Balboa, the Spirit of the Park speaks: "In the first place I want you to put down that a Park is not a building, which, having once been made on paper is built to rule and line, for it has to grow and the things in it that make for real character are those that grow comparatively slowly. . . . Another fact of much significance is that local conditions vary so that Park plans cannot be standardized. . . . The best park man that ever lived would be valueless here till he had forgotten most of what he had learned elsewhere and assimilated local conditions. In connection with the historic Exposition much beautiful development has been done but it is going to be a tax on a growing city of a hundred thousand to maintain that development without tackling all the rest of the great unclaimed, and some of the exposition buildings will take time to assimilate into the general park scheme.

Every citizen has as much right and title in the park as he has in his own garden, provided he does not interfere with similar enjoyment by all the rest of the citizens, and why the people of San Diego don't see this, I cannot understand. They don't see it or the park management would not be a battledore and shuttlecock arrangement as it is now. Why there are more ex-park commissioners go through the park than ordinary citizens, and if it were not for new settlers in the city, the first one's turn would be round again. Why are not park commissioners under the civil service and subject to examination as to their qualifications to serve, and better still, remove park matters out of the realm of politics altogether.

A park wants a man who has made its acquaintance and has a vision.

Balboa cheered up noticeably. He began to reminisce, "You remember George Cook? I often see his jolly big form when I start to remember. He came out to me from the east full of eastern park lore and I was a sore trial to him and he was to me and just as we were getting really acquainted, he was called over the border. I missed him a lot. I don't make friends easily and quickly; time is the essence of my friendships."

June/July, 1917, California Garden, Vol. 9, No. 1, 7. The Park and the Man

Friends of Balboa Park, and this should include every citizen, have viewed with more than alarm an apparent intention on the part of a majority of the Park Commissioners to remove Superintendent Morley from his position. The **Garden**, though avowedly a friend of Morley, makes no pleas for his retention on the score of that friendship. The good of the park is infinitely more to it than any personal feeling and it emphatically believes Morley should be retained for the reasons that he has made more than good, he is making good, and his position is one calling for years of experience right there on the ground. The gardening technique making for success is radically different in Balboa Park to that called for in any other Park in the country because of situation, climate, rainfall, or rather the absence of it, and soil. Those without local experience judging by the tremendous results under Morley's direction obtained in the last few years, will probably greatly underestimate the unique difficulties to be overcome. Acres of solid blasting and filling, selecting of suitable material to grow, for Balboa Park's planting list is unique, not a copy of other parks.

With all respect to Park Commissioners past and present a right superintendent, which Morley is, is of more importance than all of them put together.

Retain Morley as Park Superintendent. If you don't like his accent or his religion, tell him so, but let him park.

July 1, 1917, Exposition Papers, Board of Park Commissioners, Box 2, San Diego Public Library.

Board of Park Commissioners granted Katherine Tingley, International Brotherhood League, use of Standard Oil Building for the purpose of giving a series of home entertainments to the soldiers and sailors on the Exposition grounds and also to furnish reading and writing rooms for them.

July 1, 1917, Los Angeles Times, III, 23:1-2. War and learning mix on Exposition site.

The beautiful park and the buildings that housed the Panama-California International Exposition are now devoted to widely-different uses. One section is a great museum of art and science and all that makes for the intellectual side of life, while the other part of the buildings and grounds is devoted to active preparations for war.

Army troops are in the old marine camp, the cavalry camp and the Twenty-first Infantry camp, and the buildings east of the Plaza have been transformed into barracks, headquarters and mess rooms for the new naval recruit training station. The Southern Counties Building is the administration building for the station, the Varied Industries Building a barracks for the men, the Cristobal Café is the mess hall, and the Government Fisheries Building is a bath house for the men. Two thousand naval recruits will arrive this week.

San Diego's inheritance from the Exposition, the Museum of San Diego, is already the largest west of Chicago. The buildings that have been granted for its use are conservatively valued at \$500,000 (?); the collection on exhibition or in process of installation at \$250,000 (?). The installation in the Fine Arts Building was completed and opened to the public last Sunday. Three buildings are open to the public and two more in process of installation will be ready by July.

BETTER THAN EVER

The Fine Arts Building is more attractive now than at any time during the exposition. It includes the gallery of exposition architecture, the mission chapel, the women's headquarters (where are hung the paintings of Donald Beauregard to remain until July), the main art gallery (where the paintings from the spring exhibition of the California Art Club are installed to be followed in June by the canvasses of Jonas Lie), the little art gallery (containing the exhibit of English water colors, to be followed in June by that of William Penhallow Henderson), and the oriental gallery, in which are the Tilden collection of Chinese and Japanese ceramics and an extensive loan collection of Japanese prints.

The gallery of exposition architecture is one of the most interesting additions to the art collection and affords a delightful study. There are pencil drawings and photographs of the exposition buildings and photographs of the ancient buildings of Mexico, Spain, Italy and Constantinople, which were the models used by the architects of the exposition. One can study the pictures of ancient buildings and compare them with the pictures of the modern buildings, then walk out on the Prado and view the originals of these photographs and drawings.

IN THE MAIN GALLERY

In the main art gallery, in the spring exhibition of the California Art Club, are charming landscapes and seascapes by Guy Rose, Indian paintings by Joseph Henry Sharp, "Old and New Manhattan" by Sidney Dale Shaw, landscapes by William Wendt, some fine still life by Helena Dunlap, and a fine Indian head by Doris Rosenthal.

The exhibition of English watercolors includes "The Baby" and other charming pictures by Laura Knight, and "Knitting," "Writing" and many attractive watercolors by Harold Night; also some of the work of S. J. Lamorna Birch.

The Beauregard collection in the Women's Headquarters contains the best work of this young artist, who died May 3, 1914, while much of his work for the San Diego Exposition was unfinished. Some of the unfinished canvases are hung. The young artist was sent to France, Spain and Bavaria by Frank Springer of New Mexico in 1911. He became ill in 1912, and, realizing his condition, worked incessantly to finish his studies and complete mural paintings for the New Mexico Building at the Exposition, for which he had received a commission. He returned to this country in 1913 and died the next spring. His studies of Indian life and desert scenes and the pictures of the country of the Southwest are of great worth. Mr. Beauregard died before he reached the age of 30.

The California Building is being put in order for the Museum of Ancient America. Its most notable feature will be the collection prepared by the School of American Research, of which Dr. Edgar L. Hewett is head. Dr. Hewett is now director of the San Diego Museum and gathered the larger part of exhibits of this kind for the Exposition. In the exhibits are great statues from Guatemala; mural tablets from Central American temples, unearthed after being buried by jungle growth for centuries; models of Aztec and Maya architecture; the Vierra paintings of ancient American cities; a Maya frieze by Mrs. Jean Berman Smith; the historical frieze by Mrs. Sally James Farnham; cases of burial pottery of Mexico, Yucatan, Guatemala and Panama; and the sacred books of the ancient Maya and Aztec peoples.

INDIAN ARTS MUSEUM

The structure heretofore known as the Science and Education Building will become the Indian Arts Museum. It contains the Hall of Southwestern Archaeology, the Hall of Culture History, and, after the transfer of the Science of Man collections, will receive the Indian collections of the California coast and island tribes of the Mojave, Pueblo and other Indians of the southwest. The building will have a large lecture hall, to seat 750 persons; a classroom to seat 150; an ethnological laboratory and an employees' rest room.

The Science of Man Building, formerly that of the Indian arts, will receive the famous anthropological collections assembled with the assistance of the Smithsonian Institution, under the direction of the ethnological division of the Exposition. This collection ranks as the most important of its kind in existence. Here are shown the results of a dozen important expeditions sent out all over the world. Specimens, casts, statues, photographs and skeletons illustrate the entire development of the human species from the nearest related animal forms. The collection was prepared in Washington and in museums in Europe by Dr. Hewett and Prof. Rutot of the Royal Museum of Brussels, assisted by Polish and Australian explorers, many of whom have been killed in the war.

The famous Spy man, the Java man, the Taquina man and other specimens of the human race in the stone age are included. There have been many additions to the collections of the museum.

In the south wing of the building there will be developed later the sociological museum and in the balconies the laboratory of physical anthropology and that of sociology.

BRANCH LIBRARY

By arrangement with the Library Board of San Diego there is being installed in this building a branch which will constitute an important department of the museum. Scientific literature and books of special interest to army and navy men will be in the collection for the use of the officers and enlisted men stationed in the park.

In the government building, at the north end of the Plaza, is the famous Joseph Jessop archery museum, the greatest archery collection in the world. It comprises the primitive weapons of the peoples of Europe, Asia, Africa, America and the islands of the Pacific and Indian oceans. Here are the bows and arrows of the Indians, spears and the earliest weapons used by man. Blow guns and poisoned darts used by

savages of Borneo and bows and arrows from the Island of Tiburon in the Gulf of California, where today lives a tribe of cannibals, are among the rare specimens.

July 2, 1917, San Diego Daily Transcript, 4:1. With the 300 odd apprentice seamen who arrived at the Exposition grounds Saturday, the total force now numbers over 1,500.

July 3, 1917. NOTE: First installment of Joseph Jessop archery collection received by San Diego Museum.

July 4, 1917, San Diego Union, Classified, 1:3-4. Fourth of July parade to move from lower Broadway at 9:30 a.m., Colonel J. P. O'Neil of the Twenty-first Infantry to be grand marshal; reviewing stand in front of Sacramento Valley Building; patriotic program at Spreckels' Organ Pavilion at 10:30 a.m.; British sailors to march with American service men.

July 12, 1917, Letter, A. E. Banks, M. D., Department of Public Health, San Diego, Calif. to Henry C. Ryan, President, Board of Park Commissioners.

Dear Sir: Matters of grave public importance have arisen in connection with the Naval Training Camp located in the Exposition grounds and, with the consent of the United States Public Health officials, I am addressing this communication to you with the request that a conference be arranged for Friday, July 13th at 4:30 p.m. in the Administration Building in the Park.

It is desired that the entire membership of your Board meet at that time with representatives of the Naval Training Camp, the United States Public Health Service, the Naval Sanitary Inspector from Washington, D. C., and the local Health Department in order that these matters may receive immediate attention.

Respectfully,

(Signed) A. E. Banks, Health Officer and Superintendent.

July 15 1917, Los Angeles Times, II, 1:6-7, 8:5-7. San Diego Fair Grounds Now Great Naval Training Camp; beautiful site of Panama-California International Exposition and huge buildings turned over to embryo fighters of Uncle Sam's fleet.

In the naval training came de luxe, the beautiful exposition buildings at San Diego, bluejackets are being turned out as fast as possible for Uncle Sam's navy. For the civilian attracted by the unusual sight of recruits scrubbing their clothes under a rosebush or a magnolia tree, or by groups of happy, white-uniformed lads feeding the pigeons on the Plaza de Panama, it is difficult to realize that the happy recruits sent to do the work had done it as directed without much ado.

Another art exhibit, belonging to Miss Edna Schofield, was moved the same day by the bluejackets. Miss Schofield was absent that afternoon and did not know of the order to vacate the building. The following morning, when she arrived at her studio, she, too, found walls bare in the building where she had just hung her pictures. So thoroughly had the boys performed their work, leaving nothing in the room, that Miss Schofield became convinced she had merely dreamed of having the studio arranged. Puzzled, she went

to Dr. Hewett and learned where her exhibit had been moved. There she found screens, pictures and casts placed in exactly the positions they had occupied in the first room, with such precision that not even her critical eye could detect a fault.

The sailors proved to be expert in hanging pictures, not so much from an artistic sense as that they obeyed orders and placed them exactly in the second room as they had found them in the first.

In the old Cristobal Café, now the mess hall for the training station, a change equally as astounding has been effected by the apprentice seamen. Several coats of white paint and white enamel have transformed the main dining-room, while untold scrubblings, paint and polish have made the big kitchen or galley, spotless. Here Chief Steward Fitzpatrick, a retired man recalled into the service by the exigencies of the war, assisted by thirteen cooks and eleven bakers, prepares the meals for the big family of boys.

The old idea of army or name fare is exploded by the menus served the recruits daily. Not merely good food, but a varied menu, is arranged by Steward Fitzpatrick.

On the Fourth of July a special menu was served, as always on holidays, which included cream of celery soup, combination vegetable salad, roast turkey with oyster stuffing, corn on the cob, mashed potatoes, chocolate cake, Neapolitan ice cream and coffee.

On this particular day the boys consumed 128 turkeys, or 1259 pound of meat; 712 pounds of ham; 421 pounds of loin pork and 117 dozen ears of corn.

On ordinary days the boys have a menu like this:

Breakfast: Boiled eggs, rolled oats, with milk and sugar; bread, butter, coffee.

Dinner: Rice-tomato soup, pot roast of beef, mashed turnips, potatoes, bread, butter, coffee.

Supper: Curried meat with rice, pickled beets, bread pudding, bread, butter, tea.

Many housewives could take lessons in economy from this big kitchen, where every scrap of food is utilized. Left-over vegetables make salads, stale bread is used for toast, for croutons, for stuffing and so on.

IN TEN BUILDINGS

The training station now occupies ten of the large exhibit buildings and more will be used later. There are more than 1500 apprentice seamen in the camp, of which W. D. Brotherton is commandant and Lieut. E. A. Lofquist the executive officer.

The administration offices occupy the attractive Southern Counties Building. In the large Blue Parlor, where countless receptions were held during the Exposition, the dainty ivory and blue appointments have been replaced by business-like desks. Here busy yeoman pound their typewriters and assist with the business of the big camp. The Cristobal Café is used for the mess hall; the Government Fisheries Building has been utilized as a bathhouse, showers and baths replacing fish tanks. The police headquarters is now a hospital, while an isolation hospital is in the Pepper Grove, where the men may sleep out of doors. A number of cases of measles and mumps have made this necessary. The Foreign Arts and Varied Industries buildings and the upper floor of the Government Building on the Plaza are used for barracks. In the Pan-Pacific Building is the navy Y. M. C. A. Later, the lower floor of the Government Building will be occupied by the same, and, as soon as the Canadian exhibit is removed, that building will be used for barracks. Although not under the supervision of the government, the branch of the San Diego Public Library, which has been installed in the Indian Arts Building for the use of sailors and soldiers, is considered an important feature of the camp. Here the lads gather and read or take out books. Although most of the circulation is fiction of the Jack London style, many of the boys want reference books in some particular line of study, and many are commencing their French.

BUSY DAYS

While all the soldiers stationed in the park are compelled to study French now, this is not included in the course for the seamen. Their routine includes a busy day from 5:30 a.m., when reveille is sounded, until taps at 9:05. At 6 a.m. is assembly to scrub clothes; 7:35 breakfast; drills for the various companies from 8 until 11:55; at noon assembly for dinner; drills from 1 until 4:10 p.m.; at 6 assembly for supper; at 9 tattoo; 9:05 taps.

The boys who make up the camp far for the most part fine, manly fellows who have come from good homes, and kindly, almost fatherly interest in them is displayed by the officers. Many of the petty officers are retired navy men, who have been recalled, and these all take more than a passing interest in the young sailors, many of whom must have had to figure a little to reach the age limit of 17 required by law.

July 15, 1917, Los Angeles Times, 11:2. Two EMS annoy the recruits; measles and mumps break out in Naval Camp at San Diego

San Diego, July 14. --- An order was issued today by the City Health Officer, Dr. A. E. Banks, that the public be not permitted to travel those streets within the limits of the naval training station at the exposition grounds with the exception of El Prado, the main street, on account of sickness among the men. There have been a number of cases of mumps and measles among the recruits.

Visitors may enter the Laurel street gate and go to the organ, and street car passengers may enter the east gate and pass down the Prado to the organ. The east gate is closed to autos and to pedestrians. An order also prohibit soldiers of the Twenty-first Infantry from associating with sailors on the Plaza.

July 15, 1917, San Diego Union, 3:1-2. Noted diva will sing for charity; confident of New Bayreuth in San Diego; will never rest until this city is established as a music center; program of concert to be given tomorrow in park published.

July 15, 1917, San Diego Union, 5:2-5. San Diegans clasp hands with French in celebrating fall of Bastille.

July 17, 1917, San Diego Union, 1:7. More than 10,000 cheered Schumann-Heink in program for charity at Organ Pavilion last night.

July 18, 1917, San Diego Union, 12:2. Schumann-Heink's voice heard from organ stage; great singer's wonderful tones audible at distance of several miles.

July 18, 1917, San Diego Union, 12:3. Park concessions for two refreshment and tobacco stands granted by Board to I. L. Eno cause of protest; two members create a "new department" to receive \$125 monthly for privilege.

During the meeting at which the concession was granted Commissioner Cosgrove is said to have called for competitive bids and to have demanded that a fair opportunity to bid be given to all.

July 18, 1917, San Diego Union, 12:5-6. Army and Navy Activities: Y. M. C. A. activities in Balboa Park.

July 19, 1917, Los Angeles Times, II, 6:3-4. Sailors' Camp Quarantined; San Diego to Prevent Spread of Spinal Meningitis; Medical Experts from North Called to the Scene; Disease is Said to Have been Contracted in Chicago.

As a preventative measure against spinal meningitis in the navy, the task of taking throat and nose cultures of everyone of the 1700 apprentice seamen now stationed at the Naval Training Camp in Balboa Park, San Diego, has been begun by the city's health department.

In the past month a number of cases have developed among the men sent from Goat Island, and one death resulted. In all, Dr. A. E. Banks, health officer, reports there have been sixteen cases at the training camp and three from the cruiser *San Diego*. As preventative measures were taken at once by Capt. W. D. Brotherton, commandant, and Health Officer Banks, the situation is said to be well in hand.

A quarantine of the training camp and the sailors went into effect last Saturday, and, as a further precautionary measure, no more recruits will be transported there or to or from any of the training camps until the disease shall have been controlled, which probably will be very soon.

Owing to the immense amount of laboratory work involved in examining all the recruits, D. E. Kelly of Berkeley of the State Board of Health has been detailed to assist in the investigation. At the invitation of Dr. Banks and Dr. Kelly, Prof. H. K. Meyer, associate professor of tropical medicine at the Hooper Foundation for Medical Research, San Francisco, will reach San Diego tomorrow to consult with Dr. H. A. Thompson, city bacteriologist, relative to the research work being carried on among the Naval Training camp men now in quarantine.

One hundred men were subjected to the throat and nose examination Wednesday, and the department expects to take cultures each succeeding day of from 100 to 200 seamen until the entire brigade shall have been examined and all carriers detected and segregated from their fellows.

According to Dr. Banks other training stations have been quite slow in taking on this research work and, as a consequence, a serious situation developed before active preventative measures were established. There was an outbreak of meningitis in the naval training camp in Chicago and several exposed were sent to Mare Island, later to Goat Island, and then to the San Diego camps.

The quarantine applies merely to the naval training camp. For this reason, soldiers of the Twenty-first Infantry, stationed northwest of the Isthmus, are not permitted to mingle with the sailors. Visitors are permitted to enter Laurel-street gate as usual and have the freedom of the park not occupied by the training camp. The north, east and south gates are closed except to passengers on street cars who may enter the east gate and pass through the Prado to the organ or other parts of the park.

Dr. Banks states there is no danger in visiting other parts of the park as contact, not proximity, causes spread of the disease. At the concert Monday night at the organ, at which Madame Schumann-Heink say, there was a crowd of 10,000 people. The authorities permitted this, as it is agreed there was no danger.

There have been the usual number of cases of mumps and measles among the recruits and, for this purpose, two isolation hospitals have been established on the park grounds.

July 19, 1917, San Diego Daily Transcript, 4:1. Concert at organ in Balboa Park given by Mme. Schumann-Heink, Monday evening, netted \$2,000 to the Associated Charities of this city.

July 21, 1917, San Diego Union, 7:6. F. F. Grant of Park Commission tells his side of Eno concession controversy.

"The park took charge of these stands in April. During that month the profits were about \$40, during May \$56 and in June \$1,000. Business continued to be good up to the time when Eno took charge on July 13. Just before this, however, the public was excluded from various sections of the park on account of disease among the soldiers and sailors. Our report shows also that the army and navy maintain five canteens of soldiers' stores, which have nothing to do with the Park Board, and are independent refreshment stands.

"It may be seen from this that the stands will not get the same patronage as heretofore. We believed as a Board that it was time for us to dispose of our mercantile business and let someone else take charge of it who will be willing to assume the financial responsibility and the chances of heavy losses."

July 24 1917, Correspondence, Board of Park Commissioners; File: San Diego Museum, 1916-1930; San Diego Public Library.

Exposition stock certificates transferred to San Diego Museum as turned over to Dr. Edgar L. Hewett (with handwritten revisions) \$416,855.

July 25, 1917, San Diego Union, II, 7:1-3. The term "San Diego's Own" applied to Fourth Regiment, U. S. Marine Corps, stationed at marine barracks, Balboa Park.

"San Diego's Own," the term affectionately applied to the Fourth regiment, U. S. M. C., while it was stationed at marine barracks, San Diego, still clings to the organization in far-away Santo Domingo.

July 25, 1917, San Diego Union, II, 7:4. Local recruiting station has best day in weeks, 6 men being registered by the U. S. Army; since declaration of war more than 1300 apply for admission to Navy.

July 26, 1917, San Diego Union, 1:2, 5:4. Concession returned to Park Board; criticism of contract made for refreshment privilege causes lessee to ask for release from agreement.

It was reported yesterday that there would be a change in the management of the Japanese tea garden in Exposition park --- that the concession would be taken from the Japanese and given to another applicant. Commissioner Grant said yesterday the he knew nothing of such a move. He said that a report

that the concession would be granted to W. Thompson, a former secret service man for Mayor Capps, was unfounded.

The tea garden is now being run without any payment for the concession. The permit was granted by the old Board, the Japanese having spent about \$600 in fixing up the place. Grant said yesterday that he understood the resort was making big profits. Commissioner Ryan said that he understood that the business was not even on a paying basis. Commissioner Cosgrove was out of the city.

July 26, 1917, San Diego Union, 1:3-6. Uncle Sam's fighters headed for San Diego, contract signed; 1,000 men will start work Monday on Linda Vista cantonment site.

July 26, 1917, San Diego Union, 1:7, 5:3. District Attorney T. B. Cosgrove, refuses to give name of those in Comus Club when place was raided to City Council; Mayor Wilde defends action.

July 26, 1917, San Diego Union, 5:3. Army work holds up marine post reclamation project; Dutch Flats must yield right of way to cantonment construction.

July 27, 1917, San Diego Daily Transcript, 4:1. William Daniel Brotherton, commander of the naval training camp at Balboa Park, yesterday received his commission as captain.

July 27, 1917, San Diego Union, 12:4-5. T. N. Faulconer, executive secretary of Park Board, explains Balboa Park concession in letter; calls attention to probable effect of competition from Post Exchange on income of concessionaires in Plaza de Panama; says records open to public.

July 28, 1917, Notice, California State Board of Health, Bureau of Administration, Sacramento.

NOTICE TO ABATE NUISANCE

CALIFORNIA STATE BOARD OF HEALTH

Board of Park Commissioners
San Diego, California

You are hereby notified that a nuisance exists on property owned or controlled by you at Balboa Park, San Diego, Cal. Caused by stagnant water in lily pond under Laurel Street bridge and in adjacent ditches, creating breeding places of mosquitoes.

You are hereby ordered to abate said nuisance on or before Tuesday, July 31, 1917, on penalty of arrest and prosecution as provided in the Penal Code of the State of California.

San Diego, California
July 28, 1917

CALIFORNIA STATE BOARD OF HEALTH
(Signed) Edward T. Ross, Chief Sanitary Inspector.

Note: In order to abate this nuisance it will be necessary to drain the lily pond and to clean and straighten the sites of the various ditches in order that the water in the same will flow freely. Oil may be used on ponds where draining or filling in is impracticable.

July 28, 1917, San Diego Union, 5:2-5. Enlisted men's club rooms opened in the old Marston building at 5th and C streets; spacious quarters delight soldiers.

July 28, 1917, San Diego Union, Classified, 1:6-7. Nine-hole golf course near Golden Hills playground to be prepared.

July 30, 1917, San Diego Union, 12:2-4. Madame Montessori makes plea for war children at the Civic Women's Headquarters in Balboa Park; to speak again this evening.

July 31, 1917, Letter, A. E. Banks, Department of Public Health, San Diego, Calif. to Mr. Tom Faulconer, Secy., Park Board, Administration Building, Balboa Park, City.

Dear Sir: Numerous complaints have been filed with this department relative to mosquito conditions in Balboa Park, which are causing no little annoyance to the troops stationed there.

Kindly see that immediate steps are taken for the oiling of all ponds of water located within the limits of Balboa Park. I have instructed Inspector Coop to call on you for the purpose of cooperating with you in this matter.

Respectfully,

(Signed A. E. Banks, Health Officer.

July 31, 1917, San Diego Union, 8:2-5. Dentists establish clinic for soldiers in the Harvester Building, Exposition grounds; examine 400; fix teeth of 60 service men since the dentists have started their work.

July, 1917. SUPERINTENDENT'S REPORT OF WORK IN THE PARK DEPARTMENT FOR JULY 1917.

The general work in the Park system for the month of July has been maintenance. A large amount of seasonable planting has been done. The various roads in the Park have been repaired and smoothed up in the worst places, but with the limited amount of equipment and men they cannot be maintained in very perfect condition, especially owing to the large amount of heavy trucking for the Army and Navy camps maintained in the Park, and also for the reason that a large amount of the heavy hauling by trucks is going through the Park for Camp Kearny and the Wireless Station in Chollas Heights.

The last few evenings of July the water hydrants on the West side, especially on the slopes and in Cabrillo Canyon, have been robbed of their fittings, no doubt to get the brass for junk. Thirty seven one-inch and two two-inch hydrants have been damaged and several hydrants stolen and the water left running all night. As we have no police to patrol the Park this is liable to occur almost anytime. I have instructed Mr. Davis to work extra time and catch persons who steal them but as yet there has been no results.

The construction for the Navy department has seriously depleted our funds. However, the City Auditor has agreed to take care of expenditures until it will be absolutely necessary to stop the work. In the meantime we may receive a payment from the Government for the money expended, which amounts at the present time to about \$20,000.

The following amount of plants were planted out in the Exposition grounds and Park proper during the month of July:

EXPOSITION GROUNDS

1740 Asters
1360 Ageratums
371 Browallia Major
517 Chrysanthemums
285 Coleus
200 Cuphea Manicata
502 Execum Affinis
90 Kochia
300 Verbenas
1300 Petunias
100 Poinsettias
50 Salvias
350 Zinnias

BOTANICAL BUILDING

57 Begonia Gloire de Chatelaine
8 Begonia Retenofolia
117 Begonia Tuberous
4 Cactus Triangularis
135 Coleus
120 Celosia Pumosa
3 Clivias
584 Execum Affinis
31 Gloxinia Hybrida
9 Hydrangea Hortensis
122 Lilies, Aurum and Specosum Rubrum

Making a grant total of 8,395 plants.

500 pounds of Commercial fertilizers and 300 pounds of aerated lime were used on the grounds. A great deal of pruning as done and the acacia trees along the Laurel Street entrance are being summer pruned.

BALBOA PARK OUTSIDE EXPOSITION GROUNDS

2 Acacia Verticilata
12 Acacia Longifolia
1035 Begonia Gloire de Chatelaine
8725 Chrysanthemums, assorted varieties
493 Dahlias
1296 Execum Affinis
30 Lantanas
120 Marguerites
100 Pelargoniums
310 Petunias
425 Verbenas, Crimson King
100 Veronica Elipitica
5800 Zinnias

STADIUM

Very few games were played during July and the men in charge were kept busy caring for the adjacent planting in connection with their other duties.

NAVY DEPARTMENT

Included is a list of the orders received from the Navy Department. Part of the work is completed. Other construction is progressing. New orders are coming in every day. A full report of the work will be submitted on completion. (Not included.)

August, 1917, California Garden, Vol. 9, No. 2, 5. Monthly Excursion In and Around Balboa Park, by G. R. Gorton.

This has been a busy month at the Park --- both politically and horticulturally. At Sixth and Juniper, the Dahlia planting (which shows much promise of bloom later on) is reinforced on the rear with Hollyhocks, in many shades of red, varying from light pink to almost black. In fact, all through the planting on the

Juniper Street side, these old-fashioned garden favorites have been liberally and effectively used. The parking on the Juniper Street side is graced with a row of *Eucalyptus ficifolia*, so-called "scarlet flowering"; albeit that the colors of its flowers vary from that to almost white, however, many of the specimens in this portion of the Park, as well as those on the edge of Cabrillo Canyon opposite Spruce Street, possess the rich scarlet inflorescence which marks the species as desirable. Also, in this same row are one or two specimens which represent one of the many variations from the type. They are bushier in habit, with smaller leaves, and flowers of an attractive shade of pink.

It is doubtful if many visitors to our Park are aware of the fact that the planting at this point contains a group of the famous *Sequoia gigantea*. They are not "big trees" yet, but that is one of the things that time will mend, and from the present thrifty appearance of them, but a minimum of time will be required. Besides this planting of Sequoias, there is another and a larger one somewhat north of the Rose Garden, covering some twenty acres and extending down to the road at the bottom of Cabrillo Canyon. The last mentioned at *Sequoia sempervirens*.

Adjoining the bird cages on the east, the beds of *viola maxima* have been replaced with *Begonia Gloria de Chatelaine*, which contrast pleasingly with the natural gray of the *Santolina* border. Across the walk and a little to the north is a grouping of pomegranates in flower. There are red, yellow and white, in both single and double varieties. It seems to the writer that this subject should fill a larger place in shrubbery plantings, if for no other reason than its attractive fresh green foliage.

The section north of the Rose Garden is, in many ways, one of the most attractive portions of our Park. One particularly striking effect has been attained in a large triangular bed with San Diego and firebird cannas, two of the most beautiful varieties which have been introduced in years. Across the path, directly west, is a "jungle" of palms, bananas, etc., which lacks only boa constrictors and other "creepy and crawly" things, the loss of which is not mourned. A border of *Agapanthus umbellatus*, the magnificent "blue lily of the Nile," in full bloom is all that could be desired of it. A further note of color is found in Mrs. Conard Cannas, interspersed with the palms, etc. of the aforementioned snakeless jungle.

Bordering the path which skirts the edge of the canyon nearby are *Scabiosa* in profusion, Shasta daisies and many other blooming plants, while recently ten thousand Zinnias have been planted, which will, in due season, brighten the landscape with their multi-colored blooms.

The rose garden appears to be wonderfully indifferent to the season of the year, and still produces a very satisfying crop of bloom, especially in certain varieties.

Along the west side of the West Boulevard in the northwest section (nautically speaking, that is) are borderings of Lilliput zinnias whose golden yellow flowers suggest those of *Tagetes* in color, form and size.

Still west of West Boulevard and about opposite Thorn Street, a *Santolina*-bordered triangular bed has been planted with *Exacum affine*, blue African "violet," dainty and diminutive, fragrant and fascinating. In another triangle on the same side of the Boulevard, but opposite Grape Street, pansies have given place to *Coleus*, bordered with *Achyranthes brilliantissima* and edged with *Mesembryanthemum floribundum*. On the east side of the drive, not far distant, in a large triangle, Larkspur has been supplanted by Dahlias edged with Zinnias, and so the never-ending process of planting and replanting, placing and replacing, to please the public eye goes on, and it is doubtful, indeed, whether the majority of those who visit Balboa Park and admire the result have much of a realization of what it means to keep the Park always dressed up for company, regardless of seasonal or political changes, regular or irregular, to satisfy the demands of the lawns and plants which are ever thirsty for water, and those of the public, which is ever thirsty for variety. Verily, it is not a path of roses which the gardener treads --- figuratively --- though literally he may.

August 1, 1917, Letter, A. E. Banks, Health Officer, Department of Health, San Diego, California, to Mr. John Morley, Department of Parks, City of San Diego, Cal.

Dear Sir: We have repeatedly called attention to the fact that mosquitoes are permitted to breed in the city Park and have in the past made certain recommendations in accordance with ordinances

Nos. 4014 and 6096. A survey completed this morning shows that the canyon that runs under the bridge in the park as a long series of pools draining into the lake.

Immediate steps must be taken for the treatment of these pools and all other bodies of water wherein mosquitoes breed. The only adequate way to handle this is to apply oil, preferably a mixture of distillate and crude oil to the surface of each individual pool at periods of not to exceed four days. This will have to be applied by means of a hand spray.

I have instructed Inspector Coop to confer with you immediately relative to this matter and hope it will receive your early attention. Failure to comply with this order within 24 hours will be taken as an indication that prosecution should be started. Kindly see our communication of July 19, 1917.

Respectfully yours,

(Signed) A. E. Banks, Health Officer.

August 1, 1917, Letter, Wheeler J. Bailey, chairman of Finance Committee, San Diego Museum (George W. Marston Papers, Collection 219, Box 2, SDHS; also Board of Park Commissioners, Box 1).

At a meeting of representatives of the executive committees of the Panama-California Exposition and the San Diego Museum Association, it was proposed that the balance (about \$6,500) remaining from the Exposition be used for the maintenance of the buildings and collections of the Museum, since it is a permanent institution continuing the science and art work of the Exposition. The amount, if distributed to the great number of stockholders, would be only about 65 cents on each \$100.00 of stock. If used for the upkeep of the Museum, it would tide it over an initial period during which it has little financial support.

It was desired to refer the proposition to the individual stockholder, and we are pleased to report that the plan has met with virtually unanimous approval of the individual stockholders. At the present time over 50 percent of the stock extant has been assigned for the purpose proposed. I enclose herewith a blank which has been prepared and which is self-explanatory. If you are willing to contribute your interest in the remaining fund, will you kindly sign the blank and sent it to me in the enclosed addressed envelope, or better still, if you can find your stock certificate, sign the transfer blank on the back of it and mail.

Very sincerely yours,

(Signed) Wheeler J. Bailey, Chairman Finance Committee, San Diego Museum Association.

August 1, 1917, San Diego Union, 6:2. Buildings and grounds at park attract artists.

August 3, 1917, San Diego Union, 14:2. Mrs. Sirell C. Perrine, dramatic soprano, to sing next Sunday afternoon at Organ Pavilion.

August 4, 1917, San Diego Union, 12:1. Throng sees Chaplain of Army marry; Herschel Raymond Griffin takes Miss Olive Buckley Whalian of Los Angeles as bride before more than 4,000 persons at the Organ Pavilion in Balboa Park; marriage service read by Dr. James Allen Frances, pastor of the First Baptist Church of Los Angeles; Col. J. P. O'Neil, commanding officer of the 21st regiment of the U. S. Infantry, gave the bride away.

August 4, 1917, San Diego Union, 12:5. Officers of 21st Infantry gave fortnightly hop at U. S. Grant Hotel last night.

August 5, 1917, San Diego Union, 15:4. Free concert in Park to be given today under the direction of B. Roscoe Schryock.

August 6, 1917, Letter from unknown and name indecipherable to Captain W. D. Brotherton, Commanding Naval Training School, Balboa Park, San Diego, Cal.

Dear Sir: I desire to personally question the sailor from the Naval Training Station who was detected a few nights ago in an attempt to burglarize the concession stand of the Plaza.

On the night previous to this man's detection, parties unknown stole a number of small items through a hole cut in the tent roof of the stand, and it was exactly over this hole that this sailor was discovered by your sentry.

Some time ago the same stand was burglarized, cash registers broken open and nearly \$100 in change and merchandise stolen. While there is no wish on our part to fasten this offense upon anyone under your command, it is not impossible that the burglary was committed by a sailor, and, as this man evidently is not above such act, it is not impossible that he could throw some light upon the first occurrence.

While we have no wish to prosecute in this instance, we feel justified in taking steps toward recovery of what has been stolen from us and trust that you will cooperate with us to the extent of sending this man to our office to be questioned.

Very truly yours.

August 6, 1917, San Diego Union, 5:4. Has B. Roscoe Schryock, leader of San Diego Symphony Orchestra, the right to call concerts given by the organization "municipal concerts?" Officers and members San Diego Music Teachers' Association protest to Park Board.

August 6, 1917, San Diego Union, 8:1. Hugh Allen, baritone, to sing at Balboa Park.

Introducing Mr. Clisbee of the Vitagraph Company of New York, to whom permission has been given to film exteriors of buildings in the Indian Village.

The adjutant of the Twenty-First Infantry was advised Sept. 11 that Mr. Clisbee desired to work in the Indian Village on Sept. 12 and stated that he would make the necessary arrangements.

August 11, 1917 (?), Correspondence, Board of Park Commissioners; San Diego Museum File, 1916-1930; San Diego Public Library.

Stocks transferred to San Diego Museum Association since August 1, 1917

\$253,340

August 11, 1917, San Diego Herald, 4:3-6. Tomato "scandal" in park.

August 11, 1917, San Diego Union, 4:3-5. Tomato "scandal" in park is exploded; Mayor Louis J. Wilde says he will have complete investigation made, **San Diego Sun** alleged tomato plants were being grown in park for Standard Canning Company at the expense of the city; M. E. Salsberry raised 200,000 tomato plants for Park Commissioner F. F. Grant on 360 square feet of ground; understood Standard Canning Company was responsible for supplying seed and paying his salary of thirty-seven and one-half cents an hour; F. F. Grant was attorney for company.

It was declared that the tomato plants have been paid for by the canning company and that the labor of raising them is being paid for by the company. The only thing contributed by the city is a small plot of ground for which there was thought to be no other use this year. The plants are being given to anyone who will call for them, it was explained. The company is asking that those who get the plants sell the fruit they bear back to the company.

August 11, 1917, San Diego Union, 4:3-6. Letter, L. J. Wilde regarding tomato "scandal" and other statements made in **San Diego Sun**:

Replying to your open letter . . . when the hasty action of the park board thought proper to dispose of Superintendent Morley for reasons never published, it was on my urgent request that he was retained. When the contract was let to Emo to sell merchandise in the park, I publicly declared against such unbusinesslike methods. It was cut out at once.

In the case of Superintendent Morley, Judge Ryan and Mr. Grant were right, and in the case of Emo they were wrong. And in the tomato canning case you are wrong.

F. F. Grant was the only member of the park board I appointed. I had never met him before the recent election. He had been a champion of the Progressive movement of which **The Sun** was the spokesman. Mr. Marston, Senator Luce, Judge Sloane and Editor Scripps and Porterfield were all thick and fast friends. I could see no reason why Mr. Grant's appointment would not be a popular one. Mr. Marston resigned of his own accord. And about the only applicant for this thankless unpaid job was Mr. Grant and he was appointed.

August 11, 1917, San Diego Union, 12:1-2. Soldiers, sailors to be guests of Hugh Allan at concert Monday, seats on sale.

August 12, 1917, San Diego Union, 5:2-5. Floral Association prepares to give Dahlia Show for benefit of Museum; Park Board cooperating with movement; date set next Saturday, August 18; admission is 10 cents.

August 12, 1917, San Diego Union, 6:1. Mayor suggests that Park Board employ expert; efficiency badly needed in department he says in letter to Commission; cites report by accountant F. D. Hall.

"The report I have shows that this condition of affairs has existed for some years and that I as chief executive of this city feel and urge upon you to make arrangements to build up your department on a par at least equal to that which any business corporation demands."

Date Unknown, possibly July or August, 1917, San Diego Public Library.

To: THE HONORABLE COMMON COUNCIL OF THE CITY OF SAN DIEGO, CALIFORNIA

GENTLEMEN:

In reply to your request that the Park Board make a reduction of ten percent in the annual allowance and furnish you with a revision of the present budget, showing this reduction, we wish to advise that same has been considered by the Board of Park Commissioners in regular meeting assembled.

As this department was not represented at the conference mentioned in the letter of the City Clerk, and has no knowledge of the causes responsible for this request, the Board of Park Commissioners expressed a desire to learn something more of the conditions responsible for the proposed budget reduction before taking definite steps in the matter.

This request, or order as it is designated in the letter of your city clerk to this board, was not received in this office until 4 o'clock on the afternoon of July 27, and sufficient time for the conferences and deliberation necessary to the revision of the Budget has not been allowed.

The Board of Park Commissioners desire that, if it be necessary to effect a saving to the city, you consider fully the following report before demanding a reduction of an already too scant budget from the one department that already has borne the brunt of expenses incident to army and navy occupation of the Exposition grounds.

The sum allowed this department for the maintenance and development of the city's enormous park for the year of 1917 would, under most propitious circumstances, have been exceedingly scant. \$91,200 was allowed for the total expenditure during 1917. The sum is less by \$3,000 than was allowed for 1916, in the face of the fact that at least 20 acres more on intensive cultivation has been started, 15,000 more trees and shrubs planted and the upkeep of all Exposition buildings and several acres of Exposition grounds added to the expenses of Park development.

During 1916, the Park Department received from the Exposition Company \$3,000 per month rental. Although the Exposition continued for three months of the current year, not one cent was received by the Park Department to make up for this additional expense.

During the year 1916, the Park Department received approximately \$10,000 from earnings incident to the Exposition; in short the income of the Park Department for 1917 will fall short of the income of the preceding year by not least than \$50,000 or more than one third. With an additional reduction of 10 percent, the allowance entire income for 1917 would be but little more than half that of the preceding year. In view of the additional expenses resultant upon the continuation for an entire quarter year of the Post-Exposition, the expense of preparation for occupation of the Park by nearly 5,000 men of the Army and Navy and of the increased area under cultivation, in order that the citizens of San Diego might have some place to go in lieu of the grounds so occupied, it will not be possible for this department to suffer this cut in its already insufficient income without permitting the park system to deteriorate to such an extent that many years and many times the amount of the reduction asked will not be sufficient to repair the damage done.

The Park Department now bears the burden of upkeep, maintenance and repairs of the Exposition buildings, an expense that constantly increases, as these huge temporary structures were not built to withstand the elements for a longer period than two years, and are now deteriorating at a rapid rate. The Model Farm, Harvester Grounds, Lipton Tea Company tract, and the grounds about the Southern Counties and Standard Oil Buildings have also fallen to the care of this department.

One hundred and forty-seven men were required to keep in condition the grounds alone during 1916. The entire payroll at this time, including office force, carpenters, plumbers, electricians and watchmen, bears just eighty-seven names. A few more than half as many men as were employed during 1916 now are asked to care for 20 acres more of cultivated grounds, all of the Exposition buildings, and to do much other work that last year was done by Exposition employees.

Shorthanded in every department and facing the certain knowledge that even with the full amount of \$91,200 allowed in the original budget, the park system of San Diego could not be kept

up to its former high standard, this Board already is unable to keep within its distribution of the sum allowed. Man have been dropped from every department. Every remaining man is doing the work of two men and only those whose love for the park and for their work has made them willing to suffer longer hours and harder work are still on the payroll, and yet, with a minimum payroll of approximately \$7,300 per month, our salary allowance is insufficient for even the months of August, September and October.

In addition to the irreparable damage that will be done the park system by the still greater reduction in the park employees, a dozen or more efficient man will be left without employment and their families in need.

It is the understanding of the Board of Park Commissioners that this saving to the city is necessitated by the preparation for Army and Navy occupation, and, in this regard, we would call your attention to the fact that not only has much of our allowance been expended in Park work necessitated by the Army and Navy occupation of the Park, but \$10,000 of the Park funds has been expended for labor and material used in Army and Navy construction work. This last sum will, of course, be returned to this department, but the Park Department is handicapped by having so large a amount tied up, even for a brief period.

In submitting the foregoing statement of this department's financial condition, the Board of Park Commissioners is prompted by the desire to have your Honorable Body fully informed of the difficulties under which this department now labors, and we believe that, knowing these conditions, you will do all that is in your power to relieve use of the additional burden asked as a result of your conference of department heads.

August 13, 1917, San Diego Union, 8:2-3. Hugh Allan, baritone, to be heard in recital at Balboa Park tonight; Henderson Van Surdam, tenor appearing at Hotel del Coronado, helped to bring his friend Hugh Allan back to San Diego; the Park Board announced that ample parking space will be provided for those attending the concert in the Plaza de Panama.

August 13, 1917, San Diego Union, 12:2. Cabrillo Rifles drill and march on ocean shore; two companies of Home Guard visited Imperial Beach for war-time training yesterday; Col. J. P. O'Neil of the Twenty-first Infantry reviewed them and put them through the manual of arms.

August 13, 1917, San Diego Union, 12:4. Zoo Association tells of work; asks for help; animal exhibition in park attractive, but more funds are needed now.

San Diego has in the great Balboa Park a zoo of which any city in the country could feel proud. This menagerie is one of the chief attractions of the city park system and will not only be maintained permanently, but will be enlarged and conducted along much broader lines if enterprising citizens of San Diego will respond to the call made yesterday by the Zoological Society of this city, which has the work in charge.

Five hundred new members are needed at once. The following letter, urging all to help in the work, has been received by **The Union**:

"In the latter part of 1916 the Zoological Society of San Diego was incorporated under the state laws of California, the society being started by a handful of people of San Diego for the purpose of placing in Balboa Park a zoological garden which would be of scientific and educational benefit to the citizens of San Diego, as well as a means of entertainment for the numerous tourists who visit here each year. Several months were devoted to preparing and investigating ways and means to make this organization a success.

In the early part of this year the society began to get a nucleus of members, and inside of three weeks many of the school children and a number of prominent firms and citizens of the city contributed enough money to buy a number of the finest specimens of large animals that had been exhibited in the exposition and to feed them until the present time.

Soon after the organization of the society, the United States declared war on Germany and the Zoological Society postponed further activity to acquire members or obtain donations so as not to interfere with the sale of Liberty Bonds or with the Red Cross campaign which followed the declaration. In the meantime a committee met the park board for the purpose of obtaining an allotment of ground for the future zoological gardens and the Standard Oil Company donated its building in the Exposition grounds in which it had had its exhibit during the Exposition, as headquarters for the society. As the building and the grounds around it has been donated for this purpose and are now being used by the soldiers and sailors, it will be necessary to keep the animals in their present cages until such time as the government will not need the premises.

In the collection which was purchased were a number of animals that were duplicates and the society has since traded them off for animals which it did not have. Then, too, a number of people have donated animals of various kinds, so that now the collection is a very interesting one. During the past month descriptions of the animals have been placed in front of each cage, giving its Latin name, common name, the food it eats, its range, and any peculiarity that certain animals happen to have. Unfortunately, during the past month the public has not been able to go through the park to the zoo owing to the quarantine, and has not been able to see a number of the specimens that have been newly obtained, one especially interesting being the polar bear, which was donated by David Horsley of the Bostock Company of Los Angeles.

The citizens of the city have not only donated money to buy these animals, but food has also been given by some merchants and worn-out and crippled horses by others, this all enabling the society to keep down the expenses of feeding its zoo to a very small sum. Owing to the fact that San Diego has one of the most wonderful climates in the United States, a zoological garden can be maintained at a very small expense for several reasons, the main one being that animals do not have to be kept in buildings artificially lighted and heated; furthermore green things can be procured in winter as well as summer for animals living on a vegetarian diet.

The present group of animals costs for food, keeper and helper in the neighborhood of \$100 a month. This will surprise a great many people, as many believe that a zoo is the most expensive organization that can be maintained by any city. The buying of animals is the most expensive part of keeping a zoological garden. However, owing to the fact that climatic conditions are so good here, a great many of the large animals breed very well, and by using the offspring of the species owned, for trading purposes, San Diego will be able to boast, within a few years, of the best collection of animals on the Pacific coast, and be able to keep them at less expense than any other place in the United States. To make this possible it is necessary to have more members in the Zoological Society, not only for pecuniary reasons, which are absolutely necessary, but also to have more people directly connected with the Society to make it more of a public enterprise.

The society needs about 500 more members to continue its work and give better housing to some of the animals, which is now necessary. We are going to ask those people interested in our Society to send their names to Paul Wegeforth, secretary, 222 Granger building. Otto Jeancon is doing the field work for getting new memberships.

The zoos in most of the cities are maintained by the cities themselves, but the most successful zoological gardens all over the world are kept up by zoological societies, the city appropriating a certain sum each year to help keep them. The history of most of the societies shows that at first there is a hard struggle getting started, but it is not long before the people recognize the good they are doing and come to their assistance. After the societies are a number of years old, they usually support themselves through gifts and legacies.

Following is a list of the membership classes and fees in the society:

Junior memberships, 50 cents; active memberships \$5; life memberships \$200; patrons \$1,000; founders \$2,000; benefactors \$10,000.

August 13, 1917, San Diego Union, 12:1. Cabrillo Rifles.

August 14, 1917, San Diego Union, 2:1. Crowd at Organ Pavilion charmed by voice of Hugh Allan, by Main 3K.

Perhaps it was imagination on the part of the hearer, but there were times when it seemed Mr. Allan found it necessary to force his voice a bit.

August 14, 1917, San Diego Union, 2:3. Two cafes --- the Trocadero and Creole Palace --- closed by Police on Mayor Wilde's peremptory order; demand of War Department and approval of Colonel O'Neil given as reason.

August 14, 1917, San Diego Union, 5:1-6. Group photograph of the 71st Company of Marines, under command of Lieut. Charles Grimm, now quartered in San Joaquin Building in Balboa Park.

August 17, 1917, San Diego Union, 6:2-3. Dahlia show to open tomorrow; open-air ball on Plaza de Panama tomorrow evening in honor of officers and men of Naval Training Station; General F. P. O'Neil has offered use of 21st Infantry Band; Park Board to add lighting effects; Floral Association to furnish 300 pounds of cornmeal which will make north end of Plaza as smooth and desirable to dance upon as a polished ballroom floor; Training Station quarantine raised.

August 17, 1917, San Diego Union, 9:4-5. Dr. Montessori's lecture on "The Use of Grammar" in the Fine Arts Building proves "beautiful ode to life."

August 18 and 19, 1917. Dahlia show given by the San Diego Floral Association in the Indian Arts Building, Balboa Park (described in **California Garden**, September, 1917, Vol. 9, No. 3, 5-6).

August 18, 1917, San Diego Union, 5:1. Brigadier General J.F. P. O'Neil transferred to Fort San Houston, San Antonio, Texas.

August 18, 1917, San Diego Union, 5:1. Plan to bring Liberty Players here as a permanent institution.

August 18, 1917, San Diego Union, 5:2-5. Naval Training Station sailors to face 21st Infantry soldiers in Swimming Meet at Rowing Club tomorrow morning.

August 18, 1917, San Diego Union, 5:6. More clubs for Army, Navy boys planned in city; success of first enlisted men's clubs will lead to formation of others.

August 18, 1917, San Diego Union, 12:1. Dahlia show will open today; sailors at Naval Training Station enthusiastic over open-air dance tonight; event was arranged by General J. P. O'Neil.

August 18, 1917, San Diego Union, 12:3. Julia Heinrich, Metropolitan Grand Opera Company star, will be heard in recital the first week in September.

August 19, 1917, San Diego Union, 5:3-4. Dahlia show in the east end of the Indian Arts Building delights visitors; novel method of display shows beautiful flowers to best advantage.

August 20, 1917, San Diego Union, 5:2-6. Men at Naval Training Station in Balboa Park have one of the most beautiful dining rooms on earth; their tables are on the broad street leading from Cristobal café (group photograph)

August 20, 1917, San Diego Union, 8:2-3. Liberty Players to present best in modern drama; project of the municipal "Little Theater" is in response to an appeal from soldiers and sailors who requested half rate admissions from the road shows that come to San Diego from time to time.

August 20, 1917, San Diego Union, 8:4. Dahlia show comes to close; attendance on second day larger than opening; visitors pleased with show.

August 22, 1917, San Diego Union, 6:1. Hospitality rose garden to be saved; Women's Civic Center to spearhead campaign; Mrs. Jesse C. Knox planted garden; Mayor Wilde pledges support.

August 25, 1917, San Diego Herald, 5:2. Cabbage plants raised in park to be given away.

August 25, 1917, San Diego Union, 5:2. Standard Canning Company to distribute five million plants to gardeners of city. The Park Board will be asked by the Standard Canning Company to permit the use of a plot of the park ground, 50 by 100 ft., on which to grow approximately five million cabbage plants for free distribution, in the same plan by which two hundred thousand tomato plants recently were grown. The only condition being that the cabbages grown on any large piece of land from the free plants be sold to the company at prevailing canner's prices.

August 25, 1917, San Diego Union, 9:2. Free concert at Organ Pavilion tomorrow afternoon under the direction of Miss Edna Anderson of Coronado.

August 25, 1917, San Diego Union, Classified, 9:4. Arrangements have been made to use Spreckels organ for music programs for enlisted men; W. S. Dorland, chairman of a civic music committee; all applications for use of the park or the organ for public entertainment to be turned over to the committee; all receipts from admissions will go to a musical fund in the hands of the committee; Miss Gertrude Gilbert to be chairman of an advisory committee.

August 26, 1917, San Diego Union, 2:4. Mrs. Mary Barnum Kessler, dramatic contralto, to sing at Organ Pavilion this afternoon.

August 26, 1917, San Diego Union, 4:4-5. Good music and lots of it promised enlisted men; San Diego committee on recreation for the Army and Navy enthusiastic over prospect of concerts at park and development of talent among soldiers and sailors; plan popular in other cities with Army camps.

August 26, 1917, San Diego Union, 4:6. Art Notes, by R. R. --- Jonas Lee collection of pictures at the Museum will remain during September.

August 30, 1917, San Diego Union, 12:3. Infantry's "Hops" to be continued at U. S. Grant Hotel; affairs given for Army, Navy officers and wives will be given alternate Fridays.

August 30, 1917, San Diego Union, 12:4. Seat sale for Julia Heinrich concert to open today.

August 30, 1917, San Diego Union, 12:6. John Doane is to give an organ recital at the Spreckels organ Sunday afternoon.

August 31, 1917, Letter, from _____ Captain Hartz, Adjutant, 21st Infantry, U. S. A., Camp Taliaferro, San Diego, California.

Dear Sir:

The City Health Officer, Mr. Coop, called at the office yesterday afternoon, and complained about waste water running down a canyon south of the camp, which is making a breeding place for mosquitoes, and blaming this Department for conditions.

I have investigated same and find there is waste water running down in the canyon, and some mosquito larvae in some places.

As this condition is caused by soldiers in the camp, will you please have the ditch cleaned out, and oil used to get rid of the mosquitoes.

Thanking you for your attention to same, I remain,

Yours very truly.

August 31, 1917, San Diego Union, 11:2-5. Stadium meet Monday will show how Uncle Sam develops his defenders; public urged to see service men at play; officers of high rank to attend; plan exhibition drills; snapshot of the boys at the Naval Training Station engaging in Butts manual drill, which will be a special feature at the Stadium, Monday afternoon.

August, 1917. SUPERINTENDENT'S REPORT FOR AUGUST 1917.

The general work in the Park system for the month has been practically the same as in July. There was less planting during the month and there will not be much done in the planting line until November when the midwinter flowering plants will be ready for distribution to the various locations, with a continuous supply growing at the Nursery for Spring flowers to be planted as the season advances.

Several thousand plants have been distributed from the Nursery and been planted out in the Exposition grounds and the balance of the Park. There were also sold and exchanged from the Nursery 2,308 trees, shrubs and flowering plants at a total valuation of \$402.87.

Decorations were also furnished from the Nursery and Park for the Military wedding held at the Organ Pavilion on the evening of August 3rd.

The Park Department was also instrumental in making a success of the Dahlia Show which was held in the Indian Arts Building, August 18th and 19th for the benefit of the San Diego Museum Association.

These exhibits are expensive, but I believe it is for the best interests of the City that the Department assist in every way possible to make a success of Flower shows as it tends to develop horticulture and the beautifying of the city.

The roads in the park are being resurfaced and smoothed up in the worst places, notably on the West Boulevard. During September, Sixth Street will have to be gone over as well as finishing up West Boulevard. Our limited equipment and shortage of men makes the repairs necessarily slow but we are doing the best we can under the circumstances. Pruning of the Acacia trees along the Avenues in the Exposition grounds will soon be completed after which a lot of general pruning and thinning out of the foliage will be done prior to the rainy season.

The Stadium was not used a great deal in August, there being held 11 practices and 8 regular ball games and three drills by men of the 21st Infantry. The last week in the month the grounds were closed to prepare the field and track for the Army and Navy Field Meet on Labor Day, September 3rd.

The work for the Navy Department has been nearly completed. We are unable to give the cost of the materials as all the bills have not been checked up at the Auditor's officer. There was expended for labor for the Navy during the month of August, \$4,124.65.

The following amount of plants were planted out in the Exposition grounds and park and fresh plants in bloom placed in the Botanical Building:

PARK	EXPOSITION GROUNDS	BOTANICAL BUILDING
1 Acacia Melanoxylon	400 Ageratum	1 Croton
6 Aspidistra Lurida	200 Coleus	113 Coleus
375 Chrysanthemums	50 Geraniums	14 Lilium Auratum
3 Escallonia Betteriana	100 Lantanas	150 Lilium Speciosum
1 Dracena Indivisa	25 Poinsettias	33 Petunias (Double)

20 Genista Monosperma	1000 Petunias	16 Primula Malacoides
1 Pittosporum Eugenoides		70 Salvia Splendens
567 Petunias		
725 Zinnias		

Plants to Mr. George F. Otto	\$372.96
Plants to Miss K. O. Sessions	20.39
Plants to Harris Seed Company	9.52

ROAD AND TEAMWORK FOR THE MONTH

3,000 ft. regrading 28 th and Upas Sts., south	84.00
Intersection of Oregon St. to Park Drive	18.00
Ditch cleaning, Cabrillo Canyon	57.75
Flower Show teaming	30.00
Cultivating	28.00
Exposition grounds	80.00
4,300 ft. regrading West Boulevard, 50 yds. material	241.00
Road sprinkling	<u>287.00</u>
	\$825.75

During the fall season it will be necessary to rearrange the planting in the Conservatory. A number of palms have grown to the roof and will have to be removed. This will be heavy work and a big expense for labor. The pipe system will also have to be thoroughly overhauled and it will be advisable to remodel the same, and, as recommended in a previous report nearly a year ago, it would be to the best interests of the Department if the conservatory was a single span house which would change the height of the roof, giving more head room for the large palms, etc. growing under glass.

The present financial conditions of the Department will not admit the change being made at present, but I desire to call the Board's attention to the fact, as it will always require, under existing conditions, that a rearrangement will have to be made every two or three years, unless only small-growing plants are utilized.

The same condition exists in the Botanical Building. At present there is too much shade from Bamboo and a large Aracuaria tree which should be removed to give light and grow more flowering plants and ferns. In fact, a general remodeling of the planting is necessary to better conditions now existing.

September, 1917, California Garden, Vol. 9 No. 3, 5-6. The Dahlia Show.

(Excerpts)

The San Diego Floral Association scored a success with its Dahlia Show, given August 18 and 19, in the Indian Arts Building, Exposition Park.

Mr. John Morley, Park Superintendent, utilized some of the display material from the Canadian building, which made the displays very effective.

We all admit the dahlia display was excellent, but what would it have been without the Park, Mission Cliff Gardens, H. E. Sies, K. O. Sessions and A. D. Robinson displays is sad to contemplate.

The Show was given for the benefit of the San Diego Museum Association.

With the expenses all paid the Floral Association expects to turn over about \$200.00 to the Museum Association.

September 1, 1917, 14:1. Community Sing to be held September 4; Miss Gertrude Gilbert arranges affair to be held at organ, Balboa Park.

September 2, 1917, Los Angeles Times, II, 7:3-4. At Balboa Park: Naval cadets to get touch of sea life; First Battalion shortly will be sent abroad.

The naval training camp at Balboa Park, San Diego, where 1500 young apprentice seamen are preparing for service, is rapidly being increased. In half-battalions the men will be sent down from Goat Island as rapidly as possible to comply with the quarantine regulations until the quota is raised to 5000 men.

An up-to-date isolation camp is being completed to accommodate 500 men at one time and here the new arrivals will be held three weeks before entering the training camp proper. The isolation camp, under the supervision of Medical Inspector Dr. Ammen Farenholt, is one of the most modern on the Coast.

In addition to the eight buildings now occupied by the naval camp, the large building in the exposition devoted to the Canadian exhibit will be occupied by sailors within the next two weeks.

Sea fighters are turned out from the camp in three months now, instead of from four to six months, as in time of peace. On the Plaza de Panama and the Isthmus, used as parade grounds, the young men are kept busy drilling, a sight of which civilians never seem to tire.

The past week marked the beginning of the furloughs for the seamen who have must completed their training, and the anticipation of the vacation home for the youths, many of whom are away from their parents for the first time, has brought much joy to them. The visits home were made possible by the recent regulation which provides that the government pay the seamen only part of their money each month and save the remainder until the training is finished. In this way many of the young fellows had saved up traveling expenses and fare and the necessary half-month's play they are required to have for their return.

In the training camp, the so-called problems of safeguarding the morals of the sailors have not greatly bothered the superior officers, for, with strict surveillance over them, the rigid regulations and the small amount of money the men have to spend, they could not get into much mischief. Capt. William D. Brotherton, commandant, and other officers are regarded with a rare feeling of admiration, respect and comradeship. This is due to the kindly interest shown in the cadets by the older men.

The sailors receive \$32.60 a month pay, but actually get of this sum only \$5 twice a month until they shall have finished. On payday, the little Japanese tea-house on the grounds, where ice cream and tea cakes are sold, and the ice-cream cone man's stand on the Plaza are the most popular spots in the park when the youngsters hasten to spend their allowance.

Orders are expected shortly for the first battalion of apprentice seamen to fight on Uncle Sam's ships. A number have gone now, but only in small numbers.

The officers of the camp are Capt. W. D. Brotherton, commandant; Lieut. E. A. Lofquist, executive officer; Lieut. E. E. Scranton; Lieut. A. H. Dutton; Lieut. F. J. Loomis, Lieut. E. B. Lapham, Lieut. F. C. Beisel, Ensign H. H. Phleger, battalion commanders; J. C. Conover, adjutant; Joseph Merritt, paymaster; W. E. Blackwell, C. A. Albright, J. H. Aibuing, pay clerks; Dr. Ammen Farenholt, medical inspector; Dr. W. M. Kerr, Dr. L. H. Clerk, Dr. A. C. Smith, Dr. H. E. Spruance, Dr. P. W. Wilson, Dr. F. W. Muller, Dr. H. A. Thompson, Dr. W. P. Blake, assistant surgeons; Dr. Lester Cranz, Dr. C. H. Welbe, dental surgeons; and W. F. Gildberg, pharmacist.

To the medical department is due much of the credit for the quick elimination of the meningitis which appeared in the camp six week ago. The boys were immediately placed out of doors to sleep and eat and were put under a strict quarantine. Cultures were made from the nose and throat of everyone of the young seamen to detect carriers. The camp is now reported free from the contagion.

September 2, 1917, San Diego Union, Society-Club, 4:3-4. Red Cross flag presented to marine corps at park.

The Marine Corps at Balboa Park now has a fine new Red Cross flag for the hospital at the marine barracks. It was presented to the officers and men of the Marine Corps on Thursday afternoon by San Diego Council 429, Knights and Ladies of Security, whose membership includes a number of the officers and men of the corps.

September 3, 1917, San Diego Union, 8:6. "Community Sing" to take place September 11 at park.

September 5, 1917, San Diego Union, 5:1-6. Birdmen from Rockwell Field fly away with most track honors at army and navy field meet at Stadium; throng of 10,000 "Rooters" brave heat to yell themselves hoarse for favorites.

The feature event of the afternoon was the obstacle race, which was captured by Burton of the navy.

September 5, 1917, San Diego Union, 10:1-2. Julia Heinrich's recital received with enthusiasm; dramatic soprano of the Metropolitan Opera Co. of New York, assisted by John Doane, organist, gave concert last night at the Organ Pavilion in Balboa Park; Mr. Doane leaves today to resume his duties as head of the organ instruction work in the department of music of Northwestern University..

Musicians declared that excepting Schumann-Heink, no artist heard at the pavilion has ever given such a perfect performance.

September 6, 1911, San Diego Union, 5:4. "Freedom Pageant" to take place at Stadium November 17.

September 7, 1917, San Diego Union, 8:1-5. Machine gun company faces camera, hopes to see real action; one of the important parts of the Twenty-first Infantry which has been on the Exposition grounds for some time; photograph.

September 8, 1917, San Diego Union, Classified, 9:1. Naval training camp boys to be public's host; 2,000 of the lads will entertain San Diegans at dance on Plaza this evening; 26-piece naval training camp band will furnish the music for dancing; all young people of San Diego are invited to attend.

One of the officers in charge of the entertainment committee said:

"Homesickness and longing for the pleasant associations of home are greater hardships than going into battle, for in battle the noise and excitement are so great and the young soldier or sailor is so intent on going after the enemy, he has little time to think of being afraid.

"But in camp, the lads in this training camp, just like the sons of San Diego mothers who have gone away to fit themselves for service to their country are homesick and lonesome. They need companionship and good cheer worse than they will need sweaters and scarves for sometime to come, and we hope that the people of San Diego will come out and get acquainted . . . and cheer them up."

September 8, 1917, San Diego Union, Classified, 9:2. Magdalens placed in quarantine; soldiers and sailors said to be menaced by unregulated women.

To test the legality of the actions of the local board of health and Dr. A. E. Banks, former health officer, in committing women of alleged ill fame to the county hospital and holding them under quarantine, habeas corpus proceedings will be instituted this morning before Superior Judge Lewis. The hearing will be conducted in the interest of Mabel Armstrong, colored, who will be represented by a Los Angeles attorney.

Because of the numbers of service men who are said to be menaced by unregulated women, the case will be vigorously pressed by the district attorney's office and the health authorities. Dr. W. A. Sawyer, secretary of the state board of health, is said to be on his way from Sacramento and will assist personally in

the fight to insure the detention and quarantining of any women of alleged immoral character who show symptoms of disease.

September 8, 1917, San Diego Union, Classified, 9:4. Rush order given Red Cross band for knitted goods; thousands of garments must be made before winter sets in; 5,000 pairs of sleeveless sweaters, socks, wristlets and mufflers are required at the Pacific division headquarters at San Francisco before the first of next month; help is urged on behalf of our soldiers and those of our Allies and Belgian refugees and repatriates being returned through Switzerland to France.

September 8, 1917, San Diego Union, Classified, 9:4. Dr. Dahne case again in court, former Brazilian commissioner wants possession of Point Loma property; alleges there was never a legal marriage between him and the young woman who claimed to be his wife; court is asked to void a deed to the Point Loma home and furniture that was alleged to have been obtained by Mrs. Dahne with the purpose of depriving Dr. Dahne of his home and other belongings.

September 9, 1917, San Diego Union, Classified, 10:5. The final program of the summer series of free concerts will be given Sunday afternoon at 3:30 o'clock at the Organ Pavilion, according to announcement by B. Roscoe Schryock.

September 9, 1917, San Diego Union, 4:3-6. Arrival of three lion cubs at park zoo soon to be celebrated with real public reception.

The Zoological Society of San Diego is rejoicing in an important addition to its already large collection of animals by the birth of three lion cubs. Dr. Harry Wegeforth, the president of the society, announces that mother and children are doing well, and that a public reception will soon be held for the newcomers, who will be named Faith, Hope and Charity.

The Zoological Society has found the caging of the present collection to be wholly inadequate and as a means of entertaining the men of the service and the general public as well as to raise money for new cages and to make further additions to the zoo they have in preparation a mammoth athletic carnival in the pushball game to be held in the stadium Saturday afternoon, October 6, at 2 p.m. In this carnival, group events will predominate and local athletes, as well as the men of the army and navy, have been invited to participate. W. A. Reynolds, camp physical director of the national war work council of the Y. M. C. A. has promised the cooperation of himself and other Y. M. C. A. directors in the presentation of a program of sports that will be second to none heretofore presented.

A charge of 10 cents for admission will be made to the general public.

New animals are being added to the zoo every few days, and, as a means of amusement for the men of the service as well as the general public and as an educational feature, the collection of the San Diego Zoological Society should be greatly appreciated by all.

September 9, 1917. San Diego Union, 5:2-4. Infantry regiment directing program for gala day at Coronado Tent City; all arrangements made by athletic director with the same care as for battle; photograph of boxers who will appear in exhibitions today at the Tent City; concert by 21st Infantry Band at 3 p.m.

September 9, 1917, San Diego Union, 6:8. Architect views brigade post site; discusses plans for Marine Corps advance base station with commander, Brigadier General J. H. Pendleton.

After a visit of a few hours in the city yesterday, architect Bertram G. Goodhue of New York, who has just returned from a successful professional trip to Honolulu, declared he has spent "a short and busy, but pleasant and profitable day."

He had been appointed consulting architect by the Bureau of Yards and Docks of the Navy Department in connection with the building on Dutch Flats and contiguous territory of the Marine Corps advance base station, for which Congress recently made liberal appropriation.

September 9, 1917, San Diego Union, 8:1. Infantry Band to assist in Community Sing which will be held next Tuesday evening at the Organ Pavilion; Dr. H. J. Stewart to preside at organ and Otto Jeancon will lead singing.

The object of the "Community Sing" is to bring together the community and the enlisted men, for the singing of old, familiar songs.

September 9, 1917, San Diego Union, Classified, 9:2. Enlisted men's Plaza dancing party success; more than 1500 people attending, among them being society people of San Diego and Coronado.

September 10, 1917, San Diego Union, Classified, 9:1-2. Camp Kearny's large post office to be ready by tomorrow; building well advanced and equipment on hand; will be busy place; large force of laborers at work over Sunday; many plumbers to be put on for final drive.

September 10, 1917, San Diego Union, Classified, 9:1. Concert ends summer series of free park musicals arranged by B. Roscoe Schryock; large audience hears program given at Spreckels Organ Pavilion

September 10, 1917, San Diego Union, Classified, 9:3. Lieut. C. S. Rodgers, Corps of Engineers, who started work at Camp Kearny may soon go to France.

September 11, 1917, Letter, Indecipherable, 1st Lieut., Ret., A. A. Q. M., United States Marine Corps, Office of Post Quartermaster, Marine Barracks, to President of Board Park Commissioners, City of San Diego, California

Dear Sir; It is desired to establish the Post Library in the Utah Building in connection with the Post Exchange. In order to make this room available, permission is requested to install four windows and a graveled walk from the door on the north side connecting with the driveway in front of the building.

In case such permission is granted, such work will be done in accordance with the specifications of the Park Superintendent or architect.

Very truly yours.

September 12, 1917, San Diego Union, 6:3. Art Notes: The Museum

Criticism or fault finding is one of the very easy accomplishments, especially blinding to the great merits of artists' work. If the shadows in Jonas Lie's pictures seem too blue to anyone he need only step 10 feet or so away from the picture where all colors will have true focus and value the artist intended.

September 12, 1917, San Diego Union, 6:3. Old favorites sung by 3,000 at Exposition; first "Community Sing" proves great success; second will be held next month.

September 13, 1917, San Diego Herald, 2:1. City Development.

(Excerpts)

It is a satisfaction to know that the Chamber of Commerce and some of the other commercial and civic organizations are showing evidence of a return to sanity. During the past week some of these organizations actually went on record in favor of the city increasing its water supply.

The Herald favors all public improvements; it is in favor of a new city hall; but considers the water development more urgent. . . . The water systems of the county can be bought now for less than one-fifth of what they will cost five years hence.

If a water district was organized large enough so that it could be bonded for \$20,000,000, the water question could be solved for all time, and no burden be placed on the tax payers.

It has been suggested that 6th and Date would be a splendid location for a city hall, and the only objection has been that it is not a central location. **The Herald** has in mind a place which would quickly convert 6th and Date into a central location, and would at the same time make a revenue producer of the unused lands in Balboa Park. That part of Balboa Park which has been improved is about all the park that San Diego can maintain at the present time, and it seems a crime not to utilize the balance of that beautiful property.

Balboa park has a thousand sightly home sites, most of which are within walking distance, and all accessible to a splendid street car service which has recently been built through the entire length of the park. The \$5,000,000 the city would receive from transferring its water system to a water district would build over 2,000 concrete houses in the park which would bring the city a splendid revenue.

With the canyons in Balboa all nicely parked, it would, with what is already splendidly parked, be all the park that San Diego can afford for many years. When the city grows and more parks are needed, the 7,000 acres of public lands could then be made a beautiful park.

Should such a plan be adopted it would soon make 6th and Date a central location, particularly if the south two blocks and the west two blocks of the park were leased for business purposes. The development of the business section in every growing city is away from the waterfront and towards the best residential section. In San Diego this would mean the growth of the business section would be north and east, which the park has made impossible.

Open up the park and watch business adjust itself to new conditions and figure what the city's revenue would be from 2,000 residences and from the rental of two tier of business blocks on the south and two on the west. When the city recovers its tidelands, the revenue from its own lands should make San Diego a taxless city.

To many people this suggestion will seem impractical, because a public park has been set aside for a specific purpose. However, if the people should vote to so utilize their park, and the state legislature should sanction it, which they would no doubt do, it would make the project both possible and legal. Respectfully called to the attention of the mayor and city council.

September 13, 1917, San Diego Union, 6:3. Old favorites sung by 3,000 soldiers, sailors and civilians at Exposition; first "community sing" proves great success; second will be held next month.

September 14, 1917, Letter from C. S. Harper (?) to Board of Park Commissioners, San Diego, Calif.

Dear Sirs: By request of Colonel O'Neil, on May 17th, the Panama Canal and Streets of Panama were turned over to the occupancy of the 21st Infantry with the understanding that the 21st Infantry should protect same from damage or removal of any property of said buildings.

I personally reported to Colonel O'Neil and Captain Hartz that the equipment of the Panama Canal was being damaged and removed from the building and Captain Hartz and I personally investigated these damages to equipment, and while doing so encountered two men of the 21st Infantry climbing through one of the North windows, while a sentry was within 50 feet of the window; also he made no pretense of blocking their entrance into the Panama Canal Building.

The officers of the 21st Infantry began an investigation to trace removed property but as far as I can ascertain nothing definite was determined.

So upon a careful inventory of the missing equipment I am offering for your approval the following bill which covers the cost of replacing the equipment and property to its original condition. The Inventory and prices are as follows:

(There follows a list of material removed and cost covering such items as wireless receiving coils, electric locomotive and three cars, bronze canal locks, ships, cloud machine, condenser lenses, concentrated filament lamps, induction motor, battery, bicycle chain, pilot and range lamps and sockets; labor for replacing above items; repairs on mountain scenery, Pacific Ocean villages and Atlantic Ocean Villages); repairs on misc. electrical equipment; repairs on curtain, and two 16 inch by 30", 24 oz. window glass, with an aggregate total of \$621.40 which was corrected on December 8, 1917 to deduct labor and repair costs, bringing the final total to \$440.90

The occupancy of the Hawaiian Village was granted the 21st Infantry by the Board of Park Commissioners, July 6th, 1917 and since that date F-I-L and M Companies have used certain space for storeroom.

Also, since that date the following material has been removed from its original position, some of which has been used on Hawaiian Village property, but which the 21st Infantry has no authority to removed. Therefore, I am submitting the following carefully prepared inventory for your approval:

(There follows a list of material removed and cost covering such items as wire, switches, cut outs, panels, knife fuses, sockets, ceiling receptacles, and lamps aggregating to a total of \$154.48, which was corrected by C. S. Harper to \$117.23, with labor cost of \$37.25 for replacing equipment deducted.

September 14, 1917, San Diego Union, 6:1. Pageant of Freedom to be held at the Stadium, November 17; patriotic bodies to make plans for big parade; Lincoln's Gettysburg Address on one of decisive battles may be Civil War feature.

September 15, 1917, Letter, Executive Secretary, Board of Park Commissioners, to Commanding Officer, Twenty-First Infantry, Balboa Park, San Diego, Calif.

Dear Sir:

In accordance with instructions issued by the Board of Park Commissioners in regular meeting assembled Friday, September 14, last, I am enclosing herewith a letter submitted to the Board of Park Commissioners by Mr. C. S. Harper, electrical foreman of the Park Department.

In order that you may be informed of what steps already have been taken in this matter, I wish to advise you that assurance was given this Department by Colonel O'Neil when the looting of the Panama Canal Building was reported to him that we should be protected from further loss. Our information in this office is to the effect that the Twenty-First Infantry, through its then commanding officer, Col. J. P. O'Neil, assumed absolute responsibility for the premises when permission was given by the Park Board for such occupancy.

The Board of Park Commissioners, with these facts in view, feel that reimbursement for losses sustained during occupancy of the premises by your regiment should be made, and I am instructed to request that you give the matter your attention.

Very truly yours.

September 16, 1917, San Diego Union, 4:3-5. Story of first night at Camp Kearny told; quartermaster officer figured large in it; Capt. Christensen committed a little burglary to get things started right; camp soon will be ready for troops of the 40th Division.

September 16, 1917, San Diego Union, 4:6. Letter from A. M. W. C. protesting against noises at organ.

Would it not be kind, courteous and considerate, not alone to the organist, but to one another, if there was less noise during a recital. . . . If during the Exposition, machines were not allowed to drive down to the organ after a recital began, why should it be different now?

September 16, 1917, San Diego Union, 4:8. Art Notes: Quite a party of members of the Art Guild gathered about the modeling studio in Balboa Park Saturday morning. The arcade balconies connecting with the studio made a delightful place for sketching.

September 16, 1917, San Diego Union, Society-Club, 11:3-4. Summer term of Montessori School conducted in the Fine Arts Building under the auspices of the School of American Research closed yesterday; lectures delivered in Italian by Dr. Maria Montessori; most of the students were preparing to become teachers of the method..

September 17, 1917, San Diego Union, 8:1. Planning music for soldiers; Civic Music Committee works under direction National Army, Navy Board.

There will be free concerts at the Organ Pavilion every Sunday afternoon, choral work and musical instruction for the men, music in the enlisted men's clubs downtown, concerts at the camps, "community sings," and other activities.

September 20, 1917, San Diego Union, 1:3-6, 5:1-2. Cheered by thousands; second contingent of army draft to Liberty army cheerfully goes to camp; marchers tramp south of Broadway on way to Union station; tearful farewells at depot.

September 22, 1917, Letter, indecipherable, 1st. Lieut. U. S. Marine Corps, Retd., Post Quartermaster, to the Board of Park Commissioners, Balboa Park, San Diego, Cal.

Gentlemen: For your information, you are advised that in accordance with permission granted by the Park Board, that the Marine Corps has put new two-ply roofing on the Montana and Alameda buildings, which has [sic] also been painted. The tiling on the roofs of the Washington and Kansas buildings has been repaired and painted with mineral paint. The roofs of the New Mexico, Utah, Kern-Tulare, San Joaquin and Salt [sic] buildings have been thoroughly repaired and painted. In addition to the above the side walls of the above mentioned buildings have been repaired to conform with the present architecture.

Very truly yours,

(Signed).

September 30, 1917, Los Angeles Times, II, 2:3. Tanned, tough-muscled marines are training, by Edward C. Crossman.

Out of the forest of red tape into which all Los Angeles soldier and sailor men disappear for a time when they leave the city, there has emerged once more the company of marines that was enlisted in the

National Guard under the law providing for marine militia, and that left the city some months ago under the command of Lieut. Best.

Tanned and tough-muscled, with their clothes fitting them in the way uniforms fit men who have become used to wearing them, the Los Angeles sea soldiers are camped with other marines on the beautiful point of land that runs deep into the ravine at the San Diego exposition site below the outdoor organ. There on "Inspiration Point," there rise neat rows of brown tents among the eucalyptus trees, five companies or more of them, and there on the most beautiful parade ground in the world, there work the "leathernecks," in the intensive training of the sea-soldier likely to see service soon. Drilling, the marines gaze over the tree-filled gulch and the lovely town beyond, to the blue waters of the bay and the ships lying at anchor.

IN CONTRAST TO FIGHTING

In the other direction there rise the fairyland buildings of the exposition, now inhabited entirely by the embryo sailors of the naval training school. The music of the outdoor organ floats down to the camp. The only way from the point lies across the cool, tree-shaded square, where the pigeons used to flock and flutter for the edification of the exposition visitors. A greater contrast to the fighting line on the west front would be harder to imagine.

Yet the job doesn't at all consist of sitting in the shade and admiring the view. The parade ground was full of brown-clad marines on the morning of a recent visit. All four companies were busy getting better acquainted with the rifle butt and bayonet.

A lieutenant with a rapid-fire voice was drilling Company Thirty-six, which is the Los Angeles contingent. He was endeavoring with considerable success to give the commands of the bayonet exercise so rapidly that some of the men, at least, couldn't follow them because they couldn't think fast enough. Then he'd pick out the most flagrant transgressor and empty the vials of his good-natured conversation on his abashed head until he felt sure that the victim was sure which was the right hand and which the left --- which said victim knew before if he'd had a bit more time to think.

ANGELENOS ON THE JOB

The morning of the visit, Lieut. Glenn Hays of Los Angeles was the officer of the day, which job is a temporary appointment to a combined office of Chief of Police, trouble smoother, camp boss, information dispenser, inspector-at-large, and looker-out for higher-ups who may approach the camp on inspection-bent. Also, officiating as company clerk there was Corporal Carl May, formerly a probation officer in the county service, and now with ambitions for a chaplain's post. Keeping bad luck away, and affording entertainment when the view palled, was also the company mascot, "Popo," a real marine dog, longer in the service than the company and not merely a fox terrier, as one might think. He knew all about the Mare Island and the training to be had up there.

September, 1917. Superintendent's Report.

The general work in the department has been maintenance.

The Stadium has been used more during September for practice and scheduled games than in July and August, and every day has been taken for October.

The bills of the Navy, which were returned, have been itemized and sent to the Navy Department, the money for which should arrive by the middle of the month.

The balance of the bills will be forwarded as soon as all accounts are in and itemized.

The hot weather, the latter part of the month, caused considerable damage to the trees and shrubs in various sections of the Park; the pruning of the Avenue trees in the Exposition grounds has been completed, and the two men employed in that work are now pruning the Southern Counties Garden.

Remodeling the planting in the Conservatory and Botanical Building has commenced, and will take several weeks, as we have only a very limited amount of men to assist in the work.

The following plants have been planted in the Department during the month, and a large quantity donated to the City Cemetery from the nursery as per resolution of the Board (list is incomplete):

- 1 Acacia Cultrifornis
- 1 Acacia Mollisina
- 2 Acacia Longifolia
- 250 Agatheia Celoestis
- 50 Begonias, Cloire de Chatelaine

October, 1917, California Garden, Vol. 9, No. 4, 5. Monthly Excursion In and Around Balboa Park, by G. R. Gorton.

There is a singular appropriateness in the selection of the Exposition grounds as a site for a "Military Reservation," in that it is one of the brightest and most colorful positions of the Park, horticulturally speaking. Youth and bright colors are inseparable, and so it is fitting that the flower of the nation be surrounded by the flowers of the earth. All of this is probably not the reason the site was selected, however, but the facts stand.

Montezuma Gardens are particularly gay at this writing. The flaming scarlet of *Salvia* ornaments all the corner beds, while the four side beds, two on each side, are of *Coleus* in variety, the other two entirely of red *Coleus*, all four bordered with *Exacum* and pink and red *Vernon Begonias*. Also, contrary to precedent these *Coleus* lack that singed-cat appearance prevalent among their kind during the summer months.

The large center bed is not so rich in color, but is brightened here and there by the berries of *Solanum pseudocapsicum*, which is one way of saying Jerusalem Cherry.

Feature beds are the order of the day in the garden south of the Music Pavilion. One of these contains the gorgeous Firebird *Canna*, which loses none of its charm by the fact that by now a year has elapsed since its introduction. The San Diego *Canna*, which shares the same bed, is unique by the fact that the entire stock of this variety is in Balboa Park, and none is listed for sale.

Many men of many minds, and many Dahlias of many kinds to please them all are also in this feature garden. Many of the varieties are exceedingly interesting and worthy of study.

The Southwest bed is blessed with Cannas, Mrs. George Strohlein and Uncle Sam, the former valuable by reason of its wide, tropical-looking, bronzy leaves, and the latter especially because of its enduring qualities, despite the fact that the Cannas have not been "manicured" this season. They present a much better appearance than do many varieties which have almost daily valeting in the removal of spent blooms, etc.

It will not be long before the public will be invited to view what promises to be an exceptional display of *Chrysanthemums* in this same garden, if the present condition of the plants is any criterion.

The border of the esplanade facing the Music Pavilion presents a holiday aspect with *Petunias* and *Ageratum* in pleasing combination of fragrance and charm, the *Petunias* in all colors considered proper for *Petunias*, the *Ageratum* in the conventional blue.

The Botanical Building is always attractive, sometimes more, sometimes less --- merely a matter of degree. It seems as if during the last few months that the growth of the plants forming the permanent part of the display had made growth all out of proportion to the period of time. Particularly gigantic are several hanging baskets of *Nephrolepis* and one or two of *Goniophlebium*, which occupy most of the aerial space in the north end of the glass house. These have assumed the proportion of shade trees and seem to be still going

strong. Apparently these plants are a sort of justification for some of the large tales the more benighted of us tell about this western country of ours.

On the center bench of the glass house, several Anthuriums (Flamingo Flowers) are in bloom, and one of the ornamental leafed varieties is putting forth a new leaf or so, which, to the minds of many admirers, surpasses anything it might do in the flowering line.

Out in the lathhouse the scheme of things has been brightened with potted Salvias and Liliun Tirgrinum, the delightful fragrance of the latter perfuming the whole building. In the circular bed a large Abutilon is endeavoring to mislead the unsuspecting public by hanging its flowers upon a Cocos plumosa nearby, presenting exactly the appearance of having been born there. The writer observed at least one visitor who is sure had seen a Cocos plumosa in full flower.

In the west wing one or two Pittosporum Undulatum have been supplanted by a low bedding of fern and begonias which is very attractive indeed. Over west of the erstwhile Commerce and Industries Building, the group of Daturas has covered itself with glory and flowers, and is exceptionally beautiful at this writing.

In the gardens north of the Southern Counties Building one of the most conspicuous features is a bed of Verbenas, comprising fully a dozen colors and shades.

October 1, 1917, San Diego Union, 7:3-7. Held in reserve as expeditionary force; One Hundred First Company of U. S. Marines stationed at the Marine Barracks in Balboa Park (group photograph). Lieutenant C. Clark is in command of this company which is being held in reserve in Balboa Park as an expeditionary force.

As members of the company are sent in small detachments to ships or shore stations, others are sent here from the training barracks at Mare Island to take their places. This company may have the distinction of being the first to occupy the barracks at the new brigade post on Dutch flats, following its completion.

October 1, 1917, San Diego Union, 7:8. To distribute cabbage plants; 100,000 beginning tomorrow morning will be given away by Chamber of Commerce.

George J. Champlin, chairman of the food production committee of the Chamber of Commerce, will begin the distribution of 100,000 cabbage plants this morning at the Chamber rooms. Mr. Champlin has made arrangements whereby 5,000 cabbages will be received at the Chamber each day until the entire public interested in raising this vegetable will be supplied.

During the time last month when tomatoes were distributed, more than 100,000 plants were disposed of during five days, many farmers in the back country taking large numbers, as did many pupils in the local grammar schools. Mr. Champlin believes he will be just as successful in the cabbage enterprise as he was in the tomato.

October 9, 1917, Letter, Secretary Board of Park Commissioners, to Lieutenant Crawford, Twenty-First Infantry, San Diego, Cal.

Dear Sir: As I have not heard from you regarding the small bungalow in the rear of Universal Brotherhood Building, I am writing to advise you that the matter has been taken up with the Brotherhood people with the following results"

The present owners state that they recently purchased the bungalow and moved it to its present location at a total expense of \$150, and that they will sell the building at that figure.

Madame Tingley, head of the Brotherhood movement, is unwilling that the building should be occupied while in its present location, and, should you purchase same, you would have the additional expense of removing the building to a new location.

The Park Department will allow you to place the building at a point quite as convenient to your camp as its present location and will, of course, make no charge for ground rent.

If you care to go further into the matter, it would be advisable for you to confer with Mr. Knoche of the Universal Brotherhood, whom you may reach by telephone at "Point Loma 350."

Very truly yours.

October 11, 1917, San Diego Daily Transcript, 4:1. It was announced last night by the secretary of the Y. M. C. A. that the old Sacramento building is to be used by the organization as headquarters of the Navy Y. M. C. A.

October 12, 1917, San Diego Union, 1:7, 3:1-2. James W. Garard, former U. S. ambassador to Germany, spoke to 8,000 at Organ Pavilion last night; told of atrocities perpetrated upon prisoners; arraigned pacifists.

October 12, 1917, San Diego Union, 1:7. Warm welcome in San Diego awaits McAdoo; Secretary of the Treasury expected here tonight; speaks on Liberty Bonds Tuesday.

October 12, 1917, San Diego Union, 5:2-5. Youngsters from off farms see sea for first time, but soon adept sailors at U. S. Naval Training School, by B. P.

Henry Ford gained for himself a world-wide reputation for turning out a car every four minutes. The United States naval training station in Balboa Park, entirely unheralded, is turning out hundreds of efficient sea-fighters every four months. Ordinarily, the training period would be six months, but under the existing high-pressure intensity, necessitated by the war, and the resultant demand for men in the navy, a county youth, accustomed only to the smooth back of a mare, in 16 weeks is made to ride a pitching destroyer in a heavy sea.

Boys who arrived in Balboa park but a few months ago, lads of an average age of 19, from the cities, towns, hamlets, valleys and mountains of Washington, Oregon, Idaho, Montana, Wyoming, Utah, Colorado, Nevada, California, Arizona, New Mexico and Texas are already with the fleets as seamen, second class, and firemen, third class.

This is some distance to travel for a youngster who as late as last May rode the range at Cactus Flat in the Rockies. The fact that it can be negotiated at all is directly traceable to the exceptionally fine organization at the naval training station.

No corporation was ever more complex than this institution of which Capt. W. D. Brotherton, U. S. N., is the commandant. The naval training center is a city per se, an ever-throbbing community in which thousands dwell, and in which every aspect of civil existence is reflected in its routine. It has its government, as a matter of course, with its ramified responsibilities of administration. It has its administration building, or city hall, its police, its hospitals, its department of sanitation. A huge commissary vies with its urban counterpart, the wholesale house, and from this issue the immense quantities of food and supplies for the sustenance and comfort of its naval apprentice citizens.

Yeoman, the stenographers and clerks of Uncle Sam's navy, keep up an incessant tattoo on a battery of typewriters, while others maintain an intricate system of accounting in the training station's treasury, the paymaster's office. Others still, a large part of the complement, in fact, are constantly concerned with the vast galley or kitchen, the open-air mess hall, or hotel, the old Varied Industries building in which 1000 apprentice seamen can be comfortably quartered, the canteen, or ship's store, the post office, the barber and shoe shops, butcher shop, bakery and wash house or laundry.

Public health has its part in the makeup of the naval training station. There is a detention camp in which newcomers are kept under close observation for three weeks before they are allowed to mingle with

the rank and file of the apprentice seamen. There is also an isolation ward, in which those afflicted with communicable ailments can be confined.

Likewise, amusements receive careful attention, and there are at all times athletics, games of test and music for the edification of the apprentice seamen populace. An excellent band, organized since the establishment of the institution, plays during the noon mess hour and again at night on the Plaza. Even the movies, the most characteristic of latter-day American outcroppings, hold forth nightly at the naval training station.

Thus every item of the bodily and mental health of these embryo jackies is conserved. To what extent this studious overseeing of these youngsters is productive of results is convincingly illustrated by the almost total absence of sickness. Almost to a boy they just bloom with health and there is about their stride and the very color of them, a suggestion of magnificent youthful vigor, untouched by contact with the world.

More convincingly still is the moral accomplishment, simply indexed by the statement of my courteous and patient informant, Lieut. E. A. Lofquist, U. S. N., the executive officer:

“Of possible 3200 seamen given liberty in San Diego each week, I should say an average of three fall from grace.”

“Liberty” has ever been and is a problem, for when Jack, apprentice or seamen, ashore or afloat, has earned his leisure, it is his inalienable right to pass nominally beyond the eye and the control of his superiors. But here, with his amusements and recreations virtually laid out for him, it is rare indeed that the apprentice seamen ventures far astray. Balboa Park itself is an every-beseeking attraction to these sailors-to-be. Many of them have come from sections where flowers are uncommon, and they find delight in wandering the streets and paths, sniffing at the strange fragrances, or tarrying in the Plaza to pay with the pigeons, or willing away their idle hours at the edge of the lily-spread lagoon.

Pool and billiard tables, checker and chess boards are always at a premium in the old Filipino exhibit, where the Y. M. C. A. has provided a writing and reading room for the apprentice seamen. This same institution is now installing a gymnasium, which is to be a feature of the old Sacramento (Northern Counties) building it will occupy. A physical director will be in charge. Practically all the churches have arranged weekly socials for the entertainment of the apprentice seamen in the city, and the Hippodrome management each week sends 250 complimentary tickets to Commander Brotherton “for the boys.”

Considering this multiplex establishment with its provisions for the care and entertainment of the apprentice seamen, it seems pertinent to explain to possibly envious civilians that these youngsters of the navy pay for everything they have with downright hard work. This is one instance in which “Jack ashore” is not entirely bent on “a time.”

Life begins officially, so to speak, for the apprentice seamen when most people turn over in bed to enjoy a few extra winks of sleep. He does not arise leisurely; he is routed out literally by the bugle’s strident note. He makes his own bed, or hammock, has his shower, puts on his white duck work clothes, eats his breakfast, and passes the exacting scrutiny of the navy surgeons.

From 8 a.m. until late afternoon the apprentice seamen is a very busy young man. If he is fortunate he gives several hours of his time to infantry and artillery drill and the manual of arms. If he is unfortunate, he is assigned to detail work, which means swabbing down the floors and pavement, “a la deck,” barefooted and dragging a four-inch hose, or he goes on guard. There is variance of opinion among these navy boys as to what constitutes good fortune and misfortune. If one escapes drill, he becomes an orderly. If he has shown special qualifications, he does both, besides which he participates in numerous inspections, formations and parades, bayonet, position and aiming exercises. At other times of the day he attends school, where he receives instruction in signaling, radio, compass, and lead-line, rigging and various other branches of nautical training.

When finally at 4:30 p.m., the apprentice seaman is dismissed, he goes to his quarters and gathers his soiled clothes, These he washes, scours rather, himself, later carrying his trousers, blouses, underwear, and hose to the drying line. If he has any spare time he passes it until evening mess sewing, smilingly and without complaint. Then he writes home.

Having obtained this quite intimate view of these young men at the naval training station, knowing what they do and how well they do it, there seems to be no longer any understanding of those who do not put their faith in

“The Man Behind the Gun.”

And, reverting to Henry Ford, I could say the achievements at the United States naval training station in Balboa Park are equally worthy of world-wide import. Moreover, in my view at least, the process of transforming raw material into the finished product is much more absorbing here than it would be at Detroit, if only for the reason that when an apprentice seaman leaves the manufactory he is fully equipped --- a self-starter, as it were --- capable of really amazing endurance in the roughest possible going.

October 13, 1917, Letter, Office of the Board of Park Commissioners, to Commanding Officer, Twenty-First Infantry, San Diego, Cal.

Dear Sir; As reported to you by telephone yesterday morning, a party of men in uniform, in appearance either soldiers or marines, were observed turning over the large ornamental urns in front of Model Farm and Y. M. C. A. building. This occurred at approximately 1:15 a.m. The urns were broken loose from concrete bases and rolled into the street, the plants in some of them being destroyed.

Last night, several large board sign posts were torn from their fastenings along the same roadway, broken up and thrown into the street. This happened sometime between ten o'clock and morning. As no one has reported witnessing this last act, we have no means of knowing whether civilians or soldiers are guilty. The breaking of ornamental light globes from the tops of standards in this same vicinity also has been reported.

For the above reasons, in order to prevent further property damage and because the speeding habit, which civilians and soldiers share in common, has become a menace to the safety of pedestrians in that portion of the Park, we wish to ask that you extend to us this courtesy, namely:

Place sentry in roadway before model farm and another in roadway opposite Universal Brotherhood Building, instructing them as follows:

- (1.) To stop all motor-driven vehicles traveling in excess of 15 miles per hour; to turn offending drivers, if civilians, over to the Park Department, either at this office or, at night, to the Park Superintendent or Executive Secretary, both of whom live upon the Model Farm, or, if the driver be in uniform, to the proper military authorities.
- (2.) To prevent men in uniform from entering Model Farm premises between hours of 6 p.m. and 6 a.m., at all hours of the day or night to prevent acts of vandalism, the breaking of fruit of flowers, boisterous or unbecoming conduct on the part of both civilians and enlisted men, and to turn over offenders to the proper authorities.

This request is prompted by a sincere desire to maintain the harmony and friendly spirit existing between this office and the military authorities and to insure the placing of all blame upon the proper shoulders.

Very truly yours.

October 12, 1917, San Diego Union, 7:2-5. Artillery hard at work here all the time; group photograph of the 15th Artillery Company now stationed at Chula Vista.

October 12, 1917, San Diego Union. Playground Department to handle service athletics; Army officers agree that city bureau to make arrangements for contests; ball games to be booked; football set for first of month; track meets being arranged; effort being made to establish temporary swimming facilities on the reclaimed tidelands at the foot of Date Street.

October 13, 1917, Letter, Board of Park Commissioners, to Commanding Officer, Twenty-first Infantry, San Diego, Cal.; San Diego Public Library.

Dear Sir:-

As reported to you by telephone yesterday morning, a party of men in uniform, in appearance soldiers or marines, were observed turning over the large ornamental urns in front of the Model Farm and Y. M. C. A. building. This occurred at approximately 1:15 a.m. The urns were broken loose from concrete bases and rolled into the street, the plants in some of them being destroyed.

Last night, several large board sign posts were torn from their fastenings along the same roadway, broken up and thrown into the street. This happened sometime between ten o'clock and morning. As no one has reported witnessing this last act, we have no means of knowing whether soldiers or civilians are guilty. The breaking of ornamental light globes from the tops of standards in this same vicinity also has been reported.

For the above reasons, in order to prevent further property damage and because the speeding habit --- which civilians and soldiers share in common --- has become a menace to the safety of pedestrians in that portion of the park, we wish to ask that you extend to us this courtesy, namely:-

Place sentry in roadway before model farm and another in roadway opposite Universal Brotherhood Building, instructing them as follows:-

- (1.) To stop all motor-driven vehicles traveling in excess of 15 miles per hour; to turn offending drivers, if civilians, over to the Park Department, either at this office or, at night, to the Park Superintendent or Executive Secretary, both of whom live upon the Model Farm, or, if the driver be in uniform, to the proper military authorities.
- (2.) To prevent men in uniform from entering model farm premises between hours of 6 p.m. and 6 a.m., and at all hours of the day or night to prevent acts of vandalism, the breaking of fruit or flowers, boisterous or unbecoming conduct on the part of both civilians and enlisted men, and to turn over offenders to the proper authorities.

This request is prompted by a sincere desire to maintain harmony and friendly spirit existing between this office and the military authorities and to insure the placing of all blame upon the proper shoulders.

Thanking you in advance for your cooperation and courtesy.

Very truly yours.

October 13, 1917, San Diego Sun, 17:4-6. Stockholders to turn over \$6,500 balance to San Diego Museum

October 13, 1917, San Diego Sun, II, 8:4-5. Inga Orner, grand opera star, will sing at Organ Pavilion tomorrow afternoon; all soldiers and sailors will be admitted without charge; seats on sale at Thearles' music store.

October 15, 1917, Letter, T. N. Faulconer, Executive Secretary, Board of Park Commissioners, to Major Fred V. Chamberlain, Commanding Twenty-First Infantry, Camp Walter R. Taliaferro, San Diego, Calif.

Re: Panama Canal Bldg.

Dear Sir: I wish to advise that your communication has been brought to the attention of the Board of Park Commissioners, and that said Board in regular meeting assembled, has directed me to quote to you the following except from its minutes:

“Executive Secretary hereby is directed to inform the Commanding Officer of the Twenty-First Infantry that the Board of Park Commissioners is ready and willing to take over the Panama Canal Building now held under lease by the Twenty-First Infantry, but, in taking over said building, it does not waive its claim to loss and damage to the building and fixtures while under lease to the Twenty-First Infantry, said claim being now on file.”

Our Mr. Harper will present this letter in person and will, at your convenience, inspect the premises and release you from further responsibility.

Pending wreckage of the building by the Park Department, it is requested that you provide a sentry for the premises.

Very truly yours.

October 15, 1917, San Diego Union, 4:3. Art Notes, by R. R. --- The Indian Arts: The tools in the various cases at the Museum attract much attention.

October 15, 1917, San Diego Union, 4:7. Letter from “An Enlisted Man,” demanding square deal.

Simply because a man wears a uniform is no reason that he will throw his money to the winds. San Diego merchants, particularly proprietors of restaurants, fail to realize this.

October 16, 1917, San Diego Union, 14:1-2. Coloratura soprano pleasing; large audience greets Miss Inga Orner at Spreckels organ; bouquets presented.

October 16, 1917, San Diego Union, 14:2. “Community Sings” to be repeated next Sunday afternoon.

October 17, 1917, San Diego Sun, 4:3-5. Water colors by Arthur G. Vernon exhibited in California Building.

October 17, 1917, San Diego Union, 1:3-6, 5:1-3. Secretary of Treasury William G. McAdoo spoke to 6,000 at Organ Pavilion yesterday; made plea for liberty bonds, denounced pacifists; introduced by Lyman G. Gage, secretary of treasury in McKinley’s cabinet.

October 17, 1917, San Diego Union, 1:6. Rockwell Field is announced as U. S. Aviation base.

October 19, 1917, San Diego Union, Classified, 7:1. Mayor Wilde lands his fist on visitor who wants job; money lender called him bad name, says Wilde; man is taken in by police.

October 19, 1917, San Diego Union, Classified, 7:1. Progress is reported on work at Lower Otay dam.

October 19, 1917, San Diego Union, Classified, 7:2. Luncheon given in honor of Congressman Kettner at U. S. Grant Hotel to be meatless spread.

October 19, 1917, San Diego Union, Classified, 7:2. Suit begun to abate Hotel Harvey as nuisance.

October 19, 1917, San Diego Union, Classified, 7:3. People’s Peace Council is out; offices in Scripps Building left by Pacifiers.

October 19, 1917, San Diego Union, Classified, 7:3. Colored soldiers form contingent; Draft Boards sent notices to men who will leave for North on October 27.

October 19, 1917, San Diego Union, Classified, 7:4. Veteran troops, Arizona's finest, arrive at Camp Kearney; many members of 158th Regiment saw service in Cuba and on border.

October 24, 1917, San Diego Daily Transcript, 4:1. A big entertainment is to be given tomorrow night at the Organ Pavilion by the U. S. Marines camped in the park. Nine vaudeville acts and four four-round boxing matches are on the program. The show is given to raise money for the marines' football team.

October 24, 1917, San Diego Union, 7:1. Marines plan "big doings" for football money; nine vaudeville acts and four boxing exhibitions to be staged at Balboa Park tomorrow night.

October 24, 1917, San Diego Union, 7:3-4. Meatless Tuesday observed generally by San Diegans.

October 25, 1917, San Diego Herald, 1:1-2. Mammoth pageant of freedom will be allegorical picture of universal peace.

October 25, 1917, San Diego Sun, II, 7:6. Colonel D. C. Collier is to manage Santa Fe central railroad running from Santa Fe to Torrence, New Mexico, for a group of New York capitalists who have purchased the line; is visiting here for a few days.

October 25, 1917, San Diego Union, 8:2. Talent galore on program of Marines tonight.

October 26, 1917, San Diego Sun, II, 9:5. The Saturday night dances given by officers and men stationed on the Exposition grounds are proving a big success. It is estimated that about 2,000 persons were present at one which was held last Saturday night on the Plaza de Panama.

Ensign Conover stated today that he hoped San Diego and the Exposition would be made a permanent naval training station.

October 26, 1917, San Diego Union, 12:1. Soldier Quartet to be heard at Organ Sunday; men from Company 15, Coast Artillery, will give concert.

October 28, 1917, San Diego Union, 1:7, 5:1-4. Evangelist Billy Sunday spoke to 12,000 at Camp Kearny and to from 10,000 to 12,000 at Stadium yesterday; attacked "booze."

October 28, 1917, San Diego Union, 9:1-3. Pageant of Freedom to prove epoch in San Diego's history, prediction; notable gathering of distinguished persons expected in city November 14.

October 29, 1917, San Diego Sun, 1:3-6. Mr. Eno still has a nice exclusive park business.

Judge Henry C. Ryan and his companion of the Park Board Trust, F. F. Grant, have exemplified the truth of the old saying that you can't keep a good man down, and that there are more ways than one of killing a dog. Mr. Eno is still on the job.

A few months ago, **The Sun** uncovered and bared to the public gaze a little transaction of the Park Board Trust, by which L. L. Eno, a downtown curio merchant, was placed in charge of the refreshment concessions in Balboa park, receiving as his compensation all the net profits from the sales of refreshments and sundries to soldiers, sailors and civilians, save and except the sum of \$125 per month, which sum should revert to the park department.

As the records of the park department showed the net profits from the concessions to be averaging around \$1200 per month, **The Sun** demanded the canceling of Mr. Eno's contract. The contract was canceled and the city park department today is richer by several thousand dollars than it would have been had Mr. Eno been allowed to carry out the illegal Grant-Ryan-Eno agreement. It is but fair to

say that Arthur Cosgrove, who has a vote when a motion for adjournment is before the board, refused to sanction the agreement with Eno.

When the good people of San Diego has been awakened by **The Sun** to the sort of deal that was being given them by the Park Board Trust, the howl that went up was of such force and duration that Mr. Eno was declared by board member to have been let out, and the public resumed its slumbers.

Many citizens and taxpayers state that they have applied to the park board for the privilege of selling their wares to the soldiers and sailors in Balboa park. On the grounds that "the army and navy wouldn't like it," every one of these petitioners had been turned down, but Mr. Eno continues to sell his postcards, kodaks and gewgaws, whether the army and navy like it or not.

October 30, 1917, Letter, C. Gamborg Andresen, Lieutenant Colonel, U. S. Marine Corps, commanding, to John Morley: Request to construct a section of a military trench in the plot of ground south of the Montana Building.

October 30, 1917, San Diego Sun, 4:6. Stockholders in Panama-California Exposition are turning over their \$6,500 balance to San Diego Museum; already more than 50 percent of the stock has been assigned to the museum

October 30, 1917, San Diego Union, 8:1. Quartet of soldiers hit in recital Sunday afternoon at Organ Pavilion; big audience gathers to hear Coast Artillerymen stationed at Chula Vista who display fine voices.

October 31, 1917, Letter, John Morley to C. Gamborg Andresen, Lieutenant Colonel, U. S. Marine Corps, granting permission to construct a trench south of the Montana Building.

October 31, 1917, San Diego Daily Transcript, 4:1. Henry Schumann-Heink, son of the famous singer, left this city yesterday for the Naval Training Station at San Pedro, where he was ordered to report for service. His wife and daughter will make their home at Grossmont with his mother while he is away.

October 31, 1917, San Diego Union, 1:3-6, 5:2-6. Joffre Boulevard name selected for 80mile scenic road encircling San Diego; businessmen of city plan paved highway at luncheon.

October 31, 1917. San Diego Union, 4:1. EDITORIAL: Parks vs. Payrolls.

The action of a majority of the City Council in refusing to a shipbuilding company a site on the waterfront north of Broadway may be satisfactory to those who can see in the development of the city only hard and fast lines, possibly subordinating the commercial _____ to the aesthetic, at least in that part of the city. To many others, **The Union** believes the decision has been very much of a disappointment. In fact, there is good reason for the belief that this step, regardless of the identity of the company making the application, was wholly at variance with what a majority of the people of San Diego want.

San Diego is already very well equipped, at least for a city of the size of this, with parks, playgrounds and recreation spaces. The great city park, with its 1400 acres, is rather more, indeed, than San Diego needs now. In addition, there are various playgrounds, all of which are needed and are well used. The cost of these enterprises, designed for the recreation and physical well being of the people is considerable --- all that the city can well afford now. For instance, the upkeep of Balboa Park and the smaller parks is now about \$100,000 a year. This, too, although only half of the large park is now developed, and by no means all of that which is developed is being cared for by the city alone, as various government enterprises are using it.

October, 1917, SUPERINTENDENT'S REPORT FOR OCTOBER 1917

Maintenance has been the chief work of the Department for the month with the exception of the rearrangement of the planting in the Conservatory and Botanical Building, also repairing the roofs of the buildings occupied by the Navy Department, a complete record of which will be furnished on completion.

Twenty-seven hundred plants were utilized in the Exposition grounds and Botanical Building and two hundred in the balance of the Park system consisting of the following varieties.

EXPOSITION GROUNDS AND BOTANICAL BUILDING

- 1 Alosphylla Australia
- 3 Alocasia Machrohizia
- 85 Cuphea Manicata
- 100 Cyclamen Persicum Giganteum
- 400 Lilium Longiflorum
- 1986 Chrysanthemums
- 135 Pimula Sinensis
 - 6 Swainsonia Galegifolia
 - 6 Sansveria Zealanica

PARK

- 12 Erica Melanthera
- 4 Leptospermum
- 4 Pyoporum Acuminatum
- 135 Marguerites (Yellow)

CONSERVATORY AND BOTANICAL BUILDING

The Cocos and Seaforthia Palms in the Conservatory have been removed and transplanted in the Botanical Building and along the parking strip on Park Avenue (6th Street). The large Araucaria Bidwilli tree was chopped down as it was too large to move from the Botanical Building. Bamboos and surplus shrubs were removed and palms from the Conservatory planted in their place. The readjustment of the planting in the Conservatory is nearly completed. The cost of removing the palms amounted to \$210.00 and completing of the work will bring the total of nearly \$500.00. While this has been extra work it has been done by transferring men from other sections, making no increase in the payroll.

General pruning on the Exposition grounds is being done and the remodeling of the Montezuma formal garden is now underway and will be planted to pansies for winter and spring blooming.

November 1, 1917, San Diego Daily Transcript, 4:1. Soldiers from Camp Kearny and apprentice seamen for the Naval Training Station in Balboa Park this morning started on their campaign through the city and county to secure pledges for food conservation.

November 2, 1917, San Diego Daily Transcript, 4:1. Over 20,000 signatures were secured to pledge for food conservation by squads of soldiers and sailors who canvassed the city and county.

November 4, 1917, San Diego Union, 4:5-6. Henry C. Ryan, attorney, writes letter branding **San Diego Sun** story malicious, false; story appeared August 10; charged Park Board with graft in the authorization of the planting and cultivation of tomato plants in the park garden for free distribution; also discusses arrangement made with Mr. Eno by previous Park Board to sell photographic and kodak supplies in park.

November 4, 1917, San Diego Union, 4:3-6. Council urged to grant two military requests by government officers, by John T. Flynn.

Within the last two days important military requests have been presented to the City Council by the government officers in charge. . . . One request was for the use of Pueblo lands near La Jolla for

maneuvering purposes. . . . The other request came from Captain Leeds, district engineer in charge of harbor work, etc., in which the city is invited to cooperate with the federal government in providing a bulkhead to impound channel dredged material on the 500 acres recently ceded for naval base purposes at Dutch Flats.

November 4, 1917, San Diego Union, 4:5-6. Thomas Ryan writes letter criticizing Councilman's Tideland Lease "excuse."

In these strenuous times of war the government is calling for our boys and we are sending them; it is calling for our money and we are buying Liberty Bonds; but when it asks a lease of a part of our idle waterfront for shipbuilding, San Diego is put in the position of a slacker and our Solons turn down the request as these tidelands are desired for ornamental purposes and are too good for industries.

November 4, 1917, San Diego Union, 4:8. Art Notes, by R. R.: Indian Arts --- in case number 4 at the San Diego Museum may be seen two Indians working from the solid granite forms to express their thought of life on a well-cut monumental stone.

November 5, 1917, Letter, Captain S. S. Brundred, 21st Infantry adjutant, to John Morley, requesting Park Department to take over Panama Building and the Safety First Building pending the claim for loss therein.

November 5, 1917, San Diego Sun, II, 7:3-6. Just Among Ourselves, by W. H. P., regarding Ryan and Park Commissioners.

You may have been a perfectly dandy judge in Indiana, Mr. Ryan, but here in San Diego, you've been a darned bad public servant and the nicest thing you could do right now would be to resign and get off the job and take your friend Grant with you. Do you get that?

November 9, 1917, San Diego Daily Transcript, 4:1. In place of the usual Sunday concert at the Spreckels Organ in the Park this Sunday, Father Flynn, who so stirred the Rotary Club yesterday with a talk on his experiences about Verdun, will speak on the work and needs of the Red Cross in France. There will also be some vocal and instrumental music.

November 9, 1917, San Diego Sun, 1:8, 2:4. Irregularities charged in funds of city parks; no record of funds found.

Failure of Commissioner Ryan to account in full for a fund he is said to have collected from Griffing Bancroft for the park funds and a lack of records of a large collection Commissioner Grant is alleged to have personally made from the U. S. Navy Department are two of the counts.

November 10, 1917, San Diego Sun, 1:6. Park Board affairs to be probed.

In spite of a feeble response uttered this morning by Park Commissioner F. F. Grant, through the columns of the morning Alibi, the official organ of the park board trust, an investigation was begun by City Attorney Cosgrove into the handling of public funds by Grant and H. C. Ryan, the trust members.

November 10, 1917, San Diego Union, 4:8. Art Notes, by R. R.: The Art Gallery --- an exhibition of pictures by San Diego artists will open November 13.

November 10, 1917, San Diego Union, 5:1. Many families are removing to San Diego; indicated by large amount of household goods consigned to city.

November 10, 1917, San Diego Union, 5:4. Commissioner F. F. Grant replies to story in **San Diego Sun** on expenditures; says books are kept properly; City Auditor Moody has sent City Attorney Cosgrove a letter stating Park Fund is now exhausted and that the Board is borrowing money from the banks at 6 percent.

November 11, 1917, San Diego Union, 1:5, 12:2. Park head urges mayor to probe affairs of Board; "merely a misunderstanding," says Mayor Wilde after listening to all sides.

November 11, 1917, San Diego Union, 4:5-6. Henry C. Ryan, Park Board member, writes letter scoring attacks and insinuations by "male person masquerading as editor" of **The San Diego Sun**.

This stuff reads like the mouthings of some wild-eyed I. W. W. or an Emma Goldman.

November 12, 1917, San Diego Sun, 1:6. EDITORIAL: Come on, Jedge --- If you'll agree to sue us for libel --- make it \$50,000 Jedge --- you could use that, now couldn't you? If you'll agree to sue, we will agree to just make a nice lady-like defense, and help you get all the damages you can --- isn't that fair enough?

November 12, 1917, San Diego Sun, 1:6. Extra deputy to check park accounts; City Auditor Moody lays plans for the employment of an extra deputy.

November 13, 1917, San Diego Union, 1:3. Soldiers win commendation from Walter P. Moore, vice president of the San Diego City Council, for deportment less than four arrests a day with 30,000 service men stationed here; 85 percent of those arrested charged with intoxication.

November 14, 1917, San Diego Sun, 1:1. Frank C. Osgood, deputy city auditor, to probe Park Accounts.

November 14, 1917, San Diego Sun, 7:2-8. Palace of Industrial Arts proposed by Rau and Palmer, Inc. as permanent market; plans drawn by Henry Lord Gay, architect, and Robert Ime Recht, associate architect.

November 14, 1917, San Diego Union, 4:3. Opening night of annual exhibit of San Diego Art Guild in Fine Arts building last night.

November 14, 1917, San Diego Union, 6:3-6. Training Station eleven takes football game from Coronado High School lads by 27-6 score.

November 14, 1917, San Diego Union, 6:3-4. Exempted draft men are barred from Navy.

November 14, 1917, San Diego Union, 6:5. Christian Scientists maintain place for servicemen in Spreckels Theater building.

November 14, 1917, San Diego Union, 6:6. Naval Training Station basketball team is making great record.

November 14, 1917, San Diego Union, 7:1 Utah field artillery football team at Camp Kearny will not be permitted to make the trip to Salt Lake City during the Thanksgiving holidays.

November 14, 1917, San Diego Union. 7:3. New radio school attracts sailors at Naval Training Station; classed held daily with fifty men in attendance; 100 taking night course; five men obtaining the highest marks in examinations each week are sent to Harvard University for further study; the Naval Y. M. C. A. at Balboa Park is assisting the men in their studies.

November 14, 1917, San Diego Union, 7:3. "Fake" wrestling match last night at Balboa Park entertained sailors.

November 15, 1917, San Diego Sun, II, 9:4. "Community Sing" planned at Organ Pavilion next Sunday afternoon; enlisted men and civilians invited.

November 16, 1917, Letter, Captain S. S. Brundred, 21st Infantry, adjutant, to John Morley requesting permission to use a plot of ground east of the zoo as a pistol target range.

November 16, 1917, San Diego Daily Transcript, 4:1. President Henry C. Ryan, of the Board of Park Commissioners, in a communication to City Attorney Cosgrove covered all the points made by Auditor

Moody as to the methods of the Commission, giving full explanations of all the transactions in which the Commission took part.

November 16, 1917, San Diego Sun, 1:7-8, 6:3. Judge Ryan is guilty of misconduct by his own admission; held funds rather than depositing them with the city treasurer as called for in the city charter.

November 16, 1917, San Diego Union, Women's Page, 8:5. The enlisted men of the Army and Navy stationed in San Diego are invited to the big "sing" at the Organ Pavilion next Sunday afternoon.

November 16, 1917, San Diego Union, Classified, 9:1. Park Board makes full explanation covering charges; President Henry C. Ryan, in communication, replies to complaints of City Auditor H. L. Moody.

November 16, 1917, San Diego Union, Classified, 9:2-4. Thousands of participants ready for great pageant of Freedom; complete full dress rehearsal to be held at Stadium tonight.

November 18, 1917, San Diego Union, 1:7, 4:3. 40th U. S. Army Division, 30,000 strong, passed in review yesterday before great throng at Camp Kearny, by B. P.

November 18, 1917, San Diego Union, 1:8, 4:3-4. "March of Democracy" shown before vast audience at Stadium; great historical events portrayed with vivid realism from Marathon to setting up Republic in America; eight episodes depict world struggle; camels and oxen used.

November 18, 1917, San Diego Union, 4:8. Art Notes, by R. R. --- Mrs. Scofield's statuette "Hippity Hop" at Art Guild exhibition in Balboa Park.

November 18, 1917, San Diego Union, Sports & Auto Section, 1:2-3. Plan proposed to move 23 of 26 elk from Balboa Park to deer park in Cleveland National Forest between Descanso and Campo; Dr. Harry Wegeforth, president of Zoological Society, and Nels Dun, sportsman, approve.

November 21, 1917, Letter, Executive Secretary, Board of Park Commissioners to Captain S. S. Brundred granting permission to use a plot of ground east of the zoo as a pistol target range.

November 21, 1917, San Diego Daily Transcript, 4:1. Owing to the fact that the U. S. Government owes the Park Commission \$17,000, it will not be necessary to hold up the pay of any park employees as the money will be forthcoming shortly.

November 21, 1917, San Diego Sun, 6:3. Take the flying course in Park.

Naval officers and mechanics, who are soon to become naval flyers at Rockwell field on North Island, are now receiving a course of instruction at the naval headquarters in Balboa park, pending the completion of their school on North Island. Under the command of Lieut. Earl Spencer, Jr., the members of the school are fast acquiring the first course in the art of flying.

Only the best men available are being taken in the flying corps, as upon these men will devolve the duty of guarding the fleets from attack by hostile aircraft and submarines. Skilled men of every trade are wanted for this highly important branch of the naval service. Mechanics, tailors, electricians, photographers and others are especially desired. Promotions will come rapidly to those who shown an aptitude for naval aircraft work.

New buildings are to be erected on the western half of North Island and the army flying school, which is now located here, will vacate in favor of the naval flyers as soon as the buildings are completed.

November 21, 1917, San Diego Union, 8:1. Turkey shortage here for Thanksgiving predicted.

November 21, 1917, San Diego Union, 8:3. Park employees' payroll is not to be held up; Board, city attorney, auditor find way to make money due; United States owes \$17,000 for work performed by Park

Board preparing for the coming of naval apprentices to Balboa Park; original indebtedness amount to about \$46,000.

November 22, 1917, San Diego Herald, 3:4. Our advantages for expositions and conventions.

(Excerpts)

San Diego has received big interest on every dollar invested in her great Exposition. The interest did not stop when the lights went out at midnight on January 1, but will continue to be added to San Diego's account for decades to come. It is to be expected that San Diegans will be the last ones to accept the Exposition benefits.

It there were no other benefits, this one of being placed indelibly on the map is worth the money invested.

The Exposition itself has convinced the five million visitors, who came here during the two years, that San Diego is a wonderful place to live. Further than this the Exposition greeted the most influential men in the United States and made them friends of San Diego.

As to the tangible effects of the Exposition, San Diego will receive a wonderful park, invested with the memories of a great world's exposition, and every drive, and every remaining feature will bring a message from the days of San Diego's early glory.

Now that the Exposition has come to a close, the larger and more substantial buildings can be retained and used for convention purposes.

The splendid stadium in the park is another feature which impresses all visitors. The stadium is probably the finest in the United States from the point of utility. Money might build a more costly one, but nowhere else will climatic conditions permit the full use of which is possible only here.

November 22, 1917, San Diego Herald, 8:1. San Diego's greatest charm is beautiful Balboa Park, by T. N. Faulconer.

"When San Diego has become a city of a million inhabitants, then will she have caught her with her park system."

These are the words of a prominent official of the United States War Department, who recently visited San Diego to inspect the Army, Navy and Marine camps in Balboa Park.

Numerically and in acreage, San Diego always has been blessed with a superabundance of parks. Scattered here and there over the entire incorporated area of the city, are twenty-three parks, totaling in area nearly two thousand acres, and, thanks to the appreciation of a generous public and more especially to the adventitious circumstances of Balboa Park having been chosen as the site for the Panama-California Exposition, San Diego may claim the distinction of having one of the most beautiful parks in America, as well as to enormous park acreage.

Nor do size and beauty comprise entirely the value of this unusual park system, for the old Exposition grounds and buildings have aided in no small measure the city of San Diego in "doing of her bit" for the nation at war. Two thousand apprentice seamen are in training in the Exposition grounds, with the famous Plaza de Panama for a "deck" or drill ground, and the Exposition buildings, stripped of their exhibits, and fitted out for barrack, armories, executive offices, canteens and other necessary navy quarters.

Nearly two thousand United States Marines are quartered in the buildings grouped about the Spreckels Organ Pavilion. The daily grind of grueling drills and exercises preparatory to "going over the top" are wearing on the nerves, and, in their leisure hours, men of the Marine Corps enjoy to the fullest their beautiful surroundings.

Upon the Isthmus, where in Exposition days the raucous voice of the ballyhoo man and the conglomerate strains from a dozen or more sideshow bands made might hideous, sounds only the footfall of a sentry, the bugle notes of "taps" and the sharp challenges of the guards. Here are spread the tents of the Twenty-first Infantry and of Coast Artillery sections, polishing up their bayonets and their French in final preparation for the longed-for orders for the eastern seaboard and the Front.

Because of this military conception it has been made possible for the Park Department to maintain the Exposition grounds, for all practical purposes, in their pristine Exposition glory, and none of the handsome temporary structures will be razed during such occupancy. Thousands of pigeons still haunt the famous Plaza and the visitor to Balboa Park still has his or her picture taken in the midst of a hungry host of them feeding from hand, head, shoulder or any other part of the anatomy upon which grain has been placed for them.

And to Balboa Park San Diego business people are more deeply indebted than is generally realized. Nearly \$1500 is being expended in San Diego each day for foodstuffs for the men encamped in the Exposition grounds. The monthly payroll for the men in these camps is slightly in excess of \$150,000. Just what proportion of this amount is spend in San Diego is, of course, problematical, but, to quote not one, but many army and naval officers, "two trips downtown and a soldier or sailor borrows cigarettes until the next payday."

In addition to the fourteen hundred acre Balboa Park, nearly six acres of lawn, shrubs and flowers are maintained at La Jolla.

On Point Loma, Spaulding Park and Cabrillo Park are under cultivation and are much utilized by tourists and automobile parties from the city.

Washington Square, or Old Town Park, about which centers much historic interest, is visited by many thousands of people each year.

New Town Park in the southwest section of the city, perhaps, affords more pleasure and necessary recreation to the working people of the city and to the man out of a job than any other park in the city. Here congregate the factory men and women from nearby industrial plants to absorb sunshine and fresh air during the noon hour. Here the down-and-outter, unmolested, rests his weary bones and gathers together his courage for another joust with outrageous fortune.

The Broadway Plaza, where blazes in nightly splendor the electric fountain donated to the city by Louis J. Wilde, affords to the weary shopper and the footsore sightseer a haven of rest. Its green lawns, modern and well-kept comfort stations, and resting places have proven a boon to the men of the cantonment at Camp Kearny. Strangers in a strange land, they find it stupid business roaming the sidewalks and waiting for stage or train to carry them back to camp, and, on liberty days, the Plaza lawns are almost obscured from sight by the khaki-clad figures reposing on its inviting bosom.

There, no doubt, are isolated hamlets in the United States where San Diego is but a name, but the praise of San Diego's parks, upon the lips of millions of visitors, has gone to the four corners of the civilized world. San Diego has charmed visitors from all over the world and to Balboa Park does she owe the greatest of her charms.

November 23, 1917, San Diego Daily Transcript, 4:1. All park employees will be paid their salaries at the usual time as the American National Bank will take the note of the Park Commission until such time as the money owed by the federal government to the Commission is available.

November 24, 1917, San Diego Union, 10:1. People's Chorus of seventy-three voices will sing at Park tomorrow; organization under direction of Willibald Lehmann to be heard at organ.

For civilians the charge of admission is nominal, being at the usual rate of 25 cents throughout, plus a war tax of about two cents.

November 25, 1917, San Diego Union, 13:2-5. Naval Aircraft School arouses interest in flying here.

Lieut. Earl Spencer, Jr. and Lieut. Frank Simpson, Jr., respectively commanding officer and executive officer of the naval aircraft school are both veteran naval airmen.

The first of a number of seaplanes which have been ordered for the local naval school is now at Balboa Park. Simultaneous with instruction in naval training, the ninety youths that now form the enlisted personnel of the school are being taught aviation from the ground up.

November 25, 1917, San Diego Sun, Society and Club, 2:3-4. Peoples Chorus to sing today; capacity audience expected at Organ Pavilion; Mrs. W. H. Porterfield, soprano, will appear as soloist; Willibald Lehmann to conduct.

November 26, 1917, San Diego Sun, 10:1. Peoples Chorus concert in Balboa Park Sunday afternoon enjoyed.

November 28, 1917, San Diego Union, Women's Page, 10:2. Peoples Chorus wins praise; Mrs. W. H. Porterfield sang the aria "Il est doux" from "Herodiade" by Massenet with Willibald Lehmann accompanying her at the piano.

November 28, 1917, San Diego Union, Women's Page, 10:2. Thanksgiving service in park tomorrow; all churches in city will join; soloists: Mrs. W. H. Porterfield, soprano; Miss Eleanor Lee, contralto; Dr. H.J. Steward, organist.

November 29, 1917, San Diego Daily Transcript, 4:1. There will be a big Thanksgiving service at the Spreckels Organ, most of the churches in San Diego being represented.

November 29, 1917, San Diego Sun, 1:4. Cheerless Day For These Boys

Right on the public roadway through Balboa Park and bordering the Isthmus which once range with the mirth of exposition throngs --- right within sight and hearing of Thanksgiving celebrations --- are a group of the loneliest boys spending the most cheerless Thanksgiving of their lives.

Wearing the white uniforms of interned sailors, they are penned up in a hog-wire quarantine camp, waiting until the navy doctors are satisfied there are no disease bugs in their systems.

For every recruit at Balboa Park must spend a period in the quarantine as a measure of health protection to the hosts in training.

November 29, 1917, San Diego Sun, 1:8. City's operating department purchase bureau buys for Park Board; ordinance passed yesterday appropriating \$1461 from park funds for purchase of cigarettes and tobacco; a savings of \$490 or more than 30 percent anticipated over system of direct Park Board purchase.

November 29, 1917, San Diego Union, 9:6. Hostess Gallery in California Quadrangle opened to servicemen under auspices of Y. W. C. A.

November 29, 1917, San Diego Union, 9:6. As a result of an ordinance passed by the Council yesterday cigarettes and tobacco to be sold at the refreshments stands in Balboa Park will be purchased by the city operating department instead of by the park commission.

November 29, 1917, San Diego Union, 9:6. Thanksgiving program of athletic stunts for boys at the Naval Training Camp to be held on Plaza, auspices of Y. M. C. A.

November 30, 1917, San Diego Daily Transcript, 4:1. The civic music committee has arranged a fine concert to be held at the Organ Pavilion next Sunday afternoon.

November 30, 1917, San Diego Union, 7:1-2. Lakeside entertains many with grand celebration; five thousand gather for Thanksgiving Day program; music by 157th Infantry Band from Camp Kearny; boys of the 18th Company execute drills.

November 30, 1917, San Diego Union, 7:3. Union services drew many to park; Dr. Lincoln A. Ferris, pastor of First Methodist Episcopal Church, delivered Thanksgiving address; impressive musical program; soldiers and sailors acted as usher and took up a collection for the benefit of the poor by the Associated Charities of San Diego.

December 4, 1917, San Diego Daily Transcript, 4:1. The payment of park employees for the rest of the year is now assured as the Park Board has received from the government a check for \$13,969 for work on the Naval Training Station in the park. A sum of \$8,000 is still due.

December 4, 1917, San Diego Sun, 11:5. Receipt of a Navy Department check for \$13,969 received by Park Board, part payment for about \$45,000 worth of work, of which about \$8,000 is still due; park payroll for latter part of November paid with borrowed money.

December 4, 1917, San Diego Union, 5:6. Park Board gets \$13,969; government pays for work done by city employees at Naval Training Station; balance still due about \$30,000; check relieves tension by Park Board for some time.

December 8, 1917, San Diego Union, 11:1. "Community Sing" to be held at Organ Pavilion tomorrow afternoon; arrangements made by Miss Gertrude Gilbert; soldiers and sailors expected to be present.

December 10, 1917, San Diego Union, 8:5. Women of city knitting sweaters for men in Army Engineer Corps at Camp Kearny.

December 10, 1917, San Diego Union, 9:1. "Community Sing" at park marked by enthusiasm; affair held at Organ Pavilion yesterday afternoon is part of a nation-wide movement; singing led from stage by Mrs. L. L. Rowan; Mrs. M. P. Hesse at the organ.

December 14, 1917, Minutes of the Board of Park Commissioners.

A motion was made and carried directing the Executive Secretary to demand of the 1916 Exposition Company a statement of its account against the Park Department in order that the matter might be definitely settled before the close of the current year.

December 14, 1917, San Diego Daily Transcript, 4:1. Mrs. G. A. Haussen, singer, will give several solos during the organ recital Sunday.

December 15, 1917, San Diego Daily Transcript, 4:1. Impressive ceremonies in Old Town today when Mormon soldiers from Camp Kearny and city officials united in commemorating the Mormon battalion camping there 72 years ago.

December 17, 1917, San Diego Daily Transcript, 14:1. Madame Schumann-Heink presented the regimental colors to the 21st Infantry this afternoon in the park, following a parade of the troops.

December 18, 1917, Letter, Board of Park Commissioners, to Quartermaster Rowe, 21st Infantry, San Diego, California

Dear Sir; Last June while the 15th Company of the Coast Artillery was located on the Exposition grounds we did repair work on account of plumbing for them amounting to \$4.74. Bill for same was sent to them at that time but we have received no remittance covering same. As they have left the grounds and we do not know

where to address them we thought you might be able to give us some information as to how to reach them in order to get this little matter adjusted before the end of the year. Any information that you may give us will be greatly appreciated.

Respectfully.

December 18, 1917, San Diego Union, 11:6. Christmas celebration planned; fete to be held at Plaza de Panama; Miss Gertrude Gilbert making plans; four quartets to sing from four balconies on four sides of Plaza; Christmas living pictures modeled from famous paintings to be shown at Organ Pavilion.

December 19, 1917, San Diego Daily Transcript, 4:1. Owing to the generosity of Madame Schumann-Heink \$300 was added to the wool fund for sweaters for the 21st Infantry.

December 19, 1917, San Diego Union, 5:3. Inter-Regimental contest set for New Year's at Camp Kearny.

December 19, 1917, San Diego Union, 5:4. Madame Schumann-Heink gives \$300 toward wool fund for the soldiers of the 21st Regiment.

December 19, 1917, San Diego Union, 5:5. Huge Christmas celebration planned at Camp Kearny.

December 20, 1917, San Diego Union, 8:3. Christmas carols to be heard plan most elaborate Yuletide celebration ever held in Balboa Park.

December 20, 1917, San Diego Union, 8:3 Psychology class for mothers to meet today in the psychology laboratory in the Indian Arts Building in Balboa Park.

December 20, 1917, San Diego Union, 8:3. J. M. Kendall, baritone, will sing at organ Sunday.

December 21, 1917, Letter (Indecipherable) Colonel, 21st Infantry, Commanding, to the Board of Park Commissioners, Balboa Park, San Diego, Calif.

Sirs" In connection with the claim for damages in the Panama Canal and streets of the Panama Buildings and the Hawaiian Village, during occupancy by the Officers and men of the United States Army, the following information is desired"

- (a.) The sale value of the items upon which the total amount claimed is based, taking into consideration depreciation and the value at the time of occupancy by the troops.
- (b.) The intentions of the Board as to the future use and occupancy of the buildings and streets in question at the time of the taking over of the buildings by the Commanding Officer, Camp Taliaferro.
- (c.) The probable time of the wrecking of the buildings referred to.

December 21, 1917, San Diego Daily Transcript, 4:1. Arrangements have been completed for the installation on the Plaza at Balboa Park of a 60-ft. Christmas tree. The tree is for the soldiers and sailors at the park on Christmas even, when Madame Schumann-Heink will sing.

December 21, 1917, San Diego Sun, 3:5. Great Christmas tree is planned for Plaza in Balboa Park.

December 23, 1917, San Diego Union, 5:2. 60-ft. Christmas tree set up in Horton Plaza; Madame Schumann-Heink to open program on Christmas eve.

December 23, 1917, San Diego Union, 6:6. Jolly Christmas planned for boys at Naval Training Center; program of athletic events on Plaza Christmas morning.

December 24, 1917, San Diego Sun. Program at Community Christmas tree at Plaza tonight.

December 24, 1917, San Diego Sun, 1:3. Mayor Wilde threatens to fire Park Board; wants the Council to back plan.

A new park board may be Mayor Wilde's Christmas present to San Diego. Startling council at the very end of a languid session this morning, Wilde stated that an entire new board should supplant Commissioners H. C. Ryan, F. F. Grant and Arthur Cosgrove.

"Go ahead. It's all within your jurisdiction," said Councilman Bacon, after Wilde had suggested a round robin to discuss new members.

The mayor signified he wanted support of the council in such a change.

"We'll give you reinforced concrete," vowed Bard, laughing.

