They could have sold the lots that day. They had just been given the power to sell Pueblo Lands, They could have sold them for a fraction of their present worth. Just what that fraction would be we don't know because we have no satisfactory valuation of the park in its present state of improvement, But a few individuals wanted a park; they thought big and they wanted big. They put the pressure on the Trustees; they got it and today we all have it.

Now and again, I'm a Doubting Thomas or a cynic or something. Since December it usually comes on after a naval engagement --- I don't see spots before my eyes anymore, what with these occupational forces of Army-Navy, I see gold stripes. But if I happen to be sort of cynical and happen to be thinking about that horrible substance we grow plants in up there I think, perhaps, on that May morning Senior Estudillo and Mr. Schiller and Mr. Sloan sat back and had the best laugh. I wouldn't be surprised if they were rather chuckling and thinking: "Well they wanted a park and we gave 'em a whale of a big one --- and at the same time we washed our hands of fourteen hundred acres of the orneriest hardpan in these United States."

Hardpan it was and hardpan it remained for twenty years after its dedication. In the "seventies" there was an Indian rancheria not far from Date Street and Eighth Avenue. Some parties attacked the legality of the dedication in hopes that the area could be subdivided. But the state legislature and the supreme court upheld the park on the expression of intent in the original minutes.

In 1903 Mrs. Mary B. Coulston, who was then employed as executive secretary of the Park Improvement Committee, wrote this statement: "In recent years a growing realization of the unusual beauty of the site, its special and unique features for a great park, its value to the city in large and far-reaching ways, together with the conclusive action of the state legislature, have all operated to preserve the park from attack and division." And that's the last we hear of efforts to subdivide the park.

Between 1889 and 1899 people demanded park improvements. The Ladies Annex --- it seems as if that was a club and not a building or appurtenance thereto --- raised \$500.00 to plant a narrow strip along Sixth Avenue from Juniper to Palm. The Council leased thirty-six acres at Sixth and Upas to Miss Kate Sessions for a nursery. In return for this concession Miss Sessions agreed to plant so many trees each year. The fine plantings of Cypress and Pine and Eucalyptus in that area are more monuments to that genuinely great lady. About this time there was what was known as "The Howard Tract" of 100 acres of an orphans' school. A large building was erected on the site and many trees and shrubs were planted. Now part of that tract is in the grounds of the Naval Hospital and the rest has reverted to the park. Evidently the orphan business didn't materialize as it was expected to, because with out population today five acres amply takes care of the Children's Home.

The Golden Hill area of Balboa Park --- that's the land north of "A" between 21st and 26th --- was developed by the adjacent community in 1889 and 1890. For years it was the most choice section of the park and that's where we still have some of our best palms. The two men who were most active in promoting this project were Mr. Leroy A. Wright and Mr. Mat Heller.

Then came the drought --- seven years of it. There wasn't enough water for private gardens and orchards so, of course, park improvements had to be curtailed. How history repeats itself --- close quote.

Evidently about 1902 things became a little more moist. In that year Mr. Julius Wangenheim proposed to the Chamber of Commerce that some park improvements be started near what we now call "Inspiration Point." A Park Improvement Committee was appointed and Mr. Wangenheim was made chairman. Other members were U. S. Grant, Jr., William Clayton, George W. Marston, D. F. Garrettson, Capt. W. R. Maize, H. P. Wood, and Mr. W. L. Frevert.

A special park plans committee included Mr. Marston, Miss Sessions and Ernest White. This committee raised twenty thousand dollars. They then employed Mrs. Mary B. Coulston, as Executive Secretary, and brought Mr. Samuel Parsons out from New York. Mr. Parsons was landscape architect for Greater New York and at that time had control of the designs for over one hundred parks.

Mr. Parsons and members of his staff spent many months on the ground making surveys and preliminary designs. Then on September 11, 1905, he submitted his final report to Mr. Marston. This Parsons' plan for San Diego City Park, as it was called --- present name of Balboa Park wasn't adopted until November 1, 1910 --- is the basis plan of roads and paths as we find the park developed today. It did provide for a lot more lakes and ponds and water features than ever did materialize. Eventually a lot more trees have been planted than Mr. Parsons anticipated. But the alignment of West Boulevard, of Park Boulevard and of Pershing Drive, and the roads in Cabrillo Canyon and Powder House Canyon are almost identical as they were proposed and as they were completed.

Mr. Marston tells us that when they began carrying out this plan the local citizenry would watch the men working on the hardpan and then tell them, "For Heaven's sake give it back to the coyotes." If you want to know what the park looked like at the time Cabrillo _____ it, drive along Powder House Canyon Road north of Pershing. Keep your eyes off the border of the canyon and on the lower sides, forget the Pine and Eucalyptus that show up on the horizon, but concentrate on the rocky wash, of scraggly native chaparral --- and that's all there was to Balboa Park when the Trustees dedicated it and energetic citizens went to work on it. As an object lesson in what can be done, as well as a bit of native scenery, I hope that canyon is never touched.

That fairly well fills in the picture of the park prior to the time that most of you knew it.

Well, I've rather digressed, but I wanted to make the point about the _____ because the next step after the Parsons Plan was the preparation for the first Exposition. Expositions are a form of show business, and show business is certainly illusion. The 1915-1916 Exposition is responsible for the present character that is so fine and so universally acclaimed and that is practically a miracle.

San Diego was a little place of about forty thousand when it determined to have an Exposition. But it had some men who were really big. I can't name them all so I'm not going to name any of them. But they started out to get the best services in the country to build the best Exposition that the country ever had. They went back to Brookline and contracted with the Olmstead [sic] office to take care of the landscape architecture. For many years after Fredrich [sic] Law Olmstead [sic] did Central Park in New York, and particularly between 1910 and 1920 that office was tops in the landscape profession. They sort of spoke only to God. The architecture was turned over to Bertram Goodhue, one of the giants in American architecture. In the relatively few commodities [sic] that have a Goodhue structure all the citizens know about it and they tell their visitors. Here in San Diego we have a whole flock of them. Some of them have been torn down and about every so often somebody gets the urge to demolish another one. There haven't been any Rembrandts for along time and there won't be anymore Goodhues even after the war. Let's sort of realize what we have here.

Anyway, these Exposition promoters knew the best were and they put them to work for San Diego. Actually, as it turned out, the temperament of the Olmstead [sic] and the temperament of the Goodhue officer were such that they wouldn't mix. They got in an awful row about the aesthetics of Laurel Street and the Olmsteads [sic] withdrew from the picture. But the best in the country had a crack at it anyway. It ended by Mr. Goodhue, Carleton Monroe Winslow, Frank Allen and Mr. Morley finishing the job and you can still [sic] the manner in which they did it.

That's how it is that we have the essential development and the specific character of this great area. That, too, is why we have much of our population that was here four years ago --- or B. C. After the first Exposition the city realized that they had something too big and too grand to tear down. They put it to use; it became the center of much of the finest community activity and the basis of much of the most productive advertising that San Diego has ever had.

Small societies grew with the park into fine institutions, such as the Fine Arts Society, the Natural History Society, the Floral Association, and the San Diego Museum and the Zoological Society. Other activities grew from the facilities that were created for the last Exposition. Prior to the occupation by the Military, Balboa Park had something cultural, recreational and educational to offer every citizen and every visitor. Some of them are more keenly aware of the fact now than they were before.

You've shared this park with the visitors from all over the world. We've had royalty obviously thrilled with the place, and I always supposed that royalty was rather hard to thrill. We've also had the unfortunates, who were thrilled to spend the night on a park bench. We've had mental giants like Einstein --- and we've had local and imported brack-pots, too. We've had Madame Schumann-Heink, and we've had eighty aspiring little Rachmaninoffs pounding eighty pianos on the stage of the Ford Bowl. We've had Sally Rand and we've had some other strippers whose bubbles burst the next morning in police court. We've had Mrs. Roosevelt and President Roosevelt, and I haven't a doubt that we'll have Mr. Roosevelt visit us again as President of the United States.

But right now we have the military. It isn't as bad as you think. You may still visit the museums; you may still picnic; you may still play your shuffleboard and Roque, and you may still shoot your arrows and your golf.

Balboa Park was a great peacetime asset. One of the most satisfying memories I have is of the night of December 9th when over a thousand soldiers and officers came into the park after a trip from San Luis Obispo through a veritable downpour. From the general down, they had the jitters just like the rest of us. But they had found [sic] a wonderful spot for a breather, a place to get ready for whatever was ahead of them. Believe me, they appreciated the park. It was apparent the night and early morning, and again a week later when the Navy ran them out.

We've sort of skimmed over the surface from the beginning to the present. I haven't told you of the mechanics of the park --- they are not your worry. I've tried to give you, perhaps, a little fuller appreciation of the park you used to use completely and you will use even more fully again. In this thought of the future, I'd like to get in just a little evangelism before I'm through.

You know, of course, that the park is now a military establishment to a great extent. That's as it should be and it is a blessing that we have it to make available in this crisis. As a military establishment, it's a good one. As a park, it's pretty thoroughly washed up. Buildings for an art school are one thing and buildings for barracks and training schools are something else. If you don't think so, go around and count the plumbing. Now the government needs those buildings and areas. After the war San Diego will need them in a direct ratio to the increased number of San Diegans.

We talk much of planing for the peace. I can't plan our economic and social relations with our allied and our foes. But I've given some thought to the peacetime plans for Balboa Park. It's going to cost money to restore those buildings and areas for park purposes; it going to cost a whale of a lot

of money, a lot more money than the city can be expected to devote. It's going to take government help and plenty of that. We all foresee that after this war San Diego is going to need many, many things. But be sure that you see the whole picture. Remember what Balboa Park has done for our people and our visitors. It doesn't take much imagination with this experience behind us, to see what it can do in the future. In our peacetime planning, be sure that the restoration of Balboa Park and its return to our people is placed high on the city's priority list of post-war problems. I don't know of anything that can do more for our people's mental and physical recovery and readjustments.

August 1, 1943, San Diego Union, B-1:4. Balboa park pool used by 500 children daily; swimming tank open half time.

August 3, 1943, San Diego Union, A-2:2-3. Thomas M. Russell elected president of Zoological Society.

August 3, 1943, San Diego Union, A-8:2. Irish Colony slates party at San Diego Women's Clubhouse Sunday afternoon.

August 9, 1943, Minutes of the Board of Park Commissioners.

In a discussion of post-war rehabilitation of Balboa Park it was deemed desirable to retain the Palisades area as a large recreational area.

August 15, 1943, San Diego Union, A-14:1. Russell names committees for Zoological Society.

August 15, 1943, San Diego Union, A-14:4. Adams Avenue Business Men's Club proposes post-war Fair.

August 22, 1943, San Diego Union, A-3:2-5. Two Exposition Buildings used by Navy Nurses; House of Hospitality used as headquarters for Navy nurses.

Two former San Diego exposition buildings in Balboa Park have been converted into quarters for Navy nurses attached to the Naval hospital.

The quarters were opened officially with a formal open house attended by more than 400 naval officers and guests yesterday afternoon. All nurses attached to the hospital are residing in the new quarters.

Buildings which formerly housed the exposition international drug store and House of Hospitality and were visited by thousands of persons have been converted into comfortable living quarters for several hundred nurses.

Spacious reception lounges for the navy women have been decorated with carefully selected tapestries and painting. One large garden in the park and a patio have been given exclusively to the nurses for sun bathing and lounging during spare hours away from the rigors of their hospital work.

Main headquarters for the nurses' center is the former House of Hospitality. Outdoor tables, shaded by umbrellas, have been retained from the former exposition café and are used for informal games and afternoon refreshments. The main dining room has been kept in much of its original form and is used to feed all the hospital nurses.

Large rooms on two floors of both the café and drug store building have been partitioned off into living quarters for the nurses. One or two women are assigned to each space.

The fair buildings have been converted into nurses' quarters under the personal supervision of Capt. Morton D. Willcutts (MC), U. S. N., medical officer in command of the hospital, and Comdr. Mary D. Towse (NC), U. S. N., chief nurse.

Navy nurses hold rank equivalent to that of officers.

August 28, 1943, San Diego Union, A-4:1. Navy personnel build chapel at Naval Hospital.

August 29, 1943, San Diego Union, D-1:1-2. The 6th annual Balboa Park Mounted Troop Horse Show will be held on the ring at the Balboa Park Riding Academy today.

September 5, 1943, Ales Hrdlicka died of heart attack.

Schultz, Adolph H., Biographical Memoir of Ales Hrdlicka, 1869-1943, Presented to the National Academy of Sciences of the United States of America at the autumn meeting 1944, Vol. 23, 12th Memoir

September 5, 1943, San Diego Union, A-4:2-3. San Diego Zoo exhibits gnu only few weeks old.

September 5, 1943, San Diego Union, B-1, B-14. Natural History Museum staff kept busy in war atmosphere; research continues despite Navy taking over building, by Richard F. Pourade.

September 18, 1943, San Diego Union, A-3:3. Naval Hospital gives employees honor awards.

September 19, 1943, San Diego Union, B-5:2-3. City policies clarified on park buildings return.

September 19, 1943, San Diego Union, C-6:2-4. San Diego's Day Nursery plan praised as aid in winning war.

September 25, 1943, San Diego Union, A-2:8. Captain Lloyd L. Edmisten named head of Balboa Park Naval Hospital.

September 30, 1943, San Diego Union, A-9:2-3. American Humane Society of Albany, New York, to honor mongrel dog Sunday afternoon in ceremonies at 6th and Laurel, Balboa Park; dog summoned aid for two men trapped in a refrigerator last month.

October 1, 1943, San Diego Union, B-1:1. Plans for huge new post-war airport on the eastern end of Mission Bay told.

October 13, 1943, Minutes of Board of Park Commissioners.

Board adopted names of Zoo Drive, Florida Drive and Cabrillo Drive.

October 17, 1943, San Diego Union, A-5:2-3. Guanacos, recently imported from a Chicago zoo, are making friends here; San Diego Zoo acquires pair of cousins to camel.

October 18, 1943, San Diego Union, A-2:2-5. Capt. Josiah E. Green, San Diego naturalist, now Marine captain on Guadalcanal, sends rare collection of reptiles, insects to San Diego Museum of Natural History.

October 22, 1943, San Diego Union, A-2:2-5. Museum of Natural History receives pair of stuffed customers . . . Emperor penguin and Ringed penguin from Antarctica, by Richard F. Pourade; also received a cigar box from Pt. Barrow, Alaska containing swallowtail butterflies.

October 25, 1943, San Diego Union, A-2:7-7. Park "Cleaned" by elephant; Duchess made good scavenger; star elephant of Arthur Brothers Circus here now seen under canvas at Lane Field; performed the other day for convalescent sailors at the Naval Hospital.

October 31, 1943, San Diego Union, A-4:2-3. Annual event scheduled Saturday at San Diego Women's Clubhouse; House of Pacific Relations Fiesta will maintain traditions of nations.

November 1, 1943, San Diego Union, A-3:5. Natural History Museum nature walk topic to be Balboa Park plants.

November 4, 1943, San Diego Union. Project to rehabilitate historic sites planned; vision of San Diego related to Realtors by Sam W. Hamill, architect and chairman of the Chamber of Commerce Civic Committee.

November 7, 1943, San Diego Union, A-4:2-3. Rare sable antelopes exhibited at San Diego Zoo; captured as small animals and raised in the New York area.

November 7, 1943, San Diego Union, A-17:6. Balboa Park Navy concerts year old.

November 7, 1943, San Diego Union, B-1:1. W. A. Kearns, director of the department of physical education and public recreation, holds San Diego recreation program weak in spots, by Melvin Mayne.

November 11, 1943, San Diego Union, A-2:4-5. Navy opens hospital for men's dependents.

November 14, 1943, San Diego Union, A-16:4. Six thousand dollars set aside for work on Memorial Park in southeast San Diego.

November 14, 1943, San Diego Union, A-2:5-6. Balboa Park Horse Troop will celebrate 8th birthday.

November 21, 1943, San Diego Union, A-2:5-6. San Diego Zoo raises rare pigeon native to jungles of New Guinea.

November 21, 1943, San Diego Union, B-1:2-4. Architect John S. Siebert's sketch of post-war War Memorial Building.

November 28, 1943, San Diego Union, A-7:2-3. Hippo offspring to make debut today at San Diego Zoo.

December 1, 1943, Minutes of the Board of Park Commissioners.

Plan approved to construct an underpass beneath the Park Boulevard from the Naval Hospital to the Pepper Grove to form a connection with the temporary hospital in the exposition area of Balboa Park; the Navy to fill in the tunnel and remove the approaches to Pepper Grove within six months after the evacuation of the temporary hospital.

December 3, 1943, San Diego Union, B-1:1. Vote on people of War Memorial site proposed; many protest against using Lane Field Baseball Park for a War Memorial Building.

December 5, 1943, San Diego Union, B-1:8. Modern fireproof ball park included in post-war development plans; sketch by Sam W. Hamill.

December 9, 1943, San Diego Union, A-6:2-3. Charles E. Rinehart, 30-year resident, dies; president of San Diego Area Council of Boy Scouts for 11 years; instrumental in restoring Indian Village in Balboa Park for use by the Boy Scouts.

December 10, 1943, San Diego Union, B-1:4. Realignment of Highway 395 expected soon, State Senator Ed Fletcher revealed yesterday.

December 10, 1943, San Diego Union, B-1:5. Bear attack on child in pit at San Diego Zoo subject of law suit.

December 13, 1943, San Diego Union, B-10:4. Navy graduates 578 Hospital Corps students.

December 14, 1943, San Diego Union, B-1:2. War Memorial Building urged at Lane Field.

December 19, 1943, San Diego Union, B-1:2-5, B-10:3-4. Civic Center, architect's vision of two decades ago, becomes today's reality.

December 19, 1943, San Diego Union, C-2:6-8. House of Pacific Relations plans Christmas program Wednesday at the San Diego Women's Clubhouse, by George W. Ryan, Jr., president.

December 23, 1943, San Diego Union, A-2:4. Naval Hospital Yule program, gifts planned.

December 26, 1943, San Diego Union, A:1. San Diego suspends war effort momentarily to celebrate Christmas.

December 26, 1943, San Diego Union, C-9:5-7. Christmas art shown at Fine Arts Gallery on Pine Street.

December 27, 1943, San Diego Union, B-1:2. Rare ptarmigan specimen from Kiska given to San Diego Zoo.

December 31, 1943, San Diego Union, A-1:3-4. President's aid pleads, "Stay away from San Diego."

Date unknown (possibly 1943). SUMMARY OF MILITARY AND RECREATIONAL FACILITIES IN THE SAN DIEGO AREA, 1941, 1942 and 1943, National Archives, Pacific Southwest Region.

Page 5

II. WAR ACTIVITIES

A. Military Facilities

Navy: Employment and hiring schedule for civilian personnel of principal naval establishments (discussed below) is as follows:

<u>1941</u>			<u>1942</u>			<u>1943</u>		
Aug.	3,649		Jan.	5,500	May	6,600	Jan.	8,700
Nov.	4,638		Feb.	5,500	June	6,800	Mar.	9,700
Dec.	4,926		Mar.	6,000	Aug.	7,980	May	9,491
			Apr.	6,400			Aug.	10,500 (est.)
							Nov.	11,000 (est.)

Headquarters, 11th Naval District: Most of the buildings are located on the waterfront. Personnel and office space requirements are still expanding.

Naval Training Station, Rosecrans and Pacific Highway, had 361 [sic] civilians in March, 350 in May. Peak will be 351.

Naval Air Station, located on North Island, adjacent to the city of Coronado, has 5,493 civilians in March, 5,917 in May. This establishment will add 1,033 civilians during the next 6 months, reaching 6,950 in November 1943. (This is higher than the previously established peak of 5,400 for March 1944.) Houses will be constructed in Coronado to serve the additional civilian personnel.

Naval Operating Base: Located in National City, this establishment has been under constant expansion since 1939. Construction is still under way. Had 1,407 civilians in March, 1,494 in May and will add 246 to reach 1,740 by November.

Naval Supply Depot: Located on Point Loma, this facility had 1,007 civilians in March, 1,026 in May and will have 1,063 by November 1943.

Balboa Park Station: Used for training. Recently a 3,000-bed addition to San Diego Naval Hospital was completed in the Park.

Naval Radio Station: Located on Point Loma and on Chollas Heights.

Marine Corps Air Base: Located on site of Camp Kearny.

Page 6

Naval Hospital, San Diego: 6,000 beds (including Balboa Park addition). Recommendation has been made by 11th Naval District Medical Officer that a 60-80 bed addition be constructed at the Naval Hospital for civilian dependents of naval personnel.

Naval Hospital, Oceanside: Located within boundaries of Camp Joseph H. Pendleton, this hospital is scheduled for completion in August 1943. An approved hiring schedule for 89 civilian workers within six months includes 23 clerks (6 male and 17 female) and 66 maintenance workers (40 male and 26 female). "The hospital expects to hire these locally."

Captain Schwartz hopes he can recruit his maintenance staff from among construction workers now employed on the reservation. Dormitories for 120 naval personnel are being built at the hospital.

Camp Joseph H. Pendleton: Located near Oceanside on the Santa Margarita Ranch, this training camp was very recently fully activated for a full complement of 20,000 Marines.

Approval was recently given for the construction of a huge laundry on post. This will necessitate a very large civilian recruitment.

Labor requirements as of June 5 were as follows.

	June 5, 1943		Needs by November 1, 1943	
	<u>Male</u>	<u>Female</u>	<u>Male</u>	<u>Female</u>
Quartermaster	125	35	10	10*
Post Exchange	6	60	8	80
Laundry	0	0	60	240**

- 100 additional positions requested but not yet authorized.

** 100 women believed to be available locally.

Fallbrook Ammunition Depot: This facility was completed in July 1942, with over 130 igloos, and large inert storage areas. The depot lines to the east boundary of Camp Pendleton and the town limits of Fallbrook.

There are now 135 civilians (110 men and 25 women) and a labor battalion of 300 Negroes. Immediate civilian needs are for 8 laborers and 10 clerks. Additional needs to November total 57. Twenty-five of the latter (21 female and 4 male) will be need in the new ammunition building to operate belting machines.

Military personnel includes 16 navy officers, 50 petty officers, 15 enlisted men and 300 Negroes in the labor battalion.

Camp Elliott: Headquarters, First Marine Force. Located north of city limits of San Diego.

Marine Corps Base: Rosecrans Street and Pacific Highway in San Diego.

Rifle Range: Marine facility located south of Camp Callan on the east side of Pacific Highway.

G. Recreation

San Diego has long evidenced interest in a well-developed program of public recreation. The City Recreation Department and private agencies have been coordinated through a local recreation council organized several years ago. As wartime demands were placed upon San Diego the council, as the War Recreation Coordinating Council, served as the clearing house for the total recreation program and related programs affecting the welfare of the service man and the war worker in the area. As of January 29, 1943, this group was slightly reorganized as the San Diego War Recreation Council, and will devote its efforts more strictly to the recreation needs of the community.

The San Diego City budget for 1942-43 included the following items”

Playgrounds and Recreation	
Salaries and wages	\$95,912.74
Maintenance and supplies	15,440.00
Outlay	<u>950.00</u>
Total	\$112,302.74

The total budget represents an increase of \$9,587.85 over the budget for 1941-42.

The Department staff includes 75 activity leaders, some of whom are specifically concerned with the women's program.

The City of San Diego had a large and active program of recreation in the public parks. The nucleus of the program was Balboa Park, where the buildings and other facilities of the expositions became a part of the recreation system. The Navy has taken over the park for Camp Kidd, in addition to many of the playgrounds part of the time, the municipal pool part of the time, and the two large auditoriums. The Army also is using some of the municipal park facilities. Buildings formerly used for indoor recreation programs have been converted into dormitories.

Early in 1942 San Diego filed an application for Lanham funds (Docket 4-444) in the amount of \$68,000 to provide playgrounds to meet the loss of some of the public park facilities. The Vita Area Board approved this request in July 1942. On February 1, 1943, the FWA Regional Program Review Board turned down the project. All of this time the need for these facilities, like the _____ of the school grounds, has been increasing rapidly. _____ out again that it is the failure to provide such facilities for supervised recreation in an area where the normal opportunities for healthful recreation are lacking because of increased congestion, which results in a "youth problem" reaching dramatic proportions. It is hoped that the recent change in FWA policy regarding civilian recreation will reopen this project.

Beach recreation is popular during six months of the year. The Police Department provides a competent life-saving corps. The armed services have recommended that there is a need for locker facilities at the beaches. It is understood that the city and county are considering means of providing these appurtenances.

San Diego is faced with major recreation problems of meeting the needs of the service men stationed near San Diego or using the city as a leave center, and of the industrial workers whose demands for leisure-time activities go round-the-clock. Federal assistance has been sought on the service-connected need; an application is now in process for Lanham Act funds to provide funds to operate a recreation program for the civilian war worker.

The following major commercial rec. facilities are now in operation: 25 moving picture theaters; 1 ice skating rink, 6 bowling alleys, 13 billiard parlors, 10 dance halls, 7 riding academies, 4 golf

course, and Lane Field (Pacific Coast League Baseball Park). All commercial recreation facilities are being used to capacity and new installations have by no means kept pace with population growth. One new theater and two bowling alleys are the main additions, except for the very ordinary type of night club, of which about a dozen have been added. The ever-increasing number of war workers compete with the military for admission to skating rinks, theaters and bowling alleys.

The Federal Government has provided the following recreation facilities designed primarily for service men:

San Diego City

1. Spreckels Building, renovation and furnishing, \$45,000. Dedicated December 18, 1942.
2. Mission Garage Dormitory: Purchase, rehabilitation and furnishing, \$135,000. Dedicated October 11, 1942. Operated by USO—Army-Navy YMCA in connection with the adjoining Army-Navy YMCA building. This building provides approximately 20 bedrooms on the second floor. The YMCA provided the connecting building.
3. Parmalee Dohrmann Building: Lease, renovation and equipment, \$23,000. Dedicated June 20, 1943. Operation by USO-JWB.
4. Masonic Temple Building (Docket 4-534): \$137,800 - (\$60,000 for purchase). Lease or purchase, renovation and equipment of building to provide 40,000 square feet of space for recreation and for sleeping accommodations. Application now in Washington, D. C. for renewal and approval by FWA.

USO-YMCA operates one recreation center for Negro service men. It is being used beyond capacity and the need for additional facilities is urgent. In addition to the Negro personnel now in and near San Diego, new battalions are being sent to Camp Pendleton. The USO regionally has decided to establish another operation in the vicinity of the existing one, and for that purpose an abandoned Japanese Church will be used. Space will be provided for overnight lodging, and the Navy has indicated that some of the cots recently purchased will be available.

National City: On December 15, 1941, a Type D. Federal Recreation Building was completed. It is operated by the city.

Chula Vista: A Type D Federal Recreation Building completed in December 1941. Operated by the USO.

Oceanside: Since May 25, 1942, USO-YMCA, NCCS, JWB have been operating a two-story Federal Recreation Building, obtained after prolonged condemnation proceedings.

El Cajon: (Docket 4-429) - Presidential approval was given in October 1942 for the lease and renovation of a building. In April 1943 Presidential approval was given for an additional allotment to increase the size of the facility. PBA is the construction agency for the Federal Recreation Building. It is a local operation.

At the present time the community is operating a small service men's center in temporary quarters. It is planned that this center will be operated for Negro service men primarily from Camp Lockett when the Federal building is completed.

La Jolla: Type D Federal Recreation Building completed March 6, 1942. Operated USO-ARMY-NAVY YMCA.

Old Town, San Diego: USO-NCCS operating a recreation center.

Pacific Beach: USO-NCCS operating a recreation center.

Camp Lockett: _____ facilities here except for a number of _____ in the camp. It is 40 miles to El Cajon which has limited recreation facilities. Due to the presence of Negro troops at Camp Lockett, it is essential that some recreation center nearer than San Diego be available for their use. The Federal Building in El Cajon, approved in October 1942 and now under construction, would release space for the establishment of such a facility.

Overnight accommodations for service men and women continues to be an acute problem. It was estimated by the recreation committee that the number of service men on leave in San Diego is close to 50,000 on weekends and between 25,000 and 35,000 on weekdays. These figures probably are conservative, since three USO operations alone report a combined daily attendance of 25,000. Theaters, eating places, night clubs are jammed. Service men are on the streets at all hours, with the peak between 4 p.m. and midnight. By actual check 10,000 men entered the Army and Navy YMCA between 10 p.m. and 8 a.m. of a Saturday night.

Existing plans will require 1,800 WAVES by September, bringing the estimated total of service women in the area to over 3,000.

The Federal Recreation Building operated by the USO-Army-Navy YMCA clears the furniture from the social hall and sleeps approximately 300 men. This is in addition to the 400 beds in the rooms of the regular structure, and is the only facility of its kind to date. The proposed facility in the Masonic Building will be designed to permit maximum use of its space for overnight lodging. The Navy recently purchased 700 cots to be used in the recreation centers for overnight lodging. The number of beds which are needed, as estimated by the military and by men working in the general field of military recreation, runs well over 5,000.

Provision of such accommodations for 5,000 persons challenges the ingenuity of the community, but more than that, it is challenged by the physical limitations of space, equipment and supervision. The problem must be attacked from two sides at least --- the provision of more facilities and the staggering of leave periods. The only intelligent approach is for the military --- Army, Navy and Marine Corps --- to schedule leave periods or passes so that the cumulative impact upon San Diego is more evenly distributed through the week. Camps close to San Diego can ease the strain on housing and transportation by bring the men to San Diego in military vehicles and returning to camp at the end of the evening.

At the last session of the Legislature, California recognized a responsibility for soldier overnight housing and added this type of facility to the list of those activities eligible for participation in the \$2,500,000 civilian defense fund. Funds for this purpose are available to communities on a dollar-matching basis.

Recreation facilities designed primarily for civilians:

In San Diego, as in every other city or town adjacent to military establishments, there is an acute problem in finding accommodations for service men's families, whether for a few days or for a few months. The Red Cross has been performing whatever service it can with the limited funds at its disposal for this purpose.

Red Cross has located within the city a women's clubhouse which could be obtained rent free. The organization would assume responsibility and direction of the establishment, but funds must be obtained for maintenance and some personnel. This matter is receiving the concerted attention of the city and Red Cross, and it is hoped that funds may be obtained. It would be used as an emergency center where these families could be sent for a short period of time while the Red Cross works out a more permanent arrangement for them.

Recreation facilities are available for use at Federal Public Housing Authority projects. Their full use, however, is denied because of the limitations of the San Diego Recreation Department's budget. An application for Lanham funds to assist in providing critically needed recreation programs for civilian war workers is being prepared. Commercial facilities do exist in San Diego, and some few have been added since the war-created influx of population began, but for the most part they are not of a wholesome nature for young people; they are not located to lessen demands upon the strained transportation; they are not adequate to meet the needs of the people requiring leisure-time activities.

It is hoped that the recent change in FWA national policy in making available to communities Lanham funds for civilian recreation will have an early beneficial effect on the San Diego situation. The city is now in the process of preparing an application for a War Services project which will supply funds for maintenance and operation of a community-side recreation program. It will be operated in parks, playgrounds, schools and community recreation facilities in the housing projects. Operation of all these facilities would be under trained leadership for a greater number of hours than is now possible with the limited recreation staff of the San Diego Recreation Department.

On the public housing projects the following facilities are available.

Linda Vista: (4,850 family units) - Community Center building is inadequate for a project of this size. It is used primarily for church services. School playgrounds are not available since rejection of Docket 4-444. Project Service Division of Project Management has developed 25 jungle gyms throughout the development and cleared some areas adjacent to them. Plans are under way to bring out recreation leadership from the project. The City Recreation Department will conduct a short training course. This leadership would be used on the elementary and high school yards after school hours.

NEEDS: Larger community building for indoor activities, including adult clubs and groups. If San Diego is given Federal financial assistance, paid leadership for recreation activities should be provided.

April 15, 1944, Letter, M. D. Willcutts, Captain (MC), U. S. Navy, Commanding, U. S. Naval Hospital, San Diego 24, Calif., to Mr. Walter Cooper, City Manager, San Diego, California (National Archives, Pacific Southwest Region)

Dear Mr. Cooper:

I have just been informed that the Army is relinquishing the Canadian Building located in Balboa Park on Park Boulevard, adjacent to the Naval Hospital.

If and when the Army does evacuate this building and surrenders further occupancy of it, I desire to make application so that the building may be turned over to the Naval Hospital on conditions similar to those governing our other holdings in Balboa Park.

The hospital continues to expand with an ever increasing influx of war casualties, and we could use this building as a warehouse for light storage. Any consideration that you may give us will be greatly appreciated.

Yours very sincerely,

M. D. WILLCUTTS,
Captain, (MC), U. S. Navy
Commanding.

April 16, 1944, San Diego Union, B-1:5, B-16:1. Glenn Rick to oppose restriction of War Memorial Site; criticizes limiting location to city-owned property.

Balboa Park locations all are described as too remote from the city's hotels to be desirable for a convention center or auditorium. As to their desirability for a veteran's memorial, or an auditorium, the report described them as probably quite desirable.

Those along the western edge of the park, however, would interfere with highly developed landscaping. That, it was explained, is not true of the federal building or the Park Boulevard site. The latter was emphasized as desirable for use of San Diegans rather than visitors to a convention because it is near the center of the city's population.

April 21, 1944, San Diego Union, A-8:4-5. Zoo guidebook aids visitors.

April 22, 1944, San Diego Union, A-1:3-5. San Diego recreation facilities held inadequate for today's population, by Bob Nichols.

April 22, 1944, San Diego Union, A-4:2-4. Civilians build altar for naval receiving barracks at Balboa Park.

April 23, 1944, San Diego Union, B-1:1. Public building program will cost millions; city planning aid reveals survey of post-war needs, by Melvin Mayne.

April 24, 1944, San Diego Union, B-10:5-6. House of Pacific Relations honors Frank Drugan, founder at dinner.

May 14, 1944, San Diego Union, B-4:3-4. Twenty-eight strange birds reach San Diego Zoo from Solomons.

May 20, 1944, San Diego Union, A-7:1. Victor McLaglen light-horse group to show tricks tonight in Balboa Park.

May 25, 1944, San Diego Union, A-1:3-5. A-2:3. Harold Bell Wright, author, dies at La Jolla after two-week illness.

May 25, 1944, San Diego Union, A-1:3-4, A-2:3. Highway 395 indorsed for post-war program, by Richard Pourade.

May 28, 1944, San Diego Union, B-1:5. Five new play centers planned for San Diego; Lanham act funds to finance work.

June 4, 1944, San Diego Union, B-1:7, B-14:4. Public hearing set on memorial site; veterans favor Lane Field; two other locations to be discussed, by Melvin Mayne.

The Balboa Park site has been suggested as one of the alternatives because it, like the ball park, is on publicly-owned property, and because the harbor commission has taken the position that the harbor front should be reserved for commercial development. Veterans, however, say that the location is too far from the center of the city and would be inconvenient for veterans' meetings, conventions and theater crowds.

June 6, 1944, San Diego Union, A-1:1-8. ALLIES INVADE FRANCE (headline).

June 9, 1944, San Diego Union, B-3:3. Purple hearts award 16 at Naval Hospital.

June 14, 1944, Minutes of the Board of Park Commissioners.

Since the Commission is on record as opposing the erection of public buildings in Balboa Park, it was moved by Mrs. Bretz, seconded by Mr. Friedman and unanimously carried that the Board of Park Commissioners express their opposition to the location of the War Memorial Camp at 6th Avenue and Laurel Street in Balboa Park.

June 14, 1944, San Diego Union, A-7:4. City to assume \$40,000 cost of sewer through the upper part of Power House Canyon in Balboa Park.

June 14, 1944, San Diego Union, A-7:5. Recreation plans prepared by Frank Hope, Jr., architect, approved for Pacific Beach, Old Town, Memorial Playground and Balboa Park, near the swimming pool.

June 14, 1944, San Diego Union, B-3:2. "D" Day invades work as stork brings baby giraffe at zoo (NOTE: Incredible as it may seem, this was actually a headline!)

June 15, 1944, San Diego Union, B-1:3. Planning Board divided on War Memorial sites.

All members of the park commission were present to announce through their chairman, Milton Sessions, that they would oppose the Sixth Avenue and Laurel Street site on grounds that no more park land should be diverted to other than park uses.

June 16, 1944, San Diego Union, A-11:2. Naval Hospital opens cadet nurse course.

June 16, 1944, San Diego Union, B-1:1. Harbor Board opposes War Memorial site at Lane Field.

June 18, 1944, San Diego Union, A-9:1-2. William E. Angel, Balboa Park's mounted officer, has many varied duties.

June 18, 1944, San Diego Union, A-12:3. John Paul Scripps elected director of San Diego Zoo.

June 28, 1944, San Diego Union, A-8:4. Public hearing called on War Memorial site.

June 29, 1944, San Diego Union, B-1:1. City Planning Commission, by a vote of 6 to 1, favors six blocks bounded by 6th and Ninth Avenues and Cedar and Date Streets, as the site for San Diego's proposed war memorial buildings; property is now privately owned and is assessed at more than \$300,000.

George P. Kerrigan was the lone planning commission voting against the site the commission is recommending to the city council. He said he favored placing the buildings along Park Boulevard, south of the old Indian Village. Mrs. Lottie Crawford, another commission member who did not attend yesterday, wrote the commission stating she favored the Park Boulevard site..

July 2, 1944, San Diego Union, B-2:4-5. San Diego Zoo birds, beasts eat victory garden yield; two gardens located in Mission Valley under direction of Milton Leeper, chief of the landscaping department.

July 2, 1944, San Diego Union, B-2:3. More than 900 swimmers open Balboa Park pool.

July 6, 1944, San Diego Union, B-1:1. City Council postpones War Memorial Site.

July 8, 1944, San Diego Union, A-4:1. Chapel to serve all faiths at Naval Hospital.

July 8, 1944, San Diego Union, B-1:3. Navy praised for building Naval Hospital.

July 12, 1944, Minutes of the Board of Park Commissioners.

Mr. Irving E. Friedman was elected President for the ensuing year; Mr. Milton P. Sessions, retiring.

July 13, 1944, San Diego Union, A-6:5. Dr. Clinton G. Abbott, in an address before the San Diego Realty Board yesterday, stated his belief in the government's willingness to return all buildings to the city. Natural History Museum contains 960 beds or 3 times as many as Mercy Hospital. Underpass being constructed between Naval Hospital and park grounds. Delay of at least a year in returning buildings after cessation of hostilities might be expected.

July 14, 1944, San Diego Union, A-4:7. County Bakers Retail Association send 7,200 cookies to Naval Hospital.

July 16, 1944, San Diego Union, D-1:1. Balboa Park Mounted Troop set show next Sunday in the Balboa Park stables.

July 16, 1944, San Diego Union, A-5:5-6. Mynahs whistle at girls at San Diego Zoo.

July 18, 1944, San Diego Union, A-4:2-3. Rare Kagu bird added to population at San Diego Zoo.

July 20, 1944, San Diego Union, A-1:7-8, A-3:3. First Lady visits San Diego Naval Hospital.

July 20, 1944, San Diego Union, B-1:7. Recreation aid praises City's 10-year plan.

July 21, 1944, San Diego Union, A-11:6. Blind, friends attended picnic in Pepper Grove yesterday, by Forrest Warren.

July 23, 1944, San Diego Union, C-2:1-3. Franklin S. Miller, Navy man posted at the chaplain's officer at the Naval Hospital, gives Sunday recitals on park organ, by Constance Herreshoff; began his series last Sunday and is all set for another concert today..

July 25, 1944, San Diego Union, A-8:4-5. Boys, girls aid will receive big check from Balboa Park horse show, by Irene M. Clark.

August 9, 1944, Minutes of the Board of Park Commissioners.

Location and general plan of Model Yacht Basin and Fly Casting Pool approved; general plan for recreation facilities at Morley Field approved.

September, 1944, California Garden, Vol. 35, No. 2. Balboa Park in Wartime, by W. Allen Perry

The sun still shines on Balboa Park, but we value its ways in a different manner. Photosynthesis, resulting in the manufacture of sugar and starch, is of secondary importance. The prime importance of the sun in the Park these days is the restoration of muscle and nerve and the manufacture of robust health in the thousands of sick and wounded patients in the "Balboa Annex" of the great United States Naval Hospital.

The entire Exposition Area of the Park is devoted to the hospitalization of medical cases, the greater portion of which are ambulatory. All hours of the day you will find these men with their shirts off or in trunks, taking up the actinic rays as eagerly as any shrub or flower. Others are out on wheel chairs. Perhaps the happiest patients are those which are wheeled out on their beds. With their blankets off and the legs of their pajamas rolled up these men are getting some of the most important medications of all. And the colors of the flowers are temporarily of little significance compared with the deepening, glowing sun-tans of these fighting men.

And what do we have in the Moro and Alcazar Gardens at this season? We have Navy Nurses and Waves --- and who would ask for roses or Pansies? Since these gardens are adjacent to the buildings in which the girls are quartered, they afford wonderful private and secluded recreational and lounging spaces. They are gay and comfortable with tables, umbrellas, swings and those furnishings which contribute to the relaxation of these busy and immensely valuable women.

Balboa Park is accustomed to "the first," "the greatest" and "the only." Now, in the Palisades Area, we have the greatest and only school of Navy Hospital Corpsmen in the United States. All such training has been consolidated in this one school which will send forth thousands of Corpsmen to aid the sick and wounded.

Naturally, the conversion of this park area from a great cultural and recreation center to a component of a 12,000 bed hospital has necessitated many changes. However, no irreparable damage has been done, and every consideration has been given to preserving every possible permanent park improvement. For this consistent and conscientious cooperation the City of San Diego and everyone interested in the Park is indebted to Captain Morton D. Willcuts [sic] (MC), USN, Commanding Officer of the United States Naval Hospital. In every instance, Captain Willcuts [sic] has sought to provide for the vital functions of his tremendous hospital in a manner which will leave no permanent "scar tissue" on Balboa Park.

During this period when the park program is so drastically curtailed, the Department has been dealing in futures by planning many improvements. Of primary importance are those plans for the development of the Park Boulevard frontage from Upas Street to the Naval Hospital. The dilapidated Indian Village will be removed, lawns and trees will make this area comparable to the Sixth Avenue side of the Park. Ample parking spaces will be provided. The Park Service Yard will be removed from the south side of Laurel Street and an appropriate park entrance will be developed in this location. A Municipal Rose Garden is projected for the west side, a garden in which roses will glory in beds, on pergolas and on treillage [sic].

Extensive recreation developments will be added to Morley Field. A Model Yacht Basin, a fly casting pool and a proper archery range will be added and planting will be completed throughout the entire area. The Riding Academy will be moved to this general location to permit extensive park development on the site of the present stables. And, of course, the Exposition Area will be rehabilitated as a project of primary importance.

With public support and an active citizen interest, Balboa Park will be tremendously improved and developed. The future will demand much work and the expenditure of considerable money if the possibilities of this great area are to be realized. The present demands patience, active planning, and a recognition of the fact that the Park is now serving well its immediate, vital function.

Joyce Kilmer doubted the possibility of ever seeing a poem lovely as a tree. Doubtless, he would have had an equally keen reaction upon seeing men come back to life and usefulness under these trees.

September 13, 1944, Minutes of the Board of Park Commissioners

Director was requested to prepare a preliminary study of the area adjoining the Prado which would call for the elimination of the Park Administration Building, the American Legion Building, the Veterans of Foreign Wars Building, the House of Charm and the Food and Beverage Building.

September 17, 1944, San Diego Union, C-4:4. City recreation program goal of conference held yesterday in office of Mayor Harley E. Knox.

October 9, 1944, San Diego Union, A-9:3. Museum of Natural History marks 70th anniversary.

October 13, 1944, Letter, NH16/A1-1/A16-3 (Serial P-16162), from W. L. FRIEDEL, Commandant, to Budocks, via Bumed

Subj: U. S. Naval Hospital, San Diego, California, Balboa Park Annex, City of San Diego owned exposition buildings. REPAIRS TO

1. On or about 10 December 1941 the Navy took over for hospital use all City of San Diego owned exposition buildings in Balboa Park. At this time no commitments were made as to the maintenance or future restoration of these structures. About a year and a half ago Budocks allotted funds under CPFF Contract Noy-4412 for repairs to roof, structural members and foundations. This work was not the repair of damage or useage [sic] caused by Navy occupancy but rehabilitation required for stability.
2. Recently a letter was received from the San Diego Chamber of Commerce which recognized the work already done by the Navy in structural maintenance but requested that the scope of maintenance work be increased to include the repair or replacement of exterior plaster, trim and ornamental cornice. Considerable of this ornamental trim has been damaged by Navy occupancy in addition to the normal deterioration which is usually rapid for this type of trim.
3. It is not practicable to show in detail the extent of the work involved in this repair, however, in enclosure 1 is shown the buildings in Balboa Park requiring repairs. The estimated cost of this work is \$75,000, however, by the very nature of the work involved the accuracy of the estimate cannot be definitely determined.
4. The Commandant is making no recommendation with regard to this work as it is felt that a matter of Bureau policy is involved as to whether work of this nature should be accomplished during Navy occupancy or as a program for future restoration.

W. L. FRIEDEL,
Commandant.

October 26, 1944, San Diego Union, A-7:1. Naval Hospital patients donate to war chest.

October 27, 1944, San Diego Union, A-13:4. Gifts sought for servicemen in hospitals.

October 29, 1944, San Diego Union, A-:2-4, A-14:2-3. Seeds of more beautiful San Diego now sprouting; park nurseries plan Post-War beauty now, by Melvin Mayne,

October 29, 1944, San Diego Union, A-9:2-3. Zoological Society committees selected for years.

October 29, 1944, San Diego Union, C-7:6-8. House of Pacific Relations to present annual Fiesta next Saturday afternoon in the San Diego Woman's clubhouse.

October 31, 1944, San Diego Union, B-1:5-6. Irving E. Friedman resigned from Park Board yesterday; the two other members are Milton Sessions and Roland Hoyt.

November 3, 1944, San Diego Union, A-8:3-5. Natural History Museum received rare bird, mammal specimens; donated include Jewett collection, penguins, "spiders."

November 8, 1944, Minutes of the Board of Park Commissioners,

Joint meeting of the Park and Recreation Commission and Park Commission to discuss proposed charter amendment to consolidate Park and Recreation Departments.

November 8, 1944, San Diego Union, A-1:1-8. ROOSEVELT ELECTED TO FOURTH TERM.

November 12, 1944, San Diego Union, B-1:2-4. Supervisor Walter Bellon describes County's parks; leaves office in January.

November 13, 1944, San Diego Union, A-5:1-4. New recreation units opened at San Diego Naval Hospital in Balboa Park; new \$200,000 McIntire recreation building.

November 13, 1944, San Diego Union, A-10:1-4. Zoo officials report record crowds.

November 19, 1944, San Diego Union, A-11:2-3. Lesser pandas among rarest of San Diego Zoo animals.

November 22, 1944, San Diego Union, A-5:4. Opposition to use of the Balboa Stadium for displays involving the use of explosives was voiced yesterday by the Veterans' Coordinating Council after it had heard complaints that loud noises from shows there had been harmful to patients in the Naval Hospital nearby.

November 22, 1944, San Diego Union, B-1:1. City studying development of a group of civic buildings along Cedar Street.

November 23, 1944, San Diego Union, B-1:6-7. District conference on youth welfare to study city's recreational facilities Monday night in the County School Service building.

November 26, 1944, San Diego Union, A-11:4. San Diego Zoo tapir safe after seeing sights of city.

December 1, 1944, San Diego Union, A-4:3. Thirty-four decorations presented at Naval Hospital.

December 1, 1944, San Diego Union, A-10:1-4. San Diego Fine Arts Gallery now in new home on Sunset Boulevard.

December 2, 1944, San Diego Union, A-1:1-4, A-3:1-8. Probe begun in air crash fatal to San Diego City Manager Walter W. Cooper.

December 2, 1944, San Diego Union, A-1:5. President Roosevelt approves \$17,500,000 San Diego aqueduct plan.

December 2, 1944, San Diego Union, B-3:1. Yule gift center in Balboa Park moved on Army's order; on October 1 the Army loaned the mess hall to the camp and hospital committee of the San Diego Red Cross chapter as a room for packing and storing Christmas boxes for servicemen.

December 3, 1944, San Diego Union, A-20:1. Naval patients take interest in museum jobs.

December 10, 1944, San Diego Union, C-8:1-4. Opening of new Fine Arts Gallery building to be marked by ten shows, by Reginald Poland.

December 13, 1944, Minutes of the Board of Park Commissioners.

The Commission reviewed plans for the proposed development of the Prado with certain buildings replaced by landscape developments. It was suggested that the entire Botanical Building be replaced with a modern glass house.

December 14, 1944, San Diego Union, A-12:1. Play facilities urged to curb delinquency.

December 16, 1944, San Diego Union, B-4:1. Arthur Hays, 76, man who landscaped Balboa Park, succumbs; rites today.

December 17, 1944, San Diego Union, A-5:1. Marines resume study at Naval Hospital.

December 17, 1944, San Diego Union, B-1:4. Enough jobs seen for San Diego, Oscar Jensen, chairman of the post-war planning committee of the chamber of commerce, predicted yesterday.

December 24, 1944, San Diego Union, D-12:1-4. Many art treasures to be shown when Fine Arts Gallery opens next Sunday on Sunset Boulevard.

December 25, 1944, San Diego Union, A-1:1. A-2:6. San Diegans greet Christmas.

December 28, 1944, San Diego Union, B-1:1. Date Street Freeway proposed to link canyon, Pacific highways; Glenn Rick draws sketch for Planning Department.

December 31, 1944, San Diego Union, B-1. Crash fatal to City Manager Cooper tops new stories for year.

December 31, 1944, San Diego Union, A-6:1. Dr. Bard to end 32 years of San Diego service today.

December 31, 1944, San Diego Union, B-1:2-3. Cheetah, San Diego Zoo's fastest animal, like hunting.

December 31, 1944, San Diego Union, B-12:6. City group asks park in northeastern section of city, policing of underpass on El Cajon Boulevard.

December 31, 1944, San Diego Union, C-12:1-2. Outstanding exhibition will mark opening of new Fine Arts Gallery today.

1945

Summary of Events in 1945.

(Note: Dates of events are approximate only.)

Naval Hospital chapel dedicated (January 27, 1945)
U.S. Army vacated Balboa Park (February 10, 1945)
German defeated (May 9, 1945)
WAR ENDS (August 15, 1945)
Plans prepared for buildings in Camp Kidd area
of Balboa Park (September 17, 1945)
U.S. Navy returns swimming pool in Balboa Park
to city (November 2, 1945)
Veterans oppose War Memorial plan on tax grounds
(November 5, 1945)
Voters defeat Memorial District tax plan
(November 27, 1945)

January 4, 1945, San Diego Union, A-1:3, A-2:6-7. Big bond issue urged for post-war improvements.

Presentation of a \$14,000,000 bond issue for six public improvements, described as “absolutely essential,” was urged strongly upon the city council yesterday by representatives of the San Diego chamber of commerce at a luncheon in the Cuyamaca Club.

Included in the chamber’s program were these proposals:

Water system improvements, \$6,000,000; new main library, \$1,000,000; Mission Bay State Park, \$2,000,000; war memorial, \$5,000,000; administration building at Lindbergh field, \$250,000; new airport on Linda Vista mesa, \$150,000.

January 1, 1945, San Diego Union, A-4:1. Fast freeways proposed for San Diego after war; construction of Cabrillo freeway to start as soon as wartime restrictions on the use of materials and labor are removed (maps).

Glenn A. Rick, city planning director, in discussing the Date St. freeway said it will afford an excellent approach to the proposed mile-long group of governmental buildings planned for Cedar St., a block to the south. Ramps from the freeway will lead to the surface streets and to parking areas near the public buildings, the northernmost of which will be the war memorial group proposed for a six block area bounded by Sixth and Ninth Avenues and Date and Beech Streets.

January 8, 1945, San Diego Union, II, B-1:5-6. San Diegans have summer holiday; swim, crowd San Diego Zoo.

January 16, 1945, San Diego Union, A-4:2-4. First leaders of Natural History Society recall unit’s early days.

January 20, 1945, San Diego Union, A-4:1. San Diego Naval Hospital chapel to be dedicated.

Built to serve all faiths, the new San Diego Naval Hospital chapel will be opened next week with Catholic, Jewish and Protestant dedicatory services in which civilian and military religious leaders will participate.

January 27, 1945, San Diego Union, A-5:1. All faiths join in dedicating Naval Hospital chapel.

February 4, 1945, San Diego Union, A-5:2-3. Flamingoes' odd antics absorb San Diego Zoo visitors.

February 14, 1945, San Diego Union, Minutes of the Board of Park Commissioners.

The Director reported on a news story stating the City Council would hold a hearing on a Resolution of Intention to place on the April ballot a proposition to remove approximately six acres from Balboa Park as a site for a War Memorial Building; letter of protest to be sent to Mayor, City Council and City Manager.

The Director reported that on Saturday, February 10, the Army notified the San Francisco officer that they had vacated the portion of Balboa Park south of Upas Street and west of Richmond Street; a preferential permit of occupancy to be given to Boy Scouts.

February 14, 1945, San Diego Union, A-8:5. Park site use before City Council.

City councilmen will meet in a brief special session at 4:30 tomorrow afternoon to consider a Resolution of Intention to place on the April 17 city election ballot a proposal to vote six acres out of Balboa Park as a site for a veterans' memorial building.

Yesterday, at request of Homer H. Hacker, chairman of the veterans' memorial committee, the council authorized a survey of the land involved, lying between Park Blvd. and street car tracks north of the Canadian Legion Building.

Hacker told the council the site would be for a memorial building, without a convention hall and the theater originally planned by the veterans' group.

Councilmen had indicated they were opposed to placing these institutions at that location, but they were willing, and believed it proper, for the public to express itself on the location of a veterans' memorial building. The site would be administered under a state law giving veterans control over their own building. The city, it was stated, favors retaining direct control over its convention hall and community theater.

It will take a two-third vote to take the land from the park, and the proposal will go on the ballot only after the council has held a public hearing on March 20.

Monday the council will meet with 100 businessmen called by the chamber of commerce to consider placing a bond issue on the ballot for purchase of six blocks at Sixth Avenue and Date Street for a war memorial site.

The plan would include a war memorial auditorium and theater, and would tie in with a plan for an esplanade along Cedar Street.

February 16, 1945, San Diego Union, A-2:6. War Memorial plan given up.

Plans of the city council to place on the April 17 municipal election ballot a proposal to vote about six acres out of Balboa Park for use of a site for a war memorial building were abandoned yesterday when City Atty. Jean F. DuPaul announced that such a step would be illegal.

The plan had called for transfer of the land to the county. DuPaul said that the land could be transferred to a War Memorial District, but there is none at present.

The city attorney added that any such action appeared unnecessary, because the city could build a memorial without necessity for creation of a district, and lease it to some responsible veterans' organization.

Homer H. Hacker, chairman of the veterans' war memorial committee, attended the brief session at which the opinion was read, and said that his organization was not surprised, but was disappointed.

Also on file yesterday was a protest of the city park commission against use of park land for a memorial building.

Mayor Harley E. Knox assured Hacker that he believed it is the desire of the council to make some suitable site available to the veterans.

February 20, 1945, B-1:2-4. Organizations endorse mall, veterans' building (drawing).

Discussion of the proposed Cedar Street mall and veterans' memorial building yesterday at a meeting in the Gold room of the U. S. Grant hotel resulted in a strong vote of approval for the project from scores of civic organization representatives. . . .

Fear that conventions might interfere with veterans' organization drilling and fife and bugle corps practice was expressed by Homer H. Hacker, of the Veterans of Foreign Wars, who declared members of that organization "want a site in Balboa Park where we can run our own affairs."

March 4, 1945, San Diego Union, B-1:5-7. A Civic Recreation Committee yesterday okayed a plan to combine recreation, park departments.

April 11, 1945, Minutes of the Board of Park Commissioners.

Communications were read from Walter S. Lieber and Joshua L. Bailey protesting the proposed demolition of Indian Village as provided for in the plan for the improvement of the Park Boulevard frontage from Upas Street to the Prado.

April 13, 1945, San Diego Union, A:2-4. Franklin Delano Roosevelt here on five visits; his death came as a double-shock to San Diegans yesterday who felt they knew the nation's leader more intimately because of his local appearances.

April 13, 1945, San Diego Union, A:2-3. G. Aubrey Davidson recalled Roosevelt aid to City.

April 28, 1945, San Diego Union, B-1:1. Newly elected officers of the House of Pacific Relations will be installed at tonight's ninth annual installation dinner-dance at the San Diego Women's clubhouse.

May 9, 1945, San Diego Union, A-1. GERMAN DEFEAT WORST IN HISTORY; Von Keitel signs final articles; Russian people hear victory news 10 hours, 10 minutes after allies.

May 9, 1945, San Diego Union, A-1:4. San Diego cheers, prays, works, City spends quiet, sober victory day.

May 10, 1945, San Diego Union, A-6:2. Leo B. Calland to coordinate city recreation on July 1.

Reporting to Calland will be William A. Kearns, city playgrounds superintendent, who will have the same duties as in the past, with Calland counseling and guiding him.

May 13, 1945, San Diego Union, A-10:1-3. Triplets born to ibexes at San Diego Zoo.

May 27, 1945, San Diego Union. Polar bear at San Diego Zoo has softest of snaps, with his pool, plenty of naps; bathes often, enjoys life even though caged.

The three on display at the San Diego Zoo are a family group, composed of the mother, the father, and the new-grown son, a native Californian, for he was born in the zoo here.

June 2, 1945, San Diego Union, Classified, 1:4-5. Percy C. Broell notified of separation from job as assistant city park superintendent.

W. Allen Perry, park superintendent, said that his action was taken effective immediately to promote better morale in the park service. He said there frequently had been disputes between Broell and his superiors and that some excellent park workers, subordinates to Broell, had been lost to the park service because of recurring controversy.

June 7, 1945, San Diego Union, A-7:6. Governor signs Memorials bill.

A major obstacle to construction of a war memorial building in San Diego was removed when Gov. Earl Warren signed Assembly Bill 44, exempting memorial districts from provisions of the district investigation act of 1933 (?), Capt. Homer H. Hacker, a chairman of the war memorial building committee, was notified in a telegram from Assemblywoman Kathryn T. Niehouse in Sacramento.

Hacker said that under the act signatures of all property owners in San Diego would have been necessary before the committee could begin circulating petitions advocating creation of a district to finance the memorial.

The memorial committee chairman said work would be started immediately on preparation of the petitions. Plans for the proposed war memorial group have been prepared for some time and include facilities for a convention hall and meeting rooms for various veteran organizations.

Known also as the Mattoon act, the district investigation act was amended in 1933 to include memorial districts. The act was passed originally as a curb on formation of highway districts which the residents of the districts were not financially able to support.

June 14, 1945, San Diego Union, Classified, 1:1. City making new park plans.

Creation of a large rose garden in Balboa Park, north of the bowling green, is one of five projected park developments as soon as labor is available, the city planning commission was informed yesterday.

The commission was hold a public hearing on park commission plans for development of five park areas.

The rose garden, northeast of Sixth Avenue and Laurel Street entrance, can be made an outstanding attraction, Roland Hoyt, park commissioner, said. He asserted that San Diego soil and climate produces the finest roses on the Pacific coast.

Tentative plans for the Plaza call for removal of the fountain now in the center and for replacement of present trees with others that will not be a hazard to passerby. The entire surface would be tiled, and there are several alternate treatments proposed for arrangement of benches, entrances and small pavilions.

Other plans call for improvement of Balboa Park along Park Boulevard, from the Spanish Village to Upas Street; for enlargement of Morley Field park athletic area; and development of De La Cruz, an unimproved park area in East San Diego.

June 17, 1945, San Diego Union, A-8:3-5. Masons plan Flag Day fete at City Park.

San Diego County Masons will hold their 19th annual Flag Day observance today and will highlight the service with a special ceremony in which Old Glory will be restored to its pre-war mast on Inspiration Point in Balboa Park. A breakfast and parade will precede the flag raising.

June 27, 1945, Teletype; Originating: COM11 (PWO) S DGO CALIF; Release: MR V N BRANDON; Action to: BUDOCKS F-5-8 QASH D C; GR 111 8T; National Archives, Pacific Southwest Region.

June 29, 1945, Memorandum; From: Lucius W. Johnson, District Medical Officer, 11th ND; To: District Planning Officer; ND11/HH16/?; National Archives, Pacific Southwest Region.

Subj: Space for Expansion of Facilities of Naval Hospital, San Diego.

1. Between the Zoo and the Indian Village, on Park Blvd., is a considerable area of open ground with a number of buildings. This is very near to the Naval Hospital and would be valuable as a space in which tents could be set up and expansion rapidly accomplished, if necessary.
2. A part of this area is now occupied by the 204th Army Anti-Aircraft Unit, under the command of Major Willison, whose telephone number is Franklin 8911.
3. It is requested that negotiations be undertaken to determine if this land could be made available for the use of the Naval Hospital, San Diego.

LUCIUS W. JOHNSON
District Medical Office
11th ND

June 30, 1945, San Diego Union, Classified, 1:8 The municipal pool in Balboa Park at the foot of Georgia Street will be opened to the public at 9 Tuesday morning, the City Recreation Department announced yesterday.

July 4, 1945, San Diego Union, Classified, 1:5-6. City gets appraisal on Vet Buildings site.

Cost of six blocks of land needed for the proposed veterans' memorial group of buildings was set at \$864,000 in an appraisal submitted to the city council yesterday by City Manager Fred A. Rhodes.

The six blocks are those bounded by Sixth Ave, Beech St., Date St. and Ninth Ave. Most of the area has improvements which the appraisers estimated could be salvaged for \$90,000. The purchase price to be paid by the city, if the appraisers are correct, would be \$954,000, less the salvage value.

The council was advised that four other blocks below the memorial group, those bounded by Sixth Ave., Date St., Fourth Ave. and Beech St., would cost about \$805,000 net. The salvage value of improvements and the gross value were not stated.

The city's plans call for construction of a large convention auditorium, a veterans' building and a municipal theater in the veterans' group of buildings along Sixth Ave.. They would be the upper group of a row of government buildings extending along Cedar St. from the Civic Center to the top of the hill.

On the four blocks below Sixth Ave. and fronting of Cedar St. it is proposed to place a new public library, a state building and city schools administration buildings. Others will be constructed along the lower reaches of Cedar St. as the need arises.

The appraisal submitted yesterday had been made by James C. LaForte of the city auditor's office and Planning Director Glenn A. Rick.

If the plan for a memorial group and for the mall between it and Civic Center is to be carried out, it was stated at the council conference, it probably will be necessary to call for a vote on a bond issue and to seek new revenues from sources other than land taxes. It was suggested that the city may find it advisable to work out a business license tax similar to that now being evolved in San Francisco.

July 12, 1945, San Diego Union, A-12:5. City needs park to entertain Navy, says Knox.

San Diego, a naturally hospitable city, needs its Balboa Park if it is to play host to the Navy in the manner in which Navy representatives desire, Mayor Harley E. Knox told a group of military and civilian men in his office yesterday.

They had asked to meet with the mayor to hear complaints of Navy men that recreation facilities for naval personnel is lacking here

"San Diego is famed around the world as a tourist city," Leo Calland, city recreation director and recently recreation officer of the 11th Naval District, told the group. "The city knows how to entertain. Restore to it the recreation facilities the Navy has taken from it and it will entertain again."

July 19, 1945, San Diego Union, A-7:2-3. City Service Commission drops Broell investigation.

Dismissal of Percy C. Broell as assistant park director is final and the case is closed as far as the city civil service commission is concerned, the body decided yesterday, after debating whether an investigation was mandatory under the city charter.

July 23, 1945, San Diego Union, B-6:2. Donal Hord's "Cubana," an obsidian carving, installed at Fine Arts Gallery, by Etta Mae Wallace.

The late Miss Kate Sessions, botanist, counted Hord her chief Pacific Beach "experimenter," and was always taking him rare plants to see how they would grow. So, though his garden does hold many of the sturdy native California flora, it also offers those rare specimens which have given proof "they fit in."

August 5, 1945, San Diego Union, B-1:2-3. Veterans' War Memorial plans ready Thursday.

August 5, 1945, San Diego Union, B-1:1-8. Balboa Mounted Troop will stage its Eighth Annual Charity Horse Show today at Balboa Stadium.

August 7, 1945, Letter, From: G. M. Ravenscroft, Assistant Commandant (Logistics); To: ComWesSeaFron.; ND11/QA-SPECIAL (A7-Wr) Serial W-1975; National Archives, Pacific Southwest Region.

Subj: Alleviation of Overcrowded Condition Balboa Park Annex.

1. The Army authorities have advised the Commandant that certain Army facilities in Balboa Park adjacent to the Naval Hospital are soon to be declared excess. These facilities have been used by the anti-aircraft groups of the army which will be inactivated. Enclosure (2) is a plot plan of the buildings involved. These buildings are located on City property by permit of the City, and no lease is involved. The Spanish Village is a part of the San Diego Exposition. The other

buildings have been constructed by the Army and are very substantial as far as Army buildings do. Enclosure (3), a map of the City of San Diego, shows this site crosshatched in blue. The red crosshatching shows the main exposition buildings and Camp Kidd, now used by the Naval Hospital, San Diego. Enclosure (1) is a memorandum from the Medical Officer in Command, Naval Hospital, San Diego, requesting that these buildings be acquired for the use of the Naval Hospital and stating the uses to which they will be put.

2. The Commandant is aware of the directive of the Commander, Western Sea Frontier, not to increase the bed capacities of Naval hospitals on the West Coast and for this reason the matter is being referred to him for preliminary consideration prior to requesting the U. S. Army Engineers to turn over these facilities to the Navy. As noted in Enclosure (1), it is not intended to use these facilities to increase the bed capacity of the Naval Hospital. These buildings, however, will be used to house patients and personnel now in overcrowded buildings and in some cases actually housed in tents located in the streets of the exposition grounds. The Spanish Village is so designed as to afford excellent recreational facilities in addition to the other uses for which it might be put. It is intended to use some of these facilities for the rehabilitation program at the Hospital. Some of the barracks can be used for storage and Red Cross work, as well as wards for housing patients. The use of this facility will involve practically no cost to the Navy other than the necessary maintenance work involved in painting and refurbishing some of the buildings. Particular attention is invited to the fact that this facility adjoins the Hospital and for that reason fits in so nicely with the Navy's needs. It is therefore recommended that the Commandant be authorized to make the necessary arrangements with the U. S. Army Engineers for the transfer of these facilities.]
3. It has been indicated that these buildings will be available for transfer about 16 August. In order that these buildings will not remain idle, subject to pilfering and damage, it is requested that the Commandant be advised as early as practicable with regard to the Commander Western Sea Frontier's action on this recommendation. The Army usually allows the Navy a seven day priority on surplus facilities, after which they are made available to other Government agencies.

G. M. RAVENSCROFT
Assistant Commandant (Logistics)

cc: MOinC, NH, San Diego.

August 7, 1945, Minutes of the Board of Park Commissioners.

The City Manager forwarded a letter from the San Diego Public Safety Committee calling attention to the hazardous manner in which the Navy permits cars to be parked on the west side of Park Boulevard, in the vicinity of the main entrance to the Naval Hospital.

August 7, 1945, San Diego Union, 1:7-8, 2:6. Atomic bomb may speed end of Japanese war; President Truman warns Nippon of ruin.

August 7, 1945, San Diego Union, 1:1-2, 3:1. Senator Hiram W. Johnson dies after 25 years in capital.

August 7, 1945, San Diego Union, B-1;5. Mayor Knox asks parley over War Memorial.

Request for a conference with members of the veterans' memorial building committee before it attempts creation of a memorial building district was asked by Mayor Harley E. Knox yesterday in a letter to Homer H. Hacker, committee chairman.

The mayor pointed out that the highly controversial question of a war memorial site was to be ignored by the committee in petitioning the county supervisors to call an election to create the district.

The memorial district would be a new tax-levying body. It would have authority under state law, to levy three mills on each \$1 valuation, in addition to whatever might be necessary to retire district bonds, the mayor said.

Hacker was quoted as having said that he planned to circulate petitions at once to have the supervisors call a special election for creation of the district, bounds of which would coincide with those of the city.

The mayor called attention to the lack of any provision in the veterans' program for a convention building, which the mayor and the city council have regarded as an essential post-war project. He said it also took no account whatever of the city's plans for a war memorial group of buildings on a six-block site at the upper end of Cedar Street, to be connected to Civic Center by a highly landscaped mall along Cedar Street from Pacific Boulevard to Sixth Avenue, westerly boundary of the proposed memorial area.

August 8, 1945, San Diego Union, 1:8. 2:4. 4.1 MILES OF HIROSHIMA DESTROYED BY SINGLE ATOM BOMB.

August 9, 1945, San Diego Union, 9:4. Camp Fire Girls concluded program at Loligro Cabin, Balboa Park, yesterday; Bluebirds' Day today will close the season.

August 9, 1945, San Diego Union, B-1:1. City Manager Rhodes said yesterday cost of Veterans' Service Building on Courthouse Lawn will be \$10,000.

August 10, 1945, San Diego Union, A-5:3-4. Veterans circulate petition for Memorial Building vote; cost would be about \$1,000,000 which could be raised through a three-mill tax.

August 10, 1945, San Diego Union, B-1:2. Navy granted tideland use of part of state building site at Pacific Highway and Grape Street.

August 11, 1945, San Diego Union, 3:1-2. SECOND ATOMIC BOMB WIPES OUT THIRD OF NAGASAKI.

August 12, 1945, San Diego Union, 2:1-2. Indoor sports ask funds to complete campaign for \$50,000 Indoor Sports Clubhouse for disabled veterans; fund is past the \$37,000 mark, by Henry Love.

August 12, 1945, San Diego Union, 3:4. City outlines program for Victory Day.

August 12, 1945, San Diego Union, 9:3. Patients enjoy old Lily Pond swimmin' hole.

To provide a place to train non-swimmers and to give added recreation to convalescent patients, the Naval Hospital has made the lily pond two feet deeper and has resurfaced it. Several hundred men use it daily. . . .

Overlooking the "swimmin' hole" is the Balboa Park botanical garden which is open to visits by patients.

August 12, 1945, San Diego Union, 10:4-6. Camp Fire Girls aid war effort with waste paper drive; proceeds used for new kitchen at Balboa Park cabin (photo).

August 15, 1945, San Diego Union, 1:6-7, 2:1. TRUMAN ANNOUNCES WAR'S END; JAPAN ACCEPTS POTSDAM TERMS.

August 15, 1945, San Diego Union, 1:5, 3:1. City "explodes" in exuberance; inhibitions lost in mass observance.

August 15, 1945, San Diego Union, B-12:3-4. Indoor sports project fund passes \$40,000.

August 16, 1945, San Diego Union, 1:2-3, 2:2. Crowds celebrate end of war, gas rationing.

August 16, 1945, San Diego Union, 1:3. Funds available for city works.

San Diego has \$5,412,000 immediately available in the city treasury for expenditure on public works and an additional \$11,000,000 will be on hand before spring, it was reported yesterday as the first peacetime cancellation of wartime contracts brought to the fore the community's potential unemployment problem.

August 17, 1945, San Diego Union, B-1:2-3. Information Center to be moved Monday.

August 18, 1945, San Diego Union, 4:1. Indoor Sports Clubhouse fund in sight of goal.

August 19, 1945, San Diego Union, 4:1-4. Indoor Sports for returning disabled war veterans and other handicapped persons announce close of Clubhouse campaign; \$47,613 already in fund with more still arriving, by Henry Love.

August 19, 1945, San Diego Union, A-12:1. San Diego Zoo features Russian bears during Peace Week.

August 19, 1945, San Diego Union, C-5:1-4. New techniques taught to Naval Hospital cadet nurses

All of the cadets at the San Diego Naval Hospital and other medical centers are girls who have completed 30 months of civilian training and need six months more schooling to finish their school work.

At the completion of their tour of duty at the Naval hospital they are returned to their home hospitals for graduation and then have the opportunity to enter the Navy, Army or Public Health, Veteran or Indian service, or to become civilian nurses.

Since the cadet program has been started at the San Diego Naval Hospital more than 100 girls have been trained there. Fifty more are students there now.

August 19, 1945, San Diego Union, C-8:4-5. Fine Arts Gallery, 2030 Sunset Boulevard, offers interesting displays today, by Reginald Poland, Director.

August 20, 1945, San Diego Union, 1:7-8. Japanese envoys get orders in Manila; surrender talks last for hours.

August 22, 1945, San Diego Union, B-1:1-2. Deputy City Attorney Ed Law advises City funds cannot be used to finance construction of a Veterans' Information Bureau, which had been planned as a joint venture of the city, county and various nationally recognized agencies for the benefit of service men and women returning to civilian life.

Immediately, the Council sought ways to be of assistance in construction of the building to be placed on the county courthouse lawn.

August 23, 1945, San Diego Union, 8:2. Choice of Veteran Memorial Site causes tiff.

Controversy surrounding the proposed veterans' memorial building came into the open at a meeting of the realty board yesterday noon in the U. S. Grant hotel, when city officials and a representative of a group headed by Capt. Homer Hacker presented opposing views.

Glenn Rick, city planning director, and Councilmen Ernest J. Bond and Walter Austin backed plans for inclusion of the building in the Cedar Street mall project, which Rick said is second only to Mission Bay park in importance on the municipal post-war construction program.

Carl Zahn, commander of American Legion Post 6, declared the Hacker group was now not concerned over choice of a site.. That could be postponed until a veterans' memorial district has been established at an election for which petitions are currently being circulated, he said. Hacker has previously contended that the only site acceptable to the veterans is Balboa Park and has led a fight against placement on the mall.

Zahn contended the best method of paying for the building --- which both sides agree will cost \$3,000,000 --- would be through a three mil tax for \$1,000,000 and grants of \$1,000,000 apiece by the state and federal governments. He did not just what state and federal funds could be tapped. He held that ownership and control should go exclusively to veterans' organizations.

Boud, reminding the Realtors that he is himself a veteran of World War I, said the city council heartily favors construction of a memorial building and is willing to turn over control by perpetual lease to veterans' groups, but feels that if the building is to be paid for by taxation it should be publicly owned. Its use should not be limited to veterans and the city should always have the right to place it at the disposal of any large convention, Boud maintained.

The 3-mill tax, which Boud styled "30 cents a hundred," would be more painful to taxpayers than a bond issue, he declared. Under the tax plan all the money would have to be raised within five years, he pointed out, while bonds could be paid off over a long period. He expressed confidence that state and federal funds would be as available to the city as the Hacker group.

Rick disclosed that the planning commission has rejected 10 possible sites before settling on the mall location. He cautioned against creating "another taxing agency," referring to the proposed veterans memorial district and its five-man board of directors. The commission wants no further "scattering of public buildings all over the city," said Rick.

Austin, who is a member of the reality board, presided as program chairman and introduced the speakers.

August 26, 1945, San Diego Union, 12:2. Red Cross Club to hold picnic in Balboa Park.

The seventh annual Red Cross First Aid Club picnic will be held in Balboa Park at Sixth Avenue and Quince Street next Sunday. The picnic and afternoon program of entertainment will be open to the public. Those attending are to take a basket lunch.

September 2, 1945, San Diego Union, A-6:1-4. Navy completes new warehouse on Harbor Drive.

September 2, 1945, San Diego Union, B-1:1, B-12:1. Navy may return part of Balboa Park to City; Civil Agencies Work to Smooth Restoration; Hospital structures still inadequate for U. S. needs.

Return to civilian use before the end of the year of one or more Balboa Park buildings, used by the navy as annexes to the huge Naval Hospital here since the outset of the war, was considered a definite possibility yesterday.

Civilian agencies --- both governmental and private -- are working toward that end and the navy reportedly has urged the city to appoint a committee to survey all navy-occupied property within the park with the aim of recommending what will be necessary to restore the gardens and buildings to their pre-war state.

At the same time, the navy, lacking facilities within its present permanent Naval Hospital structures to care for the tremendous increase in casualty and veteran patients resulting from the war, is said to be seeking additional park lands from the city for expansion of its permanent buildings.

Navy officials have declined to make public whatever developments have taken place since the war ended and the public has been left to sift rumors.

City park officials are known to have requested Rep. Ed V Izac, member of the house naval affairs committee, to get from the navy department in Washington some clear indication of when it intends to relinquish occupancy of the numerous exposition buildings, the three public museums and other facilities in the park, barred to the public almost from the start of the war.

Two weeks ago, it was learned yesterday, a number of chamber of commerce, city administration and civic and business leaders met with officers of the 11th Naval District and the Naval Hospital in an effort to learn from them the navy's intentions regarding release of park property.

At that meeting a representative of the district public works department recommended that the city manager appoint a committee to study the entire area of the park taken over by the navy since the war.

It is believed that this would provide the navy with some basis on which to proceed once it is decided to return the property to the city.

Fred A. Rhodes, city manager, said yesterday he has not yet named the committee but said it would be composed of outstanding citizens, including at least one member of the city park commission and the city parks' director.

The city manager said the committee probably will tour the navy-occupied part of the park with naval officers, and that the navy undoubtedly would be asked to leave intact many of the wartime improvements it made on the city's property, while other construction would have to be removed.

One source estimated the navy has spent millions of dollars on improvements in the park.

Many of the exposition buildings, as well as museums, have been drastically remodeled into hospital wards, rooms, barracks, mess halls, quarters and training facilities.

When the navy took over the property it had a gentlemen's agreement with the city to restore all buildings and grounds to their original condition, but whether this would be done by the navy's bureau of public works, or by the city with navy funds, is not known.

Apparently the city has no written agreement with the navy for restoration of the property, and some observers anticipated yesterday that an act of congress would be necessary before funds for the refurbishing and remodeling could be provided.

It is understood that the navy will relinquish the buildings within six months after the war emergency is officially declared at an end.

Out of the civic-navy meeting, Aug. 20, came these conflicting reports:

One prominent conferee said navy officials, in answer to a direct question as to how soon the buildings would be turned back to the city, said the group was told the navy expects to vacate park

buildings, other than the Fine Arts Gallery, the Museum of Man and the Natural History Museum within six months after the end of the war.

A navy spokesman reportedly added that the city "might hope to have possession by January 1, 1946."

An even more optimistic report was prevalent concerning the once-beautiful House of Hospitality, after 1936 the setting for receptions honoring distinguished out-of-city guest (President Roosevelt once was entertained there), weddings and quasi-public meetings of a number of San Diego clubs.

Taken over by the navy, must four days after Pearl Harbor --- the navy urgently needed quarters for nurses poured into this port to help care for streams of casualties being returned to the states after the nearly-disastrous Japanese attack --- the House of Hospitality has housed hundreds of Naval Hospital nurses.

Yesterday, however, William M. Brooks, owner of the four-story, 100-room Embassy Hotel at 3645 Park Blvd., reported the navy will take occupancy of the building Tuesday for an indefinite time. The 250 nurses now living in the House of Hospitality will be moved into the hotel immediately after the navy gets permission, Brooks said.

The Embassy was occupied by Spars, from Nov. 8, 1943 to April 5, 1945, with Brooks as manager, but under the new lease he will relinquish all rights except ownership. Details of the lease have not yet been negotiated.

A representative of the House of Hospitality said yesterday the group of leading San Diego women volunteers who operated it before the war had been told the city might regain use of the building before the end of the year, and that activities of the House possibly can be resumed by next April. The organization's board of directors will conduct its first meeting after long adjournment before Sept. 15.

Another often-heard report concerning the park is that the navy is seeking permanent use of all the area south of Laurel St.

One city official who attended the meeting said the navy men did not indicate any specific date for vacating park buildings, other than to suggest the probably order in which navy-occupied facilities in this area would be returned to civilian control.

This was reported as, first, the Naval Hospital annex at Rancho Santa Fe (not, however, a part of Balboa Park); and second, that area of the park known as Camp Kidd. Located in the area southwest of the Spreckels outdoor organ, Camp Kidd was used primarily in the early war days for training of the recruit overflow from the Naval Training Center, and in later years for training of hospital corpsmen.

Navy officials reportedly told the group that undoubtedly the last of the park buildings to be returned would be the New Mexico Building, now a beautifully-furnished club for officers of the 11th Naval District and the old Canadian Legion Building, now an officers' club for commissioned Naval Hospital personnel.

The city recreation department is anxious to repossess the Legion building as a site for Friday and Saturday-night teen-age dances.

In addition to park buildings it took over from the city, the navy was compelled to construct a number of frame barracks and other facilities of a temporary nature as the hospital's work expanded, and it is believed that it must continue to use many of them until the permanent facilities of the Naval Hospital itself are enlarged.

Izac said any decision on relinquishing the park buildings by the navy must wait on a complete analysis by the navy of its post-war hospital needs in this area. He added that until a veterans' hospital is built here the Naval Hospital must continue to serve not only wounded and ill military personnel but discharged war veterans as well.

To perform this dual function, Izac said, the hospital's permanent facilities must be augmented by new construction, thus accounting for the navy's request to the city for an undisclosed amount of additional land. Where or how much city property is wanted by the navy has not been revealed.

Rhodes, at the Aug. 20 meeting, suggested that the navy prolong use of city-owned buildings in the park until a four-story addition to the Naval Hospital can be built, rather than ask the city to give up more park lands for a separate permanent hospital annex. The city manager also suggested that the navy "raze a lot of the temporary buildings" it has built in the park.

Izak has said that any navy request for additional land here must come before the house naval affairs committee and would have to have that committee's approval.

The congressman said that as soon as he returns to Washington, he plans to confer with the navy department on its plans for Balboa Park.

September 2, 1945, San Diego Union, B-1:2-3, B-12:2. San Diego's big park unfamiliar to many; much of 1400-acre tract, fair buildings, museums barred to public during war.

San Diego's 1400-acre Balboa Park is pretty much a mystery to thousands of the city's new residents who have made their homes here since the war. Their knowledge of the park is limited to visits to the zoo, covering about 200 acres; to Balboa Stadium for sports events or other programs, and in some cases to the Ford Building, in which city schools have operated a vocational school throughout the war.

Only the pre-war residents can recall the summer open-air concerts in the Ford Bowl, leisurely walks through to botanical garden, the organ recitals by noted musicians on the Spreckels outdoor organ, afternoons at the San Diego Fine Arts Gallery, hours spent studying the relics of older civilizations housed in the Museum of Archaeology and Anthropology --- better known as the Museum of Man --- or days of study and relaxation in the Natural History Museum.

Others may look back with nostalgia to formal public receptions in the Sala de Oro, the weddings in the loggia or luncheons in the Café del Rey Moro of the city's House of Hospitality.

And too there are members of the 15 (now grown to 20) cottages of the House of Pacific Relations, each of which had a small meeting place of its own, reflecting the characteristics of the group's national origin. These, too, have been dispossessed by war.

One of the largest parks in the nation, Balboa Park also offered a rich variety of recreation --- golf, horseback riding, shuffleboard, archery, tennis, swimming --- some of which have been continued during the war. But for the most part the institutional activities were stopped soon after the Japs struck at Pearl Harbor.

The navy asked and the city relinquished the exposition buildings, the House of Hospitality and the Pacific Relations cottages. The occupants were given as little as a day's notice to move, so grave was the navy's need for expanded facilities in connection with both the Naval Training Center and the Naval Hospital.

The House of Pacific Relations cottages were taken over for living quarters for naval officers. One-room and kitchenette apartments, they were built facing on a green. Each cottage was charged a \$10 annual rental and was open to visitors on Sunday afternoons. Architecture here, as elsewhere in the park, was Spanish.

The Ford Bowl, built for the 1935-36 exposition and scene of the "Summer Symphonies Under the Stars" and the Spreckels outdoor organ were taken over by the navy for educational and recreational use.

The House of Hospitality was started during the 1935-36 exposition by a group of San Diego women, headed by Mrs. John M. Ward, and it continued after the festival as an integral part of community life, as a greeting place for visiting dignitaries and a place for dances, club meeting and similar functions. It had an auditorium seating 500 persons and seven other smaller ones.

The navy took it over, Dec. 12, 1941, for barracks for navy nurses, 200 to 300 of whom were rushed here immediately after the war began, and it has been used for this purpose since. The House of Hospitality became inactive and its furnishings were placed in storage.

The Fine Arts Gallery and the Museums of Natural History and Man continued to operate until March, 1943, when the navy took over these buildings for hospital patient overflow.

Lacking storage facilities here, the Fine Arts Gallery was forced to ship many exhibits to eastern museums. Its building, donated to the city by Mr. and Mrs. A. S. Bridges and built in the 1920s as a unique fireproof, earthquake-proof structure, was partitioned and remodeled into hospital rooms and wards. Windows were cut in walls and other structural changes were made to make it suitable for a hospital.

The Fine Arts Gallery now is temporarily housed at 2030 Sunset Blvd. For a time the navy obtained for the city rental of a private residence on Pine St.

The Museum of Man, too, was taken over for hospital patients, although the navy has since done extensive remodeling, including the flooring over of the rotunda balcony beneath the distinctive California tower, a San Diego landmark. The rotunda now has two full stories. The museum exhibits are stored in the basement.

The Natural History Museum was allowed to store some of its exhibits in the building and was given office space in the basement. Many of its staff, such as taxidermists and exhibit preparators, have scattered to other cities and are in the service. Curators and research workers have continued during the war. The building has been used by the navy to house hospital patients and for training of nurses and corpsmen.

About 30 acres of the park, south of the organ pavilion, soon after the war became Camp Kidd, and the four large exposition buildings in the vicinity of the Ward building were augmented by many frame structures, 32 of them former army barracks. Here the navy has trained more than 26,000 corpsmen since Pearl Harbor. It was the biggest school of its kind in the United States and in June was graduating an average of 135 corpsmen a week.

The old exposition café, across the plaza from the House of Hospitality, was taken over and enlarged tenfold into a mess hall in which thousands of meals were prepared and served each day.

At one time the Natural History Museum building was filled to capacity with scarlet fever cases.

September 5, 1945, San Diego Union, A-2:7. Question of War Memorial Building/Civic Theater referred to subcommittee; discussion held at request of Mayor Knox; committee opposed to proposed mall as site; mayor has a location in mind.

September 6, 1945, San Diego Union, A-1:3-4. Property owners protest; Planning Commission scraps plans for architectural control of proposed city mall at meeting in council chambers yesterday afternoon.

September 12, 1945, Minutes of the Board of Park Commissioners.

The Director reported the program proposed by Mr. Leo Calland, assistant to the city manager, for recreation, for the use of those buildings in the Palisades area of Balboa Park for the future recreation program. The program would place general events in the former Palace of Entertainment, music in the former California State Building, badminton, basketball and physical education in the former Municipal Gymnasium and Federal Building.

Mr. Sessions and Mr. Bard reported on the inspection made by the Mayor's committee on the proposal to develop an extensive parking lot for the Naval Hospital on the area of Balboa Park west of Park Boulevard and south of Pepper Grove. Both expressed their opinion that there was ample room for this development within the Hospital's own area.

September 12, 1945, San Diego Union, A-8:1. Navy grateful for park buildings, by Bryant Evans.

The navy said "thanks" to the people of San Diego for the use of exposition and museum buildings in Balboa Park as an annex to the Naval Hospital here, then added it would return the buildings to the city as soon as it could.

Capt. Jesse W. Allen (MC), U. S. N., in command of the hospital, told a press conference in the park that he could not yet set a date for turning the buildings back because it had not been estimated how long the buildings would be needed. He pointed out that in January the Balboa Park area had cared for a patient load of 5000 men and that 3400 are there now.

Officers took reporters on a tour of the buildings, thus acknowledging publicly the use to which the handsome Spanish-type buildings --- once the Mecca for world sightseers --- were being put by the navy medical corps.

A suggestion that the navy might want to retain the exposition site as a permanent establishment was quickly disclaimed by officers.

"The buildings are in no way suited for permanent hospital use," Capt. John Ruddock (MC), U. S. N., chief of medicine, declared. We do not want huge halls for wards, or buildings scattered as they are here. We are grateful to the people of San Diego for letting us have it when we needed it, but we shall also be glad when permanent facilities can take care of the need."

Capt. Julius L. Waterman (MC), U. S. N. R. officer in charge of park hospital units, declared that the administration problem is tremendous. Because many of the temporary buildings are inflammable, constant vigilance is required and 183 men have been detailed to constant patrolling of the buildings.

Work being done falls in three classes --- treatment, rehabilitation of patients, and training of navy medical corpsmen.

Largest hospital wards are located in the California Tower building, with 750 beds; the Fine Arts building, with 423 beds; and the Museum of Natural History, with 837 beds. Most of the large halls are densely crowded with double-deck bunks. Corner cubicles were built of plywood to provide office space. One of the most striking adaptations was made in the California Tower building where a second deck was added under the rotunda.

Life-sized statues of dinosaurs left in the Museum of Natural History because they were too large to move, have been completely incased, and the top of the casing serves as a "bridge" from which nurses and corpsmen oversee the ward.

The nearby pond, remembered as a picture of tranquil lilies before the war, yesterday was a scene of joyous activity as convalescent sailors rippled in its water. The pond was transformed by raising its sides. It can be restored to its former use by removing the concrete collar around its top.

The Ford Building has become a vocational school. Within its circular hall students work on automobile and airplane engines. In smaller rooms they study such subjects as mathematics and typing. This is part of the program of rehabilitation.

The House of Hospitality is the center of navy nurse activities. It is used as a mess hall, lounge, headquarters and dormitory. Two hundred of the 500 nurses which have been quartered in double-deck bunks placed in tiny cubicles have been moved to the Embassy Hotel, recently taken over by the navy.

Other exhibition buildings and the uses to which they have been put by the navy include Ford Bowl, theater; Electric and Allied Industries Building, barracks; Federal Building, barracks for 1200 corpsmen; outdoor organ, patients' theater; California State Building, cooks and messmen's quarters; Hollywood Hall of Fame, bachelor officer quarters; Palace of Education, C. P. O. quarters; House of Pacific Relations, officer quarters; park board officers, wards; Globe Theater, theater; San Diego Museum, wards and ships service; House of Charm, nurses' quarters; Science, Photography and Telephone Buildings, nurses' quarters, ward and post office; Café of the World, mess hall and galley; Botanical Building, lath house; Canadian Legion Building, officers' mess.

The Better Housing Building, now used as an administration unit, is being fitted to serve as a center for discharging men from the service. The exposition's "nudist colony" space is used by the Red Cross as a recreation and handicraft center.

September 12, 1945, San Diego Union, A-8:4. Navy park use to be examined.

Appointment of the Balboa Park restoration committee, charged with determining what needs to be done to park buildings to be returned to the city by the navy was announced yesterday by City Manager Fred A. Rhodes.

Its members will be G. Aubrey Davidson, T. C. Macauley, Frank R. Young and Donald B. Smith, the three members of the park commission, Dr. Howard B. Bard, Roland S. Hoyt and Milton P. Sessions; Leo Calland, assistant to the city manager, in charge of recreation; Glenn A. Rick, city planning director, and W. Allen Perry, park director.

The first seven members will make the committee's decisions. The others will be ex-officio members who will offer advice, but Rhodes said, will have no vote.

The city manager, in a letter to the council announcing the appointments, said that recent consultation with Capt. A. K. Fogg, public works director, 11th Naval District, had brought out the statement that such a committee working with the navy would be of definite benefit to both the city and the navy.

Rhodes reminded the council that the navy has occupied the buildings in the park under a verbal understanding that all of them would be restored to the city in good condition at the termination of naval occupancy.

"The time has come," he wrote, "when a survey should be made of each of the buildings and grounds to determine what should be done toward restoration."

September 12, 1945, A-8:4. Navy asked to pay.

"Why doesn't the navy pay the cost of that job?" Mayor Harley E. Knox demanded yesterday when a bid for reroofing the Mission Beach bathhouse was being considered.

The plunge has been used by the navy for more than two years without rent. City Manager Fred A. Rhodes said that the navy has refused to rebuild the diving tower. He was instructed to consult naval officials regarding roof repairs.

The manager has recommended accepting the \$6339 bid of the Benton Roof and Paint Co. Acceptance of the bid was delayed one week.

September 12, 1945, San Diego Union, A-8:6. Officials view new parking site at Naval Hospital.

City councilmen and members of the city park commission yesterday inspected an area in Balboa Park where the navy desires to install a parking lot for the convenience of the 20,000 out-patients of the naval hospital. They also visited Balboa Stadium to consider whether to permit midget auto racing there.

The group convinced naval officers that the proposed parking lot, near Pepper Grove, could be rearranged so that fewer trees would be destroyed than under the original navy plan.

Councilman Charles B. Wincote and Ernest J. Boud favored midget auto racing, while Councilman Gerald Crary was opposed. Naval Hospital authorities said patients would not be disturbed by the noise.

The council will consider the racing question next Tuesday. City Manager Fred A Rhodes said the races would provide \$6000 (?) revenue for the season.

September 14, 1945, San Diego Union, B-1:1. Veteran Memorial squabble slows building plans; it is included for Cedar Street mall, but group seeking a special election for creation of a veterans' district with power to tax for the building refuses to divulge what site they have in mind.

San Diego's public buildings program is stymied by the controversy raging around location of the proposed veterans' memorial structures, Councilman Ernest J. Boud said at a luncheon yesterday at the Republican Women's Federation in U. S. Grant Hotel.

"The council can take no further action toward carrying out that phase of its post-war program until choice of a site for the memorial can be settled," Boud said. "it is now included in plans for the Cedar St. mall, but the groups now seeking a special election of creation of a veterans' district with power to tax for the buildings refuse to divulge just what site they have in mind.

"Meanwhile, \$1,000,000 is available for the new library, \$500,000 is held in readiness by the Board of Education for the schools administration building, and a \$500,000 starter appropriation awaits use in erection of the State building."

Direct opposition to the mall plan was traced by Boud to "misinformation" spread among owners of property that might be condemned for city acquisition. Estimates on property values now in the council's hands, based on appraisals amounting to twice the assessed valuations of the lands and four times such valuations for buildings, have in no way been approved by the council, Boyd declared.

"The council intends to hire a recognized public appraisal agency to ascertain actual market values of all the property," Boud said. But many property owners have been told that our tentative figures are final and that the appraisals won't be changed. They think we want to take the property without proper compensation. That is fantastic.

"While other cities, among them Milwaukee, Denver, San Francisco and Los Angeles, complete long-range plans like that upon which the mall proposal is based, we are faced with disputes threatening to bring the whole thing to a standstill.

“When we sought architectural control over the area involved, every attempt to explain its meaning and purpose was booed by a crowd that attended the planning board’s hearing. Ignorance became a barrier to progressive development. Few of those in the crowd knew that most of the city is already under architectural control.”

September 14, 1945, San Diego Union, B-1:2. Buses at San Diego Zoo back in service as gas rationing relaxed.

With the relaxation of gas rationing, the familiar zoo buses made their appearance yesterday at the Balboa Park institution amid exclamations of joy from foot-weary patrons.

Belle Benchley, executive secretary of the San Diego Zoological Society, announced that hereafter two buses will be on the job on Sundays, and one bus on weekdays except Mondays.

The Sunday schedule will start at 9:30 a.m., with a bus leaving for its 3-mile tour of the 206-acre zoo each half hour, with the last one leaving at 4:30 in the afternoon.

The daily schedule, except Monday, calls for the first bus to leave at 9:30 a.m. and each hour thereafter, with the final tour starting at 3:30.

The zoo’s buses were the victims of gas rationing soon after Pearl Harbor, and have been laid up in the garage for three and a half years.

The hour’s ride, conducted with a running lecture by Ken Howard, takes the patrons in every canyon, and on every mesa in the zoo, with a bus-view of the garden’s 2500 birds and animals.

September 15, 1945, San Diego Union, B-1:6. Canadian Legion asks that it be permitted to resume tenancy of old Yorick Theater building at Park Boulevard and Laurel Street.

September 16, 1945 (?), San Diego Union, A-4:2-3. Glenn A. Rick, planning director, defends Board’s position on mall.

September 17, 1945, San Diego Union, A-6:1. City officials plan uses for park buildings.

City recreation officials, anticipating eventual return to public use of Balboa Park Exposition buildings now occupied by the navy for hospital use and training, are at work on plans for a diversified cultural, social and recreational mecca in the park to which an estimated 250,000 persons would be drawn each year

This was disclosed yesterday by Leo B. Calland, city recreation director, who reported that present plans are centered around five buildings in the Camp Kidd area of the park.

Since these buildings now are used by the navy as quarters for and training of hospital corpsmen it is believed they will be the first to revert to the city when naval activity is curtailed. A number of other buildings will be needed indefinitely for care of medical cases which the nearby Naval Hospital cannot accommodate.

City Manager Fred A. Rhodes said yesterday that he hopes most of the buildings in the park can be converted to public use when relinquished by the navy, rather than be returned to the private and semi-private groups, clubs and organizations which occupied them before the war.

“I don’t see any reason why a lot of special groups should be permitted to take over the buildings for use of their own members. The park should be for all the people of San Diego,” Rhodes said.

It is along this line that Calland is planning. The five buildings under consideration are centered in the area of the Ford Bowl and the Ford exposition building. Before the war the former was

popularly used for summer open-air concerts. The latter, throughout the war, has been used by the city schools as a vocational training school. Aside from these Calland's department plans to convert

1. The Palace of Education Building, now the 11th Naval District Officers' Club to an Events building.
2. The State Building to a Music building for use of non-professional music groups.
3. The Electricity and Varied Industries Building, before the war a municipal gymnasium, to its pre-war athletic use.
4. The Hollywood Hall of Fame Building to a drama, arts and crafts center.
5. The Federal Building to a city badminton headquarters.

Calland said the proposed Events building would be ideal for teenage Friday and Saturday night dances, and could be made available to State college and high schools for dances, parties and other functions for which good facilities are not now available. It also could be used by civic clubs and other groups for banquets for as many as 300 persons.

Perhaps the most ambitious undertaking is that planned for the arts and crafts center, where all types of handicraft would be taught, including a drama workshop with its scene painting, costuming and related activities. A nearby stage, Calland said, could be modified for theatrical productions. Other activities planned for the center include ceramics, weaving, dressmaking, sewing, leather work and scores of hobbies appealing to both youngsters and adults.

"Almost everyone in San Diego should find some interest in the Balboa Recreation Center, either in athletics, social activities or cultural interests," Calland declared.

Restoration of park buildings in general will be the topic for a joint conference of city park commissioners and city councilmen soon, when policy for use of park buildings and their restoration by the navy will be established, it was reported yesterday.

A committee already has been appointed to survey the city-owned parks property and, in turn, recommend necessary renovation to the navy. The navy occupies the property under verbal agreements with the city providing for restoration of the property to its pre-war condition.

September 19, 1945, San Diego Union, A-1:1. Vote on mall proposal set for November 26.

September 23, 1945, San Diego Union, A-15:1-3. Battle of park recalls start of war in San Diego, by Henry Love.

The Battle of Balboa Park, an engagement of World War II that never will get into the official records, was one of the interesting if little known skirmishes during the military occupation of San Diego, the week of December 7-14, 1941.

It has its inception when a thousand soldiers, hastily scraped up from the bottom of an unready-for-war manpower barrel, came into town a few days after Pearl Harbor, and found the city all wet.

Brig. Gen. R. E. Mittelstadt, who previously has been state adjutant general of California, was in command, and, as a former military leader of national guardsmen, he knew all about San Diego.

"To the park, men," he ordered, and the outfit bore down on the buildings left from the city's two expositions.

“Sorry, fellows, but you know how it is,” he told a bunch of American Legionnaires he found in the park’s War Memorial building.

“Say no more general,” they told Mittelstadt, and filed out, turning over the big hall and its messing facilities. The general housed his troops in various of the park buildings, taking over a city recreation building among other structures.

“Yes, we’re here,” he told the writer, who called to find out about this sudden park occupation.

But military censorship, then clamping down its iron hand, precluded an publication.

Thus, the army won hands down in the opening phase. But the skirmish had other phases.

The navy, it appears, long had planned to expand in Balboa Park when war in the Pacific would make it tragically necessary to expand local hospital facilities.

News of the army’s arrival and occupation of buildings already earmarked by the navy for its use caused hard-bitten seadogs to swear softly in their beards. Not publicly, of course. They couldn’t make a scene about it. Especially since the army promptly turned its public relations chores over to the navy.

The army was loathe to send its men out in the open for that was a wet December in 1941. The skies dripped as if loaded with the tears of a nation whose seapower had been crippled with a sneak blow at a Pacific bastion.

But finally the navy won out. The army moved out of the park buildings, but not before a start had been made at putting up some of the temporary shacks that blossomed all over the city and county within a few months.

The navy expanded its great hospital until it is now the largest of its kind in the world. It went the army one or two better. Instead of moving into just the buildings the army had seized, the navy came along and took everything else as well.

The army occupation of San Diego progressed from 1000 men in the park to 30,000 scattered in the city and county, their primary aim to smash any commando landings designed to break the production of the Consolidated Vultee Aircraft Corp’s. great plane plant. Landing fields were ripped out of the brush back from the city, while anti-aircraft guns and searchlights were rushed in to implement the defense forces.

Wealthy residents of Mission Hills, steeped in the doctrine of the rights of the individual, found their backyards filled with soldiers and guns. Every commanding eminence was a sentry post or an artillery bastion.

Skilled bomber commanders came here and estimated probable bomb runs that an enemy would make. These runs were carefully studded with artillery. One such run, along Harbor Drive in the Logan Heights section, looked like a junkyard, the piles of scrap and other debris camouflaging the snouts of long-nosed guns.

Flak towers, square buildings, two and three stories high, sprang up, their top levels crowded with heavy machine guns. The whole Presidio Hills area bristled with weapons to shoot down anything that got through the outer defenses that radiated from the city along all the probable bombing runs.

By night searchlights stabbed the sky, picking out target planes, while on the ground householders wondered when the first enemy blow would come.

For San Diegans knew, with a sureness that brooked no denial, that the toll of Pearl Harbor was much greater than President Roosevelt's "one old battleship overturned and some other ships damaged" report would indicate.

Some grimly humorous episodes were clothed with censorship.

For instance, there was the beach resident who reported a submarine surfacing off his home. He called the navy about it, but he didn't understand the situation for the sailor who responded told him he should have called the army, which at the time maintained a bombing patrol off the coast.

This was followed by a public appeal to route all calls about submariners to the army bomber command in this area, but censorship clipped off the place where the reports could be sent. This was all straightened out later, of course.

The second day after Pearl Harbor the skies opened and it rained, along with thunder and lightning. The bolts from above, smashing down on the city, caused a terrific commotion with many fearing that the enemy had come and was bombing the city. A rainy night saw the first blackout.

One of the priceless skirmishes of the early days was the joust between a column of troops and customs offices on both sides of the Mexican border. Rushed to prevent a possible landing of enemy forces while Mexico girded for the struggle, the troops, a great long convoy of them in trucks, were halted at San Ysidro while there was talk of export control, shipping arms into Mexico, customs duties and all that.

The genius who finally settled the dispute has never taken an official bowl. But the troops went through just the same. Broadway was blocked for long intervals during those days as great troop trains poured regiments to what might have proved a hot corner in the defense of the nation.

Of all this the citizens at large knew only a part. They could see bits of the drama going on around them. The first wartime Christmas and a rainy Christmas season it was, too, saw warriors, with steel helmets and weapons on hand, shopping in the downtown stores. A hard-bitten captain of artillery could be seen tenderly handling a fragile doll he was going to send home to his little girl.

A private soldier would be observed shopping for his girl friend. That first army, so far as enlisted personnel went, was composed mostly of bachelors.

Few traces now remain of that first occupation. The army has been selling off the temporary shacks. The Harbor Drive emplacements cannot be identified as such. Children playing in some abandoned buildings set them afire. Vandals worked on others.

City officials finally demanded that the army use the places, guard them properly, or get rid of them. The army chose the latter course.

A few flak towers still stand. Some of the remaining gun emplacements, where soldiers remained up to and beyond V-J day, are still recognizable as such. The places where the barrage balloons strained at their moorings no longer stand out from the surroundings.

The army force of 30,000 has dwindled to a caretaker crew at Fort Rosecrans and not much more than that at Camp Callan. Hostilities still are progressing under the legal fiction by which President Truman preserves his war powers. But the Battle, or rather the Army occupation of San Diego as we knew it, is over.

September 23, 1945, San Diego Union, A-16:1-3. Photograph of a flak tower still standing at Pringle and Torrance Streets commanding one of the approaches to Lindbergh Field and the airplane factories.

September 28, 1945, Minutes of the first meeting of the City Manager's Committee on the Restoration of Balboa Park held in the Officers' Club, Balboa Park, Friday.

Following luncheon the meeting was called to order at 1:00 p.m. by Chairman G. Aubrey Davidson. Members present: Mr. Davidson, Col. T. C. Macaulay, Mr. Frank Young, Dr. Howard B. Bard, Mr. Milton P. Sessions, Mr. Roland S. Hoyt, and ex-office members Mr. Glenn Rick, Mr. Leo Calland and Mr. W. Allen Perry.

The Committee entered into an extended discussion of the problems of restoring the Balboa Park buildings upon their return to the City of San Diego by the United States Naval Hospital. Questions discussed included the possible or probable use of the buildings in the future park program, improvements made by the Navy which the City will wish to retain, buildings in which the City will want all improvements removed and the original condition of the building re-established, personal property including furniture and equipment which the City may wish to obtain either through gift or purchase, execution of the restoration through a contract let by the Navy or with a lump sum appropriated by the Navy to the City of San Diego.

The Committee reviewed the manner in which the Navy's occupancy was requested and permitted as contained in a letter of December 10, 1941, signed by Captain Byron McCandless, Acting Commandant, 11th Naval District, and a letter dated December 24, 1942, signed by the late Walter W. Cooper as City Manager. Council Resolutions No. 81283, No. 81380 and Document No. 355037 were reviewed inasmuch as they specifically provide for the restoration of the Fine Arts Gallery, the Natural History Museum and the San Diego Museum of Man.

In view of the vast amount of detail which the restoration of the buildings involves, and the necessity for proper specifications and estimates to present to the Navy, it was moved by Mr. Sessions, seconded by Dr. Bard, and unanimously carried, that the City Manager be requested to employ professional services to conduct and prepare a survey and cost estimates of park rehabilitation, said work to be conducted under the control of the Board of Park Commissioners.

Mr. Calland outlined the proposed program of general events to be conducted in the buildings now occupied by the Officers' Club and stressed the desirability of obtaining the equipment and furnishings now in place. It was moved by Mr. Bard, seconded by Mr. Young and unanimously carried that Mr. Davidson and Mr. Calland be appointed as a sub-committee to call upon the proper Naval authorities in an effort to obtain the Officers' Club in its present condition.

After discussing the restoration agreements existing for the Natural History Museum, the Fine Arts Gallery and the San Diego Museum of Man, it was moved by Mr. Young, seconded by Dr. Bard and unanimously carried that the three institutions be advised of the professional assistance which will be provided and requested to submit specifications and estimates of their restoration requirements to be incorporated in the total estimate of this committee.

It was decided that this Committee would meet at 3:00 p.m. Wednesday, October 3rd, to begin its inspection of the various buildings and areas in Balboa Park which enter into the restoration problem.

Upon motion, seconded and carried, the meeting adjourned.

/s/ W. Allen Perry
Secretary.

September 30, 1945, San Diego Union, A-15:1-4. San Diego Zoo gets portable X-ray.

October 1, 1945, San Diego Union, B-1:7. Museum of Natural History gets plant collection from private herbarium of C. J. Jerabek of the City Park Department.

October 2, 1945, San Diego Union, B-1:1. County Supervisors yesterday unanimously adopted a resolution calling for a special election November 27 on the proposal to establish a War Memorial District.

The supervisors called the election after Asst. Distr. Atty. Frank T. Dunn reported that a petition filed with the County Clerk September 17 by a veterans' committee headed by Capt. Homer Hacker contained a total of 4869 (?) signatures, a number sufficient to warrant calling the election.

Boundaries of the proposed district will be those of the city of San Diego. Voters within the city limits will cast ballots on November 27 on whether the district should be formed and also will vote for a board of five directors.

This board will have the power to levy taxes, to propose bond issues, to select sites for the memorial buildings and to erect and manage the structure. Tentative estimate of the cost of the war memorial is \$3,000,000.

Adoption of the resolution was taken on motion of Supervisor Dan Rossi. Hacker thanked the board for its action on behalf of the veterans' organizations which circulated the petition.

October 3, 1947, San Diego Union, 4:3-4. Museum of Natural History to resume nature studies with October walks.

October 10, 1945, Minutes of the Board of Park Commissioners.

The City Manager forwarded a request from officers of the House of Pacific Relations for the return of the Houses of Pacific Relations to that organization. Since the general program for the reuse of park buildings has not yet been formulated and since the Navy has given no indication of the time at which the buildings will be returned to the city, it was unanimously carried that the City Manager be informed that these conditions preclude any action at this time.

October 10, 1945, San Diego Union, 8:4-5. Freed area men think park hospital heaven.

Four San Diego men sat on the steps of the Naval Hospital in Balboa Park yesterday and said it was like heaven. They had recently been flown from Yokohama after spending three years as prisoners of the Japanese.

They are: Chief Radioman Robert C. Miller, U. S. N., of 1569 Front St.; Chief Metalsmith Donald W. Miller, U. S. N., of 3913 Newton Ave.; Chief Electrician's Mate Earl T. Hartsell, U. S. N., of 3913 Alabama St., and Aviation Ordnanceman 1c Rudolph A. Paredes, U. S. N., of 1730 Cleveland Ave., National City.

Radioman Miller, a survivor of the death march of Bataan, pointed to a badly-scarred ear and described how a brutal Japanese guard had knocked off the ear, which has been nearly cut in two the day before while he was doing "coolie" labor in a coal yard.

Metalsmith Miller (the two are not related) gave a sidelight on the B-29 raids. He was moved from camp to camp as the bombs destroyed nearby towns. "Few of our prisoners were hurt and none killed in the raids," he said. "Osaka was completely devastated."

Paredes offered another comment on the raids by recalling "our Japanese guards greeted the first B-29s that came over with scorn and derision. When thousands of others followed, leaving fire, death and devastation in their wake, their laughter turned to amazement."

Hartsell said he found the cigarettes in Red Cross packages good for more than smoking. "One pack would net you five kilos of beans if you could contact the right guard or civilian worker," he said.

October 10, 1945, San Diego Union, B-12:5. Balboa Stadium policy bothers City Council.

What to do about Balboa Stadium has the city council bothered. One thing they are agreed upon --- it needs policing. But they are not certain that motorcycle races should be permitted there. They are not too enthusiastic about midget auto races. And they are not certain just what high school football games should be played without charge by the city. They appear to be agreed that a better understanding should be had with the city school board.

It has been the policy of the police chief not to sent city patrolmen to maintain order at privately-managed, profit-making shows staged in the city's Stadium.

Some councilmen were of the opinion when the Stadium question was debated in a conference yesterday that the "police should be where the crowds are." One member of the council said that he had attended a recent football game with his wife and daughters and that marines were using language "that would make a ship's captain blush," while two police "walked arm in arm," apparently enjoying the game and heedless of disorder, which was described as "rampant lawlessness."

"The football coaches are plenty burned up about lack of police protection," said another councilmen. One member said that at a recent game youngsters were running about the field during play and some were perched on goal posts.

Why San Diego high school teams should play without any charge to the city, while other city high schools, including Hoover, La Jolla and Point Loma, maintain their own fields and must pay for use of the Stadium is a question the council wants answered.

That will be the subject matter of an early conference between the council and the city school board, it was decided.

"The schools charge plenty for the use of Russ Auditorium," one councilman said, "but they don't want to be charged for the city's Stadium."

Another councilman said that he had recently solicited an \$1800 fund for new uniforms for La Jolla's team, because that team's "gate" does not produce enough to outfit the squad. He said the whole city school athletic program needs readjustment.

October 27, 1945, San Diego Union, Navy Day Section, 4:1-5. Naval Hospital Here Has Treated 160,000 Patients, by Vincent Dunne.

More than 160,000 patients have been treated at the Naval Hospital from the war's start to the present, it is disclosed by Capt. Jesse W. Allen, (MC), U. S. N. medical officer in command.

In addition, almost 30,000 hospital corpsmen, including the bluejackets who stormed ashore as medical aids with every wave of marine invading troops, have been trained in the hospital's Balboa Park area.

With an emergency bed capacity for 12,000 patients, the San Diego medical center is the world's largest naval hospital. Expanding during the war to include the former San Diego Exposition buildings, ex-army units in Balboa Park, and an annex at Rancho Santa Fe, the hospital's 220 buildings cover 242 acres.

Despite its great size, the hospital has won the accolade of the medical world for its high professional standards. It stands as one of the nation's leaders in reconstruction and rehabilitation work and has been selected as the Navy's west coast center for plastic and neuro surgery.

To the hospital wards have come men from European campaigns and veterans of every battle on land and sea in the Pacific, from Pearl Harbor to the Japanese shores. Some of the fighting men, those requiring considerable plastic, orthopedic or neuro surgery attention, have been hospitalized here as long as two years.

Rebuilt and in many cases entirely new noses, ears, eyelids and other facial features have been given wounded men by the hospital's plastic surgeons. Neuro surgeons have repaired delicate nerve centers and orthopedic doctors, who have had as many as 1500 patients under their care, have grafted and pieced together shattered bones.

Departments such as these have won wide acclaim but actually scores of other divisions of the hospital have accomplished equally fine but perhaps less sensational work.

Capt. Allen's staff includes some of the outstanding medical men and women in the country. Many are from the Mayo clinic, and other famous civilian medical centers.

With demobilization in the forefront, the hospital's rehabilitation program, which speeds the physical conditioning of patients and prepares them for return to civilian life, is vitally important.

Because of its size, the hospital is not unlike a small city, with a bank, laundry, carpentry shop and other similar units. Patients are taught civilian trades by actual work in these shops and activities.

Educational officers help patients with high and college studies, even as the students be in bed.

Furthermore, San Diego's weather is a large factor in outdoor physical training and the hospital conducts a major athletic program for patients to retrain and to rebuild themselves under the expert supervision of experienced coaches and physical education men.

In addition to treat service patients, the San Diego hospital cares for thousands of navy and marine dependents, the relatives of the men in uniform. One of the hospital's features is the care given to expectant mothers, the delivery of their children, and the nursery wards, which treat young patients.

When commissioned in 1922, the hospital comprised six small buildings and a tent section and its bed capacity was 500. It was centered around the present administration building, which was then used for sick officers' quarters as well as office space.

Although gradually enlarged in succeeding years, major expansion did not start until 1940 when construction began on 15 convalescent wards, which now spread over the east side of the main compound.

More than 4000 beds were added early in the war when the navy took over the former Exposition buildings and began converting them into wards and living quarters.

Speed was the essence as the American offensive advanced north from historic Guadalcanal and the Solomons and across the Pacific. Such was the job performed that when the first wounded were returned the hospital was ready to receive them.

All of the buildings along Laurel St. are now used to house patients and nurses. Exposition structures near the Ford building in the south end of the grounds form the site of the immense hospital corps school. The Ford Bowl and the Spreckels Organ Pavilion are the scenes of outdoor movies each night.

This tremendous expansion task was directed mainly by Rear Admiral George C. Thomas (MC), U. S. N., and Commodore Morton D. Willcutts (MC), U. S. N., while serving in command here.

Today the park hospital has an emergency bed capacity of approximately 8000, although the number of beds there now has been reduced to 4550, to allow more comfortable quarters for the men.

In January of this year, Balboa Park reached its highest peak in patient load when 5000 men were under treatment. There still are more than 3000 patients in the park.

Of the 29 structures used in this 33-acre park unity, the largest ward buildings are the Museum of Natural History, the California Tower building and the Fine Arts edifice.

The California Tower building, with 750 beds, now is used for convalescent neuro-psychiatric patients. A second deck has been added to give greater bed space.

The Fine Arts building, with 423 beds, is used to care for acute pulmonary, heart, arthritis and other serious medical cases.

There are 837 beds in the Museum of Natural History, including many double-deck bunks. Men suffering from skin diseases and chronic ailments are cared for there. Museum pieces are closeted beneath platforms at each end of the wards, with the tops of the platforms used as offices for the nurses.

Taken over by the Navy in March, 1943, these three buildings provided immediate quarters for patients rushed to the west coast at that stage of the war. Almost as soon as beds were set up, hundreds of patients were moved in.

The House of Hospitality is the center of all Navy nurse activities. The building is used as a "chow hall," lounge and headquarters as well as a dormitory.

At one time during the war a few of the convalescent patients occupied half-tents in Balboa Park. All these men now are in permanent buildings but some hospital corpsmen still are quartered in the tents because of the patient load.

Another of the former exposition buildings has been fitted to serve as a release center for men being medically discharged from the service.

Besides Navy, Marine and Coast Guard patients and their dependents, many veterans of World War I are under treatment in Balboa Park wards.

The park also provides considerable recreation facilities for patients. The lily pond has been deepened and converted into a swimming pool. The site of the Exposition's "nudist colony" now is a Red Cross and handicraft center. The famous Globe theater is used for classroom lectures and entertainment. The building adjoining serves as a ship's store.

The hospital corps school, in what is known as the Camp Kidd section of Balboa Park, is the largest school of its kind in the navy. The Federal, Electrical, California State and other Exposition buildings serve as school dormitories, classrooms and offices.

During the war field first aid and field sanitation were first practiced in the park's wooded areas, with students simulating the combat conditions they were later to face on Pacific islands. At its height, the corps school covered 33 acres and occupied 62 buildings, mostly former army huts.

Before Camp Kidd was occupied by the hospital school it served as an annex to the Naval Training Station.

Alterations which have been made to the Exposition buildings have been done in such a manner that the structures can be returned to the city in their original form.

The Naval Hospital also has two other units in Balboa Park. One cluster of 27 buildings on the park's west edge, which formerly was used by the army's WACS was converted to a convalescent center for the navy. The group of nine buildings north of Laurel St. is used as a baggage depot and formerly was an army camp.

Eventually San Diego will again claim its world-famous park. But meanwhile the City always can point with pride to the part its beautiful acres played in the treatment and rehabilitation of the wounded.

October 27, 1945, San Diego Union, Navy Day Section, 7:1-3. U. S. Naval Training Center gem of 11th District.

October 27, 1945, San Diego Union, Navy Day Section, 8:1-8. San Diego home of Naval Aviation.

October 27, 1945, San Diego Union, Navy Day Section, 10:3. San Diego generous in providing land for Navy, by Dick Mansfield.

Recognizing from the start the important contribution the U. S. Navy could make in the development and maintenance of the city and port of San Diego, the city has continued through the years to be more than generous to the navy in return.

Since 1916 the city has turned over land and use to the Navy to a total of approximately \$11,700,000. And city officials indicated today, there is no indication of shutting off the city's generosity. Already, the city park commission has drawn plans for the clearing and paving of space across Park Boulevard from the main gate of the Naval Hospital to provide free public parking lot accommodations for the convenience of the hospital's visitors. The Navy continues to use much of the public park land and buildings rent free.

It was in 1916 that the Naval Training Station transfer to our Southland from the San Francisco bay region was provided for, due largely to the interest and instrumentality of the late Congressman Rep. Bill Kettner, for whom Kettner Boulevard was named, and the city's fireboat, the *Bill Kettner*, which later was turned over to government use during the war.

San Diego started off by giving the Navy first 135 acres for a site of the Naval Training Station, then followed it up with 95 acres in 1930 for expansion, the whole site being valued at \$1,166,000, according to a report just compiled by the city administration.

Land donated to the Navy for Marine Corps Base establishment and expansion amounted to even more, exceeding \$2,050,000. The base was founded on a donated site of 500 acres in 1916, which was enlarged by 146 acres in 1930 and 67 more in 1933.

The Naval Hospital was given a choice site in Balboa Park of 17.35 acres in 1919, followed by 5.46 in 1926, and 15.60 acres leased for \$1 in 1937, and gift of 39.93 acres in 1939, the whole valued at \$1,114,320.

During the war and continuing to date the Navy has been allowed 200 acres or more of developed area in Balboa Park, without rent, the property being valued "conservatively" at \$1,000,000.

Eleventh Naval District headquarters have been provided with land and pier sites valued at \$4,500,000; the Repair Base with 1613 acres given and 712 leased, all valued at \$500,000.

The Marine rifle range takes 544 acres, given in 1926 and 1927, valued at \$272,000.

A Camp Kearny site of 14 acres was donated in 1929 at a cost of \$1400. The Coast Guard has not been forgotten, the citizens of the city being generous in giving waterfront land as requested and a bay area, all worth \$45,400 at the time of giving, and worth more now.

The city gave up its Mission Beach bathhouse, Balboa Park swimming pool, the old jail, space in police headquarters, city shops, garage use, the old isolation hospital building, space in Presidio Park, Twenty-eighth Street pier, and other properties, including generous office space in the Civic Center administration building itself, still in use by the Navy, and Navy public works building and a huge warehouse occupy valuable waterfront sites on Pacific Highway.

Summing it up, San Diego has given with little if any stint, granting Navy requests not only as they came up, but sometimes in anticipation, anxious to show its appreciation of the presence here of the Navy, both from families of men in the service and from those who have retired from the service and chosen to make their homes here in this city which has served the Navy so well and has been proud to claim the Navy for its own.

October 27, 1945, San Diego Union, Navy Day Section, 20:2. Camp Elliott distribution center active.

Camp Elliott, a U. S. Naval Training and Distribution Center, located approximately 16 miles northeast of San Diego, has a housing capacity for approximately 15,000 men and Waves. Initially constructed in 1941 as an activity center of the Fleet Marine force, the station was taken over by the Navy on June 26, 1944, and played an important role in helping win the war.

Covering 28,740 acres, the camp has grown continuously until today the estimated cost of facilities has reached \$9,500,000. The station provides berthing, messing, transportation, processing, distribution and refresher and advanced training facilities for all those passing through.

As a receiving station, Camp Elliott provides necessary facilities for berthing, messing and commercial transportation to officers and enlisted men attached there, taking care of men in transit

awaiting a new assignment or discharge. Since the war's end, the center has been used as an "intake" center for routing men to be discharged to separation centers nearest their homes.

The station also provides berthing, messing, administrative and training facilities for a Transport Quartermaster School, Chemical Warfare Instructors' School, and berthing and messing facilities for officers of the Amphibious Training Command, and ComFair West Coast Range facilities for activities of the 11th Naval District are also provided.

At Camp Elliott one finds a small-sized city of barracks, messhalls, administration buildings, BOQ's dispensaries, Ship's Service, school buildings, storehouses, trainer buildings, auditoriums, two boiler plants, two boiler plants, refrigeration plant, bakery, swimming pools, athletic areas and a sewage disposal plant.

Water lines with two 1,000,000-gallon concrete storage reservoirs, and a 100,000-gallon elevated steel storage tank, electric lines, telephone lines, and various ranges complete the camp's facilities.

October 28, 1945, San Diego Union, 3:1-4. House of Pacific Relations plans 10th annual fiesta Saturday evening in the San Diego Women's Clubhouse, Third and Maple Streets; R. O. Coggeshall, president of the organization, George Pruski, master of ceremonies; numbers by the Scandinavian dancers who represent the cottages of Finland, Norway, Sweden and Denmark.

October 29, 1945, San Diego Union, B-1:1-2. Hippos at San Diego Zoo show life as amphibians.

November 2, 1945, San Diego Union, 5:4. Navy returns swimming pool in park to City.

The Navy, which early in the war took over the public swimming pools in San Diego for recruit training, yesterday returned to the city the Balboa Park swimming pool at the foot of Texas Street, the 11th Naval District announced.

The Balboa Park pool, "borrowed" from the city in December, 1941, was used early in the war to teach soldiers and Naval recruits to swim. Since 1942 it has been used by the Naval Hospital.

The Navy is continuing the use of the municipal swimming pool at Mission Beach for training recruits. Since the center is reportedly operating at capacity due to abandonment of other Naval centers in the country, early return of the beach pool is unlikely.

A third pool --- formerly the Balboa Park Lily pool [sic] --- has been improved during the last summer. With another pool on the hospital compound, it will be adequate for orthopedic treatment of Naval Hospital patients and swimming instruction for other Naval personnel at the hospital.

Leo B. Calland, city recreation director, said yesterday that use of the Balboa Park swimming pool during fall, winter and spring is impractical. Accordingly, it will not be placed in public use until next summer.

Although the pool attracted 22,286 youngsters during the two months it was open to the public on a part-time basis last summer, it is eight blocks from the nearest streetcar line, Calland said.

The location was fixed years ago when city planners expected Upas Street to become a cross-town artery over which a street or bus car line would be routed.

Calland said a full aquatic recreation program at the pool is planned, beginning next June, with night swimming for adults. The pool is 135 ft. long, 65 feet wide. The Navy erected an abandon-ship practice tower on which 12,000 hospital corps school students were trained during the war.

Scores of wounded patients at the hospital have benefited from underwater exercises and treatment there.

November 2, 1945, San Diego Union, 6:3-4. Natural History Museum free events announced.

November 2, 1945, San Diego Union, 12:3-4. Balboa Park trolley service halted as wires snap.

November 4, 1945, San Diego Union, 4:3-6. Naval Hospital shows worth of bond generosity.

If you are to understand about the amount you can “afford” to invest in Victory bonds, you might use these figures as a yardstick with which to measure the extent of your loan to Uncle Sam.

Care and rehabilitation of a patient at the Naval Hospital in Balboa Park is \$2.17 a day, plus 65 cents for rations. That \$2.82 per man, and there are about 6000 of them undergoing various kinds of treatment today. If you buy a \$100 Series E bond --- cost price \$75 --- the money you put over the counter will underwrite the care of one man for about 26 days.

Someday, maybe a few months hence or longer, your man will leave the hospital as sound as the utmost in surgical and medical science can make him. He will resume the life that was interrupted by the Jap hit-and-run at Pearl Harbor.

And you? Well, if you hang on to your \$100 Victory bond for ten years, you’ll make \$25 on the deal.

The Naval Hospital is playing a vitally important but unspectacular role in restoring to usefulness thousands of men disabled at the battle front. It was because the public has only a hazy idea of what this institution is doing that the war finance committee decided to feature the rehabilitation program during the course of the Victory Loan.

At the committee’s request, Capt. Jesse W. Allen, medical officer in command of the hospital, provided some interesting facts. Here are some of the highlights:

Now being treated are veterans of every Pacific campaign from Pearl Harbor through the first day of victory. Some of them, such as those requiring considerable plastic, orthopedic or neuro surgery, have been hospitalized for more two years. Among recent arrivals were more than 350 former prisoners of the Japs. Other men, seriously wounded, are being transferred here constantly from base hospitals overseas.

Long and patient care will be required to return them to civilian life in the best possible condition. In some cases, noses, eyelids and other facial features must be restored by plastic surgery. In others, shattered bones must be grafted and pieced together, or delicate nerves repaired. In still other cases, it is the minds of the men that require healing.

Present operating costs of the hospital are around \$7,000,000 yearly, exclusive of military salaries.

Since it was started in 1922 construction costs have totaled about \$10,000,000.

Since the start of the war more than 176,000 patients have been treated. The peak month was last January when there were 12,068 patients in the wards. The present bed capacity is 9200.

On the hospital staff are 863 officers, including 170 doctors and 482 nurses. Hospital corps enlisted personnel totals 2666, of which 763 are Waves. In addition, the hospital has some 1150 civil service employees.

During the last six months, 35,192 patients, of whom 12,027 were overseas casualties, were admitted. There were 5670 operations performed in the surgeries; 3180 patients were treated in the orthopedic service; the plastic surgery department admitted 783 and performed from five to seven

operations a day; 284 operations were performed among the 456 patients in the neuro-surgery department.

Concerning rehabilitation work, Capt. Allen has this to say:

“Rehabilitation work, to speed the physical condition of patients and to prepare them to return to civilian life, is a vital part of the program. They are taught trades by actual work in various shops of the compound.

“Educational services officers help patients with high school and college studies. In the Ford Building, in the park, a school specializing in vocational subjects has been set up and is attended by ambulatory patients.

“An extensive physical training program contributes to the restoration of the patient to his normal strength and vigor, and adds to his interest in life. Occupational therapy workshops provide many convalescents with interesting and worthwhile occupation. Red Cross projects help them to pass their time constructively and provide entertainment, as does the hospital’s varied welfare and recreational program.”

Recently members of the war finance committee and county community chairmen were guests of Capt. Allen and his staff on a tour of part of the big institution, and at a luncheon. So illuminating was the visit that Philip L. Gildred, Victory bond chairman, expressed the sentiments of the entire group when he said:

“If the people of San Diego could see for themselves the great program that is being carried on at the hospital, our Victory Loan quota and its \$7,000,000 E-bond goal would be oversubscribed by a wide margin.”

November 4, 1945, San Diego Union, A-15:2-4. Cages at San Diego Zoo required to keep agile “cats” confined.

November 5, 1945, San Diego Union, B-1:1. Veterans to oppose Memorial Plan on tax grounds.

November 6, 1945, Letter, From: Charles C. Dail, To: Rear Admiral W. L. Friedell, USN, Commandant, Eleventh Naval District, San Diego 30, California; National Archives, Pacific Southwest Region.

Dear Sir:

If it would meet with your approval, I should appreciate greatly an opportunity to discuss the possibilities of working out an arrangement whereby the Globe Theater in Balboa Park might be made available to the San Diego Community Players for the purpose of enabling them to conduct rehearsals and meetings for their organization. Their present facilities, which are improvised, are very inadequate.

This overture is not an effort to obtain general admittance for the public to this facility, but to obtain the use of the building for the immediate and bona fide members of that organization which has operated in San Diego for so many years past, with signal [sic] benefit to the community, which includes all of us.

The conference contemplated would include the President of the organization, Mr. Leo Calland of the San Diego City Recreation Department and myself.

With kindest regards, I am

Respectfully yours.

/s/ CHARLES C. DAIL

November 6, 1945, San Diego Union, B-1:1-2. Veteran Memorial special vote plan meets hot opposition.

A drumfire of opposition to the movement for obtaining a veterans' war memorial through a special bond election November 27 was heard yesterday at a meeting of the Hammer Club, composed of war veterans. But action on a resolution opposing the present plan was deferred until November 19, after one member objected to acting until both sides had been heard, and it was found that Club policy is against taking sides on a controversial matter at the same meeting where it was introduced.

Opposition to the plan to get the memorial through the November 27 election was voiced by Councilman Ernest J. Boud, speaker of the day; R. King Kauffman, program chairman; and T. C. Macaulay, veteran of both world wars. Boud and Kauffman are World War I veterans.

Bert J. Schaefer, World War I veteran, then sought to introduce a resolution putting the Clubs on record against the election proposition. But Richard J. Cosgriff, service officer of the local Disabled American Veterans and a World War II veteran, said he thought the other side should be presented before the Club. Schaefer then moved to set the vote on his resolution for the November 19 meeting, as the Club will not meet next Monday, which will be observed as Armistice Day.

Boud said his opposition was to the proposed method of financing the veterans' memorial, and not to a memorial.

"I know of no one averse to a memorial dedicated to and for the veterans of all wars," he said. "I believe the present approach involving the creation of special assessment district is the wrong approach. I believe the present effort should be abandoned and a complete new start made. But this should be done only after a most complete study of all the problems involved, and that his study should be made by a definitely unprejudiced group."

Speaking as a World War I veteran and a member of the veterans' memorial building committee, Boud told the Club he wanted to present a minority report. He recalled the move to put a memorial building on the site of Lane Field and told of the studies made by the Planning Commission which proposed a memorial group, including a veterans' building, at the east end of a mall on Cedar Street, that would run from the waterfront to the park.

He told of studies made for a \$5,000,000 bond issue to finance the memorial group, with \$3,500,000 for the buildings and \$1,500,000 for the land. But some groups didn't want to move this way, he said, and the petitions for the special district were filed, with the election called for November 27, at a cost of \$25,000 to the taxpayers.

Boud said it was difficult to vote on a project that he believes hasn't been presented properly before the people, and one that has many objections. Blasting reports that a million dollars would be available from the state's \$90,000,000 post-war fund, he said Governor Warren told him none of this money would be available for jails, courthouses and other public buildings, that such buildings were not the responsibility of the state. He called on Supt. of Schools Will C. Crawford for confirmation and Crawford said he had been told the schools could not get any of the money for their proposed administration building.

Under the memorial district plan, Boud said a maximum of 30 cents on each \$100 valuation could be levied annually on city property included in the district boundaries. This levy would bring \$645,000 a year at the present ratio of valuation and taxes, Boud said he was told by Assessor Crowell D. Eddy.

Using the 30-cent levy it would take five years to finance the memorial project, the councilman asserted, adding that the district directors, who are not subject to recall and who have almost

unlimited access to district funds, could present a bond issue for a memorial which would mean another election.

But a bond issue proposed by the district would have behind it only the real property revenues of the city, while a bond issue sponsored by the city government would have all the municipal revenues available to help pay the interest and sinking fund charges, he said.

Only 45 percent of the city's property is taxable under the district plan, he said. At present the city gets only 38 percent of its revenue from real property, with the rest coming from other sources.

The site for the proposed building is "kept secret by proponents of the district plan," he said. He added that he can't find out, even though he's a member of the memorial committee. The site proposed by the Planning Commission would require street closings, as would any other site in the downtown area, yet the City Council has not been told what streets would have to be closed at the "mystery site," he said.

The present plan, he concluded, is both economically and politically objectionable. While a majority vote is all that is needed to create this district, it takes a two-thirds vote to dissolve it, which adds another objection.

Boud said he has been threatened with recall for his stand in opposing the present district plan.

Macauley praised Boud's courage, saying it was in line with veterans' ideals and with sound economics. Veterans are on trail, in a way, he said, and should move carefully. He cited difficulties his post had in getting a building downtown without obtaining the best advice on the action. Macauley said he hoped a motion would be made at the November 19 meeting to oppose the creation of the district at the November 27 election date.

Clarence Brittain presided at the meeting, but took no part in the discussion.

November 24, 1945, Letter, From: W. L. Friedell, Commandant; To: Mr. F. A. Rhodes, City Manager, The City of San Diego, California; ND11/NH16 (A7-Wr) Serial V-3085; National Archives, Pacific Southwest Region.

Dear Sir:

The Commandant received a letter from Mr. Charles E. Dail under date of November 6, 1945 relative to the availability of the Globe Theater in Balboa Park for the use of the San Diego Community Players. The Commandant replied to Mr. Dail under date of 8 November suggesting that he discuss the matter with the Medical Officer in Command of the Naval Hospital, Captain J. W. Allen (MC), USN. As a result of this conference, the Commandant has received official communication from Captain Allen under date of November 21, 1945, stating that buildings No. 259, No. 261 and No. 263 – Barber Shop and Laboratory, Ship's Service and Globe Theater respectively --- are no longer required by the Hospital. Copies of these letters are enclosed herewith.

The Commandant requests that you advise him if the City of San Diego desires the return of these buildings to the City at the present time and in advance of the release of the remainder of the buildings in Balboa Park. Should you desire that the buildings be returned at the present time, it is suggested that your representative confer with Captain A. K. Fogg (CEC), USN, the District Public Works Officer, with a view to determining what the restoration charges will be to restore these three buildings to the condition existing at the time the Navy took over the buildings.

Very truly yours,

W. L. FRIEDELLE
Commandant.

November 24, 1945, San Diego Union, 1:1. Veterans' Memorial District vote hinges on court action.

November 25, 1945, San Diego Union, A-1:1. A:5. Court refuses write to ban War Memorial District vote.

November 28, 1945, San Diego Union, A-1:1. Voters say "no" to Memorial District tax plan.

San Diego voters yesterday voted 6-1/2 to 1 against establishing a special tax district within the city to erect a veterans' memorial. Out of 544 precincts in the city, 538 had reported by midnight 3724 votes for the district and 24,091 against.

Since the district failed in the election, no board of directors will take office. Consequently the contest to name five of seven candidates to the board in yesterday's election became a matter of academic interest only.

In the contest Harry C Clark was leading in the late returns. Votes received in the 538 precincts to report are as follows:

Harry C. Clark	5285
Bryant K. Burnett	4556
Ambrose H. Redmond	4463
Henry H. Hacker	4125
Ann O. Briggs	3910
Joseph I. Nettlekoven	3608
Adolph Brodman	2720

Only one of every four of the city's 123,246 registered voters cast ballots and of these only a fifth voted for the candidates.

It appeared the total vote would not exceed 30,000 and the voters who cast ballots for candidates would not exceed 6000. Some voters who opposed creating a tax district still voted for board aspirants.

A note of post-election harmony was injected into the contest by a statement from Fred Kunzel, chairman of the San Diego Veterans' League, which was active in the campaign against establishing the tax district.

"The claims and counterclaims made during the campaign may have led the public to believe that former servicemen are divided into hostile camps," said Kunzel. "This is an erroneous impression.

"The San Diego Veterans' League, representing many thousands of ex-servicemen, opposed the proposition on the broad ground that it was basically unsound. To that extent only have we disagreed with those who championed the measure.

"This organization will be among the first to support a widely developed memorial project, and we will gladly join with our late opponents in working toward that objective."

The proposal on which citizens voted yesterday asked that a special tax district be created to erect and operate a veterans' memorial project. The district would have covered the entire area which the city covered.

The principal objections of opponents to the project was that, as the contended, the creation of a special district would incur overhead expenses which duplicate city expenditures. They said the same purpose could be attained more cheaply by city government.

November 29, 1945, San Diego Union, B-1:5. 24,165 votes against Memorial District tax plan.

November 30, 1945, San Diego Union, B-4:5. Park buildings reserved for recreation use.

Conversion of buildings in the Palisades area of Balboa Park to recreational uses is planned by the city playground commission, Leo Calland, recreation director, announced yesterday.

All requests for eventual use of buildings within the park, now under navy control, have been referred by the city council to the park commission.

Allen Perry, park superintendent, said yesterday that the buildings in the Palisades area have been assigned to the recreation department.

He added, however, that current reports that various groups are being assigned buildings for post-war use are not true. He said no allocations have been made other than city departments.

The recreation department announcement said the former Palace of Education, the State Building, Hollywood Hall of Fame, Palace of Electricity and Allied Industries and the Federal Building are due for immediate conversion to recreational use when returned and renovated.

Before the war the Federal Building had been used for badminton by the playground department and proved so popular that much more space will be used for that game and many other recreation facilities, Calland said.

November 30, 1945, San Diego Union, 14:2. Many signed petition but few voted for Veterans' War Memorial District.

Final returns from the election Tuesday in which voters overwhelmingly defeated the proposed veterans' memorial district showed yesterday that a majority of those who originally petitioned for the election either changed their minds or failed to go to the polls.

Although approximately 10,000 signatures were contained in petitions filed with the board of supervisors, the proposal received only 3764 "yes" votes. The complete unofficial count of "no" votes was 24,294.

A leader of the veterans' group, which advocated creation of the memorial district, expressed belief that a major factor in the proposal's defeat was the fact that property owners received 1945-46 tax bills, which are substantially larger than last year's, during the election campaign.

Homer E. Hacker, spokesman for the group, announced, meantime, that his organization would remain dormant "long enough to give the winners opportunity to do their stuff." He said the group would support any "worthwhile" substitute plan, but would circulate petitions for another vote at the primary election next June if the city failed to get underway a program for construction of a memorial building.

December 5, 1945, San Diego Union, 6:5. City Council creates priorities for public projects.

City councilmen, confronted by a report prepared by City Manager Fred A. Rhodes showing \$16,501,000 available for public works construction, yesterday learned that all but \$3,621,263 of the money has been spent or is encumbered.

The councilmen set up a priority system for forthcoming public expenditures, topped by not less than \$500,000 for new water mains. The total of priorities agreed upon, however, exceeded the unexpended balance.

Second place on the priority list was allotted to new sewers. G. E. Arnold, assistant city engineer, said expenditures soon of \$750,000 for additions to the sewerage treatment plant are imperative because the plant, built only a few years ago, is inadequate for the city's present greatly expanded population.

Another \$1,000,000 will be needed for truck sewer lines, he said. These, however, will be financed in part by old bond funds, but increased construction costs will make direct appropriations necessary.

Other properties, which more than exhausted the \$3,500,000 reserve, were listed in this order:

3. Mission Bay Park, \$1,500,000.
4. Civic auditorium and war memorial - cost indefinite.
5. Public library, at least \$500,000.
6. New wings on Civic Center to accommodate expansion of city and county government departments, \$450,000.

Most councilmen were agreed that bonds should not be voted now. Cost of bringing Colorado River water to San Diego still is undetermined, but recently was estimated to cost between \$28,000,000 and \$40,000,000. Councilmen contended the city's credit must be kept "in the clear" to meet any necessary cost for this enterprise.

Glenn Rick, city planning director, said \$1,500,000 must be added to the \$2,000,000 voted last spring for the Mission Bay Park. This \$3,500,000 fund will be put with \$4,500,000 which, he said, the federal government is likely to provide for the project.

Later, another \$4,000,000 would be needed to complete the aquatic park. Annual net revenue of \$500,000 is expected after the park is completed, councilmen said.

For the first time in recent months, councilmen discussed a new civic auditorium site. It was proposed that the building be erected on Laurel Street in Balboa Park to replace one or more of the old Exposition buildings.

December 5, 1945, San Diego Union, 6:6. 24,809 votes "no" on Memorial plan to 3636 in favor.

Lex Lord, registrar of voters, announced yesterday that the official result of last week's election in which the proposed veterans' memorial district went down to lopsided defeat was 24,809 "no," and 3636 "yes."

The margin of defeat was 6.9 to 1, while the total of 28,839 votes cast in the district cost and for seven candidates for district directors represented only 21.8 percent of the city's 123,246 registered voters.

Harry C. Clark led the contest among those asking to be directors with a total of 5,366. The vote on the others:

Bryan K. Burnett, 4618; Ambrose H. Redmond, 4541; Homer Hacker, 4192; A. O. Briggs, 3969; Joseph I. Nettlekoven, 3676, and Adolph Brodman, 2783.

December 6, 1945, San Diego Union, A-10:5. Benchley tells Altrusians about San Diego Zoo babies.

December 9, 1945, San Diego Union, 3:1-3. Gay-colored monkeys life of San Diego Zoo (illus.)

December 9, 1945, San Diego Union, 8:1-3. Naval Hospital arts, skills unit playing Santa (illus.)

December 12, 1945, Minutes of the Board of Park Commissioners.

The City Manager forwarded a letter asking for a recommendation on Councilman Dail's proposal to grant an occupancy permit to the San Diego Community Players for rehearsal privileges in the Globe Theater; request filed.

The Director submitted the final plan for the development of the parking lot west of Park Boulevard and south of Pepper Grove to be built at the Navy's expense; plan approved.

December 23, 1945, San Diego Union, B-1:3-4. Leo Calland urges \$153,300 fund for recreation items; program would call for expenditure of about \$32,000 at Morley Field on tennis court dressing rooms combined with bleachers at the west end of a battery of ten courts; lights for night games, a fly-casting pool, baseball diamond, bicycle track, archery and other improvements planned by Park Department; re-lighting of Softball Field at Golden Hill.

December 23, 1945, San Diego Union, B-1:5-8. Gilbert E. Kirkpatrick, photographer keeps on alert in San Diego Zoo "shots," by Adelaide Eastley.

Balboa Park zoo's official photographer, Gilbert E. Kirkpatrick, stepped casually into the canyon-sloped cage of the Canadian timber wolves. Armed only with his camera, he closed the steel doors behind him, called out in a friendly voice. The gray-maned denizens of that rocky cave, which is their captive home, peered out.

Alerted, they swept forward rapidly --- too rapidly for Kirkpatrick. He poised his box and aimed for a picture. Pack fashion, the wolves began a slow circle. "Kirk" got his picture and turned for the getaway. Between him and the door was a crouching form, lean legs flexed, ears flat. Sizing up his plight, "Kirk" set off a flash bulb. Off guard a moment, the wolves halted their stalk. He slipped out the door. As he closed it, a lithe form sprang, hurling his weight, fangs bared, against it.

The scene is old to Kirkpatrick, who has been photographing animals now for more than five years. His philosophy is "a miss is as good as a mile." He has managed most of the time to be two jumps ahead of his temperamental subjects.

An exception occurred in the condor's aviary, when he was assaulted by the female and ruthlessly pummeled by her mate. Vicious carrion vultures of the high Andes, their brutal hooked beaks went into kamikaze action. He literally slugged his way out of that clinch, blood-stained and nearly pantsless when he emerged. It was all it a day's work, he philosophized.

The young man would venture into any cage, if the zoo's director, Mrs. Belle Benchley, would let him. He is virtually fearless of any beast, knows all of them by their nicknames, pauses on his rounds daily to stroke their heads and scratch their ears through the bars. The cats "purr" sonorously for him. The hyenas laugh their croaking macabre greeting.

Yesterday "Kirk" wanted the striped hyena's picture for posterity. The **Union** photographer and a reporter obligingly accompanied him into the cage while keeper Georgia Ditto, who feeds and cares for many of the wild animals, stood by --- with a broomstick. "Kirk" walked boldly up to the hyena, whose back fur stood straight up indignantly. Mrs. Ditto, during a tense moment, reminded her audience that hyenas have a reputation for cowardice in their native state but are aggressive in the presence of mere man. While the hyena snarled and barked derisively, his picture was recorded a close range.

A South American ocelot was the next pictorial subject, and the scene was repeated. Unlike other jungle cats, the spotted beast assumed a phlegmatic pose. Mrs. Ditto explained that this was the moment of uncertainty when no man could predict its next movement. The ocelot's flight is determined by no advance warning if trembling muscle or measuring eye. "Kirk" edged in with his camera. Nose to nose, the picture was taken.

To see this athletic photographer on the job is to marvel at his curious sixth sense of caution. In reality, ready to spring toward escape at the slightest gesture of attack, he appears to his four-footed subjects as a superman, challenging them with affected bravado.

They even like him. One animal, a king-size mountain lion, seems actually to fear him, remembering a flash bulb. The beast takes it on the lam when he sees "Kirk" and his camera.

"I grew up with many of these animals," he explained, "for I worked around the zoo when I was a kid. The lioness, Sheba, is my favorite. I'd still fondle her only for the fact that now she is grown and is in the cage with new animals that don't remember me.

The vicious ponderoso and other wild hogs are awesome creatures to most zoo fans, but Kirkpatrick enjoys climbing into their cages, fraternizing while they pose for him. Long before he got on familiar terms with tigers, lions, Indian leopards and black panthers, he drove a zoo bus around the park, introducing them to visitors who preferred a respectful distance for their observations.

Kirkpatrick injects personality into his pictures. He captures the subtle guardedness of green-glazed eyes as well as the charm of an apparently sleeping tiger. The sculptural pose of the Arctic polar bear, Pancho --- hind end on a ledge, the parabola of powerful shoulders downhung over a drinking pool --- is a "natural" for him.

His high-speed camera has recorded strikingly the fluid lightning leap from ground to tree of the elongated cheetah, at the moment the beast's body-long tail serves as a perfect balance-stick for the feat.

Formerly a repairman for Southern California Telephone Co., Kirkpatrick chucked his job to devote full time to photography of animals.

December 23, 1945, San Diego Union, B-2:7. American Association of University Women give poinsettias to Naval Hospital.

December 25, 1945, San Diego Union, B-1:1. Junior Chamber of Commerce and **San Diego Union** sponsored prize-winning outdoor Christmas displays (illus.)

December 27, 1945, San Diego Union, A:2. Army transfers Camp Callan to Engineer Corps.

December 27, 1945, San Diego Union, B-1:5. Memorial site problem to go to Committee.

Revival of a citizens' committee that sometime ago began studies intended to result in recommendation of the three best sites for a veterans' memorial building was decided upon at a council conference yesterday.

Donald Hanson, who had been chairman, has asked to be relieved of membership, it was stated, and councilmen authorized Mayor Harley E. Knox to offer the post to either Guilford Whitney or S. E. Mason.

The original committee attempted, at the council's request, to narrow its choice of sites to three before a recent election at which formation of a veterans' memorial district was defeated. The committee reported inability to agree. Recently in response to inquiries made by Glenn Rick, city planning director, committee members have indicated a willingness to continue their work so that a selection of sites may be made by the public at some future election.

1946

Summary of Events in 1946

(Note: Dates of events are approximate only)

Groundbreaking for Cabrillo freeway (February 6, 1946)
Sailors incinerate black swan at San Diego Zoo (February 26, 1946)
Move to use Ford Building as a civic auditorium (April 7, 1946)
George W. Marston died (June 1, 1946)
Civic Light Opera in Wegeforth Bowl (July 5, 1946)
Indian Village burned orders of Fire Department (July 18, 1946)
City Council approved conversion of Federal Building
into a civic auditorium (August 28, 1946)
U.S. Navy returned Balboa Park buildings (October 1, 1946)
Beavers at San Diego Zoo (October 6, 1946)
City Council approved using \$25,000 from Camp Callan fund
for rehabilitation of organ and municipal gymnasium
(October 16, 1946)
Park carillon presented to city (December 25, 1946)

January 6, 1946, San Diego Union, II, B-1:1-2, B-2:3-4. City planning sticks close to Nolen survey despite changes; the city has pulled out of the plan to construct a hall of justice and the county will build it alone for its own use; the harbor department urges the city council not to give the state a site for a state building at Pacific Highway.

January 7, 1946, San Diego Union, A-7:5. Engineers from the 11th Naval District Public Works Department will join civilian engineers tomorrow in beginning of a survey of city property now occupied by the Navy in Balboa Park in order to make estimates of rehabilitation costs, W. Allen Perry reported last night.

On December 18 the Navy moved its western gate from the California quadrangle east to the Plaza de Panama. It marked the first withdrawal of the Navy from any part of the park area it has occupied since early in 1942.

Observers point out that the Ford Building was never included in the Navy compound and could be used now for a city recreation center. The Ford Building houses a vocational school.

January 12, 1946, San Diego Union, II, 1:4. In its 71st annual meeting the San Diego Natural History Museum Society yesterday elected six directors. J. W. Sefton, who has been president since 1922, announced that the Navy has given no indication when it will release the museum. It has been used as an adjunct to Naval Hospital since start of the war with exhibits stored in the basement.

January 22, 1946, San Diego Union, II, 1:5-6. Malcolm J. Rogers quits as head of San Diego Museum of Man; Malcolm Farmer, member of staff, to succeed him; Rogers resigned after 20 years of services as curator and acting director; museum building now occupied by Navy.

January 25, 1946, San Diego Union, A-7:6. Reginald Poland predicts Fine Arts Gallery in park to open soon; only a skeleton Navy staff now is carrying on work in the building.

February 6, 1946. Groundbreaking for Cabrillo Freeway.

February 10, 1946, San Diego Union, B-1:8. Uniform cages for "small fry" at San Diego Zoo.

As the first step of a carefully planned expansion program, the zoo has just completed a set of modern, uniform cages to house many of the smaller animals, it was announced yesterday by Charles Cotant, president of the San Diego Zoological society.

Located in the northeast corner of the zoo, the new unit contains squirrels, porcupines and other smaller rodents.

Formerly these animals were scattered all over the zoo; many were in out of the way cages. Whereas formerly some of the animals were shy and reticent, now in their new homes they have become more friendly and congenial, according to zoo officials.

A large-scale landscaping program also has been started in and around the small animals unit.

Plans for other improvements, called for in the society's post-war plans, were discussed at length at the February luncheon meeting of the zoo's directors yesterday.

February 17, 1946, San Diego Union, A-5:2-5. Trail broken on Cabrillo Freeway's 6th Avenue extension.

February 17, 1946, San Diego Union, B-1:1. City recreation expansion plan nears completion; surrender of park buildings by Navy key to program; cost set at \$45,000; Pauline des Granges appointed general supervisor of playgrounds and community centers; Ralph Smith appointed supervisor of municipal athletics.

February 22, 1946, San Diego Herald, 1:4, 5:4. Death came to Willie, a black swan at the San Diego Zoo yesterday, in one of the cruelest acts of vandalism on record here.

Police said today that two sailors poured lighter fluid on the birds feathers and then touched it with a match.

A peaceful resident of the zoo for 22 years, Willie was a native of Australia, valued at \$200.

February 24, 1946, San Diego Union, C-2:1-3. Civic Light Opera to use Wegeforth Bowl at San Diego Zoo for summer season, by Constance Herreshoff.

Everyone likes seeing light opera in Wegeforth bowl's beautiful sylvan setting. Many of us have pleasant memories of the light operas produced there before the war. If San Diego runs true to form, Wegeforth bowl's 1200 seats will be filled at every opera performance.

February 24, 1946, San Diego Union, C-5:1-5. Red Cross work at Naval Hospital praised.

April 17, 1946, Minutes of a special meeting of the City Manager's Park Rehabilitation Committee, held in the District Officers' Club, Balboa Park, Wednesday at 12:30 p.m.

The meeting was called to order by Chairman G. Aubrey Davidson. Members present; Mr. Davidson, Mr. Sessions, Dr. Bard, City Manager Fred A. Rhodes; ex officio members, Mr. Calland and Mr. Perry, Mr. Arthur Kennedy, representing Construction Quantities, Mr. Loveck and Mr. Wohler of the company, attended the meeting.

Mr. Kennedy delivered the report to the Committee and made a general statement on the structure of the report as outlined in the letter of transmittal. The total cost estimate, based on the Navy's labor contracts in effect during the compilation of the report, amounted to \$531,149.02. On the basis of an anticipated labor increase of approximately eighteen percent to become effective May 1st, the total figure will increase to \$668,800.00.

Mr. Rhodes raised the question of the figure to be used in submitting the report to the Navy. Mr. Davidson expressed his opinion that the figure shown in the report should be used, and the Navy put on notice that the expected increase will raise that figure to approximately \$700,000.00.

Mr. Davidson stated that the purpose of the survey and report was to arrive at the amount required to put the buildings and areas back in the condition existing at the time the Navy occupied them in 1941. He questioned whether the Navy would do the work or appropriate a sum for the work to be done under the direction of the City Manager. Mr. Kennedy was convinced that it would be impossible for the Navy to prepare adequate plans and specifications for Navy bids on the work, therefore, an appropriation would be made to the City.

Mr. Sessions questioned whether the estimate was ample to cover overhead charges, taxes, insurance, etc. and care for general and sub-contractors. Mr. Kennedy stated that the breakdown on the report showed about \$175,000.00 for labor, \$30,000.00 for material and \$180,000.00 for fixed charges. Combining the direct labor charges, and the proportion of labor in the fixed charges would amount to a total labor output of about \$260,000.00. This, combined with the materials, would bring the contractor's work to approximately \$300,000.00

Mr. Rhodes questions the procedure from this point.

Mr. Sessions discussed the use value of the buildings and area during the time of military occupancy, since the Government has paid for similar occupancies in other parts of the country. This item might be used to offset claims the Navy may make for improving the property during their use. Mr. Kennedy stated that he knew of a hotel in Santa Monica and in Van Nuys for which the Navy had paid from fifteen to twenty-five cents per square foot per year. He also agreed to furnish an estimate of the use value or rental charges based upon the square footage of the buildings and area occupied.

After further discussion, it was moved by Dr. Bard, seconded by Mr. Sessions and unanimously carried that the report submitted by Construction Quantities on the cost of re-conversion be accepted as a basis for negotiation with the United States Navy, and that the estimate be forwarded to the City Manager for his action, and to request the City Manager to take every measure possible to expedite the recovery of the buildings and areas for public use.

Mr. Rhodes was of the opinion that it would be more desirable to negotiate directly with proper Navy representatives on the basis of a letter setting forth the figures based on the prevailing wage scale, subject to revision in the event of a wage increase, rather than to attempt to negotiate through the City Council. Mr. Sessions stressed the desirability of striving to reach a settlement which would turn the buildings and areas back to the City in their present shape and provide the sum shown in the cost estimate for their re-conversion.

It was moved by Mr. Sessions, seconded by Dr. Bard, and unanimously carried, that the meeting adjourn.

April 20, 1946, San Diego Union, A-6:3-5. Forum speakers split evenly on mall topic.

April 21, 1946, San Diego Union, A-4:3-4. Abraham Riseman, Exposition building's decorator, dies.

Mr. Riseman came to San Diego from New York and established a decorating firm. In 1915 he was engaged to decorate many of the exposition buildings in Balboa Park.

April 25, 1946, Letter, From: C. W. Nimitz, Fleet Admiral, U. S. N; To: Senator Downey; Serial 842P40 4 15 12; National Archives, Pacific Southwest Region.

My dear Senator Downey:

The Secretary of the Navy has referred to me for reply your letter of April 10, 1946 relative to the facilities taken over by the Navy in Balboa Park, San Diego.

According to information received from the Commanding Officer, Naval Hospital, San Diego, the main buildings in Balboa Park, including the Museum and Fine Arts Gallery have been evacuated. These, with the land, at present, are a subject of negotiation between the San Diego authorities and the Commandant, Eleventh Naval District, as to the restoration necessary preceding the city's re-acceptance.

The Navy desires to retain temporarily the building now being used as the Nurses' Home. The Navy will move out of this building as soon as suitable accommodations can be obtained for the nurses.

The Navy also desires to retain temporarily the buildings being used for the Hospital Corps School in Camp Kidd which, although in Balboa Park, are at some distance from the buildings which were used for temporary hospital facilities. Currently, efforts are being made to find another location for this school so that these buildings may be returned to the City of San Diego.

The Bureau of Naval Personnel maintains a Bachelor Officers Quarters and Transient Officers Mess at Camp Kidd. These will be closed prior to 30 June, 1946.

The request that Laurel Street through the Park be reopened was probably made to the Commandant, Eleventh Naval District. The Commanding Officer, Naval Hospital, San Diego stated that there was no reason known to him why it could not be opened at this time. Information on this subject has been requested of the Commandant, Eleventh Naval District, and the information will be transmitted to you when it is received. It is not anticipated that there will be any objections to reopening Laurel Street.

The Navy will continue to make every reasonable effort to relinquish occupancy as soon as practicable of all buildings in Balboa Park.

Sincerely yours,

C. W. NIMITZ
FLEET ADMIRAL, U.S.N.

April 26, 1946, Letter, From: A. H. Gray, Acting Commandant, Eleventh Naval District, San Diego 30, California; To: Chief of Naval Operations; ND11/NH16/A1-1/? (Serial No. P-22895); National Archives, Pacific Southwest Region.

Subj: Naval Facilities, Balboa Park, San Diego, California

Ref: (a) CNO ltr Op 40H/bhm Serial 852P40 to Com11, dated 19 April 1946.

1. In reply to ref. (a) the Department is informed that the Navy has vacated all buildings facing Laurel Street in Balboa Park, San Diego, which includes the Museum and Fine Arts Gallery, and has offered to return these buildings to the City and to open Laurel Street to the general public providing the City will assume responsibility for police protection of these vacated buildings..
2. The City Manager of San Diego, acting on recommendations of the Park Commission, has declined to accept custody of the buildings in question, at this time, and has recommended that the Navy retain custody until after the Park Commission has had time to study the engineering survey report covering the estimated costs of restoration of park buildings and grounds. For this reason it is impracticable to open Laurel Street to the general public, since this would involve the removal of all barriers to this area, with the resultant responsibility of the Navy to furnish police protection for all unoccupied buildings in Balboa Park.

3. The Commanding Officer, U. S. Naval Hospital, San Diego, states that it will be necessary for the Hospital to continue the use of the House of Hospitality (Bldg. No. 215) for Nurses' Quarters; the Canadian Legion Building (Bldg. No. 233) for Commissioned Officers' Mess; and the area known as Camp Kidd, which is used for Hospital Corps Training School, until a later date. However, the use of these buildings and Camp Kidd by the Navy will not affect the opening of Laurel Street.
4. Negotiations between the City of San Diego and the Commandant, Eleventh Naval District, regarding the restoration of park buildings and grounds, are proceeding satisfactorily and, it is hoped, will result in an early settlement of this case.

cc: BuDocks (F-50
CO, NSNH,SD

A. H. GRAY,
Acting Commandant.

April 30, 1946, San Diego Union, B-12:3-5. Admiral Chester W. Nimitz, chief of naval operations, speeds park return to San Diego.

May 1, 1946, Minutes of a special meeting of the City Manager's Committee on the Rehabilitation of Balboa Park, held in the Officers' Club, Balboa Park, Wednesday.

Following luncheon, the meeting was called to order at 1:00 p.m. by Chairman Davidson. Present: Mr. G. Aubrey Davidson, Mr. Fred A. Rhodes, City Manager, Mr. Frank Young, Dr. Howard B. Bard, Mr. Roland Hoyt, Mr. Glenn Rick, Mr. Leo Calland, Mr. Arthur Kennedy and Mr. Herbert Loveck of Construction Quantities and Mr. W. Allen Perry.

Mr. Davidson reviewed the previous action of the Committee and questioned Mr. Young on the wage scale base on overtime above forty hours per week for labor costs. He stated that the current agreement in San Diego permitted additional hours on Mondays through Fridays at time and one-half over forty hours, and double time other days.

Mr. Kennedy stated that the estimate was prepared on the basis of double time for all work over forty hours.

Mr. Hoyt entered the meeting.

Mr. Young mentioned the fact that he found no allowance for lumber required for scaffolds. He suggested that an individual analysis be made of the summary of each building toward the end that all man-hours, materials and situations would be adequately covered. He questioned the possibility of restoring \$6,000,000.00 of work for the proposed \$531,149.02.

Mr. Kennedy stated that the man-hours had actually been more or less padded on the overall basis, to which had been added the overhead costs --- all of which could be substantiated with the Navy.

Mr. Young felt that the estimate should provide for the subcontractors percentage on overhead costs and an additional percentage for his particular craft.

Mr. Davidson requested the Committee to determine the policy to be followed in amending the report to be submitted to the Navy, and raised the question of an adequate allowance for complete restoration of the staff and exterior plaster on the Prado buildings.

Mr. Rhodes suggested that the current pay schedules and unit price costs be adjusted to the quantities as shown, and an allowance for a general contractor be included in the new report. It was his opinion that the staff and plastering should not be included in this restoration report, but should be submitted as a separate request in view of the Navy's former promise to do this work.

Mr. Kennedy was of the opinion that the City could rightfully claim the staff and plaster restoration since it was not possible for the City to go in and do this work during the Navy's occupancy and the Navy left it undone. Furthermore, since the Navy did not do it when it should have been done, the cost is now greater.

Mr. Young suggested that both spot and detail checks be made on the data indicated in the report and these findings be adjusted to the new wage scale and the contractor's allowance.

It was moved by Dr. Bard, seconded by Mr. Rhodes and unanimously carried, that the Chairman of the Committee be empowered to obtain the services of Construction Quantities and Mr. Frank Young to check and restudy the survey, report and estimate.

Upon motion of Dr. Bard, seconded by Mr. Hoyt and unanimously carried the meeting adjourned on call of the Chairman.

May 2, 1946, San Diego Union, A-5:2-3. Conversion of Ford Building into auditorium hits snag.

Glenn A. Rick, city planning director, wrote Rhodes that before the commission can act it must have referred back to it by the city council a previous recommendation for an auditorium site at the head of the proposed Cedar Street mall.

May 7, 1946, San Diego Union, A-1:8, A-2:3. City Council shelves Cedar Street Mall; City to concentrate on remodeling the Ford Building as a civic auditorium.

May 8, 1946, Letter, From: Construction Quantities, 124 West Fourth Street, Los Angeles 13, Calif.; To: City of San Diego, Calif., Balboa Park Board.

Gentlemen:

As discussed with you, we are submitting, herewith, an Estimated Use Value on Park Buildings occupied temporarily by the U. S. Navy. The unit used is 20 cents per square foot per year.

Building Use Values

Canadian Legion Building (4/21/44 - 4/21/46) - 2 years		
3300 sq. ft. x 2 years at 20 cents		1,320.00
Medical Science	19,840	
War Memorial	18,700	
Food and Beverage	52,000	
Better Housing	32,225	
Red Cross	11,600	
House of Hospitality	47,625	
House of Charm	14,850	
Floral Association	3,000	
Photographic Arts	1,600	
Pacific Relations	12,000	
Palace of Education	22,000	
Palace of Entertainment	15,250	
Calif. State Armory	27,000	
Municipal Gym	27,000	
Federal Building	24,000	
Globe Theater	8,100	
Curiosity Shop	768	
Old Tavern	<u>1,826</u>	
339,384 sq. ft.		

Above buildings occupied 12/10/41 - 5/10/46 - 4-1/2 years	
339,384 sq. ft. x 4-1/2 years @ 20 cents	<u>305,445.00</u>
TOTAL BUILDING USE VALUE	306,765.00

Land Use Value

Assuming a value of \$10,000.00 per acre to be amortized over a period of 14 years.

83.77 acres x \$10,000 x 4-1/2 years use divided by 14	<u>269,261.00</u>
TOTAL LAND USE VALUE	269,261.00

May 8, 1946, Letter, From: Benjamin Perlman, Captain, U. S. Navy, General Inspector; To: Commandant; ND11/EN3-17 BP/Ns Serial A-429, National Archives, Pacific Southwest Region.

Subj: Inspection of Naval Activities in Balboa Park, San Diego, in Regard to Expediting Release of Property Not Navy Owned; and Recommendations - Report of.

1. Inspection of naval activities in Balboa Park, San Diego, as to the earliest termination of use of non Navy-owned property and the return of same to City authorities has been made, and is herewith reported.
2. Preliminary Facts
 - (a) Use of Buildings #1, #17, #22 and #24 in Balboa Park has been formalized, after occupancy by the following documents: (1) Official Release by City dated June 20, 1945; (2) Permit Agreement between San Diego Society of Natural History and United States; (3) Permit Agreement between Fine Arts Society of San Diego and United States; (4) Permit Agreement between San Diego Museum Association and United States.
 - (b) Certain other buildings and grounds were taken over by the Navy by direction of the Commandant. Building #233, former Canadian Legion Building, was offered free by the City to the Naval Hospital, it no longer being wanted by the City.
 - (c) City could not legally charge rent for use of buildings or grounds.
 - (d) Permit Agreements with the three above-named societies provided for certain lump sum "rental" payments for the period from March 5, 1943 to June 30, 1945, and certain monthly payments thereafter until terminated.
 - (e) Navy also provided for monthly rental of a residence for housing and exhibiting the Fine Arts Gallery.
 - (f) Cost of public utilities, maintenance, landscaping, etc., has been covered mutually by the Navy and the City.
3. Facts as to Present Occupancy
 - (a) All buildings facing Laurel Street, i.e., Hospital Unit #2, the subjects of the City Release and the Permit Agreements (par 2(a)), have now been vacated by the Naval Hospital, the last being the Nurses' Quarters, Bldg. #215 (former House of Hospitality)
 - (b) The Commissioned Officers' Mess, Bldg. #233 (former Canadian Legion Bldg.) is in use by the Hospital. It can be vacated at any time. Being on the exterior side of Park Boulevard and not adjacent to Laurel Street, it is not one of the structures in the present clamor for Park use.
 - (c) Hospital Unit #3, the Camp Kidd Hospital Corps Training School, is in use. Captain Jacobs states it can be vacated within several weeks. BuMed in letter dated April 30 desires this school be moved back to main hospital reservation, classes of 600 be continued, and the Balboa Park facilities be vacated as soon as practicable and not later than December 31, 1946.

- (d) Hospital Unit #4 consisting primarily of wards is idle and can be vacated immediately.
- (e) Hospital Unit #5 consisting primarily of bag rooms is idle and can be vacated immediately.
- (f) Hospital Unit #7, consisting of storage buildings can be vacated immediately; but suitable storage place would be required elsewhere for stowage of surplus materials until disposed of.
- (g) Camp Kidd, consisting of BOQ's, barracks and Officers' Mess, can be vacated. Transient personnel can be housed in facilities elsewhere. The Mess fills an important need for recreation and morale of transient officers, which cannot be adequately met by any other existing facility. However, this need must be secondary to the more important consideration of urgency in terminating Navy's occupancy of Balboa park, and final arrangements with the City concerning restoration. The number of officers on board the Mess has shrunk from a maximum daily of 251 to 144; the number of officers received during a month from 533 to 264; and the number of meals served in the Closed Mess during a month from 8534 to 4782. Average daily meals in Closed Mess during April 1946 were 34 breakfasts, 46 lunches, 80 dinners, with a maximum of 108 dinners. Within the last few days, the figures average 33 breakfasts, 35 lunches and 41 dinners. The number of meals served daily averaged as high in the first quarter of the calendar year 1946 as at any time previous, i. e. 361. However, in April 1946 in shrank to 221.

4. Facts As to Restoration.

- (a) Each of the three Permit Agreements stipulates that the "Government shall, in accordance with terms of a release from the City of San Diego, executed June 20, 1945, restored the building comprising the premises when the use and occupancy of the premises is terminated."
- (b) The Release by the City stipulates: "That when the Government shall relinquish the use and occupancy of said buildings, it will restore each of said buildings to the condition to which it existed at the original date of occupancy thereof by the Government (March 5, 1943) upon demand by the City; damages resulting from acts of God and/or earthquakes, flood and/or other disaster, excepted." This "applies to specific buildings: Bldg. #1, San Diego Society of Natural History; Bldg. #17, Fine Arts Society of San Diego; Bldg. #22 and #24, San Diego Museum Association (also known as San Diego Museum of Man)."
- (c) Commandant in letter dated April 1, 1943 to City Manager, stated in regard to holes made in floor of Museum Building for plumbing: "This letter is being written to assure you and Mr. Abbott that the Navy will return these floors to you in as good condition as when taken over by the Navy."
- (d) Commandant in letter dated March 15, 1946 to City Manager, requested that the City accept custody and responsibility of the buildings facing Laurel Street (excepting House of Hospitality then in use). This is to be done in advance of any financial settlement on restoration.
- (e) Park Director in letter dated April 6, 1946, to City Manager advised that the Park Commission in acting on this proposal, (par. D), recommended against accepting the buildings from the Navy until a satisfactory financial agreement for restoration is achieved, inasmuch as the Navy had not make a financial agreement with the City for restoration of these and other buildings and since acceptance of the buildings would make the City responsible for their maintenance, protection and policing.
- (f) City Manager in letter dated April 12, 1946, to Commandant forwarded the Park Director's letter and recommended that the Navy retain custody of the buildings until after the Park Commission would have had time to study the report of a survey carried on by engineers employed by the City. This survey "has proceeded to a point where some discussion can be had as to the estimated cost of restoration."

- (g) Commandant in letter dated April 26 to CNO advised CNO of this refusal of the City to accept custody, and of the necessity therefore of the Navy's keeping Laurel Street closed for protection of the unoccupied buildings. "Negotiations proceeding satisfactorily" and early settlement expected.
- (h) City Manager's attitude was that it is the Navy's responsibility to restore the buildings to their former condition before turning them over to the City, and to police the street and vacant buildings until then. (San Diego Union of May 3, 1946.)
- (i) Captain Fogg, District Public Works Officer, had orally informed the City Manager that the Navy Department's policy was to settle restoration by cash payments in lieu of actually undertaking the physical work of restoration.
- (j) Commander Phipps, PWO of Hospital, in a memorandum dated December 19, 1945, stated that at that time the City Manager would prefer that the Hospital not press for return of the buildings to the City.
- (k) Captain Fogg had orally reminded the City Manager that figures of restoration costs must be in detail rather than lump sum and be reasonable and just, in order to stand Navy Department examination prior to approval.
- (l) Each Permit Agreement stipulates that a 60 days' notice in writing to Permitter to terminate agreement is required.

5. Opinions re Restoration:

- (a) Captain Fogg is on the opinion that the City Manager is not desirous of receiving money in settlement for restoration, because the City Council might decide to use the money for other purposes, and City Manager therefore seeks to have the Navy undertake the work of restoration.
- (b) Captain Fogg is of the opinion that the costs of restoration as determined by the survey has not been definitely set or declared, pending what he believes are City's efforts to raise the figures from approximately \$500,000 to \$1,000,000.
- (c) Captain Fogg is of the opinion that the City will avoid weakening its position through accepting partial custody in the meantime.
- (d) The undersigned is of the opinion that the Navy could clear the situation by advising in writing: (1) that it has vacated all buildings facing Laurel Street, and is ready to vacate all other buildings and grounds of the Park now in use by it; (2) that it is awaiting estimates of the survey from the City in order to undertake negotiations for a cash settlement of restoration costs; (3) that such settlement is the policy of the Navy Department instead of actual work by the Navy; (4) that City present survey report for negotiations without delay; (5) that the Navy is as desirous as the City to make the Park available to the public, and urges the City to take custody of vacated buildings pending settlement; (6) that there are no Navy patients in the Park; and (7) that Navy personnel of the currently occupied spaces do not constitute a hazardous traffic problem if Laurel Street is opened to the public.
- (e) When a favorable opportunity presents itself during negotiations, the Navy should seek acquiescence of the City in continued use of the Officers' Mess building in Camp Kidd, and the Officers' Mess in the Canadian Legion building. The restoration costs to be included in the settlement, though Navy continue use of these buildings.

6. Recommendations

- (a) Action be taken in line with paragraphs 5 (d) and 5 (e) above.
- (b) Action be expedited in vacating remainder of buildings now in use, except the two Officer's Messes. Action on the latter to be governed by the City's reaction to feelers for Navy's continued use. If City declines such concession, these two buildings should be vacated promptly.
- (c) Notices of termination to be presented to the three Permitters immediately.
- (d) Provide suitable storage elsewhere for the materials now in Hospital Unit #7. Incidentally, at this moment, this Unit presents an unsightly scene of a junk yard.

/s/ BENJAMIN PERLMAN
Captain, U. S. Navy,
General Inspector.

May 8, 1946, San Diego Union, A-1:2 (Bad microfilm copy in San Diego Public Library). A2:2. Council revived battle over Cedar Street Mall; referred program back to Planning Commission; pushed auditorium plan.

May 8, 1946, San Diego Union, B-1:5-6. City pools to open to public this summer.

May 9, 1946, San Diego Union, A-11:3-4. Navy to proceed with care in return of park to City.

The city manager's remarks obviously stirred up some indignation among real estate officers, who claim they would be blamed later if the navy came up on the short end of restoration negotiations.

May 9, 1946, San Diego Union, B-1:1. Glenn Rick declares Ford Building is "white elephant."

Rick declared he felt it would be unwise to spend half a million dollars on the wrong location for a convention hall and maintained the Ford Building is not easily accessible, either by private or public transportation. Rendering it more accessible would mean only additional expense, he asserted.

May 10, 1946, Letter, From: L. W. Jacobs, Captain (MC) USN, Medical Officer in Command; To: Chief of the Bureau of Medicine and Surgery, Washington, D. C.; Via: (1) The Commandant, Eleventh Naval District, San Diego, California: NH16/L9-3; National Archives, Pacific Southwest Region.

SUBJECT: Moving of the Hospital Corps School from Camp Kidd - Tentative Plans for.

Reference: (a) BuMed ltr. BUMED-P-MFD NH16/L9-3 dated 30 April 1946.

1. In compliance with reference (a), the facilities of the Hospital Corps School, U. S. Naval Hospital, San Diego, California, can be returned to the main grounds of the hospital within approximately a month.
2. The complement of 600 students can be accommodated with the present facilities and the proposed staff of twelve (12) officers and thirty-eight (38) enlisted men, in addition to the Nurses detailed as instructors.
3. No structural changes are indicated.

/s/ L. W. JACOBS
Captain, (MC) USN.

May 12, 1946, San Diego Union, B-1:1-2, B-16:3. Shelving of Mall plan would leave City with several alternatives; parley set Tuesday.

May 13, 1946, Memorandum, From: J. W. Allen, District Medical Officer, 11th ND; To: Captain Benjamin Perlman, USN, General Inspector, 11ND; ND11/NH16/(I-a); Declassified 4/5/89; National Archives, Pacific Southwest Region.

Subj: Report of Inspection of Naval Activities in Balboa Park, San Diego, In Regard to Expediting Release of Non-Navy Owned Property, Comments on.

Ref: (a) Your conf. ltr. ND11/EN3-17 BP/NS, Ser. A-429, dtd. 8 May 1946.

1. The District Medical Officer concurs, generally, in the report and recommendations made by the General Inspector on the above subject. The following added information is submitted.
2. Since the inspection made on 8 May 1946, the nurses have been removed to the main hospital reservation from Building No. 215 (formerly House of Hospitality).
3. All buildings in Unit No. 2; that is, buildings along Laurel Street; have now been vacated and Government property has been removed for storage.
4. The U. S. Naval Hospital Corps School, now housed in Hospital Unit No. 3 (Camp Kidd), could be transferred to the main hospital reservation in a few weeks, provided the number of men under training did not exceed 600.
5. Hospital Unit No. 4 is now entirely vacated, with the exception of one building which is housing the laboratory of Epidemiology Unit No. 80. This unit will be moved to the main hospital laboratory this week, and all Medical Department property from this unit will be placed in storage.
6. Hospital Unit No. 5 has been vacant for some time and has been declared surplus.
7. Hospital Unit No. 7 is now being used for storage of surplus Medical Department material. These storage facilities are particularly accessible to the hospital and to the Park buildings. A barbed wire fence has been erected around these buildings, and a security watch is maintained at all times. It would be rather impracticable and somewhat costly to remove the material stored here to some other location. Much of the material has already been declared surplus and will probably be removed and disposed of, in accordance with current directives, within a short time. Other items of equipment, now stored out in the open and which contribute to the unsightly condition mentioned in the subject report, will also be disposed of within a short time. These buildings can then be vacated promptly.

/s/ J. W. ALLEN
District Medical Officer
11th ND

May 13, 1946, San Diego Union, B-12:4-5. Reopening of Balboa Park buildings due.

Immediate action to reopen three public institutions in Balboa Park will be taken as soon as the Navy releases these buildings but at least two months will elapse before the public can be admitted to them, it was disclosed yesterday.

May 14, 1946, Memorandum; From: A. K. Fogg, Public Works Officer, 11th Naval District; To: Chief of Staff, ND11/NH16/ A1-1, A16-3 (PW); Declassified, 4/5/89; National Archives, Pacific Southwest Region.

Subj: Release of Balboa Park by Navy.

Ref: (a) General Inspector's conf. ltr. to Comdt. ND11/EN3-17 Serial A-429 dated 8 May 1946.

1. Immediately following the outbreak of the war, the Navy took over certain buildings and areas in Balboa Park for emergency hospital and training station purposes. They comprised the buildings and areas now retained with the exception of the Museum of Natural History, the Museum of Fine Arts and the Museum of Man. Due to provisions of the City constitution whereby Balboa Park property cannot be leased or sold, the City took the position that it would not opposed such use by the Navy but that it could enter into no leases for it. Consequently, there is no written agreement or lease covering it. However, by Resolution 78659 of Sept. 21, 1943, the City Council stated "Be it resolved by the Council of the City of San Diego as follows:

That any claims which the City may or might have against the United States Government for the value of the use and occupation by the Government of said buildings, or for damages suffered by the City arising out of or occasioned by such use and occupation, be, and the same are, hereby, waived, under the express condition and for the consideration that within a reasonable time, not to exceed six (6) months after the termination of the existing National Emergency, the Government will vacate such buildings, and wholly at the Government's expense, repair and restore them to the same condition in which said buildings were at the time they were taken over by the Government; provided, however, in case structural changes or improvements have been made by the Government in said buildings, which in the judgment of this Council will not interfere with the purposes for which said buildings were formerly used by the City and the cultural and educational or societies that occupied the same, the Council may be resolution waive the right to require the Government to restore such buildings to their original condition, and accept them in their altered or changed condition.

Be it further resolved that the waiver of the City's right to claim compensation for the use and by the Government of said buildings, or for damages occasioned thereby, as in this resolution provided, shall not be construed as preventing or estopping to any degree whatsoever any person, society, institution or group that was occupying any of said buildings by permission from the City at the time the same were taken over by the Government from claiming or asserting against the Government any rights which they may have to compensation or damages by reason of or arising out of the taking over of said buildings by the Government."

2. The Museum of Natural History, the Museum of Fine Arts and the Museum of Man were taken over by the Navy for hospital purposes in March, 1943. The City was, again, unable to enter into leases for these buildings, even as a third party, but stated that it had no objection to working agreements being entered into between the Government and the Associations concerned to cover restoration of the Associations' personal property and payment of expenses incurred as the result of the Associations' inability to occupy the premises formerly used by them. Such agreements were entered into. The payments were called "rents" in the agreements but actually were reimbursements for expenses.
3. The first step in the process of restoring leased properties is to secure from the owners a list of restoration items desired or required. To this end, the City has had a Committee and a firm of engineers working since late last fall on the preparation of such a list and estimates of cost to accompany it but it has not yet been presented for consideration. I have spoken to both the Mayor and the City Manager from time to time about the desirability of expediting its submission in order to expedite return of the Park Buildings to the City. This will necessarily have to be checked by the Navy as recommendations cannot be submitted to the Department without substantiation. Finally, to get this of record, a letter, signed by the Commandant, dated 15 March 1946 was written to the City Manager requesting the City to accept custody and responsibility for the buildings and to open up Laurel Street for public use prior to the settlement of costs of restoration. This offer was declined. Neither the Mayor nor the City Manager seem to be in any particular hurry to get back into the Park, as far as I can judge from conversations with them. I believe that the statements appearing in the papers from time to time have originated from other sources largely.
4. We cannot go ahead with closing out this matter without considering the City's desires in the matter of restoration but I concur in Captain Perlman's suggestion in paragraph 5 (d) of ref. (a) that we again advise the City in writing of our desire to expedite settlement.

A. K. FOGG
Public Works Officer

11th Naval District.

May 15, 1946, Letter, From: A. H. Gray, Acting Commandant, Eleventh Naval District; To; Chief of Bureau of Medicine and Surgery; ND11/NH16 (A7-Am) Serial W-3349; National Archives, Pacific Southwest Region.

Subj: Moving of the Hospital Corps School from Camp Kidd - Tentative Plans for.

1. Forwarded.
2. It is recommended that the transfer of the Hospital Corps School from Camp Kidd to the main grounds of the Hospital at San Diego be accomplished not later than 15 June 1946.

A. H. GRAY

May 15, 1946, San Diego Union, A-1:3, A-2:2. Cedar Street Mall tossed back in Planners' laps.

May 16, 1946, San Diego Union, B-1:1-4. Planning group weighs Federal Building and Ford Building in Balboa Park as auditorium candidates.

Preliminary estimates made in reports to the city manager and reported to the city council put the cost of converting the Federal Building at \$200,000 and the Ford Building at \$500,000. Neither included the cost of access routes.

May 20, 1946, Letter, From: A H. Gray, Acting Commandant, Eleventh Naval District; To: Mr. F. A. Rhodes, City Manager, City of San Diego; ND11/NH16/A1-1/A16-3 (PW); National Archives, Pacific Southwest Region.

My dear Mr. Rhodes:

In my letter to you of 15 March 1946 I stated that the Naval Hospital had completed use of the buildings in Balboa Park facing Laurel Street, with the exception of the House of Hospitality and requested that the City accept custody and responsibility in order that Laurel Street could be opened to the public and the City could make such use of the buildings as it desired. In your letter of 12 April 1946 you requested that the Navy retain custody until after the Park Commission had time to study the report of the engineers, employed by the City to make a survey of the items and cost of restoration. It was also indicated that no buildings would be accepted for return until such time as a satisfactory financial agreement for restoration is achieved.

Since that time there has been considerable publicity in the local papers adverse to the Navy's position in the matter and protests have been lodged with the Secretary of the Navy relative to it. The retention of guards and fire protection has been considered necessary in view of the City's desire not to accept responsibility. The House of Hospitality has been vacated so that the Navy is now out of all buildings along Laurel Street. Arrangements are being made to vacate buildings at Camp Kidd at an early date. The engineers' report has not been received as yet.

It is understood that City officials have been advised orally of the Navy's general policies and requirements in the matter of restoration of leased properties but it is desirable to have these of record. Before such cases can be closed out and financial settlement made, it is required by the Navy Department that the Commandant submit a report on the following items for all Government-owned improvements.

Original cost,
Value in place,
Removal cost,

Salvage value,
Restoration cost.

All of the above to be submitted in sufficient detail to permit of checking by the Department.

It is also the policy of the Department to make financial settlements with the owners in lieu of actual restoration by the Government. Under this arrangement, title to the improvements passes to the owners, the value of the improvements being deducted from the restoration cost.

It will be apparent from the above that receipt of the engineers' estimates referred to above is an essential first step in negotiating a closure of this case. It will also be apparent that a considerable time element is involved in coming to an agreement on values and in processing the matter through the Navy Department after agreement is reached locally.

The Commandant is very appreciative of the past cooperation of the City relative to the Navy's occupation of Balboa Park and is desirous of returning it to public use at the earliest possible date. He is willing to consider any suggestions that the City may care to offer to further this end.

Your comments would be appreciated.

Sincerely yours

A. H. GRAY
Acting Commandant.

May 23, 1946, San Diego Union, A-9:2-3. San Diego policy blamed for park opening delay.

Washington, May 22. A policy tussle between the city of San Diego and the navy about conditions under which the service will return Balboa Park buildings and land to the city was rekindled here as the navy blamed the city for the delay in reopening the park to the public. The navy already has vacated park buildings along Laurel Street, including the Fine Arts Gallery and the Natural History Museum, but Fred Rhodes, city manager, has declined to accept them until the city park commission looks over a navy engineer's report on what it will cost to restore the navy-acquired Balboa area to its pre-war condition, Adm. D. C. Ramsay informed Sen. Sheridan Downey (D-Calif.).

May 29, 1946, Letter, From: F. A. Rhodes, City Manager, City of San Diego; To: Captain A. H. Gray, Acting Commandant, Eleventh Naval District, San Diego 30, California; ND11/NH16/A1-1/A16-3 (PW); National Archives, Pacific Southwest Region.

My dear Captain Gray:

Answering your letter of May 20, I wish to state that the considerable publicity which you mentioned, was not of my making. It was just a case of poor writing of a bit of news which was rewritten by a man who didn't know anything about the subject and wanted to make a story. He certainly succeeded. The reporter stated he was sorry such mistakes happen; but once in a while, they do.

I have since stated that I had no quarrel with the Navy; and if there was any delay in accepting the buildings in Balboa Park, it was my fault and not that of the Navy. That still stands.

The City employed a firm of engineers to make an estimate of cost of rehabilitating the Park buildings. These estimates were based on wages which prevailed at the time the estimates were

started. Due to the fact that on May 1, 1946, a new labor wage scale agreement was entered into throughout the San Diego area, it was necessary to completely revise the cost estimates of rehabilitating the buildings in Balboa Park occupied by the United States navy. This revision should be completed and approved by the City within about two weeks and copies filed with your office. I have felt it was necessary then to have representatives from the Navy and City go over the buildings, checking the items outlined in the report, so that both may be sure the estimates of quantities are correct. After this procedure, I see no reason why the City should not accept the buildings and open Laurel Street; but I can readily understand it would be some time before actual settlement could be made.

You understand, of course, that the improvements made for the hospital occupancy were primarily for the operation of such an institution and would have little value for park purposes. In most instances, these alterations were detrimental to use of the building for civilian programs. We feel there can be little improvement value deducted from the restoration cost mentioned in your letter of May 20.

The City of San Diego was happy to be in a position to accommodate the Navy in providing these buildings for war emergency use; and I am positive all the Navy officials stationed in San Diego appreciated the value to the Navy at that time. There has never been any controversy between the City and Navy officials, both having always cooperated to obtain beneficial results.

Yours very truly,

/s/ F. A RHODES,
City Manager.

June 1, 1946, San Diego Union, A-1:1, A-2:5-6, A-6:5-6. George W. Marston, San Diego's honorary first citizen, dies; merchant who helped growth of city was 95.

June 1, 1946, San Diego Union, B-2:1. EDITORIAL: GEORGE W. MARSTON

It is given to few men to love long enough to reap as full a measure of satisfaction from his earlier efforts as Mr. Marston gathered through the years. Long regarded as the community's first citizen, his advice and counsel were sought by scores of groups and individuals up until his last illness. They had learned to lean heavily upon his opinions and decisions.

June 2, 1946, San Diego Union, A-1:4, A-B:4. City mourns Marston's death; remembrance period proclaimed by Mayor Harley Knox.

June 2, 1946, San Diego Union, B-16:7. City recreation budget \$400,000 for fiscal year starting July 1 will be met partially by an estimated income of \$146,000, Leo Calland, recreation director, said yesterday; Mission Beach and water sports are expected to produce about \$70,000; the stadium's midget auto races, motorcycle events, football games, soft drink concessions, parking lot and school board contract are estimated to produce about \$59,100.

June 5, 1946, San Diego Union, B-12:2. Simple, quiet services mark Marston burial.

June 6, 1946, San Diego Union, B-3:1. Leo Calland says recreation agencies are not a cure for youth evils.

June 7, 1946, San Diego Union, A-7:5. Sam Hamill, chairman of the Metropolitan Plans Committee, proposes City Council and City Planning Commission pursue plans for a mall for public buildings between Civic Center and Balboa Park; also advocates inner belt freeway route.

June 11, 1946, San Diego Union, A-1:6, A-3:7. Bulk of Marston's estate goes to son, four daughters; \$43,000 bequeathed to other individuals, institutions; petition for probate entered.

June 12, 1946, San Diego Union, A-5:3-4. Board of Education expressed disapproval of City using Russ Auditorium as a public meeting place; said City should have its own theater or auditorium.

June 13, 1946, San Diego Union, A-5:4. Balboa Park swimming pool will reopen for summer season Saturday.

June 15, 1946, San Diego Union, A-1:5, A-2:3. Naval Hospital waste charged; usable equipment tossed in city dump; Senate Small Business Committee investigating.

June 20, 1946, San Diego Union, A-11:2. City Park Commission estimate yesterday set at nearly \$1,000,000 the cost of repairing 23 Balboa Park buildings to pre-Navy occupancy condition.

Members of the city park restoration committee will confer tomorrow with Capt. Alden K. Fogg, 11th Naval District Public Works Officer, in the first step toward settlement of municipal claims.

Terms approved by the committee may be placed before the city council at its meeting next Tuesday, said City Manager Fred A. Rhodes.

June 24, 1946, San Diego Union, A-4:2. Haida Indian collection of everyday tools, utensils, gathered by the late Dr. B. K. Wilbur, received at the Museum of Man.

June 25, 1946, San Diego Union, B-12:5. Camels moved into modern quarters at San Diego Zoo.

June 29, 1946, Letter, From: F. A. Rhodes, City Manger, City of San Diego; To: Commandant, Eleventh Naval District, San Diego, California; National Archives, Pacific Southwest Region.

Dear Sir:

Enclosed are two copies of the estimate of re-conversion costs of the buildings in Balboa Park. This estimate was prepared by Construction Quantities, a Los Angeles firm of engineers. The labor costs are based upon the present Labor Union wage scale.

It is requested that you have your engineers check the estimate in detail. All items upon which there is a difference of opinion, can then be brought out at a conference between Navy representatives and the City's Rehabilitation Committee. As soon as you have had the itemized list checked, the City would then be willing to take possession of the buildings and release the Navy from the obligation of keeping the area closed while negotiations are progressing.

It is generally understood that the Navy is not yet ready to vacate the Officers' Club in the building formerly known as the Educational Building and also the Officer's Club located on Park Boulevard, formerly known as the Canadian Legion Building. The City will not insist that these buildings be vacated immediately; however, if the park is open to the public, it would probably be necessary for the clubs to maintain a man at the door to prevent non-members of the club gaining admittance. The Navy personnel stationed in San Diego have always maintained friendly relations with the citizens in the past. It is desired to have that feeling continue in the future.

In looking over this report, I note there is no credit given on the salvage value, on the theory that improvements put in for the benefit of the Navy were not improvements required by the City. It would, therefore, appear that some of the buildings, which have to be removed entirely, might be disposed of by the Navy, and a salvage value obtained by the Navy.

These matters, however, will be discovered by your engineers and amicably worked out in future conferences.

Respectfully,

/s/ F. A. Rhodes/City Manager.

July 5, 1946, San Diego Union, A-5:3. "Mikado" tonight in Wegeforth Bowl at San Diego Zoo.

July 9, 1946, San Diego Union, A-8:5. "Mikado" presented in lively fashion.

July 14, 1946, San Diego Union, C-2:1-3. Large families will get break in Wegeforth Bowl's presentation of "Mikado"

July 14, 1946, San Diego Union, D-1:1-8. Thirteenth annual show recalls history of Silvergate Riding Club.

July 16, 1946, Letter, J. B. Oldendorf, Vice Admiral, U. S. Navy, Commandant Eleventh Naval District; To: Mr. F. A. Rhodes, City Manager, City of San Diego; ND11/NH16/N19 (PW); National Archives, Pacific Southwest Region.

My dear Mr. Rhodes:

Receipt is acknowledged of your letter of 29 June 1946 with which you forwarded the detailed claim for restoration of Balboa Park. This is now being checked over. Further conferences on the subject will be arranged with you by Captain Fogg, if necessary.

I am very well pleased to note that the City is agreeable to the retention of use of the Officers' Mess buildings by the Navy until such time as other provisions can be made. This action on your part will be highly appreciated by all. Arrangements will be made to maintain a man at the door to prevent intrusion by non-members, as you suggest.

The Navy has all the data it requires on the City owned buildings. It is my intention to recommend to the Navy Dept. that payment in cash to the City be made in lieu of actual restoration in such amount as may be finally decided upon. Retention of these buildings by the Navy is not necessary for such negotiations as remain. In line with your suggestion, I desire to turn the keys to those buildings over to the City, remove the guards from the gates and open the grounds to the public at the earliest possible date. I would appreciate confirmation from you as to the date the City will take over.

It will probably be necessary to keep the Government-owned buildings locked until such time as final disposition is approved by the Navy Department. It is assumed that there will be no objection by the City to entrance into the Park of personnel necessary for dismantling them, should this procedure be decided upon.

Very truly yours,

J. B. OLDENDORF,
Vice Admiral, U. S. Navy
Commandant, Eleventh Naval District.

Subj: Balboa Park, San Diego, California - Claims of the City of San Diego arising from the use thereof by Navy.

1. In December of 1941 an area of approximately 66 acres, together with all City owned buildings and improvements located thereon in Balboa Park, San Diego, California, excepting three museum buildings, were taken over for Governmental use in furtherance of the war effort. The museum buildings, consisting of the Fine Arts Gallery; the Natural History Museum and the Museum of Man, were taken over on March 5, 1943. It was found that before the City owned buildings could be used for the purposes required, it was necessary to make extensive alterations. These alterations were made. In addition to the alterations to the City owned buildings, other buildings and improvements were needed and were constructed at Government expense. The Army also constructed buildings on certain other lands in Balboa Park in

December of 1941 and the early part of 1942. Some of these buildings were transferred to the Navy in September 1944 and the remainder were transferred in October of 1945. These Army installations are designated Units 4 and 5 and Spanish and Indian Villages on maps forwarded herewith. These installations occupied an area of approximately 26 acres.

2. At the time of the initial occupancy by the Navy of the original 66 acre tract, together with improvements located thereon, the City of San Diego in letter dated December 24, 1941, enclosed herewith as encl. 1, advised "that the City of San Diego is powerless to lease to the Government any portion of Balboa Park or the buildings located therein and that necessarily, therefore, the Government's occupancy of the buildings and the portions of Balboa Park required by it must be based upon such wartime power and authority as the Government may possess." The City has never changed from this position and although the matter has been discussed at length with City representatives to try to obtain a lease or permit from the City to cover the Government's use of Balboa Park and the buildings located therein and set forth the Government's obligations arising from said use, nothing could be done because of the refusal of the City to change the position taken by the City that it had no power to lease the park property.
3. Permits were obtained for the use of the Fine Arts Gallery; the Natural History Museum and the Museum of Man buildings from the respective museum societies which occupied these buildings. At the time of the execution of these permits, the City executed a release which released the Government from any and all claims arising from or because of the use and occupancy by the Government of the said buildings on condition "That when the Government shall relinquish the use and occupancy of said buildings it will restore each of said buildings to the condition in which it existed at the original date of occupancy by the Government (March 5, 1943) upon demand by the City; damages resulting from acts of God and/or earthquakes, flood and/or disaster, excepted." At the time of execution of the foregoing release by the City, indication was made that the City would claim restoration for the remainder of the property used by the Government in Balboa Park similar to the requirements set forth in the conditions contained in the aforesaid release.
4. When it was determined, early in 1946, that there would probably be no Navy need after June or July 1946 for the Balboa Park property, the matter of returning said property to the City was discussed with City representatives. The City's representatives indicated that the City intended to make a claim for the cost of restoring the park property, including the museum buildings, to the condition which existed at the original date of occupancy thereof by the Government.
5. Thereafter, the City employed the "Construction Quantities," a Los Angeles firm, to make the estimates of restoration costs. In making the estimates, a representative of the Public Works Department, Eleventh Naval District, accompanied the "Construction Quantities" employees and checked the items and quantities at the site during the survey.
6. All Naval personnel has been removed from the Park property except for a security watch and employees at the Officers' Clubs, located in buildings formerly known as Educational Building and Canadian Legion Building. All collateral equipment has also been removed and all that now remains is considered to be fixtures or real property. The result of negotiations to have the City retake possession of the premises immediately and assume responsibility of all property located thereon, pending settlement of City's claims, is stated in Encl. 4 in letter from the City of San Diego dated September 12, 1946.
7. The City of San Diego, by letter dated June 19, 1945, submitted the report of "Construction Quantities" as the basis of the City's claim for use of the Balboa Park property. This letter, together with the estimate, is forwarded herewith as encl. 2. The estimate was checked by the Public Works Department, Eleventh Naval District, and the City was informed that certain items could not be justified, that they would have to be eliminated in some cases and changes in others and that credit would have to be allowed for any salvage value of Government installed buildings, improvements or alterations. The City replied that the estimate as submitted failed to

include certain items which had been overlooked and that these items should have been added to the original claim. It was further stated that they would look into the items which were objected to and revise their statement of claim and make an allowance for salvage. After the preliminary discussions a meeting was held July 24, 1946 in the office of the Park Commission in Balboa Park. The City was represented by the City Manager and the City Park Commission. The Eleventh Naval District was represented by the District Public Works Officer and the District Planning Officer. The items in the claim of the City which were questioned and the items the City claimed should have been included in the original estimate were discussed fully. During the discussion the City agreed to submit a revised estimate. The original estimate of the cost of restoration was for the sum of \$947,855.82. The revised estimate and settlement offer of the City is for the sum of \$790,850.33, and, in addition, the City to receive title to Government buildings, improvements and alterations located on the park property. This offer is considerably less than the original claim submitted by the City. The revised estimate is set forth in letter from the City to ComEleven, dated July 29, 1946, and is forwarded herewith as encl. 3. All items of the original claim of the City as revised have been checked and have been found to be in line with the present costs of material and labor in the San Diego area. The quantities of the items to be restored have also been checked and have been found to be fair and reasonable and not in excess of what will be required to restore the premises. Encl. 4 sets forth itemized costs, together with justification of the balance sheet items submitted in the revised estimate. In substantiation of the value of the Government owned buildings and improvements, bids were requested from local contractors (1) on the basis of demolishing and removing the buildings with the contractor to retain the salvage material and (2) the contractor to demolish but the salvage material to go to the Government. All contractors refused to bid on the basis of the Government retaining the salvage material; but did submit bids on demolishing and removing the buildings with salvage to be retained by the contractor. These bids did not include the removal of concrete foundations or slabs. These bids are considerably below the \$50,000.00 figure agreed to by the City as the fair salvage value of these improvements. The \$50,000.00 figure covers only the salvage value of the Government owned buildings and improvements in Units 2 and 3 and Spanish and Indian Villages and does not include materials installed or used in altering and remodeling City owned buildings. Estimates made by the Public Works Department show that the salvage value of the materials used or installed in altering and remodeling the City owned buildings will not exceed the cost of their removal and, in many instances, it is estimated the salvage value will be less than the cost of removal. The alterations and remodeling which was done by the Government will have to be removed before the buildings can be used by the City for City purposes; the alterations and remodeling being of a type that would serve only the purposes of the Navy. Consequently, the alterations and improvements installed in the City owned buildings has no salvage value over and above the cost of removal and in view of the additional fact that unless extreme care is exercised in removal of this material, damage costs to existing buildings will exceed the salvage value of the material, it has therefore been agreed, after making a complete survey, that it is fair to set up the salvage value of this material against the cost of removal thereof on even terms and to have the one balance the other.

8. The Government owned buildings located in Units 4 and 5 have been sold at public sale and removal will be completed by the end of September 1946. These buildings have not been included in the buildings, alterations and improvements proposed to be transferred to the City at the \$50,000.00 figure. The City has agreed to allow the Government to continue to use the two Officers' Clubs in Balboa Park as long as they are needed as these buildings have not been included in this survey.
9. Encl. 5 consists of two maps and a summary. Map (1) shows the area occupied and map (2) shows the area occupied and, in addition, has been marked to show the City owned buildings and the Government owned buildings in Balboa Park. The summary shows the dates of occupancy and the estimated minimum fair rental of the City owned lands, buildings and improvements. This enclosure gives a good picture of the area occupied and readily reveals the many benefits and advantages, not to mention the convenience enjoyed by the Government in

the use of this property in furtherance of the war effort. The estimated minimum rental of \$498,292.89, while not an issue in the proposed settlement, gives a fair idea of the minimum rental the City would claim if it saw fit to make such claim, in addition to its claim for restoration.

10. Encl. 6 sets forth the list of Government owned buildings, improvements and alterations in Units 2 and 3 and in Indian and Spanish Villages, together with their estimated cost.
11. In conclusion, after considering all factors involved, it is recommended that the offer of the City to accept the sum of \$790,850.33 and the transfer of title to the City of all Government buildings, improvements and alterations located in Balboa Park in Units 2 and 3 and Indian and Spanish Villages and in consideration thereof to release the Government from any and all claims of any nature whatsoever arising from the Government use and occupancy of Balboa Park be approved. It is considered that the subject officer of the City of San Diego as set forth above is fair and equitable. It is recommended that a form of Release Contract, setting forth the terms and conditions of the offer of the City as set forth, be forwarded for submission to the City of San Diego so that when funds are available there will be no delay in the execution of the Release Contract in a form acceptable to the Navy Department.

(Article ends here. The Pacific Southwest Region of the National Archives should be checked in an effort to locate missing sections.)

September 24, 1946, Letter, From: J. B. Oldendorf, Vice Admiral, U. S. Navy, Commandant, Eleventh Naval District; To: Fred A. Rhodes, City Manager; ND11/NH16 (PW); National Archives, Pacific Southwest Region.

Dear Sir:

The settlement proposed by the City of San Diego, as set forth in letters from the City dated June 29, 1946; July 29, 1946 and September 12, 1946 regarding the Government's use of the Balboa Park property, has been forwarded, together with recommendation that it be accepted, to the Navy Department, Washington, D. C. As was recently agreed to in conference in my office that the City would accept return of the Park after the aforesaid recommendation had been made, please be advised that the custody of said Park property will be returned to the City on October 1, 1946.

I wish to thank you for the many past favors that have been granted by the City and assure you that they are appreciated.

Very truly yours,

J. B. OLDENDORF
Vice Admiral, U. S. Navy
Commandant, Eleventh Naval District.

September 27, 1946, Letter, From: J. B. Oldendorf, Commandant, Eleventh Naval District; To: MOinC, U. S. Naval Hospital, Balboa Park, San Diego, California; ND11/NH16/A1-1/? (Ser. No. P-24331); National Archives, Pacific Southwest Region.

Subj: Surrender of Possession of Balboa Park to the City of San Diego.

1. Arrangements have been made with the City of San Diego for the surrender of possession of the Balboa Park property to the City of San Diego on October 1, 1946.
2. It is requested that a formal tender of possession of the property be made to the City of San Diego. It is suggested that it be accomplished by the delivery of the keys to the Park buildings to the City Manager at his office in the Civic Center, San Diego, California on

October 1, 1946. A letter of transmittal should accompany the delivery of the keys, stating that the keys are being delivered and that the Government considers the delivery thereof as a formal surrender of possession of the Park property to the City. It is suggested that the delivery of the keys, together with the aforesaid letter be made by yourself or your executive officer.

J. B. OLDENDORF
Commandant.

(In writing) Del. By Lt. (jg.) Perry, 9/30.46

October 1, 1946. U. S. Navy returned buildings in Balboa Park to city.

October 2, 1946, San Diego Union, B-1:1. G. Aubrey Davidson, San Diego's new first citizen, here 60 years, by Henry Love (illus.).

Sixty years ago today G. Aubrey Davidson, then a boy of 18, stepped down from a train at the Santa Fe depot, took a look at dusty Broadway --- then known as D street --- eyed a one-horse street car slowly moving along and prepared to step right back on the next train out.

"But I'm glad now that I didn't give in to my first impulse when I saw San Diego," said the man who has little competition for being the San Diego's area unofficial first citizen since the death of the late George W. Marston.

In his office in the Bank of America, where he is vice-president, Mr. Davidson looked back with interest on his 60 years association with this community --- but characteristically looked forward with enthusiasm to a new and better San Diego.

HAS WALKED WITH KINGS

Since that time in 1886 when he arrived, he has walked with kings and the leading figures of this world who have visited San Diego at the two Expositions and at intervals between.

But he has steadfastly declined public office, although giving unstintingly of his time and energy to civic enterprises.

Born in Kentville, Nova Scotia, June 21, 1868, he got his first job as a clerk on a Canadian railroad. His older brother, Leonard, and his parents came to San Diego and their enthusiasm started Gilbert Aubrey Davidson westward to a new country.

"If they hadn't been so enthusiastic about San Diego I don't believe I would have given it a try, after seeing it that day in 1886," he commented yesterday. "But I wasn't here long before I got a job at \$50 a month at the Santa Fe headquarters in National City. I was payroll clerk, and also served in that capacity for the builders of Sweetwater dam when that water unit was built."

ENTERED BANKING IN 1907

Promotion followed and Mr. Davidson was called to the Los Angeles offices of the Santa Fe. But he spent the week-ends with his family in San Diego. He was auditor for the railroad's coast lines when he decided to go into another business --- banking --- in 1907.

He had heard that the late John D. Spreckels was going to build a new railroad to the east --- the present San Diego & Arizona Eastern --- and thought it would help San Diego. So he organized the Southern Trust and Savings Bank, which later became the Southern Trust and Commerce Bank, first million-dollar capital bank here and a pioneer in branch banking in this area. This bank with its branches later was the nucleus for the Bank of America's system in the San Diego area.

MARRIED 50 YEARS AGO

Before he came back to San Diego in 1907 – for good --- he was married in Los Angeles in 1896. His son, Gilbert Aubrey, Jr., lives at Pasadena, with the two Davidson grandchildren.

When he came back as a banker, Mr. Davidson became president of the Chamber of Commerce in 1909 and prepared a 10-year paving plan to take San Diego out of the summer dust and the winter mud. The thought of that dusty street when he first came here was always in his mind.

The idea of the 1915-1916 Exposition to put San Diego on parade before the world was mainly his and he was its president during its two-year run. He played a return Exposition engagement in 1935-36, as chairman of the board of directors.

MET MANY NOTABLES

His early presidency of the Exposition brought him into contact with notables of the world, many of whom left the autographed pictures that adorn the Davidson office. Among the notables were six presidents or past presidents of the nation, the maharajah Kapurthalia, and other figures famous in politics, art and business.

He was made an officer in the Legion of Honor by the French government.

What does he think San Diego should do now? He has it all figured out.

“We’ve got a job ahead,” he said. “We have a whole new frontier to explore in San Diego. We’ve got to bring our big new population to realize the need for civic betterment. The we’ve got to get together --- all of us --- and do some things.

LISTS PROJECTS

“We must have Harbor dr. finished and beautified; Mission Bay project completed; Balboa Park restored and beautified; the Civic Center project finished; state office buildings, new school buildings, including enlargement of State college; an air terminal building; a new Union station postoffice; any added naval facilities that are required; a low-grade highway to Imperial valley and the east; a war memorial with veterans’ building; civic auditorium and opera house; more street projects; construction of a tourist hotel near Palomar; with an air-field there; building of Palomar county park; completion of city sewer and water projects; construction of additional hotel facilities; a new highway to Ensenada and Lower California; tourist hotels in Borrego valley; improved railway and bus service; air service to Central and South America and the Orient; and making San Diego a port of call for more steamship lines. And a whole lot of other things.”

WANTS ANNUAL FESTIVAL

Yes, and a two-month Carnival of the Americas as an annual festival to be held in the summertime, making San Diego attractions and opportunities better known to the whole world --- a sort of annual festival that he feels San Diego needs so badly and can have.

And this from a man who never had any great amount of formal education, and who almost didn’t become San Diego’s unofficial First Citizen because it was dusty that day when he arrived, October 2, 1886.

October 2, 1946, San Diego Union, B-1:6-8. City takes over Balboa Park from Navy; exclusion of public for year probable.

Yesterday the navy returned Balboa park to the city.

What it meant, City Manager Fred A. Rhodes explained to the city council yesterday, is that the guards who keep the public out and let the navy in are paid for by the city instead of by the navy.

The city manager said that the public would be excluded from the park grounds, probably for another year to prevent damage to partially wrecked buildings. Meanwhile, he said naval officers with passes would be admitted by the guards to visit the two naval officers' clubs maintained within park confines.

"I think we are in a very poor position when we let the military proceed through the park to their clubs, while our own citizens are turned back," declared Councilman Charles B. Wincote.

"People can't even use Cabrillo bridge to walk to the zoo," commented Councilman Walter W. Austin in referring to a statement by Rhodes that pedestrians would not be permitted to pass through the park on Laurel Street. He said the guards will pass civilian vehicular traffic.

Wincote insisted that the navy should relinquish its club near the Ford building.

"I'd like a report on this club business," he said. "If the public is kept out, the club should close."

Wincote moved for a report. Austin wanted to leave the affair in the hands of the manager. Mayor Harley E. Knox said that the manager's dealing with the navy are not completed and that any such action as that proposed by Wincote would be premature.

"We're just letting the navy wind us around . . ." Wincote had said when someone else started speaking. "I come from a navy family," he continued. "The navy won't run out on paying to repair whatever damage it has done."

Councilman Charles C. Dail withdrew his second to Wincote's demand for a report on the officers' club situation. Wincote announced he was not withdrawing his motion, but it died for lack of a second, and a motion to leave the problem in the hands of the manager carried.

"I think the navy would appreciate some good straight talk," insisted Wincote.

The discussion started when Dail proposed that the council adopt a policy of returning the park to the public at the earliest practicable moment. Rhodes said it would take at least a year. Councilman Austin commented that the council "should not sit by while the public waits for use of its park. Rhodes said that numerous temporary navy buildings in the park cannot be wrecked until his deal with the navy is complete.

"We can't start repairs until after we get our \$790,000 from the navy," he said.

"You can't satisfy the public that way," Austin had insisted.

October 3, 1946, San Diego Union, B-1:2-4. More salvaged lumber in sight for San Diego; temporary navy buildings clutter former garden spots in Balboa Park between El Cid statue, organ; Navy barracks near Ford Bowl in Balboa park will soon be razed and converted into lumber for homes; City "inherits" park barracks.

Navy barrack-type buildings to be left in Balboa park for the city to use as it sees fit promise a new and valuable supply of building material for veterans' homes, City Manager Fred A. Rhodes said yesterday. Camp Callan has almost been exhausted as a source of such material, he said.

Until the navy pays the city the \$790,000 its local representatives have agreed is due to finance restoration of park buildings and grounds, Rhodes said he will be powerless to start razing the structures.

Meanwhile, he and Russell Rink, assistant to the manager, are studying the entire park situation. As soon as the settlement is completed, he said, they will be ready to move.

First task will be to get wartime temporary structures out of the way. They will hasten homes for the veterans and clear the park in preparation for restoration and new construction, preparatory to throwing the park open to the public.

The city manager said that the \$790,000, which he hopes to receive soon from the Navy department, is a figure agreed upon by the city and 11th naval district officers after a survey of rehabilitation costs made by a firm of Los Angeles engineers for the guidance of the city.

October 6, 1946, San Diego Union, A-12:3-4. Waterway denizen ready for work; Beavers take up abode in Bear Canyon at San Diego Zoo.

For the first time in many years, a pair of beavers have "registered at the San Diego zoo it was announced yesterday at the Balboa park institution.

Mr. and Mrs. Beaver already have established themselves in a "furnished home," at the top of the bear canyon near the northeast corner of the zoo. They have "dug in" a stream, and probably will try to building one of the dams for which they are famous. So far, it is underwater work, but occasionally the busy little animals come up for air --- and a glance at curious San Diegans.

When Mrs. Belle Benchley, executive secretary of the San Diego Zoological society, was at the Salt Lake zoo recently, she admired the beaver exhibit. The zoo director, explaining that beavers are plentiful in the inter-mountain region, offered to send a pair to San Diego, and they arrived yesterday.

The sharp-toothed American beaver, at one time plentiful in many parts of the nation, have become scarce in some states and are now protected by law.

October 16, 1946, San Diego Union, A-9:1. City Council approves Park Repairs Fund.

City councilmen yesterday approved unanimously the use of \$25,000 from the Camp Callan fund for the restoration of the Balboa park open air pipe organ and rehabilitation of a nearby municipal gymnasium for use of the city recreation department.

Mayor Harley E. Knox said he opposed taking any money out of the Camp Callan fund until removal of building materials from the camp is completed.

"We have \$200,000 there that we don't need for any other purpose right away," replied City Manager Fred A. Rhodes.

The mayor also wanted to know where the city would get new flooring for the gymnasium.

"We won't get any," said Rhodes. "We can repair what is there."

Reports from the park had been that the heavy, once glass-smooth floors were in a sad state of repair as the result of the navy's wartime occupation of the park.

October 20, 1946, San Diego Union, A-5:2-3. Lapwings additions at San Diego Zoo.

October 23, 1946, San Diego Union, A-9:3. Improved walks sought in park.

When Vice Mayor Walter W. Austin asked yesterday if anything could be done to improve walks in the vicinity of Roque courts and other recreational facilities in Balboa park near Sixth Ave. and Elm

St., Leo Calland, director of recreation, said that anything done in that vicinity would have to be undone later "when they improve the new entrance to the park."

No action was taken, but it developed later that the two men were talking about different areas. Calland was referring to the tennis courts west of Park blvd. in the vicinity of the zoo.

Austin said he probably will seek action on walks near the Roque clubs at an early meeting.

October 25, 1946, San Diego Union, B-1:4. Navy's Wartime Park Use Becomes Legal.

Wartime use of Balboa Park by the navy was made "legal" by a retroactive use and occupancy permit to be prepared by federal attorneys and City Atty. Jean DuPaul, so that the city may be paid the \$900,000 it claims due for restoration of park buildings..

DuPaul, in explaining the new arrangement yesterday, said that G. E. Arnold, assistant city manger now in Washington, had telephoned him of the navy's desire for a document granting the navy permission to use the park for the period from about Dec. 7, 1941 to Oct. 1, 1946.

The navy reportedly was told that it might use the park for wartime activities and the city was told the navy would restore any buildings altered to meet the navy's needs.

What the navy wants, DuPaul said he understood, is an opportunity to fulfill that verbal arrangement rather than to pay a claim for damages for properties appearing to have been used without permission.

October 27, 1946, San Diego Union, A-7:1. Ninth annual Fiesta of the Nations set by Pacific Relations group at San Diego Women's Clubhouse.

October 27, 1946, San Diego Union, A-10:2-3. Best name for baby chimp will earn pass at San Diego Zoo.

October 29, 1946, San Diego Union, B-1:1. Kate Sessions to be honored by Pacific Beach Chamber of Commerce.

November 1, 1946, San Diego Union, A-5:3-4. Major W. E. Barker, game warden, lauds San Diego Zoo.

November 1, 1946, San Diego Union, A-6:3. City planning Organ Pavilion reopening soon.

Reopening of the Balboa Park Organ Pavilion in time for Thanksgiving open air service is the aim of City Manager Fred A. Rhodes, he said yesterday.

Most of the wooden benches that were in the area in front of the organ have been damaged or destroyed in the five years in which the navy occupied the park, he said, and must be repaired or replaced.

The organ has been kept in condition throughout the war period, but needs an organist before regular concerts can be arranged, in keeping with a long-established pre-war practice.

Just as promptly as he believes it can be done with safety, Rhodes said he will reopen that park to the public. One institution that probably will be reopened soon is the Old Globe Theater, used by a little theater group before the war.

The entire Palisades area will be thrown open relatively early, Rhodes said. Crews will be put to work without delay in the recreation building, he said, so that it may be restored for use of the city's youth for various athletic games.

The city is not waiting for the \$790,000 navy representatives have agreed is due the city for restoration of buildings damaged by the navy while it was in possession of the park.

November 2, 1946, San Diego Union, A-5:3. Navy weighing Cabrillo National Park's opening.

November 3, 1946, San Diego Union, A-17:2. "Kimba" winning name for baby chimp at San Diego Zoo; Evaristo Perez chose name.

November 3, 1946, San Diego Union, B-1:6-8. Organ will delight music lovers again.

November 9, 1946, San Diego Union, A-4:4. Pacific Beach Chamber of Commerce honors memory of Kate Sessions.

November 10, 1946, San Diego Union, A-15:2-4. Eldon Blocker, animal keeper, leaves San Diego Zoo for job in Fresno.

November 14, 1946, Special Delivery Air Mail; From: R. H. Meade, by direction of Chief of Bureau; To: F. A. Rhodes, City Manager, City of San Diego; ND11/NH16/N19 (PW) FL-12:mmd; National Archives, Pacific Southwest Region.

Subj: Claim of the City of San Diego for restoration costs of the buildings in Balboa Park, San Diego, Calif., furnished to the Navy in the absence of a formal contract.

Dear Sir:

The claim of the City of San Diego, California, for restoring the buildings in Balboa Park is properly a claim for relief under Section 17 or the Contract Settlement Act of 1944 (58 Stat. 649), as the claimants have furnished to the Navy the use of Balboa Park and appurtenances thereto since December 10, 1941, and relied in good faith on the written and oral instructions of the Navy Department relative to restoration of the premises after the evacuation of same by the Navy.

A claim for relief under Section 17 of the Contract Settlement Act must be submitted in writing and shall be under oath, verified by the claimant or by the proper officer of the claimant, and shall be accompanied by the affidavits of the representatives of the claimant and other persons having knowledge of the relevant circumstances. The claim should be prepared in accordance with the principals and procedures established by Regulation 12 of the Office of Contract Settlement under the Contract Settlement Act (Enclosure 1). It is requested that these requirements be fulfilled and the matter forwarded immediately to Bureau of Yards and Docks, FL-12.

Very truly yours,

R. H. MEADE
By direction Chief of Bureau.

Enclosure 1: Regulation 12 of the Office of Contract Settlement.

cc: Commandant, Eleventh Naval District, San Diego, Calif.
District Public Works Officer, 11ND
Bureau of Medicine and Surgery

November 16, 1946, San Diego Union, A-1:3. Rear Admiral John J. Manning, chief of the bureau of yards and docks, has recommended a \$790,000 navy payment to the city of San Diego for Balboa Park restoration costs and sent his recommendation to the department's general counsel for a last-minute checkup on legal phases of the transaction.

November 19, 1946, San Diego Union, A-1:5-6. What's new at San Diego Zoo? will be forum subject.

November 19, 1946, San Diego Union, B-14:4-5. United States loan speeds Civic Theater project.

Early start on plans and specifications for the conversion of the Federal Building in Balboa Park into a municipal theater with a seating capacity of 2700 was assured yesterday when the federal works agency in Washington advanced \$15,200 to pay for the plans.

City Manager Fred A. Rhodes said the action, reported by The Copley Press Washington Bureau, will enable him within a few days to contract with H. Louis Bodmer, San Diego architect, for preparation of plans for the conversion, which it is estimated will cost \$384,020.

The theater with a seating capacity 500 greater than Russ auditorium will have a sloping floor and a large and completely equipped stage, Rhodes said.

The money advanced by the FWA will have to be repaid, without interest, before construction begins, Rhodes said, but he explained that use of the city's credit with the federal agency will permit immediate start on plans, without awaiting budget allocations next June.

November 19, 1946, San Diego Union, B-14:5. Park fund delayed.

Further delays in restoration of Balboa Park and its return to public use developed yesterday when City Manager Fred A. Rhodes was informed by the navy that the city's claim for funds had not been made on the proper forms and that a new claim, accompanied by supporting affidavits, must be filed.

The city, which gave the navy permission to use the park in the early days of the war, has been seeking \$790,000 for restoration of buildings altered or damaged by navy occupancy. The navy still maintains an officers' club in the area from which the public is excluded.

December 1, 1946, San Diego Union, A-6:3. Food for animals poses price problem at San Diego Zoo; the end of OPA (Office of Price Administration) had made grain easier to obtain, but has sent the price of bananas, oranges, lettuce and celery out of sight..

December 9, 1946, San Diego Union, II, 1:2-3. Blestok antelopes arrive at San Diego Zoo from Africa.

December 15, 1946, San Diego Union, A-16:3. The set of chimes recently presented to the City will herald the anniversary of the birth of Christ.

December 19, 1946, San Diego Union, A-16:3-4. Payment for damages to park delayed again.

Washington, Dec. 18. - A navy agreement to pay the city of San Diego \$840,000 to finance restoration of Balboa park veered into another delaying headwind today. General counsel for the navy bureau of yards and docks came up with this new demand. City Manager Fred Rhodes must submit an itemized claim of damages to the park as a result of navy occupation for wartime hospital purposes. The claim must list damages to buildings and land taken over by the navy to show how the \$840,000 figure was arrived at, the counsel advised Rear Adm. John J. Manning, yards and docks chief.

A counsel spokesman expressed some puzzlement that the itemized claim had not already reached the bureau here. He described it as a "protection" to the navy, pointing out that the Balboa park restoration cost was "unusual," in that it was not based on any prior written agreement.

The new twist to the park transaction probably will hold up the payment for weeks. For even after the itemized bill is received here, it must be checked carefully by yards and docks officials, the counsel spokesman explained.

The counsel's ruling that an itemized-item restoration claim must be filed by the city came, ironically, right after Mayor Harley Knox of San Diego, had blamed "federal red tape" for delay after delay in the navy payment.

"Six weeks ago they promised it (the payment) in two weeks and it still is to come," the mayor told the Kiwanis club in San Diego. "Balboa park will not be fully useful until that \$840,000 is paid and we can't tell when that will be."

December 22, 1946, San Diego Union, A-5:3. Captain M. C. Erwin, retired Rear Admiral, recalls how he "captured" Balboa Park for Navy.

How the municipal park was taken over was disclosed by Erwin as a humorous sidelight in the vast expansion of the Naval Training Center, where he served from 1940 to 1942 under the late Capt. Henry Gearing as executive officer in charge of construction. From a station equipped to handle 2000 recruits, the facility expanded into a center which handled a wartime peak of 33,500.

War plans called for naval occupation of the park, but just after the Japs struck Pearl Harbor the navy discovered an army brigadier general already has set up headquarters there. This raised grave questions of protocol, but Erwin --- then only a three-striper --- saved his superiors no end of embarrassment by executing an informal operation of his own.

Loading two trucks with bluejackets, he drove to the park, posted sentries at every building, established guard posts --- and then inquired politely at army headquarters if the navy could help them in moving. The army departed.

Another minor crisis occurred a few weeks later, when three large transports called here to rush marines to the South Pacific. The state of our preparedness being what it was, the leathernecks were armed with mots of the training center's drill rifles --- and it was necessary to fashion wooden weapons for schooling the boots that by then were arriving at a rate of 5000 a week.

In the park, Camp Kidd mushroomed as a center annex. Erwin rented an old boiler and converted it to gas to provide steam for a temporary outdoor galley, where food for 7000 men was prepared. What had been a Shakespearean theater was converted into a scullery.

December 22, 1946, San Diego Union, A-6:2. Park carillon will be heard Christmas Day.

The Balboa Park chimes will peal a Christmas message at civic dedication rites Wednesday from 1 to 3 p.m. The event in Plaza de California, before the steps of the California Building, will be the first public program to be held in the park since the war began.

Dr. Howard B. Bard, former mayor and member of the city park commission, will preside over the dedicatory ceremonies from 1 to 2 p.m. Principal guest speaker will be Major General Arch Howard, U. S. M. C., whose topic will be "Balboa Park in the War."

Mayor Harley Knox will formally receive the gift of the chimes from Dr. Frank Lowe, who presented the 32-chime carillon to the city in honor of his mother, Mrs. Ona May Lowe, of 2555 Fifth Avenue. Roland Hoyt, park commissioner, will unveil the dedication plaque.

December 24, 1946, San Diego Union, II, 1:1. Naval Hospital to remain principle peacetime unit; Vice Admiral Ross T. McIntire, now on leave here, tells of institution's plan, by Howard O. Welty.

From a load of 1200 patients when the war started, the San Diego hospital grew to a peak of 12,068 in December, 1944. More than 170,000 men received treatment there during the four-year war period. The institutions currently has about 1500 patients.

December 25, 1946, San Diego Union, 1:3. City to accept gift of chimes at Balboa Park.

December 25, 1946, San Diego Union, A-6:3-4. Mrs. Florence Scripps Kellogg yesterday gave to the City eleven lots of La Jolla Shores to be acquired by the City and named Kellogg Park.

December 26, 1946, San Diego Evening Tribune, B-10:1. Dedication ceremony of new Balboa Park chimes.

Hundreds attended dedication ceremony of new Balboa Park chimes yesterday held in the Globe Theater, the first public program in the park since the war began.

Dr. Frank Lowe presented the chimes to commemorate the peace and to honor his mother, Mrs. Ona May Lowe of 2555 Fifth Avenue.

The gift was accepted for the city by Mayor Harley E. Knox. . . .

Introductory remarks were made by Dr. Howard B. Bard. Milton P. Sessions, president of the Board of Park Commissioners, spoke on "The Parks and the People."

Other speakers were Major General Arch Howard, U. S. M. C., retired, and W. Allen Perry, director of parks. Invocation was by Dr. Roy Campbell.

Sacred selections were sung by the San Diego Community Chorus. . . . Lt. Paul D. Perry gave a carillon concert.

December 26, 1946, San Diego Union, A-1:4, A-4:5. Park program attracts crowd; Carillon dedicated at public concert.

Ceremonies originally scheduled in Plaza de California were transferred to the adjacent Globe Theater shortly before opening time but attracted an overflow crowd.

After introductory addresses by W. Allen Perry, parks director; Milton P. Sessions, chairman of the park commission, and Maj. Gen. Arch Howard, U. S. M. C., retired, Lt. Paul D. Perry, Carillonneur, opened a one-hour concert with his "Canterbury Chimes" signature.

December 30, 1946, San Diego Union, B-4:3. De Brazza Guenon monkey born at San Diego Zoo; second one born in captivity.

1947

Summary of Events in 1947

(Note: Dates of events are approximate only.)

Dr. Edgar L. Hewett died (January 2, 1947)
New recreation center in Balboa Park (January 5, 1947)
City to make money from sale of Camp Callan rather than to provide material for veteran's homes (January 12, 1947)
Hot rods at Balboa Stadium (January 12, 1947)
Groups assigned to majority of park buildings (January 19, 1947)
Municipal gymnasium reopened (January 31, 1947)
U.S. Navy paid \$790,000 and 35 buildings to city for Balboa Park restoration (February 18, 1947)
Miss Gertrude Gilbert died (March 29, 1947)
Balboa Park Protective Association formed (April 6, 1947)
Voters turned down Cedar Street Mall (April 15, 1947)
Starlight Opera opened season in Wegeforth Bowl (July 6, 1947)
Frederick Law Olmsted, Jr.'s report on Balboa Park Exposition Buildings (July 6, 1947)
Symphony concert reopened Ford Bowl (July 16, 1947)
City Council approved conversion of California State Building into a convention hall (July 23, 1947)
City Building Inspector condemned 7 buildings in Balboa Park (July 25, 1947)
Proposed east wing for Fine Arts Gallery (July 29, 1947)
Park Commission approved construction of Veterans' Memorial Building (August 21, 1947)
Park Commission approved plans to develop Morley Field (September 14, 1947)
Old Globe Theater opened season (October 29, 1947)
Science and Industry Show in Federal Building (November 17, 1947)
Electric Show (December 2, 1947)
Spanish Village rehabilitated (December 3, 1947)
Fine Arts Gallery reopened (December 12, 1947)

January 2, 1947, San Diego Union, A-6:3. Dr. Edgar Hewett, former San Diego Museum director, dies.

During the early 1920s, when the Federal government intensified its efforts to divst American Indians of their cultures and assimilate them into mainstream American life, an influential group of white intellectuals, many of whom lived in the Southwest, rallied around the Indians and began a nationwide campaign to save them from imminent destruction. Vased upon their highly romanticized understanding of New Mexico Puelbo Indians --- who seemed now to bear the brunt of the government's assimilation policy -- the intellectuals believed Native cultures possessed secrets of life that modern American culture lacked,

among them deeply rooted beliefs in community and the principle of unity between man and nature. Reform of U.S. Indian policy seemed imperative if these secrets were to be saved, but those persons whose sympathies lay with the Indians also believed that political reform could not be accomplished without broader efforts to educate the American public about the value of Indian cultures. (1.) A campaign of this kind would not only overturn the policy of assimilation, thus saving Indians from certain destruction, but also provide an essential foundation for the regeneration of an American culture that reformers believed was in serious trouble, the result of an urban-industrial development and the attendant growth of greed and materialism.

By 1922 when John Collier emerged as the most vocal --- and often nettlesome --- leader of the political crusade to save Indians, Edgar Lee Hewett, Director of the School of American Research and the Museum of New Mexico in Santa Fe, was assuming leadership of that campaign's cultural counterpart. Hewett, a master organizer and promoter, was as determined as Collier in publicizing the merits of Indian cultures. Largely through his efforts, Santa Fe became the center of a revival of Indian arts during the 1920s. As much entertainment and spectacle as education, these efforts included the restoration of the Santa Fe Fiesta, creation of the Southwestern Indian Fair for Native arts and crafts, and, to capitalize on the vogue of Indian music then sweeping the country, the sponsorship of numerous appearances by Tsianina Redfeather, the Cherokee-Creek singing sensation.

Tsianina's performances of compositions by Charles Wakefield Cadman, a leading member of the "Indianist School" of composers, lent what seemed an air of authenticity to Hewett's promotions. Hewett believed these appearances served his larger mission to foster "increased knowledge of the Native American race . . . appreciation of its unique culture and . . . recognition of its value and rightful place in the political, economic and cultural development of the future in America." (2) An activist and a singer, Tsianina agreed to perform at these events for precisely the same reasons, seeing in Hewett's promotions an opportunity not only to educate the American public about Indians but also to convince them of the Indian's right to determine their own lives free of Federal government interference. She was also firmly convinced of Hewett's own commitment to the cause, claiming later in her life that he "did not walk apart from the Indian and look at him through the white man's eye. He walked side by side, hand in hand, and felt the heartbeats of his Indian friend." (3)

The sense of comradeship Tsianina saw in Hewett was not always apparent in his early promotion of Indians. Still, it is clear that his friendship with her and his subsequent promotion of the Indian music she performed helped modify his views concerning contemporary Indian cultures. He also became an early supporter of Indian rights for greater autonomy and self-determination, hallmarks of Indian reform later in the twentieth century and foundations of America's multicultural ideal.

We can trace Hewett's initial interest in Indian cultures to the 1890s, when he made periodic visits to Indian ruins in New Mexico. Though a secondary schoolteacher in Colorado at this point, Hewett dreamed of a career in archaeology, not doubt inspired by the work of Adolf F. Bandelier, a Swiss-born ethnologist and disciple of evolutionist Lewis Henry Morgan. Bandelier had only recently discovered ancient cliff dwellings at the Rio de los Frijoles (now Bandelier National Monument). In 1898, as president of the fledgling Normal College at Las Vegas, New Mexico (Now New Mexico Highlands University), Hewett began conducting archaeological excavations on the Pajarito Plateau near Santa Fe and organized the New Mexico Archaeological Society to further interest in his work. Five years later, he abandoned his career in college administration altogether to pursue archaeology professionally, beginning work for the Ph.D. at the University of Geneva and conducting research for the Archaeological Institute of America, notably an archaeological survey that led to the preservation of ancestral Pueblo ruins at Mesa Verde, Colorado, in 1906.

In 1907, he managed to convince the Archaeological Institute of America to establish its American school at Santa Fe, only a short distance from some of the richest archaeological sites in the Pueblo country. Eastern-university-trained archaeologists initially opposed the decision, regarding Hewett with suspicion and believing that Santa Fe was a wasteland. Insistent lobbying at the Institute, however, enabled him to prevail and gain needed recognition for his projects. As a reward for his work, Hewett was appointed first director of the School of American Research and the Museum of New Mexico, educational institutions that were to be housed together in Santa Fe's Palace of the Governors. Restoration of the early-seventeenth-century

structure, under Hewett's direction, served as the cornerstone of a massive revival of Pueblo-Spanish-style architecture throughout the town, ultimately leading to its reinvention for the tourist market as "The City Different." (4)

An important venue for the revival, and for Hewett's interest in Indian cultures, was provided by San Diego's Panama-California Exposition (1915-1917), where he served as director of exhibits. Under his auspices, the fair promoted not only the agricultural and industrial development of the Southwest --- in conjunction with the opening of the Panama Canal --- but also the Spanish and Indian legacies of the region. In keeping with this theme, exposition buildings adopted Spanish mission architecture and, in the case of the New Mexico state building, an eclectic synthesis of Pueblo and Spanish styles patterned after the mission at Acoma Pueblo.

The architecture alone impressed visitors, but the greatest sensation was clearly the *Painted Desert* exhibit, a full-scale Indian village sponsored by the Santa Fe Railroad. Drawn from different cultures in the Southwest, it consisted of some two hundred Indians who were put on display before tourists hungering for authentic experience. As a member of the exhibit's design team, Hewett favored a living history approach. "Here," he explained,

the Indians are at work at their usual occupations, some making pottery, others designing silver ware, still others weaving baskets. There are buildings showing that favorite methods of construction of the Pueblo, Navajo and Apache Indians, and the whole exhibit is as careful a representation of the fast disappearing culture of the American Indian as it is possible to make. (5)

The rhetoric of the "Vanishing American" Hewett employed in this statement was typical of the time, reflecting the cultural biases of San Diego boosters, who as "priest-civilizers," relegated Indians to a romantic past in order that they might celebrate more comfortably the bright promises of the Anglo future. (6) Everything about the *Painted Desert* exhibit tends to support this argument. Indians became frozen in a "primitive time" which, according to Phoebe Kropp, "consigned all their activities to the murky depths of mytho-history and worked to deny them a contemporary social presence." (7) Indeed the original proposal for the *Painted Desert* that Hewett pitched to the Santa Fe Railway sought to capitalize on this assumption. "Now is the last time that such an exhibition of our Indians of the Southwest can ever be arranged," the proposal explained with no small sense of urgency. "Only the older people remember the old life and ways, and every year priceless information is lost as these aged persons pass away one by one." The Santa Fe Railroad would be doing a great service, the proposal concluded, if it rescued "the customs of these Indians from oblivion" so that the public might become better acquainted with "the former life of these tribes." (8)

That Hewett fully endorsed the assumption of Native cultural decline so clearly expressed in this proposal cannot be denied. An evolutionist whose ideas had been shaped by the sequential theory of social development developed by Morgan and promulgated by Bandelier, Hewett was convinced that the Indians who populated the Southwest in the early twentieth century were decadent remnants of a once great civilization. With the widespread influence of Anglo culture, even these remnants could not long endure. The "pure Indian types," he predicted, would inevitably disappear and their ceremonies disintegrate, leaving scientists with nothing more than an archaeological record to study. (9) Thus, Hewett's rather gloomy predictions for Indian tribes of the Southwest served well the agenda of San Diego boosters, who organized the fair as a celebration of Progress. Ironically, however, even as he persisted in the use of Vanishing American rhetoric, Hewett soon began to consider a different fate for Indians, one predicated on the recovery of contemporary cultures rather than on their decline.

Although this transformation of his thinking was not to be fully articulated until the early 1920s, Hewett may have been given the opportunity to take a first step away from his evolutionist assumptions at the Exposition itself. There, he met Tsianina Redfeather, a young Indian singer who in 1917 was enjoying nationwide popularity as the "Cherokee Princess." (10) Born of Cherokee-Creek parentage in Indian Territory in 1892 and educated at the federally supported Eufaula, Oklahoma Indian School, Tsianina early on showed promise as a musician. At the age of sixteen she moved to Denver to study music professionally, beginning her training with John C. Wilcox, Denver's leading voice teacher at the time. (11) Wilcox, in turn, introduced Tsianina to Charles Wakefield Cadman, the American composer whose search for a national

music had led him to read the ethnological works of Alice C. Fletcher and Francis La Flesche and to begin recording Native music, elements of which he incorporated into his popular-style ballads. Cadman was one of several American composers --- among them Arthur Farwell, Charles Sanford Skilton, and Harvey Worthington Loomis --- who began experimenting with Indian melodies early in the twentieth century. They came to be known collectively as the Indianist School, and Cadman quickly rose to prominence among them. His typical, romantic melodies appealed to audiences wherever they were performed. (12)

Part of the reason for the popularity of Cadman's songs came from their presentation. With Wilcox's arrangement, Cadman invited the young Tsianina to interpret his Indian songs in what became a highly successful series of lecture-performances between 1910 and 1917. Dressed in an idealized buckskin fringe-and-bead Indian costume of her own design, her braided hair bound by a decorative headband, Tsianina thrilled audiences informed by romanticized notions of Indianess. In her own words, "the novelty of an Indian interpreter of Indian songs created a furor." (13)

Press reports of the day praised her for her ability to sing the sweet laments of a vanishing people. One critic wrote,

Tsianina has the fine, strong beauty of the aristocrats of her race, a voice that is haunting, appealing --- and more than anything else, Indian. Always in her tones there is a plaintive note, the echoing farway bird-like call of the voices of the primeval forest. The Indian songs she sings proudly, tenderly, sometimes sorrowfully, with a wistful note of pitying love for a vanishing race.

Another writer called her "dainty" and "sweet," an Indian princess with a mellowy contralto voice full of depth and feeling." (14) Emotional renderings of songs like *At Dawning* (1906) and *From the Land of Skyblue Waters* (1909), the latter featuring romantic lyrics by the poet Nelle Richmond Fletcher, helped to catapult Tsianina and her partner Cadman to nationwide fame. (15)

Given their celebrity status, it is no wonder that the two musicians were invited to perform at the closing of the Panama-California Exposition on 31 March 1917. Tsianina was to award prizes for best Indian costume to white children who attended the fair that day. Afterwards, Cadman and the Cherokee Princess were to perform their Indian folksongs. (16) Hewett apparently introduced himself to Tsianina after the awards and invited her to see some of the exhibits he supervised. Along the way, she later recalled, Hewett told her,

My mother made me promise her that when I grew to manhood, I would give all my effort towards doing something for the American Indian that would let the world see him as he is, and not as wild west shows, cheap fiction, and moving pictures present him. The best we can do is save what we can of this priceless heritage and make every effort to comprehend it.

Tsianina was pleased to hear what seemed to be genuine support coming from a white man, especially given what she termed her "deep-seated aversion" to the white race, the result of a history of mistreatment, "crookedness" and factual misrepresentation in schoolbooks that put "the Indian people in a bad light." Hewett, at least initially, appeared to be of a different school of thought. As the tour continued, however, he merely reaffirmed the prevailing cultural assumptions of the day. Without much tact or sensitivity, he showed her an exhibit of skulls, which had been assembled to illustrate evolution's impact on racial variation and advance the connection between biology and race. One of the skulls was that of an American Indian, "I noticed him looking occasionally at my head," she explained.

With no attempt at flattery, he said, "You have made so much out of your life in short a time, and your head is so beautifully shaped I would consider it a great contribution to the history of your people and archaeology, if you would let us have your head when you depart for the Happy Hunting Ground." I made no reply, but inside I didn't feel so good. He frightened me, and I had a secret fear of having my skull on display for all to see. Imagine my relief when my beloved friend left for his Happy Hunting Ground before me.

While Tsianina meant for this to be a amusing recollection of her friendship with Hewett, it clear reveals her dread of becoming yet another of the white man's ethnological trophies, relegated to an exhibit case as a racial "type" with no regard for her humanity or contemporary relevance. Given the elaborate displays of Indians as exotic others that dominated the exposition and informed most Americans very superficial understanding of native cultures, this fear was not unfounded and in her particular case it was unwarranted. "Archeology or no archaeology," she told herself, "no paleface is going to get my head for any purpose." (17) For his part, Hewett revealed in this incident that he was still bound by evolutionary principles that asserted Anglo superiority and left little room for other races in the march of progress. The Indians in particular were relics of prehistory who were doomed to vanish. It remained for Indians like Tsianina to convince him otherwise.

As her autobiography makes clear, Tsianina resented Americans for what she considered a history of duplicity in Indian affairs. The U.S. government, in particular, provoked her deepest wrath for its refusal to extend to Indians the same freedoms granted to others in American society. The policy of assimilation, which had guided Indian affairs, since passage of the Dawes Act in 1887, was being utilized to dismantle reservations through allotment in severality and to divest Indians of their tribal identities. They were to be granted citizenship at the end of this process, with the right, at least in theory, to determine their own lives and destinies controlled by what Tsianina called "an inferior class of white men that were a marauding, diseased arm of their own government." She found consolation for this mistreatment in the words of Abraham Lincoln, the great emancipator, who rebuked Southern slave holders in declaring, "Those who would deny freedom to others cannot long retain it for themselves." (18)

Apparently, Tsianina saw little difference between slave holders of the pre-Civil War South and Bureau of Indian Affairs officials in the early twentieth century, each worked to deny basic rights to a race they deemed inferior. The contradiction between democratic ideas and reality in these cases was painfully clear to Tsianina, and it can be argued that she sought to address it through her work as a singer of Cadman's Indian songs. While she genuinely admired democracy and the ideals upon which the United States had been founded --- so clearly articulated by individuals like Lincoln --- she expressed nothing but scorn for the politicians who claimed to be the representatives of the people, yet subverted democratic ideals. In the case of her own people she believed, "The Indian question is not complicated, the complication in in America's leaders. Are they desirous of bringing to their offices righteous dealing for the good of their country, or fr using their offices for political gain? Past evidence appears to prove the latter," she derisively argued.

What Tsianina wanted was a new breed of politician who respected Indians as free citizens with the right to determine their own lives. "To spoon-feed him like a child, to treat him as an incompetent incapable of making the slightest decision for himself, is to rob him of all initiative and hope. The Indian is tired of being a museum piece. Let him grow up and take his rightful place in the land of his birth." She also hoped Americans, more generally, would exercise their right to vote, in so doing they must insist upon a more tolerant nation. "When our democracy is impelled by the Spirit of God to deal honestly, justly and fairly with our own American Indian, American Negro, American Chinese, American Japanese and all other American citizens, we shall have a democracy that will never die," she explained, "it will flow as a clean, clear river to cover the earth as the waters cover the sea. IT wants no white man's medicines." Her rejection of white hegemony, so clear in this last statement, reflects Tsianina's conception of democracy as the collaborative work of all races, not of one alone, when this was achieved then "the wails of inhumanity, intrigue and dishonesty will fall before the march of the true America." (19)

Of primary concern to her in this new, inner America was that Indians be recognized for the legitimacy of their culture heritage. "We lived in harmony with nature and we never tortured animals in the name of art or sport," she wrote, obliquely criticizing the materialism and anthropocentrism of white society. "The Indian worships his God every hour, every day," she continued, shifting her criticism to the spiritual vacuum which to her also seemed to characterize the dominant society. "The white man worships his God one hour each week." Equally important was her determination that the white man's ethnocentrism be challenged. Toward this end she reflected on her own experience as a student at the Eufaula Indian School. "I learned in school that Columbus discovered America. This would have been news to my ancestors who were here thousands of years before Columbus was born. Figure this out for yourself," she continued. "The white man claims he brought civilization to America. By that he means his own civilization." (20)

As an Indian, Tsianina felt an obligation to enlighten the American public about the heritage of her people. She suggested to them an alternative conception of American history, one that acknowledged the *interplay* of races and ethnic groups rather than an exclusive focus on the Anglo march of progress. Her work as the interpreter of Cadman's Indian songs provided her the leverage she needed to do this. Though the songs themselves were more an expression of nineteenth-century European romantic tradition than authentic Indian music, and Tsianina's performance of them was idealized, she was able to use them not only to establish her own celebrity in the white world but also to gain needed attention and support of whites for fairer treatment of Indian people. (21) Chief among the whites she reached was Hewett, who eventually came to share her views and to work toward their realizations in his own promotional campaigns of the 1920s.

Following the meeting in San Diego, Hewett invited Tsianina and Cadman to come to Santa Fe and participate in the dedication of the Museum of Fine Arts, scheduled for 14 November 1917. The museum was a replica of the New Mexico state building at the Panama-California Exposition and represented the formalization of the architectural revival of Santa Fe that Hewett had envisioned. As such, the museum was to serve as a center for the promotion of regional arts and cultures, though as Cris Wilson has argued, the tendency was to emphasize more the great tradition of European civilization --- vis Spanish culture --- than to honor Anglo, local Hispanic, and Indian contributions equally. (22) Nevertheless, Hewett hoped to bring all cultures together in a display of regional harmony not unlike that for which Tsianina yearned. Representatives of the various Pueblos mingled at the dedication with city and state officials, scientists, artists from the Taos and Santa Fe colonies, and approximately one thousand members of the general public who packed into the museum's auditorium for the ceremony.

Tsianina and Cadman performed some of their best known songs for them, including *From the Land of the Sky Blue Water*. She claimed that the Indians in the audience responded to the music positively

It was revealing to observe how they received Mr. Cadman's music, based on melodies from their own people. They nodded their heads approvingly after each number. In this great southwest country, Mr. Cadman was truly inspired with the opportunity to present his music to the Indian himself. The people gratified his heart because they loved and felt the sincerity of this adopted brother. (23)

It is difficult to ascertain what the Indians in the audience really thought about Cadman's music. Perhaps Tsianina, eager for acceptance by the Pueblo people, freely imagined their approval. At the same time, the Indians may well have been positive in their response, seeing in the music --- as idealized as it may have been --- at least *some* recognition from the white man of their cultural legitimacy. There is also the possibility that they felt compelled by the situation to remain quiet and not express what they were thinking. Whatever their reaction, the dedication was deemed by success by its organizers and set the stage for future collaborations between Hewett and Tsianina.

Beginning in 1919, Hewett embarked on his most ambitious promotion of all. In that year, he and his associates at the School of American Research recreated the Santa Fe Fiesta, an elaborate three-day pageant derived from celebrations dating back to Santa Fe to 1712. Processions, performances, and Indian dances were meant to commemorate the 1692 reconquest of the city by Don Diego de Vargas, and to celebrate, as well, the rich multicultural heritage of Santa Fe and the Southwest. The renewed fiesta clearly reflected a national enthusiasm for historical pageantry in early twentieth-century America that sought to reconcile tradition with a progressive faith in the future. (24) Hewett wanted the Fiesta to be, first and foremost, a folk festival that should be a spontaneous expression of the genius and character of the races which had contributed to the culture of the Southwest, a fiesta in which all the people and the landscape as well would be the essential elements. (25) But it was also to be a tourist event that would fill the city coffers as it educated urban Americans lured to Santa Fe by the romance of its Spanish and Indian past, so effectively imagined in the promotional literature of the Santa Fe Railway, a key player in the city's emerging tourist industry. (26)

Indians,, of course, played an integral role in Fiesta from the very beginning, reenacting major events in New Mexico's story history and staging dancers for the revelers who attended. More often than not, these performances tended toward spectacle, relegating the Indians to a distant past in much the same manner as had the *Painted Desert* exhibit at the Panama-California Exposition.

Hewett might have been satisfied with this form of representation, yet it appears that he now wanted more emphasis on the contemporary scene. His Southwest Indian Fair, an annual event begun in 1922, was designed to encourage Indian arts and crafts through exhibitions of weaving, pottery, painting, beadwork, and jewelry. Exhibitors, categorized by pueblo, competed for cash prizes awarded by the curatorial staff of the Museum of New Mexico. Those winning first place received a \$5 prize; second place garnered \$3. The money was meant to boost tribal economies while ensuring the survival of authentic Indian art. As one program explained, the Indian Fair was critically important by virtue of

the obvious fact that there is a danger of losing to the world the priceless heritage of distinctive Indian art unless something is done to keep it alive . . . An endeavor is being made to secure for the Indians a fair return for their work, to lead them to discover that their arts and handicraft are wanted, and that people are willing to pay enough for them to make it worth while to engage in this line of endeavor. When this is done the question of how to prevent these priceless arts from disappearing from the earth, will be solved." (27)

For Hewett, personally, the purpose of the Indian Fair could be reduced to a simple desire to restore self-esteem among the Pueblos, "Nothing can contribute more promptly to that than the improvement of their economic condition and the restoration of their intellectual freedom," he wrote, echoing Tsianina's own desire for greater freedom for Indian people. With that achieved, he argued, the future of the Pueblos would be assured. In words of caution, however, he believed it was important that whites not become too intimately involved in Pueblo affairs. Beyond economic assistance, embodied by the Fair, he wanted them left alone. As he explained, "there is a danger of too much white man's medicine" in dealing with the Indian and that it is what he does for himself that makes his future character and progress. A sound policy is to leave him alone in most of his personal affairs, merely giving him the opportunity to select and adapt what we have to offer under the guidance of his own judgement." (28) In addition to suggesting that the Indians had a future in America, he was now beginning to entertain the notion of their right to self-determination, in spite of the paternalism that marked so much of his work on their behalf.

The shift in Hewett's thinking about Indians, as hesitant and imperfect as it was in 1922, coincided with his evolving friendship with Tsianina. Beginning in 1921, she was invited to make guest appearances at the Santa Fe Fiesta, where she performed a selection of "Indian" songs by Cadman and others. She stayed with the Hewetts at their home during these appearances, while other Indians, performing in ceremonial dances, were lodged less comfortably at such locations as the St. Catherine's Indian School or in the Palace of the Governors, where many of the dances took place. As she wrote to Hewett, Tsianina did not expect special treatment while staying at his home, "just let me be part of the family," she requested. She apparently abandoned at this time her earlier fear of Hewett-as-Indian-skull-collector, seeing in him now an opportunity to discuss and perhaps even promote her idea concerning Indian rights. Indeed, in 1921, she wrote to Hewett, prior to her visit, "I shall be more than glad to have this opportunity of talking over some plans with you that I think you will be intensely interested in." (29)

More than likely, Tsianina was referring to her idea, still in the development stage, of creating Indian arts programs at select universities. As she wrote to him later, in 1928, "This would be devoted entirely to Indian arts --- taught and developed by the Indian." By then, she had plans to work with Northwestern University, and if that program succeeded, she hoped to open another program at the University of New Mexico, where she wanted Hewett to hold a salaried position. This was most likely a forerunner of the Foundation for American Indian Education that she established, in partnership with the School of American Research, in 1941. (30) She hoped by these efforts to offer Indians more opportunities to determine their own lives, free of Federal government interference. And it is probable that she found a sympathetic ear in Hewett when she initially broached the subject in 1921, particularly since he and his staff at the school were developing their own plans for the Indian Fair at that time.

The shift in Hewett's thinking about contemporary Indian cultures can also be traced to highly charged political issues that burst on the scene in New Mexico and throughout the nation in 1922. In July of that year, New Mexico's Republican Senator Holm O. Bursum introduced a bill drafted by Secretary of the Interior Albert B. Fall which aimed to settle an increasingly antagonistic land dispute between Indians and non-Indians. The Bursum Bill, as it came to be known, proposed to officially recognize through various means the claims of non-Indians who resided on Pueblo lands. Bursum and Fall saw this as the most expedient way to settle land claims and diffuse potential conflicts between racial groups, but the Indians, and the white intellectuals who supported them, including Hewett, saw it as a dangerous assault on Pueblo culture that had to be stopped. A year later, in 1923, Commissioner of Indian Affairs Charles Burke, a faithful servant of the assimilationist policy, began to impose severe restrictions on Indian ceremonial dances, claiming that "these useless and harmful performances" kept natives away from their work, thus impeding assimilation itself. (31)

This challenge to the Indians' religious freedom, in combination with the threat to Indian lands in the Bursum Bill, unleashed a flood of protests from artists and writers from Santa Fe and Taos, who had come to view the Pueblos as the embodiment of an antimodernist vision that extolled the virtues of the Indians' "primitivism." (32) In an effort to save them from the long arm of the assimilationist policy and, more broadly, from the acquisitive individualism and ethnocentrism of urban-industrial America they believed informed it, intellectuals in these communities, working with others in the urban East, launched a nationwide publicity campaign. Their effect included numerous articles in leading newspapers and magazines and guest appearance by Pueblo Indians themselves at elite clubs like the Urban League in Chicago and at such symbolic sites of American capitalism as the New York Stock Exchange. (33) These well-orchestrated salvos were meant to inform the American public of Federal government machinations with regard to Indians and to galvanize a call for reform. Though he took issue with the aggressive, often autocratic tactics of John Collier, leader of this campaign, Hewett generally supported the protection of Indian cultures from these latest twists in Federal policy. "It is clearly our duty," he wrote in 1923,

to do everything possible for the conservation of the native American race. There are still among them numerous tribes not ready for decline, and the race as a whole is proving to be one of first importance to the human family . . . it is a race of the finest character, industrious, moral and capable of becoming a most valuable element in our citizenship . . . From now on there should be no division of opinion on the question of giving the Indian a square deal. (34)

Hewett escalated his own cultural campaign so that the elusive "square deal" might be realized, and, in so doing, he politicized it. Teams of representatives from the School of American Research visited the Pueblos, seeking to enlist their participation in larger numbers of dances and ceremonies now being added to the Fiesta and Indian Fair. (35) Special tours of the pueblos were arranged in conjunction with these events. Their popularity among tourists is perhaps best measured by a 1925 article from the Santa Fe *New Mexican* that reported how a special trip to Santo Domingo to view the Green Corn Dance led to enormous snarls of cars and trains making special stops near the pueblo "As usual," the article wryly commented, "the crowds piled up on the roofs and under the portals until it looked as if some of the Indian houses would collapse under the strain." (36)

In order to protect ceremonies like this one from Federal government intervention, Hewett wrote personally to Charles Burke to express his disapproval of the ban on religious dances. In a more strident attack on Bureau of Indian Affairs policy that appeared in a 1923 article, he wrote: "It must be remembered that the Pueblos are an ancient mature race. They are not infants or incompetents. Coercive authority over them as to their religion is unwarranted under the government, a violation of our institutions, and repugnant to fair-minded men." (37) If he was defending his own interests and those of Santa Fe in this statement, as surely he was, Hewett was also beginning to defend the Indians' religious freedom. This gave his cultural campaign an important political edge that was necessary in the larger struggle for Indian rights

Seeking wider publicity and star appeal for his politically charged promotions, Hewett repeatedly called on Tsianina to perform during Fiesta. She was only too happy to oblige, seeing in turn true dedication to the Indians' cause. "He believed in their art and the people themselves," she wrote, "and so inspired and

encouraged them to give their best dances, to make their best jewelry to be on display around the Plaza.” Even more important, she believed Hewett “saw with an Indians’ eyes and understood with an Indians’ heart,” something Tsianina had rarely seen in the white man’s world. (38)

In addition to her annual repertoire of Cadman songs, Tsianina sang the lead in the 1925 premiere of *The Sunset Trail*, an operatic cantata Cadman composed on the theme of the Plains Indians’ struggles against the reservation system. (Cadman had earlier composed an opera based in part upon Tsianina’s life, *Shanewis*, or *The Robin Woman* made its debut at the Metropolitan opera in 1918 and was the first American opera successful enough to merit repeat performances the following year.) Audiences, as usual, greeted her performances with tremendous enthusiasm, but it is not clear whether they were responding to her musical talent or the novelty of an Indian who could sing opera. As one review put it, “Tsianina and Okenonton (another classically-trained Indian who sang the baritone lead) created a sensation --- the audience leaning forward in their seats to see better the unusual spectacle of real Indians singing in opera.” Her popularity as an Indian singer was in fact so beneficial to Santa Fe’s tourist industry that a writer for the *New Mexican* openly wondered, “Now if there were just some way of inducing Tsianina to remain in Santa Fe.” (39)

While she catered to audiences that were obviously hungry for romantic displays of Indianness, Tsianina seems not to have forgotten the Indian people themselves, who often attended Fiesta. In one instance, for example, she performed an evening program of songs for her largely white audience assembled in a grandstand erected on the plaza specifically for the event. When the program concluded and the crowd cheered her for an encore, she consciously turned her back in the grandstand and began to sing to the Indian people who had gathered in the shadows of the Palace of the Governors to watch. “A more dramatic picture could not be imagined,” one observer wrote. “There was no mistaking the fact that the Indian princess was giving her best to her people, and that she was unconsciously receiving inspiration from them.” (40) Despite the orientation of the event toward whites, this brief moment of communication indicates that the Indians still managed to forge their own bonds of identity.

It may well be that instances like this, contextualized within the Indian struggle for political rights then taking place, led Hewett to question by the mid-1920s the ethnocentrism that characterized modern American society and, though he would not admit it, so much of his earlier work as an interpreter of Indian cultures. In a revealing article he wrote for the Fiesta program, first in 1925, and then again as a shorter version in 1926, he stated,

we of the white race have been so long dominant that we have accustomed ourselves to look upon every people less advanced than ourselves in material agencies as an “inferior” race, forgetting that it takes several factors to constitute a fully developed civilized people, and that in some respects the peoples we have called primitive or savage, or uncivilized, have been far in advance of ourselves.

Praising the Indians for their aesthetic and spiritual development in a manner reflective of the highly romanticized depictions of Pueblo life offered by artists and writers who surrounded him in Santa Fe and Taos, Hewett went on to criticize the lack of such developments in Anglo civilization and to suggest that whites must now abandon their ethnocentrism and begin to understand Indians on their own terms. “The time has come,” he wrote, “when intelligent people honestly desire to understand every species of humanity, and to appreciate the fact that simply being different does not mean inferiority.” The purpose of Fiesta was thus to bring about a “true interpretation of the Indian” that not only included an appreciation of “his special abilities” but also recognized his place in history. (41)

As an extension of this new thinking, and in response to the growing popularity of the Indian-oriented events of Fiesta, in which Tsianina figured so prominently, Hewett in 1925 proposed the construction of an Indian theater in Santa Fe. “The Indian deserves an establishment in which to give expression to his unique abilities,” he argued, “a place where he can meet the public, as the artist and teacher that he is fully capable of being.” Citing Cadman and other white interpreters of Indian cultures, he suggested that the time had come for Indians to express their own cultural viewpoint.

At Santa Fe we conceive it to be our part to subordinate our interpretations for the present while assisting the Indian to present his own achievements in his own way, in music, painting, decoration,

handicraft, and ceremony to a public that now seems eager to learn, but which is still uninformed. We are trying to find out to what extent the Indian can be his own interpreter. (42)

From our perspective, this statement seems a tremendous leap for a man who had built his career as an interpreter of Indians, putting them on display for the American public as living relics of an ancient past. To some extent, through these exhibitions, Hewett had denied them a present and future. But he also realized, particularly in the 1920s, that Indians could be valuable assets to contemporary American society, and their cultures must be saved. The implicit conflict of these two positions was a hallmark of his promotional efforts during this time. Yet, when he proposed an Indian Fair for Santa Fe, it appears that he may have resolved the conflict, at least momentarily. Casting aside his own role as an interpreter of Indian cultures, he now suggested that Indians themselves determine their own artistic path. As he went on, however, slipping back into his more familiar paternalism, it was still not clear in his mind that Indians *could* do this. Yet he was willing to explore the possibility --- no small matter in the often xenophobic 1920s.

While it is clear that the uproar over Indian policy in 1922 and 1923 influenced Hewett's thinking about contemporary Indian cultures, and that he was influenced to some degree as well by the romanticized interpretation of the Pueblos offered by the artists and writers of Taos and Santa Fe, it is also important to consider the influence of the Indians themselves on his thinking, particularly Tsianina. Her renown as a native interpreter made it possible for her to become an advocate of note for Indian rights, but given the fact that this was still the era of assimilation, she needed a powerful broker in the white world who could help promote her ideas regarding autonomy and self-determination. In Hewett, she found such a broker.

Although others might argue that she was a willing partner in the cultural appropriations of Cadman's "Indian" music, and that this compromised her activism, Hewett did not view her participation as such. It is clear that she did not either. Tsianina seemed an authentic Indian voice to him and her popularity as a singer, in combination with her well-defined political position on the rights of American Indians, helped to convince him that they must be given their own voice both culturally and politically. This was a critically important step to take in an era marked by numerous social and political restrictions, not only for Indians, but also for most other racial minorities living in the United States. In doing so, Hewett articulated in broad outline both the terms of Indian reform to come and the multicultural ideal that would serve as its foundation.

This is perhaps nowhere better to be seen than in Hewett's address to the public at the dedication of the Indian Theater in 1926. "We ask you to remember the lesson we have learned," he said, "that a people to live in mutual respect and helpfulness, do not have to be of one blood, of one language or one faith, but simply one in the spirit of tolerance and fairness and righteous dealing with one another." (43) The Indian Theater, he hoped, would be an important first step in achieving that ideal.

January 5, 1947, San Diego Union, A-8:3-4. Colonel Arthur F. Fischer appointed director of Museum of Natural History yesterday; succeeds late Clinton Abbott, who directed museum from 1922 until his retirement a year ago.

January 5, 1947, San Diego Union, II, 1:1. First new city recreation unit near completion; buildings in park to become huge public play area.

Workmen were sanding the floor yesterday of the first unit of what is destined to become the nation's finest indoor recreation center. It will comprise five of the 1935 exhibition buildings in Balboa Park in the area designated by the navy during the war as Camp Kidd.

Leo B. Calland, assistant city manager in charge of recreation, declared that when the new center is in operation it will serve 50,000 San Diegans "in a dull month."

January 10, 1947, San Diego Union, A-14:3-4. Opposition to the plan of Supervisor James Robbins for locating Civic Center building in Balboa Park was expressed in a letter filed with the county supervisors

yesterday by De Graff Austen, board chairman; Robbins had advocated that the Civic Center buildings, including the Hall of Justice, be placed in that part of Balboa Park where the riding stables now are, not far from the Naval Hospital.

January 12, 1947, San Diego Union, B-1:2-3. Boy Scouts to have 10-acre camp in northwest corner, Balboa Park, a few hundred feet west of Roosevelt Junior High School; camp has already been fenced; Harvey H. Atherton, president of the Cuyamaca Camp Association, said that when ready for use improvements to the city-owned site will be worth between \$25,000 and \$30,000; improvements would be kept to a minimum to preserve the naturalness of the park site; a bowl for seating 500 boys will be built in a depression at the west end of the site; scouts from outlying towns would come here to camp, visit points of interest in the city; within the San Diego Scout Council are 5700 scouts and cubs and 1700 adult assistants.

January 12, 1947, San Diego Union, A-10:3. The city stands to clear more than \$250,000 in wrecking and salvaging Camp Callan, although the primary object was to provide material for veterans' homes rather than make a profit on the transaction, J. H. Shaw, city purchasing agent, reported yesterday.

January 12, 1947, San Diego Union, B-3:5-8. Hot rods usher in new season of San Diego Stadium speed duels today.

January 14, 1947, San Diego Union, A-8:1. Joseph G. Shea, real estate man, mall plan foe to make race against Mayor Harley E. Knox, by Henry Love.

January 14, 1947, San Diego Union, A-8:2-4. San Diego voters will be asked to determine the location of a new city library, county hall of justice, state building, and other proposed public buildings in the April election, city councilmen and supervisors decided yesterday in a joint conference.

January 15, 1947, San Diego Union, A-6:2-5. City Council denies revived Cedar Street Mall plan; four sites proposed for public building program

January 19, 1947, San Diego Union, A-14:3-6. Wartime Use by Army Leaves Mark on Spanish Village; Groups Assigned to Majority of Park Buildings.

The city park department has allocated most of the buildings in Balboa Park --- many of them to the same organizations that occupied them before the war --- but it probably will be several months before the buildings are ready for occupancy and the park returns to its pre-war status as an outstanding attraction, Fred A. Rhodes, city manager, reported yesterday.

Extensive building repairs necessary after their wartime service as navy buildings will not be started in most cases until the navy pays the city for damage done to the structures while the navy used them. The navy has agreed to pay more than \$800,000, but has not yet made the payment.

Meanwhile the city and army are attempting to reach an agreement on what the army owes the city for damages to the Spanish Village, only group of buildings taken over by the army during the war. The city has set the figure at \$12,000, but the army wants to make its own survey and has promised to send an investigation board to the village within the next few weeks, Rhodes said.

One of the few buildings turned back to the city by the navy which will be ready for use soon is the municipal gymnasium, where workmen have been busy more than two weeks repairing the floor and fitting the structure to be used for basketball, badminton and volleyball. Leo Calland, city recreation director, said the building may be ready in about two weeks.

The Federal Building, California State Building, Palace of Entertainment and Hall of Education will be turned over to the recreation department, and with the municipal gymnasium, will form the finest indoor recreation center in the country, Calland said.

Disposition of other buildings as announced by Rhodes:

Photographic Arts Building, to be occupied by the Photographic Arts Society.

Floral Building, to be occupied by the San Diego Floral Association.

California Building, to the San Diego Museum of Man Association.

House of Pacific Relations, to the Pacific Relations Society.

Fine Arts Gallery, to the Fine Arts Society of San Diego.

Medical Arts Building, east and center sections, to the Fine Arts Society.

Old Globe Theater group, to the San Diego Community Players.

The Spanish Village, to Spanish Village Art Center, Inc.

Rhodes listed these buildings as still available: The refreshment stand and exhibit building; west wing of the Medical Arts Building; American Legion Building; Food and Beverage Building; Red Cross offices and workroom; House of Hospitality; electric show building and Bank of America Building.

These organizations have applied for space in Balboa Park buildings, but their applications have not been acted upon, Rhodes said: Home Planners' Institute; Fighting Bob post, American Legion; Post 8299, Veterans of Foreign Wars; Post 6, American Legion; Post 5, Canadian Legion; Padre Serra post, American Legion; United Spanish War Veterans; Native Daughters of the Golden West; Daughters of the British Empire; Veterans of the 251st Coast Artillery, and Josiah Grundy's nautical museum.

January 22, 1947, San Diego Union, A-1:3-4, A-3:5-6. "GET TOUGH" policy city plan unless Navy acts on Park.

Unless the navy makes good immediately on its promise to pay the city \$840,000 for repairing the damage it did to city-owned buildings in Balboa Park during the year, the City will adopt a "get tough" attitude, city councilmen said yesterday.

Pointing out that the navy promised payment "in three weeks" when it returned the park to the city last October, Councilman Charles B. Wincote declared "it's time to get tough with the navy."

"I agree," responded Councilman Gerald C. Crary. "This has been kicked around long enough."

The discussion came up in a council conference in the mayor's office when City Manager Fred A. Rhodes reported he had received a letter from Vice Adm. J. B. Oldendorf, commandant of the 11th Naval District, asking the City's attitude on the Officers' Club, still operated by the navy in Balboa Park.

Rhodes said Oldendorf wanted to know how much longer the navy would be permitted to operate the club and what terms and whether the city would seek payment for restoring the building to its former condition when the navy returns it to the city.

Asked whether he had answered the letter, Rhodes growled: "No. It made me so mad I haven't answered it yet. I'm going to cool down a bit before I do anything. We try to be nice to them, then they try to put the squeeze on us, and I'm getting tired of it."

Councilman Charles C. Dail said he objects to operation of "an exclusive, private club in a public park," and said he believes the navy should be ousted before long.

Wincote said he objects to the fact "I can't go and wander in our city park, but any officer or retired officer who is a member of the Officers' Club can take 50 people up there with him."

Councilmen did not indicate what steps they might take, if they find it necessary to get "tough," but city hall observers pointed out that if they wanted to be tough enough they could oust the navy from Balboa Park, the Sonar School at Point Loma and other city-owned property on which the navy has short-term leases.

Mayor Harley E. Knox suggested the council meet with Adm. Oldendorf and other 11th Naval District officers and try to come to an agreement with them, but the council finally left it up to Rhodes to carry on the negotiations and asked him to report back to the council next Tuesday.

Later, in a council meeting, councilmen referred to Rhode's letter from R. L. Palmer, of 3525 Thirtieth St., protesting against the City's maintaining guards at Laurel St. gateways to the park. Palmer said maintaining guards "does no good except provide employment for guards to make cars stop." He asked that the council make the park available to the public.

At present, traffic is permitted on Laurel St. through the park, but the public is barred from going on the park grounds.

January 22, 1947, San Diego Union, 4:2. Navy, City iron out row over park buildings.

The disagreement between the city and the navy over Balboa Park buildings has been ironed out, City Manager Fred A. Rhodes reported yesterday.

Rhodes said he and Vice Adm. J. B. Oldendorf, commandant of the 11th Naval District, had agreed that any negotiations concerning continued operation of a navy Officers' Club in the park would be conducted separately from the city's attempt to obtain payment from the navy for damages done to other buildings in the park when they were under navy control.

Rhodes said Oldendorf had agreed to inform navy headquarters in Washington there was no connection between the two negotiations.

A letter from Oldendorf indicating the negotiations might be tied together touched off a stormy discussion in a city council conference Tuesday morning in which councilmen expressed resentment over the fact the navy last October promised to pay \$840,000 for restoration of the buildings but has not yet made the payment. Councilmen said they believed discussion of the navy Officers' Club had no part in negotiations for funds to restore other city buildings in the park, and that it was time to "get tough" with the navy.

January 22, 1947, San Diego Union, 4:2. Exposition use forecast.

A suggestion that the city leave the way clear for using the buildings in Balboa Park for another exposition was transmitted to the City Council yesterday by Stanley Grove, manager of the Chamber of Commerce.

Grove wrote that Chamber directors believe "the time will come when the community will again desire to use these buildings for the purposes for which they were originally erected" and suggest that leases for use of the buildings should contain provisions reserving to the city the right to cancel the leases or resume possession of the buildings for "expositions, festivals or similar activities."

January 26, 1947, San Diego Union, B-4:6-7. Balboa Park Municipal Gymnasium to reopen Friday night.

Revival of the San Diego County Badminton Association, with its pre-war membership of some 300 as well as the renewal of dozens of other athletic activities cut short by war, is in prospect with the announcement that the municipal gymnasium will be reopened Friday night.

January 29, 1947, San Diego Union, A-1:2, A-2:3. Navy will pay City Park claim; restoration fund due here soon.

Secy. of the Navy Forrestal has approved the city's \$840,800 claim for restoration of Balboa Park buildings. The navy's check will be mailed as soon as necessary forms can be exchanged, it was learned yesterday.

Capt. A. K. Fogg, 11th Naval District public works officer, said he had been told by the navy department that the claim had been approved by Forrestal.

"The only remaining step is release of claims from the city," Fogg said.

Customary procedure, Fogg is for the navy's bureau of yards and docks to send the forms for release of claims. To expedite handling of the forms, city councilmen recently authorized Fred A. Rhodes, city manager, to sign the release for the city.

"It will only be a matter of a couple of weeks," Fogg said.

Mayor Harley Knox said the news from the navy was the best the city had received in months. "We have been working eight months for this," he said.

Thus it appeared yesterday that the city's long fight for repossession of buildings loaned without charge to the navy for hospital use throughout the war was nearly ended.

Balboa Park will be formally opened to the public Friday for the first time since the navy took over most of the park, Rhodes said yesterday.

Rhodes said guards now stationed at Laurel St. entrances will be removed and will be put to work patrolling the grounds to prevent unauthorized persons from entering buildings which will not be open until they have been restored.

First of the park buildings to be restored is the municipal gymnasium, which will be opened Friday evening. The building will be available for badminton and table tennis games at 6 p.m. A rededication ceremony is scheduled for 8 p.m.

Rhodes said other buildings will not be opened until they have been restored --- a project that probably will take a year.

City recreation officials have mapped a program of public and group events in Balboa Park. Arts and crafts classes, music programs and many other activities have been outlined.

In addition, the Fine Arts Society, the Museum of Natural History, the Museum of Man and similar scientific and cultural groups --- during the war dispossessed to make way for Pacific battle casualties and for hospital trainees --- have been waiting for a chance to get back into their old quarters.

The navy took over the exposition and other park buildings early in the war, when there was no time to haggle over costs, rents or other agreements. The navy simply told the city officials it had to have the buildings.

A large part of the area became Camp Kidd, training area for hospital nurses and corpsmen. The city, as soon as museum pieces and art objects could be moved, turned over the property on a "gentlemen's agreement."

With the end of the war the city began negotiations for return of the park, once the axis around which most of the city's cultural life turned and the scene of two world expositions.

Then came the long struggle toward agreement on the cost of restoring buildings and grounds to their former state. The Fine Arts Gallery, for example, has been remodeled drastically to accommodate hospital patients. It will require extensive remodeling again to become an art center.

Engineers, aided by a citizen's committee, appointed by city officials, worked out the cost details of restoration.

January 31, 1947, San Diego Union, A-12:4. Disabled Veterans seek space in a Balboa Park building.

Harry S. Nelson, chapter No. 2, Disabled American Veterans, yesterday asked the city council for space in a Balboa Park building if and when any of the buildings is made available to veterans' organizations.

None of the buildings has yet been allocated to veterans' organizations, but several are not finally disposed of, the park commission reported. Other veterans' groups also have applied for office space in the structures.

February 18, 1947, San Diego Union, A-1:2-4. Thanks, Almost a Million, But It Took a Long Time; Spoils of war: Navy pays city \$790,000 for damage to park.

The Navy is sorry it damaged the city buildings in Balboa Park during the wartime occupation. It is \$790,000 and 35 buildings sorry.

The check was turned over to Mayor Harley E. Knox and City Manager Fred A. Rhodes yesterday by Vice Adm. J. B. Oldendorf, Commandant of 11th Naval District.

The city asked for \$840,000, but all the Navy could scrape together was \$790,000. To pay the bill in full the navy offered 35 temporary structures ranging from plywood shacks to stucco buildings. The city said sure, and come back anytime.

February 25, 1947, Letter, From: R. W. Benson, Assistant Chief of Staff for Personnel; To: Commandant, Eleventh Naval District; P21-1 ND11-152A/c1 Serial: 74/152A; National Archives, Pacific Southwest Region.

Subject: U. S. Naval Hospital, San Diego, California - Inspection of Welfare Department.

Reference: (a) ND11/EN-N (LSF-GE) Serial E-8 dtd 9 Oct. 1946.

Enclosure: (A) Inspection Report dtd 13 February 1947.

1. In accordance with reference (a), Lt. Comdr. J. K. BARRON, USNR, Assistant District Recreation Officer at Eleventh Naval District Headquarters, San Diego, California, visited the U. S. Naval Hospital, San Diego, California, on 13 February 1947, and conducted a routine inspection of the Welfare and Recreation Department. Conferences were held with Captain I. W. HUNKEL (MC), Executive Officer; Lt. J. T. STRINGER (NC), Recreation Officer; and Chief Pharmacist G. R. SOUKUP, Civil Readjustment and Insurance Officer.
2. The recreation facilities inspected were billiard room, bowling alleys, auditorium, projection booth, CPO's and enlisted men's lounge, library, golf course, softball diamond, swimming

pool and storeroom. The inspector found facilities in order with minor exceptions. No housing officer is assigned because all problems are referred directly to the District Housing Office. The insurance officer, who has other collateral duties, is consulted only upon the request of the insured themselves. The officers' mess accommodates 130 officers and guests, and the inspector found it to be well organized.

3. It is recommended that the softball diamond now used for storage or surplus materials be reconditioned.
4. Appreciation is expressed by the Inspection officer for the courtesies shown by the Executive Officer, the Staff and other personnel aboard the station while on tour.

San Diego Union, March 29, 1947, B-1:2. MUSIC CLUB HEAD DIES AT HOME HERE (photo).

Miss Gertrude Gilbert, President of the Amphion Club and one of the city's recognized cultural leaders died yesterday morning in her home, 138 Fir St.

Except for a two-year period, Miss Gilbert has served as President of the Amphion Club since 1907 and was responsible for bringing many of the world's finest concert artists to the city.

In addition to her Amphion Club work, Miss Gilbert was a member of the Board of the Fine Arts Gallery from its incorporation until 1940. She was an executive board member of the San Diego Symphony Association for many years and during 1930 was its Vice President.

She was instrumental in preserving the buildings of the 1915 Exposition after the City Council had voted to scrap the structures.

Miss Gilbert was in charge of music for the 1915 Exposition and served on the Women's Executive Board for the 1935 Exposition. During the latter event she also acted as chairman of music and entertainment for the House of Hospitality.

Born in San Diego in the 1870's, she resided here her entire life. Surviving are her brother, Dr. Alfred H. Gilbert, and a sister, Miss Bess Gilbert, both of San Diego.

Services will be conducted Monday at 11 a.m. in Johnson Baum Mortuary. Private burial will be held at Mt. Hope Cemetery.

San Diego Union, April 1, 1947, B-2:4-5. LETTERS

EDITOR SAN DIEGO UNION: To recite here all the things that Miss Gertrude Gilbert has done for her city and community would be to merely catalog most of the major events in the history of the artistic, musical and cultural life of the city. With the background of a fine musical education, acquired by study at home and abroad, she early became an active member in the musical clubs of this city.

What she has contributed to the cause of music in San Diego cannot be estimated. She had guided the Amphion Club through over 36 years of real musical pioneering. During these years she served as President, she has been instrumental in bringing to our city through the medium of the Club most of the world renowned artists of the concert field, many of whom became her personal friends.

From the very inception, Miss Gilbert was a member of the Fine Arts Society and by her interest and quiet endeavor contributed much to the splendid success of that organization.

During the 1915 Exposition she was a valued member of the Women's Board, where she helped to receive many of world famous people who were her guests at that time. Her work on the Music Committee, too, was of outstanding merit, notably the appearance of the New York Symphony Orchestra under the renowned Walter Damrosch.

During the 1935 Exposition she again served on the Women's Committee and gave gracious service at the House of Hospitality.

After the Exposition Miss Gilbert was one of the prime movers in raising the money to preserve the buildings in the Park. She was also one of those who restored the House of Hospitality, furnished it, and made it the social center we all enjoyed so much before the war.

Miss Gilbert had a real pride in her city and was already ready to work to make it a better place in which to live. She had vision and a firm faith that better facilities for the presentation of civilities and drama would be provided when the need arose and money was available. Her fondest hope was for a beautiful Civic Theater, but she was practical too, and was ready to face the situation that was uppermost at the moment. And with it all was her wonderful sense of humor coupled with her tolerance and her respect for the opinions of others.

But there was one quality that she possessed that those who knew her best will never forget, namely, her wonderful kindness. This quality, more than all the others, endeared her to all her friends.

We mourn the passing of a fine citizen and a great spirit, but we glory in the excellence of her accomplishments, and the memory of her beautiful character.

The Balboa Park site is expected to be used for overnight Camporees by more than 160 local Scout troops this year. A former Army installation, it replaces the Indian Village which has been razed.

June 1, 1947, San Diego Union, A-12:2-5. Sponsored by the 11th Tank Battalion, Marine Corps Reserve, the Marine Base Band will make its second appearance this year at the Organ Pavilion, Balboa Park, presenting a concert from 3 to 4 this afternoon.

June 1, 1947, San Diego Union, B-1:4. Repairs to Ford Bowl start tomorrow.

City crews will move into Ford Bowl in Balboa Park tomorrow morning to restore the outdoor theater to its pre-war condition.

Under direction of D. M. Hammond, Acting Superintendent of the City Building Division, crews will repair, replace and repaint the seats, paint the stage and shell, smooth the stage floor, and check the entire electrical system.

Estimated to cost \$10,000 to \$12,000 the project will be financed from the \$790,000 the City received from the Navy to restore Park facilities after their wartime use by the Navy.

June 1, 1947, San Diego Union, B-1:6. Sale of buildings in park to begin.

June 8, 1947, San Diego Union, B-1:5. Army dilatory on park repair.

The City may be forced to file a formal claim against the Federal Government for damage the Army did to the Old Spanish Village in Balboa Park during its wartime occupancy.

After more than a year of negotiations, the Army still retains technical possession of the former art colony and has made no move to rehabilitate the area, despite considerable prodding from the City. If the stalemate continues much longer, the City probably will file a claim with Congress, it was indicated by Russel W. Rink, Assistant to the City Manager, who has handled negotiations for the City.

Almost three months ago the City rejected the Army's offer of \$6453 for restoration of the area and requested that the Army undertake the rehabilitation work. O. N. Nail, Field Representative of the

Army Engineers' Real Estate Division, told City Officials last week the Army still is studying the request and has not decided definitely to do the work or reject the City's request.

Army forces took over the Village soon after Pearl Harbor and moved out soon after V-J Day. After negotiations for rehabilitation started, City engineers estimated cost of rehabilitation at \$13,717. The Army offered \$2765 in September, but in March revised the figure to \$6453. On March 18, the City rejected the revised offer and requested the Army to do the work, subject to City acceptance.

June 8, 1947, San Diego Union, B-3:2-3. Sea lions enroute to Antwerp from San Diego Zoo.

June 8, 1947, San Diego Union, Magazine, 1:2-4. Animals in San Diego Zoo run up \$1,000 a week grocery bill, by Bryant Evans.

June 15, 1947, San Diego Union, A-22:1-5. Rededication of flagstaff set by Masons.

History will repeat itself at 9:45 this morning on Inspiration Point in Balboa Park, when San Diego Masons, in their annual Flag Day ceremony, rededicate the flagstaff they gave to the City just 20 years ago.

June 25, 1947, San Diego Union, B-1:1-4. Federal Building conversion costs into a Civic Theater set at almost \$400,000 by architect H. Louis Bodmer (drawing of how Federal Building would look as a theater)..

Rhodes and Bodmer estimated conversion work on the building itself would amount to more than \$300,000, and that good theater seats, drapes, other furnishings and landscaping would add another \$55,000.

June 26, 1947, San Diego Union, A-8:1. Park building rehabilitation set by group.

A complete program for rehabilitation of Balboa Park buildings will be drafted by the City Park Commission and Park and Recreation Director Leo Calland before much more work is undertaken.

City Councilmen made that decision yesterday when Calland and City Manager Fred A. Rhodes asked them if they were ready to go ahead with work on the Hollywood Building and the Fine Arts Building. Councilmen said rather than authorize rehabilitation building by building they want a complete program laid before them so the work can be undertaken on a comprehensive basis.

They agreed that work of remodeling the Federal Building into a Civic Theater, a project that goes far beyond rehabilitation, will have to wait until more funds are available and construction costs are down. At present costs, the work is estimated at nearly \$400,000.

Rhodes said the City will open bids soon for repair of the Fine Arts Building, which he estimated would cost \$28,000. If the bids are far above that figure, he said he will ask Councilmen for permission to do the work with City forces.

July 5, 1947, San Diego Union, B-1:4. City officials think it's about time Army returned Spanish Village to city.

July 6, 1947, San Diego Union, 1:1-3. Star Light Opera to open summer season in Wegforth Bowl, San Diego Zoo, Wednesday night with "Eileen," by Helen Zugelder..

July 6, 1947, San Diego Union, II, 1:1-4, 14:3. Demolition of famed 1915 Fair landmarks strongly recommended; ERASURE OF PARK EXPOSITION BUILDINGS URGED IN REPORT; Frederick Law Olmsted, Jr., planning specialist hired by City advises removal of four or five such structures, by Winthrop Cady.

Removal of four or five of the famous old 1915 Exposition buildings along Laurel St. in Balboa Park is recommended in a report prepared for the city by a nationally-known park planning specialist, Frederick Law Olmsted, hired by the City Park Department in March to make a survey of Balboa Park, recommends that the Veterans of Foreign Wars and American Legion buildings along the Plaza de Panama be torn down to make way for extension of wings of the Fine Arts Gallery; that the Food and Beverage Building be torn down but eventually replaced with a museum or museums; that the Electrical Building be torn down except for the extreme west end and that a careful study be made as to the advisability of removing the International Arts Building.

Olmsted's report also recommends that the City immediately abandon any plans it may have for erecting public buildings other than those of a cultural nature in the Park and that it undertake a long-range, thorough study of development of the Park as a whole before it undertakes any work other than repairing wartime damage.

The report, recently received, has not been studied in detail in connection with the City's long-range plan for Park development, but will be given to the new Park Commission when it holds its first meeting, City Manager Fred A. Rhodes said.

Rhodes said the recommendations "appear a little rich for our blood," but would be taken under consideration when the Park Department drafts the overall remodeling program recently requested by the City Council. . . .

Pointing out that the only justification for large parks is to provide recreational areas combined with "the refreshing effect of spacious country-like landscape surroundings," he (Frederick Law Olmsted, Jr.) strongly recommended that no more of the Park be devoted to buildings.

Parts of the original Park have been given away for other purposes and "this intermittent yielding to the old set of ideas that it was just vacant land available for parceling out to meet any kind of use advocated at the time by any strong pressure group has led to whittling away parts of the original area and to greatly curtailing the value for park purposes of what has been retained."

For example, the giving away of the 100-acre hill now occupied by the Naval Hospital and the construction of a mass of Naval Hospital buildings dominating the hill not merely reduces the area usable for park purposes, but destroys the spacious rural character of the views retained in the park. Other examples are the use of the park for school buildings and the introduction of heavy traffic thoroughfares separating one piece of park from another."

FREDERICK LAW OLMSTED, JR. QUOTED IN *The Civic Auditorium for San Diego, A Report of the Planning Commission*, 1953.

p. 26. We have greatly changed the "spacious country-like landscaped surroundings hoped for when the park was developed" (said Frederick Law Olmsted, landscape architecture consultant in April, 1947. "From time to time progress has been made in developing the park for the special purposes for which it was set apart. But pressure of population and urban congestion, comparable with those of New York in 1868, were slow in coming to San Diego, so that the justifying purpose of the park was often forgotten or ignored and its land treated just as if it never had been set aside for that purpose.

July 8, 1947. San Diego Union, A-4:4. The Technical and Scientific Societies Council of San Diego has suggested the establishment of a Hall of Science and Industry in Balboa Park; City Manager Fred A. Rhodes endorsed the suggestion and suggested the Ford Building be used for the museum.

July 8, 1947, San Diego Union, A-7:5-6. Leo Calland, Park and Recreation director, reported yesterday that the "Recreation Round-Up" will be held in Balboa Park August 29 through September 1 in the State Building, Municipal Gymnasium and Ford Bowl.

The four-day affair will include athletics, hobbies, craft and art work, music, dramatics, dancing, pet displays, puppet shows, and other phases of recreation.

July 8, 1947, San Diego Union, B-3:5. Otto C. Kiessig, operator of sport fishing boats, denounced the city's subsidization of recreation yesterday.

July 23, 1947, San Diego Union, A-12:2-3. The City Council yesterday authorized conversion of Balboa Park buildings into a convention headquarters.

Conversion of Balboa Park buildings into a convention headquarters was authorized by the City Council yesterday after Councilmen were told the City stands to lose a million dollars next year if it does not have a larger place for conventions.

Councilmen authorized City Manager Fred A. Rhodes to employ an architect to draft plans for converting the State Building into a convention hall and the Hollywood Building, across Palisades Plaza, into a supplemental meeting place.

The development was recommended by Elwood T. Bailey, City Park Commissioner and Manager of the Convention Bureau, who said 41 conventions already have been scheduled for the city for next year, and that, unless a larger hall is available, the city will lose 10,000 delegates who could be expected to spend \$1,000,000 here. One large convention was lost to the city this year for lack of a large convention hall, he said.

Rhodes estimated the cost of conversion of both buildings at \$125,000. The State Building will be remodeled into a large convention hall, with several committee rooms, he said. The Hollywood Building will contain two theaters, and a Recreation Department workshop. The theaters can be used for smaller conventions or for sectional meetings of large groups.

July 24, 1947, San Diego Union, A-8:4-6. San Diego audience approves of "Pirates of Penzance," by Constance Herreshoff.

July 25, 1947, San Diego Union, A-1:1., A-3:5. City officials condemn Palace of International Arts and six other buildings in Balboa Park, by Winthrop Cady.

Seven of the architecturally famous buildings in Balboa Park, most of them along Laurel St., have been condemned City Manager Fred A. Rhodes disclosed yesterday.

The action leaves only two buildings immediately adjacent to Laurel St. --- the California Building and the Administration Building --- open for use.

The condemnation was ordered by Oscar Knecht, Chief City Building Inspector, and Fire Marshall Al Penrose on grounds that because of structural defects and fair hazard they are unfit places of public assembly.

The buildings are the Canadian Legion, House of Hospitality, Food and Beverages, American Legion, Medical Arts (also known as Veterans for Foreign Wars Building); Electrical (also known as the Red Cross); and the House of Charm (sometimes called the International Arts Building).

Most of the condemned structures are of Spanish-Colonial architecture, heavily ornamented and intricately carved. Most were erected as "temporary" structures for the 1915 Exposition, but were strengthened and revamped for the 1935 Exposition.

Whether the buildings will be torn down or closed and left standing as "window dressing" has not been determined. If they are left standing, it will be only because of their architectural interest; the condemnation order bars their use for any purpose whatever.

Rhodes said the buildings were actually condemned Wednesday, but the suppressed news of the action until yesterday "so we could get the condemnation signs tacked up before the protests came in."

July 26, 1947, San Diego Union, A-1:1. Razing of Park Buildings Opens Controversy; condemnation brings protests against removal proposals.

The 1915 Exposition Buildings in Balboa Park, which already have weathered three threats of demolition in their 32-year history, yesterday were the center of still another controversy over whether they should be torn down, rebuilt as permanent structures or refaced as a backdrop to the park's gardens.

Seven of the buildings, acclaimed as one of the world's finest groups of Moorish-Baroque architecture, have been condemned by City officials because of structural defects and because they constitute a fire hazard.

The proposed condemnation brought a storm of protest from many San Diegans. The fame of Balboa Park has come because of the Exposition buildings declared G. Aubrey Davidson, Chairman of the Balboa Park Restoration Committee.

"The building should not be wrecked until other buildings of like architecture and permanent material are ready to take their places," he said.

Both sides of the demolition question will be aired Wednesday at 2 p.m. at a meeting of the City Park Commission in the Park Administration Building. Leo Calland, Park and Recreation Director, announced yesterday he would recommend employment of a special park consultant to advise the City on what action to take.

July 26, 1947, San Diego Union, A-1:1, A-6:1-7. Some San Diegans advocate repairing the facades even though the interiors must be closed; Sam E. Mason, president of the San Diego Electric Railway Co., advocates maintenance of building's exteriors for their beauty and because they are "a unique attraction known to a good part of the world. . . . If necessary all interior construction, should be torn down." Joseph Dryer, president of the 1935 Exposition, also advocated preserving fronts.

July 26, 1947, San Diego Union, A-7:8. San Diego Zoo adds new 50-seat bus.

July 26, 1947, San Diego Union, B-1:2-3. Stork brings llama to San Diego Zoo.

July 27, 1947, San Diego Union, Magazine Section, 2:2-3. Long Beach Symphony Orchestra to play at Organ Pavilion today.

July 29, 1947, San Diego Union, A-6:2-5. Here's way new section of proposed structure will look when complete; addition of east wing to Fine Arts Gallery may cost \$400,000 (drawing).

Addition of the proposed East wing to the San Diego Fine Arts Gallery in Balboa Park will cost between \$300,000 and \$400,000, Frederick G. Jackson, President of the San Diego Fine Arts Society announced yesterday. It will replace the American Legion building, one of seven 1915 Exposition buildings condemned recently/

The West wing, which will be built later to match the East wing, also will cost between \$300,000 and \$400,000, Jackson said. It will cover the area where the condemned Medical Arts building now stands.

July 29, 1947, A-6:6. Rhodes urges outside view on park buildings.

Replying to statements that the buildings are no more of a fire hazard or structural risk now than they were during the 1935 Exposition, Rhodes said, "It must be pointed out that the Fire Department had three pieces of fire equipment on duty at the site at the time, and, in addition, kept a fire patrol going over the entire area continuously."

July 29, 1947, San Diego Union, A-4:6-7. City Council to give park pool to fly-casters.

In Rhode's absence two weeks ago, Councilmen approved the application of Milton Kraft, President of the San Diego Angling and Casting Club, for temporary use of the pool. Rhodes said the club withdrew its application after the Park Commission explained it was interested in restoring the pool "for the esthetic enjoyment of all park visitors," and Councilmen acted after the application had been withdrawn.

July 30, 1947, San Diego Union, B-1:1. City Council authorizes remodeling plans for State and Hollywood Buildings in Balboa Park.

July 31, 1947, San Diego Union, A-6:2-4. Park Commission asks detailed report on condemned buildings.

The City Park Commission yesterday asked for detailed reports on the condition of seven condemned buildings in Balboa Park to aid it in making its recommendation on the future of the famous structures. Meeting yesterday in the office of Park Superintendent W. Allen Perry, Commission members asked City Manager Fred A. Rhodes to supply them with detailed reports on the buildings from Fire Marshal Al Penrose and Oscar Knecht, Chief Building Inspector, who ordered the buildings condemned.

"We can't proceed intelligently to draft an over-all plan for the Park unless we know in detail the defects of each building and what would be required to bring it up to standards prescribed by the building code," Commission President Milton P. Sessions said.

The Commission also voted to ask Rhodes for funds to employ a park consultant to help plan future development and give advice as to whether the condemned buildings should be left as "window dressing" or demolished and the area landscaped.

July 31, 1947, San Diego Union, A-11:4-5. Nearly two million took advantage of playgrounds at public schools and Federal housing sites in the 1946-47 fiscal year according to report of Recreation Director Leo Calland.

August 3, 1947, San Diego Union, B-1:6. Need to raze buildings foreseen in 1915.

August 10, 1947, San Diego Union, B-1:1-2. City profits in sale of salvage from park.

City sold buildings and equipment in park for \$12,000. So far the City has realized \$62,000 from the sale of buildings and equipment left by the Navy. City accepted buildings and equipment in lieu of \$50,000 cash when it negotiated with the Navy for rehabilitation of the park. Concrete from temporary buildings erected by Navy dumped over the cliff at the foot of Hill Street in Sunset Cliffs to stop beach erosion.

August 21, 1947, San Diego Union, A-4:3. Lily vs. casting pool protests just too much.

The City Park Commission doesn't like to be blamed for the sins of the City Council.

When Park Commissioners received four letters yesterday protesting against the conversion of the Balboa Park lily pond into a fly-casting pool, they quickly pleaded innocence and forwarded the letters to the real culprits, the Councilmen.

The aesthetic sense of the Park Commissioners was upset no little several weeks ago when the Council overrode their recommendation and ordered the lily pond converted into a temporary fly-casting pool. Their sense of justice was even more outraged yesterday when they received the protests.

August 21, 1947, San Diego Union, A-4:3-6. Large audience approves park opera opening of "Rio Rita," by Constance Herreshoff.

August 21, 1947, San Diego Union, A-4:5-6. Park Commission approves construction of a \$300,000 Veterans' Memorial Building on western site of former Indian Village.

Construction of a \$300,000 Veterans, Memorial Building on the site of the old Indian Village in Balboa Park was approved yesterday by the City Park Commission.

The Commission rejected a proposal that the structure be located along Laurel Street to take the place of one of the six 1915 Exposition buildings recently condemned by the City Fire Marshall and Building Inspector.

It is premature to plan for replacing any of the condemned structures until it has been determined definitely which ones will be kept in place and which ones, if any, will be razed, Commissioners said.

To help them solve the problem they recommended that a topographical survey be made of the central area of the Park and that the City employ a Los Angeles landscape architect to aid in drafting Park rehabilitation plans. Park Superintendent W. Allen Perry reported that, on the Commission's instructions, he had discussed Park planning with Ralph D. Cornell of Los Angeles, and Cornell had offered to undertake a thorough survey for \$5000 and expenses.

Perry also objected to the Laurel Street location for the Veterans' building because "it would cost that much to match the architecture of the buildings in that area and you wouldn't have any space inside."

Commissioners agreed to a location on the western side of the Indian Village site, closer to Zoo Place than to Park Boulevard, where the structure would be close to a parking area and would not interfere with landscaping.

The suggestion that the building be located on Laurel Street came from City Manager Fred A. Rhodes, who also informed the Commission that a survey is being made to determine whether the House of Hospitality can be restored and made available for public use. A preliminary survey indicates it might be restored to acceptable standards for less than \$100,000, Rhodes said. The House of Hospitality was one of the buildings condemned as a place of public assembly.

"It has occurred to me that if the City assisted the Fine Arts Gallery to construct (a wing) to its building and restored the House of Hospitality, and even encouraged the San Diego Society of Natural History to construct its proposed Library Building by granting them monetary assistance, the City would then have a good start to maintaining the architectural effect which has existed in the Park so many years on temporary structures," Rhodes wrote.

"One might even go so far as to place the Veterans' Hall on the southwest corner of the Plaza de Panama, except for lack of parking space in that particular location. Probably a better location would be where the Electric Building is now located, which would be much closer to a parking lot."

Rhodes pointed out the City had \$800,000 in the park restoration fund and \$300,000 in profits from dismantling of Camp Callan. He estimated it would cost \$100,000 to restore the California Tower Building, the long Exposition building along Laurel Street that escaped condemnation, and \$100,000 to restore the House of Hospitality.

"In being relieved of the necessity of restoring the wooden Park buildings, considerable sums could be saved which would be applied to permanent buildings," Rhodes wrote.

In advocating construction of the Veterans' Building, Mayor Harley E. Knox suggested the City use \$250,000 from the Camp Callan fund, \$50,000 in restoration funds for one of the condemned buildings which will not be restored and furnish the structure with the \$18,000 fund from the wartime Buddy Bed operation.

September 14, 1947, San Diego Union, B-1. Park recreation plan approved; facilities radiate from picnic area in large project.

A comprehensive plan for developing the Morley Field area of Balboa Park into the City's largest and most complete recreation center has been drafted by the City Park and Recreation Department and approved by the Park Commission.

The entire plan revolves around a large picnic area, with facilities for almost all outdoor recreational activities scattered around the edge of the picnic area lawn. The area is arranged so that after a picnic lunch members of a party can scatter to the bowling greens, swimming pool, riding stable or archery range according to their interests.

The plan calls for construction of bowling greens, shuffleboard courts, Roque area, horseshoe pitching court, children's play area and swimming pool north of the picnic area, riding stable and parking lot on the east, parking lot on the west and flycasting and model yacht pool and two archery ranges on the south.

The partially-developed area now contains tennis courts, shuffleboard courts, swimming pool and horseshoe pitching courts. The archery ranges now on the Sixth Street side of the Park would be moved to the Morley Field area, but other activities on the west side of the Park, such as bowling greens and shuffleboard courts, would continue to operate in their present locations, in addition to the new facilities at Morley Field.

The complete development probably will cost approximately \$300,000, but is expected to be overtaken in small steps over a period of years. One of the first steps may be construction of the fly casting and model yacht pool, at an estimated cost of \$35,000.

There are no fly casting or model yacht facilities in the City at present, but over the objection of the Park Commission, the City Council has authorized temporary use of the Balboa Park lily pond as a casting pool.

In addition to serving as a picnic and play area, the big section of lawn in the center is designed for occasional use for special events. In the event of an archery tournament too large for the ranges farther south, for example, the central section could easily serve as a supplement.

The entire development encompasses 75 to 80 acres immediately south of Upas Street from Alabama Street eastward to Arnold Street. Only the northern part of the area, centered about Texas Street, is developed for use now.

The Morley Field plan is tied to another plan for developing Balboa Park in that the riding stables now located on a mesa west of Park Boulevard and north of Balboa Stadium will have to be moved to Morley Field before the City can go ahead on plans to develop the mesa into a picnic area, playground and supplemental athletic field for San Diego High School.

September 14, 1947, San Diego Union, B-1:5-8. Sketch shows additions proposed to make Morley Field city's finest sports center.

September 21, 1947, San Diego Union, B-1:1. Sam W. Hamill will draw up Veterans' meeting hall plans; \$300,000 building to be financed from proceeds of Camp Callan salvage and funds for park restoration supplied by the Navy.

Hamill, who has agreed to undertake the work, was selected because he has worked on plans for other proposed veterans' buildings and is familiar with their needs.

Mayor Harley E. Knox, who proposed the structure, said he would appoint a committee representative of veterans' organizations to consult with the architect before work gets underway.

As approved by the City Council and City Park Commission, the structure will be erected on the west side of the old Indian Village site in the park and will be financed with Camp Callan salvage profits and park restoration funds provided by the Navy. Furnishings would be purchased from the wartime Buddy Beds trust fund assigned by the courts to the City for veterans' benefit purposes.

September 21, 1947, B1:1. Bowl rehabilitation soon to be complete.

Rehabilitation of the Ford Bowl will be completed about the first of next month and rehabilitation of the House of Pacific Relations will be completed about November 1, D. M. Hammond, Superintendent of the City Building Division, reported yesterday. Work in both areas is being done by city forces.

In the Ford Bowl, workmen are finishing the lighting and sound systems and replacing the last row of seats. The 78 (?) buildings in the House of Pacific Relations are being painted inside and out, roofing and wiring are being replaced and structural defects are being remedied.

October 1, 1947, San Diego Union, A-12:4. City to spend \$1,911,000 for improvements.

The City has \$1,363,000 in its capital outlay fund but has need for \$1,911,000 to spend for major public improvements in the next two years, City Manager Fred A. Rhodes told City Councilmen yesterday. In addition, Rhodes reported the fund now contains \$1,608,000 appropriated for specific projects but not yet spent.

Expansion of the sewer system is the most expensive work contemplated for the next two years, Rhodes said. The work is expected to cost a total of \$1,570,000, of which a million has been earmarked for enlargement of the sewage treatment plant.

October 26, 1947, San Diego Union, A-5:2-4. San Diego Zoo obtains rare exhibit of ducks.

October 26, 1947, San Diego Union, B-1:1, B-16:3. Tentative remodeling plans for Exposition buildings to be ready soon; three of Balboa structures due for civic use; trimming of costs now main job of Calland, architects.

Tentative plans to remodel three of the 1935 Exposition buildings in Balboa Park into a Civic Theater, an Exhibit Building and an Arts and Crafts Building will be submitted to City Manager Fred A. Rhodes in the next few weeks, Leo B. Calland, City Parks and Recreation Director, reported yesterday.

"Plans are near completion on all three projects," Calland said, "but now we have to trim the costs down to what the City Council expects to spend."

Calland conferred Friday with architects and Russel Rink, Assistant to the City Manager, on the Arts and Crafts and Exhibit Building, and the group pared \$20,000 from the remodeling cost of that project.

October 28, 1947, San Diego Union, A-1:2-3, A-3:3. Forty thousand crowded Balboa Stadium in welcome to Admiral Chester W. Nimitz in Navy Day program last night.

October 28, 1947, San Diego Union, A-8:5. Globe Theater to open season tomorrow night.

Dark since Pearl Harbor, the little Balboa Park playhouse has been reconditioned, the most noteworthy improvements including cushioned seats, replacing the former benches, and interior decoration.

October 30, 1947, San Diego Union, A-13:2-5. Electrical Show renewal set in Balboa Park December 27.

October 30, 1947, San Diego Union, A-17:2-3. City Manager Rhodes yesterday approved plans for remodeling the State Building into a civic exhibit building; the architect was directed to draw up specifications for the \$80,000 project; original plan called for \$98,000.

October 30, 1947, San Diego Union, B-1:1-2. "Curtain call" trumpets to herald reopening of Old Globe playhouse, by Constance Herreshoff..

October 31, 1947, San Diego Union, A-8:5. "Kiss and Tell" to be offered at Old Globe Theater.

October 31, 1947, San Diego Union, B-1:2-4. San Diego Zoo invaded by itinerant ducks.

November 2, 1947, San Diego Union, A-6:5. Tryouts for "Kiss and Tell," a comedy to be presented at the Old Globe Theater for two weeks starting December 3, will be held today.

November 2, 1947, San Diego Union, Magazine, 1:2-4, San Diego artist colony valued feature in cultural life of city.

November 3, 1947, San Diego Union, A-8:3-5. Thomas Robertson, assistant director of Fine Arts Gallery, wife arrive from Portland to make home (portrait).

November 3, 1947, San Diego Union, A-10:4. Tenth annual Fiesta of the House of Pacific Relations Saturday night in the San Diego Women's Clubhouse.

November 9, 1947, San Diego Union, A-10"2-4. Eleventh Avenue canyon as it appears today (illus.).

November 9, 1947, San Diego Union, A-21:2-3. Victoria pigeons increase at San Diego Zoo.

November 12, 1947, San Diego Union, A-1:2-4. Armistice day ceremony at Organ Pavilion yesterday; rearmament plans outlined; nation's traditional policy of maintaining a small peacetime army has been junked says Colonel E. L. Tidwell of the 309th AG Replacement Depot.

November 16, 1947, San Diego Union, B-1:2-4, B-16:4. Square dance roundup brought 200 to State Building in park last night.

November 16, 1947, San Diego Union, B-1:5, B-16:4. Atomic energy exhibit due at Federal Building in Balboa Park; show to explain blast potential in laymen's language; Science and Industry show opens tomorrow.

The atomic energy exhibit was prepared by the American Chemical Society for display in Paris a year ago to the United Nations Educational, Scientific and Cultural Organization. It will be shown here under auspices of the San Diego section of the society.

November 16, 1947, San Diego Union, Amusement, 4:3. Lowell Davies, president of the San Diego Community Theater, announced decision yesterday to extend the number of performances of any one play at the Old Globe from 10 to 14.

November 16, 1947, San Diego Union, Amusement, 7:6-8. Old Masters will be featured when Fine Arts Gallery opens in park, by Thomas R. Robertson.

November 19, 1947, San Diego Union, A-5:1. Painters, city clash over job on park tower.

Painting of the dome of the California Tower Building, Balboa Park, was halted yesterday by a difference of opinion between the City and AFL Painter's Union on whether the work should be done by brush or spray gun. . . .

Herbert C. Baker, Business Agent of the Union agreement with contractors permits use of spray guns "where they are practical."

November 19, 1947, San Diego Union, A-5:5-6. The City Council yesterday lowered its rental fee for use of Balboa Stadium in an effort to come to an agreement with Al Bahr Shrine Temple.

November 23, 1947, San Diego Union, A-20:6. Spanish Village rehabilitation nearly ended.

John w. Olsen, President of the Spanish Village Art Center, a group that operated the Village before the Army took it over has asked to lease the area again, it was reported by Park and Recreation Director Leo Calland.

Before negotiating a lease, the City Park Commission has requested the Property Division to establish proper rentals and has asked Olsen for details on how artists qualify for membership and how the studios will be assigned to them, Calland said.

Because the structures do not measure up to the State building code requirements, they will be available only for studios and workshops. No one will be permitted to live in them, Calland said.

November 23, 1947, San Diego Union, Amusement, 4:6. New plays planned at Old Globe Theater.

November 25, 1947, San Diego Union, A-18:3-5. Sitatunga antelope arrives at San Diego Zoo from Chicago.

November 26, 1947, San Diego Union, A-7:3-5. More than two million dollars worth of works of art sent to park from temporary gallery in Mission Hills; official reopening ceremonies of Fine Arts Gallery December 13 at 2:30 p.m.

November 27, 1947, San Diego Union, B-1:5. Thanksgiving rites at Organ Pavilion this morning sponsored by San Diego County Ministerial Association

December 2, 1947, San Diego Union, B-2:1-2. Tenth annual Electric Show will open tonight at Federal Building, Balboa Park.

December 3, 1947, San Diego Union, A-1:6, A-4:1. Fifteen thousand attend Electric Show.

December 3, 1947, San Diego Union, B-14:2-4. Army has rehabilitated Spanish Village; Art Group balked in plan to return to old quarters.

December 4, 1947, San Diego Union, A-18:5. Electric Show attracts 20,000 on second day.

December 4, 1947, San Diego Union, A-19:5. University fund rally planned at Organ Pavilion Sunday.

December 6, 1947, San Diego Union, A-8:3. Electric Show attracted 20,000 yesterday.

December 6, 1947, San Diego Union, A-8:6. Pat O'Brien, movie actor, to speak at University Foundation Fund rally in Balboa Park.

December 7, 1947, San Diego Union, A-4:5. Pat O'Brien speaks today at fund campaign rally for San Diego University.

December 7, 1947, San Diego Union, A-35:2-4. San Diego Zoo acquires two cassowaries.

December 7, 1947, San Diego Union, Magazine, 10:1-4. Reopening of Fine Arts Gallery in park planned Friday, Saturday; member's preview at 8 o'clock Friday evening; official reopening at 2:30 p.m. Saturday.

December 8, 1947, San Diego Union, B-1:1-5. Mass meeting at Organ Pavilion for Catholic Bishops' Foundation Fund for proposed San Diego University.

December 8, 1947, San Diego Union, B-1:8. 30,000 attended last day of six-day Electric Show in the Federal Building in Balboa Park yesterday afternoon and evening

Total attendance at the show was more than 135,000, compared to 125,000 for the last show six years ago, Clark Chamberlain, director of the exhibit, said.

December 9, 1947, San Diego Union, A-6:2-5. Orangutan gets monkey companion at San Diego Zoo.

December 9, 1947, San Diego Union, A-9:1. Mayor Knox says city's aim is not an idealistic plan.

December 11, 1947, San Diego Union, A-12:7-8. The 1947 County Grand Jury recommended playgrounds to curb juvenile delinquency.

December 11, 1947, San Diego Union, B-1:1-3. Greater Fine Arts Gallery to reopen tomorrow night; old master's works included in new exhibit in park; Dr. W. R. Valentiner, Director Consultant of the Los

Angeles County Art Museum and Vincent Price, stage and screen act and art collector, will speak at the membership preview and public ceremonies the following day.

December 13, 1947, San Diego Union, A-10:1-5. Notables who attended opening of Fine Arts Gallery, by Eileen Jackson.

December 14, 1947, San Diego Union, A-4:3. Fine Arts Gallery reopened after 4-1/2 year lapse; Reginald Poland tells how Fine Arts Gallery came into being.

As the Balboa Park carillon tolled 21 times --- a note for each year of public service --- the doors of the Fine Arts Gallery were reopened to the public yesterday afternoon for the first time since March, 1943.

December 14, 1947, San Diego Union, Magazine, 10:1-4. Fine Arts Gallery open to public today.

December 17, 1947, San Diego Union, B-1:1-2. Snake-killing Secretary bird newest resident at San Diego Zoo; purchased from an animal dealer for \$400; it will be fed strips of raw meat.

December 17, 1947, San Diego Union, B-1:6. City Council yesterday released \$300,000 available for construction of a proposed Veterans' Memorial Building in Balboa Park to be used as a meeting place for veterans' organizations.

The money will be taken from profits realized from sale of equipment and materials salvaged from Camp Callan.

The fund for the building was made available at this time so that fees could be paid to architects for designing the structure, City Manager Fred A. Rhodes said. The building will be erected on the west side of Park Boulevard, opposite the Zoo, on the site of the old Indian Village.

December 21, 1947, San Diego Union, B-1:4. Decision due soon on fate of Fair buildings; rehabilitation will hinge on early surveys.

A detailed survey will be started soon to determine how many of the six condemned 1915 Exposition buildings along Laurel Street in Balboa Park can be rehabilitated, City Manager Fred A. Rhodes indicated yesterday.

It already has been determined that the House of Hospitality can be saved, and as soon as plans and specifications for its rehabilitation have been completed, surveys will be made of the other structures, Rhodes said. The work is being done by Paul A. Wenhe, structural engineer, and W. Templeton Johnson, architect, both hired by the City on a contract basis to handle rehabilitation of Park buildings.

December 21, 1947, San Diego Union, Magazine, 7:1-4. Fine Arts Gallery attendance gains, by Thomas B. Robertson.

Attendance at the Fine Arts Gallery since its reopening last weekend attests the popularity of this institution among San Diegans. Nearly a thousand members and guests gathered for the evening preview, and another 700 attended the official Saturday evenings. It was Sunday's attendance, however, which astounded this writer. Although art galleries are seldom the scene of mass gatherings, nevertheless, from 1 and 5 p.m. last Sunday more than 1600 people entered the gallery.

December 28, 1947, San Diego Union, A-2:1-4. Fine Arts Gallery wing will look like main building.

The proposed "silver-plate" east wing of the Fine Arts Gallery in Balboa Park will duplicate the architecture of the main gallery and approximate the style of the Laurel Street buildings built for the 1915 Exposition.

The wing to be built on the site of the condemned American Legion building will be of Plateresque architecture, so-named because it follows the ornateness of the work of 16th century Spanish renaissance silversmiths.

December 28, 1947, San Diego Union, Magazine, 1:2-3. San Diego flora collection, one of best in world, by John E. Olsen.

Chiefly responsible for the valuable collection is the late Dr. Harry Wegeforth, founder and for many years President of the Zoological Society. Throughout his frequent world travels, Dr. Wegeforth sent rare seeds and plants from all over the globe back to the zoo. His favorites were palms, and the palm gardens he started in the zoo are regarded by many horticulturists as the finest collection of the West Coast.

December 28, 1947, San Diego Union, Magazine, 7:1-4. Reginald Poland to speak at Fine Arts Gallery today, by Thomas B. Robertson.

The Fine Arts Gallery Sunday afternoon talk will be given this week by Reginald Poland, the gallery's director. He will discuss the Venetian spirit in art as illustrated by paintings in the gallery's collection. The talk will begin at 3:30 in Gallery 8. Chairs will be provided for listeners who will be admitted without charge. The gallery is open daily except Monday from 9 a.m. to 4:30 p.m. and on Sunday from 1 to 5 p.m.

December 31, 1947, San Diego Union, B-1:1-2. The City Council yesterday vigorously opposed reported attempts by the Navy to acquire title to Silver Strand Park for amphibious training purposes, but expressed the hope an arrangement can be worked out to permit the Navy periodic use of the beach when necessary.

1948

Summary of Events in 1948

(Note: Dates of events are approximate only.)

Junior Chamber of Commerce urged planetarium in California Tower Building
(February 5, 1948)
Cabrillo freeway opened (February 27, 1948)
Vandals smashed buildings in Spanish Village (March 11, 1948)
City Manager differed with Building Inspector over fate of Balboa Park
buildings (March 14, 1948)
Structural Engineer said Food and Beverage Building and House of Charm
could be saved (April 6, 1948)
Museum of Man reopened (April 17, 1948)
City to charge rentals in Balboa Park (April 21, 1948)
Widening work on Pershing Drive (May 6, 1948)
Starlight Opera opened at Ford Bowl (June 6, 1948)
Names of Balboa Park buildings changed (June 30, 1948)
Organ concerts resumed (July 18, 1948)
House of Pacific Relations returned to nations (August 1, 1948)
Park Commission opposed to giving space to San Diego World Federalists
and San Diego Chapter of United Nations Association
(August 22, 1948)
Electrical Appliance Show in Federal Building (September 14, 1948)
Free band concerts at 6th and Olive, Balboa Park (September 19, 1948)
Science and Industry Show in Federal Building (October 1, 1948)
Groundbreaking for Blind Recreation Center (October 8, 1948)
Gem Show in Federal Building (October 16, 1948)
Miniature train made its first trip (November 14, 1948)
Ordinance curtailing dogs in Balboa Park (December 10, 1948)

San Diego Magazine, October, 1968, Vol. 21, No. 1. Way Back in 1948 A. D., by Roberta Ridgely.

Along San Diego's waterfront the *Star of India* was embarrassed by its sawed masts (a wartime precaution because of possible low-flying planes). Convair was embarrassed by its surplus of square footage under roof, and leased its Plant 11 to a gentleman who was going to save San Diego's economy by making us an auto-producing center. Nearby at Lindbergh Field a group of ex-airforce pilots were beginning an aviation school, and were flying some charter, but PSA with its fleets of 727s and stewardesses with candy-box hats were figments of the future.

Down in Mission Valley a boy could make a good thing of rising early enough to pluck dewy watercress and sell it to produce merchants. Mission Beach and Ocean Beach still were connected by a bridge, and the whizzing traffic was such that no pet dog or cat was save along Mission Boulevard. Out on Mission Bay there was a big dredging program afoot, with the immediate end effect of preventing sailboats from running aground. Dredging was supposed to be the first step toward what eventually would be an aquatic park. When you tried to impress an Eastern visitor with a description of what the ultimate Mission Bay development could be, the elicited comment was, "What an imagination YOU've got."

Downtown was --- like downtown. No major shopping center yet had been constructed, and on any business day in the heart of town you could run into a goodly number of your acquaintances. Not all of the passersby were shoppers. Most doctors and dentists still were in the early high-rise Security Building --- then the Medico Dental Building --- at Second and Ash. They

scarcely had begun their move northward to Pill Hill, where a young architect named Richard George Wheeler accomplished most of the conversions.

Men were just beginning to relieve their lapels of the Ruptured Duck discharge button. With women, Christian Dior's New Look was in vogue: fullish skirts swooped so low they had to be lifted before stepping into a bus. The move to exurbia was getting underway, and the transit company's failure to provide satisfactory service to outlying areas already was presaging its doom. (If you suggested municipal ownership of the company, you were accused of being a Socialist, at least.) All over time there really were taxis available in the taxi stands. Today the stands themselves remain, outmoded and empty, hoggishly contributing to the parking crisis.

Lily ponds and bridle paths below Cabrillo Bridge were supplanted by Cabrillo Freeway --- and the wet but intact form of the last frustrated would-be suicide pulled himself drippingly from a pond and limped away. Road builders' cuts left the slopes raw and ghastly. It took nearly ten years for the segment of Highway 395 to look like a parkway. And now roadbuilders propose to denude it again.

Up in Balboa Park, the Globe concluded its second postwar summer of melodrama and olio, cum loud hissing and peanut shelling. Director Craig Noel deemed such to be beneath the standards of a seriously dedicated community theater, and began to talk about a summer of Shakespeare. Some people thought this rather extreme. Everybody complained that all the choicest new plays were being produced by the Footlighters, a rival nonprofessional organization. And in La Jolla a summer stock company --- La Jolla Playhouse --- brought picture celebrities to trod the boards of the high-school stage.

La Jolla's remodeled Green Dragon Colony established the key for village development by pointing up what was contemporary about the architecture of the past. The theme was reprised successfully again and again, for over a decade --- until one set of get-rich-quick operators made discordant use of some very conspicuous down town lots (and, ironically, went broke in so doing.) La Jolla gloried in Mabel Whitsitt's hat shop, Genevieve Ferguson's art gallery and Vivian Chamblin's Little Pink House; and in gift shops like Armin Richter's and Gerard and Sands.

La Jolla Playhouse stars usually held forth after the show in La Valenica's Whaling Bar. The local Footlighters favored the Peanut Inn, a modest Park Boulevard beer joint which made good hamburgers and provided baskets of roasted peanuts, the shells of which one was encouraged to throw on the floor. The Globe group hung out in the Rendezvous in the Grant, particularly at the tables served by Nellie, a brisk, but tenderhearted waitress who discreetly ignored those of the unemployed who might stuff their pockets with free soda crackers.

The Brass Rail, which had been the first Repeal bar in San Diego, and by the 1940s was in the Orpheum Theater (Commonwealth) Building, still was a classy downtown trysting place. The bar and restaurant for Convair purchasing agents was Valle's (now Harold's Fifth Avenue) in Park West, where the briefcase (forerunner of the attache case) was much in evidence. Downtown In spots were the Saddle Rock (you could dine in the bar and be served by everybody's favorite waiter, George, now elevated in station and greeting you at Lubach's), and the Chi Chi, on Fourth Street, across from the Grant. The Chi Chi was patterned after the then-famous Palm Springs bar and restaurant of the same name. But the decor's bare-breasted relief Balinese-type bunnies scandalized the local citizenry. The girls in the murals ended up wearing something between a drape and a chemise.

The Golden Lion of burnished renown had disappeared from downtown, where it has been the Chi Chi's predecessor. It reappeared on El Cajon Boulevard with at least one of its old chefs, some of the famed photographs and the recipe for apple pie. Many people truly believed that one section of the Boulevard was destined to become San Diego's Miracle Mile. Motels proliferated until there were eighty strung out between Park Boulevard and La Mesa.

The chocolate-nut- sundae capital of La Jolla and the beaches was Walsh's in Bird Rock (first with lazy-Susan toppings). In San Diego hot-fudge sundae headquarters was a new place at El Cajon Boulevard and Euclid --- a red-and-white striped-awning drive-in with a shingle that said Oscar's. At Mission Beach Amusement Park, where the roller coaster already had a collection of condemnation notices, an oceanfront store sold excellent salt water taffy and you still could purchases a tasty hamburger complete with unwatered ketchup.

People retained that postwar glow, that radiant conviction that something wonderful was about to happen. A publication called *Magazine San Diego* began its love affair with its city from a North Park warehouse at 30th and Meade. Admen Charley Ramsey of the Phillips Company and Gerald Champ of Barnes-Chase said they liked the magazine, but neither bought any space for that first issue. (Champ predicted it wouldn't last a year.) It came out in October of 1948, and owners Edwin F. Self and Frank Sherwood celebrated putting the first issue to be by dropping by Romaine's, a little Broadway bar where Romaine Shackelford featured fine food greatly admired by San Diego's small group of media people. A few months later, in the Spring, Ed Self responded to a rush call to the 30th and Meade location, where he saw smoke pouring forth. He also saw fireman directing a torrent of water through a window onto the magazine subscription files and a neat stack of engravings, copy, ads and art that represented the entire May, 1949 issue.

Frank Sherwood decided to get back to get his Ph.D. Ed Self decided to put out a May issue anyway. He took offices in lonely and cavernous Convair Plant Two, of which he then was the only tenant. For a while things seemed to pickup, and the magazine moved to Imig Manor (Lafayette Hotel), where between the bar and the pool for a short hedonistic period a west-coast publication was put out in the manner that many people supposed a west-coast publication was put out. But the Korean War hit and by September 1950 the magazine's financial situation was bleak. It was saved by continuing as a bi-monthly.

At about the same time the *San Diego Journal* folded. Lionel Van Deerlin (today one of the few Congressmen who can write his own material) together with other ex-*Journal* employees, began *Point*, a small, noisy, obstreperous news weekly. Eventually *Point* passed into the hands of John A. Vietor. In September, 1955, *San Diego Magazine* (having abandoned its youthful artifice of an inverted title) and *Point* issued their first combined publication.

These are the antecedents from which we grew. This is the environment in which we flourished. This is the San Diego which some San Diegans may have forgotten, and others never even knew.

January 4, 1948, San Diego Union, A-18:5. Members of the City Commission and the Spanish Village artists worked out details of a lease on the old Spanish Village area in Balboa Park at a meeting Wednesday; the Village was recently rehabilitated by the Army.

January 4, 1948, San Diego Union, Society, C-1:1-8. At the Old Globe.

January 4, 1948, San Diego Union, Features, 7:3-5. Donal Hord's sculpture in diorite, "Rest on the Flight to Egypt," lend for reopening of Fine Arts Gallery in its Balboa Park location (illus.).

January 7, 1948, San Diego Union, A-1:5-6. H. Louis Bodmer, president of the San Diego Chapter, American Institute of Architects, yesterday joined the panel that will discuss the future of the old Exposition buildings on the Union and Tribune-Sun Radio Forum over KUSN tomorrow night at 8; with him will be Harry C. Clark, former mayor of San Diego, and Leo B. Calland, city Park and Recreation director.

January 7, 1948, San Diego Union, A-4:2-4. Architect's sketch of new War Memorial Building submitted to Mayor Harley E. Knox yesterday by John S. Siebert and Sam W. Hamill, architects; will be erected with \$300,000 profit from sale of Camp Callan; contains a large auditorium and smaller meeting rooms.

January 8, 1948, San Diego Union, A-1:4-5. Park building rehabilitation to be forum subject tonight.

January 8, 1948, San Diego Union, A-9:6. Truce reached on use of lily pond in Balboa Park.

Starting this weekend, the pool will be open to the public for bait casting from 10 a.m. to 5 p.m. Saturday and Sunday.

As soon as a special platform can be constructed, fly casting facilities will also be available. Admission will be free but casters must bring their own equipment.

January 9, 1948, San Diego Union, A-5:2-3. Forum declares park buildings should stay.

The condemned 1915 Exposition buildings in Balboa Park, all outstanding examples of ornate Spanish colonial architecture, should be left standing until definite plans are drafted to rebuild them or replace them, speakers on **The Union** and **Tribune-Sun** Radio Forum agreed last night.

January 9, 1948, San Diego Union, A-9:5. School Board seeks location in Balboa Park.

The Board of Education wants to locate the proposed new City School Administration building in Balboa Park, it was disclosed yesterday as Leo Calland, City park and recreation director, announced the Park Department has begun a study of possible locations.

January 11, 1948, San Diego Union, A-4:3-5. Woman killed in leap from Cabrillo Bridge.

January 13, 1948, San Diego Union, B-12:5. John W. Olsen, president Spanish Village Art Center, fearful Spanish Village lost to arts; Park Board wants rents of up to \$30 for the smallest quarters.

January 15, 1948, San Diego Union, B-1:1. Artists ready to renew fight for Spanish Village.

Balboa Park's embattled artists, who fear the City is putting cash ahead of culture, are about to renew a running argument with their prospective landlord.

January 18, 1948, San Diego Union, A-12:1-5. Museum of Man soon to be open as repairs made.

Repairs and alterations on the main floor and balcony of the San Diego Museum of Man will probably be completed by April 15, Malcolm Farmer, director and curator of anthropology, announced yesterday. By mid-summer the entire museum will be open to the public, he said.

January 18, 1948, San Diego Union, A-12:1. Plans to restore the House of Hospitality are nearing completion and the city will be ready to call for bids in a few days, City Manager Fred A. Rhodes reported yesterday.

January 18, 1948, San Diego Union, B-1:1-2. Artists "up in arms" over Calland's remark that Spanish Village should become at Art Gallery and Selling Mart for local artists whose works do not qualify for the Fine Arts Gallery.

January 18, 1948, San Diego Union, Features, 7:1-5. Naval Hospital patients have Red Cross Christmas.

January 20, 1948, San Diego Union, A-1:8. Rear Admiral Oscar C. Badger, 11th Naval District Commandant, tells Congress of housing need; says Fleet may move from San Diego base unless more homes are provided.

January 20, 1948, San Diego Union, B-1:1. Spanish Village Art Center in tempest stage.

January 22, 1948, San Diego Union, A-18:4-5. Artists have chance to use Spanish Village.

Possibility that the Spanish Village Artists, Inc. might yet regain occupancy of the Spanish Village area in Balboa Park appeared stronger yesterday, as Leo Calland, park and recreation director, said the "way is still open" for negotiations between the artists and the Park Department.

January 23, 1948, San Diego Union, A-19:3. Mrs. Mary A. Greer, president of San Diego Floral Association for 25 years, dies at home.

January 25, 1948, San Diego Union, B-1:1-4. Officials hope park arcades can be saved; Electric Building's place in face-lifting program uncertain.

With the House of Hospitality definitely scheduled as the next Balboa Park building to be rehabilitated, the City now is turning its attention to the Electric Building and the arcades that line both sides of Laurel Street through the 1915 Exposition area of the park.

January 27, 1948, San Diego Union, A-3:3. Artists to confer with park group; Committee appointed to determine approximate costs of future repairs to Spanish Village.

January 28, 1948, San Diego Union, A-4:4. Hollywood Building and California State Building in Palisades area to be rehabilitated.

At the same time, it was indicated the Navy soon may vacate the former Palace of Education in the same area, now in use as an officers' club, and councilmen authorized any work that may be necessary to convert it to civilian use.

January 29, 1948, San Diego Union, A-6:6. Cabrillo Shrine expansion set by Government.

January 30, 1948. San Diego Union, B-1:1. The Harbor Commission voted yesterday to give the Navy 100-year possession of Navy Field, the Public Works Building on Pacific Highway, the Fleet Sonar School grounds and other tideland areas; the City gets title to 244 acres of Marine Recruit Depot land, including half the main Lindbergh Field runway and 3100 feet of adjacent bay frontage along Harbor Drive.

February 4, 1948, San Diego Union, B-1:8. The spray gun vs. paint brush method of painting Balboa Park buildings was brought up to the City Council again yesterday, with indications it finally may be settled next Tuesday.

February 4, 1948, San Diego Union, B-8:1. Artists, Park Board end dispute on occupancy of Spanish Village.

The artists group lived in the area rent-free before the war, but their contract specified that they must pay for upkeep of the property. The City's post-war policy, however, is that park tenants must pay the City a flat fee for which the City provides upkeep.

February 5, 1948, San Diego Union, B-1:3. Planetarium in park urged.

Operating of a \$25,000 planetarium in the California Tower Building in Balboa Park was proposed to the City Council yesterday by the Junior Chamber of Commerce.

February 5, 1948, San Diego Union, B-3:1. Two tryouts set for "Family Portrait" at Old Globe Theater.

February 8, 1948, San Diego Union, A-5:1. Ten Galapagos penguins arrive at San Diego Zoo.

The additions to the penguin colony were captured on Narborough Island, one of the famous Galapagos Islands, six weeks ago by Clarence Nasziger, engineer of the tuna clipper, *Espiritu Santo*.

February 8, 1948, San Diego Union, A-5:2-3. City realizes \$104,000 in park salvage sales.

Most of the property was left in the park by the Navy, although the former Canadian Legion Building and a few other properties were owned by the City before the war. The Navy left more than 40 frame buildings, large amounts of plumbing supplies and other materials in the park when it ceased operation of its auxiliary hospital there.

February 10, 1948, San Diego Union, B-14:3-4. City Park Division completes dozen new picnic facilities.

The Park division also has constructed 800 feet of log rail fence along the Cabrillo Freeway bridle trail to keep horseback riders off developed areas along the Seventh Avenue section of Balboa Park.

February 12, 1948, San Diego Union, B-1:1. City Park Commission firmly against plans to locate a school administration building in Balboa Park.

Meanwhile, City and school officials have agreed that no further steps toward locating the building in the park will be taken until after the City has received its report from Earl O. Mills, special planning consultant hired three months ago to make a complete planning survey of the City.

February 15, 1948, San Diego Union, A-2:2-3. Feathers of peacocks at San Diego Zoo now brightest.

February 17, 1948, San Diego Union, A-6:1-2. Captain Mackey takes charge of Naval Hospital.

February 22, 1948, San Diego Union, A-16:1-2. "Another Part of the Forest" by Lillian Hellman gets ardent applause at Old Globe.

February 22, 1948, San Diego Union, B-1:1-5. City planners vision vast park spreading over all of southern end of Point Loma; scenic area overlooking harbor, ocean would encompass, Fort Rosecrans, by Winthrop Cady..

February 27, 1948, San Diego Union, B-1:7. Cabrillo Freeway opening slated for tomorrow.

Parts of the highway have been in use for some months, but the section from Washington Street overpass to the downtown terminus has been kept closed to permit finishing of the shoulders of the freeway and planting of the Balboa Park slopes bordering it.

February 28, 1948, San Diego Union, A-1:4, A-6:1. Cabrillo Freeway makes dream reality.

The \$3,500,000 Cabrillo Freeway --- a dream of San Diegans for nearly 15 years --- will become a reality today at 2 p.m. when state, city, military and civic leaders officially open the highway to traffic.

March 1, 1948, San Diego Union, B-1:6. Balboa Park chimes give impromptu night program.

W. Allen Perry, park director, said the electric mechanism which sounds the Westminster chimes every quarter hour is controlled by an electric clock and normally shuts off at 8 p.m. daily.

The electric power was off in the California Building Saturday afternoon for about 4 hours, which made the chimes clock 4 hours late.

March 2, 1948, San Diego Union, A-1:1. A-4:4. Spreckels interests sell street car, bus system.

March 4, 1948, San Diego Union, B-1:1. Park Board, artists renew battle over park site.

John W. Olsen, president of the Spanish Village Art Center, Inc., labeled the Park Board "unreasonable and unfair," when it declined the artists' offer of 1-1/4 cents a square foot a month rental for the village.

March 5, 1948, San Diego Union, A-19:2. Artist objects to paying rent on Art Center.

Another brickbat was tossed from the San Diego art colony at the "City fathers" yesterday by Fred Hocks, artist, who commented that the fathers "should feel the responsibility to bring to your constituents the contribution of the artists."

March 6, 1948, San Diego Union, B-1:2. Spanish Village report planned.

A report on negotiations between the City Park Commission and the Spanish Village Art Center, Inc. --- negotiations that have ended in deadlock --- was being prepared yesterday by Leo Calland, City park and recreation director, for City Manager Fred A. Rhodes.

March 7, 1948, San Diego Union, B-1:7. San Diego Zoo birthrate booming here.

March 11, 1948, San Diego Union, A-5:1-3. Vandals smash buildings in Spanish Village.

Doors, plumbing and electrical fixtures and windows were broken and gaping holes, some large enough for a person to walk through, were torn in walls and partitions. Roof tiles were removed and holes punched through the ceilings.

March 14, 1948, San Diego Union, B-1:1. Star-Light Opera productions to move to Ford Bowl this summer; three times as many admissions possible in new location, by Helen Zugelder.

March 14, 1948, San Diego Union, B-1:2-3. Saving of condemned buildings planned; City Manager Rhodes differs with inspector's demand that Electric, other structures be rebuilt.

The City is going to save the Electric Building, one of the beautiful old 1915 Exposition buildings in Balboa Park condemned in July by the city building inspector and fire marshal.

March 17, 1948, San Diego Union, B-14:5. City Council lets Balboa Stadium contract work.

A contract for erection of the long-delayed facilities in Balboa Stadium was awarded by the City Council yesterday to F. E. Young, on a cost, plus fixed fee basis.

March 18, 1948, San Diego Union, B-1:5. Five thousand dollar city fund sought for rifle range in Balboa Park.

Suggestion that the City appropriate \$5000 for construction of a rifle range in the basement of the Ford Building in Balboa Park was filed with the City Council yesterday by Lee E. Echols, field representative of the National Rifle Association.

March 21, 1948, San Diego Union, A-18:1. Twenty-five thousand seven hundred and four visitors to San Diego Zoo told of its activities.

San Diego Zoo was brought to the attention of 24,704 children and adults during 1947 by the Balboa Park institution's educational department, officials announced yesterday.

Ken Howard, staff lecturer and instructor, conducted 16,324 children from the city and county schools on motorized tours of the 200-acre "nature laboratory," and Mrs. Jane Fergus Ross, in charge of the educational department, said another 9380 club members heard zoo speakers.

In taking school children to the zoo, officials try to correlate the subject matter with the curriculum of the class.

March 21, 1948, San Diego Union, A-23:2-4. Bonham Brothers Boys' Band to present Easter concert in park.

Instrumental and vocal specialty numbers will mark the 18th annual Easter concert by the 135-piece Bonham Brothers Band March 28 at 3:30 p.m. in the Ford Bowl, Balboa Park.

March 21, 1948, San Diego Union, B-1:1. Museum of Man to reopen with new exhibits.

The Museum of Man, in mothballs since 1943, will reopen April 17. The Balboa Park institution's first post-war exhibits will include the 500-thousand-dollars worth of material on display before the war, plus many items collected during the war years by museum officials on duty in foreign lands in the armed forces.

When the doors are thrown open at 10 a.m., visitors will walk through an arch designed after the Mayan temples of the ninth century Guatemala. Two upright columns in the shape of huge serpents grace the sides of the entrance, and the walls are taken from the ornate, inlaid walls of a Mayan temple.

March 26, 1948, City of San Diego Inter-Departmental Communication; From: Leo B. Calland, Park and Recreation Director; To: F. A. Rhodes, City Manager.

Subject: Proposal of National Rifle Association of American for Conversion of Indoor Rifle Range in Basement of Ford Building.

Returned herewith Document # 384227, communication from National Rifle Association of America relative to early construction of indoor rifle range in basement of Ford Building.

This proposed indoor rifle range, estimated to cost approximately \$15,000, was given Priority Number 92 by the Manager's Public Works Review Board. This estimate for altering the basement of the Ford Building was based upon information provided by the National Rifle Association and the City Public Works Department.

The latest proposal of the National Rifle Association as presented by Mr. Lee Echols, their field representative in San Diego, requests that the City of San Diego appropriate \$5,000 and that local interests will guarantee the balance of the cost of materials and labor to consummate the project according to the estimate as presented to the Public Works Review Board. It is not the policy of the Park and Recreation Department to recommend construction of projects ahead of their scheduled priority. However, this latest proposal of the National Rifle Association would save the city considerable money and provide a badly needed facility serving youth in the community. In view of the proposed savings to the city, it is recommended that the Manager's Capital Outlay Public Works Review Board consider the expediency of advancing the priority on this project.

/s/ Leo B. Calland,
Park and Recreation Director.

March 28, 1948, San Diego Union, A-11:1. Commercial recreation units show \$202,971 returned to City in first eight months of this fiscal year.

Largest sources of income were the Municipal Golf Course and Balboa Stadium which turned in totals of \$66,230 and \$53,885 respectively.

March 28, 1948, San Diego Union, B-1:1. Repairs start on House of Hospitality in Balboa Park; \$75,000 project.

When the \$75,000 project is completed, the building will be turned over to the House of Hospitality Association, which operated it before the war as one of the City's best-known social centers.

March 29, 1948, San Diego Union, A-3:6-8. Bonham Brothers Boys' Band, directed by conductor Jules Jacques, gives fine Easter concert at Ford Bowl, by Constance Herreshoff.

April 1, 1948, San Diego Union, B-2:5-6. Old Globe Theater to present "State of the Union," the Howard Lindsay and Russel Crouse New York comedy hit, tomorrow.

April 3, 1948, San Diego Union, B-1:1. Amphion Club dissolves after 54 years in San Diego; club was solvent but had lost many members to other local concert series.

April 4, 1948, San Diego Union, A-3:1-4. The housing shortage at the San Diego Zoo was partially relieved last week with the construction of a modern compound for the two African buffaloes, brought here as calves from the St. Louis Zoo in 1946.

April 4, 1948, San Diego Union, A-18:4-6. Open season for photographers in Peach Tree Lane; thousands drawn to Balboa Park by brilliant blossoms.

April 4, 1948, San Diego Union, B-1:1. City Manager Fred A. Rhodes, called in to referee the squabble between the City Park Commission and the Spanish Village Art Center, Inc., yesterday ruled in favor of the Commission but left the door open for some of the artists, as individuals, to obtain space in the Balboa Park quarters.

Rhode's recommendation that the village area be put to immediate use, with space allotted to individuals rather than to a single group or association, will be presented to the City Council Tuesday.

April 4, 1948, San Diego Union, Magazine, 4:6. "State of the Union" at Old Globe.

April 4, 1948, San Diego Union, Magazine, 5:1-4. Informal tour today's attraction at Fine Arts Gallery.

April 5, 1948, Letter, F. A. Rhodes, City Manager; To: The Honorable Mayor and City Council of the City of San Diego, California.

Gentlemen:

Returned is document 384 227, communication from the National Rifle Range Association of America relative to the early construction of an indoor rifle range in the basement of the Ford Building.

It is estimated that this rifle range would cost \$15,000.

It is requested that the City appropriate \$5,000 and that local interests will guarantee the balance of the cost of material and labor for its completion.

Inasmuch as the City would save \$10,000 in providing the facility and have it completed two or three years in advance of the time when the City proposed to construct it, it is recommended that your Honorable Body authorize the City Attorney to prepare a form of ordinance appropriating \$5,000 from the Unappropriated Balance to furnish labor and material for construction of the rifle range in the basement of the Ford Building.

Respectfully,

F. A. Rhodes,
City Manager.

April 6, 1948. San Diego Union, A-5:2-4. Paul A. Wenke, structural engineer employed as consultant by city, says Food and Beverage Building and House of Charm can be saved; William Templeton Johnson and

Oscar G. Knecht, acting fire marshal, concurred; only two of the condemned structures --- Café of the World and Medical-Dental Building (?) have not been approved..

April 6, 1948, San Diego Union, A-6:6. City Manager Rhodes forwarded recommendations to the City Council yesterday that the City appropriate \$15,000 for two recreation projects; one to move Randall Hall from Encanto Elementary School to Encanto playground and remodel it as a recreation center; two to construct a rifle range in the basement of the Ford Building in Balboa Park.

April 7, 1948, San Diego Union, A-5:4. The City Council asked the Park Commission to study feasibility of moving the riding stables from Balboa Park.

The Council indicated it was interested primarily in moving the stable from its present location behind Balboa Stadium so that the area could be turned into a high school athletic field, but that it doubts the wisdom of relocating the stable any other place in the park.

Mayor Harley E. Knox said enthusiastic riders had told him the Park no longer is suitable for riding because it is "too cut up with highways."

April 7, 1948, San Diego Union, B-1:1. The long-standing feud between the City and the Spanish Village Art Center, Inc. over occupation of the Spanish Village area in Balboa Park appeared definitely settled yesterday when the artists accepted City Manager Rhode's recommendation that the studios be leased on an individual basis rather than that the whole area be put under control of the center.

The artists also suggested that a "jury" be selected to pass upon qualifications of applicants for space in the village and offered to bear the expense of bringing out-of-town people here to serve on the "jury."

April 7, 1948, San Diego Union, B-1:5-7. Junior Art League gives public show in basement of Fine Arts Gallery; show dolls of many lands.

April 11, 1948, San Diego Union, A-4:1-4. The San Diego Zoo's three baby Eurasian brown bears made their official debut yesterday.

April 11, 1948, San Diego Union, B-1:2-5. Amphion Club's loss deplored, by John E. Olsen.

Mrs. Loleta L. Rowan, last president of the musical group, said she had been deluged with letters deploring the club's dissolution, April 3.

April 11, 1948, San Diego Union, B-1:7. Malcolm Farmer, director, announced yesterday that the main exhibit hall and balconies of the Museum of Man will be reopened publicly at 10 a.m. Saturday.

April 13, 1948, San Diego Union, B-1:1. Directors and delegates of the House of Pacific Relations last night authorized four spokesmen to insist on pre-war, no-rental contract terms for the non-profit organization's area in Balboa Park.

City Manager Fred A. Rhodes has favored charging a total rent of \$75 a month for the 15 cottages in the House area.

April 14, 1948, San Diego Union, A-10:5. Issue of rental of Houses of Pacific Relations stumps City Council.

At issue was the \$5 a month rental City Manager Fred A. Rhodes and Leo Calland, park and recreation director, propose to charge the House of Pacific Relations for each of the 15 cottages in Balboa Park.

April 14, 1948, San Diego Union, B-1:1-4. "Hope Deferred," John McLaughlin's prize-winning oil painting in the San Diego Art Guild's exhibition at the Fine Arts Gallery, maligned yesterday by John C. Irving, a local resident (illus.).

Judge John Zane said he chose "Hope Deferred" because it "seemed to have the greatest appeal to the imagination. It showed the most courage in its conception and execution."

April 15, 1948, San Diego Union, B-1:1. City Manager Rhodes yesterday appointed an Art Advisory Committee to help re-establish the Spanish Village as an art center in Balboa Park under city sponsorship.

He said the city will put the buildings in shape for occupancy and will rent the studios individually to artists, craftsman and art and craft organizations.

April 15, 1948, San Diego Union, B-1:2-4. **San Diego Union** receives more objections to "Hope Deferred."

April 17, 1948, San Diego Union, A-6:5. Leo Calland, Park and Recreation director, recommended yesterday that any art group not sponsored by the City that has control of a building in Balboa Park should pay enough rent to provide for building maintenance.

No building should be made available for the exclusive and private use of any individual or organization to the exclusion of others.

April 21, 1948, San Diego Union, A-6:8. City to charge rentals in Balboa Park.

Rhodes and Calland pointed out that the proposed \$5 a month rent in the long run would be cheaper than the rent-free occupancy enjoyed by the House of Pacific Relations before the war, because their occupancy permit at that time made them responsible for maintenance.

April 22, 1948, San Diego Union, A-5:5. Delegates of the House of Pacific Relations opposes paying rent for park buildings; feel they should be included as a city-sponsored institution..

April 23, 1948, San Diego Union, B-1:4. Park buildings' names changed; Palace of Electricity now officially known as Balboa Park Gymnasium; California State Building now Balboa Park Conference Building; Hollywood Hall of Fame now Balboa Park Palisades Building; New Mexico Building, also known as Palace of Education, now Balboa Park Club..

April 24, 1948, San Diego Union, A-9:4. Robert Sherwood's "Petrified Forest" to open Friday at Old Globe.

April 25, 1948, San Diego Union, A-3:2-4. Mbongo and Ngagi, two of the largest gorillas on record, are on exhibit at San Diego Zoo as bronze busts sculptured by Holger and Helen Jensen (illus.)

April 25, 1948, San Diego Union, A-20:1-4. New park amphitheater at Boy Scouts campsite in Balboa Park will be dedicated tomorrow.

Harvey H. Atherton said that in addition to the many Scouts who have helped in the construction of the amphitheater, 25 contractors associations and firms contributed funds, labor and material, comprising the greater portion of the cost of \$12,600. The M. H. Golden Construction Co. had general charge and supervision of the work.

April 25, 1948, San Diego Union. Friends of Music concert tomorrow night in the Old Globe Theater.

April 25, 1948, San Diego Union, Magazine, 2:1-3. San Diego Recreational Department arranges 100 Music Week events, by Constance Herreshoff.

April 25, 1948, San Diego Union, Magazine, 7:1-4. Robertson to discuss landscapes on today's tour at Fine Arts Gallery, by Thomas Robertson, assistant director.

April 30, 1948, San Diego Union, A-16:5. Loligro Camp in Balboa Park, center of Camp Fire Girl's recreation and week-end camping, is going through renovation.

Loligro, long used by Camp Fire Girls as their "in town" camp, is going through renovation at the hands of the cabin committee, headed by Mrs. Philip Davenport.

April 30, 1948, San Diego Union, B-1:5-7. Ken Niles will head Dennis Day program in Ford Bowl on May 14; show planned to held San Diego Boys' Club raise \$30,000 fund to build new gymnasium.

May 2, 1948, San Diego Union, Magazine, 2:1-3. Music Festival of city schools will be presented in Ford Bowl this afternoon, by Constance Herreshoff.

May 3, 1948, San Diego Union, B-1:1-2. "Desert Sunshine and Shadow" by Charles A. Small won a plurality among gallery goers who had a chance to vote in the San Diego Art Guild show.

May 6, 1948, San Diego Union, A-22:5. Plans for rehabilitating California State Building and Hollywood Building in Palisades area of Balboa Park ready for City Council action.

The State Building, expected to cost about \$75,000, will contain a large main auditorium or exhibit hall on the main floor, with a series of small conference rooms around the sides of both the main floor and balcony. Floors will be resurfaced, the entire building painted, and kitchen and restroom facilities installed. The plans were prepared by Sam W. Hamill.

The Hollywood Building will be divided into three distinct sections at a cost of about \$70,000, under plans drafted by H. Louis Bodmer.

May 6, 1948, San Diego Union, B-16:2. City starts widening work on Pershing Drive to provide four full-width lanes and room for stalled autos to park has been started and is expected to be completed in 2 or 3 months, City Manager Fred A. Rhodes said yesterday..

May 7, 1948, San Diego Union, B-1:5. Programs set for observance of Music Week.

Programs ranging from band concerts to an organ recital will be presented today in observance of National Music Week.

May 8, 1948, San Diego Union, A-7:5. Paul Sheldon, organist at St. Luke's Episcopal Church, will present the last in a series of organ concerts for National Music Week's local observance this afternoon at the Balboa Park Organ Pavilion.

May 9, 1948, San Diego Union, A-4:1. City remaining within funds in park restoring; restoration being accomplished on California Tower, Natural History Museum and Fine Arts Gallery; Navy paid \$122,944 and actual cost was \$108,800: Navy agreed to a total payment of \$840,000 of which \$790,000 was in cash; in lieu of \$50,000 balance the Navy turned over buildings, plumbing fixtures and other equipment for which the City realized \$106,389; House of Hospitality to be completed in September at an estimated cost of \$72,000; California State Building and Hollywood Building repairs estimated at \$150,000; Food and Beverage and House of Charm repairs estimated at \$150,000.

May 9, 1948, San Diego Union, A-6:2-3. Rare hydrax of Africa now on exhibit at San Diego Zoo.

May 9, 1948, San Diego Union, B-1:1-3. Plans ready for Dennis Day benefit show Friday night in Ford Bowl.

May 9, 1948, San Diego Union, D-2:1-3. Ford Bowl festival, local concerts and Music Week today, by Constance Herreshoff.

May 10, 1948, San Diego Union, A-7:7. Reserved seats go on sale for five Star-Light Opera productions at Ford Bowl.

May 11, 1948, Resolution No. 89412.

WHEREAS, the charter of The City of San Diego, section 55, provides that the City Council may, for the best interests of the City, authorize the City Manager to enter in leases or contracts or lest concessions in Balboa Park; and

WHEREAS, the charter of The City of San Diego, section 55, provides that the City Council shall prescribe the terms and conditions for the use and operation of facilities of a recreational, cultural or educational character, located in the Park; and

WHEREAS, the Park and Recreation Commissions, on the 21st day of April, 1948, approved the following policy in regard to the use of the buildings and facilities located in Balboa Park;
NOW, THEREFORE,

BE IT RESOLVED, By the Council of The City of San Diego, as follows:

That those activities shall be permitted in park buildings and facilities which shall provide the greatest interest and service for the citizens of San Diego and tourists alike over the greatest period of time possible throughout the year; and

BE IT FURTHER RESOLVED that in order to assure the best interests of the City and service to its citizens and tourists, no facility or building or room shall be made available for the exclusive and private use of any one individual or occasion to the exclusion of other individuals, organizations; building or facility use shall be so programmed that group activities sponsored by the Park and Recreation Department shall be given preference; and

BE IT FURTHER RESOLVED, that the rental charges for the use of said park buildings and facilities shall be determined in the following manner:

1. City sponsored park institutions and group activities sponsored by the Park and Recreation Department shall have the use of park buildings and facilities free of charge;
2. Groups or associations of a public interest and services having control of a building or facility which is not sponsored by the City as a park institution and is not sponsored by the Park and Recreation Department shall pay to the City as an rental charge, an amount sufficient to provide for building or facility maintenance as determined by the City Manager and park and Recreation Director.
3. The rental charge for special events shall be:
 - (a) Where no admission charge is made to the public for a special event, the rental charge for said event shall merely cover the custodial and building or facility maintenance costs as determined by the City Manager and Park and Recreation Director.
 - (b) Where the event is a charitable benefit event and an admission charge is made to the public, the rental charge shall be fixed at custodial and building of facility maintenance cost, plus a general overhead charge to be determined by the City Manager and Park and Recreation Director.
 - (c) The rental charge for any commercial event using an building or facility in the Park shall be based on either a flat fee or a percentage of the gross receipts,

exclusive of federal, state and city taxes, as determined by the City Manager and Park and Recreation Director.

Presented by /s/ F. A. Rhodes
Approved as to form by J. F. DuPaul, City Attorney,
/s/ Louis M. Karp, Deputy City Attorney.

Passed and adopted by the said Council of the said City of San Diego, California, this 11th day of May 1948, by the following vote, to-wit:

Yes --- Councilmen: Crary, Wincote, Blase, Dorman, Godfrey.

Nays --- Councilmen: None

Absent --- Councilmen Dail, Mayor Knox

May 12, 1948, San Diego Union, A-7:2-3. The City Council agreed yesterday to change the names of four buildings in the Palisades area of Balboa Park, but balked at changing the names of the Ford Building and Ford Bowl.

May 12, 1948, San Diego Union, A-7:3-4. Schedule of rental rates for city-owned facilities in Balboa Park was approved tentatively by the City Council yesterday but was sent to the City Attorney's office for rewriting before final adoption.

May 12, 1948, San Diego Union, B-14:5. The City Council yesterday refused a request of the County Building and Construction Trades Council that the City should stop spray painting in the Natural History Museum in Balboa Park.

May 14, 1948, San Diego Union, B-1:4. Registration for a special class to develop callers for square dances is scheduled at the meeting and dance of the San Diego County Square Dance Clubs in the State Building, Balboa Park, tomorrow night at 8.

May 15, 1948, San Diego Union, A-1:2-3, A-6:1-2. \$50,000 show in Ford Bowl buys Boys' Gymnasium, by Richard Gottschall.

May 16, 1948, San Diego Union, A-19:2-4. One hundred easels arrive for Summer Art Institute opening June 17 at Fine Arts Gallery.

June 2, 1948, San Diego Union, A-6:2-3. Ken Stott, Jr., curator of San Diego Zoo, takes off to study animals in Africa.

June 4, 1948, San Diego Union, A-7:4. American Legion sponsors Sunday rodeo in Balboa Stadium.

June 6, 1948, A-13:1. Star-Light Opera to present new singers in Ford Bowl.

June 8, 1948, San Diego Union, B-1:8. Cost of remodeling Federal Building in the Palisades into a first-class theater would be about \$402,000 architect H. Louis Bodmer estimated yesterday.

Bodmer's estimate includes a public address system, picture projection booth, and some stage equipment, but no furnishings. Carpets, seats and other furnishings probably would add \$75,000 to \$100,000 to the cost, it was estimated by Russell W. Rink, assistant to the city manager.

June 10, 1948, San Diego Union, B-1:5. City Planning Commission postponed action for two weeks on a plan to permit construction of a Veterans Memorial Building in the old Indian Village area of Balboa Park.

Postponement will permit the commission to discuss the location with Earl O. Mills, of St. Louis, special planning consultant, employed by the City to advise on location of public buildings and to bring the City's master plan up to date.

Specifically the proposal before the Planning Commission was a revision in the City's major park plan. The revision also contemplated some changes in the ultimate plan for development of the Morley Field area of Balboa Park, which commission members said they wanted to go over thoroughly before taking action.

The City plans to erect the Veterans Memorial Building as a meeting place for all veterans' organizations, financing its construction with \$300,000 profits from the sale of old Camp Callan.

June 13, 1948, San Diego Union, B-1:2-5. Recreation officials braced for "schools out" onrush.

June 13, 1948, San Diego Union, C-2:1-3. Nino Marcelli plans retirement after 28 years as music leader, by Constance Herreshoff.

June 21, 1948, Letter, F. A. Rhodes, City Manager; To: The Honorable Mayor and City Council of the City of San Diego, California.

Gentlemen:

Returned is document 386 675, being a form of resolution designating the names of buildings in Balboa Park.

The matter was formerly submitted to your Honorable Body upon recommendation of the Park Commission. Later, it was returned to the Manager for further study.

The Park Commission feels that since the Ford Motor Corporation financed and constructed the Ford Building, it should remain the "Ford" Building.

The Park Commission has been authoritatively informed that the Ford Motor Company had nothing to do with construction of the Ford Bowl. It was constructed by W. P. A. labor and funds entirely from the California Pacific International Exposition. The name "Balboa Park," as applied to this Bowl is important as a locating factor; and this facility should follow the same pattern established for the majority of the buildings in the Palisades area. Consequently, the Commission was unanimous in its recommendation that the name of the Ford Bowl be changed to Balboa Park Bowl.

I, therefore, recommend that the Ford Building remain the "Ford" Building, and that the name of the Ford Bowl be changed to the Balboa Park Bowl.

I further recommend that document 386 675 be referred to the City Attorney for submission to the Council with these corrections.

Respectfully,

/s/ F. A. Rhodes,
City Manager.

June 22, 1948, San Diego Union, B-1:2-4, B-8:2. Civic leaders honor G. Aubrey Davidson on 80th birthday.

June 24, 1948, San Diego Union, A-9:4. Memorial Building planned for park.

The City Planning Commission yesterday amended the Balboa Park plan to permit construction of a \$300,000 Veterans' Memorial Building on the western part of the old Indian Village site. Action on

the proposal has been delayed two weeks while the commission asked the advice of Earl O. Mills, special planning consultant.

Another amendment to the park plan approved at the same time provides for construction of a casting pool in the Morley Field area of the park. The pool, for which the City Council appropriated \$8600 Tuesday, will be built on the site of the present bicycle track, which was to have been a baseball field in the plan for ultimate development of the area.

June 24, 1948, San Diego Union, A-12:2-4. Ford Bowl stage to be improved (illus.).

Steel girders appeared over the Ford Bowl stage yesterday, as workmen started erecting a false proscenium to make the concert stage more suitable for theatrical productions.

REPORT OF THE CITY PLANNING DEPARTMENT, City of San Diego, for the Period July 1, 1947 to June 30, 1948.

- p. 5. The Planning Commission held hearings on the proposal to amend the Master Planning Park Development on Park Boulevard and on Morley Field.

Mr. Mills examined about a dozen sites to construct public buildings and finally recommended Cedar Street.

June 30, 1948, San Diego Union, A-13:3. Lions Club gets permit to build recreation center for the blind on 110 ft. by 170 ft. plot south of Upas Street and east of Indiana Street.

The club will use a plot 110 by 170 feet, south of Upas Street and east of Indiana Street. The club will pay no rent, but the building will be erected at the club's expense and once abandoned it will revert to the city with all furnishings.

The Council also entered into an agreement to allow Swope Electric Railways to operate a miniature train in the park, near the Spanish Village.

June 30, 1948, San Diego Union, A-13:6. Names of buildings in Balboa Park changed.

Approved by the City Council (Resolution 90022)

Palace of Electricity and Varied Industries renamed Balboa Park Gymnasium

California State Building renamed Balboa Park Conference Building

New Mexico Building, Palace of Education, Officers Club renamed Balboa Park Club

Hollywood Hall of Fame, Palace of Entertainment renamed Palisades Building

The three divisions of this building shall be named:

Puppet Theater, Lecture Hall and Craft Center

Ford Bowl renamed Balboa Park Bowl

Federal Building to be renamed Balboa Park Theater upon completion of contemplated conversion work

June 30, 1948, San Diego Union, A-13:7. More vandalism in the Spanish Village was reported yesterday by Patrolman Merlin Burns. Burns said windows were broken, holes poked through walls and partitions, doors torn apart, floors littered with broken glass and window frames smashed.

June 30, 1948, San Diego Union, B-2:1. EDITORIAL: Let's Keep Starlight Opera.

During its first two years the light opera has been sustained largely by underwriting guarantees of civic-minded citizens, moved by a desire to provide the people of the community with the highest type of entertainment at a minimum cost. The period of underwriting has come to an end and the Association has reached a point where it must stand on its own feet. This season will determine whether the people are sufficiently interested in the continuance of the project to come enthusiastically to its support.

July 1, 1948, San Diego Union, A-4-5. Naval Hospital exhibit at San Diego County Fair shows crafts, skills.

July 2, 1948, San Diego Union, A-11:1. Old Globe Theater plans to give the ever popular melodrama, "The Drunkard" and "Ten Nights in A Bar Room" with olios of entertainment of the vaudeville variety for the summer season; Craig Noel, director of the San Diego Community Theater, is supervising productions.

July 3, 1948, San Diego Union, A-1:3, A-3:6. President Truman signs City-Navy swap land measure.

July 7, 1948, San Diego Union, A-7:1. Science Show in park to be free to public.

The fourth annual Science and Industry Show, to be held Oct. 1 to 3 in the Federal Building will be free according to Dr. Dudley H. Robinson, chairman of the Technical and Scientific Studies Council, San Diego. Admission was charged at last year's week-long show.

July 13, 1948, San Diego Union, A-1:1, A-2:7. Officials revive Cedar Street plan for buildings.

July 15, 1948, San Diego Union, B-1:1-6. City maps proposed Civic Center area development.

July 16, 1948, San Diego Union, A-9:3-5. Braille Club picnics at San Diego Zoo.

July 18, 1948, San Diego Union, A-3:1. Children study birds, animals at San Diego Zoo school.

This year there are six classes of 25 children each. The classes have been meeting one day a week to study the animals and birds, according to the children's age levels, Jane Ross, educational director for the zoo, explained.

July 18, 1948, San Diego Union, D-2:1-3. Organ Pavilion concerts got underway yesterday with Royal A. Brown at console, by Constance Herreshoff.

For the present, organ concerts will be presented at the pavilion Saturday and Sunday afternoons at 2:30.

July 19, 1948, San Diego Union, A-6:4. "Maritza" due at Ford Bowl Thursday night.

July 23, 1948, San Diego Union, A-7:4. "Maritza" brims with melody, mirth at Ford Bowl.

July 25, 1948, San Diego Union, D-2:5. Ford Bowl gets extra lights for Hungarian opera "Countess Maritza."