"Public affairs are too important to allow gross carelessness," the mayor explained, "and the park board is too important. I don't think Judge Ryan nor Grant nor Cosgrove would do wrong, but I think they have a whole lot to learn about the park business.

"They are in trouble with warrants and always are spending money when they have none in the treasury, the auditor tells me. They have their affairs straightened out for them, and still they disregard business methods."

Moore then spoke and attributed the faults to ignorance, and not to willful wrongdoing. The mayor said he believed this was true, but he recommended that they "get together or get out."

"There has been a great deal of complaint about the park board," the mayor said.

Mayor Wilde appointed Cosgrove and Grant. Ryan was an appointee of Mayor Capps after Wilde's election but before he took office. Even since **The Sun** expose of the notorious Eno contract at park refreshment booths, park irregularities have occurred, making it necessary for Auditor Moody to employ a deputy to audit the park board accounts, and install a system in accordance with the auditing methods required by the city charter.

The Eno contract was enacted by Grant and Ryan over the protest of Cosgrove. Subsequent difficulties have been various from a public fund by Ryan to the issuance of warrants without money to meet them in the treasurer's office.

The mayor did not hint who may succeed the present members. Councilman Bard and Bacon emphatically stated they would stand by him in any change. Moore appeared to favor giving the members another chance. Bruschi was silent.

December 24, 1917, San Diego Union, 12:1. Christmas night pageant at Balboa Park; carols by vested choirs; living pictures of Bible stories; lighting effects.

December 24, 1917, San Diego Union, 12:2. Royal A. Brown, organist at St. Joseph's Church at San Diego, gave recital at organ yesterday.

December 25, 1917, San Diego Sun, 1:7, 2:6. Joyous Christmas here observed in fitting manner.

December 25, 1917, San Diego Union, 1:2-3, 2:3. Yuletide greetings to soldiers, sailors, San Diego's message; Madame Schumann-Heink sings "Star Spangled Banner" at municipal Christmas tree in Horton Plaza; 21st Infantry Band gives concert, including marching song by Raum and Eaton, two local women.

December 25, 1917, San Diego Union, 6:5. Christmas frolic held by future man-o'-warsmen; Pere Noel, alias Chief Master-at-Arms J. G. Murphy, presided at Navy Celebration.

There is a Santa Claus for sea folks as well as for land folks. This was proved last night when the jolly saint came to the former Cristobal café, now the mess hall of the United States naval training camp, Balboa Park, San Diego.

December 25, 1917, San Diego Union, 14:1. Pere Noel to reign at Balboa Park; Christmas carols, living pictures of Biblical scenes feature entertainment.

December 26, 1917, San Diego Daily Transcript, 4:1. Four quartets in red and white vestments last night sang Christmas carols at Balboa Park, afterward forming a choir and marching to the Organ Pavilion, carrying lighted candles, while singing "Holy Night."

December 26, 1917, San Diego Sun, 2:3. Park Board is causing comment.

December 26, 1917, San Diego Sun, 9:3-4. Navy Training Station enjoys happy Christmas.

December 26, 1917, San Diego Union, 8:4-5. Navy Training Station lads have rollicking Christmas; carols sung early in morning; 2400 pounds of Turkey; "high jinks" began at 8:20; contestants dive in flour to bring up coins in teeth.

December 26, 1917, San Diego Union, 9:1. Carols are sung by vested choirs in Balboa Park; beautiful ceremony draws thousands; living pictures of events in life of Christ.

December 27, 1917, San Diego Union, 6:3. San Diego Naval Air School now largest in U. S.; more than 700 flyers and mechanics at Balboa Park Aviation Institution; approximately 125 more will report for active duty January 2; by February 1 the total number of officers and men attached to the Naval Air Station at Balboa Park and the Naval Flying School at North Island is expected to exceed 1700.

December 28, 1917, San Diego Sun, 4:6-7. Mayor Wilde, in hot replay to councilman Moore, says San Diego has one foot in the grave.

Now I don't care a rap for this ungrateful-thankless-breadless-meatless office, but as long as I am here I will not let a failure in life who is not even on the tax roll, or as much as a dollar dog tax, tell me how it should run by office, and it is treason to the city government to play up a hostile who is wise only in his own conceit.

December 28, 1917, San Diego Union, 12:2. Reception to be held at Hostess Gallery in Balboa Park; War Work Council of Y. W. C. A. will entertain with open house Monday; hostess gallery situated in corridor of California Building and is entered from Fine Arts Gallery.

December 30, 1917, San Diego Union, 10:4. War Work Council of Y. W. C. A. tendered use of Hostess Gallery at Balboa Park.

December 30, 1917, San Diego Union, Classified, 1:3-4. Balboa Park zoo declared largest on Pacific Coast.

According to Keeper Friedman, the San Diego Zoological Society, of which Dr. Paul Wegeforth is president, has now the largest and finest collection of animals on the Pacific coast at Balboa Park.

Daily at 2:30 in the afternoon, except Monday, the animals are given their meals --- breakfast, lunch and dinner, all in one --- and the entertainment afforded the crowds of onlookers is wonderfully interesting. Many of the animals, including some of the lions, the big brown bear, wild cats, monkeys and hyena, have been trained by Friedman and perform at his bidding for the amusement of spectators.

Old and broken down horses are purchased by the society for use in feeding the animals at the Balboa Park zoo, and it takes three a week to take care of the daily meal.

Visitors are allowed at the zoo at anytime during the day, and cars on route No.7 and 11 now stop within a few steps of the cages, making unnecessary the long walk to and from the old Exposition entrance.

December 31, 1917, San Diego Sun, 3:1-2. City tax rate remains at \$1.98; Old Town bridge item killed; Mayor Wilde wins.

December 31, 1917, San Diego Union, 7:6. Balboa sailors to hold fistic bouts on Plaza; Navy men will celebrate this evening with special New Year's boxing show; area constructed.

December, 1917. SUPERINTENDENT'S REPORT FOR DECEMBER 1917.

The continued dry weather is proving a serious condition in the department, necessitating the use of every available hose, and the transfer of men to water the trees and shrubs on the North and East boundaries of Balboa Park. The trees and shrubs were planted without blasting the ground, consequently the root action is all on the surface and during a drought such as is at present existing, it becomes necessary to water all the trees and shrubs which in a season of rainfall would not be needed.

Several hundred trees and shrubs have died and should the dry weather continue much longer we will probably lose a great many more, as the limited number of employees does not permit of use being able to water sufficiently in a short time to overcome existing conditions.

The dry weather is also proving serious for the Park roads that have a large amount of traffic, as they are drying out and the binder will not hold as well as when there is some moisture in the roadbed. Consequently about all the team work is to be expended on road maintenance.

The rearrangement of the Conservatory has been completed and the change by thinning out some of the larger palms, etc. will prove very beneficial to the remaining plants. The pruning of the trees, shrubs, etc. in the Exposition grounds is about half completed and during the next two months the rearrangement of a large area of the planting will be necessary owing to the large growth of the trees and shrubs.

In the park, general maintenance has been the chief work with the exception of some seasonable planting for spring flowers. 16,912 plants were utilized in the Park and Exposition grounds, including the Formal Garden, which has been planted to pansies and schizanthus.

The Nursery Department has been busy with propagating and general nursery work. A large quantity of poinsettias and other decorating material was furnished by the nursery and other sections of the Park for the Officers and Hospitals of the Army and Navy at the Exposition grounds, Camp Kearny and Fort Rosecrans, the Children's Home and Playgrounds for Christmas. Plants were also donated to the Navy Y. M. C. A., Chamber of Commerce and Children's Home. Following is a detailed statement of the Nursery for the month to the various places.

(Statement not included.)

ELECTRICAL AND BUILDING DEPARTMENT

The roof and staff repair work on the Indian Arts, Science of Man, Administration Building and the warehouse and shops has been completed with the exception of two towers, one on the Science of Man and one on the Indian Arts Building.

NAVY DEPARTMENT

Repairing the roof and parapet, walls and cornices of the San Joaquin Valley Building for the Naval Aviation School we used the asphalt salvaged from the skating rink. The balance of the material was purchase. The total amount of the bill was \$330.00 including percentage.

Estimates have also been made for painting the West and South walls, repairing and waterproofing tower, cornice and staff work for \$350.00 on the San Joaquin Building for the Aviation School. As yet we have not received orders for the work.

Repairing the walls and staff at the East entrance and all buildings used by the Navy is nearly completed. \$300.00 has been allowed for the work. Repairs to trusses, in the Southern Counties Building, has been deferred until January when we will be able to salvage the timbers from the Panama Canal Building. As they are well seasoned, they will answer the purpose much better than new timber.

The Department also erected stage and accessories for the Christmas night celebration at the Organ Pavilion, the cost of which will be paid by the Committee in charge of the evening's entertainment.

Salvage sales for the month amounted to

Copper wiring and electric salvage	36.00
Lumber	49.20
Miscellaneous	59.13
Army Y. M. C. A. account	5.69
Navy Y. M. C. A. account	.60
Naval Training Camp	127.86
21 st Infantry	<u>.48</u>
	\$278.96

GEORGE WHITE MARSTON: A FAMILY CHRONICLE, Vol. 2, 1956, p. 98.

The three members of the California Commission had administered the California Building during and after the exposition of 1915 with funds secured from time to time from the state legislature. In correspondence with Governor C. C. Young and other state officials regarding the commission after Mr. Allen's death, father was informed that the commission has no legal status after 1917, that it has been continued through acquiescence only, and that in the future it would be considered as abolished. The funds currently appropriated would not be available; their appropriation was deemed illegal. Upon receiving this information the San Diego Park Commission assumed the responsibility of maintaining the California Building. Father and Mr. O'Hallaran were congratulated for having secured "illegal appropriations" for San Diego for such a long time.

January 1, 1918, San Diego Union, Supplemental Sections, 3:1-8. 2,000 bluejackets from western states study in great park.

In time of peace prepare for war.

That's what San Diego did when she constructed the handsome buildings for the 1915-16 Exposition at Balboa Park.

During the two years that the arts and crafts of the world were on the peaceful display at the Exposition, few entertained or had the remotest idea that the buildings where these exhibits were housed would be converted within a few short months into a great naval training station. The unexpected happened, however.

Today the Exposition grounds, exquisitely beautiful as ever, are the home of more than two thousand bluejackets gathered from all sections of the west and middle west. These boys --- for the majority

are still in their teens --- are training to fill responsible billets with the high seas fleet or with the naval air service.

San Diego is fundamentally a great military and naval city. Every phase of governmental activities connected with the army and navy is to be found here. The officer, the bluejacket, the soldier and the marine are as closely identified with the civic affairs of the municipality as is the civilian resident. And Uncle Sam is expending millions of dollars in furnishing these military and naval representatives with homes of which they may well be proud.

Aside from Camp Kearny the three chief governmental installations at San Diego are the army and navy flying academy at Rockwell field, North Island, the \$4,000,000 marine base on Dutch Flats, and the naval training station at Balboa Park. All are or will be extremely picturesque and beautiful. They could not be anything else in this, the garden spot of the world.

The bluejackets at Balboa Park eat the daily meals under the canopy of a matchless blue sky, the dining tables paralleling one of the most beautiful flower gardens to be found in Southern California. Each afternoon the lads are treated to an organ recital on the largest outdoor organ in the United States. The parade grounds is of concrete, banked by shrubbery and flora. Therefore, it is no wonder that the San Diego naval training station, since its inception, July, 1917, has turned out more healthy, qualified seamen according to its pro rate of satisfied personnel than any other training station in the country.

Buildings Put to Use

It is interesting to note to what uses the former Exposition buildings were utilized by the navy. The Cristobal café, the scene of many a brilliant banquet during the Exposition period, was converted into a galley, bakeship and mess hall within twenty days after the government took possession. The government fisheries building at the head of the "Isthmus," or amusement street, was converted into a wash house and shower bath establishment. The first comers hung their "scrub and wash clothes" on nearby rose bushes. Now the bushes are left to the roses while the clothes hang out to dry on regular clothes lines. It is more efficient and neater even though less picturesque.

The Varied Industries and Canadian buildings were converted into barracks, stanchions being placed so that the bluejackets could hang their hammocks in regular seagoing style. The sides of the building were lined with big racks. The naval administration building formerly housed the exhibits of Southern California.

Study for Naval Air Service

The ground school of the naval air service is located in the San Joaquin Valley Building. Here hundreds of bluejackets are being taught the fundamentals of naval aviation from the assembling and operation of high speed aeronautical engines to the maintenance and handling of huge coast patrol dirigibles or "blimps."

The bluejackets attached to the naval training station proper are being instructed in every phase of naval life. Owing to war conditions they are not sent to sea on training cruises, but, after leaving Balboa Park, are sent directly to ships and shore stations for active duty. Due to the splendid physical training received, however, the lads quickly attain their sea legs once they are added to the ship's company of one of Uncle Sam's sea fighters.

Captain William E. Brotherton is in command of the naval training station. Lieut. Earl Spencer, Jr. is in command of the naval air service school.

Sharing the popularity of sailors and soldiers, the stalwart marines of the Balboa Park camp enjoy life in this favored clime. Several hundreds of the "soldiers of the sea," most of them from training stations

of the north, are occupying the delightful location of the marine camp on the southern edge of the park and overlooking Cabrillo Canyon, while, on the opposite side, the beautiful gardens of the park present a constant picture of brilliant flowers and foliage.

January 1, 1918, San Diego Union, Supplemental Section, 3:1-8 (?), Nothing like this in San Diego . . . comparison of climatic conditions at military camps on the east coast to conditions in San Diego.

January 1, 1918, San Diego Union, Supplemental Sections, 3:1-3. Artistic development keeps pace with civic growth; famous artists perform in city within past year; music clubs promote study and bring noted musicians to San Diego for concerts, by Gertrude Gilbert.

January 1, 1918, San Diego Union, Supplemental Sections, 4:1-4. Naval Training Station occupies splendid location; buildings at San Diego Exposition home of recruits.

January 1, 1918, San Diego Union, Supplemental Sections, 4:5-6. Training camp for officers soon to open.

January 1, 1918, San Diego Union, Supplemental Sections, 4:6. Future seamen find blue water [of San Diego Bay] of deep interest.

January 1, 1918, San Diego Union, Supplemental Sections, 4:7. Towers of wireless [at Chollas Heights] largest in world.

January 1, 1918, San Diego Union, Supplemental Sections, 4:8. Radio plants at San Diego give world connection; aerial messages from capitals of entire globe heard in great stations here.

January 1, 1918, San Diego Union, Supplemental Sections, 5:1. Youthful sailors drill, study in fragrant gardens; "Model Farm" at park is delight of service men.

Sailors, soldiers and marines in training at Balboa Park find especial delight in what was one of the most interesting exhibits during the exposition years of 1915 and 1916. This is the "Model Farm," showing what can be accomplished on a five-acre tract in the way of diversified horticulture, making it an object lesson, not only to horticulturists in general, but to those contemplating the development of such a proposition.

From the time of its inception until the close of the exposition, December 31, 1916, the exposition commissioners from the eight southern counties of the state, and their efficient superintendent Charles Wilson had charge of the model farm along with their excellent exhibit in the Southern Counties building.

Since the close of the fair, the board of park commissioners has maintained the model farm and gardens as near as possible to the high standard of the exposition period.

Farm Is Interesting

The farm is still one of the most interesting sections of the park for the service men and their visitors, who seem to know all about it, from letters and published literature distributed all over the country. When told that the orchard is but five years old, they marvel at the luxuriance of the growth, which is only possible in Southern California.

It is interesting to see such a large selection of flowers, fruits and vegetables growing on a small farm, and the variety is very large, viz. navel oranges, Valencia oranges, Mediterranean sweets, grapefruit, tangerines, citrons, Mexican limes, sweet limes, kumquats and lemons in the citrus orchard, and peaches, apricots, almonds, plums, prunes, pears, apples, persimmons, quinces, figs, walnuts and chestnuts in the deciduous orchard.

Varieties Are Many

There are also planned for experimental purposes avocados, cherimoyas and sapote. Berries and small fruits comprise the following varieties: grapes, raspberries, loganberries, blackberries, dewberries, guavas, rejoia mellowiana (pineapple guava), and pear guava. Vegetables grown include tomatoes, celery, lettuce, beets, carrots, peas, beans, squash, turnips, parsnips, rhubarb, sugar beets, stock beets, sweet corn, field corn and milo maize.

The ornamental features must not be overlooked. There is a large lawn and a choice collection of shrubs, roses, palms, etc., surrounding the residence which tend to add to the attractiveness of the farm. There is also a complete poultry equipment consisting of modern chicken houses and yards, incubator house and store house.

The model farm, which was an interesting feature during the fair, is, at present, the residence of the superintendent of parks.

January 1, 1918, San Diego Union, Supplemental Sections, 5:1. 1,000 men coming to Aviation School [at Balboa Park and North Island] in San Diego; study of aerial navigation to be followed by recruits from western states.

January 1, 1918, San Diego Union, Supplemental Sections, 5:8. County library cares for needs of service men; branches opened at Camp Kearny and North Island supplies reading matter.

January 2, 1918, Correspondence, John Morley, San Diego Public Library. . . . Letter, C. W. Spencer, Jr., U. S. N., requesting use of Fair Station by Naval Air Station, Balboa Park.

January 2, 1918, San Diego Union, 1:3-7, 12:1-5. Navy beats Army at football; sailors humble Utahans, old rivals, before great crowd; 24 to 13 clash is played for benefit of Red Cross; patriotic scenes prevail as 15,000 spectators see championship decided, by Lewis H. Falk.

January 3, 1918, San Diego Union, 1:3-6, 5:2-3. One hundred and twenty-seven boys, future aircraft pilots, march from recruiting station at 8th and Broadway to school at Balboa Park.

January 3, 1918, San Diego Union, 1:6, 5:6. New drive to begin; \$10,000 wanted here to provide healthful amusements of U. S. fighting men.

January 3, 1918, San Diego Union, 5:1. G. A. Davidson, speaker, explains purpose of thrift stamp campaign to Ad Club members.

January 4, 1918, Minutes of the Board of Park Commissioners.

The Executive Secretary was directed to get together all the facts and records concerning existing accounts between the Park Department and the Panama-California International Company and to turn same over to the City Attorney with request that he take necessary steps to secure an accounting.

January 4, 1918, San Diego Sun, 1:8. Park Board demands money of Red Cross; 15 percent of rodeo demanded; intended to save our wounded soldiers.

January 4, 1918, San Diego Sun, 9:1-2. Rodeo opens today at Stadium; noon parade attracts much notice.

January 4, 1918, San Diego Union, 6:3 and January 8, 1918, San Diego Union, 8:3. Naval air service ground school to be expanded; will include oxy-acetylene plant, coppersmith shop and carpentry establishment.

January 9, 1918, San Diego Sun, 8:4-5. Camp Kearny versus Balboa Park again Saturday; on baseball diamond.

January 10, 1918, Letter, Louis H. Bailey, 1st Lieut., Signal Corps, Asst. to A. Q. M., Office of the Quartermaster, Camp Walter R. Taliaferro, to Board of Park Commissioners, City of San Diego (San Diego Public Library).

Subject: Gate in Indian Village Wall

I request that we be allowed to place a gate in the Indian Village wall on the south center side so that we can have the doctors pass from their tents to the Hospital without losing any time.

Yours respectfully.

January 11, 1918, Minutes of the Board of Park Commissioners.

Present: Commissioners Ryan, Grant and Cosgrove.

S. W. Bell requested that the local Grand Army of the Republic be granted the use of the Organ Pavilion on February 12th for a patriotic celebration. The request was granted by unanimous vote.

A letter from J. B. Pendleton requesting the free use of the Stadium on January 12th be given National War Work Council for benefit game read and request granted by unanimous vote.

Adolf Kramer requested that the Panama Canal auditorium and Streets of Panama Building be leased to him for moving picture studio. After going over the building and hearing Mr. Kramer's ideas on the subject, the Board advised him to prepare a definite statement of his needs and to make a definite offer for the desired lease.

The following resolution was introduced and adopted:

RESOLUTION CREATING POSITION OF REFRESHMENT
STAND MANAGER

WHEREAS the growth of the refreshment business in Balboa Park has increased so greatly that it no longer is possible for the executive secretary to manage and buy for this business in addition to his regular duties, and

WHEREAS the City Auditor and City Purchasing Agent have approved the suggestion of the executive secretary that the position of general manager be created and Mr. C. H. Arthur appointed to fill same, now therefore

BE IT RESOLVED that the position of general manager of refreshment stands be and hereby is created and that the compensation for and the duties of such position shall be as follows, to wit:

The general manager shall receive Four Dollars per day for each day that he works.

The general manager shall be under the direction and control of the park superintendent at all times

The superintendent shall employ such help as he may deem requisite for the proper conduct of the stands now in operation and such other stands as the Board of Park Commissioners shall subsequently order opened, to which help the civil service commission shall certify, and shall be personally responsible for the conduct of the help so employed and for all merchandise and moneys handled by said help.

The general manager shall act as buyer for all refreshment stands of the Park Department and shall have charge of a general storeroom, issuing to the several stands such merchandise as may be needed from time to time and keeping an accurate record of all merchandise to or used by each stand. He shall at all time work in harmony with the city purchasing department, furnishing such records and requisitions as shall be required by the purchasing department.

The general manager shall read all cash registers at least once daily and shall demand of all stand managers and salesmen that all sales shall be promptly rung on the proper registers in such a manner as to insure an absolute record of each and every sale. He shall collect all cash from each stand at the close of each and every day's business, and shall turn same in to the cashier of the Park Department, together with a statement from each stand showing register readings and signed by the stand manager and the general manager.

The general manager shall furnish at each regular meeting of the Park Board a statement showing the weekly sales, together with an estimated gross profit and the cost of doing business in each stand for each weekly period. He shall furnish on or before the tenth day of each month a statement showing the following records from each stand:

1. Amount of stock on hand at close of preceding month.
2. Amount of stock on hand at opening of preceding month.
3. Amount of stock issued to each stand during preceding month.
4. Cash sales during preceding month.
5. Wages and all other expense.
6. Actual net profit and actual percentage of profit on gross sale.

It shall be the duty of the general manager to buy where, when and in such quantities as shall enable him to obtain the best prices, excepting that he shall comply with the provisions of the city ordinance governing purchases, and further excepting that he shall when possible give the preference to San Diego industries.

He shall be responsible in all respects for the sanitary condition of the stands and the merchandise in them, for the conduct of the employees under him, and for a proper accounting of all funds received and all merchandise purchased. In all matters of importance, he shall consult with

the park superintendent and in the event of a difference of opinion between the general manager and the park superintendent on any matter of importance, the matter shall be laid before the Board of Park Commissioners for decision.

The general manager shall furnish a good and satisfactory bond in the amount of Two Thousand Dollars for the faithful performance of the duties and responsibilities herein before described.

The executive secretary reported that the Naval Training Station sentries were refusing to allow sailors to trade at No. 3 refreshment stand and was directed to address a courteous letter to the commandant, requesting that sailors be given the same freedom in trading with the Park canteens as they are with the Navy canteen. Executive secretary further instructed to forward to the executive officer a copy of the Navy lease on Exposition grounds in order that he might fully understand the rights of the Naval Training Station and of the Park Department.

Permission was given the Twenty-first Infantry to cut a door in the South wall of the Indian Village under supervision of the Park Superintendent.

By unanimous vote the insurance policies on the Organ Pavilion and Starr piano were approved.

Weekly report of refreshment stands filed and approved.

The superintendent and electrical foreman Harper directed to secure from San Diego Consolidated Gas & Electric Company a form of contract satisfactory to them and to present the same to the Board for approval.

Superintendent presented for approval a bill of \$76.90 covering actual expenses incurred by the Park Department in preparing the Stadium for Rodeo and cleaning up afterward. He was instructed to demand payment of the Red Cross Society for this amount.

January 11, 1918, Correspondence, Board of Park Commissioners, San Diego Public Library; Executive Secretary to Capt. W. D. Brotherton, U. S. Naval Training Station: Sentry placed before refreshment stand, opposite detention camp, is refusing to permit men to enter the stand.

January 11, 1918, San Diego Union, 6:4. Park lake for navy swimming lessons planned; Botanical Building reflecting pool to be converted into a swimming pool.

January 12, 1918, Letter, Board of Park Commissioners to Louis H. Bailey, 1st. Lieut. Signal Corps. Assistant to A. Q. M. : Permission granted to place a gate on the south center side of Indian Village.

January 12, 1918, San Diego Union, 5:3-4. Chamber of Commerce reports on activities; Committee expresses opinion that tax assessing and collecting offices should be consolidated.

January 12, 1918, San Diego Union, 9:1. Big influx here due to [Camp Kearny] cantonment shows; 8,000 to 10,000 in San Diego on this account.

January 12, 1918, San Diego Union, 9:2-3. Sweaters are presented to 517 of 21st Infantry; work of patriotic women of service league praised by Colonel Uline, commander.

January 13, 1918, San Diego Union, 4:4. "Abraham and Isaac," ancient miracle play, to be give in modern way at the navy Y. M. C. A., Balboa Park, tonight.

January 14, 1918, San Diego Union, 6:6. "Abraham and Isaac," ancient miracle play, presented for Army, Navy, by J. A. D.

January 15, 1918, San Diego Union, 1:2-4 Mayor Wilde scores Chamber for opposing project of Craig plant here; declaring city is "top-heavy with parks and playgrounds," Wilde asserts protect comes from misstatement of facts; speaks of "jealous self-interest and vacillating boneheads."

January 16, 1918, Correspondence, Board of Park Commissioners; Executive Secretary to Chief Yeoman Valors, U. S. Naval Training Station: Permission given to U. S. Navy to use baseball diamond at Stadium Monday, Tuesday, Wednesday and Thursday afternoons until further notice; Park Department reserves the right to claim any of the afternoons so granted.

January 16, 1918, Correspondence, John Morley. . . . Letter, E. W. Spencer, Jr., U. S. N., regarding location and construction of sheds south of Organ Pavilion.

January 16, 1918, San Diego Union, 1:6-7, 5:4. Manufacturers back Chamber as to Craig; Melville Klauber, president Chamber of Commerce, states opposition to lease.

January 16, 1918, San Diego Union, 4:2-3. Mayor Wilde scores Chamber of Commerce for opposing project of Craig plant here; declares city is "top-heavy with parks and playgrounds."

January 16, 1918, San Diego Union, 6:6. Navy men rush work on school [at North Island] for their fliers; ready to begin operations as soon as hangars are erected.

January 16, 1918, San Diego Union, 6:6. San Diego Conservatory of Music gave concert for 4,000 bluejackets last night at outdoor stage in Plaza.

January 16, 1918, San Diego Union, 6:6. Class in the second radio night school at the Naval Training Station in Balboa park were opened last night; more than 100 men joined.

January 17, 1918, Correspondence, John Morley. . . . Letter Morley to Spencer, granting approval to construct sheds; color scheme must conform to that of exposition buildings.

January 18, 1918, San Diego Sun, 9:4. Madame Schumann-Heink heard by thousands at Camp Kearny yesterday.

January 18, 1918, San Diego Union, 8:1-2. Craig withdraws; City will seek conference.

January 19, 1918, Correspondence, John Morley. . . . Letter from Spencer saying it is impractical to undertake further repairs to San Joaquin Building on account of cost.

January 19, 1918, San Diego Sun, 1:5. Recreation problem not solved; thousands of servicemen walk streets here; funds are needed.

January 19, 1918, San Diego Union, 14:1. Daughters of American Revolution urge swimming pool in park.

January 20, 1918, San Diego Union, 1:6-7, 12:3. Major General Frederick S. Strong, commander at Camp Kearny, praises city's moral condition.

January 20, 1918, San Diego Union, 6:2-7. Army-Navy ball game for hospital benefit planned; big contest next Sunday at Stadium will provide funds for open-air camp, where sick men discharged from service will be cared for.

January 20, 1918, San Diego Union, 5:2-4. Zoological Gardens at Balboa Park contain more than 50 rare animals.

The San Diego Zoological gardens at Balboa Park, reached by cars on Route 7 and 11, containing fifty rare animals, is regarded as one of the most interesting places on the park grounds. This is especially true at mealtime which takes place daily, excepting Monday, between 3:30 and 4:30 in the afternoon.

The war has made it extremely difficult, according to Dr. Harry M. Wegeforth, to obtain animals for exhibition purposes but, in this respect, the local zoological society has been more fortunate than others.

The collection of different species here is not at present equaled on the Pacific coast, and includes:

Two lionesses, three pumas, one buffalo, one sacred cow, one raccoon, two coyotes, one buffalo wolf, one striped hyena, one badger, two Russian wolves, ten monkeys, two baboons, two eagles, two kangaroos, two ferrets, two prairie dogs, eleven snakes, one beaver, one wildcat and three lion cubs.

January 21, 1918, San Diego Union, 7:1-2. Open-air cam carries on fight against tuberculosis; more than 150 patients treated yearly; directors hope to make needed changes with money derived from benefit baseball game to be played at Stadium, January 27.

January 22, 1918, San Diego Union, 4:6. County Federation of Women's Clubs, Daughters of American Revolution, San Diego Women's Civic Center, Federated Congress of Mothers, and Parents-Teachers' Association urge lily pond as pool to teach sailors swimming.

January 22, 1918, San Diego Union, 4:8. Art Notes, by R. R., comments on a green jade figure, does not say where it is kept.

January 23, 1918, San Diego Sun, 8:3. Closing bouts stages at "Y" tent of 21st Infantry in Park.

January 23, 1918, San Diego Union, 6:4-5. Three hundred and fifty mechanics trained at park naval school; from 40 to 60 skilled ground men graduate weekly.

January 26, 1918, San Diego Union, 4:1. EDITORIAL: Give the Boys A Chance.

Certain advocates of the "city beautiful" idea have protested against the use of the lily pond for swimming purposes. There also has been an argument in favor of a salt water bathhouse at the foot of Date Street. The naval authorities answer that it would require too much time to take the men to the waterfront and back each day. A natorium right on the ground is declared to be far more practical.

San Diego can afford to sacrifice many lily ponds rather than sacrifice the life of even one of the young men who are so soon to take their place on America's fighting ships.

January 28, 1918, San Diego Union, 1:3, 3:2-3. Will rush aviation buildings; \$6,000,000 joint Army and Navy schools will make North Island center of air training activity of government.

January 29 1918. Regimental History 21st Infantry. A Regimental Canteen was established at Camp Walter R. Taliaferro, on January 29 1918.

January 30, 1918, Correspondence, John Morley, Letter from Spencer promising not to run motors in machine shops during organ recitals.

January 30, 1918, Letter, _____ to Lieut. E. S. Spencer, Commanding, U. S. Naval Air Station, San Diego California (San Diego Public Library).

Dear Sir:-

Complaints came to this office yesterday that the noise at the machine shop South of the Organ Pavilion was so loud that the Organ Recital was stopped.

There was also scheduled a vocal concert after the Organ Recital Sunday afternoon which would have had to be postponed had it not been that Mrs. Rowan, the lady in charge of that part of

the program, spoke to one of your men in regard to it, and he very kindly has the work stopped so as not to interfere with the vocal concert.

There are organ recitals every afternoon, weather permitting, but if the noise is such that Dr. Stewart is unable to play, it will be very unpleasant for the public.

I hope we did not make a mistake in locating the building, as we want to cooperate in every way possible for the success of the Navy Aviation School. It will be very much appreciated by the public, Dr. Stewart and myself if these conditions can be remedied during recitals and especially on Sundays when the shop should be closed.

Please give this your attention and oblige,

Yours very truly.

January 31, 1918, San Diego Union, 9:1-2. Mayor Wilde applies hot terms to Councilman Moore in wrangle; Moore's attitude in Hanafin matter starts fireworks; Wilde jumps from rostrum when cowardice is intimated in denying hearing to employee.

February 1, 1918, Minutes of the Park Commission.

Present: Commissioners Ryan, Grant and Cosgrove.

By unanimous vote permission was given the Twenty-first Infantry to occupy the Streets of Panama Building as a hospital.

Report of the executive secretary covering business done in refreshment stands during the year 1917 approved and ordered filed.

Report of Stands Manager Arthur covering business for current week at refreshment stands read and approved.

Permission granted British Vice Consul to have an address delivered by Lieutenant Colonel Earl of Dunmore, England, at Organ Pavilion, on afternoon of February 17th.

By unanimous vote permission given San Diego Museum to occupy entire second floor of Administration Building, excepting built-in vault, for period of one year from date, on condition that the Museum defray all its own bills for lighting, janitor service, etc. and one-half of the cost of heating the building.

The agreement by and between the parties interested in the use of the Stadium, relative to division of dates, was presented and unanimously approved by the Board for the year 1918 and same ordered filed.

Mr. Barnet, Stadium concessionaire, personally requested that he be put in charge of all park concessions, and was directed by the President of the Board to put his proposition in writing in order than the Board might take definite action.

The bond of Stands Manager C. H. Arthur in the sum of \$2,000 filed and approved.

The executive secretary requested that an order be issued making it necessary for all requisitions to pass through his hands, in order that, as head of the office department and the person responsible for proper accounting, he might see that requisitions were properly drawn and charged to the proper budget items. The President of the Board stated that, in his opinion, such an order would complicate matters and detract from the simplicity of the system previously devised by the Board. The request was not granted.

Letter of thanks from Major General Strong for plants furnished Camp Kearny read and ordered filed.

Permission was given the Naval Training Camp to construct a small emergency hospital in the rear of the Pepper Grove Surgery on condition that the Naval Training Camp either construct an adequate septic tank or connect with the city sewer system and build a fence sufficient to insure privacy to adjacent comfort station, all of which should be done under the supervision of the Park Superintendent.

February 2, 1918, San Diego Sun, 6:2. D. C. Collier married a New York widow.

February 3, 1918, San Diego Union, 4:5. Mrs. Theodore Barnes, soprano, will sing at Organ Pavilion this afternoon.

February 4, 1918, San Diego Union, 8:1-3. Army baseball team defeats Navy 3 to 0 in 12 fast innings; 10,000 fans cheer wildly as rally by Divisional Nine of Kearny ends great game.

February 5, 1918, San Diego Union, 5:2-4. **Union** photographer shows between 3,000 and 4,000 apprentice seamen taking their meals in Plaza de Panama at Naval Training Station.

February 6, 1918, Letter, Edgar L. Hewett, Director, The San Diego Museum, Balboa Park, San Diego, California, to Board of Park Commissioners, San Diego, California.

Gentlemen:

I enclose herewith an inventory of furniture, fixtures and equipment in the Administration building and Museum buildings, the greater part of which has been for sometime past used by the San Diego Museum Association, and all of which would be permanently useful in the Museum.

As you are aware, the collections and equipment assembled by the Ethnological Division of the Exposition, costing over \$113,000.00 were deeded by the Exposition Company to the San Diego Museum Association on condition that said material be used for the establishment of a free public museum on Balboa Park, and forever maintained as such by the Museum Association. This deed covered several thousand dollars' worth of furniture, fixtures and equipment purchase on the budget of the Ethnological Division, but never segregated in separate inventories from all other Exposition furniture, fixtures and equipment.

Subsequently the Exposition Company transferred to the Board of Park Commissioners all its furniture and fixtures invoiced at something over \$18,000.00. This included furniture, fixtures and equipment above referred to as conveyed by blanket deed to the Museum Association. Since there would be no possible way of identifying which belonged to the Museum Association; and since the Museum is one of the permanent attractions of the park, though maintained without expense to the city, I beg leave to recommend that, if the Park Board has selected what is needed for its use, the remainder covered by the inventory hereto attached, be formally transferred to the possession of the Museum with the understanding that it shall be retained in the buildings used by the Museum on Balboa park.

In order to get the matter before your Board, I attach hereto a tentative resolution which may afford a basis for appropriate action.

Very sincerely yours.

(Signed) Edgar L. Hewett,
Director.

February 7, 1918, San Diego Union, 9:1-3. Mayor Wilde and Council unable to agree on vital matters affecting city's interests; chief executive agrees to appoint efficiency expert selected by City Planning Commission; lawmakers pass resolution exonerating foreman of Sewer Department whom Mayor has discharged.

Just before adjourning the meeting, the mayor said: "If there is anything I have said that I'm sorry for, I'm glad of it."

March 1, 1918, San Diego Sun, 4:1. EDITORIAL: Complaints of Navy School.

In time of war a newspaper office is deluged with rumors, reports, spy information, etc. The present time is no exception and **The Sun** has had its share of this information and misinformation.

That's where the great problem comes in, weeding out the former from the latter.

In the past two weeks a number of interested people have come to us to complain of conditions at the Balboa Park naval training station.

The consensus of opinion seems to be that the officials in charge of this school, the doctors in charge of the hospital and the navy officers stationed there are doing their utmost to care for the health and the welfare of the men. But there are complaints as to the conduct of some petty officers, as to the routine of handling the sleeping quarters, and as to the allotment of clothing for the boys while on liberty.

It is charged that the barracks are too crowded; toilet facilities are entirely inadequate; the floors of sleeping quarters are often scrubbed late in the afternoon, and that the men sleep in their hammocks above a partly wet floor all night, tending to aggravate colds. It is also charged that the under officers do not report sick cases promptly, and that a cold is often allowed to develop into pneumonia where prompt action would have saved a life. As to the sweaters and jackets the men should have when on liberty, we do not know --- except that we see many very chilly looking sailor boys on the street on cool days and late afternoons.

March 1, 1918, San Diego Union, 7:1-2. James W. Cofforth's fight films will be show at Naval Training Station in near future.

March 1, 1918, San Diego Union, 8:4. Grace Bromfield Haver, soprano, to sing Sunday at Balboa Park.

March 2, 1918, San Diego Union, 5:4-5. Balboa Park Naval Training Station Found to be Shipshape; rumors that dissatisfaction exists among 4,000 bluejackets attached to station attributed to pro-German sources; **Union** reporter makes inspection.

Rumors, attributed to pro-German sources, that considerable dissatisfaction exists among the 4,000 bluejackets attached to the Naval Training Camp at Balboa Park over sanitary conditions, disciplinary methods, and lack of proper clothing gained official cognizance from the school authorities yesterday.

Some of the rumors were that the dormitories were poorly ventilated, that the bluejackets were compelled to sleep over floors that were "sloppy wet," that the galley was unclean, the sick bay facilities inadequate, the heads of toilets unsanitary, and that peacoats were as scarce as fleas in Alaska.

Captain William Brotherton declared that the training camp is open to the public at all hours of the day, and that the public can trace down the rumors by taking as long and as many inspections of the camp as it desires.

A **Union** reporter was requested by the school authorities to inspect the camp. He did so at 5 o'clock last night and this is what he found.

The dormitories, according to custom on Friday and Friday only, has been scrubbed down. The floors were dry.

The hammock hooks are placed further apart than those aboard ship. The hammocks when slung are five feet from the floor and twenty feet from the roof of the buildings, affording ample ventilating space. Aboard ship the hammocks are about five feet from the deck and less than three feet from the beams.

The galley was scrupulously clean. The mess tables in the old Cristobal Café were being cleaned, but there was no litter.

The sick bay facilities, probably inadequate at first, have now been amplified until they are sufficient to meet the needs of the station.

The scarcity of peacoats is attributed to the fact that thousands of bluejackets attached to eastern training camps first had to be issued this particular item of clothing. In San Diego it was not thought that the need of a peacoat for a bluejacket enjoying liberty in a semi-tropical climate was a necessity. The needs of the bluejackets serving in the frigid climate of the east naturally came first.

Another report given much credence was that chief petty officers failed to report bluejackets who were sick. It was pointed out that the naval training camp is no nursery, and that if a youth of 18 or 20 years does not know enough to go to the sick bay when he is ill, he does not need the tender services of a chief petty officer, but rather of an attendant at Patton.

The school authorities thoroughly understand that many of the young bluejackets now at camp had, during the days they were attached to the old roofree, been more or less pampered. Disciplinary methods, scrubbing down floors, cleaning off mess tables, doing sentry duty, drilling, making their own beds, and washing their own clothes naturally proves irksome, but mother cannot be in the navy no matter how much she loves her boy, and the boy, for the first time in his life, is left to shift for himself.

March 2, 1918, San Diego Union, 8:7-8. Navy lads to dance at Balboa park tonight; station commander and wife will be guests of honor; Plaza to be lighted with hundreds of colored lights; music to be furnished by 45-piece station band; grounds will be carefully policed and only respectable people of this city will be admitted; program will begin at 8 o'clock.

March 3, 1918, San Diego Union, Society & Club, 3:1-2. Mrs. Grace Bromfield, soprano, to appear in concert at Organ Pavilion today.

March 4, 1918, San Diego Sun, 4:7-8. Navy student defends Balboa Park school.

In reference to the article that **The Sun** published March 1, I wish to say that whoever submitted such an article to the public have put before the public an absolute lie.

March 5, 1918, San Diego Union, 1:6-7, 7:3-4. Mayor Wilde scores City Council; vetoes water raise; refuses to preside over future Council meetings.

March 5, 1918, San Diego Union, 7:2. Mrs. Grace Bromfield Haver, dramatic soprano, sang Sunday afternoon at Balboa Park following the organ recital

March 6, 1918, San Diego Union, 7:4. Famous cartoons to be show in Museum Art Gallery; work of Louis Raemakers more harmful to Kaiser than many troops; will remain on display for several weeks.

March 9, 1918, San Diego Union, Classified, 9:2-3. Havrah W. L. Hubbard, music critic of the **Chicago Tribune**, has arrived at his home on Grossmont and yesterday took up his duties at Balboa Park as song leader appointed to the War Commission to teach enlisted men how to sing; General Pershing in favor of singing soldiers.

March 12, 1918, San Diego Union, 9:1-2. Councilmen laugh at talk by Fletcher of compromise; say it is impossible to given him city rights; engineer says proposed diverting dam would take nearly half of water belonging to city.

March 12, 1918, San Diego Union, 9:2. Mayor Wilde vetoes bill for new sweeper; urges operating department be required to advertise for bids.

March 12, 1918, San Diego Union, 9:4. Spooners must sit near lights in Park orders Police Chief McMullen; J. Keno Wilson, former chief, and Fred Doty start task of patrolling tract.

March 12, 1918, San Diego Union, 10:3-4. Fast boxing bouts please Balboa Park servicemen.

March 15, 1918, San Diego Sun, 4:6. Mrs. D. M. Tebbetts praises naval hospital.

Some of the boys, who were terribly sick a few weeks ago, are now on the road to recovery, owing to the skill of the physicians in charge and the good care bestowed by the nurses. A spirit of kindness and good will, which is a comfort to the boys and their loved ones, prevails, and which I, as a friend of all the boys in the navy, appreciate.

March 16, 1918, San Diego Sun, 4:4. Robert R. Hamilton says Park Board should pay for water used.

Today the city is not charging to the park board for water. This loss the city water department must bear. No wonder there is a deficit.

March 16, 1918, San Diego Union, 4:1-5. Photographs of sailors doing calisthenics and street riot drill at Balboa Park Stadium.

March 19, 1918, San Diego Union, 6:3. Dr. G. L. Spinning of Pasadena, veteran of Civil War, will address soldiers at Balboa Park this evening under auspices of Y. M. C. A.

March 19, 1918, San Diego Union, 6:5. Army, Navy men to have Easter service in park.

March 21, 1918, Letter, Camp Committee, San Diego Council Boy Scouts of America, San Diego, California, to Board of Park Commissioners, San Diego, Cal.

Gentlemen:

As the camp committee of the San Diego Council, Boy Scouts of America, we are addressing you in behalf of the 1200 Boy Scouts of this city and vicinity.

It is not necessary for us to go into detail as to the aims of the organization. It has come to be recognized nationally as a potent factor in the upbuilding of boys of the nation, not only physically, but mentally and morally as well. The primary object of the organization is character building, and that it is successful is evidenced by the assistance it has been able to render in the Red Cross, Liberty Loan, Special Messenger Service for the Government, etc.

An important requisite in our work with boys is the wholesome exercise in the open air and sunshine. It is essentially an outdoor organization. In accordance with this fact the boys take frequent hikes and weekend trips under proper guidance and control. In other cities of the coast definite camp sites have been established at points that are convenient for these outings. The boys avail themselves most heartily of these opportunities, and the camps are proving one of the strongest activities of the Scout Program.

Up to this time no provision of any kind has been made in San Diego. Therefore it is our purpose in addressing you to request that a portion of Balboa Park, comprising, perhaps, 40 acres, along the northern boundary abutting Alabama, Mississippi, Louisiana and Texas streets be designated as a Boy Scout Weekend Camp, and that the San Diego Council of the Boy Scouts of America be permitted to use this area for this purpose, it being expressly understood that the Park Board will be put to no expense in the matter; that this organization will pay for all water used; that no nuisance will be committed; that the site will be kept clean and sanitary; that no buildings or

apparatus of a permanent nature will be erected; and that drills for soldiers now held there will not be interfered with; we can assure you that the camp will be kept in a condition that will be a credit to the Boy Scouts and to the City of San Diego.

We shall be glad to go into details more fully if deemed necessary.

Assuring you that the granting of this request will meet with the heartfelt appreciation by the Boy Scouts and the members of the San Diego Council of the Boy Scouts of America.

Very sincerely.

March 22, 1918, San Diego Sun, 4:3-5. Letter: Sailors only ask for square deal.

I know it to be a fact that the hotel keepers and proprietors of other establishments renting rooms to the public have raised the rent of the rooms on the nights when the soldiers and sailors are given liberty.

The uniformed men are not asking to be favored; they are men and want to be treated as men.

March 25, 1918, San Diego Sun, 4:3. Letter from A. K. K.: Criticism of Navy School.

I have heard two petty officers use language not becoming gentlemen.

Petty quarrels and pets should have no place in neither army nor navy, but all should work together for the world's freedom.

March 25, 1918, San Diego Sun, 7:3. Beautiful pansy bed just east of Fine Arts building.

March 27, 1918, Letter, Executive Secretary, Board of Park Commissioners to Elwood E. Barley, Scout Executive, 503 Scripps Building, San Diego, Calif.

Dear Sir:-

Confirming oral permission given you for use by local organization of Boy Scouts of the Cavalry Camp site in Balboa Park, I wish to advise that I have presented to the Board of Park Commissioners your request in this matter, and the following action was taken:-

Upon motion duly made and carried, San Diego Boy Scouts are authorized to establish a camp site on the old Cavalry Camp site in north end of Balboa Park, on condition that the commanding officer of the Twenty-first Infantry is willing that the grounds should be used for this purpose, and on the further condition that the laying out of your camp, all construction work and conduct of the camp shall be under the supervision of the Superintendent of Parks.

I shall be very glad at any time to render the Boy Scout movement in San Diego any aid in my power.

Very truly yours.

March 27, 1918, San Diego Union, 9:4. Fisk Jubilee Singers will give two concerts at Organ Pavilion next Wednesday afternoon and evening for benefit of poor under auspices of Associated Charities of San Diego.

March 28, 1918, San Diego Union, 4:4. Art Notes, by R. R. on beauty of Montezuma Gardens.

March 28, 1918, San Diego Union, 4:5-6. Letter, Lester H. Thorton, praising Montezuma Gardens.

March 28, 1918, San Diego Union, 10:4. Easter song service in Park plan.

March 29, 1918, San Diego Union, 4:4. Outdoor concert for sailor boys last night.

March 29, 1918, San Diego Union, 8:1-8. Photograph of 3,400 bluejackets on Plaza de Panama spelling out the name "NAVY."

March 30, 1918, San Diego Union, 6:5. Open-air dance to be held this evening on the Plaza; San Diegans invited to attend.

March 31, 1918, San Diego Union, Classified, 1:6. Organ programs to include many popular numbers; increased attendance drawn to recitals by Dr. Stewart at Balboa Park.

April 1, 1918, San Diego Union, 4:4-5. H. J. Stewart, official organist, submitted annual report to city park commission; 307 organ recitals given in 1917; 267 of these played by official organist and 40 by visitors and resident organists; ten recitals omitted because of unfavorable weather and on two occasions there was a failure of electric current.

April 1, 1918, San Diego Union, 5:3. Easter services held at Organ Pavilion beginning at 2 o'clock in the afternoon; song service arranged by Miss Gertrude Gilbert and Mrs. L. L. Rowan; chorus from 144th Field Artillery, Camp Kearny.

April 2, 1918, Letter, John R. Brook, Captain, Infantry, A. Q. M., to Board of Park Commissioners stating that it is the purpose of the Government to renew lease of campsite, maneuver and drill grounds located in Balboa Park for one year, beginning July 1, 1918.

April 5 1918, San Diego Union, 7:1-4. Madame Melba, famous diva, sings for Sunshine Division at Camp Kearny.

April 7, 1918, San Diego Union, 7:2-7. Photograph of ten thousand attending open-air ball at Naval Training Station.

April 9, 1918, Letter, Executive Secretary to Captain A. A. Farmer, Commanding Company "H," 21st Infantry, San Diego, Calif.

Regarding: Use of Lipton Tea Pavilion for Library

Dear Sir:

I wish to advise you that your letter of April 3rd, last, requesting use of Lipton Tea Pavilion for Company Library has been taken up by the Board of Park Commissioners and your request granted on the following conditions, namely:

"Due precaution shall be taken for the proper protection of the premises. The building shall be inspected by an officer of your company together with a representative of the Park Department before same is occupied by you and again when you no longer require the building. It is understood that you will return the building to this Department in equally as good condition as when you receive it.

Precaution shall be taken to protect the lawn, flowers and shrubs surrounding the building, and reasonable order shall be maintained among the men using the building."

These conditions have been made necessary by past experience, when this and other buildings have been damaged, fixtures removed, and the premises left in an unclean and unsanitary condition.

This Department will gladly cooperate with you in every possible way to make conditions more pleasant and agreeable for your men, and we have taken steps to have this building vacated during this week.

Very truly yours.

April 9, 1918, San Diego Union, 7:4. Photograph of visiting Japanese officers at Exposition grounds; street riot drill put on in honor of visitors; toasts to all entente rulers feature banquet (article is incomplete).

April 11, 1918, San Diego Union, 4:4-5. Letter from Frank L. Hardesty, father, thanking San Diegans for kind treatment given son at Naval Training Station.

April 12, 1918, San Diego Union, 7:4. Mrs. A. W. Roberts, soprano, to sing at Balboa Park Sunday.

April 14, 1918, San Diego Union, 8:1. Request numbers feature Dr. Stewart's recital at organ today.

April 14, 1918, San Diego Union, Classified, 2:3. David Goldstein, Knights of Columbus lecturer, to speak on Catholicity this afternoon at Organ Pavilion.

April 21, 1918, Camp Walter R. Taliaferro, San Diego, California

Report:

Robbery of the Park Canteen opposite Officers mess. Sometime between 5:50 p.m. of April 20th and 7:40 a.m. April 21st the Park canteen opposite the Officers mess was broken into. The robbery was first discovered at 7:40 a.m. by Pvt. N. P. Sullivan, Company "I", 21st Infantry, who went to the store to make a purchase, but finding the store closed looked towards the back entrance and noticed that there was no lock on the door. Pvt. Sullivan sometime ago had assisted the salesman in closing up and knew the location of the rear entrance to the store. When he saw that the lock was not on the door he assumed that the salesman was inside and immediately went to the front entrance and called out for Mr. James Johnston, who is at present acting as salesman for the Park Board at this store. After repeated calling and getting no response Pvt. Sullivan again looked into the small alleyway between the end of the cages and the North side of the store and noticed that the staple was off the hasp. He waited until Pvt. Joseph M. Brookfield (859261) Company "L", 21st Infantry, the sentry on post no. 3, came along and then told the sentry that someone had probably broken into the store. Both of them then went into the alleyway and examined the staple and the hasp. Looking around Pvt. Sullivan found the lock on a small ledge at the end of the animal cage. The sentry stepped inside of the store with Pvt. Sullivan following and noticed that the cash register till was opened. The sentry stepped outside to call the guard, when Sergeant Smith, George W. (859199) Company "L", 21st Infantry happened to be going by to breakfast. Pvt. Brookfield immediately called Sergt. Smith and explained the matter to him. Pvt. Sullivan went to the telephone outside and called up Mr. Arthur the superintendent of the canteen for the Park Board. After Sergt. Smith had examined the lock and hasp, he brought the matter to my attention. I immediately went to the store and had a talk with Pvt. Sullivan and Pvt. Brookfield, sentry on post no. 3 and finding everything in order and not being certain that anything was missing ordered Pvt. Allison, Floyd O. (85913) Company "L" 21st Infantry, to remain on guard at the side entrance to the store. Pvt. Allison was on guard until the arrival of Mr. James Johnston salesman at the store. When Mr. Johnston arrived we went inside to ascertain what was missing. No money was kept in the store, but there was about 25 to 30 cartons of Camel Cigarettes and a box of 50 cigars missing, Mr.

Johnston was unable to say whether there was any thing else missing or not without taking an inventory. There after I explained the matter to the Officer of the Day, 1st Lieut. Hart who instructed me to investigate the case.

The staple in the hasp had been pried loose by some instrument and the lock removed. I called the sentries together who had been walking this post and inquired into the matter. The sentries were Pvt. Brookfield and Pvt. Thompson and Pvt. Lundin, all of Company "L" 21st Infantry. About 11:00 p.m. April 20, the sentry on post no. 3 was told to keep a lookout for a prisoner from the naval training camp who had escaped. The sentry was instructed to spend considerable of his time keeping a lookout for sailors boarding the streetcars. They therefore remained in front of the store from about 11:00 p.m. to 3:00 a.m. The sentries stated they heard no noise of any kind around the store, furthermore that they looked into the alleyway leading along the side entrance and noticed nothing unusual. The alleyway was very dark and it would have been impossible to see whether the lock had been removed. None of them saw any one approaching the store from the side gate and the thief must have entered from behind the animal gages.

(Sentries who walked post no. 3 and the hours they walked follows (not included)

(Signed) Aaron N. Cohen.
2nd Lieut., Inf. R.C.

April 21, 1918, Memorandum

Adjutant:-

The burglary of the Park Board canteen was reported to me about 8:30 this a.m. I immediately ordered the Officer of the guard (Lt. Cohen) to investigate the matter and report all details up until the report was made to me. The sentries, Pvt. Sullivan and Mr. Johnston, the salesman in the Park Board canteen were questioned by the Officer of the guard and my self and in my opinion there statements are in perfect order.

Mr. Johnston expected the loss to be approximately 20 cartons of Camel Cigarettes, 1-50 box of Owl cigars and 1 box of candy. I found the candy on the ground between the store and the car station, where it has evidently been thrown by the thief. I found no clew that would lead to the identification of the thief or at what time the robbery was committed.

(Signed) Henry L. Hart
1st Lieut., Infantry R.C.
Officer of the Day.

April 27, 1918, San Diego Union, 1:3, 4:3-6. General F. S. Strong, commander at Camp Kearny, moves crowd with address during Liberty Day celebration in city; long military parade from foot of Broadway to Organ Pavilion; Colonel R. C. Means, Major Howell speak.

May 22, 1918, San Diego Union, 2:4. W. H. Burns gave "Wake Up, America" at Organ Pavilion last evening; 3,000 in audience.

May 24, 1918, LEASE OF CERTAIN BUILDINGS IN BALBOA PARK TO U. S. MARINE CORPS (San Diego Public Library)

1. By authority of the Board of Park Commissioners given in regular meeting of May 14, 1918, permitted the use of certain grounds and buildings now occupied by the Fourth Regiment of the U. S. Marine Corps, permission is hereby granted the U. S. Marine Corps to occupy the Utah Building, Montana Building, New Mexico Building, Kansas Building and the Washington Building in Balboa Park so long as needed by the U. S. Marine Corps during the present war period, under the following conditions:
2. That none of said buildings are to be used for "Mess Halls" and no cooking shall be permitted in said buildings.
3. That said U. S. Marine Corps shall not make any changes of any description in any of the buildings included in this permit without the full knowledge, consent and written approval of this Board or its Superintendent of Parks.
4. That said U. S. Marine Corps shall not disturb any trees, plants, shrubs, or lawns or make any changes of any nature in the area adjacent to said buildings, erect any building, dig trenches, or in any manner disturb the grounds surrounding or adjacent to any of said buildings without the full knowledge, consent and written approval of this Board or its Superintendent of Parks.
5. That said U. S. Marine Corps shall maintain and care for the grounds surrounding said buildings and keep same in as good condition as when turned over to said Marine Corps.
6. That said buildings are to be kept in a good state of repair by said U. S. Marine Corps and said buildings are to be turned over to this Board in as good condition as when occupancy is acquired by said U. S. Marine Corps, ordinary wear and tear excepted.
7. This permit shall not in any manner interfere with any employee of this Board in going from or coming to work, or in carrying out any order of this Board, or interfere in any way with the general improvement of the landscape feature of that part of Balboa Park occupied by or adjacent to said buildings.

June 5, 1918, Letter, C. G. A., Lieutenant Colonel U. S. Marine Corps, Commanding, to Board of Park Commissioners, San Diego, California (San Diego Public Library)

Gentlemen:

The comrades of Private John J. Awkerman, M. C., a member of the 27th Company, 4th Regiment, U. S. Marines, who was killed in an engagement in Santo Domingo, D. R., June 27, 1916, having subscribed to a memorial which they desire to be placed at this post his memory, and the design having been approved by the Major General Commandant, Marine Corps, I have the honor to request permission to place this memorial on the plat of grass to the left of the side entrance to the Kern County Building, or directly opposite the Alameda County Building. The memorial will consist of a marble plate approximately two fee square, to rest on a cement base approximately two feet high at the back and one foot in the front, the base to rest on the surface, or, if imbedded in the ground, nor more than six inches. As it is the intention to place this memorial at the permanent Marine Barracks when these have been completed, the memorial will, in all probability, be moved when the Marine Corps discontinues the use of the present buildings.

If the Board of Park Commissioners will kindly grant this request, it will be greatly appreciated by myself as well as the comrades of Private Awkerman who contributed toward the acquisition of this memorial.

Respectfully,

Signed _____
Lieutenant Colonel, U. S. Marine Corps
Commanding

A written notation at the bottom of the letter reads "Granted."

June 5, 1918, San Diego Union, 4:3. Official French war films shown at Park; pictures depict French Army and Navy in action and in repose.

June 12, 1918, San Diego Union, 7:3. Madame Schumann-Heink sang last night at the Organ Pavilion in Balboa Park for 5,000 men in uniform; Edith Evans at piano.

"I'm now going to sing my favorite song, and I hope you'll like it, too," she said. "It's 'Danny Boy,' a mother's farewell to her son. Of course, all the young girls say it is a sweetheart's farewell, but don't you believe them: it is a mother's farewell to her son."

June 14, 1918, Minutes of the Park Commission.

A statement of accounts between the Panama-California International Exposition Company and the Department was presented by the Executive Secretary and he was directed to take the matter up of President G. A. Davidson with a view to securing an amicable settlement.

June 14, 1918, Letter, R. C. Dewey, U. S. Marine Corps, Quartermaster's Department, Depot of Supplies, San Francisco, CA. To Post Quartermaster, Marine Barracks, San Diego, Calif. (San Diego Public Library).

Subject: Rental of Buildings at Marine Barracks, San Diego, and of Pueblo Lands.

References: (a.) QM letter 27156, 5-29-18, to DGSF.

(b.) Permit of Park Commissioners for the Occupancy by the Marine Corps of buildings in Balboa Park, accepted by the Marine Corps, May 3, 1917.

(c.) Permit of Park Commissioners for the Occupancy by the Marine Corps of buildings in Balboa Park, approved by the Marine Corps, March 10, 1917.

Inclosures: (a.) "Lease of Certain Buildings in Balboa Park to the U. S. Marine Corps, May 24, 1918.

(b.) Tentative agreement in sextuplicate covering lease of buildings in Balboa Park, July 1, 1918 to June 30, 1919.

1. In view of the fact that inclosure (a.) does not mention the Kern and Tulare, Salt Lake, or Joaquin Valley buildings and does not definitely stipulate the period of the lease, it is recommended that the Board of Park Commissioners be requested to execute inclosure (b.) in lieu of inclosure (a.) and that the papers be returned here for acceptance, if the Board of Park Commissioners approve of the modifications and additions suggested. If they disapprove, appropriate advice in the premises is requested

(Sig.) R. C. Dewey

June 14, 1918, San Diego Union, 14:1-2 (also June 15, 1918, 5:4-5). Community rally at Organ Pavilion tonight in honor of Flag Day.

June 15, 1918, San Diego Union, 1:6. Spectacular gas attacks staged in Balboa Park; watchers getting sniff of tear gas; leave field to Grizzlies rapidly.

Lt. Von Puhl, regimental gas officer, and several "non-coms" lighted dozens of gas bombs. Men in perfect order marched through gas clouds wearing masks. No one was seriously injured.

June 21, 1918, San Diego Union, 8:6 (also June 23, 1918, 3:4). Miss Wilma Gardine, contralto, to sing at Organ Pavilion next Sunday afternoon.

June 22, 1918, San Diego Union, 9:3-4 (also June 30, 1918, 4:2-4). Welcome to new citizens to feature celebration; Americanization Day committee arranges July 4th ceremonies at Organ Pavilion; parade abandoned; music pageant to be given in evening in line with President's request.

June 23, 1918, San Diego Union, 4:1. EDITORIAL: San Diego's Patriotic Pageant

Jerome B. Pendleton, chairman of the war camp community service for San Diego, urges the hearty cooperation of all San Diegans in the effort to make a conspicuous success of the patriotic pageant scheduled for presentation in Balboa Park on the evening of the Fourth of July.

It is a reasonable request for various reasons, chief among which, or course, is the universal desire that San Diego shall on this occasion give full expression to its spirit of patriotism.

June 25, 1918, San Diego Union, 10:8. More than 1,500 soldiers and marines gathered last night in the Plaza at Balboa Park to witness a boxing card arranged by F. L. Hunt of the Y. M. C. A., under the guidance of Lt. Conover of the Training Station.

June 26, 1918, San Diego Union, 8:4-5. Stage Women's Organization of War Workers gives plays for boys in San Diego camps.; first program Monday night at the army Y. M. C. A. in the Harvester building; the program consists of three one-act comedy sketches.

June 26, 1918, San Diego Union, 14:1. (also June 29, 1918, 8:1). Outdoor dance Saturday, June 29, Balboa Park.

June 29, 1918, San Diego Union, 8:1. Will dance tonight at Balboa Park; sixth outdoor ball of series will be held by Navy men; each dance will be announced upon a screen which will be erected to the left of the newly-constructed bandstand.

June 29, 1918, San Diego Union, 9:3. Six week summer school of art planned with studios in California Building, Balboa Park.

June 30, 1919, San Diego Union, 4:3. Rehearsal held of pageant to be presented July 4.

June 30, 1919, San Diego Union, 4:4-5. Flag presentation feature of Americanization Day; nation's emblem to be given July 4 to 151 new citizens who have pledged allegiance within last year; program one of series at request of President Wilson.

June 30, 1919, San Diego Union, 4:6. Leaders of both parties work for Kettner's return to Congress.

July 3, 1918, Letter, T. N. Faulconer, Executive Secretary, Board of Park Commissioners, to Colonel Willis Uline, commanding, 21st Infantry, requesting that small room and toilet at east side of north gate to Exposition grounds be vacated.

July 3, 1918, San Diego Union, 6:6. Three hospital buildings and a nurses' home are to be erected at the Naval Training Station at Balboa Park at an estimated cost of \$50,000. The new buildings will be an addition to hospital facilities at the station. They will be erected at a site given by the Park Commissioners last week.

The plot is 200 by 500 feet and is located across the tracks east of the east entrance to the park. Each of the buildings will be 100 feet long and 25 feet wide, accommodating 30 patients each. The nurses' home will be large enough for 40 nurses.

July 4, 1918, San Diego Union, 4:3. Living pictures to show facts of United States history; plans completed for patriotic celebration at Organ Pavilion tonight.

Plans for the pageant which is intended to be San Diego's form of celebration for the Fourth of July, and which will be held at the Organ Pavilion in Balboa Park this evening, have been completed according to an announcement made yesterday, and those in charge are emphatic that the program will carry out to the fullest President Wilson's expressed conception of the day. It is expected that the evening program will be an ample ending to the local Fourth, which officially will start with the Americanization day exercises to be held at the Organ Pavilion beginning at 10 a.m.

Both military and civilian talent have been drafted for the evening celebration, the chief feature of which is to be a series of living representations of the principal facts of the history of the United States. Particular attention has been paid, it is declared, to the idea of presenting the pageant in as noble and inspiring a manner as possible. Experienced actors from civil and army life will appear in the chief roles, and among the singers to take part is Madame Edna Darch, grand opera star.

The music for the pageant will be furnished by the 21st Infantry and the Naval Training Camp and the Spreckels Organ, which will be played by Dr. H. J. Stewart. The choral parts will be sung by the People's Chorus and the Fort Rosecrans's Soldiers' Chorus. The principal address will be a four-minute speech by J. Edward Keating, chairman of the four-minute men. The program was prepared under the auspices of the War and Community Service.

July 5, 1918, Letter, John R. Brooke, Jr., Captain, 21st Infantry, to Executive Secretary stating that room and toilet at east side of the north gate to the Exposition grounds will be vacated.

July 5, 1918, San Diego Union, 1:5, 6:8. Celebrations at park draw thousands.

July 5, 1918, San Diego Union, 9:1, 10:4. Throng applauds historic pictures at organ.

July 5, 1918, San Diego Union, 9:2-7. Welcome extended to new citizens at Organ Pavilion yesterday morning under auspices of Rotary Club.

July 5, 1918, San Diego Union, 10:1. Mrs. W. Carlton Smith, dramatic soprano, to sing at Organ Pavilion Sunday afternoon.

July 5, 1918, San Diego Union. 10:1. Tropical blooms which fill lagoon underneath Cabrillo bridge make spectacle of beauty.

July 6, 1918, San Diego Union, 7:1-3. "Coming together of flags" impressive Knights of Columbus ceremony; presented to more than 2,500 members and friends of order at Organ Pavilion last night; band of 21st Infantry played national hymns of allies.

July 7, 1918, San Diego Union, Society-Club, 3:3. Mrs. Charles Franklin Fletter, contralto, to sing at Organ Pavilion today.

July 8, 1918, San Diego Union, 4:1. EDITORIAL: San Diego's Mob Manners.

People in front seats at Organ Pavilion block view of people in back by standing on their seats or by hoisting parasols; situation gives rise to loud protests which drown out performers; incidents happened during Madame Schumann-Heink's singing and during presentation of Fourth of July pageant.

July 8, 1918, San Diego Union, 6:1-8, 7:1. U. S. Naval Training Station in Balboa Park Finest in Land; Uncle Sends Embryo Sailormen Across Continent That They May Have Advantage of Ideal Training Conditions Offered at San Diego's Exposition Grounds.

Jack is going to sea! On the farms of the middle west; in the factories of the crowded east; with the cattle on the plains --- everywhere has he heard the call of the open road and felt the lure of the surging waves --- and today, several hundred thousand strong, he is either doing his bit or learning to do his bit for his Uncle Sam on the ships that Uncle owns.

But if Jack is a lucky boy, the powers that be will send him to Balboa Park, where San Diego has turned her Exposition grounds over to the navy, and where the navy, as a measure of thanks, has built up one of the finest and most successful training camps for sailors in the land. That his naval training camp is the finest is due primarily to its location in one of the most spacious and beautiful parks on the Pacific coast, and that it is one of the most successful is proved by the number of boys, fully prepared, who have taken their ditty-bags upon their shoulders since the institution of the camp and gone down to the sea in ships. And when it is remembered that Uncle is now sending men all the way from the eastern coast to have them trained at Balboa Park for the ships that Uncle owns, it is evidence that Balboa Park's training camp has done as much --- maybe a little more --- than the navy expected.

But to get back to Jack. He has probably rowed a boat on the old mill stream, or spent the long winter nights with a favorite volume of sea tales, or seen a natty man-of-war's man rolling down the village street --- and then comes the war, with his country calling for man to walk upon the decks of her navy and the merchant marine which she is busy creating. So Jack kisses his mother good-bye and goes to town to see the recruiting officer.

Accepted, for he is husky and full of pep, he immediately began to leave the old life behind him, and finds, from day to day, that he is gradually becoming a more polished gear in the machinery of the world's greatest institution --- the United States navy.

If he is lucky, as had been mentioned before, he is sent to Balboa Park. He is instructed to wear his old clothes for they will be discarded anyway, and if he can give them to the Salvation Army it will save the expressage on sending them back home. Then, will all those who have gathered together for the same purpose, he is sent to the training camp.

The detention camp has all the comforts of a modern hotel --- and some that a modern hotel never had. After his meal he is assigned to what is called a "compound," a group of 36 men, and discards his civilian clothes. His issue of navy garments is given him, and he is ready for an examination by a camp surgeon. The examination finished he is placed in the detention camp for 21 days, and is always under a doctor's observation.

His training begins immediately with preliminary instructions on discipline and other navy specialties, and so thorough are these that the detention camp is familiarly known as "the school for recruits." When the 21 days have passed, he is placed in a company, and his real training as a sailor begins.

The value of discipline has already been impressed upon him, together with a preliminary knowledge of the rules and regulations of the navy. His first period of training outside the detention camp is passed in taking him around the camp, showing him its borders; the places where he will eat and sleep, where he may smoke and lounge and recreate. He is also shown the offices or the different departments and the officers in charge are pointed out to him, together with their rank and duties. This phase of the training is necessary in order that, when detailed to orderly or messenger duty, he may know "what's what."

He has already been schooled in the care of his person and his clothing, so, after his tour of the training camp, he is ready for his routine training. The thoroughness of this may be gathered from the fact that it includes regimental drill, physical drill, with and without accouterments; bayonet exercises, signal practice, compass and lead-line practice; instruction in the use of small arms and the standard manual of arms; nautical nomenclature; splicing of various sizes of ropes and wires; knotting; instruction in all the types and uses of vessels of the U. S. navy; handling of boats under oars and _____; rules of the road; swimming and artillery drill, and first-aid. In addition, he is given comprehensive lectures on the "Life and Duties of a Man-o'-war's man," which covers all the important parts of his training.

The physical drill used at the training camp is the Swedish system of setting-up exercises without arms. But Jack has other forms of physical drill, among which the most spectacular is a physical drill with arms, which is gone through at the conclusion of dress parade. This drill is accompanied and timed by the training station band, and at this season of the year, when Jack is garbed in "whites," it provides a stirring scene as can be found in military life.

While Jack finds that even on dry land his life is really that of a sailor at sea, there are of necessity some phases of his training in which the salt flavor is more apparent than in others. This is particularly true of those studies which are included in the generic terms: "Instruction in the compass and the lead-line," which has to do particularly with the handling and navigation of ships. "Boxing the compass," has always been the sailor's favorite indoor sport, and Jack learns to box the compass in as many ways as the law allows while at Balboa Park. He learns the quaint sea terms that go with navigation, and "By the deep, six!" becomes as familiar an expression as any that came to him on the farm.

Most of the instruction takes place in a large room which has been fitted specially for it. On the walls are pictures of all the various types of United States battle craft; signal flags; special insignia, and pennants. Along one side are exact duplicates in rope of all the knots and "bends" which a real sailor should know, while in the center of the room is a "jack stay" --- a heavy rope hung to four posts in the manner of a prize ring in pugilism and carrying at small intervals lengths of smaller rope. Jack stands by the "jack-stay" with an instructor before, and learns the "bow-line," the "figure-eight," and all the knots and splices upon which his safety or convenience at sea may depend.

In handling small boats, Jack gets instruction on two regulation navy 25-foot cutters in the swimming pool. The pool is too small for maneuvering, but, nevertheless by the time his instruction is finished, he has learned the handling of oars and sails, how to take his position, and the understanding of every command which may be given him. Here, too, he gets his swimming lessons, which are among the most pleasurable of his tasks. The method of instruction is the navy dry-land system, and is under the direction of the navy's experts in swimming instruction on the Pacific coast. By this method Jack really learns to swim before he ever strikes the water --- but whether he has learned to swim or not, the pool has greater attractions for him these summer days than any other form of amusement, and he gets as much fun from wading as he does from the use of the breast stroke.

When Jack has a pair of shoes to be half-soled, a torn jacket to be mended, or hair to be trimmed, he goes to the station's own shops, where other Jacks, skilled in their trades, perform these little tasks for him. The barber shop is a model of cleanliness. Every tool is sterilized after each

operation; fresh towels are present in an unending supply, and it is as bright and sanitary as the best civilian shops. The shoe shop is filled with the latest shoe-repair machinery, and, in the manner of the up-to-date shop of the city, repairs are turned out "while you wait."

All repairs in the tailor shop are free to Jack, but the other work is assessed against him at cost price. What it means may be appreciated from the fact that the prices average a little less than one-half of those paid by a civilian. The same thing is true of the canteen, where Jack buys almost everything under the sun which may strike his fancy, and in some instances they are so low as to make the civilian tear his hair at the thought of the "margin of profit: which is exacted in ordinary life.

If Jack is specially fitted for some particular kind of work he will be sent to a school in which he will learn to do thing in the navy way. For example, there is a cooking school, where he is taught to cook and bake, and where the kitchen is the regulation gallery of the deep-sea ship. He learns the intricacies of wireless apparatus at a well-appointed radio school; if he shows aptitude for signal work he is detailed to a school of signaling where he is prepared for the navigation department, which is radically different from the quartermaster's department in the army which has to do with supplies and like matters. The signal systems in which Jack is trained, irrespective of whether he wishes to specialize in this department, are the atmosphere dot-and-dash, international signal code, and the navy general signals.

In the navigation school Jack will be given an advanced course in seamanship, ordnance and navigation. This advanced course will fit Jack for a commission, and thus Jack of the farm may speedily become Mr. Jack of the quarter-deck if he minds his p's and q's at Balboa Park.

Another large field of advancement is the clerical department, which takes care of all the bookkeeping records and general clerical work of a ship. If Jack's talents are of this kind and he is successful in passing through the school which is maintained for this work he attains the rank of yeoman, which as Jack would say, "ain't so worse."

But the striking fact concerning the navy training station at Balboa Park, aside from the success it has attained in making a sailor out of Jack, is the atmosphere of the sea which is maintained at the camp to a degree which makes it readily apparent even to the civilian. The nomenclature is that of the sea --- Jack never scrubs a floor or cleans a pavement, he "scrubs down the decks." He is never at home, but "aboard ship"; he is never in town, but always "on shore." He sleeps in a hammock which is hung at regulation navy height, and he never climbs into it --- he swings himself into it as he would have to do on shipboard. He never pulls on a rope, but he often "mans the halyards."

With all his studies, sports and recreation, Jack is vitally interested in one phase of his day at the training camp above everything else --- and his commanders and instructors are as keen about it as he is. This is the question of food, or "mess" as Jack terms it. Jack is usually a person of well-developed appetite, and he not only wants good food, but he wants lots of it.

Therefore, the galley and mess arrangements at the training camp are among the most interesting and important phases of the training course. The outstanding feature is, of course, the great open-air dining room, which is in the street in front of the former Cristobal Café, now the galley or kitchen. A large awning has been erected to protect Jack from the sun during mess times, but after he has arisen from the table it is rolled back and the bright California sun is allowed to play upon the tables and their furniture, providing a means of antiseptic, it is said, which makes this the most sanitary dining room in the country.

The foot is prepared in the gallery, or, as Jack's mother would prefer, the kitchen in the Cristobal Café. The galley, where any number of cooks and bakers hold way over the pots and pans, can feed 5,000 sailors at a meal. The menus are prepared a week ahead, and include everything from ham to eggs to the turkey of holiday time. There is no limit to the foot which is

allowed Jack. He can come back for “seconds,” and “thirds,” and even for “fourths,” but particular care is taken to eliminate waste.

The camp at Balboa Park, as has been said, is considered by naval men to have achieved a full measure of success. In the last body of recruits received at the camp there was a contingent of youths who had been sent to San Diego from Pittsburgh, Pennsylvania, and other cities of the east, while but a few of the remainder were from California. One reason for this success, of course, is the excellent climate, which permits of uninterrupted training throughout the year, while the beautiful environment of the former Exposition grounds makes the camp a thing of perpetual joy to Jack. But one thing, according to those in charge of the training is lacking in the camp, and that is sufficient opportunity for aquatic instruction. There is to the south of the camp a canyon, which may be so damned that if filled with water, it would make a lake behind it approximately 1200 feet long and 200 feet wide, providing plenty of space for maneuvering of boats, races and water sports. If this feature is added to the camp it is believed that the government will make the present camp a permanent station and will replace the Exposition buildings, many of which are deteriorating rapidly, with edifices specially adapted to Jack’s needs.

While the old buildings have been used with great success, it required much ingenuity on the part of the naval engineers to fit them and arrange the course of training with regard to them, but today this detail has been actually accomplished. With permanent structures erected by the government according to its own ideas, it is believed that still finer results could be obtained.

But Jack doesn’t worry about this. His training, though strict, is pleasant. His environment is delightful. He is welcome in the city, and the feminine heart still holds a niche for him --- especially since this is the first port in which Jack may have a wife, and she has not yet thought of the ports where Jack may lure another maid. And when, with his ditty-bag on his shoulder, and any number of things crammed in his head, he swings down to the harbor of the sun to board his first ship, he knows, and the world knows, that he is that finest product of any country’s training --- an American sailor, as expert with a steering wheel as with a cutlass, as merry in a battle as he can be with a girl.

July 8, 1918, San Diego Union, 7:1-2. Band of Balboa Park sailormen ranks with best in Southland.

July 11, 1918, San Diego Union, 7:1. Naval Training Station band to pay at Warner Springs Saturday and Sunday; assigned to French Independence celebration to be held at resort, 13th and 14th.

July 12, 1918, Minutes of the Park Commission.

President Ryan stated that he had seen Mr. G. A. Davidson, president of the Panama-California International Exposition, in regard to the settlement of existing accounts between the Exposition and this Department, and that committees representing the Exposition and the Park Department would meet at some early date to discuss a final settlement. Upon motion duly made and carried, President Ryan Superintendent Morley and the Executive Secretary were named to represent the Park Department, and the Executive Secretary was directed to so advise Mr. Davidson.

July 15, 1918, San Diego Union, 1:4-6, 2:1. Celebrate Bastille Day at Balboa Park organ yesterday afternoon; more than 10,000 San Diegans joined with French people; main address by Judge Allen R. Rodgers, Fernand Amandes of 158th Infantry sang songs in French and English; Major General Frederick S. Strong, commander of 40th Division, expressed admiration for French people.

July 15, 1918, San Diego Union, 4:3-4. Navy Band heard at Warner Springs.

July 15, 1918, San Diego Union, 5:4-6. Tribute paid to flag at War Council rally last evening; gathering at Organ Pavilion held in honor of Stars and Stripes; also to advance work of organizing citizens in community movement; address by Governor Stephens.

July 19, 1918, San Diego Union, 7:5. Fernand Amandes, baritone, now with 158th Infantry, Camp Kearny, to sing at Organ Pavilion Sunday afternoon, July 21.

July 19, 1918, San Diego Union, 8:1. Men instructors wanted for army classes at Park; courses in elementary subjects given to soldiers of 21st Infantry.

July 19, 1918, San Diego Union, 8:2-4. Dancers to entertain army and Navy men at the Knights of Columbus recreation center at Balboa Park this evening.

July 21, 1918, San Diego Union, 15:3-5. Miss Marguerite De La Motte to give interpretative dances at Knights of Columbus recreation building, Balboa Park, Tuesday evening, July 23, for men of Naval Training Station, Marine Corps and 21st Infantry.

July 26, 1918, San Diego Union, Society-Clubs, 7:2. Seventh outdoor dance to be held at Balboa Park tomorrow evening.

July 16, 1918, San Diego Union, Society-Clubs, 7:5. Mrs. W. Carlton Smith, soprano, and Mrs. E. S. Barr, pianist, will give recital at the Organ Pavilion Sunday afternoon.

July 27, 1918, San Diego Union, 5:5. Bernard Hollenhauer, violinist, will appear at Dr. Stewart's organ recital tomorrow.

July 31, 1918, San Diego Union, 6:4-5. Men of 18 nations drafted into 21st Infantry are learning English rapidly; progress made by men at Balboa Park declared amazing by teaching corps; classes taught by education department of Y. M. C. A., assisted by Normal School teachers; classes held in front of Natural History Building beginning at 5:45 p.m. and in the mess hall of the Third Battalion.

August 1, 1918, San Diego Union, 11:3. Wallace Moody, tenor, to sing at Organ Pavilion Sunday afternoon, August 4.

August 3, 1918, San Diego Union, 4:4-5. Dr. H. J. Stewart, organist, Bernard Mollenhauer, violinist, and Mrs. Mollenhauer, cellist, to be heard in recital at regular Sunday afternoon concert.

August 3, 1918, San Diego Union, 4:4-5. Letter from W. H. Wilshire recalling F. F. Grant's action as Park Board member:

As I recall it, it was Mr. Grant who allowed the refreshment concessions of the park to be transferred to a private individual for \$150 a month, when, at the time, the Park Commission was enjoying an income of \$1,500 monthly from the same concession.

August 4, 1913, San Diego Union, 3:5. Navy boys put on clever Minstrel and Variety Show at Isis theater last night; scenes written by members of Section Naval Base.

August 5, 1918, San Diego Union, 3:1. More than 4,000 persons attended Sunday afternoon concert at Organ Pavilion yesterday; organ, cello and violin trios on program.

August 5, 1918, San Diego Union, 4:6. F. F. Grant, Secretary of Park Board, writes letter answering W. H. Wilshire:

The Park Department is being maintained in 1918 with less than one-half as much of the taxpayer's money as was used by the Department in 1916. The income to the Department from sources other than taxes will be in excess of \$20,000 for 1918, against practically nothing for previous years.

The Stadium is now practically self-supporting instead of a heavy burden to the taxpayers as it had been previously.

There is no private individual who has a concession in the park to which Mr. Wilshire refers. The Park Board has charge of all concessions.

August 6, 1918, San Diego Union, 12:4. Miss Edna Mae Scofield, the artist, gave tea Saturday afternoon, August 3, in her picturesque studio in the Ethnological Building, Balboa Park.

August 7, 1918, San Diego Union, 6:6. Tenth in series of Plaza dances on Saturday to be elaborate; special lighting effects will be used; the affair will begin promptly at 8 o'clock and will be brought to a close at 11:30 because of the rule closing the park before midnight.

August 7, 1918, San Diego Union, 7:1-2. Sailors at Balboa Park heard Rabbi Nathan Krass on causes and purposes of war Monday evening, August 5; a new feature of the Y. M. C. A. building is the pergola erected by the camp; hickory chairs and tables have been placed on the Plaza and during liberty hours the place is well filled with sailors smoking, reading, playing games and just lounging.

August 9, 1918, San Diego Union, 4:3-4. Thousands attend reception marking 40th anniversary of Marston store.

August 10, 1918, San Diego Union, 6:1-2. Training Camp sailors to dance again tonight.

"It is the announced desire of the officers that only respectable persons attend."

August 10, 1918, San Diego Union, 13:8. The opening round of a 5-week boxing tourney will be held Monday evening, August 12, on the Plaza de Panama and will consist of six bouts.

August 11, 1918, San Diego Union, 1:7. Mayor Wilde punches Councilman Walter P. Moor in eye at U. S. Grant Hotel as a climax to their long-standing feud.

August 11, 1918, San Diego Union, 6:1-2. Volunteers sought to teach English at soldiers' school, Balboa Park.

August 11, 1918, San Diego Union, Classified, 1:8-4. Bessie Barriscale, screen actress, inspected her "godsons" at Naval Base yesterday.

August 11, 1918, San Diego Union, Sports and Auto Section, 1:2. Navy boxers in trim for tournament which starts tomorrow night.

August 14, 1918, San Diego Union, 6:3. English school for soldiers at park reorganized; classes being regrouped according to progress made by men; teachers needed.

August 17, 1918, San Diego Union, 3:4-6. San Diego Floral Association will hold a one-day Dahlia show tomorrow

August 17, 1918, San Diego Union, 4:3-5. John D. Spreckels celebrates 65th birthday; life-sized portrait in oils come as surprise as anniversary gift.

August 17, 1918, San Diego Union, 8:1. Training Camp sailors to be hosts at dance; tenth semi-monthly affair to be held tonight at Balboa Park Plaza.

August 18, 1918, San Diego Union, 1:7. Governor William D. Stephen's speech at Organ Pavilion this afternoon will be patriotic.

August 18, 1918, San Diego Union, 10:3 Dahlia Show today (Sunday) in California Building.

August 19, 1918, Regimental History, Twenty-First Infantry, 1918. The regiment, under instructions, telegram War Department, became a part of the 16th Division, organized at Camp Kearny, California, and changed station from Camp Walter R. Taliaferro, San Diego, California, to Camp Kearny, California.

Company C having been relieved from guard duty at North Island, California, by the 25th Battalion, U. S. Guards, returned to Camp Walter R. Taliaferro for duty.

August 19, 1918, San Diego Union, 1:5-6, 3:4-5. Governor William D. Stephen's gave stirring patriotic talk, with politics left out, at Balboa Park yesterday.

August 21, 1918, San Diego Union, 10:4. 21st Infantry to try Balboa nine Sunday afternoon at Stadium; Naval Training Station has reorganized with new lineup; Taliaferro strong.

August 22, 1918, Letter, Executive Secretary, Board of Park Commissioners, to Col. Willis Uline, Commanding, Camp W. R. Taliaferro, San Diego, Calif.

Dear Sir:-

The superintendent of parks, Mr. Morley, has requested that I report to you the following incidents:

Between 11 o'clock p.m. Wednesday, August 21, and daylight this morning, the home of the executive secretary on the Model Farm, Balboa Park, was entered and rifled. From the clothing of the executive secretary a small amount of change was taken. A breast pin composed of a dark brown topaz (about four to six karats) set in 18-karat filigree gold mounting was taken from a dressing table. This being an heirloom, the intrinsic value is not known definitely, but is estimated at \$20 to \$40.

Entrance was gained by a screen window in the living room being raised.

The burglar apparently worked without light, as clothing and contents were scattered promiscuously about the bedroom, and several articles of value were overlooked.

The occupants of the residence were asleep on a screened-in porch adjacent to the bedroom and were not awakened.

At 10:05 a.m., this date, a soldier was seen prowling about the chicken runs in the model farm. One of these runs containing peach trees, now bearing fruit, was entered and considerable fruit taken. The soldier was ordered out and left, but returned a few minutes later, remaining in the chicken run until a gardener was summoned.

Very truly yours.

August 22, 1918, Correspondence, John Morley, San Diego Public Library; Letter, Executive Secretary to U. S. Naval Air Station, North Island, stating cost of cornice work on San Joaquin Building will be approximately \$65.00.

August 23, 1918, San Diego Union, 10:2-3. First call for football issued at Naval Training Camp, Balboa Park.

August 23, 1918, San Diego Union, 10:5. 21st Infantry Baseball Team ready for two games; North Islanders play on Saturday and Naval Training Camp/Taliaferro Sunday.

August 23, 1918, San Diego Union, Classified, 9:4. Mayor throws down gauntlet to Councilman Moore.

August 27, 1918, San Diego Union, 7:4-5. "Old Doc" Cook hero at Balboa Park fights; knocked out Kid Benson in the first round and boxed three rounds to a draw with Mike Russell.

August 27, 1918, San Diego Union, 7:5 Jack Ryan, pitching for the naval training camp, won his game from the 21st Infantry at the stadium last Sunday.

August 28, 1918, San Diego Union, 6:3. 21st will remove to Camp Kearny; Regimental Headquarters in Balboa Park to be transferred last of week.

Camp Kearny, Aug. 27. --- San Diego's own fighting infantry, the 21st, which for years acted as escort of President William McKinley, is about to break camp and depart from its pleasant surroundings in Balboa Park. The announcement came from the regimental headquarters this morning, stating that the 21st would pack up and march to Camp Kearny the latter part of this week to take up new quarters in the old camp of the 18th brigade.

This is the "old, well-known army brigade," mentioned sometime ago which is to form the foundation for the 21st Infantry brigade now being formed here.

Colonel Willis Uline, commander of the 21st, will take over temporary command of the camp and the 18th division by seniority of rank, unless a few brigadier generals are assigned here to precede the division commander.

The command of the camp has been shifted so often and so rapidly in the last two weeks that it has been hard to keep track of who was in supreme authority.

Officers of the 21st Infantry have been frequent visitors to this camp the last few days, locating their camp and preparing everything for their move.

August 29, 1918, San Diego Union, 8:3 (Thursday morning). Training Camp boys to stage "deep sea" vaudeville show at the Isis Theater of the evenings of September 6 and 7; sailors will seen footlight honors; many former professionals to appear.

The men who will take part in the show are enlisted men and are men who have had experience on the stage. Vernon Dent, who will head the program, was on the Orpheum circuit before he enlisted in the Navy and appeared on the Keith circuit in the east about three years ago.

August 29, 1918, San Diego Union, 8:5. War Work Council of Y. M. C. A. experiences busiest season.

The transfer of the 21st Infantry from Camp Taliaferro to Camp Kearny has brought to a close the educational work of teaching English to the foreigners of that regiment. More than 200 men have been receiving their first lessons in English for the last five or six week under the direction of the educational department of the association. . . . The teaching force was composed of volunteer teachers from the city schools and students in the summer school of the State Normal.

August 30, 1918, San Diego Union, 4:3. Marines honor former comrade killed in action; memorial unveiled in park in presence of entire command stationed there; granite memorial resting on a concrete foundation.

Private John Awkerman of the 27th Company, 4th Regiment of the Marines, killed in action in Santo Domingo, June, 1916; memorial erected opposite entrance to Kern Building, the building now being used as a barracks for the marines.

August 30, 1918, San Diego Union, 6:4-5. Raja Yoga College students give entertainment at park last evening in the building that is occupied as the service headquarters of the International Brotherhood.

The large reading writing and recreation rooms in this building have been used constantly by the men of the army and navy since they were opened over a year ago.

August 30, 1918, San Diego Union, 6:6. Company D, 21st arrived at Camp Kearny from Long Beach last evening.

The rest of the men in the 21st will start their hike from Camp Taliaferro this morning and probably will pull in soon after noon mess.

August 30, 1918, San Diego Union, 11:5. Concert Sunday, September 1, at Organ Pavilion, by war savings music bureau of Southern California; Mrs. Bertha Winslow Vaughn, soprano, and Roland Paul, tenor, soloists; no collection will be taken at concert.

August 30, 1918, San Diego Union, 11:8. Navy to give semi-monthly outdoor dance; predicted that 14th in series of affairs at Park will cap climax.

August 31, 1918, San Diego Union, 3:6. Number 11 street car from Balboa Park crashed into rear of Number 7 car near the high school last evening; lead car stopped at Stadium to discharge passengers and car following behind struck it; seven people slightly hurt.

August 31, 1918, San Diego Union, 6:3-6. 21st Infantry now established at Camp Kearny; becomes active participant in organization of 16th Division, according to plans.

August 31, 1918, San Diego Union, 6:6. Plan to observe Pennsylvania Day at Organ Pavilion this afternoon by sailor boys at Training Station; Mrs. L. L. Rowan will sing; college songs and cheers will be given; refreshments will be served by Y. M. C. A. at Pepper Grove after the program.

September 1, 1918, San Diego Union, 6:6. Pennsylvanians meet to honor boys at Station; 400 youths from Keystone State take part in celebration at Organ Pavilion.

September 1, 1918, San Diego Union, 14:1-5. Section naval base at La Playa transforming youths of today into fighters of tomorrow.

September 1, 1918, San Diego Union, Society and Club, 1:1-2. Naval Training Station boys of Balboa Park to give "Deep Sea" vaudeville performance at Isis Theater, Friday and Saturday evenings, September 6 and 7; seats reserved; prices 50 cents and 75 cents.

September 1, 1918, San Diego Union, Sports and Auto, 3:5. Opening patriotic concert of series to be held at Organ Pavilion under auspices of war savings music bureau of Southern California; Lyman J. Gage will preside; Miss Gertrude Gilbert chairman for San Diego County war savings concert bureau.

September 2, 1918, San Diego Union, 5:3-4. Splendid musical program at Organ Pavilion; Los Angeles artists greeting with enthusiasm at meeting designed to promote patriotic and community spirit.

September 4, 1918, San Diego Union, 5:3-6. Naval Training Station never busier than now (photographs of about 6,000 bluejackets doing exercises and part of a battalion drill).

September 7, 1918, San Diego Union, 8:3-6. Men in Uncle Sam's Training School at Balboa Park in Love with Place, Shown.

That the men in Uncle Sam's training school in Balboa Park like their job is evident and there does not seem to be a general desire to get away from the school and its associations. On liberty days hundreds of the men instead of making an early break for downtown and larger liberty choose to stay in camp all day, seeking and finding diversion enough there.

On Labor Day, fully 1500 remained in camp, and in the evening witnessed and participated in the humorous athletic students, and incidentally found an outlet for the unlimited energy stored up during two days free from duty.

The events took place on the Plaza before the Y. M. C. A. hut.

September 10, 1918, San Diego Union, 2:4. Patriotic national registration rally at Balboa Park tomorrow night at eight o'clock; executive committee of Community Council of Defense asks churches, fraternal and civic organizations to adjourn their meetings so attendance may be present at rally.

September 10, 1918, San Diego Union, 5:3-6. Several hundred young men receive instruction in swimming at section naval base on Point Loma.

September 10, 1918, San Diego Union, 6:7. Sailors at Park saw boxers mix last night; show good work; more than 3,000 cheer as last of preliminaries are given on big Plaza.

September 10, 1918, San Diego Union, 6:7-8. Oriental program to be given at Park tonight by Mrs. Carl Johnson, contralto, and Miss Lois Brown, pianist, illustrating costumes and languages of India, China, Japan and Hawaii; to entertain servicemen.

September 12, 1918, San Diego Union, 1:6. City ready to register manpower; big crowd at Organ Pavilion; hear orators in patriotic utterances; 6,000 men and women attended; registration tomorrow.

September 12, 1918, San Diego Union, 5:1-6. Photograph of 5,000 sailors forming service flag for navy on Plaza de Panama.

September 16, 1918, San Diego Union, 7:1. Champions in football and baseball. That is the record the Naval Training Camp of Balboa Park has made during the two seasons of 1917-1918.

September 16, 1918, San Diego Union, 7:7-8. Final boxing bouts at Balboa Park tonight.

September 16, 1918, San Diego Union, 8:4. San Diego in line for U. S. hospital; Navy Department has started an investigation for a hospital and San Diego is included in list of eligible cities.

September 19, 1918, San Diego Union, 8:4-5. Government decides to build big hospital in Balboa Park; City Council provides 10-acre tract on convenient site; plan will call for an expenditure of \$100,000; bids to be called in the near future; two large buildings, each with a capacity of 1,000 or more beds; site is old Howard tract, northeast of Stadium; large eucalyptus trees surround site; resolution tendering use of grounds presented to Council yesterday by Councilman Walter F. Moore and unanimously adopted; in case the Navy Department may later require more ground the Council will offer land north or west of the present site; Dr. R. A. Buker, in charge of the hospital at the Naval Training Station in Balboa Park, declared yesterday the site, commanding a view of the bay and the mountains, is ideal.

September 27, 1918, San Diego Union, 1:5. Great relative and sweetheart film to be made tomorrow afternoon at Balboa Park in cooperation with **Union** and **Evening Tribune**; film will be shown here and abroad.

September 27, 1918, San Diego Union, 1:6-7, 3:6. Draft call postponed by General Crowder account of influenza epidemic.

September 28, 1918, San Diego Union, 7:1-2. Balboa seamen keep busy though tied in; quarantine placed on the station by the war department.

September 28, 1918, San Diego Union, 7:3. Section Base baseball challenge accepted by Balboa Park heads; offer to stage the game on the first Sunday following the lifting of the quarantine.

September 29, 1918, San Diego Union, 12:4-7. Bluejackets at Balboa Park pass hours of quarantine at sports and games.

Bluejackets in training at the naval training camp, Balboa Park, have readily adjusted to the rigorous quarantine placed on the camp by the naval authorities at Washington last Wednesday as a precaution against an outbreak of the influenza epidemic sweeping the country. They have cheerfully accepted the denial of liberty three times each week as part of the program for winning the war.

Order has been passed out that there is to be no expectorating on the streets of the park. The punishment is that the lad spitting on the street or the plaza must wear a cigar box swung about his neck, and this box is partially filled with sand and serves as a receptacle for the cigarette and cigar stubs of the victim's shipmates.

September 30, 1918, San Diego Union, 7:1. Balboa seamen hold another day of sports events; quarantined sailors enjoy their "should be" liberty at camp Sunday, September 29.

September 30, 1918, San Diego Union, 7:8. Naval trainers held vaudeville at Plaza de Panama Saturday evening, September 28; prizes given by local firms to sailors who did the best acting.

September 30, 1918, San Diego Union, 8:1-3. Quarantined sailors have "stunt evening" Saturday, September 28.

October 3, 1918, San Diego Union, 9:3. Naval trainers celebrated the end of the first week in quarantine yesterday afternoon by turning out and rooting for their favorite volleyball, basketball and baseball teams; games on Plaza; exhibition boxing match of four three-minute rounds.

October 4, 1918, San Diego Union, 7:2-5. Photograph of shut-in sailors playing volleyball.

October 6, 1918, San Diego Union, 4:3. Naval camp boys subscribed \$73,250 yesterday in opening day for fourth Liberty Loan drive.

October 6, 1918, San Diego Union, Sport and Auto, 1:6. Seaman guard battalion at Balboa defeated in volleyball yesterday but retained lead in quarantine pastime.

October 7, 1918, San Diego Union, 6:4-5. Captain MacArthur, who assumed command last week, in charge of Balboa naval training.

October 8, 1918, San Diego Sun, 6:4. The regular Monday evening, October 7, athletic program of the Balboa Park Naval Training Camp was featured by three wrestling matches and two fistic encounters. The program was given on the Plaza de Panama and was attended by more than 4,000 sailors.

October 8, 1918, San Diego Union, 8:4. Featured by three wrestling matches and two fast boxing bouts the regular Monday evening program of the naval training camp proved a huge success last night when it was presented on the Plaza de Panama.

October 9, 1918, San Diego Union, 6:1-8 (Group photograph of Battalion C of Naval Training Camp, Balboa Park; so far 725 of this battalion have subscribed to present Liberty Bond drive.

October 10, 1918, San Diego Union, 4:1. EDITORIAL: **Union's** 50th Anniversary, giving the history of the **San Diego Union**.

October 10, 1918, San Diego Union, 12:3-4. Naval training football eleven has many college stars; team given first stiff workout yesterday afternoon; Lt. Conover working on game schedule.

October 11, 1918, San Diego Union, 1:4-5. All theaters, moving picture shows, dance halls, churches and bathhouses will be closed until further notice beginning at midnight tomorrow night as a precautionary measure against the spread of influenza; City Board of Health issued the order last night.

October 12, 1918, San Diego Union, Classified, 9:1-4. Every precaution is taken to guard against epidemic.

October 13, 1918, San Diego Union, 9:2-3. Anti-influenza quarantine closes all public places.

October 13, 1918, San Diego Union, 10:4. Marston doubles subscription to Liberty issue; increases figures from \$40,000 to \$80,000.

October 13, 1918, San Diego Union, Classified, 1:3-4. Lt. J. S. Conover writes letter to J. J. Green, superintendent, expressing appreciation of training received by sailors in shops and drawing rooms of San Diego High School and Junior College.

October 13, 1918, San Diego Union, Sport and Auto, 1:7. Naval officers meet today on baseball field; teams from section base and training station play at Balboa Park.

October 13, 1918, San Diego Union, Sport and Auto, 1:8. Volleyball finals at Naval Station played yesterday afternoon.

October 13, 1918, San Diego Union, Sports and Auto, 14:3. Naval Training Camp sets goal of a quarter of a million dollars in Liberty Bond drive; list shows the various units of the training camp with the number of men in each who have bought bonds to date with the amount subscribed.

October 13, 1918, San Diego Union, Sport and Auto, 14:6. Strict embargo placed on all military camps; preventive measures taken to protect good health of San Diego County.

October 14, 1918, San Diego Union, 7:7-8. Naval Base officers downed Naval Training Station by score of 10 to 8 yesterday morning.

October 15, 1918, San Diego Union, 6:4. Balboa Park boys subscribed \$131,050 to Liberty Loan at closing time yesterday.

October 18, 1918, San Diego Union, 6:4-5. Record loan subscriptions reached at Naval Training Camp, Balboa Park, announced.

October 20, 1918, San Diego Union, 1:3-6, 4:6. San Diego's great airplane exhibition yesterday morning by the aviators at Rockwell Field (photograph).

October 20, 1918, San Diego Union, 14:3-5. Captain Arthur MacArthur's navy record includes service in first submarine.

October 21, 1918, San Diego Sun, II, 7:4-5. Marston is for Charles F. O'Neill for state senator.

October 21, 1918, San Diego Union, 8:5. Sailors continue with big shut-in program at Naval Training Camp.

October 22, 1918, San Diego Union, 5:3. Naval Training Camp men paid; sum of \$50,000 distributed; yesterday was semi-monthly payday; new recruits given swimming instructions in large pool near the lath house; instructions were suspended when precautions against the Spanish influenza were adopted, but will be resumed in a day or two.

October 22, 1918, San Diego Union, 9:3-4. Balboa shut-ins saw fast boxing program last night at Plaza.

October 24, 1918, San Diego Union, 9:1-2. Naval trainers start football play; two teams fight to tie yesterday afternoon on 21st Infantry grounds before more than 6,000 bluejackets and soldiers.

October 25, 1918, San Diego Sun, 4:3. Henry Schumann-Heink, diva's son, wins post of ensign.

October 26, 1918, San Diego Union, Classified, 7:-2. City Council "requests" that gauze masks be worn; not compulsory.

October 27, 1918, San Diego Union, Sport and Auto, 1. Eddie McLarney made boxing instructor at Balboa Park.

October 27, 1918, San Diego Union, Sport and Auto, 1:2-5. Naval Training Camp football contenders (photograph).

October 27, 1918, San Diego Union, Sport and Auto, 1:7. Balboa Park sailors swamp 21st team.

The athletic program for the quarantined sailors at Balboa Park yesterday afternoon was confined to a baseball game between Battalion A and a team rounded up by the soldiers at Camp Taliaferro, the contest being fought out on the 21st Infantry playgrounds.

October 29, 1918, San Diego Union, 9:1. Navy camp "Allies" football team is ready for match; over 100 players and near players report for first workout at Balboa Park; the "Allies" team will be organized to oppose the regulars; men worked out on 21st Infantry grounds.

October 30, 1918, San Diego Union, Classified, 9:1-2. Influenza cases increase; more precaution necessary; Health Department warning; Health Office has not received vaccine.

October 31, 1918, San Diego Union, 6:3. Four battalions passed in review before Captain MacArthur at Balboa Park yesterday afternoon.

November/December, 1918, Art and Archaeology, Vol. 7, No.7, 411.

2. War Work at San Diego

The Museum placed its equipment and staff at the disposal of the government for war service. As the remaining buildings of the Exposition house the six thousand men of the San Diego Naval Training Station, the demands upon the Museum by the various war activities have been great. Its buildings accommodate the work of the Young Men's Christian Association, Young Women's Christian Association, Knights of Columbus, Red Cross, Camp Musical Director and Chaplain. In the library and galleries of the Science of Man Building not less than a thousand sailors in uniform may be seen, every afternoon and evening, reading, writing and drawing, while every lecture room in the Indian Arts and Fine Arts buildings is occupied by classes in the study of language, mathematics, engineering, navigation and aeronautics. The auditorium is in constant use for lectures, band practice, evening entertainments and religious services. In the anthropological laboratories the physical and mental measurement of approximately a thousand children has been accomplished for the government under the direction of Dr. Evangeline Caven and Miss Montana Hastings, Associate in Psychology, with the assistance of a corps of physicians and other volunteers. The tabulation and analysis of data secured are in the hands of Mr. Herbert Sallee, Fellow in Psychology.

Paul A. F. Walter.

November 3, 1918, San Diego Union, 6:1. Stunt night program at Naval Training Camp success last night.

November 3, 1918, San Diego Union, 6:3. Company 3, Battalion A of Naval Training Camp, won first honors in drill contest; drills held every liberty day during quarantine as a form of recreation for men.

November 3, 1918, San Diego Union, Sport and Auto, 1:5. Navy teams may play Wednesday, November 6, in Stadium if quarantine is lifted.

November 3, 1918, San Diego Union, Sport and Auto, 1:8. Mike Goliado, Pacific coast reserve fleet lightweight champion, will battle for title tomorrow evening at Naval Training Camp with Dutch Crozier.

November 4, 1918, San Diego Union, 9:3-4. Balboa Park to see fast fight tonight.

November 4, 1918, San Diego Union, 9:3. Everything is in readiness for the lightweight championship bout between Dutch Crozier and Mike Golindo, scheduled for this evening at the naval training camp, Balboa Park.

November 6, 1918, San Diego Sun, 1:1-8. Huns sent for terms.

November 6, 1918, San Diego Sun, 1:7-8. Ed P. Sample beats Charles F. O'Neill for state senate.

November 7, 1918, San Diego Sun, 1:1-2. Armistice is signed and the fighting stops.

November 9, 1918, San Diego Sun, 1:7-8. Kaiser abdicates.

November 7, 1918, San Diego Union, 6:3. Bluejackets drilled at Naval Training Camp before Congressman Kettner yesterday afternoon.

November 9, 1918, San Diego Union, 6:4-5. Naval camp Thespians to give program tonight at Red Cross Building in Park; musical numbers from "Deep Sea" vaudeville, jazz band will have part in program.

November 11, 1918, San Diego Union, 1:1-8. **WORLD WAR ENDS;** Armistice signed.

November 12, 1918, San Diego Sun, II, 7:1-2. Make November 11, "Democracy Day," and international holiday; San Diego celebrates in joyous fashion; rousing parade and jubilee held.

November 12, 1918, San Diego Union, 1:8, 5:1-4. City celebrates big news; parade along Broadway led by Captain Arthur MacArthur, commandant of Naval Training Station, and Admiral Tallman, commander of the Reserve Force of the Pacific Fleet; sailors, 21st Infantry, civilians in parade.

November 12, 1918, San Diego Union, Classified, 7:5. Red Cross House at Park opened; first series of afternoon teas given by Society Women at dedication, 200 feet by 60 feet.

November 13, 1918, San Diego Sun, 3:1-2. Few realize great work being done at new Marine base on Flats.

November 13, 1918, San Diego Union, 1:3-6. Millions being spent around San Diego on military, naval work.

November 13, 1918, San Diego Union, 1:6. "Flu" quarantine here to be lifted next Sunday; decision reached at meeting of Health Board; situation shows improvement.

November 13, 1918, San Diego Union, 6:2. Camp Taliaferro exceeds its quota; rally in the interests of the United War Work campaign at the army Y. M. C. A. building at Camp Taliaferro; the camp, representing less than 300 men, was divided into respective companies, each in charge of its company commander, and a battle royal was staged to see which division would be the first to "go over the top" in subscriptions to assist their comrades overseas.

After a spirited address by Judge H. H. Handee, the battle began and in six minutes team no. 3, consisting of the headquarters staff, the medical corps, the quartermaster's corps, the 44 battalion, U. S. guards and the motor transportation corps, had subscribed its quota. Team 2 followed with its full quota in 18 minutes and in 31 minutes Camp Taliaferro had exceeded the margin of its quota by \$32. Much credit is due to C company for its excellent team work and the enthusiasm displayed in the contest.

Major Kay and his entire staff were present during the campaign.

November 14, 1918, San Diego Sun, II, 9:1-4. Big parade, carnival to be staged Friday night, November 15.

November 14, 1918, San Diego Union, 6:4-5. Red Cross House haven for many lads at Park; homelike place offered boys regaining health; San Diego and Coronado women serve tea and things to eat; open fireplaces prove fascinating; games wanted.

November 15, 1918, San Diego Sun, II, 9:1-4. All set for big carnival tonight.

November 15, 1918, San Diego Union, 4:3. Paved park road meets with favor; proposal to dedicate road to memory of fallen soldiers receives approval; idea of R. A. Chapman to pave driveway through Balboa Park from 18th Street to northeast corner of park at 28th Street; road to be named "Pershing Drive"; Chapman appeared before Park Commissioners yesterday.

November 16, 1918, San Diego Sun, 4:3. "Dig Up" is slogan now, last appeal.

November 16, 1918, San Diego Union, 1:8, 3:5. Last night's mammoth Broadway parade and carnival held under auspices of United War Work campaign committee; \$85,000 mark has been passed; 10 military divisions in procession.

November 17, 1918, San Diego Sun, 4:5-6. M. O. Hall opposes name of "Pershing Plaza."

November 18, 1918, San Diego Sun, II, 9:2. R. A. Chapman suggests "Liberty Drive" through Balboa Park from 16th Street to northeast corner of park.

November 18, 1918, San Diego Union, 1:6. Quarantine ended midnight yesterday; schools still closed; churches, theaters and other public places open to public.

November 18, 1918, San Diego Union, 4:6. Proposal to pave Park boulevard through Park crystallizes in temporary organization; R. A. Chapman, chairman; B. F. Radcliff, secretary.

November 19, 1918, San Diego Sun, II, 7:2-6. Story of North Island, vast aerial province, is told as grip of war censor ends.

November 20, 1918, San Diego Sun, 7:3-6. North Island is busy place; they're up and doing all the time.

November 20, 1918, San Diego Union, 12:1. Naval, military ball to dedicate Red Cross House; formal opening of social season in dance Tuesday on spacious floor of building in Balboa Park; affair to be strictly invitational.

The Red Cross House is 200 feet long and the floor will accommodate 800 couples.

Music for the dancing will be furnished by the naval training station band of 50 pieces, the naval orchestra of 15 pieces, and the famous navy "jazz" band.

A. B. Dohrmann, acting manager of the Pacific Division of the American Red Cross is coming from San Francisco with a party to attend the ball and to hand over the key to the Red Cross House to Captain Arthur MacArthur, commandant.

November 21, 1918, San Diego Sun, II, 9:1-6. Permanent improvements feature flying fields at North Island schools.

November 21, 1918, San Diego Union, 11:2. Balboa sailors fast with oval; park team in practice game shows speed; Johnson plays quarterback.

November 22, 1918, San Diego Sun, II, 9:1-5. Camp Kearny, San Diego's ideal cantonment, shelters 18,000 now.

November 22, 1918, San Diego Union, 9:3. Victory pageant to be feature of monster athletic program at Stadium Thanksgiving Day.

November 23, 1918, San Diego Union, 3:2. Red Cross House dedication will be made social event for Tuesday night; photograph of Red Cross House, formerly the San Joaquin Building at the Exposition and recently converted into a comfortable home for convalescent soldiers and sailors at Balboa Park.

The old San Joaquin building of Exposition days will be the scene of a smart event next Thursday evening when members of San Diego and Coronado social circles unite with the officers of the naval training center in dedicating it as the Red Cross House, a convalescent home for soldiers and sailors stationed at Balboa Park. A military and naval ball will follow the dedication ceremonies, which will be featured by A. D. Dohrmann, acting manager of the Pacific division of the Red Cross, handing over the keys of the building to Capt. Arthur MacArthur, commandant.

Many changes have taken place within the building during the last few weeks, while a big Red Cross on top of the building points the way to the home for Uncle Sam's convalescent nephews. Within, two immense fireplaces have been constructed to add the necessary comfort of warmth, big leather chairs have been placed all around for the boys to rest in, with just about as many real upholstered couches for them to sprawl out on, and dozens of canaries sing for the sick ones all day long.

The building has proved a real haven of joy to the convalescent soldiers and sailors, and local people will have an opportunity Tuesday evening of seeing what a fine men's club they have furnished for

the boys. Brilliant electrical effects and beautiful floral decorations are being planned to add to the attractiveness of the scene for the occasion.

Dr. Bucher, senior medical officer of the naval training station, assures the guests that there will be absolutely no chance of contracting the influenza at the affair as the building is perfectly sanitary. His endorsement was obtained by the naval officers before any step was taken to give the ball.

Capt. John B. Brown, who is in charge of the Red Cross House and who is a member of the management committee for the ball, announced last night that he has a few invitations that may be obtained by army and navy officers by telephoning. The affair is strictly invitational and cards have been sent out to more than 500 couples.

November 24, 1918, San Diego Union, 11:4. Public responds to call to pave memorial drive; nearly \$200 contributed so far to build tribute to men fallen in battle.

November 24, 1918, San Diego Union, Sport and Auto, 1:3. Athletic show Thanksgiving gives promise of packing stadium; hundreds of men are training.

November 25, 1918, San Diego Union, 7:1-2. Thanksgiving benefit plans about complete; wrestling, track, circus pageant, massed band; price of general admission is \$1.00.

November 25, 1918, San Diego Union, 10:1. Army-Navy ball to be brilliant; commanding officers of the various training camps in San Diego will attend dedication at Red Cross House.

November 26, 1918, San Diego Sun, 4:7-8. Fort Rosecrans and La Playa, scene of Army-Navy activities.

November 26, 1918, San Diego Union, 6:6. Lieutenant Commander W. R. Cushman succeeds Lieutenant Commander S. W. Wallace as executive officer of U. S. Naval Training Camp, Balboa Park.

November 27, 1918, San Diego Sun, 1:1-2, 2:4. Thousands see great air review here.

December 4, 1918, San Diego Sun, 6:1-2. Board of Commissioners ordered playground activities stopped.

December 4, 1918, San Diego Union, 1:7-8. "Solid Three" ousted in School Board recall election; third of vote is cast.

December 6, 1918, San Diego Union, 1:8. "Flu" ban on; to run four days unless Council decides to keep it on; masks must be worn in business places.

December 6, 1918, San Diego Union, 4:3-6. "F" Battalion was presented with a loving cup yesterday afternoon at Plaza de Panama for having the highest score of the athletic and drill tournament which has extended over a two-month period.

December 7, 1918, Letter, Executive Secretary, Board of Park Commissioners, to Major E. C. Long, Post Quartermaster, U. S. M. C., Marine Barracks, San Diego, Cal.

Re: Alteration of Buildings and removal of shrubbery.

Dear Sir:-

In the absence of Mr. Morley, your letter of December 4, last, has been referred to me, and authority is hereby given for the following work:

- (1.) Installation of ventilators and heating arrangements in Salt Lake Building.
- (2.) Installation of four windows in south wall of Alameda Building.
- (3.) Building of office within Montana Building, cutting of three windows in east wall of said building, and installation of two coal stoves.
- (4.) Permission also is given for pruning overgrowth of trees and for removal of such trees on south and west sides of Alameda Building as may be decided upon between the medical officer of the Marine post and this department.

All work above mentioned to be done in a neat and workmanlike manner, and under the supervision of and in a manner satisfactory to this department or its representative.

Very truly yours.

December 9, 1918, San Diego Union, 7:2-5. Rockwell Field aviators are ready for Balboa Park sailors, by John W. Swallow.

December 21, 1918, San Diego Union, 4:4-5. Major Herbert R. Fay, former councilman, proposes memorial at Organ Pavilion to San Diegans who aided in winning war; wants flag pole and granite marker containing two bronze tablets in open space in front of Organ Pavilion, which is to be called "Liberty Circle."

December 21, 1918, San Diego Union, 14:1. Boy Scouts' camp located in park, volunteers building weekend quarters on north side near Mississippi Street.

"Oh, Boy! Where do we go from here?" is what local Boy Scouts are saying. At last the weekend camp plans for the San Diego Boy Scouts have matured and actual construction of the first camp buildings will be underway in a few days. This will be good news for everyone one of the 1500 Boy Scouts of San Diego county.

The camp is to be situated at the north side of Balboa Park, at the intersection of Mississippi Street. The first building to go up will be headquarters or administration building. Scoutmaster Walter Stiern of Troop 12 will have charge of the construction work, which will be done entirely by volunteer scouts.

The parade ground is already cleared, and a large flagpole will be raised from which the stars and stripes will float in the breeze every weekend.

On these grounds will be carried out an intensive weekend scout program. Thorough training in patrol and troop drills will be given and every scout will have an opportunity to pass all tests for which he is prepared.

The platforms and tents will be provided with complete camp equipment, and scouts will be accommodated in the various tents under official supervision.

The camp will be formally opened with an appropriate scout program in the near future.

December 22, 1918, San Diego Union, 11:1-3. Artists and builders of replica of Statue of Liberty at Stadium commended; model of Bartholdi "Statue of Liberty" unveiled at Stadium Thanksgiving Day; statement by George W. Marston; supposed to be temporary but Marston thinks it should remain in front of the stadium peristyle as long as possible; Frank Mead was supervising architect.

December 22, 1918, San Diego Union, Classified, 9:3. Big Xmas dance to be given for men in uniform; soldiers and sailors away from home will be guests at Red Cross House, the old San Joaquin building, in Balboa Park.

December 24, 1918, San Diego Union, 3:3. Knights of Columbus arrange Christmas entertainment at Balboa Park; held last night; music, Santa Claus, Christmas tree, dancing.

December 25, 1918, San Diego Sun, 1:7-8. Christmas, 1918, is marked by spirit of peace.

December 25, 1918, San Diego Union, 5:1. Santa Claus does not overlook soldiers, sailors; Red Cross sees that every man in camps here gets gift.

December 25, 1918, San Diego Union, 6:6. Santa is guest of sailors at Naval Station; Christmas Even party will presents for all held at Balboa Park.

December 26, 1918, San Diego Union, 2:3. Christmas carols sung at Balboa Park; vested choirs sang in Park to large audience despite cold weather last night; presented by War Camp Community Service; four quartets placed on balconies.

December 26, 1918, San Diego Union, 8:2. Uncle Sam sets real Christmas dinner for tars.

As far as Christmas "eats" were concerned the 1000 men at the U. S. naval training camp at Balboa Park couldn't have fared better yesterday had they been at home.

Uncle Sam set an elaborate dinner for the boys in blue. There was more than enough to go around, and the husky young men were finally forced to admit their inability to "lick the platter clean."

The menu card was both elaborate and unique. The outside cover, in colors, displayed a beautiful view of the camp, and men in the formation of a blue and white flag, showing anchor and star.

The slogan on the menu card was "Stand by. All hands turn to!"

The feast that followed included such wonderful dishes as "Destroyer," which was roast young turkey; "Mess Gear," which was giblet gravy; "Sea-going Gob," which was oyster dressing; "Slacker, no crust and yellow all the way through," which was pumpkin pie; "Italian violets," meaning green onions, and so on. There was nothing lacking to make it a real feed. The boys thought last night that they wouldn't want to eat again for a week. But they will.

December 26, 1918, San Diego Union, 8:6. Balboa Park soldiers have Xmas celebration.

"High Jinks" were let loose at the Y. M. C. A. building at Camp Taliaferro Christmas night. The army personnel, the Red Cross and the Y. M. C. A. all helped to make the occasion an enjoyable one. The program was given in four parts. The first was a musical show given by a trio from Troop G, 11th Cavalry, composed of Privates Duckman, Henry and Murray. Private Parker made a hit with his "Song of the Army." Miss Hesse, a visitor, concluded the musical program with a Christmas solo, "Holy Night."

Santa Claus then made his entry, and great fun was had when the gifts were distributed, some of the parcels containing things which made an appeal to the crowd. The Red Cross packages and other gifts from various sources were gladly received. The games then started and cause the greatest laughter of the evening.

The closing number was composed of two-reel comedies. The entertainment was arranged by the camp Y. M. C. A.

December 26, 1918, San Diego Union, Classified, 1:3. Soldiers and sailors way from home will be guests at Red Cross House for big Christmas dance.

January 7, 1919, San Diego Union, 4:4-6. Teddy Roosevelt's visit to San Diego in Exposition year was feature event of Southland's great World's Fair.

January 8, 1919, San Diego Union, 1:6-7. Entire nation mourns passing of Theodore Roosevelt.

January 9, 1919, San Diego Sun, 4:5. Boy Scouts to have fine camp.

January 9, 1919, San Diego Sun, 4:5. Need more funds for golf course.

January 13, 1919, San Diego Union, 3:3-5. Boy Scouts build headquarters for big weekend camp in Balboa Park.

A new era for the Boy Scouts in San Diego county was started last week when a large number of scouts, under the direction of Scoutmaster Stiera, completed the headquarters building on the weekend camp site, on the ground formerly used by the Oregon cavalry, in the northern section of Balboa park.

It has been sometime since the board of park commissioners granted permission to the local council Boy Scouts of America to use this beautiful site for a permanent weekend camp for the scouts of San Diego county, consisting of 35 troops with a membership of more than 1500 scouts.

The establishment of the camp has been made possible through the services of the San Diego Rotary club, which recently put on a successful financial campaign and raised funds sufficient to carry on the scouting program in San Diego for a period of three years.

The camp as planned will have all the attractions of a regular military camp, and boys attending will be put through a constructive outdoor program, including strict discipline and scouting activities.

The committee in charge of all camp activities is composed of Messrs. Duncan McKinnon, M. E. Heller and John A. Gillons and these men are determined to make this one of the leading Boy Scout camps in the country.

The equipment will include headquarters building and mess hall, with ample shower baths and lavatory, complete camp equipment, including field kitchen, tents, etc. The equipment will be so complete that ample camping facilities will be provided for scouts in the weekend camps, and in the annual summer vacation camps, which will be held in the mountains. All camp buildings will be constructed by the scouts themselves.

To control the attendance of the weekend camp, troops will go into camp by assignment, and scouts can only go into camp with their own troops. This probably will mean that every Boy Scout in the city and county will be able to attend at least one camp each month. Special additional privileges will be given to scouts to attend, who make a special effort to live up to the scout oath and law.

After the camp is formally opened, the scouts will go into camp Friday evenings, where each register and receive his equipment from the camp master.

After pitching tents and completing the work of making camp, the scouts will gather around a campfire for the evening's program, which will consist of campfire stories, songs, yells, stunts, etc. Tattoo at 8:30 and taps at 9 o'clock.

The Saturday programs will be on the following order, with necessary variations according to the work to be done and the class of scouts in attendance:

6 A.M. - Reveille, flag salute, setting up exercises.

7 A.M. - Breakfast, tent clean-up.

8 A.M. - Assembly, policing the grounds, inspection.

9 A.M. - Instruction in Scout craft

10 A.M. - Second and first class tests.

12 P.M. - Dinner, tent inspection.

12:30 P.M. - Quiet hour, rest.

2 P.M. - Scout games, hikes, stalking, exploring trips, etc.

4 P.M. - Baths and general cleaning up.

5 P.M. - Assembly, parade and evening colors, accompanied by the usual retreat gun.

5:30 P.M. - Homeward bound, tired but happy.

The world interest in the Boy Scout movement challenges the intelligent understanding of everyone, and yet many people ask: "What is scouting? What do Boy Scouts do?" Scouting is outdoor life, which means health, strength, happiness and practical education.

It develops the power of initiative and resourcefulness.

It helps boys.

It insures good citizenship.

The Boy Scout movement helpfully and sanely offsets the disadvantages which civilization has caused.

It seeks to help boys on leaving school to escape the evils of the "blind-alley" occupations --- that is, such work as give the boys mere wages for the moment, but leave him stranded without any trade or handicraft to pursue when he is a man and so send him as a recruit to the great army of the unemployed and, what is worse, the unemployable.

(The remainder of the article is devoted to an explanation of the principles and practices of Scout craft, including a copy of the Scout Oath and of the Scout law.)

January 13, 1919, San Diego Union, 6:5. Pershing Drive plans completed by city engineer Cromwell; will be built through Balboa Park; many subscriptions coming in; monuments at both ends of the highway will bear the names of San Diego boys who died in France.

January 14, 1919, San Diego Union, 8:6-7. Balboa sailors will honor army service organizations with three regimental drills.

January 15, 1919, San Diego Union, 1:6-7. Bids opened for buildings at Naval Air Station, North Island.

January 15, 1919, San Diego Union, 4:3-4. Extension of city's great museum in Balboa Park favored by Board of Directors of San Diego Museum Association; War Memorial is part of program; report by Dr. Edgar L. Hewett.

The new plans and recommendations embrace the establishing of a memorial war museum or historical department commemorating the splendid work of San Diegans in the war; the establishment by local businessmen in come of the vacant Exposition palaces of a great commercial and industrial museum as a trade magnet for developing business relations especially with Latin America and the Orient; the development of the permanent quadrangle buildings; installation of heating and lighting systems concentrating there of collections relating to evolution of man; enlarging social and child welfare laboratory work; taking up more work in connection with public schools by means of classes, lectures, pageants and motion pictures; providing studios and exhibition facilities for display of art; attracting artists to the Southland; finally, Dr. Hewett presented a plan for giving publicity to the museum and to San Diego; details.

January 15, 1919, San Diego Union, 6:5. Sailors to drill in compliment to war work bodies; Y. M. C. A. organizations are guests today at regimental parade and inspection.

January 16, 1919, San Diego Union, 5:1. None flu cases, one death; day's record in city.

January 16, 1919, San Diego Union, 5:2. Balboa Naval Training Center marches in gallant review to do full honor to officials of Young Men's Christian Association.

January 17, 1919, San Diego Union, 4:1. EDITORIAL Culture and Commerce

We are heartily in accord with the plan of Dr. Edgar L. Hewett to establish a commercial museum in this city --- "an educational institution," as he phrases it, "not a mere collection of relics."

January 17, 1919, San Diego Union, Classified, 9:3. Organ recitals to be resumed; beginning Sunday Dr. Stewart will give daily programs at Organ Pavilion; recitals were suspended for repairs to Organ Pavilion.

January 17, 1919, San Diego Union, 15:4. Sailors parade at Balboa Park to honor Miss A. M. Spring who sent carload of apples to camp as Christmas present; reviewing stand on east side of Plaza.

January 18, 1919, San Diego Union, 6:3. Scouts drilled by Army officer; Colonel E. R. Wilson, U. S. Infantry, back from France, takes active interest in Boys' organization.

January 19, 1919, San Diego Union, 5:1-4, Women of Motor Corps No. 1 given praise when mustered out; inspected for last time at Balboa Park yesterday afternoon.

January 19, 1919, San Diego Union, 6:4-5. Bluejackets at Naval Training Center hold review in honor of visiting Knights of Columbus dignitaries; Knights of Columbus was the second organization to open rooms at the camp for enlisted men.

January 20, 1919, San Diego Union, 4:4-5. Why a Commercial Museum?, by Dr. Edgar L. Hewett.

Naturally in thinking of an enterprise of this sort one looks first at the existing opportunities. (In this respect we are most fortunate.) The war is over and the energies that were organized so magnificently for its successful prosecution are being released for new constructive enterprises. With the dwindling of the naval station on the park, or, as we hope, its establishment in a permanent location somewhere nearby, the Exposition buildings will again become available. No doubt our park board would welcome the opportunity to place such a building as the Southern California Counties building at the disposal of the public for a commercial museum.

January 22, 1919, San Diego Sun, 9:1-2. City Attorney fighting hard to prevent any increase in gas rate.

January 23, 1919, Letter, T. M. Faulconer, Executive Secretary, Board of Park Commissioners, to Commanding Officer, Western Division, U. S. Army, San Francisco, Calif.

In view of the fact that use of a large section of the Panama-California Exposition Grounds and several buildings therein has been given to the United States Army for the past two years at a nominal rental of One Dollar (\$1.00) per year, and whereas more or less damage has been done to the premises while occupied by United States troops, it is requested that certain small, frame buildings constructed by the various army units in these premises be left standing and turned over to the city park department of San Diego.

We are advised by Major J. A. Habegger, post supply officer in charge, that the cost of wrecking and salvaging the materials in these buildings will be such as to preclude any profit upon the work. We believe that, were you to ask Major Habegger to go over the situation, he would find that the turning over to the park department of all such buildings would not fully recompense this department for the damage done.

The buildings alluded to above are stables, mess halls and other small structures erected for storage purposes.

Thanking you for your attention to this matter and trusting that you will investigate the conditions upon which his request is based, we are

Very truly yours.

January 23, 1919, San Diego Sun, II, 9:1-2. Gas hearing ends; decision pending; rate climb shown.

January 23, 1919, San Diego Union, 5. Bluejackets of Balboa Park march in review to honor Red Cross workers.

January 23, 1919, San Diego Union, Classified, 9:2. If the city attorney can decide upon a legal way of making the necessary transfer the City Council will turn over to the City Park Commission the \$7,000 which the Commission raised during the year as a profit from the Balboa Park refreshment stand.

January 23, 1919, San Diego Union, 10:1. Balboa Park sailors will start the local basketball season officially Saturday night when they tackle the Long Beach Y. M. C. A. five at the local "Y" court.

January 25, 1919, Letter Post Supply Officer, San Diego Barracks, San Diego, California to Board of Park Commissioners, Balboa Park, San Diego, California (San Diego Public Library).

Subject: Cancellation of lease.

1. By direction of the Commanding Officer you are hereby notified under the provisions of Par. 8 of a certain lease entered into between yourself and the United States, dated June 18, 1918, for the premises described therein known as the "Hospital" Camp W. R. Taliaferro, San Diego, Calif., the Government hereby relinquishes and gives up possession of same effective January 31, 1919; the said camp having been abandoned for military purposes.
2. No rent will be paid after the date last named, and you are requested to take possession of the premises on that day.
3. Please acknowledge.

(Signed) J. A. HABEGGER,
Major, Q. M. C.
Post Supply officer

Notation at bottom of letter, typewritten, reads:

Acknowledging receipt of cancellation of lease of premises known as "Hospital" Camp W. R. Taliaferro date June 18, 1918, It is requested that you appoint officer or officers to survey said premises with officers of this department in order that the premises may be taken over by us.

Board of Park Commissioners.

January 26, 1919, San Diego Union, Classified, 1:4. Open-air dance in January new to easterners; more than 2,000 attend affair on Plaza de Panama in Balboa Park last night in appreciation of the drill given last Wednesday by the sailors of the Naval Training Station for the Red Cross officers; Navy Training Center band furnished music for dancing.

January 27, 1919, Letter Major E. (?) C. (?) Long, A. A. Q. M., U. S. M. C., Post Quartermaster, to the Board of Park Commissioners (San Diego Public Library):

Gentlemen:

You are informed that the Marine Barracks, constituting all buildings leased from the Board of Park Commissioners, and the camp, including "sick bay," or hospital, is without electric lights, and has been for a period of about a week, due to a break or short circuit in one of the feeders under your control. This condition is seriously detrimental to the health and comfort of the command, and constitutes a menace from fire, due to the use of kerosene lamps and candles for lighting the buildings and camp.

Telephonic conversation with the Executive Secretary of the Board of Park Commissioners and the manager of the San Diego Consolidated Gas and Electric Company has developed the fact that neither the Board of Park Commissioners nor the San Diego Consolidated Gas and Electric

Company will locate or remedy the trouble, the point of contention between the two parties just mentioned being, to my understanding, that the Park Commissioners do not think they should bear the expense of maintaining electric feeders which they own, and over which the Marine Corps receives its lighting circuit, while the San Diego Consolidated Gas and Electric Company are paid all money by the Marine Corps for electricity furnished. The Commissioners are willing that the system (an underground circuit) should be taken over, operated and maintained by the San Diego Consolidated Gas and Electric Company, which the latter has declined to do, stating the maintenance costs to be prohibitive, due to the fact that the feeders were installed for temporary use only, during the period of the Exposition. However, the company stands ready to immediately start construction of a Pole line to serve the Marine Barracks. This the Commissioners will not permit, as they consider a pole line to be unsightly, and therefore detrimental to the appearance of the Park.

As custom, common usage, and rules of the Interstate Commerce Commission provide that customers in certain defined areas purchasing electricity pay only the installation and maintenance inside of the meter, the undersigned does not believe that he could legally bind the Government to pay a cost which any other customer under like circumstances would not have to pay, and therefore would act without authority should he incur any expense in maintaining feeders outside of the meters.

The Marine Corps will immediately lay the matter, as mentioned above, before the Interstate Commission for a decision. However, as this is necessarily a time-consuming procedure, the Marine Barracks will in the meantime be without lights, endangering the health and comfort of the command and the safety of Government property. Since the Marine Corps has never been informed until the present of any points of contention between the Board of Park Commissioners and the San Diego Consolidated Gas and Electric Company, the Post Quartermaster requests that the Barracks be supplied with electricity as heretofore, until a decision is received from the Interstate Commerce Commission. This request seems an equitable one, as service over the Park's feeders has been rendered the Marine Corps during a period of four years with no attendant difficulty, until the present. Any immediate action taken by the Board toward reestablishing of the lighting system for the Marine Barracks will be greatly appreciated.

This opportunity is taken to thank the Park Board for its many courtesies extended in the past.

Very truly,

(Signed) _____
Major, A.A.Q.M., U.S.M.C.
Post Quartermaster.

January 27, 1919, 1st Indorsement. Hq. West. Dept., S. F., Cal., to the Commanding Officer, Camp Lawrence J. Hearn, Palm City, Calif.

Colonel, Adjutant General
Department Adjutant.

January 27, 1919, San Diego Union, 4:1. EDITORIAL: San Diego Memorial

The memorial road through Balboa Park proposed as a commemorative tribute to San Diego's dead soldiers and sailors is a community enterprise and should enlist the earnest support of every citizen.

January 31, 1919, Letter, Arthur W. Yale, Major, Medical Corps, Surgeon, to Board of Park Commissioners, San Diego, California.

Gentlemen:

The Government has erected on Rockwell Field a permanent concrete post hospital. This building is very beautifully designed and ornamented, but is situated on a piece of ground which is bare, and no external ornamentation of horticulture has yet been done excepting the leveling of the ground and the planting of some grass seed. It has come to the notice of the Post Surgeon that from time to time plants have been donated to this field by your board, but so far none of them have found their way to the hospital.

As the War Department has erected this hospital as a model, it is our desire to make it beautiful on the outside as well as on the inside, and to this end, we earnestly ask the cooperation of your board. We especially desire at this time the services of your landscape architect who has so beautifully laid out your park grounds. We would appreciate it if he would lay out a plan for the beautifying and decoration of the grounds surrounding this hospital, so that a harmonious and beautifying effect can be ultimately produced.

We appreciate the large amount of work which has been done by your board for the Army and Navy, and, although we hesitate to ask further favors, yet as this is a hospital where the sick soldiers, many of whom are San Diego boys, have to lay on beds of sickness and pain and look out on the barren grounds, we feel that in asking your aid in making the grounds cheery and beautiful for the men, that we are only asking what you would want to have done for your boy were he sick or injured in our hospital.

If your landscape architect will lay out plans for use, we will do our utmost to see that the work is carried out under the supervision of a competent officer and the work of cultivating, irrigating and taking care of the plants be continued.

Trusting that this will meet with your approval, and awaiting your valued cooperation, we remain

Yours very truly

(Signed) Arthur W. Yale,
Major, Medical Corps,
Surgeon.

February 1, 1919, San Diego Union, 4:6. Old Town bridge ordinance appropriating \$60,000 for completion of structure passes over Mayor Wilde's veto.

February 1, 1919, San Diego Union, 6:4-5. The Soldiers' and Sailor's Club of the War Camp Community Service at 615 Broadway, formerly operated by the San Diego Federation of State Societies, has been turned over by the War Camps Community Service to the U. S. Service League and will be operated by that latter organization for the War Community Service without charge.

February 1, 1919, San Diego Union, 6:6. Demobilization of the 16th Division at Camp Kearny hastened; much of routine work finished and discharges will be speedily accomplished.

New cases of influenza in this camp dropped to one yesterday, as against three the previous day.

February 2, 1919, 2nd Indorsement: Letter, Commanding Officer, Camp Lawrence J. Hearn, Palm City, Calif. to Commanding General, Western Department, San Francisco, Calif. (San Diego Public Library).

1. The following buildings are still standing at Camp Taliaferro:

Three ice houses - good condition
Gas instruction house - good condition
Old stable - made of scrap lumber
Company mess hall - fairly new
Officers mess building - good condition.

2. Of the above, one ice house is needed at San Diego Barracks for a meat and vegetable storehouse; the Officers Mess Building and the Company Mess Building are both needed at Camp Hearn. The Gas Instruction Building is not needed, but has some good lumber in it. The old stables are hardly worth tearing down.
3. There has been a certain amount of wear and tear on the Park premises, but no damage other than that has been done.
4. In view of the kindness and liberality of the Park Board, it is recommended that two of the ice houses, the gas instruction house, and the old stables be left standing, and that an ice house be hauled intact to San Diego Barracks, and the Officers Mess and the Company Mess be salvaged and the lumber hauled to Camp Hearn for use in reconstruction at that place.
5. As orders had already been issued by this office for the salvage work to begin Monday, telegraphic instructions are requested.

(Signed) Abbott Boone
Major 11th Cavalry.

February 2, 1919, San Diego Union, 15:6-7. Boy Scouts enjoy weekend at Balboa Park; construction work being done.

February 4, 1919, Memorandum, Commanding Officer, Camp Lawrence J. Hearn, Palm City, Calif.

Your recommendation in second indorsement dated February 2nd reference buildings at Camp Walter R. Taliaferro are approve.

BENSON

February 4, 1919, 3rd Indorsement, Hq. Western Department, San Francisco, Cal., to Commanding Officer, Camp Lawrence J. Hearn, Palm City, Cal.

1. Approved.
2. Attention invited to enclosed telegram sent this date.

By command of Major General Morrison:

(Signed) H. C. Benson
Colonel, Adjutant General,
Department Adjutant.

February 4, 1919, Letter, Superintendent of Parks, San Diego, California to Quartermaster, U. S. Army, San Diego Barracks, San Diego, California.

Dear Sir:-

A report made to me yesterday by Mr. Harper in charge of buildings and grounds in the Exposition Grounds, Balboa Park, quotes the following in a communication which he addressed to you:

"In making your cleanup at Camp Taliaferro, Balboa Park, it is evident from the progress of the Salvage Department the past two weeks that you do not intend to leave anything of value in building, plumbing, etc. whatsoever. Therefore it is the desire of the Supt. of Parks and the Supt. of Buildings that

- (1.) You make a thorough cleanup of all buildings built by the Q. M. Department or any other army service on the area or areas occupied by the army in Balboa Park;
- (2.) Remove all concrete floors, hauling rubbish to the dump near the north entrance to the Park;
- (3.) Clear and level to a grade conforming to the surrounding contours all trenches, ditches, holes, etc. on all space occupied by you either as a camping or drilling space;
- (4.) Replace all pipe lines, fire hydrants and fire hose equipment worn out or damaged in any way by your use and occupancy;
- (5.) Repair all Park buildings occupied by the army to their original state of repair when taken over by the Western Division as a training camp; same in include wiring, plumbing, glazing, plumbing fixtures, plaster, etc., wherever the Supt. of Buildings declares damage to property has occurred through the occupancy of the training camp."

I have been unable to make the inspection myself, having been confined to the Hospital and residence on account of illness. However it seems to me that after all the courtesies extended to the United States Army by the Board of Park Commissioners and its representatives the present actions of the army authorities are open to serious complaints.

Would it not be advisable for you to see Mr. Harper, who is in charge of the building department of the Park, and have these matters adjusted as soon as possible?

An early reply will oblige.

Yours very truly.

February 4, 1919, Third Indorsement: Hq. Western Department, San Francisco, Cal. to Commanding Officer, Camp Lawrence J. Hearn, Palm City, Cal.

1. Approved.
2. Attention invited to enclosed telegram sent this date.

By command of Major General Morrison:

(Signed) H. C. Benson
Colonel, Adjutant General
Department Adjutant.

February 5, 1919, San Diego Union, 4:6. Memory of Theodore Roosevelt to be honored at Organ Pavilion Sunday.

February 6, 1919, 4th Indorsement: Commanding Officer, Camp L. J. Hearn, Palm City, Cal. to Post Supply Officer, San Diego Barracks, San Diego, Calif.

1. Forwarded for necessary action.

By order of Major Boone

Andreas A. Patjens
1st Lieut. 11th Cavalry
Adjutant.

(NOTE: telegram not included.)

February 10, 1919, San Diego Union, 3:5-6. Tribute to memory of Theodore Roosevelt here; 10,000 gathered at Organ Pavilion for tribute.

February 10, 1919, San Diego Union, 6:3. 21st Infantry Regiment under orders to leave; San Diego's own troops have been stationed in this city since March, 1916.

Instructions have been received by the officers of the 21st Infantry to get the regiment ready to be moved with a few days. The headquarters battalion to be stationed at Vancouver barracks, Washington, and the other battalion at Fort D. A. Russell, Cheyenne, Wyoming. There are approximately 1950 men in the regiment.

Colonel Willis Uline has been in command of the regiment for about a year, succeeding Colonel J. P. O'Neil, when the latter was made a brigadier general and transferred to Texas.

This is San Diego's own regiment of troops, and many of them are San Diego boys. They came to this city in March, 1916, from Vancouver, and were stationed at Balboa park until the 40th Division went to France, when they were transferred to Camp Kearny.

Madame Ernestine Schumann-Heink is the godmother of the regiment and has always taken a great interest in the men. One of the most impressive military ceremonies here was the presentation of the colors of the regiment by the famous singer at the time when she was given the insignia of colonel.

The regimental band and troops of the 21st Infantry have participated in practically every celebration held in the city during the last year, and their removal will be regretted by all San Diego.

February 13, 1919, 6:4-5. 21st Regiment's Officers given farewell luncheon by Chamber of Commerce

Expressions of regret over the coming departure of the 21st regiment of infantry, United States army, and appreciation of the splendid services rendered by that military organization during the last three years, were voiced at a luncheon yesterday at the Cuyamaca club. The luncheon, given by the chamber of commerce in honor of Colonel Willis Uline, commander of the 21st regiment, and his staff, was attended by many prominent San Diegans.

Melville Klauber, president of the chamber of commerce, acted as toastmaster. Klauber said that the 21st infantry had during the last three years been a "big brother" to the community, that the officers and men zealously performed every function requested of them during the days of the exposition and after that, and that San Diego hailed with genuine regret the order sending them to other posts.

In responding to Toastmaster Klauber's request for a speech, Colonel Uline traced the record of the 21st from the time the regiment participated in its first engagement at Lundy's Lane, through its activities in the Civil and Spanish-American wars, down to the present time. He called particular attention to the important work carried out by the first and second battalions in suppressing the activities of spies along the international boundary line in the vicinity of San Diego and declared that the 21st border patrols captured two dangerous German agents carrying important information.

Colonel Uline praised the newspapers of San Diego for withholding publication of news which at the time would have been of much benefit to Hun agents operating in Mexico. He also praised the zeal and spirit of the drafted men that were inducted into the 21st regiment to bring it up to war strength, and closed with a plea for San Diegans to work together always in whatever future plans may be outlined.

G. Aubrey Davidson said that he was sorry to see the regiment go, that the city was losing a real friend, and that the regiment did more to make the exposition a success than any other organization connected with the big fair. Davidson [told] how the 21st regiment came to San Diego on the cruiser *Pittsburg* in March, 1916, under the command of Major William Brooke, of conferences with Major General Hugh Scott, then chief of staff, in which the latter agreed to send a battalion and band of the famous regiment here, and of the wholehearted manner in which officers and men met every obligation imposed upon them. Davidson then extended the thanks of the community to the officers of the regiment, and to Bandmaster Butler of the regimental band.

Other speakers were W. C. Hollenbeck, chaplain of the regiment, and W. S. Dorland, chairman of the army and navy committee of the chamber of commerce.

Colonel Uline, members of his staff, and the first battalion of the 21st will leave Camp Kearny tomorrow for Vancouver barracks, Washington. The Second battalion will leave Saturday for Fort Sheridan, Wyoming.

Those present at the luncheon included John D. Spreckels, William Clayton, W. S. Dorland, Melville Klauber, A. P. Johnson, Jr., Julius Wangenheim, G. Aubrey Davidson, Leroy A. Wright, Frank Belcher, Jr., Jerome Pendleton, B. W. McKenzie, Hugo Klauber, George Burnham, O. W. Cotton, Eugene Daney, Patterson Sprigg, Wheeler Bailey, M. J. Perrin, James MacMullen, George Thomas and William Thompkins.

With Colonel Uline were Lieut. Colonel Ralph Glass, Majors John Brooks, Clyde Feisenschmidt, and Richard Smith, and Captains Karl Driggers, Alfred Biles, John McAleer, Frank McGraw, Charles Stein and W. Altman Shely, and Chaplain Wilbur Hollenbeck.

February 13, 1919, San Diego Union, 14:2. Birthday anniversaries of Lincoln and Washington observed at Organ Pavilion yesterday afternoon.

February 18, 1919, San Diego Sun, 1:7. Balboa Park to be abandoned by United States Navy within a few weeks.

February 18, 1919, San Diego Union, 4:6. Mrs. Herman J. Hall of Chicago praises museum and city park; lectured at San Diego Museum on "The Appreciation of Art"; San Diego has everything nature gave to Florence.

February 19, 1919, San Diego Union, Classified, 9:4. Naval Training Station in Park is discontinued; orders for demobilization of enlisted personnel of Naval Training Station at Balboa Park were received yesterday by Captain Arthur M. Archer, Commandant.

February 21, 1919, San Diego Union, 5:2. H. J. Penfold suggests Peace Jubilee Exposition for San Diego in 1920; use of Balboa Park grounds with music as feature of show is proposed.

February 22, 1919, San Diego Union, 1:4-5. City's official welcome to troops set for today; homecoming boys of Batteries A and B, 65th Artillery, will take part in parade and celebration; speeches at Park; dinner, dances in clubs in evening.

February 22, 1919, San Diego Union, Classified, 9:5. Reverend Charles E. Erdman, Doctor of Divinity, Princeton Theological Seminary, will speak to sailors at Balboa Park tomorrow in Red Cross house.

February 23, 1919, San Diego Union, 1:3-7, 6:3-4. Thousands throng streets to honor returned veterans.

February 24, 1919, San Diego Union, 4:4-6. Grant Wallace, newcomer to San Diego, urges development of culture; "make permanent that monumental advertising campaign which used to be called the Exposition"; convert old Exposition into a Chamber of Culture.

February 26, 1919, San Diego Union, 5:4. Art Guild moves into new home in Fine Arts building, Balboa park; first of city clubs to accept invitation to use Exposition buildings; San Diego Museum has furnished and turned over free to the Guild the large room adjoining the main gallery, formerly occupied by the architectural exhibit.

February 28, 1919, Memorandum, Field Hanger Division, Air Service Flying School, Rockwell Field, San Diego, California to Captain Sidney E. Eberle, Post Inspector.

1. Request your permission to obtain from the Board of Park Commissioners, Balboa Park, three spreading Palm Trees for the three grass plots around the Field Desk, also a small supply of shrubbery

(Signed) John W. Slattery,
1st Lt. A. S., (A).
O. I. C., F. & H.

Handwritten notation at bottom of memorandum reads "Approved S. E. Eberle, Capt. 21st Inf. RMA.

February 28, 1919, San Diego Union, 4:5-6. San Diego Museum Notes

Among the noted eastern artists who have been attracted to Balboa Park and its environs by the facilities offered to painters and other art workers is Adman E. Albright of Chicago, who is completing his winter period of sketching this week and preparing to take with him a large number of studies made in and around San Diego and at Ocean Beach. . . . While at the museum this week, arrangements were made for securing for the museum within a few months a "one-man show" of Albright's paintings.

Miss Edna Scofield, whose studio is in the Museum Science of Man building, will resume her "at home" afternoons Saturday. She will be assisted by Miss May Shelton of La Jolla, some of whose recently completed examples of modeling will be on view. . . . It is probable that Miss Shelton soon will join the resident art colony at the museum.

The movement toward centering the many scientific and artistic associations around the museum has received further impetus in the decision of the Natural History Museum association to move their very complete and attractive collections of birds, mammals, fishes, shells, reptiles, botanical specimens and scientific library into one of the great exposition structures adjacent to the San Diego Museum of Man, as soon as the boys of the naval training station move out. These two museums, while wholly distinct and with different boards of directors, are related in purposes as educational centers, and in moving down from the inadequate building now occupied on the Calle Cristobal, north of the orange groves in Balboa Park, the Natural History Museum will be easily accessible to the public, and in a position to join more effectively in the general educational life of the center. Still a third museum, which it is hoped may be added to the group, is the proposed war historical museum, as a memorial of the part played in the great war by San Diego county. A fine nucleus for this war museum already is in sight, and an ideal building is available for it.

Prof. W. A. Griffith, for 20 years director of the Art museum for the University of Kansas and chairman of the exhibition committee of the College Art association is one among many artists and educators attracted to San Diego, In addition to placing at the disposal of the museum his fine collection of Japanese prints and of European and American war posters for exhibition later in the year, Prof. Griffith expressed appreciation of the efforts being made to concentrate the city's artists and cultural activities around the old exposition center. He presented a plan for the possible financing or endowing of creative artists, writers, musicians and others who have no means of developing their talent or working out their plans, and of making it possible for them to do their work in the inspiring wonderland of Balboa Park.

March 1, 1919, San Diego Sun, 6:5-8. These are our ancestors! They live in local museum.

March 6, 1919, San Diego Sun, II, 9:3. Painted Desert to be reopened Saturday at 2:30 p.m.; headquarters for Girl Scouts and Campfire Girls.

March 6, 1919, San Diego Union, 4:5-6. San Diego Museum Notes.

March 6. 1919, San Diego Union, 5:3:4 Indian ceremonials mark reopening Painted Desert; Ernest Thompson Seton will have charge of reproducing various native dances and customs; school children to aid; plan camping grounds in Pueblo buildings.

The Pueblo Indian villages in the 5-acre painted desert, which were turned over to the San Diego museum this week by the Balboa park commission, will be reopened to the public on Saturday afternoon at 2:30 o'clock. They will be maintained as the happy hunting grounds for all children from 2 years old to 92.

Ernest Thompson Seton, famous author, artist, lecturer and chief of the Woodcraft League of America, has accepted the invitation of the museum management to officiate at the opening ceremonies. The program, which is nearing completion, will be full of surprises and in harmony with the aboriginal setting of this group of the communal homes of the several Indian tribes of our southwest.

This being child welfare week of the children's year, the center of which for San Diego county is the museum under the auspices of the government, the ceremonies and entertainment arranged by Seton and Director Hewett will be carried out largely by the children of San Diego, under the leadership of the organizers of boy's and girls' clubs. Seton, whose Indian name is Chief Shuka Sapa (Black Wolf) will stage the ceremonial of organizing and conducting a woodcraft council of braves, after lighting the sacred fire by the primitive methods of rubbing sticks. He will give the woodcraft laws, conduct the rattlesnake game and the caribou dance, assisted by Boy Scouts, properly antlered and costumed. Seton will also tell weird Indian campfire stories and give imitations of wild animals and birds. He will show how to conduct a school of citizenship and there will be tribal songs of the redmen and the training of the youngsters in impromptu pantomimes.

For this, the first of many recreation days contemplated for the public at the ancient Pueblos near the north gate of Balboa Park, the director and the managing board of the museum invite particularly all school children from both public and private schools, more than 8 years old; all Boy Scouts, Girl Scouts and Campfire Girls. Their teachers and leaders, parents and friends are included in the invitation.

In order that the widest use may be made by the public of the painted desert, plans are maturing for providing camp quarters in and among the buildings for such organizations as the Campfire Girls, Boy Scouts and Girl Scouts. Rooms will be assigned for their use and for storing their campfire regalia and camp outfits.

In addition, from time to time collections of Indian articles of use and ornament will be shown, and this exhibit of Indian homes will be maintained as a permanent ethnological exhibit of the museum. It was erected by the Santa Fe railway at a cost of \$125,000.

March 7, 1919, San Diego Union, 5:3-4. Boy and Girl Scouts rush to join in tribal ceremonial to mark reopening of Painted Desert

The announcement of the reopening to the public of the famed Painted Desert by the San Diego museum, with Ernest Thompson Seton, nature author and artist, as master of ceremonies, has started a rush of applications for places around the council fires from most of the outdoor boys and girls in the city.

The weird ceremonies, must appropriately, will be under the wings of the eagle of Uncle Sam. By special arrangement with the military authorities, a large war scout airplane, in charge of Major Jefferson Davis of San Diego, will fly from March field, Riverside, tomorrow and swoop low over the Indian powwow.

An official photographer from the war zone will make a series of pictures of the ceremonies and of the Indian village from the aeroplane. The crowd will also be treated to some up-to-date flying stunts.

Since the announcement of the opening of the pueblos was made yesterday, arrangements have been completed for allotting permanent headquarters and all the privileges of the five acres of Taos, Hopi and Zuni villages to two organizations --- the Campfire Girls and the Girl Scouts. Plans are underway by Mr. Seton for holding later a campfire council for the purpose of training leaders to organize the children of San Diego into Woodcraft league Indian councils. He has issued a call for volunteers interested in working among boys to confer with him at the desert Saturday afternoon, preparatory to beginning this preliminary training. This work is parallel to that of the scouts, and boys and girls may belong to both organizations.

One group of 500 boys, led by Chief Executive Elwood Barley and scoutmasters, will attend the powwow in a body. A large delegation of the Girl Scouts, commanded by Miss Nancy Waddell, county director, will be on hand, with delegations from all the schools. Mrs. Josephine Randall, director of the Campfire Girls, garbed in Indian costume, will participate in the opening ceremonies, with Indian songs and ceremonies, and scouts from the Francis Parker school will assist Chief Black Wolf in aboriginal games and a caribou dance. The invitation is general to youngsters above 8 years of age.

The program, which will consume about two hours beginning at 2:30 tomorrow, includes Indian games, athletic contests and weird ceremonies dear to the heart of boys and girls. The chief of the Woodcraft league will teach the boys how to make a fire by rubbing two sticks together. He accomplished this feat in 25 second yesterday at the museum. His Indian songs and imitations of the howls and cries of wild animals and instruction in the games and hunting methods of the wilds, will be features of the afternoon.

March 7, 1919, 6:5-6. Public asked to be well today so nurses may dance at Balboa Park; this will probably be the last dance given by the Navy at the park as the band men are leaving March 15 and the station is to be closed by the first of the month.

March 8, 1919, San Diego Sun, 3:3-6. Southern California Counties Building.

March 8, 1919, San Diego Sun, 6:5. Girl and Boy Scouts reopened Indian Village this afternoon.

March 8, 1919, San Diego Union, 14:1. Scouts to have place of honor at ceremonies reopening Painted Desert.

Interest in the opening to the public of the museum's painted desert in Balboa Park this afternoon at 2 o'clock has grown to such proportions that Ernest Thompson Seton, head of the Boy's and Girls' Woodcraft League of America, who is in charge of the ceremonies, fears that his campfire council many be swamped by crowds. He has therefore requested that the Scouts' organizations and the school children be given the foremost places in the great powwow circle. The grownups will have to take their chances on finding more distant perches to witness the exposition of the 12 secrets of the woods and the other rites of the redmen.

It is announced by Maj. W. Jefferson Davis, who will be present with the aviators, that through arrangements made with the flight commanders, Major Bartholf of March Field, Riverside, and Captain Hoover of the North Island aviation training station, a squadron of four or five planes, instead of one, probably will be sent to assist in the ceremonies. It is expected that two of the big planes will be piloted by the two sons of General Kenley of the aviation service. Two of the planes will carry expert air service photographers, one of whom, Lieut. Gordon Pollock, who will fly from Riverside, is one of the best known of Uncle Sam's camera men. These will photograph the ceremonies.

One of the guests of the museum will be United States Senator James D. Phelan, who is here to address the people in support of the league of nations.

Chief Black Wolf Seton has decided to return later and assist in making the painted desert the great center of the southwest of the boy's and girls' Indian woodcraft activities and, aided by Dr. Hewett and Grant Wallace, the museum's experts in the lore of the deserts, he will revise the 800 pages of woodcraft ritual to conform to the land of the pueblos. Tonight he will organize leaders for the continuation of this work. Volunteers, men and women, are asked to make themselves known to him following the desert ceremonies this afternoon.

Admission is free. The entrance most convenient to the happy hunting grounds from the cars and for the autos is the north gate.

March 8, 1919, San Diego Union, 14:2. Students to exhibit art work tomorrow.

An exhibition of art work by students of Henry Lovins covering a wide range of subjects will open tomorrow afternoon at 2 o'clock. The exhibition will continue Monday, Wednesday and Friday mornings of the following week from 10 to 12 a.m. only. The collection will be displayed in the large east studio, second floor, California Building, in Balboa Park.

Another feature will be the display of work done by the sailors who attended the evening classes under the direction of Mr. Lovins and authorized by the Y. M. C. A.

March 9, 1918, San Diego Union, 4:3-5. Ernest Thompson Seton presides as chief at "Council of Thunder Bird" on Painted Desert.

The "Council of the Thunderbird" was the name adopted for the out-of-doors meeting held yesterday afternoon in the stockade of the Painted Desert in Balboa Park, to hear Ernest Thompson Seton tell about Indian woodcraft. Several hundred Boy Scouts and Girl Scouts of America in uniform and Campfire Girls, dressed in Indian costume, school children and citizens followed with interest the novel proceedings which included dances and incantations, such as were used by the Ojibway and other Indians, and contests between members of the several troops of scouts represented.

Traditions of the early days were preserved in holding the council around a "council rock," on which, with Chief Thompson Seton were seated Dr. Edgar Hewett, who was appointed guardian of the campfire; Milton McRae, head of the Boy Scouts of America; Grant Wallace, head of the publicity department of the San Diego Museum; and Miss Nancy Waddell, a leader in girl scout work in San Diego.

The chief announced that a guardian of the fire must be appointed and he placed that responsibility in the hands of Miss Josephine Randall, guardian of the Katymimo campfire at the Golden Hill playgrounds.

During the early part of the proceedings, an airplane hovered overhead, the humming noise of the propeller suggesting thunder to the primitive people gathered in council and, following Indian custom, the chose for a name for their council "Thunderbird," being the most remarkable thing they had encountered during the day. The airplane carried a pilot and a photographer, and on one of the several trips the ship made

over the heads of the council, a sea of handkerchiefs waved a salute, which was acknowledged in kind by the picture man.

Dr. Hewett, as guardian, delivered a short address of welcome to the visitors and said it is the hope of those who are engaged in promoting an interest in woodcraft and all outdoor life, that all children "between the ages of 4 and 104" will make use of the Painted Desert as a gathering place and recreation center. He announced that a house in the "desert" will be set aside for each of the boy and girl organizations of scouts, campfire girls, and boys and girls of woodcraft, who are expected to be organized as a result of Mr. Thompson Seton's visit.

Chief Thompson Seton briefly referred to the symbolism of the fire, and how important a discovery fire had been in the history of mankind. He explained the paintings on a blanket which hung above and as a background to the council rock. A central red disc was the symbol of fire, he said, and four lamps standing about it had various significance: one of them called "Fortitude" had the message: "Be brave, be silent and obey"; another called "Beauty" stood for the teaching: "Be strong, be clean, protect life always"; a third, "Truth" said: "Speak true, play fair and be patient"; and the fourth, called "Love," had the message: "Be kind, be helpful and be glad you are alive."

The "Caribou dance," done by Mr. Seton and four boy scouts, illustrated a tradition of the Ojibways in time of famine. This was followed by games and contests in which boys and girls took part, and was one of the means employed by the "chief" to illustrate how readily the young may be trained in outdoor sports and amusements, as the contests were new to all those taking part. These included "One-legged chicken fights," "Tub-tilting," "Hand-Wrestling," "Hand-Slapping," and similar games.

Among the contestants were Scouts James Otten, Daniel McKay, Edward Halber, Herbert Henschel, Franklin Fulton, Bryant Spohn, Edward Post, Harry Heilbron, Elliott Gose, Edward Fiegan, Wade Hageman and Walker Ground; and Girl Scouts Aileen Worth and Mildred Cochrane.

A weird ceremony was the singing of a chant by the campfire girls as they slowly marched around the fire and then seated themselves and continued the chanting. Another chant was sung at the close of the council. It was the Omaha tribal prayer and was rendered by the campfire girls and the boy and girl scouts forming a circle around the fire.

Mr. Thompson Seton gave an interesting recital of the story of the "Whooping Crane," a Sioux Indian, who with two scout companions made his way into the country of the Ojibways, their enemies, and learned of a contemplated attack on his tribe. The recital was accompanied by realistic acting with bird and animal calls which the Indians used in signaling to one another. The audience watched in absolute silence while the well-known nature lover and author of many books on outdoor life enacted the stealthy walking and crawling of the Indians as they penetrated the territory of their enemies.

March 9, 1919, San Diego Union, 6:3. Dance given in honor of nurses a success; about 300 couples attended affair at Red Cross House, Balboa Park.

March 10, 1919, San Diego Sun, II, 7:6. Scouts dedicated their new home Saturday.

March 12, 1919, San Diego Sun, II, 7:2-3. Conard in race for mayor; gives views on city affairs; thinks taxes are too high.

March 12, 1919, San Diego Union, 6:3. Camp activities at Balboa Park to end Saturday; beginning Monday equipment of Training Station will be sent to Mare Island.

Camp activities at the Naval Training Camp, Balboa Park, will come to an end Saturday evening, according to an announcement made yesterday by Lieut. Com. W. R. Cushman, executive officer of the station. Beginning Monday the camp will disband and all equipment will be sent to Mare Island, to which station a number of officers and chief petty officers will go about the middle of next month.

Plans for the final day of activities were announced yesterday and will include a band concert, which will be given on the Plaza de Panama from 3:30 to 3:30 o'clock, following which will be given the last outdoor dance by the officers and enlisted men of the station in honor of all San Diegans who have assisted the camp during the last two years. The music for the dance will be furnished by the crack camp band under the direction of J. Early, bandmaster.

Hundreds of people are attending the final dress parades which are being held on the plaza each afternoon at 1:30 o'clock. The last parade will be held Friday.

March 12, 1919, San Diego Union, Classified, 9:4. Permission was granted yesterday by Major David M. Randall, commandant of the Marine Barracks, to Major Elmer Buerkle of the San Diego High School Cadet Corps to use the former 21st Infantry grounds in Balboa Park as the location of a vacation camp; camp to be held during the week of the spring vacation at the high school; the necessary tents and utensils will be furnished by the Marine Corps.

March 12, 1919, San Diego Union, 16:4-7. Organ recitals gain in popularity shown; Dr. H. J. Stewart submits fourth annual report; 209 organ recitals in 1918.

March 13, 1919, San Diego Sun, 2:4-5. Thunderbird Council will stage contests at Painted Desert each Saturday.

The young Indians' "Council of the Thunderbird," which is the name given by Ernest Thompson Seton to the local club of the Woodcraft League of America, will be continued and perpetuated, with the San Diego's museum's Painted Desert in Balboa Park as headquarters. A field day of club contests with other organizations of boys and girls, game, sports, music and campfire pow-wows, will be given each Saturday afternoon.

Chief Seton of New York, whose Indian name is Black Wolf, and the museum management have appointed City Playground Supt. Frank S. Marsh as the Medicine Man to complete the organization of the Thunderbird council of boys and girls and to stage manage the big doings in the desert next Saturday. He will be assisted by a number of chiefs of the Boys' and Girls' Scout organizations and by athletic directors from Camp Kearny. A Woodcraft league chapter has been applied for from New York.

Joseph Jessop, noted archery expert, whose exhibit of bows and arrows in the museum is one of the finest in America, has offered to assist in the forming of Thunderbird archery clubs, and these will hold Robin Hood contests at the desert. A shop will be installed where the boys can make their bows and arrows besides other crafts products. There will be music, games and a jousting tournament or tub-tilting between teams to be fought out during four Saturdays with prizes. Other details of the lively program will be worked out at a meeting between Chief Marsh and sub-chiefs at the Grant hotel tonight. Many of the Woodcraft contests will be a continuation of those illustrated by Seton last Saturday to the delight of over 3,000 kiddies and their friends at the reopening of the desert to the public.

March 13, 1919, San Diego Union, 4:1-2. San Diego Museum Notes.

March 14, 1919, San Diego Union, 4:3-5. San Diego Museum Notes.

March 15, 1919, San Diego Sun, 1:7-8, 9:4. Naval Hospital site is praised; school may come.

March 16, 1919, San Diego Union, Classified, 1:4-5. Park Commissioners plan aviation depot as Balboa Park attraction; City Attorney believes Board can legally permit Lt. Hennessy to maintain air passenger service on old infantry drill grounds; action planned at next meeting; Park Commission will receive a portion of fees as rental for the flying field.

March 16, 1919, San Diego Union, Sport and Auto, 6:5. A tractor performance will take place next Saturday on the old artillery camp site at Balboa Park; Boy Scouts to plant crop on site from seed donated by San Diego merchants.

March 17, 1919, San Diego Union, 4:1. EDITORIAL: Our Playground

No more appropriate use could be suggested for San Diego's incomparable park site than that proposed by Dr. Edgar Hewett and Ernest Thompson Seton --- to make it the city's playground and artistic rendezvous and colony.

This is precisely what parks are for --- recreation, rest and the conservation of whatever the community possesses or aspires to in its esthetic activities; beauty, culture, good taste, discriminating appreciation of the best that lives in art and nature. With wise provision of an ultimate purpose the promoters of this plan to make Balboa Park a substantial asset of San Diego's growing and future prosperity have begun their great enterprise by an effort to popularize the park with the youth of the city. They have set apart the area of the Painted Desert --- the most distinctive feature of any public pleasure ground in the world --- for the young, where they may gather for their sports and outdoor exercises. Wisely, too, they include in their curriculum of recreational and educational purpose formulated on dramatic action [programs that are] peculiarly adaptable to the natural genius of all boys and girls with red blood in their veins; and throughout the scheme runs a human morality that teaches courage, fortitude, cleanliness of mind and body, benevolence, charity, honesty, truth --- all the requirements of the best citizenship wholly apart from all artificial or debatable predilections and conventions of the social environment. The basic virtues are insisted upon and the children who play in this playground may go out from it into the great world with open minds sustained by the thought that underlies the philosophy which sang through the heart of Robert Burns, "it is good to be merry and wise, it is good to be honest and true," and that which another rhymed in the verse,

May I govern my passions with absolute sway,
And grow wiser and better as my youth wears away.

The playground is the natural and logical complement of San Diego's excellent public schools. The boys and girls go from their classroom to their sports and assemblies prepared to gather confirmation and of what they have learned in books from another source wherein is also the action fitting to the word. For it is as true today as when Shakespeare spoke, that we "Find tongues in trees, books in the running brooks, sermons in stones and good in everything." Let San Diego encourage and support in every way this great enterprise of making its park a place of beauty and a joy ground forever.

March 18, 1919, San Diego Union, 7:1. Guild makes exhibit of art works' showing is open to public in Fine Arts building, Balboa park.

March 19, 1919, San Diego Union, 4:1. EDITORIAL: Fame for San Diego

The great public park of San Diego is for all the people; not to be kept for an "exclusive set" or to be a no-man's land for those who do not specialize in some cult, fad, hobby or eccentricity of inclination. There is room for everybody within the area of its fourteen hundred acres. It is the people's money that pays for the park's upkeep and enlargement; and there should be as few restrictions as may be compatible with the general purpose. Keep-off-the-grass signs should be as infrequent as the acres of properly cultivated lawn and bowling greens; let the geraniums bloom as freely as they will, but don't prohibit us from admiring them; give us full leave to play in the park, to drive there, to camp there if we desire, to make it our recreation center for all sports, to fill its stately and picturesque structures with art studios, culture groups, science societies, picture galleries, museums, music conservatories --- anything that will contribute to the higher life of San Diego, to the amusement of its hours of relaxation, to its outdoor entertainment.

. . . Those who love good music from the best composers may find what they desire in the organ recitals every afternoon under the skilled direction of Dr. Humphrey Stewart; why not offer something for everybody else?

The children especially should be allowed to use the park as their very own; for the children of this generation will be the taxpayers of the next, and if they are taught to love the park now, they will not neglect it when fathers and mothers are beyond the reach of the tax collector.

But, above all, don't let caste enter into the direction of the park administration; don't give privileges to the exclusion of any who ask for similar privileges. Make the park the golden asset for San Diego that every other city park in the United States is for the cities maintaining them. Throw the park wide open to those who can make it a great place of resort, and before many years the fame of the canyons, mesas, gardens, conservatories, colonies, boulevards, winding paths, forests, playgrounds, art, science and culture groups, will ring round the world.

March 21, 1919, San Diego Union, 4:4-5. San Diego Museum Notes

March 23, 1919, San Diego Union, 13:4. Plan permanent exhibit of home products at Park; Women's Committee applies for space in one of the old Exposition buildings.

A permanent exhibit in one of the exposition buildings of home products, fruits, vegetables, canned and bottled goods and manufactured articles of every sort, is one of the plans of the board of park commissioners for a better, bigger and more prosperous San Diego, according to Secretary F. F. Grant of the park board.

The women's home products committee has applied to the park board for space in one of the exposition buildings and the board has agreed to see that such space is provided when the exposition building preservation committee next meets.

"Balboa Park is receiving from the taxpayers of San Diego nearly \$100,000 a year," said Mr. Grant, "and the park commissioners want the taxpayers to received \$200,000 worth of benefits in return for their money. During 1918, the soldiers, sailors and marines in the exposition grounds were responsible for the expending in San Diego of more than \$6,000,000. Of this sum, every merchant and manufacturer, every laboring man and every citizen, no matter what his financial or social position, received a part, either directly or indirectly.

"Now that the army and navy are leaving, we want the exposition grounds used in other ways that will bring money to San Diego, advertise the city, and afford entertainment to our citizens."

March 21, 1919, Minutes, Board of Park Commissioners. Mr. H. J. Penfold of the Panama-California International Exposition was present to arrange for settlement of accounts existing between his Department and the Exposition. Owing to a disparity between the books of the two institutions, the president appointed the executive secretary, superintendent, and building superintendent to meet with Mr. Penfold and to file a written recommendation at the next regular meeting of this Board.

March 25, 1919, San Diego Union, 10:4. Golfers organize for city; Golden Hill Club formed to play on municipal links; financial report is given; committees chosen.

March 26, 1919, San Diego Union, 1:1-2. Mayor Wilde leads in primary mayoralty race; Johnson second, Fay third.

March 27, 1919, San Diego Union, 4:3. San Diego Museum Notes.

March 27, 1919, San Diego Sun, II, 9:3. Girl Scouts to have day at Park; program arranged for Saturday at Painted Desert.

March 30, 1919, San Diego Union, 15:3. Seventy-five Boy Scouts attend weekend camp at Balboa Park; more than 100 tests were passed.

April, 1919, Park Superintendent's Report: Wrecking of the remaining buildings on the Isthmus and at former locations of the 21st Infantry camp is progressing rapidly. There will be more good material for sale than originally estimated.

April 1, 1919, El Museo, Vol. 1, No. 1, 4. The Museum as a Clearing House of Culture and Recreation, by Grant Wallace.

In Balboa Park, only partly used, is more than a million-dollar "chunk of display advertising" which San Diego at small expense can equip and put to work again as her greatest drawing card. It is the one logical center not only of the arts, science and recreation for all the people, but for a Museum of Commerce and home products, a War Memorial Museum or historical department, as well as for the existing Natural History Museum.

April 1, 1919, El Museo, Vol. 1, No. 1, 5. The Painted Desert as a Junior Museum.

That the San Diego Museum's tabloid "Painted Desert" of five acres may be converted into a most productive field for the cultivation of children, is shown by the following list of activities now underway or planned by the management for the free use of all of the youngsters of the San Diego region:

A Junior Museum of Natural History and School Work: collections to be made and studied by children.

Union Field Day of massed sports and contests every Saturday from 2:30 to 5 p.m., open to all, in charge of a dozen juvenile societies and schools.

Free club rooms in the Zuni, Taos and Hopi Indian pueblos for boys' clubs and girls' clubs.

Facilities for night campfires, and for plays and fiestas based on Indian lore and early history.

A schooling in Americanism and self government by means of a Junior Democracy of affiliated clubs.

A workshop for training in craftsmanship.

An archery court.

An Ethnological Museum with native Indian garden.

No other Children's Museum of such broad scope and uniquely appropriate setting exists in America.

An example of the social service which an institution, untrammelled by politics, may render a city without taxing the people is seen in the action of the Museum in thus throwing open to all the children of this unique recreation center. The opening ceremonies on March 8th in charge of the celebrated author of twenty-four nature books, Ernest Thompson Seton, were attended by about 3,000 people, mostly children, who witnessed the founding of the Council of the Thunderbird of the Woodcraft League of America, of which Seton is the head. The name was suggested by the appearance overhead of aeroplanes from March Field, Riverside and Rockwell Field, specially detailed to make photographs of the opening ceremonies.

From this beginning there has evolved the regular Saturday federated field days of massed games and athletic contests in which all the boys and girls and juvenile organizations of the city and county are free to participate, from 2:30 to 5 p.m. In addition, all the youths' clubs desiring club headquarters among the hundred rooms in the five great Indian Pueblos are granted groups of rooms by the Museum. Already clubrooms have been assigned to the Girl Scouts, Campfire Girls and Thunderbird Woodcraft Council.

To encourage the collection and study of botanical, zoological, geological, industrial and historical specimens, the Museum will aid in creating a Children's Museum in the large entrance pueblo room of the Desert, and will equip it with cases and shelves for preserving the children's collections, besides adding other educational material. In cooperation with the teachers of San Diego, this Junior Museum should grow into an invaluable adjunct to the city's schools. It is hoped also that a workshop may be added, where the youngsters may receive occasional instruction in the use of tools, in making their equipment for games and in toy making and crafts work.

A Junior Democracy, whereby the juvenile club members may supply and practice self government and Americanism, through actual management of the desert community, also is in prospect, together with the production of Indian and early historical plays and pageants.

The union field day already is an assumed institution, brought about through the enthusiastic cooperation of ten or twelve of the juvenile societies of the city. These clubs take turns in supplying the program and in acting as hosts to all the other "Cliff Dwellers." These Saturday central meets of all children's clubs and unorganized youths, cannot fail to exert the most broadening and exhilarating effect upon the youth of the city. The leaders of the games have included Playground Superintendent Marsh and his assistants, Jack Case, athletic director of Camp Kearney, C. A. Van Dusen, Aviator and Athletic Director of Fort Bliss, Texas, and most of the members of the Supreme Council of Twelve. New healthful and humorous games and tournaments in which everybody takes part, are staged every Saturday. In addition, the small tots are given hours of story games.

How fully representative of San Diego's juvenile organizations is the Supreme Council in charge of the Museum's Painted Desert Union Field Day Center is shown by the personnel of the managing Council, viz.:

Frank S. Marsh, Sup. Of Municipal Playgrounds, Grand Sachem for 1919, in charge of Field Days;

Grant Wallace, head of the San Diego Museum's division of Sociology;

H. O. Wise, principal of the San Diego High School;

Ernest Thompson Seton, head of the Woodcraft League of America;

Elwood Barley, chief executive, Boy Scouts of San Diego;

George Chessum, in charge of boys' work Y. M. C. A.;

Miss Nancy Waddell, head of the Girl Scouts of San Diego;

Miss Josephine Randall, head of the Campfire Girls of San Diego;

Miss Althea Warren, San Diego City Librarian;

Miss Jessamine Hunt, head of Y. W. C. A. Recreation section;

Miss Ethel Dummer, Physical Director, Francis Parker School.

April 1, 1919, El Museo, Vol. 1. No. 1, A Broadening Field

To link the constantly expanding work of the Museum still more closely with the everyday needs of the people, it has become necessary to add a new department --- that of Sociology --- to those of the Science of Man and Ancient and Modern Arts.

The new work, which will have to do with the schools, recreation, courses of Museum lectures, Children's Museum, publications and clubs affiliating with the Museum, under the general supervision of

Director E. L. Hewett, will be in charge of Grant Wallace, who also is secretary of the local society of the Archaeological Institute of America and Fellow of the School of American Research.

The exhibition of brilliant art work of many of the one hundred members of the San Diego Art Guild now open to the public in the Museum's Gallery of Fine Arts and in the adjacent Guild club room is an excellent augury for the success of the new movement toward consolidating San Diego's cultural activities in Balboa Park.

This pioneer in the movement toward the Exposition center will be followed by other organizations devoted to art, music, literature, home economy and sociology. Our plans contemplate cooperation not only in providing for their use commodious club rooms but lecture halls, classrooms, studios, club kitchenettes, tea rooms and facilities for receptions, dances and other forms of recreation.

Among the organizations which are to be given homes in the Museum buildings are"

The members of the San Diego Society of the Archaeological Institute of America.

The San Diego Society of Arts and Crafts.

The Women's Press Club.

The San Diego Writers' Club.

The Bungalow Society.

The Scribbler's Club.

The Koch Writers' League.

The Silver Gate Business Girls' Club.

April 1, 1919, San Diego Union, 4:4-5. San Diego Museum Notes.

April 4, 1919, San Diego Sun, 1:2. City golf course will be opened tomorrow afternoon.

April 4, 1919, San Diego Sun, 8:2-3. Fletcher replies to charges made by Conard.

April 4, 1919, San Diego Union, 1:6. Salvation Army to hold meeting Sunday afternoon in Balboa Park to explain drive.

April 4, 1919, San Diego Union, 8:2-3. San Diego Municipal Band will give first public concert Sunday afternoon at Organ Pavilion.

April 5, 1919, San Diego Sun, 4:1. EDITORIAL: Mayor Wilde's Salary.

April 5, 1919, San Diego Sun, 17:4-5. William Templeton Johnson writes about library.

April 5, 1919, San Diego Union, 8:1. New army games will be used in Painted Desert.

Many of the new games and athletic contests employed by Uncle Sam in training the Yanks for service "over there" will open to all comers at the regular "Painted Desert" juvenile field day this afternoon from 2:30 to 5 p.m. in Balboa Park. The army games and tournaments for boys of all ages will be in charge of Archie Beekley of the municipal playground commission and George Arnold, who, until recently, was athletic director and boxing instructor at Camp Lewis.

Girls of all ages will be instructed in various games by a corps of leaders headed by Miss Grace Kissinger, assistant director of city playgrounds. The smaller children will be entertained in one of the Indian pueblos with stories by Miss Helen Dysart of the city library.

All children and young people, particularly, whether members of clubs or not, are invited by the museum management to make use of the pueblo playgrounds every Saturday afternoon, and to take part in the numerous exhilarating games and contests. Provision will be made, within a few weeks, for opening a junior museum in the desert, the collections to be made and studied by the boys and girls. These collections will include natural history specimens, craft work, models, and everything of interest to children.

Car No.7 stops near the desert entrance. There is no charge for admission.

April 5, 1919, San Diego Union, 8:5. Children's tests will continue at Balboa Park; physicians and nurses will remain at work; free health examination of children at San Diego Museum laboratory.

April 9, 1919, San Diego Sun, 1:4. Mayor Wilde winner in balloting.

April 9, 1919, San Diego Sun, 1:7. Naval Station is won by San Diego.

April 9, 1919, San Diego Union, 1:1-2. Wilde wins mayoralty by 2047 votes; four new Council members; Old Town bridge ordinance defeated in election in which 17,000 votes were cast.

April 11, 1919, San Diego Union, 11:4. Dr. Stewart will play a special program this (Friday) afternoon in honor of visiting Rotarians.

April 12, 1919, San Diego Union, 4:3. Rotarianettes are delighted with San Diego; 250 served luncheon in Pepper Grove; music program given.

From the picnic grounds the women were taken to the art museum to view the water colors by the little French children of Paris for the American Junior Red Cross.

April 12, 1919, San Diego Union, 4:4-5. San Diego Museum Notes.

The first issue of the San Diego Museum's new periodical, "El Museo," to be published fortnightly, will be off the press today.

The regular Saturday afternoon field day of sports and contests for both sexes will be held this afternoon at the museum's Painted Desert.

April 13, 1919, San Diego Union, 6:3. Colonel J. L. McGill to take command of the marine barracks in Balboa Park tomorrow morning; was formerly officer in charge of Paris Island Training Camp.

April 13, 1919, San Diego Union, 6:4-5. 160th Infantry due at Camp Kearny this morning; regiment will be largest unit of 40th Division to return here for sometime; others will be sent here in small bodies from time to time.

April 13, 1919, San Diego Union, 6:6. Still more men coming to Camp Kearny for discharge; portion of 91st Division has been ordered here; now on high seas.

April 15, 1919, San Diego Union, 4:4-5. Membership drive started to raise money for support of San Diego Museum at Park; museum has 300 members at present.

April 16, 1919, San Diego Union, 4:1-2. San Diego Museum Notes.

April 17, 1919, Letter, Sup't. of Parks, formerly Exec. Sec'y of Park Dep't, & Expo. Auditor, to the Board of Park Commissions of the City of San Diego, California

Gentlemen:-

Complying with directions of your Honorable Body, the undersigned have carefully considered that statement of the Panama-California International Exposition's account against the Park Department of the City of San Diego and the contra-account of the Park Department against the P.C.I. Exposition, and are prepared to recommend that the Board of Park Commissioners take the following action:-

- (1.) That, in consideration of the fact that charges for maintenance were made by the Park Department in January and February of 1916 for the purpose of offsetting any balance that might exist against the Park Department at the close of the Exposition, you authorize the striking from the records of the two items representing said maintenance during January and February 1916.
- (2.) That you authorize the acceptance of such a portion of the Exposition's bills against the Park Department as may be necessary to balance the account of the Park Department against the Exposition.
- (3.) That you authorize a letter to President Davidson of the Exposition, advising him that such action has been taken for the purpose of making it possible for the Exposition to abide by certain agreements made with Los Angeles subscribers, and that, in releasing its claims against the Exposition, the Park Department is making a decided sacrifice.
- (4.) That Mr. Davidson be advised in said letter that the Board of Park Commissioners expects and insists that, in the event of any money being returned to San Diego by Los Angeles subscribers, all of such money be given to the Park Department, as per the original agreement between the Exposition Directors and the Board of Park Commissioners.

April 17, 1919, San Diego Union, 4:3. Development of parks outlined at Ad Club luncheon yesterday.

The regular luncheon of the Ad Club was held at the Maryland Hotel yesterday, and the program centered about the city parks. Arthur Cosgrove presided, and addresses were delivered by Judge Henry C. Ryan, president of the park board, and F. F. Grant, secretary, while the accomplishments of the working force were detailed by John Morley, superintendent, and Thomas Faulconer, executive secretary.

The decorations for the luncheon were furnished by the Park Board from Balboa Park, and the music was under the direction of Claude Webster and Fred Varin.

Superintendent Morley gave a number of pertinent suggestions concerning what should be done to increase the beauty and worth of Balboa Park. He said in part:

"It has been, and should be in the future, the policy of the Board of Park Commissioners, in the further enhancement of the landscape development of the park, to leave large areas in their natural state, including nearly all the small canyons and the large areas of the mesas, preserving all the small natural shrubs and wild flowers which grow abundantly in these places.

"In other sections of the park, development should be along general park lines, such as the planting of trees, shrubs and flowers, large expanses of lawn with open vistas, keeping in mind the finest views when the improvements are made so they are not infringed upon, with waterfalls and small lakes in some of the hills and canyons constructed and planned to give a natural effect."

April 19, 1919, San Diego Union, 4:3. Dr. Hewett will begin lecture series on cultural history of mankind at San Diego Museum.

April 20, 1919, San Diego Union, 1:5. Balboa Park will be the scene of an international peace jubilee celebration next year if a resolution by Senator Ed Sample of Sacramento receives the same indorsement when it is presented to the national congress.

April 24, 1919, San Diego Union, Classified, 9:3. Amphion Club plans to turn Southern Counties building into a new music auditorium.

April 26, 1919, San Diego Union, 4:6. Balboa Park roses now bewitching mass of riotous color; 16,000 bushes with 96 varieties in full bloom; garden located about 200 feet north of Laurel Street entrance.

April 27, 1919, San Diego Union, 12:1-2. Many varieties of roses exhibited in California Building.

April 29, 1919, San Diego Union, 4:5-6. San Diego Museum Notes.

April 30, 1919, San Diego Union, 4-5-6. Dr. Hewett addressed Women's Civic Center yesterday on "Balboa Park as a cultural center."

May 1, 1919, El Museo, Vol. 1, Nos. 2 and 3, 10. The Mission Play in Balboa Park

If John S. McGroarty's famous Mission Play had been written especially for this week's production in the Exposition setting at Balboa Park, it hardly could have fitted more harmoniously and happily into its romantic Spanish-Colonial environment.

Performed by the large cast of real Indians, Spanish Americans who were born in the shadows of the old missions, and other mummers headed by Frederick Warde in the role of the great Padre Serra, the historical-pageant-drama in spirit and text and allusion and hand-made scenery, as well as in geography, was largely San Diegan. And yet, during its many years on the stage, this is the first time this living document incarnated from the pages of our own history has been shown here, the home of the Mother Mission of California, excepting for a brief engagement downtown.

With its three acts located at Old Town, on our Harbor of the Sun, at the Carmel Mission, and at the ruins of San Juan Capistrano, the story of the play is too well known to need representation. Aside from its interest and great value as a record of our past, the production embodies artistic features and contrasts of compelling force. The display of Indian handicraft and the brilliantly staged fiesta scene in the second act, with its native ceremonial dances and music, carry an interest and value far transcending their importance as mere entertainment.

For San Diego to fall short of giving the Mission Play adequate support would be a great pity; for we need to demonstrate anew that we can support such meritorious productions of drama and pageantry, not only because in this instance the surplus gate receipts will be devoted toward converting the Southern California counties building into a badly needed Municipal Auditorium or Festival Hall, but as an earnest that future productions (whether of this play or of others adapted to the Park environment) will be welcomed and supported.

Would it not be a most appropriate thing, if San Diego would again back (and support) the Mission Play for a long run, on an arrangement whereby the proceeds mainly would be devoted to rescuing Padre Serra's half-forgotten first great Mission structure from complete obliteration and oblivion? The Editor visited the ruins of the San Diego Mission in March and found a buttress and the sole remaining arch tottering toward final destruction, with only two men interested enough to give evidence that anyone cares.

We hope that the Ad Club, in sponsoring the great Mission Play may demonstrate that the play's the thing wherewith to catch the conscience of the community.

Special Events for the Painted Desert

The Supreme Council of the Painted Desert is engaged in completing its organization and in planning a series of large special events for the many juvenile societies of the city. These field days, pageant dramas, campfire story evenings and the like, will be held about once a month, beginning probably with a campfire night staged by the Y. W. C. A. girls under the direction of Miss Jessamine Hunt of the Council.

During the summer holiday period with the Saturdays given over to special events elsewhere in the Park, the Saturday union field days will be discontinued at the Desert. Meantime the Campfire Girls and Girl Scouts are engaged in equipping and beautifying the Hopi Indian houses granted to them as club houses by the Museum. When its resources permit, the Desert will be kept open constantly as a recreation center and Museum for children, in charge of a custodian and crafts instructor.

Henry Lovins is continuing his classes in applied design in the California and in Coronado.

Miss May Shelton, sculptor, of La Jolla, this month has joined the Museum art colony. She will conduct classes in modeling in the studio of Miss Edna Scofield, who is engaged on a number of orders for portraits in plaster in addition to her work in planning the casting of replicas of Maya sculptures for pilasters and panels to be used in decorating the Southwest Museum in Los Angeles.

A professor from Boston, after inspecting the wonderful bust of the million-year-old Java Man in the Science of Man building, turned to a Playground official who is a golf enthusiast and inquired:

“Pardon me, sir, but have you any ‘missing links’ on exhibition?”

“Missing links? Sure!” was the reply. “Balboa Park has two square miles of ‘em; and missing baseball grounds and tennis courts and bowling greens and places to pitch horseshoes --- all missing!”

May 3, 1919, San Diego Union, 4:3. Painting loaned from private collection now hang in San Diego Museum, Balboa Park.

May 3, 1919, San Diego Union, 4:6. City Park Board asks that Judge Ryan, outgoing member, be retained in office.

May 5, 1919, San Diego Union, 4:3-6 The San Diego Advertising Club has launched a strenuous campaign for the raising of funds to be used to convert the Southern California Counties building into a civic auditorium. To give the campaign impetus and a fitting start, the Ad Club will present the famed Mission Play in the San Joaquin Building this coming week.

May 8, 1919, 8:3. Jack C. Thompson, chairman of Mission Play Committee, says San Joaquin Building is suited to play; seating arrangements excellent.

May 16, 1919, Minutes of the Board of Park Commissioners.

Upon request of Mr. Held, a motion was made, seconded and carried, christening this road “Pershing Drive.”

Mr. Held stated that Madame Schumann-Heink and other operatic stars would give a benefit concert for this road fund at the Organ Pavilion on the evening of May 24th and requested that the Exposition grounds be closed from 5 p.m. until midnight of the date except to persons holding tickets to the concert. Upon motion of Commissioner Forward, the park superintendent was directed to have the grounds closed during the hours mentioned. Permission for use of the Organ Pavilion on this date was granted on condition that this department be reimbursed for all expenses incurred and that the superintendent of parks should have supervision over all work affecting the property of the park department.

Complaint having been made concerning the conduct of patrons of the Comus Club, the president of the board stated that he would take the matter up with the district attorney to have the nuisance abated

Action on the petition for the opening and extension of Oregon Street was deferred until the commissioners should have looked over the ground.

Request of Dr. Hewett for permission to use the Sacramento Building as an art studio under the auspices of the Museum Society was denied on the grounds that this Board has not yet received any information as to the wishes of the preservation committee.

Permission given the Playgrounds Commission to held their annual May Festival on the 24th day on this month on the West side lawns, on condition that this department be reimbursed for any expenses incurred.

Authority was given the Knights of Columbus to hear a patriotic address by attorney Joe Scott of Los Angeles at the Organ Pavilion on the afternoon of June 22, on condition that same be not allowed to interfere with the regular Organ Recital.

Action on request of Service Motor Truck Corp. for landing field in Balboa Park was deferred until the full purpose of this company should be more evident.

Permission was given the Mayflower Photoplay Corp. to film a photoplay in the Exposition grounds from May 22 to June 1 on condition that they file a satisfactory bond in the amount of \$500 to cover any damage that might be done to park property, and on further conditions that they should not work during the afternoon of May 24th if such work would interfere with the Schumann-Heink program, and that all work here to be done under supervision of the park superintendent.

The executive secretary was authorized to sign a certain lease received from the Marine Corps, authorizing said Marine Corps to continue for a period of one year its occupation of grounds and buildings now occupied by them with the exception of the San Joaquin Building.

The executive secretary was further authorized to request the Marine Corps to furnish necessary guards for protection of Exposition buildings and grounds during the occupation by Marine Corps of a portion of said premises.

Action was deferred on request of the city health office for palms and ferns for the decoration of that office.

Request of United States Naval Hospital for use of the bake shop building as a storeroom for supplies was granted.

Request of Oakland, California authorities for an opinion as to the relative values of various forms of park government was referred to the executive secretary with directions to advise the writer that the park commission was the only form of park government ever used in San Diego and that same had proven entirely satisfactory.

May 17, 1919, San Diego Union, 14:1. Judge H. C. Ryan is elected head of Park Boar; money for Pershing Drive should not be devoted to civic auditorium conversion.

May 18, 1919, San Diego Union, Society and Club, 1:1-2. Elaborate program of dances and drills arranged for 5th annual May festival to be held at Balboa Park next Saturday afternoon; children will sing National Anthems of allies.

May 18, 1919, San Diego Union, Society and Club, 12:2. Madame Schumann-Heink will come here to sing at Organ Pavilion in interest of Pershing Memorial Saturday night, May 24.

May 19, 1919, Memorandum, Offices of Board of Park Commissioners, Administration Building, Balboa Park, San Diego, California

For and in consideration of the agreement by the United States Navy Department to pay to the City Park Department of the City of San Diego, California, the sum of \$5,085.24, and to leave upon the premises all lumber and other salvage materials described in that certain estimate sheet and addenda thereto, all of which are hereto attached, the Board of Park Commissioners of the City of San Diego does hereby release the United States Navy Department from any and all responsibility for damage or damages to buildings or grounds of Balboa Park during the occupancy of said buildings and grounds by the U. S. Naval Training Station, provided, however, that this release shall not affect any claim for damage to the premises as occupied by the U. S. Naval Hospital.

(Signed) BOARD OF PARK COMMISSIONERS

By /s/ T. N. Faulconer,

Executive Secretary.

Witnessed

/s/ Elma E. Smock

Approved:

/s/ F. D. Roosevelt,

Acting Secretary of the Navy.

May 19, 1919, Letter from _____ to Captain H. C. Curl, U. S. N. Commanding U. S. N. Hospital, San Diego, Calif.

Dear Sir:-

As the Naval Training Camp will definitely will close tomorrow and this department will no longer receive protection from navy sentries, guards or fire patrol, we desire to call your attention to some of the difficulties that his department faces, and to ask your aid and cooperation in the protection of city property and in maintaining the site of your hospital and all Balboa Park in the best possible condition.

Convalescent sailors recently found picking flowers and fruit have stated that they had received no orders or instructions as to their conduct or status in the park.

Drivers of automobiles and motorcycles belonging to the Naval Hospital have been violating all traffic regulations, and have stated that they were doing so in ignorance of the fact that they were required to live up to such laws. Fast driving in the Exposition grounds has resulted in serious accidents and is a menace to the lives of women and children visiting the grounds, as there are several blind approaches, where a driver going at a greater rate of speed than fifteen miles per hour could not possibly avoid an accident should pedestrians or another car reach one of these points at the wrong time.

It is requested, therefore, that definite instructions for your officers and men be posted, and that this office be furnished a copy of such instructions in order that we may aid in their enforcement. It is requested that these instructions cover the following points.

- (1.) Driving in the Exposition Grounds at a greater rate of speed than 15 miles per hour.
- (2.) Picking of fruits or flowers.
- (3.) Entering public buildings other than those of the Navy Hospital or those open to the public.
- (4.) Defacing any building, lamp post, playgrounds equipment or other park property.

Such action on your part will greatly relieve the difficult situation faced by park authorities, and will be deeply appreciated.

Very truly yours.

May 22, 1919, San Diego Union, 5:2. Schumann-Heink Day, honoring diva, to be observed by all San Diego, May 24; famous singer to give recital at Balboa Park.

May 23, 1919, Minutes of the Board of Park Commissioners.

Present: Commissioners Ryan and Grant. Absent: Commissioner Forward.

Executive Secretary's report of refreshment stands business for weekly ending May 22nd received and ordered filed.

A committee of ladies, representing residents of that section lying just north of the Exposition grounds, appeared before the board, requesting that steps be taken to beautify the park grounds

adjacent to their property. It was stated that their property was assessed high because of its proximity to the park and that a great deal of money had been spent on grading, paving and otherwise improving property in that section, while the north end of the park has been neglected to the extent that it was a detriment to their property. This committee was informed that the Board would look over the situation and, if possible, remedy the matter.

After looking over the situation at the north end of the exposition grounds the board authorized the removal of the wire fence extending west from the north gate.

A petition of property owners desiring to grade 28th street from Upas to Thorn was presented by Dr. Allen, but, in the absence of a member of the board, action was deferred until a later meeting.

Permission given the U. S. Steel Corporation to have an all-day athletic meet at the Stadium July 4th on the usual terms.

President Ryan stated that he had taken up the matter of abating the alleged nuisance at the north end of Balboa park under the name of Comus Club with the district attorney, but had not been able to make satisfactory arrangements for such abatement.

Proposed renewal of lease of buildings and grounds to U. S. Marine Corps was ordered held until a later meeting, pending the possible definite close of the war prior to expiration of the Marine Corps' present lease.

Request of Miss Hulda Hanker for refund of the 15 percent commission charged by the park department as a rental for the use of the Organ Pavilion was received and action thereon deferred.

Permission was given the Washington school students to hold a picnic at the Pepper Grove and on the West side lawns all day June 7th.

The superintendent was authorized to give to Mrs. Thansen of Point Loma the ground robin from the Horticultural Building aviary.

Permission was given the Girl Scouts to have an aquatic drill in the lagoon May 31st for the purpose of having the same photographed by Pathe Weekly moving picture corporation.

May 23, 1919, San Diego Union, 5:2. Schumann-Heink asks all to aid Pershing Drive concert.

May 23, 1919, San Diego Union, 5:3. Filming of "Soldiers of Fortune: begun yesterday in Balboa Park; Alan Dwan director; permission to use Marine Corps obtained through efforts of the Publicity Bureau of the Chamber of Commerce.

May 24, 1919, San Diego Union, 4:1. EDITORIAL: A Perfect Memorial . . . regarding Madame Schumann-Heink's concert in aid of Pershing Drive; "an everlasting memorial embodied in imperishable art."

May 25, 1919, San Diego Union, 2:1-2. Schumann-Heink sings to nearly 7,000 people at organ; pleads for unity in advancing city; receipts estimated at between \$3,000 and \$10,000.

With all the force, all the enthusiasm, all the heart interest and all the supreme artistry which have made her the world's greatest and best loved diva, Madame Schumann-Heink sang for her army of sons --- the soldiers and sailors of the United States --- at the Spreckels Organ Pavilion in Balboa Park last evening. Through all her program and in every gesture, almost every word, this mother of the soldiers exerted every effort for the success of the monument which is to be built, as he expressed it, for her own flesh and blood --- the park's Pershing Drive, which will commemorate the part taken by San Diego county in the preservation of humanity.

And if, in her program selections, she was before all else, the most finished of artists, in her actions and in every word she addressed to the audience, she was "Mother" Schumann-Heink, the friend and lover of San Diego, as she is the friend and mother to every boy in khaki or in blue. She sang of the soldiers in Picardy and France, and of the long, long roads to home, and of the hearts that are waiting there for those who left to attempt the great adventure, and then, as if tired of her great art, she spoke in simple, womanly phrases of the love which all should have in the thoughts of San Diegans.

"We should not forget what the boys have done," she said. "Let us work for them and for San Diego, the most wonderful city in the world, and I know the world --- I have seen it here and there, and I know. I talk so much about San Diego that they get tired of me and send me back to this city, and send the navy so that I have to come."

Then with a little sob, she continued:

"You see, I am selfish. I have four boys in the navy."

Her efforts were well rewarded. Nearly 7,000 people thronged the Pavilion in front of the great pipe organ, and the receipts of the evening, which are to be devoted to the drive to be built through Balboa Park in commemoration of San Diego's part in the world war, are estimated at between \$8,000 and \$10,000.

With Madame Schumann-Heink were Frank La Forge, accompanist, who is now recognized as perhaps America's leading composer, and Ernesto Beruman, who has been declared by critics to be one of the world's foremost pianists, and the greatest artist who has ever left Mexico. In their efforts last evening, both of these proved themselves worthy of a participation in the triumphs of the famous contralto, whom they have accompanied during all of the present concert season.

After a series of selections by the band of the 32nd Infantry, Camp Kearny, Madame Schumann-Heink stepped to the edge of the organ platform amid an ovation. Then, as La Forge struck the first bars of the Vitelia aria, by Mozart, her voice rose above the applause, and the golden notes which have thrilled hundreds of thousands of admirers throughout the musical world, rang out through the flower-scented spaces of the beautiful plaza.

When the last tone had died away, Mary-Elizabeth and Katherine Pendleton, the little daughters of J. M. Pendleton, secretary of the war camp community service, presented to the diva two immense bouquets of roses, after which the singer launched into MacDowell's "They Beaming Eyes."

Beruman then began his first group of piano selections, but while he played the opening bars of the first, Mr. John D. Spreckels donor of the organ and pavilion and a warm friend of the diva, came to the rest rooms behind the organ proper. As he entered the room, Madame Schumann-Heink, with a tear in her eye, advanced toward him, saying, "My dear, dear friend."

Then, throwing her arms about his shoulders, she kissed him on the cheek and led him to a chair, where they conversed until the time came for her reappearance on the platform.

Beruman, from the beginning of his first group of offerings, showed himself to be all the artist which he had been heralded. His selections were happily chosen --- "Ballet of the Happy Spirits," Gluck-Friedman; "Minuet," Haydn; and "Dance," Beethoven. As he concluded, he also was presented with a bouquet, after which he rendered Godard's "Novellosas."

Schumann-Heink followed with five songs in English, "My Heart Ever Faithful," by J. S. Bach; "The Home Road" by Carpenter; "Have You Seen Him in France?" by Ward-Stephens; "Taps," arranged by Pasternack; and "When Pershing's Men Go Marching Into Picardy," by Oley Speaks.

In "Taps," with its martial air, so well adapted to the forceful personality of the diva, she scored her greatest success of the evening, and the applause continued for several minutes. As she turned to leave the platform, Lieut. Inez Cullison, of the Salvation Army, presented here with a large cluster of gladiolas and

larkspur, as an appreciation of her recent gift of \$500 to that organization. As she took the flowers, she kissed the Army lassie, and spoke a few words of thanks.

Beruman then played his second group, consisting of "Romance" by La Forge, Schumann-Heink's accompanist, and "Tarantelle" by Lizst. The contralto followed with a rendition of La Forge's "Before the Crucifix," after which she began one of the short speeches for which she is so well known.

"I desire first," she said to tell you that Mr. La Forge, who composed this beautiful song, is one of America's foremost artists and composers. And together we have been going to the camps, to the hospitals, wherever we could reach the soldiers and sailors, whose mother I am. For, of all who are on this earth, the best are the army and navy boys.

"If it rains, if the stones come down, I don't care when I say this. If you in San Diego who have conceived this great memorial, would stop your scrapping among yourselves and advance in one body to the good of your beautiful city, what could you do! You have been the first to recognize the honor due to our sainted dead. Let us continue this spirit. Now I will sing you an Indian love song. They say the Indians make love this way --- I don't know."

The song was Thurlow Lieurance's "Indian Love Song," and, as an encore, she sang Adtitti's "Bolero."

Dr. H. J. Stewart, exposition organist, then took his place at the keyboard, and the great singer closed her program with a stirring vocalism of "The Star Spangled Banner."

After the program an informal reception was held behind the organ, where Madame Schumann-Heink again expressed her love for San Diego, "For which," she said, "the best is none too good."

The diva, accompanied by La Forge and Beruman, will go to Los Angeles today for an appearance there, when they will return to San Diego. On Friday she leaves for a tour of the northwest.

May 25, 1919, San Diego Union, 5:3. Ten thousand watched as schoolchildren played around May Poles in Balboa Park yesterday afternoon.

May 29, 1919, Letter L. C. Webster, Captain Q. M. Corps, Office Post Supply Officer, San Diego Barracks, San Diego, California, to Board of Park Commissioners, San Diego, California

Subject: Cancellation lease, Camp W. R. Taliaferro, California.

1. Under the provisions of Article 8 of lease dated June 12, 1918, entered into between your Board and Captain John R. Brooke, Jr., 21st Infantry, for certain land in Balboa Park, San Diego, Cal., at a yearly rental of \$1.00 for use of troops and known as Camp W. R. Taliaferro, Cal., you are notified that said land will not be required on or after June 3, 1919, and the Government hereby relinquishes and gives up possession of same, effective June 3, 1919.

(Signed) L. C. Webster
Captain, Q. M. Corps.

May 30, 1919, San Diego Union, 7:4. More than 5,000 persons gathered at the Plaza on the Exposition grounds yesterday afternoon to watch Alan Dwan and his company film scene of "Soldiers of Fortune."

May 31, 1919, Notice of Renewal, War Department, Real Estate Service, Office of the Chief of the Real Estate Service, Washington, to Board of Park Commissioners, San Diego, Calif.

Gentlemen:

In accordance with Article 9 of the following lease:

LESSOR: Board of Park Commissioners of the City of San Diego, Calif.

LESSEE: United States of America

DATED: June 18, 1918 EFFECTIVE: July 1, 1918 EXPIRES: June 30, 1919

PREMISES: San Diego, Calif.

Portion of Balboa Park in Exposition Grounds, bound by Isthmus, Indian Village and the Alameda, south line of tractor shed and a westerly line from S. W. corner of said tractor shed to the west fence of exposition and exposition fence. Also Cavalry Camp.

You are hereby notified that the United States of America does hereby exercise the privilege of renewal contained in said lease, and does hereby renew same for the government fiscal year 1920, namely, July 1st, 1919 to June 30, 1920, of if said renewal privilege does not grant the right of renewal to June 30, 1920 then to such intermediate period nearest to June 30, 1920 as is granted in said lease.

Kindly acknowledge receipt of this notice.

(Signed) G. F. Woods
Chief, Real Estate Service

(Camp Taliaferro)

May 31, 1919, San Diego Union, 1:7, 5:2-6. Heroes honored by city; veterans of European war in line with older fighters of nation to pay tribute to those who gave their lives; army and navy swell long line of parade; General Strong, commander of Camp Kearny, one of speakers at Organ Pavilion; cheered loudly.

June 1, 1919, El Museo, Vol. 1, Nos. 4 and 5, 5. Los Angeles Woodcrafters to camp at Painted Desert.

Harry C. James, head ranger for Los Angeles of the Woodcraft League of America has arranged with the San Diego Museum for a three-day camping sojourn in the Painted Desert for the boys of Woodcraft. The tribes will arrive on Saturday the 21st of June and remain until Tuesday the 24th.

(See "El Museo" for balance of article.)

Girl Scouts in Feature Film

Five hundred Girl Scouts from San Diego, Fallbrook, Escondido, La Jolla, Coronado, Ocean Beach, Lemon Grove, Loma Portal and Roseville were present for the filming of the Girl Scouts picture which was made at the Museum's Painted Desert June 1, for Pathe. One of the big features of the picture was the handing over of the "keys" of the Hopi House by Grant Wallace of the Museum to Miss Nancy B. Waddell, county director of Girl Scouts.

(See "El Museo" for balance of article.)

Campfire Girls Decorate the "Desert"

The Katyimo Campfire Girls spent June 7 and 9 at their Hopi clubhouse . . . preparing the ground for a Victory garden, plaiting floor mats from tules gathered east of town and weaving baskets from the long Torrey pine needles gathered in the park. These articles, made under the direction of Mrs. Richard Dawson, will be used in decorating the Hopi house.

(See "El Museo" for balance of article.)

June 6, 1919, Minutes, Board of Park Commissioners.

Present: Commissioners Ryan, Grant and Forward.

Report of the executive secretary upon business of refreshment stand for the two week period ending June 5 received and ordered filed.

Upon motion duly made and carried, the park superintendent was directed to give possession of the San Joaquin Building to the U. S. Marine Corps, pending expiration of their present lease upon that and other buildings.

Upon motion of Mr. Forward, seconded by Mr. Grant and unanimously carried, the superintendent was directed to remove at his earliest convenience the wire fence surrounding the Exposition Grounds, also the wooden entrances at the North, South and West Gates.

Permission was given Henry Lovins to use as an art studio the northwest room on the second floor of the Sacramento building on condition that the tenant shall pay for the electric current consumed by him and shall reimburse this department for any expense incurred through his occupancy of the premises. Tenancy to be terminated at the will of the board.

Permission given property owners to grade 28th street from Upas to Thorn under supervision of park superintendent.

Request of E. B. Grey for permission to retain his studio near south gate of the Exposition grounds denied. Executive secretary was informed that he might purchase Mr. Grey's photographs or other stock that might be handled as a profit in the refreshment stand, and that Mr. Grey or anyone else was privileged to take pigeon pictures and handle them upon a commission basis through the refreshment stand.

The request of the Zoological Society for appointment of Joseph Mutters as Zoo keeper was referred back to the Common Council to be acted upon in accordance with provisions of ordinance No. 7612.

Upon motion of Mr. Forward, seconded by Mr. Grant, and unanimously carried, the executive secretary was directed to strike from the records of this Department the items charged against the Panama-California International Exposition for the maintenance of grounds during January and February of 1916, and to accept such claims of the Exposition against the Park Department as might be necessary to balance the account.

Mr. Forward was appointed a committee of one to interview the Los Angeles stockholders in the Exposition and to make an effort to have any balance left in the treasury of the Panama-California International Exposition returned to the Park Department for use in making some permanent improvement.

The Superintendent was directed to remove the trees in the northeast portion of the park in line with Oregon street.

The Superintendent was directed to remove erect two new toilets in Golden Hill section to replace those destroyed by the recent brush fire and to connect same with sewer.

Upon motion of Mr. Forward, the superintendent was directed to remove the public campgrounds from its present location to the northwest section of the Exposition grounds and to remove the fence surrounding the present camp site.

Upon motion, it was ordered that campers be required to secure permits from the park department office and that such permits be limited to thirty days.

Mr. Grant stated that he was making an effort to secure transportation for the transfer of the park elk to the Cleveland Game Refuge, and the superintendent was advised that such transfer probably would be made within the coming week.

There being no further business, the meeting adjourned.

June 9, 1919, San Diego Union, 5:4. Three thousand take part in first "sing" at Organ Pavilion; Wallace E. Moody of War Camp Community Service directed.

June 10, 1919, Letter, Executive Secretary of Board of Park Commissioners, to Panama-California International Exposition, Southern Trust and Commerce Bank, San Diego, Cal.

Attention of Mr. G. A. Davidson, President.

Gentlemen:-

Acting in accordance with the recommendation of a committee consisting of J. G. Morley, Jerome B. Pendleton and T. N. Faulconer, the Board of Park Commissioners has directed that the charge against you for maintenance of Exposition Grounds during the months of January and February, 1916, be canceled, and that sufficient of the Exposition claim against the park department be accepted to offset the balance still due this department from the Exposition.

I am directed to advise you that the Board of Park Commissioners has taken this step solely for the purpose of enabling the Exposition to fulfill the agreement with the Los Angeles stockholders, and not because the Park Commissioners do not consider the park department morally and legally entitled to the balance due this department in our books.

I am further directed to say that his commission is made upon condition that should the Los Angeles stockholders or any of them decided to return this money or any part of it to San Diego, all of such money shall come to the park department direct.

The Board of Park Commissioners depends upon your directorate to see that this provision is carried out and has placed the matter in your hands, knowing that you will appreciate the sacrifice this department has made and use your influence in our behalf.

It has been suggested and favorably looked upon by the Board of Park Commissioners, that should this money be returned to the park department, some permanent improvement be installed or some building restored, and Los Angeles be given due credit therefor.

The Park Commissioners are disposed to expend this money in a manner satisfactory to the Los Angeles stockholders, and any suggestion from them would be welcomed.

Thanking you for your efforts and interest that we feel sure you will devoted to securing this fund for us, I am,

Very truly yours.

June 11, 1919, Letter, A. J. Hanlon, Lt. Col. A. S. (A), J. M. A., War Department Air Service Flying School, San Diego, California, to Board of Park Commissioners, San Diego, California.

Gentlemen:

In a recent letter of Mr. J. G. Morley, Supt. of Park, we endeavored to get some shrubs and trees for planting at this Field, but Mr. Morley replied that he had no surplus stock on hand at present and suggested that we write the Board regarding our request for 175 honeysuckle palms and ten small palms.

Vines and trees are badly needed here to use as a wind break and to beautify the Post and if it is possible to get anything of this nature which you might accumulate it would be greatly appreciated by this command.

(Signed) A. J. Hanlon
Lt. Col. A. S. (A), J. M. A.
Commanding.

June 16, 1919, San Diego Union, 4:6. Balboa Elk Herd Roams Fields in Cleveland Park; animals taken to Laguna mountains in trucks without single mishap.

A round dozen of elk, three bucks and nine does, from the Balboa park herd are today roaming the wilds of the Laguna mountains in the Cleveland game and forest preserve, having been taken by the order of the board of park commissioners, in city trucks to the most verdant and inaccessible parts of the national forest and given their freedom.

The animals were herded and driven aboard trucks at the park elk corrals without serious mishap, and the 70-mile drive to the Lagunas was accomplished without injury to any of the animals, other than a few abrasions where the delicate horns, still in the velvet, came into occasional contact with the sides or tops of the trucks.

T. N. Faulconer, executive secretary of the park board, who had charge of the transfer of the elk, said that the animals arrived in fine condition and, with the exception of one irate buck, gave no trouble. This fellow, when unloaded from the truck, ran amuck and stampeded campers, Indians and others who had gathered to see the animals set free. L. E. Marshall, a ranch baron of the vicinity, rode his crop-eared mare

into the midst of the exciting scene and doubtless would have bested the buck but for the fact that said crop-eared mare refused to remain in the vicinity when the buck charged.

Regarding the removal of the elk to the mountains, F. F. Grant, secretary of the park commission, said:

“We have tried for the last year or two to get the major part of our elk herd removed to a more suitable location, but, owing to lack of transportation, we have had to keep them in the park until now, despite the fact that we realized the unsuitableness of the conditions under which they were corralled. It was not possible for us to give them as much room as they required, and we knew that they would thrive on deer brush and other mountain plants better than on the expensive food they were given each day in their corral.

“The park commissioners are deeply grateful to the city and country authorities for their aid in the matter of transportation, also to Forest Supervisor M. R. Tillotson and District Ranger Scarcy, who aided us in every way possible, and who have undertaken the protection and supervision of the herd in their new quarters.

“We have kept a buck and two doe in the park for exhibit purposes.”

June 19, 1919, San Diego Union, 5:6. Mayor Wilde favors selling 500 acres of Balboa Park to get money for El Capitan dam, a municipal pier and a city hall; all Council members approve.

June 22, 1919, San Diego Union, 9:4. Joseph Scott, prominent Los Angeles attorney, to speak this afternoon at Organ Pavilion on “American ideals.”

June 22, 1919, San Diego Union, 11:1. Woodcraft Boys to hold camp in Painted Desert.

Attracted by the beauty of Balboa Park and the great collections of Indian exhibits at the museum and by the weird setting of the Painted Desert as a campsite, boys from Ernest Thompson Seton’s Woodcraft League arrived from Hollywood and Los Angeles by steamer last evening, to hold campfire powwows and barbecues for four nights around the pueblo Indian villages of the museum.

.

Through the cooperation of the park board, motion pictures will be made of the camp activities to be released through the Pathe News service, thus advertising San Diego’s attractions throughout the country.

June 22, 1919, San Diego Union, 11:1-2. Three new art exhibits opened to public in main buildings of San Diego Museum at Park.

Three new art exhibits were thrown open to the public yesterday in two of the main buildings of the San Diego Museum. In the main gallery of the Fine Arts building, the San Diego Art Guild opened an exhibition of 76 works of art by local artists, many of the paintings and all of the dozen or more casts being shown for the first time. In the guild clubroom next door is the one-man show of 20 watercolors of desert Indian scenes by the California artist, poet and antiquarian, Carl Oscar Borg; and in the Science of Man building is shown a series of over 50 pen and pencil sketches of the great war made by Jonas Malm, of the 316th engineers, 91st division, now a resident of San Diego.

(See “San Diego Union” for balance of article.)

June 22, 1919, San Diego Union, 15:4-5. Article in June issue of “El Museo” devoted to “Our Museum Buildings as Superb Models for California Architecture,” written by Grant Wallace.

June 22, 1919, San Diego Union, Society and Club, 10:4-5. Dr. Edgar L. Hewett, San Diego Museum head, elected president American Federation of Arts.

June 23, 1919, San Diego Union, 4:8. "Community Sing" yesterday afternoon pleased 3,000.

June 24, 1919, San Diego Union, 4:1. EDITORIAL: San Diego's Park . . . favoring proposal to sell park acreage.

June 25, 1919, San Diego Union, 14:2. Farmers plan Fair in old Exposition building during September; portion of rotating fund now subscribed; supervisors asked to give money.

Farmers, ranchers and horticulturists of San Diego county are perfecting plans for the first county fair to be held in the old exposition buildings Balboa park for the last four days of September.

Already \$1800 of a \$2000 rotating fund to finance the preliminary operating expenses have been raised, and the county board of supervisors has been asked for an appropriation of \$1500 for premiums.

Farmers and livestock men of Lakeside, Escondido, El Cajon, Fallbrook, Ramona, Poway, Encinitas, Bonsall, Potrero, Chula Vista, Oceanside and three or four other districts are united in their efforts to make the fair an immense success.

The farmers will have complete charge of the fair, and large business concerns are to be invited to invest small amounts in premiums, cups, ribbons and cash to stimulate interest in the displays. An admission of about 25cents will be charged, and the concessions will include restaurants and refreshment booths.

Members of the executive committee in charge of arrangements are G. T. Drinkwater, Lakeside, chairman; W. A. Kent, peach grower of Poway; Felix Landis, El Cajon; J. F. Stanley and O. E. Hollway of San Diego, representing the chamber of commerce.

The fair will be given under the auspices of the Farm Bureau of California and will be one of a series of county fairs staged throughout the state.

Only products of San Diego county will be exhibited.

June 26, 1919, San Diego Union, 4:3. Legality of park land sale up to City Attorney.

June 26, 1919, San Diego Union, 4-4-5. Lyman Gage says Balboa Park is "a white elephant."

June 28, 1919, San Diego Union, 14:2. Park Board seeks change in water law.

June 30, 1919, San Diego Union, 5:3. Charles R. Baker, manager of San Carlo Grand Opera Company, says park site idea for show house; supports reuse of Southern California Counties building.

July, 1919, El Museo, Vol. 1, Nos. 6 and 7. Red Men from Many Cities to Hold Big Powwow in the Painted Desert.

. . . the Order of Red Men, having discovered here the aboriginal villages of Taos, Zuni and Hopiland, are to descend upon the Desert in force on September 1, 2 and 3, for the greatest ceremony of all. This period will include Saturday, Sunday and Labor Day.

The Museum this month is fitting up the north Hopi House of seven rooms, formerly the headquarters of Col. O'Neill of the 21st regiment, to be occupied by a member of the museum staff. Also a custodian of the desert soon will be installed in the south pueblo of Taos.

July 1, 1919, Letter, Executive Secretary, Board of Park Commissioners, to Major Long, Quartermaster, U. S. Marine Corps, San Diego, Cal.

Dear Sir:-

Regarding renewal of lease to Marine Corps of premises now occupied by U. S. Marines in Balboa Park, I wish to advise that action has been deferred until the afternoon of Friday, July 11, at which time the Board of Park Commissioners will be glad to hear any reasons that you or the commanding officer may have to advance in favor of including the San Joaquin Building in the new lease.

It will be well to take up at that time the matter of securing permission to cut a hole in the floor of that building, if included in the lease. As the Board doubtless will act upon recommendation of the superintendent, Mr. Morley, I would suggest that you have him look over the proposed alteration in advance.

The board will be in session from 3 o'clock to 4:30 o'clock on the afternoon of July 11.

Very truly yours,

July 3, 1919, San Diego Union, 5:4. Civic bodies name committee to go after auditorium; representatives of local organizations to consider Seven Counties building; names of committee given.

July 3, 1919, San Diego Union, 7:5. Arrangements for an honor program and community sing at the Organ Pavilion were completed yesterday; ceremonies will be under auspices of War Camp Community Service; Wallace Moody will be song leader.

July 6, 1919, San Diego Union, 9:3-4. Miss Annie Broderick, mezzo-soprano, to sing Sunday at Organ Pavilion.

July 8, 1919, San Diego Union, 9:1-3. City publicity campaign launched yesterday at meeting of drive for a fund of \$200,000 with which to advertise San Diego in the Midwest after completion of San Diego and Arizona Railway.

July 11, 1919, San Diego Union, Classified, 9:4. Park Board turned down request of Cecil De Mille for aviation landing place at Balboa Park; De Mille is thinking of extending a commercial air route to San Diego; Commissioner Forward said the Commission might reconsider when aviation becomes a more stabilized commercial industry, under government control of air routes.

July 13, 1919, San Diego Union, 13:4. Irving Gill designs duplex apartment for Louis J. Wilde in Coronado (sketch).

July 13, 1919, San Diego Union, Society and Club, 3:4. John Doane, organist, to be heard at Organ Pavilion today, assisted by Mrs. Lolita Rowan, contralto.

July 15, 1919, San Diego Union, Classified, 9:4. Dr. Stewart back from vacation; will be heard at Organ Pavilion today; during his absence organ was cleaned and regulated.

July 15, 1919, San Diego Union, 10:4-5. John Doane played to large audience at Organ Pavilion last night.

July 20, 1919, San Diego Union, 4:6-7. Luella K. Hedges, secretary, San Diego Humane Society, writes letter complaining about small quarters for large animals at zoo and urging contributions to erect better quarters.

July 20, 1919, San Diego Union, 13:1-3. New houses at Naval Air Station here picturesque Spanish features; designed by Bertram Goodhue, New York architect; erected by Lange and Bergstrom; 17 buildings to house officers, men and equipment; construction cost \$1,250,000 (feature article).

July 21, 1919, Letter, Executive Secretary, Board of Park Commissioners, to Commanding Officer, Marine Barracks, Balboa Park San Diego, Cal.

Dear Sir:-

Complying with your request, the Board of Park Commissioners has directed that a permit for use of the San Joaquin Valley Building as a shooting gallery be issued to you, and authority for such use I herein contained.

Permission is given for the cutting of a hole in the floor of this building, 20" by 72".

This permit is conditioned upon your acceptance of the following terms:

- (1.) That no alterations or repairs be made except under supervision of the park superintendent.
- (2.) That the said buildings shall be returned in as good condition as when you received them.

Very truly yours.

July 25, 1919, San Diego Union, 4:3-4. San Diego Museum Notes

The Balboa Park Board has turned top floor of Sacramento Building over to San Diego Museum Association, to be converted to art studios. Federation of State Societies and girls' division of War Camp Community Service are considering making their headquarters in association with the museum. About a dozen clubs and societies already have been provided with meeting places and lecture rooms by the museum.

July 25, 1919, San Diego Union, 11:1. Harold Ostrom, baritone, to sing at regular Sunday concert presented by civic music committee of the War Camp Community Service.

July 26, 1919, San Diego Union, Classified, 9:3. Exercises for Czecho-Slovak soldiers now stationed at Camp Kearny will be held tomorrow afternoon at 2 o'clock at the Organ Pavilion.

July 27, 1919, San Diego Union, 7:3. Czecho-Slovak soldiers to sing of glories of new country at Organ Pavilion.

July 28, 1919, San Diego Union, Classified, 9:2-3. Two republics glorified in songs of Czech heroes; 5,000 Americans attend celebration at Spreckels organ; native tree of Bohemia planted; bronze memorial unveiled to commemorate visit of soldiers.

July 29, 1919, San Diego Union, 5:2. Official program for entertainment of Secretary Josephus Daniels and Pacific fleet at San Diego, August 6-8; sailors to picnic at Balboa Park August 8; address by Secretary Daniels at Organ Pavilion; recital in evening; dancing of enlisted men on Plaza de Panama.

July 30, 1919, San Diego Union, 4:6. READERS' VIEWPOINT: F. A. Binney wants canyon close to Laurel Street bridge to be utilized for zoological garden; complains about ducks and geese now cooped up in a small cage with a bucket of water on west side of park.

August, 1919, California Garden, Vol. 1, No. 2. Park Department Notes by J. G. Morley, Superintendent of City Parks.

The park system of San Diego has an area of approximately 2,000 acres, which comprises Balboa Park, 1,400 acres; Torrey Pines Park, 290 acres; Soledad Park, 118 acres; Collier Park, 65 acres; La Jolla Park, 5 acres; Mission Hills Park, 5 acres; Mountain View Park, 15 acres, and a number of smaller areas set aside for Park purposes some of which have been improved, namely New Town Park and the Plaza.

Balboa Park lies practically in the heart of the city. Few large parks being located so conveniently for the use of the public. The topography has a more varied character than that of any other park so situated. The beautiful views of the mountains, bay and ocean are unsurpassed by any city.

It has been and should in the future be the policy of the Board of Park Commissioners, in the further enhancement of the landscape development of the Park, to leave large areas in their natural state, including nearly all the small canyons and large areas on the mesas, preserving all the native shrubs and wild flowers during the Spring season and in the summer the grayish color of the foliage during the war, dry weather.

In other sections of the Park development should be along general Park lines, such as the planting of trees, shrubs and flowers, large expanses of lawn with open vistas, keeping in mind the finest views when the improvements are made, so they are not infringed upon, with waterfalls and small lakes in some of the canyons, constructed and planted to give a natural effect.

Ball fields, tennis courts, bowling greens, golf courses, picnic grounds, etc. should be installed so that the people of the city may reap the full enjoyment of the park. This treatment should be followed in all parks where there is room for those features of enjoyment.

The building of a fine system of roads, trails and bridle paths to wind around the hills and on the mesas would make them inviting to the people to enjoy, whichever they care to use.

The climatic conditions of San Diego are excellent for park developments as nearly all the world may be drawn upon to provide suitable trees, shrubs and flowering plants and bulbs, a boon that few cities enjoy. Australian, New Zealand, South America, China, Japan and South America furnish a large number of the variety of trees, shrubs and flowers that are used in the development of the park system, as well as the native varieties of the United States and Europe. At the present time we are experimenting with varieties that we received from the Government collectors in Foreign countries.

Torrey Pines Park will always be noted as the native habitat of the Torrey Pine. This tree is found only at this place and an adjoining area, the property of Miss Scripps of La Jolla, and should by all means belong to the Park system as the finest trees grown on that area. The rugged character of this park is one of its chief points of beauty and the views obtained from the hills and cliffs along the ocean are unsurpassed.

Realizing the importance of this park, the Park Commissioners are having plans made for a caretaker's residence and also providing for the furnishing of refreshments and other necessary accommodations for visitors, to be created when funds are available.

The cost of improvement in the San Diego Park Commissioners are having plans made for which, in nearly all sections is underlain with hardpan, necessitating the use of powder and dynamite before planting can be done. The results obtained, I believe, had proven a success, which is attested by the growth of the trees and shrubs.

During 1914, ten tons of 40 percent dynamite was used. This does not include the large quantity used in the Exposition grounds. This gives you an idea what we have to contend with in our park improvements.

Since January 1, 1912, 285,092 trees and shrubs and 969,556 flowering plants and bulbs have been planted. This does not include these that were planted in the Exposition grounds prior to 1915.

The fine Stadium in Balboa Park is a feature not possessed by any other park system in the country. It is one of the centers of attraction, and is in continual used by the High School and others for athletic games, baseball, football, etc. Eight hundred and ninety six games were held during 1918, including 824 for practice and 72 scheduled games and events. For the first time the Stadium was self-supporting during 1918.

During 1917-18 the Board of Park Commissioners have had a very active part in providing facilities for the Army and Navy. The occupancy of the main buildings and the Exposition grounds by the Naval Training Station, the State section by the Marine Corps, and the North section by the 21st Infantry entailed a great deal of extra work for the Commissioners and the administrative forces. Every courtesy possible was extended to each branch of the Government. Flowers were furnished by the Commission to all Army and Navy hospitals twice a week and to Camp Kearny once a week. The Commission also furnished thousands of plants to the various camps so that they could be made more homelike and cheerful, and I feel sure that the efforts of the Commission have been appreciated by the officers and enlisted men.

Expenditures in the Park Department from January 1, 1912 to January 1, 1919, amounted to \$864,970.04. This includes the Bond funds for general park improvement and the building of the Stadium, but does not include the Exposition grounds prior to 1915. The following is the amount expended each year:

1912	\$ 73,743.86
1913	84,544.94
1914	235,124.97
1915	129,523.51
1916	139,124.81
1917	104,477.95
1918	118,679.66

The chief income of the department comes from the tax levy, not less than 8 cents or more than 12 cents on the \$100.00 valuation, which this year will provide about \$91,000.00. Other sources of income will probably bring the total to about \$100,000.00.

I believe the people generally appreciate the efforts of the Park Commissioners to develop the park system, which in a few years will be the equal in beauty of any city of its size in the country.

August, 1919, California Garden, Vol. 11, No. 2, 7. The Formal Garden, Balboa Park, by Fidella G. Woodcock.

While the beauty of the hills invited to fresh inspiration in the nearing heat of summer and the mountain springs are doing their best to enrich the wastes of soil with new bacteria from air and earth, and life itself seems to each of us but a handful of germs consuming, vying with one another for supremacy, the time is here to look within our four square to wipe out the microbes most hostile to well being.

The formal garden, truly designed to display the perfect relation of the individual plant or flower to the whole, gives plenty of scope for a sense of fitness in working out space and color values.

The hardy Pentstemon, perhaps the most interesting of bedding plants at this season, especially Pentstemon gloxinoides, in a depth of green, surpasses all the year around the perennials that we can hardly name or even count. In nature, in the wild, the Pacific coast is rich in beautiful Penstemons, a type that is brought down from the high coast latitudes to a space within our parks and landscapes for shapely growth.

Penstemons: - five stamens suggest other flowering plants denoted by beautiful stamens, the golden Hypericum, the fringe tree, the bottle brushes, so closed allied to the red-flowered eucalyptus of our park avenues at this season, and the veronicas with their background of evergreen acacias.

But speaking of the background effect gives a touch of reality to the subject of the Formal garden in Balboa Park at the Southern California Counties Building. The upper walk is lined with some of the most graceful forms of horticultural interest, the conifers.

Cupressus torulosa, *Chamaecyparis pisifera* var. *plumosa-aurea*, a group of *Cryptomeria japonica*, the Japanese redwood, and on the opposite corner heavily fruited cedars, *Thuja*.

Shading the walk on each side are combinations of the desert gum, *Eucalyptus rudis*, with several variations and the hickory gum, *Eucalyptus punctata*, known commonly as "Leather Jacket," added to the Mediterranean pine. *Pinus halepensis* in the corner. The principal avenue tree of this section is *Sterculia diversifolia*, now in bloom. This species is often erroneously called "the bottle tree," which is really *Sterculia rupestris*, that has trunk well rounded at the base. Both are related to *Sterculia acerifolia*, the flame tree at Mission Cliff Garden, so brilliant with scarlet flowers in the spring time before the foliage appears.

A few of the acacias are represented in the southeast corner. *Acacia retinodes*, a narrow leafed form, now in bloom, whose seeds have a red rim as distinguished from *Acacia neriifolia*, that is very similar, having a white band around the seed. These, with *Acacia Baileyana*, the favorite and prolific acacia of the drives, so well known throughout the south are all evergreen.

For simple economy the lavish wealth of the formal garden is lost without its well-trimmed borders of box and classic myrtle, *Myrtus communis*, used by the ancients to make wreaths for the victors, worn, too, as a mark of distinction of the chief magistrates at feasts served there. And the aroma of the leaves and fruit makes it of commercial importance in the manufacture of perfumery.

In trimmed hedges a small leafed myrtle is mingled with the classic form. It is *Myrtus microphylla*, a diminutive growth with long pointed leaves. But in order to preserve the true relations of color effect repetition of the same plants differently arranged is not only desirable but essential to composition. Distinct geometrical lines often overbear with rigid outlines. A contrast of over arching branches as of *Cotoneaster pyracantha* and *Duranta plumieri*, a happy combination of verbena-like, violet flowers and fruit that gives it the appropriate name of the golden dewdrop and its metallic hue and green, often variegated with white foliage, form a blend with other under shrubs and border annuals. In the way of familiar names the Spanish broom, the genistas, and the virburnums more has already been said than I can give in one months calendar. The legendry of the flower calendar sometimes overflows with rare and farfetched imagery. Still in the heart of all things, there is a likeness, the analogy, that makes harmony complete.

August 1, 1919, San Diego Union, 5:1. Preparations are being made at the U. S. Naval Hospital, Balboa Park, to receive the sick officers and sailors in the new Pacific fleet when it arrives in San Diego. It is expected that there will be several hundred out of the 20,000 men who may need medical attention at the end of the long voyage from the Atlantic coast to this city.

At present there are less than 100 patients in the Naval Hospital, these being from North Island, the radio station, and the various ships in the harbor. The hospital will accommodate 500 patients, wards being arranged for officers and enlisted men.

August 1, 1919, San Diego Union, 16:1. Association for Advancement of Colored People will entertain at Organ Pavilion tomorrow afternoon; Dr. Edgar Hewett, San Diego Museum, will give principal address.

August 2, 1919, San Diego Union, 5:7. A judgment of \$8,700 obtained in 1915 against the Panama Canal concession company at the Exposition yesterday was reaffirmed against a number of Orange and Los Angeles county stockholders.

August 2, 1919, San Diego Union, 11:2. Mrs. Andrew Thaanum, soprano, to sing at regular Sunday recital at 4:30 p.m.

August 5, 1919, San Diego Union, Classified, 9:5. Preceding Secretary Daniels' address a half-hour concert will be given by the great outdoor organ and the Coronado tent city band.

August 5, 1919, San Diego Union, 10:6. San Diego Municipal Golf Club planning to construct nine new holes, improve the entire course, and build a new club house on the site in Golden Hill Park; architect William Templeton Johnson has prepared plans for club house without cost; new members to pay \$10.00 each; present members will pay 1920 dues in advance; donations will be sought and city will allot money.

August 6, 1919, San Diego Union, 4:4. READERS VIEWPOINT: William R. Moore wants the long canyon leading down near Florida Street to where the sandy but little used road intersects the boulevard near the stone bridge turned into a drive affording passage through the park to University Avenue (Powderhouse or Florida Canyon).

August 7, 1919, San Diego Union, Fleet Edition, 3:1-8. Photograph of sailors at review during war at Plaza de Panama.

August 8, 1919, San Diego Union, 7:3. Big dance on Plaza de Panama last night for visiting sailors.

August 9, 1919, San Diego Union, 1:8, 4:3. Secretary of Navy Josephus Daniels spoke to 25,000 persons at Organ Pavilion last night; introduced by Governor W. D. Stephens; entire speech given; conclusion: "I have no doubt that as the American people mobilized for war and won it, won it by faith and sacrifice, that we have highly resolved that the fruits of that war shall be garnered, and the covenant of peace shall give to America and to the world a peace that shall bless us and all future generations."

August 9, 1919, San Diego Union, 5:6. Mrs. Daniel visits bluejackets at Exposition and is entertained at home of Mrs. Claus Spreckels.

August 9, 1919, San Diego Union, 6:3-6. Photographs of Pacific fleet sailors picnic in Balboa Park; basket picnic provided by War Camp Community Service; held on Sixth Street entrance extending from Kalmia some distance past the Exposition entrance on Laurel; military band supplied music.

August 10, 1919, San Diego Union, Society and Club, 1:1-2, 3:4. Mrs. Daniels given reception and tea in board rooms at California Building, Balboa Park, Thursday afternoon; Spanish dancers and musicians of old Exposition brought here from Los Angeles for occasion.

August 12, 1919, San Diego Union, 11:3. State societies plan big picnic next Saturday at Balboa Park; it is estimated that most of 15,000 members will attend; Science of Man Building will be used for registration room; program of speeches will be given in auditorium of Indian Arts Building; basket picnic at Pepper Grove.

August 14, 1919, San Diego Union, 5:2. A real tractor demonstration at the park's Model Farm is one of the features arranged for the county fair.

August 15, 1919, San Diego Union, 5:3. Fifty five members of Massachusetts Forestry Association examined grounds, trees and shrubbery at Balboa Park yesterday.

August 16, 1919, San Diego Union, 8:2-5. State societies will picnic at Balboa Park today.

August 17, 1919, San Diego Union, 4:5-6. "Get Together" basket picnic in Balboa Park made occasion for declarations of faith in California and San Diego.

August 17, 1919, San Diego Union, 7:5. Bi-monthly "Community Sing" to be held at Organ Pavilion this afternoon.

August 18, 1919, San Diego Union, 1:8, 7:3. One million dollar Naval Hospital at Balboa park is assurance from Washington; 15 acres required from city; site selected for proposed building on Inspiration Point must be donated by San Diego as a first step; Council to consider matter today; tentative plans for structure will be submitted to Secretary Daniels upon his return to national capitol; hospital will be between 300 and 500 beds;

30 patients were removed from the various ships to the present hospital in Balboa Park when the fleet was in; expect approximately 200 patients a month when the entire fleet is mobilized on Pacific coast.

August 19, 1919, San Diego Union, 14:1-2. Council is prepared to deed lands asked by government; gist of answer to Daniels; proposed transfers include sites for navy yards, repair stations, piers and 18 acres in Balboa Park for Naval Hospital; Congressman Kettner appeared before Council yesterday to expedite matters.

August 30, 1919, Letter, Executive Secretary, Board of Park Commissioners, to Congressman William Kettner requesting Kettner to exert his influence to expedite payment of Park Department claims of \$5,085.24 to cover repairs and replacements of buildings and grounds against U. S. Navy; agreement approved by Secretary of Navy, June 1919 (Board of Park Commissioners, Box 1, A-R - 1919, San Diego Public Library).

September 3, 1919. Seventeen acres deeded to United States Government for a Naval Hospital in Balboa Park.

September 4, 1919, San Diego Union, 4:3-6. Seven glorious day seeing San Diego. 2nd Day: Balboa Park ant the City, by Publicity Bureau, San Diego Chamber of Commerce.

Buffalo, deer, lions, bears, monkeys and a large variety of all animals are housed in different parts of the park.

September 5, 1919, Board of Park Commissioners, Letters (?), Minutes (?). Control of Municipal Golf Course reverted to City Park Department; all money from sale of tickets to be turned over to the Executive Secretary and receipts checked.

September 6, 1919, San Diego Union, Classified, 9:4. John Francis Barron, U S. N., will sing a group of his songs at the Organ Pavilion on Sunday afternoon. Barron was a member of the crew of subchaser 287 when it suffered a serious explosion in the harbor some weeks ago and his life was despaired of at the time.

September 7, 1919, San Diego Union, 8:3-4. San Diego with naval improvement in prospect destined to become home of Pacific fleet.

September 7, 1919, San Diego Union, Society-Club, 6:4. County Fair offices moved to International Harvester Building in Balboa Park.

The offices of the county fair have been moved out to Balboa park and are in the International Harvester building. The carpenters have completed their work in several of the buildings to be used, and the main building which will house the local industrial and mercantile exhibits will be ready for installation of booths tomorrow or Tuesday.

September 8, 1919, San Diego Union, 5:6. \$102,444 raised to purchase site for naval base; fifth day of drive for funds.

September 9, 1919, San Diego Union, 5:1. Plans for hospital announced; dozen of more buildings of Spanish architecture to go up in Balboa Park at cost of about \$2,000,000; announcement yesterday by Bureau of Yards and Docks; plans and specifications being drawn by Commander Frederick W. Southworth of the Bureau of Yards and Docks, who is project manager of naval hospital; the architectural drawings are being drawn by Bertram Goodhue, famous New York architect.

September 12, 1919, Board of Park Commissioners. The Executive Secretary submitted a form of permit authorizing the Balboa Aviation Company to use the Infantry drill grounds as a flying field during such period as use of the field should meet with the approval of the Board; authority to sign and issue same was granted.

September 14, 1919, San Diego Union, 5:1-5. Complete resume of naval work on San Diego harbor.

September 14, 1919, San Diego Union, Society and Club, 3:4. Floral Association will hold annual flower show as part of County Fair in Balboa Park.

September 14, 1919, San Diego Union, 5:4. Miss Inez Anderson, contralto, will be heard Sunday at Organ Pavilion.

September 16, 1919, San Diego Union, 9:3-4. Stadium will be open to all alike when President Wilson speaks to San Diego; executive committee of Chamber of Commerce to make no reservations.

September 17, 1919, San Diego Union, 1:6-7, 5:3-4. President will be heard by largest crowd here; Magnavox will enable packed Stadium to get every word of Wilson's speech Friday.

September 18, 1919, San Diego Union, 1:2-3, 2:5-6. Half-holiday is set to honor President; Mayor issues proclamation; plans to escort Mr. Wilson into city; throngs to greet executive on Broadway and at Stadium.

September 19, 1919, San Diego Union, 1:8, 5:2-3. Stage set for grand reception.

September 20, 1919, San Diego Union, 1:1-2, 5:3. More than 50,000 hear President Wilson defend League of Nations; features of his entertainment were a visit to Exposition grounds, a dinner at the U. S. Grant Hotel, and a reception in the hotel lobby.

September 20, 1919, San Diego Union, 6, 7. Largest audience of entire tour greeted President Wilson when he spoke to 50,000 persons at Stadium.

September 20, 1919, San Diego Union, 6:1-2. President and Mrs. Wilson Hear Spreckels Organ in Brief Stop On Way to Stadium Gathering

A **Union** reporter and three other persons got a close-up view of President and Mrs. Wilson when the car in which they were riding yesterday afternoon slowed down at the Spreckels Organ Pavilion in Balboa Park for a moment for the President and the first lady of the land to hear the piece being played by Dr. Humphrey J. Stewart, official organist.

The reporter would have got closer but was waved back by one of the street service men, who stepped from the running board of the car saying:

"Some power in that organ," with a look that meant, "Don't go any closer to the President."

The official car started and the secret service man ran back to his place on the running board.

It was not generally known that the President's car would stop at the great outdoor organ, and, anyway, practically the entire population of the city was gathered at the stadium awaiting his arrival there.

Dr. Stewart, however, had been notified by the committee in charge of the arrangements for the automobile ride through the park that the President and Mrs. Wilson would be there.

As soon as he saw their car approaching he began to play "Pomp and Circumstance," a military march by Edward Elgar, and the tones of the great organ were heard by members of the party long after they had passed through the Plaza de Panama.

September 20, 1919, San Diego Union, 6:7-8. President's automobile lost for time in mazes of Balboa Park on journey to Stadium.

September 21, 1919, 8:2-3. County Fair to be ready for opening on Wednesday, September 24; hundreds of workmen and decorators putting things in readiness for throng of visitors expected; Human Ad parade to be feature of opening night.

September 23, 1919, San Diego Union, 5:1. Fund for Navy site climbing; reports at noon meeting show more than \$6,000 added by day's work; "it must be done" is motto.

San Diego must raise \$250,000 to donate the site for the naval training station. \$156,834 raised to date.

September 23, 1919, San Diego Union, 5:2-4. Carnival spirit to reign on opening night of San Diego's first annual county fair; full program during day; public may enter grounds at 9 a.m. tomorrow; stock prizes to be awarded.

September 24, 1919, San Diego Union, 9:2-3. Exhibits at county fair open today; range from white mice to tractors; everything in readiness in Balboa Park for annual event; formal addresses 8:30 tonight by Mayor Wilde, Supervisor Foster and President Drinkwater; educational department to present interesting feature; open-air dance.

September 25, 1919, San Diego Union, 5:2-3. Educational exhibit shown by beekeepers.

Mr. Hanson said yesterday: "Be sure to visit this section in Building No. 10 and do not hesitate to ask questions on any phase of the industry in which you may be interested."

September 25, 1919, San Diego Union, 5:1. County Fair furnished Rotary luncheon motif at the U. S. Grant Hotel today.

The Rotary Club will assist in making the county fair a success by presenting Miss Ellen Beech Yaw in concert in the Commerce and Industry building. An admission of 50 cents will admit to the Fair and concert as well.

September 25, 1919, San Diego Union, 5:2, 7:4. Thousands throng grounds at opening of county fair; County Supervisor Joseph Foster says, "the grandest fair that San Diego ever held."

A crowd variously estimated at 7,000 to 10,000 saw the opening of the first big fair last night.

A public dance, open-air music in several parts of the grounds, the crowded exhibit buildings, addresses in the Merchants' and Manufacturers' building, the human parade and many other things kept the big crowd entertained until well along toward midnight.

The building that, during the exposition was the Home Industries building, has been appropriately changed in name to the Merchant's and Manufacturers' building temporarily.

Agricultural and horticultural exhibits of a general character showing samples of produce from all parts of the county fill the old Cristobal café.

Farther down the drive and in another building are competitive exhibits of numerous varieties of chickens, turkeys, geese, ducks and rabbits.

In a separate building --- the old International Harvester building --- the various branches of the San Diego farm bureau hold forth.

The livestock pens and stalls are in the tractor sheds of exposition time, at the northern extremity of Alameda drive -- rechristened Pumpkin alley.

September 25, 1919, San Diego Union, 5:3. Will play new fox trot at County Fair dance tonight and Saturday night.

On both occasions handsome silver Olive Thomas cups will be presented to the winning couples by Myron Selznick, president of the Selznick Feature corporation.

September 26, 1919, San Diego Union, 5:1-2. Second day of San Diego County Fair big success; educational exhibit, feature; teachers of lower grades use grounds as schoolroom where exhibits furnished instruction and entertainment for classes; livestock displays attract attention; other sections come in for share; Rotary program tonight.

Of the numerous exhibits in the Merchants and Manufacturers' building, so many might be called especially good that it is impossible to describe or even list them all. One that holds an interested

crowd is not a mercantile or manufacturing exhibit, but shows the result of carelessness with regard to fire on the part of campers. It is produced by representatives of the U. S. Forest Service.

September 26, 1919, San Diego Union, 5:3, Weather Bureau set up at Fair; H. F. Alciatore denies his weather gauge is fireless cooker and will explain all about it.

September 27, 1919, San Diego Union, 2:2-4. Farmers say County Fair will be made annual event; President Drinkwater calls conference and all favor repeating show yearly; gates will be closed after tonight; estimated 10,000 visited grounds yesterday, which would bring the total for the three days close to 18,000.

September 27, 1919, San Diego Union, 4:5-6. San Diego Museum Notes.

September 28, 1919, San Diego Union, 5:4-5. County Fair is brought to close with real bang; ringing of bells, blowing of horns mark ending of exhibition; masked dancers hold sway; all pleased and enthusiastic for another in 1920.

September 28, 1919, San Diego Union, 11:3-4. Block campaign drive in naval base fund is ended; subscriptions to continue; \$177,925.50 raised to date.

September 29, 1919, San Diego Union, 6:4. New firm ready to rush work on U. S. Marine post; W. P. Haskell of Federal Construction Company says forces have been reorganized; work in constructing the group of six permanent barracks is now nearly five months behind schedule due to the financial and other troubles in which the Dawson Company became involved.

September 29, 1919, San Diego Union, 6:4. Brigadier General J. H. Pendleton, U. S. M. C., comes to assume command of the new created Pacific coast brigade of marines and will establish headquarters at San Diego.

September 29, 1919, San Diego Union, 5:5-6. County Farm Bureau heads work for fair next year; officers feel that festival just ended was so successful that all efforts should be made to repeat it during years to come; 33,000 entered gates.

October, 1919, Board of Park Commissioners, Superintendent's Report. During the month the San Diego County Fair was held in the Exposition grounds and was well attended, there being over 40,000 paid admissions. The percentage of the Park Department amounted to \$612.50.

October 7, 1919, San Diego Union, 1:1, 4:3-7, 5:5. Mayor Wilde offers his resignation providing George W. Marston be appointed by the Council as his successor; Marston declines post.

October 10, 1919, San Diego Union, 1:4, 5:1-4. The Grant Exalted Ruler of the Elks pledged undivided allegiance to United States in meeting at Organ Pavilion last night; Elks holding convention in city.

October 18, 1919, Letter, Executive Secretary, Board of Park Commissioners, to Secretary-in-charge, Y. M. C. A. requesting footballs and baseballs not be issued for use on the Plaza de Panama to protect city property and persons who visit the park; light gloves and windshields of passing machines have been broken and several people have been struck by balls (San Diego Public Library, Box 1, S-Z, 1919).

October 23, 1919, San Diego Union, 9:1. Ellen Beech Yaw, soprano, will sing at Organ Pavilion, November 2.

October 25, 1919, San Diego Sun, 10:4. San Diego will honor the memory of Theodore Roosevelt tomorrow with exercises at the Organ Pavilion in Balboa Park.

October 26, 1919, San Diego Union, 8:2-3. Plans to celebrate Red Cross Day at Organ Pavilion next Sunday.

October 26, 1919, San Diego Union, 11:3. War Community Service, aided by patriotic bodies, will honor memory of Theodore Roosevelt at Organ Pavilion today.

October 27, 1919, San Diego Union, Classified, 9:2-3. War Service Organizations pay honor to Theodore Roosevelt.

October 29, 1919, San Diego Sun, 11:1. Frank H. Ehmke appointed temporary superintendent of playgrounds; certified today by Civil Service Commission; position made vacant by resignation of Captain James L. King.

October 29, 1919, San Diego Union, 1:1. Prohibition Act becomes law; Senate passes dry bill.

November 1, 1919, San Diego Sun, 14:3-4. Will build new homes for animals in zoo; work begins at once.

A new home for the animals at the Zoo will commence at once.

Three big bear pits are to be constructed in Cabrillo canyon just as soon as the plans can be drawn and the work started. According to Dr. Harry Wegeforth, president of the San Diego Zoological Society, at a recent meeting of the board of directors, the society decided to spend the \$1300 on hand for construction of the bears' new home, which is needed most, and it is hoped money can be raised to provide better quarters for the other heavy animals belonging to the zoo when the bear pits are finished.

It was at first contemplated to use this money to have drawn up a comprehensive, forward-looking plan for a zoological garden, the equal of the finest in the country, and which it was expected would be built in installments covering a number of years. A skilled landscape artist was to have been employed to lay out the gardens in the canyon above Cabrillo bridge. Limited funds and urgent need of safer quarters for the bears forced the directors to abandon this plan and use what money is now on hand to construct the bear pits.

The bear pits will be built in the canyon just below the building in Balboa park where the animal exhibit was held during the county fair. They will follow natural conditions as nearly as possible in design, and will be in the bottom of the canyon so that the bears may be viewed from above, according to Dr. Harry Wegeforth, president of the society.

Caesar, the Alaskan Kodiak bear cub, has grown so huge and powerful that he frequently stands up and playfully pushes the roof of his cage. His present weight is about 1400 pounds and being the kind he is, will grow to tremendous proportions. At birth Caesar weighed eight ounces and when the society secured him, he was a meek little fellow with playful ways. He was brought here from Kodiak island on a government vessel and while still a sailor Caesar made a practice of running down the gang plank and crowding off into the water those who happened to be on it. He wasn't mean about it. But there wasn't room for men and the bear and it didn't occur to Caesar to give anyone else a chance. He is one of the very few Kodiak bears in captivity and San Diego is fortunate to have so fine a specimen. It is said there are but six species of Kodiak bear known and that it is impossible to tell the difference between them until the bears are killed and dissected. Caesar will soon have a roomy pit in the canyon and an opportunity for expansion and growth.

While it is the policy of the Zoological society to keep only those animals who require the kind of climate found in San Diego, yet the polar bear has been retained because he has thrived. He has gained 40 pounds since the society acquired him. This bear has traveled all over the world and is one of three survivors of a group of ten polar bears owned by the Hagenbeck circus. Most of these bears were killed because they turned vicious and unsafe. The white bear here has so far adjusted himself patiently to the circumstances and is tractable enough. His pit will include a large tank of cold water in which to disport himself. The third bear will accommodate the two other bears owned by the society.

Probably no animals at the Zoo attract so much attention as the white and black spider monkeys. "Jerry," the little black fellow, has become a San Diego institution. The antics and accomplishments of this pair is the constant delight of the children and old folks too. They all fall for them. It is a treat to watch the white monkey hang suspended by his hands and feet and thrust the long prehensile tail through the wire of his cage to accept peanuts. The tails of these monkeys are useful as a fifth hand. Prohibition means nothing to Jerry's young life. When he wants the joy of feeling indefinite and dizzy, he hangs by his tail from the ring and spins himself around with his hands until the desired degree of "jag" is attained. Then he lets go and waltzes giddily about the cage. Shame on you, Jerry.

San Diego Zoological society is patterned after the Bronx Zoological society of New York city. All animals, birds and snakes collected become city property. The city contributes \$200 a month to support the inhabitants of the Zoo. Money that is contributed is applied to the fund for building a permanent home for them in Balboa park.

Dr. Harry Wegforth is president of the society, F. M. Faulconer, secretary; Joe Sefton, treasurer; and the directors are Frank Stevens, William Moore and Dr. Fred Baker.

November 3, 1919, San Diego Union, 16:1. Ellen Beech Yaw saw to large audience at Organ Pavilion yesterday afternoon.

November 4, 1919, Letter, John Morley, to Mr. Theodore Wirth, Supt. of Parks, Minneapolis, Minn.

Dear Mr. Wirth:-

Your letter as to auto tourists camping grounds received. We furnish camping grounds for autos free of charge. A section of the Park has been set aside for the purpose and equipped with water and toilet facilities.

We are later going to furnish fire places and wood from the trimmings of the trees in the Park Department and charge a nominal price for the service, probably 25 cents to 50 cents per day according to the number in the party, so we can make the camp self-sustaining with a man in charge.

We average 15 machines a day and we have as many as 58. Some stay one day and others for several days and we have had parties stay for a month.

At one time the Hotel Association protested to the Commission, as they claimed it took business away from the Hotels. They have, however, changed their minds and find from experience that auto parties who camp out do not patronize the Hotels.

I believe camping grounds should be provided as it is an inducement for auto parties to stay over a few days in the city and they are bound to spend considerable money even though they do not stay at Hotels.

Yours very truly,

November 25, 1919, Letter, Executive Secretary, Board of Park Commissioners, to Mrs. A. B. Spreckels, 2080 Washington Street, San Francisco, Calif.

Dear Madam:-

By direction of Mr. John Forward, Jr., of the Board of Park Commissioners, I am enclosing herewith photographs of the New Mexico State Building in Balboa Park.

The structure is in excellent condition and subject to being made a permanent building at comparatively small expense.

It is one of the most artistic and beautiful bits of architecture in the park, and I regret that I am prevented from securing photographs of the courtyard, chapel and other attractive features by reason of the fact that the premises are occupied by the U. S. Marine Corps as a supply depot.

If you should desire information regarding amount of space, size, number and location of rooms, we shall be very glad to have floors plans made and forwarded to you.

Very truly yours,

December 13, 1919, San Diego Sun, 17:3-5. Caesar will have new home in canyon; big bear pit is nearing completion (Sketch drawn by **The Sun's** staff artist showing the new bear pit as it will appear when it is completed), by Wallace Hamilton.

The new bear pits and cages which the San Diego Zoological society is building in Cabrillo canyon will be as fine as any in the country, according to Dr. Harry Wegeforth, president of the society. Construction was commenced several weeks ago, and Mead and Requa, architects, promise that the bears' new home will be ready for them with six weeks.

San Diego now has an unusually fine collection of bears. The need of adequate quarters for them has been felt for a long time, but until recently a lack of funds has made it impossible for the society to build. The den, which is under construction, includes three pits and three cages of ample dimensions. It is so built as to allow visitors a splendid view of the bears without the slightest personal danger. Moreover the natural conformation of the canyon has been considered in laying out the pits and cages, the result being very realistic.

Caesar, the great Kodiak bear, will occupy one cage and pit alone. This splendid example of the Bruin family is the largest meat-eating animal in captivity. He has grown so in size that his present cage of board and iron bars will scarcely hold him. At maturity Caesar will weigh almost a ton [2,240 pounds]. The polar bear, belonging to the society, will also occupy a cage by himself. Contrary to expectations, this animal, whose natural habitat is the snow and ice country in the north, has thrived here. The California black bear and his cousin, the brown bear from Canada, will occupy the third pit and cage together.

The building of the bear pits is a part of a comprehensive plan contemplated by the society to construct in Cabrillo canyon a zoo that will be second to none in the country. This, of course, is looking far into the future, but the society feels that a definite building program commenced now and accomplished as funds permit, will effect a saving of money and effort in the long run. At the present time insufficient funds are in the possession of the Zoological society to complete the bear pits. Money in small amounts is being contributed, however, and it is hoped that enough will be accumulated by the time the pits are complete to pay for the work. The shortage at present is about \$200.,

Joe Mutters, keeper at the Zoo, is enthusiastic about the new home for his bears. But he wants to see his lions properly caged when the bears have been cared for. The only way this can be accomplished will be through donations of loyal San Diegans and such funds as the society may raise by public entertainments. There have been so many calls for money here of late that the society has kept in the background. But the need of permanent quarters for the animals is very great.

The bear pit under construction is situated in an arm of Cabrillo canyon at the eastern end of the Tractor building. The back wall, made of heavy concrete, is roughly 75 feet long. The north wall, which follows the contour of the slope, is 73 feet in length. As the south wall is but 42 feet long, it will be seen that the den is roughly pear-shaped.

The inside walls throughout will rise eight feet sheer, topped by a 3-foot wall of chain wire. A cheval-de-frise of pointed steel bars, bent inward and down, will fringe the top of the wall to prevent the bears from climbing out or reaching persons behind the visitors' wall. Barb wire will be strung in such a manner above the chain-wire screen that thoughtless children cannot possibly climb into the pits.

It is an unusual feature of the bears' den that visitors may view the bears in safety while standing on the edge of the pits. An unobstructed view may be had from all four sides and with easy approach.

Cage doors will be automatically operated from the outside. The pools, which will be provided for the bears, may be filled, emptied and cleaned from the outside. In each cage a large lopped-off pepper tree is to be planted to afford amusement for the bears and to exercise their climbing powers. The pits may be drained and cleaned from the outside also.

December 15, 1919, San Diego Union, 2:1-2. Theater Arts Guild plans community theater in Balboa Park; hopes to secure room in Sacramento Building which is already partially fitted up for dramatic performances.

December 16, 1919, Letter, Arthur F. Wright to Board of Park Commissioners:

“It is my opinion that to lease a considerable portion of Balboa Park to ‘Denishawn’ would be merely to devote a portion of Balboa Park to private use, and the Board of Park Commissioners has no authority to do so.”

1920

January 1, 1920, San Diego Union, Annual Edition, 3:1, 6:3. Great outdoor organ typical of San Diego climate; concerts daily throughout year on magnificent instrument, by Humphrey J. Stewart.

Exactly five years ago today the great Spreckels organ at Balboa park was dedicated to the public. This magnificent instrument, together with the building, in which it stands, was the gift of Messrs. John D. and Adolph B. Spreckels.

In addition to the original gift of the organ and organ pavilion, John D. Spreckels has paid the salary of the organist from the inauguration to the present time, together with the salary of the resident organ tuner, whose services are needed every day in order that the instrument may be kept in proper condition.

The organ was formally presented to the people of San Diego on December 31, 1914, on the even of the opening of the Panama-California Exposition. The daily recitals commenced on the following day, January 1, 1915, and they have been continued regularly to the present time.

A series of organ recitals given daily and extending over five years is unique in the history of American music, and in fact I am not aware of such a record in any other country. The Spreckels organ has another distinctive feature --- it is the only outdoor organ in the world; nor is it likely that this unique distinction will ever be challenged, for climatic conditions would probably stand in the way of such an enterprise in any other city. No better testimony to the climate of San Diego can be given than the fact that postponements of concerts on account of unfavorable weather have only averaged nine days each year.

As I have had the honor to preside at the Spreckels organ in the capacity of official organist since its inauguration, I gladly accept the invitation of **The San Diego Union** to give a little information concerning the instrument and its use. Speaking generally, it may be said that the object of the generous donors was not only that of affording gratification to our music-loving people, but also to cultivate a taste for good music in the community by the daily presentation of high-class compositions. It will be seen, therefore, that the work of the organist is largely educational, and the daily programs must be judged from this standpoint rather from that of merely providing amusement and diversion by the performance of music of a popular type.

It will readily be understood that the preparation and performance of the daily program is a task of considerable magnitude. For example, during the year 1919, no less than 2,269 numbers were played. This record naturally includes a good many repetitions of favorite pieces, most of them by request; but by actual count, 1,174 compositions have been presented and of these about 200 have been played for the first time. The list of composers represented is too long for publication in this article, but it numbers 385, and includes names ranging from Bach (1685) to Debussy and others of the present day. Practically every composer of note is represented in the list.

I esteem it a great privilege to have had the opportunity of presenting these daily programs to the people of San Diego, for I know that the recitals have been of inestimable value in bringing the works of the great masters before the public. To most people the great men in music are merely a name or a tradition. In a vague way we know of these musical giants --- Bach, Handel, Beethoven, Mozart, Schubert and Wagner, to mention only a few --- but unless we have opportunities of hearing their works, the world of music is as a sealed book to us. Such opportunities are afforded by the daily organ recitals, which are growing in popularity as the taste for good music develops.

The Spreckels organ is one of the finest examples of the organ builders' art. It was built by the Austin company of Hartford, Connecticut, and it contains four complete manuals with 88 stops. Only those who have inspected a modern organ at close range can appreciate the truly wonderful mechanism by which its thousands of pipes are easily operated. I take this opportunity to inviting any of my audience to go over the organ after the daily recitals, and I shall be most happy to explain to them the details of this noble instrument.

Undoubtedly the greatest problem the recital organist has to solve is that of the choice of music for his programs, and a few words on the point may not be out of place, especially as the same question has arisen in every city wherein organ recitals have been established. Quite frequently the performer is accused of playing selections which are "over the heads of the people," to use a common expression. It is a curious fact that the eminent pianist, violinist or vocalist who presents a recital program may --- and does --- perform the works of the great masters without arousing hostile criticism. Only the organ recitalist seems to be the target for such comment; and just why this should be I confess I am at a loss to understand.

But there is another side to the question. The organist is compelled to bear in mind that a large number of his audience really do desire to hear good music, and they are quick to resent the introduction of mere "trash," such as may be found in the so-called "popular" music of the day. This tendency is indicated by the numerous requests received for high-class compositions; indeed it has been my experience that requests for special numbers are almost invariably along classical rather than popular lines. Of course, we are always likely to have with us the friendly critic who tells you he "knows nothing about music"; a fact which, if properly considered, ought to make him rather careful in criticizing. Still, this type of critic seeks to justify himself by stating that even if he knows nothing about music, "he knows what he likes." Now, having already informed you that he is ignorant of the art, with delightful inconsistency (and not a little self-conceit), he calmly assumes that the music that happens to please him must, of necessity, be the best not only for himself, but for others.

In this connection, a little experience of my own may not be without interest. A few months after assuming my duties at the Spreckels organ, a gentleman waiting on me at the close of a recital, and complained that the music he liked did not appear on my programs.. Not feeling quite clear as to his wishes, I suggested that he should draw up two or three specimen programs, thus giving me a definite idea of what he wanted. This he promised to do, and a few days later he called again. I asked him for the promised programs, and he said, "Dr. Stewart, I feel I owe you an apology. I thought it would be easy, but I find that I am unable to name enough pieces to make even one program." I ventured to remind him that I had to furnish not one, but 365 programs every year; upon which he renewed his apologies, but produced a slip of paper containing the titles of three of his favorite compositions. Turning to my record, which I have kept everyday since I commenced by duties here, I was able to prove to my friend that each of his selections had been played quite recently, and one of them on two or three occasions.

As I before remarked, the question is one of some difficulty, but I have found the best solution to be a system of "request" numbers. Anyone who wished to hear a favorite piece has only to send me a postal card giving the name of the selection and the date on which he wishes it played. As the programs are prepared three or four days in advance, allowance should be made for this in the date selected; but if this is not convenient the request may be handed in at the time of the recital, and if possible the piece will be played as an extra number.

It is perhaps needless to aid that music of the cabaret or dance-hall type will not be considered. Such pieces are really not music at all, and their performance would undoubtedly give offense to a majority of the audience. Those who prefer "music" of this kind will find no difficulty in gratifying their taste, for unfortunately such selections are always to be heard in public places; but to allow then on a concert program would be the equivalent of filling the bookshelves of a public library with dime novels or exhibiting comic supplements of the Sunday papers on the walls of an art gallery.

I am sure that all loyal San Diegans would deplore the presentation of programs which would certainly give a wrong impression of the musical taste prevailing here. It has often been a satisfaction to me to find my programs quoted in eastern musical papers, coupled with complimentary remarks as to the choice of pieces. In this way I know that the daily recitals have established the musical reputation of San Diego throughout the United States; and so long as I have the honor to preside at the keyboard of the Spreckels organ I shall endeavor to maintain this standard, believing that only in this way can for objects for which the instrument was dedicated be completely achieved.

January 1, 1920, San Diego Union, Annual, 6:1. Year-around beauty of City parks charms visitors; flowers and greenery glorify Exposition grounds; 1400-acre tract in heart of city is San Diego's pride.

January 1, 1920, San Diego Union, Annual, 6:5-6. Rare collection on exhibit in Balboa Park museum; display in Science of Man Building declared one of the most complete in world.

The San Diego Museum has been kept open every day since the Panama-California Exposition of 1915-1916. Its galleries are visited by not less than half a million persons every year. Its collections are known as among the most valuable in the world. The museum is restricted to the sciences of man --- anthropology, ethnology, archaeology and art.

The California Building, built, owned and maintained by the state, is by arrangement between the state commission and the museum association devoted to the museum of American archaeology. It also contains the museum library, the California reception rooms and executive offices. The Fine Arts building, built by the city and granted to the Museum association for the use implied by its name, forms part of an architectural unit with the State building, bearing the name of the California Quadrangle, a permanent, fireproof structure. It includes the main gallery, several small halls, stores rooms and the business office.

Fifteen Exhibitions Held

The museum has the beginning of a permanent art collection, and with the assistance of the San Diego Art guild, which has transferred its activities from downtown to the museum, the gallery is kept well filled. Fifteen exhibitions were held during the year and not less than 600 paintings were displayed.

The Science of Man building houses the collection of the same name, which is conceded to be the best of its kind in existence. One of the unique collections of the world. The building also accommodates the laboratories of anthropology and psychology, the latter including the child psychology department of the city schools. Five artists have studios in the building.

The Indian Arts building houses ethnological collections, the museum lecture hall, the priceless Jessop archery collection, the Art guild quarters and studios for sculpture, weaving and leathercraft. It and the Science of Man are two of the most attractive of the original exposition buildings, but they are temporary structures and must be improved for permanent use.

Painted Desert Impresses

The Painted Desert, built by the Santa Fe Railway Company, was taken over by the museum this year and reopened. It constitutes a unique ethnological museum in itself, even without collections. It is a complete Indian pueblo and suggests endless possibilities in educational directions.

From the above it will be seen that the museum as an inheritance from the exposition is one of the half dozen most extensive and valuable museums in America. The hospitality of the museum has been extended to a dozen or more active organizations, which now hold all their meetings in the buildings and add much to the cultural life centering about the institution. A dozen artists have their studios in the museum buildings: painting, sculpture, design, textile weaving and leathercraft being represented. It is hoped to equip at least double the number of studios during the coming year and place them at the disposal of the artists, both resident and non-resident. The plan of offering free studio facilities to artists as free laboratory and library privileges are accorded to students of science is one that has met with gratifying results. It is done for the advancement of art and as an assurance to artists of the appreciation of their presence and efforts on the part of the institution and community.

Expansion Proposed

Discussing the outlook for the museum, the following statement was made by the directors:

“The museum has only private support, and the years just past have not been easy ones. Nevertheless, if all dues are paid, it will reach the year of the year 1919 free of debt. Few museums of any importance can show such a record now. Nearly all are struggling with formidable deficits, with rapidly mounting expenses and serious impairment of service to the public. That the museum is able to report such a condition is due to its peculiarly favorable situation which enables it to run on smaller expenses than any other large museum in the country; to employees who remain out of loyalty to the museum; to a considerable amount of volunteer help; and to contenting ourselves with a well-nigh stationary policy. Such a course is tolerable only during a crisis. An institution must grow or die. We must find a way to buy cases for valuable collections that can be had for this museum if we will install them properly, otherwise they are going elsewhere.

“The safety of the priceless collections we have must be assured. There should be a museum assistant in each building to insure the proper care and use of collections and for the guidance of classes. The valuable library must be put into service. The buildings must be made comfortable during the winter for the large number of sojourners in San Diego to whom the museum and its library constitute one of the city’s foremost attractions.

Research Work Urged

“The museum should begin to do its part in research work. One of the richest and least known fields in the world (Lower California) lies at our door awaiting scientific exploration. Even from our own back country priceless collections are being taken to eastern museums. It seems hardly right that in order to study some of the most important things of San Diego county we should have to go to New York City.

“During the war the Museum association did not feel like pressing the needs of the institution. There should be several thousand corporate members and among the many who have found great opportunities in San Diego there must be a considerable number who as sustaining members and patrons and through bequests are prepared to keep the museum growing at a rate commensurate with the developments of San Diego now confidently predicted.”

January 1, 1920, San Diego Union, 6:8. Naval Hospital will be built in Balboa Park.

One of the finest and most modern hospitals planned by the navy department will be established in beautiful Balboa park within a short time. More than \$1,000,000 for this hospital is now available. And additional \$1,000,000 is expected to be appropriated from funds which originally were to have been expended for hospital construction in France. The end of the war made these later built hospital unnecessary.

The buildings for the magnificent San Diego naval hospital were designed by Bertram Goodhue, famous New York architect. The plans and specifications were drawn up under the supervision of Comdr. F. W. Southworth, project manager of hospitals, bureau of yards and docks, navy department.

17-1/2 Acre Plot for Hospital

According to Capt. H. C. Curl, senior medical officer of the Balboa Park temporary naval hospital, it is planned first to erect four groups of wards, an administration building and a commissary or supply store. Later a commanding officers' quarters, nurses' quarters, power house, and other buildings will be added to complete the permanent group.

The hospital grounds will be located on Inspiration Point, one of the most scenic spots in San Diego. The grounds will cover 17-1/2 acres.

Captain Curl said that the staff of the new hospital will comprise 10 surgeons and physicians, two pharmacists, a supply officer, 50 hospital corpsmen and 25 nurses. The hospital will be used exclusively in rendering medical attention to units of the Pacific fleet based at San Diego and to the various naval establishments in and near this city.

San Diego Physicians Praised

Whether the temporary naval hospital buildings in Balboa park, which rendered excellent service during the war, will be abandoned entirely upon the completion of the new \$1,000,000 hospital, has not been decided, according to Captain Curl. The latter paid a sterling tribute to the corps of San Diego physicians who formed virtually the complete surgical staff of the temporary hospital at the park during the war.

"These San Diego physicians who volunteered for duty during the war and who were attached to the Balboa park hospital performed their duty efficiently and zealously," said Captain Curl. "The navy appreciated their fine work."

January 1, 1920, San Diego Union, Annual, 6:8, 7:3-4. Exposition site buildings became property of city; artistic structures amid scenic tropical foliage preserved for public.

When the Panama-California Exposition officially closed its gates on December 31, 1916, the Exposition itself passed into history, but the beautiful and artistic structures, flanked by rare plants, shrubbery and flowers, and bordering on wide paved thoroughfares, have been preserved.

It is this "white city" in the spacious Balboa Park, San Diego has a unique and distinctive attraction. Years before the Exposition was completed, and when the plans were being laid, the builders decided upon a policy of stability of construction, to the end that when the purposes of the Exposition had been fulfilled, the building could be passed down as a heritage to the city. Most of the larger buildings are now devoted to civic uses, such as art galleries, museums, libraries and assembly halls.