The show starts tonight at 8:30. From any of the bowl's 3800 seats, even in the last row, you can hear perfectly.

July 25, 1948, San Diego Union, D-2:3. Royal A. Brown to give program at Organ Pavilion this afternoon at 2:30, by Constance Herreshoff.

July 26, 1948, San Diego Union, A-4:4-5. "Countess Maritza" brims with melody, mirth at Bowl.

July 26, 1948, San Diego Union, B-1:4-5. City Manager Rhodes home with plans for such diversified projects as improving the rubbish collection system and establishing a science and industry exhibit in the Ford Building along the same lines as displays in Chicago.

At present part of the Ford Building is not in use, although the school system is using some of the basement for storage purposes and has used part of the main floor for vocational training classes. The City has approved plans to establish a rifle range in the basement.

July 29, 1948, San Diego Union, A-11:2-3. "Countess Maritza" reopens this evening in Ford Bowl.

July 29, 1948, San Diego Union, A-12:2-3. Braille Center fund hits \$2,000 in five days of the San Diego Lions Club's 30-day campaign for \$30,000 to build the Braille Recreation Center.

July 31, 1948, San Diego Union, A-2:1. City Planner Glenn Rick backs Cedar Street plan.

August 1, 1948, San Diego Union, B-1:1. City to give House of Pacific Relations back to nations; fifteen bungalows to revert to old organization at 2 p.m. today; at present 19 nations are accommodated in 15 homes; Frank Drugan, founder of the Houses, will occupy a place on honor on the speakers' platform; stage and screen star Melvyn Douglas, master of ceremonies, will present keys to each Cottage.

August 2, 1948, San Diego Union, B-1:1. House of Pacific Relations reoccupied old park section.

A crowd estimated at 4000 persons saw members of the 19 cottages accept bungalow keys from the City yesterday as the House of Pacific Relations formally reoccupied its section of Balboa Park, used by the Navy during the war.

August 3, 1948, San Diego Union, A-5:1. Two thousand two hundred visitors set record for San Diego Zoo.

An average of 2200 persons a day visited the Zoo to set an all-time record of 801,033 admissions for the year ending June 30, Charles L. Cotant, president, reported at the 31st annual picnic meeting of the Zoological Society last night in Balboa Park.

The turnstile count was 562,414 adults and 193,981 children. An additional 44,638 toured the Zoo in organized groups.

Fifty new species of animals and 120 new specimens were acquired during the year, Cotant said. After balancing births and deaths, purchases and sales, the Zoo colony includes 598 mammals, 1331 birds, and 556 reptiles – 2485 animals of 695 species.

Cotant also reported the society purchased two open-type sightseeing buses, a sedan, two pickup trucks, and a street sweeper.

Society members unanimously reelected Cotant, Fred Annable, John P. Scripps and Fred Kunzel to serve 3-year terms on the board of directors. In closed session, directors voted to retain officers for another year.

Mrs. Belle Benchley was reelected executive secretary. She has held the position 21-1/2 years.

After the picnic, society members viewed H. L. Winston's trained seal act in Wegeforth Bowl.

August 4, 1948, San Diego Union, A-9:1. "Vagabond King" opens tomorrow at Ford Bowl; new stereophonic sound system makes hearing perfect in the farthest corner of the Bowl.

August 4, 1948, San Diego Union, A-9:8. Community wide support of the Old Globe Theater through expanded membership will be sought in a drive to begin soon, according to Lowell Davies, president San Diego Community Theater.

August 6, 1948, San Diego Union, A-11:1. "Vagabond King" pleases large audience, by Constance Herreshoff.

August 8, 1948, San Diego Union, A-10:3-5. Curator of San Diego Zoo writes about safari in Africa.

August 8, 1948, San Diego Union, A-20:2. Baby Blestok makes debut at San Diego Zoo.

August 10, 1948, San Diego Union, B-1:1. Indoor Sports Club, on Front Street between Redwood and Quince Streets, to start building soon; club lacks about \$20,000 of estimated \$66,000 cost; club paid \$10,000 for site.

August 13, 1948, San Diego Union, A-12:2-3. Leo Calland, parks and recreation director, has asked whether the City will approve a \$50,000 project for removing 2411 assorted trees along city streets and planting saplings in their place.

City Manager Rhodes has refused to support the request, pointing out that the City has no funds for tree removal.

August 14, 1948, San Diego Union, A-9:7. "Vagabond King" to close here tomorrow night.

August 15, 1948, San Diego Union, A-2:1-4. Blind Center fund boosted by \$1,000 check; only a week remains to collect the remainder of the \$30,000 goal (drawing of floor plan)..

August 15, 1948, San Diego Union, A-3:3-5. Orphan fawns find home in San Diego Zoo.

August 15, 1948, San Diego Union, A-17:1-4. Five thousand members sought by San Diego Community Theater (feature article).

Winding up a 6-week summer melodrama season next Sunday the San Diego Community Theater will launch a drive for 3000 new members under a revised program.

The new program calls for membership at two prices instead of the single \$5 seasonal membership of the last year.

Casting for plays is done through competitive open readings where anyone is welcome to try his hand.

August 17, 1948, San Diego Union, A-7:4. City Manager Rhodes favors cut in City Stadium rental fee from 15 to 10 percent after tax deductions for midget and hot-rod auto races.

The percentage reduction was recommended by Leo Calland, parks and recreation director. He said attendance always has been large enough to pay the City more than \$250, but added that the promoters have lost money on several races this year.

August 18, 1948, San Diego Union, A-6:5. City Council rejects bid to lower Stadium lease.

August 19, 1948, San Diego Union, A-11:1. "Merry Widow" opens tonight at Ford Bowl.

August 20, 1948, San Diego Union, A-9:1. "Merry Widow" pleases many at Ford Bowl, by Constance Herreshoff.

August 22, 1948, San Diego Union, A-5:1. The City Park Commission is unanimously opposed to granting free office space in Balboa Park for the World Federalists of San Diego and the San Diego Chapter of the American Association for the United Nations.

City Manager Rhodes said the commission voted in view of its old policy of granting building space for "activities of greatest public interest."

August 22, 1948, San Diego Union, A-8:2-3. Dr. Patricia O'Connor, veterinarian, praises San Diego Zoo's collection of wildlife.

August 22, 1948, San Diego Union, A-12:1. Zoo-born seals wait for debut at San Diego Zoo.

August 22, 1948, San Diego Union, D-5:1-3. Model Railroad Club provides enjoyment for former sailors, by Charles M. Hatcher.

Until this summer the club had an elaborate layout in Balboa Park, with miles of trackage in the old State Building there. Forced to move out, baggage cars and switch terminal, the club now has its rail lines set up in a building at 1356 Fifth Avenue.

August 23, 1948, San Diego Union, A-6:5. Lions Club to build Blind Center with own funds.

The San Diego Lions Club's month-long campaign for funds to build a Braille Recreation Center in Balboa Park ended yesterday with only approximately \$12,000 of the \$30,000-goal raised, but thanks to the sponsoring organization, the center for the blind will be built anyway.

August 23, 1948, San Diego Union, B-1:2. Hungary feted in open house.

The Cottage of Hungary, a post-war addition to the House of Pacific Relations, held its first open house from 2 to 5 p.m. yesterday in its Balboa Park hacienda. Hungarian dishes were served to visitors by hostesses in native costumes.

Because the expanding House of Pacific Relations has 15 buildings for its 19 member groups, Hungary shares a cottage with France, Portugal, Switzerland and Czechoslovakia. Each is the host once in 5 weeks.

August 26, 1948, San Diego Union, A-15:2-3. "Merry Widow" reopens tonight at Ford Bowl.

August 27, 1948, San Diego Union, A-10:2-3. Dinner Friday will honor Old Globe Theater actors.

Top performers, now being selected in a membership vote, will receive Atlas Awards, bronze trophies depicting Atlas of Greek mythology, holding up the Globe.

August 28, 1948, San Diego Union, A-6:1-2. San Diego Company protests Balboa Park contracts.

Cory & Longworth, a contracting firm with headquarters in Chula Vista, submitted a low bid for rehabilitating three buildings in Balboa Park, but a San Diego firm (Hazard & Slaughter) yesterday asked the City Council to invoke a reservation in the call for bids permitting the City to award the contract to a contractor whose principal place of business is San Diego.

August 29, 1948, San Diego Union, A-5:1. Giant replica of Scout oath raised in park.

Atop the Court of Honor Bowl in the Balboa Park Boy Scout Camp Ground the world's largest reproduction of the Boy Scout oath has just been completed.

August 29, 1948, San Diego Union, A-14:5. City Council to cut Stadium rents for midget cars.

The City Council has agreed to cut the rent on Balboa Stadium for midget and hot-rod auto races on nights when gate receipts total no more than \$6000 after tax deductions, Russell W. Rink, assistant to the city manager, said yesterday.

August 29, 1948, San Diego Union, D-2:1-4. San Diego Light Opera busy rehearsing "Blossom Time"; final event of season; opens at Ford Bowl Thursday night, by Constance Herreshoff.

As to airplanes, they have not disturbed opera audiences since the opening night of "The Merry Widow," the producer said. At Hollywood Bowl red searchlights warn airplanes to detour from the bowl during concerts, But that precaution will not be necessary if airplanes arriving continue their present policy of courtesy to the Star-Light Operas.

August 31, 1948, San Diego Union, A-13:1. Leo Calland says, "Oh, Listen to the Band," at 6th and Olive Street, Balboa Park, starting Sunday afternoon, September 12.

Present plans call for the concerts to continue through October with different types of orchestral units and music each week.

AUTUMN, 1948, California Garden, Vol. 39. No. 3. Progress Report, by W. Allen Perry

Regardless of the dates which historians have assigned to V-E Day and V-J Day, there was little about Balboa Park to indicate the war was over until the summer of 1948. True, its trees had continued to rise against the horizon, its perimeter lawns had remained green; the Zoological Gardens the golf courses and playfields had been open to park patrons. But the true heart and the great distinctive feature of Balboa Park --- its Exposition Center --- had held little lure between December of '41 and the summer now ending.

For the seven and one-half years of Navy occupancy and the beginning of demolition and restoration, this Exposition Area was closed to the public or had nothing to interest visitors. To some of you the days of the museum visits, the organ recitals, the symphony concerts, the lectures and social events in the House of Hospitality, the marvelous food you enjoyed on the terrace of the Café del Rey Moro, and idle hours in the gardens and Botanical Building were nostalgic memories. To others, tales of these things may have been a bit of a bore, since you had never experienced them and it rather looked as if you never would. But the Fine Arts Gallery was formally reopened in December, and by summer time sufficient improvement had been made in the landscape picture, building restoration was progressing sufficiently and there were plays, light operas and concerts to assure old and new San Diegans and their visitors that the "park" was being returned to them.

Those who wandered through this area immediately after the Navy vacated have some conception of the extent to which the war-time activity scarred, destroyed and damaged this magnificent center. They saw acres of lawn completely destroyed when they became the sites of tent camps and temporary barracks, galleys and mess hall. They saw empty gardens and the effects of years of minimum maintenance. They gained a little idea of the extent to which buildings were expediently converted to hospital demands. Few of them could visualize the problem of attempting to stretch \$790,850.00, to which the Navy reduced the City's original restoration request and \$109,684.00 recovered from sales and salvage, to restore the monumental grandeur and useful attractiveness of what is "Balboa Park" to so many people.

This restoration and resuming of attractions and activities is, of necessity, a gradual thing. The Globe Theater has a most successful season and had to increase the run of each production over pre-war schedules. The Fine Arts Gallery is in fine physical condition and its collection has increased to a value of two and one-quarter million dollars at the time of reopening. The San Diego Museum of Man opened its main building with a new staff and new life, and the remaining rooms will be opened as quickly as the new arrangements and classifications of exhibit material can be installed. This museum's interests and community service programs have been increased tremendously. The House of Hospitality has been restored and we hope that this most important facility may be

furnished and opened again in the fall season. The recitals on the great outdoor organ have been drawing Saturday and Sunday crowds such as the formerly attracted only during Exposition days. The light opera season in the Balboa Park Bowl played to at least 75,000 people during its summer season.

And, in the meantime, the Recreation Division has opened the Municipal Gymnasium for its program of badminton, volleyball and basketball. It has brought the Federal Building into condition for the Electric Show and a show of the American Kennel Club. It has contracts executed for the conversion of the former California State Building and Hollywood Building into highly function conference and craft centers which will be available to conventions as well. Additions are being made to the parking facilities in this Palisades area which will improve, but probably not solve, the parking problem.

Flowers bloomed again in the gardens, for the first time in seven and one-half years. The magnificent spring displays of Pansies were followed with Calendulas, Centureas and the summer show of Zinnias. The panels of the Mall came alive with Petunias and Ageratum, which bloomed against their new, green carpet of lawn. Building difficulties have delayed the opening of the Botanical Building, which will have to be completely refurbished before becoming a justifiable, horticultural attraction. Work on the grand-scale Lily Pond was completed too late for effective planting, but there is no question that it will be in its glory in 1949. Restoration of lawn areas is being delayed because of the impossibility of obtaining pipe with which to replace the irrigation systems. As rapidly as this material can be delivered on outstanding orders, the lawns will be rebuilt.

But the restoration of the Exposition area is only one phase of the planning for Balboa Park. The plans for the development of the Park Boulevard frontage from the Zoo to the street car right-of-way and from Upas Street to Laurel have been incorporated into the City's master plan. This area will include a great parking lot on the Zoo side; a treatment similar to the Sixth Avenue development immediately adjacent to Park Boulevard; the Veteran's Meeting Building just south of the Roosevelt School; and a highly amusing miniature train which will carry the youngsters on a half-mile ride through an extensively landscaped area now being developed north of the Spanish Village. The Fly-casting Pool has been completed in the Morley Field area, and so has the new tennis club building. It is anticipated that the Riding Academy will be moved to this area as well as the archery ranges and a large new picnic area. And, perhaps, you've found other new picnic areas with tables and grills which have been scattered conveniently but carefully through the park.

It has not been our intent to give a complete survey of park restoration and improvements. We have intended to give you assurance that there is much in the park to justify your interest and to reward your attention.

September 1, 1948, San Diego Union, A-8:1. "Blossom Time" to start run in Ford Bowl tomorrow night.

September 2, 1948, San Diego Union, A-6:2-3. The City Water Director urged a ban on all recreation at Morena Lake because of drought.

September 2, 1948, San Diego Union, A-8:1-3. Ten outstanding Old Globe actors and actresses will be honored tomorrow night at a dinner given by the Community Theater in the Rose Room of the U. S. Grant Hotel.

September 3, 1948, San Diego Union, B-1:2-7. "Blossom Time" delights crowd, by Constance Herreshoff.

September 4, 1948, San Diego Union, B-1:1. Atlas winners at Old Globe received awards, by Constance Herreshoff.

The trophies were presented to the winners by Gregory Peck, motion picture actor, during a 10:30 to 11 o'clock broadcast.

September 4, 1948, San Diego Union, B-1:3-4. Miss Bettie Palmer will give recital at Organ Pavilion today.

September 5, 1948, San Diego Union, A-5:5. Eleventh annual Appliance Show will be held in the Federal Building, Balboa Park, September 14 to 19.

Persons attending will be televised and their pictures telecast to television sets in exhibit booths throughout the building.

September 7, 1948, San Diego Union, A-8:7. "Blossom Time" will be given in Ford Bowl four more times.

September 7, 1948, San Diego Union, A-15:3-5. Six young gibbons flown from Bangkok to San Diego Zoo.

September 12, 1948, San Diego Union, A-12:2-4. Park electronic carillon to greet crowds approaching the Electric Show this week; the carillon will be played by Paul D. Peery of Coronado, between 7:15 and 7:45 each evening, Tuesday through Sunday.

September 13, 1948, San Diego Union, B-14:2-4. Sunday concert series opens in Balboa Park.

September 14, 1948, San Diego Union, B-3:1-5. Annual electrical show opens tonight (map).

Six days and nights of free entertainment, stage shows and novel, interesting and educational demonstrations will be made available to thousands of San Diego area residents when the doors of the 11th annual Electrical and Home Appliance Show are opened at 6 o'clock tonight in the Federal Building in Balboa Park. The show will continue through Sunday night.

September 15, 1948, San Diego Union, A-6:3-5. Television display lures capacity crowd to Electric Show opening.

September 16, 1948, San Diego Union, A-7:3-5. Twenty thousand attend Electric Show.

September 16, 1948, San Diego Union, B-2:2-4. Flood of votes received to choose 1949 Starlight Opera selections.

September 17, 1948, San Diego Union, A-8:5. Twenty two thousand jam park to visit exhibit.

September 17, 1948, San Diego Union, A-20:2-3. John S. Siebert, architect, former councilman, passes.

September 19, 1948, San Diego Union, A-5:1. Second of free park concerts set today at 6th Avenue and Olive Street, Balboa Park; concerts are presented under the joint sponsorship of the City Recreation Department and A. F. L. Musicians' Local 325, and are financed by the national union's recording and transcription fund.

September 19, 1948, San Diego Union, A-18:1-3. Two rare Keas shown today at San Diego Zoo.

September 19, 1948, San Diego Union, D-8:1-3. Fine Arts Gallery shows Britannica collection of United States painting, by Thomas B. Robertson (illus.).

September 22, 1948, San Diego Union, A-6:6-7. State, United States officers to set status of Balboa Park Club.

State and Federal officers will meet in Los Angeles tomorrow to discuss the right of the U. S. Navy officers' mess at Camp Kidd in Balboa Park to serve liquor without a state license or without paying state sales taxes, Mrs. Betty Marshall Graydon, assistant U. S. attorney, said yesterday.

Although commonly called an "officers club," Mrs. Graydon said it was not a club because it was open to all officers of the armed services, instead of to members.

September 22, 1948, San Diego Union, A-9:2. Frederick William Schweigardt, 1935 Exposition sculptor, passes in New York Hospital.

September 23, 1948, San Diego Union, A-13:1. E. Willard Schurz, Globe Theater's new technical director, talks as brush flies, by Constance Herreshoff.

September 24, 1948, San Diego Union, A-1:1, A-2:4. President Truman talk at Lane Field scheduled today.

September 24, 1948, San Diego Union, A-10:6-7. Registrations are now being taken for San Diego Community Theater 9-week series of lectures on basic acting, directing, lighting and play production to start October 5 at Old Globe Theater.

September 25, 1948, San Diego Union, A-1:1. A-3:1. Truman brings presidency to city for hour.

September 25, 1948, San Diego Union, A-11:8. Audience likes Old Globe version of play "Laura," by Constance Herreshoff.

September 26, 1948, San Diego Union, A-4:1-2. First San Diego built plane to be exhibited at Science and Industry Show, Saturday and Sunday in Federal Building.

The plane is one of the 10 M-I's built by Ryan Aeronautical Co. in 1926.

September 26, 1948, San Diego Union, A-4:6. Bandits repeat holdup tactics in Balboa Park.

Balboa Park bandits early yesterday robbed a San Diego mail clerk of \$15 at gunpoint, a few hours after they took \$20 and a watch from an off-duty city policeman south of the Spreckels Organ Pavilion.

September 26, 1948, San Diego Union, A-11:5. Old Globe offers memberships at two prices.

September 26, 1948, San Diego Union, B-1:1. Three groups push Point Loma as tourist goal; organizations seek added interest in Cabrillo Monument, by Bryant Evans.

Under the proposal being made to the government, [the monument] would be enlarged to reach from the Ft. Rosecrans National Cemetery to the light itself, three-eighths of a mile south of its present limits.

September 26, 1948, San Diego Union, D-2:1-2. Starlight Opera starts young San Diegans on path to success, by Constance Herreshoff.

September 26, 1948, San Diego Union, D-7:1-4. Conducted tour of Britannica Exhibition planned for today at Fine Arts Gallery, by Thomas B. Robertson (illus.).

September 27, 1948, San Diego Union, A-4:1. Park prowler, missed by shot at Date Street and 7th Avenue, eludes police.

September 27, 1948, San Diego Union, A-4:2-4. Stained glass window of Good Shepherd dedicated at Naval Hospital Chapel; the Chapel is *supposed to be used by* Catholics, Protestants and Jews.

October 1, 1948, San Diego Union, A-9:4-5. Fourth Science Show opens in Balboa Park's Federal Building tonight.

October 2, 1948, San Diego Union, B-1:2-5. Varied exhibits greet visitors to Science Show.

October 3, 1948, San Diego Union, A-12:4. Thousands flock to see Industry Show at park.

October 3, 1948, San Diego Union, A-18:3-7. San Diego listeners at Star Light Opera set new mark.

As a first step in forming plans for a more extravagant 1949 summer season of Star-Light Operas, company officials already have submitted a formal application to the City Park Department for a long-term lease on Ford Bowl.

October 3, 1948, San Diego Union, B-1:8, B-16:1. Spanish Village restoration to go ahead soon.

An out-of-town jury was appointed several months ago and made some approvals. At the time City Manager Rhodes seemed to agree with the jury system, Spanish Village Art Center members said. But now, from a business standpoint, he believes the Village studios should be rented on a basis of tenant respectability and ability to pay.

The restoration program will move slowly because of finances, Rhodes said. Leo B. Calland, parks and recreation director, estimated the job will cost \$15,000.

October 4, 1948, San Diego Union, A-12:2-4. Fast-running cheetahs go on display at San Diego Zoo.

October 4, 1948, San Diego Union, B-1:8. Twenty four thousand visit Science Show.

October 6, 1948, San Diego Union, B-14:3. The City Park Commission yesterday authorized the drafting of an agreement for reopening the House of Hospitality by the group that directed it in pre-war days.

The Commission also authorized Leo Calland, parks and recreation director, to draw an agreement dealing with the San Diego Civic Light Opera Association's application for a long-term lease on Ford Bowl. Calland said the Commission was agreeable to leasing the bowl for 5 years but felt the group should not be given exclusive use of the bowl during the summer months.

October 7, 1948, San Diego Union, B-12:2-4. Three youths confess Balboa Park robberies.

A wave of Balboa Park holdups was believed solved by police yesterday with the arrest of all three youths, all of whom confessed after being rounded up within a few hours of the last of three robbers (photos of Lawrence H. Gordon, Frederick King, John W. Berry).

October 8, 1948, San Diego Union, B-1:2-4. Lions' Head presides at groundbreaking ceremonies; work begun on center of blind recreation.

October 10, 1948, San Diego Union, B-1:1. City's recreation area hailed as United State's greatest; Leo Calland cites widely diversified activities.

Here, Calland said are the sports Balboa Park patrons can take part in: Golf, Roque, lawn bowling, horseshoes, archery, horseback riding, swimming, fly casting, tennis, baseball, volleyball, badminton, basketball, handball and ping-pong.

October 10, 1948, San Diego Union, B-1:3. Organ concert by Royal A. Brown planned for today.

October 12, 1948, San Diego Union, B-1:7-8. Box seats prohibited for Ford Bowl operas because the hint of class distinction..

October 18, 1948, San Diego Union, A-4:2. More than 5500 visited attended the Gem Show in the Federal Building which closed last night after a two-day exhibition.

October 24, 1948, San Diego Union, A-1:7-8, A-4:1-4. Nature walkers view globe's shrubs in Balboa Park, walk sponsored by the Natural History Museum and led by Charles F. Harbison, by Bryant Evans.

October 24, 1948, San Diego Union, B-1:4. Organ concert by Royal A. Brown features old masters.

October 25, 1948, San Diego Union, A-6:3-5. Reformation observance in Ford Bowl yesterday, Methodist Bishop G. Bromley Oxnam, speaker.

October 26, 1948, San Diego Union, A-4:4. Stamp exhibit at Fine Arts Gallery set for opening.

October 28, 1948, San Diego Union, A-11:1-2. Philatelists opened stamp exhibit in Fine Arts Gallery yesterday, by Lloyd Wilkins.

October 28, 1948, San Diego Union, A-11:4. Police break up "bat gang" in park.

A self-styled "Bat Gang" that used some Huck Finn tactics and others that Mark Twain would have deplored was evicted yesterday from a Spanish Village tower in Balboa Park, where it has claimed squatters' rights for 5 days.

Seven boys were linked in the gang, which had adopted a bat insignia, but only three were involved in recent property damage.

October 30, 1948, San Diego Union, A-7:4. "Little Foxes" will be presented at Old Globe Theater, by Constance Herreshoff.

October 31, 1948, San Diego Union, A-23:2-5. House of Pacific Relations group arranges public festival Saturday evening in San Diego Woman's Club, Third Avenue and Maple Street.

October 31, 1948, San Diego Union, A-26:2-5. Albino fur seal added to San Diego Zoo's collection.

October 31, 1948, San Diego Union, D-7:1-4. National Art Week observance at Fine Arts Gallery today, by Thomas B. Robertson (illus.).

November 3, 1948, San Diego Union, A-12:2-3. The San Diego Art Council will sponsor an open-air art mart at Laurel Street and Sixth Avenue in Balboa Park Friday through Sunday.

November 6, 1948, San Diego Union, A-1. City Council gives City Manager Rhodes a confidence vote after hot parley, by Frank Rhoades.

November 7, 1948, San Diego Union, A-14:1-4. First post-war camera exhibit planned in Photographic Arts Society Building, Balboa Park, Saturday and Sunday.

The society plans to rotate its shows on its pre-war schedule --- changing the prints every four weeks. The exhibits will be the work of local amateurs, for the most part, augmented by traveling shows from camera clubs elsewhere.

November 7, 1948, San Diego Union, D-2:1-3. All-Sousa band concert in park this afternoon to honor memory of "March King," by Constance Herreshoff.

November 8, 1948, San Diego Union, A-6:5. Sousa concert gets overflow in Organ Pavilion.

Yesterday's all-Sousa concert, donated through the Recording and Transcription Fund of the American Federation of Musicians, was cosponsored by the City Park and Recreation Department.

November 11, 1948, San Diego Union, A-1:1-2. Parade, memorial service mark Armistice Day; morning rites in Balboa Stadium to precede procession in down district.

November 14, 1948, San Diego Union, A-12:2-5. Balboa Park 48-passenger miniature train makes its first trip.

The train runs over nearly a half-mile of tract on grounds opposite the entrance to the zoo, being operated under agreement with the City Park Commission by Swope Railways. The City will receive a percentage of the fares - 9 cents for children, 15 for adults.

November 14, 1948, San Diego Union, A-30:3-4. Two Burmeister Seriema birds from Argentina on display at San Diego Zoo (illus.).

November 15, 1948, San Diego Union, A-7:3-4. Three thousand view Ken Murray's "Blackouts" in Ford Bowl under sponsorship of the Uptown Exchange Club. for Infantile Paralysis benefit.

November 17, 1948, San Diego Union, B-1:2-4. Squirrels come into their own; laugh at pooches; joyousness fades for dog-walking in Balboa Park (illus.).

While the dog-walkers mapped their anti-sign strategy, the squirrel-feeders went about their favorite sport, apparently unaware of the black looks directed at them by the dog-walkers.

November 21, 1948, San Diego Union, A-4:2-3. Laurence Oliver, president of American Fisheries Co., has been elected a director of the Zoological Society of San Diego (por.).

November 21, 1948, San Diego Union, C-15:2. Balboa Mounted Troop will install Miss O. Helene Kinney president.

November 23, 1948, San Diego Union, A-4:3. Dog owners protest park leash law.

The City Council yesterday received the first formal protest against sudden enforcement of Balboa Park's leash law, a situation that has caused a break between dog-walkers and squirrel feeders.

November 26, 1948, San Diego Union, A-1:1-5, A-4:1. Three thousand attend Thanksgiving services at Organ Pavilion.

November 28, 1948, San Diego Union, B-1:5-6. Organ recital set today.

November 30, 1948, San Diego Union, B-1:2. City Manager Rhodes yesterday appeared to have kept his promise to save the City \$3000 by refusing to bow to A. F. L. demands in painting the interior of the Natural History Museum in Balboa Park.

December 3, 1948, San Diego Union, A-1:6, A-3:2-3. Son of Louis J. Wilde, former mayor of San Diego, seeks aid, by Edmund Rucker (illus.).

December 3, 1948, San Diego Union, A-4:1. Civic Theater projected at Pacific Highway and Barnet Street with \$350,000 outlay (drawing).

December 3, 1948, San Diego Union, A-12:3. The Fine Arts Gallery has closed its branch at 2030 Sunset Boulevard and announced that the property would be put up for sale; property given to Society four years ago by Mr. and Mrs. Frank Marcy; housed the Gallery's art treasures during the war.

December 4, 1948, San Diego Union, A-1:6-7. Son of L. J. Wilde gets job at Walker's Department Store after Mayor Knox writes letter.

December 5, 1948, San Diego Union, A-27:3. Jabiru stork latest arrival at San Diego Zoo (illus.).

December 5, 1948, San Diego Union, A-42:1. "Spring Stirring" completed by sculptors Donal Hord and Homer Dana (illus.).

December 9, 1948, San Diego Union, A-21:3. Leo Calland scores plan for flat Stadium rents instead of taking a cut of the gate's receipts; the City has just spent \$136,000 for building improvements at the Stadium.

December 10, 1948, San Diego Union, A-11:5-6. City Manager Rhodes supports curb on dogs in park; ordinance requiring dogs on leashes has been in effect since 1913.

When the signs first appeared, dog-walkers blamed squirrel-feeders and they divided into separate camps. Yesterday, however, Leo B. Calland, parks and recreation director, hinted that picnickers have been behind the enforcement order. "No one likes to have a dog running through his lunch," he said.

December 10, 1948, San Diego Union, A-15:1. San Diego Zoo sends female Andean condor to National Zoo in Washington, D. C. (illus.).

December 15, 1948, San Diego Union, A-13:2. City Council placed a rental ceiling of \$5,000 on all commercial events at Balboa Stadium.

December 16, 1948, San Diego Union, A-1:1, A-2:5. Cedar Street foes draw wrath of Chamber group; denounce Voters' Association group for ridiculing site.

December 16, 1948, San Diego Union, B-12:4. Mayor Knox promised Navy will push land swap; Congress authorized trade and President signed the bill months ago; involved in the trade are 50-year renewable leases on six city-owned properties, 5-year leases on two others, Navy title to the old city jail site on Second Avenue and Navy ownership of a 90-acre city tidelands strip; in return the city will get title to six Navy-owned parcels.

December 19, 1948, San Diego Union, A-3:1. Special events for children at San Diego Zoo to mark Zoo's first annual San Diego Zoo Week (illus.).

Three "very special" events will be held for children this week at the zoo to mark the San Diego Zoological Society's first annual Zoo Week, Belle J. Benchley, executive secretary, announced yesterday.

The zoo will exhibit its rare albino fur seal and silver-phase fur seal in the enclosure at the top of Bear Canyon today from 10 a.m. to 4 p.m.

There will be a special showing Wednesday of Doris, the playful female orangutan, recently flown from the Orient to be the sometime bride of Kokok, the zoo's male orangutan, and Friday at 2 p.m. a seal show will be staged in the Wegeforth Bowl.

December 22, 1948, San Diego Union, B-3:4. San Diego Zoo to exhibit orangutan.

Doris, the San Diego Zoo's recently imported female orangutan, will be on display in the Balboa Park Zoo today from 10 a.m. until 4 p.m., Belle J. Benchley, executive secretary, reported.

"Doris will be on display one day only as a feature of our first annual Zoo Week for the children," said Mrs. Benchley.

Ken Stott, Jr., the zoo's general curator, will talk on orangutans and other great apes. Doris will be given public feedings by her keeper, Byron C. Moore.

At 3:30 p.m. Mrs. Jane Fergus Ross, educational director, will stage the popular "Zoo's Who" program in front of the orangutan cage for delayed broadcast over KUSN at 9 o'clock Saturday.

Doris was imported from Sumatra-Borneo region as a mate for Kokok, the zoo's 12-year old male orangutan. Doris, 4 years old, was brought here October 21 and is undergoing acclimatization in a closed section of the zoo. She received international attention after an earlier zoo attempt to obtain a female orangutan produced a common macaque instead.

A seal show will be presented at 2 p.m. Friday, Children's Day, in Wegeforth Bowl.

December 29, 1948, City Council Resolution No. 92207, Doc. No. 396303, repeals Resolution No. 89412 and established policy regarding use of buildings and facilities in Balboa Park.

December 29, 1948, City Council Resolution O. 92208, Doc. No. 396302, schedule of rentals.

December 30, 1948. San Diego Union, A-1, A-2:4. Six candidates in City recall threat named; R. O. Coggeshall, president of San Diego Voters' Association, says operations against City Council to start soon; objects to Cedar Street buildings.

December 31, 1948, San Diego Union, A-1, A-2:7. Mayor Knox challenges Council foes to recall him; asks to be put on list; blasts head of movement.

1949

Summary of Events in 1949

(Note: Dates of events are approximate only.)

Officers' Club in New Mexico Building closed (January 8, 1949)
Dog Show in Federal Building (January 22, 1949)
Conference Building remodeling completed (February 1, 1949)
No more denominational services in Balboa Park (February 18, 1949)
Arts Crafts Center in Palisades Building dedicated (March 13, 1949)
Spanish Village reopened (April 23, 1949)
Family Fair in Conference Building (May 7, 1949)
Blind Recreation Center opened (May 8, 1949)
Horse Show (May 12, 1949)
Electric Building reopened with Home Show (May 15, 1949)
Starlight Opera opened 4th season in Balboa Park Bowl
(June 30, 1949)
Shakespeare revived at Old Globe (July 20, 1949)
San Diego Symphony concerts resumed in Balboa Park Bowl
(August 9, 1949)
Plans for fair in 1955 (August 23, 1949)
Hobby and Inventors' Show at Conference Building
(August 25, 1949)
House of Hospitality opened fall season (September 11, 1949)
"Caught in the Act" revue at Old Globe (September 23, 1949)
Natural History Museum opened post-war show (October 31, 1949)
City to keep control of Veterans Memorial Building (November 19, 1949)
Appliance Show in Electric Building (November 26, 1949)
Mickey Rooney practicing roller skating in Federal Building
for movie, "Dark Challenge" (November 30, 1949)
"Old English Christmas" at Old Globe (December 7, 1949)
Nativity scenes at Organ Pavilion (December 23, 1949)

January 7, 1949, San Diego Union, B-1:3-8. Conference Building, remodeled from State Building, nears completion; will seat 2300 persons in hall surrounded by conference rooms; Palisades Building houses Recital Hall seating 700, Puppet Theater seating 254, and hobby shops.

January 9, 1949, San Diego Union, A-3:1. Because it has no place in a museum devoted to San Diego flora and fauna, a mounted African elephant yesterday was taken out of the Natural History Museum and handed back to the San Diego Zoo, which lent the exhibit in 1941.

January 6, 1949, San Diego Union, A-4:1-3. Park construction project set for Boy Scouts; City Planning Commission approved plans yesterday; two-story rustic type building will be erected on a ten-acre site set aside in 1945; site has a 600-seat capacity amphitheater and six camp sites with rock stoves; campaign committee preparing to launch a campaign to raise \$50,000.

January 7, 1949, San Diego Union, B-1:3-8. Park buildings prepared for new role in civic cultural center; 2300 seats provided in convention hall.

All work on the remodeled Conference and Palisades Buildings will be completed and the two structures will be turned over to the City by February 1, according to L. E. Earnest, assistant to the parks and recreation director. Cost of the two projects is \$170,000.

January 8, 1949, San Diego Union, A:1. Leo Calland, Park and Recreation director, said yesterday the Officers' Club in Balboa Park has been closed and the Navy has until March 1 to move the equipment.

January 10, 1949, San Diego Union, A-10:2-4. Canary Island Phoenix Palm in Palm Canyon, Balboa Park, falls victim to disease (illus.).

January 11, 1949, San Diego Union, A-6:7. Park revenues "satisfactory" despite drops.

Despite unexpected losses early in the fiscal year city park revenues seemed to be stacking up satisfactorily at the Jan. 1 halfway mark, Parks Director Leo Calland said yesterday.

The park department's annual budget is \$1,300,000. Up to Jan. 1, it had collected 48 percent of the revenue expected for the fiscal year, but Calland added cautiously, "The first half of the year is usually best."

January 16, 1949, San Diego Union, A-14:2. Plans for reopening of Spanish Village without waiting for city to restore run-down buildings announced yesterday by Spanish Village Art Center, Inc.; a member of the group has taken up residence at the Village as a caretaker to prevent further vandalism.

January 16, 1949, San Diego Union, A-18:3-6. Newly modernized House of Hospitality setting for initial concert of the Sinfonietta orchestra of San Diego on the night of January 31.

January 16, 1949, San Diego Union, D-4:1-2. Old Yorick Theater brings on memories, by Ralph W. Hastings.

January 23, 1969, San Diego Union, A-21:1. Sixteenth annual All-breed Dog Show of the Silver Bay Kennel Club opened yesterday at the Federal Building in Balboa Park (illus.).

January 28, 1949, San Diego Union, B-1:3-7. Spanish Village to become artists' colony again.

Spanish Village Art Center will repair the one building which has about six studios and pay no rent on it until the whole village is restored, City Manager Rhodes said.

He reported that rentals will be "very reasonable," naming no rate.

January 30, 1949, San Diego Union, C-9:-5. Spreckels Organ in Balboa Park, by Esther Mugan Bush.

A Sunday afternoon . . . the organ pavilion in Balboa Park flooded with glorious sunshine . . . perfume from flowers riotously abloom . . . tall, graceful eucalypti swaying and nodding and whispering in the gentle breeze . . . birds flitting about from branch to branch, warbling an obligato to the inspiring strains from the organ now awakening as masterly fingers touch the keys.

Winter in California! Time again to begin telling the world at large and newcomers to San Diego in particular about this wonderful gift to San Diego --- the largest pipe organ in the world --- and about our marvelous climate which permits recitals virtually every day of the year in Sunny San Diego.

The organ was presented to San Diego to commemorate the Panama-California Exposition, or "Exposition Beautiful," in 1915. It was the gift of Adolph Spreckels, of San Francisco, and John D. Spreckels, of San Diego, late sugar kinds of the West Coast. It stands today an enduring monument to their memory.

We pause here to pay special tribute to our own John D. Spreckels, who more than any other man or group of men (since the early Franciscan Padres founded here the birthplace of California) contributed to the cultural and civic growth of our favored city. The missionaries, who established a chain of 21 missions along the coast northward to Sonoma County, tilled the soil and blessed it, civilized the woefully ignorant and dirty Indians, and taught them useful trades, established a

spiritual culture which exerts its influence to the present day, an influence of which the Spreckels brothers were not unmindful when they donated this magnificent instrument to the city. It was installed at a cost of \$100,000, a staggering figure in those days. The Exposition formally was opened to the world at midnight on December 31, 1914, when the late President Wilson in Washington pressed the electric button to signal the first all-year exposition in history. The inaugural concert was played on New Year's Day. Casting about for an artist worthy to preside over the console, Spreckels had chosen Dr. Humphrey J. Stewart, of San Francisco, as the one best qualified to do justice to the instrument and give to San Diego the very best organ music obtainable.

Dr. Stewart as an English gentleman of the old school, distinguished not only as an organist, but as a composer worthy to rank with some of the old masters. Of kindly aristocratic bearing, no one who ever witnessed his courtly bow and heard him speak from the platform, or in "Songs Without Words" from the organ, could forget him. He presided at the console uninterruptedly until soon before his death shortly before Christmas 1932.

Perhaps his greatest claim to immortality is his oratorio "The Hound of Heaven," based on the sublime poem by Francis Thompson. For this outstanding work and for his Requiem Mass he was decorated by the Pope with the insignia of Knight of the Holy Sepulcher. A deep spiritual quality marked his creative genius.

Dr. Stewart was mourned greatly in passing but not without foresight had he developed a successor who was to reflect credit on his teacher and to perpetuate the fame of the organ for many years to come. Royal A. Brown, F.A. G.O., our present civic organist, was Stewart's pupil and protégé. He completed his studies abroad under Marcel Dupre, who recently gave a concert in San Diego, and was the logical and undisputed claimant of the position which had been held by his illustrious predecessor.

Great was the rejoicing amongst San Diego music lovers when it was announced through the newspapers that Brown again had been chosen to bring to life the beloved organ after its seven years of doleful silence behind the asbestos curtain during and following the war years.

Brown and his music are one. In it he "lives, breathes and has his being." I was amused by the incident related to me by a friend who rode one day on the La Jolla bus opposite this avid student of organ technique. Even away from his beloved console he could not forget his five-finger exercises, which he diligently practiced, using his trousers as a keyboard, oblivious to the curious stares of fellow passengers. As far as he was concerned there was no one else on the bus. No wonder he performs so unerringly, never fumbling the keys, never a discordant note.

As one who was in frequent attendance at pre-war recitals, I feel justified in asserting that never has the Spreckels organ possessed such magnificent tonal quality; nor have I ever heard Royal Brown in such fine fettle as he was on the Sunday of which I speak. He performed the most stupendous works with ease and seemingly untiring vigor, ranging from Bach fugues to melodious Strauss waltzes . . . from compositions by old masters to those of contemporary aspirants to fame and fortune.

That, as was true of his renowned predecessor, is one of Brown's endearing characteristics. Himself a composer of unusual themes, which allow the full play of his artistry --- and with centuries of classics to draw from --- he graciously lends of his talents to further the ambitions of his contemporaries.

This writer has several times had the honor of listening to her own compositions played by Brown in his inimitable style. "How does it make you feel," inquired a friend who sat beside me on the Sunday referred to, "to see your name up there besides Strauss?" "Oh, that, I replied facetiously, "but how do you think Strauss feels about it?"

Which may be taken anyway you like. Be that as it may, “even as I do say it who oughtn’t,” my Silver Strand Waltz was as well received as the “Fruhlings Stimmen,” by the waltz king. In fact, never have I heard a recital on Balboa’s organ in which every number drew forth such enthusiastic response. It was happily diversified, appealing both to academic and popular tastes (not meaning the juke box variety).

After the concert someone remarked about this pleasing arrangement and Brown assured the gentleman that it would be his policy at all times to avoid stuffy programs, too heavy with renditions which only those far advanced in musical knowledge might be able to appreciate, at the same time guaranteeing that each program would feature some numbers representing the best organ music, ancient and modern, obtainable.

He particularly favors American music and will make it an outstanding feature of his recitals. One of his most gracious characteristics is his willingness to promote the efforts of contemporary composers when he might be presenting works of his own which allow full play for his organ technique.

On the occasion of which we write Brown graciously responded to repeated encores at the end of his programmed numbers. I believe he would have been kept at it indefinitely had he not brought his audience to its feet by playing the National Anthem, with which he always closes his performance. He literally was besieged before he could leave the platform. Curious interested persons thronged about him.

“How many pipes are there in the organ,” one woman queried. “About 5000,” Brown replied. Think of it! Five thousand pipes to be kept in tune 365 days of the year, come rain or shine, mist or high fog rolling in from the sea. Thank God for our beneficent climate which produces a minimum (dare I admit it?) of inclement weather. Still these pipes are extremely sensitive and require an expert technician constantly in attendance. They are more allergic to hot, dry weather, than to moisture. Forest fires, of which we usually have an epidemic in the fall of the year, scatter their hot breaths far and wide, filling the air with tiny specks of smoke and ashes. The organ has two types of pipes --- the flues and the reeds. It is the latter “temperamental prima donnas” that become annoyed as these atmospheric “bugs” are wind-driven into their mouths (similar to those of a flute) ticking their sensitive throats.

Leonard Dowling, technician, to the rescue! Brown gives Dowling full credit for keeping the organ in top condition. The instrument is tuned one hour before each performance. Not only does the technician understand the fine art of tuning but he is a skilled electrician into the bargain. At present, what with machinery grinding away, hammers pounding and various other noises incident to rehabilitation of the park buildings (which served as barracks and officers’ quarters during the war), the technician works under difficulty.

That, by the way, is why we are having only two recitals a week at present. No doubt the recitals will be held daily and when be broadcast over a national network when this work is finished. The Chamber of Commerce should see to this.

Surely there could be no better way of letting the world know about our superb all-the-year round climate, or of showing that we bear no ill will toward anyone as we present without prejudice the works of international composers the world over.

What a messenger of peace our organ could be. We might even penetrate the “Iron Curtain” and reach the seemingly non-existent heart of “Good Old Joe.” . . . “The Voice of San Diego!” Wouldn’t that be a whizzbang title for a radio program over a national hookup? Think it over, C. of C. . . . And for a theme song, “Echoes from Heaven on Earth.” How about commissioning me to write it, Joe Dryer?

Brown and his technician are hatching up some kind of scheme to add novel effects to the organ. "Don't you think after seven years of silence the organ deserves a present?" Brown asks. "What kind of present?" we queried. "Oh, that's a secret," he replied, with a sphinx-like expression that makes us very curious, and leaves us in a state of delightful anticipation. In a similar state of anticipation we hope to leave our readers until our second article about our wonderful outdoor organ appears --- soon.

January 30, 1949, San Diego Union, D-7:1-3. Fine Arts Gallery has constructive season, by Reginald Poland, director.

Last year was an exceptionally busy and constructive one at the Fine Arts Gallery. Most important were the additions of many "top" works of art to the permanent collection of Old Masters and Old Asiatic Arts. Respectively exemplifying there are Rubens' portrait of an Italian princess and a group of ancient Shang Dynasty Chinese bronze ceremonial utensils.

Among other outstanding achievements was the development of work with children, collaborating with the San Diego Chapter of the Junior League in the Junior Art League project. This is four-fold: creative art work by any child who cares to join this project; a theme exhibition ("Mexico" is the current show); movies, illustrating the current theme exhibition, and guided study of important phases of the gallery's permanent collection.

The third feature of the year was the improved correlation of the art of art-enthusiasts and workers through such newly formed groups as the San Diego County Art Council, the several Studio Art Guild sections, and the Asiatic Arts committee. The council represents 23 art organizations with a total membership of 3000. Directed by Edward Longstreth, it already has sponsored the art show at the County Fair, has taken charge of the most successful and most comprehensive Art Mart, held last fall in Balboa Park, and is at work on a most important art feature for our County Fair.

The Studio Art Guild in an outgrowth of last summer's large and successful Institute of Art classes, headed by Fred Taubes of New York city. With Lt. Carroll Walsh heading this guild, about 75 members have been working regularly in painting, drawing and in ceramic arts. This is one of the most promising and encouraging art developments among our younger people.

The Asiatic Arts committee, headed by Mrs. Irving T. Snyder, is a volunteer group of Asiatic art connoisseurs and enthusiasts. It has been meeting regularly to study and to schedule exhibitions and lectures for the public. Dr. Kenneth Foster spoke on the great, Old Chinese ceramics and bronzes; the Obatas also came to San Diego to give painting and floral arrangement demonstrations. Prince Giovanni del Drago's internationally famed collection of old Chinese paintings appeared here through this committee.

The educational activities, with Margaret Erdt as chairman, have progressed as never before. In addition to the above mentioned activities, there have been all sorts of events, from meetings of the Print Club with Freda Klapp, to regular radio programs, the staging of 245 programs in the gallery by outside organizations, a score of talks by the gallery staff outside the gallery, and 100 tours in the gallery to about 4250 persons, not counting the thousands who have made visits through the Junior Art League project.

Attendance of more than 147,748 indicates the measure of success. More than 400 a day, this brings the attendance to 100 a day more than during the year preceding World War II.

Important and numerous art acquisitions increase the value of San Diego's art collection to a sum in excess of 3-1/2 million dollars. About \$1800 worth of new publications have also stepped up the value and significance of the gallery's art reference library. A number of anonymous donors have principally contributed toward this two-fold development. Fourteen examples by Old Masters have still further enhanced the departments of Old Italian and Spanish arts, which already were the finest

in the entire West. The Laura Wangenheim bequest has added greatly to both the old and new modern arts, to the representations from the Orient and the Occident, also to the library.

Not forgotten were the contemporary arts. Exemplifying the donors was Saide A. May who has added to her collection of Modern arts for the gallery, paintings by Harry Bertoia and Edward Rosenfeld.

No museum or art institution can be alive or influential without a representative membership. The Fine Arts Society of San Diego totaled 1477 members on December 31, 1948, appreciably larger than a year ago. Under the vice chairmanship of Mrs. Hervey K. Graham, this membership is now developing in a big way.

In closing it may be pointed out, toward still more important progress this year, that the gallery has three prime needs: a still large and more active membership; also much larger funds, first as an endowment fund to take care of annual, running expenses, and second, the means for the addition of a wing to the present structure in Balboa Park. Such a wing would better house San Diego's most important permanent collections, and make it possible for this city to study and enjoy more comprehensive and significant temporary exhibitions of art.

February 3, 1949, San Diego Union, II, B-1:1. Harvey Atherton, chairman of a Citizens' Campaign Committee of civic leaders, announced yesterday that more than 800 Scouters will attend the "kickoff" dinner-meeting tonight for the \$50,000 campaign to build a permanent "home for Scouting" in Balboa Park.

February 4, 1949, San Diego Union, A-17:1. A new children's exhibit of the Junior Art League entitled "Arts and Crafts of Mexico" is currently being shown in the Fine Arts Gallery.

February 6, 1949, San Diego Union, D-9:1-5. "Unusual" winter weather fails to dampen enthusiasm for recitals on outdoor organ, by Esther Mugan Bush.

In this, my second article about the famous Spreckels outdoor organ, I am recording the date of writing, Sunday, January 9, 1949, because it makes a most unusual event, the first indoor recital performed on the instrument since its installation in 1915.

This is the day on which San Diego sunshine went A. W. O. L. and left about 300 music lovers out in the rain. . . . Because of the enviable reputation which our favored city enjoys for no rainy Sundays, these enthusiasts refused to be frightened away by the weather man's predictions or ominous clouds.

Anticipating the inevitable, though most unusual downpour, Royal A. Brown, civic organist, told the crowd that if it should rain the concert would be held inside the "asbestos curtain." Before he was half way through the concert, with no preliminary drops, came the deluge.

Quickly the asbestos curtain was dropped in front of the organ and in less time than it takes to tell the tale, the audience, with heightened rather than dampened enthusiasm, sought shelter inside the pavilion. Comfortably seated in a warm, cozy hall (made possible by recent alterations), they enjoyed the complete program, followed by a merry chat-fest.

Brown was in his element.

"This is the first interruption we have had in the six months since our initial concert following the war," he proudly boasted, "and it makes me happy that you are taking the innovation so agreeably."

The crowd made good use of the occasion to ply the organist with questions. Get him to talking about the organ and you will hear some strange and interesting stories. For instance, about those tame squirrels which are regular attendants at the recitals. They invariably come in increasing

numbers whenever he plays "The Squirrel" by Powel Weaver. "Don't take my word for it," says Brown. "Just ask Dowling about it."

Thus appealed to, the technician laughed and insisted that the squirrels recognized their own language and seem to be holding a convention about it as they hop about, chattering gladly, or sit up in a listening attitude. "We must have our little jokes," says Brown, smiling.

More seriously he explained that there are five keyboards --- four for the hands and one for the feet (and don't think he doesn't perform some gymnastics on those foot pedals). There are approximately 75 stops, most of them representing 73 pipes. Each of these pipes has its individual room inside the organ, so it is sheltered from the slightest changes in temperature. In spite of all this, however, and the evenness of our climate, the technician must constantly be on the job.

Only one thing seems lacking at these organ recitals. Some persons in the audience cannot read the program which is printed on the blackboard which stands on the platform; some have not read the one published in the newspapers or have forgotten to bring them along. Others may have dropped into town just for the day and only accidentally have stopped at the organ pavilion, not knowing that a great treat was in store for them. Wouldn't it be fine if they could carry away with them a souvenir program? Isn't there some civic-minded person or firm who can see the advertising possibilities in this suggestion that would be willing to sponsor such a program? Or again, is it a matter for the Chamber of Commerce to take over?

We hear mentioned the national interest that could be aroused by broadcasting a daily organ recital as was done previous to the war. But even before the invention of the radio, the organ had been quite thoroughly exploited.

As assistant editor of the *Santa Fe Magazine*, mouthpiece of the great western trail-blazer, I handled much copy concerning the Exposition Beautiful held here in 1915. As a tourist, I came here during that year and my first objective was the outdoor organ about which I had heard so much. I wanted to see and hear the master organist, Dr. Humphrey J. Stewart, perform. Thousands upon thousands of tourists shared my objective. Though the great maestro has passed into higher fields of endeavor, his spirit lingers fondly over the fingers of his protégé, Royal Brown. I am satisfied that these concerts have lost nothing of their appeal to tourists and that our outdoor organ is one of our greatest assets, and deserves widespread exploitation. In spite of the weather's naughty performance on this date, where in all the world will you find a climate where organ music may be enjoyed *al fresco* almost 365 days in the year?

On a less recent Sunday, in mid-December, this fact was impressed upon me by remarks of some friends who were seated beside me --- the A. J. Schweigens of New York, who recently came here to make their home. They are ardent music lovers and dyed-in-the-wool boosters, and were enjoying their first outdoor winter concert.

"Isn't this something to write home about?" questioned Mrs. Schweigen of her husband. "How'd you like to be sitting out in Central Park trying to listen to music on this cold winter day?"

"Br-r-r! I'll take San Diego," said Pop, pulling an imaginary coat collar around his ears. "ME, too," echoed the family. Mrs. Schweigen is a lyricist who constantly sings the praises of California in her song melodies.

During the second exposition in 1935-36, San Diego was a veritable mecca for musical America. Most of the great artists of that day visited us and gave of themselves to further the enviable reputation we enjoy as a city of culture.

Included in the category of brilliant artists were our own Charles Wakefield Cadman, foremost American composer, and the beloved Madame Schumann-Heink, greatest contralto the world has ever known, both of whom have passed on, leaving the world richer for their having tarried with us

for awhile. No doubt there will be other world fairs and other artists of renown and ability to grace our organ platform, but none can take the place of our two beloved world-esteemed San Diegans. Who that was present can forget Cadman Day at the Exposition, when every musical group of the grounds sounded forth in Cadman numbers? Incomparable, his Indian melodies!

How many times his "Land of the Sky Blue Waters," "At Dawning" and other favorites, with their flute calls ringing clear, have been heard at the organ, while the composer himself made a personal appearance and told how he had spent years in the reservations to capture the spirit of their plaintive airs. He loved Balboa's organ and he greatly respected Brown's interpretive ability.

Loving, beloved Schumann-Heink, "mother" to all the boys in the service in World War I. She gave unstintedly of her golden voice to entertain these men in camp. I heard her sing "Holy Night" in a chapel at Camp Kearny at a midnight Christmas Mass. Almost I wish I could forget the last time I heard her sing --- the last time she sang in the park.

She had given an afternoon performance which taxed her failing vocal chords. At her evening appearance it was evident that she was suffering from exhaustion. "I did much better this afternoon --- but I'm tired now and I'm h-o-n-gry." How pathetic she was. There was not a dry eye in the audience as we realized that the grand old trouper was bowing out.

Not very long before that she had sung at St. Joseph's Church, where Brown was organist. The number, I believe, was Bizet's "Agnus Dei." At rehearsal her voice was strained. "It's a little too high for me now, isn't it?" she asked Brown. "Would you like me to transpose it into a lower key?" he inquired. "Oh, if you would," she exclaimed gratefully. At the service she sang it well, too. She asked Brown to autograph the copy he made for her. What a privilege to have known this great diva. What a sadness, never to see her again.

We recall, too, the many delightful choruses that performed here, the organ lending sympathetic accompaniment to such aggregations as the famed choir from the Salt Lake Tabernacle. Our own Exposition Chorus, under direction of Dr. Earl Rosenberg, offered some unforgettable programs. It would take too much space than we are allotted to recount the many delightful events which filled our days and our nights with veritable feasts of music in its highest forms of expression.

Commenting on the quick transition from day to night in our city, beautiful Isabella Churchill, in charming phraseology, writes:

There is not twilight in the town

Where incandescent light

On every thoroughfare

Anticipates the night.

Nevertheless our days to lengthen on as the year wears on and the Vespers hour gives up brief, restful surcease from the day's activities. I for one look forward, come the good old summertime, to a revival of those last afternoon musicales which were so popular during the Exposition days.

And now let me present a prelude to an article I wrote in September, 1936, entitled "Music Hath Charms," while I was under the magic spell of "Music at Dusk."

It is the vespers hour. A hush as come upon the milling throngs, weary from much seeing. Quietly they drift into the organ theater and seat themselves before the great outdoor organ, soon to awaken to the touch of a master's fingers. A feast of beauty is before them. The pavilion, of exquisite architecture, with its symbolic decorations in bas-relief; its circular peristyle bordered with tall, graceful eucalypti. Gorgeous flower beds add color to the picture.

How soothing the first soft strains that float out upon the air! Simple melodies, now tender, now gay, enthrall us. Or perhaps it is a Bach fugue whose complex progressions, skillfully handled, display the technique of the recitalist.

Now we are listening to a composition into which strange, elusive harmonies have been woven . . . harmonies which you enjoy but cannot quite grasp. That would be the original work of the composer at the console. Individual, modernistic, yet chastened by influence of old masters. Delightful to sit here in the deepening shadows, drinking in the healthful tang of the sea air. Music at dusk --- happy, restful interlude between the activities of a busy day and a busier night at American's exposition.

February 11, 1949, San Diego Union, B-1:5. Rotarians given \$500 to Scouts' building fund.

February 13, 1949, San Diego Union, A-7:4-5. Competitive classes for the annual camellia show the San Diego Camellia Show will sponsor next Saturday and Sunday in Balboa Park were announced yesterday.

February 13, 1949, San Diego Union, D-7:1-4. Directory of Fine Arts Gallery will discuss important art acquisitions of 1948, by Thomas B. Robertson, Asst. Director (illus. of "Agnus Dei," by Francisco de Zurburan, recent gift to the Fine Arts Gallery).

The "Agnus Dei" hangs with San Diego's two other Zurburans, a monumental "St. Jerome," painted 1640-45, just a few years after the Lamb, and replete with beautifully modulated grays and whites against the Cardinal's beretta and cloak, and a late "Madonna and Child with Infant St. John," inscribed 1653, and showing the strong influence of Murillo, which became apparent in the artist's last years.

February 15, 1949, San Diego Union, A-6:6 Henry G. Fenton, contractor, dairy owner and rancher, donates another \$1000 to Boy Scouts.

February 15, 1949, San Diego Union, A-10:6-7. "John Loves Mary" made March choice at Old Globe Theater.

February 17, 1949, San Diego Union, A-5:1. "Chicken Every Sunday," comedy, pleases crowd at Old Globe.

February 17, 1949, San Diego Union, B-1:6-7. Public gives \$30,000 for scouting home.

February 18, 1949, San Diego Union. A-6:5-6. Fred L. Annable, past president, proposes San Diego Exposition in 1955 to Chamber of Commerce.

February 18, 1949, San Diego Union, A-16:5. W. Allen Perry disclosed yesterday that there will be no more denominational religious services in Balboa Park.

The Park Commission has found the City Charter prohibits them, and in making the discovery the Commission has solved the thorny, old problem of which sect to admit and which to exclude.

Board Clerk Gladys M. Anderson wrote that the Church of Christ Scientist arranged last fall to rent Balboa Bowl on May 8 for a Christian Science lecture, but recently had been informed by park officials the bowl will not be available "due to a statute in the City Charter which forbids" the lecture.

February 18, 1949, San Diego Union, A-20:4. Scout campaign meeting slated.

February 19, 1949, San Diego Union, A-8:6. Scout building campaign fund reaches \$36,649 or 75 percent of the \$50,000 Scout building campaign goal.

February 20, 1949, San Diego Union, A-4:1. Public responds generously to Scout fund campaign.

At the most recent tabulation of results, the public, the major donors as well as the "little ones" had contributed \$36,649 --- 73 percent of the goal.

February 20, 1949, San Diego Union, A-4:3-4. Facilities for major Scout events provided in new home.

The building will have a large assembly hall with dining facilities and adequate space for all units of the central headquarters, according to Harvey Atherton, general chairman of the current fund-raising campaign.

February 24, 1949, San Diego Union, A-4:5. Bishop Buddy asserts San Diego cannot let Boy Scouts down.

February 24, 1949, San Diego Union, A-11:4-5. "Chicken Every Sunday" held for second time at Old Globe Theater.

February 25, 1949, San Diego Union, A-17:4. Boy Scouts' fund campaign nearing goal.

March 3, 1949, San Diego Union, A-4:4-6. Construction of new, permanent home for the County's 6300 Boy Scouts is assured; subscriptions total \$59,742.24 or 119-1/2 percent of the \$50,000 goal.

March 6, 1949, San Diego Union, A-22:2-4. Female llama born at San Diego Zoo (illus.).

March 7, 1949, San Diego Union, B-1:6-7. Burglar ransacks Old Globe Theater dressing rooms.

March 8, 1949, San Diego Union, B-1:7-8. Clean-up party to prepare Spanish Village for official opening, April 17.

March 9, 1949, San Diego Union, A-6:4. Horseman plan big free show for Boy Scouts.

March 11, 1949, San Diego Union, A-11:3. Old Globe Theater sets new run with 21st staging of the comedy hit "Chicken Every Sunday."

March 13, 1949, San Diego Union, A-18:1-4. Horseman will ride today to aid Scout fund (illus. and map).

The horseman of San Diego County will ride today to help the Boy Scouts furnish and equip the two-story rambling home and headquarters to be built in Balboa Park.

The Horsemen's Jamboree is being stages this afternoon as a benefit to raise funds for the new building which recently was given the County's 6300 Scouts by public contributions to a \$50,000 campaign.

Gates of the Scouts' camp site, where the Jamboree will be held, open at noon, or earlier if the crowd requires it, according to Walter Church and Robert Harness, co-chairmen of the free show.

March 13, 1949, San Diego Union, A-19:3-4. Open House to dedicate new Arts-Craft Center in Palisades Building Saturday and Sunday, March 19 and 20..

March 14, 1949, San Diego Union, A-7:2-4. Thousands attend Jamboree to aid home for Boy Scouts (illus.).

Exact sum realized through the jamboree had not been determined by late last night, but officials estimated it would be about \$3000.

March 14, 1949, San Diego Union, A-10:2-4. Spanish Village gets cleaning (illus.); artist move into the center on Easter Sunday, April 23.

Organizations to use the center include the San Diego Art Guild, Allied Artists Council, Allied Craftsmen, Junior Painters Work Shop and San Diego Press Women's Club.

March 18, 1949, San Diego Union, A-9:1-6. Rehabilitation of Balboa Park structures nearing completion; Food and Beverage Building and House of Charm about 95 percent finished: Open House planned at Palisades Building (illus.).

The Palisades Building has been remodeled into a puppet theater, recital hall and crafts section. The work was done by F. E. Young Construction Co., which also remodeled the Conference Building as an auxiliary convention hall and exhibit building.

Contracts will be awarded soon on remodeling of the Medical Arts and American Legion Buildings. These two projects will overdraw the fund by about \$118,000.

March 20, 1949, San Diego Union, A-8:2-4. Museum of Man plans exhibits of primitive weapons (illus.).

Malcolm Farmer, museum director, said yesterday that the first major post-war reorganization effort would open to the public on May 2 in its new primitive weapon room. Its 6000-item weapon exhibit has for its core the archery collection given the museum by the late Joseph Jessop, San Diego jeweler.

March 21, 1949, San Diego Union, A-9:1-8. City gives 223 feet wide and 86 feet deep Palisades Building to crafters (illus.).

The San Diego Folk Dancing Club uses the recital hall for learning new dancers and practicing old ones. When it is not being used for dances, the floor can be used for seating an audience of 400 persons in movable chairs.

The building will be used as city headquarters for the department's arts and crafts programs.

The Puppet Theater in the same building has space for 254 permanent seats. It is decorated with paintings of Donald Duck and family.

March 27, 1949, San Diego Union, B-1:7-8. New-born chimpanzee makes debut in San Diego Zoo today (illus.).

March 29, 1949, City Council Resolution No. 93275, Doc. No. 400116, rescinding Resolution No. 92207 determining rental charges.

March 30, 1949, San Diego Union, A-1:1-2, A-2:1. Street cars will bow out here April 24.

April 3, 1949, San Diego Union, B-16:6. Balboa Park use given to schools; Louis M. Karp, deputy city attorney, wrote new clause into policy governing use of park facilities that gives San Diego City and County schools free use of Balboa park buildings, except the Stadium and leased structures; events are limited to those for which rent would ordinarily be paid from tax funds, such as graduation exercises..

April 7, 1909, San Diego Union, A-15:4-5. Mosquito "plague" hits Balboa Park.

Leo B. Calland, director of parks and recreation, last night put the "curse" on the Wishing Well at the Spanish Village. He gave orders to have the well's stagnant water drained out after village artists complained about the mosquito onslaught.

April 9, 1949, San Diego Union, B-1:5-7. Rare orchid flown to San Diego for San Diego County Orchid Show in Balboa Park, April 30 and May 1 (illus.).

April 10, 1949, San Diego Union, A-15:4. Palm Sunday Organ Pavilion program planned today.

April 17, 1949, San Diego Union, A-14:1-5. San Diego Zoo reclamation plan for water in operation (illus.).

The San Diego Zoo's new system for reclaiming the 200,000 gallons of water daily, which formerly ran into the bay, is now in operation, it was announced yesterday by Ralph J. Virden, general superintendent.

Built at a cost of more than \$6000 the system is reclaiming the waste water and sending it back up on the deer mesa to irrigate the erstwhile barren hillsides bordering on the Cabrillo Freeway, Virden said.

The system, with its one mile of pipelines, is centered in a canyon in the southwest corner of the zoo grounds, where a pool containing about 500,000 gallons of water is located behind an earthfill dam with a concrete core.

Just below the dam is located the pump house, which contains a 15-horsepower, two-stage pump which lifts the water into lines running over the western edge of the zoo, and operating 30 sprinklers.

The pool in which the water is collected also will serve as a haven for wild ducks and other fowl in the winter season, and will be another colorful exhibit, Virden said.

April 17, 1949, San Diego Union, A-20:4. Rose Garden Show fund to be used for the future establishment of a Municipal Rose Garden in Balboa Park; Show will be held Saturday and Sunday in Recital Hall.

April 18, 1949, San Diego Union, A-1:1. Sixteen hundred at Balboa Park Easter rites.

April 22, 1949, San Diego Union, A-9:1-2. Organ Pavilion to get face-lifting (illus.).

The Spreckels Organ Pavilion is due for a \$5420 face-lifting, Parks and Recreation Director Leo Calland said yesterday.

The "treatment" will include sand blasting to clean up the ornamental plaster and cast stone work, patching of cracks and a complete paint job.

Money for the work will come from the park's restoration fund.

April 22, 1949, San Diego Union, A-9:4-5. Catholic schools to give concert; one thousand students to have part in Music Festival at Ford Bowl next Sunday afternoon.

April 24, 1949, San Diego Union, D-2:3. Catholic schools to open festival series in Balboa Park Bowl this afternoon.

April 25, 1949, San Diego Union, B-1:1-4, B-5:1. Street cars close San Diego transit era (illus.).

April 25, 1949, San Diego Union, B-12:6. Catholic group pleases crowd at Balboa Park Bowl in music fete.

April 27, 1949, San Diego Union, B-1:7-8. County-grown orchids to be shown at park Conference Hall Saturday-Sunday (illus.).

May 4, 1949, San Diego Union, A-8:1-3. Band concert at Plaza by St. Augustine High School Band, Balboa Park Carillon by Thomas Cain among today's events; celebration of National Music Week reaches half way point (illus.).

May 5, 1949, San Diego Union, A-6:1-3. Best stock horses in county to compete in Balboa Park show, by Ilma Pourade (illus.).

May 6, 1949, San Diego Union, A-13:2-3. William F. Connell, Jr., visiting recitalist, to play park organ.

May 7, 1949, San Diego Union, B-1:1-2. Family Fair to open in Conference Building, Balboa Park, this morning; exhibits ranging from the family records of A. E. Horton, founder of modern San Diego, to the genealogical records of the Kearney High School.

May 7, 1949, San Diego Union, B-1:1. Development of some sections of Silver Strand Park has been started despite lack of navy-state agreement on use of park areas for amphibious landing exercises.

May 7, 1949, San Diego Union, B-1:2. The U. S. Naval Training Center band will offer its second annual Music Week concert in the Organ Pavilion at Balboa Park today at 4 p.m.

May 8, 1949, San Diego Union, A-7:3-4. Frank C. Bonnet, Black Dan's rider, to return to Balboa Park as a guard at the San Diego Zoo following his retirement from the Police force (illus.)

May 8, 1949, San Diego Union, A-10:1. San Diego Zoo displaying pair of rare wolverines (illus.).

May 8, 1949, San Diego Union, A-22:1-2. Blind Welfare Center opens with public ceremony today.

Dr. Anthony C. Moran, general chairman, emphasized that the facilities at the center are for all the blind and all local blind organizations. "The blind will be in full control, and will formulate their own varied programs and activities --- from handicraft to theatricals, from card parties and educational therapy to dinner dances," Moran said.

May 9, 1949, San Diego Union, A-4:1-2. Recreational Center given over to blind.

May 10, 1949, San Diego Union, A-7:3-4. Stops, marked walks asked for park riders.

As protection for women and children who patronize the riding facilities at Balboa Park, 339 citizens yesterday petitioned the City Council for bus stops and marked crosswalk on Park Boulevard at the Date Street Drive and Eighteenth Street junction.

May 12, 1949, San Diego Union, A-8:1-3. Sunday Horse Show entries close today (illus.).

May 12, 1949, San Diego Union, A-11:7. Three one-act plays moved to park Recital Hall from Puppet Theater due to an anticipated larger attendance tomorrow night.

May 14, 1949, San Diego Union, A-5:8. Mary Ann Getty, San Diego State college student, to play organ at Balboa Park this afternoon.

May 15, 1949, San Diego Union, A-16:1-4. Horses compete today in Silver Gate Riding Show in the Balboa Park ring (illus.), by Ilma Pourade.

May 15, 1949, San Diego Union, B-1:7-8. Star-Light Opera opens 4th season June 30.

May 15, 1949, San Diego Union, C-13:4-7. House of Hospitality has colorful history.

San Diegans have awaited the reopening of the House of Hospitality in Balboa Park for this marks one further step in the process of reactivating park facilities for the use of San Diego citizens. Prior to the war, this building served as a cultural, educational and social center and was managed by the House of Hospitality Association, an incorporated group of civic-minded citizens. The building was taken over by the Navy immediately following Pearl Harbor.

This association dates back to November, 1923, when a group of civic-minded citizens, both men and women, formed the non-profit organization known as the Balboa Auditorium Association. Funds were raised to rebuild one of the 1915 Panama-California International Exposition buildings on Laurel Street at the east end of the park. This building had several auditoriums and studios, which were rented to clubs and organizations.

One Saturday night in 1925 the Balboa Auditorium was rented for the Firemen's Annual Ball. Just one hour before the guests were to assemble, a fire broke out and the auditorium was burned to the ground. Following this tragedy the Balboa Auditorium Association continued as a well-organized corporation waiting for the day when it could again offer the same facilities.

Following the 1935 and 1936 expositions, the Balboa Auditorium Association was called upon by the city to manage the present building, located on the southeast corner of the plaza in Balboa Park. This building also was originally constructed for the 1915 Exposition. It was remodeled and used during the 1935 expositions and became known during these years as the House of Hospitality. Exposition officials made this their headquarters and world renowned celebrities were entertained there. In 1938 the Balboa Auditorium Association changed its name to the House of Hospitality Association.

In December, 1941, the Association was given 24 hours notice by the Navy to vacate the building. The Navy purchased some of the furnishings. However, the entire furnishings of the Gold Room and part of the Loggia furnishings were put in storage.

The City again has called upon the House of Hospitality Association to manage the building as a greatly needed center for social, cultural and educational purposes. It has been necessary to completely furnish the building with the exception of the Gold Room and loggia. The building has a large auditorium, several smaller ones, studios, a beautiful loggia, the Gold Room and the Café del Rey Moro. The former decorations of Flamingo Studio have been duplicated. The Flamingo hangings have been done by Esther Barney, former local artist, now living in Ramona. The La Verde Room is used for wedding receptions, teas, club meetings and small concerts. The Junior League of San Diego has its headquarters in the building and several studios on the second floor have been rented to State College sororities and fraternities. The loggia overlooking the beautiful patio, centered by Donald Hord's Indian Woman, is available for wedding receptions and teas.

Casa del Rey Moro Café on the first floor, again will be popular as an outstanding place for entertaining. In this delightful Spanish setting guests may dine under colorful umbrellas on the terrace or in the main dining room. The dining terrace overlooks a lower garden terrace reached by iron balustraded steps. This garden is a replica of the garden of the Casa del Rey Moro at Ronda, Spain. Guests on the terrace often will be able to hear strains from the outdoor organ, played by Royal A. Brown. The carillon chimes from the California Tower may be heard hourly.

Outstanding room is probably the Gold Room. This Spanish type, skillfully appointed in gold, will be opened daily, with a hostess in attendance. Guests will meet their friends there or relax in its quiet atmosphere. Groups dining in Café del Rey Moro will find it convenient to assemble in the Gold Room, adjacent to the café.

May 15, 1949, San Diego Union, D-2:1-3. Fine Arts Society, concerts, opera, symphony feature summer events, by Constance Herreshoff.

May 15, 1949, San Diego Union, D-11:1-2. Home Show exhibits arranged for opening in Electric Building Sunday; building materials, furnishings on parade at 8-day San Diego event.

The biggest home show ever held in San Diego opens Sunday at the Electric Building, Balboa Park at 2 p.m. with a display of everything for the home, from "America's smallest complete kitchen" to a fully-furnished, two-bedroom dream house.

It's the start of the 8-day San Diego National Horse Show presenting a lavish showcase of new building materials and furnishings for everyone interested in buying or remodeling a home.

More than 100 exhibits, many on a large scale, will show San Diegans the most recent developments in construction and home furnishing. Every detail of the home from drawing board to the completely furnished product will be demonstrated.

Booths have been arranged to provide convenient display of the products. Sponsors' representatives will be on hand to explain the items, many of which are being displayed publicly for the first time.

Among the major displays will be Chris Cosgrove's "Model 833," a low-cost home with luxury features. Designed for a quality home at a moderate price, the building contractor has provided comfort without loss of distinction or sacrifice of budget, large storage closets, parquet flooring, tile and beamed ceiling represent a few of the features installed in the home as a result of surveys which indicated their popularity with American home makers.

Most of the furniture, appliances and decorative effects of the model home have been created by the CBM Company, an organization affiliated with Cosgrove. Each room is a modern blending of furnishings and color.

The hope will be open to the public throughout the show and its to be landscaped by Walter Anderson to provide the most natural setting for the display. To complete the scene, the Lansing Patio Furniture Company of La Jolla will furnish striking redwood outdoor furniture and Jack Brem will display the latest barbecue equipment.

The tuna industry will be represented by a Sun Harbor Packing Company display of a model clipper in addition to a valuable, heavily-insured scale-model tuna boat, loaned by the National Steel and Shipbuilding Corporation. Representatives of the tuna company will be on hand to pass out tuna food specialties to all visitors from a cleverly-designed giant tuna can.

A distinctive and refreshing patio exhibit has been prepared for the Altes Lager Brewing Company by Richard Smith, local industrial designer. In achieving the theme of hospitality, the designer, aided by G. R. Burrows and G. S. Wright, required a half tone of flagstone plus redwood beams and Aurelia plantings. Alsynite, a new translucent building material, produced by Allied Synthetics Company of San Diego, is combined with special lighting to produce outstanding effects.

Numerous other exhibits will be actual working models so that home owners can visualize how the products will look and work in the home.

New building materials and methods, modern housing design, economical financing and a complete array of home furnishings in typical settings will round out the gadget to model home scope of the show.

Reservations for exhibit space moved rapidly from the opening announcement of the event. Many of the current sponsors are already requesting larger space for next year's show.

Curry Home Shows, producer of this first annual San Diego National Home Show, recently concluded highly successful expositions in Oakland and Houston. The organization has staged more than 30 shows on a nationwide scale throughout the country. The show here is being produced in cooperation with **The San Diego Union** and **The Tribune-Sun**.

Civic leaders have pointed out that increased building activity may result from the wide public response to the home show. Attendance is expected to top the 70,000 mark.

Home Show Week in the community was stressed last week when Mayor Harley Knox issued a proclamation setting aside May 15-22 as official "Home Show Week" in San Diego.

The mayor urged maximum attendance for the event. He noted that home ownership represents a major aim of the average American family and this type of home show presents the best opportunity for residents to obtain a panoramic view of home building and furnishing.

Wide interest is also evident in the cooking school to be directed by the nationally-famed Martha Logan. The Swift and Company home economist will personally supervise the elaborate program planned for the daily afternoon and evening sessions.

May 15, 1949, San Diego Union, D-12:1-3. The Electric Building will be the scene of the National Home Show beginning Sunday at 2 p.m. and continuing for 8 days (illus.)

May 15, 1949, San Diego Union, D-12:4-6. Edward C. Borgens to play organ music each day at National Home Show in Electric Building (por.).

May 16, 1949, San Diego Union, A-11:1-5. Favorites take most ribbons in yesterday's Silvergate Club Horse Show (illus.).

May 16, 1949, San Diego Union, B-1:4-7. Nine thousand attend Home Show opening day (illus.).

Once inside, they had a 3-hour job ahead of them just to see all the gadgets, aids and equipment displayed to supplement the American way of life.

May 17, 1949, San Diego Union, A-7:3-4. Home Show draws interested crowds.

May 18, 1949, San Diego Union, A-8:1-3. Cosgrove Model House biggest event at Balboa Park exhibition (illus.).

May 18, 1949, San Diego Union, A-8:4. Girl Scouts to use abandoned Officers' Club building at Camp Callan as a camp; the Girl Scouts will pay no rent and no money will be spent on the building.

May 20, 1949, San Diego Union, A-20:2. Square dance round up set at old Officers' Club in Balboa Park tomorrow at 8 p.m.

May 20, 1949, San Diego Union, A-20:3-5. Fun gets underway today; Lions from four counties will start registering for conclave; dinner and entertainment tonight in the Conference Hall in Balboa Park; stag breakfast tomorrow in Palisades Building; luncheon and business session tomorrow in Conference Hall.

May 22 1949, San Diego Union, A-2:5-7. San Diego Home Show concludes successful debut tonight.

May 22, 1949, San Diego Union, D-2:1-3. San Diego Symphony arranges four park concerts in August, by Constance Herreshoff.

May 29, 1949, San Diego Union, D-5:4-7. Art and Artists; Miss Frances Roberts Nugent, speaker to tell of "old masters" this afternoon, by Thomas B. Robertson, asst. director, Fine Arts Gallery (illus. of "Apollo and Daphne" by Paolo Veronese, owned by the Fine Arts Gallery).

May 30, 1949, San Diego Union, B-10:5. Larry J. Manford, 45, ends life in leap from Cabrillo Bridge.

May 31, 1949, San Diego Union, A-12:1-2. Frank Drugan plans another exposition (por.).

June, 1949, DEPARTMENT OF PUBLIC WORKS, ANNUAL REPORT, Fiscal Year, 1948-1949.

Development and execution of plans for expanding facilities at 20th and B Streets were the responsibilities of the Public Works Division of Public Buildings.

June, 1949. ANNUAL REPORT OF THE CITY PLANNING COMMISSION FOR THE YEAR ENDING JUNE 1949.

- p. 4. An amendment to the General Plan of Morley Field Recreational Area for an enlarged Fly Casting Pool and other lesser activities.

An amendment to plan and landscape development area adjacent to Park Boulevard from Plaza de Balboa to Upas Street to permit construction of a Veterans' Memorial Building.

June 8, 1949, San Diego Union, A-9:4. Dr. Fabien Sevitzy is to reorganize the San Diego Symphony next month for a series of five concerts to be presented in Balboa Park on Tuesday evenings in August and the first Tuesday in September.

June 12, 1949, San Diego Union, B-1:3, B-14:1. San Diego Symphony is to be heard in five concerts in Ford Bowl August and September.

June 12, 1949, San Diego Union, B-1:4-5. Leo Calland, Parks and Recreation Director, says varied recreational programs ready for children at 53 playgrounds and other centers.

June 13, 1949, San Diego Union, 1:6-7. Masonic group raised colors on Inspiration Point in Balboa Park yesterday; 23rd annual Flag Day observance (illus.).

June 19, 1949, San Diego Union, A-11:1-4. Sketch of San Diego Veterans War Memorial building to be erected in Balboa Park; the city has approximately \$270,000 available for the job from the sale of salvage at Camp Callan; construction contract awarded Tuesday to F. E. Young on a \$217,957 bid, the lowest of three.

June 19, 1949, San Diego Union, A-16:1. Royal A. Brown will play music of Dr. Humphrey J. Stewart this afternoon at Organ Pavilion.

June 21, 1949, San Diego Union, A-1:5-7, A-3:4-6. G. Aubrey Davidson will bring long business career to end; unofficial "first citizen," 81, to retire from bank today, by Henry Love.

June 23, 1949, San Diego Union, A-16:3. The Planning Commission yesterday afternoon removed the lower Cedar Street location for public buildings from the City's Master Plan.

June 27, 1949, San Diego Union, A-5:6. Natural History Museum officials preparing to reopen first floor of Museum to public visitors for the first time in six years Sunday; will go before City Council with plea for aid.

June 28, 1949, San Diego Union, A-1:8. Undersecretary Don A. Kimball says San Diego activity cutback not on Navy's plans.

June 29, 1949, San Diego Union, A-1:3, A-3:1. City budget cut; \$1.96 tax rate predicted; \$20,000 item for rehabilitating Botanical Building cut out; park lighting is now \$55,000.

June 29, 1949, San Diego Union, A-4:1. EDITORIAL: Star Light Opera.

June 30, 1949, San Diego Union, A-1:2-3, A-3:4-5. Fair weather to greet Star Light Opera opening of fourth season in Balboa Park Bowl; troupe to present "Naughty Marietta" tonight.

July 1, 1949, San Diego Union, A-1:5-6., A-2:!. Four thousand seen Star Light Opera raise curtain.

July 1, 1949, San Diego Union, A-2:5-6. "Naughty Marietta: delights audience, by Constance Herreshoff.

July 3, 1949, San Diego Union, B-1:1-4. Dr. Fabien Sevitzy, who organized the Indianapolis Symphony Orchestra 12 years ago and will conduct it next winter, will arrive here July 28 to begin auditioning musicians for San Diego's "Symphonies Under the Stars" series next month in Ford Bowl.

July 3, 1949, San Diego Union, B-1:5-6. City Manager Rhodes to ask City Council to shift library annex to park for economic reasons; will point out that the recently rehabilitated Food and Beverage Building is adaptable to library needs..

July 3, 1949, San Diego Union, B-1:6. J. H. Shaw, City purchasing agent, said yesterday that he will recommend that the City Council accept the \$12,298 bid of Hazard Slaughter, Inc. for restoring the Medical Arts Building in Balboa Park.

July 3, 1949, San Diego Union, D-2:1-3. Star Light Opera cast to rest after tonight's Bowl performance of "Naughty Marietta," by Constance Herreshoff.

July 5, 1949, San Diego Union, B-12:1-2. Balboa Park organ noted world over.

July 7, 1949, San Diego Union, A-10:4-6. Two thousand offer final tribute to Forrest Warren, newspaper man, at Organ Pavilion in Balboa Park.

July 7, 1949, San Diego Union, A-14:1-2. Fine run of Victor Herbert's "Naughty Marietta: opens tonight; will be presented four times in Balboa Park Bowl by big cast (illus.).

July 7, 1949, San Diego Union, A-14:5. Old Globe Theater to present Shakespeare beginning July 20 when the San Diego Community Theater and San Diego State College present "Twelfth Night,; under the direction of B. Iden Payne; dancing on the green will precede each performance.

July 7, 1949, San Diego Union, B-14:1-3. Fifty young San Diego artists on field trip to San Diego Zoo.

July 9, 1949, San Diego Union, A-5:6. A festival of songs, featuring more than 500 voices, will be held tomorrow afternoon at 2:30 in Conference Building auditorium in Balboa Park.

July 9, 1949, San Diego Union, A-7:1. "Twelfth Night" cast completed at Old Globe Theater.

July 10, 1949, San Diego Union, A-2:4-5. Mrs. Benchley, San Diego Zoo director, seeks young gorillas.

July 10, 1949, San Diego Union, D-2:1-3. Star Light Opera ends "Marietta" tonight; "Rose Marie" next, by Constance Herreshoff.

July 12, 1949, San Diego Union, B-14:5-6. San Diego Zoo plan to adopt pair of gorillas falls down.

July 15, 1949, San Diego Union, B-2:3. "Rose Marie" please big crowd, by Constance Herreshoff.

July 17, 1949, San Diego Union, B-1:1-3. Shakespeare's plays to be revived at Old Globe Theater (illus.).

This year's revival of the Shakespearean Festival in the Old Globe Theater will be the first since the 1935-1936 Exposition when all the world came to the park to get a taste of Elizabethan England.

July 17, 1949, San Diego Union, D-2:4-5. Martha Gene hit of "Rose Marie" at Balboa Park Bowl.

July 21, 1949, San Diego Union, A-13:1-5. Color marks opening of "Twelfth Night" (illus.).

July 22, 1949, San Diego Union, B-1:4-5. Recital by Paul D. Peery on reconditioned Ona May Lowe chimes scheduled Sunday at 2 p.m.; bells have been in Los Angeles where the manufacturer, the Mass Organ Co., has brought their partial overtones into pure harmony.

July 24, 1949, San Diego Union, A-12:1-5. Hyacinthine Macaws get new home at San Diego Zoo.

July 24, 1949, San Diego Union, A-15:1-4. Lily Pond becomes photographic joy; restored after use as a swimming pool for Naval Hospital during war; planted with white, yellow, blue, crimson water lilies; water hawthorne, Egyptian water papyrus, lotus and pickerel.

During the war, the pond was rebuilt into a swimming pool for patients and personnel at the Naval Hospital annex in the park exposition buildings. To restore it the gutters had to be removed, the railing removed, and tons of earth hauled in to give the lilies and other water plants a place to grow. The mechanical work was completed a year ago in March, too late to obtain plans for last summer's display.

July 24, 1949, San Diego Union, D-2:4-5. "Student Prince" next in Balboa Park Bowl opera series.

July 25, 1949, San Diego Union, A-5:5-6. Bit of Jolly Old England revived on lawn of Old Globe Theater yesterday afternoon.

July 28, 1949, San Diego Union, A-4:1-2. Size of Star Light Opera audiences intrigues; Friday night 3437 persons say "Rose Marie."

July 29, 1949, San Diego Union, A-5:3. "The Student Prince" pleases big crowd at Balboa Park Bowl.

July 31, 1949, San Diego Union, A-15:1. Swiss Society to celebrate on House of Pacific Relations lawn today.

July 31, 1949, San Diego Union, D-2:1-3. Melody joined with mirth in Old Globe's Shakespeare, by Constance Herreshoff.

July 31, 1949, San Diego Union, D-2:5-6. "Student Prince" ends Balboa Park Bowl run this week.

August 2, 1949, San Diego Union, A-6:1. Star Light Opera draws young hearers; "The Student Prince" to open its final week Thursday night.

August 2, 1949, San Diego Union, A-6:5. "Twelfth Night" and the Shakespearean Festival opens the third and final week at the Old Globe Theater tonight.

August 2, 1949, San Diego Union, A-7:5-7. Actors, actresses nominated for 1948-49 Community Theater "Atlas" awards.

August 2, 1949, San Diego Union, A-10:1. L. M. Klauber chosen head of San Diego Zoological Society (illus.).

August 3, 1949, San Diego Union, B-1:4. A Boston Terrier puppy match will beheld Sunday afternoon in Balboa Park, 6th Avenue near Quince Street, under auspices of Boston Terrier Club of San Diego County.

August 7, 1949, San Diego Union, A-11:1-3. Star Light Opera's "The Red Mill" opens Thursday (illus.).

August 7, 1949, San Diego Union, D-2:1-3. San Diego Symphony will present first of five concerts Tuesday in Balboa Park Bowl, by Constance Herreshoff.

August 8, 1949, San Diego Union, A-7:1-3. Dedication ceremonies set Sunday at new Boy Scout Headquarters; swimming pool construction to begin the day following the dedication.

August 9, 1949, San Diego Union, A-1:1-2, A-6:1-2. Symphony music returns to San Diego; home-grown aggregation opens tonight in concert at Balboa Park, by Bryant Evans.

All of the art activities in the park are participating activities. The Star Light Opera has offered a chance for acting and singing and dancing to hundreds of talented young San Diegans.

The Old Globe has offered a medium to talented actors of all ages and more than 400 artists and students have availed themselves of the facilities of the Fine Arts Gallery this summer, without counting the artists who have used the nine studios which the City has made available in the old Spanish Village.

The Symphony gives employment to 60 local musicians, some of whom it has brought back to San Diego from other cities.

August 9, 1949, San Diego Union, A-9:7-8. "The Red Mill" to open engagement at Balboa Park Bowl Thursday.

August 10, 1949, San Diego Union, A-1:3-5, A-4:1-2. San Diego welcomes return of own symphony after an 8-year lapse.

August 10, 1949, San Diego Union, A-4:3-6. Orchestra, Dr. Sevitzy win "vivas" as Symphony returns; concert praised as golden milestone in San Diego, by Constance Herreshoff.

August 12, 1949, San Diego Union, A-8:1. Cast of "Red Mill" scores hit.

August 12, 1949, San Diego Union, B-1:5. Park West Civic Association yesterday called on City Council to prevent further suicide leaps from Cabrillo Bridge.

August 14, 1949, San Diego Union, A-16:1-4. Dedication of Scout's new home set today (illus.).

San Diego's new Home for Scouting, 1207 Upas Street, valued at \$75,000 and made possible by generous donations of civic-minded citizens and organizations, will be dedicated today. The informal, public ceremonies will be a "double-barreled" one. As soon as the dedication service is over, ground will be broken for a new \$20,000 to \$25,000 swimming pool 60 feet to the rear of the new building.

August 14, 1949, San Diego Union, A-17:1-5. The county's enthusiasts in everything from model trains to gadgets and copper tooling to tropical fish will display hundreds of hobbies in Balboa Park's Conference Building Aug. 25-28 at the Craft, Hobby and Inventors' Show.

August 14, 1949, San Diego Union, B-1:5. City Manager Rhodes lists 49 parks in city limits.

Biggest park is Balboa with 1280.37 acres while the smallest plot 0.12 acres is at Wabash and Dwight.

August 14, 1949, San Diego Union, D-2:1-3. San Diego Symphony won acclaim in first concert of the Balboa Park series Tuesday night, by Constance Herreshoff.

August 14, 1949, San Diego Union, D-2:6. The Star-Light Opera Company will continue its successful run of "The Red Mill" Thursday night at 8:30 in Balboa Park Bowl.

August 15, 1949, San Diego Union, A-7:4-8. San Diego gorillas' debut spoiled by big chimpanzee (illus.).

August 15, 1949, San Diego Union, A-9:1-6. Scouts take over new \$75,000 home in Balboa Park; Harvey Atherton named as dynamo behind efforts to get land, building.

August 16, 1949, San Diego Union, A-3:2-3. Second symphony concert to open.

August 17, 1949, San Diego Union, B-9:4. Dr. Sevitzy, symphony draw praise, by Constance Herreshoff.

August 18, 1949, San Diego Union, A-7:3. "Red Mill" to initiate second week.

August 18, 1949, San Diego Union, A-9:1-3. New traffic routes to Balboa Park Bowl on nights of Star-Light Opera shows adopted to avoid jams (map).

August 20, 1949, San Diego Union, A-1:1-2, A-12:2-3. "The Red Mill" breaks all attendance records; 4100 San Diegans jammed the Bowl last night (illus.).

Park visitors not attending the opera, especially those residing in East San Diego, find the new [traffic] system inconvenient, some cars winding up in the opera parking street instead of on a homeward street.

A police radio message Thursday night said 100 autos were jammed in a waiting line on one road.

August 21, 1949, San Diego Union, B-2:1-3. Stragglers irk conductor, most patrons of symphony, by Constance Herreshoff.

August 21, 1949, San Diego Union, B-2:4. "Red Mill" ends run tonight.

August 23, 1949, San Diego Union, A-1:3-4, A-3:5-6. Planned 1955 Fair raises questions; "Where shall we put it?"

August 23, 1949, San Diego Union, A-5:3-4. Crowd due to hear Brian Sullivan, tenor, tonight at Balboa Park Bowl.

August 23, 1949, San Diego Union, A-6:1-2. Plan started to make Date Street wide arterial.

August 23, 1949, San Diego Union, A-7:3. Congo, Oka and Lady Congo, three baby gorillas, permanent San Diego Zoo citizens.

What the appealing trio cost was not disclosed, but accountants still were figuring Sunday's gate receipts after one of the largest crowds in years turned out for a look at the babies.

August 23, 1949, San Diego Union, B-1:1-3. City seeks new locations for buildings.

August 23, 1949, San Diego Union, B-1:7-8. Site of Balboa Park Riding Academy okayed for parking for patrons of Balboa Bowl; city would build pedestrian bridge over canyon between Park Boulevard and the Bowl with salvaged San Diego Transit firm steel..

August 24, 1949, San Diego Union, A-8:1-2. Late arrivals mar symphony concert, by Constance Herreshoff.

August 24, 1949, San Diego Union, B-1:2-5. Tropical fish to be viewed at Hobby Show which begins tomorrow in Conference Building, Balboa Park (illus.)

August 25, 1949, San Diego Union, A-6:3-4. Four-day recreation, hobby roundup to open this afternoon in Conference Building.

August 25, 1949, San Diego Union, A-7:3 City Manager Rhodes plans fight against a foot bridge between Park Boulevard and Balboa Park Bowl.

San Diego Transit System is "not going to be allowed to dump" its abandoned Balboa Park street car trestles on the City, if City Manager Fred A. Rhodes can "prevent" it, he said yesterday.

August 28, 1949, San Diego Union, A-2:6. Naval Hospital tour impresses top medical officers of the armed services.

August 28, 1949, San Diego Union, A-11;4-6. Yarn balls spun from Angora rabbit fur at Hobby Show in Conference Building.

August 28, 1949, San Diego Union, D-2:1-3. Marine Koshetz to be guest artist in fourth symphony concert, by Constance Herreshoff.

August 28, 1949, San Diego Union D-2:6-8. Star Light books "The Chocolate Soldier" by Oscar Straus.

August 30, 1949, San Diego Union, A-12:1-3. The San Diego Zoo's male baby gorilla will be known henceforth as Albert (illus.).

August 31, 1949, San Diego Union, A-5:6. City declines abandoned street car trestles for building a foot bridge linking Park Boulevard with Balboa Park Bowl.

August 31, 1949, San Diego Union, A-12:1-2. Symphony scores splendid triumph, by Constance Herreshoff.

August 31, 1949, San Diego Union, A-12:2. Community Theater sale now at Old Globe Theater.

September 1, 1949, San Diego Union, A-1:5-6. Star Light Opera may net 110,000 customers; "The Chocolate Soldier" opens tonight.

September 6, 1949, San Diego Union, A-1:2-3. Hold Zepeda, brilliant young Mexican pianist, will appear as soloist with the San Diego Symphony Orchestra, directed by Fr. Fabien Sevitzky, tonight at Balboa Bowl.

September 6, 1949, San Diego Union, A-10:5. "The Chocolate Soldier" to overtop Balboa Bowl record.

September 7, 1949, San Diego Union, A-11:2. Dr. Sevitzky acclaimed as summer season ends, by Howard O. Welty.

September 7, 1949, San Diego Union, B-1:2-6. Unexplained echoes in Park organ fascinate Virgil Fox, organist of the Riverside Church in New York; debut recital sponsored by the American Guild of Organists (illus.).

September 8, 1949, San Diego Union, A-9:1-2. "The Chocolate Soldier" sets new record for attendance for a first-week's showing at Balboa Bowl.

September 8, 1949, San Diego Union, A-11:3. Old Globe Theater award given again to actress Helen Giovanazzi (illus.).

September 11, 1949, San Diego Union, A-10:1-6, A-23:1. House of Hospitality opens big fall season (illus.).

Twenty five San Diegans who voluntarily supervise the operation of Balboa Park's celebrated House of Hospitality, this week saw the beginning of their first big fall season since before World War II.

Luncheons and dinners are served at the Café del Rey Moro under the supervision of Mrs. J. E. Priest, restaurant lessee.

September 11, 1949, San Diego Union, A-17:1-4. San Diego makes opera successful; 115,000 pay admissions (illus.).

Bob Sullivan is one of the three founders of Star-Light. He handles the business-end of things, while William L. Dean and Charlie Cannon, the other founders, take care of production and box-office attraction, respectively.

September 11, 1949, San Diego Union, D-2:1-3. San Diego Symphony Association plans large series for 1950, by Constance Herreshoff (illus.).

September 15, 1949, San Diego Union, A-1:1-3. Miniature railway traffic halted by cow escaped from trailer and headed for lush turn of park (illus.).

September 15, 1949, San Diego Union, A-1:7-8. Another world exposition scheduled for San Diego; Chamber to sponsor Fair at earliest possible date.

September 16, 1949, San Diego Union, A-11:1. Dedication set for windows at Naval Hospital chapel Sunday.

September 18, 1949, San Diego Union, A-26:2-3. Historical pageant "warm-up" planned.

September 18, 1949, San Diego Union, B-1:6-8, B-16:6. Decision to hold Exposition here based on public opinion.

September 22, 1949, San Diego Union, A-5:1-2. Goodwin to direct World's Fair group.

September 23, 1949, San Diego Union, A-14:5-6. "Caught in the Act," Old Globe Theater play, extended to October 15.

September 25, 1949, San Diego Union, A-12:1-4. Swedish life exhibited in park today (illus.).

September 27, 1949, San Diego Union, A-8:4. Archbishop of York, Cyril Foster Garbett, will speak at a public meeting in Balboa Bowl, October 7.

October 7, 1949, San Diego Union, A-17:3-4. Archbishop of York will preach tonight in Balboa Bowl.

October 8, 1949, San Diego Union, A-1:1, A-2:6. San Diego's Exposition set for 1955.

October 8, 1949, San Diego Union, A-1:1-2, A-3:1. The Archbishop of York told more than 1000 San Diegans last night in Balboa Park Bowl that family of nations is God's plan.

October 9, 1949, San Diego Union, D:2. The Shambles Show House, a fascinating, roofless ruin in the Spanish Village, was the scene of an exotic entertainment put on by Spanish Villagers on the night of Sept. 30.

October 9, 1949, San Diego Union, D-4:1-2. Tunes prove hit in Old Globe comedy, "Caught in the Act," by Constance Herreshoff.

October 15, 1949, San Diego Union, A-1:2. Committee picks "World Progress" as name of Fair.

October 23, 1949, San Diego Union, D-14:1-8. Museum of Natural History to mark 75th anniversary (illus.).

After 75 years of studying the ever wonderful aspects of nature in Southern California, the San Diego Society of Natural History next Sunday will celebrate by holding open house in the Museum of Natural History in Balboa Park. The Sunday celebration will consist mostly in reintroducing the museum to the public. Scientists will be on hand to chat about the collections in which they have done research. A 4 p.m. Less Passmore will give a lecture on "Insects, Spiders and Their Habits." A collection of fine natural history photographs by local photographers will be on display. The museum will be open from 10 a.m. to 6 p.m.

In 1946 Clinton Abbott died and Laurence M. Huey, curator of birds and mammals, took over as acting director for 11 months. Then Col. Arthur F. Fischer, USA, ret., who had been director of the Bureaus of Forestry and Science in the Philippines, took over the job of reconstruction. The

exhibits which are on display represent his conceptions. Fisher is now on a 3-month leave occasioned by effect of tropical illnesses.

October 25, 1949, San Diego Union, A-7:5-6. New stage sought for Balboa Bowl; City Manager Rhodes orders cost estimates on revolving device for park.

Rhodes also asked the Public Works Department to determine the cost of building a four-window box-office and changing the location of light projectors in the bowl.

October 31, 1949, San Diego Union, A-4:2. Natural History Museum opens post-war show (illus.)

Approximately 4000 San Diegans deployed through the Natural History Museum in Balboa Park for the first full-time dress open-house the museum has held since the war. For the first time since the war the basement exhibits were open to the public.

Throughout the afternoon, the sliding doors of the museum's outstanding bird's egg collections were going up and down. Visitors rested on automatic switch rails and saw panoramas of wild life in natural settings light up.

Hours of study were spent looking at the gigantic relief map of Southern California, lent by the Metropolitan Water District. The saber-toothed tiger was universally admired.

A new department in the museum was appreciated by hundreds of youngsters who found their way to the lower floor. Down there are mounted animals with the signs on them, "please touch." The are the school loan exhibits which are meant expressly for handling and study by young students.

Lee Passmore, veteran photographer and naturalist, entertained audiences by showing slides of photographs of creatures he had filmed. One fascinating sequence shows the life history of the familiar trap-door spider.

November 3, 1949, San Diego Union, A-10:2-4. San Diego Art Mart will be held in the open air at 6th Avenue and Laurel Street in Balboa Park, Friday through Sunday (illus.).

November 5, 1949, San Diego Union, A-8:1-4. San Diego Art Mart opens at park (illus.).

November 6, 1949, San Diego Union, D-2:4-8. Annual stamp show opens at Fine Arts Gallery, by Reginald Poland (illus.).

November 7, 1949, San Diego Union, B-1:6. Art Mart big success in Balboa Park; sales net \$5623.

November 8, 1949, San Diego Union, A-8:3. Parks Superintendent W. Allen Perry yesterday apparently killed the idea of a revolving stage for Balboa Park as proposed by the San Diego Civic Light Opera Association.

Perry said he made his recommendation "in view of the need for such facilities as rose gardens and reconstruction of the Botanical Building and Japanese Tea Gardens."

November 8, 1949, San Diego Union, B-1:2. The abandoned street car right-of-way in Balboa Park would become a permanent four-lane highway under a proposed plan for parking 16,000 automobiles in the park during the California World Progress Exposition in 1955, it was revealed yesterday.

The plan, advanced by James E. Reading, city traffic engineer, also calls for an 800-foot bridge across Florida Drive to link Park Boulevard with a 10,000-car parking area south of the Municipal Pool.

Still another improvement would be an escalator rising 100 feet in the air to deliver pedestrians to the Plaza de Balboa from a 2000-car parking lot in the canyon just east of there.

After the exposition, the escalator would be moved to Ford Bowl canyon on the west side of Park Boulevard to serve bowl patrons who would use a projected parking area in the canyon, Reading said.

November 9, 1949, San Diego Union, A-16:2-5. San Diego Zoo's rock hyrax cousin to elephant (illus.).

November 11, 1949, San Diego Union, A-13:4. Centennial Council for 1950 celebration formed.

November 12, 1949, San Diego Union, A-1:4, A-3:4. Military parade to Balboa Bowl features City's Armistice fete; Army-Navy football game in Balboa Stadium; concert in Spreckels Organ Pavilion.

November 12, 1949, San Diego Union, B-1:1-2. San Diego World's Fair design sketched; Clyde Vandenberg suggests exposition featuring people.

November 13, 1949, San Diego Union, B-2:4-8. Renoir, Cezanne to be discussed in first of this season's education lectures at Fine Arts Gallery Tuesday evening (illus.).

November 14, 1949, San Diego Union, A-1:1, A-2:1-3. City ready for changes in streets; plan involves 3 belt routes about downtown areas.

November 15, 1949, San Diego Union, A-17:3. "The Beautiful People," by William Saroyan starts final week at Old Globe Theater.

November 17, 1949, San Diego Union, A-5:6-7. San Diego's World's Fair will be mapped during the first quarter of 1950 by Clyde M. Vandenberg, exposition authority; Exposition committee headed by Ewart Goodwin.

November 19, 1949, San Diego Union, A-9:8. City Manager Rhodes said yesterday the City probably will keep control of the \$350,000 Veterans' Memorial Building being constructed in Balboa Park and will set up a scale of charges for organizations using it.

November 20, 1949, San Diego Union, A-9:1. Parking set for electric exhibition in Balboa Park; attendance of 150,000 anticipated.

A "two-way stretch" of parking facilities that will materially ease the situation for persons attending the 12th Annual Electrical and Home Appliance Show in Balboa Park Friday to November 30, was planned yesterday by park, police and show officials.

Meeting with Leo Calland, parks and recreation director, Lt. Bill Thien, police traffic division head, and Show Manager J. Clark Chamberlain mapped a one-way traffic pattern designed to channel cars rapidly into enlarged parking facilities on both sides of the Laurel Street Electric Building site for this year's show.

City crews have expanded both parking areas, Calland said. One of these, considerably enlarged, lies to the south back of the Outdoor Organ. The other is north of the Electric Building, extending to Roosevelt Junior High School.

November 20, 1949, San Diego Union, A-16:4-5. Osa Johnson says he will deliver rare African animals to San Diego Zoo.

November 20, 1949, San Diego Union, D-2:4-6. Dr. Reginald Poland to talk on "Old Dutch Masters" today, by Thomas B. Robertson.

November 23, 1949, San Diego Union, B-14:2-4. San Diego animals depart for sea voyage to Honolulu Zoo (illus.).

November 24, 1949, San Diego Union, A-4:1. Action held up on street plan; City Park Department objected to limited access highway up Switzer Canyon which it maintained would ruin the 18-hole golf course in Balboa Park.

November 24, 1949, San Diego Union, A-6:4. Cash pledged to aid San Diego Exposition.

After a meeting of the Exposition committee it was announced that \$9000 of a \$2500 preliminary expense fund had been pledged.

Incorporation papers have been filed with the secretary of state at Sacramento, naming Harold B. Starkey, Ewart W. Goodwin and Edmund T. Price as incorporators.

November 24, 1949, San Diego Union, C-3:1-4. Appliance show offers biggest exhibit ever stages on coast (map showing parking areas).

The newly renovated Electric Building provides 250 percent more space for spectators and 50 percent more space for exhibitions than the Federal Building, previous home of the electric shows.

November 25, 1949, San Diego Union, A-1:3-4. Lighting of Christmas Tree lane to open 12th annual Electric and Home Appliance Show in Electric Building, Balboa Park, tonight; 6-day show sponsored by Bureau of Radio and Electrical Appliances of San Diego County.

November 25, 1949, San Diego Union, A-3:1-2. Crowd of more than 3000 persons at Thanksgiving Day services of the San Diego County Ministerial Association in the Organ Pavilion (illus.).

November 25, 1949, San Diego Union, A-10:2-4. Parade marks San Diego State College's Homecoming Day; replicas of Balboa Park's Cabrillo Bridge and California Tower win prize for float (illus.).

November 25, 1949, San Diego Union, B-2:4. Preparations for the presentation of a colorful pageant entitled "Christmas in Olde England" are underway at the Old Globe Theater; included in the pageant will be a performance of Charles Dickens' "A Christmas Carol."

November 26, 1949, San Diego Union, A-1:1-4, A-6:1. Electric Show draws first night throng, 75 manufacturers and distributors of 200 appliances have exhibits in the free show (illus.).

November 27, 1949, San Diego Union, A-23:5-6. Electric Show anticipates big crowd.

November 27, 1949, San Diego Union, B-1:1-8, B-16:1. Thousands take up square dancing; City Recreation Department finds diversion at peak in community (illus.).

November 27, 1949, San Diego Union, D-2:4-8. Art education aims will be discussed by Thomas B. Robertson (illus.).

November 30, 1949, San Diego Union, A-9:1. Electric Show to end tonight.

Another 30,000 persons visited the show's four huge display rooms yesterday, J. Clark Chamberlain, show manager, estimated, bring the total attendance in the first 5 days to approximately 140,000 --- equal to last year's total attendance, with one more day to go in this year's event.

November 30, 1949, San Diego Union, A-10:2-4. Mickey Rooney, movie star, practices in Federal Building for roller skate speedway scenes in "Dark Challenge" (illus.).

December 4, 1949, San Diego Union, A-17:1. Buffalo calf at San Diego Zoo offers big problem (illus.).

December 5, 1949, San Diego Union, A-6:6. Many of San Diego's outstanding choral groups will sing Christmas carols at the Old Globe Theater during the run of the "Olde English Christmas" presentation which opens Wednesday.

December 8, 1949, San Diego Union, A-1:5-6, A-3:5-7. Committee sets San Diego World's Fair for 1953 (por.).

December 10, 1949, San Diego Union, A-4:3. Chamber told City to benefit by World's Fair.

December 11, 1949, San Diego Union, A-22:1. Seventy-five thousand dollar remodeling project underway to give city banquet hall; structure, to be known as Balboa Park Club, will be ready for reopening in February (illus.)

L. E. Earnest, administrative assistant of the Park and Recreation Department, said the building, with a ballroom of nearly 13,000 square feet, measuring 71 by 180 feet, will provide a banquet hall for serving more than 500 and up to 1500 persons. For dancing the capacity will be nearly 2000.

Earnest stressed that the banquet hall is intended only for the use of groups of 500 or more, because facilities are available in downtown hotels for smaller conventions.

The former barroom of the officers' club is being converted into a soda fountain and snack bar.

December 11, 1949, San Diego Union, A-32:4. A tea will open the annual pre-Christmas exhibition and sale of art objects of the Allied Craftsmen in Spanish Village today.

December 15, 1949, San Diego Union, A-11:1. San Diegans to ask state aid for Fair.

December 15, 1949, San Diego Union, A-23. A Mexican Posada will be featured on the Pan-American League Christmas program December 19 in the House of Hospitality.

December 16, 1949, San Diego Union, A-1:5. Plan for San Diego Exposition laid before Governor Warren.

December 16, 1949, San Diego Union, A-13:1. Yule events planned for playgrounds; Christmas tableaux, carols at Organ Pavilion December 23 a 7 p.m. featuring Civic Chorus.

December 18, 1949, San Diego Union, A-30:1. San Diego Zoo seeking flamingo's pink blush.

December 23, 1949, San Diego Union, A-6:2. Nativity scenes will be staged at Organ Pavilion by members of San Diego Civic Chorus and students in city playground's dramatic classes at 7 tonight.

December 25, 1949, San Diego Union, D-10:3. Balboa Park famous for beauty, attractions.

December 29, 1949, San Diego Union, A-1:7, A-2:3-6. City Council forces Rhodes to quit as City Manager; O. W. Campbell appointed to take job (illus.).

December 29, 1949, San Diego Union, B-1:2. San Diego youngsters pursued "fox" through Balboa Park yesterday (illus.).

1950

Summary of Events in 1950

(Note: Dates of events are approximate only.)

Plans for Fair in 1953 (January 18, 1950)
Puppet Theater modernization completed (March 5, 1950)
Controversy over "Freedom" plaque for War Memorial Building
(March 15, 1950)
Orchid Show in Conference Building (March 25, 1950)
Frank Drugan died (April 8, 1950)
Rose Show in Recital Hall (April 15, 1950)
Frozen Food Fair in Electric Building (April 26, 1950)
Music Week began (May 7, 1950)
Family Fair in Electric Building (May 14, 1950)
Horse Show (May 14, 1950)
"Save Balboa Park" group organized to oppose exposition
in Balboa Park (June 3, 1950)
Veterans War Memorial Building dedicated (June 22, 1950)
Reginald Poland resigned as director of Fine Arts Gallery
(June 24, 1950)
Starlight Opera opened season at Balboa Park Bowl
(June 29, 1950)
"Red Way of Life" exhibit at Museum of Man (July 13, 1950)
Model train show in House of Charm (July 23, 1950)
Midsummer symphony concert series opened in Balboa Park Bowl
(August 1, 1950)
California Centennial Celebration of California Journalism
in Electric Building (August 1, 1950)
Dog Show in Federal Building (August 6, 1950)
Park & Recreation Department "Know Your Park" program
(August 25, 1950)
"Golden Trail" in Balboa Park Bowl (August 26, 1950)
Balboa Park Protective Organization newly organized to fight
exposition in Balboa Park (September 7, 1950)
Home Appliance Show in Electric Building (November 24, 1950)
Model railroaders in House of Charm (December 3, 1950)

January 8, 1950, San Diego Union, A-25:4. City Council postpones decision on footbridge between Balboa Park Bowl and Park Boulevard until it has been decided whether the 1953 Exposition will be held in the park, Fred A. Rhodes, acting city manager, said yesterday.

January 8, 1950, San Diego Union, B-1:1-8. San Diego Zoo - gorillas' personalities grow like babies, by Bryant Evans (illus.)

January 12, 1950, San Diego Union, A-1:4. Part of Naval Hospital may go to Veterans' Administration; institution only 30 percent full, local group says, by Frank Macomber.

January 13, 1950, San Diego Union, A-17:1-2. Naval authorities rap hospital report; assertions from Washington surprise 11 District heads; figures denied.

January 13, 1950, San Diego Union, A-21:4. The California World Progress Exposition set for 1953 has completed the initial job of raising \$25,000 for preliminary expenses, Chairman Ewart W. Goodwin reported yesterday.

January 15, 1950, San Diego Union, B-1:1-4. San Diego Zoo - wild ducks shun Zoo ponds; pintail mystery (illus.).

January 18, 1950, San Diego Union, A-16:4. Chamber of Commerce interest in local expositions dates back to 1892; preliminary work for the 1953 California World Progress Exposition was started by Chamber in 1949.

January 18, 1950, San Diego Union, C-7:1-3. Area's greatest community project looms in 1953 fair, by Harold Keen (illus.).

January 18, 1950, San Diego Union, C-8:4. History of development of San Diego harbor (illus.).

January 18, 1950, San Diego Union, C-13:1-2. Successful past shows set stage for 1953 fair.

January 18, 1950, San Diego Union, C-13:5-7. Opportunities for studying provided by six museums.

January 18, 1950, San Diego Union, C-15:1. Mission Bay Park aimed at future, by Richard Mansfield (illus.).

January 19, 1950, San Diego Union, A-1:4. San Diego Junior College girl jumps to her death from Cabrillo Bridge.

January 20, 1950, San Diego Union, B-1:2. The Fine Arts Gallery, Balboa Park, was visited last year by 141,957 persons; membership highest in 25-year history; report by Dr. Reginald Poland at annual meeting last night.

January 22 1950, San Diego Union, A-1:6-7. Fred A. Rhodes, acting city manager, yesterday ordered plans for a barricade which will prevent suicide leaps from Cabrillo Bridge.

January 23, 1950, San Diego Union, B-6:2-4. San Diego Zoo - three major planned improvements: new elephant enclosure surrounded by a moat; administration building, café and classrooms for older children; education building with assembly room for moves, a natural history library and classroom space for young children..

January 27, 1950, San Diego Union, A-18:4-5. Alcazar Building proposed as new name of House of Charm; Park Commission gives up trying to chose building names which will please the City Council.

January 29, 1950, San Diego Union, B-1:1-4, B-16:2-3. San Diego nearing its 100th birthday celebration, by Bryant Evans.

February 5, 1950, San Diego Union, A-15:2-3. San Diego Boy Scouts to fete anniversaries.

February 9, 1950, San Diego Union, A-10:4-5. Starlight appoints Charles W. Newman, Jr., director as successor to Harry G. Boucher.

February 15, 1950, San Diego Union, A-7:2-3. Barring of horseback riding in park asked.

February 16, 1950, San Diego Union, A-6:1. Historical data exhibit slated.

The complete exhibit of California historical material assembled for the California Centennial last year by the Library of Congress will be exhibited at the Electric Building in Balboa Park from

August 1 to September 15, John Lawrence Fox, of San Diego, reported after a meeting of the California Centennial Commission in Los Angeles yesterday.

Fox, a member of the commission, said the exhibit would be a special supplement to the centennial exposition of California journalism to be shown in the Electric Building in the same period.

The historical data also will be shown in Los Angeles from April 12 to May 10; San Francisco, May 15 to June 14, and Sacramento, June 19 to July 15.

The historical material includes such items as the treaty of Guadalupe Hidalgo, credentials of the first California senators, Fr. Kino's map of California, and Edwin Markham's manuscript of "The Man With the Hoe."

February 19, 1950, San Diego Union, A-7:1-3. Fine Arts not inhospitable to any group, Reginald Poland says; answers criticism from members of the Southwestern Artists' Association.

February 19, 1950, San Diego Union, A-20:2-7. Balboa Park may offer site for Home Builders' exhibit.

February 19, 1950, San Diego Union, B-1:1-6. San Diego Zoo - feathered bipeds woo-pitching time (illus.).

February 24, 1950, San Diego Union, B-3:4-5. Balboa Park Bowl to get revolving stage.

February 26, 1950, San Diego Union, A-4:2. "Balboa Park Suite" by Royal A. Brown will be played this afternoon at Organ Pavilion.

March 1, 1950, San Diego Union, B-1:3-5. Conference Building - orchid show March 25 and 26.

March 2, 1950, San Diego Union, A-11:6. Palisades Building - reopening of Puppet Theater: Londonderry Opera Guild will present "Pasquinade," a one-act comedy by Felix Foundrain in the Moliere style, Sunday and Monday nights at 6:30.

March 5, 1950, San Diego Union, A-16:1. San Diego Floral Association urges a king-sized flower festival in Balboa Park in 1951.

March 5, 1950, San Diego Union, A-28:1. Palisades Building - Puppet Theater modernization completed at cost of more than \$20,000.

March 6, 1950, San Diego Union, A-7:3. Old Globe to give "Montserrat" by Lillian Hellman.

March 8, 1950, San Diego Union, A-13:1-2. Three California Centennial events outlined for City; San Diego, County Support for Summer Celebration Sought by Committee.

The celebration, tentative plans for which are to be considered by the city and county centennial commissioners, would include.

1. An historical art exhibit in the Fine Arts Gallery, from July 1 to August 15.
2. Centennial Exposition of California Journalism in Electric Building, from August 15 to September 9.
3. Re-enactment of 1850-1950 era of California history in a parade August 31 and in a pageant to be given twice daily from August 31 through September 9 in Presidio Park.

The largest of several preliminary budgets set up for the celebration calls for total expenses of \$124,501, of which \$38,500 would be paid from remaining funds of the State Centennial Commission.

George A. Scott reviewed his committee' work on celebration plans over the last 18 months and then introduced Fox, who briefly discussed California's centennial celebrations in 1948 and 1949 and observances planned for this year to mark the State's admission into the Union.

March 8, 1950, San Diego Union, B-14:1-4. New stages for Starlight Opera in Balboa Park Bowl underway (illus.).

March 10, 1950, San Diego Union, B-1:5-6. Gardening units decide to hold flower festival in Balboa Park in the Spring of 1951.

March 12, 1950, San Diego Union, A-6:1. Leo B. Calland, city parks and recreation director, said yesterday he had requested Rep. Clinton D. McKinnon to campaign for elimination of federal tax on events and pastimes staged with municipal recreation facilities.

During 1949, the government collected \$126,586 through its 20 percent admission tax on events and pastimes staged with park facilities here.

March 12, 1950, San Diego Union, A-15:1-2. Palisades Building - Floral School opens today in Recital Hall.

March 13, 1950, San Diego Union, A-8:1. Floral group ends parley with show.

March 13, 1950, San Diego Union, B-6:1. Boy Scouts' swimming pool in Balboa Park ready soon.

March 15, 1950, San Diego Union, B-1:2-3. Veterans groups ask "freedom" on plaque for Veterans Memorial Building; majority votes down Admiral Standley's objections; Council to choose wording.

Acting on a split vote, the San Diego Council of Veterans Organizations yesterday asked the City Council to restore the controversial "Four Freedoms" in a proposed dedicatory plaque for the Veterans Memorial Building in Balboa Park.

In so doing, a majority of the veterans' council voted down Admiral William H. Standley, U. S. N., ret., who has opposed the "freedoms" as having communistic connotations, but the balloting revealed that two other council members do not favorably regard the Roosevelt wartime phrase.

Standley, representing the Regular Veterans Association on the council, was supported by Frank H. Malone, Marine Corps League, and Arthur C. Baylor, United Indian War Veterans, it was reported by Council Chairman Ambrose H. Redmond.

The veterans' council is made up of representatives of 10 organizations. Other groups are Amvets, Catholic War Veterans, Disabled American Veterans, United Spanish War Veterans and Veterans of Foreign Wars.

Delivery to the Civic Center of the veterans' written request was followed by a disclosure that they met in a stormy session at their Spreckels Building headquarters at noon Monday.

"The meeting first got into politics, and finally into personalities," said a council representative who would not permit his name to be used.

In the end the majority agreed to ask that the plaque read:

"Dedicated by the citizens of San Diego as a living memorial to our honored dead of all wars.

1 - Freedom of Speech

2 - Freedom of Worship

3 - Freedom from Want

4 - Freedom from Fear”

“Freedom from Want” was the term to which Standley, former ambassador to Russia, was most opposed when he prevailed upon the City Council on February 16 to delete the “freedoms” from plans for the plaque. The veterans, except for Standley and the council, had previously approved them.

The City Council decided on a 4-3 vote that the plaque should bear “a more appropriate excerpt from the United States Constitution.” City Manager O. W. Campbell has not selected the excerpt and sources close to him have reported that he regards the situation as a “hot potato and intends to lay it back in the lap of the council.”

When the Standley complaint was delivered to the City Council, Mayor Harley E. Knox voted to delete the “freedoms” on grounds that the City-financed veterans building should be dedicated to the war dead. At the time it was dedicated to “those Americans who have fought for the Four Freedoms,” with the “freedoms” listed in order.

Redmond admitted this had influenced the veterans’ council when it submitted yesterday’s proposal, making the actual dedication to the war dead but reaffirming indorsement of the Four Freedoms.

However, this was not a reversal on the part of the veterans, Redmond said. “We wanted it dedicated to the dead all along, but a change was made somewhere between our headquarters and the City Council’s first approval of the plaque,” he declared.

Monday’s action by the veterans’ council stemmed from a resolution in which Fleet Reserve Association Branch 9 requested it, Redmond reported.

When the “Four Freedoms” were first approved by the veterans, Standley was out of the city and did not vote on the question. His appeal to the City Council followed.

The veterans’ request will be on the agenda for tomorrow’s City Council meeting, along with a similar demand by the San Diego Central Labor Council.

March 16, 1950, San Diego Union, A-1:3-4, A-2:6. Elderly man ends life in Cabrillo Bridge plunge.

March 17, 1950, San Diego Union, A-1:3-5, A-3:4. City Council bows out of dispute over deletion of “Four Freedoms.”

March 17, 1950, San Diego Union, B-14:6-7. Balboa Park Club. - Collegiate Club dances open tomorrow night when college and high school students hold the first of a series of dances planned for each Saturday night.

March 20, 1950, San Diego Union, B-1:4-5. Balboa Park Club - Collegiate Club begins dancing (illus.).

San Diego’s new Collegiate Club for high school and college students initiated its dance series Saturday night in Balboa Park Club with top entertainers on hand for two floor shows.

The dances and floor shows will be held weekly. Admittance will be by club membership cards which may be obtained from club representatives in the high schools and San Diego State College. Dance hours will be 8 p.m. to midnight.

March 21, 1950, San Diego Union, A-9:5. Lights aid tragedy “Montserrat,” now running at Old Globe, by Constance Herreshoff.

March 26, 1950, San Diego Union, A-11:1. Easter Parade, April 8, at Organ Pavilion as part of 1950 Easter Seal campaign.

March 26, 1950, San Diego Union, A-23:1-4. House of Pacific Relations - United States bungalow exhibits "Little Brown Church" (illus.).

March 26, 1950, San Diego Union, D-3:7-8. Players of Ancient Instruments to present concert tomorrow night in Old Globe Theater.

March 27, 1950, San Diego Union, A-1:2-3. Embittered man dies in leap from Cabrillo span.

March 27, 1950, San Diego Union, A-3:3-4. Conference Building - orchid show; judges from the international Cymbidium Society gave 14 rare awards..

March 27, 1950, San Diego Union, A-4:5. Strings, harp pleasing at Fine Arts Gallery, by Constance Herreshoff.

March 28, 1950, San Diego Union, A-14:2. Old instrument concert by Pardo Players of Ancient Instruments at Old Globe Theater lauded, by Constance Herreshoff.

April 2, 1950, San Diego Union, A-12:3. Morley Field - swimming pool will open tomorrow.

April 2, 1950, San Diego Union, A-16:1-4. Two new revolving stages nearly ready at Balboa Park Bowl (illus.).

April 2, 1950, San Diego Union, A-18:1. Big parade at Organ Pavilion to climax Easter Seal effort.

April 2, 1950, San Diego Union, A-18:3. Boy Scout new swimming pool opens.

April 2, 1950, San Diego Union, A-19:1-4. Donal Hord finishes new jade statue of Lady Yang Kuei-fei (illus.).

April 2, 1950, San Diego Union, A-22:2-3. San Diego Zoo - seal acts during Easter vacation.

April 2, 1950, San Diego Union, B-16:1. Junior Theater's imaginative production of "Mary Poppins" at Old Globe.

April 2, 1950, San Diego Union, C-9:3. Polo matches sponsored by Balboa Mounted Troop open this afternoon in Balboa Park Riding Arena.

April 2, 1950, San Diego Union, C-16:6. Palisades Building - Rose Show in Recital Hall., April 15 and 16.

April 2, 1950, San Diego Union, D-2:4-5. International exhibition of selected paintings by San Diego Art Guild members at Spanish Village; John Reed to talk on "The Influences of Frank Lloyd Wright" this afternoon in Fine Arts Gallery.

April 2, 1950, San Diego Union, D-2:4-5. Old-master paintings lent by Fine Arts Gallery, by Dr. Reginald Poland.

April 8, 1950, San Diego Union, A-8:8. Floral groups to hold open house in park tomorrow.

April 8, 1950, San Diego Union, B-1:2-3. Frank Drugan, "father" of 1935-36 Exposition, dies.

For years Mr. Drugan . . . had envisioned a permanent San Diego national exposition, modeled after Germany's famed Leipzig Industrial and Cultural Fair. Meanwhile he began securing token

contributions to his promotion plans for a 1950 exposition. Outgrowth of this is the proposed 1953 California World Progress Exposition.

April 9, 1950, San Diego Union, B-1:6-8. Museum of Man - progress in art of killing men charted in alcove of Museum of Man (illus.).

April 11, 1950, San Diego Union, B-2:8. Letter, Gertrude W. Kueny, objecting to Fine Arts Gallery policy concerning exhibit space.

April 12, 1950, San Diego Union, A-13:3. "Strange Bedfellows" at Old Globe opens tonight.

April 13, 1950, San Diego Union, A-11:3. "Strange Bedfellow" suffragette play at Old Globe wins laughs, by Constance Herreshoff.

April 13, 1950, San Diego Union, B-2:8. Letter, Howard Little, regarding Fine Arts Gallery exhibit policy; wants "conservatives" given the same amount of exhibiting space as is given to moderns; wants conservatives to be given right to pick their own juries; wants more space for artists and art groups of San Diego; declares the Gallery has space enough for four shows a year "by a different use of the two big rooms upstairs," which, to him, means storing the "old masters" away two months of each year..

April 15, 1950, San Diego Union, A-12:6-7. Palisades Building - Rose Show opens today in Recital Hall.

April 16, 1950, San Diego Union, D-2:4-6. Fine Arts Gallery to offer flower, print show next weekend; Ben Messick, Los Angeles artist and teacher, to discuss his own paintings this afternoon, by Thomas B. Robertson.

April 18, 1950, San Diego Union, A-14:1-3. Non-Resident poor given tickets home; only 18 percent of County's welfare clients in San Diego less than 3 years, by Edmund Rucker.

April 20, 1950, San Diego Union, A-1:6-7, A-2:1. Vast building program outlined for San Diego Fair.

April 20, 1950, San Diego Union, B-14:2-3. Boy Scout 3,000 square foot swimming pool dedication tomorrow.

April 20, 1950, San Diego Union, B-14:5-6. Leo Calland suggests Collier Park sale; use the money to develop a southwesterly section of Mission Bay Park.

April 22, 1950, San Diego Union, A-6:6. Letter, B. W. Bonham, thanking *San Diego Union* for giving space to Balboa Park Bowl Easter concert of Bonham Brothers Boys Band.

April 22, 1950, San Diego Union, A-12:5. Boy Scouts' pool dedicated in Balboa Park (illus.).

April 22, 1950, San Diego Union, A-12:6-7. Earl L. Smith hired as financial adviser by Exposition.

April 23, 1950, San Diego Union, A-13:1-2. Music Week events, May 7 to 14, at Organ Pavilion, Balboa Park Bowl.

April 23, 1950, San Diego Union, B-16:8. San Diego Zoo - Nelson big horn sheep to be shown.

April 26, 1950, San Diego Union, C-3:1. Electric Building - Frozen Food Fair opens tonight; refrigerators, home freezers to be shown.

April 26, 1950, San Diego Union, C-4:4. Available parking for Frozen Food Fair visitors.

April 27, 1950, San Diego Union, A-1:1-2, A-2:7. Frozen Food Fair attracts crowds.

April 28, 1950, San Diego Union, B-2:8. Letter from Thomas B. Oakley opposed to removal of Organ Pavilion.

In view of the conditions imposed and the acceptance of the "gift" by the City, how can the directors of the Exposition contemplate the razing of this organ pavilion? Can it be done legally?

April 29, 1950, San Diego Union, A-12:4. Fifty thousand see Frozen Food Fair show.

April 29, 1950, San Diego Union, A-12:4. Intruders, who struck Clark Evernham, curator, with a 3-foot board, failed to take anything from the San Diego Museum of Man, an examination showed yesterday.

April 30, 1950, San Diego Union, A-6:2-3. San Diego Zoo - Eleven rare "Ruppells Francolins" chickens added to Zoo collection.

April 30, 1950, San Diego Union, A-24:1. Palisades Building - Family Fair in Recital Hall and Puppet Theater, May 13-14 (illus.).

April 30, 1950, San Diego Union, B-1:1-4. Lawn courts rate highly with bowlers (illus.).

"The most beautifully landscaped courts in the world," is the way visitors from England, Canada, Scotland and Australia have described Balboa Park's lawn bowling courts at Laurel Street and Seventh Avenue.

They should know. Many of them, particularly those from Canada, come here during San Diego's winter months just to play this game, so popular in their native land. The well-laid courts are two perfectly level 120 by 120 feet surfaces of grass as closely cropped as the finest putting green. Neatly landscaped tiers of ice plant border the courts and the entire area is nestled in a panoply of evergreen trees and shrubs.

Paramount compliment to the courts is paid by the erstwhile Florida "regulars" who, since they discovered the facilities in Balboa Park, now winter in San Diego to get their daily session of lawn bowling. Such considerations as these justify the care that the Park and Recreation Department must lavish on the upkeep of these courts. A grounds keeper visits the area each day, rolling the greens and tending the lawns and flowers.

The courts were built in 1932, but long before their completion an enthusiastic group of local citizens who had been lawn bowling addicts in other parts of the world had formed an organization known as the San Diego Lawn Bowling Club. In 1935, after many a bowl had curved across the greens, a clubhouse was constructed by the W. P. A. for the Club.

The organization now has 60 members and is affiliated with the American Lawn Bowling Association. Gage Brenneman is the current president, and local members have made a name for themselves not only as genial hosts to out-of-town visitors, but as brilliant bowlers in competition with teams from the north.

Membership is open to anyone in San Diego 16 or older, although thus far the game has been attractive mostly to older citizens. One of the club's most skillful performers, in fact, is 86-year old Milton Brown, who came out here in 1929 from Nebraska.

Although club dues are \$10 a year and new members must meet the approval of the executive board, the club actually functions for the benefit of the public, as do many such organizations using City facilities.

Facilities at the courts include a clubroom, dressing and washrooms for men and women, a kitchen and storage rooms. In addition to daily match play at 1:30 p.m. and tournaments which are going on almost constantly, the club has frequent luncheons for the members.

Lawn bowling was invented in the middle ages and has had a steady popularity in many countries of the world for centuries. Akin to the form of bowling with which Americans are familiar, the game consists in delivering an eccentrically-weighted bowl as near as possible to a white ball at the other end of the grass lane. The bowl is delivered with the weighted side inside when curving out from the center of the lane. It then returns on the bias with a roundhouse arc that would make a big league pitcher's curve look like the shortest distance between two points.

One item that must be considered is the acquisition of a set of bowls. These are imported from Australia or England through agents in Los Angeles at an average cost of \$35 a set. Practice bowls are kept at the club, however, for prospective new members, and the players are always willing to lend a skilled hand at instructing the beginner.

Probably the only thing holding back further popularity of lawn bowling in San Diego is the fact that so few people know it exists, hidden as it is behind the flora of the park.

May 4, 1950, San Diego Union, B-2:8. Letter, Lavinia Adele Watkins, protesting removal of Spreckels Organ.

May 7, 1950, San Diego Union, A-12:1-4. Balboa Park available to picnickers (illus.).

Picnic time is at hand for San Diegans again --- and a half dozen Balboa Park areas give every man his patio.

With advent of warmer weather, the City Park and Recreation Department reported yesterday hundreds of families again are beginning to make use of San Diego's exceptional picnic facilities.

These areas include --- in addition to beach, bay and undeveloped park spots -- such maintained locations as Arbor Grove, Golden Hill, Grape Street, Morley Field, Pepper Grove and Pine Grove.

The latter six picnic areas, all maintained in Balboa Park by the Park and Recreation Department, offer scenic settings, privacy and convenient tables for outdoor spreads.

Unlike the policy in many cities, the Department requires no reservations for use of the facilities. It is a "first come, first served" arrangement that seems to work best for all concerned.

Pepper Grove, along the west side of Park Boulevard, has been in continuous use for almost 40 years, but Pine Grove, near Sixth Avenue and Juniper Street, is only about 2 years old, yet is had come to rival Pepper Grove in popularity.

The others, developed in 1947 and 1948, include Arbor Grove on the west side of Pershing Street, just below Redwood Street; Golden Hill, near Twenty-fifth and A Streets; Grape Street at Twenty-eighth and Grape Streets, and Morley Field, south of the park tennis courts.

Facilities vary with each area. Arbor Grove has three fireplaces, nine tables and the scenic attraction of a Jacaranda grove. Golden Hill has five fireplaces, seven tables, restrooms, spacious lawns and a beautiful view.

Grape Street has four fireplaces, 10 tables and a play lawn, while Morley Field offers 10 tables, fireplaces, restrooms and easy access to tennis courts, a swimming pool, a children's play area, shuffleboard courts and a baseball diamond.

Pine Grove, offering a view of Cabrillo Freeway, has five fireplaces and 14 tables. Drinking fountain and rubbish disposal facilities are at all areas.

(Description of Pepper Grove facilities, not included, follow.)

May 14, 1950, San Diego Union, A-16:1-4, A-17:1. Robin Hood era revived by archers. (illus.).

Ever gone shooting down in Gold Gulch?

The reference is not to some mythical mining town of the last century. Gold Gulch is located in the heart of San Diego, and field archery shooting is common there.

Gold Gulch is a winding canyon, lined with eucalyptus, live oak and sycamores, extending from southwest of the Girl Scout headquarters in the Park to the road that joins Balboa Park Bowl with the Cabrillo Freeway. The canyon can be approached either from the freeway a few blocks north of Ash Street or from the road by the refreshment stand at Park Boulevard and El Prado.

Named during the 1935 Exposition, when it was decked out like a street in the old Wild West, the Gulch has been the scene of a 28-target field archery course since 1939. The course was laid out by the San Diego Field Archers, a club which previously had functioned briefly in Mission Valley and which not only build the course, but has maintained it since, save for a period during the war when Balboa Park was closed by the military.

To the outside observer driving through this area, a dozen or so target butts --- bales of hay wired together on which cloth or paper targets are affixed --- make an appearance on hillsides or tucked back in shaded vales.

The remainder are scattered throughout a rough, but fascinating area that the local archers term "one of the most beautiful setups for field archery in the United States." And not the least of the advantages of this course, members will tell you, is its amazing proximity to all points in this spread-out city.

The price for this archery facility has been one of endless hours of work on the part of the 70-member San Diego Field Archery Club. Target butts cost around 3 to 4 dollars and no few man hours to install, and wear and tear on these is a minor problem compared with that of vandalism by a constant stream of invaders on week days when the area is otherwise virtually deserted.

The unceasing efforts of archers to maintain their course testifies to their love of this sport, one any archer prefers to target archery on a lawn at standard distances. Field archers shoot at standard distances, too, so their scores can be compared with field archers throughout the country in competitions carried on by the National Field Archery Association.

But the resemblance to target archery ends there. Not only are field archery targets harder to bulls-eye because of varying heights and slanted terrain; they offer a continually changing problem for the archery with varying distances, angles, wind and footing.

Probably the greatest asset of field archery is its exercise value. Drawing the average 45-50 pound bow (28 pounds for women) takes a sturdy back, but covering some 3 miles of mountainous terrain 2 hours before lunch and 2 after during the course of a standard 56-target tournament requires sturdiness all over.

Field archers hold one of these tournaments on the third Sunday of each month. In addition, they meet for work parties or for business meetings at frequent intervals. Occasionally other unofficial tournament shoots are held, such as archery golf, battle clouts or tin-can rounds.

The local archers form a hale, gun-bronzed group, composed of an almost equal proportion of each sex and ranging considerably in age. They are particularly anxious to take in new members and to interest more people in this sport, one in which there still are a surprising number of amazingly skilled adherents in this post-Robin Hood atomic weapon age.

Two of the local members, Roy Dill and Frank Elcholz, have been national champions. There also are many beginners in the group, however.

Membership in the club is \$6.50 a year or \$9.50 for a man and wife. This includes membership in Southern California, State and National Archery Associations as well as a subscription to the magazine *Archery*.

Tournaments cost 50 cents per person which go for awards to winners. The average outfit for a starter, bows, arrows, quiver to hold arrows and an arm guard amounts to around \$30.

May 21, 1950, San Diego Union, A-18:1-2. Balboa Park looks to dream of future (illus.).

One of Balboa Park's greatest assets, paradoxically, is not what facilities it has, but what possibilities it holds for future development. A huge centrally located expanse of land with varied topography, the park sets no limits on the dreams of those who envision San Diego as a tourist paradise.

One such dream already planned in detail is that of **Greater Morley Field**.

This 10-acre area, lying between Upas and Laurel Streets on the north and south and between Arizona and Florida Streets east and west, already contains 10 municipal tennis courts, a tennis clubhouse, an outdoor swimming pool, a bait-casting pool, four shuffleboard courts, a children's playground, a picnic area and a baseball diamond.

When money is available to complete development of Morley Field, the entire area around the casting pool and swimming pool will be landscaped. The Balboa Stables, now just north of the Stadium, will be moved here and fine new stables built. Archery ranges will dot the hilly sections.

More picnic areas will be nestled between the wilder growths east of the tennis courts and pool. And large adequate parking lots will be leveled and paved for the convenience of the public.

Morley Field will become a park within a park, and one with which many metropolitan cities would be content without the rest of vast Balboa Park.

Facilities now are nothing to complain about. The unusual advantage of having 10 tennis courts in one locale makes possible the large tennis development and tennis tournament program of the City Park and Recreation Department. The excellent outdoor pool is a popular summer sport. Other facilities are widely used.

Progress made in improving Morley Field the last two years indicates the final goal is coming closer. The recently-completed tennis clubhouse, which houses a tennis shop and has a large furnished lounge and restrooms has increased the popularity of the courts threefold.

Planting of shrubs about the clubhouse was followed by landscaping of the north side of the courts with ice plant and a large, partly-shaded lawn. Next move probably will be landscaping of the north side of the pool.

Many of the present facilities were constructed in 1932 and 1933 with bond funds and W. P. A. assistance. The area was dedicated in 1934, and was named in honor of the then park director, John Morley. Morley, who served in that capacity from 1912 to 1939, died a year after his retirement.

May 21, 1950, San Diego Union, A-22:1-2. Bertram Tanswell, comic of 1935 Fair, to play "Belvedere," by Constance Herreshoff; played Puck, Feste, Touchstone and other comedy roles in Chicago, San Diego and Dallas.

May 22, 1950, San Diego Union, B-4:8. Letter, Reginald Poland, defending Fine Arts Gallery policy regarding exhibition space.

We have read Howard Little's letter with interest and sincere appreciation.

The Fine Arts Gallery feels that it has given what Mr. Little terms the "conservative" fully as much exhibition space as it has given what he calls the "moderns." If anything, this gallery is known as favoring the conservative.

We can scarcely subscribe to Mr. Miller's suggestion for the appointment of juries for art shows. We would agree with him that the conservatives should choose their own juries, if the shows in question are predominantly of conservative arts. Increasingly, we favor having a gallery invite its exhibits. However, a gallery is able to select a jury that can and will be fair to various kinds of art, good art. We believe our gallery has proved this point.

A gallery must maintain standards of the highest art quality. Continuously, as one feature, it should exhibit art which has stood the acid test of time, what is distinguished beyond question. Of such are the representative paintings by the great Old Masters that San Diego proudly owns.

Our gallery should not take down an entire room of these paintings by Old Masters every 6 months. We doubt whether San Diegans would expect or want the gallery to imperil such art.

We beg to differ with Mr. Little that one can become surfeited with our Old Masters. Others have said the permanent collections of Old Italian paintings and of Old Spanish paintings are the finest in the West. We maintain that seeing and associating with such great art, instead of producing the sensation of being surfeited, makes for increased pleasure. That is unquestionably the effect upon us.

May 24, 1950, San Diego Union, A-10:4. "Belvedere" opens Old Globe run tonight.

May 25, 1950, San Diego Union, A-6:1-2. "Belvedere" starts run amid gaiety, by Constance Herreshoff.

May 25, 1950, San Diego Union, A-12:2-3. Civic Auditorium plan drew only seven spokesmen at hearing yesterday called by City Planning Commission.

They appeared to be about equally divided on whether the auditorium should be located in Balboa Park. Chief argument against the building there was that the central part of the park offers inadequate parking facilities. A convention hall came in for almost no discussion.

May 26, 1950, San Diego Union, B-1:3-4. Heaven-on-Earth Club to celebrate.

May 28, 1950, San Diego Union., A-8:1-2. Golden Hill playground rated high (illus.).

Balboa Park, San Diego's playground, has within its 1400-acre confines, the ultimate in recreational facilities. Thus, it is no surprise that its one playground within a playground is the best planned recreational area in San Diego.

Golden Hill playground, located a block north of A Street on Twenty-Sixth Street, adjacent to the Municipal Golf Course, is nearing the end of a 3-year improvement project that will see it converted from the City's oldest and most run-down recreation center to the most up-to-date and accommodating.

The work began 3 years ago because of a fire which destroyed the roof of the old recreation building. Rehabilitation of the building led to work on the equipment and grounds, and soon a blueprint was drawn for complete landscaping and reorganization of the site. These plans now are nearing full realization.

First change involved turning the area, which formerly held the old clay tennis courts into a children's play area with sand and apparatus. The courts were the scene of Southern California's only clay court tennis championship tournament, but upkeep expenses proved prohibitive and the area long since had given way to weeds and sand.

The children's area is one of the City's best both from the standpoint of equipment and because it is located next to the clubhouse, from which the youngsters easily can be supervised.

The cement tennis courts, which formerly were behind the clubhouse and which also were in a state of disrepair, were shortened 45 feet and made into asphalt basketball courts. This 45 feet was added to the baseball diamond, improving this facility no little.

A softball diamond has been laid out at the southwest corner of the field and lights soon will be added. Use of this diamond at night will save wear and tear on the baseball baselines, while during the day it will be possible to have two softball games at once.

As for the lost tennis facilities, two fine courts are being planned west of the new softball diamond near the street. Bleachers now used for baseball will be replaced.

Not all the improvements to Golden Hill playground are concerned with additional play facilities. The area has already been given a completely new face.

The street was widened to provide additional parking, and a strip between the street and the new fence --- formerly an eyesore --- was landscaped. The field itself has been graded and resurfaced with decomposed granite, while considerable new fencing and several new backstops have been added.

The extreme south portion of the playground is as yet unchanged, but eventually this will be converted into a picnic area, with tables, fireplaces and greenery. Adjoining this miniature park will be three horseshoe, a Roque and four shuffleboard courts.

One of Golden Hills greatest assets is locality. Where else can parents find a supervised playground with every facility to divert their youngsters while they step next door and play 18 holes of golf.

May 25, 1950, San Diego Union, B-4:8. J. Davis writes letter praising Spreckels Organ.

Editor: It would be the worst thing that could happen to San Diego if anyone is permitted to remove the organ in Balboa Park.

It was put there as a permanent attraction for the City and for the enjoyment of the people.

It was the first thing I wanted to see when I came to San Diego and I have heard many others say the same.

May 26, 1950, San Diego Union, B-1:3-4. Heaven-on-Earth Club to celebrate; organization conceived here in May 1936 to promote climate, other attractions.

May 29, 1950, San Diego Union, A-5:5. Stan Kenton band bill for Balboa Park Bowl Friday night.

May 29, 1950, San Diego Union, B-10:8. Letter, Mrs. Charles S. Bryer, regarding removal of park organ.

May 31 1950, San Diego Union, B-2:8. Letter, James Britton, regarding location of auditorium.

The City Planning Commission hearing on the problem of a civic auditorium brought out a great display of interest, contrary to the impression of your report. The council chamber was almost full, and the fact that only seven persons spoke was due to the short time available.

The location recommended for the concert theater as "in or adjacent to the southwest corner of Balboa Park, between Sixth and Ninth Streets," thus suggesting a choice of using park ground (an auditorium is legally admissible in the Park) or buying the land adjoining the Park which has been highly indorsed by visiting experts as a site for an auditorium.

June 2, 1950, San Diego Union, B-1:2. City Council hints more aid to playgrounds.

June 3, 1950, San Diego Union, A-10:6-8. Evening concerts will begin Monday at 8 p.m. in Organ Pavilion.

June 3, 1950, San Diego Union, B-1:5-6. "Save Balboa Park" group seeks vote; alleges use of park for an exposition will mean closing off a large portion of it from public use.

Organization of a Save Balboa Park Committee to oppose holding the 1953 World Progress Exposition in the park was announced yesterday.

Alleging that using the park as the exposition site will mean closing off a large portion of it from public use, the committee said it will ask the City Council to submit the park location to a public vote. The pre-election campaigning would insure a fair public discussion and presentation of the facts, the committee declared.

Officers are Lucien C. Atherton, chairman; Mrs. Fred H. Wylie, secretary, and Mrs. Harriett P. Snyder, treasurer. Other members are Mr. and Mrs. Herbert Sparks, Mr. and Mrs. Thor Nielsen, Mrs. Wilman Harper, Mr. and Mrs. Guy L. Fleming, Mrs. Lavinia H. Watkins, Maj. Chapman Grant, Fred J. Radtke, Fred H. Wylie, Thomas B. Robertson and Frank F. Wirtz.

June 4, 1950, San Diego Union, A-16:1. Veterans Memorial Building nearing completion; whether the controversial "Four Freedoms" will be used on one of the dedicatory plaques has not been announced, the City Council left the decision up to the veterans (illus.).

The new Veterans War Memorial Building in Balboa Park, estimated to cost approximately \$234,000, is scheduled for completion this week, Leo B. Calland, parks and recreation director, said yesterday.

On June 22, the building will be dedicated by the veterans' organizations which will use it as a meeting place, Calland announced.

The single-story structure, built of stucco and concrete, is an auditorium and six meeting rooms. The auditorium will seat about 500.

The meeting rooms are in wings extending from the auditorium. Each could seat 120 Calland said.

The building is located south of Roosevelt Junior High School. Landscaping of the 5.2 acre site has not been started.

Calland said the Parks Department plans a large parking lot extending from the veterans' building to the Spanish Village.

The building will be maintained and operated by a non-profit corporation representing all recognized veterans organizations.

It was built by the City with funds gained from the sale of lumber when Camp Callan was razed.

Within a few days, Calland said, Superior Court will be asked to transfer from the City to the veterans an \$18,000 trust fund which came from the wartime Buddy Beds operation. This money will be used to furnish the new building, Calland said.

The park official reported dedication plans have not been announced and he does not know whether the dedicatory plaque on the front of the building will include the controversial "Four Freedoms."

Plans once called for dedicating the building to veterans who fought for the "Four Freedoms," a term popularized by Franklin D. Roosevelt. The City Council ruled this out on a claim that the

“freedoms” had communistic connotations, but later left the decision up to the veterans who will use the building.

June 6, 1950. ELECTION: Mission Bay Bonds

4. Park Boulevard will not be torn up or fenced from Upas Street to the Naval Hospital.
5. The exposition corporation does not plan to close the park for a year prior to the fair's opening.
6. The Exposition will not close and place admission gates at Mission Bay.
7. No facility now enjoyed by the public in Balboa Park will be destroyed.

June 18, 1950, San Diego Union, A-13:1. Sam W. Hamill's drawings of new auditorium for Lincoln Junior and Senior High School.

June 18, 1950, San Diego Union, D-4:1-5. San Diego Symphony will stage six concerts in Balboa Park Bowl.

June 19, 1950, San Diego Union, A-4:1. Shuffleboard, Roque lure Old-timers.

A prominent national magazine recently extolled the merits of St. Petersburg, Fla. as America's paradise for old folk, but apparently several thousand San Diego oldsters either failed to read the article or were not impressed by it.

In any event, the number of sexagenarians and septuagenarians who happily congregate daily at Balboa Park's shuffleboard and Roque courts, play cards at the clubhouse or pitch horseshoes has not decreased by one gray head since the article appeared.

Little observed by younger San Diego, but neither particularly quiet nor at all exclusive or unfriendly, a large and animated crowd of elderly local citizens and tourists collects every day at three adult recreation centers within the park.

Two locations are just east of Sixth Avenue near intersections of Date Street and Redwood Street. A third is east of the swimming pool at Morley Field. Out-of-park centers are to be found at Highland and Landis Streets, at 4079 Fairmount and at La Jolla Cove.

These park regulars are the strongest boosters of all for San Diego's ideal year-around climate and the recreational value of Balboa Park, for they record exuberant appreciation by their actions each day. Instead of sitting out a tiresome old age in a rocking chair, local habitués of the shuffleboard court and card table are highly sociable, full of vitality and mentally stimulated by varied interests.

This contribution to the happiness of a large and oft-forgotten segment of the population has resulted in returns to local taxpayers who put in the areas in the 1920s. Tourists not only frequent the facilities during vacations here --- they plan their vacations because of them. A large number stay on to build homes and invest in business, like the former governor of Texas, who belongs to the San Diego Shuffleboard Club. The financially independent, often wealthy, far outweigh the small number of pensioners who apply for new memberships. One day no less than 27 out-of-state cars were counted on Seventh Avenue near Redwood Street opposite the San Diego Shuffleboard Club.

This area has both a shuffleboard club and a Roque club, separately governed but mutually cooperative. Dues are \$3 a year for use of 15 shuffleboard courts and access to the clubhouse, where cards are played daily; Roque dues for the eight courts and the privilege of cards are \$5 a year. Rates are scaled down for tourists or those who wish to play a day, a month or 3 months.

The Balboa Shuffleboard Club on Eighth Avenue near Date Street has 11 shuffleboard courts, six horseshoe courts, two indoor shuffleboard games, one Roque and one croquet court. All facilities, including cards played at as many as 50 tables in the large clubhouse, are available for annual dues of \$2.00, also scale down for shorter periods. The Morley Field Shuffleboard Club, east of Municipal Pool, is a small recreation center with 12 shuffleboard courts, only half of which are in use.

Although this is the slack season, compared to winter, the Balboa Shuffleboard Club currently has 460 active members, the San Diego group as 360, and the Roque Club about 100. In addition, daily visitors crowd facilities. The Balboa Club registered 3645 who paid the 10-cent-a-day fee last year.

The San Diego Shuffleboard Club holds duplicate bridge tournaments every Friday through Monday. Rubber bridge is played on Tuesdays and Thursdays, with canasta and pinochle games going on every day. At Balboa, pinochle is the most popular, although cribbage, chess, checkers, rummy bridge and canasta have adherents.

There is no screening of potential members at any club, and young people (over 17 at Balboa, over 21 at San Diego) are welcome. Gambling and drinking are strictly prohibited.

June 19, 1950, San Diego Union, A-4:2-3. Activities in Balboa Park listed for this week.

June 23, 1950, San Diego Union, A-13:5-6. Merits of requiring vote on Fair aired.

June 23, 1950, San Diego Union, B-1:1-4. Veterans groups attend rites at Veterans Memorial Building (illus.).

The new San Diego Veterans War Memorial Building in Balboa Park was dedicated yesterday at a brief, impressive ceremony in which all veterans' organizations in the city took part.

After reviewing the history of the structure, Mayor Harley E. Knox told a sizable crowd of spectators that "in this building San Diego has beaten swords into something better than plow shares."

"It was constructed," he said, "without one cent of cost to the taxpayers."

The financing was done, he explained, through sales of lumber from barracks at Camp Callan. This was by arrangement between the city and the federal government. The lumber went to build homes for veterans.

The dedication ceremony also marked the beginning of the 29th annual convention of California Disabled American Veterans, many delegates to which were on hand.

Members of the City Council sat on the speakers stand with Mayor Knox as did a number of other public officials and San Diego area military leaders.

Dr. Roy Campbell gave the dedicatory prayer and this was followed by raising of the flag. Music was furnished by the Marine Recruit Depot Band.

Allan Lane, vice president of the non-profit corporation which will operate the building, was master of ceremonies.

At the conclusion of his address, Mayor Knox turned keys to the building over to Ambrose Redmond, president of the corporation. It represents all recognized veterans' organizations in San Diego. The building will be a meeting place for veterans' groups.

June 24, 1950, San Diego Union, A-1:7-8. City starts opening way for Exposition; Council indicates it will soon permit immediate occupancy of park buildings.

June 24, 1950, San Diego Union, A-6:5-6. Letter, Mrs. Marian Walker, against closing of park for exposition.

Under the provisions of Section 55 of the City Charter of the City of San Diego, Balboa Park cannot be put to any use other than park purposes without a two-thirds majority vote of the citizens of San Diego

June 25, 1950, San Diego Union, A-20:1. Museum of Man/California Tower - San Diego symbol building has fine exhibits.

For years, camera fans and admirers of Balboa Park's Spanish Renaissance architecture have stood in front of the California Tower in awe at a building that has come to be not only the prize example of the park's architecture, but a symbol of San Diego as well.

More recently these same people have begun to wander inside this building where, much to their surprise, they find a treasure house of fascinating exhibits. Most are surprised to make such a discovery, although the San Diego Museum Association, the controlling organization for the Museum of Man in the California Building and adjoining quadrangle on El Prado has had archeological material on display since the 1915 Exposition.

The Museum of Man, devoted to physical and cultural anthropology, is not discouraged by the task of trying to match the ornate and appealing facade of this Spanish cathedral replica with something as interesting on the inside. As a matter of fact, Malcolm Farmer, museum director, is currently two steps ahead of museum directors throughout the country in modernizing his interior displays.

Farmer's story-telling exhibits are set off in brilliantly colored functionally designed displays that are a relieving contrast to the usual morgue-like atmosphere of museums. Recent displays here were the subject of a study by Dr. Albert Parr, director of the American Museum of Natural History in New York.

As to the content of the exhibits, nobody who ventures inside the Museum of Man is cowed by such terms as anthropology, archaeology or paleontology. The museum is what its name implies, a place where mankind's physical and cultural development is studied through skeletal remains, casts of heads, works of art, craft products, tools, weapons and other remnants of past civilizations. The exhibits offer a visual study of man and his history, more romantic, more personal and more impressive than reading about the subject.

The north room, beneath the Tower, has changing exhibits which are made up from material usually stored for lack of exhibit space, from loaned exhibitions, gifts, bequests, exchange exhibits and material obtained on the field trips the museum staff has time to make.

Currently there are displays of Southern California archaeology, Indian basketry, Early Egyptians jewelry, carved stone and metal work, and shoes of all ages and races. On the balconies are physical and cultural anthropology displays, a series of health and medical exhibits planned in cooperation with the San Diego County Medical Association.

The modern touch begins in the east end of the Tower Building with the entrance to a weapons room that continues through much of the east building overlooking El Prado. Here an extensive collection of bows and arrows, knives, swords and early guns --- much of which belongs to the Joseph Jessop Archery Collection --- is on display.

A large room in the south building, which also houses the attractive St. Francis Chapel, is in process of modernization. When exhibit surroundings are fully refurbished, there will be displays here of Latin American and Southern California Indian cultures, archeological material from the Mexico and the Maya region, and ceramic sculpture and weaving products of all ages. Some of this material is now in this and the west end of the rectangular structure.

Farmer, a young, forward-looking anthropology graduate from the University of Arizona, is assisted by two curators, H. Thomas Cain and Carr Tuthill. The staff, supported by City Park and Recreation Department funds, also includes maintenance personnel. Officers and a board of trustees elected each year by the San Diego Museum Association control the policies of the Museum, the work of which is supported out of association funds.

Work carried on in the Museum of Man, in addition to providing San Diegans with one of the country's finest anthropological museums, includes separate classes for both adults and juniors held

in the small auditorium and the activity room, advisory services for schools and cultural organizations, cooperative field salvage work and research in this and surrounding areas.

The organization has 120 adult and 125 junior members at present, although thousands more in this area are regular visitors to the museum. It is through additional memberships, open to everyone, with fees scaled to the member's capacity to support, that Farmer hopes to build the Museum of Man into a model for museums throughout the world.

June 25, 1950, San Diego Union, A-22:1-2. Israel Cottage, House of Pacific Relations, will show art.

June 25, 1950, San Diego Union, D-2:1-3. Many prescriptions filled at Naval Hospital pharmacy.

June 25, 1950, San Diego Union, D-2:4-5. "Provincial" features of art held important, by Reginald Poland.

June 26, 1950, San Diego Union, A-1:6-7. Balboa Park Club - Billy Rose to talk in Balboa Park Club on Exposition plans.

June 26, 1950, San Diego Union, B-2:8. Letter, H. K. Raymenton, opposing use of park for exposition.

When other cities feel the urge to have an exposition they assign a site for it in an unimproved district; they do not surrender their chief parks. If the local exposition enthusiasts feel that they must have another one, let them build their honky-tonks and coconut-shies on Kearny Mesa and leave the park for the enjoyment of the people of San Diego, its rightful owners.

June 27, 1950, San Diego Union, A-1:4-5, A-3:4-7. Billy Rose says "clean" Fair will draw 15 million.

June 27, 1950, San Diego Union, A-14:4. U. S. Navy plans to increase the capacity of Santa Margarita Hospital near Oceanside from 350 to 850 beds to make up for the transfer of Long Beach Naval Hospital to the Veterans Administration.

June 28, 1950, San Diego Union, A-1:2-3. Exposition bill due Monday; Truman may indorse Fair.

June 28, 1950, San Diego Union, A-1:7-8. U. S. jets attack Korea invaders.

June 29, 1950, San Diego Union, A-1:2. Starlight Opera's 5th season opens tonight in Balboa Park Bowl.

June 29, 1950, San Diego Union, A-8:2. James E. Reading, city traffic engineer, reported yesterday that raised safety islands may be built at a half-dozen Sixth Avenue intersections for the benefit of pedestrians going to and from Balboa Park.

June 30, 1950, San Diego Union, A-10:6-8. Evening concerts will begin Monday at 8 at Organ Pavilion and will continue every Monday throughout July and August.

June 30, 1950, San Diego Union, B-4:8. George H. Hazzard, San Diego Rowing Club, responds to "ballyhoo" by Billy Rose.

Following is an open letter to Billy Rose: Your inspired ballyhoo at the June 26 mass meeting in Balboa Park to get our 1953 Exposition under way, got me so enthused that I am herewith pledging a 100 percent cash gift to the enterprise, by virtue of which I should be permitted to call your attention to something you seem to have forgotten.

Our 1935 Fair was a great financial success. Our 1936 replica of same was, alas, a dismal flop. (Consult the statisticians.) Why was this? Because, in both the 1915 and 1935 expositions, we had a Midway. The hundreds of thousands of Joe Doakes who came from the hinterland incidentally to see the "white elephant" were not wholly disappointed.

In 1936, the fun zone, with practically nothing to titillate the curiosity, or satisfy that away-from-home feeling of the sightseer, was all but deserted, with certain erstwhile concessions boarded up. Now you are again proposing a snow white Midway. That would be just fine and dandy, Billy, provided human nature has, in the meanwhile, changed completely. This I doubt very much. Advertise there will be no sideshows even bordering on the risqué --- none whatever --- and they will stay away in droves.

Nevertheless, in the fond hope that you may be right, and that all Joe Doakes wants now is sweetness and light, I will still make good my pledge.

July 2, 1950, San Diego Union, A-4:1-2. Rehabilitation fund aid to Balboa Park . . . restored buildings reactivated; many in regular use as expenses justified (illus. of Palisades Building).

Palisades Building (former Hollywood Hall of Fame), home of Recital Hall, Arts and Craft Center and Puppet Theater, restored out of a \$143,500 fund for this structure and Conference Building; money came from Navy for wartime use and from sale of salvage; City added \$36,000 for furnishings for both buildings;

Recital Hall - 499-seat capacity using movable chairs - ideal for conventions
Puppet Theater - 254-seat capacity

July 2, 1950, San Diego Union, A-9:5-6. Morley Field - swimming lessons tomorrow in park pool.

July 2, 1950, San Diego Union, D-4:1-3. San Diego Symphony plans six concerts in Balboa Park Bowl, by Constance Herreshoff.

July 3, 1950, San Diego Union, B-1:3-5. Star Light Opera breaks record for first of four performances; attendance record of 11,060 (illus.)

July 4, 1950, San Diego Union. SAN DIEGO MARINES ORDERED TO ORIENT.

July 4, 1950, San Diego Union, B-2:8. Letter, Jean Wilson, regarding use of Balboa Park for a carnival.

Balboa Park never was intended to be a fair ground. There is one at Del Mar much better suited to the needs of the carnival promoters. Why can they not use that, and leave the park to the people who now enjoy its advantages without let or hindrance?

July 7, 1950, San Diego Union, A-10:6-7. "Taming of the Shrew" to open festival July 18.

July 9, 1950, San Diego Union, A-10:1-4. San Diego Zoo - one-humped camels --- a pair of dromedaries and a 3month old baby from Australian --- join Zoo family (illus.).

July 9, 1950, San Diego Union, A-18:1. Balboa Park Club - Parties draw teen-agers to park club (illus.).

A club for teen-agers on Saturday nights; a meeting place of civic luncheons and community banquets; a setting for wedding receptions; style shows, bridge teas --- the Balboa Park Club has become this and much more to San Diego in the 5 months since it was reopened under City Park and Recreation Department supervision.

Last of the Balboa Park buildings to be relinquished by the Navy and returned to the City, this handsome and valuable structure is still known by many as the Camp Kidd Officers' Club. It has become a focal point of teen-age activity on Saturday nights.

The Collegiate Club, a great tradition in pre-war San Diego, is functioning again, thanks to the Balboa Park Club's facilities. Every Saturday night a dance is held for high school junior college and college students. A 12-piece orchestra plays for dancing and there is a floor show. A dimly-

lighted soft-drink bar adjoins the spacious dance hall, and between dances couples chat comfortably in a luxuriously appointed lounge adored with paintings loaned from the Fine Arts Gallery.

All this is available through departmental sponsorship for a dollar membership card and a change of \$1.20 for each couple at the dances.

The Collegiate Club is self-governing. Co-managers Dwain Kantor and Dick Klein are answerable to a board of directors made up of two or three students from every high school, junior college and college in the City and County.

Teen-agers are not the only ones to find the former officers' club a bonanza for social activities. With a kitchen equipped to serve 1500, the broad dance floor can easily be converted into a banquet hall and is then a "natural" for convention luncheons and large parties. Chairs and tables can easily be set up for style shows, bridge teas and other large-scale social events. The beautiful lounge is proving increasingly popular for wedding receptions.

The city has spent \$75,000 to re-equip the club since the Navy relinquished it in March of 1940. Most recently installed was a soda fountain, leased out by Jack Roland and Glen Sheppard, and open daily from 11:30 a.m. to 8 p.m. and until midnight on Star-Light Opera or Collegiate Club nights.

The Balboa Park Club structure dates back to the 1915 Exposition, when it was the New Mexico Building. A dance floor was added for the 1935 Exposition, when the building was known as the Palace of Education. Last year, the newly-named Balboa Park Club was painted inside and out, the dance floor was refinished, venetian blinds were added, lounge re-furnished, and the kitchen completely equipped.

Balboa Park Club facilities rent through the Park and Recreation Department on the following scale: \$75 for youth groups; \$150 for fraternal or social groups; \$225, plus a small percentage of gross receipts, for commercial dances. There food is served, arrangement for rental must be made through a caterer approved by the department.

July 9, 1950, San Diego Union, B-1:1-3. Sevitzky will welcome all classes to symphony series; music for everyone, conductor declares; boxes eliminated.

July 9, 1950, San Diego Union, D-1:1-3. Pageant will show California history, by Bryant Evans.

July 9, 1950, San Diego Union, D-4:1-3. "Girl Crazy," Star Light Opera production, due Thursday, by Constance Herreshoff.

July 13, 1950, San Diego Union, B-1:1-4. Museum of Man - exhibit extolling Red way of life, by Edmund Rucker (illus.).

A San Diego Union reporter, strolling through the Museum of Man in Balboa Park on his off day, came across two startling exhibits. A glorification of the Russian political system is displayed on the west balcony.

The exhibits indicate how Communists propaganda can even penetrate scientific and educational centers, and often passively be accepted in good faith.

Visitors to the west balcony of the museum are immediately attracted by an idealized portrait of Paul Robeson, Negro singer, who has long been conspicuous as an ardent admirer of the Soviet regime and a follower of the Moscow line.

Robeson is shown in the center of a group of four Negroes. Two of them are included, perhaps, for “window dressing” purposes, as they have attained high status for their contribution to science and art. The other two are W. E. B. DuBois, writer and editor, and Langston Hughes, poet.

One, W. E. B. DuBois, and a Langston Hughes have received much attention from the California Legislative Committee on Un-American Activities.

DuBois is listed by the committee as a contributor to the *Daily Worker*, the Communist newspaper, and a sponsor of various “front” organizations for Indonesian independence, the withdrawal of American troops from China after World War II, to free Earl Browder from prison, when he was arrested and before being deposed as American Communist leader, and opposing American policy in Greece and Turkey.

The name of Langston Hughes appears 25 times in Un-American committee listings.

The record lists him as a member or sponsor of a dozen Communist front organizations including American Youth for Democracy, American Committee for the Protection of the Foreign Born, American Committee for Yugoslav Relief, American Peace Mobilization, and American Student Union, of which Celeste Strack, formerly of San Diego, was national high school secretary.

The other figures in the group are Marian Anderson, distinguished singer and one of the world’s truly great artists, and the late Dr. George Washington Carver, eminent scientist, agricultural experimenter, apostle of soil enrichment and crop diversification, who shortly before his death in 1943 donated his life savings of \$30,000 to the continuance of his work.

No suspicion of subversive disloyalty to the United States has ever attached to the names of Miss Anderson or Dr. Carver.

Moving along the panel exhibits, the reporter came to a racial map of Russia which extols the U. S. S. R. for wiping out race prejudice. Here is a conspicuous sign which reads:

“The U. S. S. R., one of the largest nations, has within its borders all the races and approximately 174 nationalities. Within 25 years the people of the U. S. S. R. learned to live in harmony and wiped out race prejudice by education and legislation.”

July 14, 1950, San Diego Union, A-10:1-3. Electric Building - California Centennial Celebration starting August 1; story of journalism in California; exhibit of California art as it portrays California history; historical documents supplied by Library of Congress; pageant of San Diego history to be held in Presidio Park..

July 14, 1950, San Diego Union, A-15:1-2. Museum of Man - Red propaganda at Museum of Man; storm of protests hits institution following disclosure by **Union** story, by Edmund Rucker.

Communist propaganda was yanked yesterday from the Museum of Man in Balboa Park. Following **The Union’s** disclosure that portraits of Paul Robeson, Negro singer and fellow traveler, and other members of Communist fronts were conspicuously displayed, together with praise for the Russian political system, a storm of protest broke over the museum.

Forthwith orders for the removal of the displays were issued by W. Allen Perry, city park director, and Leo Calland, director of parks and recreation.

Another development was a call by the American Legion for a public meeting Monday at 3:30 p.m. to wide the search for subversive propaganda, especially in the schools and libraries.

The meeting was held in the director’s room of the Chamber of Commerce. Harry Foster, national executive committeeman of the Legion and past state commander, announced that invitations to the

meeting were being sent to Dr. Will C. Crawford, city superintendent of schools; Dr. John S. Carroll, county superintendent of schools; Mrs. Clara E. Breed, city librarian, and representatives of the churches and civic clubs of San Diego.

“We are not planning an attack on anyone,” Foster said. “But we want to point out the seriousness of the situation and invite the cooperation of responsible officials. We want a thorough housecleaning in San Diego.”

At the office of the museum, H. K. Raymenton, president of the San Diego Museum Association, explained that the exhibit was set up in 1944 at a time when Russia was regarded as an ally in the war against Germany and there was no thought of hostilities with the Soviet regime. He also pointed out that the displays were received from the Cranbrook Institute of Science, and were meant purely as a lesson in anthropology.

Park Director Calland admitted that the inclusion of Robeson, Langston Hughes and W. E. B. DuBois as representatives of the Negro race was unfortunate. He suggested that they be replaced in the panel by Willie Steele, San Diego broad jumper; Jackie Robinson, baseball star; and Joe Louis, retired heavy-weight boxing champion.

“These men are outstanding members of their race and their loyalty to America is unquestioned,” Calland pointed out.

Meanwhile there was a stream of indignant and incredulous parents to the museum to see the exhibits and to demand to know who was responsible for their admission. One irate woman said she had drive 18 miles to express her outrage.

Raymenton and Calland prepared a written statement of explanation for the propaganda. It reads as follows:

“The unfortunate news story in **The San Diego Union** stating that an exhibit in the San Diego Museum of Man “Extols Red Way of Life” definitely needs clarification. First, it should be understood that the material used and featured in the story was taken (in part) from a photographically illustrated exhibit prepared by the Cranbrook Institute of Science and circulated by the Race Relations Division, American Missionary Association - Fiske University. The complete series (15 in number) was compiled and issued in 1944 and has been widely used throughout the United States in all branches of education (including the secondary schools of San Diego).

“The entire series purports to demonstrate graphically that man, as a biological animal, is a single species, and that the different races are but variations of that species. It demonstrates that, anthropologically speaking, there are no inferior or superior races. Examples of countries and individuals were chosen with no thought as to their political status. Such political implications as may have been understood in the series were entirely incidental and unintentional.

“The worst feature of the exhibit is that it is something out of date in that international relations have changed since the exhibit was compiled. In order to eliminate any further misunderstanding, the exhibit has been removed.”

The quality of the thinking of one of the Communist sympathizers --- Langston Hughes – who for 6 years has been held up to San Diego adults and children as a model, may be judged from the following selection from his poems.

“Listen Christ
You did all right in your day, I reckon -
But that day’s gone now.
They shosted you up a swell story too
Called it Bible -

But it's dead now

. . .

Goodbye Christ Jesus Lord God Jehovah
Beat it on away from here now
Make way for a new guy with no religion at all -
A real guy named
Marx, Communist Lenin, Peasant Stalin, Worker Me -
I said, Me!

. . .

That great mob that knows no fear
Come here!
And raise your hand
Against this man of iron and steel and gold.

. . .

Come here
Great mob that knows no fear,
And tear him limb from limb,
Slit his golden throat
Ear to ear,
And end his time forever
Now -
This year -
Great mob that knows no fear."

July 30, 1950, San Diego Union, D-2:5-8. Centennial Show will open Tuesday, by Ivan Messenger.

Ready for the San Diego Centennial Celebration, the Electric Building in Balboa Park will open Tuesday with three centennial shows: Centennial Exposition of California Journalism, Library of Congress California Exhibit and the Exhibit of Historic Art.

The Pageant of the Golden Pueblo will have its eight-day run beginning September 2 in Presidio Park. This is also the opening date for the fifth phase of the centennial show, the Centennial Parade, which is to follow the route of California's first camino from a point near the harbor to the site of the first mission in Alta California at Old San Diego.

Paintings and prints for the Exhibit of Historic Art have come in from museum art galleries, historical societies and private collectors in the state. Most of this material is of the California period dating between 1850 and 1880 and is owned by organizations and individuals in the northern part of the state.

A number of "old masters" of California landscape and portraiture, such as Thomas Hill, Albert Bierstadt and William Keith, have been included as a link to the present. Hill's local entry will be his Yosemite painting lent through the San Diego Public Library and the Maurice Braun family in 1944.

Selections from the contemporary group have been limited to the historic field, work by artists who have done special work of this theme. Most of these paintings and prints come from the old mining country: Charles Surendorf of Columbia; Roi Partridge of Oakland; George Mathis of Nevada City; William Wintle of Volcano, and John Ayres, John Brandon, Marion Hope, and Thomas Babbelman of the Sacramento area.

A group of 12 canvases in keeping with the centennial story of California is shown because of its authenticity of detail and social interest. These were done by Harold Von Schmidt, "painter of the west," and a past president of the Society of Illustrators, for the John Morrell & Co. calendar of 1949.

July 30, 1950, San Diego Union, D-4:1-3. "Three Musketeers" to reopen Thursday night, by Constance Herreshoff.

July 30, 1950, San Diego Union, D-4:6. Symphony sets first concert for summer Tuesday night in Balboa Park Bowl.

July 30, 1950, San Diego Union, D-6:4. "Taming of Shrew" begins final week tonight.

July 31, 1950, San Diego Union, A-3:6-8. Electric Building - California Centennial Celebration exhibits put in place (illus.).

Virtually completed, meanwhile, was the "Old Frontier Town," a realistic reproduction of an early western community that includes a hotel, jail, blacksmith shop, office of California's first paper, stores and other enterprises. It is part of the journalism exhibit.

August 1, 1950, San Diego Union, A-1:2-4, A-4:1-3. Midsummer Symphony opens tonight at Balboa Park Bowl.

August 1, 1950, San Diego Union, A-1:4-5. Governor Earl Warren arrives to open Centennial Show today.

August 1, 1950, San Diego Union, A-6:2-3. "Three Musketeers" smashing Balboa Park Bowl attendance records.

August 2, 1950, San Diego Union, A-1:1, A-3:1-8. Electric Building - Governor Warren opens six-week run of California Centennial Celebration today (illus.).

August 2, 1950, San Diego Union, B-1:1. Canopy of stars usher in season's first concert.

One minor annoyance, reminiscent of last year's concerts, marred the early part of the program. During the first two numbers, a half dozen airplanes flew over the bowl but none so near that they causes Sevitzky to stop the music.

August 2, 1950, San Diego Union, B-1:2-5. Summer symphony off to a good start, Leonard Pennario, piano soloist, played Liszt's "Concerto in E Flat Major, by Constance Herreshoff (illus.).

August 13, 1950, San Diego Union, D-14:1-5. House of Hospitality, a friendly institution (illus.).

The House of Charm may be a model railroad headquarters and the Federal Building a badminton haven, but the House of Hospitality is a Balboa Park Building that is exactly what its name implies. This beautiful Moorish-style structure, built around a lovely patio and terracing off on its south side into the famous Del Rey Moro formal garden, is San Diego's own living room, so to speak. Here local organizations, private parties, sororities, service clubs and individuals entertain their members and their guests. And here San Diego is host to the rest of the world, for at any time the visitor is welcome to relax in the serene Gold Room, wander through the patio or the gardens or dine at the Casa Del Rey Moro restaurant.

The word "visitor" incidentally includes the thousands of San Diegans who have never been inside their own House of Hospitality. A prevalent idea that this facility exists only for wealthy San Diego society women, probably occasioned by incredulity that such luxurious appointments could be made available to the public, seems to have scared away many individuals and groups whose patronage of facilities would have been helpful to the House of Hospitality Association as well as a boon to those entertaining.

Wedding receptions, for instance, may utilize the handsome Loggia, looking out over the patio, for 35 dollars, with silver plates, punch bowl and a lace tablecloth provided along with use of a kitchen. Here, with amber lights glowing in antique lanterns over the patio and with the fountain gently murmuring in the distance, is an atmosphere as romantic as something Hollywood might depict on the screen.

For smaller groups, such rooms as the Cuarto Nuevo, the Flamingo, La Verde, the Bel chez and the Davidson room are available at very minimum fees, ranging from \$15 with kitchen for the Cuarto Nuevo (accommodating 100) to \$2 for La Siesta (which holds up to 15) for music recitals, lectures, convention meetings, parties, dances, teas, lodge meetings, card parties, baby showers, motion picture showings, and receptions.

For large groups up to 500 a splendid auditorium is available along with a stage and another tastefully appointed lounge for banquets, style shows, conventions, dessert bridges, company parties and other events. Rental is \$20 for mornings, \$40 for afternoons and \$60 for evenings.

These facilities are rented by the non-profit, self-supporting House of Hospitality Association under the direction of Mrs. Willa Carter, executive secretary. The association is an outgrowth of the former Balboa Auditorium Association, formed following the last Exposition. The building itself dates back to the 1915-16 Exposition, though its stormy history since includes condemnation around 1920, burning down in 1925 (prior to a Fireman's Ball, of all things) and acquisition by the Navy in 1941.

The showpiece of the building --- or rather the foremost one --- for every room is strikingly furnished with taste that reflects the culture and sound judgment of the women who have conducted the House of Hospitality affairs --- is the famous Gold Room. Here volunteer hostesses, recruited from leading women's clubs, show the visitor the antiques, objets d'art, and sumptuous furnishing that decorate this comfortable lounge.

It is open during day and evening hours to the public, and serves as a pleasant meeting place before lunch or dinner at the Casa Del Rey Moro restaurant. Flowers, changed daily by volunteer flower chairman, never fail to charm the visitor. Hostesses could compile a volume of superlatives collected by tourists from other states and other countries.

The restaurant has a main dining room, a solarium and a terrace. The latter, overlooking the formal garden, is immensely popular during the warmer months. Luncheon clubs, service organizations and other groups are accommodated with private facilities for breakfast, lunch or dinner.

The remaining rooms on the second floor, overlooking the patio, are occupied by sororities, who lease well-furnished rooms by the year for meetings and social events.

Thus the House of Hospitality is a busy place socially, fully of well-dressed people coming and going to and from meetings, dinners and entertainments, camera fans, hovering around Donal Hord's sculptural Aztec Woman, adoring the fountain in the patio, and tourists admiring the furnishings in the Gold Room. In short, it is a hospitable place.

August 15, 1950, San Diego Union, A-8:4-5. "Roberta" will reopen in Balboa Park Bowl Thursday.

August 15, 1950, San Diego Union, A-14:1-3. Bard's love blooms on part stage, by Constance Herreshoff.

August 15, 1950, San Diego Union, A-14:4-5. Old Globe to switch to recorded music.

August 17, 1950, San Diego Union, A-11:5-6. 2,900 heard symphony concert in Balboa Park Bowl Tuesday.

August 20, 1950, San Diego Union, A-11:1-4. Conference Building proves useful.

Balboa Park's Conference Building is a good example of the post-exposition usefulness of structures erected for a World's Fair. Created to house displays from counties throughout California during the 1935-36 Expo., the State Building --- as it was then known --- was used in the years between the Fair and World War II as an armory for the National Guard. After its service during the war as part of Camp Kidd, the Conference Building underwent restoration paid for by the Navy, was outfitted by the City, and promptly became an invaluable facility for large convention meetings.

With a 93 by 180 foot main floor surrounded by three small lower floor rooms and 15 rooms of varying sizes on the balcony, the Conference Building can handle the largest of conventions, both for general assemblies and for divisional meetings of any size or number.

Like many other Park buildings, it also serves as an exhibit hall, a banquet room, a square dance center, an athletic building and a place to house such affairs as the Family Fair, the Recreation Round-Up, the Boat Show, flower shows, fraternity and hobby group meetings, and the Youth for Christ rally.

Right now plans are being readied for the first annual "Know Your Park" show, scheduled for the Conference Building, Friday, Saturday and next Sunday. Every organization and recreational facility in Balboa Park will put up exhibits depicting its activities, and, as is the usual custom in this building, admission will be free.

One particular virtue of this edifice is its large east entrance with reinforced concrete floor, which make it possible for trucks to drive in and deposit such heavy loads as were hauled in by the Boat Show a few years back.

The Conference Building also has two costume rooms, now in use by the Centennial Pageant group and the costume makers for "The Golden Train," a children's operetta soon to be shown in Balboa Park Bowl. A smaller sewing room is available for more leisurely projects. Other facilities include 1900 chairs, folding tables which also serve as speaker's platforms, a concession stand and a clothes check room.