In the building of the exposition the principal structures were grouped, and the streets and grounds were brought to the highest state of improvement. It is this group of buildings that is now being used for civic purposes.

The Panama-California Exposition, known as "the Exposition Beautiful," continued for two years, thereby establishing a record for continuity that had not been approached anywhere in the world. The object of the Exposition was to commemorate the completion of the Panama Canal, as well as to advertise to the world what Southern California, in general, and San Diego, in particular, had to offer.

Because of its magnificent setting, architecture and permanent collections, the Exposition was a distinct contribution to the science and art of America. It gave San Diego an enviable reputation as a place of beauty and culture, and educational and scientific advantages. The charm of the Exposition was not confined to its superficial features but the serious side of human affairs --- the arts, industry, history and science were given special attention. For the first time in the history of expositions, the story of man was given special presentation: the native American culture was presented in a manner more illuminating than ever before. Aside from the great exhibits illustrating the highest achievements of aboriginal America, there were others

of great historic and scientific value which received interested attention on the part of the public and unstinted praise on the part of men of science, and which, from the inception of the Exposition, were destined to serve a great purpose as the permanent museum of San Diego.

The Museum of San Diego is the logical successor to the Exposition. It was established for the purpose of cooperating with the city in making the benefits of the Exposition perpetual. The park, buildings and scientific collections are the permanent possession of the people. By developing a great cultural and recreational center, the Exposition is made a permanently productive investment. The museum is planned to meet the high standard of the Exposition and the park, and to develop with the future growth of the city.

The museum is already the largest west of Chicago. The buildings, which have been granted for its use, are valued at \$500,000; the collection on exhibit is worth \$250,000. Not less than \$1,000,000 were spent in the grading, planting and other permanent development of this portion of Balboa Park. The Fine Arts Building, now installed throughout, includes the gallery of Exposition architecture, the mission chapel, the women's headquarters, the main art gallery, the little art gallery and the oriental art gallery. The plan is to keep this building constantly installed with collections of paintings and other objects representing the progress of art, particularly in California and the Southwest.

Wonderful and inspiring, and the only one of its kind in the world, the magnificent outdoor organ, in the Exposition grounds, stands as an impressive tribute to the year 'round openness and delightfulness of San Diego's climate. Here recitals are given throughout the year. Because of its character as an out-of-door organ, the builders gave special attention to the carrying quality of its tones and produced an instrument which can be heard many blocks distant, even when the total power of the organ is not used. Special attention was paid to the orchestral equipment of the organ when it was designed, consequently orchestral effects are to be found in greater number in this instrument than would be in the case with an organ designed for church work.

The organ was the gift of John D. and Adolph Spreckels to the Exposition and the city. Through the generosity of John D. Spreckels afternoon recitals are given the year around, and are free to the public.

January 1, 1920, San Diego Union, Annual, 7:7-8. Naval Training Center and Marine Base for city' big projects entail outlay of \$16,500,000.

January 9, 1920, San Diego Sun, 2:5. It will involve approximately \$1,000,000 to make Exposition Buildings lasting according to Frank P. Allen, Jr.

January 11, 1920, San Diego Union, 8:3. Inspection made of buildings at old exposition; no decision reached regarding old structures; auditorium planned.

No decision was made yesterday by the exposition preservation committee after making an inspection of all the buildings at Balboa park which were used during the two years' exposition, as to whether the buildings should be salvaged or used for future use.

Every building was inspected carefully from the ground to the top of the roof and in many cases members of the committee went below the surface to see the main beams of the buildings. The structures were found to vary as to their condition. Some of them were found to be in fair condition in one section while another was not so substantial. In many cases buildings close to the ground without good underground ventilation were found to be in poor condition. This was found to exist in the southeast end of the Pan-Pacific building, which during the exposition was called the Electrical building.

The Southern counties building, which is proposed to be used as a music building in the future, was found to be in good condition. Several members of the committee who made the inspection suggested this building could be made into an auditorium at a small expense. It is said that it has a seating capacity of approximately 35,000 people.

As no decision was reached yesterday, it is expected that a meeting of the committee will be called in the near future at which time it will submit a report and some definite plan for the maintaining or salvaging of the buildings.

Those making the tour of inspection yesterday afternoon included F. F. Grant, George W. Marston, G. A. Davidson, Frank Allen, Julius Wangenheim, J. P. Morley, Miss Gertrude Gilbert and Joseph W. Sefton, Jr.

January 12, 1920, San Diego Sun, 1:2. Directors to quit Wilde's oil projects; Weitzel and Heilbron explain reasons for "getting out."

January 14, 1920, San Diego Sun, 1:1. A communication received from the Board of Park Commissioners by the Council today states that a Council resolution request that Park Commission expenditures not exceed the budget allowance for parks is misleading.

January 15, 1920, San Diego Sun, 9:3. San Diego poultry and pet show opens in Balboa Park tomorrow.

January 15, 1920, San Diego Union, 9:1. Marines to be hosts at Balboa Park; much interest shown by Corps in annual ball; decorations are elaborate.

The marines stationed at the barracks at Balboa Park are looking forward with much interest to their annual dance to be given this evening in the San Joaquin building. Every detail for the entertainment of their guests has been completed and the officers are cooperating with the enlisted men to make the affair one of the most enjoyable ever given by men of the service in this city.

The San Joaquin building has been elaborately decorated with flags, palms, flowers and greenery for the evening. A buffet supper consisting of chicken salad, sandwiches, olives crackers, ice cream cake and coffee will be served at a late hour and punch will be served throughout the evening.

The grand march will start at 9:30 o'clock and will be led by Colonel John E. McGill and Mrs. Moore and Sergeant Major Moore and Mrs. McGill.

Automobiles will meet the guests at the street car line and convey them to the San Joaquin building and after the dance will take them back to the car line.

January 15, 1920, San Diego Union, 9:4. Program for Park concert is varied; benefit at Organ Pavilion expected to draw large audience.

A large audience is expected at the Organ Pavilion next Sunday afternoon at 3 o'clock to attend the concert which has been arranged by Dr. H. J. Stewart for the benefit of Associated Charities

The program will be a varied one, consisting of ensemble numbers for violin, cello, piano and organ, and soprano solos. Dr. Stewart and Royal Brown will play two beautiful compositions for organ and piano with a special arrangement of the piano part by Dr. Stewart. Dr. Stewart, for four years the official organist of the open-air organ in the Park, has an international reputation as composer and concert organist, and his compositions appear on the programs of famous singers and organists of this country and abroad. Royal Brown, one of the best known pianists and organists of the city and at present organist and choir director at St. Joseph's Catholic Church, has appeared successfully many times before the Amphion Club. During Dr. Stewart's absence from the city, Mr. Brown has played the daily organ concerts in the park.

The other artists who will appear on Sunday's program are Mrs. Dorothy Cranston Scott, violin; Mrs. Hermina West, soprano; and Mrs. Bernhard Mollenhauer, cello.

January 15, 1920, San Diego Union, Classified, 11:4. Park Board says funds are not overdrawn; resolution passed by Council is misleading.

January 18, 1920, San Diego Union, Society-Club, 4:4-5. Program at park today offers widest variety; Mrs. Dorothy Cranston Scott, violinist, to appear (photo).

January 19, 1920, San Diego Union, 5:3-4. Benefit recital for Associated Charities at Organ Pavilion enjoyed by 2,500 persons.

January 24, 1920, San Diego Sun, 1:7. Wilde shoots another barrage at Police!

January 27, 1920, San Diego Sun, 1:1-8. San Diego welcomes General Pershing today.

January 28, 1920, San Diego Sun, 1:2, 6:6. Pershing is guest of honor; throngs gather at Organ Pavilion to meet American Expeditionary Forces hero.

January 28, 1920, San Diego Union, 1:1. General Pershing visits San Diego; will speak at Organ Pavilion today.

January 29, 1920, San Diego Sun, 3:3-4. Thousands at reception given Pershing; war idol continues journey north.

January 29, 1920, San Diego Sun, 10:1. Alleged pickpocket falls among park crowds.

January 29, 1920, San Diego Union, 1:1-2, 6:3-4, 7:1-4. General Pershing spoke to 30,000 persons at Organ Pavilion; made plea for universal military training.

January 29, 1920, San Diego Union, 3:3. A "Community Sing" will be held at Organ Pavilion Sunday afternoon under auspices of Y. W. C. A.

January 29, 1920, San Diego Union, Classified, 9:3. Crowds to park handled easily; transportation to Pershing reception at Balboa Park successful; San Diego Electric Railway now using zone system of fare collection..

January 30, 1920, San Diego Sun, 10:2. James E. West, chief Boy Scout executive, will visit San Diego tomorrow; to speak at organ in park.

January 31, 1920, San Diego Sun, 1:3. Hospital assured; \$500,000 is ready; bids called soon.

January 31, 1920, San Diego Sun, 1:6. Balboa Park to be scene of "Big Sing"; Blue Triangle community "feast" will be staged tomorrow at organ.

February 1, 1920, 6:3. Work on Naval Hospital to begin; Congressman Kettner wires Navy will call for bids within 60 days; hospital will be largest on coast; \$500,000 available for work.

February 1, 1920, San Diego Union, 8:3. The Katyimo Campfire Girls held a meeting yesterday in their club room in the Zuni Pueblo, Painted Desert, Balboa Park.

An exhibition of their handiwork formed part of the attractions of the day, needlework, cooking and other evidences of their progress in domestic science being on display.

Dr. Edgar L. Hewett talked to the girls on the early life of the Indians and showed specimens of pottery found by the excavators in Arizona and New Mexico. Grant Wallace told some of his experiences while living among the Navajo Indians. These talks were made to fit into the address delivered before the girls the previous Saturday by John Burroughs, the eminent naturalist, who spoke on woodcraft, the campfire and outdoor life in general.

February 8, 1920, San Diego Union, 8:3-4. Camp plan of Throop College of Technology at Pasadena outlined last night by President Scherer; plan prepared by Bertram Goodhue (illus.)

February 18, 1920, Letter, Edgar L. Hewett to Frank Mead (George W. Marston Papers, Collection 219, Box 2, File 31, San Diego Historical Society).

In order to adapt the interior of the California Building to the purpose for which it is devoted, namely that of a museum of the art and culture of Ancient America, it is desirable to have some architectural changes made while the interior is being repaired. I, therefore, desire to submit the following specifications for your consideration, and if they meet with your approval, would be obliged if you will pass them on to the California commission for final action.

1. Remove all the rococo plaster ornament.
2. Change the columns under the balconies from round to square, using wire lath and stucco, making them from 30 inch to 36 inch square at the base as may seem best to you after studying the proportion to all the related members.
3. Bring the Maya frieze from the walls of the upper balconies to the entablature around the rotunda, making three additional panels so as to complete the subject as originally planned. Cover the balustrade around the balconies with wire and lath and stucco, making the same appear as a upward extension of the entablature and placing the Maya frieze in the center of same.
4. Convert the semi-circular apse into a square chamber with the tall monument in the center of the entrance, making a rectangular room approximately 12 by 16 feet, the interior of which can be treated in the decorative style of the inner cells of the Maya temples.
5. Make the interior of the building, including the small rooms of the main rotunda, an old ivory color corresponding to that of the ceiling in the vestibule.
6. Move the mural paintings from the upper balconies to the corresponding spaces

below. The small windows that will be thus covered by the paintings should be permanently closed on the inside and the paintings lighted by artificial light.

7. Continue the scheme of decorating the interior with Ancient Maya Art by adding designs in color to the panel spaces of the great columns supporting the dome, also to the wall spaces on each side of the monument in the apse and the great arch above the same. These paintings can be prepared on canvas and either pasted upon the walls in their proper spaces or stretched on frames to be fitted to the wall spaces; the latter might be serviceable in improving the acoustics of the building.
8. Cover the floor of the rotunda with grass matting, which may also be treated with Maya designs.
9. Close permanently the two side doors between the vestibule and the main rotunda.
10. Cover the glass in the large transept windows with material that will break the clear transparency but at the same time reduce the light as little as possible.
11. Provide glass doors at the main entrance to be used for protection from the weather when the solid doors are thrown open. (NOT APPROVED.)
12. Finish the interior of the tower with rough sand finish.
13. Remove the chandelier from the center of the rotunda and replace the same with a more effective system of lighting. (NOT APPROVED.)
14. It has been suggested to me recently by an eminent authority in such matters that a very important improvement could be made in the acoustics of the building by stretching a canvass across the rotunda at the base of the dome, an instance being cited where an experiment of this kind in a similar case has been a conspicuous success. This might be an experiment worth trying. (NOT APPROVED.)

In working out the architectural changes and decorative scheme proposed above the director has had the cooperation of yourself, as architect, Mrs. Jean Beman Smith, Miss Alice Klauber, Mr. Templeton Johnson, and Mr. Henry Lovins; the latter having prepared drawings embodying these plans which are herewith submitted. These drawings have been studied and criticized by all members of the above named committee and have been formally approved by the board of directors of the Museum. The whole scheme is now submitted for your final consideration and for submission to the California commission. Any modifications that you have to suggest will be gratefully received.

Very sincerely yours.

Note: I concur with the above recommendations. (Signed) Frank Meade.

March 11, 1910, San Diego Union, 3:4-5. John Charles Olmsted, landscape architect of Exposition, dies; leaves many friends here.

John Charles Olmstead [sic], landscape architect of national fame, well remembered here because of his work in connection with the San Diego Exposition, died in Brookline, Mass., on Feb. 24. As advisor to the buildings and grounds committee of the exposition he played an important part in arranging the wonderful landscape effect that has been held by many to be unsurpassed.

At his suggestion Bertram Goodhue and Frank P. Allen were engaged as architect and director of works respectively and great credit is given Mr. Olmstead by all who were connected with the building and management of the exposition for its marked success.

George W. Marston yesterday received a letter from Frederick Law Olmstead, brother and business partner of John Charles Olmstead, telling of his death. The letter said:

"After a year of fluctuating illness and much pain borne with characteristic but wonderful patience and cheerfulness, my brother John died last night, quietly and painlessly."

Speaking of John Charles Olmsted, Marston said:

"During his stay here in San Diego Mr. Olmstead made many friends who held him in highest regard and honor.""

The noted landscape architect was engaged by the directors of the exposition in 1910 for professional work in connection with exposition plans. He spent several weeks here in the preparation of landscape and building plans. The border planting of Balboa Park on the north and east sides and partly on the south side was done under his personal direction.

A brief review of his life, published in a recent issue of the **New York Evening Post**, said:

"John Charles Olmstead, landscape architect, long associated with Frederick Law Olmstead in his chosen profession, dies on Tuesday in Brookline, Mass, where his home was at 16 Warren street. Mr. Olmstead, who was in his sixty-ninth year, has been failing in health throughout the last year.

"He was born on Sept. 14, 1852, in Geneva, Switzerland, the son of Dr. John Hull Olmstead of Hartford, Conn. And Mary Cleveland (Perkins) Olmsted of New York. He was educated at the Englewood military academy and the Knapp school in Plymouth, and later at the Yale Sheffield scientific school, where in 1875 he received his Ph. D. degree.

"He was a member of the American civic association, American society of Landscape Architects, of which he formerly was president; the Boston Society of Civil Engineers, American Association of Park Superintendents, Massachusetts Horticultural society, American Forestry association, Social Science

association, American Free Trade league, Municipal Art society of New York, American Association for the Advancement of Science, Massachusetts Anti-Double Taxation league, Boston Museum of Fine Arts association, and he was an associate member of the Boston Society of Architects. He belonged to the Appalachian Mountain club, the Century and Reform clubs, as well as the National Arts ____, New York.

“On Jan. 18, 1899, Mr. Olmsted married in Brookline, Sophia Buckland White, by whom he is survived, together with two daughters, the Misses Carolyn and Margaret Olmsted.”

May 24, 1920, San Diego Union, 16:1. Boy Scouts may use Painted Desert as headquarters.

By action of the board of park commissioners Friday afternoon, the Boy Scouts of San Diego were given the privilege of using the Painted Desert in the park. It is given out at local scout headquarters that the San Diego council is making careful plans to make the most of this splendid opportunity, and it is the belief of those in charge that in taking this action John Forward, Jr., Judge Ryan and F. F. Grant, members of the board, have not only given a wonderful opportunity to the boys of San Diego city and county, but have made it possible to conduct a type of boy work here that is not duplicated anywhere. It is the hope of the local scout officials to make of San Diego's tabloid Painted Desert of five acres one of the most unique and most productive outdoor schools of scout craft in the country.

The desert, with its five replicas of Indian pueblos, has been one of the most interesting show places of San Diego since its erection by the Santa Fe Railroad Company in 1914 at a cost of \$150,000, but only periodical activities have been conducted in it since the closing of the fair in 1916.

In presenting the plans of the local council to the members of the board of park commissioners Ellwood E. Barley, local scout executive, explained that it is the purpose of the council to transfer the weekend activities at the present reservation to the Painted Desert, and also establish the executive offices of the organization o the main building facing the Isthmus.

Other departments that will be opened are the scout museum, where a collection of all kinds of bird, animal, mineral and plant specimens will be arranged, a branch of the city library containing all the best boys' books, department of equipment and supplies and a shop of woodcraft in which all kinds of woodcraft can be taught and all repairs to the pueblos made, printing department, and a department of camping, in which will be kept sufficient camp equipment to care for the needs of 43 local scout troops.

Each of the troops will have its own special troop headquarters and general assembly headquarters will be furnished, in which the following schools of special instruction will he held throughout the year.

Scout leaders' reserve, scoutmasters, assistant scoutmasters, patrol leaders, scout scribes, drill leaders, second class, first class, merit badge scout, band, bugle and drum corps and amateur wireless. Special quarters will be assigned to scoutmasters and assistants, patrol leaders and sea scouts.

Regular weekend camps and hikes will be scheduled so that each troop will get the greatest possible share of the advantages offered in the centralized scouting activities.

The formal presentation of the use of the Painted Desert to the scouts by the board of park commissioners will be made Saturday, June 5, at the third annual scout field meet.

May 26, 1920, San Diego Union, 6:3. Morning Memorial Day services at Park to be impressive; high mass will be offered; Catholic, Protestant clergy to speak.

May 27, 1920, San Diego Union, 6:3. \$300,000 Naval Air Station administration building completed at North Island.

May 28, 1920, San Diego Union, 5:4-5. Morning Memorial Day services at Park.

May 30, 1920, San Diego Union, Society-Club, 4:4. San Diego High School will present its annual "Grand Chorus" at the Organ Pavilion next Sunday afternoon.

May 31, 1920, San Diego Union, 5:4. All live troops in County plan to enter field meet; third annual meet of Boy Scouts to be held at Indian Village Saturday (photography of Boy Scout Day at Indian Village last year).

Wayne Hageman, Boy Scout leader, who is in charge of the third annual field meet to be held at the Indian Village Saturday, announces that every line troop in the county is planning to enter one or more of the events. Friday evening the troops will report in at the camp as early as possible and prepare their camp with troop and individual camp equipment. This is the annual tryout of the troops' ability to set up an overnight camp, and the following day make a presentable appearance for the annual inspection. Saturday's program will take the form of a daily program in a scout camp with the annual contests as a special attraction.

The Colburn trophy is attracting keen interest, as the scouts are heaving many rumors which come from the troops that are busy training for the contest, and Saturday is expected to see at least 10 well-drilled teams in the field for the final test. It has been announced that troops not going into the camp will not be debarred from entering the contest, but they will be handicapped enough to give an even score for the troops that carry out the program in full.

The commissioners' flag and the American Legion colors have not arrived at the headquarters, but are expected before Saturday. These are new trophies and have aroused keen interest among the troops. Troop 15 says that the commissioners' flag is already in its possession, but several other troops are brushing up their uniforms in hopes of capturing this all-year honor. The legion colors will go to the troop making the best all-year scout effort.

June 1, 1920, San Diego Union, 5:3-4. Photographs of May Festival at Golden Hill.

June 1, 1920, San Diego Union, 6:4-6. Military Mass at Organ Pavilion in memory of soldier dead; ministers of all denominations join in service of commemoration.

June 2, 1920, San Diego Union, Classified, 11:1. A permanent home for the San Diego Society of Natural History and the permanent construction of a group of fair buildings in Balboa Park was made possible yesterday by a \$50,000 gift of Miss Ellen B. Scripps of La Jolla. The only condition was that the Society should take steps immediately to enlarge its membership.

Exposition Building No. 8, at the southwestern corner of the Plaza de Panama, will probably be rebuilt as a fireproof structure. Society collection has been housed since 1917 in the Nevada Building in the Park.

June 3, 1920, San Diego Union, 1:1-8. First picture of great Naval Hospital to be built in park; drawing received from Bureau of Yards and Docks yesterday by Congressman William Kettner; made by architects of the Bureau of Yards and Docks, under the supervision of Admiral C. W. Parks, chief of the Bureau.

June 3, 1920, San Diego Union, 1:4-5. Millions to be spent here by Government to carry out plan for great naval base; between \$500,000 and \$1,000,000 will be expended in constructing the first units of the \$2,000,000 Naval Hospital at Balboa Park; appropriations will become available July 1; first group of buildings to consist of Administration Building, two wards, surgical laboratory, subsistence building, mess hall and one or two other structures; the City recently deeded 17 acres of land on Inspiration Point to Navy Department as a hospital site.

June 5, 1920, San Diego Union, 7:4. Boy Scouts to take full possession of Indian Village.

The Boy Scout Indian Village in Balboa Park took on a new lease of life last night when several hundred local scouts pitched camp under the shadows of the rocks and pueblos of the famous Painted Desert. After the youngsters picked their camp sites and stood in line for their first inspection in the new home, the campfire was lighted by Charles N. Miller, national field scout commissioner, who is a special guest at the local council at the third annual scout field meet. An interesting program was given by troops 15 and 19, the former standing a troop meeting under the leadership of Tom Russel, scoutmaster, and Wayne Hageman, senior patrol leader, with 32 uniformed scouts, nearly all of whom were first class. Troop 19 proved to be real actors in staging the popular scout playlet, "A Strenuous Afternoon," in which the scoutmaster, Stanley Millar, and Orville Thompson, senior patrol leader, starred.

Duncan MacKinnon, president of the San Diego council, was a special campfire guest, but when greeted by the scouts, told them that he would have something to say to them this afternoon at 2:30 o'clock, when the scouts will form in line and the members of the board of park commissioners will formally present the use of Indian Village to the scouts of San Diego county.

Some of the discoveries made last night were that troop 10 reported as a body, including the troop committee and the pastor of the church. The entire organization went under its own canvas for the night. Thirteen scouts reported from Fallbrook. Troop 18 had just 18 scouts in camp. Troop 15 had 24 first class scouts present. A number of parents and friends were on hand.

Local scout headquarters announces that the program of events today will be interesting and in invitation is extended to the general public to attend. The contest for the Colburn drill trophy will take place at 11 o'clock this morning, following the third annual review. These two events will be in charge of Colonel E. N. Jones, who is an enthusiastic volunteer scout worker. The afternoon events will consist of a first aid race, staff relay, fancy drill demonstration, message relay, carrying message one mile at scout pace, making fire by friction, cooking flapjacks. A number of mass games will be played, the contests being under the direction of Scoutmaster Sandford, director of the Rose Park playgrounds.

This afternoon, Judge Henry C. Ryan, F. F. Grant, and John Forward, Jr., members of the board of park commissioners, will be present at 2:30 o'clock and formally present the use of the Indian Village to the San Diego council. Duncan MacKinnon, president of the council, will officially accept the custodianship of the village for the local council, and will then address the scouts who will form one of the famous scout squares. Milton A. McRae, scout commissioner, also one of the founders of the Boy Scouts in this country, will be present as guest of honor.

June 7, 1920, San Diego Union, Classified, 11:1. Chorus of high school singers pleased audience yesterday afternoon.

June 7, 1920, San Diego Union, Classified, 16:1-3. F. F. Grant, park secretary, presents Indian Village to Boy Scouts.

In presenting the use of the Indian Village to the Boy Scouts of San Diego city and county last Saturday afternoon, F. F. Grant, secretary and member of the board of park commissioners, made friends with the scouts who were assembled in one of the famous Boy Scout hollow squares, and expressed his confidence in the scouts that they would not only officially appreciate and protect the property involved, but that in short time marked improvements would be made. He told the scouts of many responsibilities resting with the board of park commissioners and that it was a pleasure for him to present the use of the Painted Desert to the scouts. The unavoidable absence of Judge Ryan and John Forward, Jr., the other members of the board, was regretted, as well as that of John Morley, park superintendent.

In accepting the custodianship of the Indian Village from Mr. Grant, in behalf of the San Diego Boy Scout council, Duncan MacKinnon, president of the council, made a fine address that will stay with every scout who heard it. He told Mr. Grant of the splendid and "good turn" the board of park commissioners had done in making it possible for the boy scouts to use this reproduction of the abode of the first Americans. He explained to the scouts the great responsibilities that rested upon our public officials, how the mayor was responsible to the citizens for the proper care and improvement of Balboa Park. After explaining the responsibilities of the board of park commissioners, MacKinnon paid the present board a compliment for the splendid effort its members were making to make this valuable heritage, Balboa Park, serve the largest number of people in the best possible way. He assured Grant that the executive committee of the local boy scout council fully realized the confidence the board placed in the scouts of this city in turning over to them property so valuable as the Indian Village, and turning to the scouts, he said that big opportunities always carried with them correspondingly large responsibilities and that he wanted each scout present to state definitely whether or not he would promise not only to protect the property from defacement or destruction, but that he would not permit it to be done by another. Every scout promised to fulfill this part of the contract and MacKinnon expressed his confidence in the promise of a Boy Scout. He said that any boy scout who needed a policeman to watch him so that he would not destroy public or private property had no place in the Boy Scouts of America.

(Remarks by A. McRae that follow are not included.)

June 7, 1920, San Diego Union, 16:4. Third annual scout field meet declared great success; work of winning team said to be better than record last year.

June 9, 1920, San Diego Union, 4:1. EDITORIAL: Our Painted Desert

The Park Board has performed a double service in granting the use of Indian Village of the Painted Desert in Balboa Park to the Boy Scouts. They have provided a permanent home and appropriate headquarters for a deserving organization and they have taken efficient measures for the preservation of a cluster of buildings architecturally and historically unique.

Brown of San Diego and 4 by John Doane of New York; 8 recitals omitted because of unfavorable weather; 5 days no recitals because of failure of electric current; 22 days no recitals by reason of repairs to organ and Organ Pavilion; Roy W. Tolchard, resident tuner, in daily attendance; cards containing information about daily recitals distributed to hotels.

June 24, 1910, San Diego Union, 1:4-5, 2:5. Josephus Daniels, Secretary of Navy, greeted by thousands on visit to city..

June 24, 1920, San Diego Union, 4:1. EDITORIAL: San Diego's Organ

A unique feature of San Diego's daily life is the recital at the Spreckels organ in Balboa Park. No other city in the world possesses this attraction, because there is no other city in the world combining a great outdoor organ with a climate that permits daily recitals throughout the year.

June 25, 1920, San Diego Union, 1:7, 5:3. Because of an appeal voiced by Congressman William Kettner and Secretary of the Navy Josephus Daniels at the Rotary Club luncheon yesterday, City Attorney Higgins informed **The Union** last night that he will present to the Council next Monday an ordinance calling for a special election to vote on the question of conveying to the United States Government certain tidelands and park lands for naval purposes.

Higgins explained to **The Union** that the reason he has not hurried the proposed election is because the legislature could not ratify the amendments until January of next year, and because there is a cloud on the title to the site for the proposed new Naval Hospital in Balboa Park, which the Government wanted cleared up.

In a communication addressed to this office during the month of February, 1920, Mr. Robert O'Connor, Unites States district attorney for the southern district of California, doubted the sufficiency of the title of the city to that portion of land in Balboa Park sought to be conveyed. It seems that some years ago the city conveyed this land in trust to a certain benevolent society for the founding of an orphan's home. This land was never used for such purpose, and undoubtedly reverted to the city. The United States district attorney insisted, however, that this cloud on the title be straightened out, and it was accordingly agreed that this office should initiate the necessary quiet title proceedings.

June 26, 1920, San Diego Union, 10:1. Council will set date for voting on gifts to Navy; unless there is change, city body in Monday will designate August 3 as time.

June 27, 1920, San Diego Union, 11:3. Dr. Stewart will leave tomorrow for his annual convention; daily concerts suspended for July.

July 5, 1920, San Diego Union, 5:4-5. Patriotism finds eloquent expression at organ rally.

July 6, 1920, San Diego Union, 4:1. EDITORIAL: What Is A Park?

The Court of Appeals of New York has recently defined the meaning of the work and its application in a decision reversing the judgment of the Supreme Court and the Appellate Division to the purpose that "no objects, however worthy, such as courthouses and schoolhouses, which have no connection with park purposes, should be permitted to encroach upon it without legislative authority conferred."

. . . The decision is in the main applicable to every public park in the United States, but as the Court intimates its scope is subject to local statutes and regulations. A park reservation is a public asset and it should not in any portion be alienated from the public except by free public consent, and even then only for a purpose equal to or superior to the original one of recreation.

July 6, 1920, 10:7. Community Theater Association to present "Everyman" at Sacramento Building Saturday.

(Excerpts)

San Diego council is divided into four city scout divisions and each division meets on the Friday evening of each month which corresponds to the division number. The third division meets on the third Friday evening of each month.

Two one-minute rounds of peppy boxing were put on.

Scoutmaster A. L. Brown of Troop 16 told of his work with the boys of his race, and during his talk thanking the scoutmaster of Troop 11 and his scouts for the help they had given his troop during the last four years.

October 19, 1920, San Diego Union, 1:6. Council refuses Mayor Wilde's request to oust Chief of Police James Patrick; mayor charges police chief has allowed dens of vice to run wide open.

October 22, 1920, San Diego Union, 11:3. While members of the City Council would be glad to see the Southern Counties Building reconstructed into a Civic Auditorium, a plan advanced by the women of San Diego's Civic Center to have that building transferred to them as a corporation was not approved by the Council yesterday afternoon; City Attorney said such a transfer to a private corporation might not be legal; Council would be glad to see the money raised for the improvements with the city still in charge of the buildings and grounds.

October 28, 1920, San Diego Union, 1:4-5, 2:6. Local firm's bid of \$707,350 lowest at Naval Hospital; Kier Construction Company of San Diego bid jointly with Sampson Construction Company of Los Angeles; time of contract set at 450 days.

November 2, 1920, San Diego Union, 1:5. Naval Hospital contract for 6 buildings let to local firm; joint bid of two companies is \$707,350; work to start at once; to be completed within 450 days; contract calls for erection of only 6 of the total group of 20 buildings planned by the Navy Department for the completed \$2,000,000 Balboa Park hospital; Kier and Sampson Construction Companies will construct.

Administration Building: 6 stories in height counting tower; 144 feet long and 27 feet wide with an extension 15 by 30 feet.

Two hospital wards, each 2 stories in height; 237 feet long and 37 feet wide; central portion will be 3 stories.

Two-story operating building, 82 by 37 feet.

Four-story subsistence building with 2-story extensions; main building will be 144 by 37 feet and the extensions 42 by 30 feet.

Two-story power house, 25 by 26 feet.

All buildings will be of the old Spanish-Renaissance type. They will have reinforced concrete framing throughout, concrete footings, hollow terra-cotta tile walls, plastered throughout, with stucco exteriors. The roofing will consist of pan and over tile and glass tile.

All the buildings contracted for yesterday, with the exception of the power house, will be located on the brow of Inspiration Point. They will face to the westward and will form an imposing sight when completed.

W. E. Kier Construction Company built the Administration Building at the North Island Air Station. Sampson Construction Company erected the San Diego depot.

The Japanese are holding thousands of acres of land in the west now, and the acreage is increasing rapidly. The people of the United States are facing a serious problem in this, whether the east and middle west realize it or not.

November 10, 1920, San Diego Union, 11:3. Memorial Drive proposal received; cash amounting to \$3,000 with Southern Commerce and Trust Bank; G. A. Davidson, chairman and custodian of Pershing Drive fund; Davidson said yesterday some sort of memorial to the local men who died in the service of the county in the European war should be erected, even if the memorial drive plan is given up.

November 11, 1920, San Diego Sun, 1:2, 2:5. Entire city celebrating end of war; Armistice Day stops all other activities; Balboa Park is place.

November 11, 1920, San Diego Union, 10:4. Program at organ to commemorate signing of Armistice; Professor J. H. Hildebrand of University of California to give chief address; veterans of all wars expected to be present.

November 11, 1920, San Diego Union, Classified, 11:2. Memorial fund committee will continue at work; smaller body will consider plans for 20 foot paved rive through park with a five foot shoulder on each side running from 28th Street through Balboa Park; city engineer estimates cost at \$50,000.

November 12, 1920, San Diego Union, 3:4-5. Armistice Day program at Organ Pavilion; music and speechmaking.

November 13, 1920, San Diego Sun, 1:2. Work on new Naval Hospital began today.

November 14, 1920, San Diego Union., 20:5. Excavating begun on site of Navy Hospital.

November 20, 1920, San Diego Sun, 5:3-6. San Diego's Boy Scout Town, by Lansing Warren.

If architects, with the results of several fund drives and large charitable bequests, has planned to build headquarters for the San Diego Council of Boy Scouts, they never could have succeeded in constructing anything so ideal as the Painted Desert and Indian Village in Balboa Park.

Combining an incomparable atmosphere of romance and adventure with space for every sort of activity, the Indian Village is probably the most unusual and distinctive Boy Scout center in this country, and offers an opportunity for limitless development.

Built for the Panama-Pacific exposition [sic], an exact reproduction in plaster and frame of the adobe villages of the Navajo Indians [sic] of New Mexico [sic], the village has a historical and intrinsic value beyond many of the structures surviving the exposition. Unoccupied, it was gradually falling into decay for want of care, when the directors of the Boy Scout council took up the idea of obtaining it for a permanent scout headquarters.

The plan, backed by many prominent citizens, was presented to the park commissioners, who at once lent their cooperation, with the final result that the entire Indian Village was turned over to the scout council by the city last July.

Offices of Elwood [sic] E. Barley, scout executive, were immediately installed in the main entrance building, and the members of the various scout troops outlined the program of improvement and upkeep of the grounds and buildings which is now progressing. All work is done through the volunteer services of the scouts themselves, who keep the village in order, and are fitting quarters in the various buildings to accommodate different activities.

The buildings include two main village replicas of the Indian villages at Taos and Zuni, New Mexico, and several smaller groups. They are built around a wide field which affords a parade ground and sport field, surrounded by walls and stockades.

One of the smaller buildings is being equipped as a mess hall and kitchen, and in another of the houses, the large, wireless apparatus is operated daily by the scouts. A class of more than 80 is studying radio at the village, and the control is kept open by regular shifts of the pupils. The instrument has communicated with San Francisco, and during hikes and trips kept in touch with the scout troops who carry field wireless sets.

While individual troops, in most cases centering at churches in the district, retain their own headquarters, the Indian Village is the center of all the larger scout activities. Deputy commissioners and committees meet their [sic] annually, scoutmasters meet once a month, and a monthly rally of scouts is held there. Campfires blaze on the Indian Desert, lighting up the red-terraced dwellings. The scouts are assigned to separate parts of the village for their meeting and camp is pitched by each group. After the meetings there is a general assembly, when each troop presents some stunt of demonstration of scout craft.

In order to preserve the policy of development of group activities, use of the village is assigned to the four scout districts in rotation. Division one has the privilege the first week in each month, division two

the second week, and the other two divisions during the next weeks. Only for special events in the entire membership assembled.

Offices of the council, who aided in securing the unique meeting place for the scouts are: Milton A. McRae, scout commissioner; Duncan MacKinnon, president; Mathias F. Heller, first vice president; Leslie S. Everts, second vice president; George Burnham, third vice president; Frank J. Belcher, Jr., treasurer; and the following honorary vice presidents: A. S. Bridges, G. Aubrey Davidson, Lyman J. Gage, George W. Marston, E. W. Scripps and John D. Spreckels.

November 20, 1920, 3:4. This afternoon Dr. Stewart will give special recital at Spreckels organ for pupils attending public schools.

November 20, 1920, San Diego Union, 6:4-5. Work on Naval Hospital to start in ten days; grading and excavation operations begun several days ago; plans and specifications being drawn up by large force of engineers and draughtsman in the Winchester building at Fort Rosecrans and Lytton Street; Commander Lincoln Rogers is in charge of this work; a survey of the Naval Training Station to obtain elevations for the buildings is nearing completion.

November 21, 1920, San Diego Union, 6:5. **Union** exercises will be held at park organ Thanksgiving; Reverend W. E. Crabtree, speaker of day; organist will be Dr. Stewart and musical director will be Wallace Moody.

November 21, 1920, San Diego Union, Classified, 3:3. Motion picture syndicate plans studio in Park; W. A. Robards has asked Park Commission for use of Southern Counties Building.

November 22, 1920, San Diego Sun, 2:3-6. Important art exhibitions shown at museum in park, by Beatrice de Lack Krombach.

Group of the work shown at the 11th annual fall exhibition of the California Art club, which recently closed at the Museum of History, Science and Art at Los Angeles, sung by the committee of the San Diego Art Guild; to be seen until December 22.

Paintings by Indians living in the southern states show yesterday afternoon in blue room of the museum at meeting of the Archaeological Institute. . . . Dr. Hewett presented these painting and explained their symbolism. He showed a group of the first work done by Cresencio --- who will be remembered as the prime factor in the Indian pottery making at the Panama-California exposition. . . . Also show, paintings by Velino, Awa Taiveh, Kahotie (check spelling).

November 23, 1920, San Diego Sun, 8:1-2. Local citizens to oppose Commission abolishment.

At a meeting of citizens being held at a downtown grill yesterday afternoon at which G. Aubrey Davidson presided as chairman, it was unanimously decided to organize at once a committee for the purpose of conducting a vigorous campaign against four of the proposed charter amendments which are to be voted on at the election two weeks hence.

November 23, 1920, San Diego Union, 1:6, 3:3-6. Fight organized on amendments to abolish four city commissions; John F. Forward, Jr. alleges City Council and San Diego Board of Education have formed a secret combination to destroy the commission form of government.

November 24, 1920, San Diego Union, 5:5. Y. W. C. A. and church organizations to hold prayer meeting in Balboa Park Thanksgiving morning.

November 24, 1920, San Diego Union, 10:2-3. The City Commissions, by Mayor Louis J. Wilde.

In one emphatic sentence, I believe this special election to be entirely out of order, uncalled for, or no real use, but stacked up and put out on the taxpayers as a new overhead expense and timed with becoming

ingenuity for spring election propaganda and should defeat everyone who favors it. Vote to keep your commissions --- every last one of them. Caution is given to the commissioners not to quarrel among themselves, and the public is warned not to oppose because they dislike some few commissioners. "NO" is a big word, but nine times out of you can bet on It. "NO."

Very truly yours.

LOUIS J. WILDE.

November 24, 1920, San Diego Union, 10:4-5. Charter amendment committee issues statement replying to opponents of proposed changes.

November 24, 1920, San Diego Union, 13:1. Recital at Organ Pavilion to open Thanksgiving Day program in park; services to begin at 10:50 a.m.

November 25, 1920, San Diego Union, 7:2-3. Henry C. Ryan, president Board of Park Commissioners, denounces amendments.

November 25, 1920, San Diego Union, 11:3. Twenty two big turkeys on exhibit at annual poultry show in the big showrooms of the Panama-Pacific [sic] building at the northeast corner of the Plaza de Panama; pigeons, rabbits, guinea pigs and covies also shown; from November 25 to November 28.

November 25, 1920, San Diego Union, 7:3-5. Four thousand gather in Park for service of thanks.

November 27, 1920, San Diego Sun, 6:1. EDITORIAL: A Permanent Exposition.

The other day we read a story about some moving picture outfit proposing to lease the Southern Counties building in the exposition grounds as a permanent location for future operations.

We don't know this outfit. It may be perfectly all right financially. Doubtless it is so, or the able park commissioners would not have considered the proposition, but we don't like the idea on general principles. We don't want to see our park turned into a moving picture village or city. There are plenty of other places for the establishment of such institutions if they can be induced to come here.

Some time ago the Master Pictures announced the purchase of the Jamul ranch for \$375,000, the leasing of the mayor's town house, and various other important activities. What has become of the Master Pictures? We dunno. Do you?

But, anyhow, friends and fellow citizens, why can't something be done to establish a permanent exposition in the park, to be held several weeks of every year, the proceeds to go to the rejuvenation, rebuilding and renewing of the exposition buildings? Here we have a \$5,000,000 plant, the most beautiful in the work, right in the heart of our city. What are we doing with it?

Dr. Hewett and his Archaeological society have done something --- a good deal, in fact.

Dr. Baker and his Natural History society, with the aid of Miss Ellen Scripps' splendid donation, have done something and will do more.

Dr. Stewart and the beautiful exposition organ, given by John D. and Adolph Spreckels, is still providing us with daily concerts.

The Friends of Art have established a series of beautiful art exhibitions.

Now these are all fine in their way, and together they make Balboa Park the greatest asset our city possesses, but we must do something to make permanent the wonderful buildings in the park. Why not a permanent exposition?

November 27, 1920, San Diego Sun, 8:1. Local museum in park to be educational center.

Popular education is to be made the main feature of the San Diego Natural History museum in the Foreign Arts building in Balboa Park. Toward this end an educator has been placed in charge of the branch of school work. Twenty traveling cases have been ordered ready for the opening of the schools and any teacher wishing first-hand knowledge will be able to find a case of specimens of birds, animals, botany, minerals, etc.

A year ago a collection of fossils was shipped from Kansas, but the museum was so crowded that this collection, with others, are still boxed. When this condition was brought to the attention of Miss Ellen B. Scripps, she, by a gift of \$50,000 and a promise of more, made it possible for the museum to take larger quarters in its present location.

The first installation being made is a collection of fossils made by Charles H. Sternberg, the oldest individual collector of fossils on this continent. Mr. Sternberg has spend over half a century in this work and there is not a large museum in the world that lacks some of his material. He is here in person to install the material which will be the most striking exhibit of its kind on the coast. The collection occupied a whole car and was shipped from Lawrence, Kansas, where Mr. Sternberg had had his headquarters for twenty years. It contains the only duck-billed dinosaur on the coast, and this specimen alone will occupy a panel 86 (?) by 26 feet (?). A horse from Texas will be an open mount. There will also be three of the largest type of fish ever found. Two of these will be 18 feet long, and the other will be 16 feet long, so far the largest on exhibition.

November 27, 1920, San Diego Union, 14:4-5. Charter committee issues statement; advances argument in favor of abolishing commission form of government by adopting suggested amendments to charter; favors managerial system.

November 28, 1920, San Diego Union, Classified, 1:2-4. Integrity and Development of Balboa Park Real Issue, by John F. Forward, Jr.

November 28, 1920, San Diego Union, 4:4-6. R. P. Irving, public accountant, says city records prove Park Board inefficiency.

November 28, 1920, San Diego Union, Classified, 5:3-4. Electors asked to vote for school site in Balboa Park for 1200 pupils; 17 acres on north side of park at Upas Street and Park Avenue.

November 29, 1920, San Diego Union, 18:4. Country divided into sections for scout purposes; original plans of organization said inadequate to handle growing needs; the 12th district, of which San Diego is a part, comprises California, Arizona, Utah and Nevada.

November 28, 1920, San Diego Union, 19:4-5. Carroll De Wilton Scott, Natural History Museum, defends his theory that forests of live oak not common on coast in early days.

November 28, 1920, San Diego Union, 21:2-3. Poultry and rabbit exhibits will close tonight.

December 4, 1920, San Diego Union, 8:5. Writer declares sentiment growing against charter changes.

December 5, 1920, San Diego Union, 1:3, 8:1-2. George W. Marston sees grave danger in abolishing city commissions.

George A. Marston, pioneer merchant who in past years has done much good work in helping to develop the San Diego park system is unalterably opposed to abolishing the park commission. Mr. Marston, himself once a park commissioner, issued this statement yesterday:

"The movement to abolish the city commissions very properly arouses grave apprehensions of danger. For my part, I am convinced that the parks, playgrounds, harbor and cemetery will suffer immeasurably by the transfer of management from the commissions to the council and city manager.

"No one should expect perfection from any form of government. The personnel of the administration determines mostly the character of the work done. And yet a good system is very important not only for its own inherent advantages but also because it will draw into office and hold there the ablest and best citizens.

“Under the present charter the mayor appoints and the council confirms or rejects the appointment. No better method of selection has ever been devised. It puts considerable power in the hands of the mayor, with a veto check by the council. If we withdraw this responsibility from the mayor, we are strongly impairing his rightful power and standing. Further, it is a charter provision that appointments shall be made in a sequence of years, in order to avoid abrupt changes in the personnel of the commissions. This holds some experienced men continually and prevents the growth of partisanship. While it is true that mayors may arbitrarily override these wise provisions, the system is perfect.

“Our fine councilmen have suddenly decided that this safe and democratic system, the product of a generation of thought and municipal experience, should be destroyed. Their recommendations carry great weight because of their fine personal character and the honest constructive work they have been doing for the city. I grant their sincerity and devotion to public welfare, but I believe they are slightly flushed with their success and in danger of ‘overdoing their job.’ Is the honorable council really ‘the whole thing?’ How about the mayor and his part of the city job? What about the score of representative citizens who, without compensation or salary or perquisites, are giving valuable time and business experience to various departments of the public service? It seems to me that it is a wise thing to join the paid and unpaid workers, the official and the non-official classes, in a united, representative community effort for city building rather than to turn all the legislative and executive functions of the municipality into the hands of five councilman and their selected manager.

Political Machine Feared

“Without reflection upon the present administration (for I respect and heartily commend its competent management of operations), I submit that there is a danger of a future political machine in making the proposed changes. The principal argument advanced is that concentration of management will insure economy and lessen taxes. This is specious, and incorrect in all probability, but even if true, it would not compensate for the losses that have been well pointed out by Mr. Klauber, Mr. Forward and others. In respect to the alleged extravagance of the park board, it is obviously unfair for the councilmen to make the comparisons they do between the figures of last year and former years. The growth of park planting, the general landscape development, and the high costs of labor and materials account for the difference.

“There are eight parks and plazas in San Diego, five of them under cultivation. This is an arid country, the soil is thin and park maintenance is necessarily expensive. The same conditions apply to our gardens. It is a great credit to this city that notwithstanding these adverse conditions, it has made its parks playgrounds and gardens exceedingly attractive and noteworthy. Balboa Park and the exposition grounds have won the admiration of the whole country. Their development has been entirely under the commission plan. Any other way means steady deterioration.

Applies To Cemetery

“What applies to the parks also applies to the cemetery, playgrounds and harbor. With the best intentions possible, the council would fail in the delicate and technical problems. Their contention is that their capable manager would get expert superintendents and foreman, just as the commissioners do. Let us see. For each commission, any mayor who has the interests of the city at heart chooses citizens of special intelligence and adaptability for the particular commissions. These persons given time to their duties, visiting other cities for ideas, studying the literature of their specialty, coming into personal touch with expert authorities and with their own superintendents and employees. They represent the non-office holding part of the people and, at the same time, are closely connected with the general administration of the mayor and council, and particularly under the financial regulations of the city government.

“I join Mayor Wilde in recommending that these charter amendments to abolish playground, park, harbor and cemetery commissions be voted down.”

December 5, 1920, San Diego Union, 4:6. James B. Gauchen reviews work of city commissioners.

December 5, 1920, San Diego Union, 18:3-5. Board of Education says park school site will save at least \$300,000 for taxpayers; issues final statement urging electors to vote for granting of land asked (illus.).

Telling the taxpayers that it will be necessary to spend \$200,000 for school sites if the proposal to set aside 17 acres in Balboa Park for school purposes is not carried at Tuesday's election, the city board of education yesterday issued its final statement on that subject. The statement follows:

"If proposition no. 1 on the ballot Tuesday fails to carry, it will necessitate the purchase of approximately six city blocks for school grounds. This purchase will have to be made, as buildings must be built to take care of our crowded conditions in the schools.

"The approximate cost of six city blocks would be \$50,000 per block, or \$300,000 for school sites for the two proposed schools. In addition to this, the city will lose the income in tax collections for all time on all property purchased for school purposes. This statement shows why the board of education is asking the city to grant the necessary school sites from the park land. It will be a great addition to the park if the school district is allowed to improve the 17 acres near Upas street and Park boulevard.

"The piece of land in question is indicated on the printed map of the park. If the school district uses this piece of land it will be improved and beautified in a way similar to the present high school grounds, and will relieve the park commissioners of spending money for its improvement, which means a great deal when you consider that so far this year the commissioners have spent \$125,000 in maintaining the park.

"The Board of education has been compelled to purchase a nine-acre tract in the southeast part of the city, near Logan school, at a cost of \$45,000. Before buying this, a careful investigation was made of property in different parts of the city. It was ascertained that in case the board was compelled to purchase school sites bordering on the park, in place of using the park land, they will not only spend a large sum of money for the city, but it will be necessary to close streets and destroy homes or move them away.

"If the taxpayers will consider the number of abstracts, condemnation proceedings, etc. necessary they will realize the added financial burden. The whole question is 'Shall the board of education be authorized by the voters of the city to beautify the acreage absolutely necessary for a school on the border of our 1400-acre park, and thus save the city a tremendous outlay for school sites purchased from private owners, and at the same time beautify these pieces of land in the park, which at the present time are entirely neglected?'

"Remember that no funds were voted in the recent bond election for grounds for these two schools. It will be necessary to bond the school district again to purchase the sites in case proposition No. 1 is not carried. This will delay the construction of school buildings which are absolutely necessary.

"The park belongs to the people, not to the park commissioners. It is up to the people to decide next Tuesday whether the school board may use the necessary grounds for these two buildings"

December 5, 1920, San Diego Union, II, 1:7-8. Commission Form is Wrong in Principle, says Moody; City Auditor addresses voters and taxpayers, endeavoring to prove proposed charter amendments will place municipality upon more businesslike basis and establish more efficient methods; illustrative examples given.

(Excerpts)

In this discussion of the proposed amendments, I wish to confine myself to a consideration of these measures that are vigorously opposed, namely, amendments nos. 4, 7, 8, 9 and 10, which provide for the placing of the administrative functions of the city playgrounds, water impounding system, parks and plazas, harbor affairs and cemetery, under the jurisdiction of the manager of operation.

These commissions, being appointed especially to care for these departments, are interested solely in the success of their individual department and not in the conduct and administration of the affairs of the corporation as a whole, which results in a lack of coordination between these various departments, conflict of authority, extravagances in the expenditure of money, each commission vying with the other in its endeavor to make the best showing possible without counting the cost to the taxpayer; their tendency is toward extravagance and inefficiency. It appears that their principal occupation is an everlasting scramble for money and more money, until our tax burden is rapidly becoming unbearable.

Now, Mr. and Mrs. Voter and Stockholder in the great corporation of the City of San Diego, why does not Mr. Spreckels adopt this splendid method which we have enforced for the city of San Diego in the management of his business; why does not Mr. Spreckels discharge his efficient manager and appoint a number of commissioners, good men and true, who will have his interests at heart, and who, by reason of the honor of serving a worthy cause, without pay or reward, will take charge of his several departments? Why does he not say to his worthy and honored commissioners: "I have appointed you to this responsible position because I realize that you are public-spirited men, men above suspicion and reproach, men in whom I place the utmost confidence. You will take great pride in making this part of my business a success; therefore I am intrusting you with the sole care and management of my interests. I authorize you to expend by money as you see fit."

December 5, 1920, San Diego Union, Classified, 4:5-6. Board of Park Commissioners declares City Council is unfair; answers charges.

December 5, 1920, San Diego Union, Home News Section, 1:1-3. Frank P. Allen, Jr. architect of exposition, says commission ought to be retained at election; also urges voters to vote against giving any part of Balboa Park for public school purposes.

Frank P. Allen, Jr., architect, who had a prominent part in the building of the San Diego Exposition, is one of these working hardest to defeat the proposed charter amendment that would abolish the park commission. He believes that to do away with the park commission would be a bad thing for the parks and for the city.

Allen also is opposing the item that would give 17 acres at the north end of Balboa Park to the city school system. He asserts that this proposal is both bad for the park and for the schools and should be defeated.

Mr. Allen, yesterday, sent the following letter to **The Union** outlining his views on both subjects.

Editor, **San Diego Union**: At the forthcoming election there are several matters to be voted upon concerning which I have special knowledge and experience that I wish to place at the service of the voters before they make their decision.

The first of these matters is the proposal to do away with the park commission and place the management and operation of the park in the hands of the city council. This is Item No.8 on the large ballot.

I believe that this will be a very unwise thing to do and the result can only be bad for the park and for the city. The proper development and upkeep of parks requires that very specialized knowledge of an extremely varied characters, combined with an appreciation and genuine love for the work. To the casual observer the development of the park appears merely a matter of individual taste, whether a road shall be run here or there, or whether one tree or a different one should be planted and that these matters are decided purely upon the taste or prejudice of those in power, and that after this is done the maintenance is merely a matter of mowing the lawns and watering the flowers.

This is far from being the case. Everything that is done in a park is or should be done for a very different reason and with regard to its part in the whole scheme of park development. In any park system, and especially in one like ours, which will be under development for many years to come, this means that many important questions continually are being put to the park commission for its decision, and in reaching

these decisions it is guided by its past experience, by its plans for the final scheme when the park shall have been fully developed, and by practical considerations of the moment as well as the horticultural limitations and aesthetic ideas toward which it is struggling.

In addition to these, emergencies continually are arising which must be met not only immediately but wisely. The good city council, meeting with the best intentions in the world, would not have sufficient knowledge to make the proper decisions, nor would it afford to spend sufficient time to acquire this knowledge. In fact a new park commissioner, even though he be a man of excellent education, civic pride and horticultural experience and a liking for the park work, is seldom of much value until he has become a member for at least a year. For this reason many cities have found it wise to have a board of five or more members, serving terms of four or more years, and in this way the city gets the benefit of the experience gained by the commissioners and the continuity of the park work is assured.

Parks cannot be properly developed under a management that constantly is changing. Each park must be developed as a whole in itself and also as a unit in the entire park system. The results take years to accomplish and it will take as many more years to change them if they are not satisfactory. If the decisions in this work are left with the city council, which is changing every two years, the park will be subject to the whims and personal likes and dislikes of every incoming councilman, and the results can only be chaotic. The fact that the cost of the work will be wasted is not so important as the money can be replaced, but the wasted years cannot be replaced.

Future Development

A great deal of work has been done in Balboa Park in preparation for future development. To the layman practically all this work is meaningless. He sees only a grove of eucalyptus along the border, the trees in a canyon site, or some shrubbery near a road, and to him it seems very casual. Every bit of it however has been done with a definite scheme in mind. The park commission expects to build a boulevard passing the eucalyptus grove. When this is done, many of the trees will be moved away to open up vistas and the trees used to reinforce other points and make a growth stronger and heavier. Without the reasons for deciding upon these particular points, no one, not even a member of the city council, is competent to say whether such work shall be continued, stopped or changed in part.

There is another great reason that the park will fare much better in the hands of the park commission than in the hands of the city council. This reason is that parks need active defenders to protect them from neglect and encroachment. In most cases park commissions have to fight to get their appropriations and then continually fight to keep them and prevent the money being diverted for some other purpose. The commissioners have to listen to the noisy cranks, who have wonderful ideas as to why the plans should be changed, the property owners bordering the park who demand that a park entrance should be placed opposite their property or that a grove of trees be cut down or else that a grove of trees be planted or that something with red flowers be placed there.

Efforts Of Few

I wish also to point out that there is not one single thing in the whole of the San Diego park system, not one bit of roadway or even one spear of grass, that had been done by or because of any city council. The whole history of the park development in San Diego is the story of the continuous effort of a comparatively few individuals, working first as private citizens, at a later period as a committee of the chamber of commerce, and finally as the park commission. They work without salary, without hope of reward, and even without receiving credit for what they have done. Balboa Park as it stands today is entirely the result of their efforts. Can anyone imagine that the results would be equally good if the park had remained under the sole direction of the city council, even such a council as we have now?

The other matter of which I wish to speak is Proposal No. 2 on the small ballot, which proposes to give to the school board a certain tract of 17.4 acres on the northern part of Balboa Park. This area, as proposed, will extend along the north boundary of the park, beginning at the entrance on Park Boulevard and

running west 989 feet, then running south into the park approximately 1300 feet to within a few feet of the building that was used for the tractor exhibit during the exposition, then skirting along the back of the Indian Village to the park entrance.

The boundary of this tract, as it is proposed, is extremely irregular and is purposely made so to avoid the canyons and take in only the level ground on top. This plan has been worked out so successfully that the school board will get all of the level ground lying between the tractor building and the north park boundary, except a small strip along the Isthmus, and, at the same time, all of the canyons will be left with the park board to develop and maintain.

Bad For Both

This proposal is very bad for the park and for the school board and should be defeated. In the first place the granting of this part of the park to the school board will absolutely block for all time the development along the north side in the park from Cabrillo Canyon to Park Boulevard. It is hoped that sometime in the future there will be a broad boulevard, similar to Park Avenue (Sixth Street from Date to Upas) across the whole north end of the park, which will connect with another boulevard along the east side of the park. Then with the further development of the road section in the southern part of the park, we will have a magnificent boulevard six miles long around Balboa Park. Probably it will take years to accomplish this, but the work was started in 1911, and the planting on the north and east boundaries was laid out with this boulevard in mind. Each year a little more work is being done. And when they are able to afford the grading and paving of some parts of the roadway, the trees and shrubs will be already well developed. The grant which is proposed for the school runs clear to the extreme north boundary of the park and blocks these boulevards absolutely. In fact, it so effectually shuts off the northern part of the park that it will never be possible to connect the northern part of Cabrillo Canyon to the main park, and anyone driving through will be obliged to go outside the part and then reenter. This grant will cut off access from the mesa of two beautiful canyons in the northern end of the park, and will cut off all access to the mesa points between them, except by climbing up from Cabrillo Canyon. These canyons and mesa points will have to be developed someday for their effect on the rest of the park, but will be utterly useless in themselves as they will be entirely inaccessible.

Furthermore, I feel very strongly opposed to the granting of this or any part of the park for school purposes. From 1910 to 1915, I was the chief architect and director of the works of the exposition. For more than three years of this time my officers were in the Administration building in the exposition grounds, and I walked, rode and drove over the grounds at all times of the day and well into the evening. My observations during this time clearly convinced me that no school should be located in any park.

Means More Money

Further than this, no building or other utility for the public should be located so far away but should be as near as possible to the center of this district. If the proposed school is built in the park, it will be at the extreme southern end of the district it serves and as far as possible away from three-quarters of the district. This means that instead of saving money on our schools by getting a free site, we will actually have to spend more money in the near future to build other schools closer to the district they serve.

I wish to urge upon the voters that Proposal No. 8 on the large ballot and Proposal No. 2 on the small ballot should be decisively defeated.

To me the whole scheme of doing away with all the city commissions and placing the work of these commissions in the hands of the city council seems not only wrong but ridiculous. Any man of average intelligence can accept appointment to a commission with the reasonable hope that he can learn enough of the work of that commission to be of value within the limits of his term, but to imagine that such a man, being elected to the council, would acquire all the necessary knowledge and information regarding the work of all commissions, covering the harbor, our parks, our water system, playgrounds, cemeteries, etc., as well as the multitudinous duties of the city council, is to imagine that we will secure councilmen who are mental

colossi, of a type that are not apparent to the casual observer of the present city council. Much information may be dispensed around the cracker barrel of a corner grocery and a knowledge may be gained in bathrooms, but such learning scarcely equips a man to carry out the entire development of our city.

Very truly yours,

Frank P. Allen, Jr.

December 5, 1920, San Diego Union, Home News Section, 1:4-5. EXPLANATION OF PARK MAP

The following explanation of the map printed herewith was furnished by the Park Board.

Map showing proposed school site on north boundary of Balboa Park on Upas Street, between Park Boulevard and Richmond Street.

Included within the heavy lines in the map is the tract of 6-1/4 acres approved by the Board of Park Commissioners as a school site, also the extensions inclosed in the area marked by the dotted lines, comprising altogether 17 acres.

The original site agreed upon commences at a point 130 feet east of the west line of Richmond Street, thence 678.90 feet to the east line of Herbert Street, thence southerly 400 feet, westerly 678.90 feet, then northerly 400 feet to the place of beginning.

The proposed site to be voted on comprises the whole area from 130 feet east of the west line of Richmond Street to Park Boulevard, a distance of 989.53 feet, thence southerly 70.12 feet, southwesterly 495 feet, then southerly 361 feet to the Tractor Building. The westerly line runs from a point 130 feet east of the west line of Richmond Street, 950 feet to the edge of Canyon, and the south line along the edge of the canyon 950 feet to a point, thence southeast 200 feet, thence east 829 feet to the southeast corner of Alameda Drive and the Tractor Building, a total of 17.43 acres.

The enlarged site has not been approved by the Board of Park Commissioners. In fact, they were not consulted on the matter, nor was any landscape authority consulted, the whole question having been decided upon by the Common Council and the Board of Education. The Board of Park Commissioners, as appointed by the mayor and confirmed by the Common Council, are entrusted with the administration, improvement and integrity of the park system, and deem it against public park policy and the integrity of Balboa Park to agree to the proposed area to be voted upon and permanently removed from the park system.

Included in the 17 acres is a large part of the area set aside for the construction of a fine zoological garden, the plans of which are being made by the Zoological Society in connection with the Park Commission, and on which the Zoological Society has spent a large amount of money.

The road leading from the Alameda Drive to the municipal auto camp and Cabrillo Canyon will have to be abandoned, making it inconvenient to reach not only the camp but the canyon road to the west side of the park by having to drive out of the park and on Upas Street to Richmond Street entrance to reach those locations of over 130 acres in this territory of the park. It will also take away the area on the west side of the entrance at Park Boulevard and Upas Street removing control of the improvement of the future planting and ornamentation of one of the main entrances to Balboa Park as well as the landscape development of the adjacent area.

December 6, 1920, San Diego Sun, 11:1. City Attorney's Office say Park Commission cannot lease Park for movie studio.

December 6, 1920, San Diego Union, 1:5, 3:6. Both sides in hot charter fights says victory is theirs.

December 6, 1920, San Diego Union, 11:5-8. Henry C. Ryan, Park Commission president, says political machines trying to win by specious arguments.

December 6, 1920, San Diego Union, 15:1-2. Hotel men foresee defeat tomorrow for amendments.

December 6, 1920, San Diego Union, 15:2. Golfer praises Park Commission; says Municipal Links are testimonial to its foresight and enterprise.

December 6, 1920, San Diego Union, 15:3-4. Joseph W. Sefton, Jr., banker, urges defeat of amendments to abolish commissions; opposes school grant.

December 6, 1920, San Diego Union, 15:3-4. Board of Education requests voters to grant park lands for playgrounds and schools.

Urging passage of the measure in tomorrow's election, granting land in Balboa Park for school sites and playgrounds, the city board of education yesterday issued the following open letter to the voters of San Diego:

"At Tuesday's election we are asking you to vote in favor of the proposition granting two pieces of land from Balboa Park for school sites and playgrounds. You alone have the authority to give this to the school district. The amount asked for is simply enough for building site and playground.

"The building planned, for which you have voted the money, will face Upas street, near Park boulevard. The 100-foot front along Upas street will be a lawn with shrubbery on the east and west sides of the building. Back of the building, to the south, will be a well planned playground with tennis, volley ball, handball courts, baseball diamond, and the usual equipment of a playground. Every square foot asked for is needed in order that this plan may be carried out. There is no playground in this part of town, hence the city should make adequate provision at the new school that is planned for the north side of the park, near Upas street and Park boulevard. It will serve thousands of children for years to come.

"If this land is not voted now by the people, it cannot be granted until the legislature meets again two years from next January.

"The tract asked for has not other use. A careful survey of school enrollment shows that it is an ideal central location for about 1200 children to attend school. Hence the board of education must obtain a school site in this neighborhood. If it is not granted from the park, the district will have to make a purchase expending approximately \$300,000. The city also will lose the tax income from the property purchased.

“We are asking you to dedicate these small parcels of land out of your immense 1400-acre park to playground. Our purpose is simply to give the necessary opportunities for education, mentally, morally and physically for the thousands of children that will grow up in these neighborhoods.

“All progressive cities are considering the welfare of children and have built up fine playgrounds in different parts of their beautiful parks.”

December 7, 1920, San Diego Union, 4:3-4. W. J. Mossholder urged negative vote on all amendments.

December 7, 1920. PROPOSITION 1: 17 ACRES FOR ROOSEVELT JUNIOR HIGH SCHOOL - Yes - 6,309; No - 5,308.

PROPOSITION 8: GOVERNMENT AND CONTROL OF PUBLIC PARKS, PLAZAS AND SQUARES PLACED IN THE OPERATING DEPARTMENT, UNDER CONTROL OF COMMON COUNCIL - Yes - 2,809; No - 8,562.

December 8, 1920, San Diego Union, 1:1-2. Anti-race track law beaten; all City Commissions remain; Council plan loses; Park school decision site doubtful; Marine Base refund to subscribers approved.

December 12, 1920, San Diego Union, Home News Section, 6:3-4. Carroll De Wilton Scott declares evidence of oak trees here in early days insufficient.

December 13, 1920, San Diego Union, Home News Section, 10:3. Dr. W. H. Raymenton, vice president San Diego Museum of Natural History, denies museum is “a junk pile.”

December 14, 1920, San Diego Union, 4:4-6. Council sharpens paring knife for 1921 estimates; members declare departments have “run amuck” in making requests for their next year's expenditures; say exorbitant figures would mean a tax rate of \$3.649.

December 15, 1920, San Diego Union, 7:3. Charles H. Sternberg, curator of paleontology at Natural History Museum, has been engaged for the last six months in mounting a number of old fossil bones of extinct mammals, fishes, lizards, which he has collected in his numerous “fossil hunts.”

December 15, 1920, San Diego Union, 9:3. Children to have big day at Park; **Evening Tribune's** best babies' contest to feature occasion this afternoon with Colleen Moore, movie star; prizes amounting to \$1,000 being offered.

December 17, 1920, San Diego Sun, 1:1. Exposition here will be annual affair; Midwinter Exposition is planned.

December 17, 1920, San Diego Sun, 20:1. Plan theater for children; move backed by Parent Teachers Association; may be located in Balboa Park.

San Diego children may soon have a little theater all their own where every Saturday afternoon children's motion pictures and playlets will be given. This movement is now underway with Leslie H. Carter, who has previously established many such theaters, as director, and Mrs. Florence Hersinger as assistant director. The movement is backed with the support of the Parent Teachers association, through the personal efforts of Mrs. Curtis Hillyer, president of that organization. The movement has the cooperation of B. C. Johnson, city superintendent of public schools, of the Community Service, and many other organizations and businessmen.

The little theater will be self-supporting and almost a non-profit organization.

A movement is now underway for a location in Balboa Park where the little theater may have a permanent home.

All parents who wish further information in regard to the Little Theater, and especially those having children between the ages of 6 to 14 can call at any time during the day for from 7 to 9 in the evening on Leslie H. Carter, room 29, 729 Broadway, where full detailed information will be given. The instructions to the children will be given free.

December 17, 1920, San Diego Union, 4:3. Ancient and modern "remains" in Natural History Museum exhibit; collection of curiosities will be opened to public tomorrow in building on the south side of the main driveway east from the Plaza de Panama; prizes offered to children.

December 18, 1920, San Diego Union, 3:3. Reverend W. B. Stevens, Episcopal prelate, to speak at pre-Christmas services in Park tomorrow afternoon; massed surplice choir will sing.

December 18, 1920. San Diego Union 5:3-5. Annual Mid-Winter Exposition in park announced by California Exposition Company; plans to feature countries of Pacific; Alexander Reynolds, Jr., president; H. J. Penfold, secretary; will open January 1, 1922.

December 18, 1920, San Diego Union, 5:6. Museum if like Garden of Eden in full bloom; beasts and birds, butterflies and bees appear on display ready for opening.

Officers and members of the Natural History Society of San Diego, volunteers, from the park force, and members of the Floral Association of this city, have been engaged the last few days in preparing and decorating the new Museum of Natural History in Balboa Park for the opening today.

In its floral setting the museum has taken on an appearance not unlike that of the Garden of Eden, with its birds, beasts, butterflies and bees in bowers of living green and flaming flowers. It is the hope of the institution that children especially will find great interest in the beautiful minerals, the multi-colored shells, the numerous specimens of fishes and the thousand and one other things on exhibition.

A special attraction for the boys and girls will be the "Children's Corner." C. A. Fries, the well-known artist, has painted a background of mountains and forest on the broad expanse of the walls with a brook winding its course through a picturesque valley. A wide variety of birds and beasts are to be seen, half hidden in real bushes and placed behind racks and trees.

Frank Stephen's book, "California Mammals," will be given as a prize to the boy or girl under 16 years of age who correctly names the greatest number of animals in this group. An artistic souvenir, a nature poem, by Carrol De Wilton Scott, will be presented to every participant in the naming contest.

Ten-minute talks on nature subjects will be given in the lecture hall and the museum will be open from 10 a.m. to 5 p.m. No admission will be charged.

December 19, 1920, San Diego Union, Classified, 3:2-3. Natural History Museum at park formally opened; thousands who visited new institutions surprised at magnitude of exhibits.

December 20, 1920, San Diego Sun, 3:5-6. Museum is open to public; curator writes of plans, by Carroll De Wilton Scott.

The Natural History Museum opened its doors to the public on Saturday. The hundreds of visitors were entertained as far as possible by members of the staff. It had been decided that the opening would be an informal welcome from the museum of the people of San Diego. Hence there was no program and no addresses of dedication were made. But if the curator of education had said what was on his mind it would have sounded like this.

I believe the Natural History of San Diego will be a modern museum the ideal museum the museum of the future. The museums of the past have been storehouses of curiosities, mostly under lock and key, and seen only by the curious-minded, in fact, never intended to be seen save by the few. The old type of museum hid itself away from life, and in its proud isolation suffered the fate of the shrinking and the selfish --- it was ignored by the live world of men and women. But the new museum will be primarily an educational institution.

It will, course, have a research department for advanced students. But its main energy will not be in that direction because research can be carried on to greater advantage in larger and special institutions. Besides not one person in 10,000 is fitted for or interested in research. The new museum is more interested in giving over to the 10,000 the knowledge which has been accumulated by the specialists of the past and present. Knowledge of nature will no longer be kept under lock and key, but given freely to all who ask.

Nature is for everybody to know and enjoy. The crying need of the world now is for nature lovers. The number of scientists will take care of itself.

Being a teaching institution, from the arrangements of its exhibits to its outdoor excursions, its watchword will be service. It will welcome to its rooms any man, woman, boy or girl who wants to know about any branch of natural history. It will be proud to help anyone to a better understanding and a deeper enjoyment of nature, because it knows that a correct understanding of man's place in nature is one of the marks of an educated personality. As long as we are dependent upon the natural world for physical sustenance are healthful recreation, so long will the museum be an indispensable force in the educational life of the people.

The museum is not an end in itself. It is only a guide and invitation to the treasures of the outdoors. But with its collections and especially its pictorial exhibits, its habitat groups of plants and animals, it can foster a lover of plants and animals, rocks, birds, shells, weather and all. For it believes that every person, especially if he be a resident of the city, should have an outdoor nature interest just for the sake of his health alone.

Important as the specimens on exhibition are as tools and material for teaching, the workers of the museum will be of greater importance to the institution as an educational force. Rows of shells, drawers of butterflies, cases of minerals are so many mummies and curios unless back of them in every department there is the collector or teacher ready to make them alive to the new seeker of knowledge and inspiration. A boy bringing a rock in which he is interested, a girl a caterpillar to find out about, a man or woman a new plant or

bird or shell to identify, to each one of these the museum will reach a hand of welcome and through some special science department of the general educational bureau give the desired aid and encouragement.

The museum of the future will be build solidly and generously upon the ability and helpfulness of its workers. Its value to the community will be determined more by the human beings than by the specimens within its walls.

The museum of the future will help to save the wild nature of proven value because it knows how much the generations to come are going to need and appreciate trees, birds, animals, parks and natural landscape. Therefore, it will be a leader and a center for the conservation of natural resources, water, soil and minerals, birds and animals.

But as a speaker cannot speak without an audience, so the new museum cannot reach its highest usefulness without the cooperation of those whom it seeks to serve. People of San Diego, this is your natural history museum, the only one you have. Help it be what it wishes to be. Ask favors of it, given it constructive criticism, give it duties to perform and stand back of it when it asks your cooperation. It would be overpowered now with a sense of its imperfections if it did not have the hope of youth and the power of growth. Help to make it a museum of the future.

December 20, 1920, San Diego Sun, EDITORIAL: The Pershing Memorial Boulevard.

Councilman Fred Heilbron has figured out what seems a most satisfactory solution to the Pershing Memorial drive problem, and which suggestion has been enthusiastically accepted by good roads boosters and the directors of the Pershing fund, so far as seen.

In brief, this plan is to vote a small bond issue, say not more than \$150,000 at the regular spring election next April to complete the following roads and streets in the city:

The Pershing Drive through the park; the paving of the boulevard running from the end of 12th Street up along the trolley line to the entrance of the Exposition grounds, paving the street from the east end of Imperial Avenue to connect with the new Encanto-Lemon Grove-Imperial County Highway just now being finished by the County; and complete the last link in the Los Angeles -San Diego Highway from La Jolla to the Biological Grade.

There is now \$3700 in the Pershing Memorial fund, subscribed in small amounts by public spirited citizens.

December 20, 1920, San Diego Union, 18:1. New campfire circle or outdoor theater at north end of the canyon of Painted Desert was used for the first time Friday evening at Boy Scout rally; boys arrive late but in large numbers; Third Division is recruiting actively

With the addition of tents this week this part of the painted desert is bound to be one of the most used parts of the village grounds. The camp, with the background of rock cliffs, will make a fine scene for the amateur photographers from all parts of the country, who frequent the village daily.

December 24, 1920, San Diego Union, 7:2. Impressive scene to be feature of Park Christmas celebration; procession of Elks Chanters with novel lighting will precede program tonight on Plaza de Panama.

December 24, 1920, San Diego Union, 12:3. Council asked to care for Balboa Park zoo; San Diego Zoological Society wants Council to appropriate \$5,000 for the upkeep of the zoo for the next year; assert that the granting of 17 acres of land at the north end of the park to the School District routed the zoo out of its home and made all improvements on the ground of new value; will seek new site in park.

December 24, 1920, San Diego Union, Classified, 13:1. New exposition offices to be opened in park; California Exposition Company will occupy quarters in Administration Building next week; list of officers.

December 26, 1920, San Diego Union, 1:6-7, 5:2. Horace B Day, water commissioner, asks Council to oust Louis J. Wilde from office of mayor on the grounds that he is a resident of Coronado and not of San Diego.

December 26, 1920, San Diego Union, 2:1. Elks' Chanters hold impressive open-air service; processional in picturesque setting is followed by a program of anthems, the south side of the Plaza de Panama was banked with automobiles extending almost to the Organ Pavilion, many persons preferring to view the exercises from their machines; benches flanked the east and west sides of the square; Chanters carrying lighted tapers and dressed in red and white vestments proceeded from the Prado at the west side of the Plaza to the balcony of the Varied Industries Building, while singing "Oh Come All Ye Faithful."

December 26, 1920, San Diego Union, 6:1-2. Academy of Fine Arts to open in park January 10 in Sacramento Building; Eugene De Val will be director of the Academy.

December 30, 1920, San Diego Union, 1:6-7, 2:1-3. Mayor Wilde removes Day from Water Commission; "temperamentally unfit," says Mayor.

1921

January 1, 1921, San Diego Union, 1:1-5. San Diego built around beautiful Balboa Park; fast becoming splendid cultural center of community; recreation, education find idea facilities in city's biggest park.

January 1, 1921, San Diego Union, 1:7-8 (no annual edition on microfilm at San Diego Public Library). SAN DIEGO BEAUTIFUL EXPOSITION TO BE PERPETUATED; Exposition Grounds Famed for Beauty Will Be Preserved.

Now that the San Diego Mid-Winter Exposition has undertaken the task of obtaining funds to repair and make permanent the beautiful buildings which were set up for the wonderful exposition of 1915 and 1916, residents are confident that this beauty spot will be saved to San Diego for all time.

January 3, 1921, San Diego Union, 16:3. The radio "pow-pow" last Thursday at Indian Village was a success. Gray model field set demonstrated in the compound.

January 4, 1921, San Diego Union, 10:1-8. Company opens Exposition office in Balboa Park; City Board allots part of Administration Building to Midwinter Fair concerns; H. J. Penfold, secretary, in charge; Alexander Reynolds, Jr., president of concern; plan to hold Exposition in Balboa Park for 4 to 6 months each year, the proceeds to be used to make all the Exposition buildings permanent.

January 7, 1921, San Diego Union, 7:4. Chamber of Commerce approves movement to vote bonds for paving of Pershing Drive and other roads.

January 7, 1921, San Diego Union, 7:6-7. Laborers, carpenters working on new Naval Hospital strike; contractors say men replaced; job supposed to be "open shop."

January 9, 1921, San Diego Union, Classified, 1:3. Exposition heads seek big men for advisory board; directors ask prominent San Diego businessmen to counsel.

January 9, 1921, San Diego Union, Classified, 1:4-5. Carroll De Wilton Scott advocates making Mission Bay recreation park and wild bird refuge.

January 9, 1921, San Diego Union, Society-Club, 3:2-3. Nearly 1,500 men and women attended the reception given in the Persimmon Room, Balboa Park, New Year's Day by literary societies of city.

January 16, 1921, San Diego Union, 5:6. Exposition plan arouses interest.

January 18, 1921, San Diego Union, 4:1. EDITORIAL: Preserving An Asset

Aside from all artistic or merely sentimental considerations, San Diego cannot afford to let this beautiful picture fade. Balboa Park is not a luxury to be maintained merely for the pleasure of San Diego; it is a necessary of our civic life and a profitable adjunct of our future metropolitan development. To keep this wonderful possession and to make the most of its limitless resources of beauty and pleasure is the main object of those who have organized the Mid-Winter exposition movement. Its purpose should appeal to every San Diegan, every public-spirited citizen and every lover of the beautiful in art and nature.

January 18, 1921, San Diego Union, 10:3. Prominent men to explain plan for exposition; arrangements made for musical program at mass meeting Thursday evening.

January 19, 1921, San Diego Union, 1:6, 3:1. San Diegans must act soon to save park structures; Mid-Winter exposition seems to be only way of raising funds for preserving them.

January 20, 1921, San Diego Union, 1:6-7. Interest keen in mass meeting called for tonight to consider plans for Mid-Winter Exposition.

January 21, 1921, San Diego Union, 1:8, 3:4-5. Mass meeting gives Exposition indorsement; Councilmen pledge support to movement.

January 22, 1921, San Diego Union, 4:1. EDITORIAL: An Exposition Plan

The groundwork of the great enterprise is now laid. It is only necessary to build on it substantially and permanently. In the success which we feel is assured from the beginning of the enterprise, San Diego city and county will reap incalculable benefits and all the renown attaching to a great work well done.

January 23, 1921, San Diego Union, 1:3-4, 15:3-4. Wonderful marine brigade post, most beautiful in West, will be put into commission about March 15; more than \$2,000,000 already expended.

January 24, 1921, San Diego Union, 4:4-5. Nathaniel E. Slaymaker, landscape architect, praises plan to preserve Exposition buildings; "San Diego actually has a civic center and doesn't realize it."

January 26, 1921, San Diego Union, 1:5, 5:5. Body of stranger found yesterday in Rose Garden off Laurel Street entrance into Balboa Park; foul play suspected.

January 29, 1921, San Diego Union, 6:1. The Community Theater Association, henceforth the Community Players, have moved into their new home in the Southern Counties Building; members sought.

January 30, 1921, San Diego Union, 4:1. EDITORIAL: An Exposition Feature . . . suggests planners of Mid-Winter Exposition contact Professor Herbert Eugene Bolton, University of California, for help in creating a historical and archaeological exhibit.

January 30, 1921, San Diego Union, Classified, 1:5-6. Acacias in Balboa Park blooming in golden masses, by Carroll De Wilton Scott.

January 30, 1921, San Diego Union, Classified, 7:4. San Diego County Federation of Women's Clubs indorses plan to rehabilitate Southern Counties building for a municipal auditorium; will present spring carnival to raise funds for project.

February 8, 1921, San Diego Union, Classified, 11:1. \$50,000 asked of County for fair in park; supervisors agree to contribute that sum providing it can be legally done.

February 9, 1921, San Diego Union, 9:1-3. Aimee Semple McPherson concludes series of meeting at Organ Pavilion; 8,000 in attendance; evangelist treated more than 300 cases during services which lasted about five hours.

February 14, 1921, San Diego Union, 1:4-5. Congressional appropriations totaling \$2,139,000 for naval work at San Diego contained in bill approved by House; \$1,975,000 appropriated for Naval Hospital; wards increased from 194 to 800 beds.

February 14, 1921, San Diego Union, 16:6. Council members see quick muster of four divisions; about 500 boys gathered on short notice for review at Indian Village; formal inspection made by Governor Balarezo of Lower California, Milton A. MacRae, Commissioner, Commission MacKinnon, George Burnham, president of the San Diego council, and other local officials.

February 14, 1921, San Diego Union, 16:7. Scouts relinquish old cavalry site; Executive Committee decides Indian Village will fulfill all requirements for years; will repair buildings..

The approval of extensive repairs to the village property will result in entirely restoring the appearance of the village walls and buildings to their original condition.

February 16, 1921, San Diego Union, 2:3-4. Citizens decide on drive to raise \$250,000 by popular subscription for fair; city officials, business and professional men take action at meeting; J. F. Sefton, Jr. says city's problems of water, harbor development and roads should come before exposition.

February 19, 1921, Letter, Executive Secretary, Board of Park Commissioners, to Motor Car Dealers' Association (San Diego Public Library).

Gentlemen:-

By authority of the Board of Park Commissioners, given in adjourned meeting of this date, and in consideration of the agreement by the said Motor Car Dealers' Association to the terms hereinafter set forth, permission is hereby given the Motor Car Dealers' Association to occupy Building No. 10, Balboa Park from date until April 3, 1921, and to hold in said Building No. 10 and Auto Show from March 26 to April 2, inclusive, subject to rules of the park department and to ordinances of the City of San Diego.

The Motor Car Dealers' Association hereby agrees:

- (1.) To reimburse the Board of Park Commissioners for all labor and material furnished and for any and all expenses incurred by the Park Department as a result of occupancy of park premises herein authorized.
- (2.) To pay to the Park Department an additional sum equal to 10 percent of the net profits of said Auto Show, and, upon demand, to open the books of the Motor Car Dealers' Association for inspection by representatives of the said Board of Park Commissioners in order that a proper accounting may be shown upon the records of the Park Department.
- (3.) To make no alterations or repairs to said Building No. 10 and to do no construction work therein except with the approval of the Superintendent of Parks and under his supervision.
- (4.) To comply with all rules and regulations of the Park Department and with ordinances of the City of San Diego governing parks, plazas and public squares, and to leave the premises in a clean and neat condition.

(Signed) Board of Park Commissioners by

Executive Secretary.

February 19, 1921, San Diego Union, 4:1. EDITORIAL: A Civic Investment

Every dollar invested in [the Midwinter-Exposition] is a dollar added to the capital wealth of the community. The return will be direct to every investor, like interest in any other business investment. The only car to complete success is lack of unity in the community itself.

February 19, 1921. Park Commissioners. San Diego Battalion, Coast Artillery, National Guard, given permission to use San Joaquin Valley Building (Building No. 7) as an armory.

February 19, 1921, San Diego Union, 6:4-5. Coast artillery battalion, California national guard, will have armory at Balboa Park in Building No. 7 which lies between the Plaza de Panama and the goldfish bowl; Park Commissioners granted permission yesterday; there is room inside the building to permit drilling on rainy nights and plenty of room in the Plaza de Panama to drill an entire battalion.

February 19, 1921, San Diego Union, Classified, 11:1. Lecture series on city planning opens Thursday; speaker will be Dr. Carol Aronovici; lectures timely in view of the forthcoming report by Frank P. Allen, Jr. relative to waterfront improvements and beautification.

February 19, 1921, San Diego Union, Classified, 12:1. Large reception in rotunda to compliment George W. Marston; event to be leading feature of opening of California Quadrangle; the walls of the rotunda are now decorated with six large murals by Carlos Vierra, nine murals by Gerald Cassidy of New York, which were in the Indians Arts Building, and three new murals by Henry Lovins; frieze of Aztec architecture by Jean Berman Smith have been rearranged.

February 20, 1921, San Diego Union, 15:5. Everything in readiness of spring folic; event to begin tomorrow night with ball at Cristobal Building; proceeds to be used to convert Southern Counties structure into an auditorium.

February 20, 1921, San Diego Union, Classified, 9:2-4. Redecorated California Quadrangle reopened with reception; occasion was to do honor to George W. Marston as head of the California State Building Commission; throng of art lovers crowd spacious rotunda and galleries; walls, floor and balustrade around the balcony have been tinted an old ivory shade that has been given the proper mottling effect productive of the color of Tennessee marble; columns that support the gallery around the rotunda have been changed from round to square pillars, whose lines are in harmony with the straight heavy columns and pillars placed on exhibition as replicas of Maya hieroglyphic stones; frieze by Mrs. Jean Berman Smith, formerly hung in the various galleries, now incorporated in balustrade surrounding the rotunda; four panels by Henry Lovins of

this city representing Maya life are in the rotunda and mural paintings by Carlos Vierra depicting ancient civilization are on walls underneath the gallery; art and architecture exhibits of ancient and modern America are to be found in the galleries forming the quadrangle; Persimmon Room was gathering place for visitors last evening.

February 23, 1921, San Diego Union, 1:4-5, 3:3-4. Carnival spirit rules city throughout frolic program; pageant composed of floats of historic significance precedes circus exhibition at Stadium; 10,000 people attend circus; carnival concluded with dance at Cristobal.

March 1, 1921, San Diego Union, 4:4-5. Dr. Edgar L. Hewett asks support for San Diego Museum.

Not fewer than 10,000 passed through the museum during the four days following the reopening of the California quadrangle. That number is considered a large attendance for an entire month in museums by cities much larger than San Diego. It is unnecessary to make any claims for the museum. Those of our people who care for art and science and the thousands of cultured travelers who sojourn in San Diego for pleasure rather than for business opportunities are most generous in their praise of it. Every expression has been heard so far to the effect that this is a priceless possession of this city and state. The purpose of this statement is to acquaint the people of San Diego with some important facts concerning the museum and to request their cooperation in maintaining it.

Ancient America Art

The permanent quadrangle, consisting of the State building and Fine Arts building, contains the museum of ancient American art, showing the achievements of the native American peoples of ages ago; collections illustrating the culture of the Indian tribes of the southwest and of California in recent times, and native village life from Alaska to Patagonia; rooms especially provided for official use; and the rooms devoted to social purposes which became noted during the exposition as the women's headquarters, including the famous persimmon room. These rooms are now devoted to exhibitions of modern American art, an oriental collection, the museum library and officers, and an excellent heating plant which warms the entire quadrangle.

The Science of Man museum is not so fortunately housed. This unique collection, illustrating the physical evolution of man through the ages, and the early steps in human culture that have led to civilization, has no parallel in the world. To it is being added the Joseph Jessop archery collection, without doubt the most complete and valuable to be seen in any museum. This building also is provided with a good heating plant. It is to be regretted that the Science of Man museum cannot be in finished fireproof buildings, where its safety would be assured and the material, as an educational exhibit, brought to its highest efficiency. This is something to work for. Its loss would be irreparable.

Unique in Make-Up

No effort is being made to build a museum of vast size, but instead one that will illustrate a few things of great importance in a manner not to be seen anywhere else. Whatever distinction it has attained is due to its unique character. This places it among the half dozen most important museums of the country. It will be proper here to call attention to how little this museum has cost the people of San Diego.

1. The immensely valuable site cost nothing. It is on the public park.
2. The California Building, one of the finest architectural achievements in America, was built by the state.
3. The Fine Arts and Science of Man buildings were erected from the sum voted for park improvement in building the exposition of 1915.
4. The original collections, cases, furniture and other equipment were secured with an allotment of \$100,000 from the funds subscribed by the exposition stockholders. With the assistance of the Smithsonian Institution and the Archaeological Institute of America, the School of American Research planned, collected, assembled and installed the material during the years 1912, 1913 and 1914. Valuable additions have since come as gifts and loans.

Department Added

5. The exposition corporation at the close of the fair, transferred the property of the department of science and art to the San Diego Museum association for the purpose of founding a permanent museum, as contemplated from the beginning of the exposition. The California state commission and the city park board granted the use of the buildings above named for

the purposes of the museum as long as the association continues to carry on its part of the contract.

6. The museum association has conducted the museum free to the public for the last four years at an average annual expense of \$10,000. This sum has been derived from the following sources: The fees (\$5 a year) of an average of 300 corporate members; the fees of a few life members (\$100); the contributions of three or four sustaining members (\$500 a year); the contributions of two or three patrons (those who have given \$1000 or upwards); a small cash balance transferred to it by the exposition corporation to assist in maintaining the collections.

The museum as it is today, including buildings, could not possibly be built anew at a cost of \$1,000,000. It is a perpetual asset to the city and state. Improved as it has been during the last year by the completion of the California Building and its reinstallation. It will be one of the chief assets of the proposed mid-winter exposition, and it is the desire of the board to make it contribute to this purpose to the fullest extent. It will help toward the preservation of the architectural features of the park, for which public sentiment in San Diego is overwhelming.

Assured Fund Essential

This brings us to the final statement which must be made at this time concerning the museum, and it is one which must have the serious consideration of every citizen. It has cost \$10,000 a year to keep its doors open to the public, its buildings in habitable condition, and the collections reasonably well cared for. Twelve thousand dollars a year is the minimum on which it can be run with any margin at all for development. It has never received a dollar for maintenance from public taxation. The small cash inheritance from the exposition is exhausted. An assured maintenance fund must be found//

The board has decided that the first essential step must be the securing of not less than 1,000 members at the annual fee of \$5. The steps for raising the additional amount needed are now under consideration. The plan of charging admission to all non-members, as in most eastern museums and art galleries, with only one general free day, has been proposed and is being considered. Under any arrangement made with the mid-winter exposition, the museum membership card will be duly honored. Some valuable bequests have been made to the museum which will become available in future years.

Means of Assistance

It is hoped that everyone interested in the welfare of San Diego will respond to this appeal by calling the museum secretary and asking to be enrolled for membership. There must be many whose interest extends further than simply being a member. The following citizens stand ready at all times to advise those who desire information and who will consider helping in any way with the permanent financial foundation of the museum.

George W. Marston, G. Aubrey Davidson, Alice Lee, Wheeler J. Bailey, Mrs. W. P. B. Prentice, Duncan MacKinnon, Alice Klauber, Dr. Fred Baker, Mrs. Anna Connell, William Templeton Johnson, Edgar L. Hewett. Membership blanks may be obtained at the museum office and remittances should be sent to the San Diego Museum, Balboa Park. The month of March will be devoted to this campaign for the permanent founding of the museum.

March 1, 1921, San Diego Union, 11:5-6. "La Bella Sevilla," Beatrice Dominguez, Spanish dancer of Exposition, dies.

March 2, 1921, San Diego Union, 4:1. EDITORIAL: Balboa Park Museums

The citizens of San Diego will certainly respond to Dr. Hewett's appeal and make the museum features of their beautiful park a dominant incentive to their civic activities.

April 18, 1921. San Diego Union, 4:7. READERS' VIEWPOINT.

Editor: I quote the following from **The Union** of April 14:

"The largest open air organ constructed in any city of the Rockies [sic] has just arrived at the University of Virginia and is now being set up as part of the equipment of the new McIntire Greek Amphitheater."

This paragraph is of special interest to me, for it happens that I have been engaged to go east next month to give the opening recital on this new organ.

The University of Virginia is --- or was --- at Charlottesville, Virginia, but now that it has been moved to "the Rockies," I will not have to travel so far to play my program!

Incidentally, why do people always speak of "the largest organ," as though mere size were the only test of merit?

Having played occasionally on organs loudly proclaimed to be "the largest," I can testify that some of them are very defective and lacking in many of the features which are essential in a good instrument.

The Spreckels organ at the park, at which I have the honor to preside, is by no means one of the largest in the world, but I can safely say it is one of the best. Perhaps someday we shall learn to regard quality and not quantity as the real test of these instruments.

Yours very truly,

Humphrey J. Stewart

April 20, 1921, San Diego Union, Classified, 11:1. A. B. Spreckels presents life-size statue of John McLaren to San Francisco.

May 16, 1921, Letters, Thomas Faulconer, Executive Secretary, Board of Park Commissioners, to Rev. Chas. T. Murphy, Chairman, San Diego, California.

Dear Sir:

The request of your committee for permission to utilize the East half of the first floor, Sacramento Building, Balboa Park, as a recreational and amusement center for men of the U. S. Navy on shore liberty, under auspices of the Seaman's Commission of the Protestant Episcopal Diocese of Los Angeles, has been filed with the Board of Park Commissioners, and the following action thereon was taken:

Permission for above described use of the premises named is hereby authorized until such time as the said premises may be required for other purposes, on the following conditions, to wit:

- (1.) No construction work nor structural alterations shall be made except with the expressed approval of the Board of Park Commissioners or its superintendent.
- (2.) The Board of Park Commissioners shall be reimbursed for electric light consumption, gas consumption, labor or any other expense incurred as a result of such use of the premises.
- (3.) That this permit may be terminated at any time by notice in writing, and the premises shall be vacated within ten days from the date of delivery of such notice.
- (4.) That the premises shall at all times be under supervision of Rev. Frank Thompson or other person of authority, who shall maintain order and protect the premises from damage, and that the premises shall be closed when such supervision is lacking.
- (5.) That the premises shall be left in as good condition as on the date when occupation under this permit shall begin.

(Signed)

Board of Park Commissioners
Exec. Secy.

Above terms hereby accepted by San Diego Convocational Committee, Protestant Episcopal Diocese of Los Angeles by (Signed) Charles T. Murphy, Chairman

City decided to remove all save the permanent buildings; \$40,000 was raised and buildings were repaired.

June 7, 1921, San Diego Union, 4:1. EDITORIAL: The Civic Auditorium

The Balboa Park auditorium now in process of construction under the direction of the Civic Center and about 20 cultural organizations will add an essential element to the progressive enterprises underway in this community.

The building chosen for the purpose is the Southern Counties building of the San Diego, California exposition, one of the handsomest structures in the park, and, at the same time, amply commodious for all purposes to which it will be devoted. Two paramount objects will be achieved in this enterprise --- the permanent preservation of a beautiful architectural conception and adequate provision for the accommodation of assemblies of any magnitude. Seldom has this combination of the artistic and the thoroughly practical been so felicitously effected. The Southern Counties building was designed in composite replica of every phase of the Spanish Colonial order of architecture. Its facades, interiors, corridors, towers, arches, roofs and portals are reproduced from originals of some of the most famous structures in the world included within the Renaissance and Moorish forms; these decorative features have a lineage in direct descent from the architectural arabesque art of the Alhambra and the Escorial through the cathedral forms and their modern modifications in Colonial America, some of which was the product of the genius of native Americans in Mexico and South America. Never before has the experiment of this composition been attempted, and the praise for its successful accomplishment must be award to Goodhue, who conceived the general plan in the hope that future generations of California architects might find in it a basis form upon which to build a true California order of their constructive art. In view of all the circumstances involved I this uniquely artistic result it would have been a vandal act to destroy this magnificent building.

The women of San Diego have undertaken not only to preserve the Southern Counties building in Balboa park; but they have arranged to make practical uses of it as a civic asset. The auditorium, which these women propose, has been long desired as a necessary adjunct of the city's public and official activities; but other public necessities have been deemed more pressing and this one had to wait. As it is, the auditorium will not cost the taxpayers a dollar of tax money: when it is completed it will be a contribution to the community by the individual citizens through the popular methods devised by the women of the Civic Center and its collateral organizations.

With the completion and equipment of this splendid structure San Diego may enter the competitive list of "convention cities" on equal terms in any bid for national and state assemblies. We can offer every facility for these conventions in the most attractive environment on the American continent, amid beauty,

natural and artificial, unsurpassed anywhere else in the world. What the women of San Diego are doing for this community in this regard will be counted in millions of dollars within the next decade; and the fame of our city will be trumpeted far abroad from the lips of thousands who come in doubt, to leave with naught but praise of that which we will give them.

June 7, 1921, San Diego Union, 4:5. THE READER'S VIEWPOINT: Enthusiastic Golfer Issues Rallying Cry

Editor **San Diego Union**: I have read with considerable curiosity and wonderment a recent article in the daily press wherein the board of park commissioners were quoted as favoring the construction of a large athletic field in Balboa park, said athletic field to contain several baseball diamonds, with grandstands, bleachers, tennis courts, etc. In fact, something of the kind to be built on a large scale and at considerable cost to the city. I am wondering what the big idea is and why.

In the first place, the only site I can think of suitable for such a purpose is the old cavalry field on the northeast border of the park, and I think this site can be used eventually for something far more suitable and of which I shall speak later.

We have at the present time within the limits of the city of San Diego nine baseball diamonds, three on the Y. M. C. A. service field at the foot of Broadway. I think all of these have bleachers and, in some cases, covered grandstands. We have numerous tennis courts, located at the different playgrounds and at the high school. We also have football gridirons at these different places. I cannot say just how many. Furthermore, we all hope that before many years San Diego will occupy a berth in the Coast league. This will mean another large and first-class baseball field, with modern grandstand and bleachers, located within the city. When the San Diego team was playing away from home, this field could, no doubt, be used for baseball and other athletic events.

Now, last but not least, allow me to mention our stadium, one of the finest in the country and surrounding an athletic field second to none, with a fine baseball diamond, football gridiron, running track and other facilities for holding almost any kind of a field meet --- even up to Olympic games, if we all got together and talked loud enough. Now, can anyone tell me why we need another large athletic field?

I wonder if it has occurred to our honorable park commissioners and sport-loving citizens of San Diego that there is something already built and in good use in our city that I believe has greater potential value for the future good of our community and the entertainment of our tourist friends in the way of healthful outdoor sport than another athletic field? I mean our municipal golf course. With all due respect to whose faithful and far-sighted ones who were the fathers of this project and our park commissioners, who have done what they could to build it up and keep it going, yet I must apologize when I say that our municipal golf course is a joke. It is a sad thing to have to apologize to one's friends, who have played over municipal golf courses in other cities, when we take them to play over ours. Even out of respect for our feelings, they cannot hide their own. I believe I am not alone in saying that the present course is not properly laid out. This probably through no fault of the builders as, when the first nine holes were built, the other nine were not thought of seriously. However, if possible, this should be changed and the clubhouse located in a more accessible position relative to the two nine-hole courses, as in other modern 18-hole courses. The present course should either be made over with grass fairways and greens, properly trapped and bunkered, or, as I intimated in the beginning of this letter, a new 18-hole grass course should be laid out on the site of the old cavalry camp.

Proposed addition to San Diego High School must be submitted to this Board before construction can be granted.

A request of the San Diego Girl Scouts for permission to utilize as headquarters the New Mexico Building as soon as same should be vacated by the U. S. Marine Corps was granted provided

- (1.) that the Girl Scout organization should place the premises in a first-class state of repair;
- (2.) that the Girl Scout organization should at all times keep the premises in repair and in a clean clean and neat condition;
- (3.) that all repairs and maintenance should be without cost to the city park department, and that meters should be installed for the measurement of gas and electricity consumed in the building, all of which should be paid from funds of the Girl Scout organization.

Upon motion of Commissioner Forward, executive secretary was directed to confer with the Common Council and to request that police badges be issued the several members of the park commission.

July 8, 1921, Letter, Marion M. Kettner, Commissioner, County Headquarters Girl Scouts, San Diego, California, to Board of Park Commissioners, San Diego, California.

Gentlemen:-

The Girl Scouts have reached such a membership in San Diego at the present time that we are urgently in need of suitable headquarters. We find that the New Mexico building in the park grounds is admirably suited to our needs, and we hereby make application for the use of the building. We understand that we cannot occupy the building until the marines are no longer using it; and we agree to return it to you in as good condition as when we take it over, except the ordinary depreciation as the building grows older.

(Signed) Marion M. Kettner,
Commissioner.

July 16, 1921, San Diego Evening Tribune, 4:7-8. Miscreants in park guilty of cowardly cruelty to animals.

Instances of almost unbelievable cruelty to animals, caged and helpless, were reported at the city hall today by Dr. H. J. Wegeforth, president of the San Diego Zoological society, which conducts the exhibits in Balboa Park. His statements would make it seem that humane societies have little hope for popularity because society at large is not humane.

A favorite pastime for some of the inhuman "beasts" that roam the park at will is to drop boulders on the bears in their pits, according to the doctor, their special diversion being to see if they can hit a bear on the head. The Polar bear was one on which a "bull's eye" was scored, and an abscess was started that nearly killed the animal.

Another popular "sport" is throwing rocks at the lions, picking out the biggest rocks that will go between the bars. As many rocks as would fill a bushel basket have been taken from a lion's cage at one time, Dr. Wegeforth stated. One of the lions was so badly battered by rocks when a keeper made the rounds one morning that he could not stand on his feet and was unable to recuperate enough strength to do so until noon.

The kangaroos of the zoo are all extinct, aided on their way to that state by persons whose intentions may have been none but good in giving them herbs to eat.

Special efforts are to be made to apprehend and prosecute these inhuman miscreants, it was stated today.

“The number of cruelties inflicted on animals in the park is almost unbelievable,” said one official today. “We are determined that an example shall be made and we are going to spare no efforts to bring about the arrest and prosecution of any person guilty of practicing cruelty on the animals. These miscreants are in the same class as dog poisoners. They ply their cruelties at times when they think there is no possibility of detection. Not one of them would have the courage to throw a rock at one of the animals when they thought there would be a possibility of their being observed. They are snakes of the worst variety and there is not one of them that does not deserve a heavy fine and a term in jail. We have the starting of an excellent zoological garden and the animals are being maintained at the expense of the city and for the benefit of San Diegans as a whole. We, therefore, insist that a jail term as well as a fine shall be given to any person convicted of cruelty to any of the animals.”

The zoological society is at present trying to find and employ an engineer to plan zoological gardens in the park, to enable exhibit of the animals in something like their native haunts. Such places would be laid out along the canyons without view obstruction to passer-bys, deep moats to cut between the roads or walks and the haunts” instead of building fences on the view sides of the enclosures.

July 17, 1921, San Diego Union, 1:6-7, 10:2-3. San Diego Zoo assured fine zoo gardens on 200-acre site; Zoological Society announces completion of preliminary plans; habitat idea to be carried out in preparation of grottos; money for several of which already has been pledged; city to aid in upkeep; \$5,000 yearly promised.

As the culmination of plans quietly prepared by officers and members of the San Diego Zoological society, in cooperation with the city park board and the city council, work will begin this week on a 200-acre zoological garden in Balboa Park designed to be among the finest establishments of its kind in America. This announcement was made yesterday by Dr. H. M. Wegeforth, president of the Zoological society.

The total cost of the gardens, much lower that it would be in a city where winter housing for animals would have to be considered, is estimated at \$60,000. The city council will allow \$5,000 a year for upkeep of the gardens, Dr. Wegeforth said yesterday, and Mayor John L. Bacon will act as consulting engineer during their construction.

Surveying has already begun on the tract of approximately 200 acres, just north of the exposition buildings, allowed for the gardens, and work on some of the dens will be begun within two or three days.

The entire gardens will be constructed on the habitat plan, Dr. Wegeforth announced. There will be no cages or bars, and no pits. The public will be protected by a system of moats and low walls, all being so

“camouflaged” as to preserve, as far as possible, the appearance of a natural wilderness, and the animals will be so housed as to insure light, air, sunshine and shade, together with adequate housing at night.

A member of the local society, Dr. Slaymaker, who has had wide experience in the designing of zoological gardens in the east, will have charge of that part of the work here, Dr. Wegeforth said, and plans are now being prepared. Mayor Bacon has promised to act as consulting engineer for the project.

Robert S. Mears will be superintendent of the new zoo. Mr. Mears has had charge of other establishments, according to Dr. Wegeforth, and has owned circus and exhibition zoos. The society has the promise of valuable animals for the collection from many different parts of the country, and navy men have promised a liberal supply of specimens from South American countries. The park board will also turn over all the animals which it is at present keeping in various other tracts in the park.

Dens and grottos for the smaller animals will be begun in January when final work on the whole project will be started. Complete plans will not be available until the last of this year, Dr. Wegeforth said, and it is planned to begin the work in earnest when they are completed, so that the construction work can be done at one stretch rather than by degrees.

The garden will include an area beginning south of the International Harvester building, and running west to the road through Cabrillo canyon. It will extend north to the edge of the park, exclusive of the tract allotted to the new intermediate high school.

The Harvester building, according to present plans, will be used as an administration building, and also as a reptile house. West of it a large space will be given over to a playground for children and a picnic ground. The rest of the tract will be landscaped to permit the construction of dens and grottos for the animals and also to give the whole area a natural “wild” appearance.

A lagoon for waterfowl is planned. Aside from the planting of shade trees and the growth of vines along the walls in front of the dens and grottos, there will be no “parking” on most of the tract.

Money for the building of grottos and dens to house the animals here is being raised rapidly. Those who wish to build a grotto to house some particular group are allowed to make a choice, and each grotto so donated will bear a brass plaque with the name of the donor.

Several of the grottos have been already donated, at prices ranging from \$300 to \$3500 and work on some of the dens will begin at once.

“Raising money for this big project is comparatively simple,” said Dr. Wegeforth yesterday. “Between 2500 and 5000 persons come to the present zoo every Saturday and Sunday and among them are many children. The older folks are showing the wild animals to the children, and when they are asked to contribute to the new gardens, they realize they are contributing something worthwhile to their children and to their grandchildren.

“The new gardens will be a splendid thing for San Diego, ranking with the best of the kind that America has to offer. I have a letter from Director Hornaday of the New York Zoological Society, which controls the famous Bronx zoo, telling me that he has looked over our plans and considers that our gardens will be the finest in the country.

“We are constantly receiving plans, advice, congratulations from zoological societies all over the country. Several local organizations are cooperating in the work, and we are assured of success.”

July 17, 1921, San Diego Union, 20:1. Rocks and boulders dropped on bears in their dens and rocks thrown at lions at zoo by visitors; Dr. Wegeforth asks jail terms for those caught injuring animals.

July 17, 1921, San Diego Union, Classified, 1:1. Home Building Exposition opens its doors at park.

July 18, 1921, San Diego Evening Tribune, 10:2-3. Thousands attend big Home Building and Industrial Exposition.

The San Diego Home Building and Industrial exposition is a known worth-while attraction today, thousands of visitors having voiced their approval with enthusiasm since the opening Saturday afternoon. There are 65 exhibits by San Diego firms gathered in one large building in the park, aside from the exhibits there are numerous inviting amusement features, entertainment and dancing being provided for as diversions.

The home-building phase is emphasized in the exhibits, and here anyone may see collected for his study all the latest materials and appliances which will make a home strictly modern. A visit to the exposition enables one to compare materials and prices from the foundation to the last furnishings of a home --- all within one building, where a day's study affords more complete information than could be had in weeks of calls at the various plants and stores.

In making his address opening the exposition, Major John L. Bacon voiced his opinion that the exposition should be a permanent one because of its usefulness and convenience to anyone interested in building or improving a home. Rufus Choate and Carl Heilbron were other speakers at the opening exercises, and Prof. Carol Aronovici of the University of California lectured both Saturday and yesterday on home building and the housing problem.

Two programs daily is the order of the show, which will continue 16 days, lectures and entertainment being without charge. Bann's syncopated orchestra furnishes music for the dancing. Refreshments, lunches and plate dinners are served by the women's auxiliary of the American Legion, so that visitors need not leave the exposition to get meals.

Congratulations are being heaped upon Manager H.J. Penfold and his assistants for the success of the exposition and upon exhibitors for their excellent displays of San Diego made or sold building products.

Hours of the exposition are from 1:30 until 11 p.m.

July 18, 1921, San Diego Evening Tribune, 13:3. Bible sessions opened in Balboa Park.

The Southwestern Bible conference opened yesterday afternoon with a large audience at the Cristobal building. H. A. Ironside of Oakland made the opening address. In the afternoon he spoke on "The Great Mystery: or the Spirit's Baptism and Its Results." His text was from Ephesians 5:32, where the apostle Paul calls the relation between Christ and His Body, the Church, "A Great Mystery." He gave a comprehensive definition of the word "Church: and the organization of the "Church of Christ" on the day of Pentecost, and also the early development of the church, its mission in the world and its future destiny.

In the evening he spoke on "The A B C of Prophecy: or the Great Image of Daniel Two." In his address he showed from Scripture how the Gentiles were given the government of the world because Israel had been unfaithful. He also held forth how the final form of the Gentile nomination would develop and come to its final destruction.

Ironside is an easy, fluent speaker, with a voice that carries well, and yet is comfortable to hear. This afternoon at 2:30 he will begin a series of studies in the Epistle to the Ephesians and this evening he will speak on "The Backbone of Prophecy: or the Seventy Weeks of Daniel Nine."

July 28, 1921, San Diego Evening Tribune, 10:4. Community Theater players may be ousted from home in park.

Unless some agreement is reached at a conference to be held this afternoon, a group of loyal San Diegans, known as the Community Players association, stands an excellent chance of being ousted from house and home.

Some months ago the Community Players fitted up the east wing of the old Southern Counties building as a theater, and there they have been giving plays at regular periods. Now this theater, it is said, is claimed by the Women's civic center, as a part of the new civic auditorium.

According to members of the Community Players organization, the theater was fitted up at no expense whatever to the women's civic center and the Community Players derive nothing more than a sum sufficient for its maintenance by giving a play once a month at a nominal admission, the receipts being meager because of the seating capacity, which is limited to 200.

Members of the Community Players were somewhat surprised and shocked recently, they say, upon receipt of a formal notice that the theater is claimed by the women's civic center as a part of the new civic auditorium, and that, hereafter, the Community Players would be subservient in its business dealings to that body.

Immediately upon receipt of the notice, there was some tall skirmishing on the part of officials of the Community Players, which resulted in the appointment of a committee to confer with officials of the women's civic center. The latter agreed to meet the Players' committee to "talk things over." This conference is set for 4 o'clock this afternoon in the blue room of the civic auditorium.

"The Community Players' association fitted up the east wing of the Southern Counties building as a theater long before the women's civic center or any other organization every thought of the structure as a civic auditorium," said one of the officers of the Players' association this morning.

"The plays given by the Community Players' association are not given for profit. This would be impossible even under the conditions prevailing before the women's civic center declared the theater to be part of a new civic auditorium, because the theater has a seating capacity of only 200 persons. The entire expense of fitting up the theater was borne by the Community Players. Now the women's civic center is insisting that the Community Players shall pay a charge of \$100 a night for the use of the building. This it is impossible for the Community Players to do. If it is impossible for an agreement to be reached, the Community Players will be forced to seek quarters elsewhere, or to give up the production of plays."

The civic auditorium was fitted up through the securing of funds from a spring frolic given under the auspices of the women's civic center and through a number of subscriptions. Since being fitted up the auditorium has been placed in the hands of a board and charges for the use of the building are now being made. Recently when an effort was made to secure funds for the disabled veterans at Camp Kearny by means of a benefit dance, it is said that a charge of \$100 was made for the use of the building. The dance proved a financial failure and, instead of netting a sum of money for the disabled veterans, there was a deficit, including \$100 said to have been charged for the use of the building that had to be met.

July 30, 1921 San Diego Evening Tribune, 7:2. Industrial Exposition to close tomorrow.

July 31, 1921, San Diego Union, 4:1. EDITORIAL: 'Spooning in the Park'

The romance of young love is intimately associated with moonlight and calm, still nights and whispering winds in immemorial groves and the nightingale warbling melodiously. The jasmine-perfumed gardens of Italy have been famous for their love stories, and the lemon groves of Spain have lent themselves to the service of great writers of great love tales. Poets have been inspired by the variety of moonlight that bathes the orchards and vineyards of Provencal; and such masters of the art of romance as Conrad and Louis Becke and Blasco Ibanez and Lafcadio Hearn have written stories of love beneath the palms in "climates sultry" when a tropic moon disarmed the effulgence of Cancer and deepened the shadows of the mysterious jungle.

In real life, of course, it is seldom so. If, for example, a great poet like Richard Le Gallienne or a great writer of love stories like Robert W. Chambers should come to San Diego, he would find the stage set for his love drama, but he would also find that the city council had prohibited the action of the play as immoral, and that the chief of police had ordered his purity squad to arrest all persons caught "spooning in the park." That's what the chief calls it --- "Spooning in the park." Imagine Petrarch "spooning" with his Laura, or Mrs. Browning writing a sonnet from the Portuguese riming "spoon" with "loon" or "coon!"

“The city park is no place for spooning,” the chief of police announces in his matter-of-fact, unromantic way of saying it. “It these warm summer nights affect people that way, they will have to go some place other than the park to spoon.” What, indeed, is Hero or Leander or Abelard or Heloise or Paola or Francesca to our chief of police! If they warm summer nights affect them that way, they must not create their immortal romances in our park --- let them go to the Hellespont or to Brittany or to the rose terraces of Rimini.

This is most unfortunate, for there is no lovelier spot on earth than Balboa Park under summer skies, when the moon is shining, and the west wind softly blowing, and a barcarole murmuring from the great organ; nor a place where romance should be more welcome --- a place where “soft stillness and the night become touches of sweet harmony.” Someday, perhaps, when San Diego shall learn to live in its traditions, our children’s children will regret that the city council and the chief of police forbade their ancestors to “spoon” in Balboa park; for they will search in vain through contemporaneous literature for such legends as Boccaccio wrote and such love lyrics as flowed from the inspired pen of Ovid, although nature and the genius of man had provided everything necessary as a background for master tales and immortal poems of this sort --- wooded canyons, gardens, odorous with the perfume of a thousand flowering plants and shrubs, purple vistas from broad mesas, starshine and moonshine on distant ocean waters, primrose paths, greenswards beneath tall trees, and the clustered architecture of old Spain, towered, pinnacle, and carved in the fashion of Cordoba of the Moor of Seville the superb.

Everything will be in keeping with the story except the actors and their romances, and our children’s children will speak ill of us, and say that there was no poetry in our souls, and that we were unworthy ancestors who preferred to do their “spooning” in the “parlors” and back porches of Main street, or in automobiles on the state highway, because when the warm weather affected them that way they were debarred by a city ordinance and an unromantic chief of police from “spooning” in the park.

August 6, 1921, San Diego Evening Tribune, 1:7-8. Big open-air pageant being planned as one feature of three-day Mid-Summer Carnival in Balboa Park, August 18, 19 and 20.

August 6, 1921, San Diego Sun. Here's at \$250,000 attraction open to you; sketches and article about Indian Village by Wallace F. Hamilton.

In the Painted Desert, San Diego has one of her main attractions. This colossal structure, imbued with the spirit of the Rio Grande, appeals powerfully to young and old without distinction, stirring the fancy, quickening the imagination and arousing an ardent desire to explore and play.

Officials of the Santa Fe railroad must have sensed the attraction that lay within recreating Indian haunts of the southwest when they determined to spend \$250,000 in the undertaking back in 1914. Since then thousands have enjoyed what was built up; and when the Santa Fe, at the conclusion of the Panama exposition, gave the Painted Desert to the city, it was patent that the permanence of the structure as a place for visitors was assured indefinitely.

Under the supervision of the San Diego park board, the Painted Desert was thrown open to the public free of charge and will remain so according to present plans. The visiting hours are from 9 a.m. until 5 p.m. daily. In this connection there has been some misunderstanding. When the park board turned the Painted Desert over to the Boy Scouts of San Diego for their headquarters, many believed that the public would thereby be excluded. The park board and the Boy Scout officials are both eager to have this supposition corrected. The park board has posted signs announcing that the Painted Desert is free and open, and Boy Scout officials have been at pains to keep someone standing by to assist the public in every way.

No Longer There

The Indians, the Taos, Hopis and Zunis, who built many of the structures in the same fashion as they did their own homes along the Rio Grande, are no longer to be seen. But they have left their stamp and artistic imprint in every part of the village. The entire structure stands as a monument to their interesting influence. The half-dome bake ovens are still in evidence, although savory odors of baking food no longer lift on the warm ocean breeze; the hogans of the Navajos in the west mesa of the walled area are almost as appealing, if not more so, that when dusky blanket weavers and silversmiths occupied them.

The kivas, or ritual places of the Indians, are as fascinating to the imaginative observer as when they served for such strange ceremonials as snake-eating and grotesque dances. Likewise, it is not hard to picture mentally Indians at work shaping pottery, and busy squaws, papoose-laden, scrambling up rough-hewn ladders with the ambidextrous agility of monkeys.

Pleasure There

There is a wonderful pleasure in merely wondering about the enclosed area, searching for charming vistas that haunt the eye for days and there are many such. There is a rugged reality about the adobe dwellings --- a useful simplicity that is art. Deep-set doorways of rough-hewn wood, the sills worn deep with age and much friction, are picturesque, to say the least. The artistic eye is delighted with the play of color under the southern sun and the ever-changing effects of light and shadow. The wireless tower of the Boy Scouts is an interesting, though sharply contrasting note. It is a far cry from the ancient cliff dwellers, whose existence is commemorated so aptly at the village, to the modern electrical phenomenon which eliminates space as a factor in communication. The presence of the Boy Scouts, however, in addition to giving them a wonderful romantic playground, serves to keep the Painted Desert in repair. It is doubtful if, in other circumstances, the park board could afford to maintain the village because of the cost.

The time may come when a group of Indians may be moved here to further augment the attractiveness of the Painted Desert. Perhaps it may not be long until San Diegans may hear once more the rumble of drums and see figures limned high against the night sky, weaving and twisting in the strange ecstasy of the dance to the new moon.

August 6, 1921, San Diego Union, Classified, 11:1. History Museum planned for park; may be installed in old Sacramento building; request presented to Board of Park Commissioners yesterday.

August 9, 1921, San Diego Evening Tribune, 5:4. John Doane to be heard in concert at Organ Pavilion Tuesday evening, August 16.

August 9, 1921, San Diego Union, 6:3. Marines honor visiting organist; enlisted men at local barracks, Balboa Park, made presentation of loving cup.

Marines stationed at Balboa Park last night united in an informal farewell reception to Marshall W. Giselman of San Francisco, the visiting organist who has several times given special recitals at the Spreckels outdoor organ for the entertainment of enlisted men of the marine corps.

As a climax to the festivities of the evening, held in the marine corps club rooms near the Organ Pavilion, Sergt. Maj. Edward A Platt, U. S. M. C., presented Mr. Giselman with a handsome silver loving cup on behalf of the officers and men of the detachment. The cup was suitably inscribed and was decorated with the emblem of the marine corps.

A. L. St. Brown, traffic officer in the park, also came to the fore, presenting Mr. Giselman with a large bouquet of San Diego dahlias, grown in the park, and offered with a special letter of commendation by the board of park commissioners. A big crowd of marines took part in the festivities and in the handshaking which followed.

August 10, 1921, San Diego Evening Tribune, 5:3. Park Board protects park from vandals.

Vandalism in city parks promises to become an expensive pastime if the campaign inaugurated by the board of park commissioners hold up to its present rate of speed, the proprietor of an apartment house on the park at Kalmia street having been required to replace a palm tree valued at \$500, after painters engaged in decorating the apartment moved the tree without consulting the proper authorities.

Park commissioners assert that trees and plants frequently are damaged or destroyed in the city parks. Occasionally an offender is caught in the act and heavily fined. If the plans of the park commission are carried out, the law will be enforced to the limit, the penalty for such infractions being both fine and imprisonment.

The park commission also had directed that ordinance number 5380 regulating traffic over park drives be enforced. A fine is provided for trucking and teaming, it being forbidden to haul goods, wares, merchandise, or any other article of commerce, garbage, lumber or other building material over a park road.

Records of the park department show that Park avenue, Park boulevard, Pershing Drive, and Laurel street are being utilized for heavy traffic almost as constantly as are many of the heavy duty streets and it is claimed that the expense of road maintenance in the parks is approximately doubled by such illegal uses.

Three super-dreadnoughts, *Arizona*, *Oklahoma* and *Nevada*, coming to San Diego Sunday, August 21; Monday will be known as "Military Day"; parade, luncheon in Balboa Park for the marchers, and an afternoon of sports for the servicemen planned; ball in Civic Auditorium in evening.

August 14, 1921, San Diego Union, 1:5, 5:3-5. Five-day carnival will open Thursday, close Monday; program.

August 14, 1921, San Diego Union, 9:2-5. Dr. William P. Gates, recently appointed director of archaeology for the Republic of Guatemala, gives San Diego Museum of Scientific Research works on Chinese art.

The rare books have been set apart in what is known as the William P. Gates alcove at the museum.

August 16, 1921, Letter, Jno. J. Byrne, Asst. Pass. Traffic Manager, Los Angeles, Cal., The Atchison, Topeka and Santa Fe Railway Company, to Mr. William F. Hamilton, care San Diego Sun, San Diego, Cal. (San Diego Public Library).

Dear Sir:

Your article with illustrations on the Painted Desert, the Santa Fe's Exhibit at the Panama Exposition at San Diego, appearing in the **San Diego Sun** of Saturday, August 6th, clipping of which has been sent me, is very interesting and I wish to take this occasion to thank you and to assure you that we appreciate the publicity given us.

You, no doubt, will be interested in one of our new publications, entitled "California Picture Book," wherein appear a number of views taken in and around San Diego.

I am also attaching hereto a copy of our Hopi Snake Dance Circular, which may give you very interesting data for a short story. The Snake Dance this year will take place at the village of Polacca about August 21st.

Yours very truly,

(Signed) Jno. J. Byrne.

August 21, 1921, San Diego Union, Classified, 1:1-7. Fireproof building for Museum of Natural History, dream; San Diego Society aims to increase its membership; annual fund desired to insure carrying out of intelligent development program, By Howard H. Cleaves, managing director San Diego Natural History Museum.

(Editor's note: Mr. Cleaves, for seven years a curator in the museum of the Staten Island Institute of Arts and Sciences, New York City, and for the last two and a half years with the New York state commission, assumed his duties with the San Diego Society of Natural History on July 1 of this year. He is a wild-life photographer of note, has lectured widely in the east on birds and written extensively for many of the best-known magazines.)

"Will a billy goat eat sage brush?"

"What is the chemical analysis of a jelly-fish?"

"Can a queen bee sting?"

"Does a snake swallow its young?"

"Can a bird smell?"

"How should one kill a butterfly?"

“Does a bat carry bedbugs?”

Just a few of the dozen of inquiries that confront the museum man in the course of an average week; queries which might rudely jolt the author of the Edisonian questionnaire himself. But that is one of the why's of a natural history museum. It is a people's dispensary for nature information. And heaven help the museum man if he falls down on an answer!

The things which a museum contains should answer many questions before they are asked. The ideal exhibit should give the visitor so much pleasure and information that he will have the involuntary desire to share his discover with another, as does the reader who comes unawares upon a rare phrase or witticism in a book. The modern museum is no longer “the chamber of horrors” that museums used to be in the old days.

The San Diego Society of Natural History maintains its free museum open daily the year round, in the structure known during the exposition as No. 8 or Foreign Arts Building, at the southeast corner of the plaza, Balboa Park. It is one of the comparatively few museums west of the Rocky mountains, and is hardly more than six months old in its present form, yet contains literally thousands of specimens of birds, mammals, insects, shells, corals, minerals, fossils, plants and reptiles. The natural history museum is without question one of the interest centers of Balboa Park and of the city, but the museum staff is by no means satisfied. To those who know, it is plain that San Diego's museum will not bear too close comparison with up-state institutions and with museums in the central and eastern states.

The visitors' register, which has been maintained at the museum since the opening last December, reveals interesting data. It shows that persons from every state in the United States have viewed the museum's cases in these brief eight months, but this remarkable record is not the most astounding thing to be learned from the book. The register also holds the names of visitors from Canada, Mexico, Alaska, Hawaii, England, France, Spain, Russia, Germany, Norway, Switzerland, China, Belgium, Australia and numerous smaller countries, mention of which is precluded by lack of space. It seems that all but Iceland are represented.

Can San Diego --- the Wonderful --- afford to have these visitors from round the globe return to their native lands and say that San Diego has the grand climate, the magnificent park, the wonderful organ, but somehow she “pay[s] not much attention to her museum?”

It is not much that the Natural History society asks of the 100,000 San Diegans --- merely that 5,000 or more of them become members of the society in order that its museum may have an annual fund upon which it may depend to carry out an intelligent program of development. By a recent change in the by-laws, the general membership fee has been reduced to a dollar a year, so as not to exclude anyone. There is nothing in the by-laws to discourage one from making a special contribution in excess of the membership fee. A membership card in the Natural History society is one of the few necessities of life that can be bought for a dollar. Junior membership is 50 cents a year. One may enter the class of patron by the payment of \$1,000. A hotel proprietor of the writer's acquaintance in Buffalo, N. Y., regards so valuable the work that is being done by the Buffalo Society on Natural Sciences that he has enrolled not only himself, but his wife, daughter, and his hotel as members of the organization.

The history of the San Diego Society of Natural History is not different from that of many another scientific and museum organization in other parts of the country. These societies usually receive their original impetus through the initiative of a handful of kindred souls who are scientifically minded or otherwise devoted to the things of the outdoors. It was so with the San Diego Society as may be learned by consulting the musty old book containing the early records, where will be found this entry: “The following named gentlemen met at the office of D. Cleveland, Esq., on the evening of October 1, 1874, for the purpose of organizing a society of natural history: L. L. Roberts, E. W. Hendrick, Charles Coleman, jr., W. F. Allen, G. W. Barnes, O. N. Sanford, D. Cleveland, L. R. Wilson and J. B. Wells.”

During the period since 1874 the society has weathered many a lean year, when discouragement stood close at hand and some may have doubted the wisdom of “carrying on.” This again is an all too

common experience with such organizations. The San Diego society is more fortunate than some --- finding itself today a "going concern" in the midst of a healthy and aggressive population.

The time is at hand when the society and its museum must be enlarged and developed beyond anything which has heretofore been conceived. The whole organization must evolve into a veritable people's institute. The museum plant, which is the society's medium of exhibition, in order to be abreast of the times, should have the most modern plate glass cases, with exhibits skillfully organized and executed by a staff of taxidermists, preparators and other skilled artisans --- men who can reproduce in glass and wax the life of the sea bottom, the plants and flowers of the mesa, and the cactus of the desert, with such fidelity that even the experienced eye can scarcely distinguish the artificial from the real. There should be a grand series of habitat groups, with painted backgrounds representing many of nature's wonders from ocean, sea, beach, bay, mesa, canyon, mountain, lake and desert. There should be working models, miniatures and cases representing the industries of southern California which are based on natural products --- fishing, agriculture, bee-keeping, mining, oil, quarrying, etc.

At present the museum is circulating natural history cabinets among 20 schools in San Diego, but these cabinets could be greatly improved and their range of usefulness widely extended so as to embrace the schools of outlying towns and districts.

A beginning has been made in the conducting of outdoor excursions and classes under the auspices of Mr. Carroll De Wilton Scott, but it has been only a beginning, and this work or practical contact with nature should be much emphasized. The museum should have corner or a room devoted exclusively to children, where books and objects easily understood by them would be specially arranged. There might also be special classes in this room where the children would be taught the elementary study of insects and plants, the painting of flowers, clay modeling of animals, etc.

The museum should have a collection of thousands of colored lantern slides, covering dozens of separate topics, for lectures in the schools and at the museum, and it is not too much to anticipate the establishment of a film library covering the same or different subjects to supplement the slides. The museum's collection of slides at present embraces only a few dozen treating on trees, water supply, and a few on birds. A local cannery has offered the use of a fine set of pictures showing the entire sardine industry, and there is a wealth of other material near at hand if funds were available.

For the public at large the Natural History Society should do many things. Perhaps the most urgent and worthwhile of these would be the establishment of a winter course of monthly or semi-monthly lectures by the most eminent scientists, naturalists and explorers.

But this and the many other visionary plans for the society can hardly be realized without the solid backing of the people of San Diego. It must be the people's own enterprise. By fully appreciating this situation and acting accordingly with promptness, it is conceivable that the people of this city, in keeping with their idealism, enthusiasm and estheticism, that are manifest on every hand, may in the near future witness another miracle in this land of miracles. In making this statement the writer has in mind the establishment of a large endowment fund and the erection of a modern and beautiful fireproof museum edifice, the dedication and opening of which would take place with no greater appropriateness than on the occasion of the 50th anniversary of the organization of the Society of Natural History, which will be celebrated in 1924.

September 14, 1921, San Diego Union, 4:1. EDITORIAL: Our Park Structures

If the issue were fairly before the voting citizens of San Diego there is little doubt that the almost unanimous opinion would be in favor of the preservation of the beautiful group of structures in Balboa Park.

In the existing conditions of the public finances and the prevailing rates of taxation, it is not even advisable to test the desire of the voting citizenship in a bond issue; there are other equally important and, perhaps, more pressing measures to be considered. The preservation of the buildings must, therefore, be left largely to the individual patriotism and generosity of the citizens.

September 29, 1921, Letter, Wallace F. Hamilton to Mr. Jno. J Byrne, Los Angeles, Calif.

Dear Sirs:-

Your letter thanking me for an article featuring the Painted Desert, the Santa Fe's exhibit at the Panama Exposition here in 1915, was most appreciated.

Since that time it has occurred to me that a sign such as the enclosed would gain for yourselves additional publicity and be of great service to the public as well.

I have had the matter of painting the sign before the Board of Park Commissioners who have given their sanction. This sign will be painted on the wall of the Village on the Park Boulevard side, the main thoroughfare and main entrance to the Exhibit. The dimensions of the sign are six and eight feet. White letters against a dark blue background with orange border and insignia, is the color scheme proposed. The cost will be \$40.00.

I am located in the park and am also well equipped to do this work in a satisfactory manner.

Yours very truly.

October 30, 1921, San Diego Union, 4:1. EDITORIAL: An Asset of Beauty

Among other things the citizens of San Diego have planted a wonderful park on the mesa overlooking the city, and for what they supposed at the time was only a temporary use, they provided a cluster of structures that for beauty of architecture are unrivaled. These exposition buildings were designed by Bertram Goodhue, the highest authority in the world on Spanish-Colonial architecture --- artist, poet, lover of medieval romance as he visioned it in the facades of the cathedrals of old Seville, in the towers of Compostela, in the arabesques of the Alhambra, and in the composite Spanish-Indian architecture of Mexican churches and palaces of the vice-regal period of Spanish domination of America.

. . . If the park treasures are to be preserved, it must be through the public spirit and civic pride of the citizenship of San Diego.

October 30, 1921, San Diego Union, Classified, 1:3-4. Lyman J. Gage indorses movement to save Exposition buildings.

October 30, 1921, San Diego Union, Classified, 8:8. Scouts entertain George J. Fisher, deputy chief executive, in Balboa Park; Mayor Bacon extends welcome.

November 2, 1921, San Diego Sun, 1:3, 8:1-2. Sunset Magazine arraigns city; says San Diego's running expenses are high; gives comparisons..

"San Diegans have good reasons for asking questions," says a writer in the current number of Sunset Magazine in an article on taxation is 23 western cities.

The writer, Harold J. Fitzgerald, divides municipal expense into two parts --- special projects, such as bond issues, and administration. He finds in San Diego something to criticize under both headings.

Under special projects, voted by the taxpayers, he says that more than one-fourth of the \$31.91 per capita cost of government here came by special authorization of the voters.

"Interest along on the debt incurred by popular ballot for the 1915 exposition now adds \$5 per capita to the city's yearly expense," he declares.

Referring to regular department government, the writer includes San Diego among the "horrible examples." He says:

"The per capita cost of Seattle's department government is \$26.44, while that of Portland is only \$23.78, and Denver's is \$21.99. San Diego taxpayers are charged \$22.99 per capita, while those in El Paso get off at \$14.64. The cost of Stockton's departments is \$21.92 for each citizen served by them, while the cost for the corresponding service in San Jose is only \$16.02 and in Pueblo \$13.85."

The figures quoted by the writer are based on federal census statistics of 1919, But although the city tax rate is now lower than for that year, the assessed valuation of the city has increased, which in a measure equalizes the difference in the tax rates.

Concerning regular department government for which the heads of city departments are responsible, the **Sunset Magazine** writer says of San Diego.

The costs of the regular department government for which the administration is presumably responsible is considerably higher than the average for other cities. The average is \$20.10. San Diego's cost is \$23.99. San Diegans have good reason for asking pointed questions.

(See **San Diego Sun** for balance of article.)

November 2, 1921, San Diego Union, 4:1. EDITORIAL: Conserving An Asset

San Diego must keep these buildings and they will be kept if the citizens are given an opportunity to make them permanent. We are asking that this opportunity be offered in a concrete business-like manner as soon as possible, so that the work of rehabilitation may proceed before it is too late.

. . . several city officials took their pens in hand to show that the **Sunset Magazine** article comparing San Diego unfavorably with 22 other western cities was full of errors.

November 3, 1921, San Diego Sun, 4:1. EDITORIAL: Let's Get Going.

SAN DIEGO is often torn by strife and divided hopelessly on civic projects. But there is no reason in the world why the proposition of restoring and maintaining the exposition buildings in Balboa Park should not get 100 percent support in this fair city.

Balboa Park is a thing of joy and beauty now, and it should be a thing of joy and beauty forever. We have an opportunity now to maintain the GREATEST group of park buildings in America, in a setting of unexcelled beauty. We must not fail to take advantage of this opportunity. The longer it is put off, the more costly the work of restoration will be.

Some adequate and satisfactory plan for financing this work should be provided at once, and every ounce of energy put behind it.

This is a project on which we can all agree, and one for which we can all work, side by side.

Let's get going!

November 19, 1921, San Diego Union, 6:3. Marine Brigade starts removal to new quarters; stores and equipment in Balboa Park to be transferred as soon as possible.

The United States Marine Corps brigade post at Barnett Avenue, the most costly, most beautiful and largest of the kind in the country, will be formally occupied by the first battalion of the seventh regiment within two weeks.

Lieut. Col. J. M. Huey, commander of the marine barracks at Balboa Park, announced yesterday that all stores and equipment will be moved as rapidly as possible from Balboa Park to the new post. The first truckloads of equipment were transferred to the new barracks yesterday. Col. Huey said the transfer will be delayed because 245 men recently were assigned to guard duty in various railroads in California, Oregon, Washington, Utah and Nevada, leaving fewer than 150 men at the Balboa Park barracks.

The Balboa Park barracks, Col. Huey said, will be abandoned, all Marine Corps activities being concentrated after December 1 at the Barrett Avenue post.

Although \$500,000 to be expended this winter and next spring in the construction of additional buildings at the brigade post, there are now sufficient buildings completed, officers announce to commission the post on a workable basis. The barracks completed and ready for occupancy has accommodations for more than 1,000 men.

November 19, 1921, San Diego Union, Classified, 18:1-2. Subscription started to save fair buildings; John T. Mitchell contributes \$1,000 and asks 24 others to give like sum to raise half necessary money; supervisors and city to raise remainder.

November 21, 1921, San Diego Union, 4:1. EDITORIAL: Public Conservation

The work of salvaging the beautiful structures in Balboa Park is well in hand. . . . In this effort there is one error of policy to be sedulously avoided. Municipal authority over the occupancy of the buildings thus reclaimed must not be lured by hope of profit into granting concessions to private enterprises. Balboa Park must not be "rented" to persons whose primary object is personal gain. Whatever the public pays must go into the funds for maintenance and upkeep of the buildings and whatever changes are made for entertainment, recreation and exhibitions in these buildings or any portion of the park area, it must be understood that all surplus is for the perpetuation and improvement of the park itself. Nothing savoring of a commercial profit at public expense must be permitted.

November 25, 1921, San Diego Sun, 7:1. Colonel Collier may land berth; San Diegan likely candidate for Brazil Exposition commissioner.

November 27, 1921, San Diego Union, 4:1. EDITORIAL: A Community Affair

There are hints of an undercurrent of opposition to the preservation of the park buildings based upon a vague opinion that the cost of reconstruction may be excessive. The objection, if it exists, is premature.

. . . Divested of these structures Balboa Park would be merely a garden spot and a site for rebuilding possibly upon a plan and in an architectural form contrary to the wishes of the people who own the park and contribute to its maintenance. . . . Let us be accurately informed how we can preserve these buildings, and then let the citizens of San Diego decide what they intend to do about it. This is a matter to be disposed of by the community, not by individuals or groups of individuals.

December 1, 1921, Letter, W. B. Frisbie, Division Passenger Agent, The Atchison Topeka and Santa Fe Railway System, to Mr. T. N. Faulconer, Exec. Sec'y., Board of Park Commissioners, Balboa Park, San Diego, California.

My dear Mr. Faulconer: -

Having just returned to San Diego after a month's vacation, I find myself a little out of touch with local conditions.

I note copy of your letter to Mr. G. A. Davidson under date of November 2nd relative to placing sign at entrance to the Painted Desert exhibit in Balboa Park, and I am wondering if this has been done and shall appreciate your advising me at your early convenience.

In the file I note a letter written by Mr. Wallace F. Hamilton of the Park Board to Mr. Byrne at Los Angeles under date of Sept. 29th, 1921 in which he submits his proposition of a sign at cost of forty dollars and I believe it would be a courteous thing for use to make some reply to his letter, and therefore I hope you will explain to Mr. Hamilton that this sign was due us without cost by the Park Commissioners.

Yours very truly,

(Signed) W. P. Frisbie,
Division Passenger Agent.

December 4, 1921, San Diego Union, Classified, 1:8. Unnamed donor gives \$10,000 for improvements to San Diego zoo; dams to be built to impound water for seals, alligators and other water animals; Mayor Bacon in charge.

December 7, 1921, Letter, Executive Secretary, Board of Park Commissioners, to Board of Park Commissioners, San Diego, California.

Gentlemen:

By your direction, I have advised the authorities in charge of the U. S. Naval Hospital in Balboa Park that the sale of merchandise in public parks is contrary to city ordinance #5380. My letter to Captain Curl, U. S. N., M. C., in charge, together with its replies are hereto attached.

In this connection, I have further to report that sailors bearing badges inscribed "master at arms" have appeared at park refreshment stands during the current week and forced sailor customers to stop purchasing articles there, stating that the men would have to buy their articles at the naval hospital canteen or go without them.

It would seem that this department is entitled to reasonably courteous treatment at the hands of the naval hospital authorities, as the use of the premises is given them free. Moreover, very few days pass without this office being requested to grant special favors to the naval hospital, officers of the naval hospital or to other branches of the U. S. Navy, all of which are granted when possible.

Aside from the etiquette of the situation, this department is under considerable extra expense through occupation of the premises by the naval hospital, and it seems hardly reasonable

or fair that we should be deprived of the opportunity to offset in some small measure, through the profits of our refreshment stands, the expenses incurred on us incidental to naval use of the park.

The refreshment stands contribute a considerable sum toward the maintenance of the park and should be encouraged by the support of this board if they are to be continued.

Trusting that our help in the refreshment stands may be encouraged in their efforts to make their places of business profitable and creditable to the park department, I am

Very truly yours,

Executive Secretary.

December 7, 1921, San Diego Sun, II, 1:1. Park repair is estimated; need \$100,000 to rehabilitate buildings; Allen, Quayle, Banning, Buckner, Hoffman and Kistner made investigation.

December 7, 1921, San Diego Sun, 4:1. EDITORIAL: Rebuild Them!

A COMMITTEE of local architects has made a comprehensive report on the rebuilding of the exposition buildings.

They estimate that \$100,000 will be required to put the buildings in first-class shape, so that they will stand for years.

These buildings are well worth more than that to San Diego. They are our biggest man-made attraction. Steps should be taken at once to raise the necessary funds to start this work

There is no doubt that at least 25 persons can be found in this city who would donate \$1,000 each to the fund. Thousands of San Diegans would give smaller amounts.

The longer this work is put off, the more costly it will be.

Let the entire city get behind this worthy project and put it over.

Save the exposition buildings!

December 12, 1921, Letter, W. F. Frisbie, Division Passenger Agent, The Atchison Topeka and Santa Fe Railway System, to Mr. T. N. Faulconer, Exec. Sec'y, Board of Park Commissioners, Balboa Park, San Diego, California.

My dear Mr. Faulconer:-

On the 1st inst. I wrote you as follows: (See above.)

Will you kindly advise me when I may expect reply.

Yours truly,

(Signed) W. B. Frisbie,
Division Passenger Agent.

December 13, 1921, Letter, Offices of the Board of Park Commissioners, Administration Building, Balboa Park, San Diego, California, to W. B. Frisbie, Passenger Agent, A. T. & S. F. Railway, San Diego, Calif.

Dear Sir:

Answering your letter of December 12th, we wish to advise you that the park commission has authorized the making of a suitable sign to be placed at the entrance of the Painted Desert in Balboa Park.

The sign will bear the inscription:

The
PAINTED DESERT
open to the public
9 am to 5 p.m.
FREE
Donated to
CITY OF SAN DIEGO
by
A.T. & S .F. RY.
Headquarters, Boy Scouts
of America

December 13, 1921, San Diego Union, 2:5. Committee seeks public opinion to determine if money for the reconstruction of Balboa Park buildings should be by bond issue or by popular subscription

December 15, 1921, San Diego Union, 8:4-5. Storehouse and administration building, hospital and fleet repair base for Navy will be commissioned within six months.

December 19, 1921, San Diego Union, 4:1. EDITORIAL: Capitalizing Beauty

. . . the Committee of the Paris Salon asked Bertram Goodhue, the architect who designed the buildings in Balboa Park, to exhibit photographs and drawings of these structures in the American architects' section of the salon this year. Thus San Diego achieves international fame in the great art center of the world. What can be accomplished with our artificial beauty can be even more readily accomplished with our natural attractions.

December 23, 1921, San Diego Union, 6:6. Rain and wind destroyed more than 50 Naval Hospital tents for housing convalescents during the last few days; tents located on edge of canyon opposite the marine barracks.

December 24, 1921, San Diego Union, 9:4. Christmas program outdoors at park tomorrow night; scenes to be photographed for movies; Elks' Chanters to have prominent part, will march from Plaza to organ singing "Oh Come All Ye Faithful"; Dr. Lathan True, eastern musician will substitute for Dr. Stewart.

December 25, 1921, San Diego Union, 1:4-5. Throng expected to attend outdoor gathering in park; Elks' Chanters to sing Christmas carols at Spreckels Organ Pavilion tonight; Mrs. L. L. Rowan, contralto, will contribute to program; photographs of unusual scene to be taken.

December 25, 1921, San Diego Union, Classified, 1:4-5. Throng expected to attend outdoor gathering at park; Mrs. L. L. Rowan, contralto, will sing "Ave Maria" by Gounod.

December 25, 1921, San Diego Union, 1:7-8. Bond issue not feasible for Exposition buildings; City Attorney delivers opinion to Rehabilitation Committee; bond issues may be voted on only for original work, not for repairs, according to state law; private subscriptions probably will be resorted to; City may be asked to help with \$25,000; \$100,000 estimated to be necessary to restore buildings.

December 27, 1921, San Diego Sun, 16:5. A revolving fund of \$50,000; \$25,000 to be raised by City Council and \$25,000 by citizens of San Diego for restoration of certain of the buildings in Balboa Park is the plan presented to the Park Board by the City Council today.

December 28, 1921, San Diego Union, 7:5. Council will aid restoration plan; members will confer with Committee on Measures to Save Buildings.

December 30, 1921, Letter, W. B. Frisbie, Division Passenger Agent, The Atchison Topeka and Santa Fe Railway System, to Mr. T. N. Faulconer, Exec. Sec'y., Board of Park Commissioners, Balboa Park, San Diego, Calif.

My dear Mr. Faulconer:-

Your letter of the 28th inst.

It was very nice of you to extend the invitation to look the sign over that you have now completed for the Painted Desert. Just at this time you can understand that I am extremely busy, and as I am well satisfied that the work will meet with the entire approval of all concerned, I hope you will put same in place at once, and I will at some later date come out and see you, and we will together look at it.

With the compliments of the season, I am

Very truly yours,

(Signed) W. B. Frisbie
Division Passenger Agent.

January 2, 1922, San Diego Union, 2:3-4. Marine Barracks on Barnett Avenue best in America.

January 2, 1922, San Diego Union, Annual Edition, Business Section, 5:1-8. Zoological gardens of city equal best in America; splendid specimens of animal life show here; unique system of animal den in park; hidden barriers instead of steel cages confine kings of forest, by T. N. Faulconer, Executive Secretary, Park Commission.

Pride in their home town, the ambition to make San Diego preeminent in the arts and sciences and the love of children and animals, the last probably more than all else, have inspired the officers and members of the San Diego Zoological Society to undertake the financing, construction and equipment of a zoological gardens in Balboa Park.

At the close of the 1916 exposition this Society was formed and its members donated the funds required for the purchase of the valuable collection in the exposition zoo. Until two years ago the maintenance costs of the zoo were borne entirely by these few men and women, and upon their heads has been heaped the criticisms and abuse of those persons whom the howls of the animals annoyed, or who, for other reasons, found fault with the zoo.

The condition of the ancient and flimsy cages became such that the necessity of replacing them with modern quarters or selling the animals and depriving the city of a zoo became apparent, and the Zoological Society assumed the labor of securing the required funds. Regarding this work, Dr. Harry M. Wegeforth, president of the Society and in a large measure its inspiring genius, says

Animals Owned by People of City

"We are doing just what every man and woman in San Diego would do if they could be made to understand the . The animals belong to the city of San Diego, to every person in the city, and not to the Society or its members. The new Zoological Gardens will add to the beauty and usefulness of the park, will provide entertainment and educational advantages for everyone, and will not in any way benefit the Society or its members financially or otherwise than it will every other citizen or visitor to San Diego."

Government encouragement is being extended in all civilized countries to those institutions tending toward the preservation of those species of wild animals that encroaching civilization would otherwise exterminate. Attention is being called in government bulletins to the fact that the carrier pigeon, once so numerous as to be a menace to crops, is now utterly extinct. Except for those few specimens bred in government reservations and zoos, the great American bison has vanished, and many other species of beasts and birds native to the United States have become extinct or nearly so.

To aid in the establishment of a well-equipped Zoological Garden is to encourage the work of preserving to posterity specimens of the fauna peculiar to this continent. The history of the United States is replete with legend and story of red men and wild animals, of pioneer and gallant deeds. To prevent the extinction of the American Indian, the government has established reservations and has provided the necessary funds. Prolonging the existence of the wild animals of America is largely a matter for such public institutions as the San Diego Zoological Gardens.

Gives Entertainment to Many Visitors

Prosperity, business, progress --- because San Diego has been particularly fortunate in natural endowments, these things have come to be as a natural consequence. Broad, able men of affairs and of finance have aided in starting San Diego upon the pathway that leads to metropolitan greatness and now that the world has become cognizant of her great advantages in geographic location and climate and resources, nothing short of universal disaster can stop her onward march.

To provide entertainment for the hordes of visitors to whom San Diego has become a mecca for annual pilgrimages, and to furnish educational features for youthful inhabitants and visitors, a number of citizens have formed the San Diego Zoological Society and pledged themselves to construct in Balboa Park a Zoological Garden equal in size, in the artistry of its landscaping and construction, and in the variety of its exhibits to the best in the United States.

The possibility of surpassing the largest and best of existing Zoological Gardens is not remote, as local conditions are from every standpoint far more favorable to the establishment of such an institution than can be found elsewhere in the United States.

Zoological Gardens Urgent City Need

The personnel of the San Diego Zoological Society comprise hundreds of citizens who having succeeded in business and professional lines, are ready to devote their energies to the good of the community without other compensation than the knowledge that they are aiding in the accomplishment of something worth while.

The community's need of a zoological garden is acknowledged to be greater than that of other cities, as there are few places so constantly filled with visitors seeking recreation. In adding attractions of this nature, the popularity of San Diego as a winter and summer resort is enhanced and the city thereby is advanced commercially. The tourist is to San Diego in a large measure what steel is to Pittsburgh, what cotton is to the south, and realizing that the object is not to bring the tourist to San Diego, but to entertain him, prolong his visit and send him home with pleasant memories, San Diegans are gladly aiding in the campaign for a Zoological Garden.

Thanks to summer skies throughout the year and to a constant, mild temperature, winter houses, steam-heated and inclosed, are not needed even for those birds and animals whose habitat is tropical. The African lion, leopards from India, monkeys from the Philippines, Africa or Central America thrive through summer and winter, with only the protection of dens for sleeping or for escaping occasional rainstorms. It is recognized among animal men that the inmate of the California open air is healthier and less subject to tuberculosis, the great enemy of captive animals than the animal in winter quarters.

For this reason, it is possible for the San Diego Zoological Society to devote its funds and genius to making the new gardens attractive, artistic, instructive and convenient to sightseers as nothing need be sacrificed to the effort to protect the animals from blizzards and inclement weather.

Ideal Zoo Site Located in Park

The Board of Park Commissioners has set aside in Balboa Park, adjacent to the north side of the exposition grounds, a tract of land ideal for the purpose. Canyons, steep hillsides and broad mesa provide the topography best suited to the laying out of corrals for ruminant animals, dens for the carnivores, dams and lagoons for aquatic animals, and playgrounds for children, where Jumbo the elephant, a dromedary and sundry donkeys or burros will joyride the youngsters to their hearts' content.

Included in the tract provided is the building occupied by the International Harvester Company in Exposition days. Plans have been drawn for the remodeling of this structure and making it a reptile house, where quarters will be provided for several hundred snakes and saurians. Donations already promised this section of the zoo are three varieties of rattlesnakes, an Anaconda from Central America, a Gila monster from the Arizona desert, a Central American iguana, and countless horned toads, gopher snakes, king snakes, lizards and other reptiles native to this country and to Mexico.

Replica Planned of Water System

Mayor John L. Bacon says:

“I would rather see 100 tourists come to San Diego, spend a month or a season, be busy every minute with healthful, outdoor entertainment, and go back home to tell their relatives and neighbors that San Diego is the greatest town in America than to have 10,000 tourists come, stay 24 hours, and go away ‘knocking’ because they had a dull time.”

That is why Mayor Bacon is boosting, working and making his friends work for the new Zoological Gardens. The mayor is an engineer, and he is giving his earnings and his other spare time in the planning and laying out of the aquatic features of the new zoo. This will be not only a very interesting attraction, but, if Mayor Bacon’s plan materializes, the aquatic features will be a replica of the great water system from which San Diego derives her copious supply of that most necessary fluid.

Miniature mountains and gorges were provided by nature in the zoo tract and comparatively little alteration to nature’s handiwork will be necessary in covering several acres into a huge relief map showing the streams, dams, conduits and watershed of San Diego’s back country. The plans include bronze tablets bearing detailed information concerning the several units of the water system so that tourists may be shown in an hour or so the vastness of our water resources and the local San Diegan may learn just how enormous have been the accomplishments of the city departments having this work in hand.

In and upon the waters of the lakes formed by these will be several varieties of trout, bass and other fresh water game fish, gold fish, carp, ducks, swans, cranes, beaver, muskrat and possibly many of the large aquatic animals from the tropics. Aside from the entertainment and educational features of this branch of the zoo, it is planned to make the area _____ most beautiful, landscape features of the entire park.

Mayor Bacon has volunteered his services as structural engineer. Nathaniel E. Slaymaker, landscape architect and a new resident of San Diego, has given several months of his time and has visited the best zoological gardens in the east in the preparation of the plans for the new zoo here. Louis J. Gill, architect, has donated his services, as have Dr. Fred Baker, J. W. Sefton and others. The society will incur no expense in the preparation of plans or other preliminary work, and every dollar raised can and will be spent on the actual material and labor of construction.

The society has been promised the aid and cooperation of the common council of the city. The park commissioners are aiding in many ways, and a very large portion of the citizens approached have responded generously. Sufficient funds for the construction of several units of the new zoo are available, and some construction already has been done. It is hoped to have the greater part of the animals in their new quarters by the first day of March 1923, and it is intended to keep the campaign until the work is completed and San Diego can point with pride to a zoological garden in keeping with the city’s progress along other lines.

The accomplishment of a task of such proportions as the raising of funds for the construction of a zoological garden such as San Diego is destined to have, the interesting of the public in a municipal improvement, and the gathering together of the widely diversified groups required to handle the various phases of such an undertaking needs that inspiration that comes only with great ambition.

Such an ambition inspires the officers and directors of the San Diego Zoological Society. It is an ambition to achieve for San Diego the preeminence along the lines of education and entertainment that the city merits.

January 2, 1922, San Diego Union, 5:2-4. Boy Scouts of City win distinction; have unique home in Indian Village; fine facilities in park give perfect setting for activities on scout craft.

January 2, 1922, San Diego Union, Navy Section, 3:1-8. Photographs of Naval Hospital, Naval Training Station, Marine Post, and Fleet Repair Base.

January 7, 1922, San Diego Union, Classified, 11:1-3. Third annual poultry show opened in Cristobal Building yesterday; more than 600 birds; will continue until Monday.

January 14, 1922, San Diego Union, 5:3. Horseshoe pitching in Balboa Park, about 100 yards north of Date and Eighth Streets, enlists interests of tourists (illus.).

January 15, 1922, San Diego Union, 19:1. Natural History Museum reports activity in all departments; holds annual meeting; members trebled.

January 16, 1922, San Diego Union, 16:3-4. Nature walk leads to birds and animals in Balboa Park; naturalists favor San Diego plan; letters from W. T. Hornaday and G. Stanley Hall.

January 19, 1922, San Diego Union, 20:5. Goofs to restore park light poles; series of dances to be given in Civic Auditorium to raise \$3,500.

January 20, 1922, San Diego Union, 7:1. Meeting of subscribers and others called for Monday night at U. S. Grant Hotel to discuss paving of Pershing Drive.

January 22, 1922, San Diego Union, 18:3. Forum to discuss Balboa buildings; opinion on preservation to be crystallized at meeting tomorrow night in Unitarian Church; principal speaker will be John W. Mitchell, president of the Los Angeles Municipal Art Commission and a member of the American Institute of Architects.

January 22, 1922, San Diego Union, Classified, 3:3-4. "One Who Loves San Diego" writes suggesting Spanish architecture as appropriate for buildings in San Diego.

January 22, 1922, San Diego Union, Classified, 4:3-4. Aims of Community Chest pictured in pageant of symbolism at Organ Pavilion at opening of 1922 campaign to collect funds yesterday afternoon.

January 22, 1922, San Diego Union, Society-Club, 1:4-5. Manuel Mora, Spain's foremost tenor, to sing at park Sunday, January 29, in Civic Auditorium.

January 23, 1922, San Diego Union, 8:4-5. John W. Mitchell speaks at Open Forum; hopes San Diego will save park buildings; George W. Marston, Dr. Edgar L. Hewett and Councilman Fred Heilbron also spoke in favor; Mitchell called group a fine group of Spanish architecture than any he had seen in Spain; Committee of 21 appointed by Mayor Bacon had an examination of buildings made by the Architects' Association of San Diego which estimated \$100,000 will be necessary to rehabilitate buildings.

January 24, 1922, San Diego Union, 4:6. Agreement made for paving of Pershing Drive; city offers to supply labor and gravel; property owners will provide cement.

January 25, 1922, San Diego Union, Classified, 11:1. Architects kept busy preparing building plans; Frank P. Allen designed new plant for San Diego Ice and Cold Storage Company on Imperial Avenue between 8th and 9th Streets; prepared plans for remodeling Marston's store annex; is now working on plans for two business buildings in the downtown section of the city.

January 26, 1922, San Diego Union, 1:3. Council pledged \$25,000 for fund to save Balboa Park buildings yesterday; city's help contingent on \$75,000 gifts.

January 26, 1922, San Diego Union, 7:5. Meeting to discuss Pershing Drive called for tonight in auditorium of Jefferson School.

January 27, 1922, San Diego Union, 4:1. EDITORIAL: Our Crown of Art

We are sure that there will be a ready and generous response from the body of our citizenship when the committee shall ask them for pecuniary aid in the effort to save these park buildings to be an artistic memorial for the San Diego of today to the San Diego of tomorrow.

January 27, 1922, San Diego Union, 9:3. Pershing Drive meeting raises \$2,140 for paving; swells total on hand to \$5,813; city to put up dollar for dollar.

January 28, 1922, San Diego Union, 1:8, 5:2-3. San Diego again on Exposition map; representatives of leading civic organizations approved plans for four-month Exposition in buildings in meeting last night in Chamber of Commerce rooms; Exposition to be opened January 1, 1923; Balboa Park will not be closed, but a system of coupon tickets admitting holders to exhibit building will be used; plans presented by John W. Ryckman; Frank J. Belcher said he opposed rehabilitation of the buildings and the holding of an Exposition; Hugo Klauber of the Park Board took a middle ground.

January 28, 1922, San Diego Union, 5:5-6. Midwinter Exposition directors approved proposed four-month fair in present park buildings yesterday; endorsed John W. Ryckman as director of works; Exposition will commemorate limitation of armament plan at the Washington conference.

January 28, 1922, San Diego Union, 4:3-4. Edwin F. Banning, architect, urges art commission to regulate signs, poles, wires, street parkings and planning; advocates city planning by trained architects; praises exposition buildings: "The chief beauty of the exposition was, however, no so much in the individual beauty of each building, but on account of the unanimity and homogeneity of the whole, all in one common style, and one which is most happily adapted to our climate and historical atmosphere. This one fact will make it the most beautiful group of exposition buildings this country has ever had."; would like to see whole architecture of city carried out in same style.

January 29, 1922, San Diego Union, 7:3-4. Thousands throng galleries in Balboa Park to see splendid works of art.

January 29, 1922, San Diego Union, 8:4-5. Senor Manuel Mora, Spanish singer, gives impressions of city at request of **The San Diego Union**.

. . . I have before my eyes the surprising spectacle of a romantic city of Spain rising amidst luxuriant verdure. From immediately about the buildings down to the depths of the canyons, the land is covered with a growth of semi-tropical foliage, with lofty trees and generously spreading shrubs and bushes. A magic garden has taken the place of the desert. This Aladdin performance must be most interesting and instructive to those that never have been privileged to visit your city. And then take that Venetian spectacle while standing over the terrace of the home where I am a guest. The sun has dipped into the ocean behind Point Loma and San Diego in the distance presents itself at night in a new appeal. There is no new experimentation in evidence here in the field of lighting. Your city at night is full of mystery and enchantment.

January 29, 1922, San Diego Union, 8:6. Goofs to held series of balls; object is to raise money to replace light poles in Balboa Park.

January 29, 1922, San Diego Union, Classified, 1:1-8. Photograph of development from Florida Street looking east from Balboa Park illustrates city's rapid growth; a year ago the land on which these numerous homes are situated was almost completely covered with sagebrush.

February 13, 1922, San Diego Union, 16:1. Nearly 2,000 persons attend Lincoln program at Organ Pavilion; Mayor Bacon and Reverend Roy Campbell speak; Dr. Stewart plays selections.

February 15, 1922, San Diego Union, 3:4-5. Industrial exhibit scheduled April 1 to 15.

February 18, 1922, San Diego Union, 10:1-5. The first of San Diego's Charity Balls to be held in Civic Auditorium was given last night; San Diego and Coronado elite filled boxes; ballroom was draped with ferns and smilax.

February 19, 1922, San Diego Union, First Spanish-American Ball to be held at Civic Auditorium, February 27; Senor Manuel Mora, Spanish tenor, to give recital.

February 21, 1922, San Diego Union, Classified, 11:5. Reptile House rebuilt under direction of G. Edward Chase, who had charge of original construction of building; two months of work at \$7,500; Zoo wants man who understands care of snakes.

Installation of the reptilian boarders will begin in about two months.

There has never been a treatise published on the subject of reptilian dietetics according to local zoologists who have had correspondence with all the leading zoological institutions and it is hoped to find someone here who has a practical knowledge of caring for reptiles and small animals in this climate.

The foundations of the Harvester Building were reconstructed and an all-concrete base put in. The stringers were changed, the entire building "painted up," the roof repaired, and the skylight supports strengthened. The outside of the building was also refinished with new wire lath and a coat of tinted plaster.

Numerous cages and two reptile pools were installed inside the building. There are now five large rooms, partitioned off with wire screen and 17 feet square, where large reptile groups will be kept. New windows have been cut so that the "scenery" of trees inside the cages is blended, to the spectator, with the foliage outside the large windows. On the balcony a large number of cages have been placed. They are adjustable in size, so that groups of various sizes can be accommodated.

The completed building contains also a woman's rest room and the offices of the Zoological Society. Work is now in progress, west of the building, on a pool for seals, another for alligators, and a wading pool.

I. Lewis, the Australian collector of reptiles and wild animals, probably will be given an order for a large group of Australian snakes for the new house, to be delivered in two or three months. In the collection will be two gigantic lizards 10 (?) feet long, which Lewis has offered to deliver for \$100 a pair.

Having surmounted many obstacles in completing the new reptile house, officers of the society are confident of success in their present effort to find a competent dietitian and caretaker for the inmates of the house. The dietitian's duties would not appear to be very onerous for some of the larger snakes --- boas and pythons --- will take nourishment only once in three months.

February 22, 1922, San Diego Union, 4:2. Reverent Ernest C. Wilson writes letter indorsing Dr. Stewart's stand and protesting against monopoly of Balboa Park by any private commercial enterprise: "It seems regrettable that moving picture enterprises should be granted so great a preference, let us encourage movement to make Balboa Park an artistic and cultural community center."; cites instance where a national art institute was refused studios in Balboa Park.

February 22, 1922, San Diego Union, 9:3. Spanish dances feature fiesta program next Monday in Civic Auditorium

February 23, 1922, San Diego Union, 20:2-3. Baby Show part of State Federation Program to be given in Indian Arts Building, February 25.

February 25, 1922, Board of Park Commissioners to Board of Education, Correspondence (San Diego Public Library, Box 3, File A-G, 1922) - permission given to Board of Education to use Kern and Tulare Counties Building for library purposes on a temporary basis is terminated; musical organizations of city have requested building; other uses may be found if an exposition is held in 1923. .

February 25, 1922, San Diego Union, 7:2. Second annual Police Ball at Civic Auditorium a success.

February 26, 1922, San Diego Union, 11:5. Preparations to start this week of industrial display in April.

February 26, 1922, San Diego Union, Classified, 1:1-2. Natural History Museum program for March made up; Dr. Phifer to give lecture today on cliff dwellers of Southwest.

February 27, 1922, San Diego Union, 3:3. An airplane scattering advertising matter for the Spanish Ball disturbed H. J. Stewart's recital at Organ Pavilion Sunday outdoor recital yesterday afternoon.

March 1, 1922, San Diego Union, 1:8, 3:4-5. Pledge to restore Exposition buildings; many speak at meeting; raise \$75,000; fund started with a rush; County supervisors to aid if taxpayers approve; no dissenting note sounded; three-fourths of required \$100,000 to rejuvenate structures pledged yesterday in meeting at city hall; Mayor Bacon opened meeting; W. S. Dorland named chairman of committee; G. W. Marston, vice president; John S. Akerman, Secretary; Alex Reynolds, Jr., treasurer; Council and Board of Supervisors offer \$25,000 each; \$20,645 pledged from among persons present in Council chamber.

George W. Marston was ill and confined to his bed yesterday. But Mr. Marston was not too ill to send an expression to the meeting. In a note written by him on his sick bed, he said:

"I am thoroughly with you in the movement for saving the exposition buildings. No time should be lost now, as recent storms have played havoc with them.

"My chief concern centers upon the plaza. It is vitally necessary to maintain the plaza, both for practical and aesthetic reasons. If its architectural outlines should be broken, its beauty is gone. Therefore, I recommend that the first restoration work should be done of the four central buildings where the Prado crosses the plaza.

"It seems to be that the city administration is justified in appropriating as large a sum as can be spared from its funds. Probably \$100,000 is needed at the least. If the city can provide only \$25,000, then the people should be called upon for the balance. This is not a large amount, considering the interests involved. I shall be glad to cooperate."

March 2, 1922, San Diego Union, 1:6-7. Exposition buildings restoration fund lacks \$15,000 of amount required; intensive campaign on; Ministerial Association yesterday agreed to make restoration of buildings topic of morning sermons March 12; Taxpayers' Association in favor of restoration..

March 2, 1922, San Diego Union, 4:1. EDITORIAL: Preserve This Asset

(Excerpts)

Balboa Park is San Diego's garden spot, and there are few as beautiful in all the world. Topographically it is unique --- its miniature mesas rimming deep, cool canyons that drop away abruptly and flow down to the shore of a sun-bright sea; its terraced slopes which the art of the gardener has converted into an open-air embroidery of the plant life of many lands; its flower-bordered paths, its broad driveways, and its magnificent vistas of mountain ranges, opaline sea, and the bay sparkling in the sunlight far below. Neither the Riviera, nor the famed regions of the Mediterranean coast, nor the gardens that hang above the Aegean sea can boast a beauty as varied as that which we possess in Balboa Park, partly bequeathed by Nature in her most generous mood, partly bestowed by the inspiration of man's artistic genius.

Embowered in this garden are structures of exquisite architecture, composed from the salient features of the order that was the glory of old Byzantium, that mingled with the medieval Gothic and developed through the Italian Renaissance into the towers, domes, minarets and arabesques of the Moorish and Spanish-Colonial. These buildings are as essential to the picture as the garden itself; the sunlight that bathes them, the landscape that stretches around them.

The garden without the buildings would be as incomplete as the buildings without the garden. They are complementary to one another, as the pyramids are complementary to the desert, as the palms that fringe the South Sea atolls are suggestive of the coral reefs that hint of primitive romance, as the pagodas of the Far East are reminiscent of a religion as ancient as Buddha, to whom they utter their reverence in the tinkling of innumerable bells swaying in the wind.

Samuel I. Fox	250

March 9, 1922, San Diego Union, 4:1. EDITORIAL: Our Banquet of Beauty

It we would have our cake, we must buy it. It doesn't cost much, and it is sweet to the taste; it is worth far more than we will ever pay for it. So don't be reluctant or niggard in providing this feast of art and beauty, nor only for our pleasure, but for all the world besides.

March 10, 1922, San Diego Union, 1:3-6. Give, Liberally to Restoration Fund, Urges San Diego -California Exposition President

.Editor San Diego Union: In all the history of San Diego there has never been accorded to her citizens a greater privilege than that of preserving for posterity the buildings in Balboa Park.

Hundreds of men and women who know and love San Diego have given to the limit of their means to the fund which a committee of citizens is endeavoring to raise that the Exposition buildings may be restored before the ravages of time have completed their sorry task of wrecking them beyond redemption. The city and the county of San Diego have each pledged a sum of \$25,000 to this fund, provided that individuals in the community will subscribe a balance of \$50,000. This latter amount is the goal for which the committee is striving with every power at its command.

Approximately \$13,000 of the quota allotted to public subscription is still to be raised. Every dollar of this must come from those who love Balboa Park. It is to be regretted, but it is true, nevertheless, that this is one occasion where civic affection must find expression in material form. Love our beautiful Balboa Park as ardently as we may, dollars --- and dollars alone --- can save her now.

Within the next 48 hours the Balboa Park buildings restoration fund committee must raise \$12,000 to complete the \$100,000 fund that eventually is to preserve the Exposition buildings for the world in all their beauty. To those who know San Diego we appeal at this time for the final response to our efforts in behalf of Balboa Park.

Give! Give liberally and give now! Carry your check, for every cent that the Balboa Park buildings are worth to you to the Chamber of Commerce this morning.

Then, when the \$100,000 fund is assured, when the money has been turned over to the proper authorities for conducting the restoration; when, finally, the work has been completed and Balboa

Park has once more assumed its rightful place as the most beautiful spot of its kind in North America, then, and rightfully, you may point with pride and say:

“I, too, helped to save those buildings!”

G. A. DAVIDSON, President San Diego-California International Exposition, 1915-16.

10, 1922, San Diego Union, 1:6, 2:5. Committee needs \$13,000 to assure saving buildings; Federated Parent Teachers Association recommends restoration; also Women’s Public Welfare Commission.

March 11, 1922, San Diego Union, 1:2-5. Letter from George W. Marston recommending restoration.

To the Editor of **The Union**: Why should the park buildings be saved? Were they not built as temporary structures, without any thought of being retained after the Exposition period? Yes, it is quite true; but there may be reasons for doing differently. Notwithstanding our purposes, notwithstanding the advice of architects themselves, the dangers involved and the sheer impossibility of permanent restoration at present, the community has grown slowly into conviction that what we have there in Balboa Park --- which is something more than mere buildings --- must not perish. You may prove what you will in facts and figures about the shaky old buildings, the only answer is: “They shall not pass.” Somehow, without knowing how to explain it, we are instinctively, sub-consciously, incurably in love with them, and will not give them up. It’s the grand emotion and is founded, I think, on something real and vital.

The truth is that the Exposition “built better than it knew.” Instead of a collection of exhibition sheds, we have the simulacrum of an old Spanish city. It may be a phantom in some respects, but it looks like the real thing. The wonder of it amazes me. Built for a day, it has the elements of permanency: historical interest, architectural integrity, beauty of form, color, group relationship, and landscape setting. You can cross the great bridge, pass through the stately portal, and find yourself in another world --- that’s partly the charm of it --- the transition from San Diego to Seville, from California to Spain.

Shall we let this wondrous treasure slip away? It is crumbling to pieces rapidly these rainy days, and, as Mr. Davidson well says, sentiment will not save it. Money is needed and needed quickly.

Someday San Diego will rise to the idea of rebuilding our “garden fair” in the permanent materials of the California Quadrangle. The best we can do now is stay the downfall of these buildings for a few years. The amount of money is slight compared to the incomparable values at stake.

I confess to some disappointment over the dragging of the campaign. It seems to me that self-respecting citizens should not wait for Mr. Dorland, Mr. Bard, and their fellow committeemen to call upon them. It is everybody’s business to send the contributions by mail or to carry the money to the chamber of commerce. It is absurd that I should be called upon to write an “appeal” (Mr. Dorland had to telephone about it three times). Doesn’t the object itself make the appeal? Are not the printed coupons staring in the face in every newspaper? I appeal --- Subscribe, Oh, Subscribe!

GEORGE W. MARSTON.

March 11, 1922, San Diego Union, 1:1. Chauncey Olcott, actor and singer, now at Spreckels Theater, urges San Diego to save buildings.

March 11, 1922, San Diego Union, 1:5, 2:6. Park building rally staged for this afternoon in Balboa Park; more than 6,000 expected to attend picnic of State Societies; Major Davis and his band to play in Plaza de Panama for an hour.

March 26, 1922, San Diego Union, 12:4. Nathaniel E. Slaymaker writes letter protesting City Hall in Park.

March 27, 1922, Letter, Executive Secretary, Board of Park Commissioners to Bertram Goodhue.

Mr. Bertram G. Goodhue,
#2 West 47th St.
New York City.

My dear Mr. Goodhue:

The exposition buildings present a problem of such magnitude that we are taking the liberty of writing to you, in the hope that you will feel sufficient interest to generously held the Park Board solve it.

The question as to whether or not the buildings should be saved or demolished is ably answered by George W. Marston, in the enclosed newspaper clipping. We know it is entirely contrary to your convictions that the buildings should be retained, but they have been retained and now the people refuse to part with them.

Furthermore, the task of taking down the buildings and properly laying out the grounds would be one of great magnitude and expense, and it would take many years to make the grounds attractive again. The citizens of San Diego have raised more than \$100,000 to save the buildings, if only for a few years. In the meantime, perhaps some plan can be devised whereby at least some of the buildings can be replaced by permanent structures.

Before placing our problem before you in concrete form, I should like to outline briefly the present status of the buildings.

Building No. 1 In excellent shape and is used as quarters for the Park Board, and for some other purposes. (1915, Administration Building)

Buildings Nos. 2 and 3 are permanent.

Buildings Nos. 4 and 5 Used by the San Diego Museum Society and in pretty bad condition, especially No. 5 (1915, Indian Arts); Building No. 4 (1915, Science of Man).

Building No. 6 Is in pretty good condition outwardly. It is now closed, having been used for various unimportant purposes from time to time.

Building No. 7 Is in fair shape. It has been closed most of the time since the Exposition closed.

Building No. 8 Has been used for several years by the Natural History Society, who have installed and maintained a very extensive exhibit. Over 3,000 people visited the building last Sunday, although there was nothing unusual going on. Enough money has been spent on the building to make it usable, but the exterior looks very shabby. (1915, Foreign Arts)

Building No. 9 Is in pretty good shape outwardly. No doubt it needs a new foundation badly. (1915, Commerce and Industries)

Building No. 10 Has been largely used for motor exhibitions, County Fairs, Industrial Shows, etc. It needs a large expenditure of money to put it in shape to last a few years longer. (1915, Varied Industries and Food Products)

Building No. 11 Permanent and now very attractive indeed. (1915, Botanical)

Building No. 12 This building has been restored by the ladies of San Diego for used as a Civic Auditorium. From \$15,000 to \$20,000 has been spent on it, and more is being constantly spent, now, especially on the exterior. The work was started last May and met with such encouragement that the ultimate outcome was never in doubt. The building is in constant demand for large balls, and will soon be in use for conventions, etc. The success of the movement to restore and use the building undoubtedly is responsible to a considerable degree for the determination of the people to save the others. (1915, Southern California Counties)

Buildings 16 and 17 Are in very bad shape, having been used all during the war by the Marines.

The buildings mentioned above are the only ones which need to be discussed. The others are either unimportant, or have been already condemned.

It is perhaps needless to say that all buildings north of Building No. 28 on the Isthmus, with the exception of the Indian Village, have been wrecked.

Our principal problems are the following:

First, Shall we try to save all the main buildings or shall we put our money in some of them and allow the others to go? If so, which?

Second, What would be the best treatment of areas where buildings are removed?

Third, Would it be wiser to spend out money mostly on foundations, retaining walls, roofs, side walls, plastering, staff work or painting?

Fourth, How about arcades, pergolas and other minor walks?

Fifth, As it is evident that the people are determined that the buildings shall remain standing, what would be the best purposes to which to devote them? It is assumed that it would be better for many reasons to use the buildings as much as possible, rather than to keep them permanently closed.

It is our intention to have, in the near future, a thorough survey made of all the buildings mentioned above, with estimates in detail of the cost of restoration.

The people of San Diego appreciate more each year the wonderful "Dream City" which you created in Balboa Park, and would esteem it a great favor if you would give us the benefit of your valuable advice and suggestions.

Sincerely yours,

BOARD OF PARK COMMISSIONERS

by

Executive Secretary.

March 27, 1922, San Diego Union, 7:1. Miss Teresa Morley and Miss Agnes Tobin preside over bridge tea at Miss Morley's home in Balboa Park.

April 4, 1922, Letter, Bertram Grosvenor Goodhue, Architect, to T. N. Faulconer, Esq., Board of Park Commissioners, Balboa Park, San Diego, Cal.

My dear Mr. Faulconer:

I am in receipt of your letter of March 27th for which I am glad to express my thanks, even though the question you ask me seems to be already settled.

My opinion as to what should be done to the temporary fair buildings, or at least to most of such is well known. However, please permit me to reiterate it here. In my opinion, the only buildings or structures of any kind that should be permitted to remain in Balboa Park are the following:

The bridge, #2, 3, the organ building, the Botanical Building (11) and such pergolas, pavilions, etc. as form necessary items of the gardening and parking system. Building #1, the Administration Building, entirely nullifies the dignity and impressiveness of the California Building (3). I pointed this out when #1 was first projected. The fact that this building was for strictly utilitarian purposes necessitated the presence of a great number of windows, this giving it a restless and, to my mind, in view of the scale of the California Building, an impertinent appearance. However, its site is probably strategically the correct one and I believe a new building that would be fireproof, dignified and in harmony with the California Building could well take its place. As for the other buildings on the "Prado" and the "Plaza de Panama" up to and including #12, these are all mere stage scenery. Their windows come where they look well and have no reference to anything within. They are, structurally, of the flimsiest sort and should come down.

Of course, it is quite true that the needs of the San Diego Museum Society should be met; but this could be done without any tremendous expense by building a lower and simpler building on the site of #4 with, possibly, a still lower and still simpler U-shaped addition to #2, which would extend around three sides of a little garden between #2 and #5. In this way the resultant pile, i. e. #1 modified, #2, #3, #4 modified, and a substitute for #5, would form an impressive whole, would have the advantage of bringing everything together and make everything, as it certainly should be, fireproof. I am sure that Dr. Hewett would approve the principle of all this. As for the present #5, 6, 7, 8, 9, 10, 12 and 27, they are now crumbling, disintegrating and altogether unlovely structures, structures that lack any of the venerability of age and present only its pathos, and the space they occupy could readily be made into one of the most beautiful public gardens in the new world. I have the utmost confidence that were this process placed in the hands of Mr. Morley, it would not be a matter of "many years" but that in, say, two the beauty of the result would be apparent to even the most hardened sentimentalist.

A very convincing answer to that overwhelming body of citizens who would preserve the buildings comes to me, a quotation, and not of my own making, to wit, "There's nothing in majorities: how about Noah?"

With no hope whatsoever that the suggestions I have outlined above will be followed or that my opinion or that of any other expert will be regarded as of any value, let me close by reminding you that at the time I was first called in to act as Consulting Architect for the Panama-California Fair, I asked for and received a definite promise from the Building Committee that the temporary buildings should come down when they had served their purpose.

I should be very glad indeed if you would give this letter of mine the widest publicity. For Mr. Marston as a man and as a citizen I have the highest respect; but for the appeal he makes in print my sentiment is distinctly the reverse.

Very faithfully yours,

(Signed) Bertram G. Goodhue.

April 5, 1922, San Diego Union, 14:3. Services at Organ Pavilion to commemorate 100th anniversary of General and President Ulysses S. Grant's birthday to be staged April 27.

April 7, 1922, San Diego Union, 4:1. EDITORIAL: San Diego Museum

(Excerpts)

The Natural History Museum in Balboa Park is one of the most important educational institutions in San Diego. It should be the nucleus of every local scientific activity, a research laboratory, a repository of specimens of every variety from the fields of geology, zoology, archaeology and paleontology; a museum, in short, wherein the student and passerby may learn the history of the world and of man, almost at a glance, with an object lesson to illustrate the revelation on every hand, and experts in every department to make the record clearer.

The Museum is only fifteen months old, but in that short time it has more than justified its existence and the ambitious purposes of its founders and sponsors. Perhaps, therefore, it will be interesting to those not familiar with the work of the museum to know that during the past winter, the Museum authorities arranged for and delivered 51 lectures on subjects pertaining to the work of the association, and that these lectures were attended by more than 11,000 persons; that 28 groups of school children and special students, numbering more than 600 individuals, visited the Museum and were given such information and instruction as they desired; and that, in the same period, 26 Outdoor Nature Walks have been conducted with an attendance of more than 1400. The Museum also circulates 20 natural history cabinets among as many schools in San Diego, these miniature museums containing no fewer than 700 natural history objects, representing practically all the branches of the natural sciences. A Museum truck calls at the schools at intervals for the purpose of shifting these cabinets during the school term of forty weeks.

. . . The Museum received no pecuniary aid from the city, county or state, and is, therefore, dependent for support on private subscriptions, membership fees and special donations.

April 8, 1922, San Diego Union, 7:4. Park Buildings Fund Committee elects officers; Edward Chase chosen engineer to direct rehabilitation; Committee to open office; Mr. Dorland, chairman, said \$105,500 has been subscribed to the restoration fund to date.

April 20, 1922, Letter, Executive Secretary, Board of Park Commissioners, to City Park Commission, Pittsburgh, Pennsylvania; Attention: Secretary of or Official in Charge of Schenley Park Golf Course.

Gentlemen:

The enclosed clipping was taken from **The San Diego Union**, a morning daily paper, of April 1, 1922, and the information therein has aroused much interest in this department, by reason of the fact that municipal golf has become an important factor in the entertainment of the many thousands of tourists who visit this city annually.

We believe that you can materially help us with such information as you may care to furnish in regard to the methods employed in so successfully introducing and handling the game in Schenley Park, and we enclose a questionnaire with our request that you answer the questions therein as fully as you care to go into the matter.

It may interest you to learn that in 1400-acre Balboa Park, adjacent to the Panama-California Exposition Grounds and buildings, which now are being restored, we have an 18-hole course that last year brought in gross receipts of \$8,972.70 from green fees.

Our charges are as follows:	Daily tickets	.50
	Monthly (good 30 days)	2.00
	Annual	12.00

Owing to climatic conditions, golf is an all-year sport here, and the course was in use 345 days in 1921; total play for the year was 29,152 players or an average of 85 persons per day.

Course embraces some 275 acres of table-land, intersected by deep valleys, affording natural hazards and unusual playing conditions. Greens are of oiled sand, which many golfers like quite as well or better than turf by reason of their uniformity.

Our total cost of maintenance and operation for 1921 was \$5,470.39, leaving profit of \$3,502.31, which will go back into improvement of Course.

Sincerely yours,

Exec. Secy.

May 8, 1922, San Diego Union, 4:1. EDITORIAL: Balboa Park

Balboa Park is one of the coordinate factors of San Diego's civic growth and prosperity. It has been called an "asset"; it is more than that --- it is as much an integral part of our community as our chamber of commerce, our banks, our business houses, our religious organizations, our newspapers, our cultural and commercial activities. It is complementary in actual material importance with our harbor development. There is no reason why it should not aid in that development, as the improvement and use of the harbor must provide from its traffic the means for the development of the park. The harbor and the park serve to make San Diego a complete city; the harbor is the source of the wealth that will build the city to metropolitan proportions, and should be our first consideration in every civic enterprise; our park is the direct result of that prosperity, also serving its special purpose of advertising to the world that we possess the concomitant to wealth which is leisure to enjoy the rewards of culture, the healthful relaxations of recreation, and the indulgence of our love of the beautiful.

. . . We must understand as a community that whatever we contribute to any of the park's activities is absorbed for the sole emolument and further improvement of the park and its unique structures, which add so much to the beauty of the environment. There is no personal profit for any feature established in the park, and every dollar invested is so much relief from the general taxation. The business policy of the park board and those connected with the management of the various subordinate and accessory departments are entirely apart from any hint of commercialism. Balboa Park represents the finer side of San Diego's civic aspiration; it is our best bid for the appreciation of the world at large; its affairs are wisely administered, and always in direct contact with the cultural, the recreational and the educational uses of the community. Balboa Park is San Diego's garden, school and playground, and, as such, should be forever cherished as our most precious ornament and possession.

May 31, 1922, Letter, Bertram Grosvenor Goodhue, Architect, to J. W. Sefton, Esq., Sefton Investment Company, San Diego, California.

Dear Mr. Sefton:

Although it is my firm conviction that anything you may write me or anything I may reply to you will make no difference in the final result, I am grateful to you for your letter of May 22nd and the stand you take in it.

Reading your letter very carefully and several times over, so far as I can see, your point of view is exactly the same as my own. This point of view I have repeatedly expressed in writing to various people in San Diego, notably to Mr. Marston. I have volunteered to make a revision of the plot plan of the Fair, showing how very simple a matter it would be to park the spaces now occupied by the rapidly disintegrating, shabby and altogether disgusting looking buildings, and indicating in "block" proper fireproof continuations (wings and what not) in which could be housed safely, conveniently and beautifully, the various collections now in the possession of the City. That I should be glad to make such a drawing without cost to the City remains as true as hitherto, providing that the scheme were accepted --- something of which I have no doubt whatsoever --- I should, of course, be made architect for the fireproof additions, which I believe should be very simple in character indeed; though again, I think it extremely improbably [sic] that this would occur.

One thing you can be certain of; in this way and in this way only, the City of San Diego would have at the least possible cost, one of the finest, if not the finest public gardens in America. Furthermore, that in this way and in this way only, would the cost of fireproof housing for your collections be reduced to the minimum. It is idle for an architect to guess at any such time as the present; but I believe you can count on forty cents a cu [sic] foot as a fair average price.

However, I have talked this over with so many people that, while I am delighted to find you sympathetic and in harmony with my views, I think it is probably quite idle to express them again in this fashion.

Believe me

Very faithfully yours,

(Signed) Bertram G. Goodhue.

Wright; Association reports receipts of \$18,018 from benefits and rentals; \$16,536 expended on building last year; main auditorium used 78 times during year.

June 8, 1922, San Diego Union, 8:3-4. Secretary of Navy and party to be guests at ball at Civic Auditorium tonight.

June 9, 1922, Letter, Mr. Carl C. Dorland to Mr. Joseph W. Sefton, Jr. (George W. Marston Papers, Collection 219, Box 2, File 31, San Diego Historical Society Research Library).

I return herewith Mr. Goodhue's letter of May 31st which you left with me. I took it up with the intention of writing a replay, and I find that his views are so at diversity with mine that I feel it would be a waste of time to write to him and of his time to read what I would write, and I am sure that neither of us would change our opinion.

However, I am very glad to have seen his letter, as it has been suggested, and I think I have backed the suggestion that he would be the man to be employed to lay out a permanent plan for use to build to for the future, but after reading his letter, I am satisfied that he is not at all the man we should have, assuming that we want any kind of beautifying buildings in the park. His interest, as I understand it, is purely in developing a public garden. My interest is in building in our garden, in an artistic way, a group of buildings for art and cultural purposes, and I would, myself, much prefer to employ some architect who was in sympathy with this idea.

However, if you and I cannot agree in all matters connected herewith, I am strong for the Natural History Museum, and would like to see one that is ornate and of beautiful structure, rather than Mr. Goodhue's building that would be "very simple in character" indeed.

June 10, 1922, San Diego Union, 1:1. Y. M. C. A. plans \$750,000 for Navy building here; George W. Marston announces plan at meeting of secretary with Chamber of Commerce directors.

June 10, 1922, San Diego Union, 10:1. Throngs greet head of Navy at garden fete yesterday afternoon.

June 11, 1922, San Diego Union, 1:2. Two thousand school children parade to Park in 640 automobiles from Protestant churches of San Diego; parade ended with exercises at Organ Pavilion.

June 13, 1922, San Diego Union, 1:8, 3:5. Reference library to be presented to city; W. W. Whitney, retired businessman and world traveler, announces intention to erect memorial to book-loving wife; gift of \$30,000; building will occupy site of old Salt Lake Building.

June 13, 1922, San Diego Union, 1:5. Collier returns from Rio de Janeiro to battle with his deputy commissioner, F. A. Harriman of Nebraska.

June 14, 1922, San Diego Union, 1:7, 3:5. Park building restoration to be started soon; G. Edward Chase has just completed a survey of buildings; \$100,000 fund not sufficient to restore eleven buildings, so Committee was forced to decide what buildings to repair; Work to start on No. 10, the Foreign and Domestic Products Building (Note: 1915, Varied Industries and Food Products); given precedence because of letter from Felix Landis of San Diego County Farm Bureau; building will be ready for Fair, date of September 20; Foreign Arts, Science and Education, Russia and Brazil, Panama-Pacific [sic], Canadian, Kern and Tulare Counties and San Joaquin Buildings to be repaired in order given; none of state buildings included in survey; New Mexico Building has been offered to Girl Scouts; Committee has on hand about \$47,000 in cash and \$10,000 in uncollected pledges.

June 18, 1922, San Diego Union, Classified, 1:8. New Zoo plans given; membership drive underway.

June 18, 1922, San Diego Union, Real Estate Section, 2:4-5. Expect to complete paving of Pershing Memorial Drive through park in early fall.

June 19, 1922, San Diego Union, 8:3-4. Articles on plans for San Diego Zoo by H. M. Wegeforth, M. D., and Burritt S. Mills, chairman membership committee.

June 20, 1922, San Diego Union, 9:4. California Construction Company to be awarded contract for paving Pershing Drive.

June 20, 1922, San Diego Union, Classified, 3:1. Opening event for Ad Club Convention to be staged at Organ Pavilion next Sunday afternoon.

June 20, 1922, San Diego Union, 20:5. Collier and other members of Brazilian Fair Commission ask President Harding to oust F. A. Harriman.

June 23, 1922, San Diego Union, 4:1. EDITORIAL: History in Pageantry

The use of pageantry in furtherance of community activities and enterprises serves a double purpose --- it enlarged the public spirit by an appeal to the public interest through the individual citizen, and, properly presented, it has educational value in its historical aspect. These are the purposes specified in the program offered by the San Diego County Federation of Women's Clubs in their "Mission Pageant" in Balboa Park on Saturday; the monetary proceeds will be contributed to the rehabilitation fund of the Balboa Park Auditorium, and, at the same time, a vivid picture of our local history will be unfolded before the spectators.

June 23, 1922, San Diego Union, 8:2-3. Description of pageant to be given tomorrow afternoon and evening back of California Building in Balboa Park, cast of 500.

June 23, 1922, San Diego Union, 11:2. President Wegeforth explains plans for housing animals at Balboa Park; they are not going to roam around the park loose.

June 24, 1922, San Diego Union, 10:3. Work to begin on repairs for park buildings; assembly of materials for restoring County Fair building already started; will cost \$21,720; skylights to be fixed, walls plastered, ornament retreated, roof repaired, footing replaced with concrete.

June 25, 1922, San Diego Union, 19:6. Mission pageant of Cabrillo era given in Park.

June 25, 1922, San Diego Union, 19:6. Swedish residents held picnic in Pepper Grove yesterday afternoon.

June 26, 1922, San Diego Union, 1:8. Dr. Rufus E. Klein Smid, president University of California, addresses Pacific Coast Advertising Club Association at first meeting at Organ Pavilion; Dr. Stewart gives organ recital; community singing.

July 1, 1922, San Diego Union, 1:7. Harriman quits Brazilian Fair Board; President Harding accepts resignation; lack of harmony charged.

July 8, 1922, San Diego Union, 8:1-4. Santa Barbara undertakes plan to restore restful Spanish atmosphere of early years.

July 14, 1922, San Diego Union, 6:3. Half million dollars available for continued construction of hospital in park; plans for buildings to be erected are on way from Washington, D. C.

July 15, 1922, San Diego Union, Classified, 11:5. Hotel men given leopard's cage to Zoo in Park.

July 16, 1922, San Diego Union, Classified, 1:3-7. Zoological Society members pose in cage for camera at dedication of gift from Hotel Men's Association; address of dedication given by Sam S. Porter; Mayor replies for City.

(Caption for photograph: This is entitled "One the Inside Looking Out." It is a view of the east front of the hollow square of new tile and steel cages built at the Zoological Gardens with money given by public-spirited San Diegans. The "wild animals: in the high center cage are members of the San Diego Hotel Men's Association, who financed this particular cage and who dedicated it with appropriate ceremonies Friday afternoon.)

Running true to form --- "out in front" in civic and public enterprises --- the San Diego Hotel Men's Association dedicated the first of the new, sanitary, humane animal cages that has sprung into being as a result of the gifts of many public-spirited San Diego organizations and individuals, with a brief but impressive little ceremony at the zoological gardens Friday afternoon.

The particular cage dedicated, one of the four large, arched structures that form the centers of the hollow squares of the new animal homes just west of the reptile house, had been duly decorated for the ceremony with the bronze plaque that attests its dedication to the children of San Diego and environs by the hotel association. As a preliminary to the ceremonies, which were attended by many citizens, the members of the association, accompanied by Mayor John L. Bacon and Dr. Harry M. Wegeforth, president of the Zoological Society, has themselves locked within the cage and were duly photographed in the role of wild animals by Gen. M. O. Terry of Coronado, an enthusiastic supporter of the new zoological gardens.

DEDICATION ADDRESS

Introduced by R. B. Thorbus, president of the Hotel Men's Association, Sam S. Porter of the San Diego Hotel happily choosing as his theme the humane side of housing collections of wild animals for study, delivered a short but effective address of dedication. He prefaced his talk by reading G. E. Goodrich's touching poem, "A Prayer for Dumb Creatures," and cited the Chinese as the world's race most kind to dumb animals --- never allowing themselves to get angry with them nor maltreating them. The "Prayer" is reproduced in another column. (Not included in this collection.)

Another striking point brought out by Porter was the cardinal reason for conserving bird life. "If such a calamity should occur," he said, "as the sudden extermination of all bird life on earth, the human race would not survive it by a year --- the insects would multiply and overrun the earth, devouring every vestige of the food of mankind."

Following Porter's address, Mayor Bacon spoke briefly in acceptance of the Hotel Men's gift on behalf of the city and of children of all ages.

BOON TO CHILDREN

"This Zoological Garden," said the mayor, "has outrun my knowledge in its rapid growth --- it is developing into a splendid monument to the men and women whose devotion, hard work and sacrifices are making it possible. IT is a boon to our children. Moreover, from the purely selfish viewpoint of advertising of our city, it will become famous all over the world. I want to express the profound gratitude of the city, and my own gratitude for this splendid gift."

George H. Champlin, who has been indefatigable as an aide to Dr. Wegeforth in "putting across" the improvements in the gardens, followed the mayor with a short discussion of the underlying purpose of the Zoological Society --- education of the younger generation. He impressively waved a page from a recent magazine section of **The Union** before his audience, bearing an illustrated story of the innovation in supplying anti-snake bite serum by airplane, as introduced by the San Diego Zoological Society; then produced a similar page from a Syracuse, New York, paper, bearing the same story, and said that it had been "lifted" and "syndicated" to such a wide extent that more than a million and a half copies had been circulated, reaching probably no less than five millions of readers.

REPLICAS OF DAMS

Dr. Wegeforth, Champlin, Landscape Architect N. E. Slaymaker, Director W. H. Raymenton, and Capt. Burritt S. Mills, chairman of the membership committee, then conducted the hotel men and guests through the lower grounds, gleefully pointing out to Mayor Bacon the fact that the Zoological Society could give the city administration pointers on efficiency and economy in dam construction, inasmuch as for an expenditure of only \$11,000 in four months the Society has built exact duplicates of Morena, Barrett and Lower Otay dams in the canyons below the Reptile House, where aquatic animals, birds and reptiles will disport themselves.

Names of members of the Hotel Association present at the ceremonies follow.

July 19, 1922, San Diego Union, 7:1-2. Submarine base at San Pedro and naval training personnel at San Francisco to be transferred here.

July 21, 1922, San Diego Union, 1:5. Woman gives Zoo \$10,000 to build a fence around 150-acre Zoo.

July 26, 1922, San Diego Union, 12:1-2. Mrs. A. B. Spreckels given treasures abroad for California museum in San Francisco; French government presents rare porcelains and pottery; Marshal Foch donates uniform and sword of Battle of Marne; Queen of Rumania to give room.

July 26, 1922, San Diego Union, 12:5. Mayor Bacon to present Merit Badges to Girl Scouts at Balboa Park service in the Court of Women at the Botanical Garden to the left of the lily pond tomorrow.

July 27, 1922, San Diego Union, 9:4. Only four days remain in which to raise \$3,500 to complete financing of Pershing Memorial Drive.

July 29, 1922, San Diego Union, 1:3. Marshall W. Giselman, popular organist, arranged for prelude from "Parsifal" to be played on organ with themes by members Marine Corps Band; part of tonight's recital.

July 30, 1922, San Diego Union, Society-Club, 1:7-8. John Doane will give moonlight concert at Spreckels organ, August 2, to benefit Civic Auditorium.

July 30, 1922, San Diego Union, Real Estate Section, 1:4-5. San Diego Museum of Natural History possesses only specimens of southern fur seal known.

July 30, 1922, San Diego Union, Real Estate Section, 1:8. Masterful organ recital thrills 8,000 persons; unique lighting effects lends enchantment to rendition of prelude from "Parsifal" in which U. S. Marine Corps ably assist.

August 2, 1922, San Diego Union, 10:1. Dr. Stewart returned from vacation; recital at organ this evening; recitals will continue Wednesday and Saturday evenings during summer; other day recitals will be given in afternoon beginning at 3:15.

August 3, 1922, San Diego Union, 7:16. A. B. W. writes letter expressing desire for ample parking system to take care of demand for spaces during events staged in the park for the public.

August 4, 1922, Letter, Executive Secretary, Board of Park Commissioners to Board of Education, relative to a bond issue to pave Park Boulevard from Russ Street to Exposition grounds.

August 7, 1922, San Diego Union, 1:6. Organ recitals to be held every evening for remainder of summer.

August 7, 1922, San Diego Union, 3:3. Rehabilitation of County Fair structure almost finished; other work rushed; work started on Building #5, the old Mining Building, of Exposition days.

August 8, 1922, San Diego Union, 5:4. Education Board adopts contract for Stadium use; will pay Commission \$200 a month for use of Stadium and a 15 percent share in the receipts of student activities.

August 9, 1922, San Diego Union, 1:2-3. George W. Marston tells why he is for Charles C. Moore and against Hiram Johnson for U. S. Senate.

August 9, 1922, San Diego Union, 6:6. New \$1,000,000 hospital will be commissioned August 24; total personnel of big Naval Hospital will approximate 600 by September 1; 160 hospital corpsmen and patients are occupying tents on the new hospital reservation grounds; bids are to be opened August 23 for construction of two more wards and an industrial building; September contract will be for a group of six more structures; Naval Training Station at Point Loma will open November 1.

August 10, 1922, San Diego Union, 8:1. Doane to give second recital this evening.

August 10, 1922, San Diego Union, 14:1. Madame Boshko, violin virtuoso, displayed masterly technique in program at Spreckels organ last evening.

Admiral 10, 1922, San Diego Union, 14:5. Admiral Roger Welles wants \$35,000 in bonds to be issued for paving of Park Boulevard from Russ Street to Exposition grounds; new hospital is situated east of this road and dust from unpaved road will blow in that direction.

August 12, 1922, San Diego Union, 7:1. Submarine base will remain at San Pedro.

August 14, 1922, San Diego Union, 3:3-4. Frank P. Allen, Jr., architect, writes letter indorsing Charles C. Moore for Senate: "Charles C. Moore is an engineer, a big engineer, he is familiar with the advantages and disadvantages, the problems and the difficulties of such a project as Boulder Dam. He need not depend upon what someone else tells him or take what someone else hands him. He is in his chosen field and profession when he passes upon a phase of this project and his judgment is a personal, technical knowledge, not hearsay, that may or may not be right.

August 15, 1922, San Diego Union, 3:3. George W. Marston and Julius Wangenheim protested against the granting of a lease to the Marine Engine Works of a factory site at the foot of D Street in an appearance before the City Council yesterday.

August 17, 1922, San Diego Union, 7:3. Installation of ornamental lamp posts in Park to be accomplished soon; Esco Ives, big chief Goof, turned check over to John F. Forward, Jr. of Park Board.

August 18, 1922, San Diego Union, 5:4. Rehabilitation of County Fair building progressing rapidly.

August 19, 1922, San Diego Union, 10:1. Tax Association opposes City Hall in Park; approves Mayor Bacon's proposal to build a City Hall in conjunction with a Court House on present location.

August 20, 1922, San Diego Union, 6:7. Councilman Harry K. Weitzel writes letter favoring City Hall in Park.

August 20, 1922, San Diego Union, Automobile Section, 1. Balboa Park boasts splendid animal cages (illus.),

August 21, 1922, San Diego Union, 6:4-6. Robert E. Masters writes letter advocating park cactus garden.

August 22, 1922, San Diego Evening Tribune, 10:4-5. The Hospital Office announces that the Naval Hospital at Balboa Park is formally opened.

August 22, 1922, San Diego Sun, 1:4. The new million dollar hospital on Inspiration Point in Balboa Park was dedicated today with simple ceremonies.

Elaborate ceremonies were not held because the hospital staff could not interrupt its work.

By tonight all the hospital cases in the tents at Balboa Park, with the exception of surgical cases, will have been transferred to the new hospital, which has a capacity of 600 patients.

Captain J. A. Murphy (Medical Corps), U. S. N., is executive officer and acting commandant of the hospital. Captain Francis W. F. Wieber (Medical Corps), U. S. N., will become commandant of hospital later.

The new building consists of an administration building and two ward buildings and surgical and commissary buildings in the rear.

The Red Cross is constructing a recreational house which will be turned over to the government.

August 27, 1922, San Diego Union, Classified, 1:5-6. Community Circus to be held in Balboa Park, October 17-21, as benefit for Zoological Gardens; George Best, manager Coronado Tent City, to act as manager; about 12,000 persons visit the Zoological Gardens on Sundays and holidays.

August 28, 1922, San Diego Union, 9:6-7. George W. Marston urges election of William D. Stephens as governor.

September 1, 1922, Letter, Duncan MacKinnon, president San Diego Museum Association, to Board of Park Commissioners (Box 1, File: San Diego Museum. 1916-1930) protesting use of Science of Man Building (Building No. 4) for refreshment stand; on August 29, 1922, Park Board commenced tearing out north and east walls; cites 1917 agreement of Park Commissioners with Association.

September 8, 1922, San Diego Union, 8:4. Native Sons and Daughters of Golden West will celebrate Admission Day tomorrow at Pepper Grove, Balboa Park.

September 9, 1922, San Diego Union, 5:6. Sells-Fioto circus offers Zoo two elephants

September 10, 1922, San Diego Union, Classified, 1:4-5. Sells-Fioto circus asks \$6,000 for pair of elephants.

September 11, 1911, Letter, Executive Secretary, Board of Park Commissioners to The San Diego Museum, San Diego, California, Attention of Duncan MacKinnon, President (San Diego Public Library).

Gentlemen:

Replying to yours of Sept. 1st, which was taken up with the Park Commissioners on Sept. 8th, and request therein that work be suspended on the installation of the refreshment stand in the No. 4 building, denied, I am directed to advise you as follows:

In granting your request for use of certain buildings in Balboa Park, the Park Commissioners, on Apr. 9th, 1917, specified that your occupancy of the premises should be authorized so long as certain uses were made of them. Your agreement in this respect has frequently been violated.

It was further specified that the Park Commissioners did not relinquish general control of the buildings.

These facts, while sufficient to warrant the use of a portion of the buildings by the Park Commission, would not have caused the several Park Commissions to feel that they would care to occupy any of these buildings without first considering your Board, except that Building No. 4 apparently has been abandoned by the San Diego Museum. Your exhibits were removed from that building on the first day of March of this year, and the plate designating this building as the Science of Man building was transferred by you to another building. Furthermore, the building has been closed to the public for the greater part of a year when the Park Commissioners decided to use a portion of it for other purposes.

Something over a year ago, Dr. Hewett stated to the Park Commissioners that the San Diego Museum had not sufficient means to provide supervision for so many buildings, and that it probably would be necessary for them to give up at least one of the buildings. He further stated that the Museum was in a precarious financial condition, and that its existence was seriously threatened by its lack of funds. In view of his statement and your later action in closing the building, this department assumed it was your wish to vacate the premises, and, as we have never enjoyed the confidence of your Association, we had no means of knowing that you intended to again occupy the building.

While the Restoration program does not include this expense, and will not be called upon to pay any of the cost of this installation, the removal of our present refreshment stand from the Plaza is certainly in keeping with the restoration idea. The stand was installed during the war as a temporary measure, and it was always the intention of the Park Board to get it out of sight as soon as possible. The necessity of maintaining a refreshment stand of some sort cannot be questioned. Visitors must have some place to obtain refreshment after the long walk across the bridge, or after walking for several hours around the park, and the stand has proven a great convenience to the

several hundred people who are employed by the park department and the several institutions in the park. Of still greater importance is the fact that San Diego receives exceedingly valuable advertising from the postcards sold at the stand and from the thousands of pigeon pictures that are taken every month and sent by visitors to their friends and families all over the world. From five hundred to one thousand rolls of film are sold each month, which should give you some idea of the advertising value of maintaining the pigeons and a place where the films may be obtained.

As to the building No. 4, the Park Commissioners believe that the refreshment stand will be an asset, rather than otherwise. It will tend to make this one of the most attractive spots in the park, and will take so little of the floor space as to be of no consideration. According to our estimates, the floor space we are devoting to this improvement is small compared to the total area covered by this building, and is more than offset by the space the San Diego Museum is devoting to purposes other than those stipulated in the agreement which you quote.

The Park Commissioners appreciate the fact that the San Diego Museum is a valuable asset to the city and to the park. They have given it hearty support at all times, both morally and substantially, as they will no doubt continue to do. Other features, however, demand their consideration, and it is their wish to serve the best interests of the park, the various institutions operating therein and of the city at large.

If you will go over the situation with the Park Commissioners in person, we are sure that you will find that their action is fully justified by the facts in the case.

Sincerely yours,

Board of Park Commissioners

By

Executive Secretary.

September 11, 1922, San Diego Union, 5:4. Offer to sell elephants

September 11, 1922, San Diego Union, 14:5-6. Ten cents admission charge will be made at Zoo beginning Sunday; children will be admitted free.

September 13, 1922, Letter, Executive Secretary to Captain R. W. F. Wieber, Marine Corps, U. S. N.

The Board of Park Commissioners, in regular meeting of September 8 last, formally accepted the return to this Department of the two buildings located in the Pepper Grove, Balboa Park, and used by the Medical Department of the U. S. Navy since May of 1917.

September 13, 1922, San Diego Union, 5:6. Elephant deal falls down at final moment; circus demanded cash in full payment

September 13, 1922, San Diego Union, 10:2. In line with other improvements to the County Fair to be held September 20-24 at Balboa Park, including the addition of the Civic Auditorium for farm center exhibits, the erection of another livestock shed, the enlarge poultry show, the addition of a junior poultry division and the Boys' and Girls' Pig Club, and the building of a real dance floor for the big indoor dance, the County Fair Committee has authorized Manager Landis to fence in additional acreage and to grade a circular track therein, which can be utilized for other free attractions during the Fair.

The area is directly north of the livestock shed and will include what was originally the Tractor Demonstration Field during the Exposition days. The space will permit of a track about one-fifth of a mile in circumference and of sufficient width to permit cow-pony racing. It also will probably be used for bicycle races.

September 13, 1922, San Diego Union, 20:3. Los Angeles Club to hold annual picnic in Balboa Park Saturday morning.

September 15, 1922, San Diego Union, 7:4. County Fair to give prize dance for all nations.

September 15, 1922, San Diego Union, 9:2. Alligators arrive at Zoo.

September 16, 1922, San Diego Union, 1:3-4. Ringling Brothers and Barnum and Bailey Circus Company tried to give a 31-year old elephant to Zoo, but the elephant refused to leave car.

September 19, 1922, San Diego Union, 7:4. Roosevelt Junior High School (on 17-acre tract) opened yesterday.

September 20, 1922, San Diego Union County Fair Section

2:1-8. New construction track is arranged for contests; bronco busting and cow pony racing; promenade of milk maidens; flappers' parade; boxing bouts

3:5-6. Bureau of Pest Control will display live insects

5:4-5. Plan many new entertainment features, by Ed Davidson

7:3-6. Receipts at annual County Fair will be used in financing bigger exhibit next year, by Winfield Barkley, Southern Trust and Commerce Bank.

Approximately \$5,000 was distributed in premiums during 1921 fair; more than \$3,000 has been paid to Park Board as rentals for buildings used, while another \$3,000 has been paid for old lumber.

The fair committee gave \$500 toward the restoration of the exposition buildings. Permanent lighting for No. 10 building has been installed at a cost of \$2,000, while a new electric service cable cost \$600.

At the end of the 1920 fair, the committee returned \$2,000 which had been given by the Board of Supervisors, believing that the fair had reached that stage where it was financially able to stand on its own feet.

September 20, 1922, San Diego Union, 1:4. Japanese fencing to be feature at County Fair; local contestants have records for proficiency (illus.).

September 21, 1922, San Diego Union, 1:4, 3:3. Snitzky, Bolshevik Navy bear, becomes Lady Jason of San Diego; latest star of elite set at Zoo; gift of U. S. S. *Jason*.

September 22, 1922, Letter S. G. Ames to Judge H. C. Ryan, Board of Park Commissioners stating 1,470 children registered at Roosevelt Junior High School.

September 22, 1922, San Diego Union, 5:2-3. San Diego County's greatest fair exhibit opens with feature program of instruction and entertainment.

September 22, 1922, San Diego Union, 6:3. Building blocks use of Naval Station; officers expect opening of new \$4,000,000 plant to be two months late.

September 22, 1922, San Diego Union, 9:3-4. Farm parade and races big fair features today.

September 22, 1922, San Diego Union, 10:5-6. Recapitulation of County Fair events.

September 23, 1922, San Diego Union, 5:3-5. Japanese broadsword fencing feature at County Fair.

September 24, 1922, San Diego Union, 1:-34, 7:4. Rodeo provides thrills at County Fair; big Farm Bureau exhibition to close tonight.

September 24, 1922, San Diego Union, 22:1. Numerous San Diegans will realize dream to be clowns at Community Circus; opens in Balboa Park, October 17; Tommy Getz and Jack Dodge, leaders of troupes of clowns.

September 25, 1922, San Diego Union, 5:4-5. Annual County Fair ends; some criticism of keeping fair open on Sunday; directors estimate that last year's attendance of 43,000 will be equaled; baby show and livestock parade were outstanding features of final day; expense of fair will exceed \$25,000; livestock sales during week totaled several thousand dollars; total exhibits last year 2,902, this year, 5,815.

September 25, 1922, San Diego Union, 7:6. Flower show to exhibit rare flora; 16th annual event to be held next Saturday and Sunday in Cristobal Building.

September 25, 1922, San Diego Union, 14:2. Fourth Division Boy Scouts has review at Indian Village Friday evening.

September 25, 1922, San Diego Union, 14:6. Reverend Roy Campbell scores Sunday carnival feature of County Fair.

September 26, 1922, San Diego Union, 10:5. Three thousand dollars asked for aid of Zoo; Council favors assistance, but conditions of City's finances said to prevent.

September 28, 1922, San Diego Union, Classified, 11:1. Thomas Lee Woolwine, Democratic candidate for Governor, to speak tonight at Civic Auditorium.

September 28, 1922, San Diego Union, 18:5. Community Circus in Park, October 17 to 21, will held Zoo; meeting at U. S. Grant Hotel last evening; W. E. Slaymaker, architect, outlined plans.

September 30, 1922, San Diego Union, 4:1. EDITORIAL: Our Own Architecture.

As at present designed, the [Y. M. C. A.] building will follow the lines of the Spanish-Colonial order so beautifully expressed in the cluster of composite facades and ornate skyline of Balboa Park, the massive aspect of the Naval Hospital, and the distinctive characteristics of the Naval barracks group on the northern shore of the harbor.

October 1, 1922, San Diego Union, 14:1. Natural History Museum closes for one month; collection will be moved to larger quarters assigned in Canadian Building, which is directly east of building now occupied by museum; advantages: plastered walls and neat interior, absence of floor platforms, wide inviting entrances, room for expansion.

October 1, 1922, San Diego Union, Society-Club, 7:1. Bazaar to raise funds for new home for children will be given Saturday afternoon and evening, October 14, at Civic Auditorium.

October 3, 1922, San Diego Union, 5:5. City Council approves \$600 to help Zoological Society meet payroll.

October 7, 1922, San Diego Union, 10:1. Masonic order will hold dance tonight at Civic Auditorium.

October 8, 1922, San Diego Union, 10:4-5. Mrs. Florence Austin's five-day lecture series to open tomorrow at Civic Auditorium under auspices of **The Union** and **Evening Tribune**; free instruction to housewives.

October 8, 1922, San Diego Union, 17:3. William E. Smythe, local historian and irrigation organizer, died Friday night at age 61.

October 8, 1922, San Diego Union, "Better Homes Week" Section, 3:4-5. Marine Brigade Band will play at Balboa Park; grading of a large area south of Painted Desert for 12 or more tennis courts to be undertaken soon, funds promised by local tennis association; area adjacent to 6th and Date Streets regraded and planted in 1922, approximately 2,000 cubic yards of dirt added to scenic point at this location; this entrance to park is easily accessible to guests of downtown hotels.

October 11, 1922, San Diego Union, 1:1. 16th Street franchise winds, charter amendment defeated; special election brought out 50 percent vote.

October 11, 1922, San Diego Union, 7:1. Kiwanis Club votes to help put on Circus to benefit Zoo; Circus starts Tuesday.

October 12, 1922, San Diego Union, Classified, 11:1. Fifth Marine Brigade Band concerts in Park assured.

October 13, 1922, San Diego Union, 9:1-2. Scientific Library Association formed to expend the \$30,000 gift of W. W. Whitney, local capitalist; \$10,000 to be spent fitting up California Building to house library.

October 14, 1922, San Diego Union, 2:1-5. Fifth Marine Brigade Band, U. S. Marine Corps, assisted by Dr. Giselman, gives concert at Park tonight (illus.).

October 15, 1922, San Diego Union, Classified, 7:5. Marine Brigade Band exhausts concert encores; first of Balboa Park music series draws 10,000 people to Spreckels pavilion.

October 17, 1922, San Diego Union, 5:2. San Diego's own Community Circus to start 5-day engagement on Zoo grounds today (illus.).

October 17, 1922, San Diego Union, 12:2. Benefit bazaar for Children's Home, Saturday afternoon and evening, a success; record-breaking crowd at Civic Auditorium.

October 18, 1922, San Diego Union, 5:2. Community Circus opens with bang at Balboa Park for four-day run; big top is at end of Sawdust Trail which begins at street car line running through the Park and cuts across back of Painted Desert to Zoo grounds; a Carnival City lines the Sawdust Trail and is made up of clean-cut amusements.

October 18, 1922, San Diego Union, 20:4. Pershing Drive fund (\$10,800.30 in subscriptions); final report on status of fund filed with City Clerk; paving in progress.

October 19, 1922, San Diego Union, 5:3. Nothing is left out of Community Circus program; not even lemonade, peanuts, popcorn and clowns.

October 19, 1922, San Diego Union, 9:4. Bazaar realizes \$3,947.82 in cash for children; subscriptions of \$3,326.00 pledged.

October 20, 1922, San Diego Union, 20:1. Circus at Park repeats Wild West features; show will stay over Sunday instead of closing tomorrow.

October 22, 1922, San Diego Union, 14:1-2. George S. Best, Community Circus director, takes issue with pastors opposing show on Sabbath.

October 22, 1922, San Diego Union, Classified, 1:8. Community Circus to close with afternoon and evening shows.

October 22, 1922, San Diego Union, Classified, 7:1. Woodmen of World to hold initiation at Indian Village.

October 23, 1922, San Diego Union, 5:3. Community Circus in Park comes to close after six days.

October 26, 1922, San Diego Union, 5:2. New recreation center for children formed by group of prominent local men and women; park officials donate buildings formerly used by Naval Hospital to center; old surgery building has been renovated and furnished for resident director's living quarters through generosity of Miss Ellen Scripps; Mr. and Mrs. Reardon now installed there; Girl Scouts given an office building to make their headquarters; "In the past the Pepper Grove has been a bad and unwholesome spot; in the future it will be a wholesome and happy spot for children and parents, a true children's center."; three directors appointed at a total of \$100 a month.

October 27, 1922, San Diego Union, 1:7. About 65 percent of park building restoration done; less than 60 percent of fund expended; will be finished by January 1.

October 29, 1922, San Diego Union, Classified, 1:7. H. Lincoln Rogers, who has charge of the design and construction of the new Naval Training Station, has been appointed architect of the \$750,000 Army-Navy Y. M. C. A. building.

October 31, 1922, San Diego Union, 9:1. Sciots to stage entertainment and dance at Civic Auditorium for Masons only Saturday evening.

November 2, 1922, San Diego Union, 9:4. American Legion plans ball as Armistice celebration at Civic Auditorium on November 11.

November 5, 1922, San Diego Union, Classified, 1:7-8. San Diego Zoo gets two green monkeys and big snakes; Dr. Wegeforth returns from East with turtles and lemurs; comments on Zoos of New York, Philadelphia, Washington, D. C., St. Louis, San Francisco and Los Angeles; ten cents admission charge for adults at San Diego, children admitted free.

November 7, 1922, San Diego Union, 10:5. Marshall W. Giselman, popular organist, expected at Marine's concert at Park tonight.

November 15, 1922, San Diego Union, Classified, 13:3. Mayor asks advice on radio broadcasting station at Organ Pavilion.

November 17, 1922, San Diego Union, 4:3-7. Dr. H. J. Stewart writes letter in support of broadcasting organ concerts.

November 17, 1922, San Diego Union, 22:4. Park program at Pepper Grove; children invited today for celebration of Good Book Week; several local authors of children's books will speak.

November 23, 1922, San Diego Union, 7:6. Do San Diego citizens want big radio station in park?; Committee wants to know public sentiment.

November 26, 1922, San Diego Union, Classified, 1:4-6. Lincoln Rogers, architect, F. W. Stevenson, associate; drawing of remodeling of Security Bank Building at 5th and E Streets.

November 26, 1922, San Diego Union, Classified, 8:4-5. San Diego fans swell demands for Balboa Park radio station.

December 2, 1922, San Diego Union, 3:5. Pershing Drive will be closed Monday for the purpose of removing paving; paving of entire drive planned; City to pay \$7,500, the property owners a like amount.

December 2, 1922, San Diego Union, 14:3. Carol singing instruction free at Balboa park center; program will be given December 14 a 2 p.m.

December 3, 1922, San Diego Union, 13:4-5. Lovers of wild flowers have opportunity to tag flora in Zoological Garden.

December 5, 1922, San Diego Union, 1:4-6. Architect's drawing of Balboa Theater to be built at 4th and E Streets; William H. Wheeler, architect.

December 5, 1922, San Diego Union, 10:1-2. Louis J. Wilde writes letter-to-editor giving his opinion of San Diego; petty jealousies and microscopic analysis of small town peats, pikers and politicians.

"A live-wire in San Diego, trying to put the town on the map, has about as much chance as a buggy-whip salesman has in Detroit."

December 7, 1922, San Diego Union, 1:2. Fifty businessmen of the City yesterday launched plans for financing a municipal radio station slated in Balboa Park; to cost \$20,000; outdoor music from Balboa Park organ will be broadcast; Mrs. Lillian Pray Palmer enthusiastic.

December 8, 1922, San Diego Union, 1:2. Council estimates budget. The Park was given the maximum of 12 cents on each \$100 valuation, but will next year have the extra expense of maintaining the Park Zoo.

December 8, 1922, San Diego Union, 4:1. EDITORIAL: San Diego's Miracle . . . supporting erection of a continental radio station in Balboa Park.

December 8, 1922, San Diego Union, 5:5. Marcel Dupre, Paris organist, praises organ.

December 8, 1922, San Diego Union, 22:2. Natural History Museum which has been closed since October 1, will open its doors to the public on Sunday, October 10; has moved from Domestic Arts Building [sic] on corner of Plaza into former Canadian Building.

December 9, 1922, San Diego Union, 7:3. The entire outdoor cover of the **American Bee Journal** of December issue contains a picture of the San Diego County apiarian exhibit installed at the Farm Bureau Fair in Balboa Park last September by Fred Hanson, County inspector of apiaries.

December 10, 1922, San Diego Union, 8:2-3. Reptile House has varieties that pestered over indulgent before Volsted (illustration of Reptile House and of animal keeper Joe Mutter).

December 12, 1922, San Diego Union, 2:2. Council frowns on wage boosts

The council yesterday agreed to give the City Park Department the full amount legalized by the charter --- about \$93,000. The Park Commission also gets an additional \$10,000 for the upkeep of the zoo, but it was agreed that the Zoological Society will have the right to say how this money is to be spent.

December 13, 1922, San Diego Union, 1:1. Will cost city \$102,000 to maintain park in 1923 as against \$93,976 last year.

December 14, 1922, San Diego Union, 1:1. Naval balance carries. \$330,000 for work on Naval Training Station and for buying lands for a marine barracks at San Diego.

December 17, 1922, San Diego Union, Society-Club, 1:1. Tableaux, carols planned for Christmas celebrations; Amphion Club and Friends of art to revive beautiful moonlight ceremonies at Balboa Park's outdoor organ.

December 18, 1922, San Diego Union, 8:1. Marine Band will play park concert this afternoon at Organ Pavilion beginning at 3 p.m.

December 21, 1922, San Diego Union, 1:4. Park buildings need re-wiring for protection from fire risk; restoration fund committee applies to City Council for additional allowance estimated at \$35,000.

Declaring that the present electrical wiring in Balboa Park is a fire menace and that rewiring is necessary to safeguard the handsome buildings and exhibits in the park, members of the Balboa Park restoration fund committee yesterday called on the City Council for additional funds. For this, and other work, about \$35,000 is needed, it was asserted.

Both the Council and the Supervisors declared there are no funds available for such work, and that it might be possible to put before the people at the spring election the question of raising sufficient money by a popular vote.

The city attorney, the city auditor, and Councilman Fred A. Heilbron were appointed to a committee to go more thoroughly into the matter and decided upon the best method of financing the improvements.

The wiring would cost about \$14,000. Repairs to the exterior of the Civic Auditorium would require about \$11,000. About \$2,500 is needed for restoring the Indian Village buildings, now occupied by the Boy Scouts and some money is required to repair the Botanical Building.

The committee reported that this is all new work, not provided for in the original restoration plans. The nine principal buildings provided for in those plans will be restored with the money originally provided, about \$105,000. In fact, the work has been completed on eight of the buildings.

The committee has a balance of \$9,963 on hand with which to finish its work. About \$2,500 still remains in uncollected accounts. The Council and Supervisors provided \$50,000 for the original work several months ago and the rest was raised through popular subscription.

W. S. Dorland, as chairman of the committee, laid the plans for the new work before the Council and Supervisors yesterday. He explained that the entire electrical wiring system in the park is practically gone, and there is danger of a short circuit at any time. He urged also that more adequate police protection be provided for the park.

Several speakers told of the high value of the exhibits in the park and of the great loss that would result, in addition to the destruction of many fine buildings, if there should be a conflagration.

Others spoke on behalf of the Boy Scouts and Civic Auditorium. Among these speakers were G. A. Davidson, Lyman G. Gage, John Burnham, Hugo Klauber, Reverend H. B. Bard, Sam Porter, Jr., Della Haman, and Miss Alice Lee.

December 21, 1922, San Diego Union, 7:4 Faculty votes confidence in Principal Thomas Russell, San Diego High School; his attitude toward sororities praised.

December 22, 1922, San Diego Union, 10:5. Christmas fete to be given on special stage; Park Board and Superintendent cooperate to make celebration a success.

December 23, 1922, San Diego Union, 19:8. Cabrillo Bridge west entrance to be closed to cars during celebration of singing by vested choirs on Plaza de Panama; ceremonies to begin at 8 o'clock; antiphonal staging of four vested choirs from four balconies; living pictures of famous paintings of the Nativity will be shown.

December 24, 1922, San Diego Union. General Joseph H. Pendleton, commanding Fifth Brigade, U S. Marine Corps, proposes Marines get section of Zoo; will donate spider monkey from Nicaragua and other animals.

December 24, 1922, San Diego Union, Society-Club, 1:1. Balboa Park Christmas celebration tomorrow night.

December 27, 1922, San Diego Union, 14:4. Living pictures revived at Park after interlude; Christmas tableaux and music festival to be annual affair; many attend; crowd estimated at 15,000.

December 28, 1922, San Diego Union, 5:2. Radio experts approve organ broadcast plan.

1923

(Summary of Events)

Zoological Garden Developments
Installation of Ornamental Lamp Posts
Bond Issues to Pave 12th Street through Park, to Fund Zoo,
Parks and Plazas through Assessment
and to extend Date, Upas and 28th Streets
and Russ Boulevard. Approved.
American Legion Gets Building
Floral Society in Kansas Building
San Diego Players in Fisheries Building
Ellen Scripps Gives Money to Zoo
O'Rourke Junior Zoological Building Planned
Python Is Force-Fed
Elks Have Circus
Two-Week Musical Programs
Scientific Library Opened in California Building
Gardner and Slaymaker Present Plans to Re-Landscape
East Plaza of Balboa Park
President Harding Memorial Service
Nevada Building Sold to Private Party
Cristobal Building Torn Down
New Structure Built for Poultry Exhibit
Zuni Pueblo Repaired
Bird House at Zoo Completed
Farm Bureau Fair at Balboa Park
Frank H. Buck Removed as Zoo Director
Dog Killed Deer at Zoo
Music Festival
Reception for George W. Marston
Tennis Tournament
Nevada Building to House Children's Center
of Zoological Society
Navy Wants More Land in Balboa Park
Christmas Tableaux

January 1, 1923, San Diego Union, 2:3-4. Scientific Library is assured in Park; W. W. Whitney, retired capitalist, donated \$30,000 for this purpose; will be houses in California State Building.

January 1, 1923, San Diego Union, 3:1. State College traditions go back to 1897; houses 500 students.

January 1, 1923, San Diego Union, 4:1-6. Splendid Zoological Gardens in Balboa Park; bird, animal, reptile life represented in striking display; many specimens housed through unique system; wild beasts confined by hidden barriers; picturesque trails lead to series of miniature dams where seals, alligators, wading birds disport themselves.

It has been said of the United States marines that they "boast like the devil, but always make good." The Zoological society was accused of boasting when it announced just 12 months ago that it had taken over 150 acres in Balboa Park and would build thereon the finest zoological garden in America. People who considered this a wild boast are now marveling at the progress made toward than end. The 12 month's record set forth in this article is remarkable for the immense amount of work done and for the high quality of every installation that has been made, especially in view of the fact that every dollar of the more than

\$50,000 expended in this work was secured by the Zoological society through subscriptions and freewill offerings.

Protection of the animals and equipment from vandalism and other destructive elements was the first consideration faced by the society. Nearly \$10,000 was required to place a permanent steel wire fence around the zoo area. The money was subscribed and the very best and most appropriate fence that money could buy was erected.

More Than 200 Reptiles Exhibited

The reptile house, formerly the International Harvester building, was restored and equipped at a cost of \$10,000 and is used as a main entrance to the zoological area, as well as to house the more than 200 reptiles exhibited there. The mezzanine floor of this building is used to house the offices of the society.

Lawrence M. Klauber is the herpetologist in charge of this exhibit and has been eminently successful in building up a reptile display, interesting both to science and to the casual sightseer. Boa constrictors and pythons, two of each, attract the greatest attention and a crowd may always be found viewing them as they draw their huge, sinuous trunks about their den.

The small California blue boa is not so spectacular in appearance, but is of greater interest to science, he being the only reptile of his genus so far north. Other non-venomous snakes are the racers, blue red and banded; a variety of colubrids; gopher snakes; pine snakes, hog-nosed snakes; garters and water snakes. Three varieties of king snakes are of interest, each being a deadly enemy of the rattlesnake, which he attacks, kills and devours at every opportunity. The most attractive of the king snakes is banded with brilliant markings of red, black and yellow.

Copperheads from down east; flat, stubby moccasins from the swamps of the south; and many varieties of rattlesnakes, including the western diamond from Texas, the Pacific and the red diamond from California; the horned rattler or sidewinder from the desert; the Arizona mountain diamond; timber rattler from Pennsylvania, and the very rare pallid rattler, or Mitchell of this state, are all represented. This is said to be the largest collection of rattlesnakes shown in an American zoo.

The lizard family is represented by the Gila monster, the desert terror, over which scientists engage in heated arguments; the Australian horned lizard, armed with wicked spines from nose to tail; the so-called "Two-headed lizard" from Africa, and a number of local varieties.

Seal Lagoon Is Feature

West of the reptile house lies the seal lagoon, 30 by 100 feet in extent, reflecting in its surface the surrounding orange trees and buildings. This was designed for the habitation of harbor sea, and an island grotto furnished them a resting place and playgrounds.

Beyond the seal lagoon, the model group of cages for small animals stands. Large quarters, walled on three sides with hollow tile, concrete floored, with roof and front of welded wire mesh, are built around a hollow square, in which are located store rooms, work shops and general service yard. There are 31 cages, with connecting runs for convenience in changing animals from one cage to another. Special attention was paid to the sanitation of this group and to providing thoroughly warm, comfortable and safe quarters for the animals. Experts have said that efficiency, the welfare of the animals, sightliness and convenience to the public have been combined here to an extent not equaled in any other known zoo.

In this group are 102 animals, including wolves, coyotes, wildcats, badgers, coons, porcupines, black bear, ring-tailed cats and skunks, all from the United States; monkeys, catemondas, kinkajou, lemurs, apes, hyenas, etc. from the tropical regions of this and other continents.

Enormous Flying Cage to be Built

Eagles, hawks, ravens, owls and parrots are exhibited in the sections just north and south of the small animal cages. The site has been chosen for an enormous flying cage for birds of prey, and construction will be started in January of this year. The cage will rise from the bottom of a deep ravine, or canyon, a distance of 60 feet and is 20 feet above the area surrounding the canyon. It will be 60 feet in width and 180 feet long, and will be constructed entirely of steel, in order that no heavy beams or uprights will obstruct the view. The natural growth, including native shrubbery and trees 60 feet in height will be left in the cage, so that the birds will live under the most natural conditions possible.

From the broad mesa upon which these improvements stand, a mile and a half of easy trails, following the contour of the canyons, lead to the various dams and grotto sites to the south, west and north. Tules, cattails and rushes add to the beauty of the wading, or shore bird, pond, and serve a useful purpose in providing hiding places and nesting grounds for any denizens of shore and marsh lands. This pond was designed for herons, cranes, coots, gildeer, willets, alecettes and the numerous wading birds native to this vicinity or that stop briefly during the migratory seasons.

The pond of the shore birds is first reached by the southern, or "seal pond" trail, and below it is the dam, behind which a number of sea lions, ranging in size from tiny babies to the big chaps, five or six feet long, romp and play in deep water, or sun themselves on warm banks, sleeping and barking in their dreams, just as dogs do in the hunting season.

Alligator Pond Attracts Many

Below the seal dam is the alligator pond, where nearly a dozen huge saurians bask in the mud, or, submerged to eyes and nostrils, float about in the hope that some foolish bird or animal will drop within striking distance. The largest of the 'gators is 12 feet long and weighs about half a ton. When he is hungry a quarter of beef appeals to him as an appetizer.

The aquatic bird dam lies north of the alligators and is one of the most admired features of the zoological garden. Like the seal dam, it is of reinforced concrete and is a replica of one of the many beautiful dams that store water in the mountain section of San Diego county for the enormous demands of the city and county. This dam restrains a broad lake in the midst of a forest of eucalyptus trees, and provides an ideal setting for wild geese, teal, mallard, widgeon, the rare wood duck, pelican, gull, cormorant and a large number of other aquatic birds, from the fresh water lakes of this section and from the nearby beaches and islands of the Pacific ocean.

The site of the lion, tiger and bear grottos is reached by the northern, or "bird canyon" trail from this point. Construction is in progress on these features at the present time and they should be completed early in the spring. Great interest has been evinced regarding these grottos, as they will be of the modern "cageless" type. Vast excavations will be made in hillsides, which will be inclosed on three sides by cliffs and rocky ledges, modeled on existing natural rock formations of this vicinity. The front will be protected by a concealed moat, so that, to all appearances, there will be nothing between the observer and the ferocious inmates except a waist high hedge. The depth and width of the moat will be such as to afford absolute protection, although invisible.

Buffalo Paddocks Are Installed

The buffalo paddocks, which five sturdy members of the nearly extinct American bison family now share with a dozen goats, lie west of the bird dam and extend to the northwestern border of the area. Adjoining them are the tracts set aside for elk paddocks, deer corrals and quarters for other ruminant animals.

The northern mesa, or table land, will be devoted to an animal hospital, keeper's residence and other practical purposes of the institution.

The construction already undertaken covers only the very immediate needs of the society. Animals now in temporary quarters will fill every cage and den under construction, and it will be necessary to more

than double the amount of animal quarters to take care of the exhibits that the society expects to secure during 1923.

Among the assured additions to the animal collection for 1923 are a shipment of animals from Australia, 50 parrots from Central America, iguanas and reptiles from Panama, animals and reptiles from Brazil, two leopards, mountain lions, an elephant, a tiger, all in addition to local animals and birds and to the various monkeys and other small animals to be obtained from other zoological gardens through trading off of extra specimens.

Members of the Zoological society are recipients of frequent hearty congratulations on the remarkable progress made during the last year in regard to the work that has been done. Dr. H. M. Wegeforth, president of the society, says:

Society Does Good Work

"People who recently have visited the zoological gardens express amazement when they see how much we have done in the last year. We feel that we have done well and that our work merits appreciation. Our directors, our architect, Lewis Gill, and landscape architect, Nathaniel E. Slaymaker; L. M. Klauber, our curator of reptiles, and many others have worked hard, without compensation, to help us realize our ambition that San Diego should have the finest zoological garden in America.

"The cooperation of these men and the generosity of those who have realized with us that this institution would be of incalculable value as an educational feature for our children, a course of entertainment for our visitors, with enormous advertising possibilities, and have helped us with subscriptions have made our progress possible. The help and encouragement given us by the large number of people who have assisted by donations, by praising our work, by joining the society and offering to render assistance cannot be overestimated. It is not our zoo. Neither I nor any officer nor other person connected with the society derives one white more benefit from it than does every other person in San Diego. It is San Diego's own zoological garden, in San Diego's own park, and we feel that everyone should enjoy it to the fullest; that everyone should heartily support it, not with money necessarily, but with goodwill and a boost when the opportunity offers.

"I recently returned from a trip to the east coast, where I went for the sole purpose of studying the best zoos and all the conditions responsible for their excellence. We are trying to combine all the good factors in our own zoo and to eliminate the bad ones.

"The fact that most impressed me on my trip was that all the worthwhile zoos were conducted by such societies as ours, composed of private citizens with no political axes to grind. The failures invariably were conducted as cogs in political machines, operated by city governments, built up by one administration and torn down by the next.

Admission Fee Is Small

"At nearly all the important zoos I found that admission fees were charged, except at the national institution at Washington, D. C. In New York, Philadelphia, Cincinnati and other cities a charge of from 25 cents to 35 cents was made and some of them had no more to show for it than we have.

"Our board has decided upon an admission fee of 10 cents for adults, except members of the society who are admitted free. All children are admitted free and urged to come often. The zoo is essentially for the kiddies and the fees collected from adults are used to purchase new animals for everyone to see. It is inconceivable that any adult would object to the payment of so small a fee, knowing that every penny so received goes toward increasing the attractions of the zoo. Certainly no greater list of attractive exhibits ever was shown in San Diego for so small an admission.

"By the close of the New Year we shall have \$100,000 worth of improvements in the new zoological garden. The improvements we are about to start upon will make an even greater showing than do

those already installed, as much of the work has been of a practical and preliminary nature, such as surveys, maps, plans, service years, shops, etc.

“We have made good. We have done more than we promised to do in one year, more even than we hoped to do, and we are going to do still more in 1923. We are grateful for the encouragement and help we have received. To express our thanks to each individual is not possible. The results of our work must be a token of our appreciation.”

January 1, 1923, San Diego Union, 4:4-6. Interesting facts about new San Diego Zoological Gardens.

Location --- 150 acres lying west of the Alameda and north of the exposition section in Balboa Park.

Cost --- The more than \$50,000 worth of cages, dams and other construction accomplished by the San Diego Zoological Society during 1922 cost the taxpayers, as such, exactly nothing. This fund was raised by the society through subscriptions, donations and entertainments.

Prospects --- The Zoological society has available and in prospect for 1923 at least another \$50,000 for new construction.

Maintenance --- The common council has been asked to appropriate \$10,000 for the maintenance of the zoological garden in 1923. This will cover only employment of animal keepers, feed of animals and other current expenses.

Gate Fee --- A gate fee or admission charge of 10 cents will be made for adults. There will be no charge for children or for members of the Zoological society. Money derived from admission fees will be devoted to purchase of new animals, reptiles and birds. (Admission charges of from 10 cents to 50 cents are made at zoological gardens everywhere in the United States, with few exceptions.)

Operation --- The zoological garden is operated by the San Diego Zoological society for the benefit of the children of San Diego. The land and buildings, the animals and other exhibits, as well as every improvement financed and constructed by the society, immediately becomes the property of the city of San Diego.

Officers - The following officers and directors of the San Diego Zoological society serve without compensation or pay of any nature:

Dr. Harry M. Wegeforth, president; Joseph W. Sefton, Jr., treasurer; T. N. Faulconer, secretary; N. E. Slaymaker, landscape architect; Louis J. Gill, architect; John L. Bacon, engineer; Col. A. T. Balentine, director; Dr. W. H. Raymenton, director; Frank C. Spalding, director; Miles S. Edgerton, director; D. D. Wray, director; L. M. Klauber, curator of reptiles.

Annual membership in the San Diego Zoological society cost \$5. This entitles one of free admission to the zoological garden every day in the year; and the money helps to increase the attractions.

January 1, 1923, San Diego Union, 5:1. San Diego's park system famed throughout world; exposition buildings restored to former beauty; Balboa Park has commercial value to City; visitors enchanted by garden spot situated in center of community.

The physical valuation of nearly \$7,250,000 placed upon the lands and improvements comprising the park system of the city of San Diego conveys but faintly the actual meaning of Balboa Park and lesser tracts of park lands to the people of San Diego. Ample facilities for recreation fulfill the accepted purposes of a public park. Among the features are music, flowers, art galleries, museums, drives and foot-paths through miles of verdure, tennis courts, picnic grounds, golf courses, a large and beautiful stadium, a zoological garden, orange orchards and hilltops, from which may be viewed enchanting panoramas of island-dotted ocean, majestic mountains and the intervening miles of stately business blocks, city homes and ranch lands.

Park Appreciated by San Diegans

All these the park affords for the entertainment and enjoyment of San Diegans and visitors alike, and the alacrity with which \$110,000 recently was subscribed for the purpose of restoring the exposition buildings in Balboa Park evidenced that the people of San Diego, rich and poor, appreciate the fact that public spirit and able supervision, aided by perfect climatic conditions, have created in San Diego a park system of world-wide renown.

While it has been no means been a primary consideration with the authorities in charge of the park system, it is worthy of note that Balboa Park has a great commercial value to the city, in that it presents to visitors a southern California in miniature, portraying on the model farm the diverse and abundant crops that may be produced, and so enchanting eastern visitors with San Diego and its possibilities as to create in them an irresistible desire to live in this land of sunshine and flowers.

The park system is operated under direction of a board of three park commissioners, appointees of the mayor, who serve a period of three years each, without compensation. Actual direction of park maintenance is in charge of the superintendent of parks, the records, accounting and other office details being under supervision of the executive secretary.

Riot of Blossoms Source of Wonder

Blossoming flowers by countless thousands adorn the parks of San Diego on Christmas and New Year's Day, as abundant and sturdy as in midsummer. This is a source of wonder and delight to visitors from north and east, and a testimonial in nature's own script to the even and delightful climate of southern California.

The Rose garden, while not at best until spring, is a place of perennial beauty. The gardens south of the Organ Pavilion are planed in seasonal flowers and through the winter months present a many-colored picture of blossoming cannas, dahlias, zinnias and roses.

The Botanical Building is filled with exotics and is maintained at all times in a state bordering upon a tropic jungle. The walks wind through tunnels of tree ferns, lianas and strange plants, whose names mean nothing to the average unscientific hearer.

The formal gardens north of the Balboa Park auditorium are a source of interest to visitors. Trim hedges protect beds of flowers that change with the procession of the seasons, affording such variety of blossoms throughout the year that one never tires of its charm.

Oriental Gardens Are Unique

Surrounding the Japanese tea pavilion are the oriental gardens, maintained by Mr. and Mrs. Asakawa, who lend an atmosphere of the flowery kingdom to the gardens as well as the pavilion itself where cakes and tea from Japan are served to visitors, with ice cream and other American refreshments.

The Montezuma garden, famed for its annual pansy display, is one of the most unique formally planted areas in the country. More than 70,000 pansy plants are placed in its path-bordered paths each spring. Words cannot picture the riot of color, or the richness and variety of hue, the telling effect that a sight of this huge expanse of colors has upon one seeing it for the first time. Beds of solid purple, golden yellow, snow white, maroon, black and scarlet, form a border in which literally hundreds of varieties mingle in utter confusion.

Zinnias take the place of pansies in the Montezuma garden through the summer and fall. The size and depth of color attained by this flower in this favored spot merit the praise that is liberally heaped upon them, but it is the pansies, late in the spring, that evoke from travelers, who have looked upon the most beautiful of the world's treasures, all the superlatives their vocabularies afford.

January 1, 1923, San Diego Union, 5:2-3. San Diego Park System: Board of Park Commissioners

Hon. Henry C. Ryan, president; John Forward, Jr., secretary; Hugo Klauber, commissioner.

T. N. Faulconer, executive secretary; John G. Morley, superintendent.

Value of city parks, including buildings of Panama-California Exposition, zoological gardens, municipal camp grounds, golf course, stadium, Spreckels Organ Pavilion, and other improvements, \$7,250,000 (from city's assessor's valuation).

Number of parks, 23. Total acreage of parks, 1,921.

Tax allowance for park maintenance and improvements, \$93,976.

Public service institutions operated by park commission: Automobile camp grounds, golf course, San Diego stadium, daily concerts Spreckels Organ Pavilion, refreshment stands, tennis courts and athletic fields, Torrey Pines lodge and refectory.

Other institutions operated in parks under permits by park commission include: San Diego Zoological garden, Natural History museum, San Diego museum, Civic auditorium, Pepper Grove picnic grounds, Children's center, Academy of Fine Arts, Fine Arts Gallery, Boy Scouts at Painted Desert, Girl Scouts.

January 1, 1923, San Diego Union, 5:4-7. Civic Auditorium is great asset.

Two years ago a group of public-minded citizens, representing various civic and welfare organizations of this county, requested from the board of park commissioners the use of the old Southern Counties building as an auditorium for the people throughout the city and county.

The building was granted by the park board and that which has so long been the dream of this earnest, far-seeing body of citizens began to be a reality. A committee, composed of a member from each organization represented, was organized, and under this body the work began.

The granting of the building and the forming of a committee to carry on the work was the beginning of a long year of hard work of planning ways and means to finance this tremendous undertaking --- the rehabilitation of a building condemned as unfit for use. At the time it was taken over not one dollar was available as a start for the fund.

The first effort made to raise the money was the "Spring Frolic," a circus and pageant produced under the direction of the committee, which netted \$2,000, inspired confidence and brought the realization that there was a way to do it if the right spirit was backing the effort.

Many Donations Are Made

The Ad Club of San Diego gave as its donation to the fund \$1,000 that had been raised for the purpose of restoring his building some time before by staging the "Mission Play," and this gift added much to the confidence and hopes of the committee.

Meanwhile it was necessary to commence the work if the building was to be saved and with the fund previously mentioned to which was added a few small amounts derived as benefits the contractors began the restoration of what was to be the Balboa Park auditorium. Realizing the city's need of an auditorium and appreciating the unselfish and untiring devotion of the men and women who were giving their time without stint to make this a success, merchants, limber dealers, and roofing men extended credit for the building materials, etc., and the contractors and architects donated time and services for the supervision of the work.

At this juncture of the work a reorganization was effected and the Balboa Park Auditorium association was formed under which affairs have been carried on since that time.

The club women inaugurated the movement to hold an opening ball, to officially open the building to the public. In this early part of June 1921, plans were consummated and on June 16 one of the most brilliant and successful balls ever given in San Diego took place. Six thousand dollars was derived from this benefit, which sum aided greatly in refilling the now nearly depleted treasury. Everyone's assistance had been enlisted in this effort and it was thoroughly a community affair.

Substantial Amounts Added to Fund

A number of other benefits were given by local civic organizations, accomplishing splendid results and adding substantial amounts to the fund. The Amphion club has given three large benefits, raising \$2,401.00 to buy chairs and help install the furnace. The Goofs' club gave a benefit ball to raise money to repair the roof and turned in to the auditorium account, \$1,262.50. Other amounts to be used in the building fund are Silver Gate Business Girls, \$189.75; Daughters of Liberty, \$50; Auditorium and Civic Center, \$249.87.

Approximately \$25,000 has been spent on rebuilding, refitting and re-furnishing the auditorium to date, and this entire sum has been raised by benefits or by rentals derived from the use of the building.

A great many things still remain to be done before the building will be completely restored according to the plans and aims of the committee.

It is impossible to overestimate the value of the Balboa Park auditorium to the community. It has been in constant demand for benefits, dances, lectures, political meetings, conventions, pageants, carnivals and many other things that go to make up the community life of a city, bringing the people together and by its desirable location in beautiful Balboa Park, its adaptable arrangement and splendid capacity, making possible plans of every kind, it has become a home to organizations of every description in both city and county, and affords to organizations throughout the state and along the coast a setting unsurpassed for the holding of conventions and conferences.

January 1, 1923, San Diego Union, 5:8. Main structures in park are rehabilitated; \$110,000 obtained by public subscription expended in restoration.

Restored to more than its pristine beauty, in that age and the growth of surrounding trees and shrubs have effaced the newness that mars all things new, the Exposition Grounds in Balboa Park now offers to the world a store of architectural and landscaped beauty not equaled in America. All the main buildings of the Exposition have been completely restored, and the park commission now is engaged in razing the few small structures not considered worthy of restoration, in order that no inharmonious note may be left to break in upon the perfection of the picture.

Approximately \$110,000 has been devoted to this work, all of it donated by San Diegans and visitors. The announcement that \$100,000 would be required to restore the exposition buildings met with the instant approbation of the public and those who conducted the campaign to secure this fund say that never in their experience have they found people so glad to give.

Director of Works G. Edward Chase, who was placed in charge of operations as soon as the fund was raised, has found the buildings to be in an excellent state of repair with the exception of foundations, roofing and staff work. These items were of a more or less temporary nature, as it was never considered possible that San Diego would attempt to preserve the buildings after the expiration of the exposition period. The structural work was found to be in the best of condition, as all beams, trusses and supporting members of every sort were designed to bear the exceedingly heavy loads of exposition displays and exposition crowds. Mr. Chase had estimated the restored buildings, with order care in maintenance, will last at least 20 years.

January 1, 1923, San Diego Union, 5:8. New Fine Arts Building given to San Diegans.

The 1922 program of new construction and improvements in Balboa Park is of no less importance than the restoration work that has been done in the last year. Of greatest magnitude, perhaps, is the construction of the north end of the Plaza de Panama, on the site of the Sacramento building, of a Fine Arts building, a gift to the people of San Diego by Mr. and Mrs. A. S. Bridges.

The Fine Arts building, the plans of which are being completed by William Templeton Johnson, architect, for Mr. and Mrs. Bridges, will be of reinforced concrete, fireproof in every particular, and designed with special regard to surrounding landscape and architecture and to the purposes for which the building is dedicated. It is said that the new building will cost approximately a quarter of a million dollars.

The prospect of having so fine a structure devoted to the encouragement of artists and the development of the fine arts has aroused great enthusiasm in local art circles, to which the fine working light and rare scenic beauties of San Diego have attracted prominent artists from all over the world. Prominent members of the San Diego Art Guild and other local art organizations believe that in presenting a Fine Arts building to the people of San Diego, Mr. and Mrs. Bridges have laid the foundations for the establishment in this city of one of the greatest art centers in America.

January 1, 1923, San Diego Union, 5:8. Spreckels Organ is park feature.

The Spreckels Organ Pavilion and America's largest outdoor pipe organ, the gift of Messrs. John D. and Adolph Spreckels to the people of San Diego are located just above the high scenic point of land at the south end of the Exposition grounds in Balboa Park, and from its graceful colonnades may be seen a view of city, bay, ocean and mountains that has intrigued the dozens of artists who have tried to reproduce it on canvas.

Daily throughout the year, except on the possible half dozen afternoons when rain interferes, concerts, free to all who care to attend, are given by the official organist, Dr. Humphrey J. Stewart.

During the summer months, when warm evenings and moonlight are tempting, moonlight concerts are given and each of these occasions has been rewarded with capacity attendance.

Plans are now being discussed for the installation of a high-power broadcasting apparatus, in order that the daily concerts and other musical events given at the Spreckels Organ Pavilion may be heard by radio in the homes of those thousands from other cities and other states who have not the opportunity of being present in person.

January 1, 1923, San Diego Union, 6:1-2. Natural History Museum is popular institution, by Clinton G. Abbott, director Natural History Museum.

January 1, 1923, San Diego Union, 6:1-6. Dr. Humphrey J. Stewart gives daily organ recitals on splendid instrument.

January 1, 1923, San Diego Union, Navy Section, 2:1-6. Millions expended by government in naval works here; hospital designed for 1,000 patients; commissioned in 1922; cost \$2,300,000; marine brigade post, cost \$3,000,000; 382 acres of dryland and 292 acres of unreclaimed wetlands (approximately 732 acres in all); training station comprises 21 buildings on 255 acres of bayshore land; as it now stands \$3,200,000 is cost; Naval base station on North Island covers 542 acres; costs thus far \$3,824,000.

When completed marine post will contain 45 buildings on an area of 52 acres.

January 1, 1923, San Diego Union, Sports, 4:7. Municipal auto camp is popular with tourists; 10,000 automobiles take advantage of fine Balboa Park equipment in 1922.

January 1, 1923, San Diego Union, Sports, 4:8. Tennis courts will be built in Balboa Park; Park Commission sets aside idea tract of land near Painted Desert for sport.

January 1, 1923, San Diego Union, 4:8. Former exposition buildings new form large art center.

January 1, 1923, San Diego Union, 16:4-6. 30,000 used municipal golf course during 1922; total membership of over 1,500; 18-holes; daily ground fee, 50 cents; receipts for year, approximately \$9,000.

January 1, 1923, San Diego Union, Historical Section, 6:4-5. New ornamental lamp posts will be installed in Balboa Park; 85 in number; cost about \$5,000 in place; made of concrete with crushed marble as aggregate; Goofs' Club has raised \$1,500 toward cost; not as ornate as temporary ornamental standards of Exposition days.

January 1, 1923, San Diego Union, Historical Section, 6:5. Garden of roses near western end of Cabrillo Bridge in perpetual bloom.

January 3, 1923, San Diego Union, 1:7. Park Board asks for more money; charter amendment sought authorizing tax levy increase for park purposes.

January 3, 1923, San Diego Union, Classified, 1:1-3. Free Saturday afternoon lectures will be resumed at Natural History Museum.

January 4, 1923, San Diego Union, Classified, 1:4. Council refuses police power to city park board; under present system council has enacted practically all regulatory powers asked by the Park Board.

January 6, 1923, San Diego Union, 4:1. EDITORIAL: San Diego's Best Asset

Shortly before his death, A. W. Whitney gave \$30,000 for the equipment of a library of scientific works to be housed in one of the buildings in Balboa Park. It is the intention to make the library the nucleus of the most comprehensive collection of scientific data in the United States. The library is a San Diego institution, financed by a San Diego citizen with San Diego money. Its equipment, therefore, should be manufactured and installed by San Diego industries.

The cost of this installation is estimated at about \$10,000 in shelving, cabinets, furniture and decoration. The money should be expended in San Diego, provided the contract is awarded to the lowest bidder.

January 18, 1923, San Diego Union, 7:3. Campaign will start today for Park radio fund.

January 25, 1923, San Diego Union, 2:5. Pershing Drive fund supporters to meet; committee believes subscribers are opposed to truck traffic on the drive; recently the Council voted to permit 5-ton trucks on city roads; drive cost \$25,000; citizens raised \$16,000.

January 26, 1923, Minutes of Park Commissioners.

Present: Ryan, Forward and Klauber. Absent: None.

Executive secretary was directed to request common council to authorize purchase from American Cement Products Co., Los Angeles, forty five lamp standards of the design formerly adopted by this Board, at \$35.00 each, f. o. b. Los Angeles, and for two additional standards for the Board of Education, as requested by the secretary of that board, Will Angier.

Executive secretary was authorized to rent to the Sciots for a dinner on the evening of March 31, the Cristobal Café Building, at a rental of \$50.00, including lights.

Executive secretary was directed to draw for approval of this Board, a permit, authorizing occupation of the Fisheries Building by the Community Players, conditioned upon their promise to restore and maintain the building in good repair during their occupancy.

Upon motion of Mr. Klauber, seconded by Mr. Forward and unanimously carried, executive secretary and superintendent were ordered to make such improvements and additions to the present refreshment stand in Building No. 5 as might be necessary to bring its appearance up to the standard set by its surroundings.

A committee of citizens, purporting to be a representation from the approximately 15,000 citizens and property owners north and east of Balboa Park, appeared and requested that no trucking be permitted on Pershing Memorial Drive. Letters supporting this request were presented, as well as resolutions adopted at a mass meeting of citizens and by the San Diego Realty Board. The letters were from Chas. A. Small, J. P. Hymer, Mayor J. L. Bacon, Rufus Choate and Jos. W. Sefton. Another letter was filed in which H. F. Heller protested closing Pershing Drive to commercial traffic. Several speakers urged that commercial use of Pershing Drive be not permitted, and C. K. Fitzgerald, representing the trucking interests, took the opposing view.

Upon motion of Mr. Forward, seconded by Mr. Klauber and unanimously carried, it was ordered that Ordinance no. 5380, the measure now governing the city parks, be not changed, and that the police department be requested to enforce its observance.

Superintendent Morley was directed to place large signs at each end of Pershing Drive, setting forth the traffic limits as stated in Ordinance no. 5380.

Upon motion of Mr. Forward, seconded by Mr. Klauber and unanimously carried, it was ordered that the following buildings be offered for sale in due form as provided for in the city charter: Sacramento Building, Salt Lake Building, Washington Building, Cristobal Building.

It was further ordered that the following buildings be wrecked and salvaged at once: those buildings south of the Fisheries Building and between the street car line and Park Boulevard, also that the Natural History Society be requested to remove from the park the old Nevada State Building, Theosophical Building.

On condition that they repair and maintain the Standard Oil Building, authority was given the San Diego Zoological Society to take over and use that building in connection with the Zoological Garden, it having been stated that it was necessary to have a resident keeper who should have charge of the zoo at night.

Executive secretary was directed to write Mr. Burns of the San Diego Electric Railway, urging that street cars be stopped at the south end rather than the north end of the East Gate Arcades. IT was further directed that the street railway company's attention be directed to the fact that the East Gate Arcades were built by that company and were regarded as being under jurisdiction of that company, wherefore this Board feels that the company should be responsible for the restoration of the arcades to conform with other restored buildings in the park.

It was ordered that the superintendent of parks take steps as early as possible to plant out or hide by planting the lumber yard and service yard from view of Park Boulevard.

January 27, 1923, San Diego Union, 1:1. Trucks barred by Park Board act from using Pershing Drive; immediate legal contest is forecast by announced intention of operators to benefit by paving.

January 28, 1923, San Diego Union, 15:1. Goofs' announced ten-day Mardi-Gras for Park radio.

February 4, 1923, San Diego Union, 20:1. Dedicatory exercises of the Theodore Roosevelt Junior High School will be held next Wednesday evening, February 7.

February 4, 1923, San Diego Union, Automobile Section, 4:3. Park Board called off a tractor demonstration of Park hill.

February 7, 1923, San Diego Union, 5:2. Dedication of Theodore Roosevelt Junior High School in auditorium this evening.

February 8, 1923, San Diego Union, 3:4-5. Roosevelt Junior High School dedication is impressive ceremony.

February 18, 1923, San Diego Union, 6:4. San Diego Consolidated Gas and Electric employees and friends to hold costume ball at Civic Auditorium, Wednesday, February 21.

February 18, 1923, San Diego Union, 10:4. Organ classics heard daily in Balboa Park; Dr. Steward now in his ninth year.

February 21, 1923, San Diego Union, 5:6. Annual Washington anniversary Community Sing and program will be held at Organ Pavilion tomorrow (Thursday) afternoon.

February 28, 1923, San Diego Union, 1:8. Navy training activities to center here; number of officers and men to be stationed in San Diego within ten months; estimated at 20,000 to 25,000 (1/4th of entire Navy); submarines and tenders ordered here; monthly payroll, \$3,500,000.

February 28, 1923, San Diego Union, 10:6. Bond issues on primary ballot, March 20, include \$30,000 for paving 12th Street through park to Exposition grounds.

March 3, 1923, San Diego Union, 22:2-3. San Diego Sciots will open convention frolic at Balboa Park tonight in County Fair building.

March 4, 1923, San Diego Union, 11:4-5. Balboa Park's needs increase; issue to be submitted to voters; article by Winfield Barkley: The City Council has wisely included in the coming election, March 20, a proposition increasing the minimum provided for parks from eight to ten cents per \$100 of assessed valuation. . . . Another most worthy proposition includes a bond issue for \$30,000 with which to pave the continuance of 12th Street to the former Exposition grounds.

March 4, 1923, San Diego Union, 13:2. The Fisheries Building of Exposition days may become permanent home of San Diego Players if City Council grants a petition filed yesterday by that organization; building will be made into a theater with a platform stage and seating capacity of 300.

March 7, 1923, San Diego Union, 12:4. Hazardous task on park building dome completed; painting interior of California structure has been in progress for three weeks; H. Chester Prose and J. T. Seville in charge of project; dome painted a light buff; state authorities considering plans for painting of the model of the ship "Cabrillo" which adorns the spire of the building.

March 9, 1923, Minutes of Park Commissioners.

Present: Ryan, Forward, Klauber. Absent: None.

The bid of J. A. Alpert upon the seven buildings advertised by this office being the highest submitted to the purchasing bureau of the city, the buildings were sold to Mr. Alpert. Executive secretary was directed to advise the purchase bureau that the bid on the Theosophical Building had been rejected, but that the sale of the remaining six buildings could be closed. The high bid on the six buildings amounted to \$2,625.00, exclusive of plumbing, which this department reserved.

A committee of Roque players appeared to request that the roque courts be installed in Balboa Park. Sixth and Redwood, Sixth and Fir, and Sixth and Date streets were the three locations proposed, the Sixth and Fir apparently being favored by the majority of the committee. Superintendent Morley stated that the two courts would cost approximately \$500.00, and the committee was directed to submit a proposition for financing the construction and the maintenance of the courts in order that this board might have definite information upon which to base its action upon the request.

Upon motion of Mr. Forward, seconded by Mr. Klauber, it was ordered that trucks of not to exceed one-ton capacity, when carrying not in excess of a one-ton load, be permitted to use Pershing Drive and the extension of Eleventh Street, under Cabrillo Bridge, to the north end of the park. The superintendent was directed to have park employees stop all other commercial traffic in the park and to have violators of the ordinance prosecuted.

Request of Chas. A. Small that shoulders be placed along Pershing Drive was read, and it was ordered that this office advise Mr. Small that we would take care of the matter as soon as possible.

The lease of certain grounds in Balboa Park for tennis courts was read and officially approved. The term of the lease was declared to be three years with two-year renewal clause at option of the lessee. (Approved, March 16, 1923, T. N. Faulconer, Exec. Secr.)

March 9, 1923, San Diego Union, 4:3. READERS' VIEWPOINT.

Editor: Permit me to offer two suggestions to the commissioners of Balboa Park for the improvement of same, namely, that the space near the Laurel Street entrance, formerly occupied by

an exhibit of monkeys and bears, be cleared of the vacant cages which at present disfigure the landscape and obstruct the view into the canyon.

Also, that a foot path be made into the canyon at that point for the conveniences of many visitors who, like myself, would enjoy the beautiful walk, which at present exists from the viaduct through the canyon to the end of Eleventh Street.

Yours faithfully,

A Well Wisher.

March 9, 1923, San Diego Union, 9:3. Plan campaign to carry park funds increase; Park Board members explain necessity for protecting great San Diego investment.

March 10, 1923, San Diego Union, 1:7. Python kills boa in snake duel at Zoo; big serpents lock in death grip which Gordon Flemmer, keeper, can't break until one is lifeless.

March 10, 1923, San Diego Union, 3:3. Repairs are now in progress on the last structure of the restoration program, the horticultural building; G. E. Chase, director of works, estimates funds on hand with pledges still unpaid will be sufficient to complete work; Claus Spreckels, manager San Diego Electric Railway Company, has agreed to rehabilitate peristyle forming east entrance to Park in connection with installation of new street car terminal planned for Park.

March 13, 1923, San Diego Union, 9:3-4. Goofs installed 135 new concrete lamp posts in Park; organization raised more than \$4,000 through a series of dances and unsolicited donations.

March 14, 1923, San Diego Union, 7:4-5. John F. Forward, Jr., Park Board member, sets forth vital need to two amendments in upcoming election providing larger allowance.

March 15, 1923, San Diego Union, 1:6-7. Wild boar roots his way into alligator's home at Zoo; alligator gulps --- that's all.

March 16, 1923, San Diego Union, Special front page. Police chief seizes **San Diego Herald** for attacking Mayor Bacon; orders printers to stop; ejects watchman; issue contains charges of vice and corruption; Editor A. R. Sauer has been indicted by Grand Jury and arrested Tuesday night on a libel charge filed by W. A. Doran.

March 16, 1923, San Diego Union, 1:6-7. Navy has spent fifteen millions here in five years.

March 18, 1923, San Diego Union, Classified, 1:1-2. Police chief backs down on suppression of **San Diego Herald**.

March 18, 1923, San Diego Union, Classified, 1:3-6. Drawing of architect's perspective of new Army and Navy Y. M. C. A. building.

In considering the design of the building, the architects say a style that has been adopted which will show an expression of architectural relationship to the group of government buildings in the district --- the new naval air station, marine barracks, naval hospital, and naval training station --- all of which were designed by architect Lincoln Rogers, while serving as commander in the naval reserve forces.

March 18, 1923, San Diego Union, Society-Club, 10:5-6. Henry C. Ryan, president San Diego Board of Park Commissioners, said last year San Diego spent \$92,000 for park maintenance; gifts to Zoological Society to date amount to more than \$75,000; cites gifts of W. W. Whitney and Mr. and Mrs. A. S. Bridges; points out necessity of favorable vote on amendment.

March 20, 1923, ELECTIONS: Proposition 2: Not less than ten cents nor more than sixteen cents on each \$100 property valuation for parks, plazas and squares; at least one cent for Zoological exhibits

Yes	9821	No	4194

March 20, 1923, ELECTIONS: Proposition 9: Vote granting 9 acres for Russ Boulevard, 6.9 acres to Upas Street and 6.5 acres to 28th Street

Yes	10012	No	3713

March 20, 1923, ELECTIONS: Bonded indebtedness of \$30,000 for construction and completion of the permanent pavement of road in Balboa Park extending from northerly end of 12th Street through Balboa Park and connecting with the existing pavement at the Exposition grounds

Yes	12597	No	2713

March 20, 1923, San Diego Union, 4:3. READERS' VIEWPOINT.

Norman W. Smith, Commander (CEC), U. S. Navy, Public Works Office, 11th Naval District, claims Office of Public Works Officer prepared designs, details and plans for all projects, except those taken care of by Bureau of Yards and Docks, Navy Department, Washington, D. C.; Lincoln Rogers was in Public Works Office in San Diego for less than two years as a Naval Reserve officer, but was not engaged by Government as an architect to design naval buildings of this district. **San Diego Union** adds postscript, saying Rogers "merely stated he had designed the buildings of the Naval Training Station."

March 20, 1923, San Diego Union, 8:5. Work on Stephens and Company's office building to start soon at 3rd Street and Plaza as old structure removed (illus.).

March 21, 1923, San Diego Union, 1:1-2. Bacon scores clean majority of mayor; Held and Stewart lead in Council race; all propositions and bond issues carry; less than half registration votes.

March 22, 1923, San Diego Union, 4:3-4. Lincoln Rogers, architect, makes reply on naval buildings.

My attention has been drawn to a letter in your issue of March 20, signed "Norman M. Smith," appended to which is a correction which I personally requested you to make prior to my knowledge of the article to which said letter refers.

Without any desire on my part to do any injustice to Commander Smith himself, or any of his naval or civil officer force, or to detract from such credit as may be due to them individually or collectively, the actual facts relative to the designing of the various groups of government buildings in this district, irrespective of the statements contained to the contrary in said letter, are as follows:

The naval air station and marine barracks were designed by Bertram Goodhue of New York, an architect of national reputation, and his work was carried out during the period when I was stationed at the Bureau of Yards and Docks at Washington, D. C., where the naval hospital group, as well as the additions thereto, were also designed.

As regards the very positive reference as to the period of my service in the department being "less than two years," as the letter implies, I may state that my period of service covered from the early part of 1917, when the United States entered the war, until my resignation from the service, July 1922.

At the close of the war, when I planned to return to my practice of architecture and also to resume my duties as architect to the Catskill aqueduct in New York (from which I was called by the navy department), I was prevailed upon by the department, much against my will, to continue on active

duty at the Bureau of Yards and Docks at Washington, for the explicit purpose of designing the naval training station at San Diego and the plans for this, as well as those for other buildings in connection therewith, were approved at the department at Washington, D. C. Later on I was directed to proceed to San Diego to supervise their construction and my traveling orders from the navy department so read.

This letter is written to keep the record straight in the public mind, and the facts contained herein can be confirmed in the office of the commandant of this district.

Lincoln Rogers.

March 30, 1923, San Diego Union, 5:4. Rotary approves Naval Hospital; San Diego Club inspects new park buildings and enjoys luncheon.

March 30, 1923, San Diego Union, 6:5. Submarine base removal from San Pedro to start July 1; San Pedro base must be abandoned by March 4, 1924.

March 31, 1923, San Diego Union, 7:5. Handel chorus will be organ Easter feature; Community Sing to follow recital at Organ Pavilion tomorrow afternoon.

March 31, 1923, San Diego Union, 21:7-8. Voices of wild may be heard at Zoological Garden in Park; by Frank Forrest Gander, curator of mammals.

April 1, 1923. Municipal auto camp discontinued; camp situated on high point in north end of park; about 15 acres; accommodations for approximately 500 campers.

April 1, 1923, San Diego Union, Classified, 1:1. Magnificent resort to be established at Mission Beach by John D. Spreckels (illus.).

April 1, 1923, San Diego Union, Classified, 11:1-2. Mayor Bacon will lecture on San Diego water problem at Natural History Museum tomorrow.

April 3, 1923, San Diego Union, 7:5. Dramatic Order of Knights of Khorrasan to given drill concert in Balboa Park Saturday evening at Organ Pavilion, followed by a theatrical ball at Civic Auditorium.

April 4, 1923, San Diego Union, 5:4-5. San Diego Museum, one of few places containing data for study of Yucatan, by W. E. Pate, secretary San Diego Museum.

From time to time recently in the daily press there have appeared articles of explorations carried on by American institutions in the ruins of the ancient cities of Mexico, Yucatan, Guatemala and Peru.

In **The San Diego Union** for April 3, there is an account of the proposed work at Chichen-Itza in southern Yucatan by Dr. Sylvanus Morley of the Carnegie Institution. Many of the readers of **The Union** have doubtless wondered where more information could be secured about Chichen-Itza and the other prehistoric cities of Yucatan and Guatemala. To all such we would say that San Diego is one of the two or three cities in the United States where such information may be secured.

It was Colonel D. C. Collier who on November 4, 1911 wrote as follows to Doctor Edgar L. Hewett at Santa Fe, New Mexico: "It is the purpose of the Panama-California Exposition at San Diego to illustrate, as has never been done before, the progress and possibilities of the human race. You will appreciate the large part that Archaeology and Ethnology must take in such a scheme. We cannot afford to do such a great work for the year 1915 only. We propose that what we shall do shall stand as a permanent contribution to the world's progress. The management will guarantee that not less than \$100,000 shall be expended by this department for expeditions, installations and maintenance. As a result, expeditions were conducted by Doctor Edgar L. Hewett to Guatemala and Yucatan and material secured which has ever since been under the care of the San Diego Museum.

MAYA ART REPLICAS

Three of the finest replicas of Maya art were presented by Messrs. George W. Marston, Joseph W. Sefton and Doctor Edgar L. Hewett. All the archaeological specimens from Central America have been housed in the California Building.

Upon entering the California Building, the first thing which one sees is the entrance portal to the temple at Chichen-Itza. On either side are representations of the plumed serpent. The head of the serpent is on the ground and the tail supports the lintel. As will be noticed, feathers have been introduced on the serpent.

On either side of the vestibule are the tablets from the old temple at Palenque which according to many archaeologists go back centuries before the Christian era. One of these is the Tablet of the Sun and the other the Tablet of the Cross. On the Tablet of the Cross is the sacred bird on top, always a source of interest and discussion. Are we to understand that this is the Christian cross? If it can be, when and how did it get over to Yucatan? Most American archaeologists hold that the cross in Ancient America is the symbol of the four world quarters.

On the columns of the either side of the entrance are the two bas-reliefs from Palenque, one representing a very old man with a tube in his mouth. A very interesting account is found in Mrs. Nuttall's article in the **Peabody Museum Papers**, Volume 2, 1901. A careful study of her article along with Bulletin

57 of the Bureau of American Ethnology by Morley, shows how near the starting point of Maya chronology comes to the proverbial 4000 B. C.

WORK OF DOCTOR HEWETT

The article in **The Union** states that two of the temples at Quirigua will be excavated soon. This city was cleared and partly excavated by Doctor Edgar L. Hewett from 1910 to 1914. From here came the great monuments in the California Building.

The replicas of the turtle and dragon show the wonderful carving which these ancient people could do with stone chisels. From the turtle there is much to be learned and we are told in the **Popol Vuh** that is was on the back of the turtle that the three ancients were saved when the great flood covered the earth. The great turtle is pronounced by Dr. Holmes, the leading authority in ancient art, to be one of the finest examples of ancient sculpture in existence.

The largest monument must cause wonder to all who gaze at it. How was it transported, how erected, and how cut out of the quarry with such primitive tools as they possessed. The carving is intricate and wonderful. In **The Literary Digest** for June 21, 1919, there is an article by Frank C. Higgins of New York, one of the most noted Masonic antiquarians in the United States, dealing with this particular monument. Dr. Hewett says the romance that has been read into these ancient monuments and inscriptions would make volumes of fiction.

MRS. SMITH'S FRIEZE

Carlos Vierra, famous Santa Fe artist, accompanied the Exposition expeditions to Central America and has left his impressions of six of the ancient cities in six beautiful murals, and Mrs. John Berman Smith made the wonderful frieze in the California Building whose praises have been sung not only in the United States but abroad, of the life and times of the ancient Maya, secured through years of study and reading in the School of American Research. Four of the panels represent the sacrifice of the virgins in the sacred well to propitiate the rain god, mentioned in **The Union** article.