Hobby groups and fraternities make most use of the peripheral rooms which seat from 15 to 150 for meetings. An average night may find the Tropical Fish Society and a stamp club meeting upstairs along with a couple of fraternities; the Indoor Sports Club may be having a square dance drill on the main floor, and a volleyball game may be in progress on the other side.

With all this activity, many meeting rooms are still available to groups which, unaware of the park's facilities, meet in crowded and uncomfortable quarters.

September 10, 1950, San Diego Union, A-1:7-8, B:6-8. Parades, pageant end Centennial celebration.

September 10, 1950, San Diego Union, A-19:1-4. Starlight Opera to conclude "Song of Norway," fifth season tonight (illus.).

September 10, 1950, San Diego Union, B-3:1-8. Description and history of Floral Society Building.

An unobtrusive but attractive structure located about half a block west of the Organ Pavilion, the Floral Society Building is a nerve center for activities concerned with flowers in this community. This is no mean function in a city as devoted to the study and worship of beauty as San Diego and no location could be more appropriate for such a headquarters than the heart of Balboa Park. Here, on the first Sunday of each month, from 1 to 5 p.m., the public is invited to an open house at which are exhibited cut flowers and potted plants representative of the wide variety of horticulture in this area. With lush growths each year of camellias, roses, pelargoniums, orchids, jacarandas, eucalyptus, acacias, fuchsias and begonias, the area never fails to contribute richly to the attractions of the park.

Here, too, in meetings at 8 p.m. on the third Tuesday of each month, are plotted such invaluable community services as the floral exhibits for the two World Fairs, the conservation projects, which made it possible for this county's Torrey Pines, wild flowers, and El Monte oaks to be preserved, and annual April Flower Festivals that have long delighted interested and always sympathetic San Diego residents.

The public is invited to the San Diego Floral Association meetings and to the meetings at the Floral Society Building of the many member clubs of the Association. Postcards addressed to the Floral Association in Balboa Park will be promptly answered with information on the various activities.

Member clubs of the Association are the Coronado Floral Association, A. D. Robinson Branch of American Begonia Society, Eve Kenworthy Gray Branch of the American Begonia Society, Organic Gardening Club, San Diego Branch of Southern California Nurserymen's Association, San Diego Camellia Society, San Diego County Orchid Society, San Diego County Florists' Association.

The Floral Association dates back to 1904, and has been putting out an internationally known publication, "California Garden," for 41 years. All of the association's accomplishments stem from volunteer work by members who often belong to four or five or the specialized member clubs. Present occupation of the entire group is the 44th annual Fall Flower Show, which for the last few years has been a Chrysanthemum Festival.

For the open house, Association members label all flowers and put in many hours on flower arrangement, selection of exhibits, and over-all decor. They also open up their splendid library containing a wealth of rare and interesting books on horticulture. The building's large exhibit room, side room used for cutting flowers and kitchen serve the Association's purposes admirably for open houses and also for the monthly meetings when a lecture on some phase of floral culture always precedes an hour dedicated to informal comparing of notes on gardens.

Association activities are sponsored by the City Park and Recreation Department, with the Floral Society Building provided without charge. Actually, the City is indebted beyond measure to this organization whose avowed purpose has been "To make San Diego a more beautiful city in which to live."

September 10, 1950, San Diego Union, D-4:1-3. Starlight Opera to close successful season tonight, by Constance Herreshoff.

September 12, 1950, San Diego Union, A-10:3-4. Thirty new songs written for "Caught in the Act."

September 17, 1950, San Diego Union, D-14:1-8. Balboa Park Gymnasium magnet for those who enjoy athletics; open to public year round.

A question asked many times a day of the switchboard operator at the Park and Recreation Department office is "How much does it cost to play badminton at the Balboa Park gym?"

The answer, that it costs nothing, is met with surprise and even incredulity. Municipal gymnasiums open to the public the year around and supported by recreation rather than school funds are a rarity. Balboa Park gym, located next to Balboa Park Bowl, in the Park's Palisades area, offers 34,560 square feet of hardwood floor, dedicated from January through December to the athletic exertions of San Diegans.

Badminton and table tennis are the sports always in season at the gym, for when the municipal basketball leagues crowd gym floors on most week nights from November through February, The Federal Building next door is available for these activities. Volleyball and volley tennis also have full seasons, the latter game often filling the gym with housewives during an otherwise tranquil weekday morning. Other activities include girls' clubs and play days, boys' gym classes and women's gym classes.

Some indication of the use that the gym gets from day to day may be given by the fact that close to 85,000 people utilized gym facilities last year, not to mention those who came to watch others play and to take in the tournaments and exhibitions. Nearly 1000 men and women played in organized basketball leagues throughout the winter; about 500 participated in badminton competitions. But by far the greatest number taxed gym facilities day and night indulging in informal play among sports offered there.

Balboa Park gym was built in 1935 as the Palace of Electricity and Varied Industries for the Fair. Following the closing of the Exposition it remained inactive until 1939 when it was opened as the Municipal Gymnasium. Two years later the Navy claimed in along with other park buildings, but its post-war reactivation was speeded up to provide a greatly expanded San Diego population with a

much-needed athletic recreation center. It reopened in February of 1947 with a splendid new hardwood floor and many facilities it has lacked in pre-war use.

The 120 by 288-foot gymnasium has an athletic equipment and refreshments shop, showers and dressing rooms for men and women, bright overhead lighting, storerooms, an office and a loud speaker system. The floor accommodates three full-size basketball courts or 10 badminton courts, five volleyball or volley tennis courts, and there are always five table tennis games going on around the perimeter of the other activity.

Restoration costs following Navy use of the gym have amounted to approximately \$15,000 and have lately included repainting of the entire building, inside and out.

The gym is open every day of the week from 9 a.m. to 10 p.m., a convenience that requires the services of a district supervisor and five recreation leaders plus the part-time presence of two maintenance men --- but a convenience that natives and tourists alike appreciate as much as anything in Balboa Park.

September 20, 1950, San Diego Union, B-2:8. Marie Woolf, Pacific Beach, complains about airplane noise in Balboa Park Bowl.

Editor: I seldom miss any entertainment in the Balboa Park Bowl. It is a wonderful spot and I, among thousands of others, love it, but why do airplanes fly directly over the bowl just when a singer or pianist is on low, sweet notes that are lost to use because of the deafening roar of the motors.

My second complaint is just as aggravating. The Park Commission or the city fathers should take away the steps of the building to the left of the bowl. I know they led to the "necessary room" but the noise of the people going there is just as annoying as the airplanes. If an entrance were made elsewhere and the steps eliminated, music lovers could really enjoy every minute of the wonderful entertainments given in our beautiful bowl.

September 21, 1950, San Diego Union, A-1:3-5, A-2:4-5. Mayor Knox to seek retained city control of Balboa Park in event of mobilization.

September 21, 1950, San Diego Union, A-13:2-3. David Craighead organ recital Wednesday evening.

October 8, 1950, San Diego Union, A-15:4-5. Howard C. Beresford, western representative for President's Committee on Religion and Welfare in the Armed Forces, informed Mayor Harley E. Knox that park should remain open to military personnel and civilians.

October 8, 1950, San Diego Union, D-3:6-7. "Caught in the Act" packing them in at Old Globe; lyrics put in album.

October 8, 1950, San Diego Union, D-11:1-4. House of Pacific Relations Famed for Harmonious Effect.

Balboa Park's House of Pacific Relations should be as famous as the United Nations' headquarters at Lake Success. Not because the fates of nations are being decided there, but because this "One World" in miniature is achieving in fact what the United Nations is striving for in theory: A peaceful and harmonious relationship among the peoples of different countries. Through the years since the House of Pacific Relations was constructed for the 1935-36 Exposition, and its 15 separate cottages located a block west of the Organ Pavilion were occupied by 19 different national groups, its hosts and hostesses have accomplished the so-called "miracle" of maintaining national identity while cooperating perfectly as integral members of an overall House of Pacific Relations organization.

For a glimpse into an almost utopian internationalism, the local resident or tourist need only attend the open house sessions on Sunday from 2 to 5 p.m., particularly during the summer when one national group represented takes its turn providing entertainment from 3 to 4 p.m., out in the lovely garden enclosure.

The houses, each with the name of its country printed on the side, are staffed with hosts and hostesses who usually have a supply on hand of native pastries or other delicacies which they will serve with coffee or tea brewed just as it would be in the Old Country.

Making the rounds of the various houses, one observes the furniture make in the prevalent modern style of a foreign country, the imported prints, dishware, posters, drinking mugs, paintings and small furnishings, the native costumes sent over by friends and relatives, and oftentimes the sound of a strange tongue. How different the customs of each land. Yet a few minutes later all present gather on the lawn surrounded by the rustic little fishpond and shade trees to hear a native of Norway tell about his country, see costumed dancers perform Norwegian dances and enjoy the experience of hearing the music of that country. Whether in the social phase here at the entertainments or in the business meetings dealing with house policies, these representatives of disparate cultures, united by Americanisms, function as one.

The success of this organization was anticipated when the fair closed, as those who played host to thousands of visitors unanimously elected to keep the organization going. Through cooperation of the City Park and Recreation Department, the residents have been able to set up central meeting places for their national groups. Save for a period between Pearl Harbor Day and September 1948, during which the occupants continued to meet regularly outside the park, the House of Pacific Relations has been open regularly on Sundays.

Buildings were assigned to national groups on a first-come, first-served basis with the result that Scotland, China, Norway, Denmark, Sweden, Russia, Poland, United States, Ireland, Finland, Germany, Israel, Yugoslavia and England have their own houses. Sharing the remaining house on alternate Sundays are France, Switzerland, Czechoslovakia, Portugal, Hungary and Mexico. Israel was, of course, added when the facility reopened in 1948, not having previously existed as a nation.

Each country elects two representatives to the House of Pacific Relations organization. These in turn elect five members of an executive board, who assign themselves into positions of president, vice president, secretary and property man.

The board meets the first Sunday of each month at 4 p.m. followed by the delegates at 4:30. Meetings of the entire membership follow on the second Thursday of each month. These are held at the House of Hospitality at 8 p.m. and include a show to which the public is invited free.

In addition to the Sunday open house and entertainment and the meetings, House of Pacific Relations's events include an annual fiesta on the first Saturday of November, and annual potluck dinner and occasional holiday celebration.

Participation in the County Fair, in the float parade for the San Diego Historical Society, in receptions for dignitaries of foreign nations and similar projects are also numbered among the organization's activities.

It is not surprising that 550 attended the inaugural potluck dinner this year, since the total membership of House of Pacific Relations is estimated to number around 3500. It is not surprising either that the dancing following dinner presented no problems to young or old, first generation Swiss or third generation Irish, they danced American waltzes and fox trots.

October 12, 1950, San Diego Union, A-24:2-3. Proponents of preserving the marshes on the north shore of eastern Mission Bay as a wildlife preserve appeared in force at a hearing of the city planning commission to determine whether the area should be preserved or turned into a golf course.

October 29, 1950, San Diego Union, D-16:4-8. Know Your Park: Electric Building - description and details concerning use.

The scene of San Diego's big Electric Shows, Home Shows and the recent Centennial of California Journalism is not a purely functional looking civic auditorium or the ballroom of a private hotel as it might be in San Francisco or Los Angeles. In true Balboa Park tradition, it is an ornate structure on El Prado reminding the cosmopolite of the Casa Consistorial at Palma, Majorca, Spain. The Electric Building, despite its brilliantly decorated cornices and soffit frieze, is a structure ideally suited for industrial and commercial displays on the inside. Installation of an elaborate system of electrical outlets, water connections and plumbing facilities not only facilitates the display of appliances and electrical devices, it greatly reduces expenses for those who would otherwise have to resort to structures readied at great expense for each different exhibit.

Because of these advantages, the Electric Building becomes in greater demand with the passing of each month. The Silvergate Kennel Club now uses it for all of its shows; the Poultry Convention was held there; a large educator's convention recently was held in the building; square and round dances are moving in between other events.

Whether those who planned the original structure and built it as the Canada Building in 1915 [sic] for the Exposition has visions of refrigerators and washing machines filling the floors someday, they contributed generously to the future by planning 52,000 square feet of floor space. By 1935 this vast hall served most usefully another Exposition as the Palace of Better Housing, featuring displays of building materials and model structures. Between the last Fair and the recent war Electric shows were held twice a year and the Red Cross set up headquarters in the west wing.

Before its reopening in early 1949, the Electric Building had been divided into four large rooms by fire walls to conform to post-war fire regulations. This proved an advantage to exhibitors by providing them with additional wall space. Meanwhile the 12-foot fire doors between rooms unified the interior for large shows occupying all rooms. Navy Restoration Funds of \$60,000 were spent on the building, while the City later expended \$10,000 for the outlets and necessary equipment.

Rental rates are returning this investment now. Conventions having 25 percent or more attendance from those living out of the County are given the use of the Electric Building free of charge. Those who take advantage of this service and those who rent all or part of the building at rates that would be hard to equal for reasonableness anywhere in the Country would be satisfied if the facade was that of an old barn. That the Electric Building adds to the architectural display along El Prado is an extra bonus to the customer, the City and to Balboa Park.

November 1, 1950, San Diego Union, A-8:5-6. "Circle" in Falstaff Tavern, Balboa Park, pleases audience, by Constance Herreshoff.

November 1, 1950, San Diego Union, A-9:1. San Diego artists' works will be exhibited in a last a dozen galleries and stored windows today through November 7 in conjunction with American Art Week; Fine Art Gallery show, "Art, Utility and You," opens November 12.

November 1, 1950, San Diego Union, A-9:5. Superior Judge Arthur L. Mundo ruled yesterday the suit to decide if Balboa Park lands may be fenced off for the proposed 1953 Exposition must go to trial.

November 5, 1950, San Diego Union, A-7:4-5. House of Hospitality - Fiesta of Nations will be staged for fourteenth time Saturday night.

November 5, 1950, San Diego Union, D-16:4-8. Know Your Park: Balboa Park Nursery (illus.).

November 7, 1950, San Diego Union, A-5:1-3. City to use Christ Child theme in Civic Center Christmas rites.

November 7, 1950, San Diego Union, A-14:4-5. American Legion conclave in Veterans Memorial Building, Balboa Park, Sunday.

November 12, 1950, San Diego Union, B-1:1-4, B-16:1. Museum of Man - models of Pueblo Indian dancers on display (illus.)

November 12, 1950, San Diego Union, D-4:4. "At War With the Army: to open run at Old Globe..

November 12, 1950, San Diego Union, D-14:4-5. Know Your Park: Morley Field - Tennis Club.

Institutions in Balboa Park illustrate the historian Toynbee's contention that strength is built out of adversity. Most of the park's present going concerns began as temporary structures dressed up with cardboard-like facades, the survived two world wars, a depression and 35 years of wear and tear to become permanent and vital civic institutions.

The Balboa Tennis Club is one such organization. Built at the beginning to the twenties, the six courts on the west side of Park Boulevard between El Prado and Upas Street were torn out in 1934 for the Exposition and the area they covered became a parking lot. By the time they were rebuilt in 1937 and given over to the management of a reorganized Balboa Tennis Club, the club's dressing room and quarters in an adjoining Indian Village, built for the 1915 Exposition, were beginning to fall apart.

Members from those days recall the wind whistling through the sagging rafters of the old pueblo-like structure, a ghostly shell of its gay Exposition Days, which few tennis players would dare to venture into after dark. Came the second war and the area was surrounded with army barracks, giving players the feeling they were hitting tennis balls around in the middle of a battlefield.

Eventually, even the dubious facilities of the Indian Village were condemned and torn down but resourceful members were able to obtain one of the abandoned army barracks which they converted into the present clubhouse and dressing rooms. While the old timers are understandably apprehensive about what is coming next, the club is actually successful as never before with a membership of more than 200 and the heaviest use of the courts in their history.

The Balboa Tennis club operates under an arrangement approximated in several other institutions in the Park. While the City owns the courts, they are entrusted to the management of the Club, which in turn provides maintenance and improvements for them. The non-member public may use the courts when they are not occupied for a designated fee.

The Club is non-profit and pays no salaries. It buys all new nets, repaints lines, provides and maintains shower and toilet facilities and pays upkeep bills.

The Club, while it dates back to the time the courts were built, has functioned as a formal organization only since 1937. It is directed by a board of nine governors elected for two-year terms, and by a president and vice president. It conducts a variety of tournaments throughout the year for members and for local juniors, and, for 26 years, it has conducted an annual County Championships, interrupted only during the three years that the courts were torn up.

Bill Tilden, Alice Marble, Don Budge and all the great of the tennis world have performed on its courts in exhibitions and during the war years the County tournament drew some of the foremost tennis talent in the country to the Park.

A primary function of the present organization is the promotion and development of junior play. Every year numerous free memberships are given to local juniors showing promise and a voluntary program of senior sponsorship assists young people by offering them skilled players for practice and financial aid in paying tournament entry fees.

While they have admittedly thrived on rough times, survivors of the Indian Village Days want to see the young Balboa Tennis Club members off to a better start than they had.

November 13, 1950, San Diego Union, A-8:6. "Harvey" run on schedule at Old Globe after January 1.

November 15, 1950, San Diego Union, A-22:1-3. Electric Building - Home Appliance Show expected to attract 175,000.

November 16, 1950, San Diego Union, A-26:1-4. "At War With the Army" play scores hit in Old Globe, by Constance Herreshoff.

November 17, 1950, San Diego Union, B-16:1. Exhibits put in place for gadget show in Electric Building.

November 19, 1950, San Diego Union, A-12:1. Electrical Show will open Friday.

November 19, 1950, San Diego Union, A-12:2-3. San Diego Zoo - San Diego giraffe in Australian zoo.

November 19, 1950, San Diego Union, D-12:1-2. Know Your Park: Children's Area - Miniature train and merry-go-round.

Balboa Park appeals to all ages, its multiplicity of offerings making it possible for a family of varying ages to spend the entire day in the park with each member pursuing his own interest. Even parents who confine the activities of their group to a tour of the Laurel Street Cultural Center will find that the children have the last word when they bargain with the bosses for a final whirl through the children's play area around the intersection of Park and El Prado.

The Balboa Park Railway here, the merry-go-round and the two children's rides on toy airplanes and in tiny automobiles are typical commercially-operated equipment at parks throughout the United States. Rates are city approved, and the gross sales percentage paid to the City helps maintain the park. But, as is true of other facilities in Balboa Park, they are unusual in having ample space to accommodate crowds and in their ready accessibility to all parts of the City.

The merry-go-round and the two children's rides are familiar landmarks of long standing, notable particularly for the absolute minimum fares to which they have adhered through steadily-rising price jumps in everything else.

Less familiar and thus worthy of some examination is the Balboa Park Railway installed opposite the Zoo on November 13, 1948, by the Swope Railways of Kansas City. Here on two and a half

acres of ground handsomely landscaped by the Park Division of the Parks and Recreation Department, a figure-eight track of 2200 feet was laid out complete with two semaphore signals, a tunnel, a block signal and a grade crossing bell plus 13 towns or whistle stops.

Over the track, to the delight of close to 400,000 customers, one-third of them adults, and far from all of these accompanying small children, runs a four-car train seating 45 and pulled by two gasoline-powered locomotives. The train is built, as other the signals and other paraphernalia, to one-fifth scale, with the locomotive modeled exactly after the General Motors Co. Electromotive Division's Model F-3. It was in fact built from drawings provided before General Motors actually built its own model. The tracks are necessarily of larger scale proportionately to assure safety of operation.

Model railroad fans, who sometimes take group rides on the Balboa Park Railway, are interested in the ladders, windows, doors and couplers of the locomotive, all built to scale, and its locomotive wheels, fluid drive, vacuum brakes on all wheels and elaborate instrument board containing 11 different instruments.

In answer to their erudite questions, they are informed by "engineer" Robert C. McCoy that the greatest upgrade on the train's course is on half of one percent, the greatest downgrade only percent, and that the circuit of slightly less than half a mile is made in from two and one half to three minutes with 15 miles an hour the fastest speed attained.

Local communities honored by signs are La Mesa, National City, Chula Vista, Mission Beach, Ocean Beach, La Jolla, Lakeside and El Cajon. Knoxville, Calland Corners, Perryville, Rhodes Center and Curtis Junction immortalize names of City officials. Naturally the management gets complaints from communities not represented in the already crowded countryside of the Balboa Park Railway grounds, but City officials have not yet been heard from.

The Railway is open from 12:30 to 5 p.m. weekdays during school and from 10:30 a.m. to 5:30 p.m. Saturdays, Sundays and school holidays. In summer vacation it is open from 10:30 a.m. to 5:30 p.m. daily. The merry-go-round and rides are open from 1 to 5 p.m. Saturday and from 11 a.m. to 6 p.m. Sundays and school holidays during school terms. In summer vacation they are open daily from 1 to 5:30 p.m. and from 11 a.m. to 6 p.m. on Sundays and holidays.

November 21, 1950, San Diego Union, A-8:5-6. "At War With the Army" opens second week tonight.

November 21, 1950, San Diego Union, A-18:4-5. Golf - coyotes no longer damage golf course.

November 23, 1950, San Diego Union, C-2:1-5. Home Appliance Show presents vast array of new equipment; 13th annual event opens tomorrow.

November 24, 1950, San Diego Union, A-1:6-7. Free Electrical Show to open in Balboa Park.

December 3, 1950, San Diego Union, A-7:1. Civic Center Yule spirit underway; still-life portrays Story of Nativity (illus.).

December 3, 1950, San Diego Union, A-11:1-2. Model railroaders compete in House of Charm.

December 4, 1950, San Diego Union, B-1:1. \$1,800 engine tops class in model railroad exhibition in Balboa Park.

December 17, 1950, San Diego Union, A-13:7-8. Playgrounds throughout city plan Yule events.

December 17, 1950, San Diego Union, A-19:4-5. More than 15,000 small fry --- and large fry too --- yesterday roared a "Hi-Hoppy" welcome as Hopalong Cassidy, western film star, pranced into Balboa Stadium astride his white horse, Topper.

December 17, 1950, San Diego Union, A-27:1. Park work worth an estimated \$198,100 balked by wartime ban on such construction . . . restoration of Botanical Building . . . construction of tennis courts at Golden Hill . . . street-light replacement and revision along Laurel Street and in Palisades area . . . construction of foot bridge from Park Boulevard to Palisades area.

December 19, 1950, San Diego Union, A-13:5. The San Diego City and County Centennial Commission has repaid all of the working capital which it received from the city and county.

December 20, 1950, San Diego Union, A-19:5-6. A future site is being reserved in Morley Field for Balboa Park's Riding Stable, said Leo Calland, city recreation director.

December 28, 1950, San Diego Union, A-1:8, A-3:3. Knox not to run again for mayor; health cited in decision to retire; achievements given, by James Montgomery.

December 20, 1950, San Diego Union, A-19:5-6. Morley Field - future site of park's riding stable.

1951

Summary of Events in 1951

(Note: Dates of events are approximate only.)

Gospel Crusade in Conference Building (January 12, 1951)
Old exposition Fire Station to be used by San Diego Disaster Council
(January 12, 1951)
Dog Show in Electric Building (February 5, 1951)
Camellia Show in Conference Building (February 24, 1951)
Judge ruled expositions okay for Balboa Park (March 29, 1951)
Frozen Foods Fair in Electric Building (April 26, 1951)
National Home Show in Electric Building (May 13, 1951)
Starlight Opera season opened (June 29, 1951)
Symphony concert season opened (July 31, 1951)
Dahlia Show in Recital Hall (August 5, 1951)
Begonia Flower Show in Japanese Tea Garden (August 22, 1951)
Recreation Roundup (August 25, 1951)
Dog Show in Electric Building (August 26, 1951)
American Legion Convention began in Balboa Park (September 10, 1951)
Virgil Fox organ recital (September 14, 1951)
City Council restricted funds for cultural groups (September 27, 1951)
Fall Flower Show in Floral Association Building (October 22, 1951)
United Nations Week (October 22, 1951)
Fiesta de la Cuadrilla in Balboa Park Club (November 11, 1951)
Electrical Appliance Show in Electric Building (November 23, 1951)
Rose Show in Recital Hall (November 25, 1951)

January 1, 1951, San Diego Union, B-1:2. Museum of Man - Clark E. Evernham appointed executive manager yesterday.

January 4, 1951, San Diego Union, A-16:1. The first fatal plunge from Cabrillo Bridge since guard railings were erected last June 9 occurred yesterday when a 20-year old sailor made the 135-foot leap; fence project cost \$4,320.

January 12, 1951, San Diego Union, A-1:2-3, A-18:2. Conference Building - Gospel Crusade opens tonight, sponsored by Youth for Christ.

January 12, 1951, San Diego Union, A-2:2-4. The City Council yesterday approved expansion of the civil defense staff and its removal from Civic Center to Balboa Park; the old exposition fire station will be remodeled for use by the San Diego Disaster Council at an estimated cost of \$2,400.

January 28, 1951, San Diego Union, A-3:4. The third annual California Recreation Conference will be held in Balboa Park, February 13-16.

February 3, 1951, San Diego Union, A-7:6-7. Old Globe to open acting school February 12.

February 5, 1951, San Diego Union, A-5:1. Electric Building - bloodhound won title at dog show last night.

February 11, 1951, San Diego Union, A-4:7-8. Conference Building - camellia show February 24 and 25.

February 11, 1951, San Diego Union, D-1:1-6. Donal Hord, hard-rock sculptor, by Bryant Evans (illus.).

February 12, 1951, San Diego Union. SOUTH KOREAN TROOPS DRIVE ACROSS PARALLEL.

February 18, 1951, San Diego Union, B-1:6-8. House of Hospitality - Camellia garden started in canyon behind House of Hospitality through agreement between Camellia Society and Park Department..

March 11, 1951, San Diego Union, B-1:1-6. Museum of Man - "turtle dragon" on exhibit; reproductions shown in Museum after decade of storage, by Bryant Evans (illus.).

After nearly ten years in storage, two of San Diego's most intriguing exhibits again are on display at the Museum of Man. These are "The Turtle" and "The Dragon," realistic reproductions of ancient Maya monuments.

They are declared by archaeologists to represent the highest development of a new-world culture which ranked in brilliance with the best that Europe had to offer.

The two reproductions are in the main hall of the museum, where they have been restored after having been sawed in six pieces each by the Navy during World War II. The Navy found the huge monuments in the way when it decided to use the hall as a hospital ward.

Why each was sawed into six pieces is a mystery that even the museum's sleuthing archaeologists have not unraveled.

Since the Navy returned the crated casts to the museum after the war, they have been stored while the museum staff gradually restored its collections. Clark Evernham, museum manager, said it was necessary to employ a Hollywood set builder to get the Dragon and the Turtle together again.

The museum acquired the casts at the close of the Panama-California Exposition in 1915. They had been made for the exposition by a party sent into jungles of Guatemala by the Archaeological Institute of America in the winter of 1914. The casts were made from glue molds formed from the actual prehistoric monuments on their primeval sites.

The original monuments were made of sandstone during the close of the eighth century A. D. Their dates are accurately known because the Mayans, more than any other ancient peoples, were adept at time measurement.

The monuments themselves are believed to mark the passing of an anniversary. Accordingly, the monuments are carefully dated in the Mayan number glyphs, which scientists have been able to decipher.

In dating their calendars, the Mayans used the vigesimal system. This is like the decimal system except that the number 20 plays the same part in the vigesimal system as 10 plays in the decimal system.

The Mayans would compound a figure with dots and bars with each dot standing for 1 and each bar for 5. Thus three bars and a dot would mean 16. This symbol followed by a zero would stand for 320 (16 x 20 plus 0).

Anyone examining the monuments in the museum will be able to find these bar and dot numbers engraved in the surface, but because of the intricacies of the design, he would be unable to read whole numbers without considerable further study.

The Dragon is the earlier of the two monuments. It is a grotesque mythological monster with open jaws. From the jaws protrudes a finely carved human head, arms and torso.

The monument is carved with inscriptions and carvings declared to be the most involved and intricate in the whole range of Mayan inscriptions.

The Turtle is a still more splendid example of a mythological animal and its creation represents the peak of Mayan monumental art. It was the last of the monuments to be carved in the shape of an animal.

The figure on the front of the turtle betrays a change in Mayan styles that occurred in the 10-year period between the time that the Dragon was built and the Turtle was carved. The face on the Turtle is the first of all Mayan carvings to be without a beard.

Both of the figures, as well as some highly decorated shafts at the museum, came from Quirigua, Guatemala. Scientists believe that the monuments of Quirigua were left by one of the colonies of the Ancient Maya Civilization.

The technical skill and advanced artistic sense shown in the carvings have led to the belief that the Quirigua colony thrived at the Golden Age of Mayan Art.

Although Mayan carvings are reminiscent of Egyptian carvings, archaeologists maintain that there was no connection. In mathematics and astronomy the American culture was far ahead of the Egyptian, or, for that matter, any other culture of its time in the world.

The unanswered riddle that the monuments have posed is what happened to this thriving society?

All at once the production of fine monuments ended, the fields were no longer cultivated, the tropical jungle moved in. Later the Mayans moved north to Yucatan and built up another country with beautiful temples.

March 11, 1951, San Diego Union, B-1:3. Civic organist Royal A. Brown will play his own "Balboa Park Suite" at his concert at 2:30 p.m. today in Spreckels Organ Pavilion. Other numbers will be "In San Diego" by Sexton and "Beautiful Balboa Park" by Blanche E. Odle.

March 15, 1951, San Diego Union, 6:1-4. Annual Easter Parade of Wheels will be held at Spreckels Organ Pavilion, March 24, the day before Easter; will mark close of Easter Seal campaign of Society for Crippled Children; Park and Recreation Department to conduct program.

March 18, 1951, San Diego Union, D-15:1. In Balboa Park.

March 22, 1951, San Diego Union, A-5:1-4. Easter Parade of Wheels for crippled children at Organ Pavilion (illus.).

March 25, 1951, San Diego Union, A-6:4. Easter Bunny visits Girl Scout House in Balboa Park.

March 26, 1951, San Diego Union, A-6:3-5. Bonham Brothers Boys' Band Easter Concert in Balboa Park Bowl (illus.).

March 29, 1951, San Diego Union, A-6:1-2. Right of the City of San Diego to contract with a private corporation for an exposition in Balboa Park was upheld yesterday by Superior Judge Dean Sherry.

He quoted from various definitions of the word "exposition" to show that the purpose of an exposition "is primarily to provide for the general public enjoyment, recreation and education."

He held that the hold of an exposition in Balboa Park would be applying the portion of the park involved (about 12 percent of its area) "to a proper and legitimate park use."

March 31, 1951, San Diego Union, B-2:6-7. Letter, Hiram C. Najarian, describing perils in archery.

The range, it seems, consists of seven or eight piles of hay bales set up in one of the busiest sections of the park, where hundreds of people, including children are roaming freely throughout the area.

April 1, 1951, San Diego Union, A-26:4. Exhibit in Floral Association Building today

April 11, 1951, San Diego Union. TRUMAN FIRES GENERAL MAC ARTHUR.

April 11, 1951, San Diego Union, A-11:1-2. "Lady in Dark" opens tonight at Old Globe.

April 12, 1951, San Diego Union, A-10:3. Cast does handsomely with "Lady in Dark," by Constance Herreshoff.

April 15, 1951, San Diego Union, A-2:5. San Diego Zoo - four lorises have arrived from Burma and will be exhibited today.

April 18, 1951, San Diego Union, A-1:5-8. Butler beats Crary in race for mayor.

April 22, 1951, San Diego Union, A-16:5-6. San Diego Zoo - chinchillas on display today.

April 22, 1951, San Diego Union, B-1:1-3. Museum of Man - Indian life exhibit, by Bryant Evans (illus.).

April 23, 1951, San Diego Union, A-4:1-2. Rose show in House of Charm opens Saturday.

April 25, 1951, San Diego Union, C-3:2-4. Frozen foods, refrigerator fair ready to open in Balboa Park; spring show to run until Sunday night.

April 26, 1951, San Diego Union, A-1:6. Electric Building - 7,000 attend Frozen Foods Fair.

April 26, 1951, San Diego Union, A-12:2-3. Two hundred and fifty veterans and guests met in the Veterans' War Memorial Building in Balboa Park last night to thank Mayor Harley E. Knox for the building and to bid him farewell on his leaving the office of mayor.

April 28, 1951, San Diego Union, A-12:5. Rose exhibit opening in Balboa Park.

April 29, 1951, San Diego Union, B-1:1-4. Crowds see opening of rose show (illus.).

May 4, 1951, San Diego Union, A-13:1-2. San Diego Zoo - tiger cubs, born to Zoo's only pair of tigers on January 23, will be introduced to visitors this weekend (illus.).

May 7, 1951, San Diego Union, A-4:1-2. Naval Training Center band wins enthusiasm at Balboa Park Bowl; audience enjoys first of seven free Sunday afternoon concerts at park, by Constance Herreshoff.

May 14, 1951, San Diego Union, B-1:3. Electric Building - third-annual National Home Show opened yesterday for an eight-day run.

May 17, 1951, San Diego Union, B-5:1. The chance of winning "The House that San Diego Built" is drawing hundreds of spectators to second and third visits to the National Home Show underway in the Electric Building, Balboa Park.

May 20, 1951, San Diego Union, D-17:1-2. Balboa Park's 1400 acres are for everybody.

May 27, 1951, San Diego Union, A-6:4. Old Globe gives "Grandmother Slyboots" by talented cast, by Constance Herreshoff.

May 31, 1951, San Diego Union, A-20:1-2. "The Bat" hailed in wild opening at Old Globe; blood-curdling screams of Miss Barr aid thunder-lightning sound effects, by Constance Herreshoff.

June 1, 1951, San Diego Union, A-13:1-2. City seeks formula for contributions to cultural life; San Diego assisted institutions requesting \$94,000 in budget; increase of \$14,000; Orin K. Cope, city budget officer, wants more information from museums; Councilman Frank Swan suggested some matching policy could be adopted.

June 3, 1951, San Diego Union, B-1:1-5. Many activities available to children of San Diego over long summer days; camp sport, zoo study open to all.

June 3, 1951, San Diego Union, B-5:3. Morley Field - tennis tourney opens June 14 in tennis courts.

June 8, 1951, San Diego Union, A-10:1. San Diego Zoo - snake and cat enclosures at Zoo designed to withstand earthquakes so there's no point in planning to destroy the animals in the event of a bombing attack on the city, according to Mrs. Belle Benchley, zoo director..

June 10, 1951, San Diego Union, C-12:6-7. House of Hospitality - women who worked on Gold Room will be honored at House of Hospitality (illus.).

June 11, 1951, San Diego Union, B-14:4-5. Naval Training Center Band Concert at Organ Pavilion yesterday afternoon.

June 12, 1951, San Diego Union, A-1:1-3, A-2:1-2. San Diego Zoo - elephant put to death as peril to public, by Bryant Evans (illus.)

June 14, 1951, San Diego Union, A-3:7-8. Kearny Junior-Senior High School held commencement exercises last night in Balboa Park Bowl for 160 graduating seniors (illus.).

June 14, 1951, San Diego Union, A-13:3. The Navy will reestablish its hospital at Corona, the 11th Naval District announced yesterday..

June 18, 1951, San Diego Union, A-7:1-2. House of Pacific Relations - Swedish festival yesterday.

June 21, 1951, San Diego Union, A-1:6, A-3:2. Defense Secretary Marshall asked Congress today for a 1,000-bed addition to the San Diego Naval Hospital and a new Fleet Air Defense Training Center on Point Loma.

June 22, 1951, San Diego Union, A-8:1. Dr. Fabien Sevitzy yesterday outlined program of San Diego Symphony concerts in Balboa Park Bowl this summer.

June 24, 1951, San Diego Union, A-7:1. A six-year concessions agreement between the City and Nate Barnett and his partners for Balboa Stadium operations was filed with the City Clerk yesterday; City will received 20 percent of gross sales except those of programs for which the City's share will be 5 percent.

June 24, 1951, San Diego Union, A-18:1. San Diego Zoo - E. J. Hallstrom, an Australian, wants to give away \$40,000 worth of birds (illus.).

June 27, 1951, San Diego Union, A-8:1-2. Proposed construction of a 1,000-bed permanent addition to the San Diego Naval Hospital at a cost of \$9,650,000 would clear the way for additional veterans' beds, the Navy and Veterans Administration officials admitted yesterday.

June 29, 1951, San Diego Union, A-1:4-5, A-2:3-4. Three thousand four hundred jam park for Star-Light Opera opening (illus.).

July 2, 1951, San Diego Union, A-12:3. House of Hospitality - Gold Room served by hostesses.

July 6, 1951, San Diego Union, A-1:3, A-7:1. Alice Klauber, noted authority on art, passes.

July 8, 1951, San Diego Union, A-16:1-2. Alice Klauber's friends recall her contributions.

July 9, 1951, San Diego Union, A-8:1-2. Art Center planned at Spanish Village.

July 11, 1951, San Diego Union, A-9:4-5. Shakespearean festival to open here July 18.

July 13, 1951, San Diego Union, B-1:4-6. Council appropriates \$5,000 each for "summer," "winter" symphony orchestras.

July 13, 1951, San Diego Union, B-1:1. "Blossom Time" makes debut in Balboa Park Bowl, by Constance Herreshoff.

July 15, 1951, San Diego Union, D-1:1-8, D-2:2-3. Shakespearean festival, by Helen Zugelder (illus.).

July 15, 1951, San Diego Union, D-4:1-3. Summer Symphony, by Constance Herreshoff.

July 15, 1951, San Diego Union, D-9:7-8. In Balboa Park..

July 17, 1951, San Diego Union, A-5:3-4. Free children's art classes in Spanish Village (illus.).

July 18, 1951, San Diego Union, A-9:4-5. Shakespearean festival opens in Old Globe tonight.

July 19, 1951, San Diego Union, A-14:1-2. "Blossom Time" resumes in Balboa Park Bowl tonight.

July 19, 1951, San Diego Union, B-14:1-3. Shakespeare fete opens to plaudits, by Constance Herreshoff (illus.).

July 20, 1951, San Diego Union, A-1:1-2, A-4:1. Three-day waterfront festival opens today.

July 22, 1951, San Diego Union, A-1:7-8. Star-Light Opera gives servicemen free seats.

September 27, 1951, San Diego Union, B-1:1-2. City restricts funds for cultural groups; maintenance of museum, art exhibits limit set on municipal assistance.

Use of city funds in cultural societies' activities will be limited hereafter to maintenance of museum and art exhibits that are available for the general public's enjoyment.

"Applied" research and the preparation of exhibits will receive city support but "pure" scientific research will not, under a six-point policy adopted by the City Council.

O. W. Campbell, city manager, and O. K. Cope, budget officer, recommended the policy. Cope, who explained it to the council, said part of the policy has been in effect.

Institutions affected are the Fine Arts Gallery, Natural History Museum the Museum of Man and Serra Museum. The city will contribute \$82,332 to the four in fiscal 1951-52. The six points:

1. The city as building owner will assume basic building maintenance as part of its contribution. Interior decoration and alterations will be the managing societies' responsibilities.
2. Under the use of city funds for general-public exhibits only, city expenditures for acquisition of objects, field trips and educational programs will be banned.
3. To permit uniform salary and employment practices within each institution, present civil service jobs should be abolished and all future personnel should become employees of the societies.
4. An official city representative should be appointed to each society's executive committee or board of directors.
5. Sponsoring societies should present complete budgets, compiled in such a manner that the requirements of city-supported activities can be ascertained readily.
6. A formal agreement should be made with each organization to implement the above policy.

September 30, 1951, San Diego Union, A-18:5. San Diego Zoo - Australian reptiles sent to Zoo..

September 30, 1951, San Diego Union, A-20:1-5. Kellogg's Arabian Horse Troop plan fantasy at Organ Pavilion Saturday night (illus.).

July 31, 1952, San Diego Union, A-1:6-8, A-3:5. The survival of America is involved in the coming presidential election and it can be achieved through election of Gen. Dwight D. Eisenhower as president, Sen. Richard M. Nixon told more than 3500 cheering San Diegans at Balboa Park Club last night.

July 31, 1952, San Diego Union, A-3:6-8. Balboa Park Club thronged with Nixon greeters.

A fervent crowd of over 3500 San Diegans attended the reception for Vice Presidential Nominee, Senator Nixon, last night in the Balboa Park Club.

Half a dozen well-wishers were standing outside the closed doors of the club just before 6 p.m., almost two hours before the arrival of the senator's procession from Lindbergh Field.

As the clubhouse ballroom filled, the soda fountain and outer reception rooms filled too, and the crowd overflowed to the rise of ground across the street, where hundreds made themselves comfortable to await the reception.

To the astonishment of observers, the entire throng found space inside the main hall in time to hear the senator's brief remarks, and few backed out even though the press of people made the hall stifling.

While political and social groups were well represented, it was obvious from a glance at the crowd that a large proportion of them had gathered as individuals on their own initiative, to look over the man they hope will be part of the next national administration.

And a survey of the crowd by a **Union** reporter verified this impression. A sampling of expressions from members of Senator Nixon's audience follows: (not included with this copy)

July 31, 1952, San Diego Union, A-26:1-2. Museum of Man - Museum plans county-wide tour; films to illustrate institution's vast collection in programs open to public, said Clark C. Evernham, managing director, yesterday..

December 14, 1952, San Diego Union, A-23:1. Conference Building - Yule ballet for children set for December 23 at 8 p.m.

December 16, 1952, San Diego Union, A-2:3-4. Countywide traffic toll meeting called for January 15 in Conference Building to work toward reducing highway and street deaths and injuries in 1953.

December 16, 1952, San Diego Union, A-9:1-2. Yule festival opens tonight with "The Rose and the Ring" at the Old Globe.

December 23, 1952, San Diego Union, A-3:1-2. San Diego Zoo - Christmas party for gorillas (illus.).

December 31, 1952, San Diego Union, A-3:7-8. San Diego Zoo - Suma, orangutan, new addition to Zoo.

1953

Summary of Events in 1953

(Note: Dates of events are only approximate.)

Proposal to locate Padres baseball team in Florida Canyon (January 22, 1953)
Dog Show in Electric Building (February 1, 1953)
Chinchilla Show in Conference Building (February 8, 1953)
Assistant City Attorney said professional baseball games in Balboa Park
are legal (February 19, 1953)
Camellia Show in Recital Hall (February 21, 1953)
Rose Show in Recital Hall (April 11, 1953)
Youth Activity and Day Camp in Balboa Park for Jewish Community Center
opposed (April 15, 1953)
Voters approved combining Parks and Recreation Commissions
and allowing City to open roads through public park, recreation
and cemetery land without seeking a vote of the people
(April 21, 1953)
Home Show and Food Jubilee opened in Electric Building (May 16, 1953)
Spring Flower and Garden Show in Recital Hall (May 23, 1953)
City Attorney said an auditorium (at 6th and Date) is a legal and proper use
of Balboa Park land (June 2, 1953)
Flag Day at Organ Pavilion (June 14, 1953)
Starlight Opera opened season (July 2, 1953)
“Mr. Roberts” opened at Old Globe (July 8, 1953)
Mineral and Gem Show in Electric Building (July 17, 1953)
San Diego Symphony opened concert series (July 21, 1953)
City Council accepted bids to construct Park Department maintenance facilities
in Balboa Park (July 29, 1953)
Dahlia Show in Recital Hall (August 1, 1953)
Dog Show in Electric Building (August 23, 1953)
Craft and Hobby Show in Recital Hall (August 28, 1953)
Recreation Roundup (August 28, 1953)
700 pianists in Balboa Park Bowl (September 27, 1953)
National Guard Jubilee Conference in Conference Building (October 19, 1953)
Parakeet Show in Recital Hall (November 8, 1953)
Square Dance Festival in Conference Building (November 14, 1953)
Rose Show in Conference Building (November 20, 1953)
California Tower illuminated (November 29, 1953)
Electric and Home Appliance Show in Electric Building (November 27, 1953)
Christmas program at Organ Pavilion (December 11, 1953)

January 3, 1953, San Diego Union, A-3:2. Glenn Rick, planning director, says Mission Bay's recreation area of 9,500 acres of water and land should bring revenue of nearly a million dollars a year 10 years after development is completed.

January 4, 1953, San Diego Union, C-2:1-8. Charles W. Hatcher says Naval Hospital Corps School produces capable graduates.

January 11, 1953, San Diego Union, A-19:1. House of Hospitality - International Student Association Meeting yesterday (illus.).

January 12, 1953, San Diego Union, A-8:5-7. Museum of Man - article by George F. Carter, Museum of Man, in **Southwestern Journal of Anthropology**, tells of humans here 100,000 years ago; curator of Museum of Man from 1934 to 1938.

January 13, 1953, San Diego Union, A-4:5-6. H. G. Dillin, president of San Diego California Club, said yesterday San Diego realized \$92,500,000 from expenditures by tourists and vacationists.

January 22, 1953, San Diego Union, A-19:2-5. Possible location for Padres baseball team in canyon east of Park Boulevard and south of Morley Field; Leo Calland's report to City Manager O. W. Campbell mentioned no specific Balboa Park site.

January 23, 1953, San Diego Union, A-7:2-3. San Diego Zoo - City Council considers charging Zoo for water; three meters installed last year indicate water bill would be \$2,000 to \$2,500 a month in the winter; annual amount may be as much as \$35,000; Zoo and Balboa Park water systems are interconnected; the city's \$1.95 tax rate includes two cents for the Zoo, which thus far has received free water.

January 23, 1953, San Diego Union, A-7:4-5. City Councilmen agreed yesterday that the question of a Balboa Park site for a Padre baseball ball will go before the Planning Commission; Leo Calland said a 15,000 capacity stadium and parking space for 2,000 automobiles are planned by the San Diego baseball club.

January 24, 1953, San Diego Union, B-2:6. Letter, Mrs. Ivy McConkey, 3540 Florida Street, protesting park baseball site.

January 25, 1953, San Diego Union, A-9:1-2. Electric Building - Dog Show to attract 700 entries next Sunday.

January 25, 1953, San Diego Union, A-15:4. San Diego Zoo - Sally, young rhinoceros, shipped to Zoo from Kenya (photo).

January 25, 1953, San Diego Union, A-22:4-5. Planning group to hear opinions about proposed auditorium-convention hall and civic theater site Wednesday afternoon; department listed 14 basic site possibilities, including 8 in Balboa Park.

January 28, 1953, San Diego Union, A-16:1-2. Balboa Park Club - Annual Girl Scout lunch set Friday.

January 29, 1953, San Diego Union, B-1:7-8. Speakers propose sites for auditorium theater; additional hearings scheduled; Mrs. Marguerite E. Schwarzman of Arts Alliance favors location at Sixth Avenue and Date Street; Jams A. Robbins, county supervisor, supports Ford Building; J. Colin Hodge proposes Morley Field-Switzer Canyon; Lucien Atherton suggests Kearny Mesa-Linda Vista; Harbor Commission opposes use of tidelands site.

January 29, 1953, San Diego Union, B-1:2. Planners hear Padre's park site bid; J. Colin Hodge against professional baseball park in Balboa Park.

January 30, 1953, San Diego Union, A-11:1-3. The City Council voted yesterday to ask for a "full, written legal opinion" as to whether Balboa Park can have a commercial operation, such as the home of San Diego's Pacific Coast League entry; Councilman Chester E. Schneider said he had been informed of a petition being circulated against the Balboa Park site.

January 31, 1953, San Diego Union, B-2:6. Letter, G. B. Clark, approve a coliseum for an undeveloped area in Balboa Park but stating too many changes would ruin park's beauty.

February 1, 1953, San Diego Union, A-16:2. San Diego Fine Arts Society has launched a membership drive to finish paying for Donal Hord's famed jade statue "Thunder"; Hord sold statue to Gallery for \$18,000; \$12,000 in contributions raised (illus.).

February 2, 1953, San Diego Union, B-2:7. Letter, Mrs. Iva G. Stephens, opposes giving away Balboa Park for a baseball field.

February 6, 1953, San Diego Union, A-11:2-3. Museum of Man - tools of Indian tribes in Panama obtained for Museum by Mr. and Mrs. William L. Phillips.

February 7, 1953, San Diego Union, B-12:7. Letter, Cadillac Jones, favors park site for baseball use; "the revenue-producing features, such as the Zoo and the Globe Theater, are the main attractions."

February 7, 1953, San Diego Union, B-12:7-8. Letter, Carroll Weldin, says ballpark should be in southeastern area of city.

February 9, 1953, San Diego Union, A-8:5-6. Conference Building - female chinchilla, owned by Thomas E. Towne of La Crescenta, competing against 356 other entries, name grand champion of second Annual Chinchilla Show yesterday.

February 10, 1953, San Diego Union, B-4:6-7. Letter, Delia A. Severin, states "Balboa Park is no place for a big ball park nor for a theater nor a municipal auditorium."

February 11, 1953, San Diego Union, A-13:7-8. Park proposals stir squabbles here since 1868; baseball plant controversy only latest of many over city acreage, by Joe Brooks.

San Diego is expected to resume one of its favorite indoor sports --- squabbling about the development of Balboa Park --- come February 25 when the City Council has scheduled a public hearing on a proposal to locate the Padres' baseball plant in the park.

The whole history of the park is one of civic controversy dating back almost of May 25, 1868, when the City Council authorized acquisition of 1400 acres of hard pan and chaparral as site of a park.

History shows San Diegans have been proud of their park and jealous of its uses since then. Almost every proposal to locate something in the park has met with opposition --- even the things that today are regarded as the park's prime assets. Sometimes public opinion has prevented use of the park property for whatever plan was being considered at the moment; other plans have been adopted despite the opposition.

When the park was first acquired, the expanse of chaparral and cactus-choked canyons and knolls seemed large enough for every conceivable use. There was little opposition to the first cut made from the park --- the location of the old Russ High School in a corner of it in 1881. Nor was there grumbling six years later when 20 acres was given for what now is the Children's Home.

But San Diego grew in population and encircled the park area. And after active development of the park started, it became obvious that level mesa sites soon would be at a premium.

One of the first disputes centered around the U. S. Naval Hospital. But despite the protests of some residents, the City Council donated a site near the center of the park to the Navy in 1921, and the hospital was built. This bite out of the park, plus the high school and Children's Home sites, reduced the 1400-acre park area to 1300 acres.

Another early controversy arose when the city sought to extend Sixth Avenue, which then ended at the south edge of the park, northward to University Avenue. Property owners blocked the move by court action. Shelly Higgins, deputy city attorney recalled yesterday. But the city later condemned a strip along the edge of the park and matched it with an adjoining strip of park land to get the necessary width for the street.

When the old Normal School became San Diego State Teachers' College in 1921, the state agreed to expand the institution if the city would provide a suitable site. The first location recommended was 130 acres at the northeast corner of Balboa Park.

It was a central location, readily accessible from all points of San Diego, proponents argued. And development of a beautiful college campus would enhance the beauty of the park, they said.

Others declared the location was convenient only to areas east of the park and said the campus would soon be surrounded by congested business districts. They argued that placing a college there would shrink the remaining level mesa acreage of the park by one-half. A city-wide vote on the question in 1927 was adverse.

Other arguments raged around the location of a merry-go-round in the park --- it's still there and in use --- and a radio station's request for park land in 1941. The latter was rejected.

There was also opposition to locating a zoo in the park and to plans for holding three international expositions there. The zoo developed into one of the largest and finest in the world and one of the park's major assets. Two expositions were held, in 1915-16 and in 1935-36, but the third, scheduled to start this year, was canceled because of the Korean war.

Most of the buildings in the park were built for the Panama-California International Exposition of 1915-16, which is largely credited with developing the beautiful park and putting San Diego in the national spotlight. Many other buildings, particularly in the Palisades area, were constructed for the second exposition.

Shortly after the war, a plan to develop the Palisades area into a convention center was proposed but fell through. Then one of the bitterest fights involving Balboa Park land arose over the question of where to locate new public buildings needed by the city. A Cedar Street Mall plan was countered with proposals to place the buildings at various spots in the park. A Balboa Park Protective Association was organized to oppose the park locations. Eventually, all sites were rejected. Years earlier a Save Balboa park committee had functioned to resist encroachments on park property.

One of the principal objections voiced by most critics of new park projects was summarized by the Board of Park Commissioners in 1926 when it went on record as saying all remaining land in the park was needed for park development.

"It is the history of most city parks that project after project has been evolved to sell lands or invade the territory for all sorts of alien purposes."

To other earlier arguments that various projects would ruin the natural beauty of the park or lower property values in the neighborhood has been added the newer cry of traffic congestion.

Within the last few years, a master plan has been formulated for development of Balboa Park to conserve the level mesa land available for development. But Harry Haelsig, assistant city planning director, said there are no plans involving the Florida Street canyon area now proposed for the ball park.

February 11, 1953, San Diego Union, B-4:7. Letter, William H. Dixon, favors park site for baseball field.

February 12, 1953, San Diego Union, B-1:3. Don Hyder asks City Council to support baseball plan; Planning Commission will hold hearing February 25 on proposal.

February 13, 1953, San Diego Union, B-1:1. Bill Starr, Padres president, asked for two-month delay in Planning Commission hearing on ballpark in Florida Street Canyon.

February 13, 1953, San Diego Union, B-2:7. Letter, Henry Gabbe, would bar Padres from Balboa Park.

February 14, 1953, San Diego Union, B-2:6-7. Letter, Hugh Strong, opposes baseball plant in park.

February 17, 1953, San Diego Union, B-2:7.6. Letter, Norman Lasbury, says "Progress" dictates baseball in park.

February 18, 1953, San Diego Union, B-2:7. Letter, R. B. Boone, scores objectors to baseball park, civic stadium and municipal auditorium in park.

February 19, 1953, San Diego Union, A-15:6-7. Shelly J. Higgins, assistant city attorney, advised Council yesterday that professional ball games in Balboa Park are legal.

A professional baseball field within Balboa Park would be legal, Shelley J. Higgins, assistant city attorney, said yesterday in an opinion delivered to the City Council.

Legality of a possible lease to the San Diego Padres, Pacific Coast League club, has been requested by the councilmen.

The City Planning Commission was to hold a hearing Wednesday on placing the ballpark in the master plan for city park development. But the club asked for a continuance of at least two months. No new date has been set.

Higgins called attention to a Superior Court ruling that an exposition could be held in the big park. Expositions were staged there in 1915 and 1935-36.

Examples of existing activities which cost admission, Higgins related, are the zoo, Shakespearean plays, Balboa Stadium events, Star-Light Opera, a miniature railway, a merry-go-round and concessions.

February 20, 1953, San Diego Union, A-21:6. Park Commission, because of heavy traffic, has recommended moving merry-go-round from Park Boulevard to a location near the miniature railway.

February 22, 1953, San Diego Union, A-8:5-6. Palisades Building, Recital Hall - Sixth Annual Camellia Show in Recital Hall yesterday; Dr. Reuben W. Tellam, of Ramona, captured top honors,.

February 25, 1953, San Diego Union, A-8:1-2. "Light Up the Sky" lights up Old Globe, by Constance Herreshoff

February 25, 1953, B-2:8. Mrs. Eve H. Prince writes put baseball park at Mission Bay.

February 26, 1953, San Diego Union, A-28:4-5. Old Globe Theater opening grows in glamour, by Edith Cushings, Society Editor.

March 4, 1953, San Diego Union, A-11:6-7. E. M. Engelhorn told City Councilmen in a letter yesterday that bronze statue of a rider and horse, now in Balboa Park, would be more appropriate in one of the two islands at south entrance of Cabrillo Freeway.

March 8, 1953, San Diego Union, B-11:3. Ernest L. Mackay of La Jolla said yesterday "El Cid," Balboa Park statue, should stay where it is.

March 20, 1953, San Diego Union, A-13:4-5. Park Commission members received a proposed code amendment yesterday which would prohibit the allocation of park land to any particular "religion, sect or denomination of a religion, color or race."

Certain Balboa Park areas still could be allocated to “non-commercial local societies, groups and organizations which are engaged in civic, social, educational, recreational or philanthropic work.

One councilman pointed out that the Jewish Community Center could not establish a day camp and recreation center in the park as planned.

Leo Calland, park and recreation director, warned against any blanket ban that would interfere with development of the Mission Bay area.

March 26, 1953, San Diego Union, A-15:7-8. Starlight Opera to open July 2 in Balboa Park Bowl with “Call Me Madam.”

March 30, 1953, San Diego Union, A-9:5. Balboa Park Club -Final judging of Miss San Diego pageant yesterday.

April 2, 1953, San Diego Union, B:3-4. Palisades Building - Rose Show in Recital Hall April 11 and 12.

April 6, 1953, San Diego Union, A-3:7-8. Easter message By Ray Hayden Sears during Council of Churches program at Organ Pavilion yesterday (illus.).

April 6, 1953, San Diego Union, B-1:2-3. Twenty -third Bonham Brothers Boys’ Band Easter Concert in Balboa Park Bowl yesterday afternoon, by Constance Herreshoff.

April 7, 1953, San Diego Union, A-17:5-7. San Diego Zoo - sheep with four horns at Zoo; presented by San Antonio Zoo (illus.).

April 12, 1953, San Diego Union, A-12:1-2. Thousands of roses color Spring show.

April 12, 1953, San Diego Union, A-22:1. Five-hundred interview survey, conducted by Chamber of Commerce, finds San Diego residents’ favorite scenic attraction for visitors is Balboa Park

April 12, 1953, San Diego Union, A-32:1-3. Comedian Charlie Cannon “Mr. Starlight Opera” himself, by Maureen Connolly.

April 15, 1953, San Diego Union, A-6:5-6. City Councilmen received additional statements yesterday both favoring and opposing a drafted lease for a youth activity and day camp center in Balboa Park, before referring the question to conference.

W. Allen Perry, supervisor of parks, recommended in a letter that the city execute a lease for the Jewish Community Center’s proposed day camp and youth program, which is non-denominational. A summer day camp has proved highly satisfactory, Perry said.

M. E. Fisher, of 1282, Upas St., spoke for more than 30 neighbors who protested the pending expansion. The do not oppose a day camp and cultural activity, but this area of the park has reached the “saturation point,” Fisher explained.

“There can be too much of a good thing,” Fisher told the council. He said Boy Scout headquarters, Roosevelt Junior High School and its companion activities, the zoo and the bridle path are some of the existing uses which leave little room for the public and for wildlife which takes refuge in the area.

Fisher warned against “chopping up” the park for other agencies if the pending request is granted. He expressed hope that the case can “stand on its own merits” without becoming a city-wide issue. Fisher added that Jewish people residing in the area oppose the plan.

Also referred to conference were a proposed general resolution governing use and development of park property, and a drafted ordinance permitting leases with local societies for the erection of recreational, cultural and educational facilities.

April 15, 1953, San Diego Union, A-7:1-2. Architects Institute honors Donal Hord.

April 15, 1953, San Diego Union, A-13:2-3. Charter proposal on parks contested; diversion of land without two-thirds vote of people stirs vigorous opposition.

Proposition C, one of the contested charter amendments on the April 21 city election ballot, was submitted without any consultation with the Park Department, although it makes major changes in the park, recreation and cemetery setup.

The City Park Commission, headed by Elwood T. Bailey, on March 18, noted this omission "with regret."

The proposition, with its controversial sections permitting diversion of park, recreation or cemetery lands for street or highway purposes without a vote of the people, has been opposed by the Chamber of Commerce, while the Taxpayers' Association indorsed it.

The chamber based its opposition on two grounds: That the amendment did not comply with the recommendations of the citizens charter review committee, and that it permits the council to use park, recreation or cemetery land for road purposes without a vote of the people. The Taxpayers' Association did not document its indorsement.

Proposition C amends Section 55 of Article V of the charter, but the method of presentation makes it virtually impossible for any voter to determine where amendment begins or leaves off, according to opponents and proponents alike. The only way this can be done, they say, is to compare the proposed amendment with the existing charter, a practical impossibility for the ordinary voter. No copies of the section to be amended were give the voters.

These citizens say that when the state offers amendments, it shows by strikeout type what parts of existing law are to be taken out and by special type they show what new material goes in. This distinguishing typography is absent from the explanatory pamphlets sent out with sample city ballots.

As it came from the charter review committee, this proposal would have streamlined the park, recreation and cemetery sections of the charter and combined the park and recreation commissions.

When it got to the City Council, there were changes made. It was provided the current charter provision that no park, recreation or cemetery land could be voted out without a two-thirds majority of the voters, should be modified to give the council discretion in the case of road or highway crossings.

A change also was made in the present procedure governing lands classed as park and recreation areas without having been dedicated formally. These lands could, under Proposition C, be used for any public purpose decided on by City Council. There are a number of tracts in this category, the largest of which is Mission Bay area. Park department records indicate there was no formal dedication of the bay tract for park or recreation purposes although there are reports of intention to do so when the present project is completed.

Bailey, Park Commission chairman, said his group has no objection to combining the park and recreation commissions but sharply questions the Proposition C section dealing with the "right of the council to take out park lands for roads without a two-thirds vote of the people."

"I believe the Park Commission has confidence that the present council and manager would not act arbitrarily and if we could continue to have them in office, we would not need to worry," he said. "But perhaps in 10 or 15 years there might be other officials. We have never considered the park and recreation areas to be for the few. If the many want to transfer areas for other than park uses, they can do it. They did it on the part of Cabrillo Freeway running through the park. And in return we got state maintenance of an area that was run down and a source of some trouble.

"The Park Commission never has been afraid to trust the people."

In justification of his view that it should have authority to remove lands from the park without a vote of the people, the City Council has cited possible future road needs. Individual members have expressed concern that a minority group might stir up enough campaign heat to prevent a two-thirds majority vote for taking out the park lands for the road.

In connection with putting undedicated park or recreation land under council control to be used for any public purpose, the officials said some of these parcels are so scattered as to be useless for park and recreation, but possibly suitable for other municipal purposes.

April 15, 1953, San Diego Union, B-2:2. EDITORIAL: Much to Lose

San Diego voters would lose part of their control over their parks if Proposition C were approved in the city general election Tuesday.

This is a proposition which eliminate the requirement of a separate Park Commission and separate Recreation Commission, combining them into one.

There are both pro and con arguments on this section. Some value would be received in efficiency by combining the two groups, but in a city the size of San Diego it might be better to separate the two activities.

More important for the voters, this charter amendment would authorize the council to open street and highways through public parks, recreation and cemetery lands without a vote of the people. It could be a step which would lead to chopping the park sup to a great degree.

A two-thirds majority vote now is necessary before park lands can be changed to allow highways. This has worked well. For the voters to surrender this right could be detrimental to the park system. Proposition C ought to be defeated.

April 17, 1953, San Diego Union, A-14:1-2. Mayor Butler's Statement on Propositions.

Mayor John D. Butler issued a statement yesterday concerning Propositions C, I and K in Tuesday's election, as a result of City Council discussion of a "misunderstanding of the proposed charter amendments' meaning, and the council's purpose in submitting them."

The statement follows:

Proposition C is a proposed amendment of Section 55 of Article V of the charter with respect to the operation and control of parks in the city. The amendment does away with two commissions, namely, Park Commission and Recreation Commission, now existing under the present charter, and combines them into one commission, Park and Recreation Commission.

Except for this combination and one other change hereinafter mentioned, the amendment does not change the substance of the present charter at all. It is simply streamlining the language to the extent that it is more easily understood and does away with unnecessary duplication of activities in connection with parks, playgrounds and cemeteries.

OTHER CHANGES

The other material change is that with respect to the opening of streets and highways in the parks. Under the present charter, streets and highways cannot be opened through the parks without the consent of two-thirds of the voters voting at a special election. Under the proposed amendment, streets and highways may be opened in the parks without a two-thirds vote.

At the present time, and since Balboa Park was originally set aside, there have been maintained and operated within this park highways, streets, boulevards, drives, lanes and other park lands set aside for the purpose of providing access to all of the area of the park to the people by means of vehicles.

Under the present charter, none of these lands so utilized is part of the street system of the city. They are all legally part of the park. None of the gas tax revenues can be utilized for the purpose of improving or maintaining any of these park lands.

OUT OF TRUST

Some of Balboa Park, by vote of the people, has been taken from the park trust and made a part of the street system, such as Cabrillo Freeway, Sixth Avenue and 12th Avenue. Besides Balboa Park, a part of Torrey Pines Park was taken out and made a part of State Highway 101 by vote of the people. The only legal distinction, therefore, between streets, highways, boulevards, lanes and drives within the park and those outside the park is with respect to the cost of the maintenance and operation, and the source of revenues which may be used for such purposes.

The Supreme Court recently has held that the use of park land for street and highway purposes is consistent with park purposes. In the absence of a charter forbidding it, the City may open streets and highways through public parks, and, in so doing, is utilizing the parks for purposes entirely consistent with park purposes.

AMENDING NEEDED

For these reasons, the council felt that the charter should be amended to eliminate the requirement that a street could not be opened through Balboa Park without the vote of two-thirds of the people, and thus prevent a minority group from blocking necessary improvements designed to relieve traffic congestion which is so burdensome today.

(The remainder of the article is devoted to a discussion of Propositions I and K.)

April 18, 1953, San Diego Union, A-11:3-4. Spring Fair Show opens Tuesday in Electric Building.

April 19, 1953, San Diego Union, C-4:1. EDITORIAL: Five "No's" Suggested

Five of the 15 propositions on the ballot contain provisions which could be harmful to San Diego.

After careful study, *The Union* believes "no" votes best on Propositions C, D, H, I and K. This newspaper recommends a "yes" vote on the other 10 proposals. They would make changes that would improve the charter.

Most of the propositions for which a "no" vote is suggested have good qualities. But they are so worded as to leave the intent in doubt or they carry additional provisions which would be detrimental.

Proposition C is an example. It seeks to improve efficiency in governing parks and recreation. But it includes a clause which would remove the present charter provision that the dedicated use of park land can be changed only with a two-thirds vote. If this amendment were approved, the voters would lose control. Parks could be cut up badly with new highways.

(The remainder of the editorial explains why Propositions D, H, I and K should be rejected.)

April 19, 1953, San Diego Union, E-1:1-8. Starlight Opera plans five shows; rehearsals underway, by Helen Zugelder.

April 20, 1953, San Diego Union, B-4:1. EDITORIAL: Ballot Recommendations.

April 21, 1953. ELECTION: Proposition C - Create one Park and Recreation Commission; prohibit change of use of any park, recreation or cemetery land formally dedicated by ordinance or statute without the consent of two-thirds of the electors; authorize Council to open streets and highways through public park, recreation and cemetery lands.

Yes	25,911
No	24,771

April 21, 1953, San Diego Union, A-15:7-8. Spring Fair opens tonight in Electric Building; 125,000 visitors expected; modern home exhibits featured (map).

April 22, 1953, San Diego Union, A-1:1-2, A-2:3. Burgener leads in Council vote; incumbents win; school bonds carry; official pay raises, funds diversions defeated.

April 22, 1953, San Diego Union, A-13:3-4. Latest contrivances for homes shown at ninth annual Spring Fair of Modern Home Ideas.

April 23, 1953, San Diego Union, A-17:3. San Diegans see new appliances at Spring Fair in Electric Building.

April 23, 1953, San Diego Union, B-2:1. EDITORIAL: Voters Selective.

Although less than one-third of the eligible voters went to the polls Tuesday, those who did cast ballots showed considerable discrimination.

April 24, 1953, San Diego Union, A-15:6. Forty thousand visit Spring Fair at Balboa Park.

April 26, 1953, San Diego Union, A-29:1-2. San Diego Zoo - Kosi, the nyala, will be shown for the first time today (illus.).

April 27, 1953, San Diego Union, A-11:8. Electric Building - Home Fair Show hits all-time attendance of 135,000; last year's attendance was 125,000.

May 8, 1953, San Diego Union, A-11:2. Museum of Man - Article in *Museum*, a publication of UNESCO, praised dramatic displays at Museum of Man.

May 12, 1953, San Diego Union, A-4:5-7. Electric Building - Home Show and Food Jubilee to open Saturday.

May 14, 1953, San Diego Union, A-10:4-6. San Diego Zoo - admission to Zoo increased from 36 to 40 cents each because of an agreement requiring Zoo to pay part of its water bill; persons under 16 will still be admitted free.

In the year that ended March 31, the zoo had 1,311,727 visitors, of whom 837,000 were adults.

May 15, 1953, San Diego Union, B-1:3. About 100 musicians will contribute their services for the San Diego Philharmonic Maintenance Concert to be played Sunday afternoon in Balboa Park with Nino Marcelli as guest conductor.

May 16, 1953, San Diego Union, A-13:1-2. Home Show crowd of 7,500 expected.

May 18, 1953, San Diego Union, A-5:1-4. Owing to anxiety about weather conditions Friday afternoon, the place of the San Diego Philharmonic Concert was changed from Balboa Park Bowl to Russ Auditorium.

May 24, 1953, San Diego Union, A-35:1-4. Home Show crowds in Electric Building see big display; students of the San Diego Vocational School demonstrate their skills at the school's booth (illus.).

May 24, 1953, San Diego Union, A-35:4. Palisades Building - Second and final day today of 42nd Spring Flower and Garden Show in Recital Hall.

May 26, 1953, San Diego Union, A-7:1. Free concert of 125-piece U. S. Army Field Band concert in Balboa Park Bowl tomorrow at 7:30 p.m.

May 26, 1953, San Diego Union, B-14:1-3. San Diego Zoo - Delilah, addition to white-bearded gnus, appearing on D-mesa.

June 2, 1953, San Diego Union, A-5:1-2. San Diego Zoo - two rare monkeys, *allenopithecus nigrovirdis*, arrive at Zoo.

June 2, 1953, San Diego Union, A-13:7-8. Planners choose Sixth and Date Street corner of Balboa Park as site for auditorium; half of the 16 acres would be parking space; five acres in landscaping and three acres occupied by buildings (illus.).

June 3, 1953, San Diego Union, A-9:2-3. City Council asks joint meeting on auditorium; Planning, Park Commissions due to discuss recommended site.

An auditorium is a legally proper park use and no "voting out" of the Sixth-and Date site would be needed, City Atty. Jean F. DuPaul said.

June 3, 1953, San Diego Union, B-1:4-5. Council to study funds for cultural groups.

June 4, 1953, San Diego Union, B-1:1-2. Planners to continue study of auditorium; Commission agrees to joint meeting with Park Board on proposed site.

June 5, 1953, San Diego Union, B-2:7. Letter, Grace M. Sissons, claiming Kate Sessions' succulent garden in park needs care.

June 7, 1953, San Diego Union, A-21:8. Park Commission will discuss auditorium site Tuesday a.m.

June 10, 1953, San Diego Union, A-11:6-7. Masons will hold 27th Flag Day observance at Inspiration Point, Balboa Park, Sunday.

June 10, 1953, San Diego Union, B-1:4-5. Park Commission yesterday deferred its recommendation whether a proposed civic auditorium and convention hall should be located in Balboa Park pending further study.

June 10, 1953, San Diego Union, B-2:6. Letter, John H. Woodward, favors park restoration of area around the flagpole at the extreme southwestern edge of the park.

June 13, 1953, San Diego Union, B-2:6. Letter, Mrs. F. T. Scripps, favors cleaning up Kate Sessions' succulent garden.

June 15, 1953, San Diego Union, A-13:5-8. Flag Day at Organ Pavilion yesterday; Legion head addressed crowd, (illus.).

June 17, 1953, San Diego Union, A-13:2. Balboa Park Library will hold Explorers' Vacation Reading Club for San Diego children next Wednesday at 2:30 p.m.

June 17, 1953, San Diego Union, A-13:4. Park Commission went on record as opposing location of civic auditorium and convention hall at Sixth Avenue and Date Street or any other part of Balboa Park already developed as a recreation area.

June 18, 1953, San Diego Union, B-1:1-2. Planning Commission voted yesterday to hold public meeting on auditorium site question.

June 21, 1953, San Diego Union, A-19:6-8. Parks, beaches, playgrounds offer varied summer program.

June 23, 1953, San Diego Union, A-9:3-4. Planning, Park bodies discuss hall; no agreement reached on site of auditorium; Sixth and Date Street corner criticized.

Park body members reaffirmed their preference for an undeveloped Balboa Park site, rather than landscaped park land at Sixth Ave. and Date St., for any future construction.

June 28, 1953, San Diego Union, A-19:7-8. San Diego Zoo - condors bred at Zoo; production of gorillas considered possibility, by Bryant Evans (illus.).

June 28, 1953, San Diego Union, E-1:1-8. E-2:1-3. Starlight season opens Thursday evening in Balboa Park Bowl (illus.).

July 2, 1953, San Diego Union, A-13:7-8. "Call Me Madam" at Star-Light Opera tonight

July 2, 1953, San Diego Union, B-4:1. EDITORIAL: Starlight and Rain.

There will be lots of smiles when the curtain goes down tonight. But none will be bigger than those of Robert J. Sullivan, Charlie Cannon and Bill Dean. This is the dream which was theirs.

July 3, 1953, San Diego Union, A-9:7-8. 3,500 at Starlight opening of "Call Me Madam," by Frank Rhoades..

July 3, 1953, San Diego Union, A-9:7-8. Initial Starlight performance shows advancement, by Constance Herreshoff.

July 4, 1953, San Diego Union, A-9:1-2. Old Globe Theater honors Navy in opening of "Mr. Roberts," by Edith Cushing.

July 5, 1953, San Diego Union, E-1:1-6, E-2:1-3. "Mr. Roberts" set to open Wednesday at Old Globe, by Edwin Martin.

July 6, 1953, San Diego Union, A-11:3. Electric Building - Mineral and Gem Show to be held July 17-19.

July 8, 1953, San Diego Union, A-7:3-4. "Mister Roberts" to open tonight.

July 9, 1953, San Diego Union, A-16:4-5. "Mister Roberts" sell-out for opening night by Constance Herreshoff.

July 9, 1953, San Diego Union, A-18:1-3. Navy guests gather for opening of "Mr. Roberts" at Old Globe Theater, by Edith Cushing.

July 12, 1953, San Diego Union, A-16:3. Hearing Friday on suggested auditorium site.

In contrast to interest shown in the possibility of the Padres moving to Balboa Park, the City Planning Commission has received few opinions about a recommendation for a municipal auditorium to be located at Sixth Ave. and Date St., also in the park.

July 14, 1953, San Diego Union, A-6:3-4. "Mister Roberts" draws capacity audiences.

July 15, 1953, San Diego Union, B-12:1. Three named by Mayor Butler to new City Park and Recreation Commission . . . Elwood T. Bailey, Mrs. Frank E. Marcy and Edgar A. Luce, Jr.

July 16, 1953, San Diego Union, B-12:7. J. L. Chambers says Park Board site immediately south of the Veterans' Memorial Building good for auditorium.

July 17, 1953, San Diego Union, A-12:4. "Finian's Rainbow" at Star-Light Opera wins approval, by Constance Herreshoff.

July 17, 1953, San Diego Union, B-1:3-. Hearing today on park site for Civic Auditorium; the old Park Commission, which was succeeded by the new Park and Recreation Commission, opposed the Sixth Ave. and Date St. site in Balboa Park..

July 18, 1953, San Diego Union, A-7:3-4. Largest sapphire fascinates gem fans at National Mineral and Gem Show opening in Electric Building yesterday.

July 18, 1953, San Diego Union, A-14:3-5. Planning Commission defers action after auditorium talks.

Arthur H. Marston, whose family has been prominent in park development, favored the site, but said "Sixth and Date" is a misnomer. The real site in the planning report, he said, would be between Sixth and Eighth Aves.. and Elm and Grape Sts.

Marston, the only speaker to be applauded, said sewers, water and schools deserve higher priority than an auditorium and that he also favors a grouping of public buildings. But he also recalled the Cedar St. grouping plan was defeated, and referred to the difficulty of considering a grouping on expensive property.

Putting a public building in Balboa Park is not loss to the park, Marston said. He advocated two or three auto parking levels under the building, instead of surface parking.

July 19, 1953, San Diego Union, E-2:1-5, E-6:3-8. Robert Shaw to conduct first summer concert Tuesday.

July 19, 1953, San Diego Union, E-6:3-5. "Finian's Rainbow" scores.

July 21, 1953, San Diego Union, A-11:2-3. First symphony concert tonight in Balboa Park.

July 22, 1953, San Diego Union, A-6:4-5. "Mister Roberts" being received enthusiastically at Old Globe.

July 22, 1953, San Diego Union, B-12:1-2. Symphony concert in Balboa Park Bowl a success, by Constance Herreshoff.

July 26, 1953, San Diego Union, A-20:1-4. Dahlia exhibit set for Balboa Park next weekend.

July 28, 1953, San Diego Union, B-1:1-2. The Triana Company of Spanish dancers will appear in Balboa Park Bowl tonight in concert with San Diego Symphony Orchestra.

July 29, 1953, San Diego Union, A-16:1. Constance Herreshoff lauds Symphony performance.

Another near-capacity audience was on hand last night for the second concert of the San Diego Symphony's summer series directed by Robert Shaw in Balboa Park Bowl.

July 30, 1953, San Diego Union, A-17:4. City Planning Commission members tossed the ball yesterday to "all interested groups" which have expressed opposition to Sixth Avenue and Date Street as a municipal auditorium site; puts matter of site over for a month

July 30, 1953, San Diego Union, A-34:4-6. Park merry-go-round must move because of widening of Park Boulevard.

July 30, 1953, San Diego Union, A-35:2-4. City Park and Recreation Commission members elected Elwood T. Bailey as their chairman at an organization meeting yesterday in Balboa Park.

Mrs. Frank E. Marcy was chosen vice chairman. W. Allen Perry, superintendent of city parks, was designated as secretary.

The new commission, authorized by a city charter amendment approved April 21, succeeds separate commissions for park and recreation activities.

July 30, 1953, San Diego Union, B-1:1-3. Two recreation areas to get \$20,000 each for improvements; East San Diego, Clairemont Playgrounds scheduled for funds, City Park and Recreation Commission told.

A \$58,775 bid, lowest of eight, was accepted July 23 by the Council for constructing maintenance shop, paint storage and gasoline-oil service station buildings in Balboa Park. Leo B. Calland, city park and recreation director, said these will house maintenance facilities of the park department, not the public works department.

July 30, 1953, San Diego Union, B-1:3. Museum of Man - Museum asks for tower repairs; estimated cost is \$2500; Museum would charge 25 cents admission, part of the proceeds going to the city.

August 1, 1953, San Diego Union, B-2:1. EDITORIAL: Auditorium Site.

August 2, 1953, San Diego Union, A-16:1. Palisades Building - Craft and Hobby Show in Recital Hall August 28-30.

August 2, 1953, San Diego Union, A-22:1-3. "Mo," "Flo," blossoms take top prizes at Dahlia Show in Recital Hall.

August 3, 1953, San Diego Union, B-1:3. Palisades Building - Thirteenth Annual Dahlia Show in Recital Hall viewed by 3500.

August 3, 1953, San Diego Union, B-2:7. W. Allen Perry writes Ford Company did not pay for Balboa Park Bowl.

August 4, 1953, San Diego Union, A-10:1-2. Admiral Baker suggests Hall of Justice, Auditorium, State structure in layout of civic buildings.

August 4, 1953, San Diego Union, A-11:6-7. San Diego Zoo - 36th annual meeting of Zoological Society at supper under Chinese lanterns in the Zoo picnic ground.

August 5, 1953, San Diego Union, B-12:1-2. Exhibit space for organizations as well as for individuals will be available at the Recreation Round-Up's Craft and Hobby Fair in the Balboa Park Federal Building, August 28-30, the City Park and Recreation Department said yesterday.

August 5, 1953, San Diego Union, B-12:4-6. San Diego Symphony in top performance, by Constance Herreshoff.

August 6, 1953, San Diego Union, A-13:1. Naval Hospital to give veterans 50 more beds.

August 6, 1953, San Diego Union, A-28:2-3. Electric Building - Dog Show August 23.

August 7, 1953, San Diego Union, A-6:3. Forty four performers named for Atlas awards at Old Globe.

August 7, 1953, San Diego Union, B-1:4-5. The City Council suggested yesterday that Stiles Clements, Los Angeles parking expert, be consulted about the Planning Department's recommended auditorium site, Sixth Avenue and Date Street.

The site has more possibilities than Los Angeles' Pershing Square, Councilman Charles C. Dail believed. George Kerrigan said federal aid might be sought in connection with civil defense bomb shelter possibilities.

August 9, 1953, San Diego Union, A-1:2-3. San Diego Zoo - Belle Benchley to retire, Dr. Schroeder named to head collection (illus.).

August 12, 1953, San Diego Union, A-7:1-2. Symphony's fourth concert applauded, by Constance Herreshoff.

A large audience assembled in Balboa Park Bowl last night for the fourth concert of the San Diego Symphony summer series directed by Robert Shaw. The program was composed of music of decidedly contrasting types. Handel's "Concerto Gross in B minor" and Honegger's "Symphonic Psalm: King David," which was given a first performance in this concert.

August 13, 1953, B-1:1-2. A Switzer Canyon Freeway, proposed long ago, would cause the Municipal Golf Course to be redesigned or eliminated, participants in a City Planning Commission discussion declared yesterday.

August 13, 1953, San Diego Union, B-1:2. San Diego Zoo - The zoo's condor trapping project may move to Kern County near Mojave as the result of reports that there are many condors in that locality, Mrs. Belle Benchley, zoo director, said yesterday.

August 14, 1953, San Diego Union, A-12:2-4. "Desert Song" at Star-Light Opera, by Constance Herreshoff.

August 15, 1953, San Diego Union, B-2:7. B. C. Crowell writes about baseball park in Balboa Park.

August 16, 1953, San Diego Union, A-19:1-3. Proceeds from sale and rentals of opera glasses at Starlight Opera shows are swelling the fund of the Donald N. Sharp Memorial Hospital now under construction on Kearny Mesa.

August 16, 1953, San Diego Union, A-20:3-4. Seven hundred to compete here in All-Breed Dog Show.

August 16, 1953, San Diego Union, A-26:4-6. Hobby Fair schedule drafted.

August 16, 1953, San Diego Union, E-1:1-8, E-2:1. Sculptures by Donal Hord to grace new library.

August 19, 1953, San Diego Union, A-9:1-2. Everyone seemed happy at the San Diego Symphony concert last night in Balboa Park Bowl. A near-capacity audience was on hand to hear the inviting program planned by the conductor Robert Shaw for the fifth concert of the summer series, by Constance Herreshoff.

August 19, 1953, San Diego Union, B-2:7-8. R. B. Boone says baseball park won't hurt Balboa Park.

August 20, 1953, San Diego Union, A-11:5-6. "Mister Roberts" to run for a third extra week at Old Globe.

August 20, 1953, San Diego Union, B-4:7. George P. Sikes says Balboa Park already commercial project; cites zoo, restaurant, riding horses, merry-go-round, miniature railway, golf grounds, tennis courts, swimming pool, refreshment stands..

August 21, 1953, San Diego Union, A-11:2-3. "Desert Song" promises to break all records at Balboa Park Bowl.

September 17, 1953, San Diego Union, A-11:5-6. "Mister Roberts" nears end of run at Old Globe.

September 20, 1953, San Diego Union, A-12:1-2. Downtown Association urges top priority for Date - 18th Street route (drawing).

San Diego's Date-18th street plan, long a part of the city's accepted highway program, would serve a valuable dual purpose Walter Ames, Downtown Association president, said yesterday.

It would be a major help in solving any traffic problem in the downtown area because ____ a quick access to all major arteries.

For crosstown motorists, Ames continued, it would be a ready by-pass for motorists who were interested in reaching a destination rather than shopping.

The plan is non-controversial, Ames reported. He know of no opposition from any source. IT would provide a grade separation at the Santa Fe Railway tracks, which one-way streets would not do, he declared.

Ames declared a Switzer freeway would be of great benefit for 75,000 persons in the northern and eastern parts of the city because of the quick access it would give to the waterfront, aircraft plants and Civic Center.

September 20, 1953, San Diego Union, E-4:1-5. San Diego Junior Theater starts promising season, by Ralph W. Hastings.

September 22, 1953, San Diego Union, A-11:1-2. San Diego Zoo - baby elephant craves attention.

November 15, 1953, San Diego Union, A-14:4. Fifteen hundred dancers participate in Square Dance fete (illus.).

November 15, 1953, San Diego Union, E-1:2-4. In Tune - With Bruno Ussher, "Cultural Center" Survey Under Way.

Conversion of the Federal Building merits serious consideration. To repeat, it has been promised. San Diego could use a medium-size theater for plays. A Municipal Auditorium, such as discussed here, should be planned for capacity audiences of 3,000 to 3,500 attendance. Opera, orchestra concerts, ballet, musicals, large and star-crested play productions run on heavy nightly budgets. The Federal Building can take one balcony. Can it carry two to bring up capacity? The reason for so many seats is to lower prices, especially in the middle and minimum brackets. Such price-scaling is good showmanship and in a Municipal Auditorium not more than implicit democracy.

November 20, 1953, San Diego Union, 13:2-3. Museum of Man - tests made of lights for tower last night in preparation for Christmas lighting to begin November 27; first time tower has been illuminated since outbreak of World War II.

November 21, 1953, San Diego Union, B-1:1-2. For the first time in the Christmas lighting of Laurel Street in Balboa Park, Cabrillo Bridge will be part of the beautified route when the annual display is turned on, about 6:30 p.m. next Friday.

December 11, 1953, San Diego Union, A-8. Yule program at Organ Pavilion (illus.).

December 11, 1953, San Diego Union, A-15:7-8. San Diego Zoo - Belle Benchley gets civic tribute; trip around world provided; 800 guests, including many from distance, by Bryant Evans (illus.).

December 11, 1953, San Diego Union, A-16:2. EDITORIAL: If Animals Could Talk . . . retirement of Mrs. Belle J. Benchley.

Mrs. Benchley is liked and respected by her fellow men. But if they could talk, we think the animals at the zoo would pay the greatest tribute of all. Their affection can be seen any time Mrs. Benchley walks through the zoo.

December 12, 1953, San Diego Union, A-11:6. Yule Center opens in flare of 400 lights; Santa Claus officiated at lighting of 50-foot Julian fir tree.

December 12, 1953, San Diego Union, B-1:7-8. San Diego Zoo - Dr. Schroeder says more than 1,300,000 saw Zoo last year.

December 13, 1953, San Diego Union, A-27:7-8. All San Diego shares huge art treasure; enlargement sought in scope of Fine Arts Gallery; development group seeks to make exhibits available to more persons (illus.).

December 16, 1953, San Diego Union, A-16:3. Leo Calland, Parks and Recreation Director, told City Council yesterday that San Diego should spend an added 20 million dollars for recreation needs.

December 17, 1953, San Diego Union, B-4:7-8. Letter, Mrs. Belle J. Benchley, thanking *San Diego Union* for its support of San Diego Zoo.

December 18, 1953, San Diego Union, B-16:2-3. Approximately 400 Nationalist Chinese sailors visited the San Diego Zoo yesterday (illus.).

1952-1953, Department of Public Works, Annual Report.

- p. 18. Sewer division located at corner of 18th and A in March 1953.
- p. 42. During this fiscal year, the Sanitation Division converted to the Sanitary Fill method of disposing refuse. Three (3) fills have been located to minimize truck hauling distance and time being in Chollas area, one in Arizona canyon and the remaining fill in the Mission Bay area. When completed, these sanitary fills will provide usable land for recreation purposes.

Summary of Events in 1954

(Note: Dates of events are approximate only.)

Museum of Man closed because of vandalism (February 15, 1954)
Museum of Man reopened (February 19, 1954)
Chinchilla Show in Electric Building (February 20, 1954)
Orchid Show in Recital Hall (March 20, 1954)
Folk Dances in Conference Building (April 4, 1954)
Elementary School conference in Conference Building (April 11, 1954)
Home Idea Fair in Electric Building (April 23, 1954)
Rose Show in Conference Building (April 24, 1954)
Groundbreaking for Flamingo Lagoon at San Diego Zoo
(May 10, 1954)
Home and Food Show in Electric Building (May 15, 1954)
Elks Flag Day services in Balboa Park Bowl (June 14, 1954)
Symphony concert series begun (July 13, 1954)
Dahlia Show in Recital Hall (July 31, 1954)
Silver Bay Kennel Club Show in Balboa Park (August 29, 1954)
Bureau of Home Appliances Conference in House of Hospitality
(September 15, 1954)
Mock battle in Balboa Park on Army Reserve Day (September 18, 1954)
Piano Festival in Balboa Park Bowl (September 26, 1954)
Fiesta de la Cuadrilla in Balboa Park (October 22, 1954)
Parakeet Show in Electric Building (October 23, 1954)
Park Commission gave San Diego Zoo 2.0 acres for Children's Zoo
(November 1, 1954)
Silvergate Cat Club show in Electric Building (November 6, 1954)
Mass citizenship service in Balboa Park Bowl (November 11, 1954)
Home Appliance Show in Electric Building (November 26, 1954)
Christmas Center lights turned on at Organ Pavilion
(December 12, 1954)

January 9, 1954, San Diego Union, B-8:7-8. The Navy Bureau of Personnel announced yesterday San Diego Naval Hospital's command is now a flag officer's billet; it is expected that Rear Admiral Robert M. Gillette, 11th Naval District, will take command in February; expansion program calls for 1000-bed addition.

January 10, 1954, San Diego Union, F-9:1. San Diego Zoo - old cafeteria building is being torn down (illus.).

January 10, 1954, San Diego Union, F-9:1. Almost two million persons visited San Diego County's public parks last fiscal year.

January 11, 1954, San Diego Union, B-1:6. San Diego Zoo - Dr. Schroeder says cafeteria still operates.

January 13, 1954, San Diego Union, A-13:7-8. San Diego Zoo - San Diego Consular Corps volunteers to help Zoo obtain specimens.

January 17, 1954, San Diego Union, A-26:5-6. San Diego Zoo - condor trapping plan fails; legal deadline past.

January 26, 1954, San Diego Union, A-13:3-4. Fine Arts Gallery seeks new patrons; membership drive designed to bolster operating fund, now below requirements; budget about \$50,000 a year.

January 27, 1954, San Diego Union, B-2:5. Letter, Bob Turnbull, advocates repair of Balboa Park's dilapidated buildings..

January 30, 1954, San Diego Union, A-12:5. Civic theater as separate unit wins favor; citizens' committee supports separation from convention hall; the Federal Building in Balboa Park seen as center for cultural activities; H. Louis Bodmer, architect, says remodeling present space to accommodate 2,492 seats would cost about \$680,000, adding a balcony with 1,500 seats \$150,000 and the seating \$62,500..

February 1, 1954, San Diego Union, B-16:3-4. House of Hospitality - Camellia garden taking shape near House of Hospitality through volunteer efforts of San Diego Camellia Society (illus.).

February 3, 1954, San Diego Union, A-8:4. San Diego Zoo - Ralph Virden, superintendent of Zoo, reported the Administration building is now 35 percent completed.

February 4, 1954, San Diego Union, A-17:2. Robert Shaw, conductor of San Diego Symphony, sees city as center of culture, by Constance Herreshoff.

February 15, 1954, San Diego Union, A-1:1-2, A-12:1. Museum of Man - Museum closed indefinitely because of vandalism by an organized gang of burglars.

The Museum of Man in Balboa Park yesterday was closed indefinitely because of what its managing director called vandalism by an organized gang of burglars, probably juveniles.

More than \$500 worth of ancient jewelry was discovered missing during the weekend, the latest in a series of losses. The jewelry was taken from a padlocked case in the Egyptian collection.

Clark C. Evernham, managing director, said the closing was "a desperate attempt to make secure the priceless collections in the museum. The next time something more valuable and irreplaceable may disappear."

He said immediate steps would be taken to improve locking devices on display cases. Also, he said the city would be asked to hire one or more guards to patrol the large museum.

Evernham said the method of theft, and other vandalism such as scrawling on museum objects, indicated juveniles were responsible. He explained that the jewelry would be unmarketable and worthless to the thieves except possibly as gifts to girlfriends.

A week earlier some Persian material disappeared, he said, and last August thieves stole archery exhibits. The latter were recovered.

Security problems at the museum were increased, the administrator said, by its proximity to undergrowth in nearby Palm Canyon. He said burglars could approach and escape through the underbrush and shrubbery virtually undetected.

"This makes out situation unique, with other such institutions, and we were grateful recently when the city began clearing out that area of the canyon," Evernham said.

He said he discovered the jewelry theft Saturday night and reported it to the police, but it was not until yesterday that a check of museum catalogs detailed the loss. At police headquarters, Desk Sgt. Richard Alley said an investigation would proceed immediately upon receipt of the list of missing items.

Evernham said the back of the Egyptian jewelry case was opened without damaging the hasp and the lock was missing, indicating the culprits had fashioned a key to the museum locks. He said the method of theft indicated more than one person involved.

Despite the large "Closed" sign on the door, the director said the regular Sunday film programs and the county lecture programs would continue.

City funds are used to maintain the building and pay salaries at the museum, with the county and museum membership contributing other moneys. He said with only two custodians employed, it was impossible to guard the valuable collections adequately and at the same time maintain the building and grounds.

The museum collections are the property of the San Diego Museum Association, a non-profit organization.

February 16, 1954, San Diego Union, A—11:2. Museum of Man - City officials will meet this morning with Clark E. Evernham, managing director of the Museum of Man, to discuss curbing vandalism which has forced closing of the museum.

February 17, 1954, San Diego Union, A-11:6. Museum of Man - Museum will reopen with Secret Security System, Clark Evernham, director, said yesterday.

February 17, 1954, San Diego Union, B-2:2. Museum of Man - EDITORIAL: Not A Prank.

We're not sure the vandals who have burglarized the Museum of Man have the intelligence to read. But if they should stumble across these words, they ought to know they have placed themselves with the lowest of criminals in the minds of San Diegans.

February 19, 1954, San Diego Union, A-17:6-7. Museum of Man - Museum to open approximately two-thirds of its public areas today; Jessop, Egyptian tomb collections still closed because of thefts.

February 20, 1954, San Diego Union, A-11:6-7. Museum of Man - some sections of Museum reopened yesterday.

February 20, 1954, San Diego Union, A-11:7. Electric Building - Chinchilla Show today and tomorrow.

February 24, 1954, San Diego Union, A-13:3. The City Park and Recreation Commission yesterday unanimously opposed construction of a civic auditorium at Sixth Avenue and Date Street in Balboa Park after examining a scale drawing of the proposed location.

The commission that construction of a parking lot large enough for the 3,000 autos as required for the auditorium would take out one of the choicest sections of Balboa Park.

The section under discussion is bounded by Sixth Avenue and Cabrillo Freeway, from Date to Ivy Streets.

The commission favored building a civic auditorium in Balboa Park but preferred making use of undeveloped land instead of cutting out developed sections.

February 26, 1954, San Diego Union, B-2:7-8. Fran Callaway says Balboa Park is like deserted war orphan.

Editor: I walked through our beautiful neglected park the other day. It reminded me of a beautiful, shabby, uncared for war orphan. Why are we permitting unthinking vandals to deface and destroy it?

March 2, 1954, San Diego Union, A-11:3. A report to the City Manager stated yesterday that two floors of parking extending along Sixth Avenue would accompany the proposed privately financed convention hall at Sixth Avenue and Date Street in Balboa Park.

March 3, 1954, San Diego Union, A-13:5-7. City park division employees yesterday cut down large Monterey cypress killed by cypress beetles in southeast Balboa Park (illus.).

March 3, 1954, San Diego Union, B-2:6. Louis M. Richardson writes "we no longer have a beautiful park."

March 7, 1954, San Diego Union, A-26:1-3. Museum of Man - Museum will present its public Sunday film showings in Puppet Theater.

March 9, 1954, San Diego Union, A-7:1-2. San Diego Zoo - pair of occipital grebes from Peru, by Gus Holmes (illus.).

March 14, 1954, San Diego Union, A-7:1-3. San Diego Zoo - Mrs. Benchley to visit world zoos, by Gus Holmes.

March 14, 1954, San Diego Union, A-12:1. Palisades Building - Orchid Show Saturday and Sunday in Recital Hall.

March 21, 1954, San Diego Union, A-15:1-3. Amateurs to have art show at Fine Arts Gallery in park April 11 (illus.).

March 25, 1954, San Diego Union, A-13:3. Orchid Show in Balboa Park.

March 30, 1954, San Diego Union A-11:7-8. City Manager Campbell's advisory committee on convention hall proposals agreed yesterday that downtown site possibilities should be investigated.; County's new justice building called logical part of city development.

April 4, 1954, San Diego Union, A-19:5. Conference Building - conference of elementary school principals and district superintendents next Sunday.

April 5, 1954, San Diego Union, A-13:7-8. Conference Building - folk dancers yesterday.

April 9, 1954, San Diego Union, B-1:3. San Diego Zoo - Zoo to keep revenue from federal government tax.

City councilmen agreed yesterday that the San Diego Zoo, which is spending money for new buildings, can keep the seven cents which the federal government formerly received from each 40-cent admission.

April 11, 1954, San Diego Union, A-5:4-5. Conference Building - Rose Show April 24 and 25.

April 11, 1954, San Diego Union, F-4:3. San Diego Zoo - administration building nears final stages.

April 19, 1954, San Diego Union, A-10:2. Bonham Brothers Boys' Bank East Concert in Balboa Park Bowl, by Constance Herreshoff.

A large audience enjoyed the concert played yesterday afternoon in Balboa Park Bowl by the 140 young musicians of the Bonham Brothers Boys Band under the expert direction of Jules Jacques.

This was the 24th annual Easter concert of this band and also Jacques' 24th season as director.

April 19, 1954, San Diego Union, A-11:1-4. Sunrise services at Organ Pavilion; Dr. William C Ruse of California Western University delivered Easter message (illus.).

April 20, 1954, San Diego Union, A-13:4-5. Lillie Mae Barr benefit show a hit at Old Globe, by Constance Herreshoff.

Last night's benefit for Lillie Mae Barr at the Old Globe Theater was a success financially, and also from the entertainment standpoint. Contributions for the benefit received at the theater were \$1027.50, with more to come. Talent, printing, the work of electricians and all services usually paid for were donated for this benefit.

April 21, 1954, San Diego Union, A-13:2. John Ellsworth named head of Museum Association.

April 23, 1954, San Diego Union, A-17:5-7, A-18:4. Home Idea Fair to open tonight in Balboa Park.

April 24, 1954, San Diego Union, A-11:2-4. Electric Building - Home Show; 18,000 attend.

April 24, 1954, San Diego Union, B-1:3. Twenty-seventh Spring Rose Show opens today.

April 25, 1954, San Diego Union, A-6:4. House of Pacific Relations - lawn program by Cottage of Netherlands May 2.

April 25, 1954, San Diego Union, A-9:1-2. Electric Building - Home Fair lauded as best managed.

John McMillan of the Norge Corp., Chicago, said the 10th annual Fair of Modern Home Ideas here is one of the best managed and most effectively produced in the United States.

April 25, 1954, San Diego Union, A-17:1-2. Plane talk: San Diego Aero Museum plans underway, by Allan Palmer.

The San Diego section of the Institute of Aeronautical Sciences is laying the foundation for two commendable projects in keeping with San Diego's standing as a foremost center of aviation progress, past and present.

A committee is being formed to establish an air museum as the Institute's building, 3380 Harbor Drive, and a technical research library on aeronautical and related subjects. James Wenzel, vice president, explains that both are still in the beginning stage.

April 25, 1954, San Diego Union, A-24:1-3. Kenneallys win district trophy in Rose Show here.

April 26, 1954, San Diego Union, A-6:1-3. Home Ideas Fair attendance to date reaches 90,000.

April 28, 1954, San Diego Union, A-15:5. Fair will end tonight with record crowd.

April 28, 1954, San Diego Union, A-16:1-2. Piano festival set September in Balboa Park Bowl.

May 3, 1954, San Diego Union, A-15:1-2. Craig Noel uses new forum idea, stages informal press reception for Agnes Moorhead, visiting celebrity, by Edwin Martin.

May 3, 1954, San Diego Union, A-15:3-4. Catholic Schools' Music Festival presented yesterday in Balboa Park Bowl.

May 9, 1954, San Diego Union, A-5:2-4. Robert O. Peterson, a member of the nine-man Civic Center Coordinating Committee which is seeking ways to promote the tourist business in San Diego, advocated yesterday that the area might become a permanent international exposition center.

May 9, 1954, San Diego Union, F-3:1. Electric Building - Home Show will open a nine-day run next Saturday.

May 10, 1954, San Diego Union, A-6:1-2. San Diego Zoo - three capybaras, anteater at Zoo (illus)..

May 11, 1954, San Diego Union, A-15:2-3. San Diego Zoo - ground broken for Joseph E. Bryer Flamingo Lagoon (illus.).

May 12, 1954, San Diego Union, A-14:1. "Lo and Behold" Old Globe hit, by Constance Herreshoff.

May 20, 1954, San Diego Union, A-1:5. The 6th annual Home and Food Show Jubilee in Balboa Park is drawing large crowds, Jim Wilson, managing director, said last night.

May 28, 1954, San Diego Union, B-1:4. Morley Field - summer swim season to open tomorrow.

May 30, 1954, San Diego Union, A-9:8. Boy Scout fair in Balboa Park this week at Scout Headquarters; more than 13,000 Scouts from all parts of the country will take part in the annual event.

June 1, 1954, San Diego Union, B-10:4-5. San Diego Men's Art Club has become San Diego Men's Art Institute and will open a gallery June 5 and 6 in the old House of Charm.

June 5, 1954, San Diego Union, A-13:5-6. Ten thousand Boy Scouts last night at Scout Camp.

June 6, 1954, San Diego Union, A-11:1-4. Torrey Pines Park division opposed (map).

San Diego should not sell Torrey Pines Park or any part of it for residential development, 54 percent of community leaders questioned in a Chamber of Commerce poll, answered.

June 14, 1954, San Diego Union, A-13:5. National Flag Day observed yesterday at Inspiration Point, Balboa Park; 27th annual observance by San Diego County Masonic Officers' Association.

June 15, 1954, San Diego Union, A-13:1-2. Elks' Flag Day services in Balboa Park Bowl (illus.).

June 17, 1954, San Diego Union, A-15:8. San Diego Zoo - Lloyd Smith next head of Zoo publicity (photo).

June 19, 1954, San Diego Union, A-16:1-2. San Diego Zoo - Chamber of Commerce poll; Zoo for children favored in San Diego.

June 27, 1954, San Diego Union, F-1:1-8, F-2:1-6. Dedication rites today for San Diego's new library, by Clyde V. Smith.

July 2, 1954, San Diego Union, A-17:6-8. "Oklahoma!" at Star-Light Opera viewed by 3,500.

July 2, 1954, San Diego Union, A-17:17-8. "Oklahoma!", fine musical, by Constance Herreshoff.

July 4, 1954, San Diego Union, A-9:1-8. Balboa Park has colorful history, by Emily Stokes.

July 4, 1954, San Diego Union, A-9:1-8, A-11:1-2, Balboa Park - Pride of San Diego.

Balboa Park Club: Balboa Park Club, which was used as a Navy officers' club during World War II, is the site of many large dances, fashion shows and other social affairs. Dances for area servicemen also are held there on Sunday each winter month when the volunteer Hostesses are personable young dance partners.

Conference Building: San Diego's biggest facility for conventions is the Conference Building. It has a large auditorium and upstairs rooms, the latter of varying sizes.

Electrical Building: San Diegans with house dreams of mortgages are familiar with the Electric Building. For here is the site of the major house shows which attract thousands of visitors.

The building with its three large halls, also is familiar to the city's dancers. Classes in square dancing, folk dancing and ballet are interrupted only for the occasional big home shows. Then the dance classes move to other park spots.

Federal Building: The Federal Building is used almost entirely for badminton during height of the indoor athletic season. There have been various plans at various times to remodel the structure into a community theater or convention hall. So far nothing has come of the plans.

Floral Association: The authentic Spanish mission style building which is the Floral Association headquarters also is a publication office. Here the nation's oldest garden magazine, "The California Garden," has been issued for 44 years. Its staff is volunteers.

Meeting place for many of the area's garden clubs, the one-story building houses a large exhibition room, a horticultural library, a kitchen and storage space.

Ford Building: The Ford Building is used by the city schools' vocational classes.

Gymnasium: A much-used building is the gymnasium, where muscles and lung power combine in countless rounds of basketball, badminton, volley ball and volley tennis. Popular with women are the figure control classes held there.

House of Hospitality: The House of Hospitality is just that --- a hospitable and gracious place to entertain or to relax. The Moorish style structure is built around a beautiful patio with a pool centered by sculptor Donal Hord's Aztec Woman.

Meeting facilities are many. They include an auditorium for 500, smaller rooms for private parties and recitals and tasteful quarters for clubs and sororities.

A show piece is the Gold Room, furnished with antiques, art objects and fresh flowers or greenery. Café Del Rey Moro serves luncheons and dinners both in a main dining room and on a terrace overlooking lovely Del Rey Moro formal garden.

House of Pacific Relations: World peace in miniature is symbolized in the House of Pacific Relations. Actually a cluster of 13 small bungalows, the house serves 21 different nationalities.

The cottages, with identical Spanish-type exteriors, were built for the 1935-35 exposition. Interiors are furnished in the styles of the tenant's homelands.

On Sundays the various nationalities play host to visitors, sometimes dress in native costumes and serve native delicacies. Each country is represented on a House of Pacific Relations board which plans activities.

Horticultural Areas: Horticultural areas are the Alcazar, Del Rey Moro and formal gardens and Palm Canyon.

Lily Pond: The Lily Pond is the park's main scene stealer. Its reputation as the most photographed spot in Balboa Park is seldom questioned.

When there was talk of converting it into a fly casting pool there were critics aplenty. The Lily Pond remains.

Miniature Railroad: Probably the attraction that has given San Diego's children more pleasure than anything else in the park --- other than the zoo --- is the miniature railroad.

It began operations in 1946, has a half-mile route which figure eighths through a scenic 2-1/2 acres. Top speed is 15 miles an hour and some of the top contenders for rides are retired railroad men.

Another attraction is the old-time merry-go-round, whose age is covered with bright paint and a light-hearted theme.

It has been rotating in the park 32 years and before than entertained children at Coronado's old Tent City.

Museum of Man: The history of mankind is illustrated in the Museum of Man collection. Though it is housed in part of the former California Building, it is so popular that the building is becoming known as "Museum of Man."

Replicas of Mayan monuments, weapons dating back through the ages and an Egyptian Room complete with mummy are a few of the many attractions.

Topping the building is the 221-foot California Tower, one of the park's most beautiful and impressive landmarks. Its architecture is Spanish Renaissance and from it daily sound the Ona May Lowe chimes.

Old Globe Theater: There is an Elizabethan England spot in the park that provides both culture and light-hearted entertainment. This is the Old Globe Theater, replica of the theater where Shakespeare's plays first were given.

Opened for the last exposition, the theater is fronted by a bronze statue of Atlas holding the world.

Both Shakespearean and modern dramas are presented --- with accent on Shakespeare during the summer. Dancing on the green preludes the plays.

The citizenry take an active part in all productions --- paints scenery, serves intermission coffee and acts.

Organ Pavilion: The world's largest outdoor organ has been playing to Balboa Park audiences since 1915. A gift to the city from Adolph and John D. Spreckels, the instrument and its pavilion reportedly cost \$150,000.

Some of the organ's 5,000 pipes are more than 32 feet long. There are four finger keyboards and a pedal keyboard. Sheltering the organ are a 2-story ornately decorated shell and a mechanically operated metal curtain. Royal Brown has been official civic organist for 21 years. His summer concerts are Sunday afternoons and Monday evenings. The remainder of the year he plays Saturday and Sunday afternoons.

Palisades Building: Much of the craft materials for city playgrounds is turned out in the craft center of the Palisades Building's south section. Craft clubs and classes also meet there.

The building center is Recital Hall, available for programs, shows and parties. The Puppet Theater occupies the northern section. Every summer, the Padre Puppeteers delight youngsters with Sunday shows. Other small plays and shows are also presented.

Photographic Arts Building: Five hundred cameramen use the Photographic Arts Building, a modern Spanish-Colonial structure east of the House of Pacific Relations. Many of the area's photography clubs meet here, while continual exhibits attract even non-camera fans.

The **San Diego Zoo** is not the world's largest. But San Diegans believe it is the finest. They have reason, since the zoo's beautifully landscaped, 200-acre grounds and almost 3,600 animal specimens are internationally known and rated.

One of the zoo's most distinctive features is its great animal grottos. These, separated from viewers by moats, provide natural habitats for lions, tigers and bears.

Founded in 1922, the zoo has been visited by more than 50 million persons. Dr. Charles R. Schroeder, who has succeeded renowned Belle Benchley as director, plans two innovations.

One will be a children's zoo, where boys and girls can walk among tame animals. The other is the flamingo garden under construction just inside the zoo entrance.

Buzzing with artistic industry is **Spanish Village**, where San Diego artists paint, turn out ceramics, weave, sculpt, and cut and mount gems. Thirty-nine studios are in use there --- rented for nominal fees to artists of the professional class.

Rotating exhibits are displayed in a central gallery and most of the artistic wares are for sale. The village was established for the 1935-36 exposition.

Veterans Memorial Building: A relative newcomer to the park is the Veterans War Memorial Building. The \$234,000 single-story structure completed four years ago is a popular meeting place of the city's many veteran groups.

The building was recently opened for non-veteran group meetings. Seating capacity of the auditorium is 500. There are six meeting rooms.

Other Recreational Facilities: Park areas are studded with picnic grounds and with outdoor recreational facilities. In the Morley Field area are the swimming pool, municipal casting pool, tennis courts, shuffleboard courts and children's play areas.

Another tennis unit is the Balboa Tennis Club's courts and clubhouse. In the 6th Avenue area are the San Diego Shuffleboard and Roque Club, the Balboa Shuffleboard Club and lawn bowling.

Archery is so popular, there is an archery range at 6th Avenue and Laurel Street, field archery in Gold Gulch and crossbow archery at 6th and Grape Streets.

North of San Diego High School is the Balboa Riding Stable. On the park's east side are municipal 9-hole and 18-hole golf courses.

Other Buildings and Facilities: Other park buildings and facilities are the Boy Scout headquarters, Girl Scout headquarters, Camp Fire Girls cabin, the Blind Recreation Center, Balboa Stadium and the Bird Aviary.

July 29, 1954, San Diego Union, A-13:1-3. San Diego Zoo - The Dryer Flamingo Lagoon, given to the San Diego Zoo by Joseph E. Dryer, a retired San Diego merchant, was dedicated at a brief, informal ceremony at 1 p.m. yesterday (illus.).

July 29, 1954, San Diego Union, A-14:2. "Merchant of Venice" cast wins Constance Herreshoff's praise.

July 30, 1954, San Diego Union, A-10:1-2. "A Connecticut Yankee" enjoyed big audience at Star-Light Opera, by Constance Herreshoff.

July 30, 1954, San Diego Union, B-14:1-3. San Diego Zoo- Bryant Evens speaks of Zoo improvements.

Opening of the Dryer Flamingo Lagoon in the zoo this week had dramatized a new stage in the development of an already famous San Diego resource.

The San Diego Zoo has become world renowned because of what it had done for animals under the humane and imaginative guidance of Mrs. Belle J. Benchley as director. It became a witticism in the international zoo world that the San Diego Zoo was run for the animals. Of course, it was also recognized that the result of this policy worked for the benefit of the people too.

When Dr. Charles R. Schroeder took over the zoo directorship, he brought with him a fund of enthusiasm, zest and energy. But it became apparent that the animal collection at the zoo was already so far advanced that further major investments of energy in improving it were doomed to encounter the law of diminishing returns.

Consequently, Dr. Schroeder, who had his promotional training under the dynamic Dr. Harry Wegeforth, turned his best efforts to making the zoo more exciting and pleasanter for the people --- the cast customers who come from as near as Sixth Avenue and Laurel Street and as far as the Antipodes.

The results are starting to become apparent. Today the visitor that walks through the new zoo entrance walks onto a spacious promenade. In the background are the graceful and colorful flamingoes preening themselves against a background of tropical plants. The first effect is dramatic --- maybe not breath-taking, but inspiring.

Other improvements are being planned. Some are definite enough to talk about. Others are still in the Schroeder "How would it be if we . . ." stage of development.

One development that is right around the corner is the trying out of audible labels. A self-repeating tape recorder will be installed near the koala exhibit. A voice will give a history of the pets from Australia at regular intervals. Different adaptations of the idea will be tried out to find which is the most popular. Then, if it is popular, it will be tried on other exhibits. The advantage will be that the visitor can see more in the zoo by knowing more about what he is seeing.

Another experiment will deal with the use of ultra-sonic vibrations to take the place of screens for bird cages. It is believed that the birds will not fly though this sound band inaudible to the human ear. Thus vision and intimacy will be improved.

A third plan calls for a children's zoo in which there will be gentle animals that little folks can pet. This has proved delightful elsewhere. It should give a new dimension to zoo enjoyment here.

Still in the pre-planning stage is a suggestion for an outdoor refreshment terrace located at some place in the zoo where footsore patrons can rest, eat, drink and watch animals at play all at the same time.

All of this is as should be. The San Diego Zoo is not resting at the pinnacle of its fame but still growing in its ability to delight San Diego people of all ages and to attract visitors from all over the world. As Dr. Schroeder watched tourists taking pictures of the flamingoes this week, he said, "I'll bet you that a lot of people will be seeing our flamingoes on home viewers back east next winter." He had no takers.

July 31, 1954, San Diego Union, A-10:1-4. Elwood T. Bailey, retiring chairman of the San Diego Parks and Recreation Commission, said yesterday more parks needed here (illus.).

July 31, 1954, San Diego Union, A-11:4-6. Palisades Building - Dahlia Show opens today in Recital Hall.

September 11, 1954, San Diego Union, A-11:3-4. San Diego Zoo - Zoo profits from polio tests; four chimps on way.

September 11, 1954, San Diego Union, B-12:7. W. H. Chartres Martin writes Botanical Building in shameful decay.

Editor: As a native San Diegan, I am sure that I do not speak only for myself when I say that our beautiful Botanical Building has been allowed to fall into shameful decay.

This building, which was once one of the focal points of interest in our lovely Balboa Park, has now become an "eyesore" to all who come upon it. It is a shame that this lovely building constructed for the 1915 Exposition, and acclaimed all over the country for its beauty, now stands out in incongruity against the backdrop of world renowned Balboa Park.

I feel sure that if it has not now gone too far into disrepair, that proper restoration can again make it the spot that San Diegans were justly proud of.

October 28, 1954, San Diego Union, A-15:4-5. Royal A. Brown, civic organist, dies.

Royal A. Brown, 64, San Diego's civic organist since 1932, died yesterday afternoon at his home, 3771 Pershing Drive. He played his last concert on the Spreckels Organ, Sunday afternoon.

He had been under a physician's care recently for a heart ailment but the condition had not been considered serious. He returned to his work a month ago, having been on vacation.

Brown came to San Diego more than 40 years ago. He has spent his boyhood in El Paso. Here he played piano with the Hotel del Coronado orchestra and an organ in Rudder's Grill, a downtown dining room that was popular during World War I.

When the Spreckels organ made its concert debut on New Year's Eve, 1914, Brown decided that the organ was to be his favorite medium of musical expression.

He studied the techniques of Dr. Humphrey John Stewart, the first official organist, and with Marcel Dupre in Paris in 1927.

In 1932, when Dr. Stewart died, Brown, then his assistant, took over.

Brown's park concerts were abandoned during World War II, when the Navy took over the park but were resumed in 1947 and have continued since. Except for a variation in schedule during the summer months, he played regularly each Saturday and Sunday afternoon.

October 29, 1954, San Diego Union, A-16:4-6. Services for Royal A. Brown today.

October 30, 1954, San Diego Union, A-7:1-2. Electric Building - Church design and building conference, November 5 - 7.

November 2, 1954, San Diego Union, A-13:4-5. San Diego Zoo - Park Commission approved allocating two acres of property south of Zoo for a new children's zoo (illus.)

The city Park Commission yesterday approved the allocation of two acres of park property south of the San Diego Zoo for a new children's zoo.

Its action was unanimous and will be referred to the City Council for final action.

Milton G. Wegeforth, Zoological Society president, said the children's zoo would be developed to provide child-to-animal contacts, such as have been accomplished successfully at other zoos.

“It is the present thinking to have a well-landscaped site in which children will be able to pet farm animals, such as calves, pigs, lambs, kittens and many of the deer and llama family,” Wegeforth said.

He said financial support would be sought from community organizations and individuals. For those who wish to help build the new institution a blueprint of the various features and their cost soon will be available, he added.

November 3, 1954, San Diego Union, B-2:7. Pete Keller wants underground parking facilities north of Date Street in Balboa Park to relieve parking problem in downtown San Diego.

November 5, 1954, San Diego Union, A-30:1. The late Royal A. Brown, city organist in Balboa Park for more than 20 years will be honored at 2:30 p.m. Sunday by Paul D. Perry, carrillonneur, playing a special memorial program on the Ona May Lowe chimes in Balboa Park; Charles Shatto, who has been designed by the Park Department to take Brown's place pending the selection of a permanent successor, will give Saturday and Sunday recitals on the park organ.

1955

(Summary of Events in 1955)

(Notes: Dates of events are only approximate.)

Council approves crosstown freeway plan (January 28, 1955)

Speech by Frank Lloyd Wright in House of Hospitality
(March 25, 1955)

Japanese teahouse razed (April 6, 1955)

Sports group abandons baseball park in Florida Canyon
(June 16, 1955)

Stanford Research Institute plan downtown recreation and convention center
(August 17, 1955)

Warren Beach, new director Fine Arts Gallery (September 19, 1955)

Council okays downtown convention hall proposal
(December 21, 1955)

January 16, 1955, San Diego Union, A-12:3. All-breed dog show set for February 13 in Electric Building.

January 19, 1955, San Diego Union, A-11:7-8. Council approves \$6 million water bond issue for March 8 vote; pay raise proposal for mayor and councilmen also to be on ballot.

January 19, 1955, San Diego Union, A-11:7-8. The city Park and Recreation Commission yesterday agreed to a site for a civic theater in Balboa Park.

The commission adopted a resolution in which it defined the general areas as "east of Park Boulevard, between Laurel Street and the Veterans Memorial Building and Florida Street canyon."

Leo Calland, parks director, said the resolution will be submitted to the Planning Commission next Wednesday for consideration. The Park and Recreation Commission met with the Planning Commission last week to discuss possible sites.

The resolution said the exact site will be determined on the basis of architectural engineering and cost studies to be submitted at a later date.

Calland said the commission felt the general area defined in the resolution would best suit the interests of the park, the theater patrons and the public at large.

The commission's decision ended a six-month controversy over the best place to build the theater. Some wanted it at the downtown plaza, but others feared such a site would not provide adequate parking and would leave no room for enlarging the theater in the future.

The approved site will provide room enough for a theater with a 10,000-seat capacity, if desired, the commission said. It will also leave room for future expansion and ample parking space.

January 27, 1955, San Diego Union, A-12:7-8. Crosstown freeway plan offered; state commission to adopt route if councils approve it.

January 27, 1955, San Diego Union, A-12:1-2. Planners approve sports arena site on Mission Bay; action on proposed theater in park delayed by city commission.

January 28, 1955, San Diego Union, A-13:5-6. City councilmen back freeway proposal.

January 30, 1955, San Diego Union, C-2:1-3. J. J. Burke thinks city should donate site in Balboa Park for a convention hall and save "a million or two dollars."

February 2, 1955, San Diego Union, A-11:4. Auto show opens today in Electric Building.

February 3, 1955, San Diego Union, A-17:4. Auto show visited by 12,000.

February 4, 1955, San Diego Union, A-15:4. Overflow crowd jams Auto show; 4,000 inside.

February 5, 1955, San Diego Union, A-13:8. Electric Building - Auto Show.

The San Diego International Auto Show continued last night to draw crowds to the Electric Building in Balboa Park. For the second continuous night show officials briefly called a halt to ticket sales to prevent overcrowding.

February 5, 1955, San Diego Union, A-13:5. Convention of National Association of Soil Conservation Districts in Conference Hall.

February 7, 1955, San Diego Union, A-11:6. Electric Building - Auto Show to be held annually.

February 7, 1955, San Diego Union, A-11:7-8. San Diego Zoo - Mr. T. J. Martin of Gordo, Ala., millionth visitor (illus.).

February 9, 1955, San Diego Union, B-1:1-2. The City Planning Commission today will consider a proposed site for a civic theater in Balboa Park near Laurel Street, east of Park Boulevard.

February 10, 1955, San Diego Union, A-17:7-8. The City Planning Commission yesterday adopted without argument an approximately 25-acre site for a proposed civic theater in Balboa Park. Action had been postponed for two weeks to permit members of the planning group to study the site recommended by the park commission.

In adopting a map of the site for recommendation to the City Council, the planning commission also adopted a second map on the proposed sports arena in the Mission Bay area. The site was approved two weeks ago.

February 11, 1955, San Diego Union, A-15:4-5. Annual Dog Show to open Sunday in Electric Building.

February 14, 1955, San Diego Union, A-9:3-4. Electric Building - Cocker Spaniel best dog in show; more than 2,000 persons attended Silver Gate Kennel Club event.

March 1, 1955, San Diego Union, A-13:4. More than 50,000 flowers valued at \$250,000 will go on display at opening of Pacific Flower Exposition in Electric Building Thursday night.

March 1, 1955, San Diego Union, B-3:3. Old Globe crowd braves rain; is reward with "The Fiesta Flamenca," by Constance Herreshoff.

March 3, 1955, San Diego Union, A-13:1. Flower fete on tonight at park.

March 3, 1955, San Diego Union, B-2:7. Mrs. P. W. Murphy writes volunteer workers can beautify Balboa Park; wants parking space near the main park buildings.

March 4, 1955, San Diego Union, A-15:4. Electric Building - 500 view displays at Pacific Flower Show.

March 5, 1955, San Diego Union, A-13:4-5. Two thousand gather at Flower Show, by Bryant Evans.

March 6, 1955, San Diego Union, A-18:1-2. Flower exhibits in Electric Building viewed by 3,500; Garry Hall, Oceanside, won acclaim for his flower designs arranged during a half-hour solo performance on the stage.

March 6, 1955, San Diego Union, A-30:1-2. Museum of Man - fabrics and patterns from Peruvian graves at Museum (illus.).

March 7, 1955, San Diego Union, A-6:3. Pacific Flower Exposition closed last night after attracting more than 10,000 visitors; Mrs. Allan Zukor, chairman, announces it will become an annual affair.

March 7, 1955, San Diego Union, A-13:1-8. Ford Building - Schools agreed to pay \$24,000 to renovate Ford Building; their lease expires next year.

March 14, 1955, San Diego Union, B-12:8. Carol Sperry favors (Japanese) tea house rebuilding.

Have estimates as to its rehabilitation been seriously attempted? Would it be cheaper to tear it down and rebuild?

March 22, 1955, San Diego Union, A-13:5. San Diego Zoo - Parky, fugitive kangaroo, back in captivity after leaping over a four-foot wall to freedom 23 hours earlier (illus.).

March 23, 1955, San Diego Union, A-6:2. Seventh Home Show opens Saturday in Balboa Park..

March 24, 1955, (San Diego) Evening Tribune, A-25:1. Museum of Natural History asks \$5,000 fund aid from School Board.

March 24, 1955, San Diego Union, B-3:3. Orchid show in Food and Beverage Building Saturday and Sunday.

March 25, 1955. Text of "What a Civic Theater Could Mean to Community Development," speech by Frank Lloyd Wright in the House of Hospitality.

March 25, 1955, (San Diego) Evening Tribune, A-3:1-5. Frank Lloyd Wright arrives to survey auditorium plans.

March 25, 1955, San Diego Union, 17:1-2. Frank Lloyd Wright to survey Auditorium plans; give talk in Copper Room of Café del Rey Moro.

Efforts of San Diego to equip itself with a community auditorium will be studied here today by Frank Lloyd Wright, architect.

Wright, world renowned for his unusual approach to architecture and civic planning, will arrive this morning from Phoenix, where he operates the Frank Lloyd Wright Foundation, architectural school, Taliesin West.

After a press conference at El Cortez Hotel, Wright will be conducted by Glenn Rick, city planning director, on a motor tour of possible auditorium sites, principally in Balboa Park. The City Planning Commission recently recommended a site on the east side of Park Boulevard, between Laurel and Upas Streets.

Invited to accompany the architect on the tour, to start at 11 a.m., were Mayor Butler, Frank Hope, planning commission director, and G. Aubrey Davidson, pioneer San Diego planner.

At 8:30 o'clock tonight in the House of Hospitality at the park, Wright will speak on "What Civic Theater Could Mean to Community Development." The event, for which all seats have been sold, is sponsored by the local alumnae of Mills, Smith, Scripps, Stephens, Vassar and Wellesley colleges.

An amplifying system will be set up to carry the speech to the Copper Room of Café del Rey Moro, adjoining the House of Hospitality auditorium so those attending a dinner in Wright's honor may hear, Mrs. Sim Bruce Richards, committee chairman, said.

The dinner, to start at 6:30 p.m., also will honor Dr. Lynn T. White, Jr., president of Mills College, Oakland, and his wife.

Fielder-Lutes, a leading proponent of plans to erect a civic theater here, will introduce Wright.

March 26, 1955, (San Diego) Evening Tribune, A-10:1-3. Frank Lloyd Wright, architect, stresses need for Civic Theater; Recommends Park Site, by Bruno Ussher.

March 26, 1955, San Diego Union, A-12:2-3. Frank Lloyd Wright praises San Diego for civic spirit; famed architect calls opera-theater plans hopeful sign; 700 hear talk (illus.).

San Diego's spirit in planning for an opera house and a civic theater exemplifies one of the hopeful signs of the nation's future, Frank Lloyd Wright, the internationally famous architect, said here last night.

Wright, who is 85, was interviewed at El Cortez Hotel before he addressed 700 persons in the Balboa Park House of Hospitality.

"It is regrettable that such a spirit is not manifest in many other parts of the country," he said in the interview.

In his address at the House of Hospitality, Wright said the park is a natural site for a community theater.

"It is near town, but not too near, and there is plenty of space available for parking," he said.

He said in a question and answer session during his talk that a convention hall and theater "are completely different things." They should not be combined, he said. He added that community theaters should be built to accommodate no more than 1,000 or 2,000. Repeat performances would take care of audience demands, he said.

Wright toured the city with Glenn Rick, city planning director; Frank Hope, planning commission director; and G. Aubrey Davidson, pioneer San Diego planner.

Wright said in the interview that he would rather trust the voice of the people in affairs of art than the decision of politicians or what he called vested interests. He said the people too often mistake civilization for culture.

He said centralization had reached its apex and that cities must plan a spreading-out process.

"Our cities were built on the premise of fear," he said. "They are copied from models of ancient cities, that were built and planned to protect the populations from invasion.

“We have done nothing to improve the old-fashioned city except to cram it with more gadgets. Thus, the inevitable deterioration in the future.”

Wright said the basic reason for the slow expansion of culture in the United States involved the misuse of America’s scientific gifts.

“We have a magnificent tool kit full of scientific implements,” he said, “but we have never understood how to use them.”

Wright’s appearance here was sponsored by six women’s college associations --- Mills, Smith, Scripps, Stephens, Vassar and Wellesley; Mrs. S. Bruce Richards was chairman.

A dinner at Café del Rey Moro preceded Wright’s talk and also honored Dr. Lynn T. White, Jr., president of Mills College, Oakland, and Mrs. White.

Mrs. David Porter presided at the evening meeting. Fielder Lutes, a leader in plans for a civic theater, introduced Wright.

March 27, 1955, San Diego Union, A-17:1-3. Hundreds visit Orchid show in Food and Beverage Building.

March 27, 1955, San Diego Union, F-1:1-8, F-4:5-6. Home Show opens in Electric Building.

March 28, 1955, San Diego Union, A-13:5. Home Show attendance at new peak.

April 1, 1955, San Diego Union, A-21:2-5. Annual “Fiesta of the Pacific” backed by Hotel-Motel group.

April 3, 1955, San Diego Union, E-1:1-3. Prognosis: Frank Lloyd Wright on Theater.

Editor’s Note: Last week Frank Lloyd Wright, the famed architect, spoke in San Diego on “What A Civic Theater Could Mean To Community Development.” In view of the interest demonstrated by the overflow audience, **The San Diego Union**, without necessarily indorsing his views, publishes verbatim excerpts from his remarks.

The Need

“Our culture can’t afford to go on without the theater. We can’t allow the theater to lapse, we can’t depend on television, movies or whatever you have. They are no substitute for the theater, for the actual performance of the play. I think we are getting to a point where we have carried push buttons almost far enough. . . . we are getting to be egg-headed, goop-bodied, with one finger to push the button . . .

“The theater needs rescue. If we don’t come to the assistance of the theater pretty soon, I don’t think we are going to have the theater in the old sense at all. The theater needs a rebirth, perhaps a new birth . . . The theater has no means of meeting the competition that it has to meet today. It needs an entirely new --- well, shall I say --- machine? It needs some new building, entirely new. That building would not be one like the old theaters. You see, the old theater was really a peep-hole in the wall through which you viewed something. It actually was a peep-show, wasn’t it? . . . The actor was truly separated from the audience. He had very little chance to be truly artistic in his art, and he had to force everything, and the result was something not very pleasant.”

The Site

“I don’t know how serious you are concerning this matter of the theater, but I’ve been in your town, looking around at places to build it, and it seems to me there is one very good place, one that seems to be crying out for an accent in the way of a nice building . . . and that’s right in your beautiful park

. . . that would be the place for the theater . . . near town and not too near and plenty of parking in front of it, and the building out in the back, and you'd have space for the high basement we need."

The Cost

"I think it would be whatever the public would pay. That would determine the quality of the theater to be built and the size of it somewhat, too, but I don't think they ought to start in for much less than three-quarters of a million dollars."

The Designing

"I don't know of any other way to solve a building problem except by getting a good architect. . . . The most shocking thing I have ever witnessed is the way people get their architects. It is utter carelessness and ignorance. They invite some ignoramus to plan a building --- something that is going to last 300 years, that is going to represent them to posterity, that is going to characterize them all their life long and the lives of their children as well. Why the very best and most intelligently developed material in the world is not good enough! And people pick it up, take it out of a magazine and call a carpenter in to determine what kinds of buildings are going to be built."

The Challenge

"I think after all it is up to you. You are going to have the theater you want if you are any good at all, and I don't know why you aren't good down here I this end of things. You've got a wonderful situation . . . great fashioning of ground and sea and harbor and forest. You haven't done much with it except the park --- I think the park is delightful . . . We are the ugliest civilization the world has ever seen and we are trembling on the verge of the intent to make it beautiful."

April 3, 1955, San Diego Union, F-8:1. Electric Building - Final day of Home Show in Electric Building..

April 5, 1955, San Diego Union, A-20:6. "My Three Angeles" is hit at Old Globe, by Constance Herreshoff.

April 6, 1955, San Diego Union. Razing of Park Teahouse (illus.).

The old Japanese Tea House in Balboa Park was being razed yesterday to make way for the Children's Zoo. The Tea House and Garden was created for the 1915 Exposition, but has been closed since World War II when it was condemned. The two-acre site of the building and garden was allocated by the City Council in November. L. W. Willingham is the workman.

April 8, 1955, Point Newsweekly. Art of the City, by James Britton . . . A Wright Theater for Us?

This will be a "May Dayish" report, for I was privileged to spend a morning, noon and night last week in the presence of an indestructibly great man. Frank Lloyd Wright is probably the nearest American living equivalent of Sir Winston Churchill. Each received titanic leadership because he was able to see and boldly express basic needs of the times. It would mean nothing to protest that the one is a mere artist, the other a statesman. Both are prime ministers to the Lord of Creation.

At the invitation of architect John Lloyd Wright of Del Mar, I waited at 8 a.m. for the descent of Father Wright at Lindbergh Field. He came from Phoenix in a TWA air beast that looked grimy enough to have flown from another planet. When he appeared at the plane door, the unearthly accent heightened. Here was a being that radiated superhuman poise, even at a distance --- and at the age of 85. He did not stumble from the plane like his scurrying follow passengers. He alighted. Before seeking out his little knot of greeters, he turned and swept an appreciative eye over the beast that carried him. He --- at 85 --- was the only passenger to do so.

The alertness and sense-ability was continuous. When he entered the back door of the terminal, he stopped and said: "Why so many?" He had already found a fault in San Diego architecture: too many columns cluttering the interior!

As we went out the front door, he stopped again. "There it is . . . They always put it right in the middle, smash you in the nose with it . . ." He was attacking the flagpole!

9:30 a.m. --- A press conference convulsed the Copley press men as they scratched down Wrightisms they knew would meet a Copley Linotype: "Crucify the realtors! . . . They are the worst enemies of progress . . . Politicians (and he named McCarthy) know if you scare the people, they'll give you anything you want . . ."

11:00 a.m. --- A tour of the city, escorted by City Planning Director Glenn Rick, Planning Commission President Frank Hope and G. Aubrey Davidson. Relentlessly the lord and master of architecture laid on strongly condimented comments. Of Architect Hope's San Diego College for Women: "Is it a college or a glorified prison? Of the Town and Country Hotel: "The new brutality . . ." Of Torrey Pines Public Housing: "Man's inhumanity to man . . ."

Wright called "mediocre" the site officially proposed by the planning commission for a civic theater (Park Boulevard opposite zoo parking). He liked the proposed La Jolla theater site on Scripps Institution campus (but not the Scripps buildings).

Mr. Architect, his head full of ideas of his own, could not see remodeling the Federal Building (originally intended as a theater). He distinctly fell in love with Promontory Point (in the park near Sixth and Grape Streets). This is the spot referred to in his lecture as Aubrey Davidson's idea. Actually, Arthur Marston has talked up this one most, and it was for years first choice of the City Planning Department. Wright made it clear he favored the site for a theater, not a convention hall. "Conventions, I'd like to see abolished."

1:30 p.m. --- Lunch at Hotel del Charro, guests of beautiful Mrs. Alan Witwer, longtime friend of F.L.W. Wright said he had withdrawn from circulation the definitive exhibit of his work that was seen in Los Angeles last year, because the models and drawings are getting beat up. But Pare Lorentz, incomparable film director remembered especially for "The River" and "The Plow That Broke the Plains," is constructing a color movie based on Wright's buildings in use. Said F. L. W., "There never before has been a good film on architecture."

8:30 p.m. --- The Lecture. The most invigorating cold shower since Raphael Soriano, another good and "arrogant" architect, spoke and sputtered six years ago at the Fine Arts Gallery.

Frank Lloyd Wright gambitted straightface: "I don't want to sound as though I'm selling you my theater design, but what else can I talk about? . . . I've been trying to build my idea of a theater for 40 years, but have been stopped by one thing or another . . . When I was with Adler and Sullivan in Chicago, we built The Auditorium, and some thirty other theaters. Not one was bad acoustically . . ."

He described the theater he designed in 1949 for Hartford, never built because of local bigotry. His driving idea is that "The Theater needs perfect equipment to put in on a par with the movies." He believes in arena-type theater, sculptural in impact rather than framed like a painting.

The Hartford design is hexagonal in floor plan. One angle of the hex holds a revolving stage, divided in the middle. The hidden half can be lowered to the basement for "setting" while the front half is in use.

Said Wright: "We made a single ceiling that would go over player and listener . . . The ceiling is a drum really. It is subject to tension, as sensitive as you please. The floor of the stage is also a

drum-head, can be tuned as desired. . . . Here we have perfect acoustics . . . Every nuance can be heard . . .”

I have seen the drawings and model of the Hartford theater, though they were not shown to me by the Wright family. It appeals to me as one of the best of Wright’s master idea, and will be the crown to his singular career --- if ever built.

Strangely enough, it looks more in keeping with the terrain and building types of San Diego than of Hartford, and is perfectly suited to our park. Point will shortly carry more details and pictures.

While the august architect and work hurler wounded as many civic leaders as he enchanted, at least one key citizen to whom I talked is infected with the idea that the Wright theater should be built here --- privately if not publicly. I would not solve all our needs, but there is no question that it would magnetize residents and tourists alike

The audience stood spontaneously when Frank Lloyd Wright entered the lecture hall. Could San Diego do better for itself than to indulge the fondest dream of a proven immortal?

April 8, 1955, San Diego Union, B-2:7. Harry Warburton says build theater in Balboa Park.

April 10, 1955, San Diego Union, A-26:1-3. Easter parade in Balboa Park.

April 11, 1955, San Diego Union, A-13:4. Bonham Brothers Boys’ Band No. 9 in Balboa Park Bowl (illus.).

Yes	60,967
No	21,392

April 20, 1955, San Diego Union. HEADLINE: Dail is elected mayor of San Diego; Port bond issues win by 3-1 margin.

April 21, 1955, San Diego Union, A-15:1. Eleventh Spring Fair opening set in Balboa Park tomorrow (illus.).

April 21, 1955, San Diego Union, A-30:4-5. City ignores Union music ban in park.

Five Balboa Park buildings in which San Diego union musicians will not play after April 30 are still for rent and there are no plans to curtail their use, Leo Calland, city park and recreation director said yesterday.

The executive board of San Diego Local 325 of the AFL, American Federal of Musicians, has barred its members from playing after April 15 at private clubs and after April 30 at public rental facilities that have not agreed to use union musicians exclusively.

April 22, 1955, Point Newsweekly. Art of the City: (Reginald) Poland Regained?, by James Britton. Urges reinstatement of Reginald Poland as director of the Fine Arts Gallery following the resignation of Thomas Robertson.

April 22, 1955, San Diego Union, C-1:8. 101 freeway through San Diego, National City approved.

April 22, 1955, San Diego Union, C-1:5-6, C-2:1. Annual Spring Fair will open tonight, by Maureen Connolly.

April 23, 1955, San Diego Union, A-13:1-2. Convention hall study underway by Forbe and Lyte of Stanford Research Institute.

April 23, 1955, San Diego Union, A-13:4. Bright displays mark opening of Home Fair.

April 27, 1955, San Diego Union, C-1, C-2. Eleventh Annual Spring Fair of Modern Home Ideas will open at 6 o'clock tonight in the Electric Building, by Maureen Connolly.

April 30, 1955, San Diego Union, A-11:1-3. Model railroaders convene in park (illus.).

May 4, 1955, San Diego Union, A-14:1-2. Warren Beach, the man who may become director of the San Diego Fine Arts Gallery, will arrive in the city by plane tonight.

May 5, 1955, San Diego Union, A-29:4-6. Henry E. Calloway, chairman, announced yesterday that more than 1,000 young pianists from city and county are expected to participate in the seventh annual piano festival, September 25, in Balboa Park Bowl.

May 6, 1955, Point Newsweekly, 16-17. Beauty Spot? San Diego's trademark is in ruins.

Lionel van Deerlin, Channel 10 newsman, took his listeners on a trip into Balboa Park the other night, and on his way to the attractions he stopped at a park gift shop to look over the postcards.

Van Deerlin speaking:

"One (postcard) that caught my eye particularly displayed a symmetrically perfect shot of : 'The Botanical Building and Lily Pond, Balboa Park, San Diego, Calif.' On the reverse side the postcard carried this description:

" 'One of the beauty spots in world-famous Balboa Park, where the visitor has an opportunity of studying many exotic and rare tropical plants.'

"The Botanical Garden? Sure, I remembered it as a kid. This seemed like a choice place to begin my refresher course as a tourist host. And it's only a block from the little store where I'd bought my postcard. To the Botanical Building!

"But there a surprise awaited me. The place looked more like a bombed-out railroad station in Germany or northern Italy. Virtually every window had been punched out, with the jagged edges left to greet the lover of rare and tropical plants, drawn by those postcards.

"As I rounded the Botanical Building to the south side, I found a visitor scratching his head over the military-type sign: 'Restricted Area - Keep Out.' On the ground lay a window frame --- exactly where it fell or was yanked out by vandals --- and a bottomless washtub, source unknown.

"The man mistook me for a fellow tourist. And I was glad he did, because then I didn't have to answer when he cracked, 'Is this their park or the city dump?'

"Well, the boarding-up job was not perfect, and I climbed inside the abandoned structure.

“The first impression you get inside is that the old place isn’t too far gone, at that. Steel girders remain intact, and most of the redwood lath is still in place in the roof --- the way it was built to greet visitors to San Diego’s first fair 40 years ago.

“And inside the place today, you have the feeling of stepping into an untouched jungle. The palms need to have dead fronds tripped away, of course, but the vines swarm with green leaves, and in almost every open space some plant, like this *lilium auratum*, blooms against the depressing backdrop. Apparently they haven’t been told that no one cares!”

Van Deerlin has spotted a San Diego landmark which for millions throughout the work is virtually a trademark of San Diego.

The Botanical Garden was built in connection with the 1915 exposition and when the exposition closed it was operated by the city until 1941.

Through all those years it was one of the central attractions in world-famous Balboa Park. As Leo Calland, city park and recreation director, says, “probably more pictures of the Botanical Garden have been distributed --- in books, magazines and on postcards --- that of any other feature of the park.”

But in May, 1941 [sic], the U. S. Navy took over a large area of Balboa Park for wartime operations. The Botanical Garden was included in the area taken over, although the Navy, of course, has no use for it.

The public was restricted, and so were city caretakers from entering the area. At the war’s end the park area was returned to the city, and the Navy provided the city with funds for restoring facilities which it had used, damaged or converted. But the Navy took the position it had not used the Botanical Garden, so no reimbursement. The garden had not been used, merely neglected.

Several years ago the City Building Inspection Department condemned the structure as unsafe.

It began life as a Santa Fe station, and was dismantled and reassembled in the park. Structural members are heavy steel girders. Lack of paint and maintenance work let rust eat heavily into the metal.

Restoration would require structural repair, sandblasting and painting. Meantime, because some supports are rusted through, the structure is a hazard in the event of a heavy storm or earthquake. So the “Restricted Area - Keep Out” signs have been posted.

Calland reports that the City Park and Recreation Department provides some care for the thousands of rare plants in the garden, in the fond hope that some day restoration will be accomplished.

In 1947 a structural engineer drew plans for restoration of the Botanical Garden and the adjoining greenhouse. He estimated the cost at \$20,000 to \$25,000. Nothing was done.

In 1954, at the City Park and Recreation Commission’s request, the city engineer A. K. Fogg made a rough estimate on rehabilitation.

Prices had gone up since 1947, and deterioration had continued in those seven years. Fogg estimated it would cost \$37,248 to restore the Botanical Building, and another \$29,250 to restore the adjoining greenhouse.

On July 20 last year, the Park and Recreation Commission voted unanimously to ask the City Council for a \$37,248 appropriation from the capital outlay budget to restore the Botanical Building. The commission decided not to recommend restoration of the greenhouse because of the cost factor.

And there the matter rests. The City Council struck the item out of the capital outlay budget. This was no capricious act --- the Council was wrestling with a proposed capital outlay budget totaling many millions. In order to begin work on some of the most pressing street and utility repair and expansion work it upped the city sales tax from one-half per cent to one per cent.

The Council has heard no strong voice from the citizens of San Diego demanding restoration of the city's ancient trademark.

Says Calland, "I think the Botanical Garden restoration would have a dollars and cents effect on the city's tourist business, let alone its esthetic value to the community."

Says Van Deerlin: "When we advertise to the world, 1,400 acres of the most beautiful park in the world, and then lead out visitors to a tin can heaven, someone's being cheated. The tourist? Yes, but he can take his family next time to Golden Gate Park or lots of other places. Who, then? The people of San Diego, merchants, service industries and everyone who derives benefit from the tourist business. Indirectly, that's all of us."

San Diego, with a half million population, is muffing a park maintenance job it managed with spectacular success when it was a city of 100,000.

May 6, 1955, San Diego Union, A-17:5-6. Warren Beach, assistant director of the Columbus, Ohio, Gallery of Fine Arts, lauds San Diego Gallery, by Emily Stoker (illus.).

On the east entrance of Cabrillo Bridge is a tablet which was dedicated in 1928 to the memory of the San Diegans who had the vision in 1868 to plan for the park which today is one of the city's most distinct assets.

The tablet, which cites the founders of Balboa Park for "foresight and civic wisdom," reads:

"May 26, 1869, on the petition of Alonzo E. Horton and Ephraim W. Morse these 1,400 acres of pueblo lands were dedicated by trustees of the city --- Jose Estudillo, Magnus [sic] Schiller, Joshua Sloane --- to be forever a public park."

Eighty-seven years ago the need for such a park seemed remote. The long-range planning of these men should provide an example for San Diego in other community endeavors today.

May 29, 1955, San Diego Union, A-16:1-4. East San Diegans will dedicate 37-acre Colina del Sol Park at noon Saturday (scale drawing).

Butler, representing Better Sports, Inc., tells plans; 1,439 sign petitions favoring park site; Alonzo de Jessop, representing a group of property owners, opposed the site and want the park developed "along the lines for which it was originally dedicated."

Directors of the San Diego Chamber of Commerce today unanimously indorsed the Florida street canyon in Balboa Park as a suitable and desirable site for a baseball stadium. They approved its inclusion in the city's master plan.

June 9, 1955, San Diego Union, A-24:1-2. Chamber of Commerce directors ask Botanical Building restoration; also favor removal of adjoining glazed exhibition building as "a dangerous hazard to public safety."

June 9, 1955, San Diego Union, B-2:6. Mrs. Hertha Conway writes Balboa Park's purpose shouldn't be changed.

Editor: It may be well to look into the record to determine just how the wonderful Balboa Park came into existence. I am by no means certain, but from long-time residents the story is that the

park was to be preserved as near as possible to the natural appearance of the terrain. This would definitely rule out a ball park or any other commercial project.

Roads, trash disposal, golf links and parking have already removed most of the original park. It takes close watching now to get a look at a road runner or rabbit, which flourished when we first came to San Diego. It might do our small fry some good to walk through the wilderness section of the park, instead of hitting the roads at 60 and seeing nothing but a few crushed bunnies.

What about the Navy Hospital? Will it stand for the raucous sounds emanating from a ball park? Will the rest of the park be destroyed to make parking space? And, with a commercial foothold, will restaurants, bars, and other such businesses be permitted?

It is time for the City Council to start saving some of old San Diego, including the park. San Diego is notorious for two things --- commercialism and lack of civic pride. The cause and effect is obvious.

What is the matter with the mesa across the San Diego River? Two big schools and our new hospital are located there. There are good access roads --- and the whole mesa to park in. Why Balboa Park? If it is a commercial project, let the promoters dig up private land, the same as any housing development or business.

The park belongs to all San Diego, and not to some one special interest. And I am a rabid Padre fan, too.

June 10, 1955, San Diego Union, A-17:1-2. Port of San Diego, San Diego Zoo neutral on ballpark plan.

June 10, 1955, San Diego Union, B-2:1. EDITORIAL: Ball Park Debate.

Emotions are being stirred in the controversy over the possible construction of a new baseball park in Balboa Park. Perhaps this is the natural thing, with many persons having firm convictions on either side.

But it behooves city officials, who must make the final decision, to render judgment on the facts of the case, not the emotions.

The present baseball park occupies valuable city property which could be used better for other purposes. The stadium is antiquated and in disrepair.

There are the basic premises from which decisions must start. The questions then are: Should the ball park be on public property and be publicly owned? If so, should it be located in Balboa Park?

None of these questions can be answered in the interest of the entire city with a contest of petitions or letters. The decision can't be made properly by counting the names of ardent protestants or adherents. Anywhere the stadium is located there will be protests and some support.

This is not to say there is not a proper place for debate on the pros and cons of the issue. Those on both sides should be heard.

But when the debate is over the arguments of these people, not their emotional feelings, must guide the planning commission and the City Council if the decision to be made is based on consideration of the overall welfare of the entire city.

June 16, 1955, San Diego Union, A-21:8, A-30:1-2. City Planners reject Balboa Park stadium; vote 4-2 against ball field (illus.).

The City Planning Commission yesterday voted 4 to 2 against including a baseball stadium in Balboa park in the city's master plan for public buildings.

Commissioners Victor Lundy, Sibley Sellew, Charles Salik and Frank Hope, voted for a motion by Lundy which said Florida Street Canyon in Balboa Park is not a suitable site for a baseball stadium as proposed by Better Sports, Inc., which proposes to build a new field for the San Diego Padres.

John Murphy and Charles Taylor voted against the motion. Commissioner Quintin Whelan was out of town.

The vote came after a two-hour hearing before 200 persons.

John Butler, an attorney and former mayor, said after the hearing he was disappointed with the committee's action.

"In view of this decision, it is uncertain whether Better Sports, Inc. will pursue the pending proposal for a lease of the land from the city," Butler said. "The final decision will be made, possibly tomorrow by the directors of Better Sports, Inc."

Butler is a director of the group.

Mrs. Mona Andreen, deputy city attorney, said five of the City Council's seven members must vote in favor of the stadium to overrule the planning commission's action.

The commission's decision was greeted by cheers from a large crowd that heckled Butler and other speakers for the stadium early in the hearing.

Lundy, Sellew and Salik said favorable consideration of the stadium was ill advised now at a time when the Stanford Research Institute is considering Florida Street canyon among the sites it will recommend to the Council for a civic auditorium.

Murphy and Taylor said some civic development of Florida Street canyon was necessary as the best protection for Balboa Park.

Glenn Rick, city planning director, said he could not personally recommend the Florida Canyon site for the stadium. He did not explain his decision at the meeting. He said afterward he favored a stadium site in Mission Bay Park.

Rick said the Harbor Department said it needs Lane Field, which it currently leases to the San Diego Padres, for tidelands development.

James Reading, city traffic engineer, said there would be no traffic congestion during night baseball games if the stadium were built in Florida Street canyon. He said, however, some street improvements and regulation would be necessary to handle traffic after Saturday and Sunday games.

Butler said the city attorney and park and recreation commission has ruled the baseball stadium was a legitimate park use.

Rick read an opinion from City Attorney DuPaul that said the stadium could be built without a vote of the people, pay parking lots could operate in the park and there was no law against selling beer or intoxicating liquor in the park.

Arguments for the stadium were outlined principally by Butler; Bruce Hazard, a Chamber of Commerce director; Ed Riley, AFL Central Labor Council; Jerry Rudrauff, a director of Better Sports, Inc., and Ed Peterson, who identified himself as a baseball fan. They were:

1. Need for the stadium as a civic improvement in San Diego.
2. Inability of the city to maintain all of Balboa Park as a park.
3. Desirability of private financing, as proposed by Better Sports, Inc.
4. Little possibility of jeopardizing the zoo as a tourist attraction.
5. Little traffic congestion compared with other central sites.
6. Lack of noise because of the distance from the park to the homes in the neighborhood.
7. Need for a home for the San Diego Padres who advertise San Diego.
8. Need for the stadium for other civic events, such as outdoor conventions and junior sports activities.

"We need the stadium for conventions and for jobs," Riley said. "Strangely, I find myself in complete agreement with the Chamber of Commerce."

Principal opposing speakers were George W. Fisher, an attorney; Duane Maley, a football coach; Otto Ketelsen, a businessman; Stuart Lake, an author; Armistead Carter, a retired property owner, and Alonzo Jessop, a jeweler. They stressed:

1. Depreciation of home values in the neighborhood.
2. Noise from crowds, loud speakers and traffic.
3. Traffic congestion.
4. Interference with the zoo.
5. Undesirability of allowing a commercial enterprise in the park.
6. Eliminating Florida street canyon as a site for a golf course or civic auditorium.
7. Introducing alcoholic beverages into the park.
8. Possibility of using city funds to make improvements needed by the baseball club, such as streets and access roads.

In a letter to Mayor Dail, William Templeton Johnson, a member of the Board of Park Commissioners from 1920-25, yesterday reiterated his opposition to a baseball stadium in the park.

The park and recreation commission will vote on the proposal Tuesday morning. The Council is expected to act after receiving recommendations from the planning and park and recreation commissions.

June 16, 1955, San Diego Union, A-30:1-2. Planning Commission urges two 18-hole Torrey Pines golf courses.

June 17, 1955, San Diego Union, A-19:3. Sports Group abandons its Balboa Park plan; rejection by City Planning Commission cited in statement.

Better Sports Inc. yesterday gave up the proposal to build a 15,000-seat baseball stadium in Balboa Park for the San Diego Padres and other civic uses.

Directors of the nonprofit corporation --- John D. Butler, Fielder Lutes, Jerry Rudrauff, Al Schuss, Jim Robinson, Mitch Angus and Tom Hamilton --- issued a statement announcing the action:

“For the past several months Better Sports Inc. has sought to advance a plan for creation of a baseball stadium in Florida Street canyon of Balboa Park,” it said.

“The plan involved the cooperation of Better Sports Inc., the San Diego Baseball Club and the city of San Diego. It was proposed with these facts in mind:

“1. That Pacific Coast League baseball is a civic asset and has an important place in the recreational life of the city of San Diego.

“2. Lane Field is woefully inadequate and the land is vitally needed for purposes more closely in line with the tidelands trust.

“3. That economics preclude the possibility of building a new stadium by private capital.

“4. That, unlike many other cities, San Diego is not capable at the present time of creating such a facility by expenditure of public funds.

“The plan outlined by Better Sports Inc. was predicated on the use of a portion of the Florida Street canyon area of Balboa Park. Financially the plan was feasible only at this site. In addition the raising of sufficient money to make the project possible would have required practically unanimous public support and approval.

“Since the city planning commission has rejected by 4-to-2 vote the inclusion of the canyon site as the location of a baseball stadium in the city master plan and since violent feeling against the proposal was expressed at its hearing, the ingredients necessary for success seem to be lacking.

“The directors of Better Sports Inc., therefore, are reluctantly abandoning their proposal.

“The board of directors wishes to thank the San Diego Baseball Club for its cooperation and assistance and to thank the many public-spirited citizens who have signed petitions, made pledges for membership and worked for the success of this plan.

“All membership subscriptions which have been received by Better Sports, Inc. and are now held in trust will be returned to the subscribers as soon as possible.”

Butler said the corporation will remain in existence.

“We will be happy to listen to a better plan for the stadium or any proposal to improve sports facilities in San Diego,” he said.

August, 1955, San Diego Magazine, 18, 68. The City Observed, by James Britton on revived emphasis on converting the Federal Building (in Balboa Park) into a civic auditorium

The point is that daring and original architects could bring a grand new sense of order to the choked section of the park around the Federal Building. By diverting most of the parking to the rear of the cluster of buildings there, the plaza on which they face could be freed of parked beetles and restored as it deserves to gardens and promenades. Ideal place for sculpture and maybe a fountain.

August 7, 1955, San Diego Union, A-13:1-8. City considering survey to determine how many park buildings can be preserved; lath house, condemned in 1941, needs repair; \$37,250 to build lath house and \$29,250 to rebuild hot house; two sites favored for Art Gallery wings, by Peter Kaye (illus.).

The city is considering a survey to determine how many buildings in Balboa Park can be renovated and preserved.

Ed Blom, assistant city manager, said most of the buildings in the park were built as temporary structures for the 1915 Worlds' Fair. He said others were constructed for the 1935 Exposition.

"We are considering a study to determine what buildings can be saved," Blom said. "The city cannot afford to replace them or maintain them. We can't keep them as they are and we would hate to lose them."

"Our big chance is to hold another international exposition and invite exhibitors to build permanent structures."

Leo Calland, city park and recreation director, said the Park and Recreation Commission has recommended that the city employ a structural engineer to determine what buildings can be preserved and how much it will cost to maintain them.

Calland said all buildings in the park are being used except the Medical Arts Building and American Legion Building. They are to the west and east of the Fine Arts Gallery on the Plaza.

Both these buildings were constructed in 1914-15, renovated in 1935 and condemned in 1946.

"Neither building has a foundation," Calland said. "They are just resting on wooden blocks. In any other climate they would have collapsed."

Calland said he believes sites of these buildings should be reserved for future wings to the Fine Arts Gallery. He said temporary parking lots may be laid out if the two buildings are torn down before wings to the Fine Arts Gallery are erected.

"Long-range plans by the Park and Recreation Commission contemplate additional parking around the perimeter of the park, such as in the open area east of Park Boulevard," Calland said.

At least two buildings in the park will be renovated this year if the City Council Thursday approves a capital outlay budget recommended by City Manager Campbell. The are:

1. The lath house of the Botanical Building, which was condemned in 1946. Campbell has recommended \$37,250 to rebuild the lath house. Another \$29,250 is required to rebuild the hot house of the Botanical Building, Campbell said this is a desirable project but it cannot be financed now.
2. The Ford Building, which has been used by city schools since World War II. Blom said the schools have agreed to pay \$24,000 to renovate the building. Their lease expires next year. Blom said \$15,000 will be spent to repair the building this year and the remainder next year.

Various uses have been proposed for the building. Blom said they include a civic theater, aviation museum and National Guard Armory.

Calland said repair of the buildings would range from painting and replastering to almost total reconstruction. He said there never had been a survey to determine their condition.

"Recent developments are favorable," Calland said. "I am glad to see that money may be appropriated to repair the Ford and Botanical Buildings. If the Fine Arts Gallery gets two new wings it will be the biggest improvement in years."

August 16, 1955, San Diego Union, A-23:4-5. "Song of Norway" opens Thursday at Starlight.

August 17, 1955, San Diego Union, A-1:1-2, A-2:3-4. Convention Center costing 7.5 million recommended here; four square blocks in downtown San Diego picked by Stanford Research Institute.

James H. Forbes, Jr., project leader, read the recommendations yesterday to the City Council and city planning commission. He submitted copies of a report that cost the city \$15,000 and took five months to complete. . . .

Forbes said most of the sites in Balboa Park would be forced to depend on existing streets that are inadequate for heavy traffic.

The report also cited inaccessibility of downtown hotels and restaurants in Balboa Park and difficulty of winning public sanction to use part of the park for the recreation and convention center.

August 17, 1955, San Diego Union, A-1:2. Proposals at a glance.

Highlights of the Stanford Research Institute report on recreation and convention center possibilities for San Diego are:

1. Erection of three multipurpose buildings --- convention hall, sports arena, concert hall and little theater --- on a four-square block area in downtown San Diego at a total cost of 7.5 million dollars.
2. Seating capacity of 8,000 (permanent) and 3,000 (portable) in a 195,000 square-foot convention-hall arena; 3,000 seating capacity in a concert hall and 600 to 700 seating capacity in a little theater.
3. Use of the area between Ash and Cedar Streets, First and Third Avenues.

August 17, 1955, San Diego Union, A-2:1-4. City officials praise Stanford Research Institute's Report; pledge consideration; "What we required," Mayor Dail says.

Councilmen and other city officials yesterday praised the Stanford Research Institute's recommendation for a downtown recreation and convention center and promised quick consideration of the report. They commented as follows:

MAYOR DAIL - It is an excellent report. I have always believed general obligation bonds were the only methods of financing. It is a good site based on factual data and technical reasons. The information is what we required.

COUNCILMAN BURGNER - I am extremely pleased with the thoroughness of the report. We must determine the relation of the center's benefits to the public with the expense of general obligation bonds.

COUNCILMAN SCHNEIDER - This was an excellent job. I accept the report and feel it is so well done that the entire city could be content with it.

COUNCILMAN CURRAN - The report is particularly good in considering the effect of the Highway 101 freeway and its bisecting of the area to the north.

COUNCILMAN KERRIGAN - This is a pretty thorough report. It is a clear and concise analysis. The site is almost ideal. Financing is up to the people.

COUNCILMAN EVENSON - This is an idea site for the facility. I believe general obligation bonds are the best and cheapest method of financing. It was an excellent presentation.

Councilman Williams was absent on vacation and unavailable for comment.

FRANK HOPE, chairman, city planning commission - The report was excellent. Parking is something to think about. The site is OK.

GLENN RICK, CITY, city planning director - It was a fine job. The proposal will stand or fall on parking, condemnation of the land and proposed uses of the concert hall and little theater.

MITCH ANGUS, Convention and Tourist director - We have not had time to study the report. From what we have heard it is very interesting. The executive committee and board of directors will meet soon to review the report.

August 18, 1955, San Diego Union, A-9:1-2. Final summer concert, a "Pops" presentation by Ferde Grofe, scheduled for Tuesday.

August 18, 1955, San Diego Union, A-10:2. Robert Shaw given ovation for "Requiem." By Constance Herreshoff.

August 19, 1955, San Diego Union, A-17:4. The Stanford Research Institute's plan for a \$7,500,000 downtown recreation and convention center was indorsed yesterday by the board of directors of the San Diego Opera Guild.

August 21, 1955, San Diego Union, A-14:1-2. Robert Shaw proposes symphony tour of nearby cities.

August 21, 1955, San Diego Union, A-15:1-8, A-49:1. The proposed convention center.

August 21, 1955, San Diego Union, E-6:7-8. Next Sunday afternoon the Voice of America will broadcast to Europe an all-Dupre program to be played by Esther Wright of Pittsburgh on the great organ in Balboa Park.

August 22, 1955, San Diego Union, A-11:3. Old Globe lists plays for next season.

August 23, 1955, San Diego Union, B-2:1. EDITORIAL: Fine Season, Fine Finale.

Much in the fashion of old-time Louisiana tradesmen who rewarded business associates with special gifts, "lagniappe," the conductor, soloist and musicians for tonight's "summer symphony" concert have donated their talent.

Neither Ferde Grofe, pianist Howard Wells or the orchestra will profit from the "bonus' concert. . . . The general fund of the San Diego Symphony Orchestra Association will be the beneficiary of the income from this all-American program.

Thus the seven-concert season ends on a note of festive triumph. Robert Shaw's previous two years of artistic and box-office success set such high standards that one wondered if the dual progress could continue.

It did. Such has been the popularity of the programs that attendance has increased 48 percent over that of the year before Mr. Shaw arrived.

The success has not been limited to that of the box office. The concerts have aroused interest all over the nation for the artistic perfection attained, the production difficulties solved and the innovations made.

Listeners heard something new, an original composition by Robert Kurka which the association commissioned him to write; Back and Vivaldi and Mozart represented the old. Hector Berlioz' "Requiem" was the "biggest." Its score calls for a chorus of 300, giving many young singers from city and county schools a great experience with a great conductor.

It all respects, it has been a fine season!

September 11, 1935, San Diego Union, B-12:7. Botanical Building In Shameful Decay

Editor, The Union: As a native San Diegan I am sure that I do not speak only for myself when I say that our beautiful Botanical Building has been allowed to fall into shameful decay.

This building, which was once one of the focal points of interest in our lovely Balboa Park has now become an "eyesore" to all who come upon it. It is a shame that this lovely building constructed for the 1915 Exposition and acclaimed all over the country for its beauty, now stands out in incongruity against the backdrop of world-renowned Balboa Park.

I feel sure that, if it has not now gone too far into disrepair, proper restoration can again make it the spot that San Diegans were so justly proud of.

W. H. CHARTRES MARTIN

September 17, 1955, San Diego Union, B-12:1. EDITORIAL: Balboa Park Is Civic Jewel.

Frederick Law Olmstead [sic], Jr., world recognized landscape architect was retained by the park commission in 1947, to study Balboa Park. His report reiterated some basic park principles and called attention to some local violations.

He pointed out that then the 1,400 acres of public lands were saved in the 1880s for a "central park" the object was to provide opportunity for outdoor physical recreation and combine such activities with the refreshing effect of spacious, country-like landscape surroundings. In a big city this is unattainable except by devoting a large amount of land in one tract.

Olmstead found that the justifying purpose has often been ignored. "This intermittent yielding to the idea that it was just vacant land available for parceling out to meet any kind of use advocated at the time by any strong pressure group has led to whittling away parts of the original area and greatly curtailing the value for park purposes of what has been retained."

It may well be that the alteration of the park has been what the people wanted. The buildings and heavy traffic thoroughfares, which tend to destroy the spacious rural character of Balboa Park, do serve a public interest. It would be unwise to make a blanket rule against all changes.

Still the history of great parks record the need for long range planning and continuity of effort, fixed appropriations, and resistance to pressure groups. Balboa Park is a great park. But because some regard it as a grab bag, continuous inroads have been made.

It is well to remember that it now has about 1,300 acres; only a very small percentage of it is level, the rest being canyons and hillsides. Commandeering even a small area of level ground reduces a large percentage of the usable space.

The situation which Mr. Olmstead described --- and decried --- in 1947 has become worse. The park and recreation commission, under present organization, is powerless to stem the deterioration. It, for example, rejected the recent request for a 200-car parking lot behind Alcazar Garden. The mayor, city council and manager ignored the commission's recommendation.

A citizens' advisory committee recently studied Mission Bay to determine the best methods of protecting and developing it. Does not Balboa Park deserve the same kind of study?

A group of citizens should study the long-range needs of the park, reflect the community desires and determine whether or not the park commission should be given some power to plan and promote and represent the park for all the people.

November, 1955, San Diego and Point Magazine, 19, 47. Civic Theater, Continued; two modest proposals for the park, by James Britton (illus.).

Last month we found it would be a great mistake to expect exceptional facilities for music and drama to develop as part of a downtown convention facility. It was no part of our intention to minimize the great necessity for convention facilities, but rather to make clear that cultural facilities should not be cast in the role of step-sister.

A report by the Stanford Research Institute, now being taken too seriously in many quarters, does just that. The Institute suggested lumping theater facilities with mammoth convention facilities on a single site. There is little chance that a satisfying theater architecture could be achieved in that situation within a half-way reasonable budget --- if at all.

Mindful that the City Planning Commission, after extensive study, had endorsed a theater site in Balboa Park, we here explore a couple of very wonderful and definite possibilities along that line.

Starting with the specific piece of park favored by the Planning Commission (Park Boulevard, opposite zoo parking), Architect William Rosser worked up a theater design based on beautifully simple geometry (see cut). The exterior appearance would be of a great glass drum. In the daytime this would glitter wondrously as a jewel. At night it would reveal dramatically the swarming humanity within on several levels of circular promenade, and the humanity within would gaze out upon the far-strung jewels of city lights.

Parking in Mr. Rosser's plan would use flat land, stretching north and south of the theater, and the zoo parking directly across Park Boulevard. The sea of cars would be pushed back at the main approach, where a formal reflecting pool would heighten the spectacle of citizenry drawing to a focus on the stage arts.

The building itself would have crowd-making magnetism.

Mr. Rosser's basic idea is very splendid, and has the merit of conforming with the expressed decision of the official planners. A newcomer, Rosser could not be expected to realize that the planners often abandon their preferred positions.

Something like the Rosser design would mean starting from scratch on raw ground. Something considerably cheaper, and quite as satisfying could be achieved by remodeling the Federal Building.

The advantage of remodeling the Federal Building is that you start with a reinforced concrete structure, the foundations of which were designed to carry a sloped-floor theater of 3000 seats or more. The fact that this structure was never completed as a theater makes it a monument of ingratitude because it was given to the City by the Federal government expressly for theater purposes. It now has a flat floor, installed originally for exposition use, so the Park Department has happily latched on to it to serve as a gymnasium.

Esthetically hep architects could take this shell and convert into an attractive theater, big enough even for symphony and opera. Other nearby buildings could be gradually converted in ways adding up to a glamorous entertainment center, a worthy supplement to the museum center discussed elsewhere in this magazine.

For example, the building (another gym) now wedged awkwardly between the Federal Building and Balboa Park Bowl could be transformed into a restaurant. Its stucco walls would give way to glass, and the structure would then be discovered to occupy a superb view site.

This plan implies finding or building some other housing for gymnasium capers, and might be hard to sell to the Park Department, whose head, Leo Calland, is especially proud of his busy indoor sports program.

Just as the buildings along Laurel Street cry out for development as a unique museum complex (see page 20), so the Federal Building and its neighbors around Pan-American Plaza could add up to an equally unusual theater complex. Indeed, theaters and museums would be charmingly interlaced if the potential were fully developed. For one thing, the Ford Building is idea for an aviation and industrial science museum --- another local dream so far aborted. Or a museum of theater and motion pictures.

The horror that always rears up whenever conceptions like the above are discussed is parking. It is too bad that Pan-American Plaza has to be a parking lot. The aim should be to reduce the amount of parking in choice spots, yet the City Council has just condemned another beauty spot (back of the Alcazar Gardens) to be black-topped. Park Commissioner Mary Fay is disturbed enough about the trend to suggest with her inimitable straight-faced humor that the name be changed from Balboa Park to Balboa Parking.

Park Director Leo Calland likes the idea of confining parking pretty much to the fringes of the park and providing circulation within his gorgeous acres by way of open-sided buses such as were used during the exposition. This fleet could be decked out in handsome style and could be supplemented by rentable electric two-seaters and even horse-drawn carriages.

Another desirable of traffic control within the park is to build a through route to lighten the jams on Cabrillo Bridge. Tentative plans exist for such a road. It would go through canyons just south or north of Cabrillo Bridge and tunnel under one or two built-up spots.

When all convention activities are siphoned out of the park into a proper downtown facility, the present parking pattern relative to the Federal Building should be quite adequate. If more is needed, it can be developed eastward from the theater. At any rate, parking questions are not enough reason to dismiss a really wonderful prospect. The Federal Building could be made to yield far more impressive results as a theater than could possibly be had nesting in the shadow of the gigantic convention arena now being promoted for downtown.

November 17, 1955, San Diego Union, A-11:4-8. Planners OK central site for convention hall-arena; theater in park favored, by Peter Kaye (drawing of downtown convention hall by Frank Hope).

The city Planning Commission yesterday recommended unanimously that a conventional hall-sports arena be built in a four-block downtown area bounded by Ash and Cedar Streets, First and Third Avenues.

The commission recommended by a 6 to 1 vote to reaffirm Balboa Park as the site for a civic auditorium. The recommendations will go to the City Council for approval. . . .

The commission, by omitting the civic theater on the proposed downtown site, reaffirmed a recommendation earlier this year to build it across from the Veterans' Memorial Building in Balboa Park. . . .

Commissioner Taylor voted against the civic auditorium in Balboa Park.

"The only way we'll get a theater is by adopting it in the master plan of the Stanford Institute for convention facilities," he said.

The commissioners who favored the park site indicated there was no need for San Diego to concentrate its convention and theater activities. . . .

Opponents had no organized program but generally favored Balboa Park as a site for convention and auditorium facilities. They were:

Mrs. Marguerite Schwarzman, chairman of the steering committee of the San Diego Metropolitan Forum, who said she believed the convention hall and auditorium should be separated. She said she believed the auditorium should be placed in Balboa Park.

William F. Rosser, an architect, of 3975 Goldfinch Avenue, said he recommended a Balboa Park site because of adequate parking and "exciting" terrain. He presented a sketch of a proposed festival theater in Balboa Park.

Lt. Comdr. M. E. Fisher, U. S. N., ret., of 1282 Upas Street, urged sites in Balboa Park or Mission Bay Park. He said condemnation of land for a convention hall was an "un-Christian act."

Jacob A. Wapplehorst, 2409 Tulip Street, said public money should not be used for a structure that would allow private interests to benefit. He urged a Balboa Park site.

December, 1955, San Diego and Point Magazine, 33. (Drawings) Continuing our campaign to make known the theater possibilities of Balboa Park, we present here Architect Lloyd Ruocco's well-worn and well-wearing model. When the model was first sprung on key citizens ten years ago, it was a decisive factor in quashing the City's cheesy plans for converting the Federal Building into a theater.

This magazine's proposal is that the Federal Building *should* be converted into a theater and that the convention job should embody some of the virtues of Ruocco's model. In the plan above, the circular structures are restaurant, lounge and art gallery. Three pie-wedged auditoriums tie into a common staging arena which could be quickly and quietly subdivided as needed.

The aim throughout is amenity for humanity.

December 1, 1955, San Diego Union, A-10:1-2. Eighteenth annual Electric Show closed six-day run in Electric Building last night; more than 185,000 persons visited the show.

December 2, 1955, San Diego Union, A-16:1. The membership of the San Diego County Historical Days Association has indorsed the Fiesta del Pacific scheduled to open July 19.

December 13, 1955, San Diego Union, A-13:8. San Diego's recreational needs last night were outlined at a public meeting attended by 150 residents and civic officials; park and recreation department's master plan would cost 20 million dollars and take care of the city's needs to 1960.

December 15, 1955, San Diego Union, A-21:8. Chamber of Commerce yesterday urged restoration of all park buildings.

The recommendations adopted were:

1. To oppose demolition of the buildings.
2. To advocate retaining their present architectural style
3. To request the city to proceed with restoration of the exteriors of the buildings, to maintain and preserve them in a safe condition until a permanent use of the buildings or an approved plan may be developed.
4. To advocate restoration and repair of the lath house of the Botanical Building, but not the hot house.

Park plans for the outskirts of San Diego should be coordinated between the city, the county and neighboring communities, Chamber of Commerce directors said yesterday.

December 15, 1955, San Diego Union, B-6:2-3. Cultural tax studied by City Council; voters would have to approve a charter amendment to all city to levy the tax; San Diego Zoo is financed in part by a two cent a \$100 assessed valuation property tax.

December 16, 1955, San Diego Union, A-16:3. San Diego should spend an added \$20 million dollars for recreational needs, Leo Calland, City parks and recreation director, told the City Council yesterday.

Calland enumerate facilities needed to fill proposed community park and recreation centers.

December 16, 1955, San Diego Union, A-21:2. Council to study pleas for more cultural funds.

December 18, 1955, San Diego Union, A-31:3-8. Park and recreation hearings planned; San Diego's needs will be detailed in master plan; 20-million dollar long-range development is envisioned for city (map showing part of proposed city park master plan).

December 18, 1955, San Diego Union, A-31:8. The City Council will hold a public hearing Tuesday on the Stanford Research Institute's recommendation for a downtown convention center.

Henry Schwartz is chairman of the committee known as Property Owners Against the Stanford Plan.

December 18, 1955, San Diego Union, A-32:1-3. Question of what to do with all buildings along El Prado to come before City Council soon (illus.).

City officials have been considering it for several years but have never reached a decision. This time the problem is being presented to the council in the form of a set of recommendations by Chamber of Commerce directors.

The directors adopted the recommendations after a special Balboa Park committee, headed by MacArthur Gorton, Jr., made a study of the buildings.

These are the alternatives facing the city.

1. Renovate all the buildings along El Prado.
2. Raze all the buildings.
3. Maintain the exteriors of the buildings as a facade but close the interiors to the public.
4. Renovate some of the buildings and raze others.

The buildings were constructed as temporary structures for the 1915 and 1935 expositions. They have been in use ever since with only one major renovation. That was financed by a \$1,100,000 fund after the Navy returned the buildings at the close of World War II. Most of the funds came from the Navy.

Leo Calland, city park and recreation director, explained the city's dilemma to **The San Diego Union**: "The uses most of the buildings are put to do not justify spending the amount of money required to repair and maintain them," he said.

"Their deterioration is such they will reach the point where someday they will have to come down."

Ed Blom, assistant city manager, summarized the problem similarly for **The San Diego Union** last August.

"We are considering a study to determine what buildings can be saved," he said then. "The city cannot afford to replace them or maintain them. We can't keep them as they are, and we would hate to lose them."

The issue was brought to a head last spring when the plaster work on the Food and Beverage Building began falling off, according to Calland. The city Public Works Department recommended removing the plaster ornamentation, which gives the buildings their distinctive Spanish-Colonial appearance.

Calland said the city Park and Recreation Commission has requested a survey to determine the cost of repairing and maintaining the buildings. This study was never authorized.

Now the Chamber's positive recommendations may force the city to take action. These are the Chamber's recommendations to the council:

1. Demolition of the buildings is opposed.
2. Retention of the present architectural style is advocated.
3. The city is requested to proceed with restoration of the exterior of the buildings, to maintain and preserve them in a safe condition until a permanent use of the buildings or an approved plan for the central park area may be developed.
4. Restoration and repair of the lath house of the Botanical Building is advocated.

The last recommendation will be followed. The city has already budgeted \$37,000 for repair of the structure and a contract will probably be let in February, according to Blom.

Calland said all the buildings along El Prado except the Botanical Building are in use. Two of them, which flank the Fine Arts Gallery are used only for dead storage, however. They may eventually become new wings of the Art Gallery.

Before coming to a final decision on the buildings, the council is expected to order an engineering survey to determine the cost of renovation.

"If the buildings are to stay put, we will need public support," Calland told **The San Diego Union**.

Through its recommendations, the Chamber of Commerce has given its support. More is expected from other quarters when the matter comes before the council for a decision.

December 19, 1955, San Diego Union, A-17:1-3. "Thumbelina" ballet at Organ Pavilion.

December 20, 1955, San Diego Union, B-1:1-2. Playgrounds slate holiday programs.

December 21, 1955, San Diego Union, A-1:3, A-3:1-2. Council OKs downtown hall proposal; Convention Center plan adopted after two-hour hearing, by Peter Kaye.

The City Council yesterday adopted the Stanford Research Institute's recommendation to build a downtown convention center. The center would be in the four-block area bounded by Ash and Cedar Streets, First and Third Avenues.

The council overruled a recommendation of the City Planning Commission last month that a civic auditorium be built in Balboa Park separate from the downtown convention center.

The council paid \$15,000 for the Stanford report. It was issued in August. The report recommended that a convention hall, exhibit hall, civic auditorium and little theater be built on the downtown site.

(Statements from proponents and opponents follow.)

December 21, 1955, San Diego Union, A-13:4. San Diego Zoo receives five penguins from Galapagos Islands (illus.).

December 23, 1955, San Diego Union, A-11:1-2. City Council asks attorney to obtain Convention Hall site; resolution gives authority to undertake condemnation of four-block area bounded by Ash and Cedar Streets and First and Third Avenues.

December 27, 1955, San Diego Union, A-11:1-2. San Diego Zoo - two horned screamers, first o kind to breed in captivity; guard eggs in their nest (illus.).

December 27, 1955, San Diego Union, A-11:5-6. San Diego Zoo - female orangutan, born Christmas day, is being kept alive in an incubator (illus.).

December 28, 1955, San Diego Union, A-15:5-6. City takes action on convention hall; ordinance lists site in master plan; authorizes officials to buy land.

December 30, 1955, San Diego Union, A-1:3, A-2:6. Governor Knight gets Park Board's project list; Torrey Pines ranks eighth in list of Tideland Oil funds.

December 30, 1955, San Diego Union, B-1:1-3. Federal Building - City Manager Campbell to seek alternative; opposes use of Federal Building for Roller Derby.

City Manager Campbell yesterday was asked by the City Council to determine if a roller derby can be held in any Balboa Park building except the Federal Building. Campbell said he would report on the question Tuesday.

The council voted 4 to 3 against denying Phil Hayes, roller derby promoter, use of the building. Then it voted 4 to 3 against allowing him to use the building.

Councilman Burgener voted against both motions. Supporting him on the first motion were Councilmen Evenson, Williams and Schneider. Mayor Dail and Councilmen Kerrigan and Curran

voted with Burgener on the second motion. Kerrigan opposed the motion which directed Campbell to study other buildings.

Hayes said he would pay the city \$10,000 minimum rent for use of the facility through early June. The roller derby is held here three nights a week at Lane Field. Hayes said Lane Field is unsuitable in winter because of bad weather and the Federal Building, which seats 2,200, is the only structure he could use.

Campbell said the roller derby would interfere only with badminton and volleyball in the Federal Building. He said there is sufficient parking in the park during the winter.

Opposing the request were L. C. Kobler, a director of the National Square Dance Convention scheduled for San Diego June 22 to June 25 and John Leib, a director of the San Diego Badminton Association.

The council received letters in opposition from the San Diego Square Dance Federation, San Diego County Badminton Association and the Industrial Recreation Council.

Hayes' request was for one year. He said the roller derby promoters plan to build an auditorium in San Diego.

1956

Summary of Events in 1956

(Notes: Dates of events are approximate only.)

City Council denied request to use Federal Building for roller coaster derby
(January 5, 1956)
Camellia Show in Electric Building (February 12, 1956)
Spring Flower and Fashion Show in Electric Building (March 9, 1956)
Home Show in Electric Building (March 24, 1956)
Science Fair in Conference Building (April 6, 1956)
Folk Dance Festival in Balboa Park (April 8, 1956)
Rose Show in Conference Building (April 21, 1956)
Fair of Home Ideas in Electric Building (April 24, 1956)
Voters reject downtown convention civic center (June 5, 1956)
Starlight Opera opening (June 28, 1956)
San Diego Symphony concerts begun (July 17, 1956)
Fiesta del Pacific dedication ceremonies at Organ Pavilion
(July 18, 1956)
Dahlia Show in Recital Hall (August 6, 1956)
Groundbreaking for Shuffleboard, Bridge and Roque Club
(August 24, 1956)
1000 pianists played at Piano Festival (September 23, 1956)
Richard Nixon at Balboa Park Bowl (October 30, 1956)
Voters reject downtown convention center (November 6, 1956)
Electric Show in Electric Building (November 23, 1956)
Plans for freeway link through Balboa Park (November 26, 1956)
Christmas tree lighted (December 9, 1956)
Children's Christmas program at Organ Pavilion (December 17, 1956)

January 4, 1956, San Diego Union, A-17:7. City Council studies plan for a 4-cent culture tax; city attorney is asked to draft amendment.