For a few weeks longer the California Building will be closed while the Scientific Library is being installed. As soon as the building is opened to the public again, we would invite everybody to come and see these particular collections which can be seen and studied nowhere else in the United States to such good advantage as in the San Diego Museum, and which are being "discovered" by the outside world 10 years after being explored, studied and brought here by San Diego enterprise.

April 6, 1923, Minutes of the Board of Park Commissioners

Present: Commissioners Ryan, Forward and Klauber.

By unanimous vote the San Diego County Tennis Association was given permission to use such buildings in the south end of the Painted Desert as they might require for dressing rooms, showers, comfort station, locker rooms and storage, provided that a satisfactory arrangement with the Boy Scouts, tenants of the Indian Village, could be made.

Proposition of Mr. Swatzfeger, on behalf of those persons interested in the installation of roque courts in the park, to lend this department the necessary funds for the construction of such courts, and to take his reimbursement fees from fees obtained from players, was not acceptable to this board. Executive secretary was directed to inform Mr. Swatzfeger that this office could not legally enter into a contract to borrow money. It was suggested that the roque players should organize and raise funds for court construction on a similar basis to that employed by the Tennis Association.

Dr. E. L. Hewett and Cuthbert Homan appeared before the board in the interests of a group of artists who desired to take over the New Mexico and Kansas buildings for studios and to use the west side of Building No. 4 for the same purpose. It was stated that his organization wished to charge rental

for studios, the revenues derived in this manner to be devoted to the repair and maintenance of the buildings.

Dr. Hewett and Mr. Homan were advised that this board would consent to such use of the New Mexico Building, provided that it be put in such state of repair as to be satisfactory to this board from the standpoint of safety and appearance. They were advised to confer with G. E. Chase, in charge of the restoration work in the park, and with the Superintendent of Parks relative to the cost of repairs.

A committee of citizens from north and east of Balboa Park appeared and requested that shoulders be placed along the pavement on Pershing Drive, and that several small changes be made to improve certain conditions which they deemed dangerous.

April 6, 1923, San Diego Union, 7:4. Dramatic Order Knights of Khorrasan offer free band program at Organ Pavilion Saturday evening.

April 8, 1923, San Diego Union, 1:1, 7:5. American Legion to have War Memorial in Balboa Park; committee aims to raise \$15,000 to equip building recently given; four interesting collections of war relics to be housed in structure; \$1,420 raised in first day's effort.

April 8, 1923, San Diego Union, 11:4. "Sally," talented baby chimpanzee, arrives at Balboa Park for day; kiddies to be admitted free; special entrance provided north of Reptile House.

April 14, 1923, San Diego Union, 4:1. EDITORIAL: Memorial Headquarters

It is a fine and practical spirit that is actuating individual San Diegans from day to day to add their contributions to the American Legion fund for a memorial and headquarters building in Balboa Park.

April 15, 1923, San Diego Union, Classified, 5:2-4. Grotto for lions at Zoo on exhibition.

April 16, 1923, San Diego Union, 10:5. Thousands visit San Diego Zoo each day; snakes interest; animals living out of doors all year is constant marvel to easterners.

April 17, 1923, San Diego Union, 9:4-5 and April 19, 1923, 15:3-5. Kansas Building given Floral Society as permanent home; rose show to open Saturday in Civic Auditorium; proceeds from rose show this year will go toward the restoration of the building.

April 21, 1923, San Diego Union, 5:2. Lion's Club will dedicate lion's grotto in Park; public invited to see huge beasts restrained only by concealed moat.

April 21, 1923, San Diego Union, 5:3-4. San Diego Players dedicated Little Theater to "Yorick"; opening play "The Romantic Age" by A. Milne.

April 21, 1923, San Diego Union, 5:6. Natural History Museum displaying wild flowers as part of rose show which will open in Civic Auditorium this afternoon.

April 22, 1923, San Diego Union, Classified, 1:1. "King of Beasts" happy in new grotto; grotto made possible by \$11,000 gift from Miss Ellen Scripps; San Diego Lion's Club officiated at dedication; Miss Scripps gave another \$10,000 for the network of paths and roads that traverse the hills and canyons of the Zoo; still another \$10,000 for cages of birds of prey, and pledged \$5,000 a year for three years to pay the salary of the director of the Zoo.

April 23, 1923, San Diego Union, 4:1. EDITORIAL: Yorick's Theater

The Yorick Memorial Theater will offer real entertainment, Yorick believed in that. It will be no place for the intellectual puritan, the so-called "highbrow," who prates of plays with a purpose, or plays with

a deep significance, or plays that are “above” the level of the average mind. Yorick had small patience with the pose of supremacy, whether in the intellectual or the moral field.

April 27, 1923, San Diego Union, 20:2-4. Children of the Children’s Center in Balboa Park to present play, “The Naughty Princess,” in Pepper Grove tomorrow afternoon (illus.).

May 5, 1923, San Diego Union, 5:4. Spajous arrive at Zoo; three agouties and twelve parrots included in gift from U. S. Marines.

May 5, 1923, San Diego Union, 5:6. Senate committee indorses \$10,000 appropriation for repair and maintenance of California Building.

May 6, 1923, San Diego Union, 1:4-5. Zoo starts new buildings for rhinoceros and birds.

May 6, 1923, San Diego Union, 6:4-5. American Legion hopes to dedicate Memorial Building, May 30.

May 7, 1923, San Diego Union, 4:1. EDITORIAL: The Spajous

It is not extravagant to say that the San Diego zoo is helping to make more cultured citizens and more intelligent statesmen. It is bringing us closer to the far parts of the earth by bringing to our notice the strange and interesting creatures that nature has evolved in them.

May 9, 1923, San Diego Union, 7:1. Senate finance committee approved build to appropriate \$1200 to reimburse the trustees of the California Building in Balboa Park for the maintenance of the building.

May 10, 1923, San Diego Union, 1:4. The entire playground commission has threatened to resign because the city council turned down a plan to purchase additional land for the University Heights playground.

May 13, 1923, San Diego Union, Classified, 1:1-2. Mr. and Mrs. Patrick F. O'Rourke donate funds for O'Rourke Junior Zoological Building; estimated cost completed and equipped \$25,000; Louis J. Gill, architect; with the new building the total of permanent improvements will come to \$150,000 (plans).

May 18, 1923, San Diego Union, 7:4. High School plans graduation at Organ Pavilion in June.

May 20, 1923, San Diego Union, 1:4-7, 3:1-6. Text of John D. Spreckels' talk to 135 citizens at dinner in Hotel del Coronado last night.

"Now, gentlemen, between ourselves, what is the matter with San Diego? Why is it not the metropolis and seaport that its geographical and other unique advantages entitle it to be? Why does San Diego always just miss the train, somehow? I will tell you. In three words: Lack of cooperation. We have no team-play. The moment anybody appears with any proposition of a big constructive nature, the small town undertakers get busy digging its grave. Jealousy and suspicion line up the antis and knockers against any man or measure bigger than their two-by-four standards. And if any man dares to invest too heavily, he is promptly warned that San Diego objects to being a 'one-man town.' Well, gentlemen, if being a one-man town is bad for the town, it's hell for the 'one man.;"

May 21, 1923, San Diego Union, 10:1. Hundreds of San Diegans flock to Zoological Gardens to see two Indian elephants; compound prepared for them; funds must be raised to complete payments.

June 14, 1923, San Diego Union, 1:6, 2:1-4. Two young elephants and compound in which they are installed given to San Diego Zoological Society by John D. Spreckels.

June 14, 1923, San Diego Union, 8:1. Frank H. Buck, new director, under 3-year contract with Zoological Society.

San Diego Historical Society History News, Vol. 23, No. 5, May 1987, p. 3. Past Comes Alive, Fascinating facts from the Archives, Frank Buck in San Diego.

The legendary adventures of Frank 'bring 'em back alive' Buck captivated millions of people throughout the world in the 1930s and 40s. Celebrated to this day for his exploits as a wild-animal hunter and trader, Buck is less well known for his brief tenure as director of the San Diego Zoo.

Frank J. Buck went to work for the zoo on June 13, 1923. Signed by the Zoological Society to a three-year contract, the forty-one year old Buck came to San Diego backed by the strong recommendation of Dr. William T. Hornaday, director of the famed Bronx Zoo. Three months later, Frank Buck was unceremoniously fired.

Buck decided to sue the Zoological Society and its president, Dr. Harry M. Wegeforth, for breach of contract. Claiming that he had given up his lucrative animal-collecting business to work in San Diego, as well as damage to his reputation, Buck sought damages of \$22,500.

Force-feeding snakes

In a court deposition filed in January, 1924, Buck recited a litany of grievances, most of them focused upon the actions of Dr. Wegeforth. The zoo president, Buck claimed, had interfered with “practically everything” and has conspired with the board to “belittle and disparage” his efforts as director. He also alleged that Wegeforth had been responsible for the deaths of 150 snakes that had been force-fed with a sausage snuffer. Buck stated that he had been fired after he built a new bird cage without personal authorization from Wegeforth.

Quite a different story emerged from the testimony of Dr. Wegeforth’s board member Thomas N. Faulconer, and several others. All witnesses flatly denied Buck’s allegation that snakes had been killed by force-feeding.

According to these witnesses, Buck’s problems stemmed from his unwillingness to consult with the board on everyday policy. Frequently, he deliberately defied board directives. “The whole character of the man,” Wegeforth testified, “was insubordination.”

There was more involved than a clash of wills. Wegeforth charged that Buck was “incompetent” and “could not be trusted.” On one occasion Buck had ordered nameplates for the animal cages and pens. The order had to be returned when it was found that half of the names had been misspelled by Buck. Wegeforth also cited examples of Buck’s failure to recognize disease or properly care for sick animals.

Skin care for elephants

The final straw was an incident involving the zoo’s two Indian elephants --- Joy and Happy. Buck believed that the hides of the elephants, which appeared dry and cracked, would benefit from “oiling,” a practice that Dr. Wegeforth knew could cause pneumonia or Bright’s disease. Despite the president’s orders, Buck oiled the elephants. Wegeforth recalled: “they quickly became piteous-looking creatures, their trunks grew flaccid and seemed about a foot longer than usual, and their abdomens almost touched the ground. I was afraid they were doomed.”

Fortunately, Joy and Happy recovered. Frank Buck, however, was sacked.

On Feb. 20, 1924, Superior Court Judge C. N. Andrews ruled against the plaintiff Buck and ordered him to pay court costs of \$24. He soon left San Diego and resumed his career as a “zoological collector.”

Frank Buck’s autobiography, **All in a Lifetime**, does not mention his lawsuit against Wegeforth. Interestingly, “while acting as temporary director of the San Diego Zoo,” he does claim credit for inventing a method for force-feeding snakes.

Richard W. Crawford, Archivist/Historian.

June 14, 1923, San Diego Union, 14:1. Council favors Balboa bus line; Zoo president, Dr. Harry S. Wegeforth, asks service from street car stops to point of interest; distance from 5th Street car line to Organ Pavilion, Zoo and other parks of park too much for elderly people to walk.

June 15, 1923, San Diego Union, 1:4. Python forcibly fed at Zoo yesterday; first meal in 3 months.

June 15, 1923, San Diego Union, 1:6, 2:6. Women, bound hand and foot, found semi-conscious in Balboa Park.

June 16, 1923, San Diego Union, 4:1. EDITORIAL: San Diego’s Players

Could Yorick have returned for a space either last Tuesday or Wednesday evening and strolled into "his" theater, then adequate eulogy might be read "On the Margin" today of the triumph scored by the San Diego Players. The allusion, of course, is to our Yorick, not Hamlet's, and to the playhouse that the Players so graciously named after him. Chuckling with pride and glee he might be pictured, after witnessing his faith in the players so abundantly justified by their performance of that difficult masterpiece, Stephen Phillip's version of the ancient tragic love story of Paolo and Francesca.

June 17, 1923, San Diego Union, 9:1. Bands rehearse for concert at Balboa Park Organ Pavilion which will begin next Saturday afternoon at 5 o'clock,

June 17, 1923, San Diego Union, 14:3. Headed by P. T. A., 400 school children spend afternoon at picnic in the Zoological Gardens; the donkey path was the busiest part of the Zoo throughout the afternoon.

July 9, 1923, San Diego Union, 4:1. EDITORIAL: The Music Festivals.

The two weeks' music festival, brimming as it was with enjoyment for thousands, and with a service deeper than any mere promotion of pleasure, has most certainly demonstrated one thing to all of use. It has demonstrated that the festival "belongs" here. Beyond any doubt this feature can and should be made an annual event, appropriate, typical and characteristic of one aspect of a many-sided city that finds its finest

expression in the open air --- in sunlight cooled by a breeze from the sea or under summer moonlight flooding Balboa's gardens.

The great service rendered by this festival is, as we see it, the harmonizing of music's gifts with the ever-present enjoyment of a beautiful open-air setting --- a blending of universal and particular.

It is a part of the enjoyment of music, for many of us, to reflect on the ages of time, the lonely endeavor and the myriad visions of sublime things that have all served together to bring forth the harmonies enjoyed for a moment. In fine music there is an echo of all the long history of our kind, and there are ideas and rhythms that fleetingly express the glimpses of eternity which men of all times have sought and ever failed of attaining. Because of all that, music has its almost universal appeal.

These festivals bring that universal and eternal appeal to us in our civic home. They make intimate and personal, and serve to lend our accustomed landscapes a lasting atmosphere of contact with all this is fine and beautiful in the divine and ancient art of music. This is a deep service, worth of perpetuation.

If our civic park on the commanding hills lacks anything by comparison with the beauty spots of Europe's old cities, it is because our monuments are new. Theirs are very old. Within the walls of Europe's cathedrals and palaces and ancient castles there linger the thousand memories of other days --- of the kings who knelt to receive their crowns from the chosen men of God; of the knights and ladies who made merry in those halls, and have now been silent for a thousand years; of the sturdy fighting men who died in agony to defend a tinselled banner, and are all forgotten now.

Yet something of this atmosphere is not beyond our grasp, and the years may bring it speedily. In fine music, rightly appreciated, there is this atmosphere of the world's romance and sorrow. There are visions of heaven and hell and the void of waters troubled by the stirring of life, at the very birth of time. Fine music can bring to Balboa Park this meaningful background and make it significant to us and to coming generations.

In this view our music festivals in the open air seem almost necessary, for it is through these festivals that a spot we all love can find its finest expression to us all.

July 10, 1923, San Diego Union, 1:8. May expend \$2,000,000 on Naval Hospital here; to be finest institution in country; city to be asked for 3 acres south of present site for additional buildings; money now available; City recently voted to give government title to the 17 acres on which the present units have been built; Admiral Edward R. Stitt: "The land is of little use to the city, while the hospital could use it to advantage."

July 19, 1923, San Diego Union, 1:2, 3:5-6. President Warren Harding greeting will be held, August 6, at Botanical Building, Balboa Park.

July 20, 1923, Records of Park Department In Relation To Taking Over of Exposition Grounds and Buildings by the Navy Department for Training Station (George W. Marston Papers, Collection 219, Box 2, File 32, San Diego Historical Society Research Library).

The initial records of the Park Department of the City of San Diego regarding occupation of Exposition buildings and grounds in Balboa Park by the Navy Department for use as a Naval Training Station are such as to indicate that the idea was evolved some time prior to its formal presentation before the Board of Park Commissioners and that plans for tendering the premises to the Government were well developed before official action was first taken by the Park Commissioners.

Whether this idea originated with one or more of the Park Commissioners, with members of the Exposition Board or with Chamber of Commerce or Naval authorities is in no way indicated by park records.

The first official mention in park files is in the minutes of the Board of Park Commissioners, held on the fifth day of April, 1917, this being a special meeting held for the express purpose of authorizing Colonel D. C. Collier to proceed to Washington, D. C., and there tender to the War Department use of the premises. The following resolution, it being not shown by whom it was introduced, was unanimously adopted.

“Whereas the U. S. Government will be in immediate need of buildings and grounds to accommodate large bodies of troops for mobilization purposes, and

“Whereas there are a number of Exposition buildings in Balboa Park now unoccupied and adaptable for the use of the U. S. Army for temporary barracks, now, therefore,

“Be it resolved by the Board of Park Commissioners of the City of San Diego that all the unoccupied buildings in the Exposition grounds east of the Plaza de Panama be and hereby are tendered to the U. S. Government for army purposes, also such unimproved lands in Balboa Park outside of the exposition grounds as may be considered suitable for any purposes; also that Colonel D. C. Collier be and hereby is authorized to proceed to Washington, D. C. and to tender the use of said buildings and grounds to the War Department of the U. S. Government for an emergency concentration camp, the rental of said buildings and grounds to be free.”

The second document in this record is a letter from the Park Commissioners to D. C. Collier, enclosing resolution and authorizing him to proceed in accordance therewith.

Under date of April 6 are filed letters from the Merchants' Association and Rotary Club, endorsing the action of the Park Commissioners.

Also under date of April 6, in the minutes of the regular meeting of that date, is shown a motion ratifying the adoption of the above resolution as the special meeting of April 5 in the Chamber of Commerce offices.

On April 10, the Park Commission telegraphed Colonel Collier at Washington to withhold from his offer the Alameda, Kern County, San Joaquin and Salt Lake Buildings, as these structures were desired by the U. S. Marine Corps, having occupied a large area south of the Organ Pavilion for several months prior to that time.

In accordance with authority given him by the Park Commission, Colonel Collier, on April 17, offered the buildings and grounds to the War Department, who referred the matter to General Silbert, commanding the Western Division of the U. S. Army. This was reported by Colonel Collier to the Chamber of Commerce, who in turn reported to the Park Commission.

General Silbert telegraphed the Chamber of Commerce that it was impracticable for the army to use the premises and that the offer was therefore declined. This telegram was under the date of April 28, together with a letter from Melville Klauber, chairman of the Army and Navy Committee of the Chamber of Commerce, in which he states that:

- (1.) General Silbert, acting for the War Department, has rejected use of the premises for army] purposes.
- (2.) That Admiral Caperton, on his own initiative, had taken up the matter of naval occupation of the premises with G. A. Davidson, president of the Exposition.
- (3.) That Admiral Caperton said that the navy badly needed space for a training station and urged that steps be taken toward offering the premises to the Navy Department.
- (4.) That the Army and Navy Committee of the Chamber of Commerce had tentatively offered the premises for naval use and desired that the Park Commission ratify the action at the earliest possible moment.

On April 30, the Park Commissioners received a telegram from D. C. Collier to the effect that, in accordance with telegram from Chamber of Commerce, he and William Kettner, Congressman from this district, had tendered the premises to the Navy Department, and had changed the letter and resolution of the Park Commission so that it authorized use of the premises by the Navy Department, instead of by the Army. The telegram also stated that the tender would be accepted. Also on April 30, a telegram was sent to Colonel Collier, advising him that his change of the resolution and letter of authorization had been confirmed. This telegram was authorized at a called meeting of April 30. At this meeting Lieutenant Swanson, port commandant for the U. S. Navy, appeared before the Board and asked that a permit be drawn in accordance with the offers made. Superintendent and executive secretary were directed to draw a form of permit similar to that under which certain parts of the park were already occupied by the U. S. Marine Corps.

At a called meeting of May 8, 1917, Lieutenants Menocal and Clements first appeared before the Park Commission and requested that offices in the Administration Building be turned over to them, saying that one of the exposition officials, Mr. George Burnham, had advised them they might use the same. This request was granted and the formal permit for naval occupancy of the premises was adopted and signed.

Superintendent Morley was later authorized to make such structural alterations as might be required by the navy, and he, with Electrical Foreman C. S. Harper, employed a large force of men for that purpose. Within the next few months, all the main buildings east of the Plaza had been refitted by park forces for naval use, and more than 5,000 naval recruits were receiving training in the park before the close of the year. This work of repairs and alteration cost the Park Department nearly \$30,000, and this expenditure was refunded by the Navy Department. Park forces were engaged on this work day and night, and Messrs. Morley and Harper were highly praised by naval authorities for their able and untiring efforts.

July 20, 1923

I hereby certify that the foregoing has been compiled from records of the Park Department of the City of San Diego, that the essential facts from all records of the department in relation to the establishment of a naval camp are, to the best of my knowledge and belief, included herein.

(Signed) T. N. Faulconer
Executive Secretary
Park Commission.

July 29, 1923, San Diego Union, Classified, 1:2-3. Elaborate plans submitted for re-landscaping east plaza of Balboa Park to be in keeping with restored east entrance building of Electric railway.

In order that the nearby area may be in keeping with the entrance building, now being restored to its former beauty by the San Diego Electric Railway company, the east plaza and surrounding grounds in Balboa Park are to be re-landscaped, according to announcement made last night by the Board of Park Commissioners.

A re-design of this section of the park has been submitted by Gardner and Slaymaker, landscape architects, and the new design has been formally accepted by the Park Commission.

The new plans call for radical changes in the east plaza. Four safety islands will be established for the protection of pedestrians passing through the plaza to and from the street railway station. Access from the railway station will be had by wide paths paralleling the northeast and south lines of the present plaza, extending from the ends of the walks on the north and south sides of the Prado. Within these paths will be planting strips, 15 wide [sic], entirely surrounding the plaza, intersected by the Prado on the west and by Park Boulevard on the north and south sides. This will restrict the plaza to approximately 130 by 145 feet, instead of 180 by 210 feet, as it now is.

This, it is hoped will almost entirely eliminate pedestrian traffic at the main intersection of the streets, thereby decreasing the danger and number of accidents. The average vehicular traffic over this intersection has been checked and the Park Commission has issued an authoritative statement to the effect that more than 5000 vehicles pass this crossing every day.

As all visitors to the park, several thousand each day, include many hundreds of children, patrons of the zoo, museums and other similar attractions, the danger of accidents is so serious that the Park Commissioners consider the betterment of conditions there a vitally important step.

The new planting scheme will virtually prohibit the use of the east plaza for parking purposes, and the Park Commission is now planning the opening of a large parking area east and west of Park Boulevard, just south of the east plaza, also to the west of Park Boulevard, north of the plaza.

Park Boulevard is to be reconstructed through the narrow section just north of this plaza and will be widened to 30 feet of paved surface. A new walk will be installed between the Boulevard and the Balboa Park Auditorium.

Owing to the fact that the two high masts, which in Exposition days bore enormous standards emblazoned with the colors of old Spain, have been declared unsafe, these stately landmarks will be removed.

Gardner and Slaymaker, through their interest in civic improvements and particularly in further developments of city parks, have presented the city with sketches of the proposed rehabilitation of the east plaza section, and in view of the labor and time involved in the preparation of so extensive a landscape

scheme, the Park Commissioners have written the landscape architects, highly commending them for their public spirit as well as upon the excellence of their design.

August 3, 1923, San Diego Union, 6:3. Several youthful bathers under ten years of age were taken to Police Headquarters last Friday on a charge of swimming nude in lily pond beneath Cabrillo Bridge.

August 4, 1923, Letters, Board of Park Commissioners; Natural History Society sold Nevada Building to J. A. Albert for \$401; moving or wrecking to be commenced before October 1, 1923.

August 4, 1923, San Diego Union, 5:6. John Doane organ concert will benefit completion of Balboa Park Civic Auditorium.

August 5, 1923, San Diego Union, 1:6, 14:5. Plans for \$550,000 Army-Navy Y. M. C. A. by Lincoln Rogers ready for contractors.

August 7, 1923, San Diego Union, 1:8, 2:1-2. Memorial services for President Harding planned in Balboa Park Friday.

August 8, 1923, San Diego Union, 20:1-2. Investment bankers move into new building on downtown plaza at corner of 3rd Street (illus.).

August 9, 1923, San Diego Union, 1:1, 6:3-5. Greatest naval base in western America to be here; Bureau of Medicine and Surgery plan creation of hospital corpsmen school at Balboa Park this fall; two acres of land will be needed.

August 9, 1923, San Diego Union, 1:3, 3:5-6. Plan seating arrangements for 8,600 at President Harding Memorial Service at Organ Pavilion tomorrow afternoon.

August 9, 1923, San Diego Union, 7:4-5. Hundreds climb to tower's top at California Building.

More of San Diego has been seen by more people during the last two weeks than in any equal period since the close of the Panama-California exposition, according to T. N. Faulconer, secretary of the park commission. That is one way of saying that the tower of the California Building in Balboa Park has been open for the last two weeks, after being closed for nearly five years.

Within one hour Sunday, 227 visitors signed the register at the tower, and more than 50 percent of this number were from states other than California. Scotland, Canada, Cuba, New Zealand, Ireland and Hawaii were represented, and to each of these states and foreign countries will go kodak pictures made by these visitors showing the wonderful land and seascapes composing the incomparable view to be had from this, the highest viewpoint in the city.

More than 2,000 visitors have climbed the 612 (?) steps to the topmost platform of the tower since its recent re-opening and unanimously have voted the view was well worth the effort.

In order to prevent a recurrence of the vandalism that resulted in the tower being closed, visitors are now required to register before entering the tower, which is kept open only from 11 a.m. until noon and from 2 to 3 p.m. Custodian John Glenn is constantly in attendance and has thus far prevented the damage and defacement so prevalent when the tower was left open at all hours without restriction.

August 10, 1923, San Diego Union, 1:6, 3:5-6. San Diego pays tribute to dead President today.

August 11, 1923, San Diego Union, 1:8, 5:2-5. Estimate of 30,000 attend President Harding Memorial Service; U. S. Senator Samuel M. Shortridge delivered eulogy; Mme. Schumann-Heink sang "Oh Rest in the Lord"; U. S. Marine Band and organ supplied music; Kern-Tulare Counties building on the right of the Plaza used as a first-aid station for the few cases of fainting; problem parking automobiles.

August 11, 1923, San Diego Union, 9:1. Street railway transported 15,000 passengers from Balboa Park after President Harding Memorial Service.

August 12, 1923, San Diego Union, 12:5. San Diego Zoo asks share of Park receipts.

Finances for the upkeep of the San Diego zoo will be the topic of discussion at a conference to be held soon by the city council and the board of park commissioners.

The commissioners yesterday applied to the council for such a conference and the date probably will be fixed by the council tomorrow.

Sometime ago officers of the San Diego Zoological society asked for a share of the money derived from park receipts. The council transferred this application to the park board.

August 12, 1923, San Diego Union, 14:1-2. Children and grownups enjoy elephant and camel rides at San Diego Zoo (illus.).

August 15, 1923, San Diego Union, 1:4-5, 2:4. Mr. Spreckels praises American Legion's first gymkhana; sends \$1,500 check for Park War Memorial.

August 23, 1923, San Diego Union, 20:1. Park Commission Secretary Faulconer declares park traffic ruling must be obeyed; 16 drivers of commercial vehicles are fined \$5 for driving in park; law has been on books for last 8 or 10 years; City Ordinance No. 5380 provides that one-ton trucks with one-ton loads may use Pershing Drive and 11th Street from north to south end of park; no commercial vehicles shall use either drive.

August 25, 1923, San Diego Union, 6:3. Replacing old Cristobal building, which was recently torn down, the County Fair this year will show its poultry, rabbits and covies in a new building of its own.

August 26, 1923, San Diego Union, 12:3-4. Montezuma Gardens display zinnias six inches across, by T. N. Faulconer.

August 27, 1923, San Diego Union, 9:1. Repairs being made to Zuni pueblo, largest building in interesting group.

September 2, 1923, San Diego Union, Real Estate and Development, 1:4-5. World's largest flying cage is completed at San Diego Zoo; new bird house costs \$15,000; gift of Miss Ellen Scripps.

The San Diego zoo's new flying cage, the largest structure of its kind in the world, has been completed and will be dedicated with due ceremonies next Saturday. The birds which will make their home in the great enclosure will be placed in the cage early this week, and will be thoroughly "at home" when the dedication exercises are held. The great cage, built at a cost of \$15,000, was made possible by the liberality of Miss Ellen Scripps of La Jolla, who has contributed liberally to the upbuilding of the city's splendid zoo.

The flying cage occupies space in a canyon leading from the small animal's cages to the seal pond. The cage follows the contour of the canyon, being 60 feet wide at one end and 90 feet in width at the other. It is 200 feet in length and at the lower end attains a height of 85 feet. Birds released in the big cage will have much of the freedom of the open spaces.

The first inhabitants of the flying cage will be the "wading birds," a number of fine specimens of these kind being numbered among the zoo family. The larger flying birds will be the next introduced to their new home. The collection will be an interesting one, including Victoria crown pigeons, curassow from South America, white aigrettes, cranes of several varieties, plovers and other small birds.

The big cage is built throughout of steel and wire, and was made to order in San Diego. It will last indefinitely according to zoo officials who declare it not only the largest but the finest in the world. Cement walks have been placed around the cage and Supt. Morley of the city parks has put in a fine collection of flowers and plants.

Officials of the zoo are preparing an appropriate dedication.

September 8, 1923, Letters, Board of Park Commissioners: Ed Fletcher to Park Commissioners.

Inclosed find plan of proposed Powder House Canyon dam east of the Naval Hospital; also photos taken by me in Mexico, Cuba and Florida showing palm groves and how effective they are along the water's edge.

September 5, 1923, San Diego Union, 5:6. Contract for paving 12th Street in Balboa Park goes to Griffith Company; submitted bid of \$24,299; street to be widened near hospital.

September 22, 1923, San Diego Union, 20:2-3. Careless zoo visitor burns elephants' hay.

September 23, 1923, San Diego Union, 14:4. Dr. Stewart will resume organ recitals this afternoon.

September 23, 1923, San Diego Union, 19:2-4. Spreckels Company makes a big hit with fine booth and exhibits at annual County Fair (illus.).

September 26, 1923, San Diego Union, 7:1. Thomas N. Faulconer, executive secretary Park Board, offered San Diego Zoo directorship (photo).

September 29, 1923, San Diego Union, Classified, 11:2. Frank H. Buck threatens to sue Zoo board; demands immediate hearing on charges that led to removal; employed at \$5,000 a year and has held position for several months; was censured for building a cassowary pen without due authority.

September 30, 1923, San Diego Union, Real Estate and Development, 3:1-3. O'Rourke plans \$150,000 educational addition to San Diego Zoological Society (architect's drawings and illustrations.)

Officers of the San Diego Zoological Society say that, through the philanthropy of Mr. and Mrs. P. F. O'Rourke, the establishment in the Zoological Gardens of an institution of specialized applied science is now assured. The O'Rourkes have purchased the Nevada State Building, one of the largest of the exposition state buildings and classed as one of the chief architectural attractions, which they will have removed to the Zoological Gardens and there restored, after which it will be devoted to the entertainment and education along natural history lines of the children of San Diego.

Mr. and Mrs. O'Rourke are engaged in restoration of the Standard Oil Building, recently removed by them to the Zoo grounds, and this will be used as an adjunct to the larger building. While the cost of removing, rehabilitating and fitting these new buildings for their new use will entail an expenditure of approximately \$25,000, the completed group will be such as could not be built at present day prices for less than \$150,000.

The O'Rourke group will be devoted especially to education by association. The Junior Zoological Society, which already has a membership of more than 100 boys and girls, will have its offices and meeting place in the group. Instructive lectures, illustrated by motion pictures as well as by live specimens of birds, animals and reptiles will frequently be given, and attendants will at all times be on hand to entertain and instruct budding naturalists on animal lore. In the last year the city schools have sent classes of children under the supervision of teachers to the Zoo for first-hand study of the animals, and this method has proven so successful that it has become necessary to designate one of the zoo attendants to devote almost his entire time to the several classes present each school day.

Playground apparatus will be installed for the children, and parents will be able to leave young children in the care of attendants, while their elders are viewing the extensive exhibits of the Zoo. The cooperation of the Children's Center has been sought, and it is expected that the interest of that organization

will be turned to this new project as it has been found impractical to maintain a Children's Center in the Pepper Grove part of Balboa Park, as was at one time planned.

Dr. W. H. Raymenton, an educator of national reputation and a director of the Zoological Society, is at the head of the committee appointed to organize the Children's Center and Junior Zoological departments made possible by the establishment of the O'Rourke group. He in common with men and women prominent in local educational work, predict that this new feature of the Zoological Gardens will prove to be the most practical and one of the most efficient means of public instruction the city has ever known. Knowledge will be imparted through bringing children of the city into direct contact with living specimens of animal life in such a manner as to indelibly impress upon their minds important natural facts without recourse to books or laborious study.

It is planned that reconstruction of the O'Rourke group shall be completed in time for Mr. and Mrs. O'Rourke to present these fine buildings to the children of San Diego as a Christmas present, and it is further planned that an enormous Christmas tree shall be a feature of the occasion.

October 2, 1923, San Diego Union, 4:4. Convinced that the paving of 12th Street in Balboa Park will not require all of the money voted for that purpose, the City Council yesterday instructed the City Manager to use the surplus in widening the road just north of the east entrance in the park.

The Council hopes also to construct some kind of a dirt road through Pound Canyon for the use of automobile trucks which has been prohibited from using the newly-paved Pershing Drive.

October 6, 1923, San Diego Union, 10:1-2. Ground broken in Balboa Park for addition to O'Rourke group; new cages of eagle and orangutan.

October 7, 1923, San Diego Union, 4:1. Dignified barn owls at San Diego Zoo disdainfully regard mere humans.

October 7, 1923, San Diego Union, 10:2-3. Deadly black diamond rattlers received at San Diego Zoo.

The deadly black diamond rattlesnake, terror of the Florida everglades and the bayou districts bordering the Gulf of Mexico, is the newest and most interesting exhibit in the Reptile House in the Zoological Garden at Balboa Park.

A shipment of seven of these beautifully marked reptiles was received yesterday from C. C. Tyler of Anthony, Florida, one of them being nearly six feet in length and the second largest rattlesnake ever exhibited at the zoo. One of the seven had apparently incurred the dislike of his fellows during the trip across the continent, as he had been repeatedly struck on the head and body, and has succumbed when the shipping box was open, upon arrival here.

Zoo authorities say that the rattlesnake is not susceptible to the venom of other rattlesnakes and death can only ensue when the long fangs penetrate the spinal cord or other vital spot.

The black diamond and the pigmy, the largest and smallest of the rattlesnake family, are plentiful in Florida, the former assuming such huge proportions that he has not difficulty in swallowing full-grown rabbits. The pigmy rattler has about the length and girth of a lead pencil, but his venom is no less deadly than that of the black diamond.

The copperhead is less plentiful in Florida, but the profusion of water moccasins, with which the everglades abound, more than make up for the scarcity of the copperhead.

The coral snake, especially dangerous because of his beautiful markings and harmless appearance, is found more commonly in Florida than elsewhere, although not especially numerous there. He is a living and dangerous confutation of the common belief that all venomous reptiles have stubby tails and flat, broad heads.

Fortunately, however, for Californians, there is no danger of picking up a deadly coral snake by mistake, as he is never found in this state.

The safe rule in California is easy to follow, as the rattler is the only venomous reptile native to this state, and he is easily recognized..

October 7, 1923, San Diego Union, 11:1-2. Fidella G. Woodcock, curator of plants, says San Diego Natural History Museum's plant collection among best.

October 14, 1923, San Diego Union, 7:4. Park zoo gets three leopard seals after adventure at Coronado Islands (illus.).

The San Diego Zoological garden in Balboa Park is the richer by three fine specimens of leopard

seals, the fruit of an expedition to the Coronado islands, where several of the party came near being lost in the unusually heavy surf at the foot of the steep and rugged cliffs, where this variety of seal makes his winter home.

The leopard or harbor seal is seldom exhibited in any zoo as he is so wary by nature and so careful in his selection of inaccessible resting places as to make his capture a matter of extreme difficulty and hazard. The new exhibits have been placed in the seal lagoon, just west of the zoo's main entrance, where they apparently are quite as happy as in their native element.

Officials of the Zoological society say that they are especially proud of the new seals by reason of the fact that they were captured by a party of men who give two days of their time and braved serious dangers in order that they might present these interesting animals to the children of San Diego. The party consisted of Harry B. Tellyer of the Bent Concrete Pipe company, Kenneth A. Gardner of Gardner & Slaymaker, W. H. Raymenton, a member of the zoo board of directors; S. E. Tellyer, Karl Tenney, E. L. Silver, LeRoy A. Dahm, and C. Russell. The party made the trip in Steve Solezzi's *Josephine Z*, one of the staunchest fishing craft on the bay.

Dr. Raymenton, who is widely traveled and familiar with perilous undertakings, says that he had never seen a more hazardous venture than was the capture of the harbor seals on this expedition. The high seas were typical of the unusual conditions that have brought about so many shipwrecks on this coast with the last few weeks, and, in spite of every precaution, two members of the party came near being crushed against the cliffs under tons of water and being carried way to sea.

October 15, 1923, San Diego Union, 1:3-6. Bloodthirsty Airedale kills five deer beloved by children at San Diego Zoo; wounds two others.

An Airedale hound was found in the paddock at the Pepper Grove picnic grounds with the carcasses yesterday morning; park regulations forbid dogs from running loose on the grounds on penalty of a misdemeanor fine.

October 16, 1923, San Diego Union, 5:3-6. Two more Balboa Park deer succumb to wounds inflicted by savage Airedale in Pepper Grove (illus.).

October 21, 1923, San Diego Union, 20:3. Pair of mandrels and three mangabeys received at San Diego Zoo; eight baboons expected today; Zoo has nearly 50 primates embracing 13 distinct species (illus.).

October 21, 1923, San Diego Union, Classified, 1:1. Music drama will be given in Balboa Park; scenic effects beautiful as grand opera; "Scenes from Montezuma" and "Legends of Yosemite" to be given Tuesday night (illus.).

October 21, 1923, San Diego Union, Classified, 1:1-3. Arrangements complete for public reception honoring George W. Marston in Balboa Park tomorrow afternoon; reception to be held in Plaza back of California Building; Wallace Moody will start ceremony with Community Singing; Reverend Doctor Bard will deliver invocation; addresses by Melville Klauber, Senator War, Philip Morse and Mrs. A. E. Horton; Frank P. Allen and D. C. Collier among members of general reception committee.

October 21, 1923, San Diego Union, Society-Club, 3:3. Fine Arts Gallery in Balboa Park worth seeing; exhibition of advanced students of San Diego Academy of Fine Arts, which is located in Park.

October 22, 1923, San Diego Union, 7:5-6. Zoo gifts range from cow spider to mountain lion.

October 22, 1923, San Diego Union, 8:4-5. Five tennis tournaments will open city courts in Balboa Park October 27.

October 22, 1923, San Diego Union, 9:6. Luncheon to be held by Women's Civic Center at Balboa Park Auditorium tomorrow afternoon; Councilman Fred Heilbron will talk of the work of the tree planting commission; a few reservations are available.

October 22, 1923, San Diego Union, Classified, 11:1. Organ Pavilion transformed for Music Festival to be given tomorrow night.

October 23, 1923, San Diego Union, 1:8, 2:56. E. J. Burns, assistant general manager of San Diego Eastern Railway, breaks ground for \$3,500,000 Mission Beach-La Jolla line.

October 23, 1923, San Diego Union, 4:1. EDITORIAL: A Good Citizen . . . in praise of George W. Marston.

October 23, 1923, San Diego Union, 5:3-5, 9:2. San Diegans honor George W. Marston with 73rd birthday present; present his bust to City; more than 1,000 citizens on hand; bust to be placed in quadrangle of California Building; done by Scarpitta (?).

October 24, 1923, San Diego Union, 1:2-6. Crowd estimated at 10,000 enjoyed music and pageantry at Organ Pavilion last night (illus.).

October 24, 1923, San Diego Union, 1:7, 17:3. Thousands crowd plaza at Organ Pavilion to hear Music Festival.

October 27, 1923, San Diego Union, 1:4-5, 5:4-5. New Naval Training Station at Point Loma to be formally dedicated today.

October 27, 1923, San Diego Union, 9:3 and October 28, 1923, 5:4. Chrysanthemum show opened in new floral home of San Diego Floral Association in Balboa Park, formerly the Kansas Building.

October 28, 1923, San Diego Union, 1:8, 6:4-6. \$4,000,000 Naval Training Station dedicated.

October 28, 1923, San Diego Union, 4:6. Dr. Wegforth obtains more than 40 animals, birds, reptiles for San Diego Zoo during eastern trip.

October 30, 1923, San Diego Union, 5:6. Frank H. Buck, former director of Zoo, files suit; alleges he was forced out of place through no fault of his own; declares president of Zoological Society tried to arrogate to himself many responsibilities of the director.

October 30, 1923, San Diego Union, 10:6-7. San Diego Natural History Museum will open its autumn series of Sunday afternoon lectures beginning next Sunday.

October 31, 1923, San Diego Union, 12:5. Employees of San Diego Consolidated Gas and Electric Company to make merry in Civic Auditorium tonight at Halloween Spook Ball.

November, 1923, California Garden, Vol. 15, No. 5, 11. Balboa Park Notes, by John G. Morley, City Park Superintendent.

In the article for this issue of the magazine, I take pleasure in stating to our readers that the reconstruction of the Conservatory Building in Balboa Park has been completed. The rearrangement of the planting, etc. under an entirely different plan was finished the first week in October, and for the past several weeks has been reopened to the public.

The conservatory has always been one of the most interesting features of Balboa Park during the Exposition days, and until several months ago, when it had to be closed for the reasons heretofore mentioned.

This was one of the buildings to be restored under the program of the Restoration Commission with the funds subscribed to restore the main buildings of the former Exposition, however, when the work on the conservatory was commenced, the funds were so limited that practically one-half of the work had to be completed from the funds of the Park Department, necessitating strict economy in the finances of the department to be able to complete his important feature of the system.

In removing some of the large palms from the building, it was found no drainage has previously been provided and the subsoil resembled a quagmire. This condition has been overcome by a drainage system. A new hot water system has been put in --- the outside walls four feet high, built of concrete in place of the former wood construction, and concrete foundations for all supporting posts. The replanting plan resembles a garden, and on the sides of the house, the plant benches, instead of being continuous, are divided in sections with a rockery planted with ferns and other choice plants between the divisions. This change has proved very effective and harmonizes with the garden plan of the main portion of the conservatory. The arrangement of the planting gives the visitor when entering the conservatory, an extended and expansive perspective of palms, ferns, dracaenas, and other exotics, and when passing along the walks, the visitor is also able to observe the beauty and individuality of the many varieties of plants utilized in the new scheme of improvement.

In conjunction with the conservatory, it was hoped that the Botanical Building would also be repaired and the planting rearranged, but, because of financial reasons, this work has been postponed until 1924.

The popularity of these two features of the Park has proved to be one of its greatest attractions, and with the addition from time to time of other very choice tropical and exotic plants, and possibly the renewal of an early period of seasonal displays of those flowering plants, bulbs and orchids, this effort of the Board of Park Commissioners will keep Balboa park in the forefront of civic beauty.

The conservatory contains some very fine plants, among which are some very fine specimens of palms, notably the *Areca Lutesceus*, one of the choicest, and a very rare species. There are several very fine specimens in the conservatory. It is not a single stem palm, but produces offshoots or suckers which grow up around the main stem, producing a beautiful and graceful effect. It is a native of the island of Mauritius, where it attains a height of thirty feet or more. The true name of the palm is *Chrysalidocarpus Lutesceus*, however, the common or trade name, *Areca Lutesceus*, is much easier of pronunciation and is more generally used.

Rhopalostylis Spaida (correct name), commonly called *Areca Spadia*, a native of New Zealand --- one plant is in the conservatory and several fine plants in the Botanical Building. This palm, though susceptible to frost, thrives well if planted out of doors in a shady and protected situation.

Chamaedora Elatior, a very graceful palm from southern Mexico, is the tallest growing of the *Chamaedoras*, with long, slender, cane-like stems. The young plants of the *Chamaedoras* are very fine for decorative purposes and the varieties are more extensive than any other palm.

Cocos Waddelliana, a native of Brazil, the most beautiful and graceful of all the small palms, and many thousands are grown for use in fern dishes and for florists use. For conservatory planting they produce a charming effect, especially when growing among maiden hair ferns.

Howea Belmoriana and *Howea Fosteriana* are two choice palms from Lord Howe's Island, for which they are named. The trade name for them is *Kentia*. These palms are grown more extensively for general decorative purposes than any other varieties, as they have proved to be the most useful for greenhouse planting out of doors in San Diego in sheltered locations.

Cycas Revoluta, the Sago Palm, is a native of Java. This palm is extensively planted out of doors in Southern California and Florida, and also extensively grown in greenhouses. The foliage under glass is much more graceful than when grown outside. The seeds are edible and they ripen in Florida. I do not know of any having ripened in California. The pith of the trunk is utilized in its native state for making sago by the inhabitants, hence the reason it is called the sago palm.

Phoenix Roebilenii is a native of the Laos region of Indo China and has the most graceful foliage of all the Phoenix palms. It is also recognized as being more tender than any other and will not withstand much frost. During the heavy frosts in San Diego in the winter of 1913, many that were planted in the gardens and lath houses were killed or seriously damaged. They are among the best decorative plants for all purposes for florists and many thousands are grown for that purpose.

November 1, 1923, San Diego Union, 24:2-3. Zoo leopard seals break fast after hunger strike lasting nearly three weeks.

November 4, 1923, San Diego Union, 16:1-2. San Diego Zoo attracts attention throughout the United States.

November 7, 1923, San Diego Union, 1:5, 3:7-8. Soviet motion picture, "The Fifth Year," barred from showing at Civic Auditorium after protests made by San Diego organizations.

November 8, 1923, San Diego Union, 10:4. Armistice Day celebration scheduled for Balboa Park November 12.

November 11, 1923, San Diego Union, 11:7-8. Balboa Park zoo gets many new specimens, including eagles.

November 12, 1923, San Diego Union, 1:5, 2:4-5. Thousands hear Armistice Day program at Organ Pavilion; San Diego Sciot band gave concert; Reverend Dean Barnes delivered invocation; "Armistice Day Greeting" by Reverend Roy E. Campbell.

November 17, 1923, San Diego Union, 15:1. Club women active in drive to restore exterior of Civic Auditorium; more than \$26,000 has already been raised.

November 18, 1923, San Diego Union, 2:4-5. U. S. S. *Argonne* brings consignment of Nicaragua birds and animals to Zoo.

November 23, 1923, San Diego Union, 12:2. Big Elks' ball tonight in Civic Auditorium.

November 25, 1923, San Diego Union, 5:1. Park Zoo Now Houses Best Collection of Primates on Entire Pacific Coast; Specimens Range from Lowest Order to Orangutan, who Performs by Hour.

With recent arrivals filling in the gaps, the San Diego zoo in Balboa Park now has the most interesting collection of primates on the Pacific coast and one of the most complete in America. The order of primates, including all of the four-handed animals, is represented at the San Diego zoo by 48 specimens embracing 15 species of apes and monkeys, beginning with the marmoset, lowest of the primate order, and on up to and including a Borneo orangutan, nearest relative of man with the exception of the gorilla.

“Mike,” the orangutan, if measured by his intelligence and the similarity of his behavior to that of man, is not so far from being human after all. He loves applause and will perform dozens of original and amusing stunts by the hour, as long as he had an appreciative audience. Unless, however, he is being watched by an appreciative gathering, Mike just sits and thinks. Keeper J. E. Renshaw swears that Mike understands as much of what is said to him as does the average child of his own age, which is between 3 and 4 years.

Next in order comes the mandrills, a fine pair of youngsters recently brought to this country by Karl Hagenbeck, from whom Dr. Wegeforth, president of the Zoological Society, purchased them at the docks in New York City. At the same time eight baboons were purchased, a pair each, of the long-armed golden baboons, hamaydryas sphinx and dog-faced, all of them healthy young animals, youth being a desirable quality because of the greater ease with which young animals are acclimated and trained.

In addition to these specimens from the higher rungs of the ladder, the zoo has the following monkeys, Giant rhesus, red-faced wanderoos, sacred, sapajous, greens, pigtailed, Javas and three distinct sub-species of spider monkeys.

November 25, 1923, San Diego Union, Real Estate and Development, 3:1-3. Drive for civic auditorium fund by women given hearty response; voluntary subscriptions past week exceed \$1200 (illus.).

November 25, 1923, San Diego Union, Real Estate and Development, 8:1-2. Old Nevada Building moved to Children's Center of San Diego Zoological Society (illus.).

November 26, 1923, San Diego Union, 5:4-5. Nature walk of Natural History Society records largest attendance; 137 persons last Saturday were taken on tour of Zoological Gardens, by T. N. Faulconer, director.

November 30, 1923, San Diego Union, 10:4. **Union** program drew record crowd at organ Thanksgiving services held under auspices of San Diego municipal association; Wallace Moody conducted Community Singing; Cadman Club sang.

December 2, 1923, San Diego Union, Real Estate and Development, 1:2-3. Baker Thomas writes letter urging beautification in conformity with Park.

December 2, 1923, San Diego Union, Society-Club, 1:2. Elaborate card party to be given Friday afternoon by society women as benefit toward restoration of Civic Auditorium.

December 7, 1923, San Diego Union, 1:8, 6:4. Navy seeking more land to expend \$1,240,000 here in 1924; three acres asked for Naval Hospital on southerly slope of Inspiration Point; mayor and heads of Chamber of Commerce in favor; plan to spend \$800,000 for hospital corpsmen training school; the three acres are inaccessible except to those passing through the hospital reservation.

December 8, 1923, San Diego Union, 5:4-5. Decide upon plan to beautify Naval Training Station grounds; Balboa Park will supply shrubbery; nurseries and citizens asked to donate.

December 9, 1923, San Diego Union, 22:4. Charles A. Small asks conference on Park budget; says City Council has not allocated money to beautify Pershing Drive promised by Park Board.

December 10, 1923, San Diego Union, 7:4. Plover colony added to Zoo feathered show; first canvasback joins the aquatic bird exhibit which includes 150 specimens.

December 10, 1923, San Diego Union, 10:2-3. Scout Headquarters in Park Made Habitable by Repairs.

Probably few people realize the extent of the work that has been accomplished by the money contributed by the 67 local firms and citizens as announced in the Boy Scout department of **The Union** last Monday. The buildings comprising the Indian Village have been in danger of collapse for several years and only three of the smaller buildings have been used by the Scouts, and these were badly in need of repair, as they were not usable in wet weather, owing to the leaky condition of the roofs. Now these three buildings have been made safe and comfortable and are said to be in better shape than when they were first built. The larger buildings have been braced on the inside so that with a little work each year they may be preserved for a number of years as one of the city's interesting park exhibits.

The Scouts are keeping the grounds, known as the "Painted Desert," open everyday to the public, and many visitors are welcomed each day. It is the hope of those in charge to be able within a short time to make some additions to the reservation of five acres that will make it better serve the actual needs of the Boy Scouts as a permanent weekend camp, where a well-supervised outdoor program may be conducted throughout the year in which the boys will learn to camp out and to take care of themselves under proper direction and leadership. When these plans are completed the Boy Scouts of San Diego will have the best and most unique permanent camp for boys in the world.

December 11, 1923, San Diego Union, 1:6-7, 3:3. Civic Auditorium body denies Klan use of hall.

December 12, 1923, San Diego Union, 12:5. Pershing Drive adornments put up to Park Board; Council decides Commission gets ample funds to provide for beautification; Councilman Weitzel said: "The big stick should be used on the Park Board."

December 13, 1923, San Diego Union, 4:1. EDITORIAL: The Auditorium

We submit there is no reason why the Auditorium Association should deliberate behind closed doors.

December 15, 1923, San Diego Union, 6:5. Formal opening of War Memorial Building on January 6; Schumann-Heink selects day on which she can be present.

December 16, 1923, San Diego Union, 5:4-6. New gold-plated galleon rides as weather vane at top of California Building; weighs 500 pounds and is made of copper overlaid with gold (illus.).

December 16, 1923, San Diego Union, Real Estate and Development, 9:1-2. Balboa Park exposition buildings are all restored.

December 16, 1923, San Diego Union, Society-Club, 1;8, 3:1. Living pictures Christmas night in Balboa Park.

Reviving the novel and beautiful observance of the Christmas by the presentation of living tableaux of famous paintings of the Nativity and the singing of Christmas carols and chants, the Friends of Art and the Amphion club will Christmas night again present this novel and impressive spectacle of Balboa park for all San Diegans and visitors to the city.

Mrs. George W. McKenzie of the Friends of Art and Miss Gertrude Gilbert, president of the Amphion club, had charge of the three celebrations which were given in the same way during the two years of the exposition and the year following. Mrs. McKenzie, who is chairman of the pictures, representing the Friends of Art, and Miss Gilbert, who is chairman of the music, representing the Amphion club, will this year have as assisting committee in the Nativity pageant, Mrs. C. Fred Henking, Mrs. John Forward, Jr., and Mrs. L. L. Rowan.

This is now planned to become a permanent institution and it is expected that each year the beautiful group of living pictures will be shown on Christmas night at the Organ Pavilion, preceded by antiphonal singing of Christmas carols and chants by the four vested choirs of four churches of the city, from the buildings near the organ and from the peristyle.

The singing will begin at 8 o'clock and between 7:30 and 8:30 no autos will be allowed to pass through the Plaza de Panama, going east or west. The Cabrillo bridge, west of the park, will be closed to autos during that time, but not to pedestrians. This is done in order that the singing and ceremonial of the chanting choir, marching to the Pavilion with lighted tapers, be not disturbed.

Following are the pictures, reproductions from famous paintings by the masters, which will be shown in living tableaux:

Three scenes of "The Annunciation."

"Holy Night with Christ Child in the Manger with the Shepherds"

"The Coming of the Wise Men"

"The Adoration of the Child"

"St. Agnes"

"The Holy Family"

"St. John and the Lamb"

"The Good Shepherd"

"Suffer the Little Children to Come Unto Me"

"Benediction of the Angel"

The pictures will be accompanied by appropriate Christmas music, which will be sung by the vested choir, composed of the combined quartets. The music for the pictures and the antiphonal singing is in charge of Mrs. L. L. Rowan. Following are the personnel of the four quartets:

Congregational quartet: Mrs. W. A. Porterfield, Miss Inez Anderson, George F. Reed and Harrison Palmer.

Presbyterian quartet: Mrs. C. C. Kempley, Mrs. Austin Shaw, George M. Hewes and Oscar Griffith.

Episcopal quarter: Mrs. Kenneth G. Barstow, Miss Grace Brady, Albert E. Johnstone and Sydney Gaines.

Unitarian quartet: Mrs. Theodore Barnes, Mrs. L. L. Rowan, Joseph M. Kendall and Joseph A. Farrell.

December 21, 1923, San Diego Union, 8:5. Benefit performance for Civic Auditorium to present diversified program; to be staged next week.

December 23, 1923, San Diego Union, 9:5. Special music New Year's Eve; classical program to be given by vocalists in Organ Pavilion under auspices of Community Service.

December 23, 1923, San Diego Union, 15:6. Will close park zoo Christmas; employees and animals will have first quiet day in two years.

December 23, 1923, San Diego Union, Society-Club, 1:1-2. Living pictures to be seen Christmas evening in Balboa Park; Christmas carols will be sung.

December 25, 1923, San Diego Union, 5:3. Friends present Park Zoo with rare animals; antelope, elk, buffalo cows and whistling swans added to other attractions.

December 25, 1923, San Diego Union, 8:2. Sing Christmas carols tonight in Balboa Park.

December 26, 1923, San Diego Union, 16:4-5. 10,000 witnessed Christmas tableaux in Balboa Park last night.

December 30, 1923, San Diego Union, Classified, 1:4. Free elephant rides will be given children visiting Zoo New Year's.

1924

(Summary of Events)

Auto Camp land required for Zoo expansion
Woodrow Wilson Memorial Service
New Mexico Building completed as one department of
San Diego Musical Association
Midwinter Festival
Opposition to using old Marine Site for Auto Camp
Auto Camp Closed
Scouts to erect Fountain in Indian Village
Uses of Assembly Hall at Indian Village
O'Rourke Building Dedicated
War Memorial Building Dedicated
Music Festival
Marston Gives Land to Balboa Park
New Bear Grotto at Zoo
Costume Ball at Organ Pavilion
Scouts to Repair Indian Village
Yorick Theater Improvements
County Fair
Spreckels Objects to Organ Pavilion Use as a
Political Rostrum
Dog Show in County Fair Building
Name Park Point for George W. Marston
Nativity Tableaux
Admission to be Charged to Art Museum

January 1, 1924, San Diego Union, Park Section:

Front Page: San Diego's Dream City. Park
Commissioners: John Forward, Jr., president; Hugo Klauber, secretary; William Templeton Johnson, commissioner; John G. Morley, superintendent; T. N. Faulconer, executive secretary.

3:1-4. Balboa Park is San Diego's crowning glory; exposition buildings give lasting art treasures to city; during 1922 the people of the City donated \$150,000 to restore exposition buildings; Electric Railway park entrance building restored; Zoological Gardens cover 150 acres and had attendance of more than one half million in 1923.

Balboa Park, 1400 acres in extent, lies in the heart of San Diego. Surrounded by residence and business districts, this great tract of land is easily accessible to everyone, and is never without its throng of visitors. From the shores of San Diego bay, the ground rises sharply on south and west, culminating in high table lands, intersected by deep canyons.

These heights comprise Balboa Park and rest above the city like a wreath of evergreen upon its brow. The acres of brilliant green, studded with towers and minarets of snow-white exposition buildings are visible from the sea-lanes, where ply the great ships of the coastal trade, and from the rising ground of the foothills and mountains that form a barrier north and east of the city.

In all, San Diego has 23 parks, embracing more than 2,000 acres. La Jolla park, upon the brink of the ocean cliffs in the little suburban town from which it takes its name, is a place of beauty. Plaza park and New Town park in the business district afford a resting place for tired shoppers and workers. There are other

parts in the city that are admired and extensively used, but it is Balboa Park that is thought of in New York, Chicago or even in foreign lands, when one speaks of San Diego's wonderful park.

Buildings in Park are Rehabilitated.

No more enlightening commentary upon Balboa Park, San Diego's park par excellence, could be made than to recite the fact that during 1923, the people of the city donated \$150,000 for the restoration of the finer examples of architecture bequeathed to the city by the Panama-California Exposition of 1915 and 1916. Today, nearly a dozen of these superb examples of Spanish and Mission architecture, fully rehabilitated, stand as a lasting and beautiful monument to the love that San Diegans bear towards this tract of land that has been transformed from cactus vales and hills into a city of dreams.

Artists from the east and from capitals of Europe have visited San Diego that they might put upon canvas the charm that has made this spot a lure to lovers of beauty from the ends of the world, and many of these canvases have been admired in the galleries and salons of Paris, London and Rome.

Nowhere in this country has nature so favored the horticulturists, and the profusion of blossoms never wanes. The season flowers of spring and summer are literally crowded out by the no less prolific growth of fall and winter. The procession is endless and of infinite variety. Stately yuccas from the arid desert grow among the massed foliage of jungle origin, and tropic flowers bind the tall trunks of pines that germinated beneath the snows of the far north. Flaming hibiscus from the South Seas flaunts its radiance amid roses and lilies, against a background of graceful palms.

Expansive Lawns Bordered by Trees

Entering Balboa Park from the west, the eye meets expansive lawns bordered by stately eucalyptus trees, with miles of quiet shaded paths that border acres of beds filled with season flowers. The main entrance is by way of Laurel Street, which debauches upon Cabrillo Bridge, its quarter-mile span connecting the Exposition grounds with the western part of the park. From this bridge the view is one of the most delightful to be had in the city. A hundred and twelve feet straight below may be seen the lotus pond, where in season lotus and pond lilies spring in thousands, casting their reflection upon the quiet bosom of the pond.

To the north, bison and other ruminants are seen grazing in their paddocks in the Zoological garden, and the southern outlook embraces the downtown district of the city, San Diego bay, and beyond that, the Silver Strand of Coronado, ruffled with the silvery lace of breaking surf, and the still more distant Coronado islands of old Mexico.

At the east end of the bridge stands the Administration building, flanked by the majestic tower of the California State building, housing the Scientific Library. Facing the California Building and with it forming a small Plaza is the Fine Arts building, with exhibition galleries and the Academy of Fine Arts.

East of these and facing each other, on either side of the main street or Prado, are the Science of Man and Indian Arts buildings, in which are shown the archaeological, anthropological and Indian art exhibits of the San Diego Museum. The buildings form the western wall of the Plaza de Panama, a vast paved court, where public festivities, outdoor dancing, fiestas and similar entertainments are of frequent occurrence.

American Legion Building Is Feature

The American Legion Building, at the northeast corner of the Plaza, is being reconstructed for activities of the Legion, and will contain one of the finest museums of World war relics in the west. The Foreign Arts Building, at the southeast corner of the Plaza, has been reserved for expansion of the Natural History Museum, which now fills to overflowing the old Canadian Building of exposition days. The mounted specimens of native animals, current and extinct varieties, the herbarium and other exhibits form an exceedingly interesting display of the fauna and flora of San Diego County.

South of the Plaza de Panama, flanked by its graceful peristyle framing glimpses of the blue Pacific, the great Spreckels organ commemorates the love of two brothers for their fellow citizens. This largest outdoor pipe organ in the world, a gift to San Diego of John D. and Adolph Spreckels, is heard daily in concerts throughout the year, and is a source of unending delight to San Diegans and visitors from elsewhere.

Just north of the Prado and east of the American Legion Building, the lagoon, with its thousands of pond lilies and lotus blossoms, mirrors the lath dome of the Botanical Building, through which giant bamboo, nearly 70 feet in height, poke their frond heads. In this building and in the adjoining conservatory are displayed the luxuriant tropical planting that would not thrive even in the mild climate of San Diego. Rare exotics and the more delicate native flowers are shown here under the most perfect growing conditions, and are the subject of admiring comment the year round.

The Domestic Arts Building, one of the largest and handsomest of the exposition group, is in frequent use for industrial and agricultural exhibits, the annual County Fair being the most important of these features.

Auditorium In Demand for Many Conventions

The Balboa Park Auditorium, restoration of which has not yet been completed, is in charge of the Auditorium Association, and is in great demand for state and national conventions, large gatherings for business or social purposes, and for such civic assemblies as require large seating capacity.

Much favorable comment has resulted from the restoration by the San Diego Electric Railway of the colonnade forming the east entrance and car station. This entrance building, through which enter some 90 percent of all visitors by trolley, is now one of the most attractive features of the exposition grounds.

The Pepper Grove picnic grounds is one of the most popular sections of the park. Groups of tables in shaded nooks, convenient drinking fountains, playground apparatus and other equipment attract to this spot many picnic parties each day. The local Girl Scouts occupy two buildings in the Pepper Grove, and their activities add greatly to the life and spirit for which this part of the park is noted.

Zoological Garden Covers 150 Acres.

The Zoological Garden has taken over three of the exposition buildings and restored them for use as administrative, educational and exhibit purposes, in connection with the 150-acre tract that has been transformed into an extensive Zoological Garden. The largest group of animals, birds and reptiles in the west is maintained in this Zoo. The records of the Society show an attendance of more than half a million people during the last 12 months.

The Painted Desert occupies a large area in the north end of the park and comprises a group of replicas of Indian community houses. This, during the exposition, was regarded as one of the greatest attractions ever shown, and it was considered of so great value to the community that the Atchison, Topeka and Santa Fe Railway, by whom it was built, was prevailed upon to donate it to the city. The Painted Desert is now occupied by the Boy Scouts, for whom it makes an ideal group.

In addition to its supremely beautiful landscape effects, its museum exhibits and its attractiveness for lovers of art and music, Balboa Park provides facilities for the entertainment of those who have athletic tendencies. An 18-hole golf course, a battery of six concrete surfaced tennis courts, horseshoe pitches, miles of dirt road for equestrians, and many more miles of quiet trails for pedestrians afford ample enjoyment for outdoor exercise.

Baseball and football, track meets and similar sports may be indulged in on the several fields located in the park, while the huge concrete bowl Stadium, seating 35,000 people, is reserved for the more important football and baseball matches. In addition to athletic events of importance, great gatherings for which accommodation is not possible elsewhere, are held at the Stadium. The Prince of Wales, President Wilson, General Pershing and other of the world's great men have spoken at the Stadium to enormous audiences,

more than 50,000 people having assembled there on one occasion, filling not only eight miles of concrete seats, but every available foot of the athletic field as well.

In charge of this great institution that is a park, and, at the same time, a small community in itself, embracing dozens of features not commonly found in parks, stands John G. Morley, superintendent of parks. To him, in large measure, is attributed the beauty of the landscape, the excellence of the miles of roads and trails, the efficient and quiet administration of park affairs, and the high regard that all San Diegans feel toward this magnificent park.

4:1-2. Art and Sciences featured by San Diego Museum; fine scientific library bequeathed to city by late W. W. Whitney.

4:2-3. Six municipal tennis courts recently completed in park.

4:4-5. Complete history of man depicted in exhibits, by Margaret E. Bard.

4:7. Art Gallery has fine collection of masterpieces, by Cuthbert Homan, curator.

4:8. Academy of Arts offers artists rare subjects; institution has its studios in the heart of Balboa Park; under tutelage of faculty, directed by Eugene de Vol.

5:1. Rapid progress, fast-growing membership of Zoological Society.

5:3. Park Auto Camp well equipped; average population in 1923 was 179 persons a month; average number of visiting automobiles was 60; total of 21,600 persons stayed an average of three days; spent an estimated \$97,300 during year; camp is situated on land required for Zoo expansion; new camp in park is planned.

5:4-5. Great work accomplished by Girl Scouts.

5:6. Great panorama seen from California Tower.

5:6. Floral Association has annual exhibit.

5:7-8. Educational institution valuable adjunct to Zoo; Junior Zoological Ranch formed in 1917.

6:1-4. Spreckels Outdoor Organ nucleus of music center; daily recitals given; Dr. Humphrey H. Stewart wants to use Kern County and San Joaquin County Buildings as part of civic music center.

7:1-2. Natural History Museum grows in popularity.

7:3-4. Balboa Park Auditorium is big municipal asset; used for social gatherings, conventions, balls.

7:5. Annual County Fair increases in popularity; first organized five years ago; well over 5,000 exhibits last year.

With perhaps the most delightful setting and environment in the world, San Diego County conducts in the latter part of each September, a four-day, old-fashioned County Fair, utilizing some of the restored

buildings of the 1915 exposition in Balboa park, together with a number of specially constructed buildings for the purpose of housing the livestock division.

Here, under ideal weather conditions which permit of all amusement and concession features being held out of doors amidst the gardens, lawns, shrubbery and semi-tropic trees of San Diego's 1400-acre park, located in the center of the city, farmer, merchant and manufacturer alike view with one another in presenting the product of their labor.

The fair is held under the auspices of the San Diego County Farm Bureau, whose membership is comprised of 19 rural groups called "farm centers: scattered at strategic points near and far in this very extensive county and covering a variety of agricultural and horticultural products found in few parts of the county, owing to the diversity of soil and climatic conditions to be found from the lowlands fronting the Pacific to the more rugged elevations of the inland mountain ranges.

The activities displayed cover agriculture, horticulture, livestock, farm center competitive exhibits, farm bureau projects, an auto show, commercial and industrial exhibits of the city, and a wide variety of entertainment and amusement featuring a rodeo with wild west riding, roping and cow pony racing. The fair was first organized five years ago and has increased from a small exhibition to one that contained well over 6,000 exhibits last year.

The livestock division has grown astonishingly and authorities stated last years Guernsey exhibit was the best on the coast. Poultry also has shown enormous strides during the last few years, San Diego's eggs being quoted at a premium on the New York market where coast combined associations, headed by a local man, maintain a large warehouse of their own, shipping something over 1,000 carloads last year.

The farm center competitive displays are a feature of the fair and the fair itself has been pronounced the best farmer-controlled fair on the coast.

7:6-7. Restoration Committee does excellent work on

Balboa Park buildings

Within 30 days from the announcement that the public would be asked to share in financing the work (in 1923), the estimated cost of \$100,000 had been oversubscribed by 20 percent and George Edward Chase, who has charge of much of the work during the original construction of the buildings, was employed to direct the restoration program.

Eight buildings rehabilitated --- new foundations, new roofing material, plaster and staff replaced, waterproofing.

Restoration Committee:

W. S. Dorland, chairman
George W. Marston, vice president
Mayor John L. Bacon
G. Aubrey Davidson
Henry C. Ryan
John Forward, Jr.
Hugo Klauber
Alexander Reynolds, treasurer
T. N. Faulconer, secretary

Receipts, Accounts Receivable and Disbursements itemized

Total receipts	\$110,290.49
(\$25,000 each from City and County)	

Total disbursements	110,195.41

Sources of Money are Tabulated

Interest on deposits in savings banks	\$ 258.13
Reimbursement by Natural History Society	
for labor and materials used in fitting up museum	4,703.96
Laskey corporation repairing plaster	23.16
Salvaged material, scrap lumber, etc.	<u>50.00</u>
	\$ 5,035.26

7:8. Yorick Theater is successful park feature; Director Francis P. Buckley, President Frank Spalding; an amateur Community Theater.

The San Diego Players have as their ultimate aim the production of original work, plays and sketches that merit presentation, but would not be accorded a hearing in the commercial theatrical world. Their first effort of this sort was a contest, with a prize of \$100 offered for the best three-act play, and \$50 for the best one-act play. The former was won by William A. Conselman, a Los Angeles newspaperman, and presented by the Players for three successive performances. It had the intriguing title of "And Then What," and aroused a great amount of interest and enthusiasm when produced.

Other dramatic ventures of the Players have included "Alice Sit By the Fire," "Everyman," Austin Adams's play, "Who Knows?," "Paolo and Francesca," and recitals by such notables as Frederick Warde, veteran tragedian, and Havrah Hubbard, nationally-famous operalogist.

The plans of the San Diego players are many and varied. One of their fondest dreams is the organization of a group of Junior Players children who will be directed to express themselves in worth-while drama and comedy easily and naturally, and encouraged in the appreciation of art in its truest sense. They aim also at having a building so perfectly equipped that it will lend itself to the necessities of any organization desiring it for entertainments or conventions. Above all, they aim at producing the best, and doing their share in making Balboa Park what it should be, and will be, the artistic center of San Diego and the southwest.

January 1, 1924, San Diego Union, Educational Section, 5:5-8. Montezuma Gardens display zinnias six inches across, by T. N. Faulconer.

January 1, 1924, San Diego Union, Business-Industrial Section, 8:1-2. Mission Beach enterprise underway; work to be started soon on \$300,000 bathhouse; plans and specifications by Lincoln Rogers, architect, and F. W. Stevenson, associate.

January 1, 1924, San Diego Union, Regular Section, 7:2-3. Beautiful Christmas tableaux at Balboa Park praised.

January 3, 1924, San Diego Union, 22:3. San Diego City Council believes that the electors should vote to give the U. S. Navy several additional acres of land near the Naval Hospital in Balboa Park, provided the War Department will deed to San Diego the block of land near the front of Market Street, formerly occupied by the old Army Barracks.

Mayor Bacon told the Council that it is the Navy which wants the park land, and the Army which owns the barracks site. The Councilmen paid little attention to this warning.

January 5, 1924, San Diego Union, 6:1-2. Out of the recent use of the Christmas holiday of the double cypress tree near the Sixth Avenue side of the park has grown the idea of using living trees in the future for this purpose and the connecting of Arbor Day with the Yuletide by planting the trees on that day.

January 5, 1924, San Diego Union, 7:5. Because of the completion of the Boys' Gymnasium of the San Diego High School the basement of the Technical Department is now occupied by the Printing and Automobile Departments.

January 6, 1924, San Diego Union, 1:5-8. Huge python at Zoo will be fed in public for the first time.

January 6, 1924, San Diego Union, 21:4-5. Marston bust wins high praise; likeness of San Diego merchant shown in California Building (photo).

January 6, 1924, San Diego Union, 1:2-4. Mme. Schumann-Heink sends check for \$500 to local American Legion post; will sing later in Memorial Building (photo).

January 6, 1924, San Diego Union, Society-Club, 1:5-6. Wedding ceremony in St. Francis Chapel.

January 6, 1924, San Diego Union, Society-Club, 10:3-4. Christmas tableaux at Balboa Park praised.

January 7, 1924, San Diego Union, 1:3-6. Python at Zoo takes monthly meal; table manners bad; about 6,000 San Diegans paid Zoo admission to watch him eat.

January 8, 1924, San Diego Union, 9:1. American Legion gives party in Memorial Building, Balboa Park.

January 8, 1924, San Diego Union, 12:2-3. If City Manager Rhodes has been successful yesterday, the Automobile Camp grounds in Balboa Park would soon be a thing of the past, but he wasn't. The Council turned down Rhodes' recommendation that the Park Camp be abolished so that the land it occupies may be utilized by the San Diego Zoo.

January 10, 1924, San Diego Union, 21:3- Photograph of crowd watching python being fed at Zoo last Sunday.

January 13, 1924, San Diego Union, 11:1-3. John Nolen will consider development of city at a meeting this afternoon with various official and semi-official bodies; in city at invitation of George W. Marston and G. A. Davidson.

January 19, 1924, San Diego Union, 19:1-2. John Nolen advocates survey to decide best plan before starting city improvement campaign.

January 21, 1924, San Diego Union, 7:5-6. Asserting that the erection of a fence around the Roosevelt Junior High School to the Auto Camp grounds in Balboa Park, now underway, will work a hardship on many San Diegans and Coronadans who find recreation in horseback riding, Doctor Arthur Wegeforth of Coronado yesterday voiced a protest on behalf of the San Diego riders against the elimination of traffic across the school grounds.

According to the Coronado physician, the Board of Education has received permission from the Park Commission to build the fence from the school building to the camp ground to eliminate all traffic on an extension of the Cabrillo Canyon road which traverses the school property.

January 25, 1924, San Diego Union, 1:7-8. Testimony in suit brought by Frank H. Buck against Zoological Society yesterday centered around a tiger which died at the Zoo. Buck alleges animal's death was due to medicine given it by a Zoo official, while the defense is attempting to prove that the animal was struck over the head with a heavy weapon.

January 25, 1924, San Diego Union, 12:1. Council diverts \$3,000 to repair Civic Auditorium; another \$3,000 from Supervisors with cash on hand believed sufficient; some of the beams under one part of Auditorium have been attacked by dry rot. The Council had hoped to use some of the excess bond money to build a dirt road for trucks through Powder House Canyon in the park, but it is feared that this will have to be

eliminated. The Park Commissioners have notified the Council they do not wish such a road in the park, not considering it a proper place for truck traffic.

January 29, 1924, San Diego Union, 1:7-8. The San Diego Zoological Society won a decision in Superior Court yesterday in the suit brought by Frank H. Buck for \$22,500 alleged to be due to him in salary and damages following his discharge from his position.

January 29, 1924, San Diego Union, 6:3. An ordinance adopted by the City Council yesterday appropriated \$3,000 to be used for repairs on the Civic Auditorium in Balboa park; the money is to be taken from the general funds to which it was transferred from the bond funds left after 12th Street through the park had been paved.

February 2, 1924, San Diego Union, 6:3. John Forward, Sr., president of the Union Title Insurance Company and a former mayor of San Diego, has made a substantial donation to the Zoological Society for the construction of a series of bird cages to be erected along the edge of the small mesa where the eagle cage now stands.

February 3, 1924, San Diego Union, 8:1-5. Federation of State Societies of San Diego to hold annual open-air winter picnic at Balboa Park, Saturday, February 23 (photos).

February 3, 1924, San Diego Union, 12:3. Rowing Club and Athletic Association to hold festival at Civic Auditorium, March 1 to 10.

February 3, 1924, San Diego Union, 13:1-2. Balboa Park has graceful group of mimosa trees; scientific names is *Acacia Baileyana*; form bowers along west boulevard in Balboa Park; line the sides of the lower end of Cabrillo Canyon; Botanical Building and Conservatory have been recently restored.

February 3, 1924, San Diego Union, 18:1-5. Lenore E. Downey interviews Mme. Schumann-Heink.

February 3, 1924, San Diego Union, Classified, 5:4-5. More than 600,000 persons visited the San Diego Zoo in 1923; paid admissions were 164,000.

February 4, 1924, San Diego Union, 1:1-8. Former President Woodrow Wilson dies.

February 4, 1924, San Diego Union, 1:3. 2:3. Woodrow Wilson's visit to San Diego in 1919 recalled.

February 6, 1924, San Diego Union, 1:6-7, 3:3. San Diego will hold memorial service for Woodrow Wilson Sunday afternoon at Organ Pavilion.

February 6, 1924, San Diego Union, 3:1. San Diego Zoological Society elects officers for 1924; Dr. Harry Wegeforth unanimous choice for president.

February 7, 1924, San Diego Union, 10:6-7. 523 tennis players used Balboa courts during last month; a small charge is made for the use of the courts for the purpose of liquidating the debt incurred in building them.

February 8, 1924, San Diego Union, 1:1-2. The municipal Auto Camp in Balboa Park will be closed on or around April 1; the decision was announced last night after City Council members, Park Board members and Board of Education members met with Dr. Harry M. Wegeforth; the Park Zoo needs more room right away.

February 8, 1924, San Diego Union, 10:4. Boy Scouts to hold anniversary celebration at American Legion building in Balboa Park tonight (illus.).

February 10, 1924, San Diego Union, 1:5-8. Prayer and Thanksgiving will mark Woodrow Wilson Memorial Services at Balboa Park today.

February 10, 1924, San Diego Union, Classified, 1:8. Boy Scouts initiate their dads at Indian Village; fathers enjoy flapjacks over campfire and rolling up in blanket.

February 11, 1924, San Diego Union, 1:6, 2:2-3. Five thousand persons honored Woodrow Wilson in big meeting at Organ Pavilion; G. A. Davidson presided; Reverend Wallace Hamilton delivered memorial address.

February 17, 1924, San Diego Union, Classified, 1:8. Free elephant rides in park will end today; hereafter children will be taxed ten cents; camels to carry adults.

February 18, 1924, San Diego Union, 5:3. Doctor Henry Frank Speaker delivered Lincoln oration before Illinois Society yesterday at Organ Pavilion.

February 18, 1924, San Diego Union, 5:5. Natural History Society report given to public.

February 18, 1924, San Diego Union, 8:5. New Mexico Building in Balboa Park has been completed as one department of the San Diego Musical Association under the direction of its art curator, Cuthbert Homan; several card parties have been arranged to supply funds for the furniture.

February 23, 1924, San Diego Union, 1:3-4, 2:3. State Societies gather at outdoor picnic today.

February 24, 1924, San Diego Union, 1:8, 2:3-5. Twenty thousand attend picnic of state societies in park; all corners of country represented (illus.).

February 26, 1924, San Diego Union, 11:1-2. Natural History Museum educational program for March in Park announced.

February 28, 1924, San Diego Union, 8:2-3. Sioux Indians will entertain Midwinter Festival patrons March 1 to 10; also Ratliff dancers, trapeze artists and a fashion show.

March 1, 1924, San Diego Union, 9:4-5. Midwinter Festival will open tonight at Civic Auditorium for the purpose of raising funds for amateur athletics in the city.

March 9, 1924, San Diego Union, 13:5. Signs notifying campers they must vacate the place by April 1 were placed in the Municipal Camp Grounds in Balboa Park by the Board of Park Commissioners yesterday.

March 9, 1924, San Diego Union, 2:3-4. A. G. Stacey writes letter in favor of giving U. S. Navy ten acres of Balboa Park for Naval Hospital.

March 10, 1924, San Diego Union, 19:1. E. W Peterson writes letter opposing abandonment of Auto Camp in Balboa Park, occupies ten acres.

March 11, 1924, San Diego Union, 4:5-6. Mrs. R. S. Henry wants Auto Camp to continue in Balboa Park.

March 11, 1924, San Diego Union, 17:4. Scouts to erect a fountain at the Indian Village.

March 12, 1924, San Diego Union, 7:3. A burglar Monday night rifled a collection of semi-precious gems at the San Diego Museum in Balboa Park.

March 12, 1924, San Diego Union, 15:4. J. M. Hunolt wants Balboa Park renamed San Diego Park with a "beautiful electric sign at the entrance gates."

March 13, 1924, San Diego Union, 6:3-5 and March 14, 1924, 5:5. Five hundred sailor Navy Training Band will provide music at Organ Pavilion Sunday.

March 15, 1924, San Diego Union, 5:3. Colonel D. C. Collier back for visit; banquet planned by Chamber of Commerce; arrived in San Diego last night.

March 16, 1924, San Diego Union, 14:4. Rodent section at Zoological Garden nearly finished; new cage group donated by Colonel Milton McRae.

March 16, 1924, San Diego Union, Classified, 1:3-4. Naval Training Station lads will play and sing at Balboa Park Organ Pavilion this afternoon (illus.).

March 17, 1924, San Diego Union, 6:3. Navy Day brings record crowd to Organ Pavilion; automobiles packed both sections of Plaza de Panama and all parking spaces on both sides of the main streets from gate to gate.

March 18, 1924, San Diego Union, 3:6. A proposal by the Zoological Society that the School Board exchange with the Zoo a section of land in the park territory, now a part of the Roosevelt school grounds, for an adjoining triangular section was approved by the Board of Education last evening.

March 18, 1924, San Diego Union, 9:6. San Diego Zoological Society seeks land for large aquarium at foot of A Street.

March 18, 1924, San Diego Union, 12:1. Council unanimously favors Marine site south of Organ pavilion as site for Auto Camp.

March 20, 1924, San Diego Union, 4:4-5. Dr. Stewart opposes old Marine Corps base as auto site; Board of Education members join in protest.

March 21, 1924, San Diego Union, 4:3. Rotary Club observed "D. C. Collier Day" yesterday; Collier gave short talk; returned to his old home at Ramona last night.

March 21, 1924, San Diego Union, 10:5. Chamber of Commerce to honor D. C. Collier next Wednesday evening.

March 22, 1924, San Diego Union, 3:1. Auto Camp site puzzles Park Board; no suitable place suggested.

March 22, 1924, San Diego Union, 5:3. Marston to speak at D. C. Collier dinner to be held next Wednesday evening in Pompeian room of San Diego Hotel; tickets on sale at \$1.50 a plate; Collier is staying at Hotel.

March 22, 1924, San Diego Union, 9:4-5. Congress votes million for San Diego Naval Hospital; expenditure is contingent upon City granting additional acreage; new buildings in north quadrangle will be erected this year.

March 23, 1924, San Diego Union, 12:2-3. Zoological Society plans great aquarium on Bay Front.

March 23, 1924, San Diego Union, 16:5. Exposition days dinner subject; reminiscences of San Diego fair will be given at D. C. Collier banquet next Wednesday.

March 23, 1924, San Diego Union, 17:4-5. D. C. Collier will help Normal Heights celebrate completion of improvements; Colonel Collier laid out Normal Heights subdivision more than 12 years ago.

March 23, 1924, San Diego Union, Society-Club, 1:2-3. **Mi Careme** fashion show and card party at Civic Auditorium Thursday afternoon to raise final sum to complete restoration and interior decoration of building (photos of society women who will as mannequins).

March 24, 1924, San Diego Union, 10:4. Boy Scouts Court of Honor outgrows rooms; quarters will be moved from Court House to Roosevelt Junior High School.

March 24, 1924, San Diego Union, 10:5. The entire chorus of the Elks Chanters will sing at the dinner to be given by the San Diego Chamber of Commerce in honor of D. C. Collier Wednesday evening.

March 24, 1924, San Diego Union, 10:5. The Assembly Hall of the Indian Village will soon contain a permanent exhibit of articles made by Scouts for the various requirements in the 70-merit badge; will show subjects for which they can work.

March 25, 1924, San Diego Union, 22:4. Silver Gate trio rounds out program for testimonial to Colonel D. C. Collier.

March 26, 1924, San Diego Union, 11:3. Final preparations have been completed for the testimonial dinner to be given in honor of Colonel D. C. Collier.

March 27, 1924, San Diego Union, 4:4-6. Citizens pay tribute to D. C. Collier at banquet; San Diegan back from Brazil hailed as man who had great vision which resulted in Exposition; honor guest predicts brilliant future for city.

Collier declared with pride that the City of Rio de Janeiro, inspired by San Diego's example, in making her big exposition buildings permanent, had likewise made the Brazilian buildings permanent, thus creating one of the most beautiful groups of buildings anywhere in the world.

"They also gave us some suggestions of value," he said, "when they decorated the interiors of their exposition buildings, so that they are as beautiful as any interiors anywhere. They are perfect gems, and future expositions will do well to follow their example in the interior decoration of their buildings."

. . . It was the exposition spirit of cooperation and determination that brought us our harbor development; that made North Island the finest air station in the world bar none; that brought us the marine base and the naval training station.”

March 28, 1924, San Diego Union, Balboa Theater Section, 1:8 Balboa Theater combines beauty, comfort, charm.

March 28, 1924, San Diego Union, 16:6. 5th Brigade Marine Band to give concerts at Balboa Park on Monday afternoons at 3 o'clock.

March 29, 1924, San Diego Union, 14:2. Colonel Collier at Sciots luncheon pays special tribute to John D. Spreckels.

March 30, 1924, San Diego Union, 14:2. State College to present annual vaudeville offering at Yorick Theater in park this afternoon; delegation of 40 arrives on way to national conference in Los Angeles to make tour of city.

April 8, 1924, San Diego Union, 7:3-5. Animals in San Diego Zoological Gardens receive best of treatment.

April 12, 1924, San Diego Union, 5:3. Zoo management requests public not to capture baby seals found on shore; infants brought to Zoo have died.

April 13, 1924, San Diego Union, 7:4. John Nolen, noted landscape architect, will attend at "city beautiful" conference to be held at the City Hall tomorrow afternoon.

April 13, 1924, San Diego Union, 17:1. San Diego Sciots to stage public initiation at Organ Pavilion Friday evening, April 28.

April 13, 1924, San Diego Union, Real Estate and Development, 4:3-6. Hugo Klauber Gives Comprehensive Outline of Development, Management, Financing and Natural Difficulties That Must Be Overcome In Beautifying Grounds

San Diego's park system, its management, financing, future development, and the difficulties which such development must overcome, but particularly the future of the park as the center of San Diego city and San Diego interest has been interestingly and instructively discussed by Hugo Klauber, member and secretary of the San Diego park commission. At a recent gathering of an unorganized group of men interested in civic affairs, Mr. Klauber presented his comprehensive outline of the future of San Diego parks as follows:

San Diego's park system has become of such importance in the daily life of the community that no pains should be spared to assure its permanency and continual future expansion along carefully worked out lines.

To anyone who has given the matter even superficial study, certain problems at once present themselves, which show how San Diego's park problems differ from those of other western cities. Briefly, these may be included under the headings: Topography, poor soil, small annual rainfall, lack of native trees.

NATURAL OBSTACLES

These are the natural obstacles which are here met with that make San Diego's park problems uncommon, and which present difficulties to be overcome, which must be met with due recognition of the handicaps under which we are compelled to work.

On the other hand, these natural obstacles carry with them certain advantages which lend themselves to unusual development. The topography, though difficult to handle, gives us the beautiful combination of canyon and mesa. These offer unusual opportunities for landscaping, broad vistas, and outlooks over mountain and water. The deficiency of rainfall is more than outweighed by other characteristics of our climate which enable us to use with success a larger variety of semi-tropical flora, perhaps than is found in any other part of our country. Then again, our dry, level mesas adapt themselves to all-the-year recreation, which is an important consideration where so much of the daily life of the people is spent in the open.

The above discussion, covering natural obstacles which are encountered, naturally leads to a consideration of other difficulties to be overcome to insure permanent and proper development of our parks. These may be summarized under plans and policies, management, finance, water.

PROBLEMS ARE DIFFERENT

Here again we must immediately recognize the difference of our problems from those of most cities. In almost every respect the conditions in our parks, and particularly in Balboa park, are different from those usually met with. Not only must we at all times bear these differences in mind, but we must also

recognize that the charm of Balboa park is its departure from the usual and stereotyped.

Under the heading "plans and policies" it is evident at once that we are confronted with almost a total absence of any definite plans, either for the future development of Balboa park or of the larger subject of a park system plan. This is too intricate a subject to permit of discussion at this time, but its importance will surely be recognized. It may be said in passing that the plans originally made for the development of Balboa park were rendered impracticable by the building of the exposition. As to policies, it is quite evident that these must be carefully thought out and developed through changing commissions, and can be permanently established only by their general acceptance from year to year. The permanent employment of such a superintendent as we now have can in the end, however, be made perhaps the most important factor in perpetuating sound park policies.

The word "management" referred to as the second problem, was intended to relate to commissions as distinct from superintendence. Here we have a most vital factor in park development. It is needless to dwell on this any more than to say in passing that commissioners should be selected with the greatest care and entirely apart from political consideration. They should be men of broad vision, executive knowledge and experience, courage, devotion, and, of course, unquestioned integrity. A superficial knowledge of horticulture is an additional advantage, but not a necessary qualification. Leisure to devote to park matters is a necessity. It is, perhaps, unnecessary to state that the present writer is well aware how far he is from fulfilling these requirements.

The third item, "finance" is perhaps the most important of all problems mentioned. Insufficiently financed, the overcoming of other park problems would avail nothing, and failure would be inevitable. Properly financed, nearly all problems can be somehow met, excepting only "water." The problem of water supply in this case is a city problem and not a park problem, for the reason that no plan has ever presented itself which suggested any possibility of an independent water supply for Balboa park. Public sentiment, however, would undoubtedly prevail in saving Balboa park in case of a water famine.

SUGGESTS SOLUTIONS

Having now skimmed hurriedly over some park problems, it may be in order to give some suggestions as to their ultimate solution. This must be done with a full realization that the question of how much money should be spent on parks in San Diego can never be considered as definitely settled, and that a list of "things which should be done" will always be met with the question: "How shall we finance them?" This being granted, we must always endeavor to fix upon the most important projects to be carried out, leaving those of lesser import to be taken up later.

We have in San Diego 22 parks, 25 including East San Diego, ranging in area from one-tenth of an acre to 1400 acres, the total being 1921 acres. Of these only six are partially developed, and these are the only ones of any importance. This list does not include Spalding esplanade and Mission Cliff park, nor does it include the three county parks at Lakeside, El Monte and Fallbrook. The six parks referred to are La Jolla, New Town park, Horton plaza, Old Town plaza, Torrey Pine park, and Balboa park. Mention should be made also of Soledad park, with its superb view from the summit of Soledad mountain.

All these parks, both municipal, private and county, as well as the military and naval reservations (which may be broadly considered as coming within the park system) should be connected by a system of paved highways, carefully laid out with regard to present and prospective traffic. These should be broad boulevards wherever possible, should be planted with trees, and developed in such a manner as to fit in with and progress along with park development.

The La Jolla park, with the exception of the bath house, has already reached a full stage of development. Plans for a new bath house have already been drawn, and probably will be taken care of soon by a district bond issue to be voted on in La Jolla. New Town park is simply a breathing space and is fully developed at the present time. The Horton Plaza park needs little further development. The chain fence around it should be replaced with a substantial low wire fence. It should then be planted on the borders and

particularly in the corners with low, hardy shrubs, particularly those which flower over a long season and those which have orange and red berries.

The Old Town plaza is a pressing problem. This very important historical landmark should be immediately improved. Careful study should be given the landscaping of this park, so that the planting would harmonize with its surroundings and historical atmosphere.

Torrey Pines in the past two years has, through the generosity of Miss Ellen Scripps, shown marked improvement, with which all are more or less familiar. Plans are now on foot to greatly expand this park. This is to be done by including within its boundaries the present Government Experimental station. This most important proposition is soon to come before the common council for final action, and will no doubt receive favorable action.

The development in Torrey Pines, in case the above extension is carried out, will be along the lines of replanting and filling up bare spaces with San Diego county shrubs and trees, particularly those which thrive in that section, such as the Torrey pine. The plan is to make of it a native plant garden. The success of this idea is assured by the growth of native plants which have been placed on the grounds around Torrey Pines lodge.

PARK DESIGNER URGED

The last and by far the most important of our parks is Balboa park. One hesitates to try to visualize the possibilities of this remarkable tract of land, which, perhaps by the merest chance, was saved for us by the wisdom and foresight of our earliest settlers.

If we have made mistakes in the past, let us insure ourselves against any more in the future by employing, as soon as possible, the best park designer available. Such a man must live with Balboa park for a while before he undertakes the big work of planning for its future development. Having secured such a plan, having adopted it, and rendered it secure against important changes, we can then proceed with plans for financing it from year to year as funds are available.

Before proceeding with the vital question of finance, it may be well to review briefly some of the pressing needs of Balboa park. These may be grouped as follows: Roads, paths, and trails; buildings and grounds; recreation; planting.

There are three paving projects which must soon be undertaken: Cabrillo Canyon road; West boulevard and connecting links; and the streets that border on the park. These streets, being now partially park property and partially city property, the paving of which must be partly financed by assessments against abutting property. The remainder of the cost must be met by the city. Cabrillo Canyon road and West boulevard should be paved by bond issue. A number of contour drives, as distinct from through highways, should be built for those who wish to visit and enjoy at their leisure all parts of Balboa park.

TRAILS ADVOCATED

A number of trails should be laid out, particularly in an east and west direction to connect the area east of Cabrillo bridge with that on the west side. Equestrian paths are common in all large parks, and, in this respect, Balboa park should offer facilities for the enjoyment of those fond of horseback riding.

The problem of buildings in Balboa park has been to a certain extent solved, at least for the present. Seventeen of the more important buildings of Exposition days have been wholly or partially restored, and are in use by the many institutions now housed in Balboa park. Here again we have pioneered in park policies, first in having so many buildings in our park, and second in giving certain organizations certain control of those buildings (and in a few cases of grounds). Thousands of public-spirited men and women have, as a result of this policy, devotedly sacrificed time, energy and money in the interests of these organizations, with results which, it must be perfectly evident, would otherwise have been impossible. In the future these societies need encouragement and assistance in carrying forward their plans.

Eight exposition buildings have been removed. The expense of cleaning up and replanting the areas left vacant has been a severe tax on the finances of the board. In fact, many of these areas are still unimproved, and must be taken care of in the future. One of the buildings is to be replaced in the near future by a magnificent art gallery, the gift of one of our generous citizens. It is hoped that other public-spirited men of wealth will come forward with similar gifts, either to make present buildings suitable for use or preferably to replace temporary buildings with permanent fireproof structures, suitable for housing safely the valuable exhibits which are now subject at all times to a severe fire hazard. At this point it may be well to mention that no provision whatever has been made for the permanent preservation of the Pueblo Indian village. A suitable sum of money must be somehow provided in the near future to save that remarkable replica.

Under the heading of recreation in its broader sense, we should have in Balboa park, where there is ample room for every variety of outdoor recreation, including playgrounds, picnic grounds, music, sports of all kinds for young and old, etc. Space forbids covering this matter in detail. Suffice it to say that each of these requires individual consideration as to plans, finance, development and operation. The present golf course is altogether inadequate for our needs. A new course and club house must be built in the near future.

MONEY HALTS PLANTING

It may puzzle you to know why the subject of planting has scarcely been mentioned so far in this paper. That is because the planting problem is purely a question of money. It must be perfectly evident to anyone who has even a superficial knowledge of conditions in Balboa park that the planting of any new tracts of any size is at present impossible, and, perhaps, even inadvisable. Strips of planting, yes; but large areas, no. The cost of piping, blasting, hauling dirt and fertilizer and plants, which with labor constitute original outlay, are altogether out of proportion to results obtained, and the cost of upkeep has to be added. Even if indigenous shrubs are used, and they surely must be over some areas, the initial cost is practically the same. Large areas of Balboa park should, and necessarily must, for a long time to come, be left in their native state. It may be necessary even to help the natural growth by placing water on these tracts.

Notable exceptions to the above are the southwest corner of the park, and the northeast corner. The southwest corner must be highly improved without delay. This area extends from Date street along Sixth to Juniper street. This statement does not, we think, permit of any argument. It is a very expensive piece of work, but it must be done, and will be done as rapidly as park funds permit. The Winslow plan has been adopted for the area from Date to Fir. From Fir to Juniper, there should be a sunken garden, which would provide a beautiful feature at a minimum of expense.

The other exception referred to is the northeast corner of the Balboa park. The growth of the city toward the northeast has been far beyond expectations. The people in that vicinity are entitled to some development along their park frontier. No plan has been made for this development, but it needs immediate consideration. The cost will be great as this corner of the park has almost no soil on the surface. Blasting will be required before any planting can be done. The policy of the present board is to do no work unless it can be properly done. Much of the old planting will have to be renewed, as the trees can make no headway on account of faulty planting at the start. Many trees have died, and many have been removed, and literally hundreds have blown down because of insufficient root formation, caused by faulty planting during the rush of preparing for our exposition. This is very costly economy and should never be repeated.

The last subject to be considered is "finance." Park funds are procured from the following sources: Tax levy bonds, concessions, profit-yielding operations, gifts.

MORE MONEY NEEDED

It is not advisable at this time to enter into a discussion as to how much San Diego can afford to spend on parks. The main point to be considered is the adoption of a policy which insures the proper maintenance of the already completed projects and to provide at least something for additional future development. The present minimum which the common council can allow is 10 cents on each \$100 of assessed valuation. Under this law the council, if unsympathetic with park development, could cut the

budget to \$100,000 a year for parks, whereas it did allow for 1926 (?), \$135,000, of which the zoo received \$20,000. From concessions and profitable activities about \$10,000 more was realized, leaving the park maintenance, apart from the zoo, about \$125,000. If the council has allowed the minimum, there would have remained for park maintenance, apart from the zoo, only \$20,000 (?), as against \$25,000 actually allowed, or a difference of \$35,000. The present council is sympathetic to park work, but a future council might not be, and the charter should be amended so that Balboa park can never be subject to adverse action, as explained above. The allowance for the present year, \$186,000 (?), is the very minimum that could have met our present requirements for maintenance, without any extensions, additions or improvements. The minimum of 10 cents should, therefore, be raised to at least 14 cents or 15 cents. At this point it should be stated that Balboa park is seriously handicapped by lack of police, no provision being made for this under our charter. In San Francisco about 15 police are provided for in the parks. This force is paid out of city funds, not park funds.

Permanent park improvements in most cities are provided for by the issuance of bonds. It is sound economically to make the future user pay, in part at least, for all permanent improvements. In Balboa park the cost of maintenance is so high that it seems clear that costly projects of a permanent nature should be taken care of by the sale of bonds. Among such projects may be mentioned buildings, athletic fields, roads, bridges, waterways, lakes, and the laying out of new parks hitherto undeveloped. The attitude of our people toward park improvement insures favorable action on such projects if presented to them in the proper manner.

PARK CONCESSIONS

Park concessions are everywhere used by park commissions to add to park revenue. In fact, it is becoming common practice for park boards to operate concessions themselves, and to use the profit for park development. In Balboa park we have some profitable concessions and also profit-yielding activities. It is hoped these revenues can be increased in the future.

Gifts to Balboa park have been increasing from year to year. Ever since its beginning Balboa park has received gifts of money from public-spirited citizens. Many thousands of people gave small sums to the restoration fund, thus testifying to the desire of every citizen to do his bit. Other thousands have contributed by taking membership in the scientific institutions in Balboa park. Valuable material of scientific and educational value has been donated by other citizens. Large funds have been raised for the building of our zoo, and for the maintenance of our natural history museum. The Spreckels organ is the most outstanding memorial of the generosity of one of our leading citizens, who has liberally endowed this gift so that we may have daily recitals free to all without cost to the city. The latest donation, soon to be erected, the splendid Bridges art gallery, is a further example of public spirit in a large way, which we hope will be emulated by others. The Whitney library is now housed in the California Building and open to the public. The number and the value of gifts which in future will come to Balboa park will be measured by the attitude of the people toward their park. Wealthy citizens, if encouraged to do so, will come forward and finance deserving projects, if given assurance that their gifts will be properly handled for the permanent education and recreation of the people.

Definite plans and estimates should be worked out by citizens who are interested and presented to those who are in a position to give. In this way, not only does the public benefit, but men of means are often given an opportunity for public service of which they are glad to take advantage. Thus, as time goes on, will Balboa park become a worthy example of the results of public spirit intelligently directed and generosity encouraged and appreciated.

April 15, 1924, San Diego Union, 8:1. Council authorized employment of John Nolen to draw up extensive plan of city beautification last night, will cost about \$10,000.

April 18, 1924, San Diego Union, 8:4-5. Zoological Garden and Aquarium Executives marvel at results achieved in Park by public-spirited citizens.

April 19, 1924, San Diego Union, and April 20, 1924, Classified, 3:1-3. Community singing, chorus, organ

recital will mark Easter celebration at Organ Pavilion tomorrow afternoon.

April 20, 1924, San Diego Union, 9:2-3. Zoo's regal python in new finery will appear for public feeding today.

April 20, 1924, San Diego Union, 9:4-6. Boy Scouts build house for birds in Balboa Park (illus.).

April 21, 1924, San Diego Union, 3:2-3. Song service at Organ Pavilion drew thousands yesterday afternoon.

April 23, 1924, San Diego Union, 24:3. San Diego's site amazes John Nolen; spoke to Kiwanis Club yesterday afternoon.

April 25, 1924, San Diego Union, 7:5. Bertram Goodhue, San Diego exposition architect, dies; victim of heart attack.

April 26, 1924, San Diego Union, 5:3-4. Many San Diegans enjoyed Scioto's public ceremonial at Organ Pavilion last night.

April 27, 1924, San Diego Union, 14:4. Widow of Father Horton tells how pioneer worked to establish Balboa Park 56 years ago, by Lenore K. Downey.

She's genteel and unobtrusive, but she has raised a family, taught school, swelled the household exchequer, promoted a club, helped organize a church, assisted several thousand persons in right reading, and did a man-sized job in working for the success of the Panama-Pacific [sic] exposition in 1915.

Mrs. Lydia M. Horton, widow of Alonzo E. Horton, "father of San Diego," lives today in a bungalow home at 3571 Fifth Street. There are flowers around the house, flowers and books upon books inside, reflecting the owner's taste.

The book-and-flower lady lives in the house with her son, William Knapp, named after his father, her first husband. She reads much of the time, chats with numerous friends who call, or busies herself with little household tasks (an illness two years ago slowed up a bit her life-long activity).

Just 57 years ago this month, Mrs. Horton recalled yesterday, her husband, A. E. Horton, came to San Diego from San Francisco. It was a rather queer impulse that sent him here; the inspiration had its source in a lecture.

"Some day," he heard the lecturer say, "San Diego is going to be as great a city as San Francisco. With its bay and its climate, it has marvelous possibilities. Its bay isn't as big as San Francisco's, but it is deep and it is land-locked."

Horton went home that night with his mind made up; he was going to San Diego. He hadn't ever heard of the place before, but he had an advertisement in the next morning's paper announcing the sale of his furniture store and all his other property. Two weeks later, with all his bridges burned behind him, he landed here from the steamer *Pacific*, the only passenger for this port.

Mrs. Horton quoted Mr. Horton as saying:

"While waiting for a wagon to take me to Old Town, I walked up to where the courthouse now stands. There was nothing but sagebrush and cactus covering the ground, but before me lay the bay, tranquil and picturesque, while beyond stretched the peninsula, and still further on the Coronado Islands, and to the south the mountains of Lower California.

"The beauty of the situation impressed me, and I was struck with the commercial aspects also, the gentle sloping land from the mesa to the bay insuring good drainage and the deep water so necessary for

shipping lying in the foreground.”

Mrs. Horton continued:

“The next year --- 1868 --- Mr. Horton asked the Board of Trustees, which was composed of E. W. Morse, Joseph Manassee and Thomas H. Bush to set aside a large tract of land for a public park. Mr. Morse presented Mr. Horton’s petition to the Board, February 15, 1868, and Mr. Morse and Mr. Bush appointed a committee to select the land. There was much hilarity over this, as the new city of San Diego consisted of a few small buildings near the foot of Fifth Street. Mr. Bush refused to serve on what he called such a ridiculous proposition, and Mr. Horton was asked to serve with Mr. Morse. These two men selected the present site of Balboa Park.

“May 26, 1868, the trustees, acting upon the report of their committee, adopted an ordinance setting aside for a public park forever the lands embraced in the present city park. The trustees at this date were Marcus Schiller, Jose Estudillo and Judge Sloan.

“February 17, 1870, the state legislature passed the bill confirming the act of the trustees. At this time W. M. Robinson was our member of assembly, and W. A. Conn of San Bernardino was the senator from this district.

“These facts were compiled by Mr. Morse from the public records and constitute the first authentic report to be published of the beginning of the park, in recent years.

“In 1867 city planning as a profession was unknown, so the many mistakes of the founders are excusable. Fortunately, we have not progressed so far but many of those mistakes can be remedied by our present city planning board. We wish them all success.”

Mrs. Horton was born in West Newbury, Mass. Her father was an Argonaut, one of the intrepid men who came to California in ’49 by way of Cape Horn. Her first husband, a veteran of the Civil War, died in 1885; her marriage to Mr. Horton took place in 1896.

Mrs. Horton, with a few other persons, organized in 1870 the first Unitarian Church of San Diego. She helped found and was first president of the Wednesday Club. She was vice president for San Diego county of the Woman’s committee for the Panama-Pacific exposition. She served for several years on the library board, and for several years was librarian at the state teacher’s college. She has two sons.

May 1, 1924, San Diego Union, 6:3. A dance is being planned for all the sailors stationed afloat or ashore at San Diego; to be held at the Civic Auditorium Saturday night.

May 1, 1924, San Diego Union, 10:5-6 and May 4, 1924, 1:4. World War Officers' ball will be brilliant affair in American Legion building Saturday night.

May 3, 1924, San Diego Union, 1:8. Human flag features May Day Festival at Stadium; 1560 form huge stars and stripes; 15,000 witness sports events to raise fund for exhibit at Olympic games.

May 4, 1924, San Diego Union, 1:8, 2:6. Contract let for \$450,000 bath house at Mission Beach; drawing.

May 4, 1924, San Diego Union, 1:7-8. San Diego Zoo will send 22 sea lions to Hamburg; gets pair of zebras in exchange.

May 4, 1924, San Diego Union, 13:1-4. More than 2,000 enjoyed entertainment of Federated State Societies at Civic Auditorium last week.

May 4, 1924, San Diego Union, 14:1. Octopus is added to Zoo collection.

May 4, 1924, San Diego Union, Society-Club, 1:6-7. Seventeenth annual rose and flower show opens for two days at Civic Auditorium.

May 11, 1924, San Diego Union, 20:2-3. Los Angeles library directors mourn death of Bertram G. Goodhue.

May 11, 1924, San Diego Union, Classified, 1:1-2, 3:3-6. Work started on beautiful art museum in Balboa Park; artist's drawings of floor plans and front elevation; the statues and bas-reliefs for the facade are being modeled by the Piccirilli Brothers in New York City.

May 12, 1924, San Diego Union, 1:3. \$500,000 units will be added to Naval Hospital; bids to be opened June 4 for new structures.

May 14, 1924, San Diego Union, 9:1. Dr. Stewart guest of honor at Kiwanis Club; explains commercial value of music to City at noonday meeting yesterday.

May 22, 1924, San Diego Union, 11:1. Memorial Day observances this year limited to exercises at Organ Pavilion and cemetery service; customary street parade will not take place.

May 25, 1924, San Diego Union, Classified, 1:2. Three engine companies battled stubborn blaze yesterday in Balboa Park eucalyptus grove near organ; flames made rapid headway in dry litter; trees escaped serious damage.

May 26, 1924, San Diego Union, 3:2. G. Hamilton Hammon writes letter asking for place to eat at scenic point near 6th and Date streets.

May 29, 1924, San Diego Union, 9:2. Schumann-Heink to sing for boys at dedication; "mother" of American Legion post to fulfill deferred promise June 6; hall will seat 3,000 persons.

May 30, 1924, San Diego Union, 18:5. Two African Chapman zebras arrive at Zoo.

May 31, 1924, San Diego Union, 1:3, 2:4-5. Men of '61 remember their dead; veteran spirit flames anew as they march through lane of flags to organ.

June 6, 1924, San Diego Union, 22:1. Elks to observe annual Flag Day at organ, June 14.

June 6, 1924, San Diego Union, 22:2. Dr. Stewart to give recitals at Organ Pavilion Monday, Wednesday

and Friday evenings through summer months.

June 8, 1924, San Diego Union, Classified, 1:8 and June 9, 1924, 5:3-5. Two hundred to take part in High School student al fresco concert at Balboa Park today.

June 10, 1924, San Diego Union, 8:2. Combined orchestras of Senior and Junior High Schools to give concert at Organ Pavilion next Sunday afternoon.

June 10, 1924, San Diego Union, 8:3. O'Rourke buildings at Zoo to be dedicated July 4.

June 11, 1924, San Diego Union, 5:2. Elks to teach love for flag at park service.

June 11, 1924, San Diego Union, 5:3-4. Full Schumann-Heink program to be given at War Memorial dedication tomorrow announced; general admission \$1.00; reserved seats \$2.00.

June 12, 1924, San Diego Union, 5:2. Annual G. A. R. campfire draws thousands to War Memorial Building in Balboa Park.

June 13, 1924, San Diego Union, 5:2-3. San Diego Elks to observe Flag Day at Organ Pavilion tomorrow afternoon.

June 13, 1924, San Diego Union, 9:1-2. Schumann-Heink thrills throng at American Legion concert; program presented by diva at dedication exercises of War Memorial Hall in Balboa Park; 2,500 persons take part.

June 15, 1924, San Diego Union, 12:5-6. Museum of Natural History valuable aid to biology students in San Diego schools.

June 15, 1924, San Diego Union, Classified, 1:8. Thousands attend patriotic Flag Day exercises at Organ Pavilion given under auspices of local Elks.

June 15, 1924, San Diego Union, Classified, 2:3. Zoo having strenuous time in its efforts to provide suitable quarters for new arrivals (illus.).

June 16, 1924, San Diego Union, 3:4. Thousands heard concert by San Diego High School students at Organ Pavilion yesterday afternoon.

June 16, 1924, San Diego Union, 5:4-5. San Diego Zoological Garden boasts best collection of rattlesnakes in United States.

June 16, 1924, San Diego Union, Classified, 1:1. Bureau of Yards and Docks, Navy Department, to spend \$30,000 painting Balboa Park Hospital buildings.

June 17, 1924, San Diego Union, 9:5. Officers, men of the destroyer squadron visiting here will give dance at Civic Auditorium, June 21.

June 18, 1924, San Diego Union, 8:3. Pomona College confers degree on George W. Marston.

June 20, 1924, San Diego Union, 20:1. Music Festival to open Sunday at Organ Pavilion; will continue for two weeks under direction of Wallace Moody.

June 21, 1924, San Diego Union, 5:2-5. Two hundred and sixty three High School graduates given diplomas at Organ Pavilion yesterday (illus.).

June 22, 1924, San Diego Union, Classified, 1:6-7. Concert by Sciots Band opens Music Festival at Organ Pavilion today.

June 22, 1924, San Diego Union, 5:3-4. Swedish Festival was celebrated at Balboa Park yesterday under auspices of John Ericsson League.

June 22, 1924, San Diego Union, Real Estate and Development, 4:5-8. Advertisement announcing temporary real estate officers for D. C. Collier at 1050 9th Street.

June 23, 1924, San Diego Union, 5:3-4. Music Festival has auspicious opening before large audience at Organ Pavilion in Balboa Park.

June 24, 1924, San Diego Union, 4:4. Music Festival fills seats at Organ Pavilion; numbers by Marine Band and Orpheus Quartet.

June 24, 1924, San Diego Union, 4:5. Arizona Street Players will present "Robin Hood" in Montezuma Gardens next Saturday.

June 24, 1924, San Diego Union, 5:4. Naval Band and Chorus at Civic Auditorium tonight to get funds to build a bandstand at Training Station; reels of Naval pictures will be shown; general admission 50 cents.

June 24, 1924, San Diego Union, 12:3-4. School Board appropriates \$150 a month for use of Museum of Natural History.

June 24, 1924, San Diego Union, 15:1. City Council hires John Nolen to make plan for city; salary \$10,000; Kenneth Gardner is Nolen's local representative.

June 25, 1924, San Diego Union, 4:4-5. Dr. Stewart, Choral Club to present joint program tonight.

June 25, 1924, San Diego Union, 5:3. A feature of the Southern California Dental Association was the entertainment put on by the Los Angeles County and Health Department at the Organ Pavilion yesterday morning. A number of juvenile motion picture stars sang and danced.

June 26, 1924, San Diego Union, 2:5-6. Women's Chorus presents fine program at Music Festival; Guild of Organists to present Royal A. Brown in recital this afternoon.

June 26, 1924, San Diego Union, 11:3-4. Dr. Stewart's compositions will feature organ recital on Music Festival program today.

June 26, 1924, San Diego Union, 11:5-6. A toy band made up of 20 children from the vicinity of Albatross Street will be a feature of the program to be presented at the Montezuma Garden on Saturday at 4 p.m.

June 27, 1924, San Diego Union, 5:5. Snooky, chimpanzee guest at Zoo, installed in special quarters; star of more than 50 motion pictures.

June 27, 1924, San Diego Union, 7:1. Royal A. Brown played works of Dr. H. J. Stewart at Spreckels Organ yesterday afternoon.

June 29, 1924, San Diego Union, Society-Club, 11:3-4. Park Board has promised Dr. Stewart building for Civic Music Center in Balboa Park.

July 1, 1924, San Diego Union, 12:1. Marine Band and Choral Club presented fine bill at Spreckels Organ last evening.

July 1, 1924, San Diego Union, Transportation Edition, 10:1-2. Balboa Park terminal declared to be best in country; remodeling done at a cost of \$5,000.

July 2, 1924, San Diego Union, 1:8. Navy Department to expend \$739,500 on Naval Hospital; four officers' quarters, isolation unit, mortuary included.

July 2, 1924, San Diego Union, 24:1-2. "Song of the Camp," Dr. Stewart's setting to Baylard Taylor's poem, presented at Music Festival last night; sailors and marines assist Cadman Club; other local singers on program.

July 3, 1924, San Diego Union, 17:2. Twelve-day Music Festival closes; draws thousands.

July 4, 1924, San Diego Union, 5:2. Zoo prepares to handle big crowds today; special exhibits arranged for Forth; dedication of O'Rourke group delayed.

July 6, 1924, San Diego Union, 12:1-2. Illinois State Society will hold annual picnic in Pepper Grove Saturday afternoon.

July 6, 1924, San Diego Union, Classified, 2:5-6. Attendance at 12-day Music Festival held at Organ Pavilion estimated at 38,000.

July 9, 1924, San Diego Union, Classified, 1:2. Sixteen Arizona girls, guests of city, gain permission from Governor Hunt of Arizona to ship pair of antelope to San Diego zoo.

July 10, 1924, San Diego Union, 11:3. Officials of the Ocean Beach Business Men's Club yesterday stole for Ocean Beach a slogan Colonel Collier has created for his new Wonderland Beach, formerly Wonderland Park, "14 minutes on 14 cars to San Diego's closest beach." Collier chuckled and remarked good-naturedly about "some people's nerve."

July 13, 1924, San Diego Union, 7:4-5. New exhibit of San Diego County bird life prepared by staff of Natural History Museum.

July 17, 1924, San Diego Union, 8:5-6. San Diego music lovers will enjoy John Doane organ concert in Park tonight.

July 17, 1924, San Diego Union, 20:1. Park Board expresses appreciation to Mr. and Mrs. George W. Marston for recent gift of an addition to Balboa Park extending from north line of park between 9th and 10th streets, in Cabrillo Bridge canyon, northward 500 feet, thence northeasterly 1200 feet to a line halfway between Vermont and Richmond streets; its width varied from 200 to 600 feet; letter from A. S. Hill, executive secretary.

July 18, 1924, San Diego Union, 7:1. Doane concert delights large crowd at organ; Civic Music Center benefits by generosity of noted New York musician.

July 19, 1924, San Diego Union, Classified, 1:2-3. Scioto Follies free to public at Civic Auditorium tonight.

July 20, 1924, San Diego Union, 9:1-4. Colonel Collier introduces new and novel features in home product material for new quarters at 1050 9th Street; drive-in inducement for customers (illus.).

July 20, 1924, San Diego Union, 9:3-5. San Diego Scientific Library, California Building, offers rare field to students; by Carroll De Wilton Scott, Museum staff.

July 20, 1924, San Diego Union, 10:3-5. New bear grotto in Zoo, donated by Miss Ellen Scripps, completed (illus.).

(Five bears of different species are occupying the new grotto just completed at the San Diego zoo. This grotto, said to be the finest in the country, is 75 by 100 feet, contains a large mountain oak, and a swimming pool, and is really a home de luxe for the representatives of the bear family. The five inmates show their appreciation by dwelling together in complete harmony.)

A little more than two years ago the common council of the city of San Diego yielded to the importunities of the Zoological society and appropriated a sum for the starting of a bear grotto in Balboa Park, thereby providing the nucleus about which the city's present wonderful zoological garden has been built. The bear grotto, as first constructed, was a mere shell, but it served as a foundation upon which to lay the plans for what is today one of the foremost zoos in America.

During the past two months, reconstruction and completion of this grotto have been underway, and the zoo bears now have what is said to be the finest bear den every constructed. In it, despite the forebodings of eastern zoologists with whom the matter was discussed, are five species of bears, the kodiak, largest and most dangerous of all the bear tribe, black bear, cinnamon, Himalayan, and Malay sun bear, the last mentioned being a vest-pocket edition with bowed legs, pigeon toes, and a nasty disposition.

Expecting civil war, as eastern zoo men had predicted would be the case if bears of different species were placed together, Director T. N. Faulconer had men stationed at strategic points with fire hose, long poles, and other means for nipping in the bud any incipient battle. The bears, however, were so pleased with their new quarters that they found no time for fighting. The little sun bear from the Malay islands received a licking at the hands of the kodiak bear, the cinnamon established his right to occupy a corner that suited his fancy, and the Himalayan bear retired to sleeping quarters, after which harmony prevailed.

The new grotto is approximately 75 by 100 feet in extent. It is built of concrete and stone, tile blocks, and is of the "barless" type, which means that the animals are restrained by a concealed moat, there being no iron bars or other obstruction to the view.

One of the most remarkable features of the new grotto is the monster oak tree, nearly three feet in diameter and weighing three and a half tons, brought from Warner Springs by the Bent Concrete Pipe company, builders of the grotto.

Funds for remodeling and completing the bear grotto were provided by Miss Ellen B. Scripps, whose fondness for children and whose faith in the educational value of a zoological garden have been responsible for many handsome donations toward this work.

July 20, 1920, San Diego Union, Classified, 2:3-4. New York State Society will hold its annual picnic in Pepper Grove next Saturday (illus.).

July 22, 1924, San Diego Union, 2:3. Colonel Collier speaks on Brazil at Hammer Club lunch.

July 28, 1924, San Diego Union, 5:3. To break ground for tiger grotto at Zoo; work to start tomorrow; John Burnham to bear cost of work.

July 30, 1924, San Diego Union, Classified, 1:8. George W. Marston named president of Golden Scroll Society yesterday; purpose of society is restoration of California missions; John Steven McGroarty, author of "The Mission Play," outlined plans of organization at meeting yesterday.

July 31, 1924, San Diego Union, San Diego Union, 5:3. Bond issue for park roads; \$165,551 asked by Park Commission for paving streets in and around Balboa Park; includes that half of 6th Street from Date to Upas; paving Date Street from 6th to 9th Streets; paving West Boulevard from Upas to Date Streets; paving Upas Street, Alabama Street to Pershing Drive; paving 28th Street, Upas to Nutmeg Streets; Russ Street, 11th to 18th

Streets; Arizona Street extension; Cedar Street extension; Cabrillo Canyon Road; widening Pershing Drive to 30 feet.

August 3, 1924, San Diego Union, Classified, 2:6. Asiatic leopards at Zoo have housewarming in cage provided for them by John Burnham (illus.).

August 3, 1924, San Diego Union, 5:5. Ex-New Yorkers had picnic in Pepper Grove last week.

August 3, 1924, San Diego Union, 18:1-3. Drive for new Children's Home to replace condemned structure in Balboa park will be made this month; need \$60,000; Oscar G. Knecht, City Building Inspector, issued edict that old building at 16th and Ash Streets must be torn down immediately; old house built in 1890; new home is designed to conform to the general scheme of the other structures in the park; estimated cost is \$100,000; Building Committee has raised \$44,000; Hazel W. Waterman has prepared plans; will accommodate 104 children and include dormitories for 44 girls.

August 5, 1924, San Diego Union, 2:3-4. San Diego voters to pass on land gift to Naval Hospital at March primary.

August 5, 1924, San Diego Union, 2:7. A proposal by John Forward, Jr., Park Commissioner, that the City Council submit to the electors a \$166,000 bond issue for paving thoroughfares in Balboa Park met with considerable opposition at a Council meeting, largely on the part of Councilman Harry K. Weitzel and Don M. Stewart.

The opposition developed after Forward had explained that he had been led to believe that the property owners on Sixth Street would contest the matter in court in case the City failed to pave the entire width of that thoroughfare.

Asserting that Sixth Street has been opened for the benefit of the property owners, Stewart said he could see no reason why they should not be made to pay for paving the entire street.

August 9, 1924, San Diego Union, 1:8, 2:2-3. Zoological Society and Park Board come to open break; split over charge to feed python, as result of Board's ruling that children will have to pay admission to see big snake fed at Stadium; director T. N. Faulconer asked for use of Stadium Sunday from 2 until 3; Park Commission says 1/5th of proceeds must be used as Stadium rental; minimum fee of \$20 would be charged whether that much should be taken in at gate or not.

Officers of the Zoological society, which maintains the big zoo in Balboa park, came to an open break yesterday with the park board, or at least the two members of the board who are now in control of park affairs. These two are President Hugu Klauber and Secretary W. Templeton Johnson. The other member is John Forward, Jr., who recently retired as secretary, but remained on the board.

The break came as the result of an attraction which the zoo management plans to give to the public in the stadium, which is under control of the park board, tomorrow afternoon. The big show is to be the feeding of the zoo's great python, which, being in captivity, has to be forcibly fed once in a while to keep him from starving.

As the result of the park board's ruling, the zoo for the first time will have to charge an admission fee for children, who always have been admitted free to the zoo, and will have to pay rent for the use of the stadium, just as any outside organization would have to do, although the zoo is in the park and has spent large sums of money for the development of the park.

Dr. Harry M. Wegeforth, president of the Zoological society, said the park board's action was the culmination of a long series of acts on the part of the park board to hinder and obstruct the zoo. Director T. N. Faulconer, of the Zoological society, declared that he had been "amazed and stunned" by the board's attitude. He quoted Commissioner W. Templeton Johnson of the park board as saying that the commission "doesn't care a damn whether it is policy or not," in reply to a suggestion that the board donate to the zoo the money collected from the zoo show in the stadium.

Altogether it was a warm day in the park. The zoo people, however, are going right ahead with their plans for entertaining the public when the big python is fed tomorrow. A crowd is expected.

In a letter to the board of park commissioners, the Zoological society yesterday asked for use of the stadium Sunday from 2 o'clock until 3, that the great number of people expected to see the feeding of the zoo's big python might not be crowded as has been the case when the python was fed at the zoo, where there are no seats or other accommodations for a crowd.

The letter stated that an admission of 10 cents would be charged to defray the expense of the feeding and the Zoological society has announced that the tickets would admit the bearer to the Zoological garden after the feeding, so that the cost would be no greater to the individual than if he had seen the snake fed at the zoo.

The letter also stated that every penny realized from the sale of tickets would be expended on improvements to the Zoological garden, a part of Balboa park.

The reply of the park commission was that one-fifth of the proceeds would be demanded by the park department as a stadium rental and that the same terms would be made as if the Zoological society were some out-of-town baseball team or other foreign organization; that is, that a minimum fee of \$20 would be charged, whether that much should be taken in at the gate or not. It meant further that a charge of two cents would be made for every person entering the gates who did not pay, whether it be a child member of the Zoological society, as the stadium rules state that organizations using the stadium will be allowed only a limited number of passes, approximately a dozen, and that they must pay a commission on all others admitted free at their behest.

Director T. N. Faulconer of the Zoological society, who presented the request to the park commission, said that he protested vigorously against the charge on the ground that the park commission has no right to take money earned by the zoo to expend on other park features. He requested that the park commission agree to place the rental demanded in that part of the park budget set aside by the common council for zoological development and maintenance. Even this request was refused.

"The park commission doesn't care a damn whether it is policy or not," said Commissioner W. Templeton Johnson, according to Faulconer, when Faulconer suggested to the commission that insisting upon the rental might not be public policy. Not to disappoint the public, which has exhibited great interest in the public feeding of the big snake, Faulconer advised the park commission that he was forced to accept its terms, but that he did so under protest. And he requested that his protest be made a matter of record.

Commissioner John Forward said that he would be willing for whatever fee is charged to be placed in that part of the park budget devoted to the zoo, but when this suggestion was made at the park board meeting it was not approved.

"I was amazed," said Faulconer yesterday, "and almost stunned when the park commission took the attitude that we would have to pay them for the privilege of using the stadium for the convenience of the public, despite the fact that we have raised and spent on the improvement of a part of Balboa park nearly a quarter of a million dollars.

"We could attract just as large a crowd in the zoo grounds for this event, probably a large crowd, but we didn't want the public to be packed and jammed and disappointed. Therefore, we asked for the use of the stadium where the people might sit in comfort to view this unusual spectacle.

"If the park commissioners 'don't care a damn about policy,' we do. We have a feeling that the park belongs to the people, not to the few wealthy people who can drive about in their motors here and there, and sit comfortably in their cars, parked in special privilege parking spaces, getting close—up views of everything that goes on while the rest of the world looks under their cars or peeps over their shoulders. The zoo and all it ever hopes to be is for the public, poor as well as rich, and for the children.

“Never since the zoo was started has any boy or girl under 15 years old paid one cent of admission to any event give by the Zoological society. The zoo is free to them and always will be. Everything that we have belongs to the children, but Sunday when the big snake is fed, every little tyke of a boy or girl that comes to the stadium must pay a dime. We are ashamed of that, and we hope to make it up to them someday, the Lord knows how, because the zoo hasn’t any money, not even enough to provide for the tax on free admissions that the park commission’s ruling demands.

“We’d like to call it all off. We would abandon the whole thing if we had time to stop our publicity, but we can’t disappoint the people this late in the game.”

Dr. Harry M. Wegeforth, president of the Zoological society, declared that the present demand of the park commission for a fifth of the gate receipts at the stadium Sunday, when the big snake will be publicly fed for the last time, is but the culmination of a long series of acts on the part of the park commission to hinder and obstruct the zoo.

“We know that the zoo is one of the greatest attractions in the park,” he said, “and we feel that it is entitled to the support of the park commission. Lacking its support, we feel that we have a right to demand a square deal, and it is not square to force upon us the alternative of abandoning our Sunday at the stadium or of charging children admission. No child has ever paid to see the zoo or anything connected with the zoo, and now, after having invited them all to come, we have to charge them admission so that we can pay the park commissioners their pound of flesh.”

August 10, 1924, San Diego Union, Society-Club, 3:1-3. San Diego’s Art Guild exhibit at Balboa Park Museum marks forward step in achievement; to continue to end of August.

August 10, 1924, San Diego Union, 12:1. San Diego residents gave \$30,000 in week for new home of children in Balboa park.

August 10, 1924, San Diego Union, Classified, 1:4, 2:4. Big python to be fed in Stadium today; Zoo tickets promised to all who attend; indignation expressed at Park Board’s action in charging for “Bowl.”

August 11, 1924, San Diego Union, 1:4-5, 3:6-7. Great python takes quarterly meal before 5,000 spectators; Park Board relents at last and admits children under 12 free; **San Diego Union** distributes 150 tickets donated by sympathizers with youngsters otherwise out of luck; Commission collects \$66 on exhibition.

August 12, 1924, San Diego Union, 8:1. Costume ball at Organ Pavilion Saturday night will climax the celebration of “Fiesta de San Diego.”

August 13, 1924, San Diego Union, 7:1. City Council settles tangle tying up \$7,000 voted Zoo; sum given for storage barn transferred so Zoo can build animal cages.

August 16, 1924, San Diego Union, 1:6-7, 2:1. “Snooky,” a chimpanzee actress, was wandering about her cage last night with a dangerous piece of pipe in her hands; four boys gave her the gas pipe yesterday; boys taken to police station.

August 16, 1924, San Diego Union, 10:2-3/ Crime wave sweeps over Zoo; trumpet birds and magpies imprisoned on murder charge.

August 16, 1924, San Diego Union, 15:1-2. Ten thousand see fireworks, big water circus today; costume ball at Organ Pavilion tonight; admission free to those in costume.

August 16, 1924, San Diego Union, 20:3. Summer flowering season makes Balboa Park scene of surpassing beauty; dahlia plot back of organ; Montezuma gardens carpeted with pansies; approach to Botanical Building beautiful; lotus pond on Cabrillo Canyon road a mass of leaf and bloom.

August 17, 1924, San Diego Union, Classified, 1:8. Keepers at Zoo disarm “Snooky” by trick device.

August 18, 1924, San Diego Union, 1:7, 2:2. San Diego units to hold test day in Balboa Park; committee meets tomorrow with Army officers to arrange details for September 12; citizens committee is expected to work out a demonstration that will be efficient and, at the same time, a rebuke to disloyal and pacifist elements which have been obstructing the program.

August 20, 1924, San Diego Union, 12:1. Plan to use Stadium for defense day exhibit.

August 24, 1924, San Diego Union, 16:1. Many exhibitors will compete in County Fair here September 24 to 27; exhibit spaces in industrial building have been on sale for a week.

August 25, 1924, San Diego Union, 13:5. Scouts repair Indian Village' big rock bluff on west side patched up; fireplace in assembly hall repaired.

August 29, 1924, San Diego Union, 3:2. Mayor Bacon has re-appointed John F. Forward, Jr. to Board of Park Commissioners.

August 31, 1924, San Diego Union, Classified, 1:5-6. United States tug *Koka* to land four elephant seals for Zoo today; captured off Lower California coast; two to be sent to Mexico City within few weeks.

September 1, 1924, San Diego Union, 1:4-6. Two elephant seals from Guadalupe Island take up new quarters at Zoo; two others dies on way; transported on Naval tug *Koka* and Eagle Boat No. 12.

September 6, 1924, San Diego Union, Classified, 1:5-6 and September 7, 1924, Classified, 4:1. Zoo's big python will be fed tomorrow at Zoological garden; baby black bear to welcome children on grounds.

September 7, 1924, San Diego Union, Society-Club, 9:2. Yorick Theater now undergoing extensive improvements; has its interior ready for presentation of "The Boomerang," September 12-13.

September 9, 1924, San Diego Union, 7:3. City Council orders improvements along west half of Sixth Street by park; paving will leave east half of street along Balboa Park unpaved as the City has no funds with which to care for that part of the work; owners or residences along Sixth Street wanted the Council to hold up the work until bonds could be voted to take care of the city's share of it; street also is known as "Park Avenue."

September 10, 1924, San Diego Union, 8:2-3. William Aaron Henry, former dean of University of Wisconsin's School of Agriculture, spends his summers here because of Balboa Park; says it is "beauty spot of world."

September 13, 1924, San Diego Union, 1:2. Nineteen thousand registered during Defense Day test; 10,000 men and women went to Stadium yesterday; 19,000 registered their willingness to serve their flag in the event of a national emergency (illus.).

September 13, 1924, San Diego Union, 3:2-3. Court of Honor in Balboa Park will be scene of public reception for Curtis D. Wilbur, Secretary of the Navy, next Tuesday.

September 14, 1924, San Diego Union, 1:6-7. Python to be turned loose today in seal pond at Zoo for exercise to terminate hunger strike.

September 14, 1924, San Diego Union, 10:2-6. Special prizes for dahlias to be offered at fall flower show at Balboa park (illus.).

September 14, 1924, San Diego Union, Classified, 7:1. Variety promised for visitors to County Fair; night show, rodeo, prize baby competition among attractions.

September 14, 1924, San Diego Union, Classified, 7:4. Antelope wolf from Chihuahua expected at Zoo today.

September 14, 1924, San Diego Union, 1:4-5, 3:6. Seal vanquishes python in battle at park; combat took place in Zoo pool when snake got first bath in 15 months; attendants came to rescue in time to save reptile's life; first scrap of kind in history.

September 16, 1924, San Diego Union, 1:1. President Coolidge cancels Secretary Wilbur's visit to San Diego; needed in Washington for hearing on Navy cut.

September 18, 1924, San Diego Union, 1:3. Police to hunt mountain lion seen south of Naval Hospital in Balboa Park.

September 18, 1924, San Diego Union, 2:4-5. N. E. Slaymaker writes letter supporting development of cultural center in Balboa Park.

September 19. 1924, San Diego Union, 4:1. EDITORIAL: A Cultural Center.

September 20, 1924, San Diego Union, Classified, 1:1. County schools to have exhibits at annual fair; horses arrive for big rodeo.

September 20, 1924, San Diego Union, 13:1. Park Board asks \$221,490 in bonds; proposed paving east half of Park Boulevard, north half of Date Street, all of West Boulevard, south half of Upas Street, north half of Russ Boulevard, extension and widening of Pershing Drive, paving Cabrillo Canyon Drive and Alameda Drive, paving from Cristobal Place to new Art Gallery.

September 21, 1924, San Diego Union, 7:4-5. "Mike," Zoo's young orangutan, to be given chance to build home in tree today.

September 24, 1924, San Diego Union, 5:5-6. County Fair opens at 10 a.m. today; set aside as State Societies Day.

September 24, 1924, San Diego Union, 6:3-4. A. G. Stacey urges giving land to Naval Hospital.

September 24, 1924, San Diego Union, 10:4-5. Scout exhibit at County Fair to show their work in detail.

September 24, 1924, San Diego Union, County Fair Section, 1:1-2. Exhibits increased in number; varied programs offered.

September 24, 1924, San Diego Union, County Fair Section, 2:1-2. Horse show attracts fine stock in various classes; "monkey-drill team" from 11th Cavalry will give exhibitions nightly.

September 24, 1924, San Diego Union, County Fair Section, 6:4-5. Park provides beautiful background for County Fair.

September 27, 1924, Board of Park Commissioners, Letter, John D. Spreckels to Board, saying Balboa Park organ should be kept out of politics; says his anti-La Follette position is not the real question (Box 1, San Diego Public Library).

September 28, 1924, San Diego Union, 10:5. Natural History Society, incorporated October 9, 1874, to keep 50th birthday.

September 28, 1924, San Diego Union, 14:4-5. "Diablo," Zoo python, will swim in water today.

September 28, 1924, San Diego Union, 22:1. County Fair closes with big attendance.

September 29, 1924, San Diego Union, 1:6. Brush fire in park gives fight to firemen, burned about five acres in canyon.

October 1, 1924, San Diego Union, 10:5-6. Colonel Collier, guest speaker at Three Arts Club, recalls Exposition, pictures Brazil.

October 2, 1924, San Diego Union, 7:1-2. Make plans to observe Exposition anniversary; businessmen and former officials of 1915 Exposition call general meeting next Tuesday to consider arrangements for several days fete; it was suggested that any funds raised by means of the celebration be use in restoration and repair of old Exposition buildings; Carl Heilbron, chairman; Frank Goodman, chairman of publicity; dinner will cost \$1.00 a plate; the perpetuation of the Exposition spirit for which City became famous ten years ago was the most impressive argument advanced.

October 2, 1924, San Diego Union, Classified, 1:1. Elks to dedicate Elk group at Natural History Museum next Saturday afternoon.

October 5, 1924, San Diego Union, 13:1. Plan to observe anniversary of Exposition here; dinner and meeting Tuesday night at San Diego Hotel; Colonel D. C. Collier outlined plans he and other former Exposition officials had drafted at preliminary meeting.

October 5, 1924, San Diego Union, 16:4-5. Rare specimen of Mexican wolf will be added to Zoo; due to arrive last night; gift of Roscoe Hazard.

October 5, 1924, San Diego Union, Classified, 5:2-4. Local lodge formally presented case housing group of elk to Natural History Museum.

October 6, 1924, Board of Park Commissioners, Letter, Executive Secretary of Park Board, to John D. Spreckels, stating that it is policy of Park Board that permission be denied to any individual or organization to hold meetings of a political significance at Organ Pavilion.

October 7, 1924, San Diego Union, 11:5. Park Commission at meeting last Friday night unanimously voted that Organ Pavilion in Balboa Park no longer be used for political meetings of any character.

October 7, 1924, San Diego Union, 24:2. Chamber of Commerce has indorsed Park Board's plan to pave most of the roads in Balboa Park.

October 8, 1924, San Diego Union, 3:5. Committee, consisting of Reverend Howard B. Bard, Ernest White, Miss Gertrude Gilbert, Carl Heilbron and Dr. Edgar L. Hewett, named to draw up tentative program for Exposition fete.

October 8, 1924, San Diego Union, 4:1. EDITORIAL: Relief.

We unanimously approve the decision of the park board to ban political meetings from the organ pavilion in Balboa Park. When recently a La Follette pacifist vapored against that classic background, we felt annoyed, but refrained from any comment lest the reader might misinterpret our protest s a partisan one.

A political meeting at the Organ Pavilion is out of place --- like waste paper on a new lawn.

October 12, 1924, San Diego Union, 20:1. San Diego Zoo valued at \$250,000; accountant's report shows success of work done by Zoological Society.

October 12, 1924, San Diego Union, Building & Development, 7:5. A. E. Roberts expects to dispose of tract between Alabama and Mississippi Streets, next to Balboa Park; announces short-cut highway from Pershing Drive to Alabama and Mississippi Streets will be paved soon.

October 15, 1924, San Diego Union, 1:5. 3:2. First big G. O. P. rally in county to be held at War Memorial Building in park tomorrow; building will seat 3,000; no charge for admissions and no collection will be taken.

October 15, 1924, San Diego Union, 1:5. City sets aside Mission Bay as bird sanctuary; law enacted by Council, after long fight, will become effective January 16.

October 15, 1924, San Diego Union, 11:1-3. Giuseppe De Luca, Metropolitan Opera baritone, here; marks epoch in musical history; pleased large audience in "Rigoletto" at Civic Auditorium last night; auditorium seats about 3,000.

October 15, 1924, San Diego Union, 12:2-3. Marines bring birds and animals from Central America to Zoo.

October 18, 1924, San Diego Union, 9:2-4. Chrysanthemums rule today in Floral Association home in park at third and best annual exhibit.

October 18, 1924, San Diego Union, 20:3. Marine Day tomorrow at Zoo; appreciation to be evidenced for shipment of rare creatures from tropics.

October 19, 1924, San Diego Union, 19:1. Annual dog show to open October 31 at Balboa Park in County Fair building.

October 23, 1924, San Diego Union, 9:4. November 8 set for "La Traviata," second performance of Civic Grand Opera season to be given in Civic Auditorium.

October 27, 1924, San Diego Union, Classified, 1:2. San Diego to have scientific research institution; plan comprehensive study of diseases of man, beast; Dr. Harry M. Wegeforth obtains funds on eastern trip for structure in park to develop work; building to be begun in short time.

November 2, 1924, San Diego Union, Sport Section, 12:3-6. Bob White Quail at San Diego Zoo; T. N. Faulconer from Kentucky has long wanted to hear call of Bob White Quail resounding across the canyons of his beloved park.

November 2, 1924, San Diego Union, Classified, 19:6. Four thousand attended Greeters' Ball at Civic Auditorium Friday night.

November 2, 1924, San Diego Union, Building & Development, 5:1-6. First aerial analysis of future growth and dazzling possibilities of San Diego, by D. C. Collier.

November 9, 1924, San Diego Union, 1:7. Roller skating rink planned at Mission Beach.

November 12, 1924, San Diego Union, 9:3. Ball given in Civic Auditorium last evening, feature of Armistice Day celebration.

November 12, 1924, San Diego Union, 12:3-4. Grand Army of the Republic proposes voting to Naval Hospital 30 or 40 acres on the west: "We petition the Council to consider favorably this proposition, which, if adopted, would add so largely to the present beauty of this greatest park in the United States."

November 16, 1924, San Diego Union, Society-Club, 12:1-4. "Balboa Park in the Moonlight" by Mary: "and in my heart there was an ache --- the exquisite poignant ache which beauty always brings me."

November 19, 1924, San Diego Union, 1:1-2. "El Capitan" winds 3 to 1; verdict of voters in approving bonds considered rebuke to interests obstructing city's progress.

November 19, 1924, San Diego Union, 12:4. Park Board names park point for George W. Marston.

November 23, 1924, San Diego Union, 17:4-5. Mr. and Mrs. Bengal Tiger will hold housewarming in their new \$10,000 grotto at Zoo today.

November 23, 1924, San Diego Union, 17:5. Free lecture on Christian Science in Civic Auditorium this afternoon.

November 24, 1924, San Diego Union, 10:1. San Diego Zoo opens its new tiger grotto; the fourth of its kind open at Zoo; made possible by a donation from Miss Ellen B. Scripps.

November 25, 1924, San Diego Union, 15:5-6. Federation of State Societies entertain in American Legion War Memorial Building in park tonight.

November 26, 1924, San Diego Union, 12:4-5 and November 27, 1924, Classified, 11:6-7, 13:5-6. Thanksgiving Services at Organ Pavilion to open at 10:30 a.m. tomorrow.

November 27, 1924, San Diego Union, 6:3. Zoo tigers will get Thanksgiving dinner today in new grotto; public invited.

November 27, 1924, San Diego Union, 20:2-4. Loma Haven, new residential subdivision, to be put on market today by D. C. Collier (illus.).

November 28, 1924, San Diego Union, 11:8. Service at organ draws big crowd.

November 30, 1924, San Diego Union, 14:4-5. Carroll De Wilton Scott, Natural History Museum writes letter refuting claim of live oak forest on Point Loma.

November 30, 1924, San Diego Union, Classified, 4:3-5. "Diablo," huge python, magnet for crowds at San Diego Zoo.

December 2, 1924, San Diego Union, 2:4-5. School Board gets Lincoln Rogers' plans for shell of auditorium for San Diego High School; will be minus ornamentation until funds are available for completion.

December 4, 1924, San Diego Union, 4:4-5. Zoo offers one-year membership for \$5.00; regular gate admission is 10 cents.

December 4, 1924, San Diego Union, 12:2. Four marmosets, monkeys that act like squirrels, gift to zoo from Miss Anna Cabell of Glendale, California.

December 7, 1924, San Diego Union, Development & Building, 3:2-4. D. C. Collier has one-day sale today of Wildwood View sites on Point Loma (illus.).

December 10, 1924, San Diego Union, 7:1. Many donations to San Diego Zoo.

December 10, 1924, San Diego Union, 7:2. Players to give comedy, "To The Ladies," for the third time tonight in the Yorick Theater, Balboa Park.

December 13, 1924, San Diego Union, 1:4. Thieves deplete park roses; several dozen beautiful bushes stolen from celebrated garden; John Morley announced it is the intention to prosecute the thieves to the fullest extent of the law as he considers the act of robbing a park maintained for all the people, of some of its most beautiful flowers, one of the meanest crimes that has ever come to his attention.

December 14, 1924, San Diego Union, Building & Development, 5:4. Construction far advanced on 1925 Paris Exposition.

December 15, 1924, San Diego Union, 3:2-3. Charles A. Small, known as "the father of Pershing Drive," asks that \$20,000 be allowed for the purpose of beautifying Pershing Drive; one-half of the expense of building the drive was borne by the property owners in the northeastern part of the city; text of letter given; western part of park has been improved to the highest degree, whereas the eastern part is, for the most part, in its natural state.

December 16, 1924, San Diego Union, 28:2. Dr. Wegeforth asked creation of Municipal Zoo Commission; City Council decided to submit question to voters in spring election; Councilman Harry K. Weitzel said that there are already too many conflicting heads to the city government; Wegeforth does not like going to the Park Board for every little thing the Zoo needs.

December 21, 1924, San Diego Union, Society-Club, 1:1-2. Nativity tableaux to be given in park Christmas night; Friends of Art, Amphion Club arrange impressive outdoor spectacle at Organ Pavilion.

December 21, 1924, San Diego Union, Society-Club, 12:1-6. Wilma Frances Minor writes glowingly of beauty of San Diego and Balboa Park.

December 22, 1924, San Diego Union, 7:2-3. Evergreen monarch in Park at Sixth and Laurel Streets to be scene of chorus singing and novel play presentation under direction of Community Service on Christmas Eve.

December 24, 1924, San Diego Union, 7:4-5. Special organ music to be given at Balboa Park when Nativity is depicted.

December 25, 1924, San Diego Union, 1:4, 2:6. Christmas spirit pervades Naval Hospital (illus.).

December 25, 1924, San Diego Union, 3:3-5. Scene of Nativity will be depicted tonight at Organ Pavilion.

January 1, 1925, San Diego Union, 5:6-8. Natural History Museum oldest in Southern California, by Clinton G. Abbott.

January 1, 1925, San Diego Union, Park Section, 6:1-2. Tropical and semi-tropical plans adorn Balboa Park, by John G. Morley. (Note: spelling of all botanical names should be checked for accuracy.)

San Diego is located in the semi-arid and semi-tropical zone and many rare trees, shrubs, palms and other exotic plants that have to be grown under glass in the northern and eastern states, thrive well out of doors in our excellent climate and the luxuriant growth attained furnishes our park with a distinctive and charming diversity of character that cannot be duplicated in the colder areas of the country. While we are able to grow successfully nearly all the plants of the temperate zones, we utilize many that come from the warmer sections of the world, both from the tropical and semi-tropical zones.

The majority of our trees come from the southern hemisphere. From Australia we have the eucalyptus in many varieties; acacias, one of our finest flowering trees, which commences to bloom in December and continues in succession until June, according to the varieties we grow; *Tristania conferta*, a very beautiful tree, the flowers and foliage somewhat resembling the eucalyptus, but a more umbrageous habit of growth and which in Australia, its native habitat, is utilized extensively as an avenue; *Pittosporum Undulatum*, the Brisbane box, is another beautiful tree, with dark green glossy foliage and covered with sweet-scented flowers in the early spring. This variety is also extensively planted as a shrub and for hedges. *Hymenospermum Flavum* is a very fine medium-sized tree with sweet-scented yellow flowers; the Casuarinas, very striking trees in the character of several varieties; *Agathis Australia*, the Kauri pine, a very interesting coniferous tree from New Zealand; *Ficus*, the rubber trees from Australia, South America and the East Indies; *Araucarias* from Australia and also the Norfolk Islands off the coast of South America; *Eugenias* and *Lagunarias* from Australia; the coral trees from South Africa; *Bauhinias* from tropical Africa and China; *Schinus Molle* and *Teberenthifolia*; the pepper trees from South America; camphor trees from Formosa and Japan; pine trees from subtropical countries; our own native pines, evergreen oaks, cedars, cypress, cherries, fir trees and many others are conducive to the great variety and character of our park landscape.

Many Varieties Beautify Parks

Many varieties of shrubs from the same zones are grown and intensify the beauty of our park plantings. The following selection is worthy of mention: *Coprosma Bauerians*, a shrub that is conspicuous by its beautiful glossy green leaves. In New Zealand, its native habitat, it is frequently grown as a tree for avenue planting. It may be advisable to grow it in Southern California with like treatment. The dwarf *Grevilleas* from Australia are also a very pretty shrub and planted extensively. *Grevillea Thelemanniana* is the variety utilized more than any other --- the graceful foliage and red and yellow flowers produce a charming effect. The *Pittosporums* in several varieties; *Myoporum*s for seacoast planting, and the *Swainsonias* of several colors and varieties, are also natives of Australia; *Rapheolepsis Ovata* and *Indica* are very fine dwarf shrubs from China, and also the *Hibiscus Sinensis* in several varieties and colors thrive luxuriantly. The *Ericas* of heathers from South Africa and the Mediterranean region, the *Escallonias* from Peru, the *Melaleuca* and *Callistemons*, with flowers resembling a bottle brush, and in all shades of colors --- these interesting shrubs are from Australia. *Chosia Ternata*, a beautiful white flowering shrub from Mexico, and the *Cestrum*s from the West Indies, including the sweet-scented, night-blooming variety; *Cestrum Noethurnum*; *Naudina Domestica*, with its beautiful colored foliage and red berries from Japan; and many others from the warmer climates are utilized. Special mention is here given to our famous Christmas flower, *Euphorbia pulcherrima*, or, as we call it, the Poinsettia, which adds a crimson glory to our gardens during the

holiday season in midwinter, and which is grown by the thousands for cut flowers for the Christmas season. The plant is a native of Mexico, to which country we are indebted for so beautiful a flower at this season of the year.

Tropical Vines Thrive Luxuriantly

The climbing vines from the tropical and sub-tropical zones are also a fine addition to our park planting, notably the Bougainvilleas from South America, in several varieties, which thrive luxuriantly and produce a gorgeous effect with their abundance of blooms. The tender varieties of Bignonias, the *Campsidium valdivanum* from Chile, is one of our choicest climbers, with its pretty glossy green foliage and clusters of tubular flowers. Passifloras, Philodendrons, Jasmines, *Rhyncospermum*, *Jasminoides*, *Solanums*, *Sollyas*, *Tecomas* and the *Vitis*, or evergreen grape, furnish us with charming effects on the buildings and pergolas of Balboa Park.

Other interesting plants which add to the to the tropical and semi-tropical plantings are the numerous varieties of palms from all the warm climates --- *Dracaenas* and *Cordylines* from Australia and the Canary Islands; bamboos from China and Japan; bananas; *Phormium Tenax* and other varieties of New Zealand flax; the *Strelitzias*, or bird of paradise flower, from South Africa; these with the tropical grasses and the fine collection of water lilies from all over the world, provide a choice selection of material to use in our parks system that few cities in the country are enabled to enjoy, as do the visitors and residents of San Diego.

6:1-8. Music, art represented in cultural activities of community's progress, by Gertrude Gilbert.

7:1-8. Aerial view of U. S. Naval Hospital

January 1, 1925, San Diego Union, 8;2-4. New Junior High School on crest of Point Loma in modified Spanish; architect Edwin F. Banning (illus.).

January 4, 1925, San Diego Union, Classified, 1:4. Police pickup 11 sticks of dynamite west of Naval Hospital; safe crackers may have placed the explosive in park in hope of returning to get it and boil it down to extract the nitroglycerin, of which it is composed.

January 5, 1925, San Diego Union, 16:7-8. Richard A. Addison calls on citizens to defend park property from vandals; eucalyptus trees uprooted; animals teased at Zoo.

Why is it that sane and intelligent citizens will stand quietly by and see other people destroy property or steal such things as flowers and potted plants, benches, garden hose, etc. in their own public parks, is a problem which is perhaps deep enough to tax the mental powers of even our most learned psychologists.

Full-grown persons, seemingly in possession of all their faculties and evidently not extremely near-sighted, are known to have looked on in utter unconcern while several small boys uprooted a dozen young eucalyptus trees which were recently set out in one of the canyons of the zoological gardens.

On a number of occasions, potted plants, pots and all, have been stolen in broad daylight while hundreds of citizens passed calmly by, caring little or nothing what damage was done, believing it to be a matter outside their concern. Flower-pulling is a common pastime with many of the visitors to our beautiful Balboa Park.

Teasing the animals at the zoo is another offense of common occurrence. Although the age cage carried large signs forbidding the feeding of these specimens, the keepers find it necessary to watch constantly to see that their charges are not made sick by being fed candy, chewing gum, and other ridiculous things.

And the most puzzling thing about it is that law-abiding citizens, who wouldn't think of doing such things themselves, stand by and permit others to perform these acts of vandalism. The park belongs to the citizens of San Diego. When we find someone committing a nuisance, let's assert our rights as citizens, appoint ourselves policemen, and take steps to prevent its recurrence. Or if our dispositions are too retiring to allow us to do this, we can render valuable service by notifying those in charge.

January 8, 1925, San Diego Union, 9:3. J. L. Nusbaum, superintendent of Mesa Verde National Park, will speak to pupils at Francis W. Parker School, using slides on ancient Indians; Nusbaum planned and built the Pueblo Indian Village now used as headquarters of Boy Scouts.

January 8, 1925, San Diego Union, 11:3. Colonel D. C. Collier says San Diego offers greater inducements to the homeseeker than Florida, with business conditions equaling the best.

January 8, 1925, San Diego Union, 13:1. Balboa Park station makes mail record; on December 22 a total of 7,494 parcels was handled; in the 15 days that station operated 40,500 packages carrying insurance were handled.

January 10, 1925, San Diego Union, 1:4-5. Permit issued yesterday for erection of Children's Home Building in Balboa Park at a cost of \$90,600.

January 11, 1925, San Diego Union, 16:2-7. Drawing of \$200,000 dance hall at Mission Beach; architects Lincoln Rogers and F. W. Stevenson.

January 11, 1925, San Diego Union, Classified, 1:7, January 12, 1925, 1:3-6, 2:2-3, and January 13, 1925, 3:2-6. San Francisco will dedicate outdoor organ in Palace of Legion of Honor; gift of John D. Spreckels to city; Dr. Humphrey J. Stewart will play after Marshall W. Giselman, organist of the Palace; cost \$100,000; designed for either outdoor or indoor recitals.

Located within the arch are the great chimes, part of the organ, which can be heard over the city and far out to sea.

January 11. Ceremonies dedicating a new outdoor organ presented to the city of San Francisco by John D. Spreckels will be held in Golden Gate Park [sic] today with the unveiling of a bronze memorial palm given by the French republic.

John D. Spreckels, Claus Spreckels, and Dr. Humphrey J. Stewart are in San Francisco to attend the dedication ceremony.

An impressive program has been arranged by the San Francisco park board. There will be singing by a chorus of 250 voices, combined choirs of San Francisco churches, an orchestral concert, ceremonial speeches by City officials and members of the French consulate and two organ recitals in the afternoon.

Dr. Humphrey J. Stewart, organist of the park organ here, will play the new Spreckels organ after its dedication at the hands of Marshall W. Giselman, organist of the Palace of Legion of Honor.

William Humphrey, chairman of the San Francisco board of park commissioners, will act as chairman of the double ceremony and aiding him will be Mrs. Cornelius Quinton, director of the art gallery.

Patrick Coppinger, French consul general to San Francisco, is expected to make one of the principal addresses in behalf of the French government.

Tonight the music of the great organ will be broadcast by radio.

January 12. San Francisco, January 11. (Special) Afternoon sunlight streaming through the Golden Gate alone rivaled the beautiful simplicity that marked presentation to the public today of the great Spreckels organ in the California Palace of the Legion of Honor by John D. Spreckels of San Diego.

Situated at the Memorial building on one of the grassy bluffs of Lincoln park, adjacent to the entrance to San Francisco's harbor, the impressive ceremonies made a picture that will long be remembered by Mr. Spreckels and the huge crowd that filled the open-air court of the palace and overflowed to the hillsides in front.

The fondest dreams of one of the donors of the palace --- that late Adolph B. Spreckels, brother and business partner of John D. Spreckels of San Diego --- would have been realized could he have lived to witness the appreciation expressed by the public for the two gifts. His widow, Mrs. Alma de Bretteville Spreckels, joint donor of the building with her husband, was present and saw with pleasure the public's gratitude demonstrated.

Long before the hour set for the beginning of the ceremonies, San Franciscans began heading toward the shrine dedicated to the soldier and sailor dead of America until, when following the presentation of the organ a cheer was proposed for John D. Spreckels, a mighty chorus of appreciation arose from the thousands of men and women assembled there that it must have been heard aboard an American dreadnaught that came creeping through the Golden Gate to add color to the scene.

This great tribute of San Francisco to Mr. Spreckels was not lost upon him, for a few moments later Dr. Humphrey J. Stewart, organist of San Diego, began his masterful cantata, "Star of the Legion of Honor." Mr. Spreckels was plainly overcome by this evidence of the love from his fellow-men, and others too, in the great assemblage, were obviously affected by the compelling sincerity of the occasion.

Prior to the presentation of the organ by Mr. Spreckels, Mayor James Rolph and Clay M. Greene James, playwright, officiated at the planting of two memorial trees, one to the honor of the organ and the other in memory of his dead brother.

Mayor Rolph told of the great love the two Spreckels brothers had for one another, seconding their fraternal affection, to their desire to be ranked first among those who love their fellow-men. Never has so much been done for San Francisco as by these two brothers, said Rolph.

The tree-planting ceremony was made especially beautiful with the reading of verse composed for the event by Mayor Rolph and Mr. Greene. Rolph spoke the introductory lines before members of the Spreckels family, Greene appearing spade in hand, to finish the remarkable tribute.

In planting the trees in memory of the dead brother, these softly spoken lines by Greene found sympathetic ears:

*"So, spirit of Adolph, here in thy name
We plant this growing symbol of thy fame,
Remembering that what thou didst can come no more,
For brain of man ne'er dreamed its like before."*

The following lines spoken by Greene expressed the sentiment of San Franciscans in placing in the ground their growing reminder to posterity of the deeds of the living brother:

*"So, brother of Adolph, this tree shall grow,
While golden memory's stream shall ebb and flow,
For that thou gavest to his city's art
And for the love of music in thy heart,*

*A mine for inspiring lure,
That through the dust of ages shall endure."*

Although the program was brief for such an auspicious event, it was well-planned. It had a touch of internationalism, tending to prove the great ties of human interest with which this country and its sister republic France are bound. The French became parties to the program by dedicating two bronze palms to those to whom the California Palace of the Legion of Honor in San Francisco is a living tribute --- one to the heroic soldier and sailor dead of the state to whom the building is dedicated and the other to the memory of Adolph Spreckels. The bronze plaque commemorating the deeds of the dead American boys of the world war was unveiled on the exterior wall near the entrance to the palace, while the tribute to the donor will be placed over his grave.

Consul General of France Patrick Coppinger presented the palms in behalf of his government. Following this America responded with the playing of "La Marseillaise" by the orchestra under the direction of Supervisor Eugene E. Schmitz. The orchestra opened the program with "The Star Spangled Banner."

The great respect the French government and its honored men hold for California and the Spreckels family was expressed by Paul Verdier, San Francisco merchant and chevalier of the Legion of Honor, who offered a tribute in behalf of his decorative order.

"As a Franco-American," said Verdier [sic], "I wish to thank with all my heart DeBretteville Spreckels for the magnificent conception they have had, not only to build a replica of one of the most beautiful of French buildings, le palais de la legion d'honneur, but to dedicate this home to the California boys who died in the great war. These people have united once more the people of the two republics and have paved the way toward peace and prosperity>"

In telling of the meaning of the Legion of Honor, Verdier said: "If this decoration could be given to the dead, it should be given to the 60,000 American boys who went to France and gave their lives to save civilization and to Adolph Spreckels, who decided to erect this monument. It has been given to Mr. Spreckels' widow, and she well deserves this recognition from the French government, for having built this beautiful palace, which again exemplifies the great friendship that has always united France and America."

Mr. Spreckels received a tremendous greeting when he arose to present the organ and was introduced by Park Commissioner William F. Humphrey, chairman of the day. He answered by announcing he would read the deed by which he was transferring to the people the great musical instrument

The deed is an explanation of the motives that brought about the presentation of the organ and reads in part:

"In token of my deep love and affection for this city and its people, this organ is presented..

"I intend that it shall contribute to significance and usefulness as a memorial of the great sacrifice made by the patriotic sons and mothers during the world war."

Following reading of the deed, Mr. Spreckels concluded his remarks with, "You now have this musical instrument in your hands. It is yours. I have bought it for the people of California to enjoy."

It was at this time that Mr. Spreckels was given such a tremendous three cheers by the great gathering.

Next came the rendition of the cantata, "Star of the Legion of Honor," the text of which is taken from Lord Byron's poem. Dr. Stewart was more than six months preparing the huge work. But his

labor of love, for such it is, being dedicated to the memory of his late friend Adolph Spreckels, more than repaid him for his tremendous efforts. The cantata proved to be even more than music critics had predicted. The perfect harmony of the great organ with the voices of a mixed chorus of 200, a quartet of soloists and a 65-piece orchestra, made Stewart's work a masterpiece that will live. Dr. Stewart conducted the entire musical body, Benjamin Moore of the Trinity Church playing at the console of the new organ. The organ, which is considered one of the finest in the United States, is unique in many ways. It is the only instrument of its kind in the world, designed for either indoor or outdoor recitals. By raising a frieze over the entrance of the Palace the tones of the giant instrument are released to the open air, having an audible power of about one mile. An extra loud chimes arrangement is hung in the arch of the building, in front of the open court, and the bells can be heard clearly at a great distance. The chimes will later be augmented by trumpet pipes.

No pipes are visible in the Palace itself, the music being thrown, for indoor use, through a camouflaged wall of airplane cloth. An echo organ is used to send the gentle tones of the instrument through the many corridors and rooms of the Palace. Marshall W. Giselman, well known to San Diegans, spent more than a year designing the organ, and it cost in excess of \$100,000.

The console of the organ is of walnut and ivory, and bears a bronze plaque on one end, showing a relief of John D. Spreckels and the inscription, "John D. Spreckels has generously given the organ in this temple for the pleasure of those who like himself are lovers of music. AD MCMXXIV."

That others beside those in the vicinity of San Francisco might enjoy the great organ, a special radio program was broadcast tonight by Hale Brothers' San Francisco radio station KPO. The program was given under direction of Mr. Giselman, who was at the console.

In addition to the presentation of the bronze palms, the French government presented medals to the following prominent Californians present at the dedication ceremonies: Mayor Rolph, John D. Spreckels, Mrs. De Bretteville Spreckels, William F. Humphrey, Mr. & Mrs. William H. Crocker, Mr. & Mrs. Herbert Fleishecker, Edgar Plaxiotto, and Major and Mrs. W. W. Quinton. The medals served to commemorate an exposition of French tapestries and other national arts, now being shown in the Palace.

San Diego was represented at the ceremonies by Mr. and Mrs. Claus Spreckels and Senator and Mrs. Ed P. Sample.

January 15, 1925, San Diego Union, 8:1. Max Winter of Los Angeles gets contract to build Children's Home at 16th and A Streets; Mrs. Waldo Waterman, architect.

January 16, 1925, San Diego Union, 1:4-5. Only a smoke barrage laid down by feeding chemicals into Naval Hospital furnace succeeded in driving a psychopathic ward patient from the lofty perch he had taken atop the tall smokestack of the institution yesterday afternoon.

January 20, 1925, San Diego Union, 17:6. Extensive park paving program put on ballot; bond issue of more than \$100,000 submitted to City Council by Park Commission yesterday; paving of 6th Street from Date to Upas Streets along the park; paving of streets on the east and north side of the park; widening of Pershing Drive five feet on each side; Council eliminated proposals to pave West Boulevard and the road up Cabrillo Canyon.

January 21, 1925, San Diego Union, 9:5. Chamber of Commerce named sub-committees to help develop San Diego parks yesterday; George W. Marston will head sub-committee appointed to confer with John Nolen on plan for park development; J. W. Snyder to head sub-committee to investigate the proposal to establish a four-year college in the park; A. E. Scott to head Pershing Drive beautification sub-committee; Frank J. Belcher to head road paving sub-committee; architectural standards for the park will be cared for by William Templeton Johnson, chairman, Richard S. Requa, Louis J. Gill, Frank P. Allen, L. P. Delano, Lincoln Rogers and H. L. Sullivan.

January 28, 1925, San Diego Union, 1:7-8. John D. Spreckels gives Mercy Hospital \$300,000 for completion of south wing.

January 28, 1925, San Diego Union, 12:1. Zoological Society President Wegeforth tells Optimists that San Diego Zoo is a great city asset.

“During 1923 nearly 100 pictures of our zoo were published in the illustrated sections of the big city newspapers in every state in the Union,” said Dr. Wegeforth. “In motion pictures, the zoo and our expedition for elephant seals have been shown in almost every theater in the United States, always with the name San Diego prominently displayed. If it ‘pays to advertise’ then our zoo is paying enormous dividends to San Diego.

“The zoo is educational as well as recreational. We entertain thousands of school children, provide men to escort classes from the city schools through the grounds and to inform them fully concerning the exhibits. Through the generosity of Mr. and Mrs. P. F. O’Rourke a handsome junior zoo building is being fitted up for the use of the children. The auditorium of this building will be available for meetings of all organizations interested in nature study, the preservation of wild life and allied causes.”

January 28, 1925, San Diego Union, 12:2-3. Illustrated folder of Southern Trust and Commerce bank shows beauty of Balboa Park.

January 29, 1925, San Diego Union, 12:1. Two koala bears arrive for Zoo; more than 200 specimens of animal life brought back from Australia by T. N. Faulconer (illus.).

January 29, 1925, San Diego Union, 12:6-7. John Nolen arrived here last night with plans for San Diego’s future.

February 1, 1925, San Diego Union, 12:4-5. Hugo Klauber tells early history of Balboa Park.

February 4, 1925, San Diego Union, 8:4-5. T. N. Faulconer praises Sydney's great Zoo.

February 4, 1925, San Diego Union, 24:2-3. Colonel D. C. Collier made Director-General of Sesqui-Centennial Celebration to be held at Philadelphia in 1926; salary of \$25,000 a year.

February 5, 1925, San Diego Union, 7:1. John Nolen addresses Realty Board: " . . . avoid congested districts in your city, beware of crowded areas of population and provide liberal traffic spaces in planning the city of the future."

February 6, 1925, Meeting of Board of Park Commissioners.

Present: Commissioners Klauber, Johnson and Forward.

The secretary stated that a Mrs. Gilbert had submitted an offer to repaint the announcement slides at the organ; her charge to be \$5.00 for the lot. The offer was not accepted, and upon motion of Mr. Forward, seconded by Mr. Johnson, the superintendent of parks was authorized to have the painting done under his supervision.

The secretary was instructed to send written communication to the Board of Playground Commissioners authorizing them, when building new fence around Golden Hill playground, to include land on the south side between playground and alley; also to extend playground four feet on the north to allow for regulations size of tennis courts.

The secretary presented replies to office letters sent to the superintendents of New York St. Louis and Philadelphia zoos, which were referred to the president of the Board.

February 6, 1925, San Diego Union, 1:5, 3:5-6. John Nolen urged full-time city plan secretary in talk before Civic Committee of the Chamber of Commerce yesterday.

February 6, 1925, San Diego Union, 4:1. EDITORIAL: On City Planning

It is within our power to build a unique, beautiful and efficient community, and it is our duty to do so, lest chance and haphazard development spoil everything that ought to remain unspoiled.

February 10, 1925, San Diego Union, 7:1. The City Council to consider transferring to the Navy Department another section of Balboa Park today.

February 10, 1925, San Diego Union, 10:2. "B. B." writes of the Children's Hospital and the U. S. Naval Hospital in Balboa Park (illus.).

February 10, 1925, San Diego Union, 24:1. Voters to pass on paving at the March election.

February 12, 1925, San Diego Union, 4:1. EDITORIAL: The Zoo

As to the charter amendments affecting the zoo, they do not embody any great changes, but are designed to cut out a little of the former "red tape" and promote efficiency in administration. They should be passed without much difficulty.

February 14, 1925, San Diego Union, 9:4-5. Zoo elephants full of pep after vacation; ready to give San Diego children rides; N. E. Slaymaker has redesigned the buffalo paddock to provide a roadway through that portion of the Zoo.

February 14, 1925, San Diego Union, 12:4. The Board of Park Commissioners announced yesterday it has approved the granting to the Navy Department of additional land in Balboa Park.

February 15, 1925, San Diego Union, 10:5. A. F. Mercier, San Diego & Arizona Railway official, names Zoo director at annual meeting yesterday.

February 15, 1925, San Diego Union, Building & Development, 3:1-2. D. C. Collier opens sales of lots on overlook across valley from Mission Hills (illus.)

February 16, 1925, San Diego Union, 2:3. 7:1. Seventy four sets of twins romp before 5,000 spectators in prize parade at park; twin round-up held by Publicity Department of the Chamber of Commerce to tell the rest of the world about San Diego's phenomenal increase in population since the last census. Kinograms Pathe News, International News, Fox News, and the Leavitt Cine Picture Company were represented by cameramen at the twin round-up.

February 16, 1925, San Diego Union, 7:1. Illinois State Society speaker Dr. Harry Frank lauded Lincoln's ideals at Organ Pavilion yesterday afternoon; war tunes by G. A. R. fife and drum corps; Wallace Moody led Community Singing.

February 19, 1925, San Diego Union, 8:3. Circus, Auto Exhibit and Industrial Show coming to County Fair building under auspices of San Diego Chapter of Greeters of America (photograph of ten baboons that do everything but talk). Show to run eight days --- afternoon and night --- is planned to raise funds for the national Greeters' convention which will be held here in June; to be held at County Fair building starting March 14; producers are Meeker and Oatman, professional circus men; local merchants are asked to exhibit merchandise.

February 22, 1925, San Diego Union, Classified, 1:1. 5:5-7. Full city planning program presented here for first time; John Nolen suggests harbor improvement, general park system, more playgrounds.

February 22, 1925, San Diego Union, 3:3-4. John Nolen says San Diego's recreational areas are inadequate and that Balboa Park has little to offer in way of solution.

March 8, 1925, San Diego Union, Classified, 3:4-5. Zoo shipping surplus specimens to other Zoos.

March 10, 1925, San Diego Union, 24:1. City Council votes to take \$3,500 from Park Fund; Park Commissioners had expected City to use general budget money for tennis court equipment; receipts from courts will come to about \$150 a month and this revenue will go to the Park Department.

March 11, 1925, San Diego Union, 24:2. H. R. Mitchell, business manager of New York Zoological Park, praises San Diego institution (photo).

March 14, 1925, San Diego Union, 12:1. Greeters' Circus will open today; four hundred children from city institutions to be guests of hotel men this afternoon.

March 14, 1925, San Diego Union, 12:2-3. Visiting sailors show interest in animals at Zoo.

March 15, 1925, San Diego Union, Classified, 1:6. Greeters' Circus wins plaudits on opening evening; exhibitions and acts entertain 6,000 during day; industries show products.

March 15, 1925, San Diego Union, Classified, 2:1. Music program to be given in Civic Auditorium; 35 Carol Club girls to sing a song especially written for the occasion; artists from San Diego Conservatory of Music to take part; Orpheus male quartet to sing several numbers; Wallace Moody to lead Community singing.

March 15, 1925, San Diego Union, 2:3. Sailors flocked to Civic Auditorium for big dance last night arranged by civic agencies.

During the evening it was announced that many of the sailors who could not get rooms ashore would forfeit their Sunday liberty if they went back to their ships during the night, and an appeal was made for quarters for the boys.

The dance was arranged by the civil agencies to entertain the sailors and show them the best time possible. Another dance will be held Wednesday, and still another Saturday, it was announced.

March 15, 1925, San Diego Union, Classified, 5:3-4. Today is Navy Day at Zoo for special benefit of bluejackets, "Diablo," the 23-foot python, will be taken out and given an airing.

The rule limiting the riding of the elephants to children will be waived in favor of the sailors, and "Mike," the funny little Borneo orangutan, will be taken out of his cage so that he may be photographed with the boys in blue.

Of special interest to visitors will be the largest herd of California sea lions in captivity. The zoo herd now numbers 30 specimens, ranging from big fellows that weight 600 to 700 pounds, down to the youngsters of 70 or 80 pounds, that are being held for training purposes. Three of the largest will be shipped soon to the Philadelphia zoological gardens, while the smaller ones will go to Karl Hagenbeck at Hamburg, Germany, where they will become members of his famous sea band and will learn feats of balancing and acrobatics.

As Snooky, chimpanzee movie star, will return to her Hollywood home some time this week to resume her place among the stars of filmdom, it is expected many who have enjoyed visiting here during the year will go to the zoo today to say goodbye.

The special events that will take place today in the following order:

Four baby lions will be on exhibition all day, as will the little Australian bear. Mike will leave his cage at 10 a.m. and after a stroll about the grounds, will spend several hours in a tree that has been set up for

him in the inclosure about the seal lagoon. The big python will be taken out for an airing at 2 p.m. and the elephants will be saddled at 3.

Anticipating a large crowd and a warm day, the zoo people have ordered the usual quantity of ice cream and soft drinks.

March 19, 1925, San Diego Union, 5:3-6. Greeters invite sailors to see park circus (illus.).

March 19, 1925, San Diego Union, 11:4-5. Army, Navy Committee of Chamber of Commerce urges San Diego voters to authorize park land grant to U. S. Navy: "the land which is needed is wholly unsuitable for park purposes."

March 27, 1925, San Diego Union, 1:1, 3:2-3. Officials think library, paving bonds defeated; issues fall short two-thirds.

March 28, 1925, San Diego Union, 1:3. Senator Ed P. Sample and Assemblyman Byron J. Walters to sponsor a bill calling for an appropriation of \$100,000 by California for a state building at Philadelphia Sesquicentennial International Exposition; Colonel Collier spoke yesterday on senate floor for five minutes.

March 28, 1925, San Diego Union, 5:3. Mayor Bacon changes mind on Zoo plan; says that if charter amendment goes through Zoo employees would be under civil service; all income from Zoo would go into the City Treasury as does income for other departments; also objects to turning over a section of the park to a private organization.

Opposition of Mayor Bacon to the proposed amendment which would give to the Zoological society control over the park lands occupied by the zoological gardens, came as a complete surprise yesterday to members of that organization. In a statement issued yesterday, the mayor came out in opposition to the amendment which will be voted on at the coming election.

"This is the first intimation we have had that Mayor Bacon is opposed to the plans of the Zoological society," said Dr. Harry M. Wegeforth, president of the society.

"When the matter was presented to the city council and debated before that body, the mayor did not offer a word of opposition. December 15 of last year, the measure was passed and adopted by the council by unanimous vote, and was signed by Mayor Bacon without hesitation. We are at a loss to know why he had changed his attitude."

The two charter amendments asked by the Zoological society were to have been on the ballot at the primary election this month, but were deferred by decision of the council until the April election. In a statement issued by the society at the time the matter received the favorable consideration of the mayor and council. It was pointed out that "the first proposition is to merely set aside the Zoological gardens so that the building of these gardens can be continued as laid out by the landscape architect, N. Slaymaker. It does not in any manner change the purpose for which this area is set aside.

The second proposition merely allows us to expend money directly through the city purchasing department instead of the park board."

That statement covers the entire plans of the Zoological society, its officers declare. Study of the situation during the years of hard work on the part of members which has built up the zoo to the point where it is a great asset to the city, convinced them that greater efficiency can be obtained if they have direct supervision over their part of the park and this is all they are asking, they point out.

Friends of the zoo are expected to really to the support of the proposed charter amendments in the coming election.

The mayor's opposition to the zoo amendment is expressed in a signed statement he gave out yesterday. It is as follows:

"The proposed amendment turning over a section of Balboa Park to the exclusive control of a zoological commission I believe should be defeated for the following reasons:

"First, the present Zoological society has done wonderful work in developing the zoo. They can receive private funds and disburse them as they see fit. Should the amendment go through, it would place all the employees of the zoo under civil service, and, in the language of the city attorney: 'All expenditures of the board shall be made pursuant to city charter, and all income must go into the city treasury, as does the income in any other city department.'

"Secondly, I do not believe that any one section of the park should be turned over to a commission appointed from a private organization.

“Thirdly, I believe the park should be maintained intact. We have given away too much park land already. We must maintain one central control. It would be setting a dangerous precedent to turn any of the city’s functions over to a board appointed by and from a private society.

“JOHN L. BACON, Mayor.”

March 28, 1925, San Diego Union, 5:5. T. N. Faulconer, Zoo director, to quit June 15; is leaving to engage in a business which offers higher financial returns.

He has been director of the zoo for about a year, during which time it has added hundreds of new specimens, and has grown in size and importance until now it ranks with the finest institutions of its kind in the country.

Faulconer just returned from a trip to Australia a few weeks ago, bring with him any new and interesting animals.

March 28, 1925, San Diego Union, 9:3. Residents of Park Avenue on 6th Street ask that the street be placed in Zone B to permit apartment and bungalow courts on the street and to prevent commercial buildings.

March 29, 1925, San Diego Union, Classified, 6:1-2. Members of Zoological Society, using slogan “Keep Zoo Out of Politics,” ask public support in election April 7.

“The San Diego zoological gardens were started primarily for the benefit of the children of the city,” says Dr. Harry M. Wegeforth, president of the society since its formation. “The many donations made by public-spirited citizens have been made directly to the children. The zoo is providing a splendid source of entertainment and instruction to the young. The directorate and membership of the San Diego Zoological society is devoting its time and efforts to administering the affairs of the organization for the children’s benefit and we ask that the public cooperate to the extent of voting in favor of the two amendments which will aid us in our work.”

History of zoological gardens in the United States shows that municipal zoos have been failures, while those managed by zoological societies have been uniformly successful, San Diego zoo supporters contend. Where city officials or commissions have control, politics creep in, with an impairment of efficiency, they contend, while public-spirited citizens who devote much of their time and thought to the direction of the zoo through a society invariably attain the best results. Boston and Los Angeles are cited by society members here as examples of what happens to the zoos when politics are permitted to enter in the management.

Before the present zoological society was organized, San Diego had a few animals on display in Balboa Park. A few buffalo, several bears and a fine collection of birds were shown, the birds and the fine cage on the Sixth street side of the park being the gift to the city of Joseph Sefton. But the birds have died and have never been replaced, their places being taken by pigeons. On the other hand, the San Diego zoo has prospered under the able direction of its board of directors until it now is regarded as one of the city’s best assets and has a collection of animal and bird life excelled by very few in the entire country.

An overwhelming vote in favor of the two amendments asked by the Zoological society is expected by the friends of the zoo.

March 31, 1925, San Diego Union, 1:4-6. Junior Zoological Society sponsoring a straw vote among school children on issue of Zoo and politics (Note: this was not a paid political advertisement.).

Same Ballot

YES

I want my Zoo kept out of politics and would vote for Proposition No. 6 if I could vote on April 7.

NO

I don't care what becomes of the elephants and ponies and other animals and would vote against No. 6.

March 31, 1925, San Diego Union, 1:1, 2:1. The city clerk announced yesterday that vote canvass shows that library and park bonds lost last Tuesday while the transfer of the Bonita pipe line bonds to a water bond fund carried; a check of figures revealed that a mistake had been made in an earlier count.

April 2, 1925, San Diego Union, 24:3-4. Park Commission views on Zoo amendment given.

April 3, 1925, Letter to **The San Diego Union** from George W. Marston,

I have read with interest and full approval the statement of the Park Board regarding the charter amendment proposed by the Zoological Society. In my judgment there is no question whatever that Balboa Park would be seriously injured by the passage of the Zoo amendment.

It should be remembered that the Zoo has attained its present high standing under existing charter regulations and that the Park Board has assisted and encouraged the development of the Zoo, rather than hindered it. Indeed, its interest has been so marked that it has allowed the Zoo to do some things contrary to the Board's judgment. For instance, the treatment of the hill north of Cabrillo Bridge where the buffaloes range. This use of the land by animals that destroy every plant and make the hill look like an ill-kept barnyard is entirely contrary to a proper landscape treatment. The park commissioners realize and deplore this, but have permitted it because of the general good management of the Zoo and their desire not to interfere.

There are two points in this illustration: first, the Park Board is friendly to the Zoo; second, the Board should retain the power to restrain the Zoo, or any other society in the park, from injuring the park as a park. Our city charter wisely places general control of all park land under one body. There are always a score of corporations and societies that have a foothold in Balboa Park and there will be more in the future. It is a splendid thing for the city that educational and recreational societies can be grouped in a central place. But the ground itself should be held by the city so as to preserve some unity in respect to landscape treatment, roadways, water system, telephone lines, fire protection, use of buildings, etc.

Balboa Park is primarily a park, to be cherished as a place of natural beauty. Although it is one of the largest parks in the country, the time is coming when the building of hospitals and school houses, or even libraries and museums, must cease, or else we shall have a city there instead of a park.

We have a good park, we have a good Zoo, and there are many other good things in the park. But Balboa Park and its fine accessories did not come by chance. It represents great ideals, civic enterprise, labor, money, continuous planning, and, withal, an enormous amount of good management. The results have been extraordinary and justify our great pride in the park. It has all been done under unified control and it seems to me that this proposed change is not only uncalled for but exceedingly foolish.

Furthermore, I venture to say that nine-tenths of all out park and exposition builders, those who have borne chiefly the cost and toil of the upbuilding, are against any change of general policy. The children should have their bears and parrots and monkeys, but older heads should not let false sentiment and misunderstanding of the real issues swerve them away from well tried and sensible administrative policy.

Dr. Wegeforth says that future park boards may not be as just and considerate as the present one. He fears that a future unfriendly board might work great injury to the Zoo. I beg to answer that a future

board of the Zoological Society might not be as fair and competent as the present one. In that case, if the Zoo board had control of its land, could it not do great injury to the park and stir up any amount of trouble?

The Zoo is probably the most popular institution in the park and its directors deserve praise for their successful efforts to found a great and worthy zoological garden. Nevertheless, it does not follow that the city should part with the control of its land and give to one of the park organizations such powers and rights as would break up the park entirely if likewise given to the other organizations. Every consideration of the rights of the city, the management of the park, and the interests of the Zoo itself, calls for the defeat of this amendment.

(Signed) G. W. Marston

April 3, 1925, San Diego Union, 1:2-7. Councilman John A. Held urged San Diego voters to support Zoo charter amendments: "For what better purpose could part of any park be used than for zoological gardens?"

April 3, 1925, San Diego Union, 4:5-6. Patrick O'Rourke, Zoo director, urges support of charter amendment No. 6 to be voted on next Tuesday.

April 3, 1925, San Diego Union, 5:3-5. Captain F. W. F. Wieber, commandant of San Diego Naval Hospital, is honored on eve of retirement after 40 years in service.

April 3, 1925, San Diego Union, 9:2-4. Dr. Wegeforth says Park Board can abolish "Kiddies' Zoo" under present system; people must remove danger by correcting charter; children's ballot included.

April 4, 1925, San Diego Union, 1:3-6. Amendment legally gives to zoo what Park Board once went on record to provide, citizens learn; in 1921, the Park Board set aside land for the Zoological gardens and asked the Council to approve the action; letter from Park Board to Council, October 7, 1921, included.

April 4, 1925, San Diego Union, 8:3-5. Heavy vote predicted on Park today when children decide future of Zoo; children's ballot included.

April 4, 1925, San Diego Union, 9:6-8. Paid political advertisement from Balboa Park Preservation Committee stating Federated Trades Council and Chamber of Commerce urge "No" vote on Amendment No. 6; map of Balboa Park included.

April 4, 1925, San Diego Union, 8:2-3. Letter from George W. Marston expressing opposition of Amendment No. 6 (See above, April 3, 1925).

April 5, 1925, San Diego Union, 1:8, 5:4. Children trudge through rain to support Zoo; kids urged to vote "Yes" on Amendment No. 6.

April 5, 1925, San Diego Union, 1:7-8. Dr. Harry Wegeforth says opponents of the Zoo amendment declare they are friends of the Zoo, but they are spending more money advertising against it than they ever gave for the upkeep of the Zoological gardens.

April 5, 1925, San Diego Union, 15:2-5. Kenneth Gardner, City Planning Commission, prepares plans for Civic Center for Ocean Beach; Council asked to call election there on \$200,000 bond issue.

April 6, 1925, San Diego Union, 1:2-7. Dr. Wegeforth says San Diego Zoo will die lingering death if Amendment No. 6 fails.

April 6, 1925, San Diego Union, 4:1. EDITORIAL: Three Propositions.

That the people of San Diego want the zoo, and want the best sort of zoo that the city can reasonably support is not open to question. This proposition suggests that the administration of the zoo be turned over to the organization that has carried it to its present high standard. That is all. It doesn't propose to take a slice

of Balboa park away from the people --- or even from the park board that now controls its. It proposes to give the administration of the zoo to the organization that at present administers it, and its only effect would be to relieve the zoo commission of the obstacles that are always present when two sets of directors --- however friendly --- are empowered to direct one institution.

Opposition to this amendment has come up unexpectedly, at the last minute, with a slogan of "Save Balboa Park." These opposing the amendment have asserted that the zoo's present condition is the result of "the present system," and have urged that the "system" be retained. The argument does not hold water, of course, as any of the zoo directors can cite improvements made by the zoological society despite the present system, not because of it.

Inasmuch as the zoological society has a membership of 1,000 or more San Diego citizens, and a directorate that includes the mayor and a member of the park board, we cannot see that any "ruin" to Balboa Park is likely to result from allowing the Zoological society to take full charge of the splendid zoo that it has created.

April 6, 1925, San Diego Union, 12:1-2. Open Forum hears debate on Zoo amendment; Dr. Harry Wegeforth appears for proposal of keeping institution out of politics and William Templeton Johnson speaks against proposed change.

April 6, 1925, San Diego Union, 15:3. Court of Honor held at Indian Village Friday evening; 50 scouts appear for badges at outdoor ceremony; Troop 30 wins.

April 7, 1925, Proposition 6: Creates Board of Zoological Commissioners and places Zoological exhibit under their control; tax of not less than 10 cents or more than 16 cents of each \$100 valuation of property for improving parks, plazas and squares; at least 2 cents of each tax to be used for maintenance of Zoological exhibit.

First count	Yes	3,647	Second Count	Yes	3,847	Yes	7,930
	No	4,033		No	6,088	No	13,242

April 7, 1925, San Diego Union, 1:6-7, 3:2-3. The Hammer Club indorsed Zoo amendment after address by director Faulconer and Dr. Wegeforth; Faulconer said attitude of Park Board toward Zoo was similar to its attitude toward the American Legion and former servicemen in general; Wegeforth said Park Board should be abolished.

April 7, 1925, San Diego Union, 1:3-6. Friends say sentiment in city is turning in favor of Amendment No. 6; voters urged to follow children.

April 7, 1925, San Diego Union, 1:1-8. At the polls today remember the police and the fireman, the city employees and the Zoo and vote "Yes" on Amendments Nos. 1, 4 and 6.

April 7, 1925, San Diego Union, 12:2-3. Charles Liftchild, former member of Spokane Park Board, urges citizens to vote yes on Amendment No. 6.

April 8, 1925, San Diego Union, 1:1-2. Bruschi, Weitzel, Maire elected to City Council; school bonds carry; zoo amendment lost; police, firemen win.

April 9, 1925, San Diego Union, 5:4-5. Mrs. Howard Dudley will tell stories to children at Balboa Park, Saturday, April 18, in that part of park adjacent to 6th and Laurel Streets.

April 9, 1925, San Diego Union, 10:1. 10th anniversary of San Diego Exposition held in 1915-16 brings to mind many colorful scenes of days when park was tourist mecca.

April 12, 1925, San Diego Union, 14:4. Easter festival to be held today at Spreckels Organ; recital by Dr. Stewart and soprano solos by Mrs. A. B. Starkey.

April 15, 1925. BALBOA PARK, SOUVENIR GUIDE, SAN DIEGO, CALIFORNIA.

April 21, 1925, San Diego Union, 9:3. Truck men want their park road up Powder House Canyon; what has become of \$5,000 allowed for thoroughfare asks Council; road would be used for heavy trucking not permitted on Pershing Drive; truck people were told to go to Park Board for what they want.

April 24, 1925, San Diego Union, 5:6. Directors of Chamber of Commerce confer with San Diego California Club regarding a representation at the Sesqui-Centennial Exposition to be held in Philadelphia; Colonel Collier urged representation.

April 24, 1925, San Diego Union, 9:7-8. George W. Marston, Wheeler J. Bailey and Reverend H. B. Bard asked City Council conference for annual funds to support San Diego Museum; Museum plans to move from its present quarters to a permanent building near the California Building; directors want to abolish admission fee; exhibit valued at nearly \$200,000.

April 25, 1925, San Diego Union, 22:1 and April 27, 1925, 3:4. American Legion Lyceum is planning to accommodate one of its biggest crowds tomorrow evening when a double program will be presented, including a music program and an address by Congressman Swing in War Memorial Building, Balboa Park.

April 27, 1925, San Diego Union, 5:5-6. Miss Kate O. Sessions writes engagingly from Europe.

April 27, 1925, San Diego Union, 9:6. Boy Scouts to hold field meet at Indian Village Friday evening.

April 28, 1925, San Diego Union, 22:2. Biggest roller coaster in world promised patrons of Mission Beach Amusement Center; Prior and Church to start work within 10 days (illus.).

April 30, 1925, San Diego Union, 12:2-3. Dr. Wegeforth returned from Mexico City yesterday.

May 3, 1925, San Diego Union, Classified, 5:4-5. Dr. Wegeforth, recently returned from Mexico City, will be followed by about ten crocodiles, porcupines, pheasants, parrots and turtles.

May 5, 1925, San Diego Union, 10:5. City Council appropriates \$8,000 for installation of new water mains on 6th Street from Date to Upas Streets; City has no funds to pave half of street that abuts Balboa Park; a half-paved street along Balboa Park is generally regarded as an eyesore and a danger to traffic.

May 5, 1925, San Diego Union, 12:3. Humane Society gave Zoo critic, Richard Wolfe, small comfort; cruelty charge and demand for removal of President Wray because he is a member of the Board of Directors of the Zoo failed to score.

The fact that Richard Wolfe has not been and is not a member of the San Diego Humane Society did not prevent him yesterday from appearing before the board of directors, accusing the San Diego Zoological society of cruelty in its treatment of the zoo animals, and demanding that the humane society remove its president, D. D. Wray, because he is a member of the board of directors of the zoo, which he characterized as "the enemy," and "the torture society."

For some reason, however, Wolfe did not get much farther than the elephants that he complained were chained by their hind legs. Apparently the directors felt that Wray knew more about his job as Humane society president and as zoo director than Wolfe knew, and that the elephants may possibly be made happy without feather beds or Roman baths.

"I don't care to go into the matter," said Wolfe, after reading for five minutes letters that he had written to the press and which had been written in answer to his charges. "I just want to lay the matter before you," he said, and then started in on a 15-minute attack on the management of the zoo and the fitness of Mr. Wray to serve as president of the society.

He objected that the elephants at the zoo were tied short by a chain on one leg, that they had neither food nor water, and that the day was hot. He objected, too, that there was no attendant taking care of them. He did not say definitely, but he inferred that the weather was much hotter than it is in the torrid zone from which the animals came. It was so hot, he said, that they were forced to stick their trunks down their throats to extract therefrom moisture with which to anoint their backs.

He was informed via the indirection of an answer published in the press that the elephants were tied outside while a concrete floor was being completed for the elephants to stand on. But nothing seemed to satisfy Wolfe.

"This is just an evasion by this man, Faulconer, whoever he is," he said. "And besides it is a cruelty to make heavy animals stands on concrete all day. Think how their feet will hurt at night!

"I do not feel that our president is the proper person to serve as president while he is a director of the zoo. It was clever work by the enemy in making him a director of the torture society, so that this Humane society will not interfere. They have already been forced to take the main entrance out of the snake house. We were told that if the charter amendment was not passed the zoo would die. Well, I think it is on its death bed now."

"I never go to the zoo because I don't like it," was the opening shot fired by Miss May Dillenbeck, who was there to hold up Wolfe's hands. She concluded her remarks by declaring that she knows all about what is going on up there at the zoo.

"Dr. Wegeforth is just trying to shut us up by having our president on his board of directors," she continued. "You will print only defenses of the zoo. A veterinarian should be in charge of the zoo, not a vivisectionist like Dr. Wegeforth. Untold cruelty is going on up there all the time. The forcible feeding of the anaconda is terrible.

Miss Dillenbeck was interrupted at this point, and told that it was a kindness to force-feed the big snake, and that it was done to save his life.

“That may be true,” she said, “but it need not be done in public. It is humiliating for the anaconda to be fed that way. After all, a serpent is a serpent.

“You will see that one of these days there will be strict laws that will prevent keeping any animals in captivity. There will not even be goldfish in bowls.

“And the worse is yet to come. The zoo says it is going to put up a hospital for animals. The tigers died from neglect and so have other animals. That hospital will not be for sick animals. It will be for vivisection, for experiment on our dogs and cats. And we will soon be hearing the heart-rending howls of anguish from that hospital when we go to the park. Oh, I know all about that place!”

There was a moment of silence before Mr. Wray arose to defend himself against the charge of being a director of the zoo.

“I did not know,” he said, “that there was any such terrible place in the park. I do not think Dr. Wegeforth knows all about this ‘cruelty.’ I was under the impression that the zoo is a real asset to the city and an educational exhibit. I visit it at least once a week, and I have never seen any cruelty.”

One member of the Humane society directorate immediately arose and expressed her confidence in President Wray and in the zoo. She expressed pleasure at the thought that the Humane society and its ideals were so well represented on the directorate of the zoo. She apparently expressed the feelings of the other directors, for the subject was dropped. Wolfe, not being a member of the organization, was hardly in a position to move the removal of the president. Instead, he rose majestically and announced that he had intended to ask for a Humane officer’s star, but that he did not care to represent an organization with the attitude expressed and he would not honor it by wearing the star. Thus speaking, he left the room, and the meeting adjourned.

May 8, 1925, San Diego Union, 7:3. Fine Arts Society of San Diego filed incorporation papers yesterday with County Clerk.

May 9, 1923, San Diego Union, 1:3-6. Tender love scenes in Balboa Park viewed by youths from camouflaged hiding place; certain secluded spot in Balboa Park much frequented by spooners; police pried out of the youths a list of names of the “lovers,” which now reposes in Police Department safe.

October 4, 1925, San Diego Union, 2:1-5. Idea that San Diego Zoo is self-supporting exploded; gets its reward by providing educational features; starts 1925 with debt of \$26,000; donations reduce amount to \$13,000; operating costs always in excess of combined receipts for its varied activities, by Dr. Harry Wegeforth.

Judging from the comments one hears at the ticket window of the San Diego zoo in Balboa Park, many people have somehow developed the idea that the zoo is self-supporting and is being conducted as any other business for monetary profit. But such is not the case, and financial gain has never been the aim of the Zoological society.

The zoo started the year of 1925 with a debt of \$26,000, but through the generosity of a public-spirited citizen and the rental of some animals, which included the camels given to the zoo by the local Shriners sometime ago, this debt has been reduced to \$13,000.

The operating cost of the zoo has always been in excess of the total of the combined receipts obtained from all of its many sources of revenue. It has been necessary to depend largely upon the charitableness of certain San Diego citizens, who have had the welfare of the zoo so much at heart ever since its earliest conception that they have contributed generously and continuously, and with the realization that they were aiding one of the finest of San Diego's public institutions.

Such an institution as this one is not usually founded as a money-making proposition. Greater results than mere financial rewards may be and are accomplished through the maintenance of all educational projects. And in this day and age, when the native fauna of this and all other countries is fast disappearing, it is only through such organizations as zoological societies that the general public may receive satisfactory and pleasurable enlightenment along the lines of animal life and history.

A list of the expenditures necessary to the upkeep of the zoo would include many items foreign to the average livestock business. Aside from the expenses connected with the department of administration, the corps of attendants, the feeding and housing of animals, and other more obvious needs, it is necessary to provide for new buildings, the building and repair of roads, comfort stations, benches, and for the care of the landscape, many of these things are not included when the expenses of the ordinary stock business are being itemized.

But while the zoo has not realized financially on its investment, it has known a greater profit than any material gain. It has accomplished that toward which it has directed every effort, the education and amusement of thousands of interested persons. Young and old alike take keen pleasure in watching and studying the many exhibits which are found here, and the splendid quarters which have been provided for the animals add to the enjoyment of the visitors. The naturalistic and barless quarters which have been built for

many of the animals have meant greater expense than the ordinary, old-style, iron-barred cage would mean, but the satisfaction of seeing the animals so much at home offsets the difference in the cost of construction.

The location of the zoo grounds has provided a picturesque setting for the hundreds of specimens on exhibition, but the recent work of widening the canyon paths into broad walks has added greatly to the pleasure of a jaunt over the trail that takes in all of the zoo. The benches that are placed near the cages afford an opportunity for relaxation while watching the animals, and hundreds of trees, vines and shrubs, which have been planted, will in the near future provide shade and add beauty to the surroundings.

These things mean added expense, but all are necessary to the welfare of the zoo. Innumerable smaller items constantly present themselves for consideration; some to be ignored, others of necessity to be undertaken.

And each one prevents to some extent the realization of any profit, financially speaking. The zoo is still many thousands of dollars in debt, and expects to be for some time to come.

Although it is not generally known, and the zoo officials modestly refuse to crow much about the matter, they have through their anti-venom distribution department, actually saved six human lives in San Diego county from the fatal effects of rattlesnake bite. Each year 200 people in the United States meet death through the bite of venomous snakes, and the heads of the zoo feel that if, through their knowledge of the snake and its deadly bite, they can lessen the percentage by one life, they have rendered a service to mankind that can hardly be reckoned in dollars and cents.

Mr. and Mrs. Patrick F. O'Rourke certainly were not anticipating any interest on investment when, at a personal cost of between \$40,000 and \$50,000, they purchased two of the Exposition buildings, moved them across the road into the zoo grounds, and put them in first-class condition, decorated and equipped them, and presented them to the Zoological society.

One of these buildings is used as the zoo's administration and concession building, and the other as a Junior Zoo, where children are to be taught the life history and habits of the animals of the world by Dr. W. H. Raymenton, a noted educator.

The people of San Diego should take great pride in claiming Miss Ellen B. Scripps as a fellow citizen. Miss Scripps has given liberally to the zoological work in the past, and has recently made possible the establishment of a zoological research and biological study building, which is to be erected next year upon the zoo grounds. Here will be a place where men, scientifically inclined, may study after completing their college work to fit themselves for a life of service to mankind. When this great institution and the Junior Zoo [are] functioning, San Diego can proudly boast of having the greatest and most outstanding zoo in the world. Nothing like it has ever before been attempted. Certainly the dollars sign could hardly be the god or one who could conceive and foster and work for such an enterprise.

The result of scientific research is not remuneration in dollars. A man who devotes his life to such study does so in the full knowledge that he is destined to remain a poor man as the wealth of the world is reckoned, but he is vastly wealthy in the satisfaction of knowing that he is performing a great and unselfish service to humanity.

For the modest admission fee of 10 cents the zoo offers no apology. Animal food costs money and the animals must be fed. As for the zoo paying dividends over and above the operating cost, the thought is absurd, and a glance around the garden of the thousand or so of exhibits will bring the realization of its absurdity.

But, as has been said before, the zoo has never hoped for monetary reward. The knowledge that it has been of educational value to the children and grown-ups of San Diego, adding materially to their scientific knowledge, and that through its collecting excursions and the general interest it has aroused in outdoor things, as well as through its spacious exhibition grounds, it has provided outdoor recreation which

keeps healthy children healthy and makes weak children strong, all this means the greatest profit, the only reward for which the San Diego Zoological society has ever striven.

October 4, 1925, San Diego Union, Development, 2:2-5, 7:8. Richard Requa says avoid shames in home construction.

November 26, 1925, San Diego Union, 1:1, 2:2-5. City Auditorium burns; Balboa Park building completely destroyed by spectacular blaze; flames started from oil-fed furnace; former exposition structure demolished just before Firemen's Annual Ball; insured for \$12,000.

Fire that started in the oil-fed furnace completely destroyed the Civic Auditorium early last evening. So rapid was the spread of the fire and so fierce were the flames that the building was doomed before a single piece of fire apparatus reached the park.

Nine companies surrounded the blazing structure but, although the firemen risked their lives to get into advantageous positions, they were unable to do more than keep the flames within the building and force the walls to fall in rather than out onto the streets. Only \$12,000 insurance was carried on the building and furniture, and it is estimated the structure could not be replaced for less than \$120,000.

The fire started about 7 o'clock as the auditorium was being made ready for the annual Firemen's Ball. Had it occurred an hour later some loss of life would have been almost inevitable, for the dance floor would have been crowded with revelers and the streets about the building, needed for the use of fire apparatus, would have been filled with parked automobiles.

With the flare-back of the oil furnace that heated the building, the flames seemed to mount at once to the roof according to those first on the scene. The walls, the whole roof and the cornice surrounding the roof were all aflame with almost miraculous speed. The flames shot hundreds of feet into the air and were seen in all parts of the city before they had 15 minutes start. Almost immediately people began to pour into the park from all directions by automobile, afoot and on the street cars. All available police were rushed to the fire, and a group of Boy Scouts were organized to help the police keep the thronging spectators behind the fire lines.

Despite the streams of water that were poured onto and into the building as rapidly as the fire companies were swung into action, the battle was lost before it started. The water seemed hardly to lessen the intensity of the flames and at one time an aerial ladder, on which the firemen were directing a hose through the roof, caught fire and had to be wet down. There were times when one company or another seemed for a moment to have mastered the fire in one section of the building, but the blaze broke out with renewed vigor as the towers, walls and cornices crashed into the flaming pit of the auditorium.

Two sailors who had gone into the park early to attend the ball were the first to enter the blazing building. While the early arriving spectators lined the walks and shouted warnings, the two men --- W. A. Pickney and R. J. Zeller --- crashed the front doors and made a dash for the big United States flag with which the auditorium was decorated. They tore down the flags and pennants as fast as they could until the smoke was so thick they could hardly find their way out and there was imminent danger that the roof might fall in on them. Pickney, a third-class fireman, is attached to the electrical school at the naval training station, and Zeller is a seaman attached to the battleship *Mississippi*.

Among the fortunate aspects of the fire is that fact that there were no serious injuries. Company No. 2 was in the greatest danger with a post at the north or back side of the auditorium. Ladders were up and the men were on the roof pouring water into the holocaust below them. Other members of the company were in the arcade trying to work through the back door. Someone felt the trembling of the roof and gave warning just in time for the men to jump back from danger before the roof fell in. The margin between life and death was a matter of about two seconds.

There was another narrow escape on the same side of the building when some men were trying to sal_____ furniture through a small _____ door. Two men were in the _____ room when an ominous cracking warned them that a section of the cornice some 30 feet long was about to fall. The door to the room was blocked with chairs and it was with difficulty that the men forced their way to safety just as the blazing timbers fell behind them. An instant later the iron stack from the furnace fell away from its burned supports and crashed down where Company 3 had escaped only a few minutes before. Again there was a scurrying for safety and a group of firemen got out from under just in time.

The only injury reported was to Captain F. W. Haslam of Company 11, who had a finger of his left hand painfully cut by a falling timber, and would have been seriously hurt if not fatally injured, but for his helmet which turned the blow. Captain Haslam's injury was dressed by Dr. C. E. Rees, department surgeon, who was on duty at the fire.

Another fortunate feature of the fire was that the slight breeze that was drifting in from the northwest carried the gigantic pillar of flames, sparks and blazing bits of wood to the southeast and away from every other building in the park. An easterly breeze would have made it difficult if not impossible to save the county fair building and then the other buildings in line to the west and south, including the American Legion War Memorial building and the Natural History museum which houses a collection which probably could not be replaced for less than a quarter of a million dollars.

With the wind making no trouble for them the fire fighters were able to concentrate their efforts on the civic auditorium, and, as section after section of the walls toppled inward, they gained gradual mastery of the flames. The last section to fall was the northwest corner. After that crashed down it was just a question of pouring in enough water to flood the wrecked interior and put out any stray fires concealed in the debris. The southwest corner remained standing as did parts of the front wall and all of the lower section of the east wall, but these leaned dangerously and will probably be pushed over as soon as possible to protect those who will find it necessary to inspect the ruins.

Perfect cooperation between the various companies of firemen, the police, civilian deputies, and boy scouts made the battle as effective as it could possibly be. Many of the firemen were off duty at the time the fire started and were dressed in their best uniforms ready to attend their annual social function. These men were conspicuous in the fire, joined with their properly armored comrades in every kind of dangerous and dirty work.

While the fire was still at its height, Assistant General Manager Neil Brown of the Mission Beach Amusement Company sent word to Fire Chief Louis Algren, that the Mission Beach casino would be available to the firemen without cost if they desired to proceed at once with the annual ball as soon as the fire should be extinguished. The chief declined the offer with thanks, explaining that the men would be in no condition to conduct such an affair properly after the strenuous work of the evening. He expressed his appreciation for the offer and for the promptness with which it was made.

The department was put to a severe test during the evening for while every effort was being directed toward the extinguishing of the fire in the auditorium, another alarm was turned in from 2420 Madison Avenue. It was reported that two cottages were afire, and Chief Algren immediately dispatched a battalion chief and two companies. They found, however, that only one cottage was involved, the property of David McAllister. The flames were easily extinguished and the cottage was only partly destroyed. A whole block of cottages was threatened, however, and the prompt work of the fireman probably prevented a second bad fire. This blaze is said to have been started when McAllister attempted to clean some clothes with gasoline.

Shortly after the two companies had been sent to this second fire, the spectators were startled to see a bright red flare in the northern sky, obviously a third fire. The crowd started to desert the fading fire in the park in expectation of a new thrill, but someone remembered that the state college students were burning a monster bonfire on the athletic field to generate enthusiasm for today's football game.

There was no more beautiful building in the exposition group than the Civic auditorium, known in the exposition days as the Southern Counties building. It was in this stately structure of exquisite Spanish design that the counties of the glorious southland exhibited their choicest products to the thousands of visitors who flocked to San Diego in 1915-16.

It was estimated last night, after the raging flames had reduced the structure to charred timbers and ashes, that it could not be replaced for less than \$120,000. Insurance on the auditorium amounted to only \$10,000 with an additional \$2,000 carried on the furniture used in the building.

At the close of the exposition in 1916, the Southern Counties building was turned over to the board of park commissioners, who in turned conveyed the use of the structure to the federal government in connection with the naval training station then established in Balboa park. During the war days it was a disbursing and supply base for the naval trainees and a part of the large ground floor area was used as a storeroom for naval clothing. At various times clothing valued at more than \$1,000,000 was stored in the north wing of the building.

With the end of the war, the building reverted to the board of park commissioners, and in 1920 that body, petitioned by a group of women prominent in the work of the Women's Civic Center, to convert the structure into a civic auditorium for public use. Among the group of women who initiated and aided this change were Miss Alice Lee, Mrs. Dalla G. Haman, Miss Gertrude Gilbert and Mrs. Lillian Pray Palmer. Their request was granted by the park board and the building became known as the Balboa Park Civic auditorium.

Under its new name it gained national prominence as one of the finest structures on the Pacific coast for the holding of big conventions and important public gatherings. It was the scene of state conclaves of various civic and fraternal organizations and within its walls were held political assemblies, grand balls and holiday events in addition to many lectures and public entertainments. It was also a meeting place for many local civic bodies.

In 1922, the committee of women in charge of the auditorium was reorganized under the name of the Balboa Park Auditorium association, of which Mrs. Haman was president in 1922-34 and Miss Lee president from that time to date. Following reorganization of the committee, steps were take to rehabilitate the civic auditorium and in the last five years women members have raised more than \$40,000 for this purpose.

Under their direction a new floor was installed, a new roof was laid, a modern heating plant was built and five kitchens were thoroughly equipped for the handling of large banquets and dinners.

Businessmen of the city in 1923 were of the opinion that other exposition buildings near the auditorium could not be rehabilitated, but spurred on by the results obtained by the women's group in improving the auditorium, they succeeded in raising about \$110,000 which was used to restore the American Legion building, the Art building, the Natural History museum and the County Fair building.

Miss Lee said last night that steps would be taken immediately seeking the erection of a new and modern Civic auditorium, preferably on the same site. Besides Miss Lee, officers of the association include Mrs. George McKenzie, first vice president; Mrs. Lydia Fo____ Frank, second vice president; A. H. Wright, secretary; and O. F. Darnall, treasurer. The board of directors includes 20 prominent San Diegans.

November 26, 1925, San Diego Union, 2:2-3. Jewel of exposition buildings had varied service in its short life.

November 27, 1925, San Diego Union, 1:7, 2:5-6. Finer Civic Auditorium city's aim; more desirable and fireproof building to replace that razed by blaze; hundreds visit ruins.

Plans for rebuilding the Civic auditorium as a fireproof structure better adapted to auditorium purposes than the old building, were forming yesterday as nebulously as the wraiths of smoke that still drifted over the blackened heap that was once the most beautiful building in Balboa park.

Officers of the Civic Auditorium association began at once to count the cost, to figure on ways and means and to hope and plan for the phoenix they hope to see arising from the ashes of their seven years of hard work. A committee from the junior chamber of commerce will meet today with a committee of directors in an effort to work out some sort of plan.

Neither the officers of the association nor the public are under any misapprehension regarding the cost of an undertaking such as the rebuilding of the auditorium.

The new Bridges art museum is costing more than \$300,000.

The new high school auditorium will cost, when completed, about \$380,000. With slightly different construction and the elimination of the elaborate opera chairs and stage equipment, the building could be reconstructed as a fireproof auditorium for less than either of the buildings mentioned; but, even so, no permanent construction of any size could be built for less than a quarter of a million dollars.

That the auditorium association will have the full support of the city became evident yesterday when two more volunteers came into **The Union** office with \$5 each, expressing the hope that enough such donations will come in to warrant proceeding with plans for a new auditorium.

"Enclosed find five bricks for the new Civic auditorium," wrote Lewis W. Fox of the county horticultural commission.

The other "five bricks" to come in yesterday came from Captain W. P. Cronan, U. S. N. (retired), known all over the city as "Billy." With his "five bricks" Billy Cronan wrote:

"The loss of the Civic auditorium appears to be a blessing in disguise, for had the fire broken out two or three hours later, with the building crowded and the adjacent streets congested with parked automobiles, there might have been many lives lost.

"Furthermore, the building was ill-adapted to its purpose, being especially deficient in the two qualities the most desirable in that the acoustics were bad and the floor unfit for dancing.

“A plan occurs to me for the replacement of this building without delay, as a matter of civic pride. First, replace the Civic auditorium with a fireproof building of approximate design, simple in character, with especial regard for acoustics and dancing. Second, raise the money needed by popular subscription in amounts limited to \$5 each maximum, from individual citizens, and 25 cents each maximum from school children, so that everyone can share. Third, the construction of the building to be superintended by a committee of businessmen selected by the chamber of commerce. Forth, subscriptions to be paid at banks, newspaper offices, and in the schools.

“Enclosed find check for \$5.”

It is pointed out that any reconstruction must be fireproof, both for the sake of economy and because the city zoning law would never permit the erection of another frame structure in the park.

The tragedy of the fire is two-fold: the loss of the Civic auditorium, one of the most beautiful buildings in the park, and the small amount of insurance carried on the building, which was 13 or 15 times as valuable as the total of the fire insurance policy. The reason for the small insurance, is that the building, like the other temporary structures in the park, was nothing but tinder, an ideal place in which to start a disastrous fire. The rates for insurance on the building were prohibitive, and the maximum that the Association could afford was carried. As a matter of fact, it is understood that directors of the association decided last year not to renew their insurance as they were paying too much for it. The company, however, renewed the insurance and the directors decided to pay the premium, so that at least was saved from the wreckage to pay for clearing up the debris.

“All those old exposition buildings are nothing but fire traps,” said J. W. Sefton of the Natural History museum, last night. “I go to bed every night afraid that I will wake up in the morning to see the park buildings wiped out and with them collections of material that could not be replaced for less than \$1,000,000, and in several years of hard work. In the Natural History museum alone we have exhibits worth about a quarter of a million dollars. But we cannot afford to carry proper insurance. The rates are too high.

“I made myself very unpopular some years ago by advocating the razing of the park buildings. They are a real menace. The people here are living in a sort of fool’s paradise. We think we have something in the park that is beautiful and of which we can be proud. In reality, we have some houses of tinder. They are pretty to look at, but we may wake up any morning and find them gone, and our million dollars worth of exhibits with them. If there had been an east or southwest wind last night, nothing could have saved the county fair building, and probably the other buildings right up to the new Bridges museum on the plaza.”

The blackened pit and the few standing skeletons of what once were walls attracted almost as large crowds to the park yesterday as swarmed in Wednesday afternoon to watch the blaze. The fireman and policemen had roped off a large area about the ruin, however, so that no sightseers could get within range of the walls if any of them should collapse. A detail of firemen was on duty all day, searching through the ruins for signs of fire, and putting out little blazes that were hidden under the old charred timbers, protected from the tons of water that had been poured onto the building the night before.

The front and rear arcades of the building still stand. The gray room at the southeast corner seems almost untouched by the flames; an elaborate paper-confetti decoration suspended from the ceiling being unscorched. The kitchen and equipment in the basement were hardly damaged. Water, however, had ruined the room, and the second story was destroyed by fire. The east wall still stands, a paper-thin layer of charred wood supported by a coating of plaster on the outside. Parts of the north and west wall remain, and the room at the southwest corner charred and soaked with water, is a funnel through which chairs, pianos, and other furniture of the room and the persimmon room on the second floor were poured into the basement when the burned floor joists gave way in the center.

The great hall of the auditorium is a blackened pit, filled with writhing steel tie rods, fallen ceiling, and great twisted roof and ceiling beams, either all but consumed or charred from end to end and warped by the heat and the water. It is a black chaos of plaster, burned flooring, beams, rods, and charred decorations, all soaking with water.

As in the case of every fire, someone was heroically useless. Some unknown hero rushed into the blazing hall and tried to rescue the big bass drum belonging to the orchestra. All he hauled out was the canvas truck in which the drum is transported from place to place, while the drum itself, worth several times the cost of the truck, was destroyed.

The E. P. James Symphonic band, which was to have furnished music for the firemen's ball, had already placed its instruments ready for the beginning of the night's entertainment. Everyone of the instruments was lost, adding some \$425 to the total loss of the building itself. The instruments were not insured, Mr. James explained, due to the high insurance rates on instruments moved about from place to place as were these.

November 27, 1925, San Diego Union, 4:1. EDITORIAL: Questions

The community has lost \$120,000 through the destruction of a civic auditorium which was both a first-class fire hazard and insufficiently insured. It was our good fortune, not our good management, that prevented a terrible loss of life in the auditorium fire. . . . Might it not be wise to appraise other public buildings in the light of what we have learned from this disaster?

November 27, 1925, San Diego Union, 7:4. Thanksgiving Day services at Spreckels organ yesterday morning drew thousands.

November 28, 1925, San Diego Union, 1:5, 3:3-4. Fire Chief Algren says water supply failed at fire; City Manager Rhodes denies charge, blames alarm tardiness for park loss; discuss rebuilding plans.

San Diego's newest problem, "How shall we replace the civic auditorium?" centered at the city hall yesterday, but nobody seemed to have the answer.

Mayor Bacon said he intended to take the matter up with the auditorium association, but that Miss Alice Lee and Mrs. Della Haman, two of the leaders in that organization, are out of the city.

Because of the many "drives" just ended and the fact that the Community Chest soon will be appealing to the people again, the mayor said he disliked to start a movement to raise funds for an auditorium by popular subscription.

The fact that so little insurance --- \$12,000 in all --- was carried on the building, was deplored yesterday, but it was explained that insurance on such structures is high and that the association was without funds to carry more insurance. Insurance men are beginning to write letters to the council offering to insure the other buildings for larger sums, but it is doubtful if the park commission, or organizations controlling certain buildings, can find the money.

City Manager Rhodes denied yesterday that the firemen were handicapped by lack of water pressure at the fire Wednesday night. Rhodes declared a check of the pressure showed enough water was available to put out any fire had the firemen been there in time.

The manager blames the tardiness in alarm for the destruction of the auditorium, declaring that was beyond control before the fire apparatus arrived.

The elimination of every possible fire hazard in the exposition buildings in Balboa Park was urged yesterday by Louis Algren, fire chief, as the most important step to be taken in connection with the preservation of those structures.

"We found Wednesday night," said chief Algren, "that the water supply in the park is not dependable, and it is only through the purest luck that we did not lose every building in the exposition limits.

“Every fire hazard must be eliminated from these structures if we hope to keep them. The history of like structures throughout the United States is a history of destruction, for they are invariably destroyed by fire, often with loss of life.

“All events, such as the county fair, should be prohibited in the exposition buildings. Large crowds of people, flimsy decorations, flaming exhibits --- all these may result in a holocaust which may be obviated by preventive measures, but which is inevitable if definite steps against them are not taken now.

“The exposition buildings are the pride of the city. The fire department feels that it can cope with any situation arising in the park with its present facilities, including Station No. 3 at Fifth and Palm Streets, Station No. 5 at Ninth and University, and Station No. 2 at Tenth and B Streets. But these facilities must have a chance to operate and this chance can be given only by regulation of the crowds frequenting the buildings and the events held in them.”

Chief Algren said that an investigation of the fire in the civic auditorium was started by his department immediately after the destruction of the building. John E. Parrish, acting assistant fire marshal, is in charge of this investigation, and a report of its findings will be submitted to the chief as soon as the work is completed.

The real work of preserving the buildings in the exposition grounds, according to Chief Algren, lies with the park commission, with which the fire department will cooperate to the limit, the chief said. He pointed out the fact that the enforcement of laws and regulations within the confines of the park lies largely with the park commission, and that the primary work of insuring the permanence of the exposition buildings must be done by the commission.

“The big thing,” the chief said, “is the elimination of every possible fire hazard. The fire department knows the importance of this --- it is enough to say that the water supply Wednesday night failed dismally. The crowding of buildings must be eliminated, the holding of big affairs in which fire hazards are apparent must be prohibited, and, in general, a careful supervision of the buildings must be maintained if we are to keep these distinctive features of our civic progress.”

Mayor Bacon and City Clerk Wright, the latter secretary of the auditorium association, visited the ruins yesterday, but the mayor said he was not conducting an investigation and had no blame to place on anybody for the loss of the building.

Oscar G. Knecht, city building inspector, also made an inspection of the ruins and yesterday made public his findings as follows:

“The building department is not lamenting the loss of the Civic auditorium. Just a few years ago it was necessary to rebuild much of the underpinning and add additional shores and braces. The entire space beneath the main floor was a network of wood braces, struts, posts and ties. A regular kindling forest, so to speak.

“At one time the long span roof trusses started to fall. These were also rebraced and tied up, making them at least temporarily safe. This necessitated placing numerous ties and braces in the large attic open space, making another wood forest.

“Much of the electric wiring grossly violated the electric safety laws and was extremely dangerous.

“We have not forgotten that the building was only originally designed as a temporary structure, to last, perhaps, not more than five years. In the meantime, the patching, bracing and rebracing prolonged the structural safety at least a short while. However, the mass of kindling and tinder and the dangerous electric wiring created a potential fire hazard. It would have been possible for the entire basement to have been a mass of flames, and a crowd on the floor above would not have known the danger until part of the floor collapsed. For this reason alone, the building inspector is glad the building is gone.

“Our building ordinance does not give sufficient authority to condemn the building because of the large amount of wood construction. However, in another year or so the building would have been condemned for structural reasons, unless additional wood bracing and shoring was again resorted to.

“Most of the other frame and plaster fair buildings in the park are equally as dangerous, a few having nothing more than wooden foundations.”

December 6, 1925, San Diego Union, 1:6, 2:3-4. Reginald Poland of Detroit has been appointed director of the new Fine Arts Gallery in Balboa Park; budget for 1926 of \$25,000 is secured by appropriation of the City Council through the Park Board of \$19,000 and a gift of \$6,500 from Mr. and Mrs. A. S. Bridges

Reginald Poland of Detroit has been appointed director of the new Fine Arts Gallery in Balboa Park. The members of the executive committee said yesterday they made this announcement with pleasure, feeling that in Mr. Poland they have found a man with all the qualifications to meeting the exacting requirements of the post.

"The successful management of such a great art gallery as the one Mr. and Mrs. Bridges have given to San Diego," says the announcement, "requires equipment of three distinct sorts --- executive ability, thorough technical knowledge and the gift of presenting art for the pleasure of the public. Mr. Poland, though still in his early thirties, has demonstrated the possession of these varied abilities. Knowledge of art he has breathed in from his boyhood for his father was head of the fine arts department at Brown University. He himself took his first degree in this department, his master's degree at Princeton, and won a fellowship of the American Academy at Rome, which the outbreak of the great war prevented his using. He then spent a year at Harvard, using the collections in the Boston and Worcester museums in connection with his work. He had had four seasons of study in Europe in addition to two years with the American Expeditionary Force in France.

"One of these European years was spent studying with an expert in the galleries and museums of Central Europe and Italy. His last journey, accompanied by Mrs. Poland, he devoted chiefly to Spain."

The year before he went over seas, Mr. Poland was appointed director of the Denver Art Association. At the end of the war he might still have used the fellowship at Rome, but Denver urged his return so strongly that he went back. The next year he joined the staff of the Detroit Institute of Arts. In Detroit he had managed the executive educational activities of the institute besides doing curatorial work in the museum and getting out many of the monthly bulletins. He has arranged lecture courses for different sorts of people --- for children, for teachers, for the general public, and has given numberless lectures himself. His idea of what the relation between an art museum and the public should be is told by quoting a sentence of his in the October bulletin of the Detroit Institute:

"Instead of a gloomy vault containing treasures almost too precious to be even looked upon, the museum has become an interested, living friend, anxious to share its possessions with all. It now knows that the greatest joy comes in sharing beauty with others."

During the five years he has been in Detroit, Mr. Poland has received offers from Columbus, Ohio, the Carnegie Institute, John Herron Art Institute of Indianapolis, the University of Indiana and the Chicago and the Pennsylvania museums. Recently he spent several days in San Diego conferring with the executive committee of the Fine Arts Society and expressed much enthusiasm for the opportunity offered here for the upbuilding of the finest sort of organization. He feels that Southern California is destined to become a great

cultural center, especially on the artistic side, and is happy to have the opportunity to assist in this development.

Mr. and Mrs. Poland will arrive in town early in January and the Fine Arts Gallery will be opened soon after the first of the year. The budget of the Fine Arts Gallery for 1926 of \$25,000 is secured by appropriation of the city council through the park board of \$19,000 and by the addition of the generous gift of \$6,500 from Mr. and Mrs. Bridges to complete the budget.

With the Fine Arts Gallery in Balboa Park, to house it with financial security and an able and enthusiastic director, the Society is looking forward to an interesting and successful first year in its new home. The officers of the Fine Arts Society are: Honorary president, Appleton S. Bridges; honorary vice president, Lyman J. Gage; honorary vice president, Miss Ellen Browning Scripps; president, Willett S. Dorland; first vice president, G. Aubrey Davidson; second vice president, William H. Sallmon; treasurer, William H. Wheeler; secretary, William E. Harper; members of the executive committee, Miss Alice Klauber and Miss Gertrude Gilbert.

1926

Summary of Events in 1926

(Note: Dates of events are approximate only.)

New Zoo (January 12, 1926)
State College in Balboa Park (January 22, 1926)
Yorick Theater (February 4, 1926)
Nolen's New City Plan (February 6, 1926)
New Fine Arts Gallery (February 27, 1926)
Natural History Museum (March 1, 1926)
Playground Board Fires Tam Deering (April 20, 1926)
Rose & Spring Flower Show (April 21, 1926)
Trucks on 6th Avenue (May 4, 1926)
John D Spreckels Dies (June 8, 1926)
Zoological Hospital (June 16, 1926)
Mormon Tabernacle Choir (July 30, 1926)
Balboa Park Day (August 4, 1926)
Fall Flower Show (September 8, 1926)
County Fair (September 12, 1926)
Argentine Ants (September 14, 1926)
Horseshoe Club (October 17, 1926)
O'Rourke Institute (November 4, 1926)
Voters Reject Land Grant to State College (November 23, 1926)
Tablet to Honor Park Founders (November 30, 1926)
Nolen's Plan for Balboa Park (December 13, 1926)
Nativity Tableaux (December 25, 1926)

January 1, 1926, San Diego Union, 6:1-2. American Legion building at northwest corner of Plaza is being reconstructed for Legion activities and will contain one of the finest museums of World War I relics in the west.

January 1, 1926, San Diego Union, Water Section, 3:8. Splendid site afforded County Fair in Balboa Park.

January 1, 1926, San Diego Union, Water Section, 9:3-6. Collections of educational value in San Diego Museum.

January 1, 1926, San Diego Union, Education, 7:4-6. Comprehensive exhibits, outdoor nature studies feature Natural History Museum's Work, by Clinton Abbott.

January 1, 1926, San Diego Union, Education, 8:1-2. San Diego's distinctive architecture by Richard S. Requa.

January 1, 1926, San Diego Union, Recreation, 6:1-8. San Diego's great park system gives chance for variety of recreational and cultural expression.

(Edited in part because of execrable writing.)

San Diego outranks most cities in the United States in area, only five of them including more land within their corporate limits, and it has taken advantage of this to set aside over two dozen parks covering a total of 2,600 acres with the largest, Balboa Park, occupying 1400 acres in the city's center, thus making

easily available to a great proportion of its citizenship an area of great beauty, providing a wide variety of recreation.

Many elements have contributed to make his great park a wonderland of beauty and usefulness, besides its size and location. Its topography, commanding viewpoints seamed by deep canyons, but all intriguing possibilities for artistic landscaping. The prevailing climatic conditions afford the utmost for garden treatment. Its great area has permitted abundant space for golfing, tennis, equestrianship, archery and practically every athletic feature, including a fine stadium that will seat 35,000 people. And last, but far from least, the international exposition which was held in San Diego in 1915 has left a superb and exquisite group of buildings in Spanish-type architecture which are now occupied by, and for, the various cultural activities of the community: the drama, music, art, museum and similar interests, each being splendidly housed within one of more of these beautiful buildings. The zoo, too, now the third largest in the United States, occupies several buildings and about one hundred and fifty acres of park land.

Any attempt to picture the charm of this great park, its buildings, its drives and walks, its gardens, shrubs or trees, or even to pick out its greatest features, would be futile in the extreme because of Balboa Park offers to each individual too wide an appeal and he must, of necessity, center his approbation on one or two details which, like as not, another overlooks entirely in his particular admiration of something else. Six hundred acres, intensively developed in landscaping and architecture, is more than one mind can encompass, even though visited regularly over a long period, for each day brings forth its quota of shrub or flower. Even the architect is contriving his frequent contribution through the courtesy and financial aid of an interested citizenship which is constantly adding to what park officials must do for the upkeep and improvement of this great park.

The main entrance into the park is by way of Laurel Street, which leads to Cabrillo Bridge, whose quarter-mile span connects the Exposition grounds with the western part of the park. From this bridge the view is one of the most delightful to be had in the city. At 112 feet straight below may be seen the lotus pond, where, in season, lotus and pond lilies spring in thousands, casting their reflection upon the quiet bosom of the pond.

To the north, bison and other ruminants are seen grazing in their paddocks at the Zoological garden; to the south are seen the downtown district, the bay, the Silver Strand of Coronado, and the still more distant Coronado Islands of Mexico.

Artists from the west and from the capitals of Europe have visited San Diego so that they might put on canvas the charm that has made this spot a lure to lovers of beauty. Many of these canvases have been admired in the galleries and salons of London, Paris and Rome.

Nowhere in this country has nature so favored the horticulturist, and the profusion of blooms never wanes. The flowers of spring and summer are crowded out by the no less prolific flowers of fall and winter. The procession is endless and is of infinite variety. Stately yuccas from the desert grow among foliage of tropical origin. Manas (?), that germinated beneath the snows of the far north, bind the tall trunks of pines. Hibiscus from the South Seas flaunt their radiance amid roses and lilies, set against a backdrop of graceful palms.

At the east end of the Bridge stands the Administration building, flanked by the majestic tower of the California State Building which houses the Scientific Library, while the Fine Arts Building, with its exhibition galleries and Academy of Fine Arts, faces the California State Building and with it forms a small plaza.

East of these and facing each other on either side of the Prado, or main street, are the Science of Man and Indian Arts Buildings, in which are shown the archaeological anthropological and Indian art exhibits of the San Diego Museum. The buildings form the western wall of the Plaza de Panama, a paved court, where outdoor dancing, fiestas and entertainments are sometimes held.

On the north end of the Plaza and facing the great outdoor organ about two blocks to the south is Balboa Park's newest jewel, the recently completed Bridges' Art Gallery. A liberal expenditure of money and of thought on the part of its donor has given San Diego an architectural masterpiece.

At the northwest corner of the Plaza, the American Legion is reconstructing the former Home Economy Building as a site for its activities and for a museum of World War relics.

The Natural History Museums has reserved the Foreign Arts Building, at the southwest corner of the Plaza, to house those exhibits that cannot be accommodated in the former Canadian Building, its present home.

South of the Plaza de Panama, flanked by its graceful peristyle and framing views of the Pacific Ocean, the great Spreckels Organ commemorates the love of John D. and Adolph B. Spreckels for their fellow citizens.

North of the Prado and east of the American Legion Building, a lagoon, with thousands of pond lilies and lotus blossoms, mirrors the lath dome of the Botanical Building, though which bamboo, some nearly 70 feet high, poke their heads. In this building and in its adjoining conservatory tropical plants, that would not thrive even in San Diego's mild climate, are displayed. Rare exotic and delicate native plants grow here under perfect growing conditions.

The Domestic Art Building, one of the largest and handsomest of the Exposition group, is used for industrial and agricultural shows, the annual County Fair in the fall being the most important.

The San Diego Electric Railway received much favorable comment for its restoration of the colonnade forming the car station and east entrance to the Prado. This entrance building, through which about 90 percent of visitors by trolley enter the Prado, is now one of the most attractive features on the former Exposition grounds.

The Pepper Grove picnic grounds is a popular section of the park. Tables in shaded nooks, drinking fountains, playground equipment and other accessories attract many picnic parties to this spot. San Diego Girl Scouts occupy to buildings in the Pepper Grove, and their activities add to the spirit for which Balboa Park is noted.

The Zoological Society has restored three of the Exposition buildings for administrative, educational and exhibit purposes in connection with a 150-acre tract that they have transformer into an zoological garden. The Society maintains the largest collection of animals, birds and reptiles in the west.

San Diego Boy Scouts occupy a group of replicas of Indian community houses in the Painted Desert at north end of the former Exposition site. The Atchison, Topeka and Santa Fe Railway Company, who built the Painted Desert, donated the complex to the City of San Diego at the conclusion of the Exposition. The Boy Scouts were chosen as tenants after they promised to take care of buildings and grounds.

To the Board of Park Commissioners and to Park Superintendent John G. Morley is due the credit for handing an park project that includes features seldom found in the parks of other cities. They have promoted the development of the park and encouraged citizens to make the park a cultural center as well as a place for San Diegans and visitors to enjoy.

Because of the Park Board's hospitable policies, many citizens have given time, energy and money to establish and develop cultural institutions in the park that afford pleasure to thousands of visitors.

January 3, 1926, San Diego Union, 16:6-7. R. A. Addison says San Diego Zoological Gardens will be finest in United States in another year.

January 3, 1926, San Diego Union, 17:2. Everyday at local zoo is fish day for elephant seals (illus.).

January 3, 1926, San Diego Union, Development, 7:1-8. Finished plan made by architect Requa from Miss Amy Lyon's roughly-drawn suggestion in **The Union's** small home plan competition.

January 8, 1926, San Diego Union, 2:3. Dr. H. M. Wegeforth refuses to get excited over Dr. W. H. Raymenton's verbal attack upon him.

Dr. Harry M. Wegeforth, president of the San Diego Zoological Society, refuses to get excited over a verbal attack made upon him by Dr. W. H. Raymenton, director of education at the zoo.

Dr. Wegeforth declared last night that Raymenton's declaration that "what the society needs is a president who will carry out the will of the directors," is entirely uncalled for.

"The board of directors is composed of prominent citizens," said Dr. Wegeforth, "who would not be dictated to even if I were inclined to try to dictate."

The annual election of the society is set for next Monday night and Dr. Wegeforth has mailed proxy blanks to the 405 members of the society. He is a candidate for re-election as president, and is not worrying over the result.

Dr. Raymenton started the fight on Dr. Wegeforth because he declares the O'Rourke Zoological Institute is not receiving enough funds for its operation from the zoo gate receipts and other receipts. It is his idea to incorporate the Institute and make it a separate institution from the zoo.

Dr. Wegeforth said last night that the progress made by the zoo is well known and that last year 250,000 persons visited the zoological gardens. He said that all moneys donated to the zoo are spent in improvements, such as are desired by the donors. He expressed the opinion that whatever dissension may have arisen in certain sources soon will be ironed out and the zoo will continue along its successful lines.

Raymenton's assertion that the "zoo is a public property and not a one-man proposition," merely caused Dr. Wegeforth to smile.

President Wegeforth is given credit for having built up the zoo through years of hard work without any compensation whatever.

January 9, 1926, San Diego Union, 7:1. City Park Board enters Zoo fight; Attorney Higgins to investigate Commission's jurisdiction, submit report.

The city park commission yesterday entered into the controversy now being waged in zoological circles, and set for City Attorney Higgins, in a effort to ascertain just what jurisdiction the commission has over the zoo.

The city attorney was accompanied to the commission's rooms by Mayor Bacon. He declined to given an offhand opinion as to the commission's authority in things zoological, but promised to furnish the commission with a written report within the next few days.

The commissioners said that they had been informed that several people had been bitten by an elephant seal at the zoo, and wanted to know of the commissioners could be held legally responsible for damages.

January 10, 1926, San Diego Union, 14:2-4. San Diego Zoo trains once vicious wolf to take leisurely strolls on end of leash.

January 10, 1926, San Diego Union, Development, 7:2-4. The Entrance Hall, by Richard S. Requa.

January 12, 1926, San Diego Union, 8:1. Dr. H. M. Wegeforth to head Zoological Society another year; name heads list of five directors when vote cast; report shows 365,043 persons visited park institution in twelve months.

Re-election of Dr. Harry M. Wegeforth, as president of the San Diego Zoological society, was made certain last evening when the annual election of members of the board of directors of the society was held at the zoo's administration building. Dr. Wegeforth's name led the list of the directors who were unanimously elected for the ensuing year. Dr. William H. Remington, the sixth nominee, having moved the closing of nominations before his own name was read.

The directors of the society for 1926 are: Dr. Harry M. Wegeforth, Patrick F. O'Rourke, Frank C. Spalding, A. T. Mercier and D. D. Wray.

The meeting was attended by about 25 members of the society, but a great proportion of the membership was represented by proxies. The election was without incident, and followed the reading of the reports submitted by Dr. Wegeforth and the heads of the various departments of the zoo.

In connection with these figures, Dr. Wegeforth said that a count of automobiles parked outside the zoo on weekdays during the year has shown that more than one half of all visitors to the grounds were from without the state.

Dr. Wegeforth also announced that the ground plans for the research building and animal hospital for which Miss Ellen B. Scripps has given \$50,000, have been prepared and the preliminary details of the work of construction now are being worked out. This building is to be placed on a plot of mesa ground back of the California Building. The land was given to the Zoo by the Board of Park Commissioners.

Another feature of the report was the statement that more than 2,000 trees have been planted within the confines of the zoo during the last year. These trees are being planted under the supervision of John G. Morley, park superintendent, according to a definite plan of permanent improvements, so that within a few years the grounds will be among the most beautiful sections of the park.

The society last evening endorsed unanimously the action of the Board of Directors in naming several citizens of San Diego as benefactors and patrons of the society. Benefactors are those who have given \$10,000 or more to the zoo, and those names last evening were John D. Spreckels, Mrs. Ellen B. Scripps, Patrick F. O'Rourke, Mrs. Patrick P. O'Rourke, Miss Anna Zimmerman. Patrons are those who have given \$1,000 to the zoo, and those named last night were John Burnham and Ralph Granger.

The treasurer's report showed that with construction now underway the zoo has expended at total of \$350,000. The indebtedness of the society, which was \$26,000 a year ago, has been reduced to \$12,000.

Other reports submitted last evening were those of Dr. William H. Remington, director of education, and L. M. Klauber, curator of reptiles.

Following the election of offices, a resolution endorsing the work of Dr. Wegeforth was read from the floor and unanimously adopted by the members.

An announcement of the president, which came as a surprise during the meeting, was his publication of the fact that arrangements have been made to put two sightseeing buses at work in the zoo on a system of roads, which will take visitors to every part of the grounds. Accompanying the buses, will be guides, the entire innovation being designed to make a visit to the zoo as easy as well as a pleasant experience.

January 13, 1926, San Diego Union, 7:5. W. A. Hammon, head of Public Address Department, San Diego High School, told Kiwanis Club last night that San Diego State College should be located in the northeast corner of Balboa Park.

January 16, 1926, San Diego Union, 1:8, 2:5-6. Board of Park Commissioners votes to bar college from Balboa Park; teachers' proposal to place new state institution there causes flare-up from prominent residents.

While members of the Board of Park Commissioners were engaged yesterday in drafting a resolution of unqualified opposition to further encroachment on park lands by institutions that are not essentially park features, a number of well-known citizens, all of whom have shown definite interest in Balboa Park and its increasing beauty and worth, were dictating interviews in which they expressed the same opinion as that carried in the Park Board resolution.

The resolution adopted by the Commissioners referred directly to the proposed plan of allotting a part of the park to the new state college and in passing it --- the Commissioners said that they believed they were expressing the views of a majority of the citizens of San Diego. These views, Commissioners declared were summed up in a statement that the people of San Diego wish to see the park remain solely a park and, as such, a magnet for the city's many visitors and a continuing heritage of beauty for all who may call San Diego their home now and in the future.

The matter was brought before the Commissioners, by E. N. Jones, member of the Board.

"I have been reading where some high school teacher is proposing that a site in the park be given over for a new state college," he said. "I believe now is a good time to nix this plan in the bud and preserve the park for the people for all time."

Jones then offered the following resolution, which was unanimously carried:

"Whereas. The Board of Park Commissioners, having observed in **The San Diego Union** of January 15, 1916 that W. A. Haman, head of the public speaking department of the senior high school, advocates placing the new state college in Balboa Park; now, therefore be it

"Resolved. That the Board of Park Commissioners, believing that they represent the wish of the people of San Diego that park departments lands should be preserved for the use of the public, stands unqualifiedly opposed to any further encroachment upon park lands for institutions which are not essentially park features."

John Forward, Jr. president of the Board, spoke strongly against the move to cut another slice of the park. Several free sites have been offered for the state college, Forward said, and he expressed belief that some one of these offers be accepted rather than an attempt to take away some of the park.

W. Templeton Johnson, another member of the Board, came out strongly against the plan to put the college in the park.

"There must be a line drawn somewhere to stop encroachment on the park," he said. Johnson produced a plan of Central Park, New York, showing that if the authorities there has permitted it there would be more activities going on in that part than there would be space for. There is a similar danger confronting San Diego, he said.

The opinion of those interviewed by **The Union** during the day was as emphatic in its unanimous opposition to cutting further into the park. In every instance, those who stood unreservedly for the

conservation of the park, expressed their high regard for the officials of the state college and declared that they believed the state college is destined to become one of the most important as well as one of the largest educational institutions in southern California.

The belief in the importance and ultimate size of the college was one of the chief reasons urged against its being placed in the park. It was pointed out repeatedly that while the placing of the first units of the proposed new college in the park would mean comparatively little, the demands of the institution as it expands will have to be met with increased allotments of park land.

But overshadowing even this reason was the universal belief that Balboa Park is a priceless heritage which should be preserved for the citizens of San Diego in all its present extent. Those interviewed stressed, in every case, that fact that Balboa Park is needed and that as the city grows it will be needed more. Its increasing beauty, its charm of hill and valley and level greensward, the opportunities it gives for seclusion from the noise and turmoil of the city, its ideal location --- all these thoughts were brought out by the citizens who were interviewed yesterday.

An interesting view of the situation and one which is valuable in that it was expressed by a visitor to San Diego, was that of W. B. George, a prominent Montana man, former state senator, and one of the builders of the fine city of Billings. George has fallen in love with San Diego, and his friends are expressing the hope that he will come here to stay permanently. In discussing Balboa Park, his words were those of a keen observer whose opinion came from experience.

"If I may be permitted, though not a resident of your city, to say a word on this question. I should like to," he said. "I have had some experience in laying out grounds for schools and normal schools and I am convinced that such an institution as San Diego State College will need, at least ultimately, about 80 acres of land, perhaps more. To take such a parcel out of the beautiful park which San Diego has would, in my judgment, injure the park.

"The college, if I may be allowed to say so, ought to go to some place where there is plenty of room for it now and for its natural expansion. It might well have acreage devoted to agriculture and the growing of fruits, particularly citrus fruits. Students at such institutions in Montana, Wisconsin and other states, have the opportunity to study those subjects and when they graduate they know a lot about their own states."

G. Aubrey Davidson, president of the Southern Trust and Commerce Bank, chairman of the Civic Affairs Committee of the Chamber of Commerce; former president of the Panama-California Exposition, and member of the State College Committee was explicit in outlining his ideas concerning the preservation of the park.

"I am very much opposed," he said, "to giving away any more of Balboa Park. Although I am a member of the State College Committee, the advantages connected with putting the State College in the park must be presented to me with real reasons behind them before I will consider them. I feel that no civic proposal is so important as the preservation of the park in all its present extent, and that no matter in which the citizens of San Diego may give their attention is so vital as this."

George W. Marston, who has been one of the most active and devoted of San Diego citizens in preserving and increasing the beauty of the city and its surrounding country, and whose opinions are those of a settled and mature judgment in the matter of civic development, concentrated the thoughts of all who were interviewed in a statement which went at length into the whole problem. He said:

"The essential thing is the park, and the park means landscape scenery, and the affording of large spaces of ground for recreation, including facilities for golf, baseball, tennis and other sports which require acres of land.

"Now, while the park is large, we must remember that of its 1400 acres, a very great part consists of canyons. The encroachment of buildings upon the park will rapidly exhaust all its level land. Further than this, placing buildings upon the park land will eventually destroy its character as a park.

“We build parks to get away from the city, and in the case of Balboa Park, we, as citizens, should take a definite part in seeing that its natural beauty is conserved. It is said that we have much more land than we can take care of. My feeling in this is that there are some parts of Balboa Park which should be kept in their natural beauty.

“California will be so densely populated in the future that there will be little natural country left next the sea coast, and it is essential to have not long large cultivated areas but as much land as we may preserve in its natural state.

“I feel that the encroachments of buildings, such as those of the exposition and the proposed state college, detract not only from the beauty of the park but from the objects for which it was set aside and for which the majority of our citizens desire to keep it. I believe that these encroachments have gone as far as they ought to go, and that we should direct our efforts to conserve all the park for the future.”

January 16, 1926, San Diego Union, 4:1. EDITORIAL: A Needless Generosity

We are not hostile to the enterprise of a new college --- quite the reverse. We are simply quite certain that there is no need for making a further inroad upon Balboa Park and that only an obvious and pressing need would excuse any such inroad.

January 16, 1926, San Diego Union, 5:5. Park overhead fund menaced by coin drain; Park Board President Forward says “cultural societies” needs mean increased tax split.

Declaring that the most serious problem confronting the park management is the maintenance of so-called “cultural” organizations that now have or are seeking city aid through park funds, the Board of Park Commissioners yesterday called a meeting of all these groups for next Friday, when an effort will be made to find a solution.

To provide these organizations with the aid they desire, and to keep up the work of maintaining and improving the park would require an increase from 16 cents to 25 cents on each \$100 valuation in the city, President John Forward, Jr. said.

The groups mentioned during the discussion include the Natural History Museum, the San Diego Museum Association, the Fine Arts Society and the Zoo. The latter organization is not on the same status as the others because the people by their votes have officially approved a tax levy for carrying on the zoological exhibit.

Recent action of the City Council in placing the San Diego Museum Association under the Park Board, to be maintained partly out of park funds, brought up the discussion.

At present six out of the park’s 16-cent allowance go to the so-called cultural groups, and if all the organizations carry out their announced intention of seeking city aid, they will be taking 60 percent of the park funds, President Forward said.

“If we are to maintain all these auxiliaries, what will become of the park?” he asked. “The Art Gallery will take \$30,000, the Museum \$15,000, the Zoo \$25,000, and the Natural History Museum will want \$25,000. It is a most serious problem and one that we must face.”

If the cultural groups are to be maintained with city aid, some provision for raising the necessary money must be made, the president continued. It will mean the cessation of much necessary maintenance and improvement work on the park proper if the money for the Museum, the Natural History Society, and the Fine Arts Gallery is taken from the park funds without providing the park additional money, he said.

Charter amendments providing for additional tax levies, as was done in the case of the Zoo, are seen as the only solution, but the exact method of procedure is expected to be worked out at the meeting next Friday, the commissioners said.

John Morley, park superintendent, said he has been unable to do much work that he would like to do because of the shortage of funds. He has had to lay off 10 men recently because of the shortage, he said.

During the meeting delegations from Golden Hill and La Jolla appeared and asked that the Park Commission do more improvement work in their territories.

January 17, 1926, San Diego Union, 5:4-6. Zoological garden animals furnish inspiration for members of San Diego colony of artists (illus.).

January 17, 1926, San Diego Union, 12:2-4. Scores oppose plan to encroach on Balboa Park for college site; quotations from Melville Klauber, Ernest E. White, Leroy A. Wright, Miss Alice Lee, W. D. Dorland, Milton F. Heller.

January 17, 1926, San Diego Union, Development, 4:1-3. The Living Room, by Richard S. Requa.

January 18, 1926, San Diego Union, 7:1-5. Through San Diego Zoo with its president as guide; financial report for 1925; total net worth, December 21, 1925, \$271,664.91.

Putting in concise and interesting form the facts and figures which show the great part the San Diego Zoo is playing in affording pleasure and instruction to hundreds of thousands of people each year and the important factor it has become in advertising San Diego to the world, the heads of several departments of the San Diego Zoological Society, including President Harry W. Wegeforth, M. D., outlined the growth of the great zoo in Balboa Park in reports submitted at the annual meeting of members of the organization.

President Wegeforth's report was given in the form of an address. It follows:

During the past year many improvements have been made in our zoological gardens. Our plans have gradually rounded out and what we intend to accomplish is beginning to approach completion.

The early part of the year, with money provided us by the city, we were able to construct a portion of our deer paddocks, as laid out by the landscape architect. These paddocks are 22 in number; well constructed and considered the finest in the United States for several reasons. The comfortable houses provided for the animals are so situated as to make it impossible for any one to strike or hammer on the walls and frighten the animals, which permits them to enjoy their food undisturbed. A beautiful eucalyptus grove provides shade as well as giving a natural background. The fences have been constructed with pipe posts; they and the wire are painted green, which makes them less visible from the distance. One of the main features of these corrals is the arrangement by which the doors of the houses can be closed by a series of pulleys when it is necessary, enabling the men to clean the paddocks while the animals are thus confined.

In the event it is desired to move an animal to the hospital, which is in the center of the main group of enclosures, it is only necessary to open the gates of each of the six enclosures forming a long lane leading to the main building, through which the deer may be driven, thus avoiding contact with other animals and eliminating the always dangerous methods of catching them with ropes or straps.

It was our desire to complete these paddocks this year, but owing to insufficient funds we were not able to finish the entire 40, although we have on hand sufficient wire and most of the posts. This year our budget provides for this deficiency, and the badly needed additional pens will be completed. It will then be possible to segregate the several species into individual enclosures, which it has been impossible to do under the present congested condition. This is desirable as it is very inadvisable to keep animals of different species in the same pens. It is expected that all 40 paddocks will be occupied this spring.

At the first of the year we had only a few Panama deer, but on my trip east I secured by exchange and purchase some fine specimens, and now we have the Siki, Fallow, Red Fallow, Black Fallow and others.

Besides building these paddocks we have been able to construct a series of roads extending over two and a half miles, leaving from mesa to mesa. New paths have been laid out making all parts of the garden more accessible.

Money has been promised to provide two buses for the comfort and pleasure of our guests, who are unable of disinclined to walk through the gardens. These proposed buses will be four feet wide and will contain seven seats, accommodating 20 people beside the operator.

Let us be the first to enjoy this luxury. Come with me that it may be my pleasure to conduct you on the initial trip through the gardens. Before leaving the vicinity of the deer park in our new buses, your attention is attracted by the very fine collection of kangaroos, and other closely allied marsupials. Through the generosity of John D. Spreckels, a trip to Australia and Hawaiian Islands was made possible. On this expedition Mr. Faulconer procured and brought to this country many new specimens for the zoo, among them these kangaroos. We have raised six and by selling or exchanging them with other zoos have added materially to our exhibits. The animals secured on this trip will be seen in many different parts of the garden. Owing to Mr. Faulconer's keen and untiring interest in the care of the animals in transit, they arrived in splendid order and became a valuable addition.

Leaving the mesa, traveling down the road to the buffalo pens, you will see on the left the water buffalo family, including the fine heifer calf born last fall in the zoo. These we obtained from Kansas City zoo in the spring in exchange for sea lions, gulls and pelicans. On the right are the American buffalo or bison, which were donated to us by Golden Gate Park.

Coming up the canyon from the buffaloes, we pass the pelican and gull pond. This has been much improved in appearance by careful planting of shrubbery.

Next is the alligator pond and just beyond are the peccaries, which are becoming crowded in their pen owing to the fact that they multiply very rapidly. These, however, make excellent material for exchange with other zoos. Going to the left up what we called "seal canyon," we pass several bird enclosures, which are being planted with the yellow blooming acacia trees, and very soon it will be a beautiful sight to see the birds among these trees, especially when they are in bloom.

Further on we come to the seal pond, which is a replica of the Lower Otay dam, built on a 1-10 scale. This was built for instructional purposes and makes a very beautiful enclosure. It is a gift of Miss Ellen Scripps, of whose generosity we will see much evidence throughout our tour. Passing on we come to the mountain lion and tiger grottoes, wonderful structures, which will be even more beautiful when the vines grow around and over the side walls. The pond containing the harbor seals is next in order and then our lion grotto, which is another gift of Miss Scripps. Before going further I would like to say that these lions are known all over the country as being unexcelled, enabling us to sell our surplus at great profit. Pictures of Prince and Cleopatra, with their young, have been shown in many parts of the country. Our swan pond is not enclosed and the swans are at liberty to wander about, but they are usually to be seen nearby. It is our intention to have later on a number of birds of this kind loose in the grounds, as they are harmless and live in harmony with each other.

Crossing the bridge built and donated by the Bent Concrete Pipe Company, we pass a vacant spot which is to be laid out in bear grottoes. At the top we come to the den completed with money given to us by Miss Scripps. Here the bears are to be seen straight in front of you, giving the same appearance as they would have in their wild state. There are four varieties here, but when we are able to complete our other grottoes, the species will be separated.

Just north of the bear bit we find the little Koala bear donated by Mrs. Gail Calmerson. This little bear attracts great attention from the visitors and everyone enjoys watching him sitting in his little red chair Santa Claus brought him, high up in the Eucalyptus trees, oblivious to all.

Turning to the left we see the camels in their stockades. The Mystic Shriners of San Diego donated to the zoo two Bactrian camels. One dromedary was given to us by the Lasky Film Corporation of Los Angeles and the Ringling Brothers Circus donated its mate. The fence surrounding these paddocks was built with money supplied us by the Campbell Chevrolet Company of San Diego. Still further on is the site in which we hope some day to have a pair of hippopotami if we can find a donor who will contribute the \$12,000 estimated to complete the proposed compound. The pleasure it would give the people would be a better return on his money than if he had put it into stocks and bonds.

Further on we come to the commodious enclosure where the elephants, Happy and Joy, are confined. Although not entirely completed, it still is one of the best and most popular exhibits in the garden. The attraction was another gift of John D. Spreckels. On the west side space is left for a contemplated pool to be used for the elephants to bathe in. Anyone knowing how the pachyderms love to sport in the water cannot fail to realize what an added source of pleasure this will be.

On the opposite side of the mesa is the roomy warehouse used principally for the storage of hay and grain. By buying our hay in large quantities early in the season, we were able not only to obtain a very good uniform grade, but were able to effect a saving of about 40 percent in the cost. This constitutes a valuable asset, as hay-eating stock comprises a large percentage of our animals. This location was made possible by the liberality of the city Board of Education in deeding back to the Board of Park Commissioners this plot of ground.

A trail close by leads to what is known as the "cat canyon." Although there is practically nothing there at present, you may see on any of our plans the designated positions for the cages of the smaller members of the cat family. This will prove an interesting part of our trip, leading as it does down past the sea lion pond, around the brow of the hill, past the Inclosures where are kept the emus, storks and other large birds. Passing the duck ponds and goose dam on the right we come to the end of this trail. Here is situated the largest flying cage in the world. It is reached by two flights, one on either side, of easily ascended stairs, on which at intervals, seats are provided from which the large flying birds may be seen in a most natural setting. The ponds and running streams, large trees and other nature-like features of this inclosure, together with its immense height creates an exhibit that has attracted the attention of many people all over the country who have shown the pictures they have secured to countless others, thus making it one of our greatest advertising features.

From the top of this flight of stairs, the view down the canyon toward Cabrillo Bridge is one of the finest to be found in the park, noted for its beautiful views.

Turning to the left we pass the aquarium and come to the turtle pens, numbering about 50. On the left of the path are the fresh water turtles and on the right are the terrapin.

Passing along this same path are to be seen a fine and unique group of cages built by Colonel Milton McRae and dedicated to his grandson, John Paul Scripps, housing what is known as the burrowing group. These cages are built on an old sea shore. This was found to have a backing of hardpan which we reinforced with concrete. The surface was replaced as nearly as possible to its old contours, this while being made doubly safe, still enables these small animals to live in an almost perfectly natural condition. Especially notable are those containing the owls, which seem to show up to a great deal of advantage.

At the right of the turtle pens is a group of bird cages given to the zoo by John Forward, Sr. This is composed of a large central cage where the birds of prey are confined. Around this eighteen cages are grouped in the form of a horseshoe in which the many small birds and animals form a never-ending source of pleasure to the youthful visitors.

Let us follow the crowd for a moment, which is sure to bring us almost directly to the large primate cages where at the east end are two fine chimpanzees presented by Ralph Granger. The pleasure exhibited by the visitors to this group is returned in full as these two "chimps" enjoy their guests mightily and, in fact, show that they recognize many who are frequent callers at their cage.

The laundry companies of San Diego donated the cage just to the north of the large primates. This is filled with the bright colorful cockatoos and parrots, who attract our immediate attention by their noisy chatter.

Returning to the cages of monkeys constituting the large group, we find several occupied by animals that do not rightfully belong here. This is a situation which we are planning to relieve if possible during this year, hoping to be able to remove the coyotes, wolves, and others to cages in a group more suitable to their proper care.

Barney is so well known all over the country as well as by sociologists of Europe that he requires no special introduction. He is docile, interesting and not in the least quarrelsome, and is known to be the only northern elephant seal in captivity. This lake for him was donated by Miss Anna Zimmerman and named "Mirror Lake," so called from the beautiful view to be seen at sunset reflected in this mirror.

The old Harvester Building has been converted into a reptile house at no little expense. This building was originally constructed on wooden piles and the walls, which were made partly of wood with some paper construction, has sagged from three to six inches in places. This has been restored, a proper basement built and many cages for the reptiles installed. The snake is a cold-blooded animal but requires and likes heat, however, they will live in cold places, having been seen basking in the sun near snow banks in the month of April in Colorado. The basement is now prepared for the installation of a heating plant, which is badly needed. With the plans as they are now working out, this building will be heated without doubt before three months have passed. Many snakes are contributed by the people of San Diego, 10 having been obtained in December. Yesterday two fine specimens of the red rattler, caught on San Miguel Mountain, were brought in by Mr. Faldborg.

The administration building, north of the Reptile House, was the old Standard Oil Building of exposition days. Although it had been given to the park, it stood in its original location east of Alameda Drive, which runs in front of the zoo, as we had no money to pay for its removal until Mr. and Mrs., Patrick O'Rourke were so kind as to have it moved to its present location, where it now houses the offices of the Zoological Society. Through this building is the main entrance to the garden, in it also is maintained a refreshment parlor for the benefit and convenience of our guests.

North of the administration building stands the O'Rourke Zoological Institute, intended for education purposes largely, and we are indeed grateful to Mr. and Mrs. O'Rourke whose generosity again has made it possible to realize some of our ambitions.

A few Zoological gardens may possess educational features, others may have facilities for scientific work, but so far as I am aware San Diego Zoo is the only one which provides both.

I have spoken to you of the O'Rourke Institute, which provides the educational feature, and I am not able to announce that Miss Ellen B. Scripps has donated \$50,000 for the erection and equipment of a Zoological Hospital and Biological Research Institute. This institution will be located on a plot of ground just north of the California Building, which has been allotted to use by the Park Board.

The institute is for the study of humans as well as animals and construction will be started very shortly. Its purposes are first to provide isolation and hospitalization for our animals (newly received or those permanently domiciled here) and second, for purely research purposes in the field of biology, including biological chemistry, the mechanics of fractures, etc.

Prints of the first and second floor of the building were sent to scientific societies and universities all over the country, requesting comment and criticism. Upon receipt of their replies, the directors considered them very carefully and made some slight changes in the plans to conform with some of the valuable and helpful suggestions received.

We have now come to the end of our circle through the garden. We have hastened, perhaps, where we should have liked to linger. Inspiring views, such as the one from the deer mesa, have been barely glimpsed. Is it any surprise that 365,034 persons, other than ourselves, have passed through our turnstiles this year to go away and show their pictures and speak our praises to their friends "back home" or to become almost daily or weekly visitors to the zoo.

It would be impossible to make an address of this nature without grateful acknowledgment of the assistance we have received in all ways at all times from the officials of the city of San Diego. It is only with their aid and support that we have been able to make this part of the park as attractive to tourists and a never-ending joy to the citizens of San Diego.

In closing I want to express my appreciation to the Board of Directors of the Zoological Society and to the various committees who have been untiring in their efforts to further the interests of the Society during this year. I wish to thank all of the many supporters and friends for their generous gifts and unflagging interest in all our undertakings of the past and plans for the future.

The report on the Reptile House, prepared by L. M. Klauber, curator of reptiles, follows:

During the year 555 snakes were brought into the zoo from San Diego County, in addition to which this writer recorded 148 live and dead specimens in the country, bringing the total for which location records were obtained to 703. This figure may be compared to 447 in 1923 and 443 in 1924. In addition, 80 specimens were brought in from Lower California, Imperial County and Arizona. Besides the snakes, a considerable number of specimens of lizards and amphibians were brought in from San Diego County. From eastern and northern points we received through trade and purchases, 260 snakes, 18 lizards and 87 turtles. We sent out as trades and donations to eastern zoos, museums and universities and natural history societies 318 snakes, 130 lizards, one turtle and 350 batrachians: the above being live specimens. In addition we sent out 60 snakes, 133 lizards and 14 amphibians preserved in alcohol.

The operation of the Reptile House has continued to show improvement. During most of the summer an adequate food supply in the shape of mice and meal worms has been continuously available. There has, however, been a shortage of frogs, which are necessary for some species, and a supply of these should be provided in the future.

Our prize offer this year was a great success in stimulating interest and increasing the number of specimens brought into the zoo. The prizes offered totaled \$65 dollars as follows: For the individual bringing in the greatest number of snakes during the season, March 1 to November 30, \$35; next largest number, \$20; most unusual specimen, \$10. This compares with a price list of \$100 during 1924.

The prizes for 1925 should be awarded as follows:

First prize for the largest number of specimens to Fred E. Walker of East San Diego, who brought in exactly 100 snakes besides numerous lizards, during the season March 1 to November 30. Walker likewise brought in 10 snakes during December, thus making a total of 110 snakes which he furnished to the zoo.

Second prize for the greatest number of snakes should be awarded to L. Faldborg of Chula Vista who brought in 42 snakes during the contest period. His collection of red rattlesnakes was particularly fine.

As to the most unusual specimen, I would recommend that this prize of \$10 be divided between A. H. Schlange, Box 113, San Ysidro, and L. Kemp, 3722 Howard Street, East San Diego. Each of these persons brought in a western faded snake, *Arizona elegans occidentalis*. As we have had only three faded snakes in three years from San Diego County, they must be considered rarer than the California tantilla (*Tantilla eiseni*), of which we have had four from San Diego County and two from Lower California.

The above prizes in accordance with our offer should be paid immediately in cash. Considerable publicity should be given these payments in order to stimulate interest this year and at the same time prizes

for this year should be offered. I would recommend that the prizes be in the same amounts as last year and that, as usual, county schools and post offices be circularized.

In this connection we might give consideration to the awarding of a special prize of, say, a radio set to the county school sending in the great number of specimens during the year. (This offer, if made, should be exclusive of rattlesnakes, in order that there may be no danger to the students in catching the snakes. It would likewise be advisable rather than to grade the prize award entirely on a basis of numbers to assign values in points for the several species of snakes, giving larger numbers of points for the rarer specimens. This could be done in a way that would stimulate much interest.

The report of the Junior Zoological Society, prepared by Jack C. von Bloker, Jr., president of the Society, was read by Dr. W. H. Raymenton, director of education. It follows:

The first session of 1925 of the San Diego Junior Zoological Society was held in the O'Rourke Zoological Institute in the Junior Zoological Society Building, Balboa Park, March 5, 1925. At this time Miss Helen Huberty was elected president; Jack von Bloker, vice president and treasurer, and Samuel G. Harter, secretary.

From this date (March 5 to June 25, 1925) meetings were held regularly every Saturday afternoon from 2 to 5 o'clock except in the summer vacation.

The second session of the year occurred on September 17, 1925. At this time Jack C. von Bloker was elected president and treasurer and Samuel G. Harper vice president, with Helen Huberty, secretary. Since then meetings have been held every Saturday afternoon up to December 24, 1925. At these meetings members talked on some subject in which they had become especially interested. Their subject is frequently illustrated by lantern slides on the silver screen. Many of these slides they make themselves, depicting on pieces of glass cut to the size of the slides the animals under consideration, and these are then shown on the screen. Animated and interesting discussions follow. Questions by members and answers by the speaker of the day, quotations from authorities, and original observations by the members of the club are then in order.

The president of the second session has in his talks gone more into detail in teaching the structural differences and varying habits of various animals. He had also laid much emphasis on the conservation of animal life, especially bird protection.

An important innovation during the second session on the initiative of the president, was the founding of the San Diego Junior Zoological Museum, November 12, 1925.

Following is a list of the members of the staff of the museum:

John C. von Bloker, director; Paul C. Covel, curator of mammals; Samuel G. Harper, curator of birds; John L. King, curator of amphibians; Harry L. Benbough, Jr., curator of invertebrates; Richard C. Benbough, curator of paleontology; Jack C. von Bloker, preparator; and Samuel G. Harter, assistant preparator.

Specimens of birds and mammals which have in the San Diego Zoo have been given to this museum to be prepared for mounting or for scientific study of skins. Specimens of birds have been given to his museum, both mounted and study skins, by the San Diego Natural History Museum, and several of the boys have loaned their various collections to us from time to time. One expedition has been sent out by use to La Puerta Valley, a semi-desert valley on the eastern slope of the mountains, to collect various specimens of the fauna, flora and geological specimens of the valley for comparison with specimens found in or nearer the city. These boys were sent on this expedition from the club. They are Paul F. Covel, curator in chief of birds and mammals; Samuel G. Harter, curator of birds; and Jack von Bloker, director.

The party left December 25, 1926 and returned January 3, 1926. The trip was successful, although it rained every day but one. Seven mammals were collected, of which five were made into study skins and two were mounted by the director of the museum.

Eighteen birds were collected, all of which were made into study skins; one reptile, preserved in alcohol; 133 insects were collected and pinned after having been killed by fumes of cyanide of potassium. A considerable number of botanical and geological specimens were secured and brought to the museum to be classified and exhibited. In all, there were 159 animal specimens secured on this expedition, the first of many we hope to have in the future.

Classes from the city and county schools have been personally conducted about the zoological garden by various members of the Junior Zoological Society from time to time.

Boys and girls from the ages of 10 to 18 are eligible as members of the Junior Zoological Society and are cordially invited to join. The dues are five cents a month or 60 cents a year.

Arrangements have been made with the department of visual education of the city schools by which educational reels will be loaned to us for use in our large motion picture machines.

We are also to have the use of one of their small motion picture machines with educational reels for our Saturday afternoon meetings.

January 21, 1926, San Diego Union, 8:5-6. Fred E. Lindley favors State College site in Balboa Park; San Diego, with its miles of beaches and with its beautiful back country accessible to and visited by practically everyone who owns an automobile, does not have use for the large area of the park which is now lying idle.

January 22, 1926, San Diego Union. State and City officials review State College site; scale of evaluation to be presented February 10; eight properties to be selected from which educational tract is to be selected; Will C. Wood, State Superintendent of Public Education, favors Balboa Park location, which has not been offered: "If there is a general desire on the part of the people for the college in the park, he would prefer it over almost any other site. But if the consideration of the site in the park, or the choosing of the site there should be accomplished only after a battle with its resulting division of the city into two armed camps, he would avoid even discussing it, for the injury to the city would be greater than the advantage of having the college in the park."

January 22, 1926, San Diego Union, 8:3-6. Photograph of Citizens' Committee selected to pick a site for the new San Diego State College with State officials.

January 23, 1926, San Diego Union, 7:1. Representatives of the Zoo, Art Gallery, Natural History Society and Museum Association met with the Park Board yesterday to discuss the advisability of joining with the Park Board in an effort to obtain more money for their maintenance. At present the Natural History Museum is the only one of the four not receiving city aid.

January 24, 1926, San Diego Union, 7:5-6. George E. Morrison backs plan to give park site to college: "Establishment of the college in beautiful Balboa Park will quicken the cultural impulses of the city and add immeasurably to the delightful atmosphere of Balboa Park."

January 24, 1926, San Diego Union, 16:2-5. Music may soothe the savage beast, but Zoo keepers find sugar or chuck or raw beef more soothing than string quartet; persons mistreating the exhibits have been ordered out of the garden (illus.).

January 24, 1926, San Diego Union, Development, 13:1-3. The Dining Room, by Richard S. Requa.

January 28, 1926, San Diego Union, 11:1-2. Malcolm & Company protest against plan to take portion of park for new college.

January 28, 1926, San Diego Union, 13:4. Mrs. Clara J. Champlin advocates park college site.

January 29, 1926, San Diego Union, 1:2, 2:5-6. Forward resigns after 16 years on Park Board; declares he will fight effort to locate new State College on Balboa Park site.

January 29, 1926, San Diego Union, 7:5. A campaign to place the new State College campus in Balboa Park will be launched tomorrow evening by a mass meeting in the Lincoln School auditorium at 7:30. Announcement of the meeting was made yesterday by W. A. Hamman, head of the Department of Public Address at San Diego High School. Dr. Edgar L. Hewett, Edgar McMath, Fred Lindley, William Evans, Fred Finn will assist in organization of campaign.

January 29, 1926, San Diego Union, 11:3. John Nolen here Wednesday.

January 30, 1926, San Diego Union, 5:4-5. Elizabeth Freese, B. H. Haddock, Cary Richard Colburn write in favor of site in park for State College.

January 30, 1926, San Diego Union, 12:1-2. Colonel E. N. Jones, Park Commissioner, warns don't start dividing park; predicts San Diego will have no Balboa Park tract at all if City starts doling out acreage to State College and others.

January 30, 1926, San Diego Union, 22:5. \$25,500 needed for Art Gallery; City to put up \$19,000 and Mr. and Mrs. Bridges \$6,500 for year's upkeep.

January 31, 1926, San Diego Union, 14:4-5. W. S. Staley favors Balboa Park as State College site.

January 31, 1926, San Diego Union, 19:3-5. Arrival of twin nilgai babies at San Diego Zoo causes great stir.

January 31, 1926, San Diego Union, Classified, 1:4-5, 6:5. Forward scores educators for attempt to take park land for State College.

Tactics employed by local educators in an effort to grab 100 acres of Balboa Park lands for a state college were unmercifully scored yesterday by John F. Forward, Jr., who on Thursday, after 16 years of service, resigned his position on the park commission.

Mr. Forward issued a signed statement in which he declared that these educators cannot beat around the bush any longer in their efforts to show that they are not making an organized attempt to "invade Balboa Park." He asserts that he can prove that all kinds of propaganda is being used by them to gain their ends, both in the schools and without.

He charges that President E. L. Hardy of the State college at one time approached him and suggested a plan whereby the state college would get the Exposition buildings and the very center of the great park for its future activities. Moreover, Mr. Forward charges that a hired press agent or publicity man is in the employ of the State college and high school faculty to help out over the park scheme. His statement is also an appeal to the people to save the park from confiscation and to preserve it for posterity. Mr. Forward's signed statement is in full as follows:

"The Union Friday morning carried a statement from President E. L. Hardy of the State college, in which he said that no one connected with the development plans of San Diego State college --- state officials, citizens' committee, faculty or students --- has taken any official stand for or against the location of the college in Balboa park, and that the new site must be chosen from tracts voluntarily offered the college, not solicited by it.

"I was greatly surprised when I read this. When I was on the park commission, President Hardy came to me and suggested a plan whereby the State college would take over the Exposition buildings in the park and the surrounding ground. He said that the state would make the buildings permanent for the college. Of course, I told him that I would not listen to such a suggestion; that it was absolutely out of the question.

“President Hardy also said in his letter to **The Union** that the State college has carefully remained apart from the public agitation for and against the Balboa park site, and that no attempt is being made to influence public opinion. In this connection, I wish to say that Sam Jackson, a publicity man, residing at 415 Corona apartments (Fourth and Juniper streets) is employed, I understand, by the faculty of the State college and the faculty of the high school as their press agent in this and other matters. I understand he writes articles favoring the park grab for the State college and endeavors to get citizens to sign them. Do they deny having employed him? I would like to head their answer to that.

“Already the people of San Diego have given away Balboa park lands worth \$3,000,000. When is it going to end? The Roosevelt school ground alone is valued by the school board, I understand, at about \$300,000. It is worth nearly \$500,000. The ground given to the senior high school and the stadium is worth easily a million more. The beautiful point of ground donated to the naval hospital is worth a large sum, being the finest view point in the entire park, and it now has a fence around it.

“If we keep giving our park away, we will succeed in demoralizing our credit. San Diego must develop water. And for this development, including the Colorado river, we must have every ounce of credit at our command, or the city is going to stand still --- perhaps fall back. We must call a halt on those who are confiscating our assets. In five years we will have to put up our share for the development of the Colorado or else [lose] all right to that water forever. If the city’s assets are continually cut down we will have no credit on which to float a bond issue for this most necessary purposes.