January 4, 1956, San Diego Union, A-15:8. City Council yesterday unanimously voted to contribute \$50,000 to Fiesta del Pacifico to help underwrite a month-long pageant in San Diego this summer.

January 4, 1956, San Diego Union, A-15:8. City Council will go on tour of inspection of park buildings January 26.

January 5, 1956. Resolution 130599. City Council turned down request to use Federal Building for roller coaster derby.

January 6, 1956, San Diego Union, A-13:5. Nineteen theater groups back Fiesta del Pacifico plan; members will aid in presentation of "California Story."

January 6, 1956, San Diego Union, A-20:2. City Council for second time denied a request to lease the Federal Building in Balboa Park for a roller derby.

January 9, 1956, San Diego Union, A-11:4. San Diego Zoo - Proboscis monkey from Borneo arrived yesterday; first ever to be exhibited in Western Hemisphere (illus.).

January 12, 1956, San Diego Union, A-15:4. Chamber of Commerce outlined objectives, including the saving or replacing of Balboa Park buildings with architecturally compatible structures.

January 21, 1956, San Diego Union, A-13:4-5. Animal trainer Lion Smith assumed duties at San Diego Zoo (illus.).

January 22, 1956, San Diego Union, A-33:1-2. Chamber of Commerce polled community leaders for reaction to fate of Exposition buildings.

Chamber of Commerce researchers asked a selected list of community leaders last week what should be done with the old exposition buildings along Laurel Street in Balboa Park. The chamber's research bureau reported there were nearly as many different answers as there were persons questioned.

Some of those who responded were in favor of razing the buildings to create parking areas or lawns. Others wanted them restored and put to civic uses. Still others thought the facades of the buildings should be kept at all costs. The facade suggestion was rejected by those who felt it beneath the dignity of San Diego.

One of the leaders suggested that due to San Diego's place in aviation industry, one building should be used as an aviation museum and that others could be used for an international exposition to further the United States' link with Mexico.

"The Botanical Building should be repaired and reopened," another answer said. "All other temporary structures should be kept usable if possible, and when not usable, should be retained even though closed to the public until they can be replaced under an orderly master plan.

"Under a proper plan, properly financed as a long-term effort, San Diego can acquire a permanent cultural center superior to that of any other city on the Pacific Coast."

One writer thought that the building used as a temporary library should be razed to provide room for more parking and that the buildings flanking the Fine Arts Gallery should be torn down to permit the Gallery to add wings.

Another thought that the buildings might be used for a civic auditorium and convention halls rather than building an auditorium downtown. Use of the buildings for adult or other classes was suggested.

Few of the writers took up the question of the design of new buildings, but one said that the new buildings should retain the same style of architecture but be set back from the street.

January 22, 1956, San Diego Union, A-33:5. Square dance classes to be held at Conference Building and Food and Beverage Building.

January 24, 1956, San Diego Union, A-21:1-2. Downtown Association approved connection of Switzer Canyon from 18th Street and Pershing Drive to a connection with the Wabash Freeway.

January 27, 1956, San Diego Union, A-18:1-3. Councilmen and Chamber of Commerce visited the Spanish Village, American Legion Building, Botanical Gardens, Food and Beverage Building, Electric and Exhibit Buildings and the Ford Building yesterday (illus.).

The tour also included the site of the proposed children's zoo. It took two hours.

January 28, 1956, San Diego Union, A-15:3-4. The Junior theater next month will open its sixth season of plays at the Roosevelt Junior High School auditorium; drive to sell 9,600 tickets begins today.

January 30, 1956, San Diego Union, A-15:2. A citizens committee to study Balboa Park development will hold its first meeting at 2 p.m. tomorrow at Civic Center.

January 30, 1956, San Diego Union, C-2:1-2. EDITORIAL: Balboa Park Needs Must Be Met.

San Diegans have good reasons to hope that a better Balboa Park will come out of the {Balboa Park Study) committee's deliberations. If the planning meets the challenges of the future and at the same time keeps a bond with the past, the committee will have done its work well.

February 1, 1956, San Diego Union, A-7:1-2. William Wheeler, retired architect, succumbs at 83.

February 1, 1956, San Diego Union, A-13:6-7. Four San Diego Museums yesterday withdrew their request for a museum maintenance tax proposition to be placed on the city ballot in the June 5 election.

H. K. Raymenton, chairman of a public relations committee seeking 4 cents per \$100 assessed valuation tax to maintain the museums, said the movement was dropped because it was feared that the museum proposal would jeopardize other proposed charter amendments calling for expenditures.

He said that Mayor Dail was informed of the decision to withdraw the request yesterday. Raymenton said the decision was made at a meeting of representatives of the various museums Monday. The museums which had sought the tax are the Fine Arts Gallery, the Museum of Natural History, the Museum of Man and the Serra Museum.

Raymenton said the withdrawal did not mean that the museum groups would not ask for a similar levy at another time.

February 5, 1956, San Diego Union, A-25:1-2. Museum of Man - Panama Indian exhibit in Jungle Room opens today, by Bryant Evans (illus.).

February 10, 1956, San Diego Union, B-2:1-2. EDITORIAL: Park Buildings Should Be Saved.

Balboa Park's famed buildings should be preserved.

The city is considering demolition of a few of the park landmarks now, perhaps more later. If the plan is carried out without replacing the structures it will result in defacing the park. The buildings are as much a part of the attractive surroundings as are the trees, grass, fountains, statues and the zoo.

On at least three other occasions in the last 41 years similar action has been considered and rejected. A sound policy which still applies was enunciated in 1947 by G. Aubrey Davidson, pioneer civic worker, who said:

"The buildings should not be wrecked until other buildings of like architecture and permanent material are ready to take their places."

It would be a mistake, for example, to substitute a blacktop parking lot for a building famed for its beautiful Spanish architecture.

Such a plan is contemplated in the proposal to destroy the Medical Arts Building and the American Legion Building which flank the Fine Arts Gallery. Both structures presently are condemned for public use and have been allowed to deteriorate to a sad degree.

The Fine Arts Gallery later will be enlarged, to include two wings, and it then will be necessary to remove these buildings. But they then will be replaced by structures equally decorative or perhaps more beautiful. And meanwhile the park will not suffer.

Additional parking facilities are needed in Balboa Park. But even on a temporary basis it would be better to located them in less developed park areas.

Balboa Park's buildings have attracted distinguished visitors from all parts of the world. Many of the structures were built for the 1915 exposition and renovated for the 1935 fair. Other buildings were added at that time. During World War II the buildings served first as an adjunct to the Naval Training Center and later as an important part of the Naval Hospital.

The last major rehabilitation work in the park was after the war when \$1,100,000 was allocated, most of which was contributed by the Navy.

Money presently is budgeted for restoration of the lath house of the Botanical Building. This is commendable, but it represents only part of the work which should be done.

Balboa Park is too important to be allowed to deteriorate further.

February 12, 1956, San Diego Union, A-33:1-3. Winners announced in 9th annual Camellia Show which opened in Electric Building.

February 13, 1956, San Diego Union, A-9:1-2. "The Moon is Blue" next at Old Globe.

February 13, 1956, San Diego Union, B-1:1-2. San Diego Zoo - rare crested ape arrived.

February 19, 1956, San Diego Union, A-23:4-5. Science Fair will be held in Conference Building April 6-10.

February 20, 1956, San Diego Union, B-2:8. A. O. Innis asks why more land for recreation?

February 22, 1956, San Diego Union, A-14:5-6. "The Moon is Blue," excellent comedy, by Constance Herreshoff.

February 23, 1956, San Diego Union, B-2:7. Mrs. Dorothy Holbrock stresses the importance of recreation in combating juvenile delinquency.

February 26, 1956, San Diego Union, E-1:4-8, B-8:1-5. Faye Emerson, actress, tells of Old Globe between 1937-40.

March 7, 1956, San Diego Union, A-18:1-2. "Family Night" show sparkles at Old Globe; put on as a bonus for members of the San Diego Community Theater, by Constance Herreshoff.

March 9, 1956, San Diego Union, A-17:1-2. Museum of Man - City Council yesterday approved plans for paving parking lot in back of Museum.

March 9, 1956, San Diego Union, A-17:3. Second annual Spring Flower and Fashion Show in Electric Building.

March 9, 1956, San Diego Union, A-17:6-5. Conference Building - Science Fair, April 6-10; displays selected from North Shore area High and Junior High Schools.

March 23, 1956, San Diego Union, B-1:4-5. Electric Building - Home Show opens tomorrow.

March 26, 1956, San Diego Union, A-11:6-7. Twelve thousand visit 8th Home Show..

March 27, 1956, San Diego Union, B-2:7. Helena Russell opposes granting liquor license to proposed restaurant in Spanish Village.

March 30, 1956, San Diego Union, A-11:4-5. Old Globe to offer "Mr. Pennypacker."

March 30, 1956, San Diego Union, B-2:3. Bonham Brothers Boys' Band at 26th Easter concert Sunday afternoon in Balboa Park Bowl.

April 1, 1956, San Diego Union, F-9:1-3. Home Show closes tonight.

April 2, 1956, San Diego Union, B-1:1-2. Rain fails to douse Bonham Brothers Band performance, by Constance Herreshoff.

April 3, 1956, San Diego Union, A-13:5-7. Conference Building - Rose Show to open April 21.

April 4, 1956, San Diego Union, A-11:2. Fiesta del Pacifico costumes previewed at luncheon at U. S. Grant Hotel yesterday (illus.).

April 4, 1956, San Diego Union, A-11:3-4. City will discuss park liquor sales with Convention and Tourist Bureau and other groups; San Diego reported losing conventions because drinks are banned in Balboa Park.

April 4, 1956, San Diego Union, A-12:1-2. "Mr. Pennypacker" at Old Globe inspires laughter, by Constance Herreshoff.

April 5, 1956, San Diego Union, A-17:7-8. City Council determined to keep Balboa Park dry; conference canceled.

April 5, 1956, San Diego Union, A-17:8. Conference Building - students set up exhibits today at Science Fair.

April 6, 1956, San Diego Union, A-17:3. Science Fair opens tonight.

April 7, 1956, San Diego Union, A-11:8. Science Fair winners named.

April 8, 1956, San Diego Union, A-27:1-4, A-28:5-6. Naval Hospital wing work to be finished in May, 1957.

April 8, 1956, San Diego Union, E-1:1-3. "California Story" using all stagecraft arts, by Edwin Martin.

April 9, 1956, San Diego Union, A-13:3. Pupils given their day at Science Fair, by Lester Bell.

April 9, 1956, San Diego Union, A-13:4-5. Folk Dance Festival ended its 2-day session in Balboa Park yesterday; Highlanders are highlight (illus.).

April 10, 1956, San Diego Union, A-13:8. Science Fair to close its exhibits today.

April 11, 1956, San Diego Union, A-15:3-4. Science Fair draws 35,000 in four days.

April 12, 1956, San Diego Union, B-1:1-2. "California Story" ticket sale begins.

April 12, 1956, San Diego Union, B-2:7. E. L. Bartlett writes park would suffer from new freeway.

I do not believe the people fully realize what the proposed new freeway will do to Balboa Park. I think it should be give more publicity and study.

According to the drawing by Wallace Hamilton that appeared in *The Union* March 18, the new freeway will destroy all of the park between Cedar and Date, east of 6th, by a deep cut. It would destroy most of the big trees and the lawn up to the horseshoe court.

It would cut off the roads north of 10th street and the road to the Ford Bowl and the Federal Building; it would go through where the riding stables are, an cut out all of those trees on the east

side of Park Boulevard, part of the practice field, and that paved road that goes by the Children's Home. It would go over Cabrillo freeway and under Park Boulevard.

It is not necessary. Hundreds of homes would be destroyed through Middletown at great cost and little benefit. It is a scheme to use up surplus highway funds in a wild spending spree.

It would serve the public better to improve the present Pacific Highway by building a causeway over such streets as Spruce, Palm, Laurel and others and then swing over next to the Santa Fe and bridge Elm, Cedar, Ash, Broadway and Market, east of the police station, likewise, 5th, 8th and 10th Avenues.

I hope the people will wake up to this useless and wild spending by the Highway Department.

April 13, 1956, San Diego Union, B-1:1-2. Theater in Mission Bay Park idea re-examined.

April 16, 1956, San Diego Union, A-4:6-8. Museum of Man - prehistoric Indian relics given to Museum, by Carroll Scott.

April 17, 1956, San Diego Union, A-15:6-7. Electric Building - Appliance Show to open April 24.

April 19, 1956, San Diego Union, A-22:4-5. Eleventh annual one-act play tournament to open tomorrow in Puppet Theater; sponsored by Little Theater League of San Diego County.

April 20, 1956, San Diego Union, B-2:7. Carroll D. Scott writes evidence rules out live oaks near coast.

April 22, 1956, San Diego Union, A-23:6-8. San Diego Zoo manages to earn most of its expenses . . . a million dollars a year (graph).

Tourists from larger cities than San Diego often visit the San Diego Zoo and start wondering. They know that their home cities have zoos that are only a fraction as complete as the one here.

"How come?" they ask. "How can San Diego afford a zoo like this? Who pays for it?"

Nine times in ten they will be told by a San Diegan that the zoo is maintained out of tax money.

And this answer is about one-tenth true.

What is true is that San Diego taxpayers for zoo upkeep, pay 2 cents annually on every \$100 worth of the assessed valuation of their property. It also is true that the city contributes \$20,000 toward the zoo's water bill and the County contributes another \$5,000. But when it is all added together, the taxpayer's contribution amounts to only \$132,000.

Dr. Charles Schroeder, director of the zoo, said in an interview that the taxpayer's help just about covers the annual depreciation of the zoo's improvements and, in addition, pays for improvements.

He said the expense of running the zoo amounts to \$1,027,000 a year, exclusive of the cost of improvements or fixed charges.

Actually, he said, this cost is met by funds that come from sources other than taxation.

"Approximately 32.5 percent of our income comes from gate receipts and 50 percent comes from the business we do on the grounds --- cafeteria, film and book sales, bus trips and son on," Schroeder said.

"The members of the San Diego Zoological Society --- the organization that operates the zoo --- pay \$6,800, and our sale of animals nets us approximately \$5,500. The rest comes from endowments and incidental items."

Thus Schroeder said the admiring visitors who go through the Zoo pay a lion's share of the expense without complaining.

"We have had 1,400,000 visitors in the last year," Schroeder said. "Of course, many of them were under 16 and, under the laws of our zoo, they did not have to pay."

The operation of the zoo follows a plan that probably never has been described in books on government. The zoo property is owned by the City of San Diego and is operated by the zoological society.

"I was talking to a stranger during lunch the other day," Schroeder said, "and he told me about the zoo. He said it was run by the society 'as a concession with no profit.' I had never thought of it that way, but it about sums it up.

"He thought the whole operation was pretty remarkable. I agreed with him."

From a business viewpoint, the zoo is an enterprise that

(Continued on page a-28, Col. 1)

April 22, 1956, San Diego Union, A-31:1-3. Cabrillo Freeway completion to be delayed two months.

April 23, 1956, San Diego Union, A-9:5-6. One-act play tournament's winners named, by Constance Herreshoff.

April 24, 1956, San Diego Union, A-13:7-8, A-14:1-2. Fair of Home Ideas will open tonight in Electric Building.

April 25, 1956, San Diego Union, A-15:4. Fifteen thousand attend opening of Home Show.

April 26, 1956, San Diego Union, A-15:4. Electric Building - Home Show.

April 26, 1956, San Diego Union, A-19:8. Forty thousand see Home Show in Electric Building..

April 27, 1956, San Diego Union, A-20:1-2. Museum of Man to exhibit Mayan civilization.

April 28, 1956, San Diego Union, B-12:2. EDITORIAL: Preserving Balboa Park.

As long ago as April, 1947, one of the world's most able park authorities, Frederick Law Olmstead [sic], Jr. warned that further developments in Balboa Park "must be carefully and consistently planned."

This week the directors of the San Diego Chamber of Commerce revived public interest in this subject when they urged that the City Council appoint a committee of citizens to re-examine Balboa Park and made recommendations for its development and the preservation of its heritage.

Nine years to the month after Olmstead issued his warning, the Chamber of Commerce has found that plans for the park are "both obsolete and inadequate."

Balboa Park is too rich a San Diego asset to be the victim of haphazard planning.

April 29, 1956, San Diego Union, A-17:1-3. Museum of Man - Indian cradleboards shown at museum

May 11, 1956, San Diego Union, A-17:5-6. Exhibit in Conference Building opening tomorrow to display work of students.

May 11, 1956, San Diego Union, B-18:1-3. Observance of Mother's Day Sunday will include three public events in Balboa Park.

May 13, 1956, San Diego Union, A-33:7-8, A-42:1-3. San Diego Zoo - three young gorillas have never learned to talk, by Bryant Evans.

May 14, 1956, San Diego Union, B-1:3. Scout Fair in Balboa Park, June 1 and 2.

May 19, 1956, San Diego Union, A-13:5-6. A rare horned screamer chick hatched at San Diego Zoo (illus.).

May 21, 1956, San Diego Union, A-5:1-3. Community Services Inventory Report says more neighborhood park and recreation areas, facilities and leaders are needed.

May 21, 1956, San Diego Union, B-3:3-4. "Caught in the Act" opens at Old Globe tomorrow.

May 22, 1956, San Diego Union, A-15:1-3. Bank will replace old Sefton house at 6th and Laurel Streets (illus.).

May 23, 1956, San Diego Union, A-10:4-7. "Caught in the Act" revue wins praise, by Constance Herreshoff.

May 25, 1956, San Diego Union, B-1:4-5. Superior Judge Clarence Harden yesterday ruled that Stadium Racing Association must surrender full use of Balboa Stadium to the city for a track meet and Fiesta del Pacifico events this summer.

May 30, 1956, San Diego Union, B-5. Private dancing teachers yesterday asked the City Council to stop competing with them by offering free lessons at city playgrounds, by Peter Kaye.

May 30, 1956, San Diego Union, B-1:4. Colonel Arthur F. Fischer, retiring director of Natural History Museum, feted at banquet.

June 1, 1956, San Diego Union, A-17:4. San Diego Branch of American Association of University Women and San Diego Fishermen's Association have announced their support of Proposition A, a bond issue for construction of a civic auditorium, it was announced yesterday.

June 3, 1956, San Diego Union, A-23:1. Three Major Propositions.

Proposition A: Downtown convention hall

Proposition B: Mission Bay

Proposition C: Sewer system

Proposition L: Authorizes sale of 19.2 acres of Collier Park in Point Loma for a Junior High School

June 5, 1956. ELECTION: Mission Bay bonds.

Yes	81,144
No	34,298

June 5, 1956, ELECTION: Construction of convention civic center.

Yes	71,088
No	46,206

June 6, 1956, San Diego Union, A-1:2. Auditorium lags, sewer, bay leading.

June 7, 1956, San Diego Union, A-1:8, A-3:5. Voters approve charter amendments for revenue-bond financing for new sewer system; Torrey Pines will be transferred to the state; sale of 19.2 acres of Collier Park to the Board of Education approved.

June 8, 1956, San Diego Union, A-13:4-5. The County Grand Jury yesterday issued an interim report that city officials should seriously consider future use of Belmont Park in Mission Beach as a city park

June 9, 1956, San Diego Union, A-13:8. City urged by San Diego Convention and Tourist Bureau to buy site for civic hall.

June 10, 1956, San Diego Union, A-7:1-3. Frank Lloyd Wright still working diligently at 87.

June 11, 1956, San Diego Union, A-8:3. Thirtieth Flag Day observance by San Diego County Masonic Officers Association yesterday on Marston Point in Balboa Park.

June 12, 1956, San Diego Union, B-2. Claudia P. McClelland says city auditorium should be in Balboa Park.

June 21, 1956, San Diego Union, A-21:5-6. National Square Dance Convention events scheduled in Conference, Federal Buildings, Recital Hall and Balboa Park Club.

June 26, 1956, San Diego Union, A-4:3. City Attorney Du Paul yesterday made public a legal opinion that Mission Bay Park could be used as a municipal airport site without two-thirds approval of city voters.

June 26, 1956, San Diego Union, A-7:4-5. City Council yesterday indicated it may charge \$1.00 a semester to children who receive instruction such as tap and ballet dancing from Park and Recreation Department; dance program costs city about \$21,000 yearly.

June 27, 1956, San Diego Union, A-15:5. City Council votes to continue dance set up; City Manager instructed to study fees for tap, ballet classes.

June 27, 1956, San Diego Union, B-2. EDITORIAL: Terpsichore's Charms.

(The Council) proposes to solve the problem by charging the kids \$1 a semester.

Thus the city offers to give up providing free lessons but, on the other hand, solemnly considers going into the dancing business of revenue.

June 28, 1956, San Diego Union, A-27:3-5. Starlight Opera opening expected to attract 4300 tonight.

June 29, 1956, San Diego Union, A-19:5-7. "King and I" opens at Star-Light Opera before 4000.

June 30, 1956, San Diego Union, A-13:8. Outdoor dedication ceremonies for Fiesta del Pacifico at Organ Pavilion July 18.

July 2, 1956, San Diego Union, A-5:4-6. "The King and I" will reopen on Thursday, close on Sunday.

July 3, 1956, San Diego Union, A-15:1-2. G. Aubrey Davidson lauded; gets Navy medal; work on behalf of enlisted men noted (illus.).

July 8, 1956, San Diego Union, A-21:1-2. San Diego Zoo - Dr. Werner Heuschele, new veterinarian (illus.).

July 8, 1956, San Diego Union, A-41:5-7. Latest poll favors new vote on Civic Auditorium proposal.

July 8, 1956, San Diego Union, E-1:6-7. Summer Symphony program.

July 9, 1956, San Diego Union, B-1:6. San Diego Zoo - Tasmanian devil grotto dedicated as memorial to Paul W. White, a pioneer radio and television news editor..

July 10, 1956, San Diego Union, A-13:3-4. First Fiesta del Pacifico event tomorrow evening in Spanish Village.

July 11, 1956, San Diego Union, A-13:3-5. Spanish market place, art center opens tonight.

July 11, 1956, San Diego Union, B-2:7. Walter J. Pattee, Jr., flabbergasted at the lack of proper business management, offers suggestions to Starlight Opera.

July 12, 1956, San Diego Union, A-12:4-7. "Robin Hood" opens tonight at Star-Light Opera.

July 13, 1956, San Diego Union, A-17:1. John Nesbitt will narrate Fiesta story.

July 13, 1956, San Diego Union, A-24:1-3. "Robin Hood" delights young.

July 13, 1956, San Diego Union, B-1:6-8. San Diego Zoo's first African safari to seek our rare animals.

The first African safari ever conducted under auspices of the San Diego Zoo will get under way early next month from Nairobi, Kenya. Two local big game hunters and a zoo official plan a three-month 12,000-mile trek.

The expedition will be made by Glenn Pearson, a San Diego businessman, who is sponsoring the safari; his wife, Dorothy, and Dr. George Pournelle, the zoo's curator of mammals. Pearson will leave here today, Pournelle tomorrow.

July 15, 1956, San Diego Union, A-1:1-3, B:1-2. Mission-dollar Fiesta opens Wednesday.

July 15, 1956, San Diego Union, E-6:3-6. San Diego Symphony begins in Balboa Park Bowl, by Constance Herreshoff.

July 16, 1956, San Diego Union, B-3:1-2. Summer offers fine entertainment, by Edwin Martin.

July 16, 1956, San Diego Union, B-3:1-2. Thirty-one day Fiesta del Pacifico opens tomorrow.

July 17, 1956, San Diego Union, A-11:4-5. San Diego Symphony to open 8th season tonight.

July 18, 1956, San Diego Union, A-1:6, A-2:4. Fiesta del Pacifico opens.

July 18, 1956, San Diego Union, A-12:3. Paul B. Rayburn names chairman of San Diego Parks and Recreation Commission.

July 18, 1956, San Diego Union, A-13:3. Four thousand turn out of San Diego Symphony.

July 18, 1956, San Diego Union, A-13:1-2. San Diego Symphony given merited applause, by Constance Herreshoff.

July 18, 1956, San Diego Union, B-2:1-2. EDITORIAL: Fiesta Brings General Delight.

July 18, 1956, San Diego Union, B-2:7-8. R. M. Clark says Starlight Opera needs no help from Hollywood nor from vendors of popcorn.

July 18, 1956, San Diego Union, X-2:1-2, X-3:1-2. Fiesta time.

July 18, 1956, San Diego Union, X-6:1-5. On Stage.

July 18, 1956, San Diego Union, X-10:1-5, X-12:1-5, X-14:1-3. "The California Story."

Richard Pourade, City of the Dream, Copley Books, 1977, 104-107.

Expositions might have passed from the scene because of the attraction of television as a vehicle for introducing or exhibiting new products. But, if Alonzo Horton and a group of earlier residents in Old Town has been able to summon a City into being, and if a City of less than 40,000 in population could have conceived the Panama-Pacific Exposition [sic], certainly a City now eleven times that size, could invoke a similar unity and enthusiasm.

But enthusiasm at first came slowly and (Ewart W.) Goodwin told the San Diego Convention and Tourist Bureau members that they could have a "Frankenstein monster" on their hands if they did not contribute wholeheartedly toward the fiesta's success. A budget of \$300,000 was set and (Allen J.) Sutherland was designated to head the subscription campaign. The City and County governments gave \$50,000 each.

The centerpiece of the celebration would be presentation of "The California Story." This was a state-owned historical pageant first presented in the Hollywood Bowl in 1950 for California's Centennial Celebration under the general direction of (Wayne) Dailard. Governor Goodwin J. Knight released "The California Story" to San Diego. "San Diego stands at the portal of this rich, moving saga," Dailard announced. "Here California History began."

The Festival of the Pacific was translated into Spanish, and the fiesta became Fiesta del Pacifico. By the summer of the following year, everything was in readiness. The money had been raised, the pageant rehearsed with 1,300 participants and thirty-five scenes which would require a stage in the Balboa Stadium as long as a city block. The fiesta was to run for thirty-three days; the pageant for fourteen days.

Production of the pageant was to be under the direction of Vladimir Rosing of the New York City Center Opera, with the symphony orchestra and 150-voice choir to be led by Meredith Wilson, a musician and song writer of popular reputation.

Spanish-type costumes appeared in retail stores. . . . The official fiesta colors were to be red and black. In June, thirty-two Navy jet fighters flew over the City streaming, red, green and yellow ribbons, the colors of Spain.

The fiesta opened with a grand parade of nearly 3,000 persons with 200 richly-costumed men and women astride horses, 200 girls on floats, tossing flowers at spectators, the massing of 500 American flags, twelve flags which had flown over California, and seventeen bands.

Everybody had a good time. The pageant was well attended, with the staging of California history from the explorer Juan Rodriguez Cabrillo to, eventually, the earthquake in San Francisco. Harry L. Foster received a special honor for his success in developing the parade.

July 18, 1956, San Diego Union, X-26:1-4. Balboa Park . . . Oasis amid a city . . . Is unmatched in beauty and attractions.

July 19, 1956, San Diego Union, A-1:6-8, A-2:7-8. Seventy thousand watch Fiesta del Pacifico parade.

July 19, 1956, San Diego Union, A-13:1-2. Shakespeare fete opens tomorrow with "A Midsummer Night's Dream" followed by "Richard II" and "Volpone" in rotation, by Edwin Martin.

July 19, 1956, San Diego Union, A-21:6-8. City Manager Campbell asks City Council for \$98 million for city improvements; submits six-year program, by Peter Kaye.

July 19, 1956, San Diego Union, A-21:7-8. City action debated on auditorium site; should Council acquire downtown property?

July 20, 1956, San Diego Union, A-10:1-2. Shakespeare fete will open tonight.

July 20, 1956, San Diego Union, A-11:4. Children delight in "Robin Hood" production here.

July 20, 1956, San Diego Union, B-1:1-3. Balboa Park Master Plan will be developed this year after engineering and planning studies; future of Balboa Park buildings was not determined in a six-year capital improvement program made public Wednesday by City Manager Campbell..

July 21, 1956, San Diego Union, A-9:1-2. Old Globe offers "Richard II" tonight; directed by Philip Hansen, by Edwin Martin.

July 21, 1956, San Diego Union, A-11:1. Charles Shatto, civic organist, will present a free public concert at 2:30 p.m. Today at Spreckels Organ Pavilion instead of Monday night.

July 21, 1956, San Diego Union, A-11:2-3. Thousands dance in downtown street; Les Brown orchestra leads frolickers in Fiesta del Pacifico event.

July 21, 1956, San Diego Union, A-11:4. Peter Bucknell's Production of "A Midsummer Night's Dream" adds unique touch to Bard's play, by Constance Herreshoff.

It was startling to hear Shakespeare's familiar lines spoken by actors posturing in the ancient dance style of Japan.

July 22, 1956, San Diego Union, A-21:1-8, A-22:1-8. Throngs drawn by Fiesta del Pacifico events.

July 22, 1956, San Diego Union, E-1:3-8. Strauss' spice; two new sopranos --- Ann Rosser and Kathy Proffitt --- debut in "Rosalinda."

July 22, 1956, San Diego Union, E-1:6-8. "Volpone" premieres tonight at Old Globe with Victor Buono, St. Augustine High School graduate, in the title role.

July 22, 1956, San Diego Union, E-2:3-8. George Marston, pioneer, executive, father, by Clarence A McGrew.

July 23, 1956, San Diego Union, A-13:1-2. Dress rehearsals begin for "California Story."

July 23 1956, San Diego Union, A-15:1-2. "Richard II" cast performs skillfully; Knox Fowler in the title role, by Constance Herreshoff.

Shakespeare's lines were spoken too rapidly by the majority of the actors.

July 23, 1956, San Diego Union, A-15:5-6. Shakespeare rotation --- It's "Midsummer Night's Dream" 2nd turn tonight.

July 24, 1956, San Diego Union, A-6:5. Symphony to present Bach's Concerto for Three Pianos in C Major tonight in Balboa Park Bowl

July 24, 1956, San Diego Union, A-6:6-7. Director, cast score "Volpone" triumph.

July 24, 1956, San Diego Union, A-11:2-3. Youngsters whirl to Fiesta del Pacifico tunes; 500 dance in Children's Crusade.

July 24, 1956, San Diego Union, A-11:5. City Council okays 5 million in city projects; road, park work would be financed by land sales, taxes.

July 25, 1956, San Diego Union, A-15:1-3, A-19:1-3. San Diego rushes plans for gala Fiesta weekend.

July 26, 1956, San Diego Union, A-11:4-5, Symphony eloquent in second concert, by Constance Herreshoff.

The honors went to Robert Shaw, conductor, and the orchestra for a beautiful interpretation of Schubert's "Unfinished Symphony."

July 26, 1956, San Diego Union, A-12:5-7. "Rosalinda" opens run at Starlight Opera tonight.

July 26, 1956, San Diego Union, A-17:6-8, A-18:1-2. Final rehearsal set for 1300 in "California Story."

July 26, 1956, San Diego Union, B-2:2. EDITORIAL: Fiesta Spirit Lives Anew.

July 27, 1956, San Diego Union, 12:1-2. Conference planned to study restoration of park buildings.

July 27, 1956, San Diego Union, A-13:1-3. Governors share spotlight on Fiesta del Pacifico program tonight.

July 28, 1956, San Diego Union, A-1:1, A-4:4. Six governors sing praises of city, fiesta.

July 29, 1956, San Diego Union, A-1:4-5, A:5-8. Three hundred thousand see parade; "California Story" opens.

July 29, 1956, San Diego Union, C-2:7-8. Robert J. McPherson says sewage plan could create park lakes.

One of San Francisco's greatest attractions is Golden Gate Park and one of that park's main attractions is the chain of lakes on which many visitors enjoy boating.

It was only recently that the writer learned that these fresh water lakes are the result of the water reclamation phase of that city's sewage treatment plant.

July 29, 1956, San Diego Union, E-1:3-5. Symphonic jazz: Dave Brubeck's "Dialogue" in premiere in Symphony's third concert at 8:30 p.m. Tuesday, by Constance Herreshoff (illus.)

August 3, 1956, San Diego Union, A-13:1-2. Fiesta Horse Show will begin today at Valley Lane Farm in Mission Valley.

August 4, 1956, San Diego Union, A-13:1-2. Dahlias to go on display in 16th show today at Recital Hall.

August 4, 1956, San Diego Union, A-13:1-3, A-14:1. Balls, rodeo, horse show, racing feature Fiesta today.

August 5, 1956, San Diego Union, A-23:4-5. City Council to discuss restoration of park buildings tomorrow.

August 5, 1956, San Diego Union, A-37:7-8. Symphony concert goers get advice on parking in Balboa Park.

Mrs. Fred G. Goss, president of the San Diego Symphony, urged persons to double up in cars or make use of existing buses to get to Balboa Park.

August 6, 1956, San Diego Union, A-13:5-7. Best of Fiesta costumes will be selected today.

August 6, 1956, San Diego Union, A-14:3. Junior Theater to offer "Yellow Jacket" in Recital Hall.

August 6, 1956, San Diego Union, A-14:4-5. "Hit the Deck" by Vincent Youman at Balboa Park Bowl Thursday night; Navy in top role.

August 6, 1956, San Diego Union, B-10:4-6. Prize-winning dahlias seen by 1500 at annual show.

August 7, 1956, San Diego Union, 4:6-7. Council okays five-man committee to study problem of restoring park buildings, park needs.

August 7, 1956, San Diego Union, A-11:6-8. Hundreds get Fiesta spirit in dances, costume contest.

August 8, 1956, San Diego Union, A-15:1-3. Golden Spike scene added to "The California Story."

August 8, 1956, San Diego Union, B-1:1. City Council confirms two new recreation board members.

August 9, 1956, San Diego Union, A-21:3-4. Fiesta del Pacifico captures visiting Kiwanians.

August 10, 1956, San Diego Union, A-13:1. Clairemont Fair highlight of Fiesta.

August 10, 1956, San Diego Union, B-2:1-3. EDITORIAL: Balboa Park Has Been Neglected.

For almost ten years the city government has been devoting spasmodic attention to the question of what to do about Balboa Park. This intermittent interest has produced meager results --- certainly not the grand design in park planning which the lovely area requires.

The five-man committee, wisely created by the City Council Monday to analyze the problem of restoring and preserving Balboa Park buildings, tackles the question which must be answered first. A citizens committee to be formed by the Council when the fact-finding group has finished its assignment, will shape the long-range program.

This will be no easy task, though not an insurmountable one. There are divergent concepts of what Balboa Park should be. But there is a strong body of local tradition which, if consulted, will give the inquiry helpful direction.

The city government has indicated a desire to augment the findings of the two local committees with those of outside experts who would make technical and engineering studies. Such a proposal does more than run aground on this community's manifest impatience with excessive dependence on expensive "experts" summoned from across the land.

More than cold engineering study is required in determining whether the park buildings be razed. These structures --- some built of the 1915 Panama-California Exposition, others for the 1935 California-Pacific International Exposition --- long have been regarded as a part of the park's charm and beauty. Any wholesale leveling of them would bring a public outcry far louder and more passionate than could be anticipated by outsiders.

The Park and Recreation Commission, an advisory body sometimes blithely overruled on important issues by the city government, has long complained of inadequate funds for Balboa Park. Some past members regarded it as an injustice that the handsome operating profit of the Balboa Park golf course, about \$70,000 this year, is not plowed directly back into the park itself.

True, the park system as a whole requires massive subsidization by the city. But had the golf course profits been earmarked for building restoration in 1947 when the city began to wonder what to do about the old buildings, they might have been gradually restored and the present crisis averted.

This is not to state that none of the buildings, however aged and flimsy, must ever be demolished. But before proceeding with destruction the city should have plans and money to replace the structures. Parking space shouldn't be accepted as a "temporary" substitute.

When in 1948 it replaced the temporary stucco arcade with the permanent one that now graces Laurel Street, the city followed a wise and practical policy. It should not have been abandoned.

August 10, 1956, San Diego Union, B-3:4-8. San Diego becomes home port for "Hit the Deck" at Star-Light Opera, by Constance Herreshoff.

August 11, 1956, San Diego Union, A-11:1-3, A-12:7-8. Festivals feature Fiesta for weekend.

August 12, 1956, San Diego Union, A-2:1-3. Warren Beach, Fine Arts Gallery director, sees link between art, engineering.

September 24, 1956, San Diego Union, A-11:1. One thousand pianists play in annual festival here, by Constance Herreshoff.

September 26, 1956, San Diego Union, A-12:4-8. "Gold Cadillac" given dashing performance, by Constance Herreshoff.

September 25, 1956, San Diego Union, A-13:1-2. Fall schedule of square and round dance classes announced yesterday by city Park and Recreation Department.

September 28, 1956, San Diego Union, A-15:3-4. Junior Theater to open sales drive to sell 9,600 tickets for the 1956-57 season.

September 30, 1956, San Diego Union, A-15:2. Balboa Park Committee to study park development meets tomorrow at Civic Center.

September 30, 1956, San Diego Union, C-2:1-2. EDITORIAL: Balboa Park Needs Must Be Met.

San Diegans have good reasons to hope that a better Balboa Park will come out of the committee's deliberations.

October 2, 1956, San Diego Union, B-1:1-2. Dr. Douglas D. McElfresh, North Park optometrist, appointed Chairman of Citizens Study Committee; Arthur F. Butler and S. Robert Frazee, vice chairmen; Building Subcommittee - Samuel W. Hamill; Landscape Subcommittee - Edward A. Heilbron; Recreation Subcommittee - Ivor de Kirby; Cultural and Education Subcommittee - J. Colin Hodge; Commercial Subcommittee - Harold Royce; Traffic Subcommittee - Ray C. Stauffer.

October 7, 1956, San Diego Union, A-19:1-3. Poor luck thus far: Zoo safari continues hunt for rare African animals.

In letters to zoo officials Pournelle said he expects no trouble in obtaining a pair of anubis baboons and bush babies, primitive members of the primate order.

October 7, 1956, San Diego Union, A-24:1-3. San Diego Zoo - two new American bison calves bring the Zoo's bison herd to a total of five (illus.).

October 7, 1956, San Diego Union, A-27:1. San Diego Fine Arts Gallery collections will circulate among schools.

October 11, 1956, San Diego Union, A-21:2-3. Museum of Natural History to have own seismograph, by Bryant Evans.

October 12, 1956, San Diego Union, A-17:8. City asked for \$50,000 for expanded Fiesta del Pacifico.

October 16, 1956, San Diego Union, A-13:8, A-17:1. Master Plan outlined for park development, hearing set for Thursday.

October 17, 1956, San Diego Union, A-15:2-3. San Diego Zoo - new lion cub has healthy appetite (illus.).

October 19, 1956, San Diego Union, A-17:3-4. Long-range park program outlined; city officials discuss proposed plan with recreational group representatives (illus.).

October 21, 1956, San Diego Union, A-13:4-8. Frail, rejected animal youngsters prosper in San Diego Zoo nursery (illus.).

Mrs. Reva Alloway said that her most frequent baby species are cats --- big ones.

October 23, 1956, San Diego Union, A-1:1-2. GOP shifts Nixon talk October 30 to Balboa Park Bowl.

October 26, 1956, San Diego Union, A-19:7-8. Floral Show opens tomorrow in park (illus.).

October 28, 1956, San Diego Union, A-8:1-2. San Diego Zoo - black Persian lamb on exhibit (illus.).

October 28, 1956, San Diego Union, A-29:1-3. International exhibit plan studied for 1957 Fiesta here.

October 30, 1956, San Diego Union, A-1:1-2. Balboa Park Bowl speech to feature Nixon visit here tonight.

October 31, 1956, San Diego Union, A-1:3-6, A-6:1-2. Nixon challenges Adlai Stevenson on Mideast; 4500 cheer as vice president calls Democratic nominee a "jittery novice," by Henry Love (illus.).

October 31, 1956, San Diego Union, A-23:1-2. Joseph E. Dryer says lack of civic hall costs city millions.

October 31, 1956, San Diego Union, B-1:1-2. \$50,000 requested of County Supervisors to aid 1957 Fiesta..

November 4, 1956, San Diego Union, A-35:1-3. House of Pacific Relations will celebrate its 21st anniversary with a Pageant of the Nations Ball in Conference Building Saturday..

November 4, 1956, San Diego Union, C-2:8. Lucien C. Atherton writes auditorium in park out of reach.

From what I understand auditoriums pay their way through convention rentals. But conventions won't use them unless they are conveniently located to hotels, restaurants and stores. And certainly Balboa Park cannot qualify in these respects.

November 5, 1956, San Diego Union, A-17:4-8. Flag ceremonies at Organ Pavilion; 1,000 hear Governor Knight at second annual service of remembrance (illus.).

November 5, 1956, San Diego Union, A-17:7-8, A-20:1. Mayor Dail asks voters to back Proposition H in tomorrow's city election. . . . Proposition H would authorize the issuance of 8-1/2 million dollars in bonds to provide a Hall of the Americas Civic Auditorium.

The opponents of Proposition H suggest the hall be put in Balboa Park at the corner of Sixth Avenue and Date Street.

November 5, 1956, San Diego Union, A-20:1-2. The sixth annual Fiesta de la Cuadrilla, which drew more than 3,000 square dancers during the weekend, ended last night in Balboa Park.

November 5, 1956, San Diego Union, A-20:3-8. George Scott answers San Diego's opponents; "I speak not for myself but as chairman of the citywide committee for the Hall of the Americas."

November 6, 1956, ELECTION: Convention Civic Center

Yes	81,683
No	82,070

November 7, 1956, San Diego Union, A-1:3. City defeating Proposition H for auditorium.

Voters yesterday were defeating the second city proposition in six months to construct a civic auditorium in downtown San Diego.

November 7, 1956, San Diego Union, A-11:5-8. \$7,200,000 Naval Hospital addition nears completion (illus.).

November 12, 1956, San Diego Union, B-2:8. J. J. Burke writes site for auditorium available near Zoo.

I suggest a location on the east side of Park Boulevard north of Laurel Street and directly across from the San Diego Zoo's parking lot. Here are several acres of unsightly, barren, city-owned property. There is plenty of nearby parking space and in no way would the beauty of Balboa Park be infringed upon.

November 16, 1956, San Diego Union, A-11:8. Council rejects Fiesta request for \$50,000.

November 16, 1956, San Diego Union, B-1:1-3. Electric Building - 19th annual Electric Show.

November 18, 1956, San Diego Union, A-36:1-3. Patients at Naval Hospital enjoy making own music.

November 19, 1956, San Diego Union, B-2:7 William Emmons writes 6th and D site for auditorium should please all.

November 23, 1956, San Diego Union, C-1:6. One thousand persons gathered at Organ Pavilion yesterday morning for the community Thanksgiving worship service sponsored by the San Diego Council of Churches.

November 23, 1956, San Diego Union, C-1:7-8. Electric Building - 19th Annual Electrical and Home Appliance Show; "Showcase of Better Living" is new theme; manufacturers sending special displays; 200,000 expected to attend.

November 23, 1956, San Diego Union, C-1:8. Yule Tree Land will glow tonight; 6,000 lights.

November 24, 1956, San Diego Union, A-11:1. Electric Building - Annual exhibit of appliances begins in park (illus.).

November 25, 1956, San Diego Union, A-17:1-8. Proposed route from U. S. 101 to Crosstown Freeway.

November 25, 1956, San Diego Union, A-19:3-6. San Diego Zoo - Animal birthdays are important to curators at Zoo, by Roy Johns (illus.).

Birthdays are as important at the San Diego Zoo as they are in many homes.

This is true especially when the birthday is that of "Blackie," believed to be the oldest snake ever kept in captivity; the short-tailed Batleur eagle, that is the local zoo's eldest citizen, or "Irish," a hooded capuchin with the longevity record for monkeys in captivity.

The interest of zoo officials in animal geriatrics (the study of old age) is two-fold: They are naturally interested in maintaining the local zoo's reputation for keeping animals healthy in captivity and there is the tangible dollars-and-cents savings in not having to replace valuable specimens that dies.

"They just don't live that long in captivity if they're not taken care of properly," says K. C. Lint, curator of birds. He speaks proudly of the nearly 40 specimens he has of 20 species that have been on exhibit here more than 16 years.

The same holds true for the elderly zoo residents under the care of Charles Shaw, curator of reptiles, and Dr. George Pournelle, curator of mammals.

Lint, for example, has the eagle that has been in the same cage in Balboa Park since 1924 and shows no signs of old age even though anything over 15 years is considered good for keeping birds in captivity.

He also has "King Tut," a salmon-crested cockatoo, imported by Frank Buck in 1925, and seven other birds that were in the collection before 1930.

Two of 1927 acquisitions, a pair of bare-eyed cockatoos, have had approximately 50 offspring to date. And "Bum," an Andean condor, acquired in 1929 from a missionary in Ecuador, has offspring in zoos throughout the country. He and his mate, acquired in 1934, are the only captive breeding pair of the species in the world.

“Blackie” is an oldtimer with special significance to Shaw. The curator remembers that when he was a San Diego schoolboy hanging around the reptile cages that the African black-lipped cobra was one of his favorites.

The seven-foot cobra was removed from public exhibit in 1948 and on October 1 of this year it passed the 28-year mark that has been the previous record for a snake’s longevity in captivity. Shaw says that the only sign of old age is a diminished appetite that has changed the weekly menu from a full-grown rat to a half-grown one.

Shaw’s other collection includes four other snakes - a rainbow boa, a blood python and two Java pythons --- that were in the zoo when the present Reptile House was opened in 1936. And he has on exhibit a 20-year old Western diamondback believed to be the oldest rattlesnake every kept in captivity.

“Deadly Duplex,” a California king snake, has been at the zoo only since November 6, 1953, but it already has lived three times as long in captivity as the previous record for two-headed snakes.

Another longevity record belongs to the Australian lace monitor exhibited here since 1939, and the zoo has five snake-necked turtles that have been in the collection since 1926.

Then, for real old age, there is “Speed,” the giant Galapagos tortoise. Shaw feels certain it is at least 100 years old, and “he may very well be 500.”

Pournelle shrugs off questions about elderly specimens by saying that Shaw and Lint have the real record holders and then he produces a list of old-timers that are the envy of curators of mammals elsewhere.

“Irish,” has been at the zoo since 1927, even though monkeys seldom live more than 15 to 18 years in captivity. Pournelle does not know how old the hooded capuchin, a favorite with zoo visitors, was when acquired but assumes he was at least three or four then.

The zoo’s animal anniversaries are not based on birth, but on the acquisition date, the curators said.

“Irish” has fathered 22 offspring, including a pair of twins.

Pournelle believes “Cap,” a California sea lion purchased in 1939, holds the age record of his species in a zoo. And the pair of spotted hyenas, acquired in 1934, are bearing down on the 24-year old record set by a hyena that was in the London Zoo.

The curator of mammals is also proud of a cage containing three generations of chimpanzees, presided over by grandmother “Katie.” She was five years old when acquired in 1932..

November 25, 1956, San Diego Union, A-20:1-3. Electrical Show draws capacity (illus.).

A capacity crowd toured the 19th annual Electrical and Home Show yesterday in the Electric Building on the second day of its six-day run. . . .

The most popular displays yesterday were the four model kitchens, each in a different color, and the electronic cooking demonstrations. . . .

From the children’s viewpoint, the big attraction was a giant model electric train display.

November 26, 1956, San Diego Union, A-15:7-8. Clubwomen urge theater for Balboa Park, by Kathryn Steffan.

The women unanimously agreed to a proposal by Mrs. Henry B. Clark to inaugurate a campaign for a theater in the park north of the corner of Laurel Street and Park Boulevard and east of the Zoo. The undeveloped site is on city-owned property.

November 26, 1956, San Diego Union, A-17:2-4. State, City, Navy accord needed on freeway link; park, hospital areas required, by Henry Love (illus.).

The freeway would enter Balboa Park at Sixth Avenue and Date Street. It would go through the riding academy ring in the park and near its 18th Street end would go through the grounds of the San Diego Children's Home, 1365 16th Street. If the home is eliminated, the state would be required to replace it.

November 28, 1956, San Diego Union, A-15:2-3. Electrical exhibit will end tonight (illus.).

November 28, 1956, San Diego Union, A-15:5-6. San Diego Zoo gets okapi, \$15,000 gift of Belgium (illus.).

November 29, 1956, San Diego Union, A-19:7-8. Crowds set record of 190,000 at Electric Show.

November 29, 1956, San Diego Union, B-2:8. J. Panosch wants auditorium near Veterans Building in park.

November 30, 1956, San Diego Union, B-2:8. Grace B. Allen thinks shade can help organ concerts, increase attendance.

December 2, 1956, San Diego Union, A-23:4. Charles Shatto, official organist, to play Christmas composition today.

December 4, 1956, San Diego Union, A-9:2-3. Christmas program Sunday at Organ Pavilion, sponsored by Chamber of Commerce; Christmas tree to be lighted..

December 6, 1956, San Diego Union, A-21:6. San Diego Zoo - sea snake (*Laticauda colubrina*) displayed at Zoo.

December 7, 1956, San Diego Union, A-10:1. Yule Center, Balboa Park, opens Sunday (illus.).

December 8, 1956, San Diego Union. AB:4-5. Cape buffalo joins attractions at Zoo (illus.)

December 9, 1956, San Diego Union, A-24:4-5. Lighting of tree at Balboa Park is set for today.

December 10, 1956, San Diego Union, A-17:7-8. Pageantry of Christmas at Organ Pavilion; 2,000 at lighting of Christmas tree; crowd joins in carols as school choirs, navy band participate at Organ Pavilion (illus.).

December 13, 1956, San Diego Union, B-4:3. Yule ballet to highlight park event Sunday afternoon; more than 100 San Diego school children will take part (illus.).

December 16, 1956, San Diego Union, A-18:1-3. Box for needy children in Organ Pavilion is filling up with toys (illus.).

December 17, 1956, San Diego Union, A-9:5. San Diego Zoo - white-breasted sea eagle from Philippine Islands (illus.).

December 17, 1956, San Diego Union, A-15:5. Yule music recital on carillon set for December 25 program will be played by Paul D. Peery of Coronado; 10th anniversary observance of chimes presentation to city.

December 17, 1956, San Diego Union, A-17:1. A crowd of 2,500 persons yesterday afternoon attended a Christmas Center children's program in Organ Pavilion (illus.)

December 27, 1956, San Diego Union, A-19:4-5. The City Planning Commission yesterday recommended adoption of a master plan for parks and recreation in San Diego.

The plan must be adopted by the City Council. The second of two public hearings was held yesterday by the Commission.

As outlined by Harry Haelsig, city planning director, the plan would increase present park acreage to more than 6,100 acres from the present 5,700 acres.

The master plan calls for neighborhood parks on school grounds, in small plazas, 38 community parks, five district parks, four large metropolitan parks, five scenic parks, 87 miles of scenic drives, 10 swimming pools, golf courses, tennis centers and youth camps. Estimated cost of the plan is 20 million dollars.

At yesterday's hearing representatives of Pacific Beach women's clubs urged development of Soledad Terrace Park above Pacific Beach.

John Leppert, executive secretary of the San Diego Taxpayers Association, said he is questioning the plan because it may be too specific in establishing sites of parks. He also questioned development of another golf course along Mission Bay and binding the city to building 10 swimming pools.

Haelsig said the plan would be flexible, but that it is necessary to set desirable standards. Joseph Padgett, planning commissioner, said a master plan would save taxpayers money in acquisition of park sites.

December 31, 1956, San Diego Union, A-12:8. The body of a man identified as Angelo Blundo, 57, was found at 7:40 a.m. yesterday in Balboa Park. He evidently had been beaten and robbed. The body was discovered in a hollow 200 feet east of 2100 block on Sixth Avenue.

1957

Summary of Events in 1957.

(Note: Dates of events are approximate only.)

Parakeet Show in Electric Building (January 5, 1957)
Silver Bay Kennel Club Show in Electric Building (February 10, 1957)
Camellia Show in Recital Hall (February 17, 1957)
Engineer Week display in Conference Building (February 21, 1957P)
Orchid Show in Recital Hall (March 24, 1957)
Science Fair in Conference Building (April 5, 1957)
Auto Show in Electric Building (April 13, 1957)
Rose Show in Conference Building (April 14, 1957)
Voters reject Civic Theater in Florida Canyon (April 16, 1957)
Spring Home Fair in Electric Building (April 23, 1957)
Craft/Hobby Show in Conference Building (May 12, 1957)
San Diego Home Show in Electric Building (May 18, 1957)
City Council gets Citizens Balboa Park Development Plan
(May 28, 1957)
Folk Dance Festival (May 31, 1957)
Children's Zoo opened (June 30, 1957)
Summer concerts begun (July 10, 1957)
Dahlia Show in Conference Building (July 28, 1957)
Crafts Fair in Federal Building (August 23, 1957)
Piano Festival in Balboa Park Bowl (September 22, 1957)
Canary Show in Electric Building (November 10, 1957)
Electrical Home Appliance Show in Electric Building
(November 29, 1957)
Christmas tree lighted (December 9, 1957)
G. Aubrey Davidson died (December 15, 1957)

January 2, 1957, San Diego Union, A-13:4-5. Angelo Blundo, 57, a gardener, was found dead in Balboa Park Sunday; he had been beaten and robbed.

January 3, 1957, San Diego Union, B-1:1-2. Visitors, exhibits at San Diego Zoo increase; 3,300 animals; total attendance during last 12 months was 1,495, 826 compared with 1,351,697 in 1955; admission charge increased from 50 to 75 cents in December.

January 4, 1957, San Diego Union, A-17:3. AWOL soldier held as park slaying suspect.

January 5, 1957, San Diego Union, A-1:1-2. A-3:1. GI deserter admits Balboa Park slaying, by Tim Shepard (illus.).

January 5, 1957, San Diego Union, A-13:1-6. More than 150 are expected to participate today in a forum discussion to support the countywide "Don't Waste Committee" in Conference Building.

January 5, 1957, San Diego Union, A-14:1. More than 400 parakeets are expected to be judged today at the fourth annual parakeet show of the San Diego County Budgie Society in the west room of the Electric Building.

January 10, 1957, San Diego Union, A-21:7. Mayor Dail yesterday said voters will be asked this spring to approve a \$3,500,000 civic theater in Balboa Park.

January 10, 1957, San Diego Union, A-21:8. City Council hearing on proposed master plan for park and recreation development is scheduled for 10 a.m. today at Civic Center.

January 11, 1957, San Diego Union, B-1:4-5. The City Council referred to conference yesterday a proposed 20-million dollar long-range program of parks and recreation development.

January 13, 1957, San Diego Union, A-34:1. House of Hungary in Balboa Park will conduct open house from noon to 4 p.m. today in appreciation of San Diego's contribution to Hungarian relief.

January 14, 1957, San Diego Union, A-13:2. Twenty-six women volunteered to serve on Women's Committee for a Civic Theater in Balboa Park at a meeting Saturday at the home of Mrs. Henry B. Clark, instigator of the campaign.

January 20, 1957, San Diego Union, C-1:7-8. Can a city grow and stay beautiful? Time for a plan.

January 20, 1957, San Diego Union, C-2:1-2. EDITORIAL: What will San Diego look like in 10 years? Teamwork by citizens and officials needed to preserve community's beauty.

January 20, 1957, San Diego Union, C-3:1-4, C-5:1. A survey of San Diego's most pressing problems in 1957.

1. Water Supply
2. Jet Age Airport
3. Highways
4. Larger Harbor
5. Sewer System
6. Balboa Park

The Problem: Balboa Park buildings and grounds are deteriorating. Many of the buildings were erected as temporary structures for world expositions in 1915 and 1935.

Parking facilities and roads in the park are inadequate to handle large events, such as the Fiesta del Pacifico, which has requested continued use of park facilities. A plan is urgently needed to insure continued development of the park for use by present and future generations.

7. Mission Bay
8. Civic Auditorium

January 20, 1957, San Diego Union, C-3:8. Review of past accomplishments and future needs of Balboa Park; deterioration of buildings and grounds told.

January 22, 1957, San Diego Union, B-5:3-4. Group submits plan; Hall would honor City Sport Stars; drawing of architect's conception of the proposed San Diego Sports Hall of Fame which would be located in the House of Charm in Balboa Park; letter and brochure of the plan have been submitted to the City Council and County Board of Supervisors; estimated cost would be \$30,000.

January 24, 1957, San Diego Union, A-17:4. Balboa Park theater site re-indorsed; Planning Commission votes unanimously in repeat proposal.

Harry Haelsig, city planning director, said the site comprises seven or eight acres on Park Boulevard just north of Zoo place. He said the location is the best of seven Balboa Park sites considered by the Planning Department. . . .

The city Park and Recreation Commission reaffirmed its approval of a civic theater in Balboa Park at its Tuesday meeting.

January 24, 1957, San Diego Union, A-17:4. The San Diego Junior Chamber of Commerce yesterday asked the City Council to defer action on a civic theater proposal until more factual information is presented.

“Any deviation from the criterion established in the Stanford Research Institute report (for a downtown auditorium) should be only after the most careful analysis and consideration,” John L. Allen, junior chamber president, said in a letter to the council.

January 25, 1957, San Diego Union, A-6:1. The San Diego Taxpayer’s Association yesterday wrote Mayor Dail and the City Council that it doubts the advisability and economics of a civic theater in Balboa Park.

January 26, 1957, San Diego Union, A-6:6-8. Allen J. Sutherland elected head of Fiesta del Pacifico.

February, 1957, San Diego and Point Magazine. Red Network in Balboa Park (map showing Balboa Park as it exists today with a few ideas entertained tentatively in recent years by the Park Department).

February 1, 1957, San Diego Union, A-11:1-2. An army deserter, who confessed to the robbery-slaying of a Navy civil service worker January 1 in Balboa Park, was bound over to Superior Court for arraignment February 15.

February 10, 1957, San Diego Union, A-12:1-2. Nearly 1,000 pure breeds have been entered in the All-Breed Dog Show of the Silver Bay Kennel Club to be held next Sunday in the Electric Building.

February 10, 1957, San Diego Union, A-23:1-2. The City Council will conduct a public hearing at 10 a.m. Thursday on a proposal to include in the city’s master plan a civic theater in Balboa park.

February 13, 1957, San Diego Union, B-2:7. Ruth C. Pearson writes that House of Pacific Relations serves foreign relations.

February 15, 1957, San Diego Union, A-17:7-8, A-23:4-5. The City Council yesterday voted unanimously to have an ordinance drafted which would put a Balboa Park civic theater in the city’s master plan for public buildings. Councilmen will vote on the ordinance Tuesday. They will meet in conference Thursday to decide whether to put a 3-1/2 million-dollar bond issue for the theater on the April 16 ballot, by Peter Kaye.

February 16, 1957, San Diego Union, A-15:5. Insanity plea in park killing.

February 17, 1957, San Diego Union, A-33:1-2. An Orange California couple yesterday won the sweepstakes’ award at the 10th annual Camellia Show in Recital Hall, Balboa Park.

February 17, 1957, San Diego Union, B-7:6-8. Public park grows on Shelter Island, by Alfred Jacoby.

February 18, 1957, San Diego Union, A-13:4-5. A bulldog owned by John O. Melveny of Los Angeles yesterday was judged the best of the dogs at the Silver Bay Kennel Club show in Balboa Park.

February 20, 1957, San Diego Union, A-11:7, A-23:4. Council indorses ballot on theater; voters will decide \$3.5 million issue.

February 21, 1957, San Diego Union, A-8:1-2. “Janus” opens run at Old Globe, by Constance Herreshoff.

February 21, 1957, San Diego Union, A-21:6. Polar exhibit is Engineer Week display feature in Conference Hall.

February 24, 1957, San Diego Union, A-19:3-6, A-28:1-2. Plan Fight For Site: women out to sell voters on theater in Balboa Park (illus.), by Peter Kaye.

Something as old as Eve, familiar as the front door and effective as an A-bomb will be used in San Diego's latest try for a civic theater.

It is, as every man should know, the women's touch.

More than 55 women's groups, headed by Mrs. Henry Clark, 3810 Narragansett Ct., are leading a campaign for a civic theater in Balboa Park.

So far they have gained the approval of the City Planning Commission and City Council to include in the city's master plan their site, which is across Park Boulevard from the zoo parking lot.

Now all they have to do is get two-thirds of San Diego's voters to support a bond issue for three and one-half million dollars in the April 16 city election.

That will be the hardest part of their campaign, which began last year soon after voters for the second time defeated an 8-1/2 million dollar bond issue for a downtown civic auditorium.

The 6.7 acre park site would be used only for a 3,000-seat theater and 600-seat little theater. The location is not suitable for a convention hall, which councilmen believe should be located in the downtown area.

San Diego's search for a public meeting place began in flames, and has ended in frustration 13 times in the last 30 years.

Firemen were holding their annual dance on November 25, 1925, in the Civic Auditorium at Park Boulevard and Laurel Street when it burned to the ground.

Now after 30 years of arguments, expert opinion and unsuccessful elections, the city is back within a block of the original site.

In 1926 a city planner named John Nolen recommended a grouping of public buildings along the waterfront. Only the present Civic Center was built there.

Voters in 1927 rejected a plan to place public buildings, included an auditorium, in Balboa Park.

A proposal to convert the Federal Building in Balboa Park into a convention hall was unsuccessfully initiated in 1939 and unsuccessfully revived in 1946.

In 1949 voters rejected the Cedar Street Mall proposal which would have placed public buildings, including an auditorium, on Cedar Street between the Civic Center and Balboa Park.

In 1954 four proposals were considered and rejected. They included a convention hall at Sixth and Date Streets, conversion of the Ford Building in Balboa Park into an auditorium, construction of a privately financed convention hall and sports arena at 36th and Market Streets and a privately financed but publicly operated underground parking garage and convention hall at Horton Plaza.

Other proposed sites include blocks bounded by A, Ash, 9th and 10th Streets; the block bounded by 3rd and 4th Avenues, E and F Streets and the short block south of Horton Plaza plus the full block south of it.

A sports arena has been proposed for Mission Bay Park. Later proposals were for a privately financed auditorium downtown or east of downtown.

Mrs. Clark emphasized the women are working only for a theater for concerts, plays, opera and light opera. She said she would leave the location of a sports arena and convention hall to the men.

"The men have failed to get us a theater," she said in an interview, "and now the women are going to work where the men have failed.

"We still can't do altogether without men. After all, the mayor, planning commission, council and city manager are all men."

A reporter reminded Mrs. Clark that about half the voters are men.

"They'll come along," she said in the tone of a woman married many years. "They want a theater as badly as the women do."

February 27, 1957, San Diego Union, 15:6-7. Civic Theater bonds to get ballot place.

The City Council yesterday took formal action to place a Balboa Park civic theater in the city's master plan and to call a 3-1/2 million-dollar bond election April 16 to finance the facility.

February 28, 1957, San Diego Union, A-11:4-5. A \$3,500,000 bond issue for construction of a civic theater in Balboa park, to be voted on at the April 16 city election, yesterday was indorsed by the San Diego Chamber of Commerce.

"The committee felt that a civic theater would be compatible with the beauties of Balboa Park and that later the possibility of a downtown convention center would be considered," Ivor de Kirby said.

March 2, 1957, San Diego Union, B-2:8. Mrs. Ira G. Stephens wants combined theater-convention hall in Balboa Park.

March 15, 1957, San Diego Union, A-16:1-2. Spring Home Fair to open in Electric Building April 23.

March 20, 1957, San Diego Union, A-14:3-5. Globe Theater Guilders meet "Tender Trap: actors, by Beth Mohr.

March 20, 1957, San Diego Union, B-7:3-4. Joseph Dryer, retired merchant and a leader in many community projects, said yesterday that he is advocating the building of a planetarium in San Diego as a tourist attraction and an educational facility.

He said that it may be that the Ford Building in Balboa Park could be remodeled for a Planetarium or it may be cheaper and better to build an entirely new building for it.

March 21, 1957, San Diego Union, A-9:4-5. Robert J. McPherson was named chairman of a group which met yesterday to discuss a museum of science and industry for San Diego.

McPherson said a principal purpose of the museum would be to stimulate the interest of young people in technical careers. He said, in preliminary conversation, it was suggested that the Ford Building be converted to museum purposes.

March 23, 1957, San Diego Union, B-12:8. Faye Smith wants large theater hall in Balboa Park.

March 24, 1957, San Diego Union, A-6:1-2. Approximately 1,000 orchids were judged yesterday in the 11th San Diego County Orchid Show in Recital Hall.

March 24, 1957, San Diego Union, C-1:1-4. Can San Diego Become Inter-American Cultural Center?, by David Hellyer, Latin American Editor.

. . . our community can and should have an important stake in the development of Latin America.

To this fact, San Diego is awakening . Proof of growing awareness is seen in such developments as the Museum of Man's new Hispanic American program, with its heavy stress on Mexico. It is seen further in the Fiesta del Pacifico's Latin theme. It is daily evidenced in this newspaper's daily pages of Latin American news --- the only full-fledged effort of its kind in North American journalism.

March 24, 1957, San Diego Union, C-1:4-8. Can San Diego Become Inter-American Cultural Center?, by Bryant Evans, Science Editor (floor plan of Museum of Man showing cultural exhibits of Mayan civilization).

Walk out of the San Diego sunshine into a Central American jungle. Walk out of the mid-Twentieth Century into the Tenth Century. Rest in the temple of a priest-led pagan people who achieved a civilized level of learning but practiced human sacrifice. Feel for a moment a past so foreign that it was never in your ancestor's memory.

And then take just a few more steps and enter another Latin American locality that today is in the act of becoming a locality where modern methods, modern architecture, modern thinking are overcoming the Northern Mexican desert. And here you may contemplate the strange mingling of a familiar technology with a racial memory from ancient Indian America.

This is the experience that will be possible when the Museum of Man opens its imaginatively designed Latin American Hall next winter.

On one side of the room under the California Tower will be re-constructions of the Mayan civilization that reached its heyday 700 years before Columbus sailed.

Its people have been called the "intellectuals of ancient America," because they developed an astronomy, a mathematics and a method of writing comparable to that of the old world. Their calendar was better than the one used in Europe.

On the other side of the hall, a theater of the Americas will present aspects of the life of Sonora --- the Mexico of today. The story of Sonora is the study of a country that for many generations as a frontier has felt the strife and stimulation of different peoples.

These two stories typify the museum's new policy of giving San Diego and California the tools to understand the peoples to the south. It is the first step toward creating an environment for intellectual and artistic exchanges among the various peoples of the New World. It is an overt act toward making San Diego a cultural gateway to Latin America.

The new policy is stated by Donald C. Dickinson, president of the Museum Association, in this way:

"We have decided to concentrate on the job that we can do best and the job that is most appropriate for San Diego. That is, of course, telling the story of how people live and how their customs and way of life developed in our own hemisphere. Most important to us is the story of our neighboring republic of Mexico and the other republics of Central and South America.

"We feel this is appropriate because San Diego is on our country's southern frontier; it has a manifest economic future as a gateway to these countries. There is a demand and a need and a curiosity to know more about them. San Diego can become a cultural and an intellectual gateway as well as an economic and physical one."

Clark Evernham, managing director of the museum, and Dr. Spencer Rogers, its scientific director, said the new Latin-American hall will be completed next winter.

They said the ancient and modern stories will be presented in contrasting methods. The Mayan story will be told with full and model sized restorations of the temples and monuments of the Mayans.

The most unusual of these will be the first full-sized reconstruction in history of a room from a temple discovered about 10 years ago in Bonampak, Chiapas, Mexico.

The discovery is considered a major find by archaeologists because of its brilliant mural painting. This painting will be duplicated in full size --- not as it was found in the Mexican rain forest but as it appeared when it was first built nearly 10 centuries ago.

The reproduction of the original colors has been the subject of long research by scientists at the Carnegie Institution, Washington, D. C., and here, Dr. Lowell Hauser, of the San Diego art department, has made it possible to duplicate them accurately. So have technicians of the DuPont Paint Co., who found the ancient rooms can be duplicated in the most modern of paints with a vinyl base.

The use of the brilliant Mayan colors and dramatic lighting are expected to recreate for modern eyes the exotic experience of being in a temple of the Mayans. Among the scenes depicted in the Bonampak murals are the preparations for a religious dance in which the gods are personified in colorful and symbolic costumes.

San Diegans who saw the Aztec dancers in the San Diego State Greek Theater during the Fiesta del Pacifico saw such costumes in the Mayan dance sequence.

A more intimate view of Mayan life will be given in a series of dioramas. There will be windows through which one can look and see what Mayan astronomers saw when they calculated the earth's motions well enough to fashion a better calendar than Europe had at the time.

An old exhibit of the museum, a stele or monument dug up at Quirigua, will be decorated in Mayan colors as the Mayans doubtless decorated it when it was built. Behind it will be the murals from the Temple of the Jaguars in Chichen-Itza, the ancient capital of the Mayan empire in Yucatan.

Two models of restored Mayan buildings --- the Castillo at Chichen-Itza and the Palace of the Governors at Uxmal will also be painted in Mayan polychrome and peopled by scale-size figures of Mayans. A dark-light map on which the Mexican and Central American sites can be located by a visitor is planned. The site can be found by pushing an appropriate button.

Evernham said the museum is planning to use robot radio guides to give conducted tours around the museum. A visitor would rent a radio on which he would hear a taped lecture which directs him through the exhibit and explains the significance of what he sees.

Evernham said the modern exhibit showing the dynamic progress of northern Mexico and its historical background will be centered in the Theater of the Americas. This will be a small structure within the main hall to seat 50 persons. In it, an automatic slide projector and an accompanying lecture and music will substitute for the static exhibits.

"This is going to tell the story of the Mexican frontier where in a few years modern agriculture and production methods have supplanted old ones," Evernham said.

"This is the ultimate contrast with the Mayan display. Sonora is a land that has undergone wave after wave of changes. Its culture has met the challenges of the Apaches from the North, the

influence of the Spanish and Central Mexican customs of the South and the technology of the United States.

“To tell the story we shall use photographic dioramas. We shall also use maps, diagrams and photographs of actual scenes. Using this method we can present as much information as would take thousands of years of static exhibits to show.”

There also will be cases of artifacts and craft material from northern Mexico. A full-size patio with a fountain and costumed figures will portray a scene from northern Mexico’s hacienda period.

The northern Mexico presentation, unlike the Mayan exhibit, will be temporary. Evernham said that after a year its exhibit would be given to the Mexican state museum at Hermosillo.

Then, he said a new exhibit representing some other phase of Mexican, Central American or South American life will be substituted for the Sonora exhibit. The use of slides will make a change in subject matter easier to accomplish.

Evernham estimated that the entire program for the Latin American Hall will cost about \$25,000.

“This will only be possible,” he said, “because of certain advantages that we have here that no other museum that I know of can equal.”

“One of these is a group of volunteers who are willing to work for the satisfaction of seeing the exhibit materialize. Last year they donated 5,000 hours of work. Much of this volunteer labor has involved hard work, such as the painstaking cleaning of valuable artifacts and plain painting. Other work has been of a specialized nature and has been done by interested persons with graduate training.

“Without such help as this, the job we plan to would cost us from \$50,000 to \$75,000.”

Evernham said another advantage is having as a staff artist, Mrs. Victoria Nelson (?) who is able to produce be___ grounds, models and dioramas that are not only faithful to scientific fact but also to the spirit of the people they describe.

“We are determined to humanize our museum,” he said. “We think the most valuable thing we can do is to let people know how other people live, or lived. Except for the trained ethnologist, the objects and trinkets of a people are meaningless unless they are fitted into a background that tells how they are used and this we intend to do,” he said.

March 24, 1957, San Diego Union, C-2:1. EDITORIAL: New Era Dawns For Balboa Park.

A long awaited and most heartening project got underway in Balboa Park last week.

Restoration of the lath house began.

To those who have known this edifice only in recent years --- as a dank and rotting chamber --- work of its restoration may carry no great meaning. But to those who remember it in all its tropical opulence, a restored lath house is a happy prospect indeed.

To them, it holds memories of lush blossoms, exotic birds and an atmosphere redolent of the great South American orchid jungles. When the reconstruction is completed, sometime in late August, young generations and old, newcomers and third-generation San Diegans, will be able to share a rare pleasure.

Why was such a fascinating structure allowed to decay? As may be expected, part of the answer is money. It will cost \$63,500 to restore and refurbish the Botanical Building.

Lack of money has not been the only cause of park deterioration. Also responsible has been the lack of an accepted grand design for Balboa Park planning.

This deficiency soon may be filled. Since last August the 75-member Balboa Park Citizens Study Committee has been studying the important aspects of the problem. Around the first of April, it will submit a series of recommendations based on findings of six subcommittees which have concentrated on park buildings, landscape, recreation, cultural institutions, street planning and land use, and concessionaires.

It is certainly to be hoped that there will be no recommendation for wholesale demolishing of old park buildings. Some are aged and flimsy but are beloved because of their charm.

The salvation of the lath house sets a new tone for Balboa Park. May its echoes be heard elsewhere!

March 24, 1957, San Diego Union, C-2:7. T. J. Haas, Alpine, Calif., writes theater proposal endangers Balboa Park retreat.

As the city becomes bigger, noisier and smellier, Balboa Park grows as a quiet and necessary retreat for the battered city dweller and his children. Under these circumstances there is not a tree in Balboa Park that is not worth more than any civic theater.

March 25, 1957, San Diego Union, B-1:4-5. San Diego Zoo most popular recreation spot, by Danah Colby.

Statistics compiled in a survey made by students of Dr. Oscar J. Kaplan at San Diego State indicate that San Diego Zoo is the most popular recreation spot in either Balboa Park or Mission Bay Park.

Of those questioned, 42 percent said they had visited the zoo one or two times within the last year. Twenty-four percent visited it three times or more.

The next most popular spot is the Balboa Park Bowl for concerts or performances. Twenty-two percent of those questioned visited the bowl one or two times. Thirteen percent visited it three or more times.

In Mission Bay Park, swimming proved the most popular attraction, 14 percent of those questioned having visited the beaches one or two times and 17 percent having gone three times or more.

The survey was taken as part of Kaplan's class in public opinion measurement. Field work for the survey was done in October, 1956. Students interviewed 480 respondents. Each geographical area in metropolitan San Diego was represented. Equal numbers of men and women were interviewed.

Following are complete results of the survey (See Newspaper article for figures.)

1. Which of the following Balboa park facilities have you visited or used during 1956?

	3 times or more		1 or 2 times	Not used or visited
Zoo	24	42		34
Picnic	10	21		69
Golf course	4	3		93
Swimming pool	3	3		94
Globe Theater	7	19		74
Museums	13	22		65
Balboa Park Bowl	13		22	65

2. Which of the following Mission Bay Park facilities have you visited or used during 1956?

	3 times or more	1 or 2 times	Not used or visited
Boating-water skiing	7	8	85
Swimming	17	14	69
Picnic areas	11	15	74
Fishing	5	4	91

3. Assuming that Mission Bay Park is completed and that existing Balboa Park facilities are improved, in your opinion which park will be a greater tourist attraction?

Balboa Park	44
Mission Bay Park	32
Undecided	23
Other	1

March 26, 1957, San Diego Union, B-2:7. J. H. Neil writes physical education should come before culture.

Let's build gymnasias and recreation areas and provide a solid vigorous physical education program for our children. Then, if we can afford culture, both our youth and our culture will have much better chance for survival.

March 27, 1957, San Diego Union, A-15:5-6. Mayor Dail has issued 2,000 invitations to a noon luncheon April 9 at the U. S. Grant Hotel to stir interest in the proposed civic theater and music hall, which will be voted on in a city election April 16.

March 27, 1957, San Diego Union, A-20:3-4. The San Diego Drama Guild will present William Inge's "Bus Stop," a comedy, for one performance only at 8:30 tonight in the Puppet Theater, Balboa Park.

March 27, 1957, San Diego Union, A-20:6. "The Tender Trap," a spicy comedy by Max Schulman and John Paul Smith, was cordially indorsed by the customers at the preview and again at last night's opening at the Old Globe Theater, by Constance Herreshoff.

March 28, 1957, San Diego Union, A-28:6-8. "Women at Work" seek theater in Balboa Park, by Kathryn Steffan.

March 28, 1957, San Diego Union, B-2:8. Mary G. Marston writes letter saying civic theater in Balboa Park has great merit.

We need an easily accessible, well appointed building. Where could we find a better site than the one proposed? It has room for parking and is near a bus line. It will add to the value of our park as a center of cultural activities.

March 29, 1957, San Diego Union, B-2:7. M. F. Culbertson writes Ford Building offers theater site.

The Ford Buildings has never been an asset to the park. It is out of harmony with the architecture of the other buildings. Now it is used only for storage. It seems to me it would be of great benefit to raze the Ford Building and put the new civic theater there.

March 30, 1957, San Diego Union, B-12:7. Richard D. Cooley, La Mesa, writes letter in answer to letter by Mr. Neil; says gymnasias are not as important as "culture."

March 30, 1957, San Diego Union, B-12:7-8. Florence R. Goss, San Diego, writes theater-music hall not compatible with commercial convention hall.

San Diego is so fortunate in possessing both beauty of setting and fine climate and these assets are something wonderful and unique. They are ours, and herein lies our fame. Balboa Park is another

blessing with its art gallery, Globe Theater, museums and Balboa Park Bowl with its outstanding summer musical programs rapidly spreading the fame of San Diego's "Festival of the Arts" throughout the country. Now, let's add to our Balboa Park --- a beautiful civic theater-music hall.

April 2, 1957, San Diego Union, 9:3. Unanimous support for the proposed civic theater in Balboa Park was expressed last night by a panel at a public forum on the theater bond issue attended by 75 persons in the House of Hospitality, Balboa Park.

Three speakers --- Supervisor Dent, Mrs. Henry B. Clark and architect Lloyd Ruocco --- discussed the theater project and answered questions at the forum, sponsored by the San Diego Town Meeting.

Mrs. Marguerite Schwarzman, chairman of the town meeting organization, said there is no organized opposition to the theater proposal.

Two women spoke in opposition from the floor. One, Miss Margaret Culbertson, of 1648 Adams Avenue, said three groups would vote against the theater. She listed them as persons opposing higher taxes, those favoring keeping the park as a park, and citizens who believe the site is wrong.

Mrs. Harriett Synder, of 3524 Alabama Street, said she opposed the park site because of congestion.

April 3, 1957, San Diego Union, A-10:3. Applications are being accepted by the San Diego Community Theater for scholarships to the acting company of the National Shakespeare Festival.

April 4, 1957, San Diego Union, A-19:8. Exhibits representing thousands of hours of study and work started to move into Conference Building, Balboa Park, last night.

April 4, 1957, San Diego Union, B-2:8. Helen Muehleisen in favor of civic theater and music hall in Florida Canyon.

April 5, 1957, San Diego Union, A-19:1-2, A-20:6-7. Exhibits placed for third annual Greater San Diego Science Fair; judging today.

April 6, 1957, San Diego Union, B-2:1-2. EDITORIAL: Science Fair Inspires All.

The Science Fair will be open through Tuesday. From it, everyone can derive both scientific education and personal inspiration. Don't miss it.

April 7, 1957, San Diego Union, A-23:8, A-24:2-3. Mission Bay airport weighed; park section suggested in site report; problem referred to presidential coordinating group.

April 7, 1957, San Diego Union, C-2:7. Carol Sperry in favor of a Japanese tea house in Balboa Park.

April 7, 1957, San Diego Union, F-11:1-3. The nation's largest rose show will be held next Saturday and Sunday in the Conference Building, Balboa Park.

April 8, 1957, San Diego Union, A-15:5. Three thousand see exhibits at Science Fair.

April 8, 1957, San Diego Union, B-2:7-8. John Cotton, San Diego, says ladies should get credit for civic theater.

. . . this is a use for which we have been saving our Balboa Park.

April 8, 1957, San Diego Union, B2:8. Mary Buck Farrow, San Diego, writes new theater is ideally located.

April 9, 1957, San Diego Union, A-13:7-8. Navy effects hospital cut at Coronado; family in-patient care eliminated; 47 workers shifted to park unit.

April 10, 1957, San Diego Union, A-13:1-2. Theater bond issue approval foreseen; Mayor Dail predicts success during luncheon meeting of project's backers.

April 10, 1957, San Diego Union, B-2:7. Harry Warburton for theater in Florida Canyon.

April 11, 1957, San Diego Union, A-21:1. Civic theater backers name 91 to committee.

April 13, 1957, San Diego Union, A-5:4-6. Easter Sunrise services to be held in Balboa Park and county areas.

April 13, 1957, San Diego Union, A-15:1-2. 110 fancy autos displayed in Electric Building.

April 14, 1957, San Diego Union, A-23:4-5. Women spearhead Civic Theater plan; \$3.5 million bond issue up to voters; project conceived by distaff leaders (architect's sketch of civic theater in Balboa Park).

Last week Sam Hamill, one of the consulting architects who made preliminary plans for the proposed theater, told a mayor's civic luncheon how the theater would eliminate the critical parking problems at Russ Auditorium. The auditorium is used mostly for theatrical and musical productions.

Hamill said plans for the theater call for split level parking lots on the site to accommodate 1500 cars, more than enough for capacity audiences.

He said the parking terraces would take advantage of the sloping terrain from Park Boulevard to the east. The terraces would be at the sides and rear of the theater and a patron could park on the same level as his theater seat.

April 14, 1957, San Diego Union, A-23:8. City's voters will choose three councilmen Tuesday; three propositions include Civic Theater bonds; only 40 percent of registration is expected to ballot, by Henry Love (architect's sketch of civic theater in Balboa Park).

A ballot issue proposition promoted almost entirely by women will be decided by San Diego voters at the municipal election Tuesday.

The proposition would authorize \$3,500,000 in bonds for construction of a civic theater on an undeveloped seven-acre site just east of Park Boulevard in Balboa Park.

Plans call for a 3,000-seat theater for the presentation of theatrical and musical events, lectures, public meetings, motion pictures and live television performances.

Conceived by women civic and social leaders, the civic theater proposal has been directed and financed by women. For these reasons it is unusual among San Diego bond issues.

However, the proposition is more than the pet project of club women. It has received support from organizations in every facet of San Diego life. And numerous men and men's organizations have assisted in the campaign.

Last week Sam Hamill, one of the consulting architects who made preliminary plans for the proposed theater, told a mayor's civic luncheon how the theater would eliminate the critical parking problem at Russ Auditorium. The auditorium is used mostly for theatrical and musical productions.

Hamill said plans for the theater call for split-level parking lots on the site to accommodate 1,500 cars, more than enough for a capacity audience.

He said the parking terraces would take advantage of the sloping terrain from Park Boulevard to the east. The terraces would be at the sides and rear of the theater and a patron could park on the same level as his theater seat.

One terrace on each side of the theater would provide parking on the balcony level, Hamill said. A lower one on each side would be on the same level as the orchestra seats.

Another terrace, lower and farther east, would run from north to south behind the theater. It would provide parking for performers and deliveries to the theater workroom beneath the stage.

Elevators would carry patrons from the lower level to the orchestra and balcony levels, Hamill said.

He said entrance and egress to the parking lots would be provided from Laurel Drive, Park Boulevard, Florida Drive and Morley Field Drive.

The number of exits would provide rapid dispersal of cars, Hamill said.

Proponents of the proposition have said that parking is only one of the deficiencies in local cultural facilities that would be alleviated by a civic theater in the park.

Other shortcomings are in acoustics, lighting, air conditioning, orchestra, pit, dressing rooms and stage equipment, they said.

The civic theater would be equipped with the most modern seats, air conditioning, lighting and acoustics and attractive draperies and curtains.

There would be a large stage and proscenium arch, adequate dressing rooms for performers, a rehearsal room for orchestra and choral groups, storage space and lockers, motion picture projection booths and offices.

The stage would be 150 feet by 50 feet and the proscenium arch would be 75 feet wide and 35 feet high.

Supporters say the theater would attract more and better cultural events and larger audiences, raising the cultural level of the community.

Because the land is city-owned, the cost of acquiring private land for a site would be eliminated. This also would mean no loss of tax revenues to the city through the removal of property from the tax rolls.

Other salient features of the civic theater listed by its supporters are”

The site is convenient because it is near the city’s population center. It can be easily reached by cars, trucks and public transportation.

Located in a pleasant setting, the civic theater would be architecturally attractive, conforming to its functional use and the requirements of the setting.

It would be built of reinforced concrete and steel. It would be fireproof and would occupy 40,000 square feet of ground space.

Inside the structure will be seating for 3,000 persons, a spacious entrance lobby with box office, a large foyer with a lounge, a large stage, orchestra pit and an engineer’s control room.

The orchestra pit would accommodate 75 musicians.

An expenditure of \$3,500,000 would finance the entire project. The city would sell 25-year general obligation bonds at about 3 percent interest. The average annual cost to the city would be approximately \$194,600. This would cost the average home owner about 96 cents.

The theater would be controlled by the city's governing body. It would be managed by a department head or a appointee.

Operation of the theater would be as nearly self-sustaining as possible. Rental rates and charges would be predetermined. All expenses incident to the production of events would be charged to the events.

Only actual management and maintenance expenses would be charged to the theater.

Mayor Dail has said that the civic theater is not planned to replace other needed public assembly facilities in San Diego.

April 14, 1957, San Diego Union, A-24:1-2. "Montezuma Rose," queen of show.

April 14, 1957, San Diego Union, A-30:1. Crippled children will be special guests at the Easter Parade of Wheels Sunday noon at the Organ Pavilion, Balboa Park.

April 14, 1957, San Diego Union, C-2:1-2. EDITORIAL: Civic Theater Issue One For Voters To Decide.

The civic theater this time goes before the voters on its own merits. Previously, a civic theater had been included in a combined downtown facility which called for a convention hall, sports arena and little theater as well. The voters twice rejected this much more costly and elaborate project. The civic theater proposal has the added advantage of being located on publicly owned unused land. The theater would take its place with the city's other major cultural structures in Balboa Park.

The civic theater has not been confronted with an organized opposition though disapproval has been expressed by the San Diego Taxpayers' Association. Some political figures and leaders have questioned the timing over other civic projects.

April 15, 1957, San Diego Union, A-1:1-2. "Zip," San Diego Zoo's prize chimp, has heart ailment, by E. G. Martin.

April 15, 1957, San Diego Union, A-6:1-3. Annual Rose Show draws 5,000 visitors here.

April 15, 1957, San Diego Union, A-13:1-2. Spring Fair of Modern Home Ideas, April 23-28, in Electric Building.

April 15, 1957, San Diego Union, A-13:8. Four robbed in Balboa Park area.

April 15, 1957, San Diego Union, A-13:3. Women to urge theater backing in phone drive.

April 16, 1957, ELECTION: Proposition A - Shall the City of San Diego incur a bonded indebtedness in the principal sum of \$3,500,000 for the acquisition and construction by said city of a municipal improvement, to wit: a civic theater, with vehicle parking thereof, to be located within an area of Balboa Park, bounded on the west by Park Boulevard, on the north by Morley Field Drive, on the east by Florida Street, and on the south by Laurel Drive; said civic theater to be used for pageants, public gatherings and other public uses, and to include radio and television facilities, movie projection booth, equipment, furniture and furnishings, and all incidental facilities necessary therefor, and said improvement to include construction and public utilities, paving, drains, sewers, structures and facilities therefor?

Yes	31,804 (31.72%)
No	25,441

April 17, 1957, San Diego Union, A-1:7-8, A-2:3. Schneider, Kerrigan whip challengers in light city voting; Civil Service, Pueblo Land Proposals Okayed as Auditorium Misses Required Support, Ross G. Tharp defeats John M. Ashton for Council seat vacated by Claire Burgener, by Henry Love.

April 18, 1957, San Diego Union, B-1:4-5. Architects' Institute Honors Samuel W. Hamill, San Diego Architect.

Samuel W. Hamill, 54, a San Diego architect, has been selected as a fellow of the American Institute of Architects. He will go to the Washington, D. C. Institute headquarters to accept a medal and diploma in connection with the honor during the organization's centennial convention May 13-18. Only two other San Diegans, William Templeton Johnson and Louis J. Gill have been named Institute fellows. Both are retired.

Fellowships in the AIA are limited to 3 percent of the professional organization's initial membership. Hamill was chosen by a jury of fellows, he was told by Edmund Purvis, executive secretary of the Institute.

Hamill, a native of Globe, Arizona, came here in 1908 when he was 5. He attended San Diego High School and San Diego State before taking an architectural degree from the University of California. He became a junior partner in the firm of Requa & Jackson and in 1970 became its sole operator when his partners retired.

One of the architects designing the proposed Hall of Justice here, Hamill helped design the Casa de Temp and the Veterans War Memorial Building in Balboa Park, the Civic Center, the Del Mar fairgrounds and other San Diego County structures. He is a director and past president of the San Diego chapter of the Institute.

Hamill was president of the Community Chest for two years and served as chairman of its budget committee, of which he is still a member. He is a member of the boards of the Fine Arts Society and the Museum of Man. He lives at 4467 Ampudia Street.

April 18, 1957, San Diego Union, B-2:1. EDITORIAL: The No's Had It.

Despite the tireless advocacy of a dedicated band of women, Proposition A --- the civic theater --- was rejected by the voters in Tuesday's city election.

It marked the third time San Diegans have turned down propositions which would provide civic theater facilities in one form or another. Unlike the previous attempts, this week's proposition split off the civic theater from convention hall proposals; a different site was to be used.

The need for public assembly facilities in San Diego is undeniable. Indeed, in two of the three elections a majority of the voters wanted the project to begin. In Tuesday's election, the "YES" vote was 31,471; the "NO" 25,264. In the first 1956 election 62,751 approved and 41,063 disapproved.

In bond issues of this type, a two-thirds majority must approve. It is a responsibility of the city government and community leadership to find the combination of site and facilities which will win the required amount of approval.

April 20, 1957, San Diego Union, A-6:4. The combined Junior and Senior Bonham Brothers Boys' Bands will present a 90-number Easter concert at 3 p.m. tomorrow in Balboa Park Bowl.

April 20, 1957, San Diego Union, A-13:1-6. New fountain in Flaming Lagoon at San Diego Zoo is accepted as gift to city (illus.).

April 21, 1957, San Diego Union, A-10:1-3. An egg hunt in Golden Hill Park, a parade on Imperial Avenue and a band concert in Balboa Park today will conclude organized Easter festivities which began in the San Diego area yesterday.

May 26, 1957, San Diego Union, F-10:1-3. Home Show ends tonight.

May 27, 1957, Balboa park Citizens' Study.

p. 71. Landscaping Committee Report - Section 29.

Section 29 is the area around the Veterans' War Memorial Building. It is bounded by Zoo Drive, Park Boulevard and the northerly line of the Park Boulevard parking lot. This is a small and recent development and requires little improvement. The only recommendation is for additional trees to be planted to breakup and shade the vast expanse of lawn area.

Undesignated Areas.

Consideration has been given to areas of Balboa Park which are not included in the numbered sections and still are not within allocations to independent agencies or developed for a specialized use.

Such an area is the east side of Park Boulevard from Morley Field Drive to Laurel Street, or El Prado. The landscape development of this section is already included in the Master Plan. The committee recommends that those proposals stand.

The Florida Drive Canyon area will doubtless be given over to an increased traffic way. No landscape development is proposed at this time due to priorities established for other areas. It is also the feeling of this Committee that the natural state of this canyon has its own merit and need not be disturbed. It is recommended, however, that cuts along Laurel Drive and Florida, as well as those at the intersection of Laurel and Pershing Drives, be given a ground cover. Ground cover is also recommended for all cut portions along Florida Drive.

Specific recommendations for Morley Field, from this Committee, are impossible due to pending revision of recreation and traffic facilities. These changes are inevitable results of the relocated golf course.

Wherever topography permits, after the construction of the Date Street Freeway, it is recommended that screen planting be made on both sides of Pershing Drive, from 18th Street to 26th Street Road, to hide the cuts made by development of the Naval Hospital grounds and by the City's Public Works Service and Storage Yards.

And, since it affects a major street as well as Balboa Park, this Landscaping Committee wants to reiterate its objection to the proposal to remove a row of *Cocos plumosa* on the easterly side of Sixth Avenue to permit the widening of this avenue in excess of that proposed in the major street plan.

May 28, 1957, San Diego Union, 17:1-8, A-23:1-3. City gets Park Development Plan; Citizens Committee submits blueprint for improvements; Closing of Laurel Street to traffic; End to horseback riding, archery proposed, by Peter Kaye (illus.).

Lease Policy Surveyed, Wins Praise: City lease policies in Balboa Park were commended yesterday by the commercial subcommittee of the Balboa Park Citizens Study Committee.

"Present leasing policies in effect should not be changed due to the unique situation and unusual business conditions in Balboa Park," the report said.

"We feel there has been much thought give by the city to setting up the present schedule. We highly commend and approve the action that has been taken and the management of the leases at present."

The subcommittee studies contracts, leases and administrative regulations. Fifty-two leases were reviewed. Hugh L. McCoy was subcommittee chairman.

Twenty-nine Acre [sic] Landscaping Program Advocated: The landscape subcommittee of the Balboa Park Citizens Committee yesterday submitted details for developing 29 areas of the park.

"The greatest effect of this report should be to alert San Diego citizens and administration not only to the needs for additional landscape development but also to the additional maintenance program necessary to salvage what already has been planted and developed," the report said.

The 29 areas generally already are planted. The subcommittee, headed by Edward A. Heilbron, also outlined a general plans for undeveloped park areas.

Complete Overhaul of Park's Traffic System Requested; Plan Proposes To Eliminate Congestion By Keeping Autos From Center Area: A complete overhaul of streets and parking areas was recommended yesterday by the traffic subcommittee of the Balboa Park Citizens Study Committee.

Generally the plan would eliminate congestion by removing auto traffic from the center of the park; improving access along freeways, major streets and park roads; building new perimeter parking lots and setting up a system of public transportation to the park and within the park.

Some of the major recommendations of the subcommittee, headed by Ray E. Stauffer, follow:

1. Three major freeways and proposed Highway 101 and Switzer Canyon will lie partly within the park and will carry the bulk of visitors to and from the park.
2. Five major streets will carry the remainder of the through traffic --- Sixth Avenue, Park Boulevard; Florida Street which would be extended south to 25th Street; 28th Street, and a proposed east-west through road along Olive Street Canyon to connect with the Cabrillo Freeway at the Richmond Street overhead.

3. Construction of a loop park road surrounding the cultural area with connections to Park Boulevard, Cabrillo Freeway and Balboa Drive; construction of a new road from Park Boulevard to 16th Street and Russ Boulevard; connection of Eighth Avenue and Balboa Drive to Sixth Avenue and improvement of other existing park roadways.
4. Closing of El Prado (Laurel Street) between Cabrillo Bridge and Park Boulevard to auto traffic.
5. Construction of new parking lots east of the Globe Theater; south of the Electric Building; in Gold Gulch Canyon; north of Balboa Stadium; at the site of the Children's Home; west of the Naval Hospital; west of Florida Street; at the proposed new golf course clubhouse, and northeast of Park Boulevard at El Prado.
6. Development of public transportation to major park events and installation of electric cars, pony cars, rickshaws or skyways to operate entirely within the park.
7. Improvement of pedestrian ways and elimination of equestrian trails.

City Council Gets Development Plan for Park: A blueprint for future development of Balboa Park was presented to the City Council yesterday by the Balboa Park Committee. For two hours Dr. Douglas McElfresh, committee chairman, summarized the eight-month work of 75 committee members.

The 80-page report that McElfresh read contains recommendations of six subcommittees --- buildings, finance, traffic, recreation, landscaping and cultural and educational.

Its scope covers the entire 1400 acres of the park for the next 50 years, McElfresh told reporters. It does not contain a timetable for proposed improvements, an estimate of their cost, or a recommendation for their financing.

"We were asked to develop the type of park that would best serve the community," McElfresh said, "with no recommendation on economics. Finances are not a part of this study."

Subjects covered ranged from pony carts to freeways, from archery to the zoo. Some of the important recommendations included:

1. Removal of such major buildings as the Medical Arts Building, American Legion Building, Administration Building, House of Charm, the gymnasium and the Food and Beverage Building.
2. Intensive development of Morley Field as a recreational area.
3. Closing of El Prado (Laurel Street) to auto traffic.
4. Development of the Ford Building for the future use of the Museum of Man or another exhibit of unusual interest.
5. Prohibition of archery, horseback riding and model airplanes and model autos from the park.

McElfresh told reporters that the recommendations represented an attempt to preserve the heritage of the park and at the same time to increase its usefulness.

Traffic and parking, for example, should be placed around the edges of the park to permit cultural, educational and recreational activities to develop in a central pedestrian island.

Recreational activities would be kept east of Park Boulevard and separate from museums, theaters and galleries. Landscaping would blend in existing and proposed parking areas and roads.

The committee commended the city's present leases with commercial interests within the park. It recommended a stepped up program to publicize park activities. Facilities and activities for senior citizens were encouraged.

"That our primarily practical people have for so long been deeply moved and attracted by the beauty of the composite of buildings and gardens at Balboa Park," the report said, "is proof positive that all

future development must be directed to continue this esthetic masterpiece through carefully considered maintenance and development.”

Balboa Park’s future was referred to the committee by the City Council last year after the Chamber of Commerce requested a decision on renovation of park buildings.

The study later was expanded to include other aspects of present and future park use. Committee members included both public officials and private citizens, technical experts and laymen interested in park development. McElfresh is a North Part optometrist.

Mayor Dail dismissed the committee after thanking members for their time and effort. He asked the executive committee to remain on call for future discussions with the council.

In addition to McElfresh, the executive committee consists of Robert Frazee and Arthur Butler, vice chairman; Paul B. Rayburn, chairman of the Park and Recreation Commission; Leo Calland, park and recreation director; and Philip L. Acker, Dail’s administrative assistant.

Demolition Urged For Many Buildings; Retention of Architectural Heritage Recommended in Replacement Plans: The buildings subcommittee of the Balboa Park Citizens Study Committee yesterday recommended retention of the park’s architectural heritage in the face of demolition of many park buildings. More than half the 31 buildings surveyed were recommended for demolition eventually. Most of them were built as temporary structures for the 1915 and 1935 world fairs.

“To the thousands of citizens who wish to retain Balboa Park in all its beauty and to many of those citizens who dread the removal of a single beautiful old structure,” the report said, “we call attention to the fact that the immutable hand of time and decay will sooner or later destroy each of the temporary structures.”

It said the greatest tribute would be to carry on a continuing program of park development to replace each building or garden with a structure of commensurate beauty.

Major recommendations of the subcommittee headed by Samuel W. Hamill follow:

Park and Recreation Department Administration Building - Be retained until offices are relocated then structure be torn down and area landscaped.

Museum of Man - Be retained permanently.

Globe Theater - Be retained until comparative facilities can be obtained elsewhere.

Medical Arts Building - Be retained until Fine Arts Gallery expands into area. If Fine Arts Gallery does not expand, building should be reevaluated and possibly removed.

Fine Arts Gallery - Be retained permanently.

American Legion Building - Be removed prior to Medical Arts Building. It is understood contemplates expanding into area [sic].

Botanical Building - Be retained permanently.

Food and Beverage Building - Be removed unless a usage exists that justifies its replacement in permanent construction. If building is removed, exposed ground should be suitably landscaped.

Spanish Village - Be retained until a more critical use appears for the area.

Natural History Museum - Be retained permanently.

House of Hospitality - Be retained.

House of Charm - Be retained only until proper redevelopment plans are made for the area.

Organ Pavilion - Be retained permanently.

Federal Building - Be retained permanently if its exterior is redesigned architecturally to improve its appearance.

Gymnasium - Its location crowds Balboa Park Bowl. Its removal would provide better access to proposed new parking areas.

Balboa Park Bowl - Be retained if rebuilt for permanency.

Ford Building - Retention depends upon use considerations and consideration of the unusual area available.

Conference Building - Be retained if need continues.

Palisades Building - Present uses eventually will require relocation.

Balboa Park Club - Be retained through its useful life.

House of Pacific Relations - Be retained for buildings' useful life.

Photographic Arts Building - May be considered for retention for the balance of its useful life depending upon use considerations.

Floral Society Building - May be considered for retention for the balance of its useful life depending upon use considerations.

Panel Urges Stadium for Park Tennis; 2,000 Capacity - Construction of a 2,000-seat tennis stadium and improvements in other recreation facilities were recommended yesterday by the Recreation subcommittee of the Balboa Park Citizens Study Committee.

The subcommittee, headed by Ivor de Kirby, recommended archery activities be removed from Balboa Park and auto racing from Balboa Stadium. It said equestrian activities will have to be removed from the park when construction of the crosstown freeway begins.

Better facilities for picnicking and elderly persons were recommended, including bridge, shuffleboard and lawn bowling.

The subcommittee recommended recreational activities be continued in the Palisades and El Prado areas, including gymnasium events, arts and crafts, square dancing, dramatics, model railroading, horseshoes, shuffleboard, lawn bowling, bridge and drill teams.

The subcommittee said the present 18-hole golf course should be enlarged to 27 holes when the Switzer Canyon freeway is developed.

The subcommittee suggested Morley Field should be developed as follows:

1. Improvement of the fly casting pool.
2. Construction of nine or ten tennis courts, storage space, a clubhouse and dressing rooms.
3. Development of a new picnic area and ball field for picnickers. Improvements to the present ball field.

4. Maintenance of the cross country track.
5. Elimination of model airplane and automobile activities because of the noise.

The subcommittee said auto racing should be removed from Balboa Stadium and a permanent athletic running track be installed.

May 28, 1957, San Diego Union, A-17:8. Balboa Park Citizens Study panel urges 2,000-seat tennis stadium in Balboa Park.

May 28, 1957, San Diego Union, A-23. Added Cultural Facilities Asked: A program that would allow retention and expansion of most cultural and educational facilities within Balboa Park was recommended yesterday.

The cultural and educational subcommittee of the Balboa Citizens Study Committee made these general findings and recommendations.

1. Space near the present site of the Natural History Museum should be retained for expansion. City and county schools should reimburse the museum for special services rendered.
2. The Museum of Man facilities are poorly arranged. Management of the facility suggest a move to the Ford Building if the city would repair it. Such a move would cost the museum \$213,000.
3. The Ford Building should be made available for the Museum of Man or another exhibit of unusual public interest.
4. The American Legion Building and Medical Arts Building should be razed to permit construction of wings to the Fine Arts Gallery.
5. Spanish Village should be brought up to a better standard of maintenance and should be renamed. Tenants should keep their studios open and artists should be required to be actively working at least half of the hours the building is open.
6. Dressing rooms, public rest rooms, box offices, concession stands and a scene dock should be provided for Star Light performances. These facilities also would improve conditions for summer symphonies.
7. Electronic transmission of organ music from the outdoor concerts might be transmitted from speakers to the California Tower to compensate for light attendance.
8. The San Diego Zoo should be granted its request for additional land between Cabrillo Freeway and the Globe Theater.
9. The Fire Alarm Station should be removed from the park.
10. The Children's Home should be moved to a more suitable location outside the park.
11. Consideration should be given to providing space for a planetarium and a science and industry museum in the park.
12. Continuation of existing facilities is generally recommended for Business Man's Art Group, Junior Theater, House of Pacific Relations, Youth Symphony, Roosevelt Junior High School, House of Hospitality, Naval Hospital, San Diego High School, San Diego Junior College, Snyder Continuation School and Floral and Photographic Arts Building. J. Colin Hodge was subcommittee chairman.

May 29, 1957, San Diego Union, A-8:3-4. Junior Theater will hold down the morning stint by rehearsing some six plays beginning June 25, with production dates set for the last week in July and the first week in August

One junior high three-act production will be presented in the Recital Hall, Balboa Park. . . . Four 40-minute plays will tour city playgrounds during week of July 29th.

May 30, 1957, San Diego Union, B-1:4. Charles Shatto, civic organist, will present a Memorial Day program Thursday at 2:30 p.m. in Organ Pavilion.

May 31, 1957, San Diego Union, A-6:1-3. Folk Dancers open four-day festival; 2,000 participants expected (illus.).

The United Folk Dance Association of San Diego, composed of three clubs in San Diego and one in Chula Vista, is host for the convention, the first to be held here. It is sponsored by the city Park and Recreation Department and the Folk Dance Federation of California.

May 31, 1957, San Diego Union, B-2:2. EDITORIAL: Broad Blueprint.

A great deal of fact-finding and thought obviously were expended by the Balboa Park Citizens Study Committee in preparing the survey of the park's needs.

June 3, 1957, San Diego Union, B-1:4. A colorful parade and lawn program at the House of Pacific Relations yesterday was the closing event in a four-day festival of the Folk Dance Federation of California; approximately 1200 persons attended one or more sessions of the festival.

June 3, 1957, San Diego Union, B-2. Mary Coffen horrified by recommendation of Citizens Study Committee which urged an end to horseback riding in Balboa Park.

June 10, 1957, San Diego Union, A-13:4-5. Children's Zoo to open June 30; reflects new concept; located on 1.75 acres of land; cost \$190,000; designed by Lloyd Ruocco.

June 20, 1957, San Diego Union, A-9:4-5. A. J. Sutherland, president of the summer celebration, announced yesterday that a featured event two weekends during the second annual Fiesta del Pacifico will be an outdoor Fiesta Art Mart in Balboa Park.

June 23, 1957, San Diego Union, 11:2. O. W. Todd, Jr. and Ed Breitbard ask use of House of Charm as Sports Hall of Fame; Fiesta del Pacific asks use of an undetermined number of buildings; Industrial Development Council will ask for Ford Building as a Science Museum.

June 24, 1957, San Diego Union, A-18:1. Sixty-nine boy scouts break camp in Balboa Park.

June 24, 1957, San Diego Union, B:1-8. The old Spanish plaza this summer will be transformed into a Spanish market for the Fiesta del Pacifico.

June 26, 1957, San Diego Union, A-13:6. Fiesta asks control of park units.

Directors of the Fiesta del Pacifico yesterday asked the City Council for exclusive use next year of the Ford Building and the Spanish Village in Balboa Park. They also requested a \$50,000 city contribution and \$75,000 worth of city services. A. J. Sutherland, Fiesta president, said he would like a decision by August 1.

Wayne Dailard, Fiesta producer manager, estimated it would cost \$86,000 to rehabilitate the Ford Building for use as an exhibit hall. He said the Fiesta would maintain the building and Spanish Village.

The Council earlier this year tabled a Fiesta request for use of the Ford Building until completion of a citizens' committee report on the development of Balboa Park.

Graydon Hoffman, a Fiesta vice president, said the Fiesta would get about \$335,000 through the sale of space in the Ford Building under a plan to market it as an international exhibit building. Sutherland said 60 firms have indicated they would purchase space there. He said the Fiesta plans to use the building for about 60 days, starting in August 1958.

June 27, 1957, San Diego Union, B-2:6. Austin W. Corditz suggests changes to script of "The California Story."

June 29, 1957, San Diego Union, B-12:2. EDITORIAL: Real Life Fairy Tale.

The small monarchs of San Diego's new junior-sized animal kingdom will survey their domain tomorrow when the Children's Zoo opens in Balboa Park. It's a democratic kingdom, however, for the children, ranging in age from 2 to 10, will be on hand-to-paw and nose-to-nose terms with their subjects once past the 25-inch high ticket counter.

Three years of planning and designing went into this fairy tale come to life. Everything to delight the heart of a child has been incorporated in the 1-1/3rd acre, \$200,000 project. There are burros and turtles to pet, monkeys to make faces at and 200 animals and 30 exhibits to see.

The zoo is built to the scale of a child of four years. Adults who can't stoop, duck or bend over will have to settle for animal crackers.

June 29, 1957, San Diego Union, B-12:7. Margarita Faxton wants more local talent in Fiesta del Pacifico.

June 30, 1957, San Diego Union, E-1:2-4, E-3:3-8. A little zoo for little people, by Jack Miner (drawing of plan).

Because feeding the animals is exciting for children, the push carts and refreshment stands are supplied with appropriate food which can be purchased and fed to the animals.

July 1, 1957, San Diego Union, A-15:1-5, A-17:3. Dad, Mom "help" kids open Children's Zoo, by E. G. Martin (illus.).

July 4, 1957, San Diego Union, B-1:1-2. "Guys and Dolls" to open tonight at Starlight Opera.

July 5, 1957, San Diego Union, A-17:1-2. "Guys and Dolls" in colorful start, by Joe Brooks.

July 7, 1957, San Diego Union, A-17:1-2. Puppeteer series will open today in Puppet Theater.

July 7, 1957, San Diego Union, A-29:1. City Council will discuss park buildings use Tuesday with Balboa Park Citizens Study Committee; will also discuss use of Balboa Park buildings by Fiesta del Pacifico, Breitbard Foundation and Industrial Development Council.

July 7, 1957, San Diego Union, A-31:7-8, A-34:7. Variety spices your appetite at Balboa Park, by Even A. Koala.

July 8, 1957, San Diego Union, A-15:1-8. Fiesta! San Diego hears call for celebration, by Alfred Jacoby.

July 8, 1957, San Diego Union, B-1:7-8. Botanical Building restored in park.

The renovated Balboa Park Botanical Building will be turned over to the city Thursday, one month ahead of schedule, W. Allen Perry, Balboa Park superintendent, said yesterday.

It won't be open to the public for five or six months, however. Perry said it will take that long to plant flowers and trees inside, realign paths and do other necessary work.

July 9, 1957, San Diego Union, A-13:6-7. Summer concerts will open tonight.

July 10, 1957, San Diego Union, A-7:4-5. City may call a halt to organ recitals; Council members cited low attendance records at the concerts in questioning the advisability of extending organist Charles Shatto's contract and contract for Leonard L. Dowling to tune and maintain the organ for another year.

July 17, 1957, San Diego Union, A-12:3. City Council plans conference on organ concerts.

July 17, 1957, San Diego Union, B-5:4. Chamber of Commerce supports Balboa Park Citizens Study Committee's recommendations.

July 18, 1957, San Diego Union, B-4:4-5. City Manager Campbell outlines park building use plan.

Both Fiesta del Pacifico and Museum of Man could use a rehabilitated Ford Building under a plan outlined by City Manager Campbell.

Balboa Park Citizen's Study recommended it be used to house the Museum of Man to replace the antiquated museum building.

Tom Fletcher, assistant to the City Manager, explained:

1. City would pay \$100,000 for rehabilitation of the building.
2. Permit the Fiesta to use it for 5 or 6 years as a trade show building for Inter-American products.
3. Require the Fiesta to pay the cost of rehabilitation from admissions and exhibitor's rental fees.
4. Permit the Museum of Man to gradually move into the Ford Building while it is occupied by the Fiesta, and to take it over completely at the end of the Fiesta.

Richard Pourade, *City of the Dream*, Copley Books, 1977, 107.

All agreed the fiesta should be presented annually. That is, perhaps all except members of the City Council. Councilmen refused to donate City funds for a 1957 fiesta, refused to rehabilitate the Ford Building of the 1935 Exposition for a fiesta headquarters and exhibit hall, and appeared reluctant to allow the Spanish Village to be diverted for such affairs. Cooperation would extend only to services.

There was some feeling in the community that the chief benefactor of the fiesta had not been the City and the tourist business but Dailard and his co-workers who has produced "The California Story." . . . It was agreed that the fiesta had run too long and next time it would be reduced from thirty-three days to eighteen.

July 19, 1957, San Diego Union, A-1:6-8, A-2:8. Julius Leib, 72, Starlight conductor, dies; stricken while on podium.

July 25, 1957, San Diego Union, A-17:8, A-18:3. Colorful ceremony opens 1957 Fiesta del Pacifico.

July 26, 1957, San Diego Union, A-15:5-7. Final rehearsals set today for parade, "California Story."

July 26, 1957, San Diego Union, A-18:3. "The Knight of the Burning Pestle" opens at Old Globe, by Constance Herreshoff.

July 27, 1957, San Diego Union, A-13:7-8. Fiesta parade, pageant set today.

July 28, 1957, San Diego Union, A-1:4-6, A:5-8. Three hundred thousand line Sixth Avenue to watch Fiesta parade.

July 28, 1957, San Diego Union, A-19:7-8. Sixteen thousand attend opening of "The California Story," by Alfred Jacoby.

July 28, 1957, San Diego Union, A-19:1-3, A-20:1-4. New songs, revamped script make "The California Story" better than ever, by Edwin Martin.

July 28, 1957, San Diego Union, E-1:4-8. Starlighters play "The Pajama Game" (illus.).

July 28, 1957, San Diego Union, E-3:3-8. Shakespeare at the Old Globe, "King Lear," "The Tempest" and "Knight of the Burning Pestle" in rotation, by Priscilla Sellman.

July 28, 1957, San Diego Union, E-3:3-4. The Hi-Los, the male vocal quartet currently riding the top of the popular music crest, will appear Tuesday with Robert Shawn and the San Diego Symphony Orchestra in the fourth summer series concert in Balboa Park Bowl at 8:30 p.m.

July 28, 1957, San Diego Union, F-8:1-3. Eight thousand dahlias in Conference Building.

July 29, 1957, San Diego Union, A-11:7-8. Thousands join in Fiesta pageant, tours, dances.

July 30, 1957, San Diego Union, A-13:4. Balboa Park flag thieves fined \$25; taken from Fiesta del Pacifico Avenue of Flags displayed along Cabrillo Bridge in Balboa Park.

July 30, 1957, San Diego Union, A-13:5-6. Fiesta week offers art, music, drama.

July 31, 1957, San Diego Union, A-15:6-7, A-21:4. Dancing, parades lead Fiesta fare.

August, 1957. San Diego Magazine, 39, 46. Festival fever: The Uses of the Past, by James Mills.

August 1, 1957, San Diego Union, A-6:3-4. "The Pajama Game" opens at Starlight tonight.

August 2, 1957, San Diego Union, A-17:5. Panel favors retention of park music; hopes to find way to increase appeal of organ concerts.

The city committee named to decide the fate of Sunday concerts on the Spreckels organ in Balboa Park yesterday said it had no intention of abolishing the concerts.

Committee members, meeting for the first time, said they hope to find a way to make the concerts appealing to more persons. Poor attendance at the concerts has been cited by the City Council in delaying a renewal of a contract with Charles Shatto, civic organist.

Improved programming with emphasis on light music rather than "the old masters" was cited by Councilman Schneider as a means of attracting larger audiences.

The park organ is not suitable for "bebop music," said Isabel Tinkham, dean of the San Diego Chapter, American Organists Guild. "That's for electronic organs."

Schneider said he thought an electronic organ could be placed at the pavilion and would attract more listeners than the pipe organ. Miss Tinkham said an electronic organ would "desecrate the pavilion."

"There's nothing sacred about that organ," Schneider said of the Spreckels organ, said to be the largest outdoor pipe organ in the world.

Councilman Tharp suggested having band concerts as well at the pavilion.

Dr. Frank Lowe suggested alternating soloists and occasional band concerts.

Ivor de Kirby, a member of the Balboa Park Study Committee, said he thought occasional use of an electronic organ would attract to the concerts persons who might become interested in pipe organ music.

Miss Tinkham said the organists guild recommends renewal of Shatto's contract.

August 2, 1957, San Diego Union, A-20:4-5. "The Pajama Game" is entertaining, by Constance Herreshoff.

August 2, 1957, San Diego Union, B-2:7. Mrs. Allen Caldwell writes organ concerts are important to city culture.

August 3, 1957, San Diego Union, A-13:5-6. Fiesta del Pacifico promises continued gaiety.

August 3, 1957, San Diego Union, B-1:4. Two pair of quokkas, rare little animal cousins to the kangaroo, have been shipped from Australia to the San Diego Zoo.

August 3, 1957, San Diego Union, B-1:8. Dr. Paul Wedgewood elected head of Park Board.

August 4, 1957, San Diego Union, A-9:1-8. Junior Ballet will present two shows at Organ Pavilion tomorrow and Wednesday evening.

August 4, 1957, San Diego Union, A-16:3-6. Attendance at "The California Story" expected to pass 100,000 tonight.

August 6, 1957, San Diego Union, B-2:8. H. M. Kroll objects to hard park benches.

August 7, 1957, San Diego Union, A-10:1-2. Large audience enjoys fifth concert of summer series in Balboa Park Bowl, by Constance Herreshoff.

August 7, 1957, San Diego Union, A-15:2-4. "The California Story" artists make sacrifice to appear.

August 8, 1957, San Diego Union, A-8:1-2. Ticket offer made for Bard's festival; sale of series tickets extend beyond the time limit set in previous years..

August 8, 1957, San Diego Union, A-13:1-4. Challenge of "The Story" lures other show's talent.

August 9, 1957, San Diego Union, A-17:7-8. Three governors arrive for final days of Fiesta.

August 10, 1957, San Diego Union, A-13:5. Grand Ball caps 1957 Fiesta.

August 11, 1957, San Diego Union, A-1:4-7, A:1-2. Fiesta head reveals plan to house "The California Story" in new ball park.

August 11, 1957, San Diego Union, C-2:1-2. EDITORIAL: For Fiesta Workers, A Hearty Well Done!

August 12, 1957, San Diego Union, A-11:8. Four hundred attend Youth Concert at Recital Hall.

August 14, 1957, San Diego Union, B-1:4. Fine Arts Gallery asks more city land for expansion.

Michael Gonzalez, president of the gallery, said it would require 150 feet of land on either side of the Plaza de Panama to build east and west wings of the gallery.

August 15, 1957, San Diego Union, A-21:5-6. Starlight Opera's "Showboat" drops anchor tonight.

August 16, 1957, San Diego Union, A-16:4-5. Compositions by three San Diego composers --- Robert Kurka, Howard Brubeck and Robert Heninger --- will be played this afternoon in a concert in the Fine Arts Gallery, Balboa Park.

August 16, 1957, San Diego Union, 30:1-2. Chamber of Commerce Supports Balboa Park Master Plan

Development of a master plan of Balboa Park improvement, support of the La Jolla-San Diego County Theater and Arts Foundation and establishment of a military affairs department yesterday were furthered in action of Chamber of Commerce directors.

In a resolution, the directors urged that city personnel be designated to develop a master program of Balboa Park maintenance and capital improvement, "using the recommendation of the Balboa Park Citizens Study Committee."

The directors urged that the citizen's committee park improvement recommendations be acted on as soon as possible.

August 16, 1957, San Diego Union, A-45:1-2. Symphony of offer "Messiah" tonight.

August 16, 1957, San Diego Union, B-2:8. Claire V. Hoerig writes park organist brings pleasure.

August 18, 1957, San Diego Union, A-6:1-2. Craft exhibition to be held in Federal Building next weekend.

August 18, 1957, San Diego Union, A-6:4-7. "Messiah" receives bravos, by Constance Herreshoff.

August 21, 1957, San Diego Union, A-6:1-2. Performance of Honegger's "Joan of Arc" in Balboa Park last night called a "triumph."

August 22, 1957, San Diego Union, A-7:1-3. Marine Depot donated \$2,700 for Children's Zoo.

August 22, 1957, San Diego Union, A-10:4. Hobbyists show arts in Craft Fair in Federal Building.

August 22, 1957, San Diego Union, A-21:3. Directors vote to stage third annual Fiesta.

August 23, 1957, San Diego Union, A-19:4. Balboa Park Craft, Hobby Fair opens today in Federal Building.

August 25, 1957, San Diego Union, A-6:1-3. Community leaders advise shorter Fiesta del Pacifico.

August 25, 1957, San Diego Union, A-10:4. Hobbyists show arts in craft fair.

August 25, 1957, San Diego Union, C-2:1-2. EDITORIAL: Shakespeare Festival Has Music Too.

Those who have gone to the Old Globe have been charmed by the nightly pre-curtain dances and songs on the green. In addition, two full concerts of baroque music feature this season's Festival.

August 25, 1957, San Diego Union, E-1:1-8, E-3:3-8. Summer finales --- festival productions entering last act.

August 25, 1957, San Diego Union, E-3:1-2. Matters of Note: Audience enjoys Festival music, by Constance Herreshoff.

August 25, 1957, San Diego Union, E-3:3-8. Finale "Anything Goes" Ends Show Season.

August 30, 1957, San Diego Union, A-24:4-5. Starlight audience enjoys "Anything Goes," by Constance Herreshoff.

August 31, 1957, San Diego Union, A-12:4-5. "Anything Goes" on again.

August 31, 1957, San Diego Union, B-2:7. Lucy M. Nicholson says "Keep Fiesta long."

September 1, 1957, San Diego Union, E-1:1-8, E-6:1-2. Classics highlight of city's varied summer music series, by Constance Herreshoff.

September 1, 1957, San Diego Union, E-6:3-8. Old Globe's new season around corner, by Craig Noel.

In looking back over the Old Globe's summer program we find that in many ways it has been an unusual season. In spite of the fact that our attendance has been smaller this year than in past seasons, the number of out-of-town reservations has grown considerably. One of the problems that faces our festival is that of building up strong attendance during the opening weeks of the season. San Diego is now enjoying such a thriving summer theatrical program many of our patrons are postponing their evening with Shakespeare until late in the season.

September 1, 1957, San Diego Union, E-6:7-8. San Diego's Ninth Piano Festival to be held September 22 in Balboa Park Bowl.

September 2, 1957, San Diego Union, A-11:5-7. "Teahouse of August Moon" next at Old Globe.

September 3, 1957, San Diego Union, A-14:1-2. Junior Theater registration begins today.

September 5, 1957, San Diego Union, B-8:3. Zoological Society told San Diego Zoo retains high rating.

San Diego's position of having the nation's largest zoo was continued last year, its sponsors were told here last night.

"We had an increase of 435 animals for a total of 3,693 --- 25 percent greater than the next largest zoo," Milton Wegeforth, president, reported to 2,000 persons attending the annual meeting of the San Diego Zoological Society.

Dr. Charles Schroeder, zoo director, said in an interview the nation's second largest zoo was the National Zoo, Washington, D. C.

The society's 12 directors named Fred Kunzel, an attorney, as president for the 1957-58 fiscal year, to succeed Wegeforth.

September 6, 1957, San Diego Union, A-10. Charles Shatto, organist at Spreckels Organ Pavilion in Balboa Park for the past three years, last night said he is not renewing his contract approved by the City Council and is moving to San Francisco.

On Thursday, the City Council approved a \$3,228 contract for continuing his concerts.

September 8, 1957, San Diego Union, E-10:1-5. Final Starlight show tonight.

September 14, 1957, San Diego Union, A-13:6-8, A-19:1. Nan Adams, Victor Buono receive top Old Globe awards.

September 16, 1957, San Diego Union, B-2:7-8. Fred Kunsel, president Zoological Society of San Diego, writes two zoos would add to costs of both.

Editor: In recent letters two of your readers asked why the new Children's Zoo does not have its own entrance and exit. We would like to explain why this is impractical.

September 22, 1957, San Diego Union, E-1:1-4, E-5:1-4. "Teahouse of August Moon" opens season, by Priscilla Sillman.

September 23, 1957, San Diego Union, A-15:1-2. One thousand two hundred and twenty-five pianists at festive here, by E. G. Martin.

September 23, 1957, San Diego Union, B-1:1-3. Fine Arts Society plans bazaar to buy Asian art.

September 25, 1957, San Diego Union, A-11:4-5. "Teahouse of August Moon" opens season at Old Globe, by Constance Herreshoff.

September 28, 1957, San Diego Union, B-2:7-8. Mrs. Carol Sanderson writes lily pond fence not needed.

October 1, 1957, San Diego Union, A-15:2-4. Lotus, baby hippo, poses for first pictures at San Diego Zoo (illus.)'

October 4, 1957, San Diego Union, B-2. Guy M. Miller writes letter expressing his approval of fine job being done by guest organist Douglas Ian Duncan. . . . He has left out the real heavy music and added a few of the lighter and more tuneful classics with the balance of the programs consisting of songs and music that we all have learned to love so much.

October 9, 1957, San Diego Union, B-2. Edward M. Little writes letter expressing preference for classics at park concerts.

Mr. Miller's letter in **The San Diego Union**, October 4, extols the interim organist's playing of popular music and light classics in Balboa Park. Mr. Duncan is an excellent organist but I am disappointed in his decision to play such music.

Concert organs are at their best when used for organ compositions, not transcriptions of pieces written for other instruments. Furthermore, they sound better in classics, such as the thrilling compositions by the semi-modern French school of Franck, Guilmant, Wider, Vierne, Boellman and modern light classics by Bingham, Clokey, Weingerger and Weaver.

I believe some people are mistaken when they think they prefer the familiar tunes. I believe that people who thrill over music, thrill just as much over unknown music. The important thing is for the organist to choose musically, not necessarily traditionally.

Mr. Shatto did this very thing and we are sorry he was allowed to slip away to San Francisco while we delayed renewal of his contract.

October 11, 1957, San Diego Union, B-1:4-5. Jesse J. Gildon, janitor, sentenced in thefts of sprinkler heads at Balboa Park.

October 15, 1957, San Diego Union, B-1:3. Baton contest slated November 9 in Balboa Park Bowl.

October 20, 1957, San Diego Union, C-2:1-2. Guy M. Miller prefers popular music on park organ.

October 25, 1957, San Diego Union, B-2:8. J. L. Silberman upset because Balboa Park does not have enough flags on display; he notes only one public building in San Diego does not display American flag.

October 27, 1957, San Diego Union, A-15:3. Bigger, best Science Fair is promised; 4th annual showing of student exhibits in Conference Building and Recital Hall set for April 11-15.

October 28, 1957, San Diego Union, B-2. Edward M. Little writes good music needed for park concerts.

. . . even good theater organ music becomes boring after a few minutes and I doubt whether a really good theater organist could make the Balboa organ sound good even for good popular music.

November 2, 1957, San Diego Union, A-13:5. Park flags will honor war heroes tomorrow afternoon in Organ Pavilion.

November 4, 1957, San Diego Union, A-15:6-8. Massing of Colors --- 200 city groups honor war dead.

November 10, 1957, San Diego Union, A-13:5-6. A nearly all-red canary was exhibited yesterday at the 11th annual show of colored canaries, sponsored by the Fed Factor Bird Club of San Diego in the west wing of the Electric Building.

November 15, 1957, San Diego Union, B-1:4-5, A-2:6. Dozen penguins from Antarctica due at San Diego Zoo today; arriving by special Air Force plane from Portland..

November 16, 1957, San Diego Union, A-1:4-5, A-2:6. Penguins waddle into pool at San Diego Zoo, by Floyd Thomas (illus.).

November 29, 1957, San Diego Union, A-21:1-2. One thousand at park service; thanks offered by San Diego in homes, churches, by Joe Brooks.

November 29, 1957, San Diego Union, A-12:6. Future kitchen highlights 1957 Electric Show tonight.

November 30, 1957, San Diego Union, A-11:7-8. Christmas lights show on in park; "miracle kitchen," most spectacular exhibit in Electric Show (illus.).

December 1, 1957, San Diego Union, A-15:7-8. San Diego Zoo plans \$1.5 million for improvements; program designed to bring animals closer to visitors; first projects include new penguin, okapi facilities; to be finished by July (illus.).

December 2, 1957, San Diego Union, A-15:2-3 (Monday). One hundred thousand attend Electrical and Home Appliance Show in Electric Building; show will continue through Wednesday.

December 7, 1957, San Diego Union, A-17:4-5. City's Christmas tree lights will shine Sunday; Community Christmas Center opening to feature carol singing, nativity scene.

December 8, 1957, San Diego Union, C-2:1. EDITORIAL: San Diego Zoo Enhances Natural Beauty.

December 9, 1957, San Diego Union, A-15:1-2. Yule tree lighted in Organ Pavilion rites (illus.).

December 9, 1957, San Diego Union, A-15:7. George E. Bean, new city manager, will take over job today.

December 15, 1957, San Diego Union, A-1:1, A-2:3. G. Aubrey Davidson, first citizen of San Diego, dies; pioneer builder, 89, sparked drive to bring Navy, Expositions to city.

December 15, 1957, San Diego Union, A-1:1. A:1. Civic chiefs pay tribute to Davidson.

December 16, 1957, San Diego Union, A-12:1. G. Aubrey Davidson rites will be held here today.

December 17, 1957, San Diego Union, A-13:2-4. G. Aubrey Davidson lauded for civic service at rites, by Joe Brooks.

December 17, 1957, San Diego Union, B-2:1. EDITORIAL: G. Aubrey Davidson

Every community that claims a place in the sun must be blessed with men who couple vision with action. Such a man was G. Aubrey Davidson, whom San Diego now mourns.

The pioneer banker and real estate developer was credited with bringing the Navy and Marine Corps to San Diego. For his activities on behalf of the Navy, Mr. Davidson was awarded the Navy's highest civilian honor, the Distinguished Public Service Award.

San Diego's honor for Mr. Davidson was to give him the unofficial title, "First Citizen of San Diego," at a community banquet when he retired in 1949.

In business life, Mr. Davidson organized the Southern Trust and Savings Bank, which later became the San Diego branch of the Bank of America. He also organized the company which completed and operated the U. S. Grant Hotel.

In civic life, he led a campaign which culminated in the Panama-California Exposition of 1915-16. The exposition led to the construction of buildings which have served the community for years and still stand in Balboa Park. He was also chairman of the California-Pacific Exposition of 1935-36.

In addition to playing a major role in bringing Navy and Marine Corps installations to San Diego, he led campaigns for the Naval Hospital, the Armed Services YMCA and the First Presbyterian Church.

Men in all walks of life sought the counsel of Mr. Davidson. He had faith in the goodness of his fellow men and a quiet but enthusiastic love of his city. He helped guide San Diego along an orderly development, as San Diegans recall, that sought to combine geraniums and smokestacks.

More than anything the beauty of the old Exposition buildings in Balboa Park is somehow symbolic of the character of Mr. Davidson and the things he left to his city.

December 19, 1957, San Diego Union, A-14:1-2. Playground holiday shows planned by City; schedules announced.

December 19, 1957, San Diego Union, A-21:4-5. "Friends of Los Angeles Zoo" gave wild kitten from Bolivia to San Diego Children's Zoo yesterday (illus.).

1958

Summary of Events in 1958

(Note: Dates of events are approximate only.)

Engineers' Exposition in Electric Building (February 21, 1958)
City Council accepted report on Balboa Park land use (March 12, 1958)
Home Show in Electric Building (March 22, 1958)
Auto Show in Electric Building (April 8, 1958)
Science Fair in Conference Building (April 12, 1958)
Robert Shaw resigned post as San Diego Symphony conductor
(April 18, 1958)
Modern Home Ideas Show in Electric Building (April 22, 1958)
Rose Show in Conference Building (April 26, 1958)
Industrial Education Association's exhibit in Conference Building
(May 18, 1958)
San Diego Home and Vacation Exhibit in Electric Building
(May 21, 1958)
Starlight Opera opened season (July 4, 1958)
San Diego Symphony opened summer season (July 8, 1958)
Billy Graham in Balboa Park Bowl (July 21, 1958)
Dahlia Show in Conference Building (July 29, 1958)
"Golden Trail" in Balboa Park Bowl (August 27, 1958)
1300 pianists in Balboa Park Bowl (September 21, 1958)
Annex plans for Fine Arts Gallery authorized (September 29, 1958)
City engaged Bartholomew and Associates to prepare
Master Plan for Balboa Park (October 1, 1958)
Appliance Show in Electric Building (November 28, 1958)
Christmas tree in Balboa Park (December 8, 1958)

January 10, 1958, San Diego Union, B-2. EDITORIAL: Nature's Art Gallery.

Warren Beach, director of the Fine Arts Gallery in Balboa Park, touched on a bit of sensible philosophy when he noted that the beauty of art is not confined to a few stuffy museums and somber picture galleries.

Mr. Beach pointed out that there is a very definite art value in the streams, hills and clouds painted by that master-artist Mother Nature. And these masterpieces belong to no one collector or critic. They are hung in the huge gallery belonging to all human beings on earth. And there is no admission charge.

Stop outdoors and open your eyes.

January 11, 1958, San Diego Union, A-15. Fiesta Board orders 1960 Fair survey; firm to study feasibility of world trade exposition here; Wayne Dailard, fiesta executive director, wants to hold in park; says city can get permanent facilities.

January 12, 1958, San Diego Union, A-31:1-4. Enjoyment in tree-watching; 300 varieties thrive in wooded dells of Balboa Park, by Charles Hull.

January 14, 1958, San Diego Union, A-13. Fill for Cabrillo freeway cloverleaf; \$3,317,000 project will be finished in 1959 (illus.).

January 27, 1958, San Diego Union, A-7. George S. Pruski installed as president of House of Pacific Relations Saturday night.

February 1, 1958, San Diego Union, A-13:6-7. Natural History Museum to begin earthquake recording.

February 7, 1958, San Diego Union, B-1:1-3. A collection of birds, mammals and reptiles from Australia is scheduled to reach the San Diego Zoo Monday.

February 10, 1958, San Diego Union, B-1:1-2. "The California Story" to be re-staged in Mission Valley.

February 11, 1958, San Diego Union, A-13:4-6. Rare Animals Arrive; Dog Yodels Way into San Diego Zoo, by E. G. Martin (illus.).

A yodeling dog, two "brides of the devil" and three of the smallest penguins in the world arrived yesterday at the San Diego Zoo.

They were among a collection of more than 400 birds, reptiles and animals gathered by K C. Lint, curator of birds, on a trip to Australia.

February 14, 1958, San Diego Union, A-16:1-2. Old Globe Theater will present the New York comedy hit, "Anniversary Waltz."

February 21, 1958, San Diego Union, A-31:4. A model of Convair-Astronautics Atlas missile --- America's first intercontinental ballistic missile --- went on display last night at the second annual Engineers' Exposition in the Electric Building.

February 21, 1958, San Diego Union, A-31:4-8. City Council approved Torrey Pines Lodge lease yesterday (illus.).

March 12, 1958, San Diego Union, A-13:5-7. City Council Accepts Report on Balboa Park Land Use; City Manager Bean calls for completion of Master Plan within two years (map of Balboa Park showing possible land use plan for the area).

The City Council yesterday, in conference, approved a report of possible uses of Balboa Park submitted to the council last May 27 by the Balboa Park Citizens Study Committee.

The council offered resolutions drawn adopting the report that paves the way for preparation of a master plan for the park's continued development.

City Manager Bean told the council the master plan should be developed and presented to the council for adoption within two years. He said many of the steps necessary are time consuming but can be processed simultaneously to keep the time required at a minimum.

Bean's report said necessary technical work can be done by either hiring a firm of consulting architects, engineers, landscape architects and land planners to prepare the master plan or by employing consultants for a limited portion of the master plan and using city staffs for the remainder. He recommended the latter.

The manager said the city Park and Recreation Commission and the city Planning Commission recommended procedures and a program of assignments. Those approved by the council in yesterday's conference were:

1. That city staffs prepare a basic land use plan for the park.
2. That official hearings be held and a basic land use plan be adopted.
3. That structural engineers be employed to survey buildings in the park.

4. That the engineers report on the life expectancy and maintenance costs of the various park buildings.
5. That the city staffs report on the size, needs and types of uses to be accommodated in the park.
6. That qualified architects and park consultants be employed to plan building locations and landscaping of the park's "exposition area" in accordance with basic land plan space allocations and types of uses approved for the park.

March 16, 1958, San Diego Union, A-13:5-6. The San Diego Children's Home hopes to start construction by July 1 of a new center on Kearny Mesa.

The home must clear its present site at 1365 16th Street to make way for a crosstown freeway.

In the last 70 years the San Diego Children's Home Association has continuously served children and families of San Diego County. More than 6,000 homeless and neglected children have received care.

March 22, 1958, San Diego Union, A-14:4-5. A nursery, a dairy and a fence company took top honors last night at the opening of the 10th Annual Home Show in the Electric Building, Balboa Park.

March 26, 1958, San Diego Union, B-1:4. The Citizens Charter Study Committee tomorrow will discuss two possible city charter amendments affecting city planning.

The committee will consider proposals to increase membership of the city Planning Commission from seven and to establish a board of planning examiners to hear appeals from commission decisions.

April 6, 1958, San Diego Union, A-11:1-8. Students prepare their exhibits --- Greater San Diego Science Fair to open Friday in Conference Building.

April 7, 1958, San Diego Union, A-13:5-6. Churches report record throngs; estimated 1,700 persons attended San Diego County Council of Churches service at 6 a.m. at the Organ Pavilion.

April 7, 1958, San Diego Union, A-13:5-6. Crowds brave rain for Easter concert in Balboa Park Bowl, by Constance Herreshoff.

April 8, 1958, San Diego Union, A-15:1-2. Five-day Auto Show opens tomorrow at Electric Building.

April 12, 1958, San Diego Union, A-13:7-8, A-14:4. Science Fair opened in Conference Building last night.

April 15, 1958, San Diego Union, A-13:1-2. Thousands due for Greater San Diego Science Fair's last day.

April 18, 1958, San Diego Union, B-1:1-3. Robert Shaw forced by ill health to give up post as conductor of the San Diego Symphony Orchestra's summer series.

April 22, 1958, San Diego Union, A-13:4, A-17:1-2. Modern Home Ideas Fair to open tonight in Electric Building..

April 22, 1958, San Diego Union, A-13:5-6. Baby gorilla given to Children's Zoo.

New York, April 21. James S. Copley, publisher of *The San Diego Union* and *Evening Tribune*, announced today he has purchased a young North African gorilla to be donated to the San Diego Zoo's Children's Zoo.

Copley said he arranged for the purchase of Scoop through the Navy. The gorilla arrived here today and was housed temporarily in the Bronx Zoo.

Copley, chairman of the Copley Press, Inc., is here attending the annual convention of Associated Press directors.

Dr. Charles Schroeder, director of the San Diego Zoo, said the baby gorilla would be placed on the same moated island in the Children's Zoo with Noell, the baby orangutan, and Tria, the baby chimpanzee.

This will make the Children's Zoo the only place in the world where the three great apes will be living together, Schroeder said.

Negotiations for the gorilla started late last year with an animal dealer in the French Cameroons.

The animal, a 22-pound male, arrived at Idlewild Airport. In 15 years the baby gorilla will be six feet tall and weight 600 pounds.

The animal is expected to arrive in San Diego April 30. Scoop will be exhibited in the Children's Zoo, after an observation period in the zoo hospital.

April 24, 1958, San Diego Union, B-1:3. Yaakov Avnon, consul general of Israel for the 11 western states, will speak at a celebration in honor of the 10th anniversary of the birth of Israel at the Organ Pavilion, Balboa Park, Sunday.

An added feature will be native folk dancing to music of Israel at the Israel Cottage in the park.

April 26, 1958, San Diego Union, A-14:3. Thirty-first annual Spring Rose Show opens tomorrow in Conference Hall.

April 27, 1958, San Diego Union, A-20:1-2. Home Ideas Fair attracts 107,500; show ends tonight..

April 30, 1958, San Diego Union, B-1:4-5. Roger Wagner, Maurice Abravanel, John Barnett and Daniel Lewis will share the podium during this summer's concert series of the San Diego Symphony Orchestra, it was announced yesterday.

May 11, 1958, San Diego Union, A-29:1-3. Science, Industry exhibit to be held in Conference Building, June 4-5.

May 12, 1958, San Diego Union, B-3:1-2. Constance Herreshoff praises "Mothers' Day" concert in Balboa Park Bowl.

May 13, 1958, San Diego Union, A-13:7-8. Pledges to Fine Arts Society come to \$376,000; the most recent gift was a donation from the Caliente Race Track by John Alessio, to be used in construction of a library.

May 15, 1958, San Diego Union, A-21:5. City Council will hold a public hearing on a proposed master plan for developing Mission Bay Park.

May 15, 1958, San Diego Union, A-21:8, A-26:4. Board of Supervisors yesterday voted "to hold the line" on 1958-59 preliminary budget appropriations for advertising county resources and for museums and zoo.

May 15, 1958, San Diego Union, B-2:2. EDITORIAL: A Sense of Beauty.

The Development Fund Campaign being conducted by the Fine Arts Society is deserving of support, for its success will add to the already great cultural statute of San Diego.

May 17, 1958, San Diego Union, A-7:3. "The Time of Your Life" by William Saroyan opens Tuesday at Old Globe.

May 18, 1958, San Diego Union, A-14:1-2. An estimated 1,000 persons yesterday attended the San Diego Industrial Education Association's annual exhibit in Conference Building.

May 19, 1958, San Diego Union, A-13:1-3. Falconry exhibits stolen from Natural History Museum.

May 21, 1958, San Diego Union, A-14:1-2. Junior Theater offers enlarged curriculum.

May 21, 1958, San Diego Union, A-14:3. Pictures of ancient wonders of World currently on display at San Diego Home and Vacation Exposition in Electric Building.

May 21, 1958, San Diego Union, A-15:4-5. Constance Herreshoff lauds "Time of Your Life" at Old Globe.

May 23, 1958, San Diego Union, A-21:2. San Diego Zoo sends animals to Moscow.

May 24, 1958, San Diego Union, A-9:3-4. Gilbert Warner's piano playing sparks "Time of Your Life" at Old Globe, by Constance Herreshoff.

May 24, 1958, San Diego Union, B-1:7-8. Falconry objects back at Natural History Museum; two teenage boys who stole them had clear consciences again.

May 26, 1958, San Diego Union, A-13:1. James S. Copley donor of "Scoop", an 18-month old gorilla, to Children's Zoo (illus.).

May 29, 1958, San Diego Union, A-8:6-7. Starlight Opera speeds production work.

May 31, 1958, San Diego Union, A-7:1-2. Summer Symphony tickets now on sale.

June 12, 1958, San Diego Union, A-1:4. Navy will shift carrier *Hornet* to Long Beach; leaves San Diego with five carriers.

June 12, 1958, San Diego Union, A-19:4-5. May Company Center map is approved; Planning Board okays subdivision plan in Mission Valley.

June 16, 1958, San Diego Union, A-13:2-3. Shriners donate buffalo to San Diego Zoo.

June 17, 1958, San Diego Union, A-13:1-2. Television's Art Linkletter to be guest star in "The California Story," August 30 - September 9.

June 20, 1958, San Diego Union, B-1:3. City Council yesterday authorized Torrey Pines shift.

June 20, 1958, San Diego Union, B-1:6. Band concert series at Organ Pavilion to begin Sunday.

June 27, 1958, San Diego Union, A-13. City Council okays May Company rezoning in Mission Valley.

June 29, 1958, San Diego Union, A-13:1-2, A-18:1-2. Fiesta del Pacific program expanded.

June 29, 1958, San Diego Union, A-30:1-3. Children's Zoo prospers thanks to adult patronage, by R. Van Denbrugh.

More adults than children have been visiting the San Diego Children's Zoo, Charles Shaw, the zoo's assistant superintendent said yesterday.

"When the zoo was opened last June 30, it was a doubtful venture," he said, "and several persons thought it would be unable to support itself. But it has been a success."

Estimates last year indicated that one-third of the persons attending the main zoo would have to visit the children's zoo in order to make it self sustaining. Approximately 592,000 persons, or 35 percent of the main zoo visitors, have paid the 35-cent admission charge to the 1-1/3 acre area.

"The surprising thing," he said, "is that 51 percent of the persons visiting the zoo were adults, and they have problems."

The zoo was scaled to children's size and complaints often come from adults who bump their heads when they fail to watch where they are going.

"We want to stress intimate association between the children and animals," Shaw said. "But we have a staff of attendants on hand to insure safety for both."

Reports indicate few accidents have occurred, and those have been minor. Many persons feared the animals would be injured or abused by children but to date most injuries have been caused by one animal abusing another.

"The children sometimes do get a bit overzealous in fondling an animal," Shaw said, "but our attendants try to teach the youngsters to respect animals."

Shaw said he hopes the support will be continued as the area, built with contributions of \$178,000, costs \$6,500 a month to operate.

Attendance reports show that weekdays are best for a leisurely visit. Holiday visitors swell attendance to approximately 6,000, with Sunday attendance at 5,000 and Saturday 4,000. The middle day of a three-day weekend is always a top attendance day. Approximately 8,000 persons visited the zoo August 31 last year.

Animals selected for the children's zoo are considered harmless and hardy enough to withstand handling by children.

"They have to be both interesting and entertaining," Shaw said, "but often adults provide much of the amusement."

An adult recently livened up the area when his false teeth dropped into the bear pit. Keepers retrieved the teeth but many of the children forgot the animals and stood around the pit staring and giggling.

"It was quite a scene," Shaw said.

Plans for the immediate future call for making the area a garden and beauty spot. Most flowers and plants to be used have been donated by local garden and flower clubs.

Exhibits scheduled are a mouse house, a turtle aquarium, a snake pit and a house of spiders, scorpions and insects children should know, he said.

To celebrate the first birthday of the zoo, a party will be held in the area from 3 to 4 p.m. tomorrow. Cake will be served to children..

June 29, 1958, San Diego Union, E-1, E-8. Charlie Cannon is Starlight Opera's "big gun."

July 1, 1958, San Diego Union, A-12:1-2. Starlight Opera ready for 13th season.

July 2, 1958, San Diego Union, B-3:3-4. Shakespeare play season previewed, by Constance Herreshoff.

July 3, 1958, San Diego Union, A-17:5-6. Starlight Opera arrives tonight.

July 3, 1958, San Diego Union, B-1:3. Ralph J. Virden, superintendent of Buildings and Grounds, has retired after 28 years at the San Diego Zoo.

July 4, 1958, San Diego Union, A-13:1-2, A-16:4. Starlight Opera opens 13th year, by Joe Brooks.

July 4, 1958, San Diego Union, A-13:3. "Damn Yankees" win nod in gay, lavish fantasy at Starlight, by Constance Herreshoff.

July 4, 1958, San Diego Union, A-13:7-8. San Diego Zoo's orangutan gets boy friend.

July 8, 1958, San Diego Union, A-13:6-8. San Diego Symphony opens tonight in Balboa Park Bowl.

July 9, 1958, San Diego Union, A-13:1-2. Three thousand attend first summer concert.

July 9, 1958, San Diego Union, A-13:2-3. John Barnett conducts Symphony in Balboa Park Bowl opener, by Constance Herreshoff.

July 13, 1958, San Diego Union, A-19:7-8. Car plunge in Balboa Park kills two occupants.

July 13, 1958, San Diego Union, E-1:7-8, E-3:4-8. Old Globe bills "Macbeth," "Much Ado About Nothing," and "Antony and Cleopatra."

July 13, 1958, San Diego Union, E-3:4-8. "Oklahoma!" next under the Stars.

July 18, 1958, San Diego Union, A-12:3. Starlight scores with "Oklahoma!," by Constance Herreshoff.

July 18, 1958, San Diego Union, A-13:4. Shakespeare Festival opens with "Macbeth."

July 19, 1958, San Diego Union, A-13:2-3, A-14:1-2. Dance on Green opens Festival, by Tim Shepard.

July 19, 1958, San Diego Union, A-14:1-2. "Macbeth" acting strong, dramatic, by Constance Herreshoff.

July 20, 1958, San Diego Union, C-2:1-2. EDITORIAL: San Diegans Well Armed Against Doldrums . . . cultural, recreational calendar keeps city free.

July 20, 1958, San Diego Union, E-1:4-8, E-3:3-8. Symphony to present "Damnation of Faust" by Berlioz Tuesday in Balboa Park Bowl.

July 21, 1958, San Diego Union, A-1:1-2, A-3:2-4. Twenty nine thousand jam Balboa Park Bowl to hear Billy Graham, by E. G. Martin.

July 21, 1958, San Diego Union, B-3:6-7. "Much Ado About Nothing" rates hearty applause, by Constance Herreshoff.

July 22, 1958, San Diego Union, A-7:4-6. "Antony and Cleopatra" fine as educational tragedy, by Constance Herreshoff.

There are good reasons why "Antony and Cleopatra" is so seldom produced. The play is not quite up to Shakespeare's best. There are too many long oratorical dissertations that could well be cut.

July 22, 1958, San Diego Union, A-13:4-5, A-14:7-8. Larger buildings, new effects set for "The California Story," by Bill Burris.

August 28, 1958, San Diego Union, A-32:4-6. "Golden Trail" in Balboa Park Bowl is lavish, well costumed production, by Constance Herreshoff.

Charles Wakefield Cadman's operetta, "The Golden Trail," was enjoyed by moonlight at Tuesday night's dress rehearsal in Balboa Park Bowl. This lavish production, presented by the Park and Recreation Department, opened officially last night and will be given a final performance at 8:30 tonight.

Giving their all in this frolic are a cast of 100 drawn from the Junior Civic Ballet, young choral groups of the city and the 80 musicians of the Youth Symphony. Maria Fielding, supervisor of the production, shares choreography honors with Don Ward, also serving as drama director. Other valuable contributors to the cause are Walter Peterson, conductor of the Youth Symphony, and C___ Dewse, vocal director.

"The Golden Trail" is brimming over with typical California melodies. The book by George Murray Brown deals with early California history, a step in the right direction to the "California Story," a coming Fiesta del Pacifico attraction.

In the Bowl production, "The Golden Trail" is blown up with an extravaganza that did not originate with Cadman. But what matter, since everyone had such a good time, that deluxe can-can dancers and Parisian type ballerinas arrive at a lonely stage stop along with the bandits and visiting firemen.

As put on by 180 young enthusiasts, "The Golden Trail" is lively entertainment. Dancing, costuming and choral ensembles are especially effective. Jose Martine, a guest artist, is a winner in his Spanish dance. You will also like the three youngest members of the cast, Nina Janowsky, Helen Palma and Jinx Palma, in their "Little Girls" episode.

Among the talented principals are Richard Crittenden as Don Pedro, Suzanna Reamo as his beautiful daughter, and Rick Hollenberger, the jaunty comedian. Many other talented young people appear in this show and in the gold rush days of 1849.

August 29, 1958, San Diego Union, A-17:7-8. Coronation Ball to open Fiesta tonight; George A. Scott to signal celebration at Balboa Park ceremony.

Dr. George Lindsay, director, said that it is hoped to add a wing to the present building when funds become available.

November 11, 1958, San Diego Union, B-2:1. EDITORIAL: Religious Services.

The issue that has now been raised as to whether conducting religious services in the city's public parks conflicts with the state constitution.

It is difficult to conceive that it does.

Last week some city officials ruled that holding such services violates a constitutional provision prohibiting aid or subsidy to any sect. However, most city attorneys of the state's municipalities have found no conflict in the law or in interpretation of the constitution for permitting various denominations to hold services on public property.

The church groups which have used public lands or buildings for services have usually paid rent on a business basis. This makes it difficult to understand an interpretation of the Constitution which maintains that the churches are beneficiaries of indirect subsidies.

Indeed, an interpretation of the Constitution that would deny the traditional right of all religious denominations to hold special services in public parks is open to question. The U. S. Supreme Court has frequently proved that the same law can be interpreted in various ways.

San Diego's public parks have traditionally been made available for divine services of all religions. This tradition should not be voided on the base of arbitrary and isolated interpretation of the law.

November 13, 1958, San Diego Union, A-1:4. Art Gallery, Old Masters given San Diego; paintings valued at two million, building at million, by Bryant Evans.

A new million-dollar art gallery and a collection of Old Masters that will rank among the most famous in the world was assured for San Diego yesterday. The collection is valued at more than two million dollars.

The offer to build the new gallery as a wing of the present Fine Arts Gallery was made by two foundations established by the Timken and Putnam families. These families have been the principal benefactors of the Fine Arts Gallery in its founding and subsequent operations.

The offer was accepted yesterday by the board of directors of the Fine Arts Society after it had been presented on behalf of the Timken and Putnam Foundations by Walter Ames, San Diego attorney and president of the Putnam Foundation.

The foundations propose to build a modern wing on the Fine Arts Gallery in Balboa Park to house and display the painting collection owned by the Putnam Foundation. The wing is to be known as the Timken Gallery.

Directors of the Fine Arts Society rose and cheered Ames and Allen J. Sutherland, senior vice president of the Security-First National Bank of San Diego, a director of the Putnam Foundation, in their acceptance of the proposal.

The action came at the end of the board meeting which Michael Ibs Gonzales, president of the society, described as "the most important this board has ever held."

The proposal now awaits a contract with the city. Under the proposal, the gallery would become the property of the city but would be leased to the Putnam Foundation for a long term.

The wing would be a one-story structure between the present Fine Arts Gallery and the Balboa Park lily pond.

Ames said the foundation would sacrifice size for quality. He said it is planned to incorporate the most modern air conditioning and lighting techniques. He estimated the cost at \$50 a square foot.

Ames told the directors that the Putnam Foundation owns about 20 Old Masters. With the exception of two stored in vaults, these pictures are displayed on loan in the National Gallery in Washington, D. C. and the Metropolitan Museum of Art in New York City.

Ames added that the Putnam Foundation has an income that would make it possible to buy two or three established Old Masters every year and these would be added to the collection in the Timken Gallery.

In the proposal accepted by the Fine Arts Society, some of the paintings owned by the society --- which were given to it by Miss Anne Putnam and the late Miss Amy Putnam --- would be hung in the new wing.

Ames explained that at first the Putnam collection would not fill the new wing.

He said the pictures so provided would be restored and cared for by the most skilled experts obtainable in the United States. He said the cost of restoring these pictures might run as high as \$50,000.

Ames pointed out that the two families whose benefactions had made the Fine Arts Gallery possible are the same families providing the two foundations' resources for the new facility.

He recalled that Mrs. Amelia C. Bridges, who was the daughter of Henry H. Timken, founder of the Timken Roller Bearing Co., provided the funds for building the present gallery and that she employed the director until she died in 1939,

In addition, her husband gave the gallery \$100,000 as an endowment in 1930 and Mrs. Cora Timken Burnett recently bequeathed a valuable collection of oriental art.

The Misses Putnam, Ames said, had given the gallery more than 90 percent of the Old Masters in the gallery's present collection.

The Timken and Putnam families were prominent in San Diego during the first two decades of this century. No member of the Timken family now lives here and Miss Anne Putnam, an invalid, is the only surviving member of her family.

Ames explained that in recent years the Putnam sisters had been unwilling to hang their later acquisitions in the San Diego gallery because of its physical and financial inability to give the pictures the quality of care which valuable paintings should have.

Under the terms of yesterday's agreement, the new facility will be used exclusively for old paintings. Ames estimated that about 20 of the Old Masters collection would be moved from the present gallery to the new wing.

This would create room in the present gallery for activities and exhibits now precluded by crowding.

He said the new building will doubtless have a physical connection with the present gallery and an interior passageway will connect them.

He said the architecture of the building would have to meet city requirements for park buildings.

November 14, 1958, San Diego Union, A-21:8. The City Council, acting on a suggestion by City Attorney Jean DuPaul yesterday asked the city attorney's office for a formal legal opinion on whether religious services can be held in city parks.

Du Paul said there is no question about the Council being permitted to hold Thanksgiving services in the Balboa Park organ pavilion. He said that is a national holiday, not a religious holiday.

"But Christmas or Easter are still to be decided," DuPaul said. "You also have Passover and Hindu Rites."

DuPaul said he would welcome a request for a formal opinion on the effect of a state constitution ban on governmental agencies granting aid to sectarian religious activities. He said differences of opinion exist within his office regarding the issue.

The city manager's office had notified the Council of Churches that the attorney's office said the constitutional ban would apply to the council's Thanksgiving, Christmas and Easter services, traditionally held in city parks.

Lester Halcomb, assistant to the city manager, said the attorney's office was asked for advice after an injunction was threatened over use of Balboa Stadium for a Billy Graham rally. He said Aaron Reese, assistant city attorney, gave him a copy of a 1954 opinion denying use of the parks for religious services and reported orally that the opinion applied to the council's Thanksgiving, Christmas and Easter services.

Reese denied that Halcomb had talked to him about the Thanksgiving services. DuPont said his office gave no opinion on the use of the parks and the Council of Churches was told it could have the Thanksgiving services in the park.

"Somebody goofed," DuPaul told the council regarding the order that the Thanksgiving services should not be held in the park.

"If you gentlemen want an opinion I suggest you make a motion and ask for a formal opinion," DuPaul told the council.

Told that the question has been referred to the city manager, DuPaul said, "This is not a city manager's proposition --- this is a legal proposition."

Councilman George Kerrigan suggested the possibility of seeking an amendment to the state constitution to clarify the use of city parks by religious groups.

November 15, 1958, San Diego Union, A-9:7-8. Gift raises hope for Art Center; second wing sought.

Announcement of the gift of a one-million dollar wing which will be added to the Fine Arts Gallery has increased hopes that funds to be raised to finance still another wing.

Edward S. Hope, chairman of the San Diego Fine Arts Society's development committee, yesterday said a drive to complete facilities of the gallery in Balboa Park had been under way for two years.

He said \$400,000 had been raised.

Hope said the Foundation offer to build a new wing should focus attention on the previous drive and should spur us to the completion of our campaign.

Walter Ames, attorney for the Putnam Foundation, Wednesday said an Old Masters wing would be financed with funds of the Timken Foundation and would house the Old Masters collection acquired by Miss Anne Putnam and his sister, the late Miss Amy Putnam.

"With the presence of the Putnam collection," Hope said. "San Diego will take its place as one of the world's great art centers."

He said, it "will provide an added stimulus to our tourist trade and will benefit San Diego both culturally and materially."

Six major additions are included in the society's development plans, Hope said. They are a children's wing, a program center, an enlarged library, exhibition and storage areas for major collections, and American and Asiatic wings.

The proposed wings, including the Timken wing, will be built on either side of the gallery building on the sites of two condemned buildings along the Plaza de Panama.

November 15, 1958, San Diego Union, B-2:1-2. EDITORIAL: A Rich, Proud Culture.

The Timken and Putnam families are to be commended for their generosity in providing for the new wing and the showing of the Old Masters. The handsome building and the collection of great paintings are sure to attract thousands of visitors and deepen the impression of San Diego as a cultural center.

November 21, 1958, San Diego Union, A-19:3. Ford Building Sought for Conventions.

The Convention and Tourist Bureau yesterday proposed renovation of the Ford Building as a meeting hall and convention facility.

The council recently received requests for use of the Ford Building by the Museum of Man and as a hall of science and industry. All three requests seek exclusive use of the building.

November 21, 1958, San Diego Union, A-19:4-5. The City Council yesterday instructed City Manager George Bean to negotiate a formal agreement with the Timken and Putnam foundations for acceptance of a new million-dollar art gallery to house a multi-million dollar collection of "old masters" paintings.

Walter Ames, San Diego attorney and president of the Putnam Foundation, asked assurance that the foundation could remain in the gallery it builds. The gallery will become city property. He also asked that the city prepare the building site, including demolition of an existing structure which has been condemned, and care for the new wing's exterior.

Ames said the foundations would build a wing with an exterior conforming to others in the park but asked a free hand with interior structure.

November 21, 1958, San Diego Union, A-21:4-6. Appliance Show November 28 through December 3 in Electric Building.

November 21, 1958, San Diego Union, A-22:1-2. San Diego Zoo gets rare gorilla (illus.).

November 22, 1958, San Diego Union, A-12:5. Mighty Mr. Moore, the San Diego Zoo's mountain gorilla, failed to survive the first night in his new home.

A keeper found the young gorilla dead in his cage at 7 a.m. yesterday. Dr. Werner Heuschele, zoo veterinarian, said the animal died of severe inflammation of the lower intestine and severe diarrhea.

An autopsy also disclosed that Mighty Mr. Moore was suffering from a mild case of pneumonia, a mild stomach inflammation and was heavily infested with hookworm.

The ape was in weak condition when it arrived at the zoo. Its mate died in Antwerp, Belgium after the pair had been captured two months ago in the Belgian Congo.

The gorilla's price, \$5,000, was contingent upon its survival.

November 23, 1958, San Diego Union, E-2:1-2. Book of the Week: "The March of Archaeology" by C. W. Ceram and "The Thrones of Earth and Heaven" by Roloff Ben.

November 23, 1958, San Diego Union, E-2:1-8. History in Art: Exhibit at Museum of Man shows rise, decline of Mayas, by Dr. Armin Keitzmann (illus.).

Credit for this thoroughly prepared, clearly and stimulatingly presented exhibition goes to Clark Evernham, director of the museum, Dr. Norman Thomas, Maya scholar, and Mrs. Vicky Nelson and her helpers, staff artists.

November 24, 1958, San Diego Union, B-1:3. Children's Zoo receives two Florida otters.

November 26, 1958, San Diego Union, A-13:5-6. City property okayed for church events.

Yesterday DuPaul said "there is no constitutional objection to the use of parks, public buildings, community centers or (when built) civic auditoriums by a religious organization for religious purposes on the same terms and conditions as the same are available to nonsectarian organizations."

November 28, 1958, San Diego Union, C-1:5. Electric Show opens 6-day run tonight in Electric Building (illus.).

November 28, 1958, San Diego Union, C-1:6-8. One thousand seven hundred told of blessings at park holiday service.

Dr. Frank Lowe, council president, told the audience that a special cause for gratitude is in a legal opinion by City Attorney Jean F. DuPaul that religious groups may use city property for their services.

November 19, 1958, San Diego Union, A-13:2. Convention and Tourist Bureau directors yesterday unanimously approved a proposal for rehabilitating buildings in the Palisades area of Balboa Park, including the Ford Building, for recreational, cultural and assembly uses.

November 29, 1958, San Diego Union, A-13:6. Twenty thousand attend opening of Electric Show.

December 2, 1958, San Diego Union, A-13:8, A-14:4. 50-ft. Yule tree was raised in Balboa Park yesterday (illus.); new scene of Nativity, "Let the Children Come to Me," prepared by Rudolph Vargas, a Hollywood artist.

December 3, 1958, San Diego Union, A-16:1. Appliance Show in Electric Building ends tonight.

December 4, 1958, San Diego Union, B-2:6. William A. Scroggs writes Ford Building perfect for conventions.

December 7, 1958, San Diego Union, A-33:1. The Board and members of the San Diego Convention and Tourist Bureau will discuss plans for converting the unused Ford Building into a community and convention facility December 15 at a meeting in the Ford Building.

December 8, 1958, San Diego Union, A-21:6. Christmas tree lighted in park (illus.).

December 11, 1958, San Diego Union, A-24:1-2. Session to study Palisades plans.

Convention and Tourist Bureau executives are hopeful that a large crowd will attend the meeting Monday noon at which plans for rehabilitation of the Palisades area of Balboa Park will be discussed.

Robert O. Peterson, bureau president, reminded San Diego residents that the meeting is open to the public. It will be held in the Ford Building in the park.

December 12, 1958, San Diego Union, B-2:7. R. W. Cotton writes park needs another east-west crossing.

December 13, 1958, San Diego Union, A-12:5-6. Christmas ballet scheduled in park tomorrow.

December 16, 1958, San Diego Union, A-13:7-8. Convention Center Plans Unfolded For Balboa Park; Cultural Facility Also Envisioned, by Peter Kaye (illus.).

Five San Diegans yesterday unfolded a dream of a convention and cultural center in Balboa Park.

The five, Robert O. Peterson, Harry Foster, Dr. Glen G. Havens, John W. Quimby and Jerry Crary, spoke at a public meeting to arouse enthusiasm for a 1.5 million dollar program to rehabilitate the Ford and Federal buildings.

Petitions were circulated after the meeting to initiate a drive for community support of the project. About 150 attended.

The speakers said the plan would serve a two-fold purpose.

1. It would at low cost provide the city with a convention center that would help stimulate local economy and a science museum that would enhance the park's cultural usefulness.
2. It would rehabilitate potentially useful park buildings that have fallen into disrepair.

Proponents of the plan are seeking City Council approval to spend 1.5 million dollars in capital outlay funds for the new facilities.

About two-thirds of the funds would be used to rehabilitate the Ford Building into an auditorium. The building, presently unused, would have an auditorium seating 5,000, exhibit hall and conference rooms.

The remainder would be used to renovate the adjacent Federal Building as a Hall of Science and Industry with a planetarium and improve the Palisades and Conference Buildings for use as smaller meeting places.

"Such a facility could not be duplicated elsewhere in the United States for 25 million dollars," said Peterson, president of the Convention and Tourist Bureau.

He said the Balboa Park plan "is the only practical and feasible solution.

"Why is this the only plan?" he asked.

"It would have community-wide support on the site because it is located midway between downtown and Mission Valley hotels. It would dovetail in with present park uses, meets requirements of all studies, including the Stanford Report of 1955.

"Access will be provided by a new four-lane road and the crosstown freeway. Last but not least, it is a setting of natural beauty."

Dr. Havens, president of the Science and Industry Corp., said his group already has asked for the Ford Building but would accept the Federal Building for a museum and planetarium.

"We must cooperate with each other," Havens said. "The Palisades area is the place."

Crary, executive manager of the convention bureau, said an auditorium seating 5,000 "would do the job.

“It would bring \$300,000 to \$600,000 daily in new dollars into San Diego,” he said. “We already have lost one big convention because of no meeting place and are about to lose another.”

Quimby said the convention center would provide jobs and could serve to attract big labor conventions to San Diego. He said the science hall would complement other park activities.

Foster, who was active in the 1935 exposition for which the Ford Building was constructed, said it could be adapted for use as a convention hall.

As an American Legion official, he said San Diego must come up with a meeting place to attract the 1961 state Legion convention.

“The 1955 Legion convention brought \$1,600,000 to San Diego in five days,” he said, “although delegates were forced to meet in a tent. They won’t do it again.”

Foster said he had examined many convention facilities throughout the country for the Legion and that none could compare with the proposed park project. He said he has advocated the site since 1936.

Several members of the audience voiced approval of the plan.

However, Vice Admiral Wilder Baker, USN, ret., said he believed the site should include a civic theater. Peterson said the two facilities were not compatible in the same building because a convention hall requires a flat roof. He suggested the possibility of covering the outdoor Ford Bowl for use as a theater.

December 18, 1958, San Diego Union, A-13:3, A-16:1-3. Board to discuss Fiesta fate, World’s Fair plans and to decide Dailard’s successor January 5, by Peter Kaye.

December 18, 1958, San Diego Union, A-13:2-4. Wayne Dailard resigns post as Fiesta del Pacifico director.

December 31, 1958, San Diego Union, A-9:5-6. San Diego Zoo to display three-horned Jackson chameleon, brought back from tour by Charles Shaw, zoo’s curator of reptiles (illus.)

1959

Summary of Events in 1959

(Note: Dates of events are only approximate.)

Frank B. Belcher died (January 13, 1959)
Boat Show in Electric Building (January 23, 1959)
Camellia Show in Conference Building (February 1, 1959)
Plans to develop Palisades as convention center (February 5, 1959)
Old Globe to engage professional actors for Shakespeare Festival
(February 26, 1959)
Engineering exposition in Electric Building (February 26, 1959)
Botanical Building renovation completed (March 21, 1959)
Elementary School conference and exhibit in Federal Building
(March 25, 1959)
Autorama in Electric Building (April 2, 1959)
Orchid Show in Conference Building (April 6, 1959)
Veterans of Foreign Wars installation in Conference Building
(April 20, 1959)
Spring Fair of Modern Home Ideas in Electric Building
(April 14, 1959)
Sportsmen's Show in Electric Building (May 27, 1959)
International Civic Aviation Organization's assembly in Balboa Park
(July 9, 1959)
Dahlia Show in Conference Building (August 2, 1959)
Car Show in Organ Pavilion (August 31, 1959)
Fiesta del Pacifico opened in Organ Pavilion (September 4, 1959)
City Council received preliminary draft of Balboa Park Master Plan
(September 18, 1959)
Appliance Show in Electric Building (November 28, 1959)
Christmas Center in Organ Pavilion (December 6, 1959)
Floral Show in Floral Association Building (December 11, 1959)

January, 1959, San Diego Magazine, Vol. 11, No. 3, 32-27. The Strength of Irving Gill, by James Britton.

January, 1959, San Diego Magazine, Vol. 11, No. 3, 38-41. The Weakness of Irving Gill, by James Britton.

January 7, 1959, San Diego Union, C-3. Navy big factor in city's economy; Navy payrolls in country increased in fiscal 1958 to approximately 267 million from 258 million the year before; at the peak of the Korean war the Navy employed 23,000 civilians; work load has stabilized in the area of 18,000; total of uniformed personnel based here believed to average in excess of 110,000 with an estimated 51,000 dependents; between 16,000 and 20,000 retired military personnel residing in the county.

January 12, 1959, San Diego Union, A-13, A-17. San Diego Zoo has a surplus year-old lady hippopotamus up for sale or trade (illus.).

January 13, 1959, San Diego Union, A-1, A-3. Frank G. Belcher, 53, dies following a hunting accident; was president of 1935 Exposition.

January 13, 1959, San Diego Union, A-13, A-14. Work on crosstown freeway to begin with interchange; construction of 8-story unit to start in summer at southwestern Balboa Park (drawing); top deck of structure, carrying eight lanes of U. S. 101 over Cabrillo Freeway, will tower 72 feet (about eight stories) over the lower level.

January 14, 1959, San Diego Union, A-13, A-14. Convention center urged in Balboa Park; 1.5 million cost seen to develop Palisades; advocated by Robert O. Peterson, president of Convention and Tourist Bureau; Ford Building would become a hall seating 5,000 persons; Walter Ames said most major improvements in Balboa Park were made by commercial interests; Karry Foster said 76,000 square feet of Ford Building would be available; Peterson said: "We'd have a 20 million dollar center for 1.5 million dollars."; group urged to make proposal by William Shea, associate publisher and general manager of *The San Diego Union* and *Evening Tribune*.

January 16, 1959, San Diego Union, 16:6. City officials met with representatives of a St. Louis planning firm yesterday to organize the master planning efforts for Balboa Park.

January 17, 1959, San Diego Union, A-12. San Diego Zoo gets Navy gift of \$8,000 for ape island exhibit in Children's Zoo (photo).

The money was contributed by Navy personnel ashore and afloat in the San Diego area.

January 17, 1959, San Diego Union, B-14. EDITORIAL: Under Our Noses: Solution for Convention Site.

For a modest sum, modest in comparison to what a new major convention hall would cost, the Ford Building's great rotunda can be roofed and converted into an auditorium to seat 3,000 persons. In addition, it has scores of conference rooms and sweeping display areas.

January 19, 1959, San Diego Union, B-2. John Williams writes park convention center a good idea.

January 23, 1959, San Diego Union, A-9. Forty thousand expected at 10-day event; San Diego boat show opens run this afternoon in Electric Building (illus.).

January 23, 1959, San Diego Union, A-18. San Diego Zoo will sell Point Loma estate of Mrs. Henry Clark for \$85,000; property deeded to Society last week to finance expansion of Children's Zoo.

February, 1959, San Diego Magazine, Vol 11, No. 4, 40-42. Art of the City: the CENTER for potentially the finest convention city in America, by James Britton

Keys to success of the Peterson Plan are enormously increased parking in Balboa Park *and* enormous enlargement of Cabrillo Freeway which runs through the park linking downtown with Mission Valley. It is not generally realized that the State Division of Highways intends to make Cabrillo Freeway eight lanes. This will mean tearing up the most beautiful parkway south of Santa Barbara just as its ripest. It will also mean changing the sense of the scene from a park with a reasonably scaled freeway running through it, to a torrential freeway with certain fragments of the park adjacent.

The traffic increase in Balboa Park, the increase of blacktop parking there, and the increase of commercial activity centering around a convention hall all spell drastic reduction in the park quality of the park, and this at a time when evidence is accumulating that a densing population like ours will need much more park space, several times more park space, not less. This is decidedly a question of the general welfare which is being ignored because the public at large is not adequately represented, certainly not by the present councilmen and mayor.

If, as seems likely, the city council is going to develop a convention business center around the Ford Building in Balboa Park, then it should at the same time announce the setting aside of suitable acreage elsewhere in the city for the major park, or parks that will be needed. Mission Bay Park can hardly be said to fill this need since it is a special purpose park, large aquatic and largely commercial too. There is an opportunity in this connection for some of our large land holders, Roscoe Hazard in Mission Valley for example, or the Fletchers in the Miramar area, to give acreage for parks that could be named in honor of them.

The makeshift of the Hall of Science and Industry to the Federal Building is a precious piece of petty opportunism that reflects credit on no one concerned. It happens that the Federal Building was given by the federal government to the city with the understanding that it would be completed as a civic theater. It has foundations designed for a sloping theater floor, a reinforced concrete shell within which an idea theater shape could be achieved, and potential seating for 3500 with a balcony. If the Ford Building is going to be a convention hall, than it makes more sense than ever that the Federal Building should be a theater, as part of a complete entertainment and convention center that *could* be the most attractive anywhere.

The Hall of Science properly belongs alongside the other museums --- the Museum of Man, Natural History, Fine Arts, all of which are further north in the park along Laurel Street. The structure in that group known as the Electric Building is logical for remodeling into a Hall of Science complete with planetarium.

Fortunately, the City has already signed a contract with Harland Bartholomew & Associates, a St. Louis engineering firm hired for the express purpose of shaping a master plan for Balboa Park. Decisions about convention centers and museums will be held up until the master planners have at least made a preliminary swipe at their job. They were scheduled to start in January, and they will be under a lot of pressure. Will they proceed independently on the basic of planning logic, as planners should, or will they kow-tow to the politicians who hired them?

February, 1959, San Diego Magazine, Vol. 11, No. 4, 42-43. The Putnam and Timken "Gifts" by James Britton.

Due to an outstanding job of misreporting in the daily newspapers, many San Diegans may have the impression that the Putnam Foundation is giving its two-million dollar collection of "old master" paintings to the City, or at least to the Fine Arts Society. *The Evening Tribune* erred in a four-column head and in its story November 13th. *The Union's* headline of the same day was no better but its story by Bryant Evans was essentially accurate: \$1,000,000 would build in Balboa Park a Timken Gallery which *would* become the property of the City, but only on condition that it be leased back on acceptable terms (minimum lease of 50 years) to the Putnam Foundation for exhibition of its collection, which would continue in its ownership.

Actually, none of the works of art in the Fine Arts Gallery belong to the public. Everything except the building belongs to the Fine Arts Society, a private corporation which theoretically could decide at any time to pack up its things and go elsewhere. That's unlikely, since the Society gets free rent in a city-owned building in a strategic location in a city-owned building, and a large part of its operating budget is from the city coffers. And the Society is quite seriously dedicated to public service.

For many years the Fine Arts Society received gifts from the elderly Putnam sisters who lived in the tiled Palacio at Fourth and Walnut Streets. As their powers declined the bankers and lawyers took a firmer hand. The gifts ceased and the Foundation was formed five or six years ago. Now the Foundation is in effect its own fine arts society, keeping strict control over the Putnam fortune tied up in expensive works of art. In order to keep its tax free status, the Foundation must exhibit its works free to the public. This is has done by lending pictures to major American museums. Now the Foundation is ready to settle down in some one place. It just so happens that the Putnam Foundation management also controls the new Timken Foundation, made up of moneys from another family that formerly gave works of art to the San Diego Fine Arts Society; the Timken fortune in fact built the present Fine Arts Gallery. The sense of the recent sensation involving a total of \$3,000,000 was that Timken Foundation dollars would build a new Timken Gallery and the Putnam Foundation would display its pictures there. Thus splendid memorials to two expiring families would be achieved, and the family lawyers and bankers who are directors of the two foundations would retain their accounts indefinitely.

Under the circumstances, it seems odd that the trustees of the Fine Arts Society would “stand up and cheer” as reported in the papers, when they were presented with the foundations’ intentions. It was not so odd that Mayor Dail added a loud executive hurrah: the Putnam-Timken maneuver would mean reduced pressure on the city budget for cultural expenses.

In truth, the Fine Arts Society was being asked to move over and make room for another art-owning private corporation that wants to use part of the park. Literally, the Fine Arts Society has to give up an area in which it hoped to build a wing of its own. Moreover, the Fine Arts Society is expected to return to the Putnam Foundation on long term loan many of the pictures given to the Society by the Putnam sisters before the foundation was formed.

One of the early efforts of the Putnam Foundation was to “pack” the Fine Arts Society board with members chosen by the Foundation. Such total eclipse was resisted by the Society but, to judge from the recent cheering, permanent partial eclipse is now acceptable to that body. It remains to be seen what future relations between the two boards will be. Which will dominate?

February, 1959, San Diego Magazine, Vol. 11, No. 4, 44-45. The center for potentially the finest museum complex in America . . . plan showing basic scheme of development by the Fine Arts Society before the Putnam Foundation came along.

February 4, 1959, San Diego Evening Tribune, A-1:8. A plan to develop the Palisades area of Balboa Park into a community center with convention facilities today has the support of the San Diego Downtown Association.

February 5, 1959, San Diego Evening Tribune, A-48:1-2. Park uses challenged in law suit; action seeks to clarify city’s right to permit religious services and an exposition center in Balboa Park.; William E. Starke, attorney.

February 5, 1959, San Diego Evening Tribune, A-48:1-2. City Charter stipulates “public use” only; attorney Starke thinks all facilities and offices in the park must be open for all the people..

February 5, 1959, San Diego Union, A-21. Use of Park by Religions Challenged; Suit Also Asks Court to Enjoin Proposal for Convention Hall.

The legality of Balboa Park’s use for religious meetings and as the proposed site for an exposition center was attacked yesterday in a Superior Court injunction suit. The action was brought against the city by W. D. Starke, an attorney who has practiced law here since 1936.

Judge Bonsall Noon signed a temporary restraining order and set February 11 for a hearing on an order for the city to show cause why it should not be enjoined.

The injunction would block the issuance of permits for religious meetings and a proposal to convert the Ford Building into an exposition center.

Starke told a reporter that the lawsuit is a friendly test. Assistant Attorney Anton Reese agreed with the description. Reese told a reporter Starke conferred with the city attorney’s staff before the suit was filed.

“Mr. Starke is performing a public service,” Reese said. “We welcome this lawsuit to obtain a judicial declaration of the city’s rights under its charter and the state Constitution.”

Starke’s suit attacked an opinion by the city attorney’s office November 25 that religious groups may obtain permits for meeting in the park.

It is contended that the state Constitution prohibits a municipality from aiding a religious organization.

The city attorney's opinion specified that the religious permits could be issued on the same terms and conditions as permits issued to other groups for park meetings, Reese said.

Starke said he favors an auditorium site east of Park Boulevard in the Florida Street area. He said he has not personal objections to the holding of special religious services in the park, such as Christmas services, but he believes even those are illegal.

"I am afraid of the long-term thing," he said.

Starke explained that by saying other California cities have granted long-term leases to religious organizations for the use of parks and schools. He said these have been held illegal.

"I want the court to spell out how far the city can go," Starke said. "I have eight grandchildren and I want something of the park left for them."

Starke's lawsuit stated that a park auditorium proposal on the ballot April 16, 1957 had failed to carry.

February 5, 1959, San Diego Union. A-21. Balboa Plan Indorsed.

The Downtown Association yesterday indorsed a proposal to develop Balboa Park's Palisades area into an exposition center.

"Favorable consideration of this excellent plan will be greatly appreciated by the property owners and business firms of downtown San Diego," James I. Robertson, association president, wrote in a letter to the City Council.

The Convention and Tourist Bureau has proposed remodeling the Ford Building at a cost of 1.5 million dollars to provide an exposition center accommodating 5,000 persons.

The council has referred the proposal to a conference for discussion.

February 11, 1959, San Diego Evening Tribune, A-1:3. The executive committee of the Balboa Park Citizens Study Committee will review a proposal to rehabilitate the Palisades area of the park for an exposition center with convention facilities.

February 11, 1959, San Diego Union, A-15:5. Study Asked on Ford Building; Exposition Center Proposal Referred to City Manager.

The Convention and Tourists Bureau's recommendation that the Ford Building be rehabilitated as a convention hall and exposition center has been referred by the City Council yesterday to City Manager George Bean and the executive committee of the Balboa Park Study Committee.

Bean said that "regardless of the merits of such a proposition, a decision should be held off until the people hired to make a comprehensive study of the park can do so."

He was referring to the St. Louis consulting firm of Harland Bartholomew and Associates, which the council has hired to draft a master plan for the park.

Bean said the firm has been instructed to push that phase (related to the Ford Building) as rapidly as possible, and should have a report within another couple of months.

Aaron Reese, assistant city attorney, told the council that pending litigation of the permissive uses within the park constitutes, among other things, an injunction against expenditure of any city funds for an exposition center in the park until the litigation is completed.

Reese said William Starke, the attorney who filed the suit against the city, has agreed to stipulate the scheduled events within the park may be held as planned.

Mayor Dail suggested that the Convention and Tourists Bureau recommendation be reviewed by the study group's executive committee.

The study committee recommended that the Ford Building be retained for some unspecified use, Bean said.

February 12, 1959, San Diego Evening Tribune, B-8:1. Superior Judge Bonsall Noon yesterday continued a hearing of a test lawsuit on the city's right to permit religious services and an exposition center in Balboa Park.

February 26, 1959, San Diego Union, A-13:5-6. Shakespeare Festival --- Old Globe to Engage Professional Cast.

Ten professional actors will be engaged for the San Diego National Shakespeare Festival, July 1 through August 10, Craig Noel, director of the sponsoring Old Globe Theater announced yesterday.

"We believe the theater of San Diego should grow with the city," Noel said. "This is a step forward in offering the community good theater."

Arrangements have been made with Equity, the actor's union, to employ the players. Five will be cast in the East by William Ball, recent winner of a \$10,000 grant from the Ford Foundation to further American theater.

Ball, who recently received a master's degree in speech from Carnegie Institute of Technology in Pittsburgh, will direct "Henry IV, Part One," at the festival. He played the title role in "Hamlet" here in 1955 and may act in the forthcoming festival.

Allen Fletcher, a speech professor at Carnegie Tech, who directed here previously, will direct "Romeo and Juliet" and "Love's Labor Lost."

The second five professionals will be cast in auditions held in Los Angeles by Noel, who also will supervise the festival.

Brochures have been sent to campuses on the 11 acting scholarships and the seven technical scholarships which pay college students \$300 each. Eight apprentices will be sought locally at \$75 each.

The scholarship announcements are expected April 1, and the professional cast will be announced in late May, Noel said.

There will be 64 performances this year, compared with 45 in previous years. The plays will be presented six nights a week with matinees on Wednesday and Saturday. There will be no Monday performances.

Plays will not be rotated as in the past. The first show will be staged for several performances, the second and third added to the schedule as casts are ready to perform.

"We feel this is a step forward and we want to continue it," Noel said, "but we shall await the results of this year's productions."

Ball has allocated \$6,000 of his grant here for two reasons. He will pay the transportation of five actors from the East and part of their salaries. He also will spend part of his grant at the Actors' Studio in San Francisco and the Washington, D. C. Arena Stage.

Three weeks of rehearsal for the nine weeks of performance will begin in mid June, Noel said.

February 26, 1959, San Diego Union, A-26:2-3. A 4-day Engineering Exposition opens today in Electric Building.

February 27, 1959, San Diego Union, A-17. San Diego Beltline Freeway Bill is Given OK; Assembly Committee Approves; cost Estimated at 66 Million.

Sacramento, Feb. 26. --- The Assembly Ways and Means Committee today approved a bill authorizing a route for the San Diego Beltline freeway.

The freeway, when completed, will connect northern San Diego to San Ysidro and will be the southernmost segment of the San Diego freeway, linking the border to the San Fernando Valley.

The bill, which was introduced by Assemblyman Frank Luckel (R-San Diego), now goes to the Assembly floor. If passed by the Assembly, it will move to the Senate.

The Beltline freeway project is expected to cost 66 million dollars. The state will be reimbursed by about 60 million dollars by the federal government because the project is part of the interstate highway system.

The route for 2.5 miles of another crosstown supplementary freeway --- from Laurel and India Streets to Market and 18th Streets --- has been approved by the state Highway Commission and construction has been scheduled on an eight-story interchange near the south end of Cabrillo freeway.

The route of the Beltline freeway, skirting the eastern boundaries of San Diego, National City and Chula Vista is still to be set by the Highway Commission, according to Jacob Dekema, district engineer for the state Division of Highways.

Dekema said the Beltline freeway will be the ultimate connecting link between U. S. Highway 80, U. S. Highway 395, state Route 94 and Wabash freeway, and also will carry the heavy north-south traffic of U. S. Highway 101.

More than seven million dollars have been spent to secure rights-of-way through the city for the supplementary crosstown freeway. Clearing of buildings along the city route is well under way.

The crosstown freeway will angle south from Laurel Street to Date Street, then curve north into Balboa park, and head south again on 18th Street.

March 21, 1959, San Diego Union, A-18. Botanical Building opens in park Saturday (illus.)

Balboa Park's Botanical Building, closed since 1951, is scheduled for public opening next Saturday after a \$68,069 renovation.

It will feature 370 permanent displays and several special collections of plants, W. Allen Perry, city park superintendent, said yesterday.

The building, supervised by David R. Roberts, nursery foreman for the Park and Recreation Department, will be open from 10 a.m. to 4:30 p.m. daily, except Mondays.

The renovation project included replacement of lattice work, restoring the irrigation system, and rebuilding plant beds, Perry said.

Roberts has spent 18 months developing the building's horticultural displays at the Balboa Park Nursery. He said present exhibits will be young plants which will mature later. One hundred additional species will be added within a year, Roberts said.

Easter lilies will be featured in six display areas on opening day, Roberts said. He is planning displays of tuberous begonias in early summer, chrysanthemums in October, and poinsettias for Christmas.

An outstanding feature of the permanent collection is a group of more than 60 species of fern which Roberts said would be one of the nation's finest fern exhibits.

Contributors to the exhibits are: D. J. Hunter, Walter Anderson, Mr. and Mrs. Norman Lawson and R. R. Walker, all of San Diego; Howard W. Johnson of La Mesa; J. H. Gridlian of Arcadia; Horace Anderson of Leucadia, and the San Diego Camellia Society.

The Botanical Building was originally a Santa Fe Railroad Station. It was reassembled in Balboa Park for the 1915 Exposition.

1. Balboa Park traffic pattern, as originally recommended in a citizens committee report, must not be materially altered.
2. The proposed facility should embody new construction above ground level in compliance with proper standards.
3. It should be built to accommodate multi-purpose usage by the community, for non-convention purposes such as music and drama.
4. The city and private businesses and industries should share the initial cost.
5. Convention activity should not be allowed to disturb present neighboring activities --- cultural, educational and recreational --- in the park.
6. Such convention use of the facility should be on a temporary basis until more adequate and appropriate facilities outside the park can be developed.

May 2, 1959, San Diego Union, B-16. EDITORIAL: Public Auditorium? Ford Building Holds Answer.

The proposal to convert the Ford Building in the Balboa Park Exposition area into a public auditorium should not be sidetracked.

It would be a serious mistake to let this issue, so vital to San Diego's cultural, recreational and economic future, sink into a morass of endless debate. There are more "experts" on auditoriums and convention halls than there are on water.

The decision in the end, rests with our elected officials, the mayor and the City Council. Committees can report, planners can plan, and resolutions can urge and counter-urge, and it all comes back to the fact that somebody must act, a decision must be made and implemented.

This must be done on the basis of what San Diego needs. San Diego needs a public auditorium and the best way to get it is by converting the Ford Building. This can be done at a reasonable cost, without the necessity of a bond issue. This would dispose of a trying problem for a good number of years to come. Perhaps, someday San Diego will want a different, larger or better public auditorium than can be provided by conversion of the Ford Building.

But the possibility of getting it is even farther in the future. San Diego has been trying to get one --- the perfect one --- for 35 years, and nothing has happened yet.

The conversion of the Ford Building, actually a handsome and basically sound structure, will provide an auditorium that can be used for all purposes --- cultural and recreational as well as for conventions.

San Diego has long needed an indoor auditorium that could serve as an alternate for the outdoor Balboa Park Bowl. Events could be staged in one or the other, depending on weather, size and desires of the public.

To say that a public auditorium which might be used for conventions is out of place in the park is not correct or realistic. Is the Balboa Bowl out of place? The Palisades area, of which the Ford Building is a part, was built as an Exposition center. Its buildings, including the Ford Building, were designed for the widest public use. The Federal Building was built for conversion into a theater.

There has been enough talk. Nothing more could be added. As to the future uses of the park, the larger interests of San Diego must be the prime consideration. To restrict all the Palisades area to limited uses, serving the interests of only a few people, would be unfair and undesirable. This area was and is an Exposition Center. Let's make it help make San Diego a better and more prosperous city.

July 30, 1959, San Diego Evening Tribune, A-1:1, A-2:4. Roads Snag Master Plan, by Charles Keely.

Robert Horn, project manager for Bartholomew & Associates

Recent metropolitan area transit study showed that on a weekday more than 15,000 cars used Park Boulevard and Laurel Street in the park; 75 percent of these cars are not park bound.

Planned improvements will take 85 of the park's 1400 acres for freeway systems.

Horn said Balboa Park is now a city within a city, and he doesn't like it. "We want this place to be a park and not a little city. We want scenery, and a place for passive recreation away from the noise and hurry of the city."

Cabrillo Freeway - widen between Date and Laurel Streets; Switzer Canyon Road - 40 acres; Crosstown Freeway - 40 acres; Upas Street crossing - 5 acres.

August 3, 1959, San Diego Union, B-1:3. Six Children's Zoo exhibits dedicated.

A plaque and six new exhibits, including a cantilever domed children's outdoor theater, were dedicated at the Children's Zoo in Balboa Park yesterday.

The plaque is inscribed with the names of individuals and firms who have donated \$100 or more to the Children's Zoo, which was opened in 1957.

Fred Kunsel, president of the San Diego Zoological Society, dedicated the plaque. It is located near the zoo exit.

Exhibits included the Col. Henry B. Clark Children's Theater, the Mrs. Elsa Koenig Memorial Clock, situated near the theater, a turtletorium, financed by donations of Oscar's employees and management in San Diego; a lath house of planting displays, paid for by the Pacifico Junior Women's Club; the Sherwood Wheaton drinking fountain, and a toucan exhibit, financed by contributions of zoo employees.

The new exhibits bring the total outlay at the Children's Zoo to about \$200,000. It covers one and one half acres, and is designed for youngsters 3 to 10 years old.

The theater, with its cantilever dome roof, will seat 200. All facilities in the zoo have been financed with donations and plans include more exhibits as contributions are received.

Heavy crowds watched the dedication ceremonies yesterday.

September 18, 1959, San Diego Union, A-17:5-8. Preliminary draft from Harland Bartholomew and Association Balboa Park plan received by City Council; 13 Balboa Park buildings labeled unfit; Firm rejects Ford Unit as convention hall; Proposes new auditorium, by Roy C. Johns.

Removal or replacement of 13 buildings in El Prado and Palisades areas of Balboa Park was recommended yesterday to the City Council. The report said 11 other buildings should be retained.

Among the 13 buildings labeled unfit is the Ford Building. Conversion of the structure would be "an inconvenient, inadequate and uneconomic solution to the convention center problem," the report said.

The council received a preliminary draft from Harland Bartholomew & Associates, St. Louis planning firm, on its suggestions for alternate uses of the buildings. Yesterday's report was the first leading to the firm's recommendations of a master plan for the park. The master plan is due in a year.

The Convention and Tourist Bureau has proposed the Ford Building be converted to provide a convention facility. The bureau's request for an early answer on its proposal led to the council asking the Bartholomew firm for an early report on the Palisades area.

Eldridge Lovelace, a partner in the St. Louis firm retained by the city for the \$35,000 study, made the presentation.

Lovelace said 11 of the 24 major buildings and groups in the two areas should be retained. He said that three others should be removed and reconstructed along similar lines, but of permanent construction, and 10 should be demolished between now and 1970. He said new structures will be proposed for the sites of some of the buildings recommended for razing.

Lovelace said his firm based its study on two basic considerations: 1. What is, or is not, appropriate park use? 2. That use of buildings must follow standards of the city building codes.

He said three alternate uses for a renovated Ford Building were considered. In addition to a 5,000-seat convention center, they were for a new museum of science and industry and for a relocated museum of man.

Lovelace estimated that conversion of the Ford Building to a 5,000-seat convention center would cost \$2,108,000. He said that for \$1,953,000 San Diego could construct a new 5,000-seat coliseum similar to that built in Charlotte, N. C., and that for \$1,300,000 it could build an auditorium of that size with a geodesic dome.

In addition, Lovelace said, San Diego needs a new convention facility with seating for at least 6,000 persons. He said the area around the Ford Building is too small for such use.

A converted Ford Building convention center would be a "makeshift" arrangement, Lovelace said, but he doubted that it would be temporary. He pointed to the number of structures now in the park which were built for the 1915 exposition and intended for two years' use but are still standing.

Lovelace also:

1. Said his firm's master plan proposal would be ready in about a year.
2. Praised the "charm" of the Prado area. He attributed this charm to uniform architecture, the arcades and mature landscaping. He said the architectural unity should be retained in any new building three and recommended reconstruction of the arcades.
3. Said no money should be spent on improving Balboa Park Bowl until the new freeway is completed to be sure the nearby interchange would not make the bowl unusable because of noise.
4. Said Balboa Park is among the city's biggest tourist attractions and is now making a major contribution to the city's economy.
5. Recommended closing Laurel Street to traffic through the park and replacing it with two roads, one north and one south of the Prado.
6. Said that new construction in the park should be of a permanent nature using masonry (concrete, stone or plastered brick).
7. Said that Balboa Park has 1,100 acres of effective park area and that whatever is done in one part of the park affects the entire park.

September 18, 1959, San Diego Union, A-17:2 Convention Hall site issue raised; Where?

"Where would they build it?"

Jerry Crary, manager of the Convention and Tourist Bureau said that if Harland Bartholomew & Associates considers the Ford Building an unfeasible site for a convention hall he wants to know where it would be feasible.

"It isn't perfect, but it's so much better than anything we could build there that there isn't any comparison," Crary said of the bureau's proposal to convert the Ford Building into a convention center.

"If not the Ford Building then what, where, when and now will be convention center we need be financed?" Crary said.

Crary said there is a difference between the Bartholomew reports and cost estimates his group received for converting the Ford Building.

"I feel this is a very thoughtful, thorough report," Dr. Douglas McElfresh, chairman of the 1957 Balboa Park Citizens Study Committee, said yesterday. "Now I think we should all have a chance to study it."

September 18, 1959, San Diego Union, A-17:3-4, A-23:1. Planners' findings on park summarized.

Here is a summary of the Harland Bartholomew & Associates recommendations on Balboa Park buildings, with the construction date of the buildings in parenthesis:

PALISADES AREA

Ford Building (1935): 60,000-square-foot structure is considered unsuitable for further use without major repairs costing more than construction of a suitable new building . . . should be torn down and the site developed into a pedestrian overlook . . . southern basement can be retained for Balboa Park Bowl storage.

Conference Building (1935): Should be removed by 1970 and preferably by 1965 . . . until then should not be used for public assembly purposes but can be used for activities having a low-occupancy demand.

Palisades Building (1935): Should be removed not later than 1970 and preferably by 1965 . . . until then its use should be restricted to Park and Recreation Department uses of the recital hall and puppet theater . . . craft center should be moved to a fireproof building outside of Balboa Park.

Balboa Park Club (1915 and 1935): Present uses, except convention gatherings, are appropriate to the park and should be provided for . . . the present building should be removed not later than 1970 and preferably by 1965 . . . it should then be replaced with a similar facility constructed of permanent materials.

Floral Association Building (1915): Has an interminable life expectancy . . . when vacated by association move to large quarters this building should be made available to the House of Pacific Relations.

Photo Arts Building (1935): Has an interminable life expectancy . . . when vacated, as expected, by Association of Camera Clubs, it should be allocated to the House of Pacific Relations.

House of Pacific Relations (1935): a group of 15 modified Spanish colonial bungalows sufficiently sound to be retained in their present use indefinitely.

Federal Building (1935): Should be converted to provide new quarters for the Museum of Man. Such conversion would cost an estimated \$35,000 . . . suggested conversion to a 2,500-seat theater is not considered practical because of the \$1,152,000 cost and the fact that a municipal theater for San Diego should seat 3,000-3,500.

Municipal Gymnasium (1935): Present use is appropriate for Balboa Park but should be relocated in a new fire resistant structure in Morley Field area . . . present building should be removed prior to 1970 thus permitting the improvement of Balboa Park Bowl and increasing parking facilities.

Balboa Park Bowl (1935): Should be retained and improved for use indefinitely . . . improvements should include new stage facilities, theater-type seating, encircling arcades, adequate screen planting, new restrooms and concession facilities, more direct access from major thoroughfares, more accessible and expanded parking facilities and possibly a retractable roof.

THE PRADO AREA

Administration Building (1915): Should be removed between next year and 1965 . . . site should be appropriately landscaped to improve the approach to the California Quadrangle . . . present use as administrative headquarters for Park and Recreation Department is inappropriate for the park.

California Quadrangle (1915): Now occupied by Museum of Man which should be removed to the remodeled Federal Building . . . not suitable for museum purposes . . . building is architecturally significant and structurally sound . . . Rotunda could be converted into a 500-700 seat “theater in the round” at a cost of \$80,000 . . . Gallery would make two small experimental theaters . . . St. Francis Chapel, workshop and boardroom would be retained for those uses.

Old Globe Theater (1935 with more recent additions): Theater has expected life between 10 and 20 years . . . should be retained until maintenance costs become excessive and then reconstructed with permanent materials, preserving the present architectural theme . . . Old Curiosity Shop and Falstaff Tavern have an indeterminate life.

The Medical Arts Building and **American Legion Building** were mentioned only briefly because they are already slated for demolition to permit additions to the Fine Arts Gallery.

Fine Arts Gallery (1925): Present use in compatible . . . present building has an interminable residual life and with the planned additions should be retained for the use.

Botanical Building (1915 and reconstructed last year): Should continue its present use indefinitely . . . A new glass house should be built.

Food and Beverage Building (1915): Too worn out to justify any major repair . . . is a major hazard to its present occupants, records and equipment and to adjacent buildings, landscaping and zoo animals . . . should be demolished as soon as city engineering divisions, now located there, can be moved outside the park.

Spanish Village (1935): Use is considered appropriate and should be continued . . . structures have an interminable life expectancy.

Natural History Museum (1933): Structurally sound and in good state of repair . . . continue present use indefinitely . . . park master plan should designate an area for expansion of this museum.

Electric Building (1915): Early removal should be planned, with demolition next year recommended . . . A major hazard to the public safety . . . trade shows now held there are inappropriate use for Balboa Park . . . site should be appropriately landscaped until it is feasible to locate a new building there.

House of Hospitality (1915): Present structure has a residual life of five to 10 years . . . should be reconstructed with a similar, if not identical appearance in permanent materials . . . this reconstruction should be undertaken no later than 1970 and preferably by 1965 . . . Patio and Del Rey Moro gardens should be preserved intact during the reconstruction.

Spreckels Organ Pavilion (1915): Should be retained indefinitely . . . master plan should provide for additional landscaping to increase the amount of afternoon shade.

House of Charm (1915): Should be removed at an early date, preferably by 1960 and certainly no later than 1965.

September 18, 1959, San Diego Union, A-23:4. Consultant Tells Center’s Needs

The planning firm which yesterday said a converted Ford Building in Balboa Park would be “an inconvenient, inadequate and uneconomic solution” to San Diego’s convention center problem did have some recommendations on what such a center should be.

However, the report of Harland Bartholomew & Associates did not say where such a center should be, other than to say it should not be in Balboa Park.

The center should have at least 6,000 seats and should be on a site large enough to permit ultimate construction of a 3,000-3,500-seat civic theater-concert hall and a 10,000-11,000-seat arena. It should have parking for 6,000-7,000 cars, the firm reported.

The convention hall itself should have about 75,000 square feet of exhibit space around or below its auditorium, according to the Bartholomew report.

The Convention & Tourist Bureau proposal for conversion of the 60,000-square-foot Ford Building proposes seating capacity for 5,000. The Palisades area now has parking for 1,008 cars.

September 18, 1959, San Diego Union, B-1:4-5. Six weekend events to bid Fiesta "adios."

September 19, 1959, San Diego Union, A-17:4, A-24:1-2. Planners' rejection of Ford Building arouses criticism; restudy due on site.

C. J. Paderewski, of Paderewski, Mitchell and Dean, surveyed Ford Building for Convention and Tourist Bureau, which, according to Harry Foster, a contractor and vice-president of the tourist bureau, wanted a 2.0 million convention hall to last 15-20 years; Paderewski, who said he agreed with the Bartholomew Plan as a whole, recommended Ford Building be rehabilitated into a 5,000-seat public assembly hall for 1.6 million.

September 20, 1959, San Diego Union, C-2:1-3. EDITORIAL: All Important Public Opinion Omitted from Report Suggesting the Razing (of Ford Building) --- "Has the Exposition Center Had a Fair Trial?"

The preliminary Bartholomew Report on what to do about Balboa Park contains, in general, nothing particularly new. It should be considered for what it seems to be: A series of old suggestions packaged as a master plan.

But the report did cause an initial shock, for in putting together many suggested changes, it for the first time offered a glimpse of a park radically changed from what the people have known and loved.

San Diegans long have realized that some of its world-famed old park buildings are going to be torn down. Some are to be replaced by equally beautiful buildings now in or nearing the design stage. Others will have to be torn down in the future, if, of course, the deterioration is deliberately allowed to progress as it has all these years. The sad truth is that many of them are being allowed to crumble through planned neglect.

The Ford Building is an example of a structure which has been allowed to deteriorate. Each passing year, if nothing is done, it will be easier and easier to argue it must be razed.

This report assumes the decision of what should be done with the entire Palisades area, of which the Ford Building is the key. This is the Exposition Center which was created for the 1935-36 Exposition and its buildings were largely designed for the future general uses along somewhat the same lines. This report recommends the breaking up of the Exposition Center, including razing of the Ford Building and four other structures, replacing one, but in general substituting more parking and landscaped area.

This recommendation goes right to the heart of the error of the whole report. Whether the Palisades area should be continued as an Exposition Center, for wide civic and organizational uses and for development of San Diego as an international convention city, is a decision that belongs to the people of San Diego.

This decision should have been made first. It should have been made by the City Council, by civic organizations, and with the full understanding of the people, and then the experts could have been called in to implement what San Diego really wanted.

A lot of time has been lost, and San Diego's opportunity as an international host city is slipping away. Let's get on ourselves with the first task at hand, the preservation of the Ford Building. The rest can wait.

September 20, 1959, San Diego Union, C-2:7. Teresa Fink, 12 years old, writes criticism of the Shakespeare Festival this summer is undeserved.

October 2, 1959, San Diego Union, A-21:8. Public hearing slated on Ford Building called for October 15.

"I think the Ford Building has stood there long enough," Mayor Dail said. "Either we put it to some use or dispose of it."

Mayor Dail said any use of the building for conventions would have to be on a temporary basis and for limited use. He said limited parking spaces in the Palisades area would make evening use of the building impractical.

October 3, 1959, San Diego Union, B-1. San Diego Zoo's A Treat For The Blind . . . members of the San Diego Braille Club visited the Zoo yesterday; Zoo personnel escorted the visitors on a bus tour of the zoo and concluded with a walking tour through the Children's Zoo.

October 6, 1959, San Diego Union, A-20:1. Woman raped in Balboa Park, police report.

October 12, 1959, San Diego Union, B-2:1. EDITORIAL: Convention Hall Stall.

The conclusion reached by the St. Louis group was not one based on irrefutable facts but on opinion and preference. It was their conclusion this building should be torn down to make way for a scenic viewpoint and conferences and conventions not be held in the Palisades area. It would seem this is a decision that must rest with the people of San Diego and their elected representatives on the City Council.

October 12, 1959, San Diego Union, B-2:7. R. E. Fleming writes: "Why should it be necessary to destroy the most substantially built structure in the park in order to obtain our badly needed public hall? Why not spend \$100,000 in rehabilitating it for our civic requirements until an auditorium can be constructed commensurate with metropolitan demands. Thereafter, it could be used for the activities of our teenagers.

October 15, 1959, San Diego Union, A-22:1-3. Dail predicts Ford Building decision soon; future eyed at hearing.

Chief spokesman against the rehabilitation proposal was J. Colin Hodge, a member of the Balboa Park Citizens Study Committee, which opposed convention facilities in the park. He received support from the city Park and Recreation Commission, and a number of individuals, including John L. Bacon, Frank Swain and Frank Seifert, former City Council members.

October 19, 1959, San Diego Union, A-15:1-2. The Monday Question: Convention Hall Opinions Divided.

October 22, 1959, San Diego Union, B-2. Letter, A. O. Nelson, saying Ford Building should be remodeled for convention use.

Why should a city the size of San Diego find it necessary to go outside for help at big expense to tell us what should be done or not be done with the future of Balboa Park and a convention center?

I believe we have many civic-minded men and women in the city that would help, consider, suggest and develop what is best for the future of our park and convention center.

Today, as the park stands with its beautiful buildings and our adjoining zoo, it is a real asset to San Diego and vicinity.

I believe it is time the men and women of this city demand that the suggested destruction of 12 buildings be given no consideration other than to make them save for future use. . . . I believe the Ford Building should be remodeled for convention use. We have vacant land within the park that can be used for new buildings without destroying our park as we now see it.

October 27, 1959, San Diego Union, A-15:1-2. Goya Painting Left To San Diego Gallery

A will bequeathing painting, "Lady With a Fan," by Goya to the San Diego Fine Arts Society was found yesterday in the New York apartment of Mrs. Lillian Timken.

October 28, 1959, San Diego Union, A-13:4. City Council orders Convention Hall finance study.

The City Council yesterday directed the city attorney's office to study four possible ways of financing a convention hall.

The council agreed to resume its conference November 24 on the city's convention needs and possible rehabilitation of the Ford Building in Balboa Park as a temporary answer.

"This shows that we're going to face up to the problem, even though the answer may not be the Ford Building," Mayor Dail said.

The council asked the attorney's office to determine if a convention hall could be built with private capital and operated by the city under either a long-term lease or a lease-purchase agreement.

Councilman Frank Curran suggested the city study the possibility of a "minimum" rehabilitation of the Ford Building so it could be used temporarily for conventions without stifling efforts toward providing an adequate new convention center elsewhere.

Russell Johnson, public relations director for the Convention and Tourist Bureau, which as proposed the rehabilitation, said a program such as suggested by Curran would provide seating for 3,700.

Estimates for the Ford Building rehabilitation suggested by the bureau have averaged about 2 million dollars.

"I do not have sufficient information yet for spending 2 million dollars of the public's money for a temporary facility," Councilman George Kerrigan said.

Both Curran and Councilman Chester Schneider said they oppose razing the Ford Building --- as recommended in the preliminary report of Harland Bartholomew and Associates --- and feel it should be used for some purpose.

The Bartholomew firm, St. Louis planning consultants hired by the city to prepare a master plan proposal for the park, has reported that the park is not a proper location for a convention facility.

It also reported that a new facility more adequate than a rehabilitated Ford Building could be constructed for less than the rehabilitation cost.

October 28, 1959, San Diego Union, B-2:8. Ruth C. Smith writes "Let us endeavor to keep commercial groups and business out of the park. The convention hall is not for a park."

November 17, 1959, San Diego Evening Tribune, A-1:5-8, A-2:1-2. Dr. Charles Schroeder estimates that San Diego Zoo needs to spend 5 million dollars in the next five years or so to keep up to date, by Frank Stone.

And Schroeder says he's wondering where the money will come from.

He said the program will include removal of some obsolete and depreciated exhibits, and construction of new ones.

For example, Schroeder wants to take the great apes in the zoo from behind their bars and put them on moated islands, where they can be seen better.

The estimated five-million dollar cost of the program doesn't include purchase of any new animals, Schroeder said. He said the zoo can't carry out the program with its present revenues.

"I don't know where we're going to get the money, but the only way seems to be to raise the gate charge," he said.

But if the present 75-cent gate charge for adults were raised, the majority of those paying it wouldn't be from San Diego County.

A survey made this year by the zoo showed that between 65 and 70 percent of the visitors come from outside the county.

The zoo's problem is that, except for some gifts, its only source of funds for capital improvements (and purchase of animals) comes from operating surpluses.

Schroeder said that in the last four years the zoo has accumulated about a half million dollars in surplus money from its operation.

This money is under control of the board of directors of the San Diego Zoological Society, which operates the zoo.

The society employs Schroeder and a staff of between 250 and 350 employees for the zoo operation. But Schroeder said the zoo property and the animals belong to the City of San Diego.

"Like most of the famous zoos of the world, we've found this to be the best method of operation," Schroeder said.

Schroeder estimated that the zoo this year will have a revenue of about \$2,138,000 and \$1,933,968 in expenses.

The zoo's sources of income include gate receipts, revenues from bus and guided tours, the restaurant, refreshment stands, gift and photo shops, and a property tax of two cents for each \$100 assessed valuation for zoo maintenance, established in 1929.

Schroeder estimated that the tax will yield slightly more than \$133,000 this year, or about 7 percent of the zoo's income.

"This won't quite pay for our water bill and the costs of feeding the animals," Schroeder said.

He estimated it will cost \$100,000 for animal feed, and up to \$42,000 as payment to the city for water for the zoo.

Until 1956, the city paid the zoo's water bill. In the following year, the city paid for half of it, and the zoo has paid the entire bill for the last two years.

Other sources of zoo income are proceeds from a trust fund of about \$60,000 and gifts. The zoo also receives \$12,500 a year from the county for its educational program.

Against this income, the zoo has its operating costs and a payroll of \$1,100,000 a year, Schroeder said.

Out of its surplus funds, the zoo tries to spend about \$50,000 a year for new animals, Schroeder said. These are purchased through correspondence with dealers, and are obtained through swaps with other zoos and as gifts.

"And through our purchases the zoo gives the City of San Diego between \$300,000 and \$350,000 a year in new equipment and buildings because anything of this type we buy, belongs to the city," Schroeder said.

He said the zoo board approved projects totaling more than \$800,000 for the present fiscal year. But there was money enough to finance only about \$600,000 worth of these, he said.

Among the current projects will be a moving staircase from the mesa in the primate area to the canyon near the seal tank, Schroeder said. The escalator will be alongside the condor cage, he added.

November 18, 1959, San Diego Evening Tribune, A-8:1-6. San Diego Zoo's busiest classroom in town, by Frank Stone (illus.).

Many of the visitors to the San Diego Zoo come to do more than just look at the animals.

They come to learn about them.

Of course, the zoo's main service to San Diego is providing the largest collection of wild animals in the world.

But zoo officials say that so far as they know, the San Diego Zoo, in addition, has the most extensive educational program of any zoo in the world.

It's an educational program that extends from nursery school to graduate college work and reaches far beyond the boundaries of San Diego.

Dr. Harry M. Wegeforth, founder of the zoo, inaugurated the program 29 years ago. The zoo itself pays for most of the program.

Through the zoo's educational program, more than 45,000 San Diego city and county elementary school children see and learn about the zoo's animals every year.

Every second grade student in the city schools system and most of those in second grades throughout the county are given a guided tour of the zoo yearly.

The city schools' second grade youngsters are taken to the zoo in a 72-passenger bus purchased by the zoo. County second graders come to the zoo in their own buses.

The latest addition to the zoo's program for youngsters is a series of classes for children under the geodesic dome of the Clark Children's Theater in the Children's Zoo.

There, children from nursery school through the third grade learn what animals eat, how they live, how they behave, and how to take care of their pets.

The teacher, Miss Patricia Kline, has movie and slide films to aid her instruction.

Dr. Charles Schroeder, zoo director, said the Children's Zoo program still is experimental. This is its first year.

The zoo's other full-time teacher, Mrs. Cynthia Ketchum, annually presents an illustrated lecture to every 4th, 5th and 6th grade class in the city schools on animals of North and South America.

More than 300 students enroll each year in the zoo's summer program, also conducted by Mrs. Ketchum. It's a six-week course of a two-hour lecture per week for children from 10 to 13.

Also, there are special tours for high school and college students.

The zoo conducts a special vocational training program for selected students interested in the medical and related biological sciences. The program is conducted in the zoo hospital.

Schroeder said students for the program are selected on recommendation of the city schools.

The school programs are available to public parochial, and private schools, Schroeder said.

At the top academic level, the zoo has a program of research grants for qualified scientists. The grants, usually for short terms, are awarded _____ of the San Diego Zoological Society.

Funds for the grants are donated by the Ellen Browning Scripps Foundation. Schroeder said the grants aid studies in such fields as biochemistry, bacteriology, comparative anatomy, physiology, and pathology. The studies are carried out in the zoo's research laboratory.

For example, one-month research grants were awarded this year to scientists from the School of Veterinary Medicine at the University of California's Davis campus, Schroeder said.

He said the zoo's research facilities are made available to qualified scientists who receive financial support for research from other sources than the zoo's study grants.

The zoo also has special programs for those who otherwise would not be able to enjoy the animal exhibits.

Handicapped children are admitted free and given special treatment, depending on their limitations.

If the children are crippled, young animals are brought to them, Schroeder said.

If they are deaf, visual material is used to teach them, and if they are blind, displays and animals are brought to them to touch, he said.

There is a similar program for the adult crippled. The blind are admitted free and given bus tours once a year. They can touch the animals at the Children's Zoo, and guides describe the animals in the main zoo's exhibits.

More than a thousand children from south of the border visit the zoo yearly on Mexican Children's Day, Schroeder said. Another thousand or more enter free as part of the Los Angeles Parks and Recreation Department's summer program.

Other special school and youngsters' groups are admitted free from outside San Diego, Schroeder said.

The free admission also applies to all children under 16, city, county and parochial school students, city and county employees and teachers and old age security card holders.

And the zoo is one of the city's main welcome mats.

Schroeder said the zoo “rolls out the red carpet” and gives special tours for official guests of the city and the Harbor Department.

The Navy also frequently arranges special tours for visiting foreign officers, he said.

November 19, 1959, San Diego Evening Tribune, A-12:1-5. City’s tourists come to see San Diego Zoo, by Frank Stone.

Community leaders agree that the San Diego Zoo is one of this area’s greatest tourist attractions in addition to providing entertainment and education for San Diego County residents.

Leaders point to the fact that nearly 70 percent of the zoo’s two million visitors a year come from outside San Diego County, and 40 percent come from outside the state, as an indication of the tourist drawing power of the zoo.

B. F. Coggan, vice president and manager of Convair-San Diego, and a member of the Board of Education, puts it this way:

“Our San Diego Zoo is one of the finest assets in San Diego. We have in the zoo a tremendous educational facility for both young and old.

“In turn, the zoo brings to our city a large number of people from other parts of the country and exposes these visitors to the city of San Diego, its climate and its industries.

“This results in many of these visitors returning to San Diego to live and to become part of our San Diego community and an integral part of our industrial picture.”

R. E. Stauffer, president of the Convention and Tourist Bureau, said that, apart from its climate, San Diego’s greatest tourist attraction is the zoo.

“We feature the zoo in all or publicity which is distributed throughout the United States,” Stauffer said. “And the fact that 40 percent of the zoo visitors are from out of state is important to our tourist industry.”

Stauffer noted that Los Angeles is planning a large zoo. “They have seen the importance of a zoo as a tourist attraction in San Diego,” he said.

Rear Admiral Charles C. Hartman, commandant of the 11th Naval District, said:

“I think the zoo is one of the nicest attractions we have here for our own personnel. And it’s just as great an attraction for visiting officers, both from the United States and from other countries. When they come here, we arrange tours, which always include the zoo.”

L. M. Klauber, a member of the San Diego Zoological Society board of directors, emphasized the importance of both the zoo’s tourist attraction and educational value.

“The zoo is most important to the city of San Diego,” Klauber said. “Because people come here from outside this area, either primarily or entirely to see the zoo.

“It’s one of the city’s greatest drawing cards, especially among those who have children. The educational program is of great value, too. It’s a kind of education you can’t get anywhere else.”

Anderson Borthwick, another member of the Zoological Society board, said the zoo is one of San Diego’s best attractions.

“The fame of the zoo has spread worldwide,” Borthwick said.

“We can do only one thing with the zoo --- we’ve got to improve it to keep it the best there is. I’m thoroughly behind Dr. Schroeder’s expansion program.

“I think that next to building a convention hall --- and maybe in preference to a convention hall --- the zoo comes tops.”

Dr. Charles Schroeder, zoo director, has said the zoo needs to spend five million dollars in the next five years or so to keep the zoo in top condition.

San Diego County’s leading educational superintendents cite the value of the zoo as an important part of the education of this area’s youngsters.

“The zoo is a tremendous resource for school youngsters to have an opportunity to see animals from other parts of the world,” said Dr. Cecil Hardesty, county superintendent of schools.

“When we lived in the Los Angeles area, we brought our youngsters down to San Diego to see the zoo. San Diego is tremendously fortunate in having an educational and cultural institution of this kind which is known all over the world.”

Dr. Ralph Dailard, city schools superintendent, said:

“We think very highly of the zoo. It is an important contribution to the education of every child, particularly of those in the second grade level. It’s one of the elements in expanding their horizon. Contact with the zoo and its animals is important in their cultural development.”

The zoo has received hundreds of letters of appreciation from visitors from throughout the United States.

“I think you have the most wonderful and interesting zoo in the United States,” wrote Mrs. William R. Hennig, of Drexel Hill, Pa.

Jerome E. Plitt, of Pearl River, N. Y., wrote:

“I have in the past visited many zoos and museums, both as an adult and as a child, and I cannot recall any instances in my life when I have visited a point of culture and have been so completely fascinated.

“The knowledge that your organization provides for the youth of today and the citizens of tomorrow cannot be measured in intrinsic value, but rather must be considered of values beyond measurement.”

November 21, 1959, San Diego Union, A-13:5-6. Duke, three-ounce Masai lion cub, born at San Diego Zoo Thursday (illus.).

November 24, 1959, San Diego Evening Tribune, B-2:1-2. EDITORIAL: San Diego’s World-Famed Zoo is Multiple Community Asset.

Mention the San Diego Zoo to some people and they immediately think of animals --- from the stately flamingoes near the entrance to the bears showing off in front of their grottoes in the leafy canyon below the mesa . . .

Or the enchanting Children's Zoo, of course, where young and old alike can walk among and handle the smaller animals.

To some the zoo is all of this, plus an incomparable collection of plants . . . exotic ferns and flowers.

The zoo is all of these things, to be sure. But it also is much more, as a recent *Evening Tribune* story series suggested.

At the head of the list, perhaps, is the fact that the world-famed San Diego Zoo is one of the most magnetic tourist attractions we have.

Of great importance, although less well known, is the zoo's function as an educational institution.

On still another count, the zoo is a sizable capital asset for the city of San Diego and its residents that is continually increasing in value.

All of these different sides of our zoo should be understood in order to appreciate the importance of current plans and hopes for improving the value and attractiveness of this asset in the future.

Dr. Charles Schroeder, zoo director, estimates that the zoo should spend a million dollars a year over the next five years or so to keep this attraction in top condition.

Where will the money come from? Schroeder doesn't know. But he says he's sure of one thing: It won't come from a bond issue or any kind of funded debt.

This brings up an interesting aspect of our zoo, that should appeal to all taxpayers. The zoo not only is one of our most valuable assets, moneywise, it is a bargain for all the services it provides.

San Diego property owners pay 2 cents on every \$100 of assessed valuation for zoo maintenance. This year Schroeder estimates that the tax will bring in about \$133,000 --- about 7 percent of the zoo's income, and not quite enough to pay the water bill and the costs of feeding the animals.

Main sources of income are gate receipts, revenues from bus and guided tours, the restaurant and refreshment stands, souvenir shops and gifts. A trust fund provides about \$60,000 a year, and the county pays \$12,500 for its educational program.

Tourists are a major arm of support. Last year nearly 70 percent of the zoo's two million visitors came from outside San Diego County, and 40 percent of those from outside the state.

Tourists who came here primarily to visit the zoo contribute substantially to our over-all economy.

Their support, along with the other sources of revenues, helps the zoo fulfill its educational function --- from free tours for school children to advanced vocational work in medical and related biological sciences.

And the zoo in turn adds between \$300,000 and \$350,000 yearly in new equipment and buildings --- capital assets that become the property of San Diego.

The zoo --- just animals" Not by a giraffe's neck!

December 3, 1959, San Diego Union, B-24:1. Officials of the Zoological Society will meet with the City Council today to discuss a recent council suggestion that tax support for the zoo be withdrawn.

December 4, 1959, San Diego Union, A-21:2-3. San Diego Zoo to present outlay program; officials promise figures to counter proposal for eliminating city tax.

San Diego Zoo officials yesterday promised the City Council a complete master plan of their projected capital outlay program and a financial analysis of zoo operations.

The zoo officials made the promise at the request of Councilman Chester Schneider, who has suggested that it might be feasible to withdraw tax support for the zoo.

Howard Chernoff, president of the zoo's Board of Trustees, was spokesman for the five zoo officials who appeared at yesterday's council conference to give reasons why the zoo tax of two cents should be continued.

Chernoff said a continuing program of capital improvements is needed to keep the zoo a popular tourist attraction. He said 70 percent of the zoo's two million annual visitors come from outside San Diego County.

He warned of the competition with local tourist business of a proposed Los Angeles zoo, if San Diego does not continue to maintain its zoo as the "Greatest in the World."

Chernoff said the zoo is forced to restrict its school children's educational programs to second-grade students. He said he would like to see annual visits for sixth-graders and high school students as well.

"If you need money and can prove it, who's going to say no," Schneider said. "If you prove it, I'll be glad to withdraw my suggestion."

A vote of San Diego citizens would be necessary to remove the zoo tax from the city charter.

December 4, 1959, San Diego Union, A-21:4. C. J. Paderewski, architect, submitted plan for rehabilitation of Ford Building at cost of one million.

C. J. Paderewski reported to City Council that Ford Building could be converted into a fire-safe structure seating 3,750 at a cost of 1.0 million to 1.1 million.

Paderewski said the seating capacity and cost of the rehabilitated structure were reduced by eliminating the previously proposed mezzanine. He said laminated wood, less costly than steel and fire-resistant, could be used for the roof.

The architect said the present building shell could be encircled with metal studs and plastered. With a sprinkler system this would provide a one-hour fire resistancy. His cost figures include air conditioning. The building's auditorium, with removable seats, would be ringed with exhibit areas.

Aaron Reese, assistant city attorney, told the council, in answer to a question, that the city could lease the Ford Building to an organization on a 5-year basis to rehabilitate the structure and operate it.

Councilman Schneider suggested financing the work from the city's capital outlay fund and repaying the fund with proceeds from a suggested 4 percent hotel-motel tax. A city study indicates such a tax would produce enough revenue to pay for the rehabilitation in 3 years.

December 9, 1959, San Diego Union, 17:1-3. City Council rejects plan to rehabilitate Ford Building; will wait for completion of Balboa Park Master Plan.

Mayor Dail's attempt to lead the City Council toward rehabilitation of the Ford Building as a convention hall was rejected by a 5-1 council vote yesterday in conference.

Instead, the council agreed it should wait until Harland Bartholomew and Associates, St. Louis planning firm hired by the city, completes its Balboa Park master plan proposal in about six months. The firm already has recommended against Ford Building rehabilitation sought by the Convention and Tourist Bureau.

Dail and Councilman Kerrigan differed sharply on whether the council had already answered that it does not favor the rehabilitation at this time. Kerrigan maintained such a decision had been reached, but Mayor Dail says he does not feel bound by it.

Mayor Dail opened the spirited discussion by asking the council to hire an architect to plan the rehabilitation. He indicated his support for a conversion program suggested last week by C. J. Paderewski, a local architect, to rehabilitate the structure as a 3,750-seat convention facility at a cost of \$1,100,000.

"What does it contribute?" Kerrigan asked of the proposal. He then answered, "A second-class convention hall." Kerrigan continued that he is not convinced San Diegans will not provide a first-class facility.

Dail said he is not sure San Diego will not have to settle for a second-class convention hall. He said he does not feel bound by the Bartholomew recommendations to date and sees no reason to wait until the firm's report is completed.

Mayor Dail said Raymond Stauffer has said use of the Ford Building is in line with proper uses of Balboa Park as expressed by the Balboa Park Citizens Study Committee's executive committee. Stauffer, a member of that committee, is president of the Convention and Tourist Bureau. Other committee members contradicted his opinion at a public hearing on the rehabilitation proposal.

"Someone found our (Harry) Handlery, owner of El Cortez Hotel, was going to build a convention center behind his hotel and said, "We can't have that" and decided we should convert the Ford Building, Kerrigan said. Dail denied that this was the reason.

With the exception of Dail and Chester Schneider, who was not present, the council all voted with Kerrigan. Among the votes to wait was that of Councilman William Hartley, who said, as the dispute between Dail and Kerrigan began, that he would approve hiring an architect to plan the rehabilitation.

1958-1959, Department of Public Works, Annual Report.

p. 5. In connection with decentralization it is proposed to develop the Rose Canyon and Chollas yards as sites for future Public Works and Utilities operations. Contemplated are provisions for those facilities directly affected by freeway construction in the vicinity of 20th and B. Facilities would be constructed at Chollas for the Street, Sanitation and Equipment Division of the Public Works Department.

p. 27. The installation of scales at Arizona fill has permitted control over daily routing of collection vehicles dispatched from the 20th and B yard.

p. 33. Buildings Division

Since it is proposed to relocate divisional headquarters away from 20th and B, custodial services will be transferred to Public Works Administration Division July 1, 1959.

p. 36. The relocation of divisional facilities is anticipated since the proposed crosstown will consume the present location. Probable sites for new facilities are Rose Canyon and Balboa Park.

p. 60. Equipment Division

Service station facilities at 20 and B, Chollas and Frontier yards.

1960

Summary of Events in 1960

(Note: Dates for events are approximate only.)

City Council renews lease for auto racing in Balboa Stadium (February 5, 1960)

Fiesta del Pacific suspended (February 27, 1960)

Balboa Park Master Plan (May 17, 1960)

Leo Calland resigns as Park and Recreation Director (July 10, 1960)

Moving sidewalk, rain forest opens at San Diego Zoo (July 21, 1960)

Hall of Champions preview (July 22, 1960)

Old Globe revives "Hamlet" (July 24, 1960)

Japanese Tea House opens in House of Pacific Relations (August 1, 1960)

Park building leased to United Nations group (August 2, 1960)

Lester Earnest appointed Park and Recreation Director (September 2, 1960)

Plans for Science Hall/Planetarium (September 28, 1960)

President Eisenhower visits San Diego/Chula Vista (October 22, 1960)

Home Appliance Show (November 27, 1960)

Plans to rehabilitate Ford Building (December 21, 1960)

.

January 1, 1960, San Diego Union, B-1:1-2. Auto-racing lease at Balboa Stadium expires.

January 5, 1960, San Diego Union, B-2:8. Robert E. Fleming wants temporary convention hall in Ford Building.

January 6, 1960, San Diego Union, A-5:1-2. "Reluctant Debutante" new hit at Old Globe, by Constance Herreshoff.

January 6, 1960, San Diego Union, A-11:7. Fiesta group votes to continue events.

January 14, 1960, San Diego Union, A-17:6. Council group urges Balboa Stadium lease renewal of Stadium Racing Association.

January 16, 1960, San Diego Union, A-15:7-8. Meeting January 26 to decide fate of Fiesta.

January 16, 1960, San Diego Union, B-2:7. Letter Walter Rein praising creation of Balboa Park as a ventilation channel.

January 17, 1960, San Diego Union, A-13:7. *San Diego Union* name contest for baby gorilla which arrives at San Diego Zoo last December 6.

January 18, 1960, San Diego Union, B-2:8. E. G. Galley for temporary use of Ford Building as a convention hall.

January 20, 1960, San Diego Union, A-20:4-5. Councilmen favor auto racing lease in Balboa Stadium.

January 23, 1960, San Diego Union, A-17:4-5. Car driver "pinched" twice in Balboa Park squeeze while trying to drive through Conference Building.

January 24, 1960, San Diego Union, A-11:7, A-22:4-6. Council sets meeting on Auto Racing; Tuesday session due on request for stadium lease renewal.

January 24, 1960, San Diego Union, B-2:1-2. Two hundred cats to become park's top dogs; two shows at once, by David Dow (illus.).

January 25, 1960, San Diego Union, A-11:7-8, A-13:3. Poll opposes auto racing; most residents near Stadium object to noise, parking woes.

January 25, 1960, San Diego Union, A-11:4. San Diego Zoo - care of gorillas like any baby's.

January 25, 1960, San Diego Union, A-14:7-8. White Persian cat wins best-in-show (illus.).

January 25, 1960, San Diego Union, B-2:2. EDITORIAL: Consider the Patients.

There is a place for auto racing in our community. But surely that place is not hard by the U. S. Naval Hospital in Balboa Park.

January 27, 1960, San Diego Union, A-15:4-5. Action tomorrow on stadium racing.

January 27, 1960, San Diego Union, A-15:6. Postponing 1960 Fiesta called likely.

January 28, 1960, San Diego Union, A-21:6. San Diego Zoo - man fell into alligator pit while trying to steal a seal to win a bet; he ended up in jail.

January 28, 1960, San Diego Union, A-27:4-5. Sixth Science Fair set for April 9-12, by Bryant Evans..

January 31, 1960, San Diego Union, A-21:1. San Diego Zoo - story of Gagi and Bongo, two gorillas, those two giant bronze gorillas at Zoo were favorites with local children, too, in real life. by Holger and Helen Jensen (illus.).

February 5, 1960, San Diego Union, A-21:4-5, A-22:1-2. Board of Education should purchase Balboa Stadium for its true value if it wants to keep auto racing from the stadium, Councilman Frank Curran said yesterday.

February 11, 1960, San Diego Evening Tribune, B-1. First contract scheduled for crosstown freeway.

February 12, 1960, San Diego Union, A-19:4. City Council okayed auto racing lease for 5-years for Stadium despite protests.

February 14, 1960, San Diego Union, A-17. San Diego Zoo - "Copy" is top name for gorillas in Zoo contest (illus.).

February 14, 1960, A-40:1-3. Two-day Camellia Show opened in Conference Hall yesterday (illus.).

February 23, 1960, San Diego Union, A-17:3. Firemen prevented a major fire in the Electric Building yesterday afternoon; electrical short circuit damaged cables under a stairwell and scorched flooring.

February 23, 1960, San Diego Union, A-17:3-6. San Diego Zoo - Councilmen hear Zoo plans; moving sidewalk, ape exhibit projects stressed in report on financial needs, by Roy C. Johns (illus.).

The City Council yesterday joined the holiday crowd at the zoo for a first-hand report on the tourist attraction local tax money is helping to maintain.

The zoo's board of directors invited the council to visit after individual council members suggested that (there) might be no further needs for the tax levy of two cents for each \$100 assessed valuation which is earmarked by law for the zoo.

Councilmen toured the zoo and heard Howard Chernoff, chairman of the board of directors, and Dr. Charles Schroeder, managing director, explain needs and future plans.

The tour moved quickly by established features of the zoo and stressed additions that are planned.

The councilmen saw:

1. The present "ape alley" and the site of a planned \$200,000 "great ape exhibit," which Schroeder said will be the first in the world to exhibit gorillas behind unfenced moats.
2. The old bird of prey flight cage which is being converted into a walk-through "tropical rain forest" for the display of 400 tropical birds, reptiles and turtles. Chernoff said there will be "no exhibit like it in the world." The cage will be ready in June.
3. The site for a \$150,000 moving sidewalk up the face of a canyon within the zoo. It was explained that this facility, to be completed by mid-July, will make all of the zoo, instead of the present 20 percent open to persons on foot who because of age or health cannot walk to some exhibit areas now.
4. The deer mesa where alterations will remove many of the fences and permit the zoo buses to drive among the exhibits.
5. The nocturnal animal exhibits which will be remodeled to display those animals to the zoo's daytime visitors.

A number of areas not open to the Washington birthday crowd at the zoo also were shown the council members. They included the commissary butcher shop where five horses a week are butchered to feed carnivorous animals and birds; the zoo hospital; its laboratory where post-mortems are performed on every specimen which dies, and the nursery which has reduced the zoo's infant mortality rate from 80 to about 10 percent.

Chernoff said the autopsies performed at the zoo laboratory and shipment of the vital organs to major research centers has been an important contribution to medical research, particularly on cancer and high-blood pressure.

In the zoo hospital, Dr. Werner Heuschele exhibited the capsule gun used to give medicine and anesthetics from a safe distance to dangerous animals.

February 24, 1960, San Diego Union, A-13:4. Annual Engineer's Week banquet at 7:30 p.m. in Balboa Park Club Friday; technical exposition on display in parking lot near Conference Building, Saturday and Sunday.

February 24, 1960, San Diego Union, A-15:1. Curtain door of Organ Pavilion stuck on its roller hinges; Douglas Ian Duncan, civic organist, is presenting his weekly Sunday recitals on an electric organ moved onstage.

February 25, 1960, San Diego Union, A-17:3-4. Spring Home Fair slated April 22-27 in Electric Building.

February 27, 1960, San Diego Union, A-15:7. Directors suspend Fiesta del Pacifico; door is left open for future renewal.

March 13, 1960, San Diego Union, B-4:4-6. Joshua Sloane's shouts gave us a park, by Jerry MacMullen.

March 20, 1960, San Diego Union, C-2:7-8. C. M. Henderson opposed to freeway in Balboa Park.

March 25, 1960, San Diego Union, B-2:7. Hugh Strong claims Balboa Park barrier to hazards of smog.

March 27, 1960, San Diego Union, B-1. San Diego Zoo - museums, Zoo plan "Park Sunday."

March 29, 1960, San Diego Union, A-18:3. Atomic exhibit slated to open tomorrow through April 15 in Electric Building.

March 30, 1960, San Diego Union, B-2:8. Charlotte Anderson says "park hobbyists" were evicted from Balboa Park "only six months ago."

April 3, 1960, San Diego Union, A-25:4-6, A-26:7-8. Five institutions invite San Diego to "Sunday in the Park" next weekend.

April 4, 1960, San Diego Union, A-17:4. Atomic future on display now in Balboa Park.

April 8, 1960, San Diego Union, A-19:1-2. Three hundred and one at Science Fair to explain exhibits.

April 9, 1960, San Diego Union, B-16:1-2. Council voted Laurel Street bypass; hearings ordered on plan to relieve jammed traffic through Balboa Park.

April 10, 1960, San Diego Union, A-19:1-2. Four museums, San Diego Zoo plan open house.

April 10, 1960, San Diego Union, A-19:2-3. Curiosity brings varied exhibits at 6th annual Greater San Diego Science Fair which opened yesterday, by Charles Davis.

April 10, 1960, San Diego Union, A-19:4-5. Science Fair start attracts 5,000 (illus.).

April 11, 1960, San Diego Union, B-2:6-8. "A View from the Bridge" playing at Old Globe.

April 13, 1960, San Diego Union, B-1:3. The Tennis Patrons Association yesterday urged the City Council to expand the Morley Field tennis center from its present 10 courts.

April 14, 1960, San Diego Union, A-21:5. San Diego Zoo - 300-lb. baby elephant arrives at Zoo (illus.).

April 14, 1960, San Diego Union, A-23:5. San Diego Zoo accused in worker firing because she is getting married to another employee.

April 18, 1960, San Diego Union, A-13:6. Three thousand five hundred worshipers attended Easter services at Organ Pavilion yesterday (illus.).

April 20, 1960, San Diego Union, A-18:1. San Diego Zoo - baby hippo makes Zoo debut.

April 21, 1960, San Diego Union, A-6:4-5. Home Ideas Fair opens tomorrow in Electric Building.

April 21, 1960, San Diego Union, A-21:1. San Diego Zoo - suspect held in theft of hawk at Zoo, missing hawk found safe.

May 13, 1960, San Diego Union, A-26:5-6. City officials have notified the Stadium Racing Association that future violations of the contract for the use of Balboa Stadium will result in an immediate recommendation to cancel the contract.

May 17, 1960, Balboa Park Master Plan, by Harland Bartholomew and Associates.

p. 10. Evidence of termite infestation and dry rot was found in all of the Palisades Area buildings and in all the Prado Area buildings except the Fine Arts Gallery, the Natural History Museum, the Botanical Building and the Museum of Man.

p. 10. Balboa Park Club

The facade of this building was constructed of wood and stucco in 1914 and the remaining structure as added of the same materials for the 1935 Exposition. The facade has architectural significance and the building's use is appropriate for the park. However, when used for public assembly purposes the combustible construction violates the fire regulations of the Building Code. The structural frame is inadequate. The building is maintained in a fair state of repair at high costs and has a life expectancy of between five and ten years.

p. 10. Conference Building

This stuccoed, wood-frame building was constructed for temporary use for the 1935 Exposition. It has no architectural significance and is used for various public assembly purposes. In this use it violates the fire regulations of the Building Code. The structural frame is inadequate and the building is kept in a fair state of maintenance at low maintenance costs. The life expectancy is between five and ten years.

p. 10. The Federal Building

This building was constructed of permanent materials for the 1935 Exposition, with eventual conversion to a theater planned. It is structurally sound and in a fair state of repair. Maintenance costs are low. The building houses an appropriate park use (Municipal Gym Annex) but is not realizing its potential. The wooden floor of the building has a life expectancy of 10 to 20 years but the remaining structure has an interminable life expectancy. Its architectural significance is negligible.

p. 10. The Ford Building

This was built as a temporary structure for the 1935 Exposition with a concrete foundation, a structural steel frame and wood and stucco walls. The use at present is for dead storage. If used as a public assembly place it would seriously violate the fire regulations of the Building Code. Architecturally the building lacks significant interest. It is in a poor state of repair. In its present dilapidated condition the building has a life expectancy which varies with its component parts. The foundation and structural frame have indefinite life expectancies but the stuccoed wood sheathing has such a limited future life that immediate removal appears warranted.

p. 10. The Zoo

The San Diego Zoological Gardens, better known as simply "The Zoo," occupy approximately 91 acres of the north central part of Balboa Park. The Gardens are operated by the Zoological Society of San Diego under a special occupancy permit from the city. The Zoo is supported by a small city tax levy (two cents per \$100 valuation), gifts and paid admissions, the latter constituting the major source of revenues to maintain an annual budget in excess of \$1,800,000.

At the close of fiscal year 1959 the Zoo advertised its wild animal collection, numbering more than 3,600 specimens, as the world's largest. The animals are exhibited by family groups in a sub-tropical setting which covers four mesas and three canyons. Throughout these areas of the Zoo that have been landscaped every specimen tree, shrub and plant have been identified. Frequent buses convey visitors over three and a half miles of roadways on a 50-minute tour, although a majority of the exhibits can be viewed on foot. The Zoo includes one of the world's largest reptile exhibits and a most complete primate collection. Outstanding exhibits include the Indonesian Proboscis Monkey, Australian Koalas, African Hunting Dogs, Gorillas, Galapagos Tortoises, Northern Elephant Seals, New Zealand Kiwis, a Snow Leopard from the Himalayas, a Sacred Crane from Japan, Okapi from the Belgian Congo and the more usual Hippos, Rhinos, Lions, Tigers, Elephants, Giraffes, Orangutans, Bears, Kangaroos, Penguins and Camels. One the north and south sides of one mesa are two of the largest free-flight cages in the world, one of them containing birds of prey, including the American condors.

The new entrance building contains a large, modern restaurant overlooking the Flamingo Pool, as well as the Administration Offices and Gift Shops. There are also two picnic grounds and several paved terraces for those who wish to bring their own lunches. A new feature of the Zoo is the children's section where all exhibits and food service booths are at child's eye level.

May 17, 1960, San Diego Union, 17:4. Superior Court Judge William A. Glen ruled yesterday in deciding a year-old suit that religious groups and their activities have as much place in the park as on the sidewalks; city's proposed buildings are also proper.

The question of permanent usage by such groups or for such activities was not raised in the friendly suit brought against the city by an attorney, W. E. Starke, Glen said.

In his 18-page memorandum opinion, Glen also held that the City Council could erect an exposition center in the park or remodel the Ford Building for that purpose without asking the voters.

He said an April 6, 1957, election defeat of a convention hall bond issue did not mean "that under no circumstances should any portion of Balboa Park be used" for such a facility.

Glen further concluded that the city was not abusing its temporary use of space and buildings in the park for various administrative offices. He noted that only a small portion is being used for that purpose and that efforts are being made to find room elsewhere.

Starke filed the suit February 4, 1959. He and Aaron Reese, assistant city attorney, said then that the action was a "friendly effort to clarify the city's rights under its charter and the state constitution.

The San Diego Council of Churches and five taxpayers joined the suit in behalf of the city.

On the religious question, Glen held that banning of religious activities would deny free speech and excluding religious groups would result in discrimination.

As for the convention hall or civic auditorium proposed for the park or remodeling of the Ford Building, Glen observed that Starke conceded the facilities are proper park uses.

"No distinction can be based upon the name attached to a community building, whether located in a park or elsewhere," said Glen. "It is the use to which the building is put that determines whether it is a proper park use."

May 31, 1960, San Diego Union, B-2:2. EDITORIAL: "Yes" on Prop. C.

If enacted by the voters, the position of assistant park and recreation director would be placed under the city manager's control for hiring and firing purposes. It merits favorable action by the electorate.

June 2, 1960, San Diego Union, A-29:2. San Diego Zoo - disease fatal to "Copy," zoo's gorilla.

June 4, 1960, San Diego Union, A-14:5. San Diego Zoo - African animals reach Zoo.

June 8, 1960, San Diego Union, A-15:3. City Council yesterday heard budget requests of cultural organizations; sport hall of champions a newcomer to the group.

June 10, 1960, San Diego Union, A-19. Board of Education seeks land in park near freeway.

1. Transfer of city-owned Balboa Stadium to school system.
2. Transfer of remaining land, including land occupied by San Diego High to San Diego Junior College.

Proposals would require two-thirds vote; planned for placement on November ballot.

June 15, 1960, San Diego Union, A-17. State Division of Highways spokesman said landscaping and traffic will be disrupted as little as possible during construction of 4-level stack in Balboa Park.

June 17, 1960, San Diego Union, A-25:4. City Council asked City Manager George Bean yesterday to arrange a meeting with Board of Education to discuss possible transfer of Balboa Stadium for school purposes.

June 22, 1960, San Diego Union, 15:1-8. Old landmarks falling victim to path of freeway; park trees felled for new route; Daley Corporation and R. M. Price Construction Company building the interchange under a \$3,493,413 contract (illus.).

June 24, 1960, San Diego Union, B-1. Change told in City Park Department.

Reorganization of the Park and Recreation Department was outlined yesterday to the City Council by City Manager George Bean and Tom Fletcher, an assistant to Bean.

Fletcher told the council that the changes were made "along functional lines to provide a more modern and efficient organization."

The recently created post of assistant park and recreation director and a proposed new job of landscape architect are placed in the administration division under the park and recreation director.

The park division has been divided into five sections: nursery and landscaping; street trees; west, east and Balboa Park maintenance districts. The Balboa Park maintenance district is a new one, removed from the east district because of the city's growth.

Two former park activities have been moved to the Department of Public Works for more efficient operation and to remove duplications. They are the shop, moved to the DPW equipment division, and the beach cleaning-erosion control, moved to the DPW division.

Park custodial activities have been moved to a new community service section, which also will provide maintenance services, Balboa Stadium operation, and related services.

A new Kearny Mesa district has been added to the recreation division of the department, bring to eight the number of districts in the city.

The Park and Recreation Department's proposed 1960-1961 budget is \$3,236,295, up from the present year's \$3,073,961.

June 28, 1960, San Diego Union, A-15:3. Conference on aging in Conference Room, Balboa Park; more than 100 opened two days of discussion yesterday.

July 1, 1960, San Diego Union, A-21:1-3. Starlight Opera opening linked to culture festival, by Natalie Best.

July 1, 1960, San Diego Union, A-21:3-4. "Kismet" charged with excitement, by Constance Herreshoff.

July 3, 1960, San Diego Union, E-1:3-5, E-3:4-8. "Julius Caesar" opens Tuesday at Old Globe.

July 4, 1960, San Diego Union, B-2:7. R. H. Flournoy writes Balboa Park is not idea for freeway.

July 5, 1960, San Diego Union, A-23:1-2. Shakespeare fete opening tonight.

July 6, 1960, San Diego Union, A-13:1-2, A-15:1. Bard's tradition reigns in park, by Eileen Jackson.

July 6, 1960, San Diego Union, A-17:5. Leo Calland will leave park post; recreation director to manage new Hall of Champions.

July 6, 1960, San Diego Union, A-18:6-8. Impressive "Julius Caesar" opens Shakespeare festival, by Constance Herreshoff.

July 7, 1960, San Diego Union, A-22:1-2. New park director expected by September 1.

July 8, 1960, San Diego Union, A-1:1-2, A-2:2-4. Twenty-one million program for Balboa Park offered to City Council.

July 8, 1960, San Diego Union, A-1:1-2. Bartholomew study proposes build, move roads.

July 8, 1960, San Diego Union, 1:1-4. Mayor Dail says proposal to convert the Ford Building into an auditorium is not feasible because, according to the Harland Bartholomew report, it is "too small, at wrong location, too expensive, and inadequate."

July 8, 1960, San Diego Union, A-2:2. Mayor Dail yesterday praised Bartholomew firms' report.

July 8, 1960, San Diego Union, A-2:1-2. Highlights listed in Balboa Park plan.

July 8, 1960, San Diego Union, A-17:1-3. Freeways to change park; lines superimposed on aerial photo of Balboa Park show how face of southwestern corner will be altered by four-level interchange of Crosstown freeway and Cabrillo freeway.

July 10, 1960, San Diego Union, A-22:4-6. City receives Leo Calland's retirement letter.

July 13, 1960, San Diego Union, A-8:3-5. "As You Like It," directed by Allen Fletcher, classed as beautiful production at Old Globe; second play in 11th annual National Shakespeare Festival.

July 14, 1960, San Diego Union, B-2:7-8. Mrs. William Paxton Cary writes all San Diegans want a beautiful theater at Marston Point in Balboa Park.

July 15, 1960, San Diego Union, A-25:4. Ruling delayed on 6th Avenue zoning change; office building sought at northeast corner 6th Avenue and Palm Street.

July 16, 1960, San Diego Union, A-17:2-4. Work on freeway to block three streets to Balboa Park (map).

July 16, 1960, San Diego Union, B-2:7-8. D. F. Franke writes people need voice on Balboa Park; area just west of Pershing Drive would be an excellent site for a convention building and center; does not like liquor in the park.

July 17, 1960, San Diego Union, A-28:1.5. Highway to Miss (Kate) Sessions tree, a tipuana at the northwest corner of Pico Street and Balboa Avenue, Pacific Beach (illus.).

July 20, 1960, San Diego Union, A-17:1-4, A-18:1-2. Showcase concert presented at Balboa Park Bowl, by Charles Davis.

July 21, 1960, San Diego Union, A-8:1-2. Lifelike sounds filled Balboa park Bowl Tuesday night; Earl Bernard Murray and the San Diego Symphony opened their 1960 summer season with an all-Tchaikovsky program, by Alan M. Kriegsman.

July 21, 1960, San Diego Union, A-21:4-7, A-22:7-8. San Diego Zoo - moving sidewalk, rain forest opened, by Alfred JaCoby (illus.).

July 21, 1960, San Diego Union, A-21:6-7. Embarrassing moment: sidewalk came to a sudden shuddering stop on first run.

July 21, 1960, San Diego Union, A-29:3. The House of Pacific Relations will celebrate its 25th anniversary Sunday with a grand march symbolizing past, present and future on the lawn near the international cottages in Balboa Park.

July 22, 1960, San Diego Union, A-9:1-2. Audience acclaims "Paint Your Wagon" opening in Balboa Park Bowl last night, by Constance Herreshoff.

July 22, 1960, San Diego Union, A-13:1-5. "Hall of Champions" unveiled yesterday; praised.

The attractively remodeled section of the House of Charm building embraces a display room containing 10 large glass trophy cases for various sports and a handsome wood-paneled Hall of Champions room in which oil-painted portraits of honored athletes are hung. It is equipped with motion picture equipment for projection of events in which the San Diego champions participated.

Newly appointed curator Leo Calland and members of the Breitbard Foundation hosted the one-day preview. The hall, officially to open to the public in October, is the latest project of the Breitbard Athletic Foundation, with backing of city and county officials.

July 23, 1960, San Diego Union, A-7:1-2. Symphony slated "Music in Paris" Tuesday under the direction of Earl Bernard Murray, by Constance Herreshoff.

July 24, 1960, San Diego Union, A-24:6-8. "Circus Day" August 5-6 in Puppet Theater (illus.).

July 24, 1960, San Diego Union, C-2:8. Roberta Boyer writes freeway in park unfair to children.

July 24, 1960, San Diego Union, E-1:3-5, E-3:4. "Hamlet" is rare revival for Old Globe; William Ball becomes actor again to repeat 1955 success with Fletcher, by Regina O'Connell (illus.).

July 24, 1960, San Diego Union, E-1:4-8, E-3:7. Symphony salutes a musical city; works of Paris composers are featured in Tuesday concert, by Alan M. Kriegsman.

July 25, 1960, San Diego Union, A-14:1. Twenty-fifth year of House of Pacific Relations feted; 40 nations join in flag ceremony in Balboa Park.

The 25th anniversary of the House of Pacific Relations in Balboa Park was marked yesterday by a colorful international pageant and march and presentation of flags by representatives of 40 nations.

Costumed representatives of Denmark, China, the Philippines, Poland Mexico and many other nations parades, dance, sang and entertained for a crowd of 1200.

July 25, 1960, San Diego Union, B-1:7-8. Gift to San Diego: Japan Tea House Dedication Set.

The Japanese miniature ceremonial tea house given to the people of San Diego by the City of Yokohama, Japan, will be formally dedicated at 2 p.m. Sunday.

The tea house is at the House of Pacific Relations in Balboa Park

The small tea house, built in Yokohama, was disassembled for the trip from Japan. The city Public Works Department is reassembling it at a site overlooking the pool in the center of the House of Pacific Relations area.

July 27, 1960, San Diego Union, A-5:1-2. Orchestra lacked in "togetherness" last night in Balboa Park Bowl, by Alan M. Kriegsman.

July 29, 1960, San Diego Union, A-20:1-2. Symphony slates "Carmina Burana" and "Belshazzar's Feast"; Robert Wagner will direct.

July 29, 1960, San Diego Union, A-20:1. "Hamlet" run starts tonight.

July 31, 1960, San Diego Union, A-19:5-8. "Hamlet" scores triumphant success, by Constance Herreshoff.

July 31, 1960, San Diego Union, C-2:7-8. Violet Jessop Holloway thinks opera house is just what Marston Point, Balboa Park, needs.

July 31, 1960, San Diego Union, C-7:1-8. Seville, a starting point for study of San Diego history, by Richard Pourade.

August 1, 1960, San Diego Union, B-1:1-3. Japanese Teahouse, Garden dedicated in ceremonies (illus.).

San Diego yesterday accepted two symbols of Japanese-American friendship --- a teahouse in Balboa Park and a miniature garden at Naval Hospital donated by Tamme Kashiwabara, a former U. S. Navy sailor.

August 2, 1960, San Diego Union, A-14:6-7. At the third San Diego Symphony concert in Balboa Park last night, guest conductor Roger Wagner mustered some awesome and powerful sounds from the symphony itself and the San Diego State Summer Workshop Chorus, by Alan M. Kriegsman.

Wagner was always thoroughly in control and his athletic style seemed well suited to the vigor of the compositions --- Carl Orff's "Carmina Burana" and William Walton's "Belshazzar's Feast."

August 2, 1960, San Diego Union, A-14:8. Park building leased to United Nations Group.

The City Council approved a lease agreement with the United Nations Association of San Diego yesterday without comment.

Councilman Justin Evenson last week moved to postpone approval until City Manager George Bean had determined the propriety of having the organization in Balboa Park.

Bean, in a report to the council said the Bartholomew report on a Balboa Park master plan approved a park lease as within proper park uses.

He said the organization leased quarters in the House of Hospitality in July 1953 without question. It wanted to move to the former office of the Fiesta del Pacifico at Village Place and Zoo Drive but was turned down.

Instead, the association agreed to move to the Photographic Arts Building adjacent to the House of Pacific Relations, where its presence would be in keeping with the charter of the cottages.

Evenson did not comment on the report. The vote to approve the lease was unanimous.

August 4, 1960, San Diego Union, B-6:1-2. "Vagabond King" revival by Starlight at Balboa Park Bowl tonight.

August 5, 1960, San Diego Union, A-9:4. Youth group rehearsing "Gypsy Baron" for Balboa Park Bowl, August 18 and 19.

August 5, 1960, San Diego Union, A-9:3. "Vagabond King" production applauded, by Constance Herreshoff.

August 7, 1960, San Diego Union, A-33:1-2. Delbert Hughes, San Diego grower, won best dahlia award yesterday at flower show in Conference Building.

August 7, 1960, San Diego Union, C-2:7. James T. Hill likes Ford Building.

August 7, 1960, San Diego Union, E-1:3-5, E-3:1-3. "Music for Dance" program Tuesday at Balboa Park Bowl, by Alan M. Kriegsman.

August 8, 1960, San Diego Union, A-17:1-2. Symphony dance finally arrives, by Natalie Best.

August 10, 1960, San Diego Union, A-8:1-2. "Vagabond King" entering second week.

August 11, 1960, San Diego Union, A-39:1-2. Spanish dancers hailed at San Diego Symphony concert in Balboa Park Bowl, by Constance Herreshoff.

August 14, 1960, San Diego Union, A-19:6. United Nations House opens today at park.

August 14, 1960, San Diego Union, E-2:3-7. Archaeologists view American art; Museum of Man exhibit spans 3,000 years of cultural progress, by Dr. Armin Kietzmann (illus.).

August 15, 1960, San Diego Union, A-11:6-7. New United Nations House opened at park.

August 17, 1960, San Diego Union, A-6:3. "Golden Fleecing," a new Broadway comedy, season's first for Old Globe; will open its 24th season September 27.

August 18, 1960, San Diego Union, A-21:3-4. Casting call issued for "Golden Fleecing" at Old Globe.

August 18, 1960, San Diego Union, A-33:3-4. Beethoven brought out season's best at Balboa Park Bowl Tuesday night, by Alan M. Kriegsman.

August 19, 1960, San Diego Union, A-13:3. Two hundred teenagers offer "The Gypsy Baron" at Balboa Park Bowl.

August 19, 1960, San Diego Union, A-18:2-3. "The Gypsy Baron" to open tonight in Balboa Park Bowl; second biennial summer youth operetta sponsored by the city Park and Recreation Department (illus.).

August 19, 1960, San Diego Union, B-2:7-8. Catherine M. Martin writes the organ concerts need more appreciation.

August 23, 1960, San Diego Union, A-15:1-2. Shakespeare Festival starting.

August 25, 1960, San Diego Union, A-14:3. Rodgers and Hammerstein concert Tuesday night in Balboa Park Bowl conducted by Earl Bernard Murray, by Constance Herreshoff.

August 27, 1960, San Diego Union, A-21:1-2. New York Philharmonic, Leonard Bernstein conducting, to present concert at Balboa Park Bowl next Tuesday evening, by Constance Herreshoff.

August 29, 1960, San Diego Union, A-10:1-2. Nominees announced for Atlas awards.

August 30, 1960, San Diego Union, A-13:5-6. Lowland ape, purchased for \$1,200 in Leopoldville, enjoys San Diego Zoo (illus.).

August 31, 1960, San Diego Union, A-13:5-6, A-17:1-2. Leonard Bernstein arrived in San Diego yesterday with 106-man New York Philharmonic..

September, 1960, San Diego Magazine. A Big Bite Out of Balboa Park, by Wally Homitz.

Date unknown, 1960, Saturday Evening Post. May cities find their parks threatened with extinction by urban "improvements."

September 2, 1960, San Diego Union, A-21:1-2. Lester E. Earnest, Mission Bay Park director, yesterday was appointed city park and recreation director by City Manager George Bean.

September 6, 1960, San Diego Union, A-20:1-2. Senator John F. Kennedy (D-Mass.), Democratic presidential nominee, will speak at Organ Pavilion Saturday noon.

September 7, 1960, San Diego Union, A-17:1. "Li'l Abner," final show at Starlight, opens tonight.

September 8, 1960, San Diego Union, A-25:4. Trustees elected Howard L. Chernoff, president of Zoological Society, for a second term last night.

September 9, 1960, San Diego Union, A-12:5-7. "Li'l Abner" opening at Balboa Park Bowl win praise as festive musical, by Constance Herreshoff.

September 10, 1960, San Diego Union, B-3:1-2. "Li'l Abner" cast gives merriment, by Constance Herreshoff.

September 11, 1960, San Diego Union, A-14:3-5. A-24:1-4. "View from Bridge" wins 6 Atlas awards at dinner, by Regina O'Connell.

September 11, 1960, San Diego Union, E-1:1-2. Symphony sets a record, but can orchestra's best be better? by Alan M. Kriegsman.

September 14, 1960, San Diego Union, A-8:3-4. "Golden Fleecing," new Old Globe play; cast named.

September 15, 1960, San Diego Union, A-31:7. San Diego Zoo - "Trib," 14-month old Lowland Gorilla imported about a month ago for the zoo.

September 15, 1960, San Diego Union, A-32:7-8. A plan to build a two-structure Japanese tea garden in Balboa Park was laid before the City Park and Recreation Commission yesterday.

A. Alan Agnew and Harold H. Iwamasa, planners of the tea garden have asked for a 20-year lease and hope to build the garden by next summer.

The chosen location is an area adjacent to the House of Pacific Relations, but Franz Ter Horst, president of that group, has asked that the site be reserved for construction of additional cottages in the Pacific Relations group.

September 16, 1960, San Diego Union, A-21:5-6. Malcolm Rogers, San Diego archaeologist, died of injuries suffered last Sunday in a 3-vehicle accident.

September 17, 1960, San Diego Union, A-9:1-2. Kingston Trio tomorrow at 8 p.m. in Balboa Park Bowl.

September 17, 1960, San Diego Union, A-14:6-7. Mormon Choir to sing in Balboa Park Bowl September 24.

September 19, 1960, San Diego Union, A-10:1-2. "Golden Fleecing" to open September 27.

September 24, 1960, San Diego Union, B-3:1-2. Mormon singers in Balboa Park Bowl tonight.

September 25, 1960, San Diego Union, E-1:3-6. E-3:1-3. Craig Noel, San Diego Community Theater director, stages 100th production.

September 26, 1960, San Diego Union, A-10:5. A large and enthusiastic crowd was on hand at Balboa Bowl Saturday night to welcome the appearance of the Mormon Choir of Southern California.

September 26, 1960, San Diego Union, A-17:4. Quail County Park plans at Encinitas progressing.

September 28, 1960, San Diego Union, A-6:4. "Golden Fleecing" at Old Globe termed hit, by Constance Herreshoff.

September 28, 1960, San Diego Union, A-11:2-4. Science Hall, Planetarium Plans Outlined to Council, by E. G. Martin.

A three-step program for developing a hall of science and a planetarium in Balboa Park, which calls for temporary use of the Food and Beverage Building, was outlined yesterday to the City Council.

Dr. Ernest O'Byrne, president of the San Diego Hall of Science and Industry, said his organization has devised a plan that can easily be put into effect.

"We propose to move into the Food and Beverage Building first," O'Byrne said. "We've been told it would cost between \$25,000 and \$35,000 to improve the building for our purposes.

O'Byrne, who is the vice president of San Diego State, told the council the second step in the plan would be to build a planetarium on a site across Laurel Street from the Natural History Museum, just east of the Electric Building.

The third step would be to mount a fund-raising campaign for construction of a hall of science next to the planetarium, he said.

The organization's plan as to sites for a hall of science and a planetarium are in agreement with the master plan for Balboa Park submitted by the St. Louis planning firm of Harland Bartholomew and Associates.

The Food and Beverage Building, built in 1914, houses several divisions of the city Engineering Department. The Bartholomew report said the structure was in such poor condition its life expectancy is less than five years.

O'Byrne said the hall of science could be opened in temporary quarters within a year, displaying exhibits keyed to San Diego's science interests --- space, nuclear energy and electronics.

The planetarium opening would depend upon receipt of gifts pledged or raised in the future, O'Byrne said. He said a projector costs \$100,000 and up.

O'Byrne's organization is sponsoring a benefit premiere of the motion picture, "I Aim At The Stars," at the Spreckels Theater, October 10, as a kickoff to the fund drive. The film is based on the life of Wernher von Braun, the former German rocket scientist who now works in the Army's missile program.

The idea of a hall of science and planetarium has been brought up a number of times in the past.

O'Byrne said the location across from the Natural History Museum is particularly suitable, getting the hall closer to the other museums in the park.

September 29, 1960, San Diego Union, A-33:5-7. Plans approved for Fine Arts Gallery wing (architect's sketch showing how proposed new wing will look when completed).

The city Planning Commission yesterday approved the preliminary design of the Timken-Putnam wing to the Fine Arts Gallery in Balboa Park.

Harry Haelsig, city planning director, told the commission the proposed structure conforms to the architectural recommendations of the master plan for the park.

With city approval obtained construction of the building can begin as soon as directors of the Timken Foundation give their approval.

Frank L. Hope, architect, said the building will be completed in two years.

The million-dollar, white marble structure will be on the site of the old American Legion building, just east of the gallery.

It will house the old masters donated by the Putnam Foundation and other paintings.

Another wing to the gallery is planned on the site of the old Medical Arts Building, west of the gallery. William T. Stephens, Fine Arts Society president, has said this wing is expected to be ready for bidding by the fall of 1961, assuming progress of a money-raising campaign is maintained.

October, 1960, San Diego Magazine. Out of the City - In and About Central Park, by James Britton

October 2, 1960, San Diego Union, B-1:1-6. San Diego Zoo - Zoo is for the children, by Alfred JaCoby.

Forty-four years ago a group of dedicated animal-lovers, headed by a man who was determined to give San Diego a Zoo second to none, organized a Zoological Society. What they developed is now the city's greatest attraction. Here is a brief story of the Zoo --- past, present and future.

Think back a moment and try to recall the first time you ever heard of the San Diego Zoo.

Difficult? Impossible. It's like trying to remember when you first heard of baseball. Or Southern California's weather. Or going to the beach.

Baseball and the beach and the weather have always been with us. And sometimes it seems as if the Zoo has always been with us, too.

It hasn't, of course. Only 44 years ago what is now the San Diego Zoological Gardens was only a clump of gullies and mesas and sagebrush --- and a motley (which is a kind word) collection of animals left over from the 1916 Exposition in Balboa Park.

That's when Dr. Harry M. Wegeforth stepped in. Because of him, San Diego has a Zoo. And because Dr. Wegeforth, who died in 1941, was formally elected the first president of the Zoological Society on October 2, 1916, tomorrow will once again be celebrated as Founder's Day.

On Founder's Day, everyone gets into the Zoo free. The gates are open. Adults and children alike pass through the turnstiles without charge.

Every other day it costs 75 cents for adults to go to the Zoo.

Children under 16 are free.

That was the way Dr. Wegeforth wanted it. His credo, his concept, his firmest belief was this: The Zoo is for the children.

Founder's Day was begun 10 years ago. The trustees, currently headed by Howard Chernoff, a retired executive, and Dr. Charles Schroeder, the managing director, said then in a letter to Mrs. Wegeforth that "if credit for any institution in San Diego could be given to any single individual, that relationship existed in the case of Dr. Harry M. Wegeforth and the San Diego Zoo." The trustees knew "Dr. Harry" and his beliefs and they knew the finest way to honor him would be to hold an annual free day in his memory.

Dr. Harry liked animals --- and he liked other people to like animals, too.

For a new generation, Founder's Day is a convenient point for recalling, for summing-up, and for predicting the future of our Zoo.

The pure statistics, in summing up, are staggering. Consider just a few: 197,079 pounds of fish were fed to animals last year, for example, and 670.428 persons took bus tours. There are 1,042 species of mammals, birds and reptiles on exhibition --- and there were 1,952,879 men, women and children who took a look during the 1959-1960 fiscal year.

More statistics --- 300 persons work at the Zoo, earning last year \$1,049,707 and 33 cents. Not only that, among their duties was the feeding to animals of 378 pounds of earthworms and 104,000 meal worms as well as 2,890 mice in the bird department, and 9,800 mice and rats in the reptile department.

And still more: A recent patron survey showed that 76 percent of the Zoo's visitors come from out of the county. California contributed 56 percent of these visitors and the rest of the nation 20 percent.

These latter figures, it may be assumed, are one of the reasons so-called non-sentimental dollar-watching businessmen like the Zoo visitors spend money, and as the Convention and Tourist Bureau put it in a recent resolution of appreciation "the economy of San Diego is in a major degree dependent upon the income derived from visitors to our city" and the Zoo "year after year proves itself an extraordinary tourist attraction.

Summing up some more, the sub-tropical beauty of the Zoo's landscaping is, perhaps, every bit as amazing as the animals on display. As any home gardener knows, this horticultural beauty doesn't come naturally in San Diego. In fact, it's been suggested that a bare patch of land should be set aside and labeled "The Way It Was." A little plaque could point out that this is, indeed, the way those 100 acres which make up the Zoo looked in 1916.

The plaque might also mention that the Zoo's plantings are valued at about \$900,000 --- which is actually more than the animals on display are worth. It takes \$50,000 worth of water a year to keep the Zoo green.

All this --- the animals, the buildings, the landscaping, even the slices of bread the bus drivers toss to the stubborn bears --- belongs to the people of San Diego. Legally, the Zoo is owned by the city, dedicated to the children of the city, and operated by the San Diego Zoological Society, a non-profit corporation. (You don't have to be a San Diegan, however, to be a member of the Zoological Society; anyone is eligible, and everybody is welcomed.) It will cost about 2.3 million dollars this year to operate the Zoo and most of this money comes from admission fees, society memberships, some gifts, and the various installations on the grounds.

City taxpayers, through a charter-required provision, contribute a tax of two cents for each \$100 of assessed valuation. This year about \$150,000 will come from the tax and this will pay a little more than 5 percent of the operational costs.

Using these facilities and resources, San Diego has produced the world's finest Zoo. One of the troubles of being the finest (and who is to dispute this boast?) is that you've got to ever expand and improve and surmount problems to stay in first place.

Chernoff in his recent annual report listed three current major problems:

FIRST, there's the problem of paying the way, a continuing problem. The Zoo must earn most of its own keep and some officials feel the 75-cent admission charge isn't high enough and an increase could very well be necessary.

SECOND, there's the problem of parking. More is needed, and Chernoff pointed out, "This is something only the city can do for use. On one recent summer Sunday, some 24,000 persons toured the Zoo; that's a lot of people and they came in a lot of automobiles."

THIRD, there's the problem of transportation within the Zoo itself. A committee of experts currently is seeking ways to make it easier to get around and through and over the Zoo.

So much for the past and present. The Zoo of the future, according to the plans of the present, will be an area where "bars and wires vanish and the world's largest wild animal collection appears in natural surroundings with a background of sub-tropical vegetation."

This particular concept was developed in Europe and pioneered in the United States in San Diego. The idea is to make a visit to the Zoo as much as possible like a visit to the jungle veldt and the desert --- except that the wild animals (who never had it so good) won't be disturbing things by hunting down the humans. This is a completely practical situation for both the humans and the animals; the humans have something to look at and enjoy and the animals will get a better diet with comfortable quarters.

What of the immediate future? The new elephant compound probably will be started next year. The big fellows will have some three times the space, fancy cement posts for back scratching, and even a swimming pool. The bars and fences will be gone, replaced by a deep moat. The plans even call for plantings and barricades which will allow spectators to concentrate on the elephants and not on the spectators on the other side.

The giraffes, now near the elephants, will be moved to Deer Mesa, to another of those compounds with neither bars nor fences.

The camels have recently seen their fences replaced with low walls in front. San Diego's sun gets warm at times and the new camel enclosure features a shade canopy over the viewing area.

All the 32 quarters in the Monkey Quadrangle are being remodeled. A cage is necessary with the monkeys but the new mesh is designed to be as unobtrusive as possible with light-colored walls, which are both comfortable to the eye and easy to clean.

The walrus pups are to get a cool pool in Bear Canyon, and the polar bears will have an enlarged pool, complete with diving platform and slide.

Someday in the far future, the big apes, too, will have open enclosures as will the rhinos. Whenever new displays are opened the effort will be to make them long and narrow, thus providing the animals more room in which to move and also keeping them close to the viewer.

One fanciful dream which should appeal to big game hunters who never leave home would provide a safari tout through the open sections of Deer Mesa, which overlooks Cabrillo Freeway. Imagine climbing into an open safari car and cruising through the jungle plain where wild animals roam at will.

All these plans and more are being included in a master plan for the future. From it, the Zoo's officers hope will come the Zoo of the future.

And each year, on the first Monday in October, Founder's Day will be celebrated. Each year, too, perhaps someone will recall a letter Dr. Harry wrote to a friend several months before his death. In it he personified the whole concept of the San Diego Zoo:

" . . . It isn't the Zoo that we are interested in, as much as it is the education and pleasure the children receive from the institution."

(In this necessarily brief recollection of the Zoo development, many other San Diegans who worked faithfully to build a Zoo of which to be proud could not be mentioned. No history, however, should forget Belle Benchley, who came to the Zoo as a bookkeeper in 1926, and stayed to become the first woman Zoo director. Mrs. Benchley retired in 1954 and retains the title of director-emeritus.)

October 4, 1960, San Diego Union, A-13:1. 10,816 record for Founder's Day at San Diego Zoo.

October 7, 1960, San Diego Union, A-17:1. Dr. Ernest O'Byrne, vice president of San Diego State, is leading a campaign to get a hall of science and planetarium in Balboa Park. The planetarium would be built across from the Natural History Museum.

October 17, 1960, San Diego Union, A-15:6-8. Maple Canyon Road Design Work Starts; to east Balboa Park flow (map showing route of proposed Maple Canyon road), by E. G. Martin.

Design work has begun on Maple Canyon road --- a \$1,835,000 street construction job that will be one of the city's major projects.

The road, formerly known as the Laurel street bypass, will relieve the congestion on El Prado through Balboa Park caused by east-west traffic, E. W. Blom, assistant city manager said.

The project also will eliminate through traffic on Laurel Street hill, the steep hill between State and Union Streets which has the distinction of having stop signs at both the bottom and the top.

The city has budgeted \$42,000 for surveying and design work on Maple Canyon road in the current fiscal year. A total of \$175,000 also has been set aside this year for acquiring right-of-way.

The five year capital outlay program sets out the following fund schedule for the project:

1961-62 - \$300,000 for right-of-way acquisition.

1962-63 - \$430,000 for right-of-way acquisition

1963-64 - \$888,000 for construction

Martin Bouman, city traffic and transportation engineer, said the route has been decided upon except for a small segment near Robinson Street.

The route will begin at Columbia and Laurel Streets and run up Maple Street Canyon beneath the First Avenue bridge to Third Avenue. From there it will follow the present route of Third Avenue to Upas Street turning east on Upas to Balboa Park.

The state Division of Highways has agreed to construct a bridge over Cabrillo freeway to carry the road on its route through the park's northern section, Bouman said. The road crosses Richmond Street and finally connects with Robinson Street.

Bouman said the city hopes to have the road look as much like Cabrillo Freeway as possible --- with planting and controlled access.

When Maple Canyon Road is completed, one of the main recommendations of the master plan for Balboa Park prepared by the St. Louis planning firm of Harland Bartholomew Associates will be fulfilled.

The master plan also recommended building new roads north and south of El Prado in order to eliminate traffic on the latter street completely. One of the recommended roads would run behind buildings north of El Prado. The other would curve beneath Cabrillo Bridge and carry traffic south of El Prado through the Palisades area.

October 24, 1960, San Diego Union, B-2:8. Eleanor B. Edmiston writes letter bemoaning ravages in beautiful Balboa Park.

Editor: Along with many of my fellow citizens in San Diego I view with sorrow and regret the ravages made in the name of progress on our beautiful Balboa Park. I understand there is to be another section cut off the park on the north side to make way for another freeway and that in time El Prado Laurel Street is to be closed to all traffic, even to those who for the sheer enjoyment and spiritual uplift they obtain choose to drive through the park on their way to business or pleasure.

In the name of progress our world-famous buildings are to be torn down and more modern appearing ones erected in their places.

Surely our prosperous and expanding city can afford to tear down and re-erect one building every two or three years without placing too great a strain on the city's budget.

The interior of the buildings could be designed to house large club rooms which various organizations in the city could rent.

Additional cafes, milk bars and tea rooms could be installed in these buildings. Rentals from such concessions would help to defray the cost of restoration.

November 1, 1960, San Diego Union, A-18:5-7. San Diego Zoo - first Kongoni antelope arrives at Zoo (illus.).

November 4, 1960, San Diego Union, A-21:3. Parley urged on park architecture; Council to decide if Spanish theme is to be retained; Councilman Tharp says Spanish architecture should be dominant theme.

Councilman Ross Tharp yesterday proposed a City Council conference to discuss thoroughly the architecture of buildings in Balboa Park, particularly the desirability of retaining Spanish architecture.

"I think it's up to the council to set the basic theme of the park and before any major changes are made we should decided on retention of the Spanish architecture," Tharp said.

He said he has received a number of letters from citizens who protested any plan to deviate from Spanish architecture in carrying out recommendations of the park's master plan.

Harland Bartholomew and Associates, St. Louis planning firm, submitted a proposed master plan for Balboa Park last July. The city Planning Commission so far has not set a date for a public hearing on the plan.

The proposed master plan recommended use of Spanish architecture in new buildings or remodeling of existing structures in the Prado area of the park.

The report pointed out that one reason for the charm of the Prado area has been the generally uniform architectural treatment of buildings, mostly Spanish Renaissance.

However, it said the requirement of Spanish architecture would not be restrictive since there are many styles of Spanish architecture.

The only new building in the park which has received city approval as to architectural style is the planned Timken-Putnam wing of the Fine Arts Gallery.

The City Park and Recreation Department and the City Planning Commission both have approved the wing, which has been described as "classic Spanish" by Architect Frank Hope.

Great emphasis was laid on the continued use of arcades in the Prado area by the Bartholomew report, which recommended the city require arcades of a uniform character.

The report further recommended arcades be either all white or of a light pastel color, not less than 15 feet in height and built of permanent material, such as concrete, stone or plastered brick.

Councilman Justin Evenson said the biggest problem facing the council is defining Spanish architecture. What is Spanish to one person may not be to another, he said.

November 27, 1960, San Diego Union, A-15:4-8. A-26:4-5. Balboa Park is member of family, by E. G. Martin; first of three articles on the 86-page Bartholomew report (aerial view of the Prado area)

A funny thing usually happens to a newcomer on his way to becoming a full-fledged citizen of the City of San Diego. At some point along the path leading to the day he can be dubbed a real San Diegan, he adopts Balboa Park as an ex-officio member of his family.

The park's role in the relationship is like an eccentric but favorite aunt. She may wear outmoded clothes and talk about bygone days too much, but don't criticize her or try to transform her into a sleek Hollywood starlet type --- or else!

This hyper-protective attitude toward the park's 1,400-acres of canyons, scrub brush, Eucalyptus trees, rococo architecture, grassy lawns and "temporary" buildings which have stood for 25 years or more serves, if nothing else, to tie San Diegans into a cohesive group. Needless to say, it makes anything pertaining to changes in the Old Lady of inordinate interest to every resident.

That is why the recommendations for future development of Balboa Park submitted last July by the St. Louis planning firm of Harland Bartholomew and Associates will be examined closely by citizens and city officials before a tree is touched or a building harmed. You can bet on it.

The Bartholomew report does, in fact, contain some sweeping recommendations aimed at rearranging the park.

For instance, take the Prado area --- that portion of the park along both sides of El Prado from Cabrillo Bridge to Park Boulevard, dipping southward to take in the Spreckels Organ Pavilion.

The report, if its recommendations are followed, would shift buildings and reroute traffic in order to create a permanent museum cultural center.

Traffic, for example, would be routed along the edges of the area.

Cars would be banned (except for emergency vehicles) on El Prado between the California Quadrangle and Park Boulevard.

Some existing buildings would be rebuilt.

Six buildings would be demolished, the list including the Administration Building next to the California tower; the Medical Arts Building and the American Legion Building, both of which are now unused; the Food and Beverage Building and the Electric Building.

Except for the Administration Building, all buildings torn down would be replaced. The Bartholomew report, it should be noted, recommends against demolition of most buildings until new ones are ready to be built.

The Prado area, in the words of Bartholomew, "would be redeveloped as an extraordinary complex of museums."

"Existing temporary buildings would be replaced with permanent construction, yet the basis form, arrangement and charm of the area would be enhanced and continued with new buildings and old interconnected by a pleasant system of reconstructed arcades."

Two new peripheral roads are recommended to replace the closed portion of El Prado as traffic barriers [sic]. Cars coming into the park from the west would cross Cabrillo Bridge and turn north onto a new road at the bridge's eastern end.

The new road would divide into two parts near the rear of the existing Administration Building. One would continue behind buildings on the north side of El Prado to Park Boulevard. The other would loop, via a down ramp, under Cabrillo Bridge, continue south for a way, then turn east to Park Boulevard, running behind the Spreckels Organ Pavilion.

Parking in the Plaza de Panama would be eliminated under this section of the Bartholomew report's recommendations.

What about recommendations concerning existing buildings in the Prado area? The report has the following to say about each of them.

Administration: Should be demolished and site landscaped.

California Quadrangle: This “masterpiece of Spanish Renaissance architecture” should be converted into a theater to function as the nucleus of a “theater center” in conjunction with the Old Globe; St. Francis Chapel continuing to be used for weddings, interdenominational services, and religious pageants. The Museum of Man, present occupant, would be moved to a building erected in place of the Electric Building.

Food and Beverage: Should be replaced by a new building and garden center, the latter possibly operated under auspices of the San Diego Floral Association.

Electric Building: Should be demolished and site landscaped until a new building for the Museum of Man can be erected in its place.

House of Hospitality: Should be reconstructed with a similar, of not identical appearance, in permanent materials.

House of Charm: Should be demolished and its site reserved for a proposed Sports Museum.

Medical Arts Building: Already scheduled for demolition to make way for a new west wing of the Fine Arts Gallery.

American Legion Building: Already scheduled for demolition as a site for the new Timken-Putnam wing of the Fine Arts Gallery.

The report recommends retention of the Old Globe, Fine Arts Gallery, Botanical Building, Natural History Museum, Spreckels Organ Pavilion and Spanish Village with additional landscaping or additions to some or all.

A site just east of the Electric Building, opposite the Natural History Museum, should be reserved for a proposed Museum of Science and Industry and Planetarium. The report recommends building a large fountain and overlook at the eastern end of El Prado.

Finally, the report’s Prado area recommendations has something to say about the architecture of new buildings. It said, in essence, that great care should be given to choosing architectural styles of new buildings so they can harmonize with existing Spanish architecture.

The report said Classic Spanish architecture has a number of variations which should satisfy any desire for variety. Arcades in the Prado should be retained, the report emphasized strongly.

November 27, 1960, San Diego Union, A-26:3. An estimated 2,500 persons an hour visited the Electrical and Home Appliance Show in the Electric Building, Balboa Park, yesterday afternoon.

The show climaxes a two-week campaign on the theme “Make Your Home Happier With New Appliances.”

November 28, 1960, San Diego Union, A-13:7-8. Palisades Changes Envisioned; landscaped pedestrian overlook would replace Ford Building, by E. G. Martin (illus.).

Imagine yourself standing at the ticket booth in Balboa Park’s Palisades area where tickets to the Star-Light Opera are sold. You are looking north toward the cluster of cottages which comprise the House of Pacific Relations.

Assuming that the recommendations of the St. Louis planning firm of Harland Bartholomew & Associates are adopted en toto for this section of San Diego’s favorite Old Lady --- Balboa Park --- your view would be something like this.

In front of you, the present broad asphalt parking lot would be a grass lawn.

The circular Ford Building, on your left, would be gone. In its place would be a large landscaped overlook with possibly a fountain as its centerpiece.

On your right, the Municipal Gymnasium would be gone. The Federal Building next to it would be remodeled and the activities which now take place in the Balboa Park Club would be in it.

The row of buildings on the western side of the present parking lot would be gone --- the Conference Building, the Palisades Building and the Balboa Park Club.

The House of Pacific Relations would still be there. And south of it, there might be a Japanese Tea Garden.

Behind you, the Balboa Bowl would still be in use unless its function is jeopardized by the noise of the new multi-level interchange for the Crosstown Freeway at Cabrillo Freeway.

All of these changes, of course, will occur over a period of years, according to recommendations of the Bartholomew report. The recommended timetable for demolition of the Municipal Gymnasium, for instance, would depend on construction of a similar facility in the Morley Field area of the park.

“The Palisades area,” says the Bartholomew report, “would be served by an outer loop road. Through much of its length this road would follow the crest of the mesa and provide magnificent views across Cabrillo Canyon. This road would go around the outside of, and be below, the “Ford Building” overlook.

As for the present buildings in the Palisades area, the Bartholomew report recommends the following:

House of Pacific Relations: The present cottages of this “unique civic activity” are sufficiently sound that they may be retained in their present use for an interminable time assuming normal maintenance and repair.

Municipal Gym: The expected life of this building is on the order of 10 years. However, all active recreational facilities should be located in the Morley Field section and the present building should be removed as soon as a new municipal gymnasium is constructed.

Ford Building: Unsited in its present dilapidated state for any use except dead storage without major repairs. It would cost more to convert the Ford Building to an auditorium or a Museum of Science and Industry than to build a completely new building. It should be torn down and site developed into a pedestrian overlook. But the southern basement could continue as a storage place for scenery of Star-Light Opera.

Conference Building: Has a life of between five and 10 years but should not be used for public assembly because it is in direct violation of the building code. Should be removed and site landscaped.

Palisades Building: Should be removed not later than 1970, preferably by 1965. No building replacement on site.

Balboa Park Club: This building has a residual life of between five and 10 years beyond which time the maintenance cost will in all likelihood become excessive. Should be demolished and its uses consolidated in renovated Federal Building.

Federal Building: Should be converted to accommodate uses currently in Balboa Park Club.

Balboa Bowl: In its present use, the bowl constitutes an attractive and important cultural asset and an appropriate use for Balboa Park. Needs some remodeling. However, no funds should be spent on improvements until there has been sufficient experience with the freeway system (and interchange) noise to demonstrate that the site is usable. If it becomes necessary to build a new bowl, a site east of Park Boulevard adjacent to a new parking lot at the Zoo would have several advantages.

November 27, 1960, San Diego Union, A-26:3. An estimated 10,000 persons saw latest in appliances in Electric Building yesterday afternoon.

November 28, 1960, San Diego Union, A-13:3. Appliance Show visited by 50,000 yesterday..

November 29, 1960, San Diego Union, B-1:7-8, B-8:1. Planning unit urges Park Boulevard relocation, by E. G. Martin.

One of the more striking proposals in the Balboa Park Master Plan, submitted by Harland Bartholomew and Associates, St. Louis planners, is the firm's suggestion to relocate much of Park Boulevard.

This could be accomplished for about \$280,000, Bartholomew says.

The relocation, the reports says, first of all would create more parking for the San Diego Zoo --- the prime attraction in Balboa Park --- by use of the present paving for parking lots.

If the master plan is adopted, Park Boulevard would be relocated from a point just north of Naval Hospital to a point near the War Memorial Building. The new road would run below the brow of Florida Street Canyon.

Between the relocated Park Boulevard and the Zoo entrance, parking could be provided for 2,760 vehicles, which would meet almost all of the zoo's future estimated parking requirements, according to the report.

Bartholomew proposes a 15-year, three-stage program for carrying out the improvements recommended in the master plan. The first five-year program would cost about \$7.5 million, the second about \$7.75 million and the third about \$6 million.

"Past financing of improvements in Balboa Park has been quite unusual in comparison with other cities," the report notes. "Much of the money that has gone into park development in the past has come through public subscription, a good part through funds raised for the two expositions."

This method can provide for much of the improvement contemplated in the master plan, the report continues. Included would be the two wings to the Fine Arts Gallery, the Planetarium, the Japanese Tea Garden, the Garden Center and the Museums of Man, Science and Sports.

These facilities alone would account for some \$9 million of the \$21.5 million overall cost of master plan improvements. The remaining \$12.5 million would have to be financed by public funds.

Taking the cost of the first five-year program along, Bartholomew says \$4,290,000 would come from private sources and \$3,245,000 from public funds. The \$3,245,000 far exceeds the amount budgeted for park improvements in the city's five-year capital improvement program, \$438,600.

"Without making an exhaustive analysis of the sources of funds to carry out the plan it would appear quite likely, if not probable, that it would be necessary for the citizens of San Diego to pass one or

more relatively substantial bond issues in order to carry out the master plan for Balboa Park," Bartholomew says.

In summarizing the financing of the master plan, Bartholomew concludes that Balboa Park currently costs the taxpayers \$875,000 a year, which includes some capital improvements, maintenance of buildings and grounds, operating costs and contributions to cultural institutions within the park.

"Current attendance at the park is estimated at 5,200,000 persons annually," the report says. "Thus, the current expenditures amount to approximately 16 cents per visitor."

Attendance, however, is expected to increase to about 13 million annually by 1975 which would lower the per capita cost per visitor to 14 cents after spending the \$21.5 million on improvements, Bartholomew notes.

"When the park is completed with museums in permanent buildings better suited to their needs, with more convenient parking facilities for the zoo and a more attractive over-all park development, it is quite likely that the tourist business attracted by the park will be three times the present and will represent an annual expenditure in San Diego of approximately \$150 million a year," the report says.

"The expenditure of even two or three times as much as proposed in the improvement program would not be considered illogical to attract a new industry that would bring an equivalent return to the community."

(Bartholomew's summary of improvement costs based on 1960 prices follows.)

November 30, 1960, San Diego Union, A-17:1-3. Appliance Show ends run tonight.

November 30, 1960, San Diego Union, B-2:8. Chapman Grant does not like Art Museum's proposed "supermarket" architecture.

December, 1960, San Diego Magazine, 60, 126. Heed the Voices and Save the Park, by James Britton.

The best way to educate adults and offspring alike as to good city planning, or environmental design is to spread out samples for them to try on for looks and fit. Such a sample is the hauntingly nostalgic Main Street of Disneyland, in which all the charm of your oldest memories is recreated and all the offensive clutter of real main streets deleted. Another sample of man-made improvements on the natural environment is the string of dream palaces along El Prado in Balboa Park. Mrs. Edmiston is right: they --- or at least their spirit --- should be preserved.

Are your city councilmen equal to the challenge? Are they run-of-the-mill politicians willing to settle for run-of-the-mill solutions to grown problems in most cases? It must be said they have occasionally stirred themselves to sponsor imaginative projections, as in Mission Bay and "University City." But a couple of commendable efforts does not excuse them from lapsing into dull answers for Balboa Park.

Vigorous prodding might change the official picture, but who's going to do it? The danger is death by cultural committee: most of the town's cultural projects are in the many-fingered but anemic hands of committees and boards whose members are often more concerned with being good Organization Men and Organization Women than they are with the vitality of the arts involved.

Such committees readily impress the City Council in the absence of stronger voices for they give a passing semblance of representing the community. An example is the Fine Arts Society's governing board, which is laboring to bring forth a wing for the Fine Arts Gallery. Plans were published in November. They are not at all in the same mood or spirit, the same "style" that prevails now along El Prado. Robert Mosher, one of the architects for the Fine Arts Gallery wing, describes his firm's

approach in this case, as “derivative Spanish Plateresque,” meaning that there will be faint suggestions of the same style as the Gallery itself. That to my way of thinking is the worst kind of mistake, as in the many derivative Federal Style Postoffice around the country.

On the basis of its half-completed plans, the Fine Arts Society has been advertising for contributions to the building fund, promising immortality, no less, to those who give. Basically it is a worthy cause, and I would recommend that gifts be accompanied by requests that plans be revamped to reflect the architectural character of El Prado.

There has been published a wretched rendering of the Timken Gallery, which the City Council intends to allow, yea welcome as replacement for the dilapidated palace just east of the Fine Arts Gallery. It would not do to comment about this architectural effort on such flimsy evidence except to say that a “modern” building, whether made of marble or cheese, will at one stroke destroy the grant continuity of nostalgic Spanish which makes El Prado San Diego’s most talked-about display. Both the Timken wing and the Fine Arts Gallery west wing will be in currently fashionable modes. They might even be acceptable architecture --- anywhere but along El Prado.

While San Diego is in the process of killing off its main architectural distinction, San Francisco is doing exactly the opposite --- bringing the dead back to life. The grandiose Palace of Fine Arts (near the Golden Gate Bridge) was built about the same time as our Prado buildings, also of “temporary” construction and also part of an exposition. The Palace in its days of exposition glory etched such a rich memory in the mind of one San Francisco youngster that, at the height of his moneyed seniority a couple of years ago, he gave a million dollars, no less, to rebuild it in permanent materials. The city itself, realizing that many others felt the same way about the Palace, added another million for the rebuilding.

It remains to be seen how far \$2,000,000 will go at today’s construction prices. The important thing is that San Francisco is making an effort; a spirited individual and the town’s officials have shown dollars-and-cents determination to preserve on of the unique features from out of the colorful local history. Note that what they would be preserving is the *spirit* of the original building, not the flesh. Not a scrap of the original material (mostly chicken wire and plaster) would remain.

The very idea of copying ancient buildings has fallen into disfavor of modern eyes, as architects strained to bring in the exciting new way of building, based on new methods. Yet just suppose that never again was there to be built any copy or replica of historic landmarks. After a sufficiency of time and erosion, the Earth would be completely erased of such perishable treasures as the Taj Mahal and Chartres Cathedral. Looked at thus, there is clearly need for more not less, attention to periodic re-housing of the spirit of the great architectural designs from the past.

The spirit of El Prado is worth that kind of attention, even though the buildings to be copied were mostly copies in the first place. The “practical” designs prepared by the Fine Arts Society and the Timken Foundation should be rejected by the City Council, which should insist on architecture that conforms better with the spirit of El Prado.

This need not be as expensive or as inconvenient as it sound. The truth is that the spirit of El Prado was pretty much a matter of dazzling facades, behind which practical layouts of space for exhibition purposes were arranged.

It would be desirable to rebuild as permanently as money will allow, but there would be no reason against rebuilding those facades in cheap lath and plaster similar to the original materials, especially since we would be dealing frankly with facades --- mock-ups or stage-sets if you will. After all, the original “temporaries” lasted 45 years.

The chief opposition to such a program might be architects whose vanity was slighted and the New York bankers, administrators of the Timken funds, who would probably favor in stereotype terms a

prideful freestanding monument. However, there is plenty of room in the area to lay out all the floor plans now planned for the wings and still preserve existing facades and arcades.

My reasoning here is architectural heresy, I know, and the potent ghost of Frank Lloyd Wright will plague me, but I am proposing that we consider first and foremost the psychological value of the Grand Illusion that is --- or was --- El Prado. This psychological value is not only for tourists. Everyone, whether he knows it or not, needs occasional reminders that there is some background, some heritage, behind his spinning days on earth.

What we have along El Prado, without quite realizing it, is an intensely interesting architectural museum which people come to see. (One is not to be confused by the fact that this museum is outside its own walls, and that within its walls are other museums!) In the nature of the case, the "exhibits" are full-size copies of "old master" buildings (Some good and some no-so) which originated in other places and times. Also part of the architectural exhibit is the very interrelatedness of the buildings, a masterpiece of environmental design. It's a museum that could be made even more impressive by further refining the historical evocations. It could not possibly be improved, but only destroyed by proceeding with the two misconceived "practical" buildings now fixing to muscle into the grand parade of El Prado.

December, 1960, San Diego Magazine, 61. San Diego's "Lincoln Center for the Performing Arts," by James Britton.

Surprise. This scale was made to show the traffic arteries now being built in Balboa Park. Incidentally it is graphic evidence of what a superb center for the performing arts San Diego could have with a little effort. Indeed, the lower left corner in this view looks like just such a center fully flourishing complete with parking.

The circular structure is the mammoth Ford Building, a majestic piece of architectural design usually underestimated because its front view is its weakest feature. It could be splendidly revised into an opera house with grandest foyer and the grandest circular promenade deck in opera history.

Next to the Ford Opera House is the Bowl now used for summer symphony and Starlight musicals on a rather too cozy sharing basis. It might be fitted with sides and a roof if freeway noise becomes a problem. The two enormous rectangular buildings could be revised for rehearsal halls, workshop cares or whatever is needed.

The square roof at the left edge of the model belongs to the Federal Building, a gigantic, solid, concrete affair capable of being adapted into an acoustically engineered symphony hall seating 2500 or 3000 lovers, symphony lovers. It was in fact designed to be a civic theater and was given to the city with the understanding it would be completed as such.

One excuse for not competing the Federal Building has been that there was not enough parking space. But, as the model partly shows, the canyon back of the building is going to be filled in and paved for parking. With this new and ample parking in mind Bartholomew & Associates, hired to survey the park, suggested that the Federal Building be used as a king-size banquet hall, replacing the Balboa Park Club.

It may be doubted that an enormous banquet hall will be needed in the park, what with all the new banquet facilities built or planned by hotels. On the other hand, it cannot be doubted that a home of its own is needed and deserved by the San Diego Symphony, which is bound to grow in answer to the rapidly growing audience for good music. Therefore, I believe the Federal Building should be converted into a symphony hall. A really good architect could transform this hulking box into an architectural wonder; nothing less will be good enough for San Diego.

December 15, 1960, San Diego Union, B-2:6-7. Lucien C. Atherton writes planned destruction of park must stop; objects to Bartholomew plan.

December 16, 1960, San Diego Union, A-25:4. San Diego Zoo completes water conservation pool; located at foot of deer mesa in the lowest canyon of the zoo.

December 17, 1960, San Diego Union, A-15:5-7, A-16:1-3. The City Planning Commission yesterday strongly urged acquisition of 1,765 acres in the Mission Gorge area for development of a major new city park.

December 17, 1960, San Diego Union, B-2. Philip P. Martin writes all citizens should protect city's park.

As a boy in San Diego I had the pleasure of knowing Father Horton for over a year before his death. My father, Patrick Martin, always spoke of him as a man of remarkable foresight and great generosity.

Father Horton gave Balboa Park to the citizens and future citizens of San Diego. Balboa Park has already lost 300 acres to non-park usage. Let us zealously guard the remaining 1,100 acres.

My father served the city as a park commissioner along with George Marston and Miss Kate Sessions in the early development of the park before the first exposition in 1915. They retained

John Morley who was park superintendent for so many years. It was he who aided and advised by Miss Sessions planted the many trees and lovely shrubs. Many of the trees torn out for the freeway interchange were 40 to 50 years old. It was hard to see them go, nearly as bad as seeing old friends pass away.

Citizens of San Diego should protect the remaining palms, eucalypti and cedar deodara from further destruction. They act as a backdrop for the architecture of the buildings.

I knew the artist who was responsible for the castings made for the original buildings. Mr. Pianso, a dedicated man, took them from originals in Seville, Granada and Madrid.

To me, Balboa Park is still a pride and joy. I think it is the desire of nearly everyone to keep El Prado area just as it was during the first exposition. But we know the temporary buildings have long outlasted their usefulness and many are a hazard to life and property. They must be renewed.. Let us keep the replacements as near as possible in outward appearance to the originals. They are a proven entity; they have received worldwide acclaim; in fact they are a part of our old-world heritage transplanted to a new world setting among semi-tropical vegetation..

December 18, 1960, San Diego Union, A-36:1-4. San Diegans are proud and jealous: Balboa Park, the Big Green Heart, by Nick Williams.

Wide-eyed youngsters, drowsy sunbathers and culture-seeking San Diegans stream daily to the heart of the city --- the big, green heart called Balboa Park.

“The people are proud and jealous of the park,” said Les Earnest, city park and recreation director. Sprawling over 1,400 acres at the edge of downtown San Diego, Balboa Park outstrips in size and attractions San Francisco’s 1,000-acre Golden Gate Park [sic!] and New York’s 840-acre Central Park [sic!].

Five million people yearly visit and participate in the abundant activities of the park. The Bartholomew Report, a master plan for Balboa Park created for the city by Harland Bartholomew and Associates of St. Louis, estimates it as a billion-dollar investment for San Diego.

Many things to many people, Balboa Park beckons its visitors to rub shoulders with history in the Prado area, current events in the Palisades, fellow athletes in the Morley Field area and grass and trees in the Golden Hill and Sixth Avenue picnic grounds, the most frequented facilities except the Zoo.

As big as the park seems now, it must have appeared larger to the 2,300 San Diegans in 1868 when the set aside the 1,400 acres, worth \$6,000, for a big city park. For the next 20 years attractions for the tourist and citizen were a dog pound, trash dump and a few cattle grazing where their Asian and African cousins would roam 40 years later.

Led by the Ladies Annex of the Chamber of Commerce, San Diegans began to take an interest in the canyon-riddled field in 1889. The ladies planted a strip of trees along the Sixth Avenue edge of the park and a picnic grove and dirt-fairway golf course were begun in the shadow of Golden Hill.

City Park, in name, died in 1910 when plans were made to have an exposition in the park in 1915 to celebrate the completion of the Panama Canal. Balboa, the city said, would be a proper name, for the park’s view of the ocean was thought similar to the explorer’s when he discovered the Pacific [sic!].

The 1915-1916 Panama-California International Exposition sired Balboa Park’s recreational and cultural wonderland of 1960.

Art works and animals left from the exposition spurred the development of the Fine Arts and Zoological Societies. The Natural History Society and Spreckel's Organ Pavilion settled in the Prado. Balboa Park was on its feet.

The park has washed its face and surrendered 300 acres to freeways since 1936, but has remained a big park with subdued tastes.

"If a large municipal park is what this city wants, and I think it is," Earnest said, "then it cannot be allowed to be chopped into small pieces."

Earnest said he is looking forward to some planned large projects. The Fine Arts Society will expand its present building to the west in a wing containing galleries, an auditorium and a statue garden.

The Hall of Science and Industry will step off with exhibitions in the Food and Beverage Building and has proposed a planetarium on the east side of the Prado. A Japanese tea house will be constructed south of the House of Pacific Relations to replace the one that gave way to the Children's Zoo.

There are big plans for Balboa Park, the big, green heart of the city.

December 18, 1960, San Diego Union, B-7:4-7. San Diego Zoo - ducks converge on zoo; free food; no shooting.

December 18, 1960, San Diego Union, C-2. G. H. H. writes in protest of inroads on Balboa Park.

They are not content with the complete devastation they have wrought at Sixth and Date but now are talking of cutting down through Sixth and Upas Road.

I remember two years ago when some wanted the Sixth and Date corner for an auditorium; it was twice voted down by the citizens. What about the freeway --- why were we residents not give a vote on it?

Now they want to ruin the architecture of the park buildings and demolish the Ford Bowl. With some money spent on it, it could be an idea spot as an auditorium with ample parking and central location.

December 19, 1960, San Diego Union, B-2:7. Adrian L. Wheeler writes about butchery being wrought on park for freeway-road construction.

The powers that be have ruthlessly torn out the Date Street end of the park.

Now they are going to tear through the Upas Street end of the park and put another unneeded freeway there.

The city fathers say it is necessary to sent all this traffic through the park.

Go to the park and see what is being done and going to be done. Can you see how, legally, our park can be given over to the traffic lords?

December 20, 1960, San Diego Union, B-2. Gloria Scot Bauman warns against further destruction of Balboa Park and its buildings.

December 21, 1960, San Diego Union, A-15:8, A-18:1-2. Mayor Dail reveals new study on convention hall; survey set on Ford Building, William L. Pereira of Los Angeles hired to examine cost estimates submitted by Harland Bartholomew and Associates and those submitted by C. J Paderewski, a San Diego architect.

Bartholomew's firm was paid \$35,000 to draw a master plan for Balboa Park which included a study on the Ford Building's rehabilitation. His recommendation was to tear down the building because it would cost too much to remodel it.

Paderewski a year ago submitted on behalf of the San Diego Convention and Tourist Bureau cost estimates in which he said it would take a million to \$1,100,000 to remodel the building as a 3,750-seat auditorium with exhibit space.

"The Ford Building hasn't been dropped as a possible temporary public assembly hall," Dail said. "The Pereira report will be ready in a couple of weeks and the council will discuss it."

Mayor Dail added that Pereira has not been able to conclude that the Paderewski or Bartholomew cost estimates were realistic. Bartholomew estimated it would cost \$2,108,000 to convert the Ford Building into a 5,000-seat auditorium.

Dail's remarks were prompted by an appearance before the council of Ivor De Kirby, a vice president of the Tourist and Convention Bureau. De Kirby said the city should begin a crash program to rehabilitate the Ford Building to give San Diego an adequate meeting hall within the next year.

He said:

1. San Diego lost 10 million dollars of income from conventions which would have come here in 1961 if the Ford Building had been rehabilitated.
2. San Diego is one of three cities in the United States over 250,000 population without an adequate auditorium.
3. San Diego is competing with 35 other California cities for convention business, compared with 16 years ago, due to smaller cities getting into the business.
4. Tourism (and conventions) is San Diego's third largest industry and the only one controllable by local citizens

Dail said the council cannot decide on rehabilitating the Ford Building when it has such widely differing cost estimates, ranging from Paderewski's \$1,100,000 to Bartholomew's \$2,108,000.

Mayor Dail also said that a downtown master plan, now being drawn by the city Planning Department in cooperation with San Diegans, Inc. will recommend a downtown location for a public assembly hall, including exhibit space and meeting rooms.

Dail, in the past, has suggested locating such a hall in the courthouse, state office building area.

Harry Haelsig, city planning director, said the downtown master plan probably will be ready in mid-February. He confirmed that it will recommend a downtown location for a public assembly hall.

In answer to questions later, City Manager George Bean said that Pereira was hired on a flexible fee basis. He estimated the fee will be about \$500.

Bean said that one of the troubles with the Bartholomew and Paderewski figures was their difference in approaches.

"Bartholomew's figures were based on reconstructing the Ford Building so that it would fully meet municipal building code requirements," Bean said. "Paderewski's figures were not."

December 22, 1960, San Diego Union, A-17:6. A-19:1. Joint program for convention hall proposed; state aid to county city eyed, by E. G. Martin.

December 23, 1960, San Diego Union, A-13:6, A-15:2-3. Time factor, auditorium plans linked; State Senator Hugo Fisher proposal; two other cost estimates weighed; Fisher proposed city-county-state participate in brand new facility.

December 25, 1960, San Diego Union, C-2:6-7. Mrs. Charlotte Getz wants to know why City Council wasted taxpayers' money by hiring Bartholomew and Associates to prepare a master plan for Balboa Park.

How in the wide world would Bartholomew and Associates of St. Louis know what the people of San Diego need and want?

Now that two years and \$30,000 have been wasted, we are still waiting for more hearings before we can get under way with any construction work.

Meanwhile, construction costs continue to rise and time marches on!

December 28, 1960, San Diego Union, B-2:6-7. P. W. Murphy writes let the people vote on convention hall; What would be wrong with Mission Bay Park?

1961

Summary of Events in 1961

(Note: Dates of events are only approximate.)

Hall of Champions Opens (January 11, 1961)

Northeast corner of Balboa Park improved (January 18, 1961)

Balboa Park Protective Association formed (January 31, 1961)

Increase in Zoo fees (February 10, 1961)

New recreation center at 6th and Ivy (February 16, 1961)

Plans to expand Balboa Stadium (March 24, 1961)

Seventh Science Fair (April 9, 1961)

Proposition to restore voters rights on road construction in Balboa Park,
defeated (April 18, 1961).

Proposition to transfer 8.5 acres of Balboa Park to
San Diego High School and City College,
passed (April 18, 1961)

San Diego Zoo plans breeding farms (May 7, 1961)

Rotary Club's plans to renovate Alcazar Garden (May 26, 1961)

Old Balboa Park nursery demolished, new ones constructed
(June 16, 1961)

End of midget auto racing in Balboa Stadium (June 18, 1961)

Plans for Timken-Putnam wing postponed (September 8, 1961)

City Council finds Timken-Putnam wing in harmony
with Balboa Park Master Plan (September 15, 1961)

George Bean dismissed as City Manager (September 22, 1961)

City Council approved West Wing of Fine Arts Gallery
(November 10, 1961)

Home Appliance Show (November 24, 1961)

.
January 1, 1961, San Diego Union, C-2:7-8. F. M. Stevens objects to freeways in Balboa Park.

January 1, 1961, San Diego Union, C-2:8. H. K. Raymenton objects to calling Balboa Park Bowl the Ford Bowl.

. . . neither Henry Ford nor the Ford Motor Co. had anything to do with its construction. To give it the official name of the Ford Bowl would be to bestow credit where credit is not due.

January 2, 1961, San Diego Union, A-13:1-2, A-15:1-2. "Hatfield Rains" myth punctured; 1916 pattern normal, by Bryant Evans.

January 3, 1961, San Diego Union, A-14:3. Old Globe opens "Arsenic and Old Lace" run tonight.

January 3, 1961, San Diego Union, A-19:4-5. Two youths threaten leap from Cabrillo Bridge.

January 3, 1961, San Diego Union, A-19:7, A-25:1. State outlines 5-year program; proposes \$5.85 million county park plan, by Arthur Ribbel.

January 3, 1961, San Diego Union, B-2:1-2. EDITORIAL: Let's Look at Park Future.

January 3, 1961, San Diego Union, B-2:8. H. K. Raymenton says misunderstanding shown about park; common misconception that Alonzo Horton gave the park to the city; the park is not 1,400 acres; present plan calls for the closing of El Prado to vehicular traffic; parking space will be increased by the construction of parking areas along the north and south access roadways; no group of park planners is San Diego was as well qualified as the firm engaged; Bartholomew plans recommendations were based on recommendations made by the Balboa Park Citizens Study Committee.

Balboa Park is now a remarkably fine park and it can be made one of the best in the world if the Master Plan is adopted.

January 4, 1961, San Diego Union, A-12:5-7. Old Globe production laces arsenic with deadly delight, by Constance Herreshoff.

January 6, 1961, San Diego Union, B-2:8. Mrs. Roy Martin objects to more freeways in Balboa Park.

January 8, 1961, San Diego Union, A-8:1-4. San Diego Zoo to retire "Old Reliable," a 23-year old bus (illus.).

January 8, 1961, San Diego Union, 15:7-8. Possible propositions on spring ballots: transfer of 5.5 acres of Balboa Park land to School District.

January 9, 1961, San Diego Union, B-2:7. Ben Safer approves of freeways in park.

January 9, 1961, San Diego Union, B-3:3-5, B-5:1. Sid Gillman, general manager and coach of the Los Angeles Chargers, engineers survey Balboa Stadium today, by Jerry Magee.

January 11, 1961, San Diego Union, A-8:3-4. Charlie Cannon, one of the three originators of Starlight productions, has been named executive producer of the stage group.

January 11, 1961, San Diego Union, B-2:7-8. Miriam Smith warns planned destruction of park must stop.

January 11, 1961, San Diego Union, B-3:1. Hall of Champions gives city glittering showpiece in park, by Jack Murphy.

January 11, 1961, San Diego Union, B-3:3-8. Hall of Champions is Dedicated Here, by Chuck Sawyer.

Great moments in sports with San Diegans playing the prominent roles came alive once more in Balboa Park yesterday with the dedication of the San Diego Hall of Champions and its feature attraction, the San Diego Hall of Fame.

The opening was the climax to a project conceived and created by the Breitbard Athletic Foundation to honor San Diego's athletic greats with major assistance from the city and county governments.

On hand at the ceremony were seven of the 11 present members of the Hall of Fame. They included Dr. Harold (Brick) Muller and Irvine (Cotton) Warburton of All-American football fame, badminton champion Dr. Dave Freeman, Maureen (Little Mo) Connolly Brinker from the tennis world, light-heavy-weight boxing king Archie Moore, former major league baseball catcher and coach Earle Brucker and Bill Miller, 1932 Olympic pole vault champion.

Others honored with full-color oil portraits in the Hall are the late Milton (Milky) Phelps from San Diego State's great basketball squads of 1938 through 1941, Boston Red Sox slugger Ted Williams, Olympic broad jump champ Willie Steele and former USC gridiron star Russ Saunders.

Opening ceremonies were conducted in the adjacent Alcazar Gardens with the seven Hall of Fame members present seated on the platform with numerous civic and military leaders of the community.

Mrs. Brinker spoke on behalf of the Hall of Fame members gathered for the occasion and called yesterday's tribute "the greatest thrill for all of us." It was quite a statement coming from the former queen of the tennis world when one considers her spectacular achievements in winning titles at Wimbledon and other tennis capitals. "It is wonderful to travel throughout the world in athletic engagements," she continued, "but the greatest feeling of all is to be honored with this fine tribute in our own home town."

The official opening of the Hall found the various champions taking part en masses in the ribbon cutting. Moments later they were walking through the Hall and reliving with a feeling of nostalgia their great moments in athletic history.

"Ancient Archie" is still very much in the world boxing picture but for the others it was recalling accomplishments of several years ago. Rubbing elbows with these "greats" of yesteryear were many others from San Diego's store of athletes who no doubt will be looking forward to the day when they, too, will make their niche in the Hall of Fame.

Among these were youthful tennis star Karen Hantze, boxer Lee Ramage, former National League home run king Ralph Kiner, golfing great Billy Casper, baseball star Ray Boone, wrestler Jim Londos, Bob Skinner from the World Championship Pittsburgh Pirates and sailing master Lowell North.

To describe the Hall itself would be to draw a picture of the greatest athletic feats of the nation and the world. At the entrance are encased photos of the Breitbard Foundation's "Star of the Year," golfer Mickey Wright among the professionals and Lowell North from the amateurs.

Included throughout the nine sports sections of the Hall are such highly prized items as vaulting poles used by the late Bob Gutowski in his world record leaps and the fame ball from the 1923 Rose Bowl battle in which Leo Calland, now managing director of the Hall, led the USC Trojans to victory over Penn State.

On a revolving stage is the motorcycle with which Brad Andrews won three national racing championships. Other trophy cases hold a football signed by Dr. Bill McColl and his "Monsters of the Midway," teammates from the Chicago bears and uniforms of numerous former baseball and basketball stars.

Depicted in striking action photos are Don Larsen's final pitch in his perfect game during the 1956 World Series. Moore in his dramatic first meeting with Yvon Durelle, Flo Chadwick beginning her swim of the English Channel, Casper en route to victory in the U. S. Open and many others.

But a personal visit to the Hall is the only real way to enjoy its greatest. It is open free to the public Tuesdays through Fridays from 10 a.m. to 5 p.m. and Saturdays from noon to 5 p.m.

January 14, 1961, San Diego Union, B-2:8. P. W. Murphy does not care for new roads in Balboa Park.

Editor: Answering Mr. Raymenton, former park commissioner.

It is unimportant who first gave or set aside Balboa Park, it is the right of the people of San Diego to question the acts of their rulers when they seem to be going against a responsible body of public opinion. Many people are unhappy about what is being done to the park, and if enough of them get together they are not going to let it be done anymore. Perhaps they are trying to keep the park as one place where we can get away from a planned existence, or, at least, find the illusion thereof.

Nothing could be more unperceptive [sic] than the remark that "Balboa Park is only one of San Diego's 34 parks." It is spacious, uniquely beautiful and historic. It has become just about the only cultural center we have, and any plans for modification should be devised with reverence and infinite care.

El Prado is not a "crosstown thoroughfare." It ends at Park Boulevard and mostly serves as access to the attractions within the park itself. Mr. R. says it creates a traffic hazard and cuts the park in two. Instead he would approve two replacement roads. This would give us two traffic hazards instead of one and would cut the park in three instead of two.

All San Diegans should demand to see how this great improvement is to be aligned, especially the proposed road north of the Prado.

Why try to change the historic area when there is a barren stretch along Florida Street which cries out for new ideas and new development? May we never look back on our desecrated park and say "How green was may valley then."

January 15, 1961, San Diego Union, A-19:3, A-20:4. Balboa Park canyon which runs under Cabrillo Bridge will bloom again, by Joe Brooks (illus.).

Along with the freeway construction the state Division of Highways embarked on an elaborate landscaping program. A carpet of grass was planted in the center island along with stately sycamore trees and a palm or two for variety.

The southwest corner of the park will be green and beautiful again, however, when the highway construction (crosstown freeway and Crosstown-Cabrillo interchange) is completed. This assurance comes from R. B. Luckenbach, assistant district engineer for the Highways Division.

January 15, 1961, San Diego Union, C-2:8. B. G. Thompson writes Balboa Park needs palm collection.

January 16, 1961, San Diego Union, B-7:1-2. Chargers ready Stadium proposal for City Council, by Jerry Magee.

January 18, 1961, San Diego Union, B-1:2-3. City Council approves Schneider's proposal to transform northeast corner of park into picnic area; \$50,000 to be spent from capital outlay fund to improve the corner at Upas Street and Pershing Avenue (illus.)

January 18, 1961, San Diego Union, B-2:7. Mrs. John Pain writes park rose bushes in need of care.

January 22, 1961, San Diego Union, C-2:7-8. David Marsh objects to freeways in Balboa Park.

January 25, 1961, San Diego Union, A-13:7-8 Special newspaper report slated on Balboa Park's future.

January 26, 1961, San Diego Union, B-2:7-8. Park and Recreation Commission tells of changes in park.

January 27, 1961, San Diego Union, A-17:4-6. Chamber of Commerce fights expansion of Anza-Borrego state park.

January 29, 1961, San Diego Union, A-19, A-20, A-21. Balboa Park: What of the future?.

San Diego is one of the fortunate cities of the land, a city with a vast park in the central area, "a place to breathe" in the expanding metropolis. After many false starts, San Diegans have come to realize they must plan for the future of their oasis of serenity. In an effort to provide the background upon which intelligent decisions may be made, *The San Diego Union's* Southwest Section, on this and the following pages, presents the story of Balboa Park past and present, in the hope an answer may be found to the question: "Balboa Park: What of the Future?"

By Joe Brown

Like millions of his fellow Americans, Dr. George A. Gwinn loaded his wife and youngsters into the family auto one day last summer in Noblesville, Ind., and headed west on a vacation trip.

The Gwinns had time to spare, and they made the most of it. They gaped at the Grand Canyon, nibbled shrimp on San Francisco's Fisherman's Wharf, soaked up sunshine in New Mexico, and took snapshots of Utah's spectacular Zion National Park.

But when the Gwinn family returned home several weeks later and sat back to reflect on their trip, one place they had visited lingered in memory longer than any other. Dr. Gwinn was so impressed he sat down and wrote a letter about it.

"Of all the things we saw and did in 7,000 miles," he wrote "the day spent in San Diego's Balboa Park was the most enjoyed."

An unusual reaction? Not at all. For ever since the late 19th century, when a group of farsighted legislators set aside 1,400 acres of San Diego pueblo land "for a public park . . . and for no other purpose," those who have come to visit --- more than five million last year --- have been strong in their praise.

And little wonder. Balboa is indeed a distinctive park, one of the finest in the nation.

It has more acreage than most --- nearly twice the size of New York's famed Central Park.

It has plenty to offer in the way of physical facilities.

It has a Zoo, housing the world's largest collection of animals.

It has an extensive botanical collection, wide open lawns and greenery, one of two municipal swimming pools, hiking trails, facilities for shuffleboard, roque and bridge, picnic areas, a variety of museums, two golf courses, and a municipal gymnasium.

It is centrally located and easily accessible.

The park is the hub of the economic, social and recreational life of San Diego. It is an oasis of serenity in the midst of a noisy city on the grow. It is, as one writer put it, "a place to breathe."

But Balboa Park has not always been so.

In 1868, its 1,400 acres were a raw expanse of sagebrush and chaparral. One corner was used for a dump. In other sections, cattle grazed and gravel was extracted. The park's only attractions then

were the wild flowers which grew in canyons and its topography: natural promontories where San Diego's 2,3000 citizens might come to enjoy a sweeping panorama of their city by the sea.

Even after the Legislature dedicated the 1,400 acres "for park purposes alone," Balboa Park remained static for many years. But slowly, San Diegans began transforming the raw land into a place of serenity, "a place to breathe."

Along came Kate Sessions, a determined Coronado woman with a green thumb and vision. She volunteered to landscape some of the park's mesa acreage in exchange for a lease to run a nursery. Soon pine, palm, eucalyptus and Monterey cypress trees were growing in the wilderness.

Along came the year 1915 and the park (it still had no name) was chosen as the site for an international exposition celebrating the completion of the Panama Canal. Millions of dollars were invested: the Cabrillo Bridge, exposition buildings in the present Prado area, access roads. A few animals left over from the exposition became the San Diego Zoo.

Other developments followed: the Organ Pavilion, the Botanical Building, a since-demolished Japanese tea house, the House of Hospitality, the Natural History Museum.

Another exposition in 1936-37 [sic] added the Old Globe Theater, the House of Pacific Relations, Alcazar Gardens, the Café del Rey Moro, Balboa Park Bowl, cactus gardens, more trees, more greenery, more roads.

The postwar period saw the development of Cabrillo Freeway, the Veterans War Memorial Building, the Children's Zoo.

But at the same time Balboa Park was growing up, it was slowly being nibbled away by the pressure of a booming population.

In 1881, 8-1/2 acres were taken for a high school. Another slice went for a children's home, still another for an orphanage. Later the federal government built the Naval Hospital in the park and still more recently, new freeways bit deeply into the landscape. Still other attempts were beaten back.

This year, the park no longer contains 1,400 acres, but less than 1,100 --- nearly a third less than the Legislature set aside nearly a century earlier.

This is Balboa Park, the past. What of Balboa Park, the future?

Today, the task of building "a place to breathe" is far from finished. More than one-third of the remaining acreage is still totally undeveloped in the area east of Park Boulevard and Florida Drive.

One thing has changed about this land, however, and that is its value. In 1868, the entire park was valued at about \$6,000. Today, the valuation of the undeveloped area alone runs into the millions and the total 1,100 acres is estimated to be worth more than \$1 billion.

Undeveloped land --- bare land without buildings, without landscaping, without roadways --- is more susceptible to encroachment than developed land. That is why many San Diegans today are voicing concern over their park and wondering aloud how it will fare as the city continues to grow.

Why not develop this raw land, they suggest, to compensate for acreage lost in the construction of the U. S. Highway 101 at the southwestern corner of the park? Why not turn the sagebrush and chaparral into another "place to breathe?"

Only two weeks ago, for instance, the City Council approved an expenditure of \$50,000 to develop a picnic area with parking and other facilities in the area west of Upas Street and Pershing Avenue

near Morley Field. Earth-movers have been busy for months shifting earth into some of the park's northeastern canyons for future use.

Sometime this spring, San Diegans will have a chance to participate in the future planning of their park. The occasion will be a public hearing on the Master Plan for Balboa Park, as proposed by the St. Louis planning-engineering firm of Harland Bartholomew and Associates. It is the fourth such master plan in Balboa Park's 93-year history, and, no doubt, the most comprehensive.

The master plan itself has been called both good and bad, and it has touched off more controversy, more comment, more interest than perhaps any other civic project in recent years.

But, good or bad, if the Bartholomew report has done nothing more than to stir up new interest among San Diegans in their park, to unite citizens into cohesive action, then it has undoubtedly served a valuable purpose.

January 29, 1961, San Diego Union, A-19:5-6. Tomorrow's park: Is This The Answer?

A comprehensive proposed master plan for development of Balboa Park, which suggests a total expenditure of more than \$21 million in the next 15 years, is now before the City Council awaiting public hearings and further action.

Of the four master plans prepared in the 93-history of the park, that submitted to the council last June by the St. Louis planning firm of Harland Bartholomew and Associates is undoubtedly the most detailed.

The master plan suggests park development in three five-year stages, beginning in 1960 and ending in 1975.

The map at the left (not included in this collection), which is based on the Bartholomew and Associates recommendations, shows some (but not all) of the major proposed changes during the 15-year period, as well as some present facilities.

The following letters and explanatory material refer to the letters on the map at the left:

- A. The new route for U. S. Highway 101 freeway, now under construction.
- B. A transformed Palisades area would include removing of existing temporary buildings, retaining others, and creation of additional parking facilities and an "overlook."
- C. Additional parking spaces throughout the park.
- D. San Diego Zoo would be improved and made more accessible.
- E. Proposed Upas Street-Cypress Avenue connection.
- F. Roosevelt Junior High School
- G. Park Boulevard realigned for better access to Prado area from north and south.
- H. Expansion of picnic areas from 65 to 120 acres throughout park, located primarily in Sixth Avenue area.
- I. Enlargement of Morley Field area, including present swimming pool, a new gymnasium, 26-court tennis center, two baseball and two softball fields, new club building.
- J. New 18-hole golf course.
- K. New golf club house.
- L. Nine-hole golf course near Golden Hill area community center.
- M. Golden Hill area, some minor improvements.
- N. Proposed Switzer Canyon Freeway with parkway type design.
- O. Connection of relocated Park Boulevard and 26th Street.
- P. Naval Hospital.
- Q. San Diego High School, Balboa Stadium.

- R. Prado area, redeveloped as a museum complex, with traffic circulation system rearranged. Laurel Street would become a walkway. Many buildings would be enlarged, some new ones erected.
- S. Plaza de Balboa, eastern terminus of Prado area, a semi-circular arcade and fountain.
- T. Sixth Avenue area, basically the same with emphasis on recreational needs of older persons.
- U. Cabrillo Freeway widened to eight lanes.
- V. New tennis courts.
- W. New gymnasium.
- X. Organ Pavilion.
- Y. Overpass west of Plaza de Balboa to serve bus patrons arriving at the Prado area.
- Z. New 28th Street connection to serve golf course areas.

January 29, 1961, San Diego Union, A-20:1-3. Tourism's Richest Lode

Balboa Park is a valuable cultural asset but it means dollars and cents in the city's economy as well.

In a city where tourism is big business, Balboa Park is without question the greatest single attraction, according to a team of planners who recently made a study of the park for the City Council.

Here is what the firm of Harland Bartholomew and Associates has to say about Balboa Park's economic significance:

"On the assumption that 1,650,000 annual out-of-county visitors to Balboa Park would remain for one day in San Diego and spend the same amount as the average convention delegate (\$30) this would mean a total yearly income of approximately \$50 million.

"In 1959 the Convention and Tourist Bureau estimated the total annual income from all forms of tourism at \$155 million.

"Another example of the expenditures induced by Balboa Park facilities is furnished by a survey of the membership of the San Diego California Club (shuffleboard and roque). The 700 members of this club and their families are estimated to have spent more than \$2 million in San Diego during fiscal year 1958-59.

"A survey of the membership in 1951 disclosed that 93 percent specifically chose San Diego as a permanent home because of the shuffleboard, roque and bridge facilities available in Balboa Park.

"Balboa Park has also influenced the land values around it, particularly those west of the park. The closer the land to the park, the more valuable it is. The current price for Sixth Avenue land with a Balboa Park frontage is \$700 a front foot. By comparison, frontage on Fifth Avenue, one block west is currently selling at an average of \$650 per front foot."

In addition, the report pointed out, it is a practice for progressive industries to assess the prevailing cultural and recreational climate of a community before locating there.

"Industry leaders recognize that top-flight personnel can be induced to live only in communities which offer significant opportunities for cultural enlightenment and recreational outlets. In this respect, the presence of Balboa Park in San Diego has done, and will continue to do much to favorably influence new industry to locate here."

Balboa Park's present value is estimated at \$1,042,600,000. This means each of its remaining 1,075 acres has an average value of \$969,860.

This should be considered, according to the planning firm, when the land is proposed to be diverted to other "more economic" uses.

January 29, 1961, San Diego Union, A-20: 1-2. Top Attraction? Yes, It's The Zoo.

What is Balboa Park's most attractive feature?

If you judge by attendance, San Diego Zoo would win by a wide margin.

The zoo last year attracted more than 1,800,000 visitors. Picnicking runs a not-to-close second with about 475,000 annually. With the exception of golfing, activities in buildings draw the balance of visitors.

Trade shows are a big attraction, too, according to figures compiled by Harland Bartholomew and Associates, the St. Louis firm which recently completed a proposed master plan for park development.

Next in order of popularity, according to attendance figures, are the Natural History Museum, Museum of Man, Merry-Go-Round and swings, Balboa Park Bowl, the municipal gymnasium and annex, miniature railway, golf courses, and the Fine Arts Gallery.

January 29, 1961, San Diego Union, A-20:1-5. Green Beauty from the Barren.

From the air, the 1,100 acres of Balboa Park present a study in ironic contrasts.

To the west of Park Boulevard, which serves as a north-south dividing line, lush greenery, buildings, winding roads, secluded picnic areas, the zoo, parking lots --- all the things a park can be.

But to the east are only deep-cut rolling canyons, covered not with green trees but with dry sagebrush and, in some spots, with tin cans and other debris.

Though the eastern portion of Balboa Park represents about a third of the park's total acreage, it has been passed up in the years of park development largely because money was earmarked for developing what already existed on the mesa-like western portion, and partly because the eastern area's rough topography meant higher costs.

In the city of Burbank, in Los Angeles county, a quite similar situation confronted city planners for years. Burbank nestles at the foothills of the Verdugo Hills, and a road at the base of the hills serves --- like Park Boulevard in Balboa Park --- as a natural dividing line between developed and undeveloped sections of the city.

That was until four years ago.

Today, an 18-hole municipal golf course is snuggled down among the hills which rise north of the city, and the once-barren sagebrush-covered land is among the most valuable in Southern California.

If the Balboa Park canyon area is rugged, the canyons near Burbank seemed impossible to develop. Yet Burbank did just that. First, voters approved a 19-year capitol improvement spending program, part of which included costs for the proposed golf course.

"We ran into plenty of opposition in proposing that golf course," recalls City Manager Harmon Bennett, "because people aid it just couldn't be done."

But, Burbank literally began moving its mountains.

Huge earth-moving machinery was brought into the battle against nature. Hilltops were lopped off to fill in deep canyons. Altogether, more than three million cubic yards of earth were dug and

dumped in the 100-acre golf course site, over a period of about 18 months. Unique among golf-courses because of its range in terrain, the Burbank municipal facility has other benefits as well.

Previously, the sloping canyons presented a flood hazard because they emptied runoff water directly into the hilly sections of the city. Now the turfed golf course provides adequate ground over to prevent erosion, and the facility's lawn-sprinkling system is a fire-prevention measure as well, according to Bennett.

More important, the golf course increase valuation of nearby city property, Bennett explains, and its economic value in attracting visitors " . . . is immeasurable."

The total cost was about \$1,800,000, a figure Bennett considers low in view of the fact that the County of Los Angeles later purchase an already-existing 18-hole golf course for public use in an area described as "far less attractive: for nearly \$4 million.

Burbank has put its hills and canyons to other good uses, too.

In a canyon south of Slough Park, a wooded glen which through the years has become a favorite with campers and picnickers, the city purchased land to use as a sanitary fill disposal area.

The city's refuse is hauled to this canyon, which is shielded from public view by attractive landscaping, and piled layer upon layer and compacted under layers of earth. Soon, the canyon will be filled and the resulting flat area on top is scheduled to become additional parking lots for Slough Park visitors.

Bennett points out that Southern California has grown to the point that no land can be considered worthless anymore --- even rugged terrain that once defied development.

The same could be done, say many San Diegans, with the rugged, natural topography in eastern Balboa Park.

January 29, 1961, San Diego Union, A-20:1-5. More To Come, by E. G. Martin.

One day in May of 1868 the city trustees of San Diego passed this motion on petition of Alonso Horton and Ephraim Morse: "Moved and seconded that lots 1129, 1130, 1131, 1135, 1136, 1137 and the vacant parts of 1141, 1142 and 1142 be for a park."

Thus, 1,400 acres of land were set aside for Balboa Park.

The procedure for establishing parks is not quite as simple in these days of fast-rising subdivisions and fluid city boundaries, but the successors to Jose Estudillo, Marcos Schiller and Joshua Sloane --- the 1868 city trustees --- haven't been blind to the needs for parks.

Five years ago, for instance, the City Council adopted a master plan for parks and recreation drawn by the City Planning Department.

"We've tried to follow that master plan pretty much," said Richard Weiser, assistant city planning director. "It hasn't been completely put into effect, of course, but the general outlines of a park development program are there."

San Diego, Weiser explained, stands in a somewhat unique position among major cities as far as park development is concerned. In acreage, the city compares very favorably with other big cities in the amount of land devoted to parks.

The trouble is that more than two-thirds of the total park acreage is lumped into three parks --- Balboa, Torrey Pines State Park, and Mission Bay Aquatic Park.

These three parks are choice examples of “regional” parks or what the Planning Department refers to as “metropolitan,” “scenic” or “shoreline” parks.

Augmenting these in recent years have been two major achievements of the city --- acquiring San Clemente Canyon in North Clairemont and the current proposal to acquire 1,765 acres in the Mission Gorge area for permanently preserving the rugged beauty of the region.

“San Clemente Canyon land acquisition is all buttoned up,” Weiser said. “All we need to now are such things as providing access roads, sending a tree surgeon in to save some of the magnificent old oaks there, and generally straightening up.”

The acquisition of land for the Mission Gorge area park is up to the City Council. The city owns 375 acres in the area outright and has a half ownership with the Cuyamaca Water Company, controlled by heirs of the late Colonel Ed Fletcher, in 65 acres. The water company owns 75 acres and other private interests 30 acres of the remaining land, except for a chunk of 1,220 acres now part of the Camp Elliott reservation.

It is the chance for acquiring the 1,220 acres of Camp Elliott land which has been the catalyst for quick action, Weiser said. The Navy has declared Camp Elliott as surplus property, the land is now in the hands of the General Services Administration and the city has annexed much of it.

Harry Haelsig, city planning director, has urged the council to put in a bid for the land with the federal government, pointing out that its rugged topography makes it useless for building. Weiser added that the Navy has indicated it would support a bid for the land as a park since it lies within the Miramar Naval Air Station flight pattern and the Navy would rather fly over open land than a sea of rooftops.

What about future regional or metropolitan parks? One outstanding proposal which now can be classed only as a dream would be a triple-threat achievement combining park with flood control with a green belt, according to Weiser.

“It has been suggested,” he said, “that the city develop a super park up the San Dieguito River Valley from the county Fair Grounds at Del Mar to Lake Henshaw and beyond.”

:The city owns some land behind Lake Henshaw and has annexed part of the river valley. This super park would be a green belt buffer, provide a natural flood control plan without fear of damaging developments, and be a natural park.”

January 29, 1961, A-20:6. Visitors? They Love Our Park.

What do out-of-towners think of Balboa Park?

Very highly, according to a cross-section of letters received by the San Diego Convention and Tourist Bureau, the Chamber of Commerce, and the city.

Of the estimated five million persons who now visit Balboa Park each year, more than one third come from beyond the county boundaries --- and 16 percent from out of state.

A lot of them take time to write their impressions when they return home.

There was the letter written by a Midwestern high school principal, for example:

“Schools of your county are fortunate in having such a renowned zoo and park so accessible,” he wrote.

A Los Angeles mother of five stopped in Balboa Park one day last fall, went home to think about it, and began to wonder out loud why her own city --- several times as large as San Diego --- had nothing to compare with Balboa Park:

"I think it's highly unfortunate," she wrote zoo officials, "that we have to travel so far to visit something would should be commonplace all over our land. The main point is not to decry our own lack but to say hats off to you in San Diego."

A woman from Drexel Hill, Pa., wrote similarly: "You have the most interesting and wonderful park in the United States."

A Waterloo, Iowa family found Balboa Park one of the highlights of their vacation trip last year:

"We feel gratified," wrote the husband, "in driving 2,000 miles just for one day in Balboa Park."

From Pearl River, N. Y., came a letter summing up the sentiments of many tourists. "I cannot recall an instance in my life when I have visited a point of culture and have been so completely fascinated."

San Diegans who may doubt the park's great magnetism may see for themselves by visiting one of its parking lots --- notably the zoo's --- any day during the summer. There the assorted colors of out-of-state license plates sparkle like hues of the rainbow. There are cars from Iowa and Minnesota, Georgia and Hawaii --- and foreign countries as well.

As a matter of fact, the pleasure is immeasurable all over Balboa Park, and a lot of people have taken time out to say so.

January 29, 1961, San Diego Union, A-21:2-3. Paris Park Land A Model.

San Diego has about 16 acres of park land for each 1,000 persons, according to Larry Milne, senior planner and head of the city Planning Department's advanced plans section.

This compares with 25 to 30 acres per 1,000 population recommended recently in the report to former President Eisenhower on national goals.

"One of the highest ratios of park land to population exists in Paris," Mile said. "Paris has 85 acres of park land for each 1,000 persons, and this high ratio undoubtedly contributes to the charm of the city."

Closer to home, San Diego's competitor as one of America's fastest growing cities, Phoenix, has just adopted a policy to trying to achieve a ratio of park land to people of 25 acres per 1,000 --- quadrupling its present rate.

In recent years, San Diego has acquired 389 acres in San Clemente Canyon and 25 acres in the Clairemont-Kearny Mesa area for parks and has begun developing Kate Sessions Park in Pacific Beach and parks in North Clairemont, Southcrest, South Clairemont, Cabrillo Heights and Allied Gardens as well as the huge Mission Bay Park.

January 29, 1961, San Diego Union, A-21:2-5. Proposed: A Prado for Pedestrians . . . Balboa Park today looks just like the picture across the top of Page a-19, a view from the air. But it could look much differently in the future, as envisioned in these two sketches (not included) which appear in a park master plan proposed by Harland Bartholomew and Associates. One major proposed change would close off Laurel Street in the Prado area, and limit access to pedestrians only. Auto traffic would be directed to new roads to be built around the Prado perimeter, and visitors arriving by bus would enter at the eastern end. The Prado itself would become a complex of museums.

January 31, 1961, San Diego Union, 14:5. Mrs. Eleanor Edmiston forms Balboa Park Protective Association; objects to architectural style of Timken wing; circulates initiative petition to restrict road building in park.

Leaflet: Aims and Objectives of the Balboa Park Protective Association.

February/March, 1961, California Garden, Vol. 52, No. 1. SAN DIEGO HISTORICAL - Two Famous Japanese Gardens.

The recent alliance of San Diego with Yokohama as sister cities has started a new wave of interest among San Diegans in Japanese culture. A bell house on Shelter Island for the Yokohama friendship bell, a tea house in the House of Pacific Relations garden in Balboa Park, and a Japanese garden on the grounds of the Naval Hospital have all been dedicated within the past year. Still, we have nothing to compare with two Japanese gardens that were major tourist attractions a generation ago.

The first was in Coronado, where the Marsh family of San Francisco built an authentic Japanese tea garden about the turn of the century. Pictures of this garden in the Historical Collection of Union-Title Insurance Company show the use of many well-known elements of Japanese garden design. Curving paths, rock steps, a pond, secluded benches, an authentic tea house (including a "shoe-removing" stone), all helped to create a picturesque setting, and a memorable one since many people remember it with great nostalgia.

The original Marsh garden suffered an ironically Japanese fate: in 1903 it was destroyed by an ocean storm. Later the remnants were moved to a site adjoining the estate of John D. Spreckels, where for many years the garden was open to the public. The late Ira C. Copley purchased the property in 1936. After being sold in 1949, to a group of businessmen, it was subdivided and the garden eliminated.

Even more famous than the Marsh garden was the Japanese tea garden created in Balboa Park for San Diego's 1915 Exposition.

In addition to authentic stone lanterns, a lacquer bridge and a wishing well, the Japanese government sent its own experts to supervise design and construction of the garden and building.

Discussing the Balboa Park garden in his 1916 book, *San Diego Garden Fair*, Eugene Neuhaus offers an insight into the appeal of Japanese gardens in general: "The stone lanterns, the high-arched bridge, the bronze crane are all suggestive of the fact that it is not along their decorative effect but the story they tell which demands their presence. Everything is in the right place and placed in such a way as to give the best effect. It is indeed marvelous to study the apparent irregularity and disorder of a Japanese garden and to discover that its arrangement is order in the best sense. No matter how recent such a garden may be, it has at once the appearance of having been in existence for a long time."

From 1916 to 1942, the Hachisaku Asakawa family leased the garden and tea house from the city and maintained them for the public's enjoyment. The Asakawas introduced many Oriental plants in Balboa Park, including the first Sago palms (*Cycas revoluta*) to be planted there. Over 200 such cycads now exist in the Park --- the most magnificent stands inside the entrance to the Zoo.

Robert L. Horn tells the rest of the story in the final installment of his "History of Balboa Park," beginning on page 19 of this issue. The tea garden is gone, but not forgotten. Countless visitors and San Diegans sipped tea there during a quarter century which included two major expositions. Returning visitors still inquire about the tea garden, and San Diegans are apt to mention it whenever Balboa Park comes under discussion. (G.L.)

February, 1961, San Diego Magazine, 14, 16, 108. Letters.

The gallery debate, part II:

As a long time member of the Fine Arts Society, even when it was called "Friends of Art," and as an artist myself, I wish to enter an emphatic protest against the design of the proposed addition to the Fine Arts Gallery.

I have always held the talents of Mosher and Drew in highest esteem, until they failed to carry out the simplicity and charm of the Irving Gill architecture that surrounded and was part of the La Jolla Art Gallery. The opportunity seldom comes to perpetuate the beauty of a center such as that in La Jolla, and it is sad to see it lost.

To my mind the sensitivity of an architect to the atmosphere of his locale is a prime test of his ability. Usually only a person who is unsure of himself inclines to be a "show-off." Surely this proposed addition cannot be the work of the firm who gave us the charm of the Green Dragon Colony --- where the structures maintained the original feeling --- of many of the lovely homes with restful oriental feeling on our hillsides. Surely the plans must have been mixed and we view a handsome structure created for the new University City or Torrey Pines Mesa, where it would be most appropriate.

I am not an old foggy who lives in the past. I prefer the freedom in the concepts of modern architecture. If the California Tower and the Fine Arts Gallery were to be razed in a few years, I could bear to see the new addition go up. But such is not the case. The tower in Balboa Park is now as much a trademark of San Diego as is her harbor, and I am sure the sensibilities of all who pass through our park would be rudely offended by the incongruity of the geometric pattern of the new addition in contrast with the Spanish curves of the permanent structures beside it, which, after all, do blend so beautifully with the tawny rounded hills beyond them.

If this design has been accepted, which I cannot really believe is true, then we have again sold a part of our birthright from our founding fathers down the river. This compounds the felony of the new freeways in the park. We have no *right* to alter the Spanish concept of El Prado. The Harland Bartholomew report, in which we have wisely invested, states so clearly that there are many types of architecture which would blend with what we already have in the park, especially if it is all tied together with the arcades as they strongly recommend.

The park belongs to the people of San Diego, and not even the Fine Arts Society, which has only their good at heart, can afford to trifle with the Spanish atmosphere that was created there 45 years ago. Whether the old world architecture is the best suited to the park is not the question. It has been here for so long that it is now a part of use, a wonderful heritage from our two fine expositions. Let Mission Bay Park be the setting for enterprising architects with new ideas. There is so little peace and harmony left in the world, let's keep it, as *it was made* in Balboa Park.

Mrs. John G. Clark

Voice of the architect.

I have read with care and interest, Mrs. Edmiston's letter and Mr. Britton's "Art of the City" which appeared in the December issue of SAN DIEGO MAGAZINE.

My sympathy with Mrs. Edmiston's view is great. Certainly all of use in San Diego take warm pleasure in our park and in its great environment. I heartily agree that all plans aimed at altering the park should be eyed with suspicion and that every new addition should be conceived in the grand spirit of the existing buildings and landscaping.

Too, there is much to be said for Mr. Britton's view, if you accept the premise that there are only two choices for the architectural development of the Park.

As I understand Mr. Britton, he offers us, on the one hand, a “practical modern building, whether made of marble or cheese,” or on the other, the repetition of nostalgic copies of past glories from old world cultures.

Mr. Bertram Goodhue, the eminent architect of the great California Building, is quoted as having repeatedly described the other temporary structures along El Prado as being only moderately successful examples of their style and unworthy of saving. I suggest that the answer to the great and pressing question of the architectural environment of the Prado is neither black nor white as Mr. Britton would wish us to believe. Unfortunately, in his article, he has drawn out of context only one sentence of the rather comprehensive description I personally gave the editors in which I outlined the manner of my firm’s development of an architectural grammar we believe suitable and appropriate for the Prado.

This statement, taken along, only serves to mislead the reader.

Had a more comprehensive description of our development of the design for the Fine Arts Gallery been included with Mr. Britton’s remarks, the reader would have been given a more accurate picture of the current situation, and thus would have been in a better position to draw reasonable conclusions.

The real question before the people and the City Council is not whether the future buildings should be “Modern” or Spanish. The point is, will they be appropriate to the existing environment and will they be good architecture?

I also find it amusing that Mr. Britton uses in his argument for re-building the Prado in the Spanish style the example of San Francisco’s Palace of Fine Arts. To compare this masterpiece, designed by the great California architect Bernard Maybeck, to the temporary buildings along El Prado has the effect of elevating them to a position somewhat above that in which they should realistically be placed. The charm of the temporary structures and the pleasure that they give us is undeniable. However, we should recognize the fact that this charm is due primarily to the luxuriant plant material surrounding the buildings, the arcades, and the pleasant play of light and shade on their facades. These qualities should be inherent in any new buildings which are suggested to replace them.

We love and are proud of the Prado but, I think, we should recognize that it has a great future as well as a distinguished past. Toward this end let us work and put a top to simply debating the question from the point of view of style, Spanish or “Modern.”

We hold that our times are worthy and wholly capable of developing a significant and appropriate environment.

To those who esteem the great traditional architecture of Europe, as indeed we do, I would point out that Europe today is leading the world in the building of great contemporary works which are integrated with the best of the past and which offer a bright opportunity for the future.

ROBERT MOSHER.

Mr. Britton replies:

Architect Mosher did indeed talk with the editor, but my own last effort (months ago) to talk architecture with Mr. Mosher met a positive refusal. Also, Fine Arts Gallery Director Warren Beach refused (more months ago) to discuss gallery expansion with me. Still, these columns are always open to those who consider themselves inadequately quoted.

I did not compare San Francisco's Palace to San Diego's Prado as to merit of architectural design (and, being on the East Coast, I did not select the illustrations --- which may have implied quality at points where there wasn't any). I did indicate that both have a comparable place in local history, and that they are equally deserving of preservation. I suggested that (in this particular, very special case) modern planning should be worked out behind facades that retain the effects which have dazzled generations. That is, marriage of "Modern" and Spanish, not a choice between them.

I stated (my opinion) that some of the Prado buildings were "good," some "not-so," and suggested that the Prado "could be made more impressive by further refining the historical evocations." My final sentence, though not necessarily the final sentence, was: "It could not possibly be improved, but only destroyed by proceeding with the misconceived 'practical' buildings now fixing to muscle in on the grand parade of El Prado."

JAMES BRITTON,
Cambridge, Mass.

Ed. Note: Mr. Mosher discussed the philosophy underlying his firm's design for the Fine Arts Gallery wing for an hour with me one day, eloquently and in some detail. This material was summarized and sent Associate-Editor-on-Leave James Britton, who was preparing an article on the subject. Mr. Britton, very properly, edited it for his own use. Because of the great debate which has developed following publication of Mr. Mosher's preliminary drawings for the wing, we feel the architect should have his day in court. Therefore, we have asked him to argue his case in this magazine together with drawings and photographs, when his final models are completed. Says Mosher: "All I ask is that the people of San Diego withhold their judgment until they can see with their own eyes what we propose. We would like them to base their judgment on fact and not on surmise." --- E. F. S.

February 1, 1961, San Diego Union, A-17:5-6, A-23:1. Camp Elliott property sought for new city park in Mission Gorge area.

The Council topped their predecessors of 97 years ago by 315 acres in moving to develop a 1,765-acre park in the Mission Gorge area.

February 1. 1961, San Diego Union, 19:2-3. Shuffleboard facilities at 6th and Ivy

February 3, 1961, San Diego Union, 21:4. City Council votes to refer proposition transferring Balboa Park land to School District to April ballot.

February 6, 1961, Letter, Jackson Woolley, San Diego, to City Council, Civic Center, San Diego, Calif.

Dear Sirs:

In the great confusion of ideas for the future of Balboa Park, one that has been advanced recently in *San Diego Magazine* and elsewhere strikes me as being outstandingly at odds with itself. This proposal is based on two admirable and sound propositions; (1.) That in rebuilding the Prado area the opportunity should be seized to create a great architectural complex worthy of world fame; (2.) That the new park should be as charming as the old. The error and futility of the proposal lies in the insistence that these objectives can be achieved by replacing the old temporary buildings with efficient new ones hidden behind imitations in permanent materials of the plaster-imitation Spanish facades that have graced the park since the 1915 Panama-Pacific Exposition [sic]. I submit that such dishonest, mongrel buildings could not possibly be great or even good architecture, and would probably fail dismally to rival the surface charm of the present buildings. They would, besides, be unworthy of and unsuitable to their functions and the purposes of the park. They would belie the wished-for image of San Diego as a big city and a growing center of culture, science and space-age activity.

The charm the old plaster facades contributed to the park was not dependent on their being authentic Spanish replicas, but on more basic qualities that can be achieved as well or better in truly modern architecture. They called attention to and complemented the beauties of the park foliage and our sunny climate. The stretches of plain walls caught shadows of leaves and branches; the broken surfaces of the ornamented areas contrasted intense sunshine and deep shade. The arched arcades were rhythmic and romantic. The total effect helped the park visitor escape from everyday humdrum.

Truly fine, imaginative modern architecture could provide not only these attributes but also the exhilaration of freshness, color and soaring light strength to match the grace of eucalyptus and giant bamboo. The park visitor could be transported not to the shell of an alien, autocratic bygone age, but to a brave new world of wonder and delight.

The excellence of this new architecture would not be skin deep. Good architectural design permeates all parts and elements of a building. Interior and exterior, function and aesthetics are all part of one problem and the solution must be a unity. Interdependence of interior and facade is apparent to anyone who has ever tried to install or to view an exhibit against the flare of the awkwardly placed windows of the Fine Arts Gallery.

The presence of this and other permanent buildings in the Spanish style need not deter the adoption of an architectural plan free from the restraints and encumbrances of a dead era. The American embassies in London and New Delhi are examples of new architecture compatible with but not imitative of the old. The permanent park buildings are part of the given facts of the architect's problem, along with the topography, the planting, the traffic, the weather, etc. Without imitation and falsification, unity between new and old can be achieved by harmonizing rhythms, proportions, placements, materials, textures, landscaping, fountains, terraces and arcades. The area must be planned as a whole, not piecemeal.

No famous triumph of the architecture of the past or present is a copy of an older model. The Acropolis, the Alhambra, Versailles, Taj Mahal --- such places are unique and they retain their timeless appeal because they are supreme expressions of the particular time and place in which they were built. Today's architecture destined to be honored in the future may include Brasilia, the University of Mexico, Chandrigar in India and Lincoln Center in New York --- all sincere attempts to solve today's problems in today's best terms.

If we really wish our park architecture to be significant and of lasting value, we must not be satisfied with a bit of nostalgia and prettified evocation of the past. Leave that to Disneyland. We must not cling to the nineteenth-century illusion that culture and art are things imported from Europe. We must not think that eighteenth-century Spanish architecture can serve today's needs better than living Americans. We must build with boldness, intelligence, imagination and integrity.

The people of San Diego, though they may not know it, need the soul nourishing bread of fine architecture. Let's not say, "Let 'em eat gingerbread."

Sincerely yours,

(signed) Jackson Woolley.

February 7, 1961, San Diego Union, A-14:6. Two thousand signers on park petition to keep freeways out of Balboa Park repent.

February 10, 1961, San Diego Union, A-10:1-2. Park road foes push campaign; 20,000 signatures claimed on petition as deadline nears.

February 10, 1961, San Diego Union, A-19:7-8. San Diego Zoo - Council approves increase in Zoo fees; adults will pay one dollar; children still free.

Howard Chernoff, president of the Zoological Society, told the council the Zoo needs the extra revenue because it is "facing problems we've never faced before, some beyond our control."

As example, Chernoff cited these.

1. The three young gorillas at the Zoo can be kept safely in their present cage only for another 18 to 24 months and it will cost \$200,000 to build a moated gorilla exhibit.
2. The Zoo must spend more money to acquire African animals which are facing extinction, including more elephants which can breed and bear young.
3. A new elephant enclosure is needed to replace the present "unsanitary and unsafe" structure which is 35 years old.
4. The Zoo needs to expand its children's educational program and its medical research program.

Chernoff said the increase will become effective April 1.

He said the Zoo, in common with other zoos, faces a challenge in the next few years of acquiring African animals which are becoming extinct because of the increasing civilization of the continent.

"The best zoological authorities say there will be no more wild animals in Africa within 10 years," Chernoff said. "We and other zoos must, therefore, build up our stocks --- particularly of elephants and giraffes."

Chernoff said an illustration of the changing picture was in a recent incident in the Congo.

"There are only about 60 okapis in the world, including those in zoos," he said. "Not long ago Congo natives broke into a compound containing 35 okapis and shot or released all of them."

An okapi is often called a cross between a giraffe and a zebra.

Chernoff said there is not danger of the three Zoo gorillas escaping from their cage. However, as the animals grow in size and strength, new quarters must be provided, he said.

"We could save money by building strong cages for them, but this would defeat the objectives of the Zoo --- presenting animals in moated natural exhibits," he said.

"The estimate on a moated gorilla enclosure is \$200,000." He said the Zoo also wants to acquire two or three pairs of breeding elephants, giraffes and other African animals to insure a plentiful supply. The cost of acquiring animals has increased.

Because the Zoo received two cents of the city's \$1.87 tax rate, the council must approve all admission fees. The last increase in fees was in 1956, when the price of adult tickets went from 50 to 75 cents.

Chernoff said attendance did not suffer after the last rate increase and is not expected to decline after April 1. He said a survey recently showed that 74 percent of adults entering the Zoo were from outside the county, so the increase would be borne mostly by outsiders.

The Zoo is regarded as the "best in the world," according to Milton Wegeforth, son of one of the Zoo's founders.

The Zoo last year drew the biggest crowds (2,126,869) of any in the world. Runners-up were the Bronx and London zoos.

Another indicator --- number of animals exhibited --- ranks the San Diego Zoo in first place. The Zoo ranks second to the Bronx zoo in number of species on exhibit. It also has the largest operating budget of any American zoo.

February 26, 1961, San Diego Union, A-13:3-4. San Diego Zoo - Charles Faust, Zoo designer, by Natalie Best (illus.).

The world's happiest zoo animals in the most modern zoo is the aim of a man with a unique job at San Diego Zoo.

Charles Faust in the Zoo designer, the first among the several hundred zoos in the world. For three years the native San Diegan, an artist and construction designer, has worked to create an exterior and interior of San Diego Zoo like none other.

"Faust's ideas are useful and beautiful here, as well as fast becoming famous throughout the world," Dr. Charles Schroeder, managing director of the Zoo, said.

"Faust spends hours observing the animals, then designs a home of comfort, warmth and light along their individual needs, rather than giving them a prison cage of bars."

The Zoo eventually will contain "walls" of high frequency sound waves to keep birds in given area; high-velocity air barriers and moats for animals, as well as novelty facilities, such as diving boards for all animals.

"We hope the zoo will contain the animals with the animals or the people realizing it, " Faust said.

"There must be more thought for animal living than for human living," Faust said.

The 38-year old artist joined the Zoo staff when he worked on the planing of the Children's Zoo. Since then he and Bob Jarboe, buildings and grounds superintendent, have worked together to build the tropical rain forest, world's largest free-flight cage through which visitors walk among tropical birds and plants --- the penguin pavilion, the sea lion pool and terrace, the hippo pools, the polar bear exhibit and the giraffe compound.

The construction technique most successfully used is Gunitite on metal, covered by a new epoxy resin. The epoxy resin provides a glass-hard easy-to-clean and durable surface.

Other exhibits designed and planned include the world's largest elephant compound, a rhinoceros compound, and the refrigerated walrus exhibit, in which three of the eight captive walruses in the world will live in arctic comfort.

February 26, 1961, San Diego Union, A-14:5. More than 40 junior and senior high schools in San Diego and the county are preparing science fairs leading up to the Greater San Diego Science Fair in the Federal Building, April 15-18.

February 26, 1961, San Diego Union, A-14:5. Revenues from the city's golf courses in Balboa Park and at Torrey Pines continue to increase, a financial report by the city Park and Recreation Department for the first half of the 1960-61 fiscal year shows.

February 28, 1961, San Diego Union, A-13:5. City Clerk Phil Acker said last night that initiative petitions seeking to prohibit building of roads in Balboa Park without a vote of the people apparently have qualified for the April 18 municipal ballot.

February 28, 1961, San Diego Union, B-2:7-8. Chapman Grant, Escondido, says the real enemy in Balboa Park are the institutions.

Editor: Some very estimable persons are working to prevent new roads from crossing or meandering about Balboa Park. Their basic reason is worthy. They wish to retain a maximum of the park for the recreation of the majority of the taxpayers. Possibly they lose sight of the fact that they may be charged with obstructing progress.

Transportation is vital to our civilization. Any person charged with obstruction will be swept aside remorselessly.

These worthy people who are fighting roadways lose sight of their real enemy. For instance, the so-called "art" museum plans to preempt several acres of park for the exhibit of some weird daubings which the average taxpayers in his ignorance would consider decidedly screwball. The golf enthusiasts occupy a large area of the park precluding its use by women and children who rightly fear maiming by a dubbed ball. A school is asking for five acres of the park, but no complaint has developed. Twenty or more tennis courts are to be made, occupying several acres. A casting pool is to occupy more land. Why? We should decide whether the park is to be cut up for the pleasure of a minority of taxpayers or retained as a park for the pleasure of all.

March 3, 1961, San Diego Union, B-1:4-6. Councilman Chester Schneider angry over \$662.50 bill for Ford Building study submitted by S. B. Barnes and associates, structural engineers and covered work the firm did for the Los Angeles firm of William Pereira and Associates; City Manager Bean said he had authority under the city charter to authorize the work.

Rehabilitating the building is regarded as a dead issue since the council has shifted its sights to building a brand new convention hall in the central area.

Pereira has voluntarily decided not to bill the city for his part in the unneeded study, according to Les Earnest, city park and recreation director.

March 5, 1961, San Diego Union, E-2:4-8. Review of Dr. Reid Moran's pamphlet, "Trees Around the Museum," which tells about trees in Balboa Park and gives location of each specimen.

March 15, 1961, San Diego Union, A-12:1-2. San Diego Zoo - six Zoo animals to leave today on exchange trip to Lima Zoo (illus.)

March 17, 1961, San Diego Union, A-29:8. Balboa Stadium to have full second deck; City okays 500-seat extension, by E. G. Martin.

March 17, 1961, San Diego Union, B-2:7-8. Sophie Gillespie skeptical above Bartholomew plan; she objects to proposed road encircling the Old Globe Theater; does not want to buy a "package deal."

Editor: Roy Kidd calls a proposed Balboa Park road encircling the Globe Theater, an improvement. For the first time, he says, it will allow more people to become acquainted with this location.

This area consists of the Globe Theater, Elizabethan village green, Shakespeare's grove, a lovely spot with shaded walks and his portrait bust in the middle of it, and a wooded hillside sloping down toward the zoo grounds. The proposed road and parking lots would bring noise, gasoline stench and a traffic hazard into these quiet walkways, in fact destroy them.

March 20, 1961, San Diego Union, A-17:5-8. Old aerobile headed for museum, by George Story.

March 20, 1961, San Diego Union, B-2:7-8. Helen Bloomenshire has doubts about Bartholomew plan; objects to the proposed two-lane scenic road and added parking near the Old Globe Theater; thinks people should read the Bartholomew report instead of accepting "sales talk."

March 23, 1961, San Diego Union. Proposed amendment against road construction called too inclusive (incomplete).

The Chamber of Commerce yesterday officially backed the city's position in the Balboa Park roads controversy when the board of directors adopted a resolution opposing an charter amendment April 18.

March 24, 1961, San Diego Union, A-19:6-8. City Council okays plan to add 500 seats to Balboa Stadium; capacity to be 34,500.

March 26, 1961, San Diego Union, A-13:6-8. Balboa Park road dispute on municipal ballot April 18.

March 29, 1961, San Diego Union, A-17:7-8, A-19:7. Rehearing asked on architectural style of Timken-Putnam wing.

The president of the Balboa Park Protective Association yesterday asked for another public hearing on the architectural style of the Timken-Putnam wing of the Fine Arts Gallery.

Mrs. Eleanor B. Edmiston, of 2828 33rd Street, the president, said in a letter to the City Council that large numbers of petitioners were unaware of the public meeting before the City Planning Commission September 18.

At that time the Planning Commission approved the design of the million-dollar wing and said its architectural style conformed to the recommendations of the park's proposed master plan.

Mrs. Edmiston said in the letter that the drawing of the proposed building "does not conform with the type of architecture in the Prado area.

She said the citizens should be given a vote on the type of architecture selected.

Designed by Frank L. Hope, San Diego architect, the one-story white marble structure features a massive bronze grill. Hope described it as "Classical Spanish" in style.

The wing will be locate don the site of the present American Legion building, immediately east of the Fine Arts Gallery. It will house old masters donated by the Putnam Foundation as well as other paintings.

The council voted to refer Mrs. Edmiston's request to the Planning Commission. Mayor Dail said he thought the commission may decide to hold an informal hearing on the architecture.

Councilman Ross Tharp said he thought Mrs. Edmiston's group, which also sponsored initiative petitions to prohibit building of new roads in Balboa Park without a vote of the people, should be heard.

"You don't have to be an architect to see that building is "not Spanish," Tharp declared. "It's no more Spanish than I am."

In an exchange with City Manager George Bean, Tharp said the building would “stand out like a sore thumb among present buildings on El Prado.”

“Except that it wouldn’t be a sore thumb, it would be a beautiful thumb,” Bean replied.

The city manager said it is wrong to assume that modern architecture cannot be as beautiful as historical architecture. He said the best thinking in local architectural circles approve the design.

April 5, 1961, San Diego Union, B-2:7. Philip P. Martin has his own plan for park roads.

April 6, 1961, Letter Robert E. Des Lauriers President, San Diego Chapter American Institute of Architects, to The Honorable Charles C. Dail, Mayor of San Diego, Members of the City Council, City of San Diego, Civic Center, San Diego, Calif.

Gentlemen:

The San Diego Chapter, American Institute of Architects, directed its Community Planning Committee to review current activities of the City of San Diego in coordinating a Master Plan for Balboa Park. The statement here presented is the resulting evaluation of the Committee and comments of the Chapter in acceptance of matters relative to the current “Bartholomew Report” and the concurrent proposals of the Planning Department for ultimate development of Balboa Park.

The San Diego Chapter, A. I. A., is increasingly anxious to serve the citizens of San Diego; first, the Chapter members wish to make their professional architectural and planning talents available in an advisory capacity, directly to the Planning Commission, the Planning Department and legislative representatives of the City; secondly, the architects desire to become better acquainted with community planning policies and actions so they could better serve the City and individual clients in the development of a total balanced community. Toward this end, the architect will assist public agencies in constructively planning policies which affect the public and the profession.

The Community Planning Commission has resolved, and the AIA Chapter has adopted the following statement relating to the current Master Plan for Balboa Park:

- A) The Chapter first heartily commends the firm of Harland Bartholomew & Associates and the San Diego City Planning Department for the professional competency portrayed in approaching and resolving initial phases of this complex project. It is the intent of a good master plan to indicate and justify proper general land use based upon broad social and economic considerations. In the Bartholomew Report, the AIA finds set found sound and feasible general plan which represents the greatest good for the greatest number.

- B) The Chapter has reviewed and generally found sound, pertinent and realistic the basic design criteria, facts and statistics upon which the Bartholomew Report is based.
- C) The AIA Chapter at this time reserves to itself the right of expression and criticism insofar as architectural design character is concerned; we later desire and intend to participate in future development of specific building design, character and criteria for the development of the Park. For today, the Bartholomew Report is properly the development and justification of a total design concept to show proper master planning of land use; the plan is to show the most flexible siting of recreational and cultural areas; and to show the proper development of pedestrian and vehicular traffic in the park. Architectural design must not be made a stifling consideration at this time.

At a later date, the AIA sincerely hopes to participate with the City in a constructive effort to achieve proper architectural design character in the Park. Currently, there is the dilemma of whether to create design character of new and respected Spanish Renaissance, or whether to find new forms and materials of design which are more expressive of modern technology. Architects are generally against the dishonest, eclectic and misfit adaptation of old styles for false impression; we are equally against the designer who would create a misfit new form of structure that is not compatible to its surroundings. Somewhere between dishonest imitation of the past and stark individuality of an architect's separate monumentality lies the fine new architectural design character for Balboa Park.

The San Diego Chapter, A. I. A., here volunteers its counsel to the City at a subsequent date in seeking jointly to achieve the optimum perfection in architectural design.

The Chapter strongly believes in the necessity of maintaining the abundant landscaping as the integrating central theme, with buildings integrated and supplementary thereto. Building design thus becomes a subordinate consideration in planning of the Park.

- D) The concept of dividing the park into general activity areas is a sound architectural principle favorably viewed by the Chapter. The Prado area will become the cultural and art center. The Zoo area will always be for children of all ages. The Morley Field area will become the recreational center. The Palisades area will become the social and group activity zone of the park. Throughout the park will be interspersed the picnic, preschool play and family recreation areas that are the essence of our Balboa Park. Two-thirds of the 5,000,000 people visiting our park each year are local residents; their initial interest in the Zoo and secondary interest in the picnic activities must be maintained.
- E) The Chapter is strongly in accord concerning the value of developing El Prado as a pedestrian mall with peripheral vehicular traffic carried behind the central buildings of the park cultural complex. Details of exact development naturally bear further study; some of us individually feel that the Plaza de California might be visually more open. The primary concealment of roadways and parkways from general view is very necessary; this can best be accomplished by depression of vehicular areas and proper landscaping development. Adequate and readily accessible parking and pedestrian off-loading areas are an essential design consideration which initially has been well planned in the Bartholomew Report.
- F) Further encroachment of park property by freeways, hospital and personal interests must be stopped, after much short-sighted exploitation has already consumed one-quarter of the park area. A great advantage to be derived from adoption of this Master Plan will then be the establishment of a justifiable and reasoned basis for saying NO to further encroachment.
- G) With the adoption of this proposed master plan, the AIA Chapter sees the designation of a basic land use which will inspire and guide further development of landscaping as the principal theme and essence of Balboa Park. Adoption and implementing of the Bartholomew Report is an urgent necessity for this reason alone.

- H) Through adoption of a basic park plan as a guide, the City can best integrate public transit systems, public and protective services, utilities and park operation and maintenance activities in a functional and economical manner for the benefit of all.
- I) The AIA Chapter have studied with Mr. Lester Earnest of the Park Department and generally concur in the soundness of proposals made by the Bartholomew Report for the integrated step-by-step development of the park. New facilities, such as the Science Museum, Planetarium and Garden Center, will be integrated with removal of such incompatible activities as the City Road Department Offices. The Museum of Man will be moved into more functional accommodations, leaving room for expansion of the Theater Arts Center in the museum's original location. The entire Bartholomew conception is thus based upon proper and realistic planning and orderly transition or development over a twenty-year period with nearly total functional use of existing and proposed facilities at all times during the transition.
- J) The AIA Chapter finds the Bartholomew Plan exceedingly flexible and responsive to our future recreational and cultural needs for the following reasons:
1. The plan for design and development of new and existing facilities will allow for flexible future modification and refinement of buildings and grounds as needs change with passing years.
 2. The Bartholomew Plan is adaptable not only to the daily and seasonal use of San Diegans and tourists, but also has the potential of being adaptable to a possible future major exposition or convention.
 3. The plan leaves major areas of the Palisades, Florida Valley [sic], etc. as land to be later developed to fulfill yet unconceived needs.
- K) The Chapter heartily concurs with the citizenry, the planners and the Bartholomew Report that the California Tower and the Globe Theater shall be preserved. Through the development of proper road systems which will even further open these beautiful and interesting buildings to public view, the tower and theater can be enhanced as significant and accessible features of the Park.
- L) And finally, the Chapter strongly urges that confidence, and a reasonable degree of freedom and authority, be granted the Park Department in refinement and execution of this entire project in accordance with the building spirit and intent of the Bartholomew Report. In stifling contrast, if the vote of the people were required for each intimate selection of species of plant or the siting of each plant in the park, there would be stagnation and mediocrity and no accomplishment worthy of the fine efforts of the Bartholomew Report.

The San Diego Chapter, American Institute of Architects, is generally in accord and affirms its support in behalf of the Bartholomew Report. The AIA Chapter reiterates its sincere willingness to now serve the public in refining and implementing this plan; the Chapter is anxious to make available to the City its objective and professional counsel to expedite succeeding phases in the development of Balboa Park under general guidance of the Bartholomew Report.

Respectfully submitted,

San Diego Chapter
American Institute of Architects

(Signed) Robert E. Des Lauriers
President.

April 6, 1961, San Diego Union. EDITORIAL: Future Use of Valuable City Land at stake in Tuesday's balloting.

Because they have an area of obvious similarity, the three charter changes on Tuesday's ballot might be expected to gain the same reaction from city voters.

Nothing could be farther from the truth. Each proposition does involve the future use of valuable city-owned land.

Right there is where the similarity ends. It is the obvious differences in the issues which should attract the careful attention of voters.

Proposition 1 would change the city charter so that a vote of the people is required to authorize construction and maintenance of streets in Balboa Park.

This is an initiative measure put on the ballot by petitions with signatures of 34, 197 San Diegans. It requires majority approval.

The proposition would add greatly to the expense and difficulty of administering the park. At the same time, it would not guarantee against additional encroachment by state highways.

It would put the citizenry in the day-to-day operation of city government. This is an unwise use of the initiative procedure. Proposition 1 should be defeated. We strongly favor vigorous action to protect Balboa Park, but this measure is not what is needed.

Proposition 2 would permit transfer of 8-1/2 acres of undeveloped park land to the San Diego Unified School District.

This land is sliced off from the rest of Balboa Park by construction of the Crosstown Freeway. It would be used to replace high school athletic fields destroyed by freeway construction.

There is no organized opposition to Proposition 2. The land would revert to the city should the school district ever decide it does not need it.

Proposition 2 requires a two-thirds vote for passage. It should be approved.

Approval of Proposition 3 would mean that the city could dispose of most of its remaining pueblo lands without approval of the voters.

A total of 1,870 acres are involved, mostly near the new campus of the University of California at La Jolla. City officials say the proposition would give them necessary flexibility in using the land for freeways, churches, schools and parks.

Funds from the land sales would be used to finance city capital improvements.

Pueblo land is one of San Diego's most priceless possessions. At one time it was squandered. Then the charter was changed so that voter approval of its disposal was necessary.

In recent years, the voters have acted with great wisdom in doling out pueblo land for key educational, industrial and recreational purposes. General Atomic, the University of California and the proposed Salk laboratories are a few of the beneficiaries.

Proposition 3 would tend to earmark this land for specific uses now. It might prevent its future use for an important new industry or scientific center. Rather than creating flexibility, Proposition 3 would destroy it.

The proposition requires a majority vote. It should be defeated.

April 7, 1961, San Diego Evening Tribune. Park Road Proposal Argued; Public Vote Required In Initiative, by Frank Stone.

April 9, 1961, San Diego Union, A-15:7, A-16:1. Seventh Science Fair opens Saturday in Balboa Park (illus.).

April 11, 1961, San Diego Union, B-2:7-8. Mrs. A. V. Mayrhofer explains position of Balboa Park Protective Association.

We must not lose sight of the fact that many who enjoy Balboa Park are aged, crippled, and families with small children. Also, people who arrive in formal attire for social functions would find it awkward having to walk, especially if we should be blessed with rain.

April 12, 1961, San Diego Union, A-17:6. A-18:1-2. Stadium bids top estimates.

April 14, 1961, San Diego Union, A-17:8, A-18:6. City plans new bids on Charger stadium.

April 14, 1961, San Diego Union, B-2:1-2. EDITORIAL: Proposition 1 --- Straitjacket in the Park.

Proposition 2 on Tuesday's city ballot is a charter amendment which would require a vote of the people to build or change roads in Balboa Park.

It was placed on the ballot as an initiative proposition after the Balboa Park Protective Association filed petitions with 34,197 qualified signatures. A majority vote is required.

Three recent developments prompted the initiative movement. Ironically, one of them could have been prevented by Proposition 1.

Improvement of U. S. Highway 395 through the park resulted in destruction of many trees and landscaped areas. The state Highway Department has promised to replant and rehabilitate the park. But the initial damage was accomplished before many citizens could be reassured.

This could not have been prevented by a change in the city charter. A vote by the citizenry would have no effect on the state's right to condemn property for highway purposes.

The Bartholomew Report for future Balboa Park development has aroused great public interest. Many of its recommendations involved closing off existing park roads and building new ones.

However, if the City Council should adopt the Bartholomew Plan before a charter amendment becomes effective, it is doubtful if a court would rule it changed because of a vote of the people.

Proposed changes in park architecture formed the third reason. The charter amendment would have no effect on architecture.

What Proposition 1 would do is to place a straitjacket on park development. Every parking lot, maintenance road or road through the zoo would require a vote of the people.

This would be expensive --- \$180,000 for a special election. It also would place impossible restrictions on the city's ability to develop the park.

Without question San Diego must be vigilant in protecting Balboa Park, but in our opinion Proposition 1 would not protect the park. It would strangle its development. A strong Park Commission, a responsive City Council and an alert citizenry are better instruments than an inflexible law.

The Park Commission particularly should be strengthened by ordinance to play a bigger role in planning and development. Its membership should include those community leaders interested in Balboa Park.

The initiative process should be applied with great care when it directly affects the everyday operation of government. Once in a great while citizens must act directly when their elected representatives have failed to serve the public good.

This is not the case with Proposition 1. The proposed charter change would hamstring government and slow park development. We urge a "No" vote in Tuesday's election.

April 14, 1961, San Diego Union, B-2:7. Mrs. E. G. King writes that if Proposition 1 is passed the future development of Balboa Park will be in danger.

April 15, 1961, San Diego Union, A-13:1-2, A-20:4. Third District foes differ on Proposition 1; William W. White, a mortician and investment representative, favors the proposition; Harry Scheidle, an appliance store owner, said he will vote against the proposition..

April 15, 1961, San Diego Union, A-13:5-6. John Koethe, a Hoover High School student, and Mary Anderson, of Point Loma High School, win sweepstakes at the Greater San Diego Science Fair; they will represent San Diego later this year at the National Science Fair in Kansas City, Mo.; winners announced last night at the Balboa Park Bowl.

April 15, 1961, San Diego Union, A-20:1-2. Dr. Ralph Dailard, superintendent of San Diego City Schools hailed the Science Fair as spur to talent last night at the opening of the annual event.

April 16, 1961, San Diego Union, A-15:1. Voters face choice on pueblo lands, park plans Tuesday.

April 16, 1961, San Diego Union, A-15:5-6. Ten thousand visitors were thrilled at the achievements on display at the Greater Science Fair yesterday in the Federal Building, Balboa Park, while many of the junior grade scientists went on new explorations.

April 16, 1961, San Diego Union, A-15:7-8. Voters Face Choice on Pueblo Lands, Park Plans.

San Diegans will elect three city councilmen Tuesday and vote on three propositions involving Balboa Park and pueblo lands. The election will bring to a close a campaign that has increased in intensity sharply during the last few days.

April 16, 1961, San Diego Union, C-2:1-3. EDITORIAL: Future Use of Valuable City Land At Stake in Tuesday's Election.

Proposition 1 would change the city charter so that a vote of the people is required to authorize construction and maintenance of streets in Balboa Park. This is an initiative proposition put on the ballot by petitions with signatures of 34,197 San Diegans. It requires majority approval.

It would put the citizenry in the day-to-day operation of city government. This is an unwise use of the initiative process. Proposition 1 should be defeated. We strongly favor action to protect Balboa Park, but this measure is not what is needed.

Proposition 2 would permit transfer of 8-1/2 acres of undeveloped land to the San Diego Unified School District.

This land is sliced off from the rest of Balboa Park by construction of the Crosstown Freeway. It would be used to replace high school athletic fields destroyed by freeway construction.

There is no organized opposition. The land would revert to the city should the school district ever decide it does not need it.

Proposition 2 requires a two-thirds vote for passage. It should be approved.

April 18, 1961, ELECTION - Proposition 1: Restore to voters rights over road construction in Balboa Park

Yes	36,344
No	50,277

Proposition 2: Transfer of 8-1/2 acres to provide needed physical education facilities for more than 7000 students at San Diego High School and City College to San Diego Unified School District.

Yes	60,413
No	24,643

April 19, 1961, San Diego Union, A-1:1-2. A-4:3. Mrs. Cobb, Scheidle, Hitch elected; first councilwoman chosen; Tharp, Kerrigan lose posts, by Henry Love.

The voters rejected Proposition 1 that would have removed from the City Council its present power to permit construction of streets and highways in Balboa Park.

Also defeated in semi-official returns was Proposition 3 that would have given the council authority to dispose of more than 1,800 acres of city pueblo lands.

Proposition 2 permitting transfer of about eight acres of Balboa Park lands to the Board of Education for recreational and athletic activities received the necessary two-thirds majority for passage.

The vote approached 40 percent of the total registration.

April 20, 1961, San Diego Union, A-19:6-7. Election results confirm victory on proposal on park land shift; defeat of others.

April 20, 1961, San Diego Union, B-2. EDITORIAL: Park Vigilance Is Needed.

A major roadblock in the development of Balboa Park was removed Tuesday when voters defeated Proposition 1, the initiative measure which would have required a vote for every road improvement in the park.

By their action the citizens of San Diego reaffirmed the sound principle of permitting the city government to make the day-to-day decisions concerning park operation and administration.

The action is not enough to guarantee the future of Balboa Park.

Sponsors of Proposition 1 expressed a very real concern for the policy decisions which will determine how the park is developed. Proposition 1 served a useful purpose because it dramatized the need for constant vigilance in matters concerning Balboa Park.

We believe such vigilance can best be served by a stronger Park and Recreation Commission.

The present commission is composed of seven dedicated citizens. But their effectiveness is reduced in two important categories by the city charter.

One is the manner in which they are appointed. Mayor Dail has three appointments, the Board of Education has two and the city manager has two. This is too narrow a base. It should be expanded to permit participation in appointments by the City Council. Such groups as the Parent-Teacher Association and cultural organizations in the park should be represented. And consideration must be given to the citizens groups interested in park development.

The other weakness of the present commission is in its advisory status. The charter provides that the commission shall advise the city manager and park and recreation director.

This type of status made the commission a tool of management rather than a public advisory body.

It would be in the best interest of San Diego if the commission were empowered to make at least its major recommendation directly to the City Council.

The Park and Recreation Commission has the responsibility for operation of all San Diego parks, including Mission Bay. It meets Wednesday at Balboa Park.

Attention would be better focused on the commission if it moved its meeting place to the Civic Center.

Park development and operation in San Diego must move ahead in the bright glare of public interest and participation. It is up to the City Council, city management and citizens of San Diego to profit from Tuesday's election in planning the next phase of Balboa Park development.

Britton: "Contradictory horoscope,"

In a letter published in San Diego (December, 1960) Gordon Edwards states that the Bartholomew Plan is "sterile, unimaginative, and completely devoid of that kind of reality that breathes life into a plan." The only reason given for this remarkable statement is that the planners did not recommend creating an exposition for the purposes of renewing and redeveloping existing landscape and buildings and of raising an estimate twenty-one million dollars. In his accompanying article, Mr. Britton quickly disposes of Mr. Edward's reason but chooses to keep his description since it conforms to his opinion of the plan even before there was a plan. At the same time he expresses himself in accord with the views of Mrs. Eleanor B. Edmiston, who has since become known in local circles as the leader of the Balboa Park Protective Association.

A fascinating aspect of Mr. Britton's agreement with Mrs. Edmiston is his statement that "she surely represents majority opinion among those who bother to think about the issues raised." Not only does this critic know what he thinks of the Bartholomew Report before it was written, he even known majority opinion before it is tested. This display of logic is typical of his reasoning throughout. He is equally clairvoyant regarding the new wing of the Fine Arts Gallery on the basis of what he calls "half-completed plans." Then he contradicts himself by saying in one paragraph that the new building will be "derivative Spanish Plateresque" and in another that the building will be an example of "modern" and "currently fashionable modes." Obviously, it cannot be both and assuming that the first description is correct, why is "derivative Spanish Plateresque" at odds with the Plateresque design of the existing Fine Arts Gallery?

One would think that after conceding that the buildings in Balboa Park are "mock up," "stage sets," "dream palaces," "nostalgic Spanish," "copies" and "dazzling facades," Mr. Britton would have given himself sufficient reason to recommend a drastic revision, but the aforesaid individual is, if anything, independent. Though he blandly announces he is committing "architectural heresy," he concludes that we must preserve the status quo because "everyone, whether he knows it or not, needs occasional reminders that there is some background, some heritage behind his spinning days on earth." In view of this extraordinary conclusion, it is interesting to note that three and one-half years previous the same man recommended that we replace the temporary buildings in Balboa Park with modern glass architecture (San Diego, July, 1957). One wonders what his conclusions will be subsequently.

Ultimately, Mr. Britton's argument hinges on the premise state at the conclusion of his article, which is that "man needs some heritage." Insofar as it pertains to buildings from the past, which are slavishly copied and travestied in future times, this point is certainly debatable. The history of architecture shows that the Plateresque and Baroque buildings, which exist by way of distant association in Balboa Park, had at one time a definite place and meaning within a culture whose members recognized their significance. But the heritage they symbolize, and symbolize not too well, since Mr. Britton describes the buildings as "some good, some not-so," is not and never has been an American or Southern California heritage. The buildings represent to me, and perhaps to others, a time when our American millionaires attempted to buy European architecture stone by stone and to haul it back to American where it was painstaking re-erected; for which practice these same "culture vultures" were held in contempt by European connoisseurs and in derision by our American satirists, such as Mark Twin, Henry James, Sinclair Lewis, H. L. Mencken and Frederick Lewis Allen.

The aesthetic mistakes committed in trying to transport an alien culture to the New Work is aptly demonstrated by our own local mistake of erecting a pseudo-ecclesiastical facade in the Balboa Park area when what is housed inside is (Russians take note) a Museum of Man. The point I wish to make is that Mr. Britton, trapped by inconsistencies and gifted with an internal horoscope, refuses to concede that compatible and harmonious change is possible and in the process demeans native talent and ingenuity.

Richard W. Amero.

May 2, 1961, San Diego Union, A-14:2. 106,000 persons saw Spring Fair in Electric Building yesterday; fair, sponsored by San Diego County Bureau of Home Appliances, opened last Friday and ends tomorrow.

May 6, 1961, San Diego Union, 18:4. Phil D. Swing urged City Council not to change architectural styles of buildings along El Prado.

May 7, 1961, San Diego Union, B-7:5. San Diego Zoo plans breeding farms.

The San Diego Zoo soon will become a sort of Noah's ark.

This will be in keeping with a new concept of zoos around the world, officials of the zoo said yesterday.

Dr. Charles Schroeder, Zoo director, and several members of his staff, returned from the third annual Western Regional Zoo Conference in San Francisco, conducted Monday to Wednesday to determine the problem of diminishing wildlife in the world, especially in Africa.

"Since wildlife is disappearing around the world and we have no idea how soon Africa will reflect on this and do something to protect their wild animal herds, the conservation problem falls to zoos around the world," Schroeder said.

"The zoos might well be considered the current Noah's Arks since they will conduct breeding farms and attempt to influence duly liberated nations on the value of their wildlife from the standpoint of conservation and tourist trade."

The concept of an island, such as Catalina Island, which could serve as a West Coast quarantine station and breeding farm, was offered by Dr. Thomas A Gage, assistant director of the U. S. Agricultural Department, who spoke at the conference.

In addition to Schroeder, Mrs. Ella Hoover, controller, and Fred Mabbitt, assistant public relations director, attending the meetings. Charles Faust, zoo designer, and Robert Jarboe, superintendent of buildings and grounds, also attended, stopping in San Francisco on the last leg of their recent 10-city tour.

Faust and Jarboe, now planning the new grottoes at San Diego Zoo for giraffes, elephants, rhinoceroses and apes, particularly studied moated enclosures of these animals in their zoo tour.

"The cooperation among zoos for the future protection of the animals will be handled through the International Union of Directors of Zoological Parks," Dr. Schroeder said. "The union plans to meet here in October 1962."

Joe Angarola's character interpretation in the role of Henry VIII is a masterpiece.

May 14, 1961, San Diego Union, A-15:7. The Bartholomew Report on Balboa Parks' future, after parking meters the second best political target in San Diego, will be up for public discussion again tomorrow.

May 16, 1961, San Diego Union, A-17:1-4, A-29:1-3. Planners favor amendments; park proposals backed, by E. G. Martin.

The city Planning Commission recommended the adoption of the master plan for Balboa Park yesterday after the approval of two amendments.

The changes were:

1. Construction, if and when traffic warrants it, of a \$2 million vehicular tunnel between 4th and 7th Avenue along the alignment of the Maple Canyon Road.

2. Construction of a \$170,000 vehicular tunnel, 300 feet long, from the west to east sides of the Old Globe Theater along the alignment of a proposed road running north of El Prado.

The Bartholomew plan now goes before the City Council, which has the final decision on adopting it.

Harry Haelsig, city planning director, said the 4th-to-7th Avenue tunnel would bring the total cost of building the Maple Canyon Road to about \$4 million. He said the tunnel portion of the road should not be built until traffic warrants it, predicting this would not happen for an unknown number of years.

Maple Canyon Road, being planned by the city to help relieve congestion in the park caused by non-park traffic, would begin at Columbia and Laurel Streets and would cross the northwestern edge of the park.

Haelsig said the 300-foot tunnel behind the old Globe Theater would eliminate any possibility of traffic noise disrupting performances, one of the criticisms voiced by opponents of the Bartholomew report's road recommendations.

In addition to the modifications involving tunnels, the commission also amended it by suggesting that an architectural review committee of architects pass on all designs of new buildings to insure their compatibility with present architecture.

Another modification suggested was a suggestion that alternate routes be studied for a road south of El Prado which Bartholomew recommended placing in Palm Canyon.

The Planning Department recommended against other tunnel proposals submitted by Philip Martin, of 5504 Lindo Paseo, and others. Cost estimates prepared by the city Engineering Department showed that it would cost from \$8 million to \$16.2 million to build tunnels for through park traffic under the park.

(In addition to Mrs. Eleanor Edmiston) other speakers in opposition spoke against the proposed road system, removal of planting, any changes in architecture of buildings and the proposal to remove all tennis courts to the Morley Field area.

Inter-Museum Day is planned to call attention to the earth and man's history, culture and knowledge, and to what the museums have to offer the public.

May 25, 1961, San Diego Union, B-2:8. Don Campbell, La Jolla, wants no new buildings in park.

Editor: An open letter to the Balboa Park Association.

Questions relative to what shall be the architectural period for the Prado and elsewhere in the park bring certain reactions from an architect. As one I object to any restrictions being placed on the architect for the external design other than that it shall be good, suitable for the particular building and compatible with its surroundings.

The 1915 fair buildings produced an charming and delightful scene compatible to the architecture here during that period. Unfortunately, most of it was of temporary construction and must be destroyed.

Is the park to be a true park or half park and half building site for all worthy institutions? Why is a museum a proper park use and not a Convention Hall? I object to both in a park.

I prefer to worry more about reclaiming open landscaped park land and not about rebuilding this or that architectural period. I believe parks were meant to be the opposite of structure: trees, shrubs, grass, flowers, wild open land.

When an old fair building is removed, let's recapture the park. What is permanent, let stand, but forbid new or replacement encroachments. No written ordinance or law, just written deep in the heart of every citizen of San Diego city and county.

May 26, 1961, San Diego Union, A-17:1-4, A-20:4. Rotarians will renovate Alcazar Garden in Balboa Park (illus.).

Philip M. Klauber, Rotary president, said the club decided to rebuild the garden as its golden anniversary year project.

. . . present-day park visitors find that the garden's two fountains fail to operate, paths are occasionally muddy or strewn with hoses, and a platform at the west end appears near collapse.

Lloyd Lowrey, park superintendent, has been authorized to make preliminary designs and estimates for renovation of the garden and present them to a 15-member Rotary Club committee.

May 28, 1961, San Diego Union, A-15:1-2. Zoo Week Accent On Baby Animals.

More than \$16,000 worth of zoo babies will be featured as the second annual San Diego Zoo Week opens today.

Zoo Week, which may be the forerunner of the National Zoo Week proposed in legislation introduced in Congress by Rep. Bob Wilson, R-San Diego, is expected to attract thousands and is dedicated to "young people getting to know young animals."

More than 100 new animals and birds will be shown in the Children's Zoo and the regular zoo.

Zoo babies range from a few skittish animals such as sheep and deer to friendly ones such as a gray wolf that likes to romp with children like a puppy and a dromedary camel that nuzzles the heads of children.

"This has been one of the most bountiful springs on record among the San Diego Zoo families," Dr. Charles Schroeder, managing director, said. "With the single, double and multiple births or hatching of the young to families of 40 different species here, we have greatly added to our zoo population.

The most important additions to the mammal department were the first spotted hyena and the second impala ever born in the United States. The graceful African antelope was born April 12. The hyena was born February 6.

Two chimpanzees, born April 2 and 12, once again gives the zoo the distinction of being the only one known to exhibit three generations of chimps in the same enclosure. These are the seventh and eighth to be fathered by the chimp George Washington, which was born at the zoo on Washington's birthday, 1938.

A number of mammals born this spring were raised in the Children's Zoo nursery. They include Patti, an Arabian camel, born April 28; Judy and Joey, two aoudads, wild sheep of North Africa, born March 3; Toto, a North American gray wolf, which has gained two pounds each week since its birth April 7; a springbok, born May 7; and tiny Shakuntala, dubbed Tala for short, a lion-tailed macaque, born May 5.

Toto and Tala are being raised in the nursery's incubator. Tala is fed a half ounce of milk eight times a day.

The zoo also has been noted for its success raising the rare Nelson big horn sheep. This record was continued with the birth of a sheep, April 13. Other animals include three mountain lions, born May 20; a reindeer, born May 19; a Muntjac, a small deer of Southeast Asia, born May 13; a number of spider monkeys and wallabies, and a Nubian goat, born May 13.

Another worthy birth was that of a Roosevelt sable antelope, born March 5. This animal is a favorite trophy because of its scimitar-shaped horns.

Among the outstanding hatchings in the bird department are four kea parrot chicks. The zoo is the only one in the western hemisphere breeding these rare inhabitants of the mountains of New Zealand.

For the 32nd consecutive year, bare-eyed cockatoos of Australia were hatched in San Diego Zoo. The two hatched this spring bring the total hatched here to more than 100.

Also noteworthy in the bird department was the incubator hatching of two rheas, the ostrich-like bird of South America, including one very rare white chick; two blue-eared Manchurian pheasants, the first ever hatched in the zoo; doe Orinoco geese, native to South America; in addition to uncounted dozens of pea fowl, ducks and geese. The bird department also is awaiting the hatching of flamingoes, expected early in July. Only four zoos in the world raise these beautiful birds.

The reptile department, which raises most of its young in the summer and fall, has added four Aruba Island rattlesnakes. Twenty giant tortoise eggs are expected to hatch next fall.

May 28, 1961, San Diego Union, B-7:5-6. Square Dancers plan 3-day convention in Balboa Park, opening June 16.

May 30, 1961, San Diego Union, A-12:5-8. Donated Art Sale Slated Saturday in Recital Hall, sponsored by the Asiatic Arts Committee of the San Diego Fine Arts Society; profits from the sale will be used to relieve costs of special Fine Arts Gallery exhibits and purchase (illus.).

June 4, 1961, San Diego Union, C-2:8. Mrs. Hannah Coss writes keep park beauty intact.

Let Mr. Campbell and all artists get together to preserve the natural beauty and spiritual associations of our park and keep out the commercial approach which will scare away the very people who would make our most delightful guests.

June 8, 1961, San Diego Union, B-2:6-7. R. H. Brock writes tennis court loss cited under plan.

In the last 25 years 14 concrete tennis courts in Balboa Park have been destroyed, six by the Park Department, five by the schools, and three by the freeway.

Now comes the Bartholomew Master Plan for the park, which during the first period, calls for the destruction of six more, the courts on Park Boulevard near the War Memorial Building, operated by the Balboa Tennis Club. Last year the club raised \$4,000 and resurfaced the courts, putting them in the best condition of any city-owned courts. The adjoining tennis club is also to be destroyed. It

contains men's and women's locker rooms, showers, rest rooms, a tennis shop and a place to get lunch.

It is suggested by the plan that as a substitute facility six courts be added to Morley Field, something which was so badly needed and still is that four years ago the Balboa Park Citizens Committee recommended that 10 more courts be added.

There is a "Municipal Tennis Club House" at Morley Field. It contains a tennis shop and two rest rooms. There are no lockers, no dressing rooms, no drinking fountain, no food. Lately, a couple of showers were installed, with cold water, no hot. There is nothing in the Bartholomew Report calling for anything better.

Are we to destroy \$50,000 worth of tennis courts, rebuild them for \$50,000 more, and move 250 Balboa Club members over to Morley Field to add to the congestion, where they go back to changing clothes in their cars, eating candy bars for lunch, and cleaning up when they get home?

The destruction is part of a \$540,000 major project in the Bartholomew Plan to be spent on the big parking lot on Park Boulevard.

Unless someone convinces four councilmen otherwise, this plan will be officially approved with a few weeks, subject to some amendments suggested by the planners for the benefit of the Globe Theater, those concerned about architecture of any new buildings, and those concerned about rare trees and plants.

If anyone is concerned about tennis courts, now is the time to give the city government the benefit of your opinion on this subject.

June 9, 1961, San Diego Union, A-20:4. Balboa Stadium seat bidder asks to withdraw.

Because the low bidder made an error on bidding on a \$50,000 job to install seat backs in Balboa Stadium, City Manager George Bean yesterday recommended that the City Council too out all bids and readvertise.

June 12, 1961, San Diego Union, B-2:6. Mrs. Eleanor B. Edmiston praises Rotarians for park interest.

June 14, 1961, San Diego Union, A-17:4. Balboa Park Stadium work bids rejected.

June 15, 1961, San Diego Union, A-21:7, A-29:4. Religious rites approved for county parks, by Charles Ross.

Religious services may be held legally in the county's 40 public parks, county counsel Henry Dietz ruled yesterday.

The ruling reversed a 1951 opinion of the county counsel banning park religious services on the grounds of conflict with constitutional provision guaranteeing separation of church and state.

The opinion, however, held that where religious services conflict with use of a park by others, services could not be held, since the parks are for public recreational use.

Religious activities in city parks have been permitted except for a brief period in 1959.

A ruling of the city attorney's office at that time held that Balboa Park could not be used for services at Christmas, Easter or Thanksgiving on the grounds that the law prohibited public assistance for religious groups. The ruling has been changed.

June 16, 1961, San Diego Union, A-28:5. City Council yesterday approved plans for demolishing Balboa Park nursery and construction of new ones.

City Manager George Bean said the project will cost about \$115,000. Involved will be the tearing down of greenhouses and erection of new one farther from Park Boulevard.

Funds for the nursery projects were in the current city capital outlay project.

June 16, 1961, San Diego Union, A-28:5. City Council approved San Diego Zoo lot paving plan yesterday; parking lot, across from the zoo, now is half paved; City will pay \$5,500 or half the cost, with the Zoological Society contributing the other half.

June 18, 1961, San Diego Union, B-2:1-4. Midget auto racing in Balboa Stadium bows out tonight to end 22-year auto era; Stadium developed into a speedway in 1939, by Johnny McDonald.

The once-popular midget autos bow out of Balboa Stadium with a 100-lap West Coast championship race. Similar tiny machines helped turn the big stadium from a white elephant into a money-maker with popular weekly shows several years ago.

June 18, 1961, San Diego Union, I-17:1-2. Eight annual California Square Dance convention in Balboa Park ends today.

June 22, 1961, San Diego Union, A-1:1-2, A-2:3-4. Camp Elliott site refused for adult hospital; Representative Bob Wilson, critic of plan, sees Navy move as killing plan; Brown indicates quest for another spot.

June 22, 1961, San Diego Union, A-32:2, A-37:1-2. City Council drops funds for seven play programs.

The council, at a budget conference, agreed the cutback might curtail youth recreation programs, but said the city was pressed for funds.

The order will affect such programs as the teaching of tap dancing, ballet dancing and the Junior theater. Councilmen unanimously agreed these programs should be financed solely by persons interested in them and not by all the taxpayers.

Councilmen agreed the city would continue to make available the facilities where these programs are conducted.

June 24, 1961, San Diego Union, B-2:6-7. A. Richard Stern writes San Diego may lose fine art collection.

Speaking as a private citizen, I am deeply concerned that through delay San Diego may lose a tremendous gift of one of the exceptional art collections in the world; truly a cultural treasure.

Reference is being made to the proposed Putnam-Timken Gallery in Balboa Park which would be designed to house some 20 great masterpieces and be constructed and fully maintained at no expense to the community. We also are threatened with the loss of further acquisitions that will be made by this foundation.

A small but vociferous minority has objected to any changes to be made in the architecture of future buildings that would be constructed in Balboa Park. This opinion does not appear to be consistent with progress. If this magnificent collection of paintings, probably worth upward of some \$3 million is not truly desired by the people of San Diego, there is a good possibility that this generous offer will be withdrawn forever.

Coventry Cathedral in England was virtually demolished by the Germans in World War II and is now being rebuilt on an adjacent site. I should like to quote in part the Very Rev. Richard T. Howard, provost of Coventry, as he answered critics of the architecture of the new cathedral:

“It belongs to this age. The old church was new in its time and the new church will be definitely and sincerely for the present day.”

August 27, 1961, San Diego Union, C-2:1-2. EDITORIAL: Precious Gift to San Diego In Jeopardy - City could lose eminent art collection through bickering.

In November 1958, those who love San Diego were thrilled to hear of a significant gift --- a gift by which the city would become the home of the most eminent art collection west of Chicago and made San Diego an art capital of the west.

Two families --- the Timkens and the Putnams --- once had San Diego ties. Both had roles in building and supporting the existing Fine Arts Gallery. They had established charitable foundations, and the foundations now were preparing to join to create a permanent home for approximately 40 irreplaceable old masters, including some on loan to the great galleries in Washington, New York, Chicago and Cambridge, Mass.

Some of the paintings already are in San Diego, the property of the Fine Arts Society. Others are the property of the Putnam Foundation and are on loan to the National Gallery, the Chicago Art Institute, the Metropolitan Museum at New York and the Fogg Museum at Harvard. They include works by Rubens, Rembrandt, Corot, Murillo, Titian and a very rare painting by Pieter Brueghel the Elder. They have been lent for safekeeping because paintings need just the right physical conditions for their safety.

When the time comes to send these works to San Diego, there is not one of the museums which will not feel it has lost a treasure.

The gift took on ever greater significance because of two facts: Europe no longer permits the easy sale to America, even at towering prices, of its works of art; it wants to keep them home. And the Putnam Foundation, through trust funds, intends to continue purchases of old masters for the San Diego collection.

The \$1 million building in Balboa Park would be known as the "Timken Gallery, housing the Putnam collection." An architect was selected and tours of the great galleries were made and expert advice sought.

Preliminary plans were approved by the City Planning Commission and by the Park Commission. It was with this approval that the long and complicated and costly work of preparing final plans had progressed. These plans are about 95 percent complete.

Now we have some persons who say they don't like the plans.

They propose different plants, or they propose that the building would be situated somewhere else. They say the building is too small, or that it will destroy a money-making attraction (Balboa Park). The don't, they say, like its looks.

They are like a nephew to whom uncle gives a new car. The nephew says he would rather have another made and model and a little more equipment on it, please.

Nephew has a right to his views, but we wonder what uncle would say.

We wonder what San Diego will say about any such protests, protests that can jeopardize one of the greatest gifts ever made to a city.

August 29, 1961, San Diego Union, B-2:7. Mrs. David H. Ryan, La Mesa, hopes El Prado will be preserved.

Editor: Boston has its memorials, its sites of famous men and events --- "Early American." So has Philadelphia, Washington, Charleston, Savannah, and many others. And each has its own particular heritage which it jealously preserves and profits by. Down east colonial architecture flourishes today in public buildings as well as in many of our most modest dwellings.

We in San Diego have our own preeminence as the birthplace of Spanish colonial civilization. This heritage has been beautifully preserved in Balboa Park; so beautifully done that El Prado is world-renowned. We poor laymen, merely taxpayers, may not be qualified to discuss architecture but we do know what makes San Diego a lasting memory in the heart of every tourist who visits El Prado and brings him back to live here.

There is plenty of room in the park. Let's be like Paris or have a palais of this or a musee of that in a location distinct from our little "Louvre" on El Prado. Let us have a Musee d'Art Modern where the Avant Garde can enjoy the modernists. A museum for modern art deserves its own proper setting and it does not belong on El Prado.

Let us keep El Prado glamorous and accessible. Cut traffic to its former 12 miles an hour so that one can drive through (if unable to walk), get a taste of faraway places and that "Castles in Spain" feeling! For those in a hurry to cross town, let's build a couple of good wide tunnels across the park.

September 1, 1961, San Diego Union, A-19:6, A-23:3-5. City Council referred to study on suggestion that a committee of architects and laymen be appointed to decide type of architecture in Balboa Park; majority of Council said new buildings should be "compatible" with existing structures, by Edwin G. Martin.

A majority of the City Council indicated yesterday that the exact reproduction of buildings along El Prado in Balboa Park would be preferred.

If it were impossible to exactly reproduce buildings needing replacement, a majority of the council indicated that new ones should be "compatible" with the existing structures in every way.

With these assurances, a second public hearing on the proposed master plan for development of the park switched from a grim war of words between the council and members of the Balboa Park Protective Association to the next thing to a honeymoon.

Helping to foster the unfamiliar harmony was the council's further indication that a proposed architectural advisory committee would be composed of lay people as well as architects.

And, according to Councilman Allen Hitch, several of the offices of the Balboa Park Protective Association would be invited to serve on the committee, the chief function of which would be to pass on architectural styles of any buildings replaced along El Prado.

The council postponed formal adoption of a master plan until September 14 to give the Balboa Park Protective Association time to study details other than architectural styles.

Still to be resolved, however, is the future of a proposed Timken-Putnam wing to the Fine Arts Gallery.

Former Councilman Ross Tharp, acting as attorney for the BPPA, said his organization favors another site for the Timken wing if the foundation is unwilling to modify its plans to conform with existing El Prado architecture.

Tharp pointed out that two directors of the foundation --- Walter Ames and A. J. Sutherland --- originally proposed that the city "exercise control over the architectural pattern of the outside of the building," according to official council minutes of a November 20, 1958 conference.

Ames, an attorney, and Sutherland, a banker, first made known to the council the proposed gift of the Timken wing to house old masers of the Putnam Foundation at this meeting.

At that time, according to the minutes of the meeting, Ames and Sutherland said directors of the foundation desired a free hand only over the internal structure of the building.

“All we ask now is that the initial proposal of 1958 be lived up to,” Tharp told the council. “All we ask is that the council do what was contemplated at the time of the original presentation, that is, to exercise control over the architectural pattern of the outside of the building.”

Tharp added, “If the benefactors at this late date desire to deviate from their original proposal, let there be found an appropriate site elsewhere.”

“If an alternative site does not satisfy them, let us be prepared to experience an unrealized gain. Let us not sacrifice an entire treasure chest for the sake of one gem.”

Ames, however, disagreed in part with the agreement in the council minutes. He told the *San Diego Union* in an interview:

“I recall that we assured the council we would build something acceptable to the city, but I don’t recall any mention of the city controlling the architecture.

“There’s a wide gulf between building an acceptable building and the city controlling the architecture.”

Ames said he was disappointed that not a single voice was raised in defense of the proposed Timken wing --- a white marble building featuring a massive bronze grill which has been described as “classical Spanish” by its architect, Frank Hope of San Diego.

“We have no thoughts at present of redesigning,” Ames said. “Architects cost money. We won’t build, of course, until something finally is settled. The directors will have to huddle to find something.”

Henri Jacot, an architect and vice president of the BPPA, told the council that he had polled 50 percent of the architects here and of that number 81 percent thought architectural styles of buildings along El Prado should remain the same.

Jacot criticized the proposed Timken-Putnam wing as being a building that “wrecks the unity of the best architectural complex in San Diego.”

“It displays box-type architecture, barren in plan and facade,” Jacot said. “It creates an unbelievable situation because the Fine Arts Gallery is unable to exercise control over the development of one of its wings.”

L. J. Ninteman, owner of a building firm, told the council that it would be comparatively inexpensive to reproduce the art work on El Prado buildings in cast stone. He said it could be done for \$14 to \$20 for each square foot of building.

September 2, 1961, *San Diego Union*, A-16:5. Three fired on a technicality in park fracas; patrolman attacked from behind while trying to help a youth who had been hurt in a fight in the parking lot of the War Memorial Building.

September 6, 1961, *San Diego Union*, 19:4. Justin Evenson, Councilman, criticizes Balboa Park Protective Association.

Councilman Justin Evenson yesterday criticized those who have objected to the proposed Timken-Putnam wing of the Fine Arts Gallery "without even seeing a model of the building."

Leaders of the Balboa Park Protective Association, a citizens group, castigated the proposed new wing as being architecturally designed like a "super market" in last week's hearing before the council on Balboa Park.

"I learned over the weekend that some of these people haven't seen the model of the building," Evenson told the council in a conference discussion which he instigated.

"It's getting to be a fine thing when we let ignorance such as this guide our thinking. I think we own the architect (Frank Hope of San Diego) and apology."

The discussion ended with Councilman Ivor de Kirby suggesting that BPPA leaders be invited on a field trip of the park to observe areas of improvement --- and to see the model of the proposed building.

Vice Mayor Frank Curran said he would attempt to arrange such a trip next week.

Ross Tharp, attorney for BPPA and former council member, said he had seen an artist's rendering of the wing in January with Mrs. E. F. Edmiston, BPPA president, and other members of the group.

Tharp said the rendering was shown by Walter Ames, director of the Timken Foundation, during a meeting with the civic unit.

He added that the BPPA members, as "long-time residents of San Diego," were intimately acquainted with all areas of Balboa Park but, in light of De Kirby's suggestion, would be happy to attend a field trip of park improvement areas.

Tharp said the group's position has always been that the council could "experiment with the unorthodox" in areas other than El Prado.

"We do not want to turn this into a name-calling contest," Tharp added. "I believe it is unfair to call these people ignorant just because they are expressing opinions about the park they love."

September 7, 1961, San Diego Union, A-22:1-2. San Diego Zoo unit renames four board members --- Dr. E. Minton Fetter, L. M. Klauber, Robert J. Sullivan and Milton G. Wegeforth.

Last Sunday (the largest single day in the zoo's history) a total of 25,631 persons visited the zoo.

The development of additional parking for 1,500 cars this year and 4,000 next year, making a total of 8,000 parking spaces, was cited as a major goal by the society.

September 7, 1961, San Diego Union, A-22:3. San Diego Zoo - Kenton C. Linton, curator of birds, back from collecting trip.

September 7, 1961, San Diego Union, A-22:3. Dr. Robert M. Stader replaces Dr. Werner Heuschele as chief veterinarian at San Diego Zoo.

September 8, 1961, San Diego Union, A-21:8, A-22:1-2. Plans for Timken-Putnam wing postponed; design dispute blamed, by Edwin G. Martin.

Plans for a Timken wing to the Fine Arts Gallery to house the Putnam Foundation's collection of old masters have been "postponed indefinitely," it was announced yesterday.

"We do not know when, if ever, consideration of the proposal will be renewed," said Walter Ames, an attorney, and A. J. Sutherland, a banker, both directors of the Putnam Foundation, in making the announcement.

Members of the City Council reacted to the news of the indefinite postponement with statements of disappointment.

Philip P. Martin of 5504 Lindo Paseo, director of the Balboa Park Protective Association, said the news was disappointing, but he added "It was unfortunate that the directors tried to cram down the throats of San Diegans an incompatible type of architecture."

The association led the attack on the proposed architecture of the \$1 million wing, which had been proposed as an east wing to the present gallery in place of the old American Legion building.

Critics castigated the building's design as being out of keeping with the rest of the buildings along El Prado and likened the white marble structure to a supermarket.

Ames and Sutherland announced the directors' decision in a statement issued yesterday afternoon.

"We now realize that the future disposition of the old buildings in Balboa Park has become a matter of wide community interest and controversy, and whether they will be demolished, repaired or replaced may not be decided for a long time," the statement said.

"The subjects of art and architecture are always matters of sharp differences of opinion, and it is not our desire or intention to become involved in broad problems of park architecture.

"Our purpose was to provide the best possible gallery for the protection, preservation and viewing of paintings, and we will not become involved in the general problems of restoring or replacing park buildings.

"Since the Timken Foundation had intended to participate in the project, we have, of course, advised it of our present plans."

Vice Mayor Frank Curran said a scheduled tour of Balboa Park for members of the association will still be conducted today. Part of the tour was to have included a look at the model of the proposed wing, as well as a model of the proposed west wing of the gallery.

"This is an example of what confusion over such difficult subjects as architecture can lead to," Curran said. "It may cause us to lose a worthwhile project, and I'm sorry about it."

Councilman Allen Hitch, however, said that while he was disappointed in the director's decision to postpone such a worthy project, "with just a few minor changes in architecture this art gallery would have been acceptable to every citizen in San Diego."

Another councilman, Ivor DeKirby, expressed hope that the directors' action will not close the door to San Diego's obtaining of the wing and the paintings.

"I say this because of the tremendous loss to the city of these art masterpieces which the Putnam sisters wanted to make available to the city," DeKirby said, "As I understand it, this exhibit when assembled would be the greatest west of the Mississippi."

Councilman Harry Scheidle said, "I'm sorry they've withdrawn the offer but if they had waited until the tour was made I'm sure some agreement could have been made."

Mrs. Eleanor Edmiston of 2928 33rd St., president of the Balboa Park Protective Association, said she was sorry to hear of the decision.

“All we’ve ever done is request that San Diego preserve its world-famous architecture,” she said. “I don’t see why the directors can’t choose another spot in the park, perhaps the Ford Building location, if they want to have their type of building. After all, art galleries don’t have to be in the same place.

Mayor Dail could not be reached for comment last night.

Martin pointed out that council minutes show that when Ames and Sutherland originally made the offer to build the wing and bring the Putnam collection to San Diego the two directors indicated that the city was to control outside architecture.

Ames, however, has said he recalls the details of the meeting somewhat differently. He has said that Sutherland and he assured the council that the structure would be made acceptable to the city, but he did not recall any mention of the city controlling exterior design.

September 8, 1961, San Diego Union, A-24:1-2. San Diego Zoo hunt nets valuable animals, by Natalie Best.

A total of 377 mammals, birds and reptiles, valued at \$15,000, were collected for the San Diego Zoo by Kenton C. Lint, the Zoo’s curator of birds, on his recent expedition to the Far East.

September 8, 1961, San Diego Union, A-24:4-5. City Council votes recreation fees.

Mayor Dail indicated he felt participants in poorer sections of the city would be forced to drop out if fees are charged.

September 9, 1961, San Diego Union, 17:2-4, A-19:1-2. Model of proposed \$1.3 million west wing of Fine Arts Gallery displayed (illus.), by Edwin G. Martin (illus.).

A model of the proposed \$1.3 million west wing of the Fine Arts Gallery was displayed yesterday for leaders of the Balboa Park Protective Association. Top leaders of the association did not like it.

The showing of the model was arranged as part of a tour of the park to introduce Balboa Park Protective Association leaders to the improvement suggested in a proposed master plan for Balboa Park development.

Twenty-one BPPA members, city officials and Fine Arts Society representatives went on the three hour inspection trip. The model of the Timken wing of the art gallery also was to have been shown, but Vice Mayor Frank Curran said directors of the foundation withdrew it.

Walter Ames, an attorney, and A. J. Sutherland, a banker, both directors of the Putnam Foundation, Thursday announced the “indefinite postponement” of plans to build the \$1 million wing. They said the controversy over the wing’s architecture caused the postponement.

Meanwhile, Councilman Allen Hitch told *The San Diego Union*, that he will recommend that the council adopt a resolution Tuesday requesting Ames and Sutherland to reconsider.

“I think we ought to ask them to reconsider so we can work something out in a spirit of harmony,” Hitch said.

“Personally, I believe a few minor changes in the Timken wing’s design would satisfy 90 percent of the people.”

Ames yesterday told *The San Diego Union* that he and Sutherland are not inclined to entertain any more discussion about the Timken wing being in Balboa Park.

His statement was more definite and final than in the original statement issued Thursday in which words "postponed indefinitely" were used rather than an outright cancellation of the project.

In addition, Ames said directors "were not trying to cram down the throats of anyone" the design, as a BPPA director had charged.

"Our plans were approved by both the city Park and Recreation Commission and the city Planning Commission," Ames declared.

Les Earnest, city park and recreation director, told the group inspecting the park yesterday that the trip has two basic purposes: first, to acquaint those attending with broad details of the master plan, including road network proposals, and second, to show them the West wing.

"It's too flat," said Mrs. Eleanor Edmiston, of 2928 33rd Street, president of the 600-member organization, in commenting on the proposed west wing.

"You may as well go ahead and close El Prado to auto traffic if all the buildings to be restored are going to look like the west wing."

Mrs. Edmiston said the trip alleviated to an extent her previous fears as to the road pattern and, in particular, to a proposed pedestrian overpass near the organ pavilion.

"The road proposals appear to be sound --- at least I can see the reasons for them," she said. "But all along we've asked two things of the city. We would like El Prado to remain open (the master plan recommends its closing so it would be free for pedestrian use) and we would like the present architecture along El Prado to remain unchanged."

At least one member of the BPPA disagreed with the others in their criticism of the proposed west wing, designed by architects Robert Mosher and Roy Drew.

Mrs. Lloyd Burgert, of 3764 Hemlock St., saw the model and said, "I may seem like a turncoat, but I like it. It gives me a feeling of harmony with the existing structures."

Mosher, who explained the objectives which guided the design, told the group that the single "great" building along El Prado is the California tower, designed by the late Bertram Goodhue.

"All the others were designed by a young draftsman in his office," Mosher said. "And Goodhue himself urged that they be demolished after they had served their temporary use because they detracted from his building which is an outstanding example of Spanish Renaissance derivative architecture."

Mosher said great care was taken to retain the "essence of beauty" of El Prado buildings in the design of the west wing while being forced to recognize the limitations of 20th century material, craftsmanship and finances.

The west wing, sand in color, will use prestressed and precast concrete and will have large sculptured concrete columns, 24 feet high, studding its exterior and interior courtyards, Mosher explained.

"We could not design a two-story structure which would equal the height of the present art gallery because a second story was not needed, and would cost too much," Mosher said.

C. J. Paderewski, president of the San Diego Chapter of the American Institute of Architecture, urged that the master plan for Balboa Park be accepted.

It has some things in it which would not be agreeable to everyone, but it has too many right things to be wrong," Paderewski said.

You'll never get all of the people to agree to all of the proposals at the same time."

The inspection began at the Balboa Park Club. The group was shown the diseased cypress trees near Sixth Avenue and Upas Street, and told of the efforts being made to save the huge trees.

September 9, 1961, San Diego Union, B-2:1. EDITORIAL: Gift Horse Kicked.

The City Council, unable to decide, unsure of the right of things, afraid to act, has kicked away a tremendous cultural asset to the city.

By its indecision, the council is losing the Putnam Foundation's \$2 million collection of old master paintings. For months it has acted like a small boy sheepishly kicking a hole in the dirt, unable to decide whether proposed plans for a wing to house the collection were pretty good enough.

Many said the proposed Timken gift building wouldn't be compatible with other buildings in Balboa Park. Others who approved wholeheartedly with the architect's drawings weren't vocal enough, as usual.

Now the foundation has aid, in effect, enough of the shilly-shallying, we are withdrawing our offer. And looking at what has happened, the decision is regretfully understandable.

Had the council decided after a thorough yet expeditious study of the plans that they were adequate, the city would have had the paintings.

On the other hand, had it decided quickly that the plans needed revision, the city would have had the painting.

Instead, the council tried to placate everyone. In spite of what one councilman said, everyone in San Diego will never like any one building, not even the Alhambra.

The council cannot always go to the voters for a decision. It should not.

It probably is too late but with the stakes so high we would suggest that even at this date the council made every effort to change the minds of the foundation leaders. Certainly this would help restore public confidence.

September 9, 1961, San Diego Union, B-2:2. Old Globe's Problems.

The 12th annual National Shakespearean Festival at the Old Globe Theater is having a record year, and yet it has a problem.

The season has been extended an extra week and even that is sold out. Attendance for the season has been 97.9 percent of capacity, compared with the best previous year (1960) of 93 percent.

Why the success? Well, there has been a general rebirth of Shakespeare interest. And the local festival for the third year is using a core of professional actors, the best there are, and there is the rub.

The theater can't afford to maintain the high-talent level without enlarging the theater, or boosting ticket sales, or asking for outside help. The non-profit corporation's volunteer board of directors is weighing the possibilities.

Old Globe has given San Diego a cultural life, one way or another, and San Diegans cannot let it fall.

September 10, 1961, San Diego Union, A-21:7-8, A-34:1-2. Edwin G. Martin says \$2 million collection of old masters victim of "San Diego syndrome."

A \$2 million collection of old masters that was destined as a gift for the city fell victim last week to what a physician might describe as the "San Diego syndrome."

A syndrome is a group of signs and symptoms that occur together and characterize a disease. Among the symptoms making up the "San Diego syndrome" are:

Hesitation.

Backwardness of view.

Scarcity of public facts.

Paucity of leadership.

An investigation into the reasons why the city apparently lost a gift other cities would fall over backward to get reveals all of these symptoms.

The background was this:

Three wealthy sisters named Putnam, liking San Diego and with ties to the community, established a foundation which held some of the finest pictures in the world. The foundation wanted to collect all of them in one place.

Another wealthy family named Timken had interests in San Diego, too, and also a foundation whose assets were not pictures but cash.

The two foundations got together and decided to use the one's cash to build a gallery next to the Fine Arts Gallery in Balboa Park in which would be placed the other's paintings.

Walter Ames, a prominent San Diego attorney, and A. J. Sutherland, an equally prominent San Diego banker, were directors of the Putnam Foundation. And, so the story goes, the two worked hard to put together all the loose ends in the deal which included persuading other directors, non-residents, that San Diego was the ideal location for the amalgamation of cash and paintings.

Thus, the healthy idea was born.

Meanwhile, the Fine Arts Society was proceeding with a plan to raise money to build a second addition to the gallery on the west side into which would go an art library, education section, and more space for paintings.

This idea, also born healthy, was identified as the "west wing" to differentiate from the Timken wing, housing the Putnam collection, on the east side of the gallery.

The directors of the Putnam Foundation hired an architect who drew sketches which evolved into a design for the Timken wing. The design was taken before the city Park and Recreation Commission and the city Planning Commission, the required and routine procedure, and both bodies approved.

At this point, the wing was described by the architect as of white marble construction in a “classical Spanish” style, with a massive bronze grill.

Later, when a hue and cry arose from part of the citizenry, the design was altered so that the white marble construction became a tan stone type of construction, more in harmony with existing buildings on El Prado in Balboa Park.

But little was said by foundation directors about the change, and most of the public never knew about it. This illustrated the symptom of lack of facts making up the San Diego syndrome.

The Timken directors, mindful of public criticism, decided not to publish a photograph of the revised design and this also illustrated the symptom of a lack of facts.

Then, an articulate segment of the population began to really criticize the wing as being incompatible with the remaining buildings along El Prado, a monstrosity, and other such terms. Here we have backwardness of view, another symptom.

Meanwhile, the Fine Arts Society decided to raise funds by running a newspaper ad. The ad was illustrated with a drawing of something labeled “proposed west wing.” But the drawing was not representative of the west wing, it turned out. It was merely something thrown together because an illustration was thought necessary.

However, the public believed it was and, not being told any different, voiced criticism of the west wing, too. The criticism mainly centered on the inappropriateness of a large, blocky glass-and-aluminum structure --- the impression created by the drawing.

The public was not told of the real design intended until last Friday when a model of the west wing was shown during a tour of Balboa Park for critics. The hesitation.

Actually, the real west wing design was impressive to a great many persons on the tour. Even a member of the most vocal group concerned said she liked it, although others had some doubts.

All of the brickbats being thrown discouraged the Putnam Foundation directors, and last week they announced the withdrawal of their plans. The model of the Timken wing was not even available for showing to critics.

The west wing, due to its secondary role in the controversy, remained alive and probably can overcome most of the criticism against it now that the public sees what it looks like.

But no leader came forward to support the Timken wing and the \$2 million art collection succumbed to the civic disease called the “San Diego syndrome.”

September 10, 1961, San Diego Union, A-41:1-8, A-43:1-3. Cabrillo Bridge: A Bridge to the World, by Floyd McCracken.

Thomas B. Hunter of San Francisco (the bridge designer) found what he sought at Ronda, Spain, where a picturesque multiple arch viaduct spanned Tajo Gorge.

Construction work was supervised by Frank P. Allen, San Diego’s Director of Works, who spent \$214,000 on the steel and concrete structure.

. . . it originally was designed --- for a foot bridge.

September 12, 1961, San Diego Union, A-15:2-4, A-21:7-8. Fine Arts Society of San Diego and Junior League of San Diego upset over loss of proposed Timken wing.

Both the Fine Arts Society of San Diego and the Junior League of San Diego yesterday expressed concern over the possible loss of the proposed Timken wing of the Fine Arts Gallery in Balboa Park.

The society's board of trustees made public a resolution it adopted Sunday urging the City Council to persuade the Timken and Putnam Foundations "to reinstate their munificent offer."

Mrs. Arthur Crews Wells, president of the Junior League, meanwhile, said the league executive board will meet today to adopt a similar resolution. She said it would be read to Mayor Dail today and delivered to the City Council before Thursday.

The concern by the two organizations stems from the Putnam Foundation's announcement last Thursday that it was dropping plans for a Timken wing at the Fine Arts Gallery.

The wing was to have been built by the Timken Foundation to house the Putnam Foundation's collection of old masters.

Members of the Balboa Park Protective Association had criticized drawings of the white marble Timken wing as a "supermarket."

The Fine Arts Society resolution was passed unanimously at a special meeting Sunday, William T. Stephens, president, said.

The resolution said the trustees "express their complete and vehement support of the proposals made to the city of San Diego by the Putnam and Timken Foundations."

It urged the City Council to "make every possible effort to persuade the Timken and Putnam Foundations to reinstate their munificent offer."

Mrs. Wells said the Junior League executive board would draft its resolution at a meeting in her home this morning. She believes the resolution will urge the City Council to go along with the Timken-Putnam plans.

The Asiatic Art Committee of the Fine Arts Society also has passed a resolution calling the Putnam Foundation withdrawal "tragic." The resolution was sent to Mayor Dail.

City officials are receiving numerous letters from citizens urging them to take steps to retain the Putnam Foundation collection for San Diego.

"I've had scores of letters to support the Timken wing," said Dail. "I think a lot of people may attend the council meeting this Thursday to voice their opinions on the withdrawal."

Councilman Allen Hitch said last week she will urge the council to adopt a resolution asking Putnam Foundation directors to reconsider.

Stephens told a reporter a large delegation of society trustees and members would attend a hearing by the City Council at 2 p.m. Thursday on the proposed master plan for Balboa Park.

September 13, 1961, San Diego Union, A-17:4, A-18:1. City Council to act on Timken wing; resolution okaying Putnam offer on docket tomorrow.

A resolution finding the proposed Timken Gallery "in harmony with architectural provisions of the Balboa Park master plan" was placed on the City Council docket yesterday.

The council will act tomorrow on the resolution, submitted by Councilman Justin Evenson.

The resolution accepts the offer of the Putnam Foundation to build the Timken Gallery and declares the building is a needed and desirable facility to further the educational and cultural development of the community.

Evenson said the resolution will be acted upon following a public hearing on the Balboa Park master plan which begins at 2 p.m. tomorrow.

Directors of the Putnam Foundation withdrew the offer to build the \$1 million Timken gallery following criticism of the proposed building. The gallery was to have housed a \$2 million collection of paintings.

Evenson's request to place his resolution on the docket tomorrow by unanimous consent was not disputed by other councilmen. Councilman Allen Hitch said his colleague's resolution made it unnecessary to introduce one he planned.

Mayor Dail said he did not know for sure whether the council's action on the resolution, assuming it is favorable, would change the minds of the directors.

"I don't think they're going to do anything until they receive some work on council action," he said.

The resolution said:

'WHEREAS, the Putnam Foundation has heretofore offered to construct a building in Balboa Park to be known as the Timken Gallery to house and publicly display art treasures consisting of paintings by 'old masters' owned by the Putnam Foundation; and

'WHEREAS, the design of the proposed building is in harmony with the architectural provisions of the Balboa Park master plan; and

"WHEREAS, said building with its public display of the Putnam art collection would result in San Diego becoming a focal point for art lovers and would provide opportunities for the citizens of San Diego and the visitors to San Diego to view the largest art gallery and collection of its kind in the western United States; and

"WHEREAS, said gallery would be a major contributing cause to the cultural and educational development of the community and would centralize the famous Putnam collection which is now exhibited in various museums on the East Coast, and

"WHEREAS, the offer heretofore made by the Putnam Foundation provides the city with the rarest of opportunities in acquiring for the citizens of San Diego a magnificent structure as a permanent facility in Balboa Park and offers visitors to Balboa Park the exceptional opportunity to view the famous and priceless paintings of the Putnam collection, now, therefore,

"BE IT RESOLVED, by the Council of the City of San Diego as follows:

"That the Council of the City of San Diego for and on behalf of the people of San Diego accepts the offer of the Putnam Foundation to construct a building for the Timken Gallery in accordance with the preliminary design plans heretofore presented by Frank L. Hope & Associates; and

'BE IT FURTHER RESOLVED that the proposed use of the housing of the art gallery is a needed and desirable facility to further the educational and cultural development of the community; and

"BE IT FURTHER RESOLVED by the council of said city that the city manager and the city attorney are hereby directed and empowered to contact the Putnam Foundation and work out all necessary arrangements for completing the project."

September 13, 1961, San Diego Union, B-2:7. Elsa P. Wilson wants Art Center in park to have same style as other El Prado buildings.

September 13, 1961, San Diego Union, B-2:7. Leo Turner wants popular selections at Organ Pavilion concerts.

September 14, 1961, San Diego Union, A-1:1-2. Hearing set today on gallery design.

September 14, 1961, San Diego Union, A-23:6-8, A-24:6-5. Council studies Timken Gallery proposal today; hearing slated on park plan; collection dates to 15th century.

The old masters' paintings offered by the Putnam Foundation to San Diego and endangered by a civic dispute on architectural styles for Balboa park date back to the early 15th century.

Valued at more than several million dollars, the collection includes the works of such great painters as Rembrandt, Titian and Rubens.

They were to be included in a new \$1 million wing to the Fine Arts Gallery in the park.

Paintings of the Dutch and Flemish 17th century period:

"St. Bartholomew," by Rembrandt; "Duke of Mantua," by Rubens; "View of Haarlem," by Jacob van Ruysdael; "The Grand Passage," landscape, by Meindert Hobbema; "A Pasturage Near Dordrecht," by Aelbert Cuyp --- all now at the Metropolitan Art Gallery in New York City; "The Letter," by Gabriel Metz, and "Portrait of a Man," by Franz Hals, both at the National Art Gallery, in Washington, D. C.

Italian, 15th and 16th centuries:

"Cardinal Bembo," by Titian (Metropolitan); "The Holy Family," by Paolo Veronese (National), and "The Madonna and Child," by Jacobello del Fiore (private collection).

Flemish and Franco Flemish, 15th and 16th centuries:

"Death of a Virgin," by Petrus Christus and "The Parable of the Sower," by Pieter Brueghel the Elder (both National); "Portrait of Gui XVII -Comte de Laval," by Francoise Clouet, and "Adoration of the Magi," by The Master of St. Lucia Legend (Metropolitan).

Spanish, 17th century period:

"Christ on the Cross," by Bartolome Murrillo (National).

French, 18th and 19th century periods:

"Portrait of Mr. Penrose," by Jacques Louis David (Metropolitan); "View of Volterra," by J. B. Corot and "Le Colin - Maillard," by Honore Fragonard (both National).

Russian, 16th and 19th centuries:

"Portrait of Countess Samoilova," by Carl P. Brulov and "The Burning of Moscow," by Vasili Veret Schchagin (both in private collections).

The proposed \$1 million Timken gallery will be considered today by the City Council in view of growing public demands to acquire it as a home for the Putnam Foundation's collection of valuable paintings.

Councilman Justin Evenson said he will offer a resolution to adopt the plans for the gallery in a last-minute effort to preserve the famous old masters' paintings for San Diego.

Evenson was joined yesterday by the Chamber of Commerce and the Convention and Tourist Bureau, which passed resolutions urging the council to override criticism and accept the gallery design.

"San Diegans as a whole are deeply concerned over the possible loss to this city of the gifts of the Putnam and Timken foundations," the chamber said in an announcement.

The Convention and Tourist Bureau called the offers a "remarkably generous combination" to benefit the city's visitor business.

The council meeting will begin at 2 p.m. in the council chamber in the Civic Center.

The resolution to be offered by Evenson will be considered after a public hearing on a proposed master plan for Balboa park.

The gifts of the paintings and the Timken wing to the Fine Arts Gallery in the park were endangered recently when architects' designs were criticized as being inappropriate to existing building styles there.

One person said the two-story tan-colored wing would take on the appearance of a "supermarket."

It was after this public dispute that Walter Ames, trustee president of the Putnam Foundation, said the offer to give the collection to San Diego had been withdrawn.

Ames said yesterday that "public interest has indicated a change in the situation," but he declined to speculate on whether the collection, valued at several million dollars, could be saved for the city. He will not attend the council meeting, he said.

:There is no question that other cities would like to have them," he said, adding he had no information about a reported offer from a group in Phoenix to build a gallery to house the collection.

Several colleges have indicated strong interest, Ames went on, "and two years ago the director of the National Art Gallery (Washington, D. C.) made a special trip out here to try to keep them."

The 20 paintings are now housed in private collections, the National Art Gallery and the Metropolitan Museum of Art in New York City.

James A. Leftwich, a La Jolla publicist-writer and former public relations director of a New York art museum, Sunday announced formation of a public group to acquire the paintings for La Jolla.

He said the group included Tim Sellew, former president of the La Jolla Town Council, and other prominent persons.

The Convention and Tourist Bureau's announcement said:

"This resolution is drawn with strong feelings that this Putnam-Timken gallery, in combination with the existing Fine Arts Gallery and its proposed west wing, will provide San Diego with one of the most formidable new visitor attractions --- of truly international dimensions --- that our area has ever acquired."

Edward A. Heilbron, chairman of the chamber's parks and recreation facilities committee, said:

“It is the belief of committee members that every effort should be extended to have the City Council take immediate action to appeal to the foundation representatives to reinstate the gift offer.”

Directors agreed that the chamber should point to San Diego’s eagerness “to become the beneficiary of these treasured works of art and a building to house them,” Heilbron said.

September 14, 1961, San Diego Union, B-2:2. EDITORIAL: Time For Action.

The City Council can take a step to restore public confidence today when it considers a belated resolution accepting the Putnam and Timken foundations combined \$3 million offering of an art gallery wing and valuable paintings.

The long overdue resolution may be too late, but it does offer encouraging hope that the council is climbing from the doldrums. As Mayor Dail has indicated, he and the councilmen should stand up and be counted on this issue.

The council until now has been unduly influenced by varied pressure groups, but judging from the mail it has received and from that sent to this newspaper, the voters of San Diego believe that the failure of the city government to act sooner is nothing less than disgraceful.

We urge the council to vote unanimously to adopt the offer for the gallery and paintings --- and then to seek in the most persuasive way possible to convince the trustees to let the past mistakes be forgotten.

September 14, 1961, San Diego Union, B-2:7-8. Donald J. Brewer, La Jolla, writes art gallery loss is tragic.

The BPPA is one of these “protective” groups that really symbolize a sort of immaturity to cope with change and kind of civic sickness that expresses itself in hysterical concern over the facade rather than the heart of things. . . .

I am sure there are thousands who don’t wish to be “protected” from intelligent thought and rational action and, in addition, from seeing the Putnam collection becoming a great San Diego cultural resource.

September 14, 1961, San Diego Union, B-2:8. Paul S. Anderson, San Diego, urges BPPA to offer the City an “equivalent gift.”

The only fair thing that a reactionary group can do is to raise the millions of dollars to offer the city an equivalent gift. Should our council allow San Diego to lose such a tremendous gift unless there is an equal alternative?

September 15, 1961, San Diego Union, A-1:1-2, A-2:6-8 City Council finds Timken gallery in harmony with Balboa Park’s Master Plan by a 7-0 vote, by Edwin G. Martin.

A resolution find the Timken Gallery in harmony with the Balboa Park master plan was approved by a 7-0 vote yesterday in the City Council. The master plan was also adopted.

The unanimous action climaxed a public hearing that attracted about 300 persons to the council chamber, one of the largest in recent years.

Mayor Dail said the volume of mail, telephone calls and personal contacts by citizens in support of the Timken gallery was one of “the greatest I have ever seen.”

“It was just tremendous,” he said in an interview. “I haven’t seen anything like it recently.”

Dail said he will try to arrange a meeting with Walter Ames, an attorney, and A. J. Sutherland, a banker, directors of the Putnam Foundation, to persuade them to reconsider and build the gallery.

He said he will try to arrange such a meeting at his office today.

“We’ll implore them to change their minds,” Dail said. “I want to show them all the letters from San Diegans and the other evidence of the support for the gallery which has been generated here on a scale never before attempted.”

After the council session Ames made public this statement:

“We appreciate and shall not ignore the action of the City Council even though it comes at a late date. The interest expressed by the public has amazed us.

“We will bring all these facts to the attention of the several persons (not identified in the statement) who will take part in any further decisions. We cannot indicate how soon any additional announcement can be made, and have no other comment at this time.”

Ames and Sutherland shelved plans for the \$1 million gallery and a \$2 million collection of old masters’ paintings last week after criticism of the architecture of the gallery.

Overshadowed by the council’s approval of the resolution concerning the Timken Gallery was the accompanying unanimous vote to approve a master plan for development of Balboa Park as modified by the Planning Commission.

Drawn by Harland Bartholomew & Associates, a St. Louis planning firm, the master plan outlines a 15-year program of development --- including the demolition and removal of certain buildings, construction of new roads, relocation farther east of Park Boulevard and rehabilitation of some structures.

The modifications included a change in a planned road to run behind the Old Globe Theater. Instead of being a surface road at that point, a deep cut will be made to carry the road past the theater. City officials hoped to eliminate any traffic noise by lowering the road.

Twenty-one speakers, representing organizations ranging from the Chamber of Commerce to the Central Labor Council, indorsed the master plan and the architecture of the proposed Timken wing.

“I don’t believe I’ve seen a more aroused group of citizens,” said Dallas Clark, president of the Symphony Association and coordinator of the program put on by those supporting the master plan and Timken Gallery.

“We actually had to limit the number of speakers because so many wanted to come forward. And our plea is simple. We want the Timken Gallery in San Diego, Clark said.

Ross Tharp, attorney for the Balboa Park Protective Association and former councilman, spoke for the opposition to the Timken Gallery.

“All the association asks is that the architecture theme of the Prado area be preserved as new buildings replace the old,” Tharp said.

Tharp said the BPPA believe the proper procedure to be appointment of an architectural committee, composed of laymen and architects, to evaluate the architectural them of each new or rehabilitated building.

The committee, Tharp said, would “insure that (the buildings) would be harmonious with the architectural design criteria of the master plan.”

He pointed out that Bartholomew & Associates recommended that new buildings “be required to harmonize with classic Spanish architecture” and said the association agreed with that statement.

(Proponents and opponents of the Timken Gallery have differed over whether the tan-marble building is sufficiently Spanish-flavored and therein lies the heart of the controversy.)

Tharp also said the BPPA indorses the proposals of the Bartholomew master plan “in general: but will reserve judgment on specific details until the specifics are ready for presentation to the council and public.

One exception to the indorsement was the recommendation to close El Prado to vehicles between the east end of Cabrillo Bridge and Park Boulevard, Tharp noted. The BPPA has opposed the closing, which Bartholomew said would return El Prado to pedestrians as it was in the 1914-15 [sic] exposition.

Mrs. Virginia Burrell, a BPPA member, told the council the organization has been accused unfairly of being a “meddling and quibbling group.”

“We’re not,” she said. “We’re just citizens sincerely interested in preserving the beauty of the park. Both the Timken Gallery and the proposed west wing of the Fine Arts Gallery are beautiful buildings --- they just don’t fit into the Prado area.”

Warren Beach, Fine Arts Gallery director, described the paintings in the Putnam Foundation collection for the Council and said the loss of the gift would “damage the city’s reputation.”

“The Timken Gallery is a honey of a building; it will be a pleasure to operate and a sheer delight to visit,” Beach said. “Generations to come will be inspired by these masterpieces.”

William T. Stephens, president of the Fine Arts Society, pointed out that one aspect of the Putnam Foundation’s gift has been overlooked; that fact that more and more paintings will be brought here.

“The foundation has enough capital to insure a sufficient annual income to purchase one or two masterpieces each year,” Stephens said.

September 15, 1961, San Diego Union, A-1:2, A-2:6-7. Six buildings recommended for demolition in Bartholomew master plan.

Six buildings in the area of El Prado in Balboa Park are recommended for demolition in the Bartholomew master plan for park development adopted yesterday by the City Council.

Most would not be torn down, however, until new ones are ready to be built.

The master plan recommends:

1. Demolition of the present Administration Building and landscaping of the site.
2. Replacement of the Food and Beverage Building by a garden center possibly operated under auspices of the Floral Association.
3. Demolition of the Electric Building with the site landscaped and held ready for a future new home for the Museum of Man.
4. Construction of a new west wing of the Fine Arts Gallery where the Medical Arts Building now stands.

5. Demolition of the American Legion Building and replacement with the proposed new Timken Gallery of the Putnam Foundation.
6. Demolition of the House of Charm with the site reserved for a proposed sports museum.

Arcades should be retained or replaced along El Prado to unify the area as it is now, the master plan states.

Other key recommendations of the master plan include closing of El Prado to vehicular traffic between the east end of Cabrillo Bridge and Park Boulevard. Traffic crossing Cabrillo Bridge would be rerouted on peripheral roads north and south of El Prado.

The master plan recommends relocating Park Boulevard farther east along the general alignment of the old streetcar tracks, which will open more parking for the San Diego Zoo and will remove traffic from view.

In the Palisades area, the master plan recommends tearing down the Ford Building and replacing it with a scenic overlook and fountain; demolishing the Municipal Gymnasium, Balboa Park Club, Conference Building and Palisades Building; remodeling of the Federal Building and conversion of the center asphalt parking lot to a landscaped open spot.

These changes, according to the master plan, would not occur immediately and would depend on finances and development of substitute facilities elsewhere. The gym, for example, would remain until a new one can be built in the Morley Field area, which will be a centralized sports area.

The plan envisions a 15-year, three-stage financing program. The first stage would cost about \$7.5 million, the second about \$7.75 million and the third about \$6 million. About \$9 million of this would be in private financing, leaving about \$12.5 million to be financed publicly.

September 16, 1961, San Diego Union, 1:1. Proposal to convert basement of Ford Building into a fallout shelter.

September 16, 1961, San Diego Union, A-13:1-2. Dail believes Park Gallery will be built, by Edwin G. Martin.

Mayor Dail said yesterday that he had "reason to believe" the directors of the Putnam Foundation will reconsider and build the Timken Gallery in Balboa Park.

September 16, 1961, San Diego Union, A-21:1. City will study Ford Building as shelter.

September 16, 1961, San Diego Union, B-2:1. EDITORIAL: Building Balboa Park.

City Council approval of a Balboa Park master plan which includes the Timken gallery is an encouraging step toward progressive leadership.

By its decisive action the council may have saved the gallery and the priceless collection for San Diego. We hope so. The council's earlier delay threatened to lose this wonderful asst.

Actually the people showed more leadership than the council. By their overwhelming desire to gain the gallery and its priceless collection of paintings they convinced the council to act. The council wisely followed, but it should have led.

On the Balboa Park master plan itself, the council again almost lost control through inaction. Six public hearings --- two by the Planning Commission and four by the council --- have been held since a proposed plan was made by Harland Bartholomew & Associates in July 1960. Nobody can say it has not been discussed enough.

Now the council must decide how to design and finance a Balboa Park for future generations. We believe the best agency to help would be a stronger version of the present Park and Recreation Commission with control over landscaping, architecture and financing studies.

In its recommendations to the council, the commission must be so constituted as to present the opinion of all San Diegans --- the cross-section of views expressed at Friday's council meeting.

The people spoke Friday and the council listened and acted correctly. We believe that if the council continues to assume leadership the people will listen and react wisely to support implementation of the Balboa Park master plan.

September 16, 1961, San Diego Union, B-2:7. Thomas B. Robertson writes 20 years of work behind art gift.

Editor: Those well-intentioned persons whose efforts might have backed acceptance for San Diego of one of this generation's great art collections are perhaps unaware of the 20 years of striving which lie behind the offer of this \$1 million gift.

The Misses Putnam began to purchase first-quality Italian Renaissance and Baroque paintings for the Fine Arts Gallery as early as 1940, under the guidance of Reginald Poland, its founding director. His resignation in 1950 and departure from the city to pursue his career elsewhere were a personal sacrifice intended to clear the way for continued gifts to San Diego by the just-established multi-million dollar Putnam Foundation.

Since then some 18 paintings have been purchased by the foundation, valued at more than \$2 million. They are now on loan to such leading museums as the National Gallery of Art, Washington, D. C., the Metropolitan Museum in New York, the Toledo Museum of Art, and others.

Poland also guided the early benefactions of the Timken family, including gift of the gallery building itself by Mr. and Mrs. Appleton S. Bridges (she was a Miss Timken).

Also to be mentioned is the leadership exercised in the trying period following Poland's departure by the able president of the Fine Arts Society --- Edmund T. Prince and the late Mrs. May Marcy. The present set-back (which we can still hope may not prove final) would surely be a disappointment to all these people --- as it is to the writer.

September 18, 1961, Letter, Donald S. Bertram, Vice-Commander, American Legion, North Island Service Post No. 753, San Diego, Calif. to Mr. Walter Ames, Director, Putnam Foundation, Bank of America Building, San Diego, Calif.

Dear Mr. Ames:

At the last regular meeting of North Island Service Post No. 753, after being moved, seconded and discussed (without any dissent it might be added) the undersigned was directed to write this letter apprising you of the sentiments of the body.

Our Post believes that a minority group, however vocal, should not be allowed to give the impression that it speaks for the community. It was further felt that the Putnam Foundation should be asked to disregard the ill-advised words and actions of such a minority, and be urged to reconsider its withdrawal of the offer to the City of San Diego of the Timken Art Gallery to be located in Balboa Park.

This organization, and nearly all civic-minded citizens, deeply regret the lack of courtesy and dignity evidenced by the few opposed to the Timken Art Gallery. They certainly did not voice the opinion of the great majority of San Diegans (both city and county residents) who would be benefited by the proposed gallery.

The American Legion and this Post, stress very strongly service to the community, to education, and by our various programs the welfare of our younger generation. Your offer, so generously made, was in the best tradition of such service.

The present Department Commander of the State of California, Roscoe Morse, is a member of our Post and I am sure he would concur wholeheartedly in these sentiments.

To its officers, and to the Foundation (whether your offer is reinstated or if you decide to go elsewhere), we wish continued success in your endeavors. We earnestly ask you to share that success with us here in the city and county of San Diego.

Very sincerely yours,

(signed) Donald S. Bertram
Vice-Commander.

September 18, 1961, San Diego Union, A-15:1. Art collecting sisters came to San Diego in 1913.

The Putnam Foundation, which has offered a collection of valuable art works to San Diego, was founded by two sisters who first moved to the city in 1913.

Miss Anne Putnam lives in a spacious Hillcrest home. Miss Amy Putnam died here July 23, 1958.

Nieces of the later Henry W. Putnam, a pioneer industrialist and inventor, the Putnam sisters shared his interest in the fine arts and civic betterment of San Diego.

Putnam commissioned Leland Stanford White, an internationally famous architect, to design a home for him which became a showpiece of the West. The two-story frame and concrete structure occupied an entire block between Third and Fourth Avenues and Maple and Nutmeg Streets.

Another block south of it, between Laurel and Maple, was planted as a garden.

The home was one of seven in California designed by White, who later was shot fatally on the Waldorf Astoria Hotel roof in New York City by Henry K. Thaw because of attentions White paid Thaw's wife, Evelyn Nesbitt Thaw.

The home later was razed for a parking lot.

Putnam died in Miami, Fla. in 1915, bequeathing his estate to relatives.

His nieces, Anne and Amy Putnam, acquired the valuable paintings through the Putnam Foundation, placing them in the Metropolitan Museum of Art in New York City, the National Art Gallery in Washington, D. C. and the Chicago Art Institute.

The foundation recently offered them to San Diego to be added to a proposed new wing to the Fine Arts Gallery in Balboa Park.

September 18, 1961, San Diego Union, A-15:1-3. Balboa Park fire burns two acres; cigarette blamed (illus.).

A two-alarm fire blamed on a carelessly discarded cigarette yesterday burned two acres of pine trees and shrubs near the Quince Street bridge and U. S. 395 in Balboa Park.

September 19, 1961, San Diego Union, A-16:4. Architect's view --- 1915 buildings "temporary."

The architect who designed the buildings lining El Prado in Balboa Park did not expect any of them to remain after the 1915-16 Panama-California Exposition, except the California Building and the Fine Arts Building.

In fact, the architect recommended that the other buildings be razed.

This came to light yesterday in a letter to the City Council by Philip L. Gildred, a former city planning commissioner, which included excerpts from an article by the architect, Bertram Grosvenor Goodhue.

Gildred congratulated the council on its decision to approve the proposed Timken-Putnam wing to the Fine Arts Gallery and on adopting the park master plan.

In the article, written in 1916, Goodhue said the "temporary buildings" built along El Prado for the exposition were not to be considered "other than temporary, for it must be remembered that exposition architecture differs from that of our everyday world in being essentially of the fabric of a dream --- not to endure but to produce a merely temporary effect. It should provide, after the fashion that stage scenery provides, illusion rather than reality."

Later he wrote: "So at San Diego, the (Cabrillo) bridge, the domed-and-towered California State Building and the low-lying Fine Arts Building were to remain: the rest was to be swept away utterly."

Goodhue concluded the article by writing, "and only by thus razing all of the temporary buildings will San Diego enter upon the heritage that is rightfully hers."

September 19, 1961, San Diego Union, B-2:7-8. Alan Cheesboro supports new art gallery in park.

September 22, 1961, San Diego Union, B-2:7. Joanne C. Perry says proposed art wing beautiful.

September 23, 1961, San Diego Union, 15:1. Plans for west wing of Fine Arts Gallery unveiled yesterday morning at a press review in the Fine Arts Gallery, cost \$2 million.

The replica of the initial building of the \$2million addition was a low, one-story structure.

"We hope this proposed wing will become one of the nation's outstanding exhibition centers," said Warren Beach, gallery director. "It is planned to exhibit art to the very best advantage.

"The specially lighted patios, pool area and galleries are designed for maximum viewing in an artistic atmosphere."

Plans for the wing, which would be built and given to the city by the Fine Arts Society, have been approved by the Park and Recreation Commission. They now await approval of the city Planning Commission and the City Council.

The first section of the wing, which would cost an estimated \$1,300,000 would house a 450-seat auditorium, new library, sculpture courts and a shipping and receiving center. Later, classrooms, which would cost \$750,000, would be added.

The society has raised \$650,000 to date.

"The wing is to provide two-thirds more exhibition space for early American and Asiatic arts and areas for temporary shows," Beach said.

Robert Mosher and Roy Drew of La Jolla were architects for the new structure. Malcolm Leland of Los Angeles was the sculptor; Richard Kelly of New York, the lighting consultant; George Saunders of San Diego, the structural engineer, and Beranek & Newmann, acoustical consultants.

"Together with the Timken Gallery, this addition will make the Fine Arts Gallery complex in San Diego one of the really outstanding ones in the United States," Beach said. "Our gallery is now one of the 30 outstanding ones in the nation. It will jump to 20th place or better."

The future of the million-dollar Timken Gallery offered by the Putnam Foundation and later withdrawn because of criticism of the proposed structure by the Balboa Park Protective Association has not been settled.

City officials have held several meetings on the subject with Walter Ames, one of the local trustees of the foundation.

The Timken Gallery was to exhibit the Putnam Foundation's \$2 million collection of old masters as a gift to the city.

October, 1961, San Diego Magazine. Publisher's Point: Lessons from the Timken Wing.

Whether the electorate yet realizes it or not, the present grand design of Balboa Park's El Prado --- its dazzling row of ornate, fake Spanish Renaissance palaces --- is finished. The City Council did it in, 7-0, when it begged the Timken trustees please to re-instate their offer of a \$1,000,000 contemporary marble edifice, with no architectural strings attached, to be built on the site of the present American Legion building. One can understand the Council's abject distress at booting away a \$2,000,000 collection of old master paintings --- and its dismay at the overwhelming pressure brought to bear by the Chamber of Commerce, the Junior League, the Fine Arts Society, and the Symphony Association to get it back or else. But now, if the gift is re-instated as seems likely, for better or for worse, the city has embarked on a new, dangerous --- and highly challenging

--- experiment: the partial rebuilding of Balboa Park attempting to preserve the best of the old (the California Building, the Fine Arts Gallery) at the same time creating new architecture compatible with the old and as good or better than the beloved if sham Spanish relics of 195. It is going to be an awfully difficult job under the best circumstances --- calling for rare architectural excellence and taste --- but it hasn't a ghost of a chance at success if it is done with the to-hell-with-the-public spirit which has marked the Timken wing controversy. Fortunately, Robert Mosher and Roy Drew's plan for the new West wing --- taken by itself --- seems an imaginative and beautiful design for an art gallery, harmonizing with the spirit of the park and with the Fine Arts Gallery. But it was sheer idiocy for the city not to insist long before the Timken matter came to a head at the Council level --- at which point Walter Ames had to right to get sore --- that the two wings be designed with each other in mind to create an integrated whole for the Plaza de Panama --- the secret of the visual success of the chicken-wire and plaster dream palaces of the Prado. Secondly, it was the worst possible public policy to permit either group, both of them quasi-public bodies, operating on public land, to keep their building plans so clothed in secrecy. The result of debating the issue in an emotional climate in which no one had the facts could not be other than an uninformed, ignorant plunge into the dark. Either there must be better planning conducted in an open manner or our New Balboa Park will deteriorate in a hodgepodge of architectural styles and individual monuments.

October, 1961, San Diego Magazine, 62. The formal, feisty Timken wing (illus.)

Edwardsonian screening in bronze was employed in the Frank Hope design of the Timken wing to provide Spanish-influence touch. In most other respects, the gallery is a contemporary building tied in with the existing Fine Arts Gallery and the Mosher and Drew west wing by color harmony.

"A honey of a layout for an art gallery," is the way one highly respected La Jolla architect, who has seen the plans, describes Frank Hope's very formal design for the proposed Timken wing to house the \$2 million collection of old master painting belonging to the Putnam Foundation. Its exterior skin would be of tan travertine, not white marble as originally planned, the better to tie in with the color tones of the Fine Arts Gallery to the north and the proposed West wing across the Plaza. It will replace the present dilapidated American Legion building, provided the City Council can persuade the trustees of the Foundation to reinstate their offer, which they withdrew in the face of adverse public criticism of their design as too radical a departure from the Spanish-Renaissance buildings of El Prado and an unnecessary destruction of the area's architectural unity. Since then, the Council has done its begging best to say it's sorry. Whether trustee Walter Ames, a San Diego attorney, really had problems with the Eastern money he represents, whether he simply was hurt by the criticism after he had worked so hard to get this gift for the city, or whether he was employing all the wile and wisdom of his 60 years in a master stroke of reverse psychology was not known. Whatever the motive (or motives) his move worked.

November 10, 1961, San Diego Union, 21:7-8. City Council approved west wing Fine Arts Gallery on a 5-2 vote, by Edwin G. Martin (illus.).

The design of the proposed \$1.5 million west wing of the Fine Arts Gallery in Balboa Park was approved yesterday on a 5-2 vote.

Approval of the council was the final step necessary. Construction should begin in about a year, according to Robert Mosher, a partner in Mosher & Drew, architectural firm.

He said seven to nine months will be required to complete working drawings for the construction with bidding procedures and other work requiring another three to five months.

Mosher told the council that the Fine Arts Society has about half of the money needed to building, including a \$200,000 contribution from the city.

Mayor Dail and Councilman Allen Hitch voted against approving the design after the council had heard arguments pro and con during a two-hour hearing.

Highlighting the hearing was an argument by Dail and council members with Henri Jacot, vice president of the Balboa Park Protective Association, which opposed the Mosher & Drew design as being incompatible with existing Spanish-type buildings along El Prado.

Jacot said the council was “railroading: the approval and his remark touched off a debate on whether the full membership of the BPPA felt as Jacot did concerning the design.

“Have you ever taken a vote of your members?” asked Councilman Justin Evenson.

“Well, we have felt that if any of our members don’t agree with our stand on this, they would resign,” replied Jacot.

Pressed by Evenson and Councilman Harry Scheidle, Jacot admitted that no formal vote had ever been taken, the only expressing being a show of hands by members present at one meeting.

Jacot and Mrs. Eleanor Edmiston, BPPA president, urged the council to withhold approval until an architectural committee composed of professionals and laymen could be organized and could study the design of all buildings proposed for El Prado.

They pointed out that the council had previously passed a motion to appoint such a committee as one of three to study various aspects of the Balboa Park master plan.

Councilman Ivor de Kirby replied that he had made the motion but the matter has been dropped. He said his idea was to have the committees function under the Park and Recreation Commission, but he later found that the commission has approved the master plan and designs for the art gallery wings.

“Since the commission has already approved, there’s no reason to have the committees,” De Kirby said. “It would be just backing up again.”

Mrs. Pat Murphy, an officer of the Better Government Association and a BPPA member, criticized the Mosher & Drew design as “architecture so basic that it could be the point of departure for almost any style --- Spanish, modern or even Gothic.”

“It’s nothing but four walls, a flat roof and a bunch of columns,” Mrs. Murphy said.

“It’s no more Spanish than a Salvation Army lassie would be if you put a tambourine in her hand.”

She urged the council to put the proposed gallery wing somewhere else in the park, possibly in the Palisades area which she said could be rebuilt as a site for modern buildings.

Jacot said the flat-roofed west wing would be incongruous on El Prado.

Mosher, in defending the design, said the building will be “appropriate to the park, a great addition to the community and is, in all humility, a building of excellence.”

He said costs were a prime consideration in the design and every effort was made to create a building which would harmonize with the existing art gallery, the proposed new Timken-Putnam gallery; other buildings on El Prado; fulfill the requirements of the gallery for exhibition space --- and be as inexpensive as possible.

The San Diego Chapter of the American Institute of Architects has indorsed the design as has a number of other civic organizations and individuals.

The west wing is separate from the proposed Timken-Putnam Gallery, whose design also was criticized severely before being approved by the council. The Timken-Putnam wing's construction now is pending approval of Putnam Foundation directors.

November 10, 1961, San Diego Union, A-26:1-2. Twenty four million dollars okayed for park program.

A \$24.39 million capital outlay program for parks and recreation projects was approved yesterday by the City Council in conference.

The parks and recreation program, covering the years 1961-62 through 1966-67, was the last remaining section of the city's six-year capital improvement project to be approved.

The total six-year program amounts to \$181.48 million including contemplated general obligation bond issue financing. The council earlier had approved the 1961-62 portion of the capital program.

Approval by the council followed a discussion with the city Parks and Recreation Commission.

Dr. Frank Lowe, commission chairman, said the commission indorsed the capital program as it applied to parks and recreation projects. But he added that an additional \$442,300 be included for miscellaneous Balboa Park projects in the 1966-67 year.

This would change the amount of general obligation bond issue financing required for parks from \$7.55 million to about \$8 million. The council has not decided on exact amounts.

Lowe's request led to a motion of Councilman Harry Scheidle that the Park and Recreation Commission restudy the bond need for projects in its province.

"If you have a need for more, you should request it," Scheidle said. "But the requests should be based on the amount needed for specific projects."

Richard Bowen, a commissioner, told the council that he was concerned over dovetailing of the Balboa Park master plan into the capital outlay program.

November 11, 1961, San Diego Union, A-17:4. San Diego Zoo - hippo born at Zoo yesterday.

November 11, 1961, San Diego Union, B-1:4-5. Massing of Colors at Organ Pavilion tomorrow; more than 250 organizations will be represented.

November 13, 1961, San Diego Union, A-15:8, A-19:8. Massing of Colors at Organ Pavilion; General Clyde D. Eddleman, Army vice chief of staff, urges vigilance, by Charles Eischen (illus.).

Parades of flags by military and veteran organizations opened San Diego's tribute to its war dead yesterday at annual Massing of Colors ceremony at Balboa Park. Some 6,000 persons, including a group of Spanish-American war veterans, attended.

November 16, 1961, San Diego Union, B-2:2. EDITORIAL: A Jewel in the Park.

The City Council acted wisely and decisively in approving plans for the west wing of the Fine Arts Gallery in Balboa Park.

Council action, by a 5 to 2 vote, stood out in contrast to its delay on approving the east wing. The negative vote of Councilman Allen Hitch can be laid to his usual obtrusiveness. Mayor Dail's no vote is harder to explain.

The west wing is the first step in plans to expand the gallery complex and make it one of the finest exhibition centers in the nation.

The Fine Arts Society deserves much praise for its determination to build this wing in the face of vocal opposition over its architectural style. We hope the council's decision will be another spur toward construction of the east wing and completion of the gallery as a jewel in the midst of our beautiful Balboa Park.

November 21, 1961, San Diego Union, A-17:6-8. San Diego Zoo - Aardvarks Limited, gourmet group, have lunch at Zoo.

December 31, 1961, San Diego Union, E-1:1-2. Old Globe Theater follows trend to the suburbs; experimental branch at the Art Center in La Jolla will feature new and little known productions; series of three plays will mark theater's spring debut, by Regina Morin.

1962

Summary of Events

Arcade design competition (January 25, 1962)

Orchids in Conference Building (March 11, 1962)

Last concert Bonham Brothers Boys Ban in Balboa Park Bowl (March 12 ,1962)

Cabrillo freeway widening (May 18, 1962)

Park bond election with \$2.29 million for Balboa Park; defeated (June 7, 1962)

Alcazar Garden renovation (June 7, 1962)

Biology Institute at Zoo (July 24, 1962)

Paid parking in three lots approved (August 10, 1962)

Fine Arts Gallery addition (August 24, 1962)

Home Show in Electric Building (August 30, 1962)

Engineering study to repair California Tower authorized (September 3, 1962)

Problem of all-day parkers in park (September 8, 1962)

Mexico Independence Day festivities (September 16, 1962)

Symphony, Old Globe, Starlight seasons (September 23, 1962)

Aerospace displays in Conference Building (September 23, 1962)

Piano festival (September 24, 1962)

Routing of traffic through Maple Canyon (October 13, 1962)

Three-day Square Dance festival (November 1, 1962)

Appliance display in Electric Building (November 28, 1962)

Christmas Tree Lane (December 3, 1962)

Second set of park bonds rejected (December 12, 1962)

Old Globe remodeling plans (December 13, 1962)

January 2, 1962, San Diego Union, A-17:8. Work on Center City will start this week; theater, meeting hall first.

January 13, 1962, San Diego Union, B-1:1-2. San Diego Zoo - Aardvarks; Zoo stay a short one (photo: This sky aardvark inspects her new glass-walled tunnel home, in which she was placed three days before her death. Animal was Zoo attraction.)

January 24, 1962, San Diego Union, A-17:1-2, A-18:1-2. City backs alterations for Stadium; Council tentatively approves \$155,800 improvement plans.

January 25, 1962, San Diego Union, A-17:4-5. Competition urged on Balboa Park arcade design.

The contest would be open to all of the approximately 150 registered architects here and would not be limited to AIA members.

January 27, 1962, San Diego Union, B-2:6-7. Mrs. J. J. Kenneally writes park improvement help needed.

It puzzles me that the city is now spending its second million on the Chargers and just can't find funds to even maintain Balboa Park.

January 31, 1962, San Diego Union, A-19:5. City Council okays Center City architects.

January 31, 1962, San Diego Union, A-19:6-8. \$22.6 million bond election plan backed; port issue vote also supported

\$12.6 for Mission Bay
10.0 for Parks and Recreation (about \$2.29 million for Balboa Park)

1.9 for Harbor Island
2.4 for 10th Avenue Terminal

February 8, 1962, San Diego Union, B-2:8. Helen Goodman protests rule that Junior Theater must reimburse the city \$7,200 by June 1, or else this service will not longer be offered as a cultural activity.

February 21, 1962, San Diego Union, A-17:8. The City Council yesterday approved the hiring of an engineer to design \$155,000 in improvements to Balboa Stadium.

February 22, 1962, San Diego Union, A-22:4. Joint board of city, bay parks urged; change in appointment of members of the Park and Recreation Commission suggested.

February 25, 1962, San Diego Union, A-13:8. San Diegans at a Town Hall meeting yesterday were asked to help the city keep pace with its future promise by support of \$26.9 million in bond issues on the June ballot, by Nick Williams.

March 5, 1962, San Diego Union, A-15:4-5. Project start due at Alcazar Garden, by Nick Williams.

March 7, 1962, San Diego Union, A-19:5, A-20:8. City Council okays delay in 23 projects; Balboa Park projects deferred: California Tower improvements, \$25,000; replacement of lily pool balustrades, \$7,300; construction of electric cart storage building at 18-hole golf course, \$30,000; rewiring Natural History Museum's electrical circuits, \$41,200.

March 9, 1962, San Diego Union, A-22:4-5. War Against Litter Committee lauds Alcazar renovation project.

March 9, 1962, San Diego Union, A-22:7-8. Balboa Park plan revision proposal detailed.

Organization and a suggested course of action for a 50-member citizens' committee to update the city's 1956 master plan for park and recreation were given to the City Council yesterday.

March 11, 1962, San Diego Union, F-1:1-8, F-12:2. Balboa Park will have orchids by the handful next Saturday and Sunday in the Conference Building.

March 12, 1962, San Diego Union, A-9:1-2, A-10:1. Last concert slated for Bonham Brothers Boys Band April 22 in Balboa Park Bowl; Bonham group will end 36 years here, by Michael O'Connor.

March 17, 1962, San Diego Union, B-2:7-8. Mrs. George Goodman asks City Council aid for Junior Theater.

In compliance with the notice given the San Diego Junior Theater that it must reimburse the city \$7,200 by June 1, the money was raised by a non-tax deductible fashion show on March 5 through the efforts of the San Diego Youth Symphony, the San Diego Civic Ballet and the San Diego Junior Theater. Such cooperation was fine but cannot be considered as a prediction of ability to play . . . forever.

March 20, 1962, San Diego Union, A-15:4-5. Anne Putnam, 94, funeral today; art patron; died Sunday.

March 22, 1962, San Diego Union, A-24:1-4. Three members of the City Council have submitted their appointees to a citizens committee which will update San Diego's 1956 Master Plan for Parks and Recreation.

March 25, 1962, San Diego Union, A-15:4. Cancer Memorial Service at Organ Pavilion April to open April cancer crusade..

March 27, 1962, San Diego Union, A-17:1. Renewed paths provided for Alcazar Garden (illus.).

April 12, 1962, San Diego Union, A-17:1-2. City Park and Recreation Commission yesterday recommended a study aimed at getting rid of all-day auto parkers in Balboa Park; cited main areas involved; gave suggestions for solving problem.

Pauline des Granges, assistant park and recreation director, said some aircraft workers have been in the habit of parking in Balboa Park and catching a ride to their plants with co-workers.

May 16, 1962, San Diego Union, A-18:5-7. Women in recreation units will tour city's park sites.

May 16, 1962, San Diego Union, A-18:8. San Diego Taxpayers' Association backs four city bond issues.

May 17, 1962, San Diego Union, A-31:1-2. One of the largest of 40 community parks which will be created by the passage of Proposition N, the \$10 million Park and Recreation bond issue appearing on the June 5 ballot is San Clemente Canyon. Improvements to the canyon, which is owned by the city, will include access roads and parking lots, picnic facilities, restrooms, utilities and sprinklers. Cost is estimated at \$500,000 and completion would be in 1966 or 1967 (map of proposed San Clemente Canyon Park).

May 18, 1962, San Diego Union, A-2. The measure calls for a municipal bond issue to finance development of a 1,765 acre recreation area north of Mission Gorge Road, at the northeast extremity of San Diego city limits.

The proposal is for the city to acquire 1,358 acres of land, now a part of Camp Elliott, join it with 407 acres of land in the gorge, now owned by the city, and call the whole Fortuna Mountain Park.

May 18, 1962, San Diego Union, A-12:1-2. Proposed (Fortuna Mountain Park) tops Balboa Park area (map).

May 18, 1962, San Diego Union, A-25. The district stage highway engineer told the Building Contractors' Association last night that Cabrillo Freeway soon must be widened to eight lanes to make it safe and facilitate traffic flow at the Crosstown Freeway interchange..

May 19, 1962, San Diego Union, B-1. Park proposed for Kearny Mesa in Proposition N (map).

May 20, 1962, San Diego Union, A-27. Two-hundred acre Lake Murray Park asked in Proposition N (map).

May 21, 1962, San Diego Union, A-13. Proposition M bay park bonds to spur income.

May 23, 1962, San Diego Union, B-3. EDITORIAL: Park Development Is Needed: "Yes" on Proposition N.

May 27, 1962, San Diego Union, A-15. Tax rise in city bond denied.

May 28, 1962, San Diego Union, A-15:1-2. San Diego Zoo week accent on baby animals.

June 2, 1962, San Diego Union, A-19. City bond approval termed civic duty.

The chairman, Jack E. Percival, Jr., termed approval of the measures "a matter of civic responsibility for every conscientious citizen."

John Quimby, secretary-treasure of the San Diego County Labor Council, said most of the 850 jobs that would come with passage of the bond issue would be in semi-skilled and unskilled classifications where labor surpluses exist now.

June 3, 1962, San Diego Union, A-27, A-34. City voters to weigh four bond issues.

June 6, 1962, ELECTION: Harbor Island Improvement Bond Issue.

Yes	92,282

Proposition M - Mission Bay Park Development Bonds (\$12.6 million)

Yes	89,172 (Failed - 64%)
No	50,055

Proposition N -Park and Recreation Bonds to improve Balboa Park and to acquire and improve additional parkland (\$10.0 million).

Yes	86,064 (Failed - 62%)
No	52,268

Balboa Park money to be used for arcades to Fine Arts Gallery wings, restoration of California Tower, 16 tennis courts and redevelopment of Golden Hill and 28th Street areas.

Defeat Propositions M and N blamed on number of bond issues facing voters and the two-thirds majority requirement.

Endorsed by San Diego Taxpayers' Association.

June 7, 1962, San Diego Union, A-1. Bond issue defeats blamed on law, by Edwin G. Martin.

The apparent defeat of two of the four city bond issues yesterday was blamed by city officials on the number of bond issues facing voters and the "antique" requirement of a two-thirds majority for the approval of general obligation bonds.

City Manager Tom Fletcher said the apparent defeat of the \$12.6 million Mission Bay bond issue and the \$10 million park and recreation issue will require a major revamping of the city's capital outlay budget.

Les Earnest, city park and recreation director, said money for rip-rapping Mission Bay, for example, will have to be found because the project is necessary. Also, capital outlay funds must be appropriated to repair the California Tower in Balboa Park, Earnest said.

Mayor Dail expressed disappointment over the apparent defeat of Propositions M and N, and lashed out at the state law requiring a two-thirds majority for city general obligation bond issues.

Councilman Allen Hitch said he favors putting the two bond issues on the November ballot "to give voters a chance to reconsider."

"A majority of voters wanted the improvements that the bonds would have provided," Hitch said. "The work will mean more jobs, and in Mission Bay it could help develop the site for a 1969 World's Fair.

June 7, 1962, San Diego Union, A-19:1-4. Old park garden is now restored (illus.).

Formal presentation of the restored (Alcazar) garden will be July 12, according to Stephen G. Fletcher, president of the San Diego Rotary Club.

June 8, 1962, San Diego Union, A-5:1-4. Proposition M (\$12.5 million bond issue for Mission Bay Park.

July 3, 1962, San Diego Union, B-2:2. EDITORIAL: The Bright Garden

The San Diego Rotary Club has given the city an invaluable gift in its renovation of Alcazar Garden.

The net result is worth far more than the \$10,000 donated by the club and the \$5,000 matched by the city. The garden has fallen into weedy neglect. Its dirty disuse set a bad tone for all of Balboa Park.

The Rotary Club couldn't have selected a better target. We think the good work of the club in the Alcazar Gardens will rub off on the rest of the park.

There are improvement projects throughout the park available to clubs and other groups. The entire city will benefit if the example of the Rotarians is followed.

July 6, 1962, San Diego Union, A-19:2-3, A-20:4-5. "Music Man" opens Starlight season; 3,500 in Balboa Park Bowl captivated by first of summer musicals, by Joe Brooks.

July 8, 1962, San Diego Union, E-1:1, E-2:4. Earl Bernard Murray gives city the jazziest symphony summer schedule, by Joe Brooks.

July 8, 1962, San Diego Union, E-8:1-8. Old Globe: "Dancing on the Green," the pre-show festivities of Queen Elizabeth and her court, have been enlarged for the present festival with the addition of gypsy actors, acrobats, a trained bear, fencing masters and Highland dancers..

July 9, 1962, San Diego Union, A-10:3. Old Globe's "Othello" is forceful, by Alan M. Kriegsman.

The highest compliment one can pay to Michael Forest's Othello is to observe that it maintains stature even alongside William Ball's brilliant portrait of Iago.

July 11, 1962, San Diego Union, A-18:1-2. Joseph E. Dryer, San Diego planetarium booster, honored.

July 12, 1962, San Diego Union, A-19:7-8. City to accept Rotary garden gift today.

July 12, 1962, San Diego Union, A-20:4-6. A contract with the Putnam Foundation for construction of a \$1 million Timken Gallery on the east side of the Fine Arts Gallery, a site now occupied by the American Legion Building, is up for consideration by the City Council.

The agreement may come before the council for action next week, according to city officials.

Mayor Dail said he was "extremely pleased" over the decision of Putnam Foundation directors to resume negotiations with the city on plans for the structure, which would house a collection of paintings by old masters as well as other art treasures.

"This gallery would be a priceless addition to the cultural life of San Diego," Dail said.

The Timken Gallery would be built next to the Fine Arts Gallery on the east, on a site now occupied by the old American Legion Building, which has been condemned as unsafe for occupancy.

The contract calls for the city to begin demolition of the American Legion Building with 45 days after being informed the Putnam Foundation is ready to proceed.

Simultaneously with the notification, the Putnam Foundation would deposit \$25,000 in cash, or acceptable securities, with the city to cover cost of demolition in the event something happens to prevent the construction.

Construction, under terms of the agreement, must begin within six months after the American Legion Building is demolished, and the Timken Gallery must be completed within 30 months after the start of construction.

The city has budgeted \$21,000 in capital outlay funds to cover cost of demolishing the American Legion Building and the old Medical Arts Building, located immediately west of the Fine Arts Gallery, opposite the Hall of Champions. The Medical Arts Building site would be taken by a proposed new west wing of the Fine Arts Gallery.

For its second concert of the summer season Tuesday night in Balboa Bowl, the San Diego Symphony, conducted by Earl Bernard Murray, has prepared a Viennese confection which should be as appealing to the musical palate as Sacher Torte is to the pastry fancier.

July 22, 1962, San Diego Union, F-19:1-4. Floral Association membership urged, by Arthur F. Otis.

The ancient and honorable group meets at 8 o'clock in the evening on the third Tuesday of each month in the Floral Building in Balboa Park.

July 24, 1962, San Diego Union, A-6:1-4. San Diego Zoo - Dr. Georges Ungar to head new Biology Institute at Zoo, by Bryant Evans.

Creation of a significant new research institution in connection with the world-famous San Diego Zoo and the selection of a distinguished scientist to be its director were announced here yesterday.

The Institute for Comparative Biology has been formed as an activity of the Zoological Society of San Diego.

The new director is Dr. Georges Ungar of New York City. He is credited with compounding the first of the antihistamine drugs and with the development of one of the first American oral drugs for treating diabetes.

Ungar, 58, is now director of the department of pharmacology of the U. S. Vitamin and Pharmaceutical Corp.

Ungar has published 157 scientific papers and has command of several languages, including Russian, which he learned while assisting his daughter who was studying it.

Dr. Charles R. Schroeder, Zoo director, said the Zoological Society has spent two years in trying to find a suitable director of research for the institution. He said that he considers the acceptance of Ungar a coup for the new institution.

Schroeder said that he could not anticipate the research program of the new institution because it will be fashioned by Ungar.

"But he has written me," Schroeder said, "that he hopes to have four of five full-time scientific investigators busy here by the first of the year.

"He has also told me that he is interested in the physiology of hibernation."

The new institute is an outgrowth of the Zoological Hospital and Biological Research Institute which has been operating at the Zoo for many years.

This has operated mainly by making grants for research to visiting scientists but has not operated as an organized and coordinated research entity with a full-time paid staff.

"The foundation of a scientific program in connection with the Zoo was one of the principal ambitions of Dr. Harry Wegeforth, the founder of the Zoo," Schroeder said.

He added that the development of the institution at this time is in keeping with the expansion of biological research activity in the San Diego community.

He said that the institute is bound to benefit from liaison with the Scripps Institution and the School of Science and Engineering on the La Jolla campus of the university, the new Salk Institute for Biological Research and the Scripps Clinic and Research Foundation which has recently expanded its research program.

Schroeder said he was astounded by one phase of the search for a director. He said that a classified advertisement inserted in *Science*, the official publication of the American Association for the Advancement of Science, brought 226 replies from persons holding doctor's degrees, many of whom were highly qualified.

He explained that the Zoological Society has remodeled the Zoological hospital for research use. It also will supply a part of the pay of the director, maintain the premises and furnish secretarial help as its support to the new institution.

The remainder of the research funds, he said, would come from research grants of both public and private organizations.

July 25, 1962, San Diego Union, 15:8. City authorizes work to begin on Timken Art Gallery.

An agreement to enable the Putnam Foundation to begin construction of the \$1 million Timken Gallery in Balboa Park was approved unanimously Tuesday by the City Council.

The agreement calls for the Putnam Foundation to notify the city when it decides to proceed with construction of the gallery on the site of the old American Legion building, next to the Fine Arts Gallery.

Upon notification and receipt of a \$25,000 bond, the city will let a contract for demolition of the American Legion building. The Putnam Foundation then will have six months, after demolition, in which to begin construction and 30 months to complete construction.

The city had budgeted funds to pay for demolition of the American Legion building as well as the old Medical Arts building on the west side of the Fine Arts Gallery. The latter site will be occupied by a new west wing of the gallery.

The resolution authorizing City Manager Tom Fletcher to sign the agreement was adopted by the council without comment.

July 26, 1962, San Diego Union, A-8:3-4. Viennese concert in Balboa Park Bowl Tuesday night was disappointing, by Alan M. Kriegsman.

It takes more than following a recipe faithfully to achieve the legendary "Viennese touch."

By the way, if the concert had been played in the middle of the landing strip at Lindbergh Field there could not have been more disturbance from jet noises.

Stephens, president, Fine Arts Society, writes one important gallery room in the West Wing will be exclusively for American art, but this is only part of the Wing; there could be as much as 15 feet between the rebuilt arcades and the south wall of the new wing as an area for lawn and planting; south wall will be 50 ft. from the Laurel Street curb.

September 3, 1962, San Diego Union, A-15:1-4, A-21:1-2. Balboa Park Tower shows ravages of time, neglect; beauty fading, by Kay Jarvis (illus.).

A fading beauty, Balboa Park's California Tower looks charming from a distance but at close range reveals the disillusioning ravages of time and neglect.

In 1915, as the only planned permanent building of the Panama-California Exposition, the California Building tower leaped above its verdant bed like an early-day space needle.

Visitors trekked, camera in hand, to the top of the city landmark to see and photograph a dazzling view of San Diego.

The state spent over \$225,000 in 1913 to design and build the structure and received its money's worth through public acclaim.

But nearly a half-century later, San Diego voters turned down a move to restore the beauty of the tower.

In last spring's primary election the electorate failed to approve a Park and Recreation bond issue which would have painted a new face on the classic spire.

City officials will submit the proposal to voters again next year, but as each day passes more dust gathers in the tower's aged recesses.

Ferver-Dorland Associates, a San Diego engineering firm, was contracted by the city, August 16, to prepare a study of the tower's restoration needs. The \$10,000 study should reveal many scars not visible to a casual observer.

Entrance to the tower is gained through a door on the south balcony of the Museum of Man, which has been located in the California Building since the 1915 Exposition. Few enter the door. The 200-foot tower is closed to visitors, and has been since 1935.

A visitor's footsteps echo strangely; great cracks appear on the exterior walls. The tower is old and tired.

Steep stone stairs wind for five levels through the plain lower portion, ending at the first of three superimposed belfry stories. The first open landing is 105 feet above the ground.

From there, the way becomes more perilous. The narrow iron stairway which leads to the other two belfries is rusted and filthy. The risers are littered with debris and footing is unsteady.

The highest vantage point is 158 feet and that, in turn, is surmounted by a bell-shaped dome topped by a wrought-iron weathervane in the shape of a Spanish caravel.

On the walls are scribbled messages to loved ones. The forgotten vows are dated through the early 1930s.

A dust-encrusted sign on the cracking tile wall states:

"This tower is open without charge for the pleasure of visitors to the San Diego Museum. Persons are cautioned against undue speed on the stairways or disregard of barriers that have been provided for their safety."

W. Allen Perry, former superintendent of parks, remembers that at least two visitors disregarded the notice and leaped to their deaths from the highest belfries.

The tower continued as a favorite of sightseers to the park and reached a high during the California Pacific International Exposition which opened in 1935.

Designed by a famous architect of the early 1900s, Bertram Goodhue, the plain lower portion is relieved by three superimposed stories. From the highest, the California Quadrangle is easily seen to be in the shape of a Greek cross. The tower is set in a southeast angle, formed by the name and transept of the building.

The enthusiasm generated by the structure is illustrated by the following excerpts from the Papers of the School of American Archaeology, circa 1916:

"A strikingly beautiful effect is obtained by the concentration of ornament at the summit of the tower and in the center of the facade, in marked contrast with the severely plain wall surfaces of the lower portion of the tower."

In 1946 the tower's Carillon, or Ona May Lowe chimes, were donated to the city by Dr. Frank Lowe. Music is broadcast from the tower; the keyboard is located across Laurel Avenue.

The tower has remained a haven to the pigeons of the city; the erosion and cracks have become more pronounced and the debris has piled higher along the stairways.

The only sounds at the summit is the soft murmur of the wind through the ornate cornices. Little eddies of dust from the ever-widening cracks in the wall sift lazily down to settle on the unused walkways.

September 8, 1962, San Diego Union, A-17;1-2. Old Globe awards taken by Ken Letner, Mrs. Minnie Cea Chambers; "A Raisin in the Sun" best play of season; Shakespeare honor goes to "Taming of the Shrew."

September 8, 1962, San Diego Evening Tribune, C-1. Park pay lots stir row; Balboa precedent alarms citizens; extension feared, by Vincent Dunne (map showing areas where motorists must pay to park)..

Civic leaders and other citizens associated with park development say they are disturbed by the precedent set by the leasing of Balboa Park property for a \$1-a-car parking lots.

The feat the practice may spread.

City Councilmen who voted to establish three pay lots near Balboa Stadium and adjacent to the Balboa Bowl and the park's Federal Building answer that there are no plans at present for other pay lots in the park system.

One councilman, however, disclosed an idea which, if adopted, would extend pay parking elsewhere in the park.

There was a suggestion that auto parking fees be levied immediately adjacent to certain areas that need improvement. The fees would finance the improvements.

Several of the many San Diegans who through the years have been vigilant in safeguarding Balboa Park voice their alarm over the leasing.

The cite the wording of a state legislative action of 1870 which specified that the park was "to be held in trust for the use and purposes of a free and public park . . . and for no other or different purpose."

Attorney W. E. Starke, who has been associated with past legal steps in connection with Balboa Park use and policies, said he thinks public rights have been encroached.

"I don't believe it is fair at all," Starke said. "Balboa Park is public property. It should be free. Nobody should be charged to park in a public park."

Others voiced similar concerns.

"I hate to see paid parking brought to the Exposition (west) side of Balboa Park," said Allan Perry, bank executive and former San Diego park director.

"The San Diego Symphony is struggling to give the people something really worthwhile. If pay parking detracts from the crowd, I'd say the fees should be dropped."

Perry said he believes the charging of fees for parking near the stadium is not so objectionable.

"It's all right near the stadium because the sports fans expect to have to pay," he said. "Pay parking seems to go with stadium events. But not around the Bowl (Balboa Bowl, in the Palisades area)."

Business executive and civic leader Robert Sullivan said:

"I'm worried about the encroachment on the west side of Park Boulevard. Where will it stop?"

“We ask people to vote bonds for park improvement. This sort of thing (parking charges) might affect how a lot of people vote.”

O. W. Cotton, long associated with San Diego’s development, expressed fear that with the city administration sanctioning pay parking adjacent to the Balboa Bowl concert area, such fees will be extended.

The concerts are a fine asset to the city,” Cotton said. “If they charge on lots there, they could start charging on the zoo lot, too. It might be possible for the city to take the fees off once it has its initial investments in the new lots back.”

Henri Jacot, an architect, who is president of the Balboa Park Protective Association, criticized the appearance of the pay lots.

“When they take land from Balboa Park and build these lots, they ought to landscape them instead of leaving them looking like concrete jungles,” he said.

The City Council put pay parking into Balboa Park by unanimous vote August 9. The project had been recommended by the city manager and park director.

City administrators say eventual cost to the city for installing all three pay lots will be \$297,000. They now are in unfinished condition but are to be curbed, landscaped and otherwise improved, the park department said.

September 9, 1962, San Diego Union, A-15:4. Five hundred groups asked to join Balboa Park flag rally.

September 9, 1962, San Diego Union, B-6:6-8. Two white rhinos, new gnu find homes at San Diego Zoo.

September 13, 1962, San Diego Union, A-21:5-7. A cake made of shrimp was served Thursday to Little Joe, the flamingo.

The occasion was the fourth birthday of Joe, the first baby flamingo to be hatched and survive at the San Diego Zoo.

Joe likes shrimp. It helps him keep his pink coloring.

Thursday he nibbled at the batter and seafood conglomeration during the excitement. An attempt to give him the cake in a floating pan at the Flamingo pond was unsuccessful.

The cake, baked by Mrs. Rose Goodner of the public relations department, involved dried shrimp in batter with fresh shrimp as top decoration. It also was topped by four candles.

A crowd of visitors gathered opposite the main zoo gate to sing “Happy Birthday.” K. C. Lint, curator of birds, presided.

Joe was hatched by his American flamingo parents in 1958, a rare birth in the West. Since Joe, five other baby flamingoes have been hatched and survived with the aid of Lint.

Zoo officials decided to celebrate this year because Little Joes are hard to raise. Zoo officials said none of the temperamental females laid eggs this year. The reason was the cool spring weather “that fouled things biological up again,” said Fred Mabbatt, assistant public relations director

September 15, 1962, San Diego Union, B-16:8. Don Wilson comments on Balboa Park Bowl concerts this summer.

The Old Globe's original one-act tournament got off to an auspicious start last night with the first three plays of a series of nine. The tournament will continue tonight and tomorrow night with three more plays each night.

A near-capacity audience was on hand for the opening night fare --- two dramas, "The Actress" by Beula Fair and "Patchwork" by Martin F. Garrish and a comedy, "The Mesdames MacGooly," by Ruth Buell Stowe.

September 23, 1962, San Diego Union, A-24:1-2. Aerospace Award Goes To Scientist (illus.).

John M. Peterson, an aircraft scientist, last night was presented the 1962 aerospace achievement award by the Junior Chamber of Commerce for his pioneering efforts in the new field of vertical take-off-and-landing flight technology.

The award was announced at the junior chamber's seventh annual dinner in Balboa Park.

The dinner followed opening of the Aerospace Museum display in Balboa Park's Conference Hall. At the opening, attended by 150 Jaycees and their guests, Capt. Robert Leeman, North Island Naval Air Station commander, presented a replica of the Curtiss A-1, the Navy's first airplane to the city. It was accepted by Vice Mayor Harry Scheidle who praised joint sponsorship of the museum by the junior and senior chambers.

Rev. Arthur D. Spearman, a Jesuit priest of Santa Clara, was awards dinner speaker. He said many of John J. Montgomery's inventions, designed in the early 1900s, are still in use by the aircraft industry.

Charles W. Brown, executive director of the Hall of Aerospace Sciences, said the museum will be opened today to the public from 10 a.m. to 4 p.m. It will be moved in three weeks to permanent quarters in the park's Food and Beverage Building.

Brown said a temporary display will be of replicas of Montgomery's first glider, accompanied by photographs and data on early flights from Otay Mesa. The display includes fragments of the original glider that made the first heavier-than-air flight near Otay in 1883. The exhibit is on loan from the Santa Clara University.

December 11, 1962, ELECTION: Proposition 5 - \$2.1 million to match grants for improvements in the category of public works projects

Yes	47,336 (57%)
No	34,273

December 12, 1962, San Diego Union, A-1:1-2. City rejects all six bond propositions; attempts to match U. S. funds fail to receive two-thirds vote, by Edwin G. Martin..

Defeat blamed on light voter turn out, opposition to the principle of federal grants, and sentiment that tax bills are too high.

Projects included replacing the Golden Hill and Southcrest Community Buildings, building a new Serra Mesa Community Center, and developing East Crown Point Shores in Mission Bay.

December 13, 1962, San Diego Union, A-18:8. Old Globe remodeling plans backed.

Plans of the Old Globe Theater for remodeling the building which now serves as the theater's business office and costumery tentatively were approved yesterday by the Park and Recreation Commission.

Victor Wolff, San Diego architect, said the theater hopes to build a 25 by 65-foot, two-story structure in English Tudor style in place of the existing small building.

December 13, 1962, San Diego Union, B-2:2. EDITORIAL: Contributing Factors.

The light vote can be attributed in part to the unusual number of elections in the last year.

There is still a possibility that the city may find other revenue sources to begin at least part of the projects with the aid of federal funds.

December 16, 1962, San Diego Union, B-2:1-6. Review of **The Good Old Days** by Oscar Cotton.

THE GOOD OLD DAYS, Exposition Press, New York, 1962, by Oscar Cotton

Chapter 19. Our First Exposition, p. 110.

Ever since the closing of this, our first Exposition, on December 31, 1916, the question has been asked and argued long and loud: "What shall we do with the obsolete Exposition buildings?"

Again and again “experts” have advocated that the buildings be torn down and the ground developed as a park, in grass and trees.

Recently a friend asked me what I thought. I answered: “Yes, by all means, tear the buildings down. Tear down the Recreation Center, where thousands play basketball, and the nearby halls where they hold the flower shows. Make the grounds into a park. Tear down the House of Hospitality, with its director’s rooms, cocktail lounge, theater, and beautiful dining terrace. Tear down the Fine Arts Gallery, the California Building, the Museum of Man, and the zoo. Tear down the Old Globe Theater and the Ford Bowl where they have been having summer symphonies and the Starlight Opera, and, while you are at it, tear down the Cabrillo Bridge and then put the whole five hundred acres into grass and trees.”

I must be losing my knack for salesmanship. My friend decided we had better keep the buildings.

December 16, 1962, San Diego Union, F-1:1-2. The Old Globe in 1963: Tales of Tragedy and Happiness, by Joe Brooks.

December 16, 1962, San Diego Union, E-7:1-6. 1915 show research turned up wrong adjectives, by Dr. Armin Kietzmann (illus.).

Director Warren Beach of the Fine Arts Gallery and his assistant Martin E. Petersen have made a remarkable effort to recreate as near as possible the art display of the Panama-California Exposition of 1915, the first important showing of modern American painting in San Diego.

The same artists are featured with characteristic works, including 13 of the 49 canvases shown here in 1915. It is an original and valuable demonstration, yet if some of the comments around it suggest that the 1915 show met with censure or apathy, one feels inclined to disagree.

Six of the 11 exhibitors, namely Glackens, Henri, Lawson, Luks, Prendergast and Sloan had belonged (with A. B. Davies and Shinn) to a modernist group, “The Eight.” A preview by Professor Clifton Olds recalled violent polemics against the eight rebels’ city realism in an exhibit staged in New York in 1908. But was there only hostility? The Whitney Museum’s Lloyd Goodrich thinks the general tone was “open minded and frequently favorable.”

Speaking of the 1908 show, Goodrich added, “later accounts have exaggerated the critical opposition; the often repeated phrases “apostles of ugliness,” “the revolutionary gang,” and “the black gang” were used by academic artists, not by the critics.

. . . “At any rate, seven years, the Armory show and much reevaluation later the adjectives used here for the moderns’ work were not “vulgar,” “nauseating,” and “unhealthy,” but instead “vital,” “independent,” and “antidotal.”

Choosing another angle, Petersen’s foreword in the catalogue finds in the original show’s set-up, criticism and press response a general attitude of apathy. Why such negative interpretation? By its location within the Exposition’s main architectural feature, the California Quadrangle (now the Museum of Man buildings) and in a gallery with ample good light and natural tones (now remodeled at the Choco Indians hall), the art display was at an advantage from the first. To speak, in comparison, of emphasis on Indian arts seems sought.

Christian Brinton, a member of an international jury, modified his sarcastic impressions of June 1915, when he published them in book form in 1916. He spoke not of “pretentious” canvases anymore, but only of “sophisticated” ones. If he still thought the moderns did not fit in the historicizing environment, he called them “admirable artists.” And he became quite explicit in his preference for the more concentrated San Diego Exposition if compared to its concurrent, the ambitious cosmopolitanism (“one of the surest indications of provincialism”) in 1915 San Francisco.

As to the press response, Petersen's sentence "scarce items from the local newspapers" is contradicted by footnotes mentioning continued criticism. The show opened on January 1, 1915 and on January 4, *The San Diego Union*, brought the first of a series of art columns, written by Mrs. Henry W. Foote; she praised the art exhibit's "independent spirit, pushing forward, unhampered by tradition, especially evident in Bellow's "Man of the Docks," Similarly, an anonymous "Onlooker" was given space in *The Evening Tribune* of January 23 to answer his rhetorical question, "have we no appreciation," by pointing to the "vital," "fresh," "for the American people" attitude in paintings by Henri, Bellows, Sloan.

It may depend on how one looks at the records, but at least they should have been presented more completely. Strangely omitted is any reference to Eugen Neuhaus' personal impressions of the show, published in 1916. On entering the gallery, Neuhaus says he felt at first rudely awakened from the period reams, but "without investigating the *raison d'être* of this amazing collection of pictures, one must in all fairness admit their individual worth and interest, despite their antidotal effect in bringing one back to the modern world."

After a brief but perceptive discussion of individual exhibits, he felt "quite consoled over the sudden departure from historic sentiment to modern matter-of-fact painting It is in a way refreshing and stimulating to be momentarily interrupted thus."

1963

Summary of Events in 1963

(Note: Dates of events are approximate only.)

Bench and drinking fountain dedicated at northeast corner of El Prado (January 14, 1963)

Aerospace Museum opened in Food and Beverage Building (February 15, 1963)

Dog Show in Electric Building (February 18, 1963)

Water reclamation plant in park urged (March 22, 1963)

Rose Show in Electric Building (April 2, 1963)

Science Fair in Federal Building (April 5, 1963)

Orchid Show in Conference Building (April 4, 1963)

Crosstown Freeway opened (April 27, 1963)

Pageant of Patriots at Organ Pavilion (July 1, 1963)

Timken Gallery construction begins (Jun 12, 1963)

United Nations Building lease debated (July 25, 1963)

Site of Planetarium and Hall dedicated (August 7, 1963)

Voters approve transfer of Park and Recreation responsibilities to City Manager (September 18, 1963)

Square Dance Fiesta (October 28, 1963)

Electric Show (November 30, 1963)

Grant from Federal Housing and Home Finance Agency to aid in construction of West Wing of the Fine Arts Gallery (December 21, 1963)

Yule Tree (December 2, 1963)

January 3, 1963, San Diego Union, A-17:1-2, A-19:5. City may ask United States to aid city in building of west addition to Fine Arts Gallery, by Edwin G. Martin.

January 13, 1963, San Diego Union, A-1:7-8. San Diego Zoo - black leopard killed James Tuttle, attendant yesterday, animal slipped out of cage; struck from behind, by Dick Bowman (illus.).

January 14, 1963, San Diego Union, A-13:6-8. San Diego Zoo defends safety set-up, blames human error.

The San Diego Zoo's safety practices were defended yesterday by an official who said the fatal mauling of attendant James Tuttle by a leopard was caused by human error.

The "human error" factor was explained by Dr. Charles Schroeder, Zoo director, during investigation of the Saturday attack. He said that no visitor ever has been hurt by an animal at the Zoo in its 44-year history and that safety procedures will not be modified.

Tuttle's death was the second among employees there. A bear trainer was clawed to death 20 years ago.

Zoo attendance averages 1.25 million a year, making it the city's biggest tourist attraction.

"Just last month, the Zoo had its insurance premium reduced 36 percent because of our outstanding safety record," Schroeder said.

Publicist Wallace Wade said the Zoo prides itself "as a place where parents can bring their children and let the Zoo be the baby sitter."

Schroeder reconstructed the fatal attack this way:

Tuttle, 35, who had taken care of the Zoo's big cats for 10 years, saw Jet, the 140-pound leopard, in the front section of the cage when he arrived with chunks of horse meat. He entered a rear maintenance cage and pulled a lever closing off the display sector out front from the feeding cage adjacent to where he stood.

"But the big cat apparently had raced into the feeding area before Tuttle pulled the lever, and when Tuttle slid open the door to the feeding cage to throw in the meat, the cat leaped out at him. We believe Tuttle turned and made a lunge at the exit door --- which was closed but not locked. The cat landed on his back and he went down."

Tuttle died in an ambulance en route to the nearby Naval Hospital.

Schroeder stressed that the door leading outside from the safety cage could only be pushed in. "None of the zoo's cage doors open out," Schroeder said.

"We've discussed at great length how this accident might have been prevented. But how do you control human error. Apparently Tuttle didn't look into the feeding cage to see if the leopard was inside. He was sure that the cat was still out front. The error here is that those leopards move so swiftly and so silently, you can't be too careful."

Schroeder said that all the other attendants "will look inside from now on --- at least for a year."

Frank Bonnet, the Zoo's security chief, said that an elaborate system of communication has been set up to meet emergency situations.

“When we get word of trouble, we sound a buzzer over the public address system to alert all personnel. Then we direct them by code to the trouble spot.”

An example, Bonnet said, would be code 300 in post six. That means a fire has been started in cat canyon (where the fatal accident occurred). All the attendants would move into that sector. There they would be directed by a security officer in the Zoo’s station wagon.

The wagon carries all types of rifles from a .300 magnum to .22s,” Bonnet said. It also contains a variety of nooses for catching loose animals, fire extinguishers, first aid kits and the like.

“If an animal is loose, you can’t have a lot of people hastily grabbing guns and creating a panic,” Bonnet said. “A stampede of people might cause more injury than a loose animal.”

Only once has a loose animal been shot to death. “Shooting is a last resort,” Bonnet said. “We’ll only shoot if a visitor or employee is in danger of losing his life.”

A bear was shot in 1936 when it walked across a board workers had left over a moat. No one was hurt.

Bonnet said new attendants are taught safety from the first day on the job when they are taken on a bus tour of the Zoo.

Bonnet said a keeper was fired several weeks ago for failing to padlock a door leading from the bird cage. “The animal couldn’t open to door but suppose some kid walked by and stole the lock? Or maybe walked into the cage.?”

January 14, 1963, San Diego Union, A-13:5. San Diego Zoo - animal prices rise in South Africa; political unrest blamed; Zoologists map supply plan, by Bill Parry.

Three San Diego Zoo officials yesterday said world unrest, especially in South Africa, has increased the cost of wild animals imported for zoos.

Plenty of animals are available, but prices have gone up as much as three times in 10 years.

Dr. C. R. Schroeder, zoo executive director, said he could not predict the long-range effect on zoos in this country. “This will depend pretty much on the political stability in the countries where these animals come from,” said Schroeder.

Schroeder, Dr. George Pournelle, curator of mammals, and Clyde Hill, Pournelle’s assistant, were asked about reports that brush-fire wars are making wild animals harder to obtain.

“As of today we can get any species we want, but the cost is two or three times what it was about 1953,” Schroeder said.

As a result, Zoo officials have become conservation-minded and undertaken a continuing breeding program to perpetuate rare species. The zoo has 4,176 mammals, birds and reptiles of 1,134 species from all over the world.

An example of the trend is the Australian Koala. Threatened with extinction, the animal that looks like a teddy bear no longer can be exported from Australia except in rare cases. So the Zoo here is taking special care to encourage breeding of the Koalas.

“We hope to establish a breeding herd, so we will have plenty and be in a position to trade with zoos that can raise other rare species,” Pournelle said.

Other animals being encouraged to reproduce here are Thomson's gazelle, okapi, Sable antelope, Grant's gazelle and the orangutan.

Schroeder and his assistants blamed several factors for rising animal prices:

1. Increasing transportation charges.
2. Higher quarantine prices.
3. Brush-fire wars have made collecting more dangerous for hunters.
4. Native hunters "are getting smarter and have learned they can charge more for animals."
5. Importers are being forced to pay higher prices, and, in turn, have boosted their prices to zoos.
6. Several governments have increased trapping fees because of the rising demand for zoo animals since World War II.

Zoo officials purchase new animals from importers who keep in touch with native hunters and trappers in such countries as Africa, Alaska, India, Australia and the Malayan Peninsula.

January 14, 1963, San Diego Union, B-1:3. Dedication set for fountain, bench in park.

Ceremonies dedicating a new bench and drinking fountain in Balboa Park will be conducted at 11 a.m. February 4 at the northeast corner of Balboa Drive and El Prado.

The date was set by City Beautiful after consulting with city officials, said Mrs. Raymond E. Smith, president of the organization.

A luncheon in the San Diego Zoo restaurant will follow the ceremony which will include the planting of three magnolia trees honoring charter officers of the beautification group.

City Beautiful bought the green and white terrazzo fountain and redwood bench with money from a fund drive last year. At the dedication a metal plaque will be installed on the fountain. The plaque will be inscribed: "A gift to the people of San Diego, City Beautiful, 1963. A gift to the City of San Diego from citizens who love beauty, truth and their fellowmen."

Mrs. Smith said several city officials and the Park and Recreation Commission and contributors have been invited.

The magnolia trees to be planted next to the fountain will honor Mrs. Philip Crittenden, corresponding secretary; Gladys Newell, treasurer, and Mrs. James Elliott, historian. They are expected to attend.

January 18, 1963, San Diego Union, B-1:3. United States Fund Plea Set For Fine Arts Gallery.

Details have been worked out on the proposed application by the city for a federal public works grant to pay half the cost of building a west wing to the Fine Arts Gallery, it was reported yesterday.

William T. Stephens, president of the Fine Arts Society, said directors approved a plan in which an estimated \$530,000 raised privately toward cost of the new gallery will be turned over to the city.

This amount will be swelled by a \$200,000 city contribution to the gallery, making \$730,000 available to match a federal grant.

The City Council next Tuesday will consider a resolution authorizing the filing of an application with the Community Facilities Administration, part of the Federal Housing and Home Finance Agency.

The grant will be sought under the federal public works acceleration program.

Stephens said the society originally hoped to apply for a grant of \$810,000 but lowered the amount upon finding that a maximum of \$730,000 could be raised as matching money.

“We’re now revising our plans for competitive bidding procedures,” Stephens said. “If the council approves the city applying for the grant and it is approved by the federal agencies we may be able to begin construction after July 1.”

The design of the proposed west wing has been approved by the council. It will occupy the site of the existing Medical Arts Building on the west side of Plaza de Panama in Balboa Park.

January 23, 1963, San Diego Union, A-13;8. City Council Okays Plea for Aid on Art Gallery.

Authority for the city to apply for a federal public works grant to help finance the new west wing of the Fine Arts Gallery was given yesterday by the City Council.

January 24, 1963, San Diego Union, A-17:1-2. “Year of Rabbit” to start tonight; Chinese Benevolent Association will sponsor a variety show in Balboa Park’s Conference Building, February 3.

January 25, 1963, San Diego Union, B-1:4. San Diego’s new Aerospace Museum will formally open February 15 in Food and Beverage Building.

Backers said they hope the museum will be the first step in a master plan to develop an entire Science Center complex in the park that will represent all the physical and life sciences.

Capt. Norval R. Richardson, USN, a director of the museum, said a long range plan for such a center is being developed and the master plan will ultimately be presented to city officials. . . .

The opening of the museum will feature until June 17, the NASA “Man in Space” exhibit from the recent world’s fair in Seattle.

February 2, 1963, San Diego Union, A-16:1. Camellias go on exhibit in Conference Building today.

February 5, 1963, San Diego Union, B-2:7-8. W. Merghart claims buildings in park in need of repair.

February 9, 1963, San Diego Union, A-15:8. San Diego Zoo - rhinos get 130-foot living room, by Bob Zimmerman.

February 9, 1963, San Diego Union, B-3:1-2. “The Captain’s Paradise,” comedy at Old Globe, proves big hit, by Constance Herreshoff.

February 14, 1963, San Diego Union, A-17:4-5. North route urged in park road plan; Commission favors Upas-Landis alternate for projected artery of the proposed Maple Canyon Road in Balboa Park.

February 15, 1963, San Diego Union, A-15:3-5. More than 4,500 trees are being raised at the city nursery in Balboa Park for tree planting program of parkways and major streets, by Paul Richards (illus.).

February 15, 1963, San Diego Union, A-17:1-2, A-22:7. Aerospace Museum dedicated in park; banquet last night hailed opening today of new facility.

February 16, 1963, San Diego Union, A-15:1-2. New Aerospace Museum tells story of air age.

February 17, 1963, San Diego Union, A-11:7. Fourteen hundred dogs expected as show today in Electric Building.

February 18, 1963, San Diego Union, 11:4-5. Crosstown links due to open June 1; freeway changing city's appearance; roads make wide sweep, by Cliff Smith.

February 18, 1963, San Diego Union, A-11:7-8, A-13:6. Valid goals urged in recreation field; opening day of the California and Pacific Recreation and Park Conference in Balboa Park; first general session in Recital Hall.

February 18, 1963, San Diego Union, A-11:8, A-13:1-2. Ten thousand attended Dog Show in Electric Building yesterday; fans snarled San Diego traffic.

February 21, 1963, San Diego Union, C-6:1-3. Shrubs, trees to sprout at 395-101 freeway interchange.

February 27, 1963, San Diego Union, A-13:3. "Giant Step" won praise at Old Globe opening last night, by Constance Herreshoff.

March 2, 1963, San Diego Union, B-1:3. Mary Bouman, city traffic engineer, will present his recommendation Monday to City Manager Tom Fletcher on the proposed Maple Canyon Road in Balboa Park.

March 3, 1963, San Diego Union, C-2:1-3. San Diego Zoo - EDITORIAL - Zoo has magic for young, old.

March 7, 1963, San Diego Union, A-27:5. The Federal government has agreed to give San Diego 46.29 acres surrounding the Padre Dam in Mission Gorge for inclusion in the proposed Fortuna Mountain-Mission Gorge Park.

March 9, 1963, San Diego Union, A-16:3. The Balboa Park Protective Association yesterday announced opposition to the construction of any roads in Balboa Park.

March 12, 1963, San Diego Union, A-11:7-8, Boyle Engineering firm of San Diego urged sewage reclamation plant for park irrigation; City Water Reclamation Commission recommended project as answer to rising water cost, by Bill Parry.

March 12, 1963, San Diego Union, A-13:4. Workmen will begin placing ice plant today or tomorrow under a contract to landscape the Crosstown Freeway interchange.

March 14, 1963, San Diego Union, A-26:5-7. Les Earnest outlined city's park needs yesterday; said city hopes to attain 20-acre average for 1,000 population through new site acquisitions in the next 10 years..

March 15, 1963, San Diego Union, A-17:1-2. "Not In The Book" by Arthur Watkyn will open a four-week run March 26 at the Old Globe Theater.

March 22, 1963, San Diego Union, A-18:4. Members of the City Water Reclamation Commission unanimously urged yesterday that the City Council act on construction of a plan to reclaim sewage water.

March 27, 1963, San Diego Union, A-11:2-3. Old Globe's "Not In The Book" has humor, thrills, by Constance Herreshoff.

March 29, 1963, San Diego Union, A-27:5-6. Two public tryouts for "Man in the Dog Suit," Old Globe's final offering of season.

March 30, 1963, San Diego Union, A-17:7-8. San Diego Zoo - Zoo arrival is a day owl.

April 2, 1963, San Diego Union, A-14:1-2. Rose Show beginning April 13 in Electric Building will honor the late Joseph J. Kenneally.

April 2, 1963, San Diego Union, A-19:1-3. Map showing Park Boulevard to Market Street link of U. S. 101 (crosstown) freeway.

(Map shows Park Boulevard to Market Street link of U. S. 101 (crosstown) freeway. Route will provide access from State 94 to U. S. 395 with ramps serving streets in southern and eastern portions of the city. Arrows indicate one and two-way traffic flow on city streets near freeway. Also show is pedestrian overpass to Balboa Stadium from Naval Hospital parking area. The 1.1 mile section is being built under a \$7.3 million contract for state Division of Highways.)

April 2, 1963, San Diego Union, A-19:4. The Science Fair will be held tomorrow through Sunday at the Federal Building.

April 3, 1963, San Diego Union, A-15:5, A-21:1-3. City Manager Tom Fletcher asks compromise on Maple canyon routing, by Michael O'Connor (map showing route suggested by City Mgr. Fletcher).

A compromise route for Maple Canyon Road which would speed up movement of traffic from downtown to Hillcrest area was submitted to the City Council yesterday.

At the request of City Manager Tom Fletcher, the council set a conference on the proposal with the city Planning Commission for 2 p.m. April 16.

Fletcher's proposal introduced a new alignment into previously discussed alternates by connection of northern and central routes by way of Richmond Street.

The city manager said the compromise would have the lowest cost (\$3,165,000) and use the least amount of Balboa Park land (2.4 acres).

The over-all project calls for construction of a four-lane divided highway between State Street and 28th and Utah Streets.

A Upas-Thorn streets alternate discussed in earlier public hearings was eliminated from final consideration, Fletcher said, because it would interfere with Boy Scout and Girl Scout camps in Balboa Park and pass adjacent to the north side of Roosevelt Junior High School.

He said following the Upas-Thorn proposal also would require relocation of the Blind Recreation Center. Construction of a tunnel to avoid adverse impact of major street traffic on the camps and the school and recreation center would cost more than 4 million, he added.

Construction was recommended in four stages from State Street to Sixth Avenue, Sixth Avenue to the Richard and Upas Streets area, Richmond-Upas to Park Boulevard, and Park Boulevard to 28th and Upas Streets. He did not include a time schedule.

One-way streets would be maintained at Palm and Quince Streets with an interchange at U. S. 395.

As outlined by Martin Bouman, city traffic engineer, eastbound traffic would use the road by leaving 395 at Quince Street and turn north on Richmond Street, west of Roosevelt Junior High School.

Bouman aid traffic reaching the end of Maple Canyon Road would be diverted onto existing access streets. There are long-range plans to widen 28th Street from its present two lanes to four lanes by 1966, he said.

The 1966 date would coincide with tentative completion time of the Maple Canyon route.

Bouman said additional widening and improvement would be done on State Street, as indicated by traffic use.

Access to Maple Canyon Road would be via Park, Texas, Richmond and other existing north and south streets.

Bouman said there was no anticipated bottling up of traffic at either end of the project when it is completed.

In making his recommendation, Fletcher said:

“Development of Maple Canyon Road as a major city street . . . is necessary to relieve traffic congestion to the Hillcrest area, provide adequate east-west transportation, and for the proper development of Balboa Park.

“Without Maple Canyon Road, the building of Balboa Park in accordance with the master plan will be extremely difficult. Through traffic would probably continue to use routes in the park for east-west traffic to the detriment of the Prado area.”

Fletcher said present traffic flow across 395 on Laurel Street, Robinson Avenue, Washington Street and University Avenue totals 69,800 vehicles daily.

Cost estimates on the construction of the Upas and Landis and the Quince-Upas streets alternates were higher than the new alternate.

(Map showing route for Maple Canyon Road suggested by City Manager Tom Fletcher, and previous alternates.)

April 4, 1963, San Diego Union, A-17:7-8, A-18:3. Life science, solar cell experiments win at Science Fair, by Bryant Evans.

April 4, 1963, San Diego Union, A-20:1-2. Prize orchids due at 17th annual show tomorrow through Sunday in Conference Building.

April 5, 1963, San Diego Union, A-25:2-3, A-26:1-3. Crowds praise science exhibits, by Edward Niciejewski.

“Bigger and better than ever,” was the unanimous verdict of an estimated 4,500 persons who had seen the fair through last night. The ninth annual fair is sponsored by The San Diego Union in cooperation with business and educational groups.

A total of 446 exhibitors are showing at 379 booths.

The fair, which opened Wednesday, will continue through Sunday in the Federal Building. Hours are from 9 a.m. to 9 p.m. today and tomorrow. On Sunday the fair will be open from noon to 5 p.m.

(List of winners.)

April 6, 1953, San Diego Union, A-18:1-2. Santa Barbarans top orchid show.

April 6, 1953, San Diego Union, A-18:7-8. Ten thousand people visit Science Fair.

April 8, 1953, San Diego Union, A-18:8. Ten thousand people visit Science Fair on final day.

April 13, 1963, San Diego Union, A-15:5-6. Spring rose show will open today.

April 14, 1963, San Diego Union, A-22:4-5. Rose exhibits get blue ribbon prizes.

April 17, 1963, San Diego Union, A-1:3-5, A-2:1-2. San Diego Zoo - Australia to send Zoo rare albino kangaroos.

April 17, 1963, San Diego Union, A-19:1-3. 20,000 years ago; Scripps Institution of Oceanography study shows San Diego was inland at one time, by Bryant Evans.

April 17, 1963, San Diego Union, A-19:5-7, A-20:5. Tunnel suggested in park road plan, two-block tube urged in Maple Canyon; project would add \$1 million to cost, by Michael O'Connor (map).

April 17, 1963, San Diego Union, A-20:4-5. Balboa Park Protective Association may seek park road vote.

April 18, 1963, San Diego Union, A-18:7. Legislature gets park transfer bill; would give Ocean Beach land to city; fund change asked.

April 21, 1963, San Diego Union, A-15:7-8. Another link in crosstown freeway to open Friday, will extend freeway south from Park Boulevard to Market Street; ribbon-cutting ceremony to start traffic in crosstown artery; will connect State 94 freeway with San Diego and Cabrillo freeways; freeway will eventually be part of a nonstop throughway from the Mexican border past Santa Barbara.

April 21, 1963, San Diego Union, A-30:1-2. Home Ideas Show to open Friday in Electric Building.

April 21, 1963, San Diego Union, E-7:1-4. Fine Arts Gallery seeks new wing for wealth of art, by Hal D. Steward.

Cost of the new wing has been estimated at approximately \$2 million when entirely constructed. However, Warren Beach, gallery director, and others of the Fine Arts Society will settle immediately for a minimum wing which can later be expanded.

April 21, 1963, San Diego Union, F-1:1-8, F-14:1-8. Miramar Ranch, a page of history, by Clyde V. Smith.

April 22, 1963, San Diego Union, A-15:3. Balboa Park Protective Association, opposing Balboa Park road plan, will ask to put issue on ballot.

April 23, 1963, San Diego Union, A-13:3. Benefits seen in Balboa Park road project.

April 23, 1963, San Diego Union, 13:5. The San Diego Hall of Science is completing plans for a drive to raise between \$400,000 and \$500,000 for a planetarium in Balboa Park; construction of an adjacent science hall is being considered; site reserved off Laurel Street opposite Natural History Museum.

April 23, 1963, San Diego Union, A-13:7-8. Sixty protest beer sale at Balboa Stadium.

April 23, 1963, San Diego Union, A-16:3-4. Home Fair opens Friday in Electric Building with feature garden lighting.

April 24, 1963, San Diego Union, A-19:2-3, A-20:1-3. Robert F. Faust, co-chairman of the Fine Arts Society Development Committee, affirmed West Wing Fine Arts Gallery plans last night, by Dick Bowman.

April 24, 1963, San Diego Union, A-19:7-8. A financial report on tunnels as part of Maple Canyon Road will be submitted to the City Council May 7, City Manager Tom Fletcher said yesterday.

April 26, 1963, San Diego Union, A-25:4-5, A-26:3. Home Fair offers glimpse of future; displays include new phones, lighting, refrigeration, by Syd Love.

April 26, 1963, San Diego Union, A-25:4. Beer in Balboa Stadium seen fostering moral decay, by Michael O'Connor.

April 27, 1963, San Diego Union, A-19:7, A-21:6-7. City opens one-mile link in freeway; crosstown section connects U. S. 101, 395, State 94, by Cliff Smith.

April 27, 1963, San Diego Union, A-20:2-3. Home Fair attracts 15,000 opening night.

April 29, 1963, San Diego Union, A-13:1-2. San Diego Zoo - rare seal found here sent to Zoo.

May 1, 1963, San Diego Union, A-19. The 1963 Spring Fair of Home Ideas in Electric Building will close tonight.

May 3, 1953, San Diego Union, A-36:7. As a prelude to Music Week, the 65-voice Concert Choir of Central High School, Phoenix, Arizona, will give a concert tomorrow at 2 p.m. in the Organ Pavilion.

May 5, 1963, San Diego Union, 15:4. Joseph Dryer, 82, to dedicate site for Hall of Science.

May 5, 1963, San Diego Union, A-17:1-4, A-18:1-4. Balboa Park changes stir opposition; 249 acres lost from original 1,419; additional 29.7 acres used by lessees on a \$1 a year basis, by Michael O'Connor.

Although there have been many individual uses proposed and granted on park property, none stirs up more controversy than roads. However, in most cases the park land has been turned over by a vote of the people.

One of the major exceptions was 72.9 acres released to the state Division of Highways for development of the U. S. 101-395 interchange in the park's southwest corner. Other street uses which started without voter approval were dedications for Sixth Avenue (7.2 acres in 1904), Upas and 28th Street dedications (6.9 and 6.5 acres) in 1923, and Russ Boulevard dedication (9 acres in 1923).

The state got its biggest chunk of parkland in 1941 when the city deeded 38.3 acres to the Division of Highways for development of U. S. 395 (Cabrillo Freeway).

Another big user is the Navy, which obtained 81.5 acres from the city as a gift in four portions from 1919 to 1938 for development of a hospital. A total of 7.2 acres was obtained by the hospital in 1961 under a lease arrangement.

The San Diego School District is another big tenant with school sites covering 51.6 acres. This property is used by San Diego High School and Synder Continuation high schools and Roosevelt Junior High.

Major leases are the Boy and Girl Scout buildings (18.5 and 11.9 acres); the Campfire Girls (6.1 acres); and the Blind Recreation Center (.4 of an acre).

If the amendment (being pushed by the Balboa Park Protective Association) is successful, it could possibly curtail city plans for road development in the park. However, the charter amendment would have no effect on state highway projects, according to Les Earnest, city park and recreation director.

Two other functions occupy a large portion of the park and one is the 200-acre Municipal Golf Course.

The other, which got no argument from the anti-road groups or any other person who has been in San Diego at least a day. It is the Zoo, which provides a haven for animals, birds and fishes of the world on 94.2 acres.

May 5, 1963, San Diego Union, E-1:1-8. "Man in the Dog Suit" at the Old Globe; drama with split personality.

May 7, 1963, San Diego Union, B-1:4-6. The State Highway Commission has returned to the city three times as much usable Balboa Park space as it has used for freeway purposes, the Highway Development Association was told yesterday.

May 9, 1963, San Diego Union, A-1:2-3. San Diego Zoo - a-year old proboscis monkey put on display yesterday.

May 9, 1963, San Diego Union, A-41:1. Old Globe's "Man in the Dog Suit" scores hit, by Constance Herreshoff.

May 10, 1963, San Diego Union, B-4:1-2. San Diego Zoo - rare pygmy hippo dies at Zoo; second sick.

May 20, 1963, San Diego Union, A-18:1-4. City will receive bids on three parking lot in Balboa Park where fees are to be charged (map).

May 23, 1963, San Diego Union, B-5:6-7. San Diego ballet will dance at House of Hospitality tomorrow, Saturday.

May 28, 1963, San Diego Union, A-17:5-6. Assistant City Manager Walter Hahn said a detailed cost study of a proposed two-block long tunnel will be made before any further reports on Maple Canyon Road are submitted to the City Council.

May 28, 1963, San Diego Union, A-17:1-2. Fifteen more beds due for Naval Hospital.

May 30, 1963, San Diego Union, A-19:1-2. City Manager Tom Fletcher claims Torrey Pines State Park to get \$268,000 in the next two years from state.

May 31, 1963, San Diego Union, A-21:1-3. San Diego Zoo - baby elephant on display near Children's Zoo.

June 5, 1963, San Diego Union, B-1:4-5. Nine cultural units ask city money amounting to \$75,743 more than was appropriated last year.

June 9, 1963, San Diego Union, E-1:1-8, E-2:4. Curtain going up on the Old Globe's 14th Shakespeare Festival Tuesday night June 18, by Joe Brooks.

This year's company will consist of 11 Equity or professional actors; 20 students on scholarships, and a few local spear-carriers.

June 9, 1963, San Diego Union, E-2:4-7. Starlight's long-time friend appears again . . . a little rod box tied together with a length of gold-colored cord; has appeared in everyone of Starlight's 85 productions since the company's debut in 1946 at the Zoo's Wegeforth Bowl.

June 12, 1963, San Diego Union, A-21:1-2, A-24:1. Putnam Foundation yesterday announced plans to proceed with construction of \$1 million gallery in Balboa Park, which will house Putnam collection of about 40 Old Masters; construction will begin when an unoccupied American Legion Building, which now stands on site, has been demolished by city, which will probably be within 60 to 90 days; will be about two years before building is completed and open to public.

The facility will be named the Timken Gallery because the Timken foundation of Canton, Ohio, "will contribute generously to the cost," Ames said. This foundation was formed by the late Henry H. Timken, founder of the Timken Roller Bearing Company. It is not connected with the Putnam Foundation. Two members of the Putnam family, Misses Anne and Amy Putnam, resided in San Diego. Both are deceased.

The gallery will be one-story construction to provide natural overhead lighting for the paintings. It will be of contemporary architecture with a travertine marble exterior with bronze trim and ornamental grills.

Ames said the building will be fire-proof, air-conditioned and humidity-controlled to protect the very valuable paintings.

Frank L. Hope & Associates designed the building. M. H. Golden Construction Co. will be the builder. Richard Kelly of New York was lighting consultant. Construction of the building previously was delayed after heated City Council discussion.

Ames said about 20 of the paintings would be Old Masters now hanging in the Metropolitan Museum of Art in New York, the National Gallery in Washington and other leading eastern galleries.

The other 20 will be selected from paintings purchased by the Putnam sisters and given to the Fine Arts Gallery, Ames said. They will be loaned for the new exhibit. He said the foundation will make additional purchases from time to time.

The Misses Putnam acquired about 90 percent of the Old Masters now owned by the Fine Arts Gallery.

The gallery was built and presented to the city by Mrs. Amelia Bridges of San Diego, who also was a member of the Timken family.

"Our gallery will house paintings of the same stature and value as found in the best eastern galleries, like the Metropolitan of New York and the National Gallery of Art in Washington," Ames said.

The Putnam Foundation and the city signed an agreement last July 24 authorizing the foundation to build the gallery on city property. The foundation is delivering a \$25,000 performance bond to the city.

Other directors of the foundation, in addition to Ames, are Allen J. Sutherland, a San Diego banker, and Dale E. Sharp, vice chairman of the Morgan Guaranty Trust Co. of New York and William A. McRitchie, a Morgan vice president.

June 15, 1963, San Diego Union, A-17:1-2. Balboa Park Protective Association seeks vote on Balboa Park roads.

June 15, 1963, San Diego Union, B-2:2. EDITORIAL on house big a contribution the Timken Gallery will be to culture in San Diego.

July 17, 1963, San Diego Union, A-17:4. City Orders Hearing on United Nations Lease; 30-day renewal granted for unit's building in park.

A 30-day extension of the United Nations Association's Balboa Park building lease was granted by the City Council yesterday to permit time for a public hearing on the controversial renewal.

The council set July 20 at 2 p.m. for the hearing.

In chambers packed by spectators, council members argued parliamentary procedures before approving a motion by Vice Mayor Harry Scheidle to reconsider the action of last Thursday that killed the lease in the Photo Arts Building.

The lease, which had expired July 1, was considered again yesterday for a three-year renewal. Councilman Allen Hitch and Justin Evenson, who had joined Scheidle to evict the association from Balboa Park in a 3-3 split vote, Thursday voted against reconsidering the subject.

After seconding Scheidle's motion, Councilman Frank Curran moved to confirm a new lease for the association. Councilwoman Helen Cobb seconded Curran's motion.

Mayor Dail then asked City Attorney Alan Firestone for a ruling on parliamentary procedure.

At this point, Council Ivor De Kirby, who previously favored the lease, said he could not now back renewal because "serious questions had been raised as to whether this is a proper use of the park.

"Maybe we should consider making available similar quarters to persons who oppose the association," he said.

Mayor Dail, who presided, accepted De Kirby's motion to amend the renewal motion to extend the lease until August 1. This amended motion passed 5 to 2 with Hitch and Evenson dissenting.

De Kirby's motion for a formal public hearing passed unanimously.

The controversy over the association's lease renewal developed last Thursday when it came up for what was thought to be a routine extension of the \$35-a month lease.

Mayor Dail, a member of the association's board of directors, did not attend the meeting. He later told a reporter he favored continuing the lease for seven years.

July 17, 1963, San Diego Union, A-17:5, A-18:1. Kostelanetz leads first of Symphony series, by Ed Nichiejewski.

It is a gladsome task to report that the Old Globe Theater's new concert-theater series is winning for itself both artistic and popular success. The series of five events, on alternate Monday evenings, has been conceived as an entertainment corollary to the National Shakespeare Festival and is under the supervisory direction of William Roesch.

July 19, 1963, San Diego Union, A-12:2-6. Starlight recreates magic of "The Desert Song," by Charles Hull.

A near-capacity audience overlooking first-night rough spots and too frequent interruptions by planes overhead took the skilled company into its hearts as once again the cherished story of intrigue and romance evolved in drama and music.

July 20, 1963, San Diego Union, 19:2-3 and July 21, 1963, 30:3. Directors of Balboa Park Protective Association to decide whether to pursue an effort to stop demolition of American Legion Building.

July 21, 1963, San Diego Union, B-1:4-5. Group to ask public; Park architecture opinions sought.

Directors of the Balboa Park Protective Association decided yesterday to call on the public to help resolve the argument over Spanish colonial or modern architecture in the park.

Mrs. Florence Abby, association president, said the group “wanted to be sure it the expressing the opinion of the majority.”

“Does the public want to retain the style of architecture that now exists in the park central area or not? --- the question is as simple as that,” she said.

Mrs. Abbey, 1408 Capitan Ave., said the association has drafted a letter to the county grand jury asking that it take a close look at the contract between the city and the Timken Foundation concerning the proposed Timken Art Gallery.

The letter to the grand jury will not be sent, however, until the group gets some kind of response from the public, she said.

The association has criticized the architectural style of the proposed gallery as being inconsistent with the park’s Spanish Colonial theme.

The City Council has approved plans for the \$1.5 million Timken building. Mrs. Abbey also criticized the contract with the city on the grounds it was supposed to be cost-free and ended up with San Diego paying for care of the building exterior, the heating and conditioning, she said.

“Timken can withdraw from the contract just by forfeiting a \$25,000 bond, which is a pittance.,” Mrs. Abbey said. “And the Putnam Foundation can withdraw its paintings on a 90-day notice --- what would that leave us with?

July 22, 1963, Park and Recreation Commission Minutes, Administration Building, Balboa Park.

Present: Chairman Bowen; Vice Chairman Kupiec; Commissioners Fay, Geyer, Kerrigan, Lowe and Stickney; Park and Recreation Director, L. E. Earnest.

Absent: None

PLANS FOR BALBOA PARK DEVELOPMENT

Chairman Bowen requested Commissioner Lowe to make a statement in regard to a motion which the latter has presented to the Commission at its meeting on July 10, 1963. Commissioner Lowe read that motion. “That as an encouragement to citizen groups which may be vitally interested, this Commission reopen and review its position, especially with regard to the proposed removal or the permanent use of the Ford Building in Balboa Park.”

Commissioner Lowe then stated that he had the opportunity of July 20, 1963 to meet with a representative of three groups which have been concerned with problems in Balboa Park and that he had asked this representative, Captain Norval R. Richardson of the Naval Air Station at North Island, to appear at this time and give a picture of what has been going on among these three groups.

Captain Richardson was introduced and stated that he is the Chairman of the Board of Directors of the Aero-Space Museum which is located in Balboa Park; that he is a member of the Board of Directors of the Hall of Science and Industry for the Planetarium and that he is a member of the Balboa Park Inter-Museum Council. All of these organizations have been working together as they have mutual problems in relation to the development of Balboa Park. It is their desire to work with the Park and Recreation Department in formulating plans for improvements to the existing plans for park development.

Commissioner Lowe then stated that, in view of the remarks just made by Captain Richardson on behalf of the groups he represents, he would like to present a substitute motion to the motion of July 10, 1963. The new motion was: That this Commission thank Captain N. R. Richardson for his

cooperation in bringing this report of the united activities of the three groups --- Hall of Science and Industry for the Planetarium, the Aero-Space Museum and the Balboa Park Inter-Museum Council, all of whom we congratulate for their interest and with whom we hope to share in future reports as their plans may develop. Commissioner Fay seconded the motion and it was approved unanimously.

UNITED NATIONS LEASE OF BUILDING IN BALBOA PARK

Chairman Bowen stated that the San Diego City Council in the meeting of July 16, 1963 adopted a resolution extending the United Nations lease in Balboa Park for one month, set a public hearing on the same subject for July 30, 1963, and referred the matter to the Park and Recreation Commission for its determination as to whether or not the United Nations organization's use of a building in the park conformed to existing park policy. He also stated that since the City Council had already set the time for a public hearing, this Park and Recreation Commission meeting was not a public hearing and that it would be necessary not to recognize questions or statements from the audience unless a specific question was asked of someone by some member of the Commission. Director Earnest announced that the public hearing is to be held in the International Room of El Cortez Hotel at 2 p.m., Tuesday, July 30, 1963.

Commissioner Kupiec requested that the section in the San Diego Municipal Code which governs the use of the park be read. Director Earnest read the section which is as follows:

“SAN DIEGO MUNICIPAL CODE - SEC. 63.04 BALBOA PARK - AREA FOR MEETING PLACE OF CERTAIN GROUPS AND ORGANIZATIONS - AUTHORIZED - That the Park and Recreation Department be, and it is hereby empowered and authorized to select a suitable area of not to exceed ten (10) acres, within Balboa Park, to be developed and used primarily, but not exclusively, for regular meeting places and headquarters by non-commercial local societies, groups and organizations which are engaged in civic, social, educational, recreational or philanthropic work and activities; and within said area to allot or allocate sites upon which buildings, structures and other facilities may be erected in furtherance of such use and enjoyment.”

Commissioner Lowe asked when the United Nations had first been issued. Director Earnest replied that it was first issued three years ago. Review of the minutes showed that the lease was first issued at the present location, the Photo-Arts Building, Building 644, on July 1, 1960.

In order to determine what type of leases have been issued in Balboa Park, Director Earnest was requested to read the list of the present lessees. This he so did.

Commissioner Stickney asked if the Council wanted the Commission to go on record as favoring or not favoring the policies of the United Nations. Director Earnest replied that the intent of the Council was that the Commission should determine whether the United Nations activity conformed with park leasing policies.

Commissioner Stickney suggested that, since Mr. Vernon Gaston, President of the American Association of the United Nations local chapter, had been invited to the meeting to answer questions as to whether or not his organization came within the prescribed organizational uses as outlined in Section 63.04 of the Code, he should be asked to outline the activities of the United Nations. Mr. Gaston was introduced and said the activities of the association included bringing speakers to San Diego, operating a speakers' bureau, supplying literature on the United Nations, providing college students with United Nations information, conducting an annual high school United Nations contest and taking a role in the annual promotion of United Nations Day and Week. It also provides flags of the United Nations when requested to do so and entertains prominent United Nations visitors, both national and international.

Chairman Bowen asked Mr. Gaston what advantage it was to the local chapter of the United Nations Association to have a location in Balboa Park rather than in some other section of the City. Mr.

Gaston replied that the proximity to the Houses of Pacific Relations in the park was of immeasurable value to the United Nations organization. Commissioner Kupiec asked how many paid employees there were in the local chapter. Mr. Gaston answered there was but one part-time employee who as an executive secretary. Commissioner Kupiec asked where the money came to run the organization. Mr. Gaston stated that each of the 600 members paid \$5.00 annually. Commissioner Kupiec also asked if the local chapter kept a file on anti-United Nations material. Mr. Gaston said that it did and that it was available to all students. He added that any anonymous virulent material was destroyed.

Mr. M. J. Montroy in the audience requested permission to make a statement insofar as the President of the United Nations chapter had been granted permission to speak. Chairman Bowen said he could speak for one minute. Mr. Montroy said that he felt the John Birch Society should be permitted to have space in Balboa Park on the same terms as the United Nations insofar as the United Nations is functioning as a political organization.

Commissioner Fay said she would like to ask the opinion of a Mrs. Kay Martin in the audience. Mrs. Martin spoke in opposition to the United Nations' occupancy of the park building, saying that it was a political organization and, as such, did not meet the qualifications of Balboa Park lessees.

Commissioner Stickney moved that the Park and Recreation Commission go on record that in its opinion the American Association of United Nations is a non-profit, educational group and falls within the scope of Municipal Code Section 63.04. The motion was seconded and adopted unanimously.

Chairman Bowen said that, subject, of course, to availability of space, any groups wishing space in Balboa Park who can meet the park requirements should make written application to the Park and Recreation Department.

The meeting was adjourned at 3 p.m.

Signed L. E. Earnest
Secretary

Build a barn if the Timken Foundation will allow it to hold the paintings. What the building looks like is of little interest.

August 2, 1963, San Diego Union, A-17:1-3. Stadium East to Reach by Car or Bus for tomorrow night's benefit football game between the San Diego Charges and the Kansas City Chiefs (map showing location of Balboa Stadium and some of the parking lots in the areas).

August 2, 1963, San Diego Union, A-17:7, A-24:1. United Nation Group's lease extended by Council; 5-2 vote reverses earlier decision, by Hal D. Steward.

The controversial United Nations Association's Balboa Park building lease was extended for three years yesterday by the City Council in a 5-2 vote.

Councilman Allen Hitch and Justin Evenson voted against approval of the renewal.

The council's action climaxed a public controversy that began July 11 when the council by a vote of 3 to 3 failed to renew the lease. Yesterday's action reversed that decision.

Councilman Frank Curran's motion to approve the lease was seconded by Councilwoman Helen Cobb.

"Inasmuch as the lease was in force three years, was not in dispute until a recent date, and met all requirements of the park, I move it be extended," Curran said in making his motion.

Vice Mayor Harry Scheidle switched his vote from the "no" he cast July 11. At the time he was presiding in the absence of Mayor Dail.

In switching, Scheidle said: "Because of the vital interest in the issue, the effect it will have on our local and national image and because of our efforts to encourage industry to come here and to stabilize business, I request those who voted "no" with me to change their vote and vote "yes."

When Mayor Dail called for action on the issue, Councilman Justin Evenson asked for unanimous consent to refer the matter of the American Heritage Council to council conference. Councilman Ivor De Kirby objected, which resulted in Evenson failing to get the consent he requested. Evenson left his sick bed to vote on the issue.

Evenson was referring to a request of the American Heritage Council, made at a public hearing on the renewal of the lease, Tuesday at El Cortez Hotel. At that time the council had asked the building be turned over to it for an American Heritage Center.

In the discussion that preceded casting of votes on the lease renewal, Hitch asked City Attorney Alan Firestone for an opinion on the legal aspects of the lease.

"This lease was first reviewed in detail in 1960 by the city attorney's office, under the late Jean Du Paul, and approved as a proper park use," Firestone responded. "Nothing has occurred to change the legal approach to the situation. I see nothing to say it is not legal now."

John T. Schall, an attorney, raised the legal question at the public hearing Tuesday. He said the United Nations group was in violation of the Municipal Code by selling literature in the park. Schall also maintained it was unlawfully conducting business as a "foreign corporation."

Earlier in council conference and again during the actual council meeting, Scheidle proposed the section covering leases in Balboa Park be reviewed.

"Procedures should be set up for such leases so all lessees will know the rules," Scheidle said. Mayor Dail said the mayor would be referred to council conference.

The action to reconsider the cancellation of the United Nations group's lease began on July 17 when the council, on motion of Scheidle, extended the lease for a 30-day period so a public hearing could be held.

Supporters at the public hearing told the City Council San Diego's image as an international trade center would suffer if the lease were not renewed.

Opponents of the lease based their arguments on charges that the United Nations Association was a political organization engaged in issuing propaganda and, therefore, was not eligible to lease space in Balboa Park.

The council action yesterday extends the United Nations group's lease for three years from July 1. The Association pays the city \$35 a month for the lease of the Photo Arts Building.

August 3, 1963, San Diego Union, A-15:1, A-22:5. Chargers, Chiefs to provide Balboa Stadium fireworks tonight.

August 3, 1963, San Diego Union, A-16:2-3. Craig Noel, producing director of the Old Globe Theater, last night was named winning designer for San Diego's float in the 1964 Tournament of Roses parade.

August 4, 1963, San Diego Union, F-16:1-4. San Diego Zoo - Zoo, a plant museum, by Arthur F. Otis.

The San Diego Zoo has an exchange arrangement with the Griffith Park Zoo in Los Angeles. We trade them animals for plants!

August 5, 1963, San Diego Union, A-15:3. Planetarium site to be dedicated; \$500,000 drive set for project in Balboa Park.

The site of the \$500,000 planetarium and hall of science in Balboa Park will be dedicated tomorrow.

Dr. Ernest O'Byrne, president of the San Diego Hall of Science, said a six-foot by four-foot sign will be posted at the site on Laurel Street directly across from the Museum of Natural History.

The site will be dedicated by Joseph Dryer, 82, longtime San Diegan and founder of the Heaven On Earth Club. Dryer founded the club, to publicize local climate and attractions, in 1936. It was absorbed into the Convention and Tourist Bureau in 1954.

Dryer is head of the Planetarium's Planning Committee.

The placing of the sign at 2:30 p.m. will start a drive for funds for the planetarium, which will be comparable to the Hayden in New York and the Morrison in San Francisco, O'Byrne said.

The location is part of the Bartholomew Master Plan adopted by the City Council.

O'Byrne, also vice president of San Diego State, said the planetarium would be the first wing of a hall of science there.

"The planetarium will be built and start operation, then we'll worry about getting money for the other half," O-Byrne said.

The planetarium will seat 400 and features a \$175,000 projector, one of three of its kind in the country. It is hoped that the planetarium will be able to exist off of admission charges to the public, he added.

O'Byrne said a group of backers is looking for a single donor who would be willing to donate most of the \$500,000 in one gift. The planetarium would probably be named after the donor, he said.

A contract should be called for by December and the earliest the planetarium would be open is December of 1964, O'Byrne said.

August 6, 1963, San Diego Union, 3:1-8, 9:4-5. Section of plaster, two feet across and a foot thick, fell off east wall of American Legion Building over the weekend..

No one was injured, but Lloyd Lowrey, park superintendent, said employees of Wayco Inc., demolition contractors tearing down the 48-year old structure, were not surprised by the mishap.

Lowrey said the building is completely deteriorated and falling apart on its own. Wayco is speeding the process under an \$87,000 contract.

Major structural beams have deteriorated away from the foundation and in some sections workmen could force their feet through the floor., Lowrey said.

Lowrey said the medical arts building across the street is probably in the same shape. But he said other buildings, although just as old, are still safe.

“The building sin daily use have received constant maintenance. They are also open to air and light which helps to hold down deterioration.”

August 7, 1963, San Diego Union, A-20:6-7. Conductor Earl Bernard Murray and the San Diego Symphony played host to a sister enterprise, the San Diego Ballet, at Balboa Bowl last night, in a program which offered visual and aural rewards of uncommon measure, by Alan M. Kriegsman.

August 16, 1963, San Diego Union, A-19:5-6. Old Globe sets public audition for “Sunday in New York.”

August 18, 1963, San Diego Union, A-15:5, A-26:1-2. Balboa Park edifices show effects of age; buildings of 1915 crumbling, by Michael O’Connor (photo of American Legion Building being wrecked).

Balboa Park is showing its age.

The majestic trees still stab into the sky and its quiet, lush surroundings continue to weave a spell of charm for San Diego. But other things are changing.

A stroll down El Prado reveals some of the wrinkles. Buildings constructed in 1915 and not planned for use for more than two years, are crumbling. Deteriorated exterior plaster and rotting wood tell the story.

The sad state of Balboa Park buildings does not come as shocking news to city officials. They have known for years that periodic maintenance was not the answer to the problem.

A report by Harland Bartholomew & Associates in June of 1960 only served to make it official.

In a master plan for park development, it was recommended that several old buildings be torn down, including the administration, food and beverage and conference buildings.

The Bartholomew report said the building should be replaced with those of compatible architecture. The City Council indorsed this section of the report.

But little has been done since 1960 and the aging process continues.

One building, the American Legion structure, is coming down now to make room for a wing of the Fine Arts Gallery. The unoccupied Medical Arts Building nearby also will be razed to make way for a second gallery wing.

Demolition of the American Legion structure, which had not seen use since World War II, pointed out the far-gone condition of the 1915-era construction.

Its foundation posts were rotten and roof paper fell away in the path of demolition crews.

Les Earnest, park and recreation director, said there is no timetable on razing of the old buildings. It will depend on when money for replacement buildings is available in the capital outlay budget.

The first order of business --- when money is available --- will be renovation of the California Tower, popular symbol of the park.

Earnest said the city has applied for a per percent matching appropriation from the federal government to complete the \$100,000 project. Plans are drawn and the work is ready to go, he said.

Renovation will be complete inside and outside the tower, Earnest said, and the architectural style of the building unchanged. Weak plaster exterior fixtures would be removed and coated with gunite and all of the upper three floors would be reinforced.

Many of the buildings marked for destruction are in daily use, bringing up the inevitable question: How long will they remain safe?

Earnest said all structures received continual maintenance and inspection by city public works crews to insure their safety. But he points out that maintenance can never solve the serious structural weaknesses the buildings have.

All buildings were out of the city's hands during World War II when the Navy took them over for military purposes. After the war, Earnest said the Navy paid the city \$900,000 to assist in maintenance expenses.

November 27, 1963, San Diego Union, A-11:1-2, A-12:2-3. Construction will begin early next year on a \$1.5 million San Diego planetarium, it was announced at a meeting yesterday of those concerned with the Balboa Park project. (illus.)

The planetarium, which will include the city's first physical science museum, will be among the most modern in the world.

Purpose of the meeting yesterday was to review plans with consultants at the building's site which is south of El Prado from the Natural History Museum.

Dr. W. E. Degenhard of New York, science director of the Carl Zeiss optical instruments company of West Germany, viewed plans, an architect's models of the buildings and the setting in an informal sidewalk conference.

"This planetarium will be one of the most impressive in the world," he told a reporter. "I think it will be wonderful in this spot with its simplified Greek style."

Degenhard recommended to the local developers that they equip the planetarium with a relatively new projector designed to serve the space age.

H. Ernest Keller, manager of the Zeiss office in Los Angeles, said the German-made instrument simulates the night sky better than was possible before.

The projector is capable of adding man-made earth satellites to the celestial show and can place the viewers into orbit and include the earth in the big picture.

“An instrument like this is being used to train astronauts and as an actual space simulator for nautical astronomical systems,” he said.

An increasing number of aerospace industry firms are using such planetariums as a scientific tool, Keller said, and the local facility may be able to derive some income in this way.

Dr. Bernard Gross, president of a non-profit corporation formed to build the San Diego Hall of Science and Planetarium, said construction of the planetarium will begin early in 1964 and will be completed within 18 months. He said two museum buildings will be added later.

Dr. Ernest O’Byrne, treasurer of the citizens’ group, said, “it appears that a pledge for approximately half of the money necessary to build the entire facility will be forthcoming.”

Estimated cost of the planetarium itself is \$500,000 and an additional \$1 million will be needed for the museum.

Predominant feature of the proposed 100 x 100 foot planetarium building is a dome 60 feet in diameter upon which the projections would be made.

Louis Bodmer, architect for the project, said the planetarium would have 10,000 square feet of floor space with an equal amount in a basement level for research work.

He said the museum building, which will project east into what now is Park Boulevard, will have about 70,000 square feet on three floors, one of which will be below ground.

November 28, 1963, San Diego Union, B-1:1. Mammoth Yule tree put in place yesterday at the Organ Pavilion by Navy Seabees and Marines.

November 28, 1963, San Diego Union, B-1:8. The 30th annual Electrical and Home Appliance Show will open at 6 p.m. tomorrow in the Electric Building and will continue through Wednesday; “Then and Now” is the theme of this year’s show; many exhibitors will display 1933-model appliances along with new ones, such as an oven that cleans itself automatically, an electrically operated bed, and a push-button device for a wash basin, shower and bathtub.

November 29, 1963, San Diego Union, A-13. Thanks are given in reflective mood, by Dick Bowman.

The Rev. William E. Vaught told more than 300 worshippers at a community service in Balboa Park’s Organ Pavilion that in the last few days “Mrs. Jacqueline Kennedy nobly endeared herself in the hearts of us all.” The service was sponsored by the San Diego Council of Churches.

November 30, 1963, San Diego Union, A-17:7, A-18:2. Twenty three thousand attend opening of Electric Show.

December 2, 1963, San Diego Union, B-1:7, B-4:8. Tree lighted in Balboa Park Yule ceremony.

December 3, 1963, San Diego Union, B-1:3-4. The central area of Balboa Park was blacked out for 45 minutes last night, leaving an estimated 2,500 visitors at the 20th annual Electric and Home Appliance Show in darkness.

December 4, 1963, San Diego Union, A-1:4-5. San Diego Zoo - Elmer C. Otto, Alpine man, wills Zoo \$1.5 million, by Homer Clance.

A retired drug manufacturer who died November 14 has left an estimated \$1.5 million of his \$6 million estate to the San Diego Zoological Society, it was announced yesterday.

The gift was among bequests in the will of Elmer C. Otto, vice president and secretary of the Charles P. Pfizer Company, one of the largest drug firms in the nation.

Otto retired in 1950 and he and his wife, Gladys, moved to a 265-acre ranch at Alpine, two years later.

The announcement was made by Dr. E. Minton Fetter, president of the society, which operates the San Diego Zoo in Balboa Park; Oliver B. James, vice president and senior trust officer of San Diego Trust and Savings Bank, executor of the estate; and Byron F. White, attorney for the estate.

The gift is one of the largest in the history of the society.

Otto never had been a member of the society and society officials said they had never heard of him.

James said, however, that Otto was a member of the New York Zoological Society and the American Museum of Natural History.

Fetter said the major needs of the Zoo are renovation of old exhibits, a project which has been underway for several years. However, he said, it will be up to the board of directors to decide how to use the bequest. This will be discussed at a board meeting Saturday, he added.

Under terms of the will, the bulk of it will go in equal shares to the San Diego Zoological Society, the New York Zoological Society and the American Museum of Natural History in New York City.

December 6, 1963, San Diego Union, B-6:5; December 18, 1963, 31:7-8. City Council has decided to take a longer look at the type of leases it grants for Balboa Park buildings.

December 18, 1963, San Diego Union, A-13:1-1. Park and Recreation Department plans ballet gift to San Diego children Friday in Russ Auditorium; ballet is called "Twelve Dancing Princesses."

December 21, 1963, San Diego Union, A-15:8. United States government approves 10 grants; way clear for work at art gallery with approval of an \$840,000 grant from the federal Housing and Home Finance Agency.

Robert F. Faust, chairman of the development program, said working plans for the west wing will be completed in about 45 days.

The new west wing will be a colonnaded, one-story structure spanning the space between the present gallery and the California Tower

Traditional features of deeply recessed courtyards, covered skylight loggias, sculptured columns and richly ornamented screens, gates and eaves are incorporated into design of the west wing.

Faust said future plans are for construction of a \$1 million education section attached to the west wing.

December 29, 1963, San Diego Union, C-7:1-8. A building boom for art's sake in Balboa Park (plans).

GALLERY GROWTH: San Diego's art complex in Balboa Park, centering around the city's present Fine Arts Gallery, will be enlarged by the construction of two additions --- the cost of which is estimated at more than \$2.6 million. At right (east) is the \$1 million Timken Gallery currently

under construction. This gallery, being financed by the Timken and Putnam Foundations will house primarily the Putnam Foundation collection of European masterworks. At left (west) is the proposed \$1.6 million west wing addition to the Fine Arts Gallery. A federal grant of \$804,000 announced last week, has assured financing of construction of the west wing. The addition will include exhibit rooms, an assembly hall with small stage, an art library and sculpture courts. The federal grant will be matched by funds from the city and the Fine Arts Society; architects' fees have been paid. Construction of the educational wing at far left is not considered in immediate plans. This wing is expected to be constructed when additional funds are raised. Plans for the west wing addition are expected to go to bid early next year. Completion of both buildings is expected in 1965.

1964

Summary of events in 1964

(Notes: Dates of events are approximate only.)

Opposition to construction of West Wing of Fine Arts Gallery (January 30, 1964)

Gift of urns and balustrades from Robert M. Golden (February 26, 1964)

Park and Recreation Board created (March 27, 1964)

Orchid Show in Conference Building (April 4, 1964)

Motel-hotel tax proposed (April 30, 1964)

Renovation of California Tower (May 5, 1964)

Construction of arcades delayed (July 31, 1964)

John F. Kennedy Library exhibit in House of Hospitality (October 4, 1964)

Massing of Colors (November 9, 1964)

Yule Tree lane (November 28, 1964)

January 4, 1964, San Diego Union, A-11:6-7. San Diego Zoo - stuffed flamingo exhibit.

January 5, 1964, San Diego Union, A-23:1-2. Mrs. Florence Abbey, president of the Balboa Park Protective Association, has urged the City Council to form an architectural commission which would pass on the suitability of new construction in Balboa Park.

January 5, 1964, San Diego Union, A-23:3. Aerospace exhibit due January 12-19.

The Air Force, Navy and Army will move indoor and outdoor exhibits into Balboa Park for an aerospace exhibit scheduled for the week of January 12-19.

Charles Dixon, Jaycee president, said the indoor exhibit would be houses in the Aerospace Museum on Zoo Drive and the outdoor exhibits would be placed on the parking lot across from the San Diego Zoo.

January 7, 1964, San Diego Union, A-8:1-8. "Shot in the Dark" will open at Old Globe.

January 10, 1964, San Diego Union, A-10:4-5. Public tryouts will be held Monday and Tuesday at the Old Globe Theater's Falstaff Tavern at 7:30 p.m. for "Take Her, She's Mine"; William Roesch will direct.

January 10, 1964, San Diego Union, A-18:4. City Council yesterday approved a \$19,000 contract to demolish Medical Arts Building; part of the contract calls for removal of 50 eucalyptus trees.

January 10, 1964, San Diego Union, A-18:8. Mimbo and Timbo, 2-year old gorillas obtained from Fort Worth, Texas, will go on display today at 1 p.m. in the children's section of the San Diego Zoo.

January 10, 1964, San Diego Union, B-2:7. James Britton decries loss of "forest" near Old Globe.

January 12, 1964, San Diego Union, C-2:5. Dee Smith pleads for Spanish architecture.

January 13, 1964, San Diego Union, A-13:1-2, A-17:1. Aerospace Week observance opens; ceremony held at museum in park to dramatize missile defense role (illus.).

January 13, 1964, San Diego Union. Fire School sailors do park drill on Zoo Drive; performance of precision drill team of the Fire Control Technician's School at the Naval Training Center; part of ceremonies opening Aerospace Defense Week observance, by Robert Zimmerman.

January 16, 1964, San Diego Union, B-2:7. William H. Strong urges tree preservation.

January 16, 1964, San Diego Union, B-2:8. Robert Mosher and Roy Drew deny grove to be lost.

January 18, 1964, San Diego Union, A-17:7-8. San Diego Zoo - three rare ducks get home at Zoo.

January 21, 1964, San Diego Union, B-2:8. James Britton again protests removal of 50 park trees.

January 22, 1964, San Diego Union, A-18:4. Warren Beach, Fine Arts Gallery director, appointed to state's new Art Commission.

January 22, 1964, San Diego Union, A-21:3. Old Globe cast plans "The Crucible" to open February 7.

January 23, 1964, San Diego Union, A-29:3, A-30:3. Balboa Park Café del Rey Moro closing set January 30; café is now being operated on a sublease held by Garner P. Dicus.

The café was operated in 1935 by Mrs. Iva Valle who operated it until the Navy took over during World War II. The sublease was obtained by Mrs. Helen Priest after the war and remained in her name for three years.

Last operator before Dicus was Miss Helen Thompson who held the sublease until October, 1962.

January 25, 1964, San Diego Union, A-18:2-3. San Diego Zoo - turkey spared by President Kennedy joins San Diego Zoo, by Mitch Himaka.

January 25, 1964, San Diego Union, A-18:5. Councilmen disagree on park group to advise on style of buildings in Balboa Park.

January 27, 1964, San Diego Union, A-16:1-2. San Diego Zoo - Zoo's hospital well stocked.

January 30, 1964, San Diego Union, 23:2. The Balboa Park Protective Association yesterday stated its opposition to the proposed Fine Arts Gallery west wing and criticized the city for removing trees to allow for its construction; about 60 eucalyptus trees are to be removed for the \$1.6 million west wing.

February 6, 1964, San Diego Union. Thomas, 55-pound turkey, outweighs many youthful admirers at San Diego Zoo, by Joe Stone.

February 7, 1964, San Diego Union. Arthur Miller's "The Crucible" opens an 11-performance run tonight in the Old Globe arena at Falstaff Tavern.

February 8, 1964, San Diego Union, A-18:2-3. "The Crucible" brews strong drama, by Joe Brooks.

February 8, 1964, San Diego Union, B-2:8. Dee Smith pleads save Prado from ruin.

February 11, 1964, San Diego Union, A-15:6, A-20:7. Mayor Curran still silent on appointments to Commissions; defers filling of posts on four boards despite State legislature ratification of charter amendments passed by voters in September primary election, by Michael O'Connor.

February 12, 1964, Park and Recreation Commission Minutes, Council Conference Room, Civic Center.

Present: Chairman Bowen; Vice Chairman Kupiec; Commissioners Fay, Geyer, Kerrigan, Lowe and Stickney; Park and Recreation Director Earnest; Assistant Park and Recreation Director des Granges; Mr. Mitchell Angus of the Colina Park Recreation Center, Inc.; the Press.

Absent: None.

DIRECTOR'S REPORT: The accelerated Public Works Program of the Federal Government is allocating \$804,000 toward the construction of a wing to the Fine Arts Gallery. Construction must be started 120 days from January 28, 1964. This has resulted in a tight schedule to demolish the old Medical Arts Building and to remove 60 trees to prepare the area for the new wing.

REMOVAL OF TREES IN CONNECTION WITH NEW WING FOR FINE ARTS GALLERY: An injunction obtained by the Balboa Park Protective Association to restrain the City from cutting down trees was served on the City Council Tuesday afternoon, January 11th after 25 of the 60 trees have been cut down. The court hearing will be held at 10 a.m. on January 13th, 1964 and all work has ceased pending the outcome of that hearing.

Two weeks ago the president of the Balboa Park Protective Association was invited to go over the site with a representative of the Park Department who would explain the plans to remove the trees. Lloyd Lowrey, the Park representative, pointed out to the president why certain trees had been selected for removal. He explained that some of the trees were being removed because they were diseased. No trees were being removed except those located within the boundaries of the new building.

At this time the Balboa Park Protective Association has taken the stand that the removal of the diseased trees is logical, but that an alteration in the plans for the Fine Arts Gallery Wing would obviate the removal of the rest of the trees.

The City takes the position that since public hearings on this subject have been held for more than a year, ample time has been allowed for objectors to present their views for consideration.

CAFÉ DEL REY MORO: Director Earnest requested that Assistant Director des Granges make a report on the Café del Rey Moro lease. This she did, stating that the Café del Rey Moro lease, which is a sublease from the House of Hospitality Association, terminated its lease as of January 31st of this year. The House of Hospitality Association is attempting to secure a new sublease. In the meantime, all groups who meeting at the House of Hospitality who wish to have catering can continue to be served as a San Diego catering company has been doing this catering separately for these groups. It is the hope of the House of Hospitality Association that the new sublessee will not only run the Café del Rey Moro but will cater as well. Five applicants for the sublease are new under consideration and it is hoped the matter will be resolved shortly.

February 12, 1964, San Diego Union, A-18:7. The City Council has turned down a proposed charter amendment which would require a vote of the people to approve road projects in Balboa Park.

February 13, 1964, San Diego Union, A-23:8, A-25:1. Twenty five eucalyptus trees in a Balboa Park grove, that a citizens group was seeking to retain by court action, were cut down by a firm holding a city contract (illus.).

February 14, 1964, San Diego Union, C-1:4-5. Balboa Park Protective Association loses fight for Balboa trees, by Homer Clance.

Superior Court Judge Vincent Whelan said, "Frankly, I don't think that equity calls for the court to halt plans for construction of the building as planned and designed at the very last moment."

The city on February 4 awarded a \$2,500 contract to El Cajon Tree Surgery to removed the 60 trees, and 25 were demolished before the restraining order was served on city officials Tuesday.

A second contract for \$8,585 was awarded February 6 to Waco Services Inc. to tear down the old Medical Arts Building, where the west wing will rise.

February 16, 1964, San Diego Union, A-13:5-6. Fourteen hundred dogs slated in one-day show next Sunday in Electric Building.

February 18, 1964, San Diego Union, A-9:5-6. "Take Her, She's Mine" opens tonight at Old Globe.

February 19, 1964, San Diego Union, A-18:6-8. "Take Her, She's Mine" proves easy to take, by Joe Brooks.

February 21, 1964, San Diego Union, A-27:4. The Fine Arts Society of San Diego yesterday presented the City Council a check of \$530,000 as a contribution to the new West Wing of the Fine Arts Gallery.

February 24, 1964, San Diego Union, A-13:4-5, A-16:1. Canines give Dog Show crowd the eye, by John Wood.

February 26, 1964, San Diego Union, 13:3-5. Robert M. Golden, construction executive, wants to spend \$15,000 as his gift to the city, in project to restored 50-year old balustrade and urns in Balboa Park's lily pond and Botanical Building; City Council accepted offer and expressed appreciation; existing wooden structure will be replaced with concrete (illus.).

March 8, 1964, San Diego Union, A-23:4-7. Zoos find animals costly, by Dick Bowman.

March 19, 1964, San Diego Union, A-23:5-7. Eleven grandmothers modeled spring fashions in Conference Building yesterday.

March 22, 1964, San Diego Union, B-1:5. An ordinance creating an 11-member Parks and Recreation Board has been prepared and will be on the City Council agenda Thursday.

March 23, 1964, San Diego Union, B-1:5. Parks Board ordinance is ready; 11-member unit would replace commissions..

March 27, 1964, San Diego Union, 15:6. The City Council yesterday approved an ordinance creating an 11-member Parks and Recreation Board; members will be appointed by Mayor Curran with consent of council; would supplant the Park and Recreation Commission and the Mission Bay Commission; the ordinance must be placed before the Council again for final passage.

March 30, 1964, San Diego Union, A-15:2-3. Easter rites at Organ Pavilion attended by 2,000, by Edward Niciejewski.

March 31, 1964, San Diego Union. "Third Best Sport" to open at Old Globe tonight.

April 4, 1964, San Diego Union, A-17:2. International park at border urged by Hugo Fisher, director of state resources.

April 4, 1964, San Diego Union, A-17:5-6. County Orchid Show in Conference Building ends tomorrow.

April 5, 1964, San Diego Union, A-19:5-8, A-32:1. Science Fair opening in Federal Building Wednesday.

April 5, 1964, San Diego Union, F-17:1-2. Spring Rose Show opens next Saturday in Electric Building.

April 8, 1964, San Diego Union, A-17:4-6. Greater Science Fair opens tonight with 396 exhibits.

April 9, 1964, San Diego Union, A-13:7-8, A-29:1. Computer, botany projects win top science awards.

April 11, 1964, San Diego Union, A-17:2-3. Two million mark this fiscal year hit early at San Diego Zoo (illus.).

April 12, 1964, San Diego Union, E-1:1-8. Starlight Opera reaches out for young new faces, by Joe Brooks (illus.).

April 12, 1964, San Diego Union, E-8:1-3. Old Globe to move into St. Francis Chapel for "A Sleep of Prisoners," by Christopher Fry, article by Joe Brooks.

April 12, 1964, San Diego Union, I-2:1-2. In 1872, they tried to steal Balboa Park and they might have succeeded, had it not been for Daniel Cleveland, by Jerry MacMullen.

April 14, 1964, San Diego Union, A-17:2-5. San Diego Zoo - City, County eye game preserve in San Pasqual; another parking lot being studied, by Michael O'Connor..

April 14, 1964, San Diego Union, A-17:1-2. San Diego Zoo - a nocturnal hootenanny, that's the Zoo at night, by Robert Zimmerman.

April 14, 1964, San Diego Union, B-2:1-2. Sally Rand gives Carny bare facts, by Donald Freeman.

April 19, 1964, San Diego Union, A-24:1-2. Spring Fair opening Friday in Electric Building.

April 26, 1914, San Diego Union, A-17:1-8. Dr. E. Yale Dawson, Natural History Museum director, solves problem of how to move dinosaur, by David Farmer (illus.).

April 30, 1964, San Diego Union, A-25:7-8, A-32:4-6. Mayor Curran backs Motel-Hotel tax proposal, by George Story.

Mayor Curran said yesterday he supports enactment of local hotel-motel room taxes and warned that the alternative is a state room-tax with the revenue going to the state.

May 1, 1964, San Diego Union, A-31:5. A bid of \$1,543,000 by the M. H. Golden Construction Company was the lowest received yesterday for construction of new West Wing of Fine Arts Gallery.

May 1, 1964, San Diego Union, A-32:2-3. Exhibits showing America's progress in space will be displayed through May 30 at the Aerospace Museum in Balboa Park, Mrs. Frank Gabaldon, president of the Aerospace Museum, said yesterday.

She is president of the Aerospace Museum, which has obtained the display for San Diego.

"Project Mercury --- A Report to the Nation," is scheduled as one of the major exhibits. It will consist of a Mercury capsule, containing a mannequin wearing an actual space suit.

Graphic exhibits with the capsule are to include details of all six Mercury flights and reports on other aspects of Project Mercury. These include human responses to thrust and space, radiation protection, international cooperation in the space program and the proposed Gemini program for manned flights to the moon and beyond.

Mrs. Galbaldon said exhibits also will include a display, "Photography From Five Years of Space," with 96 pictures of the program.

The Aerospace Museum also is to unveil its latest permanent acquisitions --- two Discover capsules from unmanned U. S. space flights that will be kept here. Mrs. Gabaldon said the museum and the auxiliary have been working for more than a year to acquire the capsules.

Four space flight films also will be shown during the month-long exhibit. These include "Friendship - 7," a report of the John Glenn flight; "Sigma 7," the Walter Schirra flight; "Faith 7," the Gordon Cooper flight, and "Mystery of Space." The movies are scheduled on weekends.

Charles Brown, director of exhibits at the museum said the exhibits will cover more than 12,000 square feet of floor space. The museum will be open from 10 a.m. to 4:30 p.m. weekdays with no admission charge.

May 1, 1964, San Diego Union, B-10:3-4. San Diego Zoo - City Council gave Zoo permission to develop additional parking adjacent to present lot.

The City Council yesterday gave the Zoological Society permission to develop additional Zoo parking adjacent to the present parking lot.

The society will develop the 26 acres in five increments and hopes to being soon in order to provide some additional spaces this summer, the city manager's office said yesterday.

The land is east of the present parking lot and total development will coincide with plans to relocate Park Boulevard east of its present location. Zoo Drive will become a cul-de-sac when this is completed.

Under terms of the agreement to be signed with the Society, City Manager Tom Fletcher said only cars which belong to employees and patrons of Balboa Park attractions, including the Zoo, will be permitted to use the lot.

He said this provision is designed to stop groups of persons from parking their cars in the most favorable positions of the lot all day and taking buses to other places.

Current plans call for realignment of the Boulevard in 1965-66, and the Balboa park Tennis Club also would be relocated. The Zoological Society said additional parking spaces are urgently needed

May 2, 1964, San Diego Union, A-1:2-3, A-6:5-8. Twelve thousand San Diegans went to Balboa Stadium under a cloudy sky and threat of rain last night to hear Billy Graham exhort them to be "born again" by turning in simple faith to Jesus Christ.

May 2, 1964, San Diego Union, A-21:3. Balboa Stadium beer sales facing fight, by Charles Davis.

A battle over Balboa Stadium beer sales will be reopened at two locations next week --- the Board of Education's meeting chambers and Superior Court.

Both instances represent an effort by James Hervey Johnson, a former county assessor, to prevent an Oakland firm, Duchess, Inc. from selling beer at the city-owned stadium

It will be up to the board --- at opposite poles with Johnson on another matter --- to decide whether to side with him as a friend of the court in the beer sales protest.

That other matter is the city schools' June 2 tax ceiling proposition. Board members are signers of an official "pro" argument going to voters; Hervey is a signer of the "con" argument.

Johnson on Thursday will attempt in Superior Court to prevent a 2-1 decision by the appeals board of the state Alcoholic Beverage Control department from being carried out.

The decision, issued March 30, upholds a conditional beer license recommended for Duchess by the department and its hearing officer, Coleman Stewart.

It coincides with a position adopted by the school board last summer, but which was changed to one of total opposition December 2 when three of the board's members were replaced.

May 2, 1964, San Diego Union, B-2:8. Walter R. Hooper scores tax-exempt foundations.

May 4, 1964, San Diego Union, A-1:5, A-8:1-2. Billy Graham told 27,500 men, women and children in Balboa Stadium yesterday that they are living in a world as wicked and marked for destruction as the Biblical city of Sodom.

May 5, 1964, San Diego Union, A-11:3-4. The final production of the Old Globe Theater's 27th season, "A Far Country," opens tonight at 6:30.

May 5, 1964, San Diego Union, A-15:1-3. Balboa Park tower gets a face-lifting, by David Farmer . . . \$80,000 renovation that includes replacing original walls of hollow clay tile around the first 7 floors of the tower with gunite concrete, 4 to 6 inches thick, by Art A. Gussa Construction Company, El Cajon (illus.).

May 6, 1964, San Diego Union, A-20:1-3. "A Far Country," drama about Freud's life, is brilliantly done at Old Globe, by Joe Brooks.

May 7, 1964, San Diego Union, A-35:1-2. Sketches, plans and cost estimates have been completed for a proposed new wing and auditorium at the Natural History Museum in Balboa Park.

The \$157,000 auditorium will seat 500 for wildlife films and lectures, museum officials said. Total cost of the new wing will be about \$360,000.

May 8, 1964, San Diego Union, B-2:7. Letter about Daniel Cleveland.

May 8, 1964, San Diego Union, B-7. San Diego Zoo - Council votes to block Zoo parking fee plan.

The City Council yesterday unanimously voted to block a \$1 parking fee proposed for the San Diego Zoo.

The Council endorsed recommendations by Councilmen Uvaldo Martinez and Dick Murphy to scrap the fee indefinitely, while allowing Zoo and city officials to work on traffic studies for Balboa Park, where the Zoo is located.

The Council also suggested amendments to the Zoo's lease with the City that would reduce any future parking fees for Zoological Society members and allow for a reserve fund for a future parking structure.

A City Council committee recommended such action last week.

May 9, 1964, San Diego Union, A-15:4-5. San Diego Zoo - Zoo parking plan OK'd over protest.

An ordinance allowing the San Diego Zoological Society to pave a Balboa Park parking lot and add five acres to Zoo property has been approved by the City Council.

The measure was opposed by the Balboa Tennis Club, which holds a lease on three acres near the Zoo parking area. The club facilities would be removed as part of the four-stage parking lot improvement.

The Zoo is to finance and maintain the paving, landscaping and marking of the 26.6-acre parking area adjacent to Park Boulevard.

Council approval also means the north boundary line of the Zoo will be extended to Richmond Street, bringing in the additional five acres. The Zoo made this request to eliminate a “no-man’s land” corridor between the old northern boundary and Richmond, which was not maintained.

Spokesmen for the Tennis Club said the group had been using park facilities since 1922, Its \$50 a month lease is scheduled to expire next year.

Councilmen indicated they would not be in favor of a club request to relocate the club at city expense. Les Earnest, Park and recreation director, said the city is planning to add new courts at Morley Field in the park and improve dressing room facilities.

May 10, 1964, San Diego Union, A-29:5-8. Aero Museum visualized as a “do it yourself” spot; “hands off” signs are missing, by David Farmer.

The Aerospace Museum in Balboa Park doesn’t want to over-awe anybody. It’s not even sure it wants to be a museum.

“We can’t bear the thought of being a Smithsonian Institution,” said director Charles Brown.

The museum would rather be a kind of Aerospace Disneyland.

Brown, who looks for all the world like a young engineer, with his crew-cut brown hair and friendly face, explains:

The museum is designed to motivate people, mainly children. So its job is to be interesting, not necessarily to hoard mementos. The museum is open daily from 10 a.m. to 4:30 p.m. free. It is a place where children --- or adults --- can see a lunar excursion module, for instance, when they learn about it in the news.

Brown plans to convert an old aircraft training mockup so it can be “flown” by visitors.

“Whenever possible, we refuse to put glass cases or ropes around things. We prefer to have things broken than to have signs up saying “Hand off,” said Brown.

Children are growing up into a more and more complicated world, says Brown, and they need to be motivated early to plunge into science.

“What we started out to do was force motivation on youngsters,” said Brown, his voice echoing in the huge, hangar-like room in the old Food and Beverage Building.

“When school groups come in, we drop everything to take them on tours and answer their questions. That’s the most important thing at the museum, the only reason why we’re here.”

The Aerospace Museum preserves many historical items.

An airplane engine made by the Wright brothers; the engine of the plane that first broke the sound barrier; the first supersonic seaplane; the largest collection of possessions on pioneer glider pilot John Montgomery; two Discoverer capsules; a full-size mockup of a moon exploration craft; and others.

They are mostly to use as an environment to stimulate the visitor.

“It doesn’t mean a thing, if there’s nothing to be gained by it. Perhaps one of the children will go home, have a brainstorm, and invent the greatest thing every made,” Brown said.

Before the museum was organized, said Brown, San Diego had almost no place to display aerospace historical items.

“San Diego has had more aviation firsts than any other city in the world, and was the birthplace of Naval aviation,” he said.

He said many valuable things were going to waste for lack of a museum. He explained:

“I was an engineer at Convair, specializing in the design of training devices. One day I saw a mockup of an 880 jetliner being thrown away. I couldn’t stand it.”

So he quit his job to help found a place where this material could be shown to the public.

May 10, 1964, San Diego Union, E-1:1-8. New vistas on the Fine Arts horizon, by Joe Brooks (incomplete)..

“In 40 years the society had an increase in members of about 300,” Barrett said. “We hope to be up to about 5,000 at the end of the year. We plan to take the story of Clairemont and every other community in the county.”

Barrett noted that the broadened membership base will help support the expanded operations of the gallery.

The exhibit space will be doubled “letting us bring many works out of the basement,” Barrett said. The new wing will contain space for a library and a 400-seat auditorium.

Beach said the expanded membership will have two effects:

1. It will provide additional operating funds for accelerated activities such as exhibitions and programs.
2. It will generate interest in the gallery. “More people will receive the bulletins, keep up with the activities, come to things. There will be more interest, and the interest will spread,” Beach said.

One of the major benefits of the new wing will be to enable the gallery to exhibit more of its permanent collection of works.

“Now we can exhibit only the top works of the European masters,” Beach explained. “With more exhibit space, we will be able to show the best works from all directions of our collections. People will be amazed at what we have.”

The San Diego Art Guild will stage an art fair next Sunday in connection with the groundbreaking ceremony. Artists and craftsmen will exhibit their works in all media and give demonstrations outdoors in front of the gallery.

Officials of the society, the City of San Diego, and the contracting company will start work about May 29 and finish some time early next summer.

The wing was designed by the architectural firm of Mosher and Drew.

When added to the present gallery and the Timken Gallery, now under construction to the east, the new building will give San Diego one of the finest art facilities in the West.

“We believe it will produce the impetus for the society to grow apace with the city,” Beach commented.

May 17, 1964, San Diego Union, E-7:1-8. An art gallery under the trees at 6th Avenue and Laurel Street, Balboa Park.

May 18, 1964, San Diego Union, A-17:2, A-19:1. Gallery west wing work begins with paint job.

"Groundbreaking" was done with paint brushes yesterday for the west wing of the Fine Arts Gallery in Balboa Park.

A 12- by 30-foot painting of the addition stood in the middle of the land the wing will occupy.

Representatives of the city, Fine Arts Society, and the contractor --- all clad in artists' smocks --- wielded paint brushes to put color in the barely outlined sketch.

H. J. Reed Barrett, San Diego Fine Arts Society president; Robert Faust, chairman of the society's development committee; Robert Golden, representing H. M. Golden contractors, who will build the addition; and William Gerhardt, assistant to the city manager, wielded brushes.

Various colors were available for artists, and when help was needed, they received assistance from Margaret Beach, 17, daughter of the gallery director, Donald (sic) Beach.

Construction of the \$1,543,000 wing will begin later this month. The Fine Arts Society has raised more than \$800,000 and received a matching gift from the federal government under the Accelerated Public Works Program.

The wing will provide San Diego with an outstanding art complex, Michael Ibs Gonzalez, past society president and master of ceremonies for the event, said.

The west wing will be completed by summer of next year and house predominantly American and Asiatic art.

Along with the Timken Gallery, which should open in about six months and house the Putnam collection of old masters, the Balboa Park galleries will be the finest on the west coast, Gonzalez said.

The more than 200 persons who attended the ceremonies were able to view artists in action. The San Diego Art Guild's Arts and Crafts Show concluded its presentation yesterday in the gallery parking lot.

Many persons toured the partially finished Timken Gallery after the ceremony.

May 18, 1964, San Diego Union, A-17:3-4, A-18:5. New wing started; Gallery to open its storehouses, by David Farmer.

Museums, they say, are like icebergs.

In case you haven't heard that one, it's because only a fraction of an iceberg is visible above the surface.

Museums don't like being like icebergs, but they often can't do anything about it.

The Fine Arts Gallery of San Diego in Balboa Park is one of the lucky ones. It isn't going to melt -- It's going to build a new \$1.6 million wing.

"Two thirds of our collections are never regularly on view," said Warren Beach, directory of the gallery.

"Only about half of our European collection is regularly up and one or two tapestries. Almost none of our American, Asiatic or graphic arts are regularly on view.

"None of our textiles, glass or metal arts are normally on view."

Beach is itching to get more of the \$7 million worth of art works in front of the public.

Construction on the new West Wing began yesterday with groundbreaking ceremonies. The wing will about double the size of the museum.

It will include exhibition space, a new library, auditorium, outdoor sculpture court, Asiatic garden court, temporary classroom and storage, kitchen, shipping and receiving areas and two galleries for specialized exhibits --- Early American and Asiatic arts.

Beach, obviously pleased, pointed to the new facilities on a big model of the new wing.

"The most important of all will be the new exhibition galleries and courts," he said. "For the first time in many years, we will be able to display regularly the best of the full range of all our collections.

"This also will encourage persons to make gifts of fine art works. (Some) had been reluctant, knowing that we could seldom display their gifts.

Beach is so happy about the museum's building progress that he called 1964 "this fabulous year."

For the new West Wing is not the only expansion for the gallery.

Already under construction is the Timken Gallery, which sets to the east of the museum, like a mushroom near a rock. It is expected to house about 40 paintings.

“These include a small number of very fine Renaissance, Baroque and 19th century European paintings and one of the most important groups of Russian icons in America,” said Beach.

He said the Fine Arts Gallery already is one of the top general art museum in the United states.

“The gallery, built in 1926, has collections of Dutch, Flemish, Italian and especially Spanish Renaissance and Baroque painting finer than any other West Coast museum,” he said.

Nearly all art forms are represented from all ages, races and cultures, Beach said.

The quality of some of the collections draws scholars from all over the world, he added.

“The gallery stages more than 30 changing exhibits each year. It drew more than 110,000 visitors during the past nine months.

The gallery, not content to sit, panting from its efforts, still has more plans dancing in its leaders’ heads.

The Fine Arts Society of San Diego, which runs the gallery, plans another million dollar building next to the west wing in the future. It will be for art education.

After that, the society will try to build up bequests and gifts. It will start at once to try to double its present membership of about 1,700

All this, says Beach, because “We need more than ever in the history of the world to develop the ability to choose the finest, rather than the most popular.”

May 20, 1964, San Diego Union, A-19:1-2. City Manager Tom Fletcher asks \$84.5 million for San Diego improvements; Council gets six-year program for streets, parks, buildings, by Michael O’Connor.

Among the major 1965-65 projects were:

\$75,000 for renovation of the Balboa Park electrical system.

\$147,000 (?) for construction of arcades on the north side of El Prado adjacent to the Timken and west wings of the Fine Arts Gallery.

May 21, 1964, San Diego Union, A-19:4-5. Mayor Curran foresees need for bond financing to meet park, recreation, police, fire and library needs.

May 24, 1964, San Diego Union, A-13:3, A-15:1-3. Pueblo lands sought for city projects, by Michael O’Connor.

May 25, 1964, San Diego Union, A-17:3, A-18:4. Propositions B and C deal with pueblo lots; city backing use of 956 acres for University of California development.

May 25, 1964, San Diego Union, A-17:7-8. Council, citizens split on Proposition D, by Michael O’Connor.

Proposition D calls for widespread changes in planning procedure, including a transfer of control of the Planning Department to the City Manager.

May 27, 1964, San Diego Union, A-25:3. Dr. E. Yale Dawson announced yesterday that grants of \$67,000 for special projects from National Science Foundation and San Diego County Medical Society have been received by the Museum of Natural History.

May 27, 1964, San Diego Union, B-1:1-3. San Diego Zoo - oldest Zoo monkey dies, Irish came to San Diego in 1927.

May 27, 1964, San Diego Union, B-7:5. Veterans Building Seeks Funds.

An official of the corporation operating the Veterans War Memorial Building told the City Council yesterday the facility is having financial problems and asked for \$2,489 to pay bills.

The request, presented to councilmen by R. B. James, a director of Veterans War Memorial Building, Inc. was submitted to City Mgr. Tom Fletcher.

James said the money was needed before the end of the current fiscal years on June 30 to meet debts which are nearing delinquency. He said corporation officials also wanted to meet with councilmen to find ways to make the building self-supporting.

One way, he said, would be through a corporation liquor license. Licenses for alcoholic beverages, however, are not permitted in Balboa Park.

The War Memorial Building was constructed by the city in 1950. It is operated by the corporation for veterans' activities under a \$50 a month lease with the city.

Pauline des Granges, assistant park and recreation director, said the corporation rents the building and its auditorium and averaged \$770 a month income from this source during the current year.

May 28, 1964, San Diego Union, A-36:3. Starlight Opera's opening set for July 16.

May 31, 1964, San Diego Union, C-2:1-3. EDITORIAL: "Yes" on propositions will aid city's future.

June 1, 1964, San Diego Union, A-21:1-2, A-23:1-2. City to spruce up Balboa Park area, by Mike O'Connor.

More than \$542,000 will be spent in Balboa Park next year to provide a series of improvements mainly in utilities, landscaping and streets.

The largest single expenditure will be \$143,000 to construct arcades on the north side of El Prado adjacent to the West and Timken wings of the Fine Arts Gallery.

June 3, 1964, San Diego Union, B-1:3. The City Council yesterday tentatively approved an appropriation of \$10,000 to assist financing of Starlight musical productions next year.

It was the first time in the 18 years of Starlight shows that a city subsidy had been sought. A similar amount is being requested from the county.

June 3, 1964, San Diego Union, B-3:3-4. Mayor Curran appoints 11 members to recently formed Park and Recreation Board.

Holdover appointees are Douglas R. Giddings, Mrs. John T. Ready and Marion Richards from the Mission Bay Park Commission and Richard M. Bowen of the Park and Recreation Commission.

New appointees are Alfred Schneider, a savings and loan executive; Dr. John R. Ford, a physician; Robert L. Covell, an electronics firm executive and president of Mission Bay Association; Wallace

Vine, a druggist; Richard F. Lustig, an accountant; Dr. Lou Robinson, a dentist; and Patrick Scott, a Young Men's Christian Association executive.

Curran announced the appointments for two-year terms ending My 3, 1966.

June 3, 1964, San Diego Union, B-3:3. "Gentleman" thief robs the Aerospace Museum of \$250 in cash and equipment valued at \$540.

"But he was gentleman enough not to touch the displays," said director Charles Brown. "A carelessly thrown match could have been disastrous."

June 4, 1964, San Diego Union, A-33:8. San Diego Zoo - \$1.5 million to Zoo from estate of Elmer C. Otto due in August.

June 5, 1964, San Diego Union, A-25:5-6. Councilman Harry Scheidle yesterday asked the city manager's office for a report on the controversial Maple Canyon Road project.

June 6, 1964, San Diego Union, A-17:5. Padre Dam dedicated as United States landmark set October 11.

June 7, 1964, San Diego Union, A-12:5-8. City playgrounds ready for summer.

June 7, 1964, San Diego Union, A-13:1. San Diego Zoo - \$12,000 incubation and brooding facility for birds built at Zoo.

June 7, 1964, San Diego Union, E-1:1-2, E-3:1-2. It's Bard Time at Old Globe; "Much Ado About Nothing" to open Shakespeare Festival

June 9, 1964, San Diego Union, B-3:3-4. Shakespeare run opening tonight.

June 10, 1964, San Diego Union, A-20:2-3. New Parks Board begins functioning; Douglas Giddings named chairman.

June 10, 1964, San Diego Union, A-22:1-2. "Much Ado About Nothing" cast does self proud, by Joe Brooks . . . Director B. Iden Payne back at the festival after an absence of 11 years.

June 11, 1964, San Diego Union, A-37:4-7. "Much Ado About Nothing" is a frolic despite a few minor flaws, by Alan M. Kriegsman.

The play itself, while certainly more than nothing, is less than much.

June 14, 1964, San Diego Union, A-25:1-4, A-26:4. Spanish Village Art Center developing world-wide fame, by Dave Farmer.

June 14, 1964, San Diego Union, E-1:1-2, E-3:1-8. "Macbeth" added to Old Globe's Shakespeare Festival, by Joe Brooks.

June 17, 1964, Minutes of Park and Recreation Board.

Lease renewed for House of Hospitality; sublease approved for Mr. Lou Haas for Café del Rey Moro.

Concept of \$200,000 addition along western portion of Old Globe Theater approved.

Civic Light Opera Association has agreed to replace benches in Balboa Park Bowl with stadium-type seats in lieu of paying rent.

Zoological Society plans to develop parking lot “for the use of all park patrons’; entails closing Zoo Drive to traffic.

June 17, 1964. REPORT TO PARK AND RECREATION BOARD by Pauline des Granges, Assistant Park and Recreation Director.

In 1868, with a population of 3,200, San Diego’s farsighted citizens dedicated 1,400 acres of park lands as City Park, now Balboa Park. Within five years, sub-dividers appealed three times to the State Legislature to set aside the dedication. They were rebuffed each time. Since then, Park Commissions and citizen groups have been protecting park lands from every conceivable type of encroachment --- a site for State College, home for the blind, professional baseball park, civic auditorium and convention center, all-faith shrine, wax museum, and a permanent home builders exhibit. If all the proposed uses had been granted space, Balboa Park would have been used three times over.

Citizens interest and Park Commission vigor have maintained Balboa Park for today’s citizens and those of the future as a center of cultural and recreational activities. Among the institutions and activities of Balboa Park are:

Museum of Man	Youth Symphony	Morley Field Tennis Courts
Natural History Museum	Junior Civic Ballet	Balboa Tennis Club (one for discussion soon)
Fine Arts Gallery	Golf Courses	Field and Target Archery
Zoo	Badminton	Boy Scouts, Girl Scouts and Campfire Girls
Organ Concerts	Table Tennis	Blind Recreation Center
Old Globe	Volleyball	Starlight Opera
House of Pacific Relations	Volley tennis	Summer Symphony
United Nations Building	Tumbling	Junior Theater
House of Hospitality	Basketball	Kearns Swimming Pool
Floral Building	Fencing	
Aerospace Museum	Shuffleboard and Bridge Clubs	
Hall of Champions	Roque Club	
Spanish Village Art Center	Horseshoes	
San Diego Art Institute		

and provision of building space for social and hobby interest groups. All operate under policies established by early Park Commissions and the later Park and Recreation Commissions. The policies for building use in Balboa Park are due for review in the future.

The Recreation side is not quite as old as the Park Commission, but it developed in much the same manner. In 1909 a group of citizens formed the Playground Association, raised money, and purchased Rose Park Playground at 12th and Island. With dollars and citizen support, they sold the need for playgrounds to the City Board of Trustees, and the Board of Playground Commissioners was created. Golden Hill and University Heights Playgrounds were established in quick succession. Miss Ellen Scripps developed La Jolla Playground and presented it to the City. This playground was a model development and one that with only minor redevelopment is still excellent.

In 1928 San Diego took the lead in the State and the Nation in providing for the use of school playgrounds and facilities for after-school-hours recreation. After 20 years of operation on an informal basis, a formal contract between the San Diego Unified School District and the City for the continuing joint use of facilities was developed in 1948. As the city limits have expanded, the same type of operational agreements have been made with the other school districts, San Ysidro, South Bay, and Sweetwater. In the not too distant future, an agreement with the Poway School District will be required.

Today after-school and summer recreation programs are conducted on 78 school playgrounds. Fifty school auditoriums are utilized for children's and adult dancing and special events. Eleven high school gymnasiums are scheduled for youth sports.

In 1946 the report of the Civic Recreation Committee, appointed by Mayor Knox, recommended that the recreation program be diversified to include such cultural activities as music, drama and crafts and that the "drab, dull playgrounds and community centers be made more attractive by the addition of trees and turf." It was suggested that they be given more eye appeal.

From this report a policy was developed to procure, wherever possible, neighborhood parks and community park and recreation sites adjacent to elementary schools, thus providing an attractive area adjacent to the outdoor sports area of the school playground. The Park and Recreation Commissions were combined shortly after the 1946 report.

In addition to the school facilities in operation, the Department operates 19 Park and Recreation Centers. On four of the areas new community buildings are under construction. One half of the funds are supplied by the City Capital Outlay program and one half by the Federal Accelerated Public Works Program. Hopefully, on your tour of facilities, you will have an opportunity to visit one of the new community buildings, at Colina del Sol Park. Also, on the tour you will note many substandard facilities and partially-developed areas. As you review in the future the Capital Outlay Program, the necessity to complete the areas will seem most important. But equally important at this time, if not more important, is the need for acquisition of lands for future parks and recreation sites in new sections of the city.

Our citizens must have some of the foresight of George Marston. He purchased approximately three-fourths of Presidio Park and developed the entire park at his own expense when --- in spite of the Park Commission's urging --- the City Council could not believe a park on the hills behind Old Town would ever serve any useful purpose. Today Serra Museum reports electric eye counts of 145,000 visitors annually, and picnic spots in Palm Canyon, the Grotto and the Bowl are at a premium any spring, summer or warm winter weekend.

Some of the same vision went into the early planning for Mission Bay Park. Foresight in planning and dedicated effort have turned the mud flats of the Thirties into the aquatic playground that is Mission Bay Park today. It is our responsibility to maintain this area and develop it for the future.

Mission Bay, Balboa and Presidio are the largest parks. But also adding to the beauty and interest of our city are the shoreline and beach parks, neighborhood and community parks, and plazas. Washington Square and El Campo Santo in Old Town remind us of our Mexican-Spanish heritage and Horton Plaza of decisions to be made. "What happens to the fountain? What will the new look be?" These are questions that must be answered soon.

The landscape development and maintenance of parks and plazas, street tree planting, control and maintenance are all responsibilities of the Park Division. At the present time there are approximately 150,000 street trees in the public right-of-way to be trimmed, sprayed and picked up on stormy nights. A new Subdivision Ordinance requires the sub-dividers to plant trees according to City specifications. Many of the larger sub-dividers in recent years have planted trees voluntarily. In Allied Gardens you will see some excellent examples of street tree plantings.

As you pass the Allied Gardens Recreation Center, visualize the park area around it --- rolling lawns, trees, picnic areas --- which will be developed during the coming year.

Plant materials for new developments, for replacement in established parks, and for floral displays in the Botanical Building, Alcazar Garden and formal gardens in Balboa Park are grown in the park nurseries. An exciting new task just about to begin is the planting and, in the future, maintenance of the plantings in the new Community Concourse. The Chollas Nursery has recently been

established. In progress there at the present time is experimental work to develop drought-resistance and low-maintenance plant materials suitable for slope and erosion control. If successful, the cuts and fills adjacent to our major streets may be more attractive in the future.

In Sunday's newspaper, most of you say, I presume, that this year Yosemite Park is celebrating the 100th anniversary of its proclamation as a National Park by President Abraham Lincoln. During this same period in history the California Legislature considered for the first time legislation to protect the ocean front of our state for the public. The legislators did not have much success, and in most coastal counties either the local jurisdiction or the State has had to spend millions in purchasing the frontage rights. San Diego again is outstanding. Over 17 miles of ocean front are available to the public. This is not an unmixed blessing. The need for lifeguard service, for controlling the use of the area and refereeing between the users and adjacent neighbors, the provision of parking and rest room facilities all are problems to be met. On tour you will see Kellogg Park, Scripps Cove Park, Pacific Beach Palisades and Tourmaline Canyon Parks, Mission Beach Strand, Ocean Beach Park (with the projected Fishing Pier site), and Sunset Cliffs --- these areas are among our major recreational resources.

The Aquatics Division of the Department maintains lifeguards on ocean front and bay beaches and boat patrols on Mission Bay. The division operates the Mission Beach Plunge and Kearns Pool and conducts swimming and sailing classes. It also coordinates and provides service to the many special events in Mission Bay, model yacht races, rowing regattas, power and speed boat races. Summer is the Division's busy season.

If time permits on your tour, you will think yourself heading toward Los Angeles, but actually you will be making a quick trip to Torrey Pines for a look at two of the most beautiful 18-hole golf courses --- why be modest? --- in the world.

They were developed in 1950, partially on a portion of Torrey Pines Park with the balance on City Pueblo Lands. Other golf facilities operated by the Golf Division are the 18-hole and the 9-hole course in Balboa Park. Golf courses operating under leases are in Mission Bay Park, Presidio Park and Colina del Sol. A fourth lease is in process with the Sunset International Petroleum Corporation on the lands adjacent to Lake Murray. When lease was suggested, the Park and Recreation Commission insisted that the terms be such that they would protect the right of the public to play and that green fees would be in line with fees at public courses and private courses open to the public.

In spite of the many new golf courses opened in recent years in the county, the San Diego Municipal Golf Courses are popular to resident and tourist golfers. Two foursomes starting every seven minutes at Torrey Pines is S. O. P. on an weather-good weekend. This amount of play makes for maintenance and reservation problems, but well established policies and procedures keep complaints at a minimum. Time schedules for development of additional courses and regulation of play will demand future consideration by your group.

"From the cradle to the grave" has been used to describe the Park and Recreation Department operations. The cradle part is slightly vague, except that, perhaps, it is the result of a wholesome recreation activity where boy meets girl; but the grave portion is a reality in the maintenance and operation of Mount Hope Cemetery. Every attempt is made in the setting of lot prices and fees for services to make the cemetery self-supporting. One-half of each lot sale is placed in the endowment fund. The interest from the fund is used to provide for perpetual care. Other fees charged offset the actual cost. In the past few months, the Council has asked that lot sale and service prices be reviewed in order that a portion of the Capital Improvement costs be met. At the present time a new office building and a new division are under construction at Mount Hope.

A major problem in the cemetery field is Calvary Cemetery in Mission Hills. This was developed with no perpetual care endowment and remains in poor condition. A Commission several years ago recommended that head stones be removed and the area be designated and developed as a Pioneer

Park. This is possible under the Health and Welfare Code. At the time it was proposed groups most closely identified with the cemetery were agreeable to such development.

My time is running out. But before it is gone, may I reiterate: the Park System and the Recreation Programs of our city are the result of dedicated citizen interest.

The Bartholomew Plan for Balboa Park, the Park and Recreation Study, and the General Plan, not yet complete, are the results of hours of citizen participation. Their recommendations, contained in the reports made available to you, form an excellent springboard for your future decisions on such matters as the arcades, architecture, road patterns, and proper use of buildings in Balboa Park, fees and charges for and content of recreation programs, building rentals, and park acquisition and development.

June 26, 1964, San Diego Tribune. Construction to be done by September 1; two-level building to house works of old masters.

The new home of a multi-million dollar art collection is nearing completion.

The \$1-million Timken Gallery, which will house the collection of paintings by old masters owned by the Putnam Foundation is expected to be finished September 1. It is being built just east of the Fine Arts Gallery in Balboa Park on the site of the old American Legion Building.

Designed by Frank L. Hope & Associates, AIA, the gallery features modern classical styling with a Spanish influence. The exterior is travertine marble with bronze trim with ornamental grills.

The two-level building, being built by M. H. Golden Construction Co., will have a basement with 2,000 square feet and a main floor with 8,535 square feet. It has been designed to provide natural overhead lighting for the valuable paintings.

The gallery also will be fire-proof, air-conditioned and humidity-controlled.

Bob Grant, project engineer for University Mechanical and Engineering Contractors, Inc., which is installing the heating and air-conditioning systems, said all rooms in the gallery will have constant temperature control.

The air-conditioning system will have a cooling capacity of 522,000 British thermal units (BTU), he said. Double ducting, lined inside for quietness, is a feature of the system.

The heating system will have a capacity of 498,000 BTUs, he said.

The gallery is named after the late Henry H. Timken, founder of the Timken Foundation in Canton, Ohio. It is not related to the Putnam Foundation.

July 27, 1964, San Diego Union, A-17:1-8. San Diego Zoo - Zoo lists "most wanted" specimens, by Robert Zimmerman (illus.).

WANTED: Giant panda. Known for cuddly, bear-like appearance. Not seen in Western Hemisphere since World War II. Substantial reward if brought back alive.

WANTED: Tasmanian "tiger," alias Tasmanian "wolf." Expert at disguise. Barks like wolf, has stripes like tiger, but is neither. Unknown except in Tasmania, and seldom seen there.

WANTED: Hooded crane. Makes annual flight from hideout in Red China to feeding grounds in Korea and Japan. All members of hooded crane gang wear black "cap" on head. Not dangerous, but clever at evading capture.

This is part of a rogue's gallery which has the same standing at the San Diego Zoo as the list of "most wanted" fugitives at any police station.

Because of man-caused circumstances or their own sky habits, these creatures are among the rarest, most seldom seen members of the animal kingdom. Any zoo would like to exhibit them but few of them do.

The San Diego Zoo is the home address of 2,479 creature, making it the world's largest collection of animals on exhibit. It boasts of many specimens that cannot be seen elsewhere in the western hemisphere.

Yet there are gaps which fret curators as much as missing pieces for a jigsaw puzzle.

George Pournelle, curator of mammals, says the most prized acquisition the zoo could make --- in his opinion --- would be a giant panda. Probably any zoo official in America would agree with him.

The giant panda, which somewhat resembles a raccoon but grows as big as a bear, has become the most sought-after, and hence the most high-priced wild animal in the world. Pournelle figures that if one got onto the open market it would bring \$25,000 to \$30,000, or more, if many zoos started bidding for it.

"We were on the track of one in 1958, but we ran into the federal regulations on trade with Red China. That one wound up in the London Zoo. Other than that, the only ones we know of in captivity are in the zoos of Moscow and Peking."

The giant panda clammers through the bamboo forests of the remote Szechwan and Kansu provinces of China. Because of cold war restrictions, the only foreseeable chance of one finding its way to San Diego is via Moscow.

"If the pandas in the Moscow zoo were to reproduce, we would be free to try to acquire one," says Pournelle. "So far, the Moscow pandas haven't cooperated."

Pournelle also would like to see a Tasmanian "tiger" in the San Diego Zoo. This marsupial with a striped back and a barking voice, ranges the "outback" of Tasmania. Naturalists seldom see it --- only its pawprints. There are none in zoos anywhere.

San Diego's zoo has three kinds of rhinoceros, the relatively plentiful species from Africa and India. Pournelle hopes that some day the zoo can add the Javan and Sumatran rhinos before they become extinct.

The scaly-coated Javan rhino and the "hairy" Sumatran rhino are dwindling in numbers at the hands of illicit hunters who shoot them to obtain their horns, which are believed in Asiatic folklore to have aphrodisiac properties. By last estimate there were only 24 to 50 Javan rhinos left and 100 to 170 of the Sumatran variety.

"If pairs of these rhinos could be protected in a zoo where they could reproduce, it might save them," says Pournelle.

The San Diego Zoo participates in the International Union for Conservation of Nature, headquartered in Switzerland, which is trying to protect rare species.

Political turmoil in Africa and Asia is taking its toll in wild animals. New native governments often are too preoccupied with civil problems to maintain conservation practices in the wild and enforce hunting regulations.

In the bird department of the San Diego Zoo, Dr. James Dolan would pick the hooded crane as the bird that would add the most to his collection. "This is easily one of the rarest birds in the world," he says.

The hooded crane is only a part-time prisoner behind the bamboo curtain. The cranes breed in the Lake Koko Nor region to Tibetan China, but in the winter, when the lake freezes over, they migrate to Korea and Japan.

"No one has succeeded in catching any," Dolan says. Another rare bird is the New Zealand blue duck. Wildlife authorities in New Zealand have permitted only one pair of these mallard-sized ducks to be exported --- to an English zoo.

Also high on Dolan's list are the tooth-billed pigeon which as a tooth-like protrusion on its beak and is found only in Samoa, the Congo peacock which is the only pheasant ever seen in Africa, and the kagu, a crane-like bird found only in New Caledonia.

The rarest of all birds is not on Dolan's list because it is so near extinction that it is counted out as a possible zoo specimen. This is the whooping crane. A truly vanishing American, there are only 36 whooping cranes still surviving, and conservationists are engaged in a crash program to try to save them from total extinction.

Charles B. Shaw, the zoo's curator of reptiles, believes there are enough snakes in the San Diego Zoo to satisfy almost anyone, and the only important blanks now are in the lizard category.

The zoo's one and only specimen of the nearly-extinct tuatara lizard of New Zealand died in 1952. Two more are currently en route from down under, filling this gap.

Shaw is still discouraged about the fate of the two Komodo Dragons --- giant lizards from the Komodo Islands off Indonesia, which reach the zoo here last year. One of them died in December, the other in January, both the victims of a parasitic disease.

While the public flocks to see such eerie creatures as Komodo Dragons, Shaw personally would be happiest at seeing a specimen with the unglamorous name of Fly River turtle.

The Fly River turtle --- named for the river in which it inhabits in New Guinea --- is distinctive because it is a fresh water turtle but it has the size and appearance of a big sea turtle. "I've never seen one offered for sale by a dealer anywhere. As far as I know there is only one of them in captivity, in a zoo in Australia," Shaw says.

Shaw believes that visitors to the reptile house are more impressed by the size of creatures than by their rarity as specimens. "Sometimes I think the only way we could really impress people would be to display a tyrannosaurus rex."

This is one specimen the zoo will never find. Tyrannosaurus rex, a 50-foot dinosaur, has been extinct for 50 million years.

July 28, 1964, San Diego Union, A-9:5-6. San Diego Park and Recreation Department will sponsor a summer musical, August 21-22, at 8:30 p.m. in Balboa Park Bowl presented by the San Diego Civic Arts for youth; it will be "Tom Sawyer," based on the Mark Twain classic.

July 29, 1964, Minutes of Park and Recreation Board

REPORT BY CHAIRMAN BALBOA PARK AND OTHER PARKS COMMITTEE

Richard Bowen, Chairman of the Balboa park and Other Parks Committee, made the following report. The Committee met on July 15th. A discussion on arcades in Balboa Park was held and Mr.

Barrett, President of the Fine Arts Society, indicated that the Society would prefer not to have arcades adjacent to the West Wing. The Committee adjourned and proceeded to Balboa Park where they inspected the model of the West Wing and walked around the Timken Gallery, inspecting the Lily Pond and the reconstruction work being done at the present time. On July 22nd the Committee met in the Conference Room of the Park and Recreation Department Administration Building. Mr. Bowen reported that Mr. Lustig, Mr. Scott and he had met with Mr. Frank Hope, architect, on Tuesday, July 21, 1964, and viewed the model of the Timken Gallery. Mr. Hope indicted that arcades to the south of the Timken Gallery would, in his opinion, destroy the beauty of the new gallery. Mr. Henri Jacot, architect, and former president of the Balboa Park Protective Association, was introduced. He indicated that he was speaking for the Balboa Park Protective Association and stated that the buildings under construction did not add to the atmosphere of Balboa Park, and that it was the hope of the Balboa Park Protective Association that arcades would unify the El Prado area. He also indicated that the arcades add to the pleasure of park patrons because of their capacity to afford changing views, provide protection from sun and rain, and access for the entrance into activity buildings.

Mr. Jacot recommended that the construction of the arcades be delayed until after the completion of the Timken Gallery and the West Wing in order that all concerned may have the feel of the buildings and also develop to some extent the pedestrian traffic pattern. He recommended that a committee be formed which would gather all of the facts regarding use and public attitudes prior to a decision to actually construct arcades.

Mrs. James B. Abbey, President of the Balboa Park Protective Association, stated that she was in wholehearted accord with the opinions expressed by Mr. Jacot and would like to recommend in addition that an Architectural Commission be established in order to study Balboa Park problems and to recommend a unified plan for the overall architecture of the park. She indicated that it was

(Note: page #19 missing from Amero files.)

2. That the funds for the construction of sidewalks be taken from the 1964-65 Capital Project for arcades, and that the balance of the funds be deferred to the 1969-70 Capital Program.
3. That an Architectural Review Committee, with subcommittees, be appointed.

Chairman Giddings states that the Board should act upon the above recommendations of the Committee. Accordingly, the following actions were taken:

ACTIONS BY THE BOARD ON ABOVE RECOMMENDATIONS.

It was moved, seconded and unanimously approved that a recommendation be made to the City Council to build sidewalks in the location of the arcades and that construction of the actual arcades be delayed.

Chairman Giddings requested that the second recommendation "That the funds for the construction of sidewalks be taken from the 1964-65 Capital Project for Arcades, and that the balance of the funds be deferred to the 1960-70 Capital Program," be deferred to Item 6 on the Agenda of this meeting which is specifically Capital Outlay Program.

It was moved and seconded that the third recommendation "The appointment of an Architectural Review Subcommittee" be put on the Board Agenda.

A discussion ensued. As a result of the discussion, Chairman Giddings appointed Board Member Lustig to act as liaison representative of the Board to work with Director Earnest and staff in the selection of qualified architects to serve on the proposed Architectural Review Committee.

Accordingly, the motion which had been seconded was tabled by unanimous consent.

July 30, 1964, San Diego Union, A-12:1-2. San Diego's annual Dahlia Show opens Saturday in Conference Building.

July 31, 1964, San Diego Union, A-20:8. Park and Recreation Board recommended deferring construction of arcades around east and west wings of Fine Arts Gallery; money will be used for construction of four tennis courts in Morley Field.

Board members also delayed adoption of a policy to control Balboa Park land and building leases until they can be assured the policy will not exclude such organizations as the United Nations.

August 1, 1964, San Diego Union, A-17:2-3. San Diego Zoo - \$1 million check presented to Zoo; funds turned over to Society from estate of the late E. C. Otto, by Edward Niciejewski.

August 1, 1964, San Diego Union, A-18:5. Dahlia Show opens today in Conference Building.

August 2, 1964, San Diego Union, B-2:4. Winners chosen at Dahlia Show.

August 2, 1964, San Diego Union, C-2:1-3. EDITORIAL: Balboa Park, A Jewel That Will Not Tarnish.

Balboa Park is not a natural advantage, such as our beaches. It is the result of detailed planning, carried on by one generation after another of San Diegans who have pride in their community. Much of the current improvement campaign is financed through private contributions.

August 3, 1964, San Diego Union, A-9:4. The San Diego Symphony will present three ballets in the third summer concert series starting at 8:30 p.m. in Balboa Park Bowl.

August 4, 1964, San Diego Union, A-11:1-2, A-13:1. Harry C. Haelsig quits planning post; will join development firm, by Michael O'Connor.

August 4, 1964, San Diego Union, A-12:7. For the fourth event in the Old Globe's Festival Concert series, the John Biggs Consort presented a program of music by Shakespeare's contemporaries, by Alan Kriegsman.

August 7, 1964, San Diego Union, A-14:1-2. Starlight Opera goes wild with "Wizard of Oz," by Joe Brooks.

August 9, 1965, San Diego Union, A-11:7-8, A-13:1. Balboa Park face-lifting underway; new art museums highlight era of renovation, by Cliff Smith (illus.).

The existing Fine Arts Gallery recently received two semi-automatic doors, which improved the extension appearance of the building.

August 10, 1964, San Diego Union, A-18:5. Attendance mark of 3,800 set by "Wizard of Oz" last night at Balboa Park Bowl.

August 11, 1964, San Diego Union, A-14:3-5. One hundred and eighty-nine youngsters graduated at San Diego Zoo summer school, by Windsor Ridenour (illus.).

August 12, 1964, San Diego Union, A-19:3. "Acting Shakespeare --- Then and Now" will be presented Monday as the fifth event of the Shakespeare Festival Concert-Theater series.

August 12, 1964, San Diego Union, A-19:4-5. Audience delights in soprano Mary Costa at last night's San Diego Symphony concert in Balboa Park Bowl, by Alan Kriegsman.

August 13, 1964, San Diego Union, A-15:1-2. Planning Commission Board promotes R. James Fairman to City Planning Director.

August 16, 1964, San Diego Union, A-21:1-7. San Diego Zoo - animal exchanges with many countries enrich Zoo.

August 16, 1964, San Diego Union, A-38:1-3. Museum of Man researchers find Mixtex Indians in Tijuana, by Syd Love.

August 19, 1964, San Diego Union, A-14:1-2. "Then and Now" Shakespeare program diverting, by Alan Kriegsman.

August 19, 1964, San Diego Union, A-15:1. Nominations announced for Old Globe awards.

August 19, 1964, San Diego Union, A-15:2-4. Last night's San Diego Symphony concert had novel twist, sonic glamour, by Alan Kriegsman.

August 20, 1964, San Diego Union, A-21:3-4. Old Globe announces 28th season; first fall production will be "Once More With Feeling."

August 21, 1964, San Diego Union, A-14:1-4. "Tom Sawyer" opens at Balboa Park Bowl tonight.

August 21, 1964, San Diego Union, A-15:4. Arthur Fiedler will be guest conductor of the San Diego Symphony Orchestra in a program to begin at 8:30 p.m. Tuesday in Balboa Park Bowl.

August 26, 1964, San Diego Union, A-8:1-4. Arthur Fiedler, Symphony run gamut, by Alan Kriegsman.

August 28, 1964, San Diego Union, A-12:1-4. "The Sound of Music" scores again at Starlight Opera, by Joe Brooks.

August 29, 1964, San Diego Union, A-18:6. H. O. Davis, San Diego Exposition leader, died yesterday in Palm Springs; director of the 1915-16 Panama-California Exposition in San Diego and public works director of the 1935-36 California Pacific International Exposition; originated the idea for night illumination of the exposition buildings and supervised landscaping of the structures in the park.

August 31, 1964, San Diego Union, A-21:6. The French film, "The Lovers of Verona," will conclude the summer festival concert theater series at the Old Globe Theater tonight at 8:30.

September 16, 1964. Community Concourse (Civic Center) dedicated.

September 30, 1964, San Diego Union, B-1:3. Citizens' Coordinate group criticized reorganization of the former Park and Recreation Commission by City Manager Tom Fletcher.

September 30, 1964, San Diego Union, B-1:6. Maple Road would delay other street improvement projects; Council confers with aide, by Michael O'Connor.

There is no money in the six-year capital outlay program for streets to cover Maple Canyon construction. A recommended route for the major East-West street would cost \$1 million and more if tunnels are used for certain parts.

October 3, 1964, San Diego Union, A-17:2-4. San Diego Zoo - Monday is Founder's Day and a free day at Zoo

October 4, 1964, San Diego Union, A-21:6-7, A-22:1. Thousands of San Diegans shuffled through House of Hospitality to see John F. Kennedy library exhibit (illus.).

October 4, 1964, San Diego Union, I-10:4-5, I-13:1. Sea World pleases Walt Disney.

October 8, 1964, San Diego Union, A-22:1. Planners back Maple Canyon alternative; Park Board voices opposition, by George Story.

October 12, 1964, San Diego Union, A-17:1-3. Balboa Park scientific expedition probes nature, by Joe Stone (illus.).

October 13, 1964, San Diego Union, A-19:3. The Highway Development Association yesterday urged construction of the proposed Maple Canyon Road as far east as Park Boulevard.

October 15, 1964, San Diego Union, A-19:8. Park and Recreation Board yesterday set November, 1966 as a target date for a proposed multimillion-dollar park bond issue; indicated no objection to a Café del Rey Moro operator's plans to apply for a license to permit the café to serve cocktails to dinner customers..

October 16, 1964, San Diego Union, A-29:2. Representative William E. Miller, GOP vice presidential nominee, to give speech at Balboa Park Bowl tomorrow night.

October 17, 1964, San Diego Union, A-17:6-8. Museum of Man - Museum offering nudes for sale, by Beverly Beyette . . . canvases, signed by L. Ruel, dating from 1881.

October 18, 1964, San Diego Union, C-7:6-8. At halfway mark, New York fair more than a fair success..

October 22, 1964, San Diego Union, B-20:1-2. Bond issue study planned on parks.

October 23, 1964, San Diego Union, A-21:4. Starlight Opera tells 1965 plans at dinner tonight.

October 24, 1964, San Diego Union, A-18:6-8. Starlight Opera looks back, plans bright future, by Joe Brooks.

October 25, 1964, San Diego Union, A-31:4-5. Flag ceremony planned November 8 in Balboa Park.

October 28, 1964, San Diego Union, A-17:3. Hearing set November 10 on disputed Maple Canyon Road project; compromise plan to be offered, by Michael O'Connor.

November 1, 1964, San Diego Union, A-33:1-2. Fourteenth annual Fiesta de la Cuadrilla to begin Friday at Balboa Park.

November 2, 1964, San Diego Union, A-17:1. Maple Canyon Road heading set for November 10.

November 4, 1964, San Diego Union, B-1:1-2. Massing of Colors Sunday in Balboa Park.

November 6, 1964, San Diego Union, A-10:3. John Ellsworth, actor, Craig Noel, director, give "Galileo" a lift at Old Globe, by Alan Kriegsman.

November 8, 1964, San Diego Union, A-23:5. Massed color rites scheduled at Organ Pavilion today.

November 9, 1964, San Diego Union, A-21:7. 7,000 attend color rites, by Jerry Marcus.

November 11, 1964, San Diego Union, A-13:4-5. Old Globe picks "Five Finger" cast.

November 11, 1964, San Diego Union, B-1:4, B-3:4-5. Council defers decision on park road proposal after 2-hour hearing, by Michael O'Connor.

November 13, 1964, San Diego Union, A-22:5-6. Café del Rey Moro gets liquor okay.

November 14, 1964, San Diego Union, A-17:4-5. Dr. E. Yale Dawson quits as Museum of Natural History chief.

November 15, 1964, San Diego Union, A-15:4. Maple Canyon Road seen as aid to park plan, by Michael O'Connor.

November 17, 1964, San Diego Union, A-17:3. Mayor Curran names World's Fair unit; citizens to decide on seeking 1967 event set in state.

November 17, 1964, San Diego Union, A-17:7, A-18:1. City's hotel tax is ruled subject to vote of public; lower court ruling is upheld on appeal, by Homer Clance.

November 17, 1964, San Diego Union, A-20:2. San Diego Zoo - Dr. Charles Schroeder, Zoo chief, gets marsupials, six rare birds.

November 18, 1964, San Diego Union, A-11:4-5. "Five Finger" play quite an exercise, by Joe Brooks.

November 18, 1964, San Diego Union, A-19:1-2. New site proposed for Memorial Arch at Balboa Park; Park and Recreation Board chief urges Maple Canyon Road location.

The chairman of the city Park and Recreation Board yesterday suggested that a memorial structure could be constructed along the path of the proposed Maple Canyon Road because it would become the main entrance to Balboa Park.

November 18, 1964, San Diego Union, A-19:7, A-25:7. Special election planned on city hotel room tax; Council okays action after court setback, by Michael O'Connor.

November 19, 1964, San Diego Union, B-3:3. San Diego Players will perform "Bus Stop" at 8:30 p.m. November 25-28 in Puppet Theater.

November 27, 1964, San Diego Union, A-21:1-2. Home Show opens in Electric Building.

November 28, 1964, San Diego Union, A-17:1. A pair of Chinese leopards --- the only ones in the United States --- went on exhibit yesterday at the San Diego Zoo. In separate cages. (illus.).

November 28, 1964, San Diego Union, A-17:7. Yule Tree Lane lit in Balboa Park; event coincides with debut of Electric Appliance Show.

November 28, 1964, San Diego Union, B-2:7-8. Barbara Marsh fears network of roads in Balboa Park.

Editor: If the proposed Maple Canyon Road slashes its ugly way across the northwest corner of Balboa Park, I shall concur heartily with the suggestion that it be spanned by a memorial arch --- a memorial to the beauty of "The Park That Was."

I am puzzled, however, by Douglas Giddings' suggestion that this road, which heretofore has been described as a high-speed road designed to route traffic around Hillcrest, can now be described as "a dramatic entry way" to the park.

December 4, 1964, San Diego Union, A-17:8, A-23:2. Maple Canyon Road is approved; work started.

The City Council yesterday approved a route for Maple Canyon Road and set aside the first increment of a total of \$2,000,000 construction cost to begin work this fiscal year.

Approval of the two actions in conference was unanimous with Mayor Curran absent. Official documents certifying the route and the initial expenditure of \$_____ will be on the official docket for approval in the next few weeks.

The decision ended more than two years of controversy on the major east-west street, which is designed to speed traffic from downtown to Hillcrest.

In a related action, councilmen referred the question of the road route in Balboa Park to the Park and Recreation Board for review. The board also will study a "memorial arch" concept of a new gateway to Balboa Park where Maple Canyon Road will enter the park.

December 7, 1964, San Diego Union, A-13:4. Yule Center opened in Organ Pavilion yesterday before 3,000 persons.

December 7, 1964, San Diego Union, A-13:1-3, A-14:1-2. Doctor from Mercury staff to direct Naval Hospital.

December 9, 1964, San Diego Union, B-1:8. Citizens' group urges City to drop World's Fair talk.

December 9, 1964, San Diego Union, B-1:4. Naval Hospital rites mark command shift.

December 10, 1964, San Diego Union, A-15:6. Yule program slated today in Balboa Park.

December 10, 1964, San Diego Union, A-20:5. Two city advisory agencies --- the Park Board and Planning Commission --- study Maple Canyon road.

December 10, 1964, San Diego Union, 21:1-3. Park and Recreation Board reshuffled its committee organization to encourage more citizen participation; members of subcommittees given for Mission Bay, Balboa Park, northern parks, central parks and southern parks.

December 13, 1964, San Diego Union, C-2:6. Priscilla Murphy cites park plight.

Editor: The approval by the City Council of another traffic road through Balboa Park (via Maple Canyon) brings home to us that in 1953 the people of San Diego made an unwise decision when they surrendered their right of approval on park projects to the council and city manager.

December 14, 1964, San Diego Union, A-19:6. Thousands saw Community Yule program at Balboa Park yesterday; two-hour program began with an organ recital by Douglas Ian Duncan of famous Christmas carols.

December 15, 1964, San Diego Union, A-15:7. Drive urged to widen 395 in park; freeway already overloaded Highway Development Association told.

December 16, 1964, San Diego Union, A-1:2-3. Two San Diego City College students were killed today when the car in which they were riding plunged from the Ford Building hill in Balboa Park and rolled 178 feet onto Cabrillo Freeway.

December 16, 1964, San Diego Union, B-1:5-6. Downtown mall plan is unveiled.

December 23, 1964, San Diego Union, A-13:1-2, A-14:2-3. City Council continues study of possibility of 1969 exposition as part of city's 200th birthday celebration; city and California World's Fair Corporation come to parting of ways regarding 1968 Fair here.

December 25, 1964, San Diego Union, A-21:3. San Diego Zoo - educational center in Zoo area to be named after Elmer C. Otto.

The new center would accommodate three separate functions in addition to providing classrooms and facilities for the use of students. It would house a public relations office, a facility for curators and librarians and facilities for communications such as television, graphic arts, photography and similar activities.

December 27, 1964, San Diego Union, A-11:4-7. Switzer Canyon Road, third freeway to bisect park; freeway would be 2-1/4 miles long and would cost about \$10 million.

December 30, 1964, San Diego Union, B-2:7-8. N. R. Keough writes park being destroyed with roads.

December 31, 1964, San Diego Union, B-1. San Diego Zoo - Otto Building will give Zoo educational lead.

An educational program far more extensive than that offered by any other zoo in the world will be made possible by the new Elmer C. Otto educational center here, Dr. Charles Schroeder, San Diego Zoo director, said yesterday. The project was announced last week.

1965

Summary of Events in 1965

(Notes: Dates of events are approximate only.)

Plans to widen U. S. 395 (March 11, 1965)

Voters approve room tax (February 17, 1965)

Plans for World's Fair (March 9, 1965)

Rise of golf fees (April 23, 1965)

Strike at San Diego Zoo (July 3, 1965)

Museum of Man admission fees (July 15, 1965)

Proposal to eliminate San Diego Zoo tax subsidy
(August 20, 1965)

Timken Gallery opens (October 18, 1965)

Box and business offices added to Old Globe
(October 26, 1965)

Aerospace Museum requests Ford Building
(October 26, 1965)

January 7, 1965, San Diego Union, 36:4-5. Electric Building - San Diego has eliminated Electric Building in Balboa park as a future site for commercial shows.

January 8, 1965, San Diego Union, B-1:3. San Diego Zoo - Zoo awaiting San Pasqual project.

January 11, 1965, San Diego Union, A-15:8, A-18:1. Community Concourse dedicated at brief rite.

January 12, 1965, San Diego Union, A-15:7-8. Group hears need to widen 395, by Joe Brooks.

Almost everyone agrees that U. S. 395 needs to be widened through Balboa Park, but nobody wants to lead the battle to get it widened, the Highway Development Association was told yesterday.

January 14, 1965, San Diego Union, A-18:1. Chamber of Commerce, Park Board, Hotel firm back room tax; support called wide for Proposition C.

January 14, 1965, San Diego Union, A-31:2-3. Park Board discusses new education center.

Members of the Board of Park Commissioners were asked to make a recommendation on the location of the center in Balboa Park near the Zoo.

February 6, 1965, San Diego Union, A-10:3-6. Old Globe's "The Hostage" would please Brendan Behan, by Alfred JaCoby.

February 10, 1965, San Diego Union, B-7:2-4. State of El Cid lighted last night for the first time; gift from the county's electrical industry (illus.).

February 14, 1965, San Diego Union, A-17:7. Big vote likely Tuesday in room-tax election; intense two-month campaign ending, by Michael O'Connor.

February 16, 1965, San Diego Union, A-11:5-6. "Come Blow Your Horn" opens at Old Globe for a four-week run.

February 16, 1965, San Diego Union, A-15:1-2, A-17:4. Study committee of Highway Development Association urges widening of U. S. 395 park route to eight lanes; rising accident toll cited, by Cliff Smith.

February 17, 1965, San Diego Union, A-1:7-8, A-2:6. San Diego voters okay Proposition C, reject A and B; room-tax approved by 52 percent turnout, by Michael O'Connor.

February 17, 1965, San Diego Union, A-11:4-5. "Come Blow Your Horn" encores top note at Old Globe, by Dick Bowman.

February 18, 1965, San Diego Union, A-33:6. Officials map legal actions on room tax, few snares remain, by Michael O'Connor.

March 1, 1965, San Diego Union, A-16:1-2. San Diego Zoo - rhino, elephant flown to Zoo.

March 8, 1965, San Diego Union, B-2:8. Mrs. C. R. McMillan praises care at Naval Hospital.

March 9, 1965, San Diego Union, A-13:4-5. Officials hear protests on Balboa Park freeway.

March 9, 1965, San Diego Union, A-13:3, A-14:1-2. World's Fair plan gets second look; businessmen's group to ask City Council for assistance.

The group, headed by Douglas Giddings, agreed after a meeting in the Administration Building to ask the City Council for staff assistance to investigate a proposal by Joseph B. Scholnick of Long Beach, vice president of the California World's Fair Corp.

March 11, 1965, San Diego Union, A-19:4, A-22:4. Park Board will fight wider 395; resolution hits proposal for 8-lane freeway.

March 11, 1965, San Diego Union, A-29:4. City park bond issue sought for 1966 ballot.

March 19, 1965, San Diego Union, B-1:1-2, B-3:3. City Council gets \$100 million projects plan; City Manager Tom Fletcher submits 6-year capital outlay budget . . . roads, paving and sprinkler system for Golden Hill area, \$124,500.

April 22, 1965, San Diego Union, A-17:1-3, A-23:1. Master Plan revealed for area east of park, by Cliff Smith.

A 15-year master plan for revitalizing and beautifying a large part of the city east of Park Boulevard and Balboa Park was made public at a press conference yesterday.

The plan includes proposals for expansion and "compaction" of commercial centers, increases in higher-density housing, including high-rise apartment buildings, new recreation and cultural facilities and many changes in streets to give better access to the area.

Titled the Mid-City Plan, it is the product of three years of study and meetings by the city Planning Department and a citizen's group called the Mid-City Development Council.

The plan includes . . .

Provisions for medium to high-density development adjacent to Balboa and Colina del Sol Parks. Property fringing the parks is earmarked as excellent ground for luxurious and high-rise apartments.

July 2, 1965, San Diego Union, A-1:8. San Diego Zoo - Zoo plans to open today despite strike; non-union workers to man facility, by Cliff Smith.

July 3, 1965, San Diego Union, A-1:6. San Diego Zoo - skeleton staff keeps Zoo going.

Caption for portrait of pachyderm, "Liz," the zoo's newest baby elephant; domiciled near the Children's Zoo.

The animals provided the show as usual yesterday at the San Diego Zoo but it was an industrious skeleton staff of people working in unfamiliar jobs that kept it going.

As an estimated 8,500 visitors flocked in for the Zoo's reopening, Dr. Clyde Hill, assistant curator of mammals, could be found cleaning the tapir and hippo enclosures with a fire hose.

Dr. Charles York, director of research at the Zoo Institute for Comparative Biology, turned tiger keeper, actually entering the big cat's grottoes to clean them.

Ben Allen, formerly elephant keeper and now a security policeman at the Zoo, went back to his old job.

Adrenal Must, hostess at the zoo restaurant, was cutting meat for the carnivores in a food preparation building in Dog and Cat Canyon.

The Children's Zoo was closed but a number of secretarial and library workers cared for the young animals there.

Avail, a baby gorilla, and Gabrielle, an infant gibbon, were cuddled and fed by librarian Deal Harrowed.

Dr. Lynn Griner, Zoo pathologist who coordinated animal care operations, said the hastily recruited staff did an excellent job.

"A few animals were fed an hour late or early," he said, "but generally everything is in beautiful condition."

The non-union employees said the animals seemed to miss the people when the Zoo was closed all day Thursday for the first time in its 49 years.

Robert Gray, of the public relations department, said the three baby gorillas who usually delight crowds in the Children's Zoo with their monkeyshines were morose without their audience.

Gray said Liz, the newest baby elephant, trumpeted her displeasure at the loneliness and performed all sorts of antics to attract attention everytime a Zoo staffer came near.

Griner agreed that many of the animals "definitely sensed" the absence of people.

July 3, 1965, San Diego Union, A-1:8. San Diego Zoo - agreement ends Zoo strike, by Cliff Smith.

The two-day San Diego Zoo strike ended last night when Zoo officers and Teamsters Union members approved a new three-year contract.

Spokesmen for both sides said normal Zoo operations would resume at 9 a.m. today.

The end of the dispute was announced in a joint statement issued at 9:40 p.m. by Zoo and union officials. The negotiators composed the press release together after 197 of the union employees voted unanimously to ratify the new contract agreement. It grants a pay raise and improved benefits.

The settlement averted possibility of the Zoo being closed during the holiday weekend, normally one of the busiest periods of the year. Up to about 50,000 visitors are expected today through Monday.

The agreement also ended the necessity for operating the Zoo on a limited basis as was done yesterday by non-union employees. Today all Zoo facilities will be in operation and regular hours of 9 a.m. to 7 p.m. will be observed.

The strike, which closed the Zoo Thursday, involved 273 members of Teamsters Union Local 481.

The compromise agreement was hammered out by negotiators yesterday in a morning session at the Zoo. When the meeting broke up just after noon, large numbers of pickets at all Zoo gates were reduced to a token number. The last pickets were removed at 5 p.m.

San Diego Zoological Society Trustees approved the compromise in a meeting held at 5 p.m. Union members voted approval at a 7:30 p.m. meeting.

Then the negotiators, with state conciliator Thomas H. Vitalch, composed the joint statement in a hasty conference in the office of W. H. J. Swett, chief negotiator for the Zoo.

Read by Zoo publicist Robert Gray, it said in part:

“(We) announce the end of the work stoppage at the San Diego Zoo and the ratification by union members and approval of the board of trustees of the San Diego Zoological Society of a new three-year collective bargaining agreement . . .

“All employees will return to work in their regular classifications and the Zoo will resume normal operations at 9 a.m., Saturday, July 3.”

Swett said the new contract assures union employees of a 9 percent across the board wage increase spread over the three years, improvements in sick leave, a health plan and increased vacation time.

He said employees with five years service now will receive three weeks vacation. Previously they received this amount only after 10 years service. Swett said four weeks of vacation will be granted only after 15 years service. The union had sought to reduce the required service for this amount to 10 years.

The vacation provision was one of the key stumbling blocks that caused a deadlock in the negotiations just before the old contract expired Wednesday at midnight.

The negotiators declined to discuss union demands for an employer contribution to an unemployment disability fund. This was the other major point that had tied up bargaining. Swett said the settlement included improvements in this area.

Present at the joint meeting were Dr. Charles E. Show, assistant Zoo director; Patrick O'Relley, Zoo personnel director; John Sheridan of San Francisco, a representative of the Western Conference of

Teamsters who headed bargaining for the union; Thomas Barham, secretary-treasurer of the local, and Lawson P. Martineau, chief shop steward for the union employees.

Sheridan said he felt Mayor Curran's open letter urging members to go back to work "helped encourage resumption of the talks."

July 12, 1965, San Diego Union, A-13:4. San Diego Zoo - Zoo pushing to keep tax money; director assails proposal to end appropriation.

The San Diego Zoo needs and will work to retain its annual two-cent rate appropriation from the city, Dr. Charles Schroeder, director, said yesterday.

City Councilmen are to discuss the mandatory tax contribution during conference on the phase two report of Mayor Curran's Committee on Municipal Finance. The committee recommended last week that the tax, which now yields \$200,000 annually be shifted for other purposes because the Zoo is self-sufficient.

A recommendation to cut the Zoo money was a major point made in the committee report, which dealt over-all with the scope and efficiency of city services.

The committee said the appropriation was needed when the Zoo was founded but that the attraction had gained enough financial strength to allow the money to be used elsewhere.

Committee findings are in the form of recommendations to the City Council.

The Zoo appropriation has been required by charter since 1934 and a vote of the people would be necessary to amend it.

Schroeder discussed the tax in a letter to members of the Aardvarks, a group of Zoo supporters, and in an interview.

Those who recommend altering the tax appropriation do not understand the financing and development obligations of the Zoo, Schroeder said.

He said the operating budget, now \$3.6 million annually, has increased an average of ____ percent each year, primarily due to rising costs of labor and materials.

In the letter Schroeder said tax opponents should not view a \$1.7 million bequest of the late Elmer C. Otto as the single answer to future financial needs. Otto of Alpine died in 1963 after a long and successful business career, leaving funds to the Zoo.

Schroeder said the more than \$1 million committed by the Zoo in capital improvements last year would continue. He noted that all capital improvements become property of the city.

The Zoo receives its funds from the city tax, donations to the Zoological Society, and admission charges. Funds also are raised from "inside" charges such as food concessions, souvenirs, the Children's Zoo, and guided tours.

Schroeder denied a statement in the committee report that the Zoo had reached a position where it could stand "on its own two feet."

The society is hard pressed to keep the Zoo growing as a major San Diego tourist attraction and to meet its maintenance obligations.

July 15, 1965, San Diego Union, A-17:4-5, A-18:5. Museum of Man to charge fees.

The Museum of Man in Balboa Park yesterday announced that a new policy of paid admissions will be instituted Saturday as a means of solving the museum's financial problems.

The admission charge for adults will be 50 cents. Children under 16, servicemen, school classes and organized study groups will be admitted free. All persons will be admitted free on Fridays.

Rear Admiral Charles C. Hartman, museum vice president, said the new policy was adopted after more than a year of study of the possible alternatives and probable effects of the admission fee.

"Potential sources of revenue were examined," Hartman said, "including increased private support, increased city and county support, and paid admission to the museum.

"The board of directors felt that paid admission was the best solution for the community since it would not create an increase in tax rates, would provide sufficient revenue to help achieve the level of service it should have and would allow the 44 percent of park visitors who come from outside San Diego to help pay their share."

The museum is a private institution, administered by the San Diego Museum Association and operated in city-owned Balboa Park buildings. The association board of directors is composed of 24 elected unpaid volunteers from the community. Dr. Gage G. Wetherill is currently president. The museum receives limited annual grants from the city and county governments.

Hartman said the new policy will enable the museum to hire additional staff members, carry on research projects, publish periodicals, reinstate educational programs for both children and adults which were dropped several years ago, and spur improvement of older exhibits and display of new ones.

He said that if the policy proves successful it also will make construction of museum additions feasible.

"Additional exhibit halls must be added if our theme "Man in the Americas" is to be properly presented," he said. "Just where and how such additions would be built is impossible to say now. But they cannot even be considered until adequate finances are in sight."

Hartman said the directors decided that the museum's striking new "Viva Mexico" exhibit, recent renovation of the main gallery and new exhibits now approaching completion justified institution of the admissions fee.

The museum also released a statement city these museum problems and shortcomings and potential improvements:

1. While the museum has made limited gains it is not expanding and improving fast enough to match the county's increasing stature as a center of education, science and culture.
2. The museum's 1965-65 budget was \$96,291 and no increase was possible for the current year although an additional \$105,000 is required to achieve immediate goals.
3. Private contributions have increased from \$10,870 in 1959 to \$41,883 in 1963 but additional revenue from such sources "will be increasingly difficult to obtain."
4. The value of museum collections is estimated at \$1-1/2 million but many of these are not displayed for need of space and about 60 percent of current exhibits are improperly housed. Additions to the museum collection must be halted unless more space is not obtained soon.
5. The museum staff already is inadequate. Staff expansion will result in better service to the public.
6. The museum does not now sponsor any scientific projects such as studies of local archaeology. Increased revenues would permit expansion in such fields.

The directors also noted that there is a growing trend among U. S. museums of adopting admission fees. The 50 cent charge adopted here was based on a study of fees at 455 paid institutions.

July 17, 1965, San Diego Union, B-1:2-6. Serene beauty of Balboa Park is reflected in its lily pond, by Dick Bowman (illus.).

The serene lily pond in the heart of lush Balboa Park is a pool of many mirrors. It reflects a variety of San Diego's charms, some a half century old, others as new as tomorrow.

On a lazy summer day, with the grey-black mosquito fish darting through its green-brown liquid, and goldfish a momentary orange blur, the pond offers a kaleidoscope of forms and faces.

Standing at the western end of the sprawling Food and Beverage Building, a visitor has only to kneel by the pool's edge to enjoy a constantly changing scene.

Noticed first, because of its nearness, is the pock-marked beige Italian marble of the stark, strong Timken Art Gallery. Its ribs and trim are bronze, and a low bronze fence offers a network of hypnotic repetition. A gardener, wearing a green pith helmet, tells the visitor the new gallery may be opened to the public by September.

Raising his eyes slowly, the visitor sees the wind-rippled image of the stately California Tower, built for the 1915 Exposition and now a reminder of past glories. Its winding stairway, barely discernible from the lily pond, is a stranger to visiting feet. The tower has been closed since 1935 for safety reasons.

The yellow-and-blue mosaic in its graceful dome bespeak its Indian origin and hints of ancient mysteries. The grayish tower is a proud sentinel guarding a thousand natural treasures, most park visitors first must walk in its shadow.

The pond also reflects a sea of faces. Some are wrinkled by years and tears and worries; others are aglow with the promise of youth.

The visitor tenses as a huge silver jetliner screams overhead, momentarily adding its shadow to the wonders of the pond. In a second only a wisp of smoke mars the blue above. It is unseen in the timeless pool

Now the red, white and blue T-shirt of a freckled-faced child is seen on its face. Next a board pale olive sunhat, the face under it merely a shadow; now the ash-tipped cigar of a father who squints to avoid the sun's relentless glare.

The pond has many beauties of its own. It doesn't need to depend on the changing scene for its accolades.

Seen here is Susan O'Hara, 9, of Oakland. She watches fat bumblebees hover over the purple "red star" tropical lilies and the bright yellow sunrise lilies. The flat green lily pads are beaded with water pushed gently by the wind. Or by her small, cupped hand.

Susan tries to count the fish. They rise to the surface, fall away and rise again. Is that the same one as before? Or is it bigger? Smaller?

Head gardener Elmer Cook tells how youngsters sometimes throw into the lily pond fish their mothers wouldn't let them keep. And so the pond is a home for more than goldfish and mosquito fish. It is a refuge for unwanted pets.

The lilies are the star of the show here, and they wave tiny pointed fingers, as if demanding attention.

They defy you to name a color not found in the pool. Lavender? Yes, sir! Salmon-colored? You bet. And blue and purple and white and scarlet.

And many, many more.

You may find the countless lilies more beautiful from the low wooden benches that dot the greenery. Several of the benches are surrounded on three sides by hedges, kept barbered for your pleasure by 19 gardeners.

Welcome to the lily pond of a thousand wonders --- where you are part of the show.

It's a San Diego County scene.

August 20, 1965, San Diego Union, A-17:7. San Diego Zoo - City Manager Fletcher urges City/Zoo talk on proposal to end 2-cent levy, by George Story.

City Manager Tom Fletcher yesterday recommended that the City Council and the Zoological Society board of trustees meet to discuss the proposal that tax support for the Zoo be halted.

Mayor Curran's Committee on Municipal Finance recently recommended that the City Charter be amended to eliminate the requirement that 2 cents of the city's tax rate be earmarked for the support of the zoo.

Fletcher suggested the joint meeting in a 28-page analysis of the mayor's committee's report.

The committee said tax support for the Zoo, which began in 1941, helped develop the Zoo into an outstanding attraction but that "the purpose for which this tax was originally imposed has been served."

When the tax support was begun, the committee noted, 2 cents on the tax rate yielded about \$30,000 a year. The figure now is more than \$200,000 a year.

September 12, 1965, San Diego Union E-3:1-8. The Old Globe, how it began.

Thirty years ago a wry imp of a man with a face as timeless and brown and merry as a gnome chugged a spade into the hardpan under a eucalyptus tree in Balboa Park.

The man was Thomas Wood Stevens. The date was April 23, 1935. The occasion was the groundbreaking for the Old Globe Theater. Today Stevens' name is lost to San Diego history --- there has never been a monument, a building or even a street named after him. And, outside of friends who remember him here, the little the world knows or anybody bothered to record about him is buried in a file at the University of Arizona.

However, the same cannot be said of the theater he built. That lives in the minds and hearts of more than 100,000 theatergoers who attend the Old Globe each year.

Stevens, now dead, would be proud of that box office crowd today because good houses were a tradition he began.

October 2, 1965, San Diego Union, A-17:7, A-18:1. Timken Art Gallery to open on October 17 (illus.).

"If our purpose had been to build an ornament in Balboa Park," said Walter Ames, "we would have chosen a reflecting pool or a fountain or some nice bed of flowers."

With a shrug, he added, "people thought we should build something like the Louvre or the Pitti. Those weren't art galleries. Those were castles."

They didn't put in nice bed of flowers, and they didn't build a castle.

They built, instead, a splendid bronze and marble structure that will be known to generations of San Diegans and to art lovers the world over, as the Timken Gallery.

In the heart of Balboa Park, just East of the Spanish Renaissance landmark that is the Fine Arts Gallery, the Timken stands in all its simplicity as a bond between the centuries.

The Timken itself is a paradox. Its facade is undeniably 20th century, but the treasures within its walls are from centuries past.

The people of San Diego will judge how well their new gallery fulfills its dual role when the bronze doors open to the public October 17.

From that day on, and every Tuesday through Saturday from 10 a.m. to 4:30 p.m. and every Sunday from 1:30 to 4:30 p.m. the doors will be open. The Timken will be closed Mondays.

Members of the Fine Arts Society will have a preview glimpse of the new gallery during courtesy visiting days Tuesday through October 16.

And the Timken will receive its first visitors today when 175 guests, including the officers, staff and members of the board of the Fine Arts Society, tour the gallery after a luncheon in the Don Room of El Cortez Hotel.

Great names in the art world who are coming for the christening include John Walker, director of the National Gallery of Art in Washington, D. C.; Mrs. Agnes Mongan and Prof. Seymour Slive of Fogg Art Museum, Harvard University.

Another guest will be Morton C. Bradley, Jr., formerly of the Fogg Museum and an expert in art forgery detection. From London will come Evelyn L. Joll of Thomas Agnes and Sons and from New York, Robert T. Davis, museum consultant for French and Company.

The three other special guests represent the two families that made the Timken Gallery possible. One is William R. Timken of Canton, Ohio, nephew of the late Mrs. Appleton Bridges, who gave the Fine Arts Gallery to San Diego.

Coming from New York are Dale E. Sharp and William A. McRitchie, both directors of the Putnam Foundation, which shared the cost of building the gallery and which has assumed responsibility for its operation and its growth.

Ames, an attorney, is president of the Putnam Foundation and he is a man with vision. "This," he tells you, "is just the birth of a gallery --- just the beginning."

With 40 paintings hanging in five galleries, the Timken is still an infant. But, among galleries, it shows promise of being a giant.

Twenty paintings belong to the Putnam Foundation and 20 are from the Putnam family collection given to the Fine Arts Society of San Diego.

Allen J. Sutherland, treasurer of the Putnam Foundation, calls it "the most comprehensive collection of icons in the country."

The president of the Putnam Foundation does not see the Fine Arts Gallery and the Timken Art Gallery as competitors. He sees them, rather, as complementing one another.

"I see for the Fine Arts Gallery a broad area of educational activities solely within its province --- children's classes, lectures, a library, traveling exhibits, displays by local artists," Ames said.

This is not the role he sees for the Timken. "Our goal is a static gallery in which we will have paintings of great quality to hang permanently, never to be loaned or sent elsewhere, somewhat like the Frick Gallery in New York."

"In the future," says Ames, "I hope our gallery will be of particular interest to scholars, students of art, people of discerning taste." Plans call for purchase of two old masters each year.

October 2, 1965, San Diego Union, A-17:5. Old fountain spurts again in Balboa Park, by Beverly Beyette.

Just as though it knew it had been turned off for 30 years, the water shot up into the air and splashed back down to wash the new green tiles.

The old fountain, built in 1915 for the World Exposition, turned off and forgotten after the 1935 Exposition, had come back to life.

The scars of the years had been erased from its cracked and peeling face with a new coat of cream-colored plaster.

It stood regally at the foot of the mall leading to the Balboa Park lily ponds and the old Botanical Building, within view of visitors to the new Timken Gallery.

In the lily ponds, the bees hovered around the water lilies and the tadpoles darted in and out among the lily pads, just as they do every other day in the Botanical Gardens.

But it wasn't any other day. The civic dignitaries had gathered on the small bunting-draped platform and a dedication was about to get under way.

A group of women from Thursday Club sat in a semi-circle and listened. They had a very special interest; their rummage sales over the past two years had raised the \$3,500 to refurbish the fountain.

Douglas Giddings, chairman of the city park and recreation board, told them, "This is a perfect example of citizens' participation" in making their city a pretty place in which to live.

Another speaker with a special interest in the Botanical Gardens was Mrs. Robert Golden. She and her husband had undertaken refurbishing of the ornamental balustrades and urns near the pools.

At the opposite end of the mall, hidden in the shadows, a second fountain stood rather forlornly, its paint peeling and its basin dry and covered with dirt.

October 26, 1965, Letter, Donald J. Metzler, Secretary, San Diego Aerospace Museum, Inc. to The Honorable mayor and Members of the City Council, City of San Diego.

Gentlemen:

Since the San Diego Aerospace Museum opened in Balboa Park (February 19, 1963), the historical materials and traveling displays, received, had expanded rapidly; and with an increased public attendance, the future success of this valuable addition to the cultural institutions of San Diego has been confirmed. Therefore, the Aerospace Museum Board of Directors has decided to create a permanent home for the Hall of Aerospace Sciences. The present quarters in the Electric Building are scheduled for replacement in the present Balboa Park Master Plan.

For some time, our organization has conducted an intensive study of the feasibility of restoring the Ford Building. Our surveys indicate that this building can be renovated for use as an Aerospace Museum at a cost which we feel is within our ability to finance. To develop detailed financial proposals (including operating and capital costs) will require considerable time and effort. Financial commitments cannot be secured on our requirements unless we are assured that we will be granted the building. It is not our intention to request capital funds from the city government for this project.

We hereby request an option on the Ford Building which would provide that on or before December 31, 1966, we submit a plan acceptable to the City to convert this building into an Aerospace Museum; and that on or before December 31, 1967, we will submit acceptable construction to commence.

Respectfully submitted
San Diego Aerospace Museum

(Signed) Donald J. Metzler, Secretary

Approved: (Signed) James C. Snapp, Jr. President

Approved; (Signed) Dale A. Pursel, Chairman of the Bd.

October 26, 1965, San Diego Union, A-16:3. Old Globe starts new \$300,000 addition; Victor Wulff is the architect for the new building of 15,811 square feet which will match the Tudor styling of the existing theater building; funds for construction supplied by COMBO.

November 9, 1965, San Diego Union, B-2:7-8. Dr. Frank Love praises saving of Ford Building.

The San Diego Aerospace Museum, which very appropriately proposes to occupy the building, is to be congratulated and thanked for coming forward to save this building and to save the taxpayers by assuming responsibility for private financing.

November 10, 1965, Minutes, Park and Recreation Board.

MOTION TO APPROVE EXTENSION OF ARIZONA CANYON LAND RECLAMATION PROJECT

Two photographs of the Arizona Land Reclamation Project in Balboa Park were presented with a recommendation to extend the Arizona Canyon Land Reclamation Project to include the canyon area to the south, immediately adjacent to Pershing Drive. This extension would allow the slopes of Florida Canyon to be continuous, and would provide additional area for the development of the golf course at the time of the development of Switzer Canyon Freeway. Upon motion of Mr. Bowen, seconded by Dr. Ford, the Park and Recreation Board approved the extension of the Arizona Canyon Land Reclamation Project to include the area southerly to Pershing Drive --- this action to be dependent upon the approval of the Balboa Park Committee. Approval was by a seven to one vote. The negative vote was cast by Dr. Robinson.

(The project was approved by the Balboa Park Committee at its meeting on October 25, 1965.)

November 13, 1965, San Diego Union, A-17:4-5. San Diego Zoo readies 50th birthday fete.

Members of the committee, meeting yesterday at Kona Kai Club to draw up party plans, decided on a tentative \$100,000 budget to finance the year-long golden jubilee celebration.

December 22, 1965, San Diego Union, A-25:1-2. Supervisors back Old Town, Torrey Pines park plans.

December 31, 1965, San Diego Union, A-9:1. Superior Judge Joseph A. Kilgarif yesterday signed an order which will give the city of San Diego \$391,300 for recreation facilities.

The money will come from the state under the Davis-Grunsky Act.

The funds will provide recreation facilities at the Miramar Dam and Reservoir Project.

December 31, 1965, San Diego Union, A-9:2-3. City Council asks bid in Park Boulevard move.

The project, including lighting and other related improvements, will cost an estimated \$606,000, most of which will be paid from gasoline tax funds.

Park Boulevard will be moved about a block east of the present right of way, freeing land for park use, including zoo parking.

1966

Summary of Events in 1966

(Note: Dates of events are approximate only.)

San Diego Aerospace Museum dedicated (February 5, 1966)

Fiftieth anniversary of San Diego Zoo (February 23, 1966)

West Wing of Fine Arts Gallery dedicated (May 16, 1966)

Park Boulevard work completed (July 6, 1966)

New lights on California Tower (July 13, 1966)

Proposal to widen U. S. 395 (August 2, 1966)

Proposition D (\$7.6 million for Balboa Park) . . . passed

Elmer C. Otto Center at San Diego Zoo opens (December 3, 1966)

January 1, 1966, San Diego Union, A-15:2-4. Elephant "helps" celebrate 50th anniversary of Zoo.

January 2, 1966, San Diego Union, A-11:2, A-12:1-2. Plan for state parks poses fund problem, by George Story.

January 4, 1966, San Diego Union, A-13:5-6, A-16:2. Highway 395 through Balboa Park called dangerous.

January 15, 1966, San Diego Union, A-21:2-3. Chamber of Commerce seeks city anniversary board.

January 19, 1966, Minutes Park and Recreation Board. Morley Field tennis facilities will be completed on or about November 15, 1966. Completed architectural plans are due from the architect on March 14, 1966. The Zoo has been advised.

Mr. Schneider then moved, seconded by Mr. Lustig, that the Board approve for submission to the Council the Bond Package considered today totaling \$23,865,700. All were in favor.

Mr. Hagar then introduced Attorney John D. Butler and Mr. Harry J. Batt who has requested time to explain the Space Needle project they wished to locate in Balboa Park. Mr. Hagar showed a map of the proposed location which included 1.64 acres in Balboa Park adjoining the West line of re-aligned Park Boulevard. He stated that the proposed parcel includes almost one acre of the area set aside for the Zoo parking addition and would delete parking spaces for an estimated 150 cars. Mr. Hagar stated that Dr. Schroeder, Managing Director of the Zoo, feels that the proposed Space Needle concession would be a drain on the proposed Zoo parking area. Mr. Butler stated that the concession would depend heavily on Zoo attendance for business --- therefore, additional parking would not be required for the proposed facility. Mr. Hagar stated that the Space Needle would be higher than the California Tower.

Mr. Butler advised that the Space Needle is a Swiss-made tower --- the overall height of which is 310 feet --- of steel construction. The needle contains a ride which would accommodate 60 people and afford a spectacular view of the city. No restaurant or bar facilities are contemplated.

Admission prices would be subject to approval of the City Manager. Mr. Butler commented that the Space Needle would not compete with other park attractions --- and would offer a good return to the City in excess of any other attraction using the same area. The base of the structure would measure 100 feet x 100 feet. Mr. Butler commented that the proposed project should be located in an area where many people are moving --- and that it would not be good as a sole attraction.

Mr. Richards voiced his tentative approval of the Space Needle project. Mr. Lustig had no objection. Mr. Covell commented that the Space Needle would be another point of interest in Balboa Park. Mr. Moore advised that the Manager's office was interested in the proposal. Mr. Giddings indicated that the Space Needle concept is approved by the Board and that Mr. Butler should resolve location problems and prepare his proposal for consideration by the city.

January 20, 1966, San Diego Union, A-21:7-8, A-22:1-4. City Park Board proposes \$23.8 million bond issue.

January 20, 1966, San Diego Union, A-22:1-4. Major projects envisioned in city's park bond issue.

January 21, 1966, San Diego Union, A-24:6-7. Fund sought to build park garden center.

January 28, 1966, San Diego Union, A-21:4. A-21:4. \$25,000 donation asked for Zoo fete.

January 29, 1966, San Diego Union, B-1:2-3. World's Fair held possible for San Diego.

February, 1966, San Diego Magazine, Vol., 18, No. 4, 52. The West Side Story (West Wing of the Fine Arts Gallery): Happy Ending, by Marilyn Hagberg.

February 1, 1966, San Diego Union, A-15:2, A-18:6. Dr. Richard P. Phillips, Natural History Museum's new director, assumed his duties today.

February 3, 1966, San Diego Union, A-22:5. The Ryan PT-22 training plane, donated Monday to the San Diego Aerospace Museum, arrived yesterday by trailer minus its fabric wings.

February 3, 1966, San Diego Union, A-35:1-5. A contract to construct sidewalks and drainage facilities to the Botanical Building, Balboa Park, has been awarded to the J. H. Haddad Construction Co.

The City Council awarded the contract on the company's bid of \$5,634, which is 4 percent below the city's estimate

The project will be paid for from a \$7,000 anonymous contribution, the city engineer's office said. Most of the nearly \$2,000 left will be used to pay engineering charges and inspection, the office said.

February 5, 1966, San Diego Union, A-21:5-6. The San Diego Aerospace Museum was officially dedicated yesterday.

February 9, 1966, San Diego Union, A-15:2-3. County slashes Zoo contributions; Supervisors vote \$5,000 of \$25,000 asked for anniversary celebration, by Frank Exarhos.

February 10, 1966, San Diego Union, A-14:1-2. Meetings set to air park bond proposal.

February 10, 1966, San Diego Union, A-14:1-2. Park Board delays stand in Highway 395 plan.

February 10, 1966, San Diego Union, A-14:2. Contest set in design of park arcades.

February 18, 1966, San Diego Union, A-17:5-7. Council okays contribution of \$25,000 for Zoo fete.

February 20, 1966, San Diego Union, A-30:4. Rose Show set in Balboa Park April 16-17.

February 23, 1966, San Diego Union, A-13:5-6. 500 salute Zoo at birthday party.

March 2, 1966, San Diego Union, A-17:7-8. City Council yesterday requested detailed plans for alternative methods of widening U.S. 395 through Balboa Park.

March 4, 1966, San Diego Union, A-19:8, A-25:2. Joseph W. Sefton, Jr. dean of city's bankers, dies.

March 10, 1966, San Diego Union, A-22:5. The Balboa Park Committee of the City Park and Recreation Board yesterday proposed a system of public transportation in Balboa Park.

March 12, 1966, San Diego Union, A-22:5-7. Art Gallery swirls, clanks in first all-media exhibition, by Beverly Beyette.

March 14, 1966, San Diego Union, A-17:1-2, A-19:2. Timken Gallery now one of San Diego's top attractions, by Joe Stone.

March 15, 1966, San Diego Union, A-13:8. Old Globe's old wing demolished.

March 20, 1966, San Diego Union, A-11:3, A-12:5. Planetarium model for San Diego shown, by Bryant Evans.

March 20, 1966, San Diego Union, F-8:4-8. Foundation Center Plans Told: Virgil H. Schade, president of San Diego Botanical Garden Foundation; reception marks start of fund campaign for garden center building in Balboa Park; the foundation has filed its bylaws with the City Council and has asked for recognition as the group to build the garden center as called for in the Bartholomew Plan for Balboa Park; Board of Trustees: Stanley W. Miller, 1st vice president; J. Everett Henderson, 2nd vice president; Joseph Keneally, secretary and acting treasurer; Walter Anderson; Mrs. William E. Belts, Jr.; Miss Pauline des Granges; Samuel W. Hamill.

March 31, 1966, San Diego Union, A-21:5-6. Kids to start new \$500,000 Elmer C. Otto Building, by Beverly Beyette.

April, 1966, San Diego Magazine, Vol. 18, No. 6.

The Zoo Story, by Roberta Ridgely, 48-58, 86-88. . . . the world's greatest celebrates its 50th year . . . Dr. Schroeder's \$7 million show on a tight ship . . . 50 years ago Dr. Harry had a big dream . . . Jiggs got too fact for the movies (illus.).

When I was eight years old, I became a partner in a large and famous zoo. This is not so incredible as it sounds, for the San Diego Zoo belongs to all the children of San Diego --- long ago arrangements were settled and papers were signed to make it legally theirs --- and when I was eight I first became a San Diegan.

Before living in San Diego, I had visited other zoos and they always had made me feel sad. I had felt almost ashamed to be free and to be looking at animals kept behind such unfriendly bars. But the San Diego Zoo was very different. The animals looked healthier and more contented than any I ever had seen. I could imagine that I was watching them as they lived a natural life in their native home and I never tired of visiting the wild animal collection in Balboa Park.

My zoo partnership was among the many things I missed when, at the age of ten, I returned to the town where I was born. However, as soon as I was grown, I was back in San Diego again. Although by then I was too old to be a zoo-owner, I was just as concerned as ever about the San Diego Zoo. Especially because it was wartime. Zoos all over the world were closing, What would San Diego's be like?

It was every bit as wonderful as I had remembered. It had grown even larger and more beautiful, and was being loved as much as every by a new generation of youngsters. Later, the Zoo passed into the hands of San Diego's big crop of war babies. Today, the babies of those war babies are enjoying and loving the largest, finest zoo in the world. Dr. Harry Wegeforth, the founder, intended it to be the finest. San Diegans always were pretty sure it was the finest. And now experts from everywhere tell us that this is true.

Here is the happy story of a very big and happy family --- the San Diego Zoo and how it grew during its first 50 years.

To the average visitor in a cheerful sports shirt with a camera slung about his neck, the San Diego Zoo is a first-rate place in which to photograph many magnificent animals, without bars, and with background so natural that the finished picture may look as if it were shot in a real jungle.

"We have 5,000 specimens and 1,500 varieties," says Dr. Charles Schroeder, the enterprising and tireless director who has run the 128-acre Zoo since 1953. "But I wonder if numbers like that mean anything to most people." To a zoologist, these figures clearly mean that San Diego's Zoo has a collection without equal anywhere in the world.

The tropical-jungle landscaping, so pleasing to the public, is no less impressive to any expert who understands botanical gardens. Originally, the land was bare and treeless. The founder, Dr. Harry Wegeforth, like Johnny Appleseed use to carry seeds in his pocket and scatter them, as he made his Zoo rounds. Once a year, the doctor traveled across the U. S. to work at John Hopkins. As he crossed the country, he gathered seeds everywhere just on the chance that they might grow in San Diego. Many took hold. In 1928 the Zoo had a big tree-planting program. Yet in the early 30s the acreage still had the look of raw land and not until the 40s and 50s did it present a truly tropical atmosphere. Like the rest of the Zoo, since 1953, the plantings have come a long, long way. Today, attractively labeled, the trees, flowers and shrubs contain some rare varieties that can be found nowhere else in the world. Their worth is said to be even greater than that of the fabulous animal collection! (Animal *prices* are not so high; it is the cost of transporting them safely and comfortably over great distances that makes them expensive to acquire. However, rare plants can present as much of a problem: \$4-5,000 was spent and power lines were removed to put in the Reclinata palms from the Mrs. Henry B. Clark estate. The Zoo hamburger stand now is enhanced by thousands of dollars worth of these palms --- probably no other hamburger stand can make this statement.

The modern-day San Diego Zoo actually began thirteen years ago when Dr. Schroeder took office. Since that time nearly every bit of construction has been replaced or improved. The doctor was no stranger to San Diego, for he had begun his career when, fresh out of the University of California at Davis, he was employed as a veterinarian at the Zoo Hospital. Board members agree that when you are in the entertainment business, as any zoo is, you must constantly change and liven up the show. Dr. Schroeder has proved to have the right and very unusual combination of showmanship and business ability, to handle all this successfully.

The Zoo, which started 50 years ago, almost without a penny, this year will spend \$3,600,000 for operating costs. The balance sheet shows fixed assets of between \$6 and \$7 million --- a low figure. Probably nobody every will attempt to inventory the botanical exhibits and it is not easy to set a value on animal exhibits. "When our fiscal year ends each June 30," says Mrs. Ella Hoover, Zoo comptroller, "we try to have a complete inventory of al the animals, with an estimated value for each one, based on the fair market price, their age, whether they are part of a breeding pair, and so on. But just as I breathe a sigh and think I have the job done, someone is always rushing in to say that he has just taken another long look at such and such an exhibit and the animal is so beautiful that surely it is worth twice the amount we have on the books." Mrs. Hoover volunteers the information that alligators are priced by the foot. She also can

supply attendance figures which are as dramatic as those for dollars and cents. In the year ending June 30, 1924, 239,463 adults and children visited San Diego Zoo. The 1955 figure was 1,347,499; 1960, 1,952,870; 1965, 2,252,225. In other words, attendance every five years now rises more than half a million. The Southern California population explosion and the growth of San Diego as a tourist center have made this possible. But it works two ways. While crowds bring more gate receipts, at the same time the public facilities must be increased to take care of heavy attendance.

“Like most Balboa Park attractions, the Zoo has had problems of finding enough parking spaces for all who want to visit it. Recently, \$400,000 was spent to enlarge the parking lot. When Park Boulevard is moved, there soon will be room for another parking area. And, according to a Stanford University report, the only limit to future attendance is the amount of extra parking the Zoo will be able to come up with.

All this means an untold and always increasing amount of work for the able staff, which constantly increases, too. Nearly 50 have been added in the last year, bringing the total to exactly 400. Dr. Schroeder has an incredible number of departments to oversee. Few people suspect the size of the Zoo bus fleet, which probably is exceeded only by Tanner Tours. Nor do they know that the Zoo has its own food-freezing and processing plant, in order to purchase perishable vegetables and fresh fish, for example, at the height of their seasons, when prices are low. The Zoo also is in the restaurant and gift shop business but every effort has been made to tone down and hold down commercialism. At San Diego Zoo, the only outstretched palms have fronds attached.

Even a casual visitor cannot help but notice that Dr. Schroeder “runs a tight ship” --- a Navy term that is particularly apt in view of the number of retired personnel who can be found on the staff. Another Navy saying is that “A clean ship is a happy ship” and certainly this holds true here too. Personnel and the exhibits themselves obviously have unusually high morale.

Probably the truest and, as it turns out, the most flattering view of the whole zoo operation is that taken by fellow zoologists from rival animal parks throughout the country. This year the American Association of Zoological Parks and Aquariums --- an organization founded many years ago by Dr. Harry Wegeforth to keep zoos informed of each other’s needs and wants, and so prevent the price-gouging that then was practiced by some professional animal dealers -- held its midwinter conference at the Zoo. When conference host Dr. Schroeder reviewed his “bread-and-butter” letters from his fellow zoo-directors, here were some of the most typical comments.

“ . . . your fine zoo . . . certainly is the greatest in the country for my money. I was most impressed by the condition of the animals and by the cleanliness of the whole park . . . ”

“We were particularly impressed with your polar bear exhibit. Would it be possible to borrow from you the pictures that you have along with the plans and specifications?”

“We are interested in obtaining some vending machines to be used in our children’s contact area and I was wondering if you would be so kind as to send me any information that you might have concerning these machines.”

“The landscaping was the most attractive, the animals the most healthy, and your staff the most friendly and helpful of any I’ve met.”

“ . . . I am a little discouraged. It doesn’t seem to be we will be able to achieve such a high over-all level of excellence.”

“What a wonderful place you have there. To think that people get paid to work there is almost too much to bear.”

"You have without doubt what must be the finest zoo in the world."

San Diegans could feel pride in their Zoo if it had taken 100 years to progress this far. As we look at the brilliant tropical flowers and the dense greenery, it is difficult to believe that we are not seeing the result of at least a full century of jungle growth. Of course, our semi-tropical climate must have had its sunny influence on towering trees and lush foliage. And climate may have had something to do with the astonishing record of San Diego "firsts" --- animal babies born for the first time in any zoo.

"When I went around the world," says Belle Benchley, "so many zoo directors said to me, 'I wish we had your climate.' And I always answered, 'I wish we had your water.'" Mrs. Benchley believes that credit for animal baby "firsts" goes back to Dr. Harry Wegeforth, his painstaking care and thoughtful planning.

It is a temptation to say that Dr. Harry Wegeforth would not recognize San Diego Zoo on its 50th anniversary. But I think he'd know it in a minute. Certain things will never change. He would recognize the devotion of a man like K. C. Lint, curator of birds, who in March kept on his office desk a box packed with baby hummingbirds, a towel and an alarm clock, for every half-hour feeding. Dr. Schroeder and his dedicated staff members are Dr. Harry's kind of people.

And, fifty years later, the sound of happy young voices is still the same. These are Dr. Harry's kind of children.

Fifty years ago, Dr. Harry had a big dream.

In 1916 the Panama-California International Exposition has just ended a two-year run in San Diego. In its last year the fair had not made very much money. Scattered about the town, cooped up in old-fashioned cages, were a few wild animal collections that had been left behind by their disappointed managers. In Balboa Park, there were two such tiny zoos, one herd of Panama deer and a herd of elk. Over in Ocean Beach, a long-since-forgotten amusement park called Wonderland, a menagerie-owner has skipped town and left still another group of wild animals.

Like many San Diegans, Dr. Harry Wegeforth, a well-known doctor, was upset about the condition of these deserted and unhappy beasts. Dr. Harry had little money but he had a big dream. He talked people into letting him take charge of the left-over animals. Then he went to the Park and asked for land on which to make a home for them. Balboa Park then did not want an assortment of animals getting in the way of trees, walks and flowers. The doctor was given what was considered worthless Park land --- tiny mesas cut up by many deep canyons.

Dr. Harry Wegeforth was delighted. With his poor, rundown animals and "worthless" land, he intended to build the world's finest zoo.

For 25 years he served as president of the San Diego Zoological Society and almost every morning before his own office hours he began the day by mounting his own handsome chestnut Arabian horse and riding through the Zoo property. As he rode, he planned exciting exhibits and scenic zoological gardens. He saw the canyons and mesas as perfect places in which to show animals in a natural state.

In his early planning, Dr. Wegeforth asked the help of architect Louis Gill. Together they visited other zoos in this country and studied what they could learn about foreign zoos by reading certain European magazines. One such magazine told about an idea of the Hagenbecks, then world-renowned animal handlers. In their Tierpark in Stellingen, Germany, they had originated a system for keeping wild animals in natural-looking stone caves and

caverns, and placing a moat between them and the public so there would be no need for cages and bars. Each moat was wider than the animals behind it could jump.

Somehow, Dr. Wegeforth raised \$2200 in donations and, deep in a canyon, built such a bear "grotto." These animal grottoes made San Diego Zoo famous and now are copied throughout the U. S.

But fame was years away in 1916 and 1917 when the Zoo was just starting. There were only endless problems --- like feeding the animals, housing them, keeping them healthy, and adding to their number to make a well-rounded collection. The Zoo was without funds but its president had lots of ideas. He also had a single-minded persistence and the fascinating ability to talk anybody out of, or into, anything.

All of San Diego soon knew, and felt, his powers of persuasion. In a quarter of a century, he probably raised over a million dollars in donations, most of it from wealthy residents. From the less wealthy, he scrounged building materials and services. When Dr. Wegeforth was not given such materials, he was not above borrowing them. Then, when his latest building project was complete, he would call in the owner and say, "The Zoo can afford to pay you for this now." Almost always he was told, "Harry, I knew you had it all the time. Consider it a donation to the Zoo."

A number of the early Zoo specimens came from private individuals. In those days there still was a great deal of ranch-living in Southern California and big ranches often had small menageries. Also, any seaman was permitted to keep a pet aboard a Navy ship. Very often that pet was a bear, and bears soon outgrow their owners. This is how the Zoo received as a gift Caesar, its first Kodiak bear. Since there was neither truck nor funds with which to rent one, Dr. Wegeforth snapped a chain around Caesar's neck, and put him in the front seat with Dr. J. C. Thompson, the Zoo board member and Navy physician who has inherited Caesar in the first place. The car attracted considerable attention as Dr. Thompson drove to the Park.

A party-crashing elephant named Culver came to the San Diego Zoo from a Santa Barbara ranch. This elephant was very attached to a small pony. In fact, the two were inseparable. One night, trappings were put on the pony and he was taken into the house to be shown off to guests. Culver tried to follow his friend. After the ranch house was rebuilt, Culver and the pony were sent off to our Zoo.

Another source of animals was motion pictures. Snooky, a chimpanzee star of silent movies, lived at the Zoo for a while. The beloved orangutan, Jiggs, was acquired from the movies when she became too large and fat for picture work. And a terribly old and miserable-looking hyena from the Wonderland Zoo leftovers became a movie star. Wallace Reid, who died of drug addiction, was appearing in an anti-drug film called *Human Wreckage*. A hyena was wanted to represent human suffering. The Zoo's elderly hyena just then was looking wretched indeed. His eyes ran a lot and the humane Dr. Harry almost had decided to put him to sleep when the beast was signed for the film and the Zoo received a much-needed \$200.00.

An important part of zoo building is animal-swapping. Of course, Dr. Wegeforth became an expert at this. Before long, professional animal dealers were calling *him* Trader Wegeforth. From the very start, San Diego Zoo animals, well-nourished (Wegeforth probably was the first to feed cod-liver oil to lions) and comfortable in lovely outdoor surroundings, settled down to raising families. Cubs were plentiful. Another trump card was the County's large rattlesnake population. A cash prize of \$35 was offered to the brave soul who could catch the largest number of rattlers during each snake season. Most important, the California sea lion, the one variety which can be trained to perform tricks, is found only in the waters south of Santa Barbara. In its early years, San Diego Zoo practically was built upon seals and rattlesnakes. To save money, the Zoo caught its own seals, then traded or sold off to other zoos the ones it didn't need. San Diego was a smaller city in those days, and the pace of life was slower;

consequently members of the board of directors often took part in trips to catch sea lions or ventured even farther down the south coast. In today's busier world, San Diego business-board members do not have time to trap animals, and the Zoo buys its present seals.

But at the Zoo's beginning buying animals was a great problem. Even if it was decided to risk the expense, it was difficult to find local wild animals for sale at a fair price. Once they were spotted, Dr. Wegeforth had to look for some generous person who would pay for their cost and transportation charges. Frank Buck helped find the Zoo's first elephants, Empress and Queenie. Dr. Harry did not know how he would pay for them. But what is a zoo without elephants. He got a loan and arranged to have the elephants shipped from India to San Diego. The pair arrived by baggage car from San Francisco, detrained nicely but would not budge from the loading platform. Dr. Wegeforth reasoned that Indian elephants must be used to riders. Although inexperienced, he climbed aboard Empress; a zookeeper scrambled up onto Queenie; and again the town was treated to an unusual animal spectacle in its streets.

The elephant load had to be repaid at once. Dr. Harry went to see millionaire John D. Spreckels, who was having some trouble with his own investments. Spreckels said he would help with Empress and Queenie only if they were "whiter elephants: than some which he himself had. Dr. Harry very seriously assured him that the Zoo had very white elephants. The next day he sent out for a keg of flour and four of the biggest powder puffs that could be bought. Empress and Queenie were transformed into the whitest of elephants, except for their black eye and pink mouths. John D. Spreckels thought the joke was so good that he wrote a check for \$7500. The children of San Diego felt this was an excellent investment. For years they enjoyed rides on jolly Queenie and Empress.

A zoo has other work to do besides provide pleasure for both adults and children. It is a miniature world which, if carefully studied, can teach us more about animals and more about man. Dr. Harry Wegeforth was deeply interested in the health and diet of all the Zoo exhibits and saw that close records were kept of them. He was particularly curious to know about the illnesses which only animals suffer, as well as the illnesses which are common to both animals and human beings. As a center for such behind-the-scenes zoo activity, he needed a special kind of hospital in which the animals could be cared for while these interesting problems were studied. At last, in 1926, the Zoo's dear friend, Miss Ellen Browning Scripps, made possible the building of the Zoo hospital.

In 1926 there was another valuable addition to the San Diego Zoo. Mrs. Belle Benchley, a former school teacher, came to work as bookkeeper.

The Zoo office in those days was not appealing to ladies --- it was a damp and uncomfortable temporary building, moved over from the Exposition grounds, ten years before. (At first, Dr. Wegeforth didn't believe in frills for the staff. "I'm exhibiting animals," he would say. "Not people.") The Zoological Society had little money --- often Dr. Wegeforth had to make up deficits out of his own pocket. Sometimes there were payless paydays. And not the least of the Zoo bookkeeper's troubles was the good doctor himself. Simply nothing could stand in the way of what he wanted to do for the Zoo. He might tie in a Zoo pipeline to somebody else's power or water line. Or "borrow" building materials from the city, or railroad ties from the railroad yards. Mrs. Benchley would just laugh and tell him he was a natural born thief and probably would end in jail. Then she would go about trying to straighten out the matter.

"I used to be in the office at eight in the morning," Belle Benchley remembers. "I'm sure Dr. Wegeforth thought it was half an hour too late. No sooner would I get out my work than he would come bursting in and say, 'Come on girl, I want to show you something! I would protest that I had to finish what I had started. He would say, 'This is more important.' Then he would take me outdoors to some part of the grounds and explain some new plan that he must have stayed awake all night to work out."

Dr. Wegeforth's tactics might have alarmed a more ordinary office-worker. But Belle Benchley began to see and to share his dream. Soon she was promoted. The Zoological Society gave Mrs. Benchley the title of executive secretary but in time the world came to think of her as the director of the San Diego Zoo --- the only woman zoo director in the country.

Mrs. Benchley and Dr. Harry generally saw eye-to-eye. When they disagreed, Dr. Harry was not an easy man to move. "I remember an idea I had for planting the area below the monkey mesa," Belle Benchley says. "I wanted to fence it off and fill it with cactus, since Eastern visitors especially like cactus gardens. Dr. Wegeforth pretended to look at me sternly, 'Mrs. Benchley,' he said, 'isn't there enough trouble in this world without you planting stickers?'"

"And that was the end of that."

The 1920s were busy years for the San Diego Zoological Society and Dr. Harry's fertile mind made them even busier. The year 1922, a particularly big year, saw the Zoo move from Park Boulevard to its present location, and Ellen Browning Scripps donate fencing for the many acres so the grounds could be confined and admission charged. Children, of course, were admitted free, as they are today. Later, Dr. Wegeforth arranged for the Zoo's first tour buses in which the visitor could enjoy comfort and a brief lecture at each exhibit. In those days they were called "rubberneck cars." Wegeforth pushed for the building of what then was the largest bird cage. He invented the goat mound, a kind of conical tower with footholds so that the Zoo's rare goats and bighorn sheep could feel as if they were scaling a mountain. And he never stopped building, adding, improving, and dreaming his big dreams.

Wartime rationing stopped the use of the Zoo buses and discouraged San Diegans from getting around. On Christmas of 1942 attendance was 1417, mostly servicemen. San Diego had filled with men in uniform and war workers from other states. Many of them had heard of the Zoo, particularly through Belle Benchley's writing. Mrs. Benchley published three books in all: *My Animal Babies*, *My Life in a Man-Made Jungle* and *My Fiends the Apes*.

Fortunately, attendance began to rise as word about the Zoo spread among strangers in town. By 1945, over 600,000 had visited the zoo in a 12-month period and a new record has been set.

Food shortages were felt keenly by the animals; they had no ration stamps and in many cases had to adapt their diets to substitute foods. The Zoo planted its own vegetable gardens in Mission Valley. Citizens often donated surplus from private victory gardens. When that seemed insufficient, the Zoo truck went around to ranches and picked up green grass and other fodder.

Each year, the San Diego Zoo had more mouths to feed. The local newspapers made up a special birth announcement to herald every new Zoo arrival. The San Diego Zoo not only survived World War II but came out of it with the strongest bargaining position of any zoo on earth. While other collections of animals had declined sadly, San Diego had a whole new crop of lovely, healthy, home-grown exhibits with which to trade and increase its varieties.

The Zoo's great loss during wartime was the death of its enormous mountain gorillas, Mbongo and Ngagi, which the Martin Johnsons had obtained from the Belgian Congo. They were the Zoo's best-known exhibits, aside from the giraffes, Lofty and Patches, who had been trucked clear across the continent with their heads peeking out of a giant packing box. Newspapers had followed their trip every hilarious mile of the way and the amusing adventures of a truck driver trying to move his tall cargo past low bridges and tunnels had brought smiles to a war-torn world.

It was some time before San Diego Zoo could make another bid to become the gorilla capital. Then in 1950 there arrived three baby gorillas, Albert, Beta and Bouba, whose names quickly became known to news-readers everywhere.

Besides replacing and adding to exhibits, much work need to be done at war's end. Many cages, built of second hand material in the first place, had stood for more than 20 years. As the annual collection grew in variety, and the building project started again, the San Diego Zoo was on its way once more.

The Children's Zoo, where the kinds and animals play, 59.

As these pictures prove (not included), grown-ups enjoy the Children's Zoo too. Superintendent John W. Muth said that, of the slightly over 1,000,000 admitted to the Children's Zoo last year, 52 percent were adults. There are many things that youngsters can do in this section set aside for them. They can pet baby animals. Now that the nursery has been moved to the Children's Zoo, they can pick up toys for the baby gorilla. Or they can have a birthday party.

Above: The South American spider monkeys entertain vigorously. Left: The domestic animal pens introduce many city kids to familiar farm animals. Left below: New additions are the baby Asian elephants, named Mashwee (meaning "Miss Gold") and Jubilee. Right: Friendly Avila, daughter of Albert and Vila, is the first gorilla born in San Diego Zoo.

Behind the scenes: a great zoological hospital and research facility, 60-61.

"What we have done in the Zoo has followed closely the concept of Dr. Wegeforth," says present-day director Dr. Charles Schroeder. And nowhere is this more certain than in the scientific investigation which is centered around the facilities of the Zoo Hospital, where Dr. Schroeder himself began his zoo career.

It was a real victory for Dr. Harry Wegeforth when the Zoo Hospital was dedicated. Generous and far-sighted Ellen Browning Scripps had made possible this institution which bears her name (the Ellen B. Scripps Zoological Hospital and Research Institute). On that day, April 1, 1927, Dr. Charles Atwood Kofoed, professor of Zoology at the University of California, came here to deliver the opening address. He spoke of the many ways in which the study of animals would prove of benefit to man: in the improvement of breeding stock; in the research for the battle against disease.

In 1932 Dr. Schroeder first was employed at Zoo Hospital, where he worked with Dr. Wegeforth. Then in 1939 Schroeder went to the Zoo at Bronx Park, New York. He returned to San Diego in 1939 at the insistence of Dr. Wegeforth. But war work called the young veterinarian to Lederly Laboratories in New York, where he remained for the duration of the war and thereafter.

As it did at that time, the Zoo Hospital still serves as a transfer point for newly received animals. Here they are given physical examinations (for parasites, disease, etc.) and inoculations and are kept isolated for a proper quarantine period.

But, like the entire Zoo, the Hospital has move far ahead of its beginnings. Recently it has been remodeled and re-equipped. There are new operating, x-ray; examining and treatment rooms. To finance this, the Zoo put up matching funds to those supplied by the National Science Foundation.

There are several programs being carried on at the hospital with funds provided by the National Science Foundation. There are programs underway in conjunction with the Heart Association. Also hard at work is a research division called the Institute for Comparative Biology. At these programs, work is done in conjunction with famous hospitals and medical schools and well-known physicians and scientists from all over the United States.

In one particularly dramatic research project, the San Diego Zoo has entered into a contract with the National Institute of Health Council Research Division to study small primates for the purpose of selecting the most desirable animals for cancer research.

Partially hidden by trees, by the Fine Arts Gallery and the Old Globe Theater, the San Diego Zoo hospital scarcely ever is seen by the public. But its work affects us all.

The future, 62-64.

"I probably am more enthusiastic than anyone else about the San Pasqual Game Preserve," says Gene Trepte, young president (term of 1965-1968) of the Zoo board of directors. "Maybe it will take 10-20 years. But there is no doubt that, with increased population, and increased leisure, there is more and more craving for recreation and places to visit.

"Besides, we know that it is going to be harder and harder to import animals from Africa. It would help out position in trading to have this preserve where herds could increase in size.

"Really only three things are holding us up on this now: a workable arrangement with the City of San Diego, funds to start the project and funds with which to operate it until it shows a profit."

The San Pasqual property is two lovely square miles circling the San Pasqual Battle Monument in North San Diego County, off Highway 395. It is sweet and unspoiled land that caused a visiting African buff to remark recently, "Just like Kenya!"

The suggested plan would be to set off a preserve for wild animals, to be separated from the freeway by a buffer strip, which the City of Escondido already has bought for a park system. The animals could roam at will.

Some of the ideas for San Pasqual include a little train that would take visitors into the area and a restaurant with a large verandah (called in Africa a *banda*) where one could enjoy a cool drink and sit and watch wild game drift gracefully toward the water-holes.

It is a unique project that could be ideally possible in such an ideal spot in Southern California. And it could be created only by such a dream-strong and think-future organization as the San Diego Zoological Society.

April 7, 1966, San Diego Union, A-16:2-3. Easter Floral Show Set for Balboa Park

The Easter display in the Botanical Building at Balboa Park will be exceptionally good this year, and will last through most of April, according to George Kempland, city horticulturist.

The display will include 450 lilies, with an average 12 or more blossoms per plant, and 750 pots of cinerarias, with several dozen flowers per plant, Kempland said.

Adding color will be red tulips and a number of cymbidiums and cyclamen.

Floral displays in the Botanical Building are changed on an average of once a month. The flowers are grown by city personnel in the Park Nursery.

The building is open to the public daily from 10 a.m. to 4:30 p.m., except Fridays.

May, 1966, San Diego Magazine, Vol. 18, No. 7, 82. A Great Fine Arts Collection Comes to Light; the \$10 million Fine Arts Gallery treasure of old world masterworks can be seen almost en toto, also evident: the contemporary collection badly needs bolstering, by Marilyn Hagberg (illus.).

Great art should be seen and not heard. There's been a lot said about the collection of the Fine Arts Society of San Diego, a collection valued at over \$10 million that should make any city proud, that in some respected is unequalled anywhere else in the West. Many of the paintings, prints, ceramics and sculptures have been continuously on display in the forty-year old Fine Arts Gallery, designed by William Templeton Johnson, but a sizable percent of the nearly 5,000 works comprising the collection has been buried in dark basements for years because there was no room for it elsewhere. There still won't be any space for it all, but when the Gallery's new West Wing (*San Diego Magazine*, February, 1966) has its three-day gala grand opening May 13, 14 and 15 the public will at last be able to view at least the cream of the crop.

It should prove a feast for frustrated eyes. By and large, there is something for everybody, except maybe the way-out avant-garde Gallery-goers, will be able to peruse spectacular pieces from a variety of places and periods, ancient to modern. The grand total is something like 500-plus paintings, almost 2,000 graphics, and splendid samples of ceramics, sculpture, textiles, tapestries, silver, glass, furniture and decorative arts. Only the finest of them will be shown in permanent and rotating exhibits in the new wing and the halls of the original Fine Arts Gallery. A number of

“lesser” works are periodically lent by the Fine Arts Society to civic and semi-civic offices and institutions in San Diego and to the House of Hospitality, across the Plaza de Panama.

The most outstanding exhibits within the collection are those of Spanish paintings from the fifteenth through nineteenth centuries and Italian paintings of the thirteen through eighteenth centuries; there isn't another museum on the West Coast that can surpass the Fine Arts Gallery in these fields. In hot pursuit are the fine Flemish and Dutch paintings, the graphic collection and Oriental arts. French, English and American paintings are not numerous, but they are excellent.

Interestingly, because of its many superlative old masterworks, it's a collection that is better known nationally and internationally than it is in San Diego --- but then people often don't appreciate what's in their own back yard. Frequent requests for particular loans come from major American and European museums, including the Louvre. A number of noted European and American art authorities have come to look at the Gallery's European collections. College art students from Los Angeles and vicinity are sent here to study Renaissance and Baroque works.

There are holes in the collection, of course. There is virtually nothing of South or Central American or Mexican arts --- a situation which the newly-formed Latin American Arts Committee hopes to remedy. Outside the area of Asiatic arts, the Gallery's good sculptures can be counted on one's fingers. There is precious little of Greek, Roman, Egyptian and Byzantine art. But the most glaring gap is in the field of contemporary American and European painting and sculpture, and it is in this area that the Fine Arts Society would be wisest to gear the Gallery's immediate growth. There has been a start, thanks chiefly to the Messrs. Earle Grant and Pliny Munger and the recent acquisitions of new blood into the Society and the Gallery. Acquisitions of contemporary works, by artists both of this region and beyond, currently are being encouraged by the Gallery director Warren Beach, assistant director Rudy Turk and the new Contemporary Arts Committee (*San Diego Magazine*, December 1965), the San Diego Art Guild and many other people within and without the Society.

Amassing this nevertheless impressive collection has not been a quick or easy task and expanding it, in any direction, will be no simpler. Collecting art is an art in itself and, as concerns a general art museum, it falls into two main categories. If the institution is fortunate enough to have large purchase funds, the problem is primarily a matter of finding and acquiring for a fair price first-rate works in the fields or periods in which one chooses to concentrate. If, on the other hand, purchase funds are almost nil, the problem becomes more difficult and complicated: one needs to interest private collectors in making gifts to the gallery. If he is very lucky, the museum's director can sometimes influence the collecting direction of donors and even receive directly purchased gifts from them now and then.

It is into this second category that the Fine Arts Gallery falls. It has only about \$1,000 annually for purchase --- barely enough for a couple of drawings or prints. Most of this is income from the bequests of Helen M. Towle (1935) and Edward Binney III (1963); \$300 of it comes from the Otto H. Schneider Memorial Award Fund, established in 1962 for the purchase of figurative or landscape paintings. A study of the growth of the Gallery's collections indicates something of the nature of collecting with little funds and a large dependence on the good interests of a few major and many smaller donors.

The primary collecting from 1925, when Mr. and Mrs. Appleton Bridges built the Fine Arts Gallery and gave it to the city, to 1955, was in the area of European paintings from the Middle Ages to the nineteenth century. Graphics and Asiatic Art also got off to a sound start. Since 1955, when Warren Beach became director, most acquisitions have been in the fields of Near and Far Eastern and modern European and American arts. The first paintings came for the Bridges, and from Mr. and Mrs. Archer M. Huntington and Mrs. Alma de Bretteville Spreckels and her children. Later, the Misses Anne and Amy Putnam provided the bulk of the Gallery's Renaissance and Baroque paintings. Aided and advised by Dr. Reginald Poland, the Gallery's first director (1926-1950), they became the most prominent donors and are responsible for approximately ninety percent of the Spanish, Italian, Flemish and Dutch works --- the backbone of the present collection.

Following the birth of the Putnam Foundation in 1950, it was hoped by many, both of the foundation and the Fine Arts Society that Putnam-purchased paintings would continue to increase the Gallery's collection. One of those who worked hardest toward this end was Thomas B. Robertson, who succeeded Dr. Poland and preceded Mr. Beach as director. Unfortunately, differences of opinion created a separation and the eventual building of the independent Timken Gallery to house the Putnam Foundation acquisitions (*San Diego Magazine*, October 1965). Happily the rift has since healed, and now the Putnam pictures and the Fine Arts Gallery are together, at least as far as the public is concerned. The Timken sits opposite the New Wing, with the original Gallery between them. Half the forty marvelous masterworks in it are among the best of the paintings given to the Fine Arts Gallery by the Putnam sisters between 1935 and 1950; they 're on long-term loan from the Fine Arts Society.

The most important slice of modern European (and a few American) paintings comes from Earl Grant and the late Pliny Munger. A number of the works from the Grant-Munger collection --- the majority of them purchased from the Dalzell Hatfield Gallery of Los Angeles, and not all of them of equal merit --- have been given to the Gallery; others rotate back and forth, a la loan, between their house and the upstairs room in the Fine Arts Gallery which is paneled like the living room of their home. The pictures (and a few sculptures and pieces of antique furniture) that can be seen here include oils, watercolors, drawings and prints by Duffy, Paul Klee, Renoir, Braque, Vlaminck, Vuillard, Rouault, Marc Chagall, Degas, Boudin, Eugene Ibsen, Marino Marini and Edvard Munch. Among the Americans in this collection are Edgar Ewing, John Marin, Max Weber, Dan Lutz and Grandma Moses.

Between 1942 and 1961 the late Miss Freda Klapp gave the Gallery 65 graphics, including about 20 superb Whistler etchings and lithographs. More recently, 220 contemporary lithographs from Los Angeles' famed Tamarind Workshop were donated by Martin Gleich. The largest bequests of Early Americana have come from Mrs. Frank Marcy, president of the Fine Arts Society from 1953 to 1956, and from Miss Anita Wells and her late brother, James H. Wells. Miss Marcia Potter gave the fine collection of antique American glass. The major bequest of Asiatic arts came from Mrs. Cora Timken Burnett, sister of Mrs. Bridges, in 1956; other members of the Timken family have made gifts of European paintings and tapestries. Another notable donor is Mrs. Irving T. Snyder, who has given many important graphics and a number of outstanding Oriental objects. In the 1930s Mrs. Saidie May contributed several excellent early twentieth-century French paintings. Additional prominent donors over the years have been Mrs. Henry A. Everett, Mr. and Mrs. Arthur Johnson, the late Miss Alice Klauber, Capt. and Mrs. A. W. Borsum, Mr. and Mrs. William Hippen, Jr., Miss Elsie Kimberly and the late Mrs. John Co Bentz and her daughter, Mrs. John Jeffers. Many gifts have been made, and continue to be made, by trustees and members of the Fine Arts Society. Some also arrive from people far afield.

The directors and trustees of an art museum, such as the Fine Arts Gallery, must continually court prospective donors. This sometimes, Beach says, "becomes a chain reaction." Contacts with distinguished New York and Philadelphia collectors, Gustave Gilbert and Sam Silverman, respectively, have resulted in significant acquisitions. Gilbert's initial interest in the Gallery led from a superb Seurat drawing to several modern French paintings and sculptures --- for a total of almost \$15,000 worth of gifts. Through Silverman, Mr. Beach met other Eastern collectors and received from them, over a period of several years, fifteen contemporary Spanish and French paintings.

Now, as in the past, a committee of the Fine Arts Society authorizes the acceptance of gifts, purchases and loans. The members of the present Acquisitions Committee are George Sorenson, Mrs. Norton Walbridge, artist Sheldon Kirby, James Erdman, Earle Grant, Dr. Edward Hashinger, Mrs. Joseph Wier and Mrs. Frederick Andrews. "We try to accept works without strings," Beach explains. "Some do come with the stipulation that they can't be sold or swapped for a certain period --- but usually we don't sell a work unless it is given for that purpose."

There is strong indication that the current acquisitions group and the Board of Trustees have a fairly liberal art outlook. This has not always been the case. In the early 1950's, for example, then-director Tom Robertson had his hands full with a conservatively-complexioned Board. Robertson was in tune with the contemporaries: he tried to put the Gallery in rapport with the area's "modern" artist; he helped the Art Guild expand to include increasing numbers of the younger painters and sculptors; he founded the Gallery Guided (Docents). Many were on his side, of course, but he had, as he says, "a lot of trouble over the acceptance of contemporary works of art into the permanent collection." Today, Robertson feels, the Fine Arts Society is "tremendously more progressive-minded." Goodness knows what modern art gems were born to blush unseen in the Fine Arts Gallery because of past policies, but that is ancient history. Now one can hope that the fresh artistic vitality and mentality seeping into the Plaza de Panama can create a lively collection of contemporary paintings and sculptures to complement the magnificent old masterworks.

The disadvantage of being more a recipient of gifts than outright purchaser is that the Fine Arts Gallery cannot, except to the extent that it can influence the purchase and gifts of its donors, determine its own collection. Along with an occasional embarrassment, it nevertheless has managed to amass a brilliant array of art. In practically every field, the collection reads like a Who's Who of World art: not only does it have "names"; it also has some of their more praiseworthy creations. I can't think of another art museum of its size in a city of this size with a better batting average.

It is also a collection that's pretty well prove. The most famous pictures in it are well documented; many of the others have been authenticated by art experts and the Gallery staff. Among the famous authorities who have looked at and given opinions about the collection have been Rome's Dr. Frederico Zeri, a Renaissance expert who has taught at Harvard; Alfred Frankfurter, the late editor of *Art News*, who was retained by the Putnam Foundation to research and document the paintings purchased by the Putnam sisters; Julius Held, the leading expert on Flemish paintings, an authority on Rubens in particular; and the late Bernard Berenson. IN the late 1940's, former San Diego State College art history teacher Mrs. Julia Gethmann Andrews researched the collection for the Gallery's first catalog --- and developed the Gallery library in the process. Directors Poland, Robertson and Beach have also done a degree of authenticating. "It's a continuous process of validating, of upgrading and occasionally downgrading works," Mr. Beach explains. "At this point we don't have the money to hire an authority to dig into the authorship of works we're not sure of, but we nab every art expert who comes to town for an opinion --- and the experts often disagree with each other."

The Gallery's Old World Spanish collection is the finest on the West Coast. In fact, if all the Spanish pictures before Picasso in all the other West Coast museums were combined, they probably wouldn't match in merit the collection here. Among the Iberian masterpieces are Velazquez' brilliant portrait of the *Infanta Margarita*, Zurburan's huge *St. Jerome and Madonna and Child with the Infant St. John*, Murillo's magnificent *Mary Magdalene*, a portrait of Philip IV by Del Mazo, Coello's *Philip II as a boy*, Cano's *Christ The Redeemer* and Padilla's *Religious Procession*. Over in the Timken Gallery are the cream of the cream: imposing works by Ribera, Zurburan, El Greco, Goya and Cotan.

Outstanding among the Italian masterworks --- the majority of them Venetian and Florentine --- are Titian's *Portrait of the Doge Francesco Donato*, a young man by Giorgione, a splendid view of Venice's Grand Canal by Canaletto, two fine works by Francesco Guardi, a lovely landscape by Bellotto, two marvelous Longhi's, and the gigantic *Madonna in Glory* by Piazzetta. Also important are paintings by Giotto, Bellini, Bartholomew, Lotto, Vecchio, Correggio, Cariani, Veronese, Caravaggio, Tiepolo and Strozzi. The Timken has Fine Arts Society-owned gems by Titian, Tintoretto, Bellotto, Crivelli, Guardi and Bronzino.

High rankers in the Flemish and Dutch departments are the huge *Holy Family with St. Francis* by Rubens, a Flemish gentleman by Van Dyck, two fine oils by Frans Hals, Rembrandt's remarkable *Portrait of a Young Men with Cock's Feather in His Cap* and his tiny *Head of a Baby*, Jacobus Vrel's *Interior with Seated Woman*, Nicholas Maes' *Girl with Pet Dog*, Terboch's *The Love Letter*,

and Jan Steen's amusing *The Cat's Medicine*. Excellent, too, are paintings by Teniers, De Vos, Wouwerman, Van Ruisdael, Droogslout and Kalf. Outstanding Gallery-loaned works by Rubens, Hans Memling, Van Der Weyden, Bosch, Van Dyck and Ysenbrandt are in the Timken.

The Fine Arts Society owns two English paintings, and they're terrific --- John Opie's little *Portrait of a Boy* and Sir Thomas Lawrence's large *Portrait of Sidki Efendi*. Supplementing these are loaned works by Joshua Reynolds, Constable and Gainsborough. The tiny German group includes three superb fifteenth and sixteenth-century portraits by Lucas Cranach, Jorg Breu and Barthel Bruyn.

From France come excellent sixteenth through nineteenth-century paintings by Quesnel, Chardin, David, Corot, Troyon, Theodore Roussau, Millet, Courbet, Fromentin, Boudin, Loiseau, Fantin-Latour and Renoir. The Gallery's collection of contemporary European paintings outside the Grant-Munger collection is small but impressive. Included are pictures by Spaniards Salvador Dali, Sorolla, Francisco Bores and Pedro Pruna, whose *La Blanche* is one of my favorites. Two fine Mexican works, Icaza's *Head of a Man* and Luna's *Horses at Dusk* are recent acquisitions. The Italian group has a marvelous abstraction by Edmondo Bacci and canvases by Chirico and Tancredi. The twentieth-century French works include Vlaminck's wonderful *Winter*, Matisse's big *Bouquet*, and prominent paintings by Villon, Dufy, Friez, Derain, Jean Helion and Jacques Bleny.

The Gallery's American collection is dominated by portraits of Josiah Blackburn, Winslow Home, Mary Cassat, Frank Duveneck, William Merrit Chase, Thomas Eakins, Henry Inman, Samuel F. B. Morse, George Bingham and Robert Henri. Also imposing are a number of city and landscapes, figures and abstractions. Headed by Charles Burchfield's *Rainy Night*, these include oils and watercolors by George Bellows, Eastman Johnson, John Sloan, George Inness, Albert Pinkham Ryder, Colon Cooper, Maurice Prendergast, Stuart Davis, Millard Sheets, Robert Gwathmey, Lyonel Feininger, Nicholai Fechin, Arthur Davies and John Paul Jones.

The graphics collection has top-notch prints and drawings by virtually every major European graphic artist: Thomas Rowlandson, Edward Burne-Jones, Augustus John, Rembrandt, Rubens, Peter Brueghel, Van Leyden, Durer, Schongauer, Altdorfer, Picasso, Joan Miro, Pruna, Corot, Daumier, Callot, Dalacroix, Cezanne, Rodin, Gaughin, Laurencin, Lautrec, Bonnard, Matisse, Rouault, Derain, Braque. In addition to the Whistlers and the Tamarind lithos, among the American printmakers are John Singer Sargent, Childe Hassam, Maurice Prendergast, George Bellows, John Marin, Rockwell Kent, Rico Lebrun, William Zorach, Paul Landacre, Peter Hurd, Millard Sheets and Robert Gwathmey.

The excellent Asiatic arts collection is almost a gallery within the Fine Arts Gallery. The Asiatic Arts Committee and Carl Skinner, the Gallery's curator, have done a splendid job in steadily increasing acquisitions in the area. The Committee (now headed by Robert Wallace) raises its own funds, makes purchases, and organizes "outside" exhibits and lectures. Several past and present members of the committee, also have made gifts to the collection, which includes some of the oldest works (dating as far back as 1,500 BC) in the Gallery. There are particularly important collections of Chinese sculpture, Persian ceramics and Japanese scroll paintings, as well as an awesome abundance of ancient Oriental prints, stone rubbings, bronzes, netsuke, screens, rugs, a few swords, a handful of paintings and assorted decorative objects.

Excluding the Asiatic arts array, the Gallery's sculptures are small in quantity but significant in quality. The finest American pieces are by Frederick Remington, Jacob Epstein, Augustus Saint-Gardens, William Zorach, Anna Hyatt Huntington, and San Diego's Donal Hord. The European sculptures are by Maillot, Cornet, Ortiz, Mestrovic, Sansovino, Canova, Cano, and Marino Marini. Some of the examples of Mediterranean and decorative arts are a small collection of ancient Roman glass, a Roman bathtub, a handful of fine Greek figurines, one important Egyptian sculpture, English silver, Spanish, French and Flemish tapestries.

As general art museums go, the Fine Arts Gallery has fared exceedingly well. Where it's going from here is anybody's guess, but I think it's safe to say it's going to grow, just as the city is going

to grow. Its achievements already are high, but it also must keep pace with art progress. If it is to compare with the finest of the country's medium-sized museums --- like Minneapolis, Seattle, Baltimore, Worcester, Mass. --- it must as director Beach has pointed out, "keep its sights even higher. Otherwise, when San Diego is much bigger than all but six or seven of our greatest metropolises, we will be way behind many small cities in visual arts opportunities."

May 8, 1966, San Diego Union, E-1. Fine Arts Wing A Pleasant Surprise, by Dr. Armin Kietzmann (photos of interior of two-level library, interior court of West Wing, ornate bronze gates)..

A museum's design challenges the architect with a number of unusual practical and artistic problems. In consultation with the director and trustees as to space and safety requirements of the museum's collections and activities, the architect is responsible for the esthetic character of the structure, and his problems can be compounded when the new design is to conform with existing buildings.

The Fine Arts Gallery's new West Wing, designed by La Jolla architects Robert Mosher and Roy Drew, meets the challenge with what appears as an understatement outside, and a big and predominantly pleasant surprise inside.

Seen from the Plaza de Panama and compared with the Fine Arts Gallery and the Timken Gallery, the Wing seems to submit to the building's complex over-all plan almost with self-effacement. Its contrast of plain walls and accent upon the portico echoes (?) motifs of the main building's facade but, besides being less ornate, reduces them to a one-story scale and a dark ochre key. The Wing, it seems to say, is a wing and not a building for itself. As to its relation to the free-standing and brightly shining Timken Gallery across the Plaza, the Wing, by keeping a balance in height, straight lines and general dimensions, appears to extend a civic gesture, a willingness to be a good neighbor.

Actually, there is self-assertion behind the reserve. Like so many architects today, Mosher and Drew kept free from austere steel and glass anonymity and dipped, instead, far into the past for inspiration of an unorthodox and individual solution.

The direction in which to seek was given by the main building's Spanish note, and the architects played it up to what they called a "romantic Spanish" result. It has its Moorish overtones in the employment of interior courts, colonnades, reflecting pool, and ornamental metal grilles.

A distinctive feature in the Wing design, the use of columns with tender shafts and molded, freely plantlike capitals, denotes the motif's comeback in contemporary architecture. The idea is "in the air." Independent variants like these here, appeared, for instance, in recent designs by Saarinen, Yamaskai and Philip Johnson, in forms of triangular piers, elongated and trumpet-topped shafts, or tapered columns.

The Wing opens this weekend. The first steps lead into the sculpture court --- as yet without sculpture --- flanked south and north, respectively, by the library and the auditorium. Quietly elegant in materials and details and of adequate size --- the library even plans to set up a print display, and the auditorium seats 450 for meetings, lectures, or chamber music --- these much-needed facilities, situated at the Wing's far end, can function when the gallery is closed.

But court, library and auditorium are only part of the Wing. Passing through a foyer, the visitor is taken to the added exhibit area consisting of two large galleries, one hung with Italian, and the other with early American paintings and three smaller galleries which, with a garden court they enclose, are meant for shows of Asiatic art.

The pleasant surprise of these galleries is their spacious, well-dimensioned light and airy appearance, unexpected to whoever enters the wing from the plaza. Circulation should be no problem in the exhibit area, "museum's fatigue" and unknown word. Another refreshing factor is the stark white of the walls which isolates each painting and brings its colors to a glow.

More of a problem is the lighting of the exhibits. One of the galleries gets north daylight, the other is dependent upon artificial light, and the small galleries around the garden court receive light from various sides. Fluorescent light, considered harmful to pictures, is avoided, but some say that the incandescent lights, which are used, "have too much energy at the red end of the spectrum." Perhaps, until more is found out about how the lighting works, it would be prudent to use the new galleries for temporary shows only.

The Wing brings to the Fine Arts Gallery about 150 percent expansion in space. It will carry on an increased programming on social, cultural and educational levels. But as Warren Beach, director of the Fine Arts Gallery, said, "Without our art collections, which we can now show for the first time, all the other activities would be relatively meaningless."

A reorganization of the gallery's collections uses all galleries of the west wing and most of the ground floor of the main building. Many works will be exhibited for the first time, others will be seen with fresh eyes.

One thing should not be forgotten, however. The Wing was originally planned for exhibition space, yes, but chiefly to take an activity load off the main building. And this is still true. Once the excitement about the new walls subsides, the chief old masters may return to the fine galleries on the main buildings' second floor.

Previews of the new wing are scheduled Friday and Saturday for Fine Arts Society members. The formal dedication will be held at noon next Sunday.

May 11, 1966, Minutes of Park and Recreation Board.

The Balboa Park Committee recommends that the San Diego Botanical Garden Foundation be designated as the official organization to prepare plans, raise funds, and construct the Garden Center Building on the site designated in the Bartholomew Plan, and that a 5-year limitation be imposed on the organization to accomplish its purpose.

Mr. Miller stated that the people interested in garden clubs for many years have wanted a center for club meetings, exhibits, and flower shows --- the building to also house a library. Two years ago the San Diego Floral Association organized a committee to establish a corporation for the purpose of raising funds and building the Garden Center in Balboa Park. As a result, the San Diego Botanical Garden Foundation was incorporated last summer. The Foundation is requesting designation as the official organization to prepare plans, raise funds, and construct the Garden Center Building on the site designated in the Bartholomew Plan, and that a five-year limitation be imposed on the organization to accomplish its purpose.

Mr. Lustig indicated that there is no need for the Facilities Committee to discuss the Foundation's request as the location of a Garden Center site has already been recommended in the Bartholomew Plan. Since the Facilities Committee has recommended implementation of the Bartholomew Plan, and to expedite approval of the Foundation's request, the Committee would have no objection to locating the Garden Center on the site suggested in the Bartholomew Plan.

In the discussion which followed, Mr. Giddings suggested that the Foundation should make a progress report within two years to be reviewed by the Board.

Mr. Richards then moved, seconded by Mr. Stickney, that the Balboa Park Committee's recommendation of April 25, 1966 --- as presented by Mr. Bowen --- be approved with the added provision that the Foundation submit a progress report within two years for review and approval of the Park and Recreation Board. The motion carried unanimously.

Mr. Giddings then suggested that the San Diego Museum of Man request be presented. Mr. Bowen reported that the Balboa Park Committee at its April 25th meeting considered the Museum's proposed expansion plans and made the following recommendation:

The Balboa Park Committee recommends that the request of the San Diego Museum Association, as set forth in a letter dated March 23, 1966 addressed to Mayor Curran and City Council, be approved. Miss des Granges summarized the letter of March 23 from G. G. Wetherill, President of the San Diego Museum Association, which requests:

1. Confirmation of the occupancy of the buildings and the site now known as the Museum of Man as the permanent quarters of the Museum of Man and granting to the San Diego Museum Association the right to occupy and maintain therein the functions and exhibits of the museum, subject to the ordinances, rules and regulations of the City of San Diego and in conformance to such understandings as to operational procedures, etc., as may from time to time be mutually agreed upon.
2. Designation of certain additional areas within Balboa Park and contiguous to the existing Museum buildings as the site for the construction of future additions to the Museum of Man --- namely, the area south of the southerly wing of the present building and the area between the Alcazar Garden and the parking area to the south of the garden.

Mr. Bowen then introduced Mr. Sam Hamill, architect, who displayed drawings of the present Museum of Man facilities --- and the proposed additions. Mr. Hamill commented that the Alcazar Garden concept had been reviewed and approved by Mr. Roland Hoyt, landscape architect. About 45,000 square feet of new space is involved in the expansion plans. The existing building will not be torn down --- and the proposed additional construction and/or remodeling would be designed in keeping with the style of architecture used throughout Balboa Park.

Mr. Lustig suggested that the proposed expansion plans of the Museum of Man should be reviewed by the Facilities Committee. Mr. Giddings asked Mr. Clark Evernham, Director of the Museum of Man, if there was time pressure for action on the Museum's request --- and Mr. Evernham replied in the negative. Mr. Giddings then accepted the Museum of Man's presentation. He concluded that the Board has received expression of the Balboa Park Committee's action --- and the Museum of Man request will be referred to the Facilities Committee for further study and a report to the Board.

May 12, 1966, San Diego Union, A-18:1. Park Board okays reduced fiscal program.

The City Park and Recreation Board yesterday approved a 1966-67 capital improvements program of \$1.5 million instead of the \$2.5 million previously projected.

Additional funds, however, might be available from two sources:

1. The \$23.8 million park and recreation bond issue which has been recommended for the November 8 general election ballot.
2. An application for \$600,000 in federal matching funds under open space and beautification programs.

The reduction in the improvement budget is a result of recommendations by citizens' committees and City Manager Tom Fletcher which currently are under consideration by the City Council.

The proposal is that \$2.5 million a year in sales tax receipts be transferred from the capital improvements budget to the operating budget to stave off an increase in property taxes.

The complete capital improvement program would be restored if the park and recreation bonds and three other bond issues are passed by the voters in November.

In other actions yesterday, the board:

Authorized the San Diego Botanical Garden Foundation to prepare plans and raise funds for construction of a garden center building on the site of the Food and Beverage Building in Balboa Park.

Took under study a request by the Museum of Man for permission to expand the museum building in Balboa Park.

May 13, 1966, San Diego Union, A-13:7-8. \$520,000 anniversary fund sought; City to be asked for \$150,000 for San Diego event, 200th Board chief says.

May 16, 1966, San Diego Evening Tribune, A-21. Fine Art Gallery's West Wing is Dedicated to Public; \$1.6 million new annex is L-shaped; officials praise effort to build park structure.

The Fine Arts Gallery's new West Wing, a treasure house befitting of the priceless art work it contains, was dedicated yesterday in brief ceremonies to the people of San Diego.

"This is your West Wing," Fine Arts Society President Evan Jones told the crowd of several hundred persons gathered in Balboa Park's Plaza de Panama for the ceremony. "It belongs to all the people of San Diego."

The wing on the west side of the plaza, the main gallery on the north and the Timken Gallery on the east, give San Diego "a truly magnificent complex for the fine arts," said Michael Ibs Gonzalez, former president of the society and master of ceremonies yesterday.

The official opening of the 1.6 million, 52,000-square foot wing came when Mayor and Mrs. Curran cut a ribbon stretched across an auxiliary entrance between the wing and main gallery. The ceremony was held there so more people could watch it, said Warren Beach, Fine Arts Gallery director.

Principal access to the new wing is through the main gallery. However, an auxiliary entrance near the auditorium in the new wing was open yesterday to accommodate visitors.

"This is a proud moment," Beach said. "This is your museum and its treasures --- expressions of man's finest creativity --- are for all.

Curran noted that the wing was the result of cooperative effort of the Fine Arts Society, the city, the county and the federal government --- through an accelerated public works program construction grant --- and many individuals.

All have cooperated "to bring a dream to reality," he said. "Within these walls are beautiful opportunities for education and enlightenment."

DeGraff Austin, chairman of the county Board of Supervisors, termed the new wing "a place where all can share in the beauties of civilization."

Austin read a telegram from Rep. Lionel Van Deerlin, D-San Diego, who expressed regret he could not be present for the ceremony.

In his invocation, Chaplain George E. Vanderpoel, USN, said he hoped man "can learn here the art of peace." He asked God to "bless the use of this building to the happiness of the people of the community."

The new wing is an inverted L-shaped building of textured sandstone. The foot of the L is connected with the existing gallery and contains three exhibit rooms and a garden court.

The leg of the L contains a library, sculpture court, reflection pond, auditorium, kitchen, foyer and receiving area.

In spreading its new wing yesterday, the Fine Arts Society brought to fruition an idea born 21 years ago when it was decided the then 20-year old main gallery, "though designed with intelligence and foresight," was inadequate to meet the needs of the growing collections and membership activities of the society, Gonzalez said.

In reviewing the history of the gallery, Gonzalez noted that the main gallery was made possible through a gift from Mr. and Mrs. Appleton S. Bridges. Many of the first art works were gifts of the Misses Anne and Amy Putnam.

"We are all pleased," Gonzalez said, "that certain paintings given by these ladies to the society can now be viewed on a loan basis, with other distinguished old master paintings owned by the Putnam Foundation in the gracious Timken Gallery."

Cited by Gonzalez for contributions to the West Wing building fund were:

Mr. and Mrs. James H. Wells and Miss Anita Wells; Mrs. Frank Marcy; John Alessio; Thomas J. Fleming, Sr.; Mrs. Nicholas Molitor; the Junior League of San Diego; Mr. and Mrs. William Thompson Stephens; Mrs. John Wimmer and friends; the Samuel I. and John Henry Fox Foundation; Mrs. A. Richard Stern and friends; Mrs. Will Hippen; and James S. Copley Newspapers, the Union-Tribune Charities and Copley Charities.

In addition to the private gifts, the city contributed \$200,000 from the capital outlay fund. The federal matching grant of \$804,000 was allocated early in 1964 and, on May 17, 1964, ground for the new wing was broken.

The wing was designed by Mosher and Drew, architects, and was built by the M. H. Golden Construction Co.

May 16, 1966, San Diego Evening Tribune, A-21, A-25:4. Choice art works on display at center's new addition, by Naomi Baker (photo of two children looking at Sebastiano Ricci's "Christ Served by Angels," one of the paintings now on display in the new West Wing).

Choice art works from the San Diego Fine Arts Society's \$10-million collection have a new and beautiful setting in the West Wing of the Fine Arts Gallery in Balboa Park.

In addition to the Italian, American and Asiatic art and art objects exhibited in the new wing, four of the first floor rooms in the main gallery have new installations of Spanish, Dutch, Flemish and English art.

The wing was opened publicly Saturday. To accommodate the public, the gallery and wing were open today although the gallery usually is closed on Mondays.

In the Italian room of the wing, the lighting gives full advantage to the Giorgione portrait of a young man, one of the most highly prized of the society collection. It has been said by art authorities that there may not be more than a dozen Giorgione paintings in the world today.

Giorgione (1478-1510) was one of the great painters of the Venetian school, and he probably studied, together with Titian, under Giovanni Bellini in Venice.

This painting has been authenticated by many scholars and art authorities. Some consider it to be his self-portrait at about the age of 32. It was once in the Terris collection, and is sometimes referred to as the Terris Portrait..

Hanging beside it is Titian's "Portrait of the Doge Francesco Donato."

Another of the important paintings in the Italian room is "Madonna and Child with Angels: Crucifixion, and Busts of the 12 Apostles." It was painted by Lorenzo Veneziano, who was active from 1356 to 1372.

Carl Skinner, curator of Oriental art at the gallery, selected and personally installed many of the exhibits in the Asiatic rooms in the wing. Light from the Asiatic sculpture court brings out the beauty of this fine collection.

There are cases of Persian ceramics dating from the 11th to 13th century, a case of Korean ceramics, another of ancient Chinese bronzes, and a painted sliding door from the house of a Japanese shogun. This stands between two large carved wood figures of seated shoguns. They were gifts from Earle Grant and the late Pliny Munger.

Large Oriental sculptures from the Cora Timken Burnett bequest face the sculpture court which gives them excellent lighting.

Three Courbets and a Corot are among the French paintings in the foyer of the wing.

The American section in the wing has two handsome white mantels. Early American paintings, and several early pieces of furniture are arranged as in a home.

No one should miss viewing the Spanish paintings in Room 7 on the first floor of the gallery. The society's collection is especially strong in Spanish art.

At the far end of the room is a 15th century painted wood "Retable of St. John the Baptist." In this room also is Zurburan's "St. Jerome," his "Virgin and Child with Infant St. John," and Velazquez' "Portrait of the Infanta Margarita."

Nineteen of the Fine Arts Society's important paintings, including El Greco's "The Penitent St. Peter," and Goya's "Portrait of the Marques de Sofraga," have been loaned for exhibition in the Timken Gallery, immediately east of the Fine Arts Gallery.

May 16, 1966, San Diego Union, A-19:6, A-21:1. West wing of Fine Arts Gallery is dedicated, by Joe Stone.

The new West Wing of The San Diego Fine Arts Gallery in Balboa Park yesterday was dedicated and officially opened.

Mayor and Mrs. Curran cut the ribbon to symbolize the opening after the mayor told the audience, "This is a meaningful birth to the things the museum can do for the improvement of our community."

Presiding at the dedication was Michael Ibs Gonzalez, member of the board of trustees and former president of the Fine Arts Society of San Diego.

He pointed across the Plaza de Panama and said, "With the completion of the Timken Gallery and our new West Wing San Diego has a truly magnificent complex for the fine arts."

He traced the history of the West Wing from 1957 when the Fine Arts Society board voted a campaign to raise funds for the construction of additions to the original Fine Arts Gallery, built in 1925.

He named “among some of the most significant contributions” to the West Wing.

A “challenging contribution” from James S. Copley, the Copley newspapers, the Union Tribune Charities and Copley Charities “making possible the James S. Copley Auditorium.”

Gifts from Miss Anita Wells and Mr. and Mrs. James H. Wells for the Wells American Gallery.

A bequest from Mrs. Frank Marcy and contributions from her family and friends for the May S. Marcy Sculpture Court.

A contribution from John Alessio for construction and furnishing of the library in memory of his parents, Dominic Alessio and Rosa Alessio.

A gift from Thomas J. Fleming, Dr. of the Theodora-Thomas J. Fleming, Sr. Foyer.

A gift from Mrs. Nicholas Molitor for the Loggia in memory of her husband, Dr. Nicholas Molitor.

A grant in 1957 from the Junior League of San Diego for initial planning and designing.

Mr. and Mrs. William Thompson Stephens in memory of their parents, “certain of the gates to the Sculpture Court.”

Mrs. John Wimmer and friends for the John Wimmer pool in memory of her husband.

The Samuel I and John Henry Fox Foundation for the Asiatic Garden Court.

Mrs. A. Richard Stern and friends for the colonnades in memory of her husband, A. Richard Stern.

Mrs. Will Hippen for the William Tillitson Cushing dressing rooms.

Gonzalez also acknowledged the contribution of the federal Accelerated Public Works Program.

DeGraff Austin, chairman of the county Board of Supervisors, read a telegram from Rep. Lionel Van Deerlin, D-San Diego, congratulating the people of the city on the new West Wing.

Warren Beach, gallery director, spoke of the pride and excitement the people of San Diego must feel in the West Wing and the treasures of original art which come from all over the world.

“It is your West Wing,” Evan V. Jones, president of the Fine Arts Society, told the people at the dedication.

The invocation was by Cmdr. George E. Vanderpoel, USN chaplain.

The Marine Corps Recruit Depot Band played a concert before and after the dedication ceremonies.

May 16, 1966, San Diego Union, A-19:2-3. Fine Arts Gallery rediscovered here.

Hundreds of people discovered the Fine Arts Gallery in Balboa Park yesterday, even though it has been there since 1925.

The musicians of the Marine Corps Recruit Depot Band can take a lot of credit for exposing many park visitors to a fine arts side of San Diego’s culture.

The band played before and after dedication ceremonies for the new West Wing of the Fine Arts Gallery. Tunes arranged from the stirring military to a medley from "The Sound of Music."

Many persons, buttonholed in the new West Wing and asked why they came, said: "We heard the band playing and came to see what was going on."

October 6, 1966, San Diego Union, B-1. Mayor Curran says four bond issues for \$47.6 million to be paid over a period of 20 years essential.

Proposition D: \$23.8 million for parks and recreation

\$7.6 million for Balboa Park

7.4 million for Mission Bay

8.8 million for other parks and recreation projects

Proposition E: \$4 million for public works, police and fire stations, libraries, Montgomery field improvements, land purchases

Proposition F: \$4.8 million for storm drains, flood control, and shore erosion control projects

Proposition G: Sewer bond issue (revenue bond)

Endorsed by 9th District Parent Teachers Association; Taxpayers for City-Wide Improvement

Bonds; Citizens Bond Evaluation Committee and Citizens Committee on Municipal Finance.

October 7, 1966, San Diego Union, B-2. Endorsed by San Diego Taxpayers' Association.

October 10, 1966, San Diego Union, B-2. EDITORIAL: Props. D, E, F, G Merit Approval, Improvements Sorely Needed.

At least two compelling reasons dictate the need for approval of city propositions D, E, F and G at the November 8 election.

The first and most urgent is that the projects contemplated in the \$47.6 million in bonds the proposition would authorize are sorely needed.

Secondly, the bonding method of financing the projects makes common sense, particularly in view of the city's sound fiscal position.

Proposition D seeks \$23.8 million in general obligation bonds. About 31 percent of the total would go for improvements at Mission Bay Park; 32 percent for Balboa Park and 37 percent for neighborhood parks.

Proposition E would provide \$4 million for police and fire facilities, libraries, airport improvement and land acquisition. Proposition F seeks \$4.8 million for flood control and shore stabilization and Proposition G seeks \$15 million in revenue bonds to improve sewer lines.

There can be no dispute over the need for the public works projects, which merely seek to keep pace with the growth of the city and the needs of its residents.

The same argument holds for the need to improve parks. Additionally, the parks provide an important source of income to the city by enhancing our tourist potential.

The growing population and new leisure has put a tremendous demand on San Diego's parks and the need must be met. Balboa Park especially is becoming a municipal eyesore in certain areas because buildings put up for temporary use half a century ago are decaying rapidly.

Funds included for Balboa Park improvement would be used in the Prado and Morley Field areas in keeping with the General Plan.

Bonding for the improvements is a logical solution to the financing problems. It helps keep the property tax rate low during a critical time. Additionally, bonding spreads the cost over generations that will use the improvements.

From a fiscal standpoint, the city is in a sound bonding position. As of June 30 the municipal debt totaled \$28.8 million in general obligation and \$90 million in revenue bonds. The total city bond capacity is in excess of \$260 million.

Additionally, it must be realized that San Diego has reached a position in which bonds must be used to provide essential facilities. Moving into the program now may save money later because of tight credit, rising interest rates and inflation.

No arguments against Propositions D, E, F and G have been filed. Most community leaders and civic organizations support them. The specifics in favor of the propositions and the testimonials in favor of them should give San Diegans additional confidence to support the necessary bond issues.

If the truth were to be known, we probably really should be spending twice as much as \$47.6 million to accelerate the necessary improvements.

October 11, 1966, San Diego Union, B-3. Proposition E will end police plight.

October 13, 1966, San Diego Union, B-3. Chamber of Commerce backs bond issues.

October 16, 1966, San Diego Union, M-1, M-12. The Issues Behind Six City Bonds, by George Story.

The city in the last few years financed capital improvements from current revenues. The last general obligation bond issued approved by the electorate, excluding harbor bonds, was a \$5-million bond issue for Mission Bay development in 1956.

October 17, 1966, San Diego Union, B-3. Voters Decide Proposition D; City offers park, recreation plan, by George Story.

Balboa Park and Mission Bay Park are generally recognized as two of San Diego's greatest assets, both by residents of the city and by an ever-increasing number of visitors.

The 1,400-acre Balboa Park with the world-famous Zoo and a great variety of other attractions, has been enjoyed by generations of San Diegans and their guests since the land was dedicated for park purposed by city trustees in 1868.

Mission Bay, once a swamp, has been developed with \$50 million in public and private funds into one of the world's most beautiful aquatic parks. It includes 4,600 acres of land and water.

The City Council and administrative staff and the Park and Recreation Board have been working for several years with community organizations on plans for additional development of both these major parks and on new and improved parks and recreational facilities in every section of the city.

These plans will cost money.

The Park and Recreation Board and Mayor Curran's committee for bond evaluation reviewed the proposed improvements and cost estimates in detail and recommended a six-year citywide park and recreation program with a price tag of \$23,856,000.

This program now requires the approval of San Diego voters. It will appear on the November 8 general election ballot as Proposition D.

The park bonds would finance nearly \$7.4 million worth of additional development in Mission Bay Park, more than \$7.6 million for improvements in Balboa Park, and \$8.8 million worth of neighborhood park projects throughout the city, including three more municipal swimming pools.

In Mission Bay Park, the six-year program includes facilities for the use of San Diego residents and for visitors, many of whom are attracted to San Diego at least in part by the development of Mission Bay.

Swimming areas, such as Bahia Point, Bonita Cove, De Anza Cove, Playa, Pacifica, West Vacation Island, and Crown Point Shores, would get additional landscaping, access roads, parking areas, restrooms, and lifeguard towers.

Picnic and landscaped, open-space sections of the park, such as El Carmel Point, Mission Point, Mariner's Point, Bonita Cove, the Sunset Interchange, and Bayside Walk, would be developed with additional planting, lighting and picnic facilities.

Boat docks and ramps would be installed at Santa Clara Point, and boating facilities would be improved in the Quivera Basin, Playa Pacifica, Dana Basin, and East Vacation Island areas.

Sports facilities, including ball fields, are planned at Robb Field and the Pacific Beach Athletic Center.

Balboa Park improvements would include redevelopment of the central Prado area into a landscaped mall with broad walks, rest areas, pools, and fountains, landscaping, ornamental lighting, and new arcades.

In addition, a new formal garden is planned adjacent to the Botanical Building and a palm arboretum would be developed in Palm Canyon.

Picnic facilities would be improved in the Pepper Grove, Golden Hill and Sixth Avenue sections of the park, and additional parking space would be provided where necessary.

The Morley Field section of the park would be developed in accordance with the park master plan, including additional tennis facilities, an archery clubhouse and ranges, clubs for shuffleboard and roque enthusiasts, and baseball fields.

The peripheral road system is included in the six-year plan, with related bridges and pedestrian overpasses. The program also provides funds for cleaning a site for a new Hall of Science and Industry and replacement of the concession stand.

A location for children's rides would be developed adjacent to the miniature train, and landscaping and parking are planned in the east portion of the park.

The third facet of the park bond issue --- neighborhood and community parks --- includes a long list of projects in every part of the city.

Sites for about 11 new parks would be purchased, and 25 parks would be developed.

Improvements, including landscaping, parking athletic fields, and playgrounds are planned at 16 partially developed parks, and seven beach area parks would be improved.

Swimming pools would be constructed in the southeast, east and north sections of the city at an estimated cost of \$200,000 each.

The bond issue also includes funds for redevelopment of Horton Plaza, for several park center buildings, and for lighting of tennis courts and play areas at several locations.

The total park bond issue has been under study by the Park and Recreation Board for several months, and the board's committees have discussed the projects individually at community meetings.

Proposition D is backed by the Taxpayers for Citywide Improvement, the San Diego Taxpayers Association, the Park and Recreation Board, and the San Diego Chamber of Commerce.

There was no argument against the measure filed with the city clerk for distribution to voters. A two-thirds affirmative vote is required to authorize issuance of the bonds and the six-year program.

October 19, 1966, San Diego Union, B-1. Proposition F would provide street drains.

October 20, 1966, San Diego Union, B-1. Sewer overhaul in Proposition G.

October 26, 1966, San Diego Union, B-3. Proposition D would enlarge Morley Field facilities, by James Bryson.

In 1927 planners for Balboa Park set aside acreage in the park's northeastern corner and said it would be for recreation.

The area consisted of plateaus and arroyos, sagebrush, and some trees. It was rough land. To see tennis courts, a swimming pool, ball fields, club buildings, roads, pathways and expanses of lawn here took vision.

The late John P. Morley, San Diego's superintendent of parks from 1911 to 1939, was one of the visionaries to whom San Diegans owe thanks for such a transformation.

For the place has all those things today, is named Morley Field after the former superintendent, and is set aside in a master development plan for famed 1,100-acre Balboa Park as the park's active recreation area.

Morley Field today also has a cross-country running course, shuffleboard courts, and a fly-casting pool.

The city also is building a \$65,000 tennis clubhouse with capital improvement funds.

But the improvements in the 40 years are barely enough to meet demands of outdoor enthusiasts who have come in greater numbers to use the sports facilities, planners say.

"It's time we did something more with this area," said Richard Bowen chairman of a citizens' Balboa Park Committee which has helped plan for a \$7.6 million six-year improvement scheduled throughout the park. The funds will be requested as part of a \$23.8 million package for city park improvements, including Mission Bay, at the November 8 election. It will be labeled Proposition D. Approximately \$1.7 million would be spent on Morley Field.

"Our recreation area here just can't keep up with demands anymore," said Bowen. "More and more of our city's young people --- and I'm not talking about teenagers but about young adults below what we like to call the senior citizen level --- are coming here for active recreation.

"Eventually this should be the center of this type of activity for the entire greater San Diego area."

Bowen, whose 14-member committee worked more than 10 years with the city in helping plan the park improvement program, listed these major prospects for the Morley Field area.

Construction of four more tennis courts (there are 18 presently) including an exhibition court with bleachers on three sides, and installation of lighting for night play on 10 courts.

Installation of a permanent archery range and adjacent parking facilities to accommodate San Diego's growing legions of archers. This would be built in the Florida Street Canyon area, Bowen said.

Improvement of the Morley Field Drive access road including extensive landscaping.

Construction of a shuffleboard clubhouse near the tennis courts.

Parking for 286 cars adjacent to the courts and municipal pool.

Improvement of existing ballfields.

Improvement of Upas Street picnic area.

Extensive landscaping throughout the Morley Field area, most of which has gone virtually unimproved since land was set aside for Balboa Park in 1868.

Bowen said future plans for Morley Field also call for a municipal gymnasium, a bicycle race track, and a new fly-casting pool, and a clubhouse for the city's 18-hole golf course.

October 27, 1966, San Diego Union, B-1, B-7. Mayor Curran confident in city bond votes; Realty Board is urged to back city bonds.

November 8, 1966. BOND ISSUES

Proposition D: \$23.8 million for acquisition, construction and completion of parks and recreation facilities

37% (\$8,830,050) for neighborhood and community parks

32% (\$7,636,800) for Balboa Park

31% (\$7,398,150) for Mission Bay Park

\$23,800,000 voted for park projects until 1972

47,665,000 approved 1966 for priority needs over a 6-9 year period

No argument against park bond proposal was submitted to the City Clerk

Yes 132,548 70%

No 56,669

189,217 total votes cast

November 8, 1966, League of Women Voters, Election Extra, p. 11.

Proposition D:

Arguments for:

1. Will allow purchase of land now for future parks at a much lower cost than later.
2. Because the cost will be spread over a period of years, future citizens will pay their share for projects which they too will use.
3. Will allow building of parks so that maximum use can be had over the years.

Arguments against: There is no organized opposition to the proposition. Some citizens, however, may oppose for the following reasons:

1. Property taxes would drop by about one percent per year if no new general obligation bonds were approved.

2. There has been criticism of the San Diego park administration and policies. Opponents urge that these be clarified before additional funds are raised. For example, they argue that the "improvements" in Balboa Park might be more roads and parking lots. Events in 1966 have demonstrated that the city lacks policies to protect existing and proposed parks from roads. Under these conditions, citizens have no assurance that their investment in parks would be safeguarded.

December 14, 1966, Minutes of Park and Recreation Board.

At the conclusion of Dr. Lowe's remarks, Mr. Bowen commented that, "San Diego is fortunate to have Dr. Lowe as a citizen who has contributed greatly of his time, talent and means to the cultural advancement of the City." Mr. Bowen then moved that:

The Park and Recreation Board thank and commend Dr. Lowe for honoring his mother by giving the citizens of San Diego the carillon which was installed in the California Tower twenty years ago; and further that this Board express its profound appreciation for Dr. Lowe for his continuing interest in the beauty and pleasure of Balboa Park; and recommend that the San Diego City Council accept, as a Christmas gift to the City of San Diego, a new 100 bell carillon to be installed in the California Tower in Balboa Park in memory of his mother, Ona May Lowe, to be known as the "Ona May Lowe Chimes."

The City to:

1. Perpetually maintain the carillon and its record library.
2. Appoint a carillonneur employed to play not less than the six appropriate holidays of New Year's, Easter, Mother's Day, July 4th, Thanksgiving and Christmas.
3. Restrict the use of the Tower loud speakers, which are an integral part of the carillon, to the carillon itself.
4. Authorize the donor, at his expense, to provide and up-to-date plaque, placed by City labor, using as the official designation of the carillon, "Ona May Lowe Chimes."

The motion was seconded by Mr. Lustig and Mr. Stickney and carried unanimously.

The members of the Park and Recreation Board recently inspected the new Otto Education Building at the San Diego Zoo.

A motion was made, seconded and carried to congratulate the Zoological Society on the successful completion of this important and valuable asset to Balboa Park.

The chairman commented on the successful bond campaign and the excellent work of the Taxpayers for City-Wide Improvement Bonds Committee.

December 14, 1966, San Diego Union, B-1:5-7. San Diego Braille Club in Balboa Park gets Yule "touch," by Joe Stone.