“What have the people who own their homes on the east side of the park got to day about this state college scheme? Do they intend to have their birthright taken away from them? I think not. I don’t think they will sit idly by and permit such a thing. Fifteen years ago the west side of the park looked worse than the east side does now. Today the west side is one of the garden spots of the world --- famous throughout the world. Who can say that within another 15 years the entire east side of the park will not be just as beautiful -- perhaps even more beautiful?

“If the city of San Diego is not bigger than the vision of those persons who want to use our wonderful park for purposes in no way adapted to such a park, God held us!

“Let’s play this game fairly and above board. Some of the public school authorities assert that they are taking no hand in this park site scheme. Take that with a grain of salt. This propaganda is being spread daily in the schools of the city, which is only natural on the part of certain instructors in our public schools. Members of the park commission and others opposed to given our park away have not been asked to address their meetings. It has been one-sided, and to me unfair. I see that W. A. Tamman, who teaches oratory at the high school, was the power behind the throne at a ‘give-the-park-away’ massing meeting at the Lincoln school the other evening. It was announced that this meeting was for the purpose of starting a campaign to put the state college in Balboa park. The ‘press agent’ notice of the meeting gave a list of those who would assist in organizing the campaign. Dr. Edgar L. Hewett, an instructor who spends only part of his time in San Diego, headed the list. Then came Edgar McMath, a teacher; Fred Lindley, attorney for the public administrator; William Evans, a teacher; Fred D. Finn, principal of the night school; Glen C. Perkins, high school principal; Elizabeth Freese, a teacher; and H. J. Roy, who used to work for the telephone company.

“I want to repeat that we are spending practically 70 percent of our tax money on education that does not educate. If these school heads will get out of politics, we may get some results in the education of our children, but not while politics and propaganda are uppermost. Politics and propaganda pass from the principal to the teacher, then to the pupil, and from the pupil into the home. It is through this process that they hope to induce the people to give beautiful Balboa park away. Because of extravagances in the schools, taxes are going up by leaps and bounds. This means that living is advancing at the same rate. The school system, with its politics and propaganda, is bearing down on the toiling masses. Governor Richardson has scored this system, and he is right. There seems to be no relief at hand, and the effort to grab our park for a state college is just another sample of what the school propagandists and politicians will attempt. Education has been relegated to the scrap heap. Of the dozens of young people who in recent years have gone to work for me, as graduates of the high school, I can recall but two who have really made good.

"The rest know all about athletics, politics, dancing, propaganda, music and art, but nothing about English or mathematics. Several of these boys are now getting in a privately conducted business school to learn something. When they have succeeded, I probably shall find use of them in my business. Is that a good recommendation for our politically-controlled system of public education? You be the judge.

"They will try to tell you that Balboa park is 1400 acres and that we have land to spare, but how much level ground have we got? The park is cut by canyons. In the northeastern section, where the state college would be established, there are only 340 acres of level land. Cut this in two, and what have you left? The golf grounds would be invaded, and the athletic field, contemplated under the Nolen plan, would be ruined.

"This probably is the last thing I shall say for publication regarding the state college effort to confiscate our park. I merely wanted to answer some of the press agent bunk that has been given such wide publicity by the school propagandists. But I shall continue to fight the state college scheme to the best of my ability, for I take a great pride in the wonderful park that we have built. And in closing, I wish to say that I do not believe our public-spirited, patriotic organizations and citizens will permit this thing to happen. Let us keep that part of our park, which still belongs to use, for our children --- yea, for the world at large --- and nip in the bud any scheme, 'educational' or otherwise, to wrest it from us."

January 31, 1926, San Diego Union, 6:5. Dr. Fred Baker objects.

"If the state of California once gets into Balboa park with its state college, eventually there will not be a foot of land in the northeast section of the park that is not the property of the state," declared Dr. Fred Baker of Point Loma, an old resident of San Diego, yesterday.

"The state is rich enough to buy all the ground it needs elsewhere, but if once the college is located in the park, it will use it as a club over the people and demand more ground every time it wishes to establish this or that department, and soon we will have nothing left."

Dr. Baker further expressed his opposition to the "park site" for the state college as follows:

"When I voted five years ago to give five acres of the park for the naval hospital, I said I never again would vote to give a foot of our park way. Every bit of ground we have left will be necessary for the true development of that land for park purposes. The present State college movement means giving away an enormously valuable asset. There are many other good available sites and the state has the money with which to buy what it needs. If the state would say that it must go into the park or there would be no college, I might vote for it, but I am far from sure. Moreover, the state is not going to say that.

"The park site is favored because it is very central, but I believe the college will be better off if the student body is not so close to the center of the city. Transportation will be provided to any other site, and those who want to attend the college will get there easily. So far as the park is concerned, two other public enterprises take precedence of the college.

"We need a city hall, but the development of water is so urgent that the question of a site for such a building is important. To buy land for such a building would mean an expense greater than we can stand. Also, the time is not far ahead when we will have to have a city hospital. This movement was started several years ago, but did not meet with success. At present, the common people, such as myself, cannot afford to go to the hospitals that we have, unless it is the county hospital. It will be hard to raise money enough to build this hospital, even without purchasing a site. If the city has land to donate, it would make a difference of years in making our dreams of such a hospital come true. A hospital has a greater claim on San Diego than the State college, especially when good sites are offered to the state. For San Diego to gratuitously turn over to the state this large tract of park land would, to my mind, be a mistake."

January 31, 1926, San Diego Union, Classified, 4:4. Decision of Committee on Site for State College will be named next Wednesday, February 3.

January 31, 1926, San Diego Union, Society-Club, 1:3-7, 2:7. Fine Arts Gallery in Balboa Park will open to public in three weeks, by L. D.

January 31, 1926, San Diego Union, Development, 4:2-8. The Kitchen Department, by Richard S. Requa.

February 1, 1926, San Diego Union, 5:2-4. Edward L. Hardy, president of the State College, sees college lost to city if site decision not arrived at soon; he had suggested replacement of all the exposition buildings by college buildings of the same type of architecture would unite in one place practically all of the cultural institutions in the city; matter was dropped after civic committee of Chamber of Commerce ruled adversely on project; approves of new proposition to put college in northeast corner of park, but only if the people are willing: "Location would be find for the college, whether or not it would be good for San Diego now and in the future is a question for the people of decide."

February 1, 1926, San Diego Union, 5:5-6. Balboa Park state college committee addressed argument to Mayor Bacon yesterday for Balboa Park college site.

February 2, 1926, San Diego Union, 7:1. Questioned by Councilman Held yesterday, Mayor Bacon told the Council that the state college meeting in council chambers tomorrow will be open to all and that the various sites suggested for the college are to be discussed.

February 2, 1926, San Diego Union, 7:2-3. Julius Wangenheim opposes plan to place state college buildings in Balboa Park.

February 2, 1926, San Diego Union, 7:2-3. Local attorney H. S. says State College in Balboa Park would be a mistake.

February 2, 1926, San Diego Union, 7:4. A. F. Molina wants State College in northeast corner of park.

February 2, 1926, San Diego Union, 7:4. E. J. Swayne upholds Forward's stand on park site.

February 2, 1926, San Diego Union, 7:4. Mrs. Frank T. Read wants park to remain intact.

February 2, 1926, San Diego Union, 7:5-6. Rufus Choate applauds Forward's appeal to keep part intact.

February 2, 1926, San Diego Union, 7:5-6. Douglas Young wants people to vote on site for college.

February 2, 1926, San Diego Union, 7:5. Irene McMichael wants state to rebuild exposition buildings for use as a state college.

February 2, 1926, San Diego Union, 7:7-8. Harry Warburton wants state college in park.

February 3, 1926, San Diego Union, 1:2. 4:4. Council will consider sites for State College today.

February 4, 1926, San Diego Union, 1:6-7, 3:3-4. Advisory Council decides to wait for John Nolen's opinion of state college site; speakers vie with each other in detailing advantages of six locations at hearing; recommendation of choice postponed for suggestions in relation to new civic plan; early action indicated.

February 4, 1926, San Diego Union, 8:1. John Nolen here to explain new city plan; zoning expert to confer with Mayor, City Council.

February 4, 1926, San Diego Union, 15:4-5. Joshua Bailey would put College in park and oust Zoo if more room found necessary.

February 4, 1926, San Diego Union, 15:5. A. C. Majors wants college in park.

February 4, 1926, San Diego Union, 15:5. Mrs. Patrick O'Rourke opposes park as site for college.

February 5, 1926, San Diego Union, 5:3. John Nolen to explain plan to city officials today.

February 5, 1926, San Diego Union, 12:1-2. Chamber of Commerce adopts resolution opposing park site for State College.

February 6, 1926, San Diego Union, 1:5, 2:5. John Nolen would bar college from park; Balboa Park tract should be kept for city; thinks more area should be accumulated.

1. Balboa Park is unquestionably intended for park and recreation purposes and should be used for such purposes only.
2. The area of Balboa Park is not too large even now and will be insufficient in future. San Diego has a long life ahead.
3. Balboa Park is not too large an area for San Diego to maintain provided it is fully planned and used as a park. Generosity is called for. The original land was a gift. It cost the city nothing, so expenditures for development can be afforded.
4. San Diego needs more, not less, resources of land and money for parks. Even if it could be demonstrated that land elsewhere would be more useful for park purposes than Balboa Park is, then payment should be made to the park board for land taken. Balboa Park is a land trust in perpetuity for park purposes, and for all the people in San Diego.
5. A dozen or more suitable sites could be found for any of the present non-park uses of Balboa Park, but property like Balboa Park in area and location could never be obtained again in San Diego. No institution, religious, educational, or philanthropic in the park or likely to be placed there, can in my opinion represent the interests of the whole of the population in San Diego now, or in the future.
6. The encroachments upon Balboa Park are already of a serious nature --- probably more so than upon the park of any other American city. As a friend of San Diego, I advise you to preserve what remains of Balboa Park in all its integrity.

February 6, 1926, San Diego Union, 12:1-5. John Nolen presents his completed plan for improvement of "City Beautiful"; would keep park intact; cut direct highway from 5th to National Avenue and "plant" island near U. S. Marine Base.

As San Diego is as a region different from the rest of the United States, it must develop along its own typical lines, declared city Planner John Nolen yesterday when he presented his completed plan for a growing San Diego to the city officials most directly concerned with his plan, the city council, the planning, harbor and park commissions, the mayor and others particularly interested in the development of the city according to a well-defined plan.

For about a year now Mr. Nolen, one of the most famous and able city planners in the country, has been studying the San Diego problems and working out a plan which will, insofar as it is possible, correct the existing mistakes in development. He came from his offices in Cambridge, Mass. to present the results of his effort to San Diego, and yesterday's was the first of a series of meetings at which he will explain to the people of this city how they can grow to one of the unique cities of the world.

Mr. Nolen declared at once that his study of San Diego had been one of the biggest and most interesting on which he had ever been engaged.

"I have had had bigger cities as far as population is concerned," he said. "I have had many interesting problems to solve. But I never have worked on a plan for a city with the potentialities for individual and characteristic development such as are to be found here in San Diego."

To illustrate his explanation of the new plan for the city, Mr. Nolen had surrounded himself with a series of maps hung on the walls of the city planning office. The most prominently placed of these were the "existing conditions" pad, and the general city map, an elaborate study with various projects worked out in

various colors to indicate exactly what will be kept unchanged, and what work will be done in developing the plan as Mr. Nolen has worked it out. Other maps, each devoted to the exposition of a definite phase of the development, showed the park system planned, the major street and highway system, the harbor development, the location of playgrounds and schools, the waterfront zoning scheme, and a preliminary study of Balboa park on which Mr. Nolen is engaged as a separate project from the general development of the city plan.

In the consideration of his plan he divided the subject into two parts, the essential nature and character of a southern California city, such as San Diego should be, and the regional planning for a metropolitan district.

"Without doubt," he said, "San Diego should be a more distinctive city in its physical developments. Its topography, its climate, its purposes all are different from the average American city. Not to be distinctive is an advantage lost, and some things in San Diego cannot be changed. The question is what can be done to recover lost ground and lead the city towards a more distinctive San Diego for the future? Cultural developments based on the site of San Diego, the peculiar merits of the climate and the possibility of a different quality of life in southern California, remains to be considered later in the planning process.

"One of the outstanding requirements of San Diego is regional planning for what may very properly be called a metropolitan district. In some respects the boundaries of San Diego may appear to be too wide already for city purposes. In other respects they are too narrow. The point is that for urban purposes the present boundaries of San Diego are not altogether too logical. For example, the city extends too far to the north. There is in that direction a large territory beyond the San Diego river and the Mission Valley, a stretch of over ten miles from north to south, which barring Mission Beach, Pacific Beach and La Jolla, with a few other minor exceptions, does not appear to be adapted on account of its extent, location and topography for development in the immediate future as an integral part of the city of San Diego. On the other hand, the territory south of the official boundary of the city, extending almost as far as the Mexican line, is by location and character and by relation to the present city as now developed, a more logical part of San Diego. This matter of city boundaries in a regional sense is one of vast importance in the proper planning and administration of the municipality, knitting San Diego together as the most important natural harbor city of southern California.

Mr. Nolen then outlined the projects which had been included in his regional plan as especially affecting San Diego, such as a parkway drive south and encircling the entire bay to Coronado, a parkway thoroughfare through Telegraph canyon, another through Chollas Valley to La Mesa, another to Lemon Grove, another through Alvarado canyon, a Murphy canyon parkway, a back country part as far inland as El Cajon, a northbound parkway inland to connect with the coast highway by several east and west canyon parkways.

Another regional project of special interest is one that would fill in enough land along the Silver Strand to provide a desirable public recreation area, with a channel cut through to the ocean to enable the tides to keep the bay swept clean. Reservations and drives to connect up to city lakes and reservoirs also are included in the plan.

He had the highest praise for the present county highway system, analyzing the truck highways outside the city, however, he called attention to the fact that the section of the main coast highway inside the city has had grades and several bad and dangerous curves which should be studied with a view to re-alignment. He recommended improvements of the Torrey pines grade and the Biological grade above La Jolla.

The thoroughfare system he proposed he has outlined on the plan map, showing how existing thoroughfares to the city are used and improved, with improvements that will give some relief from the congestion of the streets by diverting traffic to other streets and by emphasizing a system of cross-town links and feeder streets. The major projects recommended are the relocation and widening of the main thoroughfare from the north from Witherby street to Morena, and the construction of a thoroughfare across the flats which will provide a shorter and more direct route to Mission Beach, at the same time opening up

some valuable territory not now accessible. The third major highway project is the industrial waterfront highway, Market street to the city limits. This will connect at the north with a harbor which would skirt the waterfront all the way around the bay and out to Point Loma. Another recommendation is the extension of 28th street as a main thoroughfare between Golden Hill and Logan Heights and to the water front beyond. Another thoroughfare connection is recommended to pass under the 30th street bridge, connecting Pershing drive with the proposed canyon parkway drive on the east.

He recommended the extension of National avenue northward diagonally from 12th street and 6h street and southward from 26th street to National City. This will give a direct route to Tijuana without interference of street railways.

The final project recommended is a connection between the foot of 6th street grade to Mission Valley and the mesa on the north side of the valley.

"A system of parks is imperatively needed for San Diego," said Mr. Nolen, "if the city is to be distinctive or successful."

"There is no park system for San Diego now. In my report on a comprehensive plan for San Diego, prepared in 1908, attention was drawn to the fact that in a city like San Diego, stretching for more than 20 miles up and down the coast, with an almost infinite variety of scenery, no single park, even though it be as large and attractive as Balboa park, is sufficient. A system of parks is unquestionably demanded. Such a system should include characteristic parks in every part of the city and in the territory adjacent therein.

"Balboa park is one of the largest, most unusual and strikingly beautiful parks in the world, yet, from a broad city planning point of view, considering the whole of the park problem for the city of San Diego, and especially considering the other requirements of the city, such as main thoroughfares and the best utilization of all of the land of the city, it might be questioned whether Balboa park as it exists today is fully justified.

"Under present conditions, it appears to be the best policy now to hold the park as it is, exclusively and rigidly for well-defined park purposes without further encroachment, with the exception of two carefully located, adequate lines of communication across the park, in general, one north and south and one east and west. In any case, for the sake of the park itself, the whole of the area should be studied and planned at this time, as it now being done under the direction of the board of park commissioners.

"The park system of San Diego is made up of proposed new boulevards and drives and a selection of existing streets and roads for park treatment, which by following the pronounced natural features of the San Diego country, will give them beauty and parklike character. These are arranged so as to give circuits of parkways around the city, and also to connect the various parklike public areas. Such strong natural features and parks as San Diego bay, Point Loma, Mission bay, San Diego river, Mission Valley, Chollas Valley, Mount Soledad, Torrey Pines, Balboa park and the many canyons demand convenient circulation from one to the other."

Turning from the parks of the system to the harbor development, Noel declared that its comprehensive planning is one of the chief contributions that city planning can make to the prosperity of San Diego.

"Search the United States over," he said, "and you will find no other American city which has the possibility of doing the remarkable and beautiful things that are only the normal and natural thing to do here. The harbor drive is an instance of the unique opportunity San Diego has."

He told about this harbor drive and the fact that it will make the waterfront a thing of beauty that can be the city's greatest asset. He outlined again the various waterfront zones and the influence they will have on the territory immediately behind them. He recommended a battery park at the foot of Market street, both to provide a beautiful municipal waterfront park and to mark the north boundary of industrial waterfront.

Development of a municipal airport with unexcelled facilities for land and sea planes, the parking of a large island in front of the marine base and training station to add to the beauty of the waterfront and the sightliness of the government projects also were described in detail and indicated on the various maps.

The creation of a civic center just north of the present new municipal pier was urged enthusiastically. Mr. Nolen pointed out how imposing and inspiring much a city portal could be made. Later in his remarks he declared that one of the things that San Diego needs more than anything else is a civic center. The lack of such a center, he said, is one of the most potent factors in the lack of civic unity with which San Diego is often charged. He concluded his consideration of the harbor with a description of the beauties of Point Loma and the view from the end of the point.

His final recommendation was for the safeguarding of all new development by a rigid supervision of plats for subdivisions. The difficulties the city now has, he said, are a permanent handicap that never can be overcome. But in the future the city can and must see that developments are in proper accord with the general plan and with the normal demands for a proper relation of all the parts of the city to the whole.

The art of city planning, he said, can succeed only through the assistance of there other "arts." He referred to the proper publicity which will make the people realized what the plan is and what its fulfillment will mean; to the cooperation of all the departments of the city where there are overlapping functions in the carrying out of the plan; and the art of learning how to save by spending, the realization that the development of the plan, costly as it may seem at first, actually will be a saving in the long run.

Asked regarding the relative importance of the various phases of development of the plan, Nolen said that the plan as a whole should be worked out as fast as possible, not developed by completing any one of the parts first. But he said that the first and most important step is the acquisition of vacant lands which will be needed in the future. They can be secured cheaply now, he said, while later it may not be possible to acquire them at all.

The second step he urged is the development of the waterfront program. It should be pushed through to completion as rapidly as possible, he said, because it is vital to the city's future life. He declared that the realization of the waterfront development will bring a revolution to the life of the city.

February 8, 1926, San Diego Union, 11:7-8. Scouts plan big jamboree at Indian Village Saturday; everything in readiness for demonstration; public invited to attend.

February 9, 1926, San Diego Union, 2:1. Marston to give 50-acre tract to City; Presidio Hill to be name of new park; land to be developed by donor under beautification plan of John Nolen; announcement made at a meeting of members of the civic committee of the San Diego Chamber of Commerce yesterday afternoon.

A sub-committee, to be headed by Julius Wangenheim, was appointed by Chairman Davidson to investigate the possibilities of the suggested bay front civic center, insofar as property values are concerned. Another item taken under consideration of the committee was the proposal of its chairman that the upper

Point Loma boulevard from the Fort Rosecrans gate to the Old Spanish Lighthouse be paved in the near future and its cost be paid by the levying of tolls.

February 9, 1926, San Diego Union, 2:2-3. Thousands hear Nolen's city plan in talk at American Legion War Memorial Building; emphasizes importance of waterfront improvements.

That San Diegans are interested in the plan that has been prepared for San Diego's proper development and logical growth was demonstrated last night when 1,000 San Diegans went to the American Legion War Memorial building to hear John Nolen, San Diego's city planner, explain what his plan means for the city, and what city planning is doing for cities all over the United States.

Once more Mr. Nolen emphasized the importance of waterfront development as a spur to the complete development of the city according to the proposed plan. That he struck a popular note and that waterfront development should prove a popular project in San Diego was evident from the applause that greeted his first mention of the bay front drive which he declared would be one of the most beautiful in all of the world.

Mr. Nolen reiterated that San Diego is not one of the cities with great potentialities, but is actually the one city in the United States which has the greatest potentialities for an unexcelled development along the lines --- harbor and waterfront development --- of both commercial and esthetic types, parks thoroughfares, economic city development for business and for municipal beauty. He emphasized the fact that San Diego must take advantage of its opportunity to become an individually beautified and a beautifully individualized city, that it must continue its planning out into its natural region, including both the back country and the whole bay district. San Diego early turned its back on the water, he said, and has not yet turned around to face its greatest asset, commercially, recreationally and esthetically.

He scored the persons who would involve the city in a local conflict over smokestacks or geraniums, declaring that San Diego not only may but should have both in their proper places. Proper location of both the smokestacks and geraniums will stabilize all property values for both the homeowner and the owner of business property, he said.

Cities and individuals alike, he said, grow irregularly. Both have periods when they can grow more rapidly and make use of certain impetus and enthusiasm. He believes that San Diego has reached that stage of crisis, when the people are aroused to grow reasonably and to take advantage of opportunities for planned development which never will come again. He reminded the people that the city is under inspection and will be judged not by what it may do with its opportunities, but by what it actually does do with them, by the results it gets.

The address was illustrated with a number of lantern slides showing examples of the typical individualized city development of which several cities have taken advantage, of maps of the plan of San Diego, and of maps showing what other cities are actually doing in planning their development to the end that the city may be the best and most comfortable place to live economically, commercially and domestically. He showed how proper planning is an economy by preventing the installation of improvements that will have to be torn out to make way for better arranged improvements, and he showed pictures of communities that are doing their planning early.

Mr. Nolen was ably seconded by Hugh R. Pomeroy, Los Angeles county regional planner, who came to San Diego yesterday just to hear Mr. Nolen last night. He was introduced following Mr. Nolen's address by Mayor Bacon, who presided, and he emphasized the importance of taking advantage of the early opportunities for planned development.

"We have learned to our sorrow in Los Angeles county," he said, "that the opportunities which you fail to take advantage of today are a perpetual mortgage on the future. You will do well to follow Mr. Nolen's advice on waterfront development. We are being forced to spend millions on that development in Los Angeles county today, because we neglected our waterfront in the days when we had to opportunity to do so cheaply."

February 10, 1926, San Diego Union, 4:1. EDITORIAL: A Necessary Vision

A city plan is in danger of becoming merely everybody's business and no matter how enthusiastically we may adopt the Nolen plan, we shall certainly find individuals coming forward in the future to seek special privileges and modifications of the plan in their own interest. If this plan is allowed to lapse into a hazy commonplace some of these requests will be granted; and, sooner or later, somebody will put a fish cannery in the park or a brewery --- near beer, of course --- on the esplanade.

February 10, 1926, San Diego Union, 22:4. Park college site argued at Kiwanis Club meeting yesterday; Fred E. Lindley for and George W. Marston against.

Mr. Lindley, in advocating the placing of the college in the park stressed the fact that location is a vital factor to a college. He pointed out that the proposed site would be accessible to automobiles and street cars and that a great many students could live within walking distance of that site. He also declared that the fact that Balboa park has an interesting museum would be an asset to a college placed in the park.

Mr. Marston told of the action of the city trustees 60 years ago in which the ground now known as Balboa park was set aside for park purposes. He quoted the trustees in their resolution that this property "be for a park." He also pointed out that four years later, after the legislature passed an act creating the park, an effort was made to cut off 480 acres.

In his remarks Mr. Marston made a strong plea for keeping a part of the park in its natural state. He showed that San Diego must protect and conserve its wild land; that California in the future will be so developed that it would be a shame not to preserve this land.

"I am sorry," said Mr. Marston, "for the man who does not know something of the east side of the park. I am sorry for the man who does not know something of the wild flowers and of nature."

February 21, 1926, San Diego Union, 3:4-5. Attorney W. J. Mossholder wants State College in Balboa Park.

The present tendency is to make the public park more and more a place of intellectual recreation and information rather than a place of amusement. That is, the amusement feature is being overshadowed by the former.

Now, what is more fitting to carry out the idea of a park being an intellectual recreation center than to have a branch of the great institution of learning occupy a part of the park?

I call attention to the further fact that the buildings will occupy only a small part of the ground that will be donated.

If placed outside the park, or away from the city, dormitories will have to be built and experience has demonstrated the fact that immorality thrives where people are thrown in close contact as they are in dormitories.

I know of no reason why the people should not be permitted to decide this question . . . , and I therefore ask that the matter be submitted to a vote of the people.

February 26, 1926, San Diego Union, 28:2. Because of the dedication ceremony of the new Fine Arts building tomorrow afternoon, all automobile traffic east across Cabrillo bridge into Balboa park will be stopped from 2:15 p.m. until 4 p.m., the Park Board announced yesterday; west moving traffic over the Prado will be halted during the same hours at the East Plaza, adjoining the street car station.

February 27, 1926, San Diego Union, 1:8, 2:1-6. Park eliminated as site for State College; selection to be made next month; executive committee of Citizen's Advisory Council to make recommendation to City Council next Tuesday; scores bickering.

Balboa park as a possible site for the new San Diego State College campus was definitely eliminated from consideration yesterday by the executive committee of the Citizen's Advisory Council, which met to consider the various sites under discussion. The whole of the council, some 20 in number, will meet next Tuesday afternoon at 2 o'clock for a final inspection of all sites, except Balboa park. The executive committee then will meet next Thursday afternoon at 6 o'clock to select a site for recommendation to the whole council, which will be expected to receive the recommendation and make a decision before the middle of March.

At the meeting yesterday, Dr. E. L. Hardy, president of State College, presented a map which located the proposed sites and also showed the residences of the San Diego students attending the college, so that the committee can consider the new site in its relation to the density of the collegiate population.

The committee's report, signed by six members of the committee who attended the meeting, is as follows:

In 1922, the president of the College prepared a building plan and program for the development on the present site of the State Teachers College of San Diego. This plan was submitted with the institutional budget for the period 1923-1925 to that state director of education, and received his general approval. It provided for the completion in 1929 of an appropriation schedule involving the construction of nine permanent structural units to cost considerably more than \$1,000,000, crowded into every foot of available space on the campus, and designed to house 1500 college students and 500 or 600 training school children. Those items of the program which called for appropriations in 1923 were duly presented to the budgetary authorities of the state law in 1922, but received no consideration because of the policy of economy enforced in that year under the new budget established by vote of the people of the state.

Undoubtedly it was fortunate that the building program of 1923 was sidetracked by the financial policy of that year, for, in 1925, only two years later, it was clearly seen that the growth of the college demanded more land, far beyond the amount in the campus and in any neighborhood additions that could be made to the campus. A conservative appraisal of the two blocks on the west side of the campus put their cost at \$150,000, a figure that would have to be doubled today, and one that puts an absolute negative upon any proposal that the college should stay where it is.

For in ten years, 1916 to 1926, the enrollment of the college had increased 300 percent. In the period 1920-1925, it has doubled. In the current year, 1925-1926, enrollment will exceed 1500. Set aside for 1929, in the planning of 1923, an average daily membership for the year, taken at its peak, will show the figure of _____. When it is remembered that the present campus contains only 17 acres of land, that expansion of the campus is impossible, and that 60 (?) acres for every 1,000 students in average daily membership is considered the maximum unit, then no argument is needed as to the necessity of the removal of the college to a new and adequate site.

Why then, say some, should not the state, the great rich state of California, provide the college with an adequate site? Unfortunately for those who make this demand, the fact is that the state of California always has referred, with rare exceptions, and always will refer, without any doubt in the future, the provision of the site for an educational institution to the community in which it is placed. Witness the very recent re-location of the University of California, southern branch, on a site of several hundred acres provided by the citizens of Los Angeles, and the eager competition of half a dozen communities, among them San Diego with an offer of several thousand acres, to secure the institution by generous gifts of land. As a matter of fact, now that San Diego has reached a crisis in the development of her collegiate future (a situation very well understood at Sacramento) the city stands a very good chance to lose the greater college proposed, either in whole or in part, if there is any serious thought of asking that state to provide a site, or if there is any failure on the part of San Diego to carry out these representations made at Sacramento in 1925 on the basis of which the California legislature and the governor of the state gave us the legislation for a greater San Diego State College. The meaning of that legislation, which was urged by practically every responsible official and civic individual and organization in San Diego, and to the carrying out of which every such individual and body implicitly gave his pledge of support, is simply this: that the state of California will undertake the establishment and maintenance of a regional college in San Diego --- an institution which will be of inestimable value to the community --- if San Diego will meet two conditions. First, San Diego must provide an adequate site. Second, San Diego should show good faith and to recompense the state for its investment on the present site, purchase that site and the buildings on it at such figure as will enable the state to start out on the new site with housing facilities equal to those which it now has.

This constitutes an opportunity for San Diego that is so great and involves civic problems that are relatively so simple, that it is fairly amazing that the main issues should now be jeopardized by the secondary issue of the site and by threats that the bond issue, which will represent a small initial investment made by San Diego for which she will secure a great and growing enterprise, will be defeated by any group that does not have its way as to the selection of the site. The citizens' executive committee, therefore, wishes to state unequivocally the position that it takes, viz., that the issue of exact site is secondary; that the finally acceptable site must be accepted as practically the unanimous action of the community because it is not the community but the state which finally will approve of and select the site for the college, and the state has announced, through those officials whose word is final, that no site in controversy will be approved.

It must not be forgotten that the college is not a local, but is a state institution. The community, therefore, cannot be, and much less can any minority in the community, be the dictator in this matter of site. The problem of the community is to offer a site which the state can accept as reasonably adequate for the functions of the college as a state institution.

What are the functions of this state college? They are twofold:

First, to prepare teachers for the public schools of the state of California.

Second, since the California standard for the preparation of teachers necessitates a liberal arts foundation for the professional preparation of teachers, to maintain regular liberal arts curricula of two, three or four-year types.

To put in the other way round, California has decided that the teacher should have the same collegiate preparation for his or her professional training as the lawyer, the doctor or the engineer. This being the case, the 'teachers' college' becomes first of all a college and, as such, should be made available, in its appropriate region, to all the youth in that region who wish to take the collegiate studies foundational in all the professions. But it offers these opportunities as a state and not as a local college. The benefits are available locally, but they are not, and cannot be, locally controlled.

Does San Diego want these benefits? That is beyond question. But the conditions upon which these benefits may be secured have temporarily been lost sight of in the heat of the controversy that has arisen over the secondary issue of the location of these benefits.

They should be located at the central point of the city with reference to transportation and population, and that central point is clearly Balboa park, say the many proponents of the park as the site *par excellence* for the college. The argument is very plausible, and has been made very appealing, but it proves too much. For the very same argument has been used, and just as legitimately (and with the result that they are now in the park) for the location in Balboa park of the following institutions:

The Children's Home, San Diego High School, Stadium, Roosevelt Junior High School, U. S. Naval Hospital, Exposition and its offspring, including Spreckels Organ Pavilion, Museum, Zoo, Natural History Museum, San Diego Gallery of Art, American Legion War Memorial Building.

For institutions that are not yet in the park, the argument has been used for the following, which is probably an incomplete list:

The city hall, federal building, county building, civic center, civic auditorium, 'University of San Diego,' state college.

For each and everyone of these institutions, the argument of 'central location' applies with practically equal force, and if this argument prevailed the result would be a *reductio ad absurdum*, viz. a complete disappearance of the park as park, and, just as deplorable, such a congestion of institutions and functions that automobile transportation with reasonable reach of the institutions would be impossible. It is not exaggeration to say that San Diego would be committing the ancient error exemplified in the Chicago 'Loop,' the only difference being a civic rather than a commercial congestion.

It is because the argument of 'central location' defeats itself that the best city planners of today advocate the reverse of the old notion of civic center --- of a civic center designed to be a kind of civic 'omnium gatherum.' The best city planning of today does not try to locate all major civic functions at the hub of the wheel (where motion is slowest) but on concentric circles, or at the appropriate strategic points of the city's manifold operations --- commercial, recreational, educational, civic, etc. --- so that both the citizen and the businessman may have the square deal of equal opportunity, and there are many good, instead of a few, best corners.

What then, from both points of view, that of the innermost of the city's concentric circles and that of strategic location, are the fundamental principles that should control in the allocation of functions and institutions in Balboa Park? Clearly they are: First, that the functions and institutions should be city functions and institutions; therefore, they should not be state and they should not be federal institutions and functions. Because of this principle, the placing in Balboa Park of the U. S. Naval Hospital undoubtedly was a mistake --- no so much of a mistake as the place there of the Marine Base and Naval Training Center would have been, since the area required by the hospital is relatively small, but a mistake, nevertheless, Fortunately, it was a mistake that has not entailed serious consequences and it serves as a valuable lesson.

The park belongs to the city of San Diego. The land was dedicated 'to be for a park,' for the people of San Diego and for their children forever. Is it not, therefore, the duty of all good citizens of San Diego to remember the purpose of this dedication, to hold fast to the principle and to resist all plans, however plausible, which would lead them to alienate any part of their park, or wrest it from its proper function? Functionally speaking, there is not doubt as to what the park is for. There it lies, midway between the commercial and industrial San Diego and the San Diego of homes, schools and churches --- its manifest destiny that of being itself a mediating home of the recreational and cultural soul of San Diego. It is the place for the recreation of the spirit and soul of San Diego, through San Diego's own nurturing and her own institutions of music and art and science and all other kindred means, of the expression of San Diego's better self.

To this end the park should contain a building like the new Fine Arts Gallery to house a musical conservatory which will serve the musical needs of the city as the Fine Arts Gallery serves the artistic needs of the city in pictorial art. It should also contain a lecture hall or auditorium which would be of civic service for public lectures and for extension work of the state college and the state university in taking advantages to the public not usually considered of school of college age. So much is so that when it is realized --- then the shrine of San Diego will be placed in Balboa Park. There it is that our mystic citizen should have a place to stand. Around him, then, let us group our memorials, and gather for our festivals, every keeping room for the more numerous and more needful citizens who are yet to come and for whom the living must not forget to speak.

We must remember, too, that we are of the nation and of the state as well as of the city, in all of this planing. As nationals, we have had a pretty clear vision, remembering that Uncle Sam visits us usually by water, and we have made him welcome with large and generous gifts and gestures by bay, shore and ocean front. The fact, then, that national activities at San Diego have been and are and will largely continue to be naval (even if aerial navigation be included) has indicated clearly the nature of our city planning with reference to national functions and institutions, and areas have been found for them without question or controversy --- save in the case of the hospital, which is the exception proving the rule, and which, let us say again, fortunately does not seriously 'hurt.'

We come now to the question of the proper placement in San Diego of the functions and institutions of the state of California. The question of the location of the state college has become a vexed question because a large group of us have become so habituated to the thought of the institution in San Diego that we think of it as of San Diego rather than of the state of California. As the college is, institutionally speaking, almost the sole representative of the state in San Diego, its location can and must be considered from the point of view of its function, which is educational in a state and not in a local sense. While it functions for the state in a regional way, the region which it serves and always must serve is large than the city of San Diego. While it is here, in the main, to give educational service to San Diego, yet its proper territory extends roughly from the Mexican line to San Juan Capistrano and from the Pacific to the Colorado river. As a junior college, it gives and should continue to give collegiate opportunity to the youth of the whole of San Diego County, and, as a prospective four-year college (which it will be if we do not lose the present propitious moment by a juvenile quarrel over the site) it must be the college for the larger area, which it now serves in its teacher-training capacity. Clearly then, in thinking of the college, the people of San Diego, while not forgetting that they receive the major portion of its benefits and at practically no local expense whatever, must have a vision of it and its reach not limited to the boundaries of the city of San Diego.

Conceived I this way, then, is it not inevitable that the college cannot go and should not go into Balboa Park, an area that is civic and should be kept inevitably civic --- not state and not federal? From this, the necessary and only correct point of view, many of the arguments that are used for putting the college into the park are really the strongest possible arguments against putting in into the park.

It is urged, for instance, that state buildings in the park would beautify the park. That very argument would be turned against use at Sacramento. Legislators from Los Angeles, Fresno and San Francisco can be heard even now asking why the state of California should be asked to make appropriations for the beautification of San Diego's Balboa Park.

Again, it is urged that the state would relieve the city of the expense and improvement and upkeep of a considerable area in the park. Those who know how difficult it is to get any money whatever from the state for the improvement of land which, though occupied by the state, the state regards as essentially a local benefit, realize only too well that the state, if it followed its tradition, would expect the city to put in the improvements. Again, legislators from other cities would not be interested in making appropriations for a city park.

Finally, there comes the really vexing question of jurisdiction. A state college campus in a city park would be the soil in which many dragons' teeth would be sown. Some misunderstandings and questions of jurisdiction would be inevitable, and it would be unfortunate, to say the least, if it ever should become necessary, as conceivably it might be, to make it clear where jurisdiction began and ended by the building about the college part of the park of a high metal fence. A city park is not the proper site of a state college. A state college should serve the city, not add to its problems, and colleges go, not where their problems may be complicated, but where they will be simplified.

What then shall San Diego do if it wishes to keep the college? (Surely it will keep the college unless it is so unwise as to refuse a gift and reject a benefit!) The problem cannot be solved by doing nothing. The do-nothing policy (echoes of which have been heard) simply would result in leaving the whole issue stranded on the impossibly small island of the present site. Upon that area, at best an isolated teacher-training institution, not a college, can be maintained. The collegiate function of the institution inevitably will be thrown back upon the people of San Diego, and it will be San Diego's business to find a site for its own college, build the plant, maintain it to the extent of 50 (?) percent of the operating cost, and limit its service to two years of collegiate education instead of four.

If San Diego wants the college, San Diego will go bravely on, not faltering in carrying out the policy which was so unitedly envisioned by her citizens in January 1925, when city officials, school officials, civic bodies and citizens generally stood as one man back of our representatives in the California legislature in their successful efforts to pass the college bill. San Diego, for moral reasons alone, simply must not fail to carry out in good faith, the well-understood provisions of that bill, all of which turn upon the vital point of an adequate site --- a site for a state college.

February 27, 1926, San Diego Union, 4:1. EDITORIAL: A Tradition

The Fine Arts Gallery carries on a tradition that began at the Organ Pavilion with its daily ministrations of beautiful things. Or perhaps the tradition took foot in our park long before there was any Organ Pavilion there, or any lawns and trees --- when the vista of hill and canyon and the sea beyond stirred some men to that inspiration that comes from nature.

February 27, 1926, San Diego Union, 7:1. Ex-mayor Capps testifies that legal authority in 1899 declared that city's water rights were inviolable.

February 27, 1926, San Diego Union, 12:2-3. Many attend Fine Arts Gallery preview.

San Diego's social and artistic leaders gathered in the new Fine Arts Gallery in Balboa Park last evening to have a glimpse of the beautiful gift of Mr. and Mrs. Appleton S. Bridges before the gallery and its art treasures are thrown open to the public this afternoon. It was an important event in the cultural life of the city, the greatest stride forward in the history of San Diego as an art center.

All evening the spacious lobby and the beautiful galleries were filled with people who were opening expressing their delight in the perfection of the building's design and arrangement and in the paintings, sculptures, tapestries and art objects that made up the inaugural exhibit. No part of the gallery was neglected, though the galleries devoted to the fine examples of ancient Spanish painting and examples of early Spanish decoration seemed to be particularly popular.

During the evening Mr. Bridges appeared on the grand staircase and introduced to the gallery, Reginald Poland, who spoke briefly in welcome of the visitors, in appreciation of the gift of the gallery, and in explanation of the plan of the inaugural exhibition and some of its outstanding masterpieces.

In welcoming the people to the gallery, Mr. Poland expressed the hope that its beauty and its perfection will be an inspiration but not at the expense of a friendly feeling for the building and its treasures. Often, he said, pure beauty, such as is embodied in the gallery, so dominates visitors that they fail to enjoy it with informal pleasure. It is, he said, the realization of an ideal for San Diego, and as such should be loved by every person interested in the artistic progress of the city.

He then outlined the ideal of the first exhibition, its attempt to stress Spanish and American art and the examples of the art of other nations that have contributed most importantly to the art of these two nations. He took the visitors through an imaginary tour of the galleries, calling attention to first one and then another example of art typical of the period, the artist, or the artistic influences of a period or a people. He called especial attention to the Mestrovic sculptures, quoting Rodin that Mestrovic is the greatest living sculptor. He himself expressed the opinion that the Mestrovic drawings are as fine as any drawings ever made.

He told of the modern works of France, Spain, England and the United States and the spirit which had animated the particular artists whose works were on exhibition. He called attention to the modern Spanish groups and expressed the highest regard for the examples on display. He concluded with a plea that the people of San Diego should enjoy the beneficence of Mr. and Mrs. Bridges and the artistic genius of the architects, William Templeton Johnson and Robert Snyder; that they should help others to enjoy it by joining the Fine Arts Society, which is sponsoring and directing the functions of the gallery. He expressed especial gratitude to the donors of several collections of sculptures and paintings and for the cooperation and generosity of individuals and museums that have loaned numerous paintings and sculptures for this first exhibition.

In the receiving line were Mr. and Mrs. Appleton S. Bridges, Mr. and Mrs. W. S. Dorland, Mr. and Mrs. G. A. Davidson, W. H. Sallmon, Reginald Poland and Thomas Drummond.

The formal dedication and opening of the Fine Arts Gallery will take place this afternoon at 2:30 o'clock, with a brief and appropriate ceremony. The keys of the building will be turned over to the city by Mr. Bridges. Mr. Johnson will tell about the building itself and will pay tribute to the men who actually built it. Director Poland will speak briefly on the opportunity the gallery means to San Diego. The main address of the afternoon will be delivered by Frank Morley Fletcher, who will speak on "The Basis of Popular Judgment in Art."

Following the ceremonies, the building will be thrown open to the public, and it will be open free of charge daily except Mondays from 9 a.m. to 5 p.m., Friday evenings from 7:30 to 9:30, and Sundays from 2 to 5 p.m.

February 28, 1926, San Diego Union, Development, 11:2-5. Halls and Garages, by Richard S. Requa.

February 28, 1926, San Diego Union, 5:4-6. Bondo, star simian at Zoo, observes 5th birthday with party.

March 2, 1926, San Diego Union, 1:7. Expect \$750,000 hospital annex to be authorized in park at once; deed for city property forwarded to capital by Admiral Robertson yesterday; plans and specifications ready for actual construction.

March 5, 1926, San Diego Union, 8:1-2. Chamber of Commerce gives Nolen's city plan united approval.

March 5, 1926, San Diego Union, 8:4. Amphion Club local artists' concert at Yorick Theater pleases audience.

March 6, 1926, San Diego Union, 5:6. Sunset Cliffs subdivision will be opened this afternoon; John P. Mills, head of organization, selling property.

March 7, 1926, San Diego Union, 18:8. Thousands see presentation of Spalding Park between ocean front boulevard and breakers and nearly a mile in length; Councilman Stewart receives deed for city at opening of cliffs' tract.

March 7, 1926, San Diego Union, Classified, 1:4, 2:3. Tam Deering, playground director, thinks directors won't remove him; says he doesn't care to remain in office if his new policies are thrown out; thinks playgrounds should team up with schools.

March 7, 1926, San Diego Union, Development, 10:2-4. Planting the Home Plot, by Richard S. Requa.

March 7, 1926, San Diego Union, Development, 10:5. Presidio Hills development calls for ambitious parking along Nolen's plans; new residential subdivision includes 70 acres; 78 lots in tract; George W. Marston one of the members of the syndicate.

March 7, 1926, San Diego Union, Development, 13:1-5. Architect Edgar V. Ullrich, designer of Casa de Manana, announces plans for Seville apartments which will grace Prospect Street (drawing).

March 8, 1926, San Diego Union, 5:4-5. Natural History Museum finds \$200 lot donated in 1876 today is appraised at \$60,000; Society has title to Hotel Cecil property.

March 8, 1926, San Diego Union, 7:1-2. Junior Zoological Society Hears Interesting Lecture on Monkey Tribe; Keeper Shows Remarkable Specimen and Tells Interesting Story of Its Habits.

The meeting of the Junior Zoological society was held Saturday afternoon in the O'Rourke Zoological institute building, Balboa Park, under the direction of Miss Helen Huberty. Fred Chatten, keeper of monkeys in the zoo, gave an interesting talk on the monkey tribe in general and on the putty-nosed monkey in particular. He showed a specimen of this remarkably marked monkey and gave the children a charming story of its habits. This animal is a little larger than the Rocky mountain gray squirrel. It is easily tamed and becomes quite affectionate.

He warned the children against giving monkeys chewing gum, as they swallow the gum and it frequently causes their death. He exploded one popular impression. He said monkeys are very cleanly and very rarely have fleas. The frequent picking over of their own and of their neighbor's hair and their frequent lively scratchings were to remove particles of dust, dirt and dandruff. A flea would have small chance for its life against their sharp eyes and nimble fingers.

Dr. Raymenton, director of the institute, demonstrated by means of the compound microscope the evolution of hair. He showed the scales of fish and reptiles, the feathers of birds and the curious and characteristic markings on the hair of various animals. The apparently fine dust on the wings of butterflies and moths was shown to resemble the shingles of a house. The children were chiefly interested in the black,

flaxen and golden hairs from their own heads, looking as one of them said as he gazed at his own hair through the instrument, "as bit as a telephone pole!"

Jack von Bloeker, president of the Junior Zoological society, showed some 60 lantern slides on the silver screen. These slides are made by the boys and girls and represent birds, beasts, insects and reptiles. Many of the slides are painted, showing the natural colorization of the animals.

Paul F. Covell, curator in chief of birds and mammals, presented a paper giving an account of an expedition for scientific research to La Puente valley. He was accompanied by Jack von Ribeker, director of the Junior zoo museum, and Samuel Harter, curator of birds. They were entertained in the valley for one week by Frank Stephens, dean of the naturalists of the San Diego Natural history society, on his ranch.

Seven mammals were collected, of which five were made into study skins, two of which were mounted by the director of the museum. Eighteen birds were collected, all of which were made into study skins.. One reptile preserved in alcohol and 123 insects collected for the museum. A very good week's work, they thought, considering that it rained nearly every day. This is one of several expeditions that have been made to valley, mountain, mesa and seashore by the curators of the various departments of the Junior Zoo museum.

March 8, 1926, San Diego Union, 7:4-5. March session of Court of Honor at Indian Village last Friday evening breaks all attendance records; more than 500 scouts and parents present; 201 awards are made.

March 9, 1926, San Diego Union, 7:6. City Council okays Nolen's plans for city development.

March 9, 1926, San Diego Union, Classified, 17:1. Wesley Bradfield appointed associate director of San Diego Museum.

March 12, 1926, San Diego Union, 5:4. Work to start next month of Science Building; Dr. Wegeforth announces details of study center to operate with zoo; cost of building will amount to \$50,000; gift of Miss Ellen B. Scripps; 368,000 people have gone through turnstiles so far this year; 23 persons on payroll.

March 13, 1926, San Diego Union, 15:3-6. San Diego Army and Navy Academy musicians to give band concert at Organ Pavilion today (illus.).

March 13, 1926, San Diego Union, 24:2-3. Scouts plan ceremonial and initiation in American Legion Building, Balboa Park, tonight.

March 14, 1926, San Diego Union, 12:1-5. How city acquired title to pueblo lands, by Daniel Cleveland.

March 14, 1926, San Diego Union, Development, 14:4-7. The Finished Home, by Richard S. Requa.

March 19, 1926, San Diego Union, 1:7. Park college site eliminated by agreement. That is opinion of faculty on learning 120 acres of land needed for school. Final decision must be made by October 1, according to President Hardy, who is in Sacramento for a conference with the state Board of Control.

March 21, 1926, San Diego Union, 3:4-5. Pair of rare adult mandrill baboons attract great interest at San Diego Zoo.

March 21, 1926, San Diego Union, Classified, 1:3-5. Barn owls sorry to leave San Diego for mice-catching jobs in Australia; Zoo gets urgent call from Lord Howe to sent pest eaters at once.

March 23, 1926, San Diego Union, 13:1. Board of Supervisors discussed proposed civic center on city's tidelands with Kenneth Gardner, city planning commission member, yesterday.

March 24, 1926, San Diego Union, 9:2-3. San Diego Zoo offers prizes for largest and most unusual snakes.

March 25, 1926, San Diego Union, 5:3. May not chose site for college until October 1; advisory council and executive committee to meet again Monday.

March 27, 1926, San Diego Union, 6:7. Naval committee favors \$150,000 for hospital here.

March 28, 1926, San Diego Union, 8:1. Goat population of Zoo will frolic on specially built "bad lands" peaks; sandstone crags duplicated by derrick structures forming artificial cliffs.

March 28, 1926, San Diego Union, Development, 3:3-4. Real Estate sales involving an investment of \$251,000 were announced as having been completed last week by W. J. Brown of the D. C. Collier Company; transactions given.

March 30, 1926, San Diego Union, 1:3, 2:2-3. By a vote of 14 to 3 the State College Citizens' Advisory Council last night adopted the executive committee recommendation of the smaller site; proponents of Balboa Park site made a strenuous stand in opposition to the adoption of the recommendation.

March 30, 1926, San Diego Union, 5:3. Mayor Bacon named George W. Marston for Park Board to fill vacancy caused by resignation of John Forward, Jr.

April 6, 1926, San Diego Union, 3:5-6. Zoo will be closed for two days to repair damage done to walks and equipment by heavy rains; damage will exceed \$1500.

April 9, 1926, San Diego Union, 9:4-5. Army and Navy Committee of San Diego Chamber of Commerce will give a "welcome home" dance for men of the destroyer squadron at American Legion building tomorrow night.

April 11, 1926, San Diego Union, 5:5-6. Zoo gets pair of mantled monkeys captured by members of crew of *U. S. S. Zellin* (illus.).

April 11, 1926, San Diego Union, 10:5. "Rained out" Zoo reopens today.

April 13, 1926, San Diego Union, 7:4. The City Council yesterday set aside \$10,000 for park repairs in cleaning up the debris, such as trees and shrubbery felled by the recent storm, and to repair washed-out roads.

April 17, 1926, San Diego Union, 11:1-2. Seventeen valuable paintings donated to Art Gallery; unnamed friends provide rare collection of world-famous masterpieces already displayed here as gift to institution; collection includes "The Silent Pond" by Gustave Courbet and "Landscape" by Jean-Baptiste Corot.

April 18, 1926, San Diego Union, 18:1-7. What the City has done with its Pueblo Lands, by Daniel Cleveland.

April 17, 1926, San Diego Union, 1:8, 2:5-6. Louis J. Wilde, former mayor of San Diego, dies.

April 20, 1926, San Diego Union, 1:6, 4:4-5. Playground Board fires Tam Deering; action causes Mayor Bacon to remove Mrs. C. A. Dunham and W. E. Harper from Commission.

April 21, 1926, San Diego Union, 16:2-3. Annual Rose and Spring Flower Show to be given in park Saturday and Sunday.

April 23, 1926, San Diego Union, 1:5. Congestion at the Naval Hospital is so great that some patients are quartered in tents, Rear Admiral E. R. Stitt, surgeon general, told the Senate Naval Affairs Committee today in urging authorization to expend \$150,000 for needed auditorium; there are at present 750 beds.

April 25, 1926, San Diego Union, Classified, 1:6. Annual flower show, housed on Plaza de Panama just east of Montezuma Gardens, presents colorful display.

April 25, 1926, San Diego Union, 20:6-8. Pioneer details deal on city tidelands; United States official foils scheme, by Daniel Cleveland.

April 27, 1926, San Diego Union, 7:1-2. City Attorney Higgins rules tidelands may be used for commerce, navigation and fisheries, but not for city hall.

April 30, 1926, San Diego Union, 20:2-4. Girl Scouts look forward to May Day when they will be in charge of Zoo; funds raised from admissions will be used in repair work; Lions' Club has assumed responsibility for repairing damage done by recent storm to Girl Scout headquarters in Balboa Park.

May, 1926, California Garden, Vol. 17, No. 11. Three Suggestions for Balboa Park, by Walter S. Merrill

(Excerpts)

Now that the danger of ceding a part of Balboa Park for the State College grounds seems to have blown over, it is timely to consider some of the problems of future park improvement. That we have a tremendous asset in our centrally situated fourteen hundred acres of park land is acknowledged by all who visit San Diego. Probably no other city in the country has such a glorious opportunity to build a beautiful and useful center. The work done in preparation for the Exposition of 1915-16 has made the western portion of Balboa park one of the beauty spots of America. The magnificent combination of art and nature, of architecture and landscaping, attract all lovers of beauty; and the varied attractions of the park: the organ, the zoo, the art gallery, the various museums, the rose garden and the other special or seasonal gardens make even the most hurried florist feel that the park is the one thing in the city that cannot be missed.

There are, in the easterly portion, several hundred acres of almost undeveloped land, and it is opportune to make the plans for their future development now. Some day the funds will be available for doing the work, and in the meanwhile there will be far less temptation for and less probability of outside interests securing portions of park land. Too much has already been alienated from strictly park purposes; and if an accounting can be made of the requirements for the future developments, the danger of further encroachments will be lessened.

It is the purpose of this article to call attention to certain improvements which the writer feels would be of special advantage to the park and its public. These suggestions are not original with him, but seem to be of sufficient worth to justify the Floral Association presenting them to the Park Board with the request that they be considered in the plans for the further development of Balboa Park.

First: A Botanic Garden of California Flora

There is nowhere in California I believe, a public garden of native plants, properly labeled and described, where they may be exemplified and studied by amateurs, nurserymen and scientists. Such a garden would be of tremendous interest, showing possibilities, undreamed of now, for using our native shrubs and trees in domestic landscape architecture. Very few home grounds today contain more than a few scattered specimens of native plants. Monterey cypress is, of course, much used, and Monterey pines are not uncommon. Occasionally one finds a redwood, a Lawson cypress or a California holly; a few more gardens have the matilija poppy; but other than these the native plants are seldom seen. Pepper trees are everywhere, but who plants live oaks? The libocedrus decurrens (Incense cedar) is very rare in the city, yet its native home is in the Cuyamaca mountains, and a more majestic tree is impossible to find. A dozen or more varieties of ceanothus (wild lilac) will grow in San Diego, and they should be in every large garden. What could be lovelier than a large group of these, spaced far enough apart to allow each to develop to its best. For mass effects or for individual planting there are few things finer than our rhus integrifolia (lemonade berry), rhamnus californica and ilicifolia, or cerocarpus baetulifolia, and they are perfectly adapted to local conditions. Then, too, there are the perennials, --- many of them with gorgeous blooms and good foliage, most useful as border plants and in the cutting garden, plants that do not demand the pampering required by their exotic cousins.

Such a Botanic garden would be of the greatest use to owners of small homes desirous of beautifying their yards and, at the same time, of getting away from the conventions and rules laid down by nurserymen. And such a Botanic garden should be in itself a thing of exquisite beauty. A scientifically arranged collection of growing trees, shrubs and herbaceous plants need not sacrifice a bit of charm to science. Those who know the Arnold Arboretum in Boston --- or Kew Gardens near London, can vouch for that; and all who have visited any of the great Tropical Botanical Gardens (at Cienfuegos in Cuba, Port o'Spain in Trinidad or Batavia in Java) have seen marvelously lovely gardens with not the slightest lessening of their value to the student.

England today, I believe, uses more native California plants than California herself. Balboa Park could perform a really great service by educating its visitors to the value and beauty of our flora.

Second: A Botanic Garden of Succulent Plants

In various parts of the world there have been brought together collections of succulent plants --- those plants which are commonly designated as "cactus." As is generally known, succulent plants thrive in arid regions and many varieties can subsist on very meager diet. Given a moderate amount of water, fairly good soil, and a little bit of care, and they prove to be wonderfully grateful and responsive. Their infinite variety of form, color, texture, habit of growth; a certain romantic charm which seems always to have been attached to them as distinct from all other types of vegetation; their hardiness against all manner of adversity; these make them among the most interesting of all plants. Most varieties have conspicuous flowers, many of a gorgeousness or of a delicacy unsurpassed in the whole world of flowers. They appeal as much to the amateur as to the trained botanist.

Succulents seem best adapted to rock gardens, --- and a few acres of rock garden in Balboa Park so planted would be a thing to marvel at.

Third: A lath house with a comprehensive collection of begonias and similar semi-shade loving plants.

Balboa Park should have a real lath house --- low rambling disconnected, --- housing begonias and ferns and the myriad of exotics, tropical and semi-tropical plants that cannot stand the direct rays of the sun in this land of little humidity.

Architecturally, the actual building should be as inconspicuous as possible, so built that the structure would not show at all. Think of the beauty of such a collection of lath works rambling over a few acres, filled with blooming begonias, with ferns and palms and vines, with gloxinias and streptocarpus, with lilacs and primulas and all the rest, the rockeries and pools and aviaries, the lath-work draped with wisteria and all manner of vines; and scattered among the houses, trees with shady seats, and shrubbery and fountains and open courts of bedding plants. We have the space in Balboa Park. We have the man, Mr. Robinson, who knows better than anyone else in the world how to do it. Perhaps sometime the money will appear from somewhere.

May 30, 1926, San Diego Union, Classified, 7:1-6. Pioneer tells history of Balboa Park, by Daniel Cleveland.

San Diego is fortunate in possessing one of the largest and, as our citizens believe, one of the most beautiful public parks in America. Visitors to our city often express their appreciation and admiration of its

scenic beauty. The history of this park, often asked for, is seldom correctly given. Indeed much that is untrue and misleading is often, through ignorance, imparted to the seeker after knowledge.

In recent years the story has been and still is persistently told and has seemed to pass current with some of our own citizens, though more generally accepted by strangers in our midst, that the park lands were donated to this city by some generous and public-spirited citizen. This story is untrue, and should be corrected.

For the information of the general public and in the interest of truth and authentic history, it might be well to maintain a legend, painted in large letters over the eastern and western entrances to Balboa Park somewhat to the following effect:

The park is a portion of the pueblo grant made in 1835 by the department of California, then a territory of the Mexican republic to the pueblo of San Diego. Since that date it has been the property of this city.

My purpose in this communication is to give a true, though necessarily a somewhat condensed and brief history of Balboa Park. I aim to tell the story of its reservation from the large body of pueblo lands, of its vicissitudes, and of the incidents connected with its preservation from the schemes and assaults of greedy speculators, and of its development finally from native wildness in 1868 into a park of scenic and artistic beauty in 1926. To tell and under the story aright, we must begin at the beginning.

California was first settled by Europeans in 1769. The first settlement was made at San Diego by parties of priests, soldiers and settlers under the spiritual leadership of Fathers Junipero Serra and Juan Jose Crespi.

The little settlement at San Diego remained under military government, first as a Spanish province until 1821 and afterwards until 1846 as a department of the Mexican republic. On December 21, 1834 an election was held by the few inhabitants then at San Diego and the municipal officers constituting a pueblo were elected. Thirteen votes were then cast, indicating the size of the population. The officers chosen at this first municipal election were Juan Osuna, alcalde (mayor); Juan B. Machado and Jose Maria Marron, rigidores (or counselors); and Henry D. Fitch, a young sailor born in Massachusetts, sindico or law officer and legal adviser of the presidial government.

The Presidio of San Diego was organized about January 1, 1835, and the newly elected municipal government then assumed much of the authority that had been previously exercised over local affairs by the military officers stationed at this post. One of the first acts of the new municipal authorities was an application to the Mexican government of the department of California for a grant of land from the public domain, to which under the colonial laws of Spain and Mexico, as a pueblo San Diego was legally entitled for the use and benefit of its inhabitants. The grant was made in the same year.

This grant was not surveyed, nor was its area defined until 10 years later in 1845, Henry D. Fitch, acting under the orders of the governor of the department of California, surveyed and made a map of the pueblo grant. The survey and map, as thus made, include with their boundaries all the territory incorporated in 1851, at the first session of the legislature of the then new state of California.

The flag of the United States was raised at San Diego in July, 1846, and California then passed permanently from the sovereignty of Mexico. A second survey and map of this pueblo grant were made by John C. Hayes in 1858, and agreed practically at all points with the Fitch survey and map. This pueblo grant, as defined by the Fitch map, was afterwards confirmed to the city of San Diego by the courts and departments of the United States.

In May, 1867, A. E. Horton purchased nearly 1,000 acres of the city's pueblo land for the sum of \$26,600. He lost no time in having his newly acquired tract surveyed and subdivided into blocks and lots, as shown on the map of "Horton's Addition to San Diego," which was issued in October of the same year. Horton's success in securing purchasers for lots in his addition, and the influx of new settlers into San Diego,

beginning in the fall of 1867, and continuing with increasing numbers in the year 1868 seemed to indicate to a few of the more enterprising citizens of San Diego the possibility that more of the pueblo lands might soon be sold and that the then little village of San Diego might grow into a larger city.

E. W. Morse, native of Massachusetts, who had settled at San Diego in 1850, seemed to be impressed by the improved and improving conditions at this city. At a meeting of the city board of trustees, held February 15, 1868, Morse, then a member of the board, proposed a resolution that two of the quarter section pueblo lots --- 320 acres be reserved from sale, as a public park. This resolution was favorably received, and Morse and Thomas H. Bush, another member of the board, were appointed a committee to select the pueblo lots to be reserved for this purpose.

Thomas H. Bush was nominally a member of this committee, but he manifested no interest in this matter, and did nothing whatever in connection with it, except to affix his name to the report written and presented to the board of trustees by Morse.

In a letter written by E. W. Morse to A. E. Horton, August 27, 1904, Morse says:

“On looking up the city records I find the inclosed data:

“My recollection is that you and I really located the park. Bush did not go on the ground, but agreed to what we recommended. He and I signed the report, as the committee previously appointed. I don’t remember the details, but I am sure the other trustees (Bush and Manassee) took little interest in park matters, and that you were earnestly with me until it was finally clinched. I can think of no other person who did as much as you to save it.”

Morse, the only active member of the committee appointed to locate the park reservation found, on inquiry, that the city then owned about 40,000 acres of the pueblo lands, and that these lands were not then in demand. In view of this condition he decided upon a much larger tract than was first suggested for a public park. He therefore recommended in his committee report that nine quarter sections of pueblo lands, 1400 acres in all, be reserved as a public park. The nine lots selected by him are pueblo lots designated on both the Poole and Pascoe maps as numbers 1129, 1130, 1131, 1135, 1136, 1137, 1142, 1143, 1144 (excepting 40 acres in the southwest corner of 1144 that a few days before had been sold to Isabella Carruthers).

Unfortunately, after Mr. Morse’s report had been presented to the trustees, and before it was acted on an election was held, an a new, and with the exception of Joseph Manassee, different board of trustees was elected. Joseph S. Manassee, Marcus Schiller and Jose G. Estudillo constituted the new board.

On May 25, 1868, the report of the Morse-Bush park committee was called up. Trustee Marcus Schiller moved that this report be approved. A resolution was then adopted that the nine pueblo lots designated in the park report “be for a park.” This certainly was a very brief and laconic resolution upon what afterwards proved to be a very important matter, but it has been effective. It has accomplished the desirable result of securing to the city its large and beautiful park.

On February 4, 1870, the legislature enacted a bill confirming the action of the board of trustees of the city creating the park reservation, and declaring that this tract of nine pueblo lots should be “held in trust forever by the municipal authorities of said city for the use and purpose of a public park, and for no other or different purpose.”

Ephraim W. Morse should be publicly recognized as the founder of Balboa Park. He inaugurated the movement for a park reservation --- a matter that apparently no other resident of San Diego at that time thought or cared anything about. As a committee of the board of trustees, without any assistance or cooperation from any other member of the board, or any other resident of San Diego, he carefully selected, and recommended as a park reservation, the nine pueblo lots that now constitute Balboa Park. Largely through his personal efforts and influence, he secured the adoption of the ordinance.

Some fitting and permanent memorial should be erected to Morse, proclaiming the fact that he is the founder of Balboa Park.

The residents of San Diego in May 1868 were apathetic and indifferent respecting any public park. Outside of the little village of Old Town in which they lived, the whole country was unsettled and open to them as a playground, if anyone of them wanted to play. The 1400 acres selected and recommended by Morse had cost nothing to the city, or to any of them. The land had practically no value. If the whole acreage had been offered for sale at a public auction, it might not have realized \$1,000. At the valuation realized at a previous auction sale of more desirable pueblo lands to A. E. Horton, the 1400 acres of this park reservation were worth about \$300. These park lands today, lying in the heart of the city, are worth millions, and are of increasing value.

The reservation of a large body of pueblo lands as a public park was achieved and finally consummated by the bill enacted by the legislature, February 4, 1870, without opposition, because of the general apathy and indifference of the few residents than at Old San Diego. But his peaceful condition did not long continue. Soon after this time the schemers and landsharks, who have been the plague of every new town in California, began to arrive in San Diego. They were hungry and looked around for what they might find to devour. The park lands appealed to them and they wanted them. These reservation from sale of those lands interfered with their schemes. This barrier to their plans must be gotten rid of, and this could be achieved only by repeal of the legislature act confirming the lands to the city as a park "forever." A few men of this class associated themselves together for this purpose in a secret compact, of which the general public was kept profoundly ignorant. The city attorney, at least one of the three city trustees, the state senator from this district, and a very few others were in this conspiracy.

On November 17, 1871, James McCoy, state senator from this district, introduced a bill in the California legislature to repeal the statute and to restore these lands to sale by the city trustees. McCoy was supported in this action by George M. Dannals, assemblyman from San Diego. Both McCoy and Dannals resided at San Diego. This action was taken secretly, and without the knowledge of anyone not in the "ring." It was proposed to rush the bill through to final passage without opposition, before the people of San Diego were aware of the movement. They came perilously near to achieving success in this scheme.

A citizen of San Diego, who happened to be at Sacramento at this time, learned of the pending bill. He rushed the information to San Diego, where it causes intense public excitement and indignation. The citizens realized that they must act promptly and energetically. A few citizens --- George W. Marston, Thomas L. Nesmith, Daniel Cleveland, Mathew Sherman and two or three others constituted themselves a volunteer committee of "public safety" and they went vigorously to work.

Cleveland drew up a short petition to the legislature in protest against the passage of the pending or any bill affecting the park lands or the cemetery of 160 acres that had been reserved for burial purposes. This petition was printed at the office of the **San Diego Bulletin**. The whole city was divided into about 20 sections and a canvasser was sent out to each district to secure the signature of every adult male. Within a few hours the whole city was thoroughly canvassed, and every man who could be reached signed the petition. There were 366 signatures in all. All the papers were then gathered in and the petition was again printed with the names.

Within about four days from the time of the news of the introduction of this iniquitous bill reached San Diego, a copy of the petition, with all the signatures, was in the hands of every member of the legislature. This petition killed the McCoy bill, and up to this time and finally we hope has put an end to all legislative action prejudicial to Balboa Park.

One of the city trustees signed this petition reluctantly and under pressure: "A. B. McKean, concerning cemetery only."

The petition read as follows:

To the Honorable Senate and Assembly of the State of California.

We the undersigned residents of the city of San Diego would respectfully ask that chapter 42nd of the laws of the State of California, enacted at the 18th session of the Legislature of said state, setting apart and dedicating certain lands to the use of the citizens of San Diego for a free and public park forever, and to be used for no other purpose whatever, and also definitely confirming the act of said city trustees acting apart lands for the use of the city for burial purposes, and for no other or different purpose whatever, be not repealed or in any way amended.

We would further pray that in act passed by your honorable body concerning the lands of the city of San Diego, the said park and cemetery lands be especially excepted.”

It is to be regretted that it is impracticable to give here all the names subscribed to the petition, as it would give to the reader a pretty full list of all the adult male inhabitants of San Diego in 1899.

To correct an erroneous statement that has been made as to A. E. Horton’s connection with this petition, and in the interests of authentic history, it ought to be stated that Mr. Horton did not sign this petition, and that he had nothing whatever to do with it. It was said afterwards, in explanation of this fact, that Horton was absent from the city when the petition was drawn and signed.

The McCoy bill for the repeal of the act of February, 4th, 1870, confirming the park reservation as made by the city trustees in 1868, was part of a crafty and cunningly devised scheme for robbing the city of San Diego of both its public park and the “tide, swamp and overflowed lands in front of the city,” extending out from “the line of ordinary high tide to the ship’s channel,” and vesting the title in a small band of unscrupulous speculators. Charlie P. Taggart, the city attorney, devised and engineered the whole scheme. Associated with him, but subordinate in profitable interest, were at least two of the city trustees, James McCoy, first as a city trustee, then as a senator, and A. B. McKean, city trustee. These three, with a few others, comprised the syndicate.

To make this situation and scheme clear to the reader, it may be necessary to recite some of the well authenticated facts connected with what the **San Diego Bulletin** of July 29, 1871, designated as a “Tide Land Swindle.”

On March 1, 1871, two months after the United States courts and departments had decided that the municipality did not own the tide lands in front of the city, thus settling that question, James McCoy, A. B. McKean and C. W. Lewis, then constituting the board of trustees of the city of San Diego, united in a deed to Volney E. Howard and Charles P. Taggart, who was then city attorney, conveying to them as “their fee for wining the suit,” the matter of the pueblo grants which was then on final appeal before the United States secretary of the interior, “all the tide, swamp and overflowed lands in front of the city,” from the shoreline to “ship’s channel.”

Apparently, at first, Taggart intended to keep this deed from record, having some apprehension as to its effect on public opinion, and upon the ultimate success of his schemes. Seventeen days after its execution and delivery to him, probably upon the advice of General Howard, his associate grantee, it was decided that, for its legal effect, upon the question of fraud, it was necessary to place the deed on record, and risk public opinion. It was filed for record by Charles P. Taggart, Mary 17, 1871, and is recorded in book 12 of deeds, at page 176, et seq.

This deed was published in full in the **San Diego Bulletin** of September 2, 1871, under the heading “Tide Land Swindle Again.”

Taggart, acted upon the theory common to all “get rich quick schemers that all men but himself were fools. Sometimes its becomes necessary “to fool them some more.” On April 20, 1871, about one month after his dishonest deed had been filed for record, Taggart caused a paragraph headed “Generous Donation,” to be published in the **San Diego Union**. In this paragraph it is stated that Volney E. Howard and Charles P. Taggart had “donated” to the city trustees “30 blocks of tide lands,” that had “been deeded to them

by the city trustees as their fee for winning the suit,” the pueblo grant contention as to tide lands and the peninsula of Coronado. These tide lands were to constitute a school fund.

This paragraph was an impudent falsehood, but it seemed to serve its intended purpose, temporarily at least. Messrs. Taggart and Howard sought thus to convey to the public mind the false impression that they had generously given to the city all claims to the tide lands that had been conveyed to them by deed by the city trustees less than two months before.

A few months later, in the fall of 1871, the James McCoy, who had joined with his two fellow trustees in the deed to Taggart and Howard conveying to them the tide, swamp and overflowed lands in front of the city of San Diego, was the Democratic candidate for state senator from this district of the state. His opponent for that office on the Republican and people’s ticket was A. E. Horton.

The **San Diego Bulletin** of November 11, 1871, published a letter from Charles P. Taggart, who claimed to be a life-long Republican, to Judge Rolfe of San Bernardino, also a Republican and an influential man in that community, from which I make the following extracts:

“I want you to vote for McCoy and do nothing for Horton.”

Unfortunately, McCoy was elected to the state senate. His first official act after he had entered upon his office was the introduction of a bill to repeal the statute enacted at the last preceding session of the California legislature confirming the park reservation to the city of San Diego as a park “and to be used for no other purpose.”

The reader has been informed how this bill was “killed off” by the citizen’s petition of protest.

It seems to me that the inference from the established facts is irresistible that Taggart, McCoy and McKean, associated with a few others, had conspired to rob the city of San Diego of both its “tide, swamp and overflowed lands” and our public park. The introduction by McCoy of the park repeal bill was only one, and the initial step in their program and scheme. If McCoy had succeeded in securing the passage of that bill, his next move would have been the introduction of a bill to confirm and validate the deed of March 1, 1871, conveying the tide, swamp and submerged lands to Taggart and Howard. There were “millions in it.” Fortunately, the citizens’ petition and protest destroyed McCoy’s influence in the legislature, made that body suspicious concerning any other people he might attempt to introduce, and rendered quite certain that it was useless for these conspirators to further persevere in their nefarious schemes for plundering the city. The people of San Diego and the legislature of the state were against them. They were beaten. Taggart, fruitful in schemes, must try something else.

The first comprehensive map of the pueblo lands of San Diego, including, it was then supposed, all the territory within the grant made to the Pueblo of San Diego in 1835, was compiled by Charles H. Poole in 1856 from a number of small maps of local and restricted sections of the pueblo lands. These maps were made by Cave J. Coutts, (Old) San Diego and La Playa; by Henry Clayton and Clayton and Hesse and other surveyors. Poole made no actual survey. Poole’s map, though correct in the main, fails to include some of the territory actually belonging to San Diego, as being within the boundaries of the pueblo grant.

A later map, published in May, 1870, representing an actual survey, made by James Pascoe, discloses more land than is shown on the Poole map. This additional, or excess land is designated on the Pascoe map as pueblo lots “A, B, C, D, E. F and G,” seven quarter sections each of 160 acres of land. This newly-discovered land was placed by Pascoe on his map north of the park reservation, as designated in the ordinance of May 25, 1868, and where it is now conceded by everyone it rightly belongs.

There was a time, however, most notably in the years 1873 and 1874 when this discrepancy between the Poole and Pascoe maps as disclosed by these lettered lots “A. B. C. D. E. F and G” threatened dire confusion in, and possible disaster to property locations, titles and interests at San Diego.

About 1873, some unscrupulous land speculators at San Diego conceived the idea that this discrepancy between the Poole and Pascoe maps might be used very much to their own advantage. They sought to intimidate and blackmail the owners of property lying near the newly-discovered territory, designated by the lettered lots of the Pascoe map, by threatening to shift and unsettle their boundary lines, and cloud their titles. They succeeded with some of these owners.

By their peculiar and dishonest tactics they induced A. E. Horton to give them a quitclaim deed to lot 1121, the west half of which was then owned by Daniel Cleveland. This deed, dated February 10, 1874, is recorded in book 22 of deeds on page 263. By asserting a claim under this deed, they attempted to coerce Cleveland into a compromise with them. He denied their claim, and refused to enter any negotiation with, or to make any concession to them. To clear away any seeming cloud upon his title resulting from the Horton deed, Cleveland instituted a suit against Horton's grantees to quiet title to the west half of pueblo lot 1121 of the Pascoe map, though the original deed of conveyance from the city trustees in 1859, refers to the Poole map. The real vital and controlling question involved in this case is the correct location of the numbered and pueblo lines and lots as shown on the Pascoe map, which agrees as to the numbered lots with the Poole map. Cleveland contended correctly, as was adjudged in this suit, that the Pascoe map is true and correct. The defendants in this case asserted (as essential to their success in their schemes), that the Pascoe map is not correct, that the pueblo lot lines must be shifted one half mile further north, thus unsettling property lines and producing disastrous uncertainty and confusion of which these defendants expected to take advantage. After a long and bitterly contested litigation, both the trial and appellate courts rendered judgment in Cleveland's favor.

This suit and judgment were of public and general importance only because the public interests demanded that the seeming discrepancy between the Poole and Pascoe maps created by the discovery by Pascoe of the excess pueblo lands should be settled by the courts. This was the real issue in the case recited in the foregoing paragraph. The final decision and judgment in that case settles and leaves all the boundaries of both the numbered and lettered pueblo lots where the Poole and Pascoe maps concur in placing them. It ended all questions as to property lines that could be based on any seeming conflict between these two maps. In this way the judgment in this case is of importance and value as to the lines of the park reservation.

Of more immediate connection with Balboa Park is the deed A. E. Horton was persuaded into giving to these same unscrupulous parties by threats of attacking and unsettling his own property lines. This deed, dated January 6, 1874, is recorded in book 22 of deeds on page 268, et seq. Horton states in this deed that he "quitclaims all right, title and interest in and to pueblo lots 1122 and 1123, according to the Pascoe map, by virtue of a deed of conveyance by me by E. W. Morse and Thomas H. Bush, trustees of the city of San Diego, May 11, 1867. And recorded in book 2 of deeds on page 307; also by virtue of a deed of Francisco Estudillo and O P. Searle to pueblo lot 1132; that this deed 'must not interfere with a deed previously given' by me to Henry C. Brookes for the east half of pueblo lot 1123."

It ought to be stated in fairness to Horton that very soon after the recognition of these two deeds when he fully realized their nefarious purport, the uses to be made of them, and the trickery by which they were to be obtained, he expressed his regret that he had given them.

When the fact of the execution of these two deeds by Horton became generally known, an intense feeling was aroused against him and the grantees named in his deeds. It was generally and perhaps rightfully believed that these deeds were to be used as the basis of a scheme to undermine the city's title to the park reservation, among other properties, and to secure its ownership for themselves or, at least, to force some kind of a compromise advantageous to themselves.

The city board of trustees, under popular pressure, directed D. T. Phillips, the city attorney, to institute suit against Horton, his grantees and two other persons believed to be partners in this scheme, to quiet title to the park reservation. This suit, No. 749 on the docket of the district court of this county, was begun February 25, 1874. On March 5, Horton, by his attorneys, filed a general demurrer, a statement that plaintiff's complaint did not state a cause of action. This demurrer amounted to very little more than the bringing of Horton into court. On the same day, and by the same attorneys, all the other defendants filed their disclaimer of any interest in the property described in the complaint. None of the defendants thought it

prudent to antagonize public sentiment by attempting to further litigate this suit. The suit was dismissed as to Horton on April 13, 1874. No further action seems to have been taken in this case, and it is still pending as to all the other defendants except Horton.

Several attempts were made between the years 1870 and 1910, to cut down the area of the park to fewer acres. None of them, however, were pushed with much vigor. The prevailing sentiment of the citizens of San Diego has always been in favor of maintaining the park at its present size.

Only two concessions of lands within the park seem to have been made before 1902.

On August 8, 1881, the city trustees allotted a small tract of land in the southern portion of the park for a building for the first high school established at San Diego. Joseph Russ, at that time the leading lumber dealer in this state, volunteered to donate all the lumber to be used in the high school building. In grateful recognition of this gift, his name was given to the building and school and was retained for more than 20 years. The building was completed and occupied in 1883.

On December 31, 1887, about 20 acres of the park land were allotted to the Women's Home Association, a charitable organization for receiving and caring for orphan and destitute children. Later, in 1888, the Association was incorporated as the Children's Home and has now developed into a large and important institution, and is doing a great work for the purpose for which it was organized in 1888.

Nothing further of any importance was done in connection with the park reservation until late in the year 1902. Up to that year the reservation remained a bit of wild land reserved for a park. At the end of the year a movement began that resulted in the final development of the wild land into a beautiful public park of which the citizens of San Diego are justly proud.

At a meeting of the San Diego Chamber of Commerce, held on August 15, 1902, Julius Wangenheim offered a resolution that a park improvement committee be appointed. The committee appointed under this resolution consisted of Julius Wangenheim, chairman; U. S. Grant, Jr.; George W. Marston; William Clayton and D. F. Garrettson. The real work of park development then began. What has been done since January 1, 1903 is another story and must be told in another chapter.

June 8, 1926, San Diego Tribune. John D. Spreckels funeral to be held tomorrow afternoon.

June 8, 1916, San Diego Union, 7:1. Fred A. Lindley demands election for college site; Council refuses quick action; hearing set for Monday.

June 9, 1926, San Diego Union, 1:4, 2:4. Playground Commission reported to have a majority favoring reinstatement of Deering as Playground Director.

June 14, 1926, San Diego Union, 1:3-4, 7:1-6. San Diego honors memory of John D. Spreckels at Organ Pavilion; Senator M. L. Ward stresses his constant use of his wealth for public good (illus.).

Before the beautiful organ pavilion in Balboa Park, one of John D. Spreckel's most significant contributions to San Diego's community life, the citizens of San Diego gathered yesterday afternoon to pay tribute to the memory of Mr. Spreckels, the builder and the friend of San Diego. It was a gathering that was sad in the loss of a loyal and loving friend, but proud in the possession of the heritage of his memory, his contributions to the fuller and richer life of the city, material and spiritual, the sense of follow citizenship with the man, John D. Spreckels, which no other city could feel for its greatest benefactor.

"It is in response to a sentiment that has its foundation in genuine affection, that we are assembled here today to do honor to the memory of one we loved," said Chairman George Burnham in opening the brief hour of memorial tributes.

"We come not to mourn but to give thanks to Almighty God for the heritage that is ours. San Diego has no greater name than John D. Spreckels. He was the heart and life and nerve and sinew of the city he loved and helped to build. His hopes, his dreams, his courage, his works will always be an inspiration and his achievements will always remain an enduring monument to his name.

"It is given to but few men thus to live in the hearts of his fellows and throughout the length and breadth of this great state the memory of John D. Spreckels will remain not only a fragrance but a living force, urging us on to nobler deeds and greater aspirations."

BEAUTIFULLY DECORATED

The organ and the pavilion were beautifully decorated for the occasion, the front of the stage being banked with evergreen boughs, while bunches of flowers and the national colors were displayed on the stage and in front of the organ. Crowds of people filled the seats in the plaza in front of the organ, while hundred stood back of the seats and filled the colonnaded peristyles on either side of the organ. On the stage were those who participated in the exercises and a number of the intimate friends of Mr. Spreckels, as well as the leading figures of the city's civic, artistic, political and business life. Mr. Spreckels' family was represented by his daughter, Mrs. Paul Wegeforth, and her daughter, and by Claus Spreckels' younger daughter. Other members of the family had gone to San Francisco with his ashes..

June 27, 1926, San Diego Union, 18:1-6. Balboa Park's Steady Development, by Daniel Cleveland.

The second chapter of the story of Balboa Park must begin where the first chapter of the story ends -- with the appointment in August 1902, by the San Diego Chamber of Commerce of a Park Improvement Committee. This committee was wisely chosen. It was composed of representative citizens, representing the best business interests of the city, interested in the public welfare, and especially interested in the work of making San Diego a city beautiful. The members of the committee were Julius A. Wangenheim, chairman, a partner in one of the leading wholesale houses of this city and for many years president of one of our largest banks. George W. Marston, the founder and head of the Marston Company, one of the largest department stores in southern California. U. S. Grant, Jr., son of the famous American soldier of the same name, general and president of the United States. William Clayton, for more than 10 years manager of the great public utilities known as "the Spreckels system." D. F. Garrettson, president of the then largest bank at San Diego.

The committee realized the importance of the duty assigned to it and entered upon its work with energy and enthusiasm. The first thing done by the committee was to "take account of the stock," as a merchant would express the situation. The committee must ascertain the condition of the park lands, the improvement work to be done in developing the park, and the amount of money available for this purpose.

On September 10, 1902, the Park Improvement Committee reported to the Chamber of Commerce that "Mr. McLaren, the landscape superintendent of Golden Gate Park, San Francisco, will arrive in about 10

days and look over the ground (Balboa Park) and start the movement for making a harmonious plan for improving the park lands. . . . The needs of beautifying the our city must be apparent to every citizen. . . . Our needs in this connection already have been generously recognized by a number of our citizens.”

The committee submitted the following report of the amount already received at the beginning of a Park Improvement Fund:

Bequest left by the late Dr. Allyn for park improvement	\$3,000
George W. Marston*	1,000
San Diego & Eastern Railway*	500
La Jolla & Pacific Beach Railway*	200
Klauber-Wangenheim Company*	200
First National Bank	200
Garretson Investment Company*	100
Simon Levi	100
Dr. F. R. Burnham	100
U. S. Grant, Jr.*	100
Captain W. R. Maize	100
T. N. Larson	<u>100</u>
	\$5,500

*Contributed by members of the Park Improvement Committee

The report further stated that “voluntary subscriptions will be appreciated.”

The publication of this report aroused general public interest and enthusiasm in the work undertaken by the Improvement Committee. Local societies and organizations and the citizens generally contributed money and volunteered their support and services in aid of the proposed work. Buttons bearing the legend, “For Park and Boulevards.” and priced at 25 cents, were sold by children and adults throughout the city to swell the park fund. Every loyal San Diegan was expected to purchase and wear at least one of these buttons.

The San Diego Union of March 2, 1903 says

“It is an undeniable fact that since the park committee commenced operations some months ago the interest of the public in the park has grown enormously.”

Mrs. M. B. Coulston, who has already become prominent as one of the editors of “Forest and Stream,” and in connection with the work of parks and grounds in the Atlantic states, arrived in San Diego about the first of September, 1902. The Park Improvement Committee, recognizing her experience, ability and value in connection with its proposed work, elected her secretary of the committee. She entered at once upon the duties of her new office with enthusiasm and energy. She remained with the committee until 1904, when she went to the university at Berkeley to perfect herself in botany, and thus become of greater use to the community. She died at Berkeley, July 16, 1904.

It was generally conceded that, as Mr. McLaren had suggested, the initial step in the work of park improvement should be the securing and adoption of plans and a program of the work to be done. Mr. McLaren also suggested what doubtless was obvious to the Improvement Committee, and to every honest and intelligent citizen, that one of the ablest landscape architects in the United States be employed to make these plans.

The local newspaper published many communications from foolish persons clamoring for the employment of “local talent” to make the plans for and to superintend the work of park improvement.

Fortunately, the Improvement Committee was composed of men of larger vision and with a more honest and disinterested regard for the public welfare than the anonymous writers who advocated the expenditure of public money regardless of the public interests.

One of the most contemptible, dishonest and disastrous policies can be pursued in connection with public works, or in public affairs, is the yielding to popular clamor for local patronage, made by a few or by many persons, regardless of the public welfare. That clamor, yielded to for political reasons, has cost this city a great deal of money, represented by several hundred thousand dollars of the present city bonded indebtedness. Our main high school building cost this city 50 percent more than the bid of a responsible contractor for its erection because the Board of Education rejected this bid for the avowed purpose of parceling out the work among local contractors, at their own prices.

Mrs. Coulston, while connected with the Park Improvement Committee as secretary, wrote many articles, reports and letters for publication, and made many public addresses in connection with this work. At a meeting of her committee, held October 2, 1902, Mrs. Coulston said:

“The evident sentiment of the best citizens is that the park shall rank with the foremost parks of the whole country and shall be a satisfactory feature of San Diego.”

The San Diego Union of October 8, 1902 says:

“George W. Marston left for the east this morning. . . . One of his objects in going east is to secure the plans for the improvement of our city park. As is well known, Mr. Marston has been one of the most generous of contributors of the park fund, having contributed \$1,000 in cash. He will also, we are informed, pay for all the plans necessary to carry out the plans of the committee. The cost of these plans will be in the neighborhood of \$3,000.”

On the 21st of October, 1902, Mr. Marston telegraphed to the Park Committee from New York City that “Samuel Parsons, Jr.,” a distinguished landscape architect, “will prepare plans for the park.” The Committee approved the employment of Mr. Parsons.

Mr. Parsons arrived at San Diego, December 22, 1902, and entered at once upon his work. He announced he would remain at San Diego about one month, which would give him sufficient time for formulating his work and preparing the plans for the improvement of the park.

After a preliminary view of the park lands, before he began to formulate his plans, Mr. Parsons expressed his impression of them as a natural site for a park. He said that he “was delighted with the tract”; that “the natural scenery of the park, the bay of San Diego, the islands in the ocean, the great ocean view and the mountains surrounding San Diego presents one of the great views of the world.” In all of the many parks visited by him in Europe and America he has seen no park equal to it in natural beauty and potentialities.

A few days later, Mr. Parsons said:

“There are three serious problems that a landscape architect has to overcome:

“First. The flora, which at San Diego is entirely different from that of the eastern states.

“Second. A road system.

“Third. The arrangement of the system of botanical gardens; position of the open-air music stands; zoological gardens; places of amusement; art galleries, etc.

“I do not believe in cutting up a park into a thousand little jimcracks.”

At a meeting of the Park Improvement Committee, reported in **The San Diego Union**, January 2, 1903, Mr. Parsons said:

“I have never seen nor heard of a park where so little change of surface is necessary to obtain its true development by cuts and fills --- one essential almost eliminated from the San Diego park because of the fact

that the canyons are so deep, and the mesas so flat. It would be doing unpardonable violence to the beauty of the scenery to allow radical change of surface.”

In a letter written by Mr. Parsons at San Diego and published in **The New York Evening Post** of February 28, 1903, he says:

“So rapid is the growth of plants in that favored region (San Diego) that this new park bids fair, in the next decade, to be a successful rival in some particulars of the public parks of the world. . . . The park is nearly square, and measures a mile and a half across. The skyline from the north to the southwest is outlined by chains of mountains, some miles distant, the San Jacinto range, 10,000 feet high, being 80 miles away, and snow-capped at this season, as is Cuyamaca, 50 miles in a straight line. Mountains in Mexico, cone shaped and flat-topped, lie to the south. To the southwest, looking over and beyond the city, far out to sea, loom the weird and fantastic forms of the Coronado Islands, floating as it were, between the sea and sky, and leading the eye over the illimitable expanse of the ocean. Off to the northwest lies Point Loma, a long neck of land, with an elevation of several hundred feet, with glimpses of the Pacific beyond the beautiful San Diego Bay, covering 22 square miles in this wonderful landscape.

“It is a pleasure to think of a city of the moderate size of San Diego, having 20,000 inhabitants, starting out in earnest to build a park of the first-class. But this is also true, that in no other place in the United States does such a magnificent park territory seem to tempt the enterprise of citizens.”

Mr. D’Hemencourt, city engineer, recommended the construction of two dams in the park, thus creating impounding reservoirs for the storage of the winter rains, to be used in the summer for the irrigation of the park lands. Mr. McLaren, of the Golden Gate Park, San Francisco, a friendly advisor, and Mr. Parsons, park architect, agreed in opposing the proposed scheme and it was abandoned. Mr. Parsons said:

“The water so impounded would be muddy during the winter season, and would be lost early in the summer by evaporation.”

During the first year of the efforts of the Park Improvement Committee to render a great public service in developing and creating a public park for the benefit of all the citizens of San Diego, the Common Council of this city, which was then a large and unwieldy body, failed to cooperate with the Improvement Committee as promptly and cordially as seemed desirable for the general good.

Though the San Diego city government, probably because of the large membership of the Common Council and the unwieldy nature of that body, divided into two houses, failed to aid the Park Improvement Committee as promptly and helpfully as desired by the Committee, the city authorities did in fact render substantial assistance in the work of the Park Improvement Committee.

In March, 1903, John McLean, then a resident of San Diego, who had been a foreman at Golden Gate Park, San Francisco, was employed as city gardener to care for the city parks --- at that time including our main park and the small one in New San Diego. He was soon thereafter accepted by the Park Improvement Committee for work in connection with Mr. Parsons’ plans for the development of the park. McLean began his work by the construction of a large lath inclosure for the propagation of the trees and small plants needed for planting in the park. He retained the office of city gardener for several years.

In April, 1903, those on the Board of Public Works recommended to the Common Council, of which they were members, “That the Park Committee of the Chamber of Commerce be allowed to improve the city park in accordance with the plans to be submitted from time to time by architect Parsons, after being approved by the Board of Public Works.” This approval was always given, and in this respect the Committee and the Board of Public Works were in full accord.

During the first year of its work, the Committee received \$1600 from the city in aid of the Committee’s work. The second year \$6000 was received from the city, and yearly appropriations were granted thereafter.

Mr. Parsons was greatly aided in the engineering problems involved in his studies and plans and in the selection of plants to be grown in the park by T. S. Brandegee of San Diego. Mr. Brandegee was a civil engineer of ability and experience, and also a distinguished botanist. He was the best informed American authority upon the flora of southern California and Lower California. In both capacities, as a civil engineer and botanist, he gave his services and the benefit of his technical knowledge as an engineer and botanist, to Mr. Parsons, and his partner, Mr. Cooke, and the Improvement Committee gratuitously.

In May, 1903, Mr. Parsons forwarded from New York maps and plans for roads and paths in the southwestern part of the park. Additional maps and plans for other sections of the park were sent by him from New York as soon and as often as they could be developed.

While at San Diego in January, 1903, Mr. Parsons visited the Scripps' estate at Miramar, in this county. Doubtless as a result of this visit, E. W. Scripps offered to donate \$10,000 in cash to be expended in "giving to the city park one of the most complete collections of cacti in the world." Unfortunately, as I am inclined to think, the Park Committee failed to accept the terms connected with the offer. A very rich and varied cacti flora, embracing many rare, beautiful and interesting genera and species, is indigenous to the country within a radius of 100 miles of San Diego. Our park lands, with climate adapted to their cultivation, ought to possess (to use the language of Mr. Scripps) "the largest and finest collection of cacti in the world."

The San Diego Union of January 1, 1903, published the proceedings at a meeting of the Park Improvement Committee held a few days before that date. Mrs. Coulston, secretary of the Committee, read an interesting report. She said in part:

"Soon after the work of park improvement had begun, the Ladies' Annex to the Chamber of Commerce was formed, and among other public improvements undertaken by this body, 10 acres of the park were planted at an outlay of about \$500, raised by subscription. A long narrow strip was selected for this planting, extending from Date to Palm Streets, along the west side. About a third of the trees are in good condition today, and many doubtless will remain to perpetuate the work in the permanent park plan. The projector of this movement was the late Mrs. Ben Lake.

"Thirty-six acres of the extreme northwestern portion was, in 1892, granted for a term of years to Miss Kate O. Sessions by City Councils, to be used as a nursery garden. The consideration is the donation of 500 trees yearly to the city, and the permanent planting of 100 additional trees. The nurseries cover 10 acres and have been really the only floral park in the city, and an incentive to increased planting on private grounds.

"Other uses and improvements of portions of the park, which indicate the appreciation, taste and public spirit of citizens, include Golden Hill Park, a beautiful situation on a bluff at the extreme southeastern boundary of the park. The tract is under the care and direction of the civic committee of a local club of citizens. The grounds are well planned, and planted with commendable taste, all the expense being met by neighborhood funds.

"A unique and highly successful improvement has been made by James E. Mulvey on park land adjoining his home grounds, in a beautiful grove of well developed trees. The golf links of the Country Club are in the northern part of the park. Excepting the local improvements named, the great stretch of park territory at this time remains in its natural conditions, a magnificent public possession, with exceptional character and beauty in itself, and incomparable landscape effects."

A very general interest was taken in the park improvements by the citizens of San Diego. Contributions of money and offers of personal service were made by individual citizens and by local fraternal and social societies and organizations in aid of the work. The interest and aid continued from the time of the first appointment of the Park Improvement Committee in August 1902, until in 1914, the larger project of the Panama-California Exposition absorbed the general interest and superseded all other schemes and efforts for the improvement of the park.

Mr. McLaren, landscape superintendent of the Golden Gate Park, San Francisco, after his first visit to our park in September, 1902, was always a steadfast and a very helpful friend of the Park Improvement Committee, and aided in all practicable ways, by his experience, judgment and advice, in the work of park improvement. He sent many contributions of plans from the nurseries of Golden Gate Park. Contributions of trees and other plants were also received from Australia and elsewhere.

On July 4, 1903, which was observed at San Diego as Arbor Day, all the local fraternal societies and organizations united with the foresters in a great tree—planting festival in the park. Nearly 1,000 trees were planted that day in ground that had been previously prepared for that purpose.

George Cooke, partner in the firm of Parsons and Cooke, arrived in San Diego in April, 1903, to assume the special duty of personally inaugurating and managing all the work of carrying out the plan prepared by the firm for the improvement of the park. The work, which was largely tree planting, had been started by the Improvement Committee earlier on that year, before his arrival, but soon was discontinued. Under the spur of Mr. Cooke's presence and personal direction, it was now resumed, to be again suspended when about a month later he returned to New York. It was again started in December, 1903, upon Mr. Cooke's return to San Diego. Mr. Cooke was in San Diego much of the time for about two years. While here he was personally and energetically engaged in the work of park improvement, as outlined in the plans submitted by his firm. He died at San Diego in 1908.

Both Mr. Cooke and Mr. Parsons took a warm, personal interest in the park. It was with both of them far more than a matter of professional employment and obligation. They worked faithfully and energetically to supplement and develop by their art what kind nature had already done in connection with the park site, to make it one of the most beautiful public parks in the world.

Aided by contour maps of the park, Mr. Parsons prepared and forwarded plans for park improvement from time to time, as rapidly as practicable.

About August, 1903, maps and plans were received at San Diego for the eastern and western approaches and entrances to the park. These, displayed in the windows of Mr. Marston's store, elicited the almost universal praise and approval of the citizens of this city. In every community some persons are always found who through ignorance and "cussedness" or for selfish reasons, criticize adversely and oppose every plan or measure of a public character, unless it originates with themselves. The newspapers of this city published several unfriendly criticisms from anonymous writers, and a few protests were filed with the City Council demanding the rejection of the Parsons' plans, or that radical changes be made in the plans, inconsistent with them, which, if adopted, would destroy their excellence and beauty and prevent the harmonious and artistic development of our public park.

The hearing and consideration of these protests was postponed by the City Council until the time of the expected arrival of the park architects, Parsons and Cooke, in December of that year. Fortunately for San Diego, the City Council, having a proper respect for the public interests, finally approved these plans and adopted them. Thenceforth, without further opposition from ignorant or foolish people, the Parsons' plans were the law of development in Balboa Park and today San Diego possesses the beautiful park that is a joy to our people.

At a municipal election, held at San Diego, January 27, 1905, an amendment to the charter of the city was adopted, creating a Board of Park Commissioners to have charge of all the public parks in the city, and providing a park fund by an annual appropriation to be expended in the maintenance and improvement of the parks. This appropriation was fixed at not less than five nor more than eight cents on each \$100 of the assessed value of the city property. The sum thus realized in 1908 for the park fund amounted to \$14,000.

The first Board of Park Commissioners appointed under the recently adopted charter amendment consisted of George W. Marston, president; Ernest W. White, secretary; and A. Moran.

The two most notable incidents in the history of the park occurring between 1905, when the Board of Park Commissioners became a municipal body, and 1914, when the more rapid development of the park began in preparation for the great exposition, were:

The adoption by the San Diego Chamber of Commerce in July, 1909, of a resolution offered by G. A. Davidson to hold in the park in 1915, a Panama-California Exposition, and the adoption by the Board of Park Commissioners, on the first of November, 1910, of a resolution designating this tract as "Balboa Park."

Before the appointment of a "Park Improvement Committee: by the San Diego Chamber of Commerce in August, 1902, the park was a tract of wild land, designated by Mr. Parsons as "a magnificent natural site for a public park."

In August, 1902, a Park Improvement Committee was appointed by the San Diego Chamber of Commerce. At an expense borne by George W. Marston, the firm of Parsons and Cooke was employed and prepared plans for the artistic development of the park, and assumed general supervision of the work of development. Before 1906, the local expenses of this work were met by the voluntary contributions of our citizens, augmented by grants from the public funds.

After the municipal Board of Park Commissioners, created by charter amendment, had assumed the control and general management of the park in 1905, the expenses of park improvement were borne by the annual tax levy provided by the city charter.

In 1914 the work of park improvement and development was greatly stimulated and hastened by the necessities of the Panama-California Exposition. The project of holding this exposition was first suggested to the San Diego Chamber of Commerce in July 1909 by G. A. Davidson, then a member of that body. The strenuous work of preparing the park lands and buildings for the exposition began in a large way in the year 1914, The exposition opened January 1, 1915 and continued two years.

The history of Balboa Park must conclude with the work of preparation for the Panama-California Exposition in 1914. The narrative of this exposition is another story. This story is told in several volumes.

July 24, 1926, San Diego Union, 9:4-5. Board of Park Commissioners turns down W. J. Hall's request to shoot rabbits in Balboa Park; only park employees are given permission.

July 25, 1926, San Diego Union, 11:7-8. Kate O. Sessions writes about beauties of Hawaiian gardens.

July 25, 1926, San Diego Union, 14:6. Museum of Natural History shows new bird case for black-footed Albatross.

July 25, 1926, San Diego Union, Classified, 2:1-2. San Diego Zoo has fine specimens of Barbary sheep and wild goats.

July 28, 1926, San Diego Union, 12:1, July 29, 1926, Classified, 13:4 and July 30, 1926, 16:4. Mormon Tabernacle Choir to given concert at Organ Pavilion tomorrow evening.

July 29, 1926, San Diego Union, Classified, 13:4. Mormon Choir sings at Organ Pavilion tonight.

July 30, 1926, San Diego Union, 10:4. City playgrounds may do with superintendent; Board fails to explain why it rejected city eligibles for job.

July 30, 1926, San Diego Union, 16:4. Mormon Chorus scores triumph in Balboa Park.

August, 1926, California Garden, Vol. 18, No. 2, p.4. Balboa Park Notes, by John G. Morley

The present year, to date, has been a strenuous one for several reasons, during the severe storm in April a small cyclone passed through a portion of Balboa Park, commencing on the west side opposite Grape Street and through to Park Boulevard when hundreds of trees were blown down and uprooted, causing an immense amount of damage estimated at \$75,000, which includes the replanting of the devastated area. Owing to the limited finances of the Department, the Board of Park Commissioners requested an appropriation of \$10,000 from the Emergency Fund of the City Council. The Council very generously acceded to the request, the money being used for the cleaning up and removal of the debris and is now practically completed. Visitors to the Park would hardly notice the change, but those who are familiar with the former beauty of the destroyed sections can appreciate the changed appearance and the difficulties faced in the removal of the hundreds of fallen trees to temporarily restore that portion of the Park to its former beauty.

Seasonal planting of flowers to date has been for spring flowers, 48,000 pansies; 4,500 calendulas; 3,000 larkspurs; 3,500 snapdragons; 4,000 stocks; 2,000 schizanthus and 1,800 cinerarias; for the summer and fall flowers, 4,300 dahlias; 4,000 African marigolds; 4,000 asters; 17,300 zinnias --- these with several hundred each of tuberous begonias, gloxinias, Japanese lilies, exacum affine, also several hundred perennial flowering plants, which provide a continuance of bloom throughout the year.

At the present time, the dahlia garden, south of the Organ Pavilion, is a riot of color with the many varieties in bloom and the borders of brilliant flowering cannas give it an effective setting. The dahlias on the west side of the Park are just commencing to bloom in profusion and together with the large quantities of zinnias, as well as other seasonal flowers, Balboa Park will be well worth a visit to see the floral display.

September 11th and 12th is the date for the annual Fall Show of the Floral Association, to be held in Balboa Park. Prospective exhibitors should bear this in mind so that the quality of the flowers and plants exhibited will be the best we have ever had at this season of the year, and make the show as artistic and financially successful as the one held in the spring.

August, 1926, California Garden, Vol. 18, No. 2. San Diego's Horticultural Children, by K. O. Sessions

A group of [*Fremontia Mexicana*] should occupy some prominent slope in Balboa Park that it may become better known and appreciated. It makes a very excellent flowering branch of interior decoration and is worth growing for a cut flower.

August 1, 1926, San Diego Union, Classified, 1:1, 2:6. San Diego Athletic Club breaks ground for building at 6th and A Streets.

August 1, 1926, San Diego Union, Society-Club, 2:1-5. Interview with Madame Schumann-Heink in her Coronado home.

August 1, 1926, San Diego Union, Music Page, 15:7-8. Three hostesses give luncheon at Japanese Tea Garden in park honoring Captain and Mrs. F. Sellers.

August 1, 1926, San Diego Union, 1:3-4. Biggest and best County Fair billed to delight San Diego; five-day exposition promises well-balance program of merrymaking, sports, bronco busting and agricultural and industrial exhibits, carnival nights features.

August 4, 1926, San Diego Union, 8:1-2 and August 5, 1926, 7:1-2. City will see mile of freaks in big booster parade tonight; strange procession showing evolution of Miss San Diego will come as climax to Zoo Day, with animal exhibits free to public; fraternal orders take part; every beast from Zoo that can walk will parade down Broadway at noon and hold a reception in the plaza; parade designed to raise \$150,000 for San Diego California Club advertising program.

August 4, 1926, San Diego Union, 8:3-4. Fine Arts Gallery free tonight in observance of Balboa Park Day.

August 4, 1926, San Diego Union, 11:1. Zoo will build extra gate to care for visitors; west side entrance will shorten walk to cars; other projects planned; present fence to be extended to California Building.

August 5, 1926, San Diego Union, 13:2-3. San Diego Zoo gets rare specimens; deer from Indian look like dream; but wart hogs resemble nightmare.

August 6, 1926, San Diego Union, 14:3-5. Master class at Organ Pavilion conducted by Albert Riemenschneider, Cleveland, Ohio.

August 9, 1926, San Diego Union, 24:1. Indian Village busy once more; more than 200 scouts and officials attend Court of Honor sessions.

August 10, 1926, San Diego Union, 1:7, 2:4. Senator Shortridge to present collection of Canadian goats and sheep to Zoo; will arrive in December.

August 11, 1926, San Diego Union, 11:4. Richard Requa showed Kiwanis Club film he made while in Spain studying Spanish architecture.

August 15, 1926, San Diego Union, 1:3, 2:3-4. Love of elephant for Shetland pony brings romance to Zoo; both came to Zoo as gift.

August 16, 1926, San Diego Union, 5:5-6. Horse Show at County Fair expected to bring some of the finest animals of southwest to city.

August 17, 1926, San Diego Union, 5:3. Zoo needs funds; asks County for cent in budget; letter from Harry M. Wegeforth, president.

August 19, 1926, San Diego Union, 5:1. If the advice of Police Judge Chambers is carried out, dogs that get into the San Diego Zoological Gardens and molest the animals will be shot.

August 19, 1926, San Diego Union, 24:1-2. Definite action against the movement to put the State College in Balboa Park is expected to be the outcome of the meeting of the directors of the Chamber of Commerce today; statement by Lane D. Webber, president of the Chamber.

“The taxpayers are being induced to sign a petition which will place the question of the college site on the ballot. In other words, they are being asked to support a measure to deliberately give away thousands of dollars worth of their own property, while other people and organizations are offering five free sites as personal gifts.

“Why should the taxpayers give this valuable property away when if they really wanted to get rid of it, they could sell it for at least 85,000 dollars or more? But San Diegans do not want either to give away or to sell Balboa Park. No money could ever replace it. To lessen the area of Balboa Park today would be as sensible as filling up our harbor or blowing up part of the city’s water supply.

“Balboa Park is one of the greatest assets the city possesses, and only those who are blind to its tremendous value would consider disposing of any more of it. The college authorities do not want the institution located there and the city doesn’t want it there. Only a few short-sighted people are sponsoring the move.”

August 20, 1926, San Diego Union, 24:4. Chamber of Commerce heads score park site; restate opposition to putting new State College in Balboa Park.

August 21, 1926, San Diego Union, 1:5, 2:4. City Council may place park school site issue on ballot with water bonds if initiative is invoked.

It was pointed out that more than one bond issue has been messed up and lost by presenting less important issues at the same time.

Some time ago the park site advocates went before the council and asked that the question of giving the park over to state college purposes be put to the people. The councilmen refused to call an election, asserting that the petitioners should invoke the initiative.

August 21, 1926, San Diego Union, 1:7. City Playground Board appoints Bernard C. Nichols to post of assistant playgrounds superintendent; Civil Service Commission wins victory as assistant named from list.

The Playgrounds Heads have not selected a superintendent to succeed Tam Deering, whose removal from the superintendency recently created a heated controversy. They are said to be waiting for the Board of Education to agree upon a candidate who will be acceptable for school playgrounds work and who would hold a double position, as Deering did.

August 23, 1926, San Diego Union, 8:5. Scouts to plant desert garden at Indian Village.

With the rapid disappearance this week of the old stake fence surrounding the scout headquarters on the north side of the Indian Village reservation, many friends of scouts stopped by to inquire "what is was all about," and when informed that a desert garden was to be planted on the open space facing Park Boulevard voiced their commendation and offered their help.

August 24, 1926, San Diego Union, 7:1. City Council sidetracks college site at water bond election; proposal may be voted on at later date; initiative petition contains 3,600 signatures; only 2,800 valid signatures necessary.

August 26, 1926, San Diego Union, 5:5-6. Costume carnival to mark opening of County Fair on night of September 14; free dancing, auto parade, style review among features of first evening.

August 27, 1926, San Diego Union, 10:3. All County Fair entries will be closed September 7; exposition this year will be marked by enlarged exhibits in all directions.

August 28, 1926, San Diego Union, Classified, 1:1. Petitions filed by Balboa Park College Site Association to compel City Council to submit park site question to voters at special election apparently are insufficient; signatures fall short of 15 percent required to make issue; will try again

Clerk Wright yesterday notified Judge Mossholder, who is in charge of the petitions, that it is indicated that the signatures are insufficient, and Mossholder said they would be re-circulated and more names obtained..

August 28, 1926, San Diego Union, 14:5. Madame Schumann-Heink delighted 2,500 or more people at High School auditorium last night in benefit for Rest Haven Children's Home.

August 29, 1926, San Diego Union, Development, 2:2-3. New buildings to house fine pigeon exhibit at County Fair, September 14 to 18; more than \$4,000 has been spent in increasing the accommodations at the fair grounds for agricultural exhibits..

September 1, 1926, San Diego Union, 12:4. Emmett Robert Gaderer, tenor, will assist Dr. Stewart at recitals Wednesday evening and Sunday afternoons at Organ Pavilion.

September 4, 1926, San Diego Union, 1:1 and September 5, 1926, 1. Spreckels Company will bridge bay; San Diego-Coronado span 2,100 feet; cost to exceed \$1,000,000.

September 5, 1926, San Diego Union, Development, 8:2-6. Drawing of residence of Mr. and Mrs. D. E. Mann, Coronado, designed by Requa and Jackson.

September 8, 1926, San Diego Union, 18:1-2. Fall flower show to open in building on southwest corner of Plaza de Panama, Saturday; nominal fee will be charged to defray expenses.

September 11, 1926, San Diego Union, 5:5. Carnival night to open County Fair Tuesday; free dance, musical concert and exhibits to be features of program; outdoor dancing platform constructed.

September 12, 1926, San Diego Union, Classified, 2:4. Senator Shortridge gets rare collection of sheep and goats from Canadian government for San Diego Zoo.

September 12, 1926, San Diego Union, Classified, 4:1. San Diego's greatest County Fair to open Tuesday night; awards this year greater than ever.

September 12, 1926, San Diego Union, County Fair, 3:1-4. Costume carnival to be feature at opening day of big five-day program; Santa Ana's 50-piece municipal band will give free concert; Ruth Varin's 9-piece orchestra will play for free dancing.

September 12, 1926, San Diego Union, County Fair, 4:3-4. City championship bicycle races fill two-day program at County Fair; pageant on Friday morning to be followed by stunt competitions and speed contests for long and valuable list of prizes; Saturday events attract many.

September 12, 1926, San Diego Union, County Fair, 4:3-4. Handling of bees, County Fair exhibit.

September 12, 1926, San Diego Union, County Fair, 4:3-5. Society horse show presents best of equine world in 4-day event.

September 12, 1926, San Diego Union, County Fair, 5:4-5. County Fair successes credit to men who lead; experts who love San Diego and who know resources of back country responsible for continued value of annual exposition given at Balboa Park.

September 12, 1926, San Diego Union, County Fair, 5:5. Cash prizes for red heads with most brilliant shade of red hair at Midway stage at County Fair next Thursday afternoon.

September 12, 1926, San Diego Union, Development, 10:1-4. Presidio Hill subdivision to preserve San Diego's history and romance; every house plan will be passed on by Requa and Jackson, consulting architects.

September 14, 1926, San Diego Union, 7:8. George W. Marston warns City Council an invasion of Argentine ants threatens park; Council refused to appropriate \$3,785 to fight pests.

September 14, 1926, San Diego Union, 16:1-4. Array of agricultural and industrial products to be displayed at County Fair tonight.

September 15, 1926, San Diego Union, 1:7, 3:5-6. 10,000 attend opening of County Fair.

September 16, 1926, San Diego Union, 16:1-5. Record County Fair crowd yesterday thrills as finest of horseflesh parades in feature event of Eighth annual Balboa Park show; opening day of exhibition big success; saxophone contest delights great throng; other entertaining numbers.

September 17, 1926, San Diego Union, 14:3-8. Capacity throng makes merry and is educated as turnstiles of County Fair proclaim record; El Cajon won grand prize for best exhibit in Class No. 1.

September 18, 1926, San Diego Union, 5:5-6. Today last and best day of San Diego County Fair; entertainment programs offered eclipse all others; varied exhibits; event brought largest crowd since Exposition days; largest dance floor every built in Balboa Park on Midway.

September 21, 1926, San Diego Union, 7:1. Balboa Park college site election set for November 23; hot battle seen in issue forced by Balboa Park College Site Association; City Council yesterday adopted an ordinance setting election for that date; action made necessary through the filing of petitions; Judge Mossholder, representing park site advocates, said state was willing to trade present college site and buildings for Balboa Park site.

October, 1926, California Garden, Vol. 18, No. 4. Park Developments in California, by John G. Morley

Cities in many sections of the United States are noted for their park systems and the wonderful development that has taken place during the past few years, notably New York, Boston, Chicago, Philadelphia and Minneapolis. These cities have spent millions to provide additional park areas and furnish funds for their development so that their citizens may have facilities for recreational enjoyment. The cities of California are now facing somewhat similar conditions. The large increase of population in the leading cities of the state creates an ever pressing need for large areas of land suitable for landscape development and recreational facilities developed to the fullest extent, and the cities of San Francisco, Los Angeles, Pasadena, Oakland, Long Beach and Santa Barbara are alive to this necessity and are providing accordingly.

On a recent visit to San Francisco inspecting the park system with Superintendent of Parks, Mr. John McLaren, it was a revelation to note the increased facilities that have been provided in recent years on newly acquired areas. These new properties are being rapidly developed, not only from a horticultural standpoint, but also in the recreational facilities afforded, such as golf links, tennis courts, baseball diamonds, roque courts, bowling greens and children's playgrounds, and a very fine swimming pool and bath house along the shore at the southwestern limits of Golden Gate Park. The city has recently acquired five hundred acres for an additional park and plans are being made for its improvement. These accomplishments have not been done without a struggle for funds to carry them through. While San Francisco has been blessed with many generous citizens who have contributed money and also special features, such as Stow Lake, Huntington Falls, the children's playground in Golden Gate Park, etc., the city itself has been as generous as possible to its park system, of which Golden Gate Park is the outstanding feature. All these developments have taken place during the past forty-five years, at which time the funds were very meager, until today San Francisco, with its increased population and far greater taxable value, provides upwards of one million dollars per annum for its park system.

Los Angeles, likewise, has been in the same financial stress for many years, owing to lack of funds for its park system. Today, however, owing to the enormous increase of population and the increased taxable value of the city, the progress of the park system under the new charter amendments will rapidly provide ample means to place the park system of the city in the forefront of park developments for which new areas are being purchased, some donated and others acquired by the district assessment plan under the Mattoon Act, passed by the last Legislature. This year the income under the new law is over one million dollars, this is in sharp contrast to the eighty thousand dollars provided twenty-one years ago.

San Diego is destined to be the third largest city in the state and is now going through the transitory period, the same as San Francisco and Los Angeles, and while funds for park purposes are very limited at the present time, we should not be discouraged. As the city increases in population, the taxable value will increase accordingly, which will provide money not only to develop Balboa Park to its fullest extent, but also the other park areas in the system throughout the city and additional areas, which from time to time will be added thereto.

Therefore, let us all take heart and preserve their integrity and guard against any further encroachments, especially upon Balboa Park, and follow the example of the people of San Francisco in their loyalty to Golden Gate Park, the gem of their city.

November 18, 1926, San Diego Union, 1:2. Naval Hospital improvements to cost \$750,000; six buildings to be erected; drafting force of Bureau of Yards and Docks preparing plans for a hospital corpsmen's school, contagious ward, officers' quarters and a ward for six officers.

November 18, 1926, San Diego Union, 4:6. Taxpayer favors gift to college.

Shall we let the State College grace out 1400-acre park, or shall we save it for future generations? According to general opinions which credit this old world with having existed anywhere from millions of years to only a meager 6,000 years, there is not the least evidence that this portion of land, for which an election is to be held, has ever been inhabited or used by anything save jackrabbits, coyotes, sage brush, greasewood and cactus --- excepting the few months during the recent war --- since the beginning of time. Shall we save it for posterity?

Up to the year 1902 there were very few, if any, improvements in any part of our park, and had it not been for the exposition spirit that got hold of San Diego, it is hard to visualize just how much improvements we would have had there today. Those of us who have lived here during that time remember the cry that was raised against having the exposition in the park. There was a fight on, many saying the buildings would destroy the "natural beauty" of the park.

Today San Diego is proud of the result of having defeated that opposition and points with pride to its results.

We have a bonded indebtedness of \$1,800,000 for park improvement and Cabrillo bridge. Many private subscriptions have helped to build up other parts of the park, and with only these partly improved sections of our 1400-acre park, it cost the taxpayers of San Diego more than \$339,000 last year.

When the little cyclone struck one corner of our park last winter, if my memory served me right, the park board asked for \$30,000 to repair the damage, and was told there were no funds.

When our beautiful Civic auditorium burned down, it was left for months, an unsightly blot, at the very entrance of our park, because the city had no funds to clear away the debris, until finally the women's clubs of this city came to the rescue.

How much would it really cost the taxpayers to improve and maintain the greater portion of the still unimproved park?

Does the newcomer inquire as to our tax rate? Is he interested in the educational facilities? We have a population of 140,000. We have our water question. Why should we burden ourselves and posterity by trying to maintain a park acreage second to any city in the United States? Why not let the state help us improve and maintain at least 125 acres of it?

Central Park, in New York City, has only 600 acres with its millions of people.

The cry is, we are going to have 1,000,000 people here sometime in the future. Granted we may, how are we going to know our park will not be crowded? There is a way by which we can get a fairly good idea. Say we have 140,000 people here now. Take one of our popular holidays --- any one where the people

are most likely to visit our park --- drive or walk through all the highways and byways of improved sections, count or estimate the number of people there, multiply by eight, and I venture to say you will still have all the quietude and seclusion you will care for.

How many know that we have 36 parks? Good business advice is, "Do not place all your eggs in one basket." This also is true if we have a mind to serve the greatest good to the greatest number.

These parks are in different parts of the city. That unsightly canyon at your back door may be only a city park.

Why not improve these parks, so that each section of our city could enjoy its own recreational center?

San Diego has much "natural beauty" surrounding it. Too much. Is it the improved parts or unimproved sections of our park that attract our tourists?

Voters, bear in mind that the part of the 1400-acre park that you are asked to let the state put a college on, and improve for us, is in the northeast section, east of the car line, between two canyons and has no improvements on it whatever except a few eucalyptus trees at the north. Ride out Park Boulevard and take a look at it, then vote to let the state improve it for you.

Mary C. Bleifuss.

November 18, 1926, San Diego Union, 4:7 Will Rogers brakeman says:

Dick Wick Hall's Gas Station, Today --- Special.

Over in San Diego, California, they are pulling an election to decide whether 122 acres of Balboa Park shall be given to the state.

Of course, we know it is a clever publicity stunt to crowd Aimee, Hall-Mills and Marie off the front page.

Everyone all over the county loves Balboa Park and knows that San Diego would never vote away this land; but you have to hand it to these people --- they know how to keep their city before the public.

Yours,

The Brakeman of Will Rogers' Train.

November 18, 1926, San Diego Union, 4:7. San Diegan says students' autos would fill park.

Editor: If there is anything I can do to keep the state college out of Balboa Park, I am going to do it. The chief holler, as near as I can dope it out, of the people who are backing this move, is that if the college is put further out, they as parents would be put to greater expense to send their children to it. As a matter of fact, only two percent of those who are graduated from high school go to the state college, which is a very small percentage, and half of them do not finish state college by any means.

Furthermore, if the college is put in the park, it will only be a short time before a great deal of space which would be given over to park purposes will be given over to parking space. A count of the automobiles outside the high school today shows that there are between 600 and 7000 cars parked there daily. Around the state college today the streets are taken up with automobiles of the students, for three or four blocks on either side of the college, with no room for anyone who has business for a short time in the college to get in a machine for a few minutes. Overrun your park with the automobiles of college students, constantly coming and going. Add to that the already large number of automobiles of San Diego citizens who use the park for traveling back and forth to business and you will soon have a park which will be unsafe for old people and

children who find their greatest pleasure in the park, or even for the spryest pedestrians. No city in the United States has sufficient park space and this city is growing to the point now where it will have to be looking around for more parks for the future. Again, I say I think it would be a crime to allow a college or any other institution to go into that park. I would take away some of those already there if I could.

S. D. Nesmith
3501 Park Boulevard.

November 18, 1926, San Diego Union, 4:8. Citizen opposes donation of site because of size.

Editor: In reference to this discussion of giving away part of our park to the state, I hope the intelligent people of this city will not allow their minds to be clouded by this widespread discussion as to the relative values of recreation or education in a park. That is not the issue.

The issue that each voter must settle within his own consciousness next Tuesday is shall I give away \$1,000,000 worth of land, that has been sacredly dedicated to park purposes and held by us in trust for future generations, who will need it much more than we do, or shall I wait and allow some generous benefactor to present the State College with all the land it needs for present and future expansion? Several such offers have been made.

The man who counts five cents fare, or the time spent in transit, or only sees college units of 125 acres in size in a community growing like this, has no vision fulfilling the requirements of the future. This city will furnish a background of 1,000,000 people before the present generation has forgotten his contest. This is an age of greater and greater units in every activity of life. When did Oxford, Harvard or Yale cease to expand? When will they ever cease to expand? Will they be limited to 125 acres and then "building another college?" I dare say, never, never. Greater and greater size is what builds for prestige and power in educational matters as well as in commerce. Greatness of size is the spirit of this age.

When we think of convenience and accessibility along, we forget the very essence of the psychology that governs and directs the judgment of all great educators, when selecting a location for an educational institution of collegiate proportions. The governing principle has always been, and should be, to select a site somewhat in retirement, where there is quietude, certain isolation, so the mind of the student can have the opportunity to more deeply concentrate on the subject matter before him, so he may be freed from the distracting influences that necessarily inhibit his concentration, and at the same time secure the distinctive factors that help to create a healthful, permanent "college atmosphere." This cannot be secured within a park or a bustling city. Proper college location requires a large area of land, more or less set off to itself, surrounded by exclusive grounds, that makes the collegian feel that they are his own, and given proper privacy by ornamentation.

Our state college, to be in general harmony with the architecture prevalent in this, our wonderful southland, and to be in harmony with our year-round balmy climate must have buildings that spread over space, rather than several stories high, like where land can't be had at any price. Our college, therefore, should have several hundred acres and should not be confined to 125 acres, one-half of which is in a canyon.

It is through size, beauty, harmony and distinctive atmosphere that any institution derives its pulling power, not whether you can get to it for five cents or seven and one-half cents. Let us, therefore, accept from a benefactor gratis much land and faithfully retain in trust the little area belonging to our future generations in the park. This is the greatest good to the greatest number.

Henry W. Hand, M. D.
2201 Logan Avenue.

November 18, 1926, San Diego Union, 8:1-2. City Attorney Higgins says \$1,000,000 tract might go later as "school acreage."

If San Diego votes to set aside a part of Balboa Park as a State College site, is there any assurance that the state will use the grounds for that purpose and would it not be possible for the state to later sell the park acres as "school lands" that are not needed?

This question was put to City Attorney Higgins yesterday. He replied that it is a grave question and one on which he would not feel inclined to give an opinion unless the matter is referred to him by the council for thorough investigation.

The ordinance does not in any way pledge the state to commence work at any time, nor to spend any sum of money in buildings. It merely sets forth that the city of San Diego shall "set aside and grant to the State of California as a site for and for the use of the State Teachers College to be used for school and educational purposes" the land in question.

In former elections where the conveyance of park lands was submitted, the ordinance simply authorized the council to make such conveyances, the terms of the deed to be fixed later. In the present case, the vote of the electors, if favorable, would "set aside and grant." It is an altogether unusual proceeding in San Diego.

Therefore, even many of those who believe the college should be placed in the park are doubtful if they will vote for it because of the wording of the ordinance. They feel that San Diego should have some concrete assurance that the state means business and will in reasonable time build and forever maintain a fine college, before \$1,000,000 worth of fine park lands are given away.

November 18, 1926, San Diego Union, 8:1-2. Minneapolis man declares city parks are a necessity.

Balboa Park should be retained intact for two reasons especially, a communication from Theodore Wirth, superintendent of parks at Minneapolis, Minnesota, informed the "Save the Park Committee" yesterday.

"Parks are acquired for the specific purpose which they continue to serve," said Wirth. "To divert them or even a part of them to other uses --- although also in the public service --- means that faith is broken with the people who furnish the parks so that they might become available for park and playground purposes.

"No definite interpretation of the meaning of the word 'park' nor any change of law nor any vote of the people can eliminate that sound objection and conclusion. Why should anyone in the future wish to donate or pay assessments on any park or playground project if they are later to be diverted to other purposes.

"If it was deemed necessary and desirable when Balboa Park was acquired years ago to provide a park for San Diego, it is certainly still more desirable and necessary to retain it as such now and for the future, as the city has grown and will continue to grow. Parks in the center of a large city have their own particular great value which can hardly be overestimated."

"Credit for the creation and development of a fine park and boulevard system in San Diego," said Wirth, "is due to three principal factors. First, to the many natural features and advantages with which the city is blessed; second, to the foresight, courage and determination of the officials who preserve and develop these advantages, and last but not least, to the progressive spirit of the people.

"Unjustified and misdirected criticism always has been and always will be one of the unpleasant sides that come in overflowing measures to all officials in public service," said Wirth. "You must not deter in the planning and execution of necessary improvements in park properties because such improvements alone will make possible the service for which they were acquired.

"Parks, playgrounds and boulevards are great factors in building an attractive and healthy city, and all observant people who give community life and welfare careful study and thought come to the right conclusion that they are an absolute necessity and not a luxury, as so many people wrongfully call them.

“Those who are intrusted with the building of a park system, commissioners and officials alike, should be able to see ahead of others what is to be, but were we to wait with the execution of very important projects until all other less informed people could view them as we do, most things would never be done. You must, therefore, act, unmindful of censure, and be content with the public’s approval once the security of Balboa Park is assured.”

November 18, 1926, San Diego Union, 8:3. Favors donation of college site.

Editor: Yes, that is just what the common and patriotic citizenry of San Diego propose doing. A few of our mossback and bluebloods of the aristocracy would leave the undeveloped portion of the park to sagebrush and jack rabbits until redeemed by a future generation, or burden the general masses now with extra and unwarranted taxation for the sweet will of our limited population of wealth and leisure. That is the real situation in a nutshell. The old dog in the manger spirit is just the reason our city is not already several times its present size.

Whenever the Spreckels people or others in the past have sought and encouraged manufacturing and jobbing interests here, the old geranium brigade have celebrated the defeat thereof. And now these monopolistic patriots would have us believe dedication of a state college site in the park would assure appropriation of the balance to hospitals, etc. Like the cuttle fish that inks the water when frightened that it may escape in the darkness, so these people would now becloud the real issue at stake.

What finer setting and greater asset could we desire or expect than a higher institution of learning in the park? Besides being economically situated for rich and poor alike, no greater and more inviting ad is available to the solicited and much desired growth of our city, as distinguished from its isolated location in the country.

Any person visiting abroad, not endowed with more money than sense, would not think of passing up old Oxford, while in England, nor the universities of Heidelberg and Leipzig, when visiting in Germany, and, likewise, the Sorbonne in Paris. In time, likewise, with our college in the park instead of the country, it will always be an asset instead of a liability.

But of vital consideration and importance should be the fact that our tax fund is now inadequate for park purposes, and with further pressing and needed improvement only through aid of the college deal can we avoid early and greatly increased city taxation.

Frederick D. Culver.

November 18, 1926, San Diego Union, 8:3. Citizen declares college plan is impracticable.

Editor: I am against the college in Balboa Park. This giving away of public lands is a common mistake that we all make in drawing conclusions based upon what we see before us. Very few of us have the vision to look 10 or 15 years in advance and accurately picture what the necessities are going to be, particularly for a city. If this reasoning is correct, let us imagine that in 15 years San Diego will be a city of 300,000 people. It is, of course, useless to say that we will need more park than we now have for such a large city. If any of it is given away or disposed of in any manner, there is not possible means of getting it back or acquiring more.

Now keep that idea well in mind, and then let us assume that in 15 years the college has a student body of 5,000. The space allocated to them in Balboa Park would be hopelessly inadequate. How could they possibly expand?

Thus, from both angles, if these premises are correct, the idea is an impossible one. A more practical and close-up picture may make a greater appeal if the people thoroughly understand that they are

called upon to give away free over \$1,000,000 worth of property and then issue bonds for another \$500,000 in order to buy a school property from the state they do not want and cannot use.

I am impressed with the idea that if these two outstanding facts are thoroughly understood that no further argument is necessary for the people of San Diego not only to decline to give any part of the park to this purpose but to forever set it down as a principle that not one inch of that park will be given to anybody for anything.

Colonel Charles M. Tobin,
U. S. A., Retired.

November 18, 1926, San Diego Union, 8:3. Edward F. Sample warns San Diego park no place for school.

Editor: Balboa Park is not the place for the future State College which San Diego hopes to have. There is hardly more room for it in the park today than in its present place. While the state, no doubt, would do something toward keeping up the grounds, it would not make the appropriations sufficient to do so in keeping with the other improvements which have already been made in our park. San Diegans many consider that San Diego as a city is of enough importance to the state that she should be considered generously by the state officials in the matter of assisting her to beautify her park through the medium of the State College, but I would remind the citizens who are urging this park site for the college that San Diego is only a small part of the state of California and all other sections have institutions, educational and otherwise, for which they would gain appropriations from the state's coffers, bringing every ounce of influence to bear for the particular project they have in mind.

I think all arguments with regard to whether the state will or will not beautify this section, that the park is no place for the college, especially as there is plenty of room in other sections of the city for ample college room, where the contingencies for many years to come may be taken care of.

Edward P. Sample.

November 19, 1926, San Diego Union, 4:1. EDITORIAL: Tuesday's Test.

Will Rogers, noted for his ability to be funny and still make sense, gave the people of San Diego a rather valuable "tip" when he spoke last winter at the American Legion Lyceum. Mr. Rogers had just been given a trip around the city by an enthusiast who was able to explain to him just how the Nolen city plan proposed to safeguard the city's typical beauties and preserve them for the future. The gum-chewing, rope-throwing philosopher was enthusiastic about the plan, in his quiet way, but when he got up on the platform and faced his San Diego audience, he told them the straight truth about the Nolen plan.

"The plan is wonderful," he said, in effect, "but it won't apply itself. You must do the work of making it stick, or it won't do you a nickel's worth of good. Everybody is "for" it now --- but you wait. Pretty soon someone will come along and propose just this little variation, or just that little exception, and then the test will come."

The Nolen plan, as everybody knows, visions Balboa Park as the unique and glorious beauty spot which entranced Mr. Nolen when he came here --- as it has pleased and astonished thousands of other visitors. It is now proposed to modify this vision by lopping off 120 or the 140 acres still susceptible of development. This is "the one little variation, the one little exception," which we are asked to consider at the election next Tuesday.

Will Rogers was right. The issue doesn't test the Nolen plan, but it does test the citizens on whom the usefulness of the plan depends.

San Diego Union, November 19, 1926. Encanto citizen opposes cession of park lands; outlying districts will be against moving college to proposed park site.

San Diegans need have no fears of losing any part of Balboa Park to State College. That message was brought to the "Save the Park" Committee yesterday by Bruce R. Stannard of Encanto, who said that Encanto would vote 10 to 1 on November 23 against moving the college into the park. All outlying districts are interested in keeping the park free for recreation, Stannard told the Committee.

"All the outlying districts should vote against moving the college into the park," Stannard said. "They are far enough away to get a general perspective and a proper appreciation of the value of the park. Citizens of these communities see the park just often enough to appreciate its value and want to continue it for its present purposes. This is one case where we can both eat the cake and have it, by developing the park as a recreational area and the college for education elsewhere."

A statement from the "Save the Park" Committee yesterday pointed out that should the voters on next Tuesday decided to give away 120 acres of park lands to the state, there is no assurance that the land would be utilized or beautified.

The statement pointed out that the state has not provided sufficient funds for the State College authorities to beautify the grounds of the present site. This condition, they said, would reasonably be expected to continue should the college be moved into the park.

In a letter to the Committee yesterday, H. G. Sloane pointed out that the citizens of San Diego would have no control whatever over the northeast corner of the park should it be given to the State College.

"According to the ruling of our supreme court," Sloane said, "the state can help itself to whatever additional land it wants, by vote of the legislature, and without consulting the will of San Diego."

"If we indicate by our vote now that 120 acres subtracted from our park is of no consequence to use, the legislature may infer that the loss of additional acreage will not be distasteful to use later."

L. J. Duhig, a recent comer to San Diego, told the Committee that "the sacrifice of a portion of the park area would be sorely regretted but could never be corrected."

"San Diego, if she only knows it, has a city park that is destined to rank high among the beauty spots of America. Why cripple its possibilities by reducing its area? It will be needed as the city grows and becomes more congested, as it is bound to do, and the citizens of tomorrow will not thank you of today if you barter their birthright for a mess of pottage."

"Your city --- our city I might almost say --- has commercial, industrial and marine resources that insure rapid and permanent growth. In addition to these, it has an almost perfect climate that has a strong appeal to visitors from states where more rigorous conditions prevail."

"If a check could be had on these visitors today, their number would, perhaps, surprise you. This class of business is bound to grow immensely and is an asset of major importance. These visitors, as well as home people, will find a strong attraction in the greater Balboa Park of the future. It does not seem possible that the progressive citizens of San Diego will take a backward step by voting away any portion of the park area."

November 19, 1926, San Diego Union. Citizen pleads retain park land.

Editor: Balboa Park is to San Diego what Golden Gate Park is to San Francisco, only more so, in view of its proximity to the city. One of its countless charms is its easy access.

It we expect to grow (and who is there that does not thoroughly believe in that thought), the park is none too large. In fact, I for one believe our generosity in the past as to hospitals, schools, and so forth, was a real mistake, made in good faith, but a mistake just the same.

To save the park for the people of San Diego rather than for colleges and hospitals and what not, is a real, honest and desirable as our hope for a greater San Diego.

Herbert A. Croghan.

November 21, 1926, San Diego Union, A-1. EDITORIAL: When in Doubt, Vote "No"

We know that San Diego needs Balboa Park --- that it could not dispense with any part of the present Balboa Park development without becoming less attractive as a city. We know, too, that the chances are that San Diego's need of broad park lawns, Balboa's beautiful buildings and groves of trees, will increase as the city grows larger. Certainly the city will never need less park development than it has now. Just as certainly, the overwhelming probability is that it will need more.

These facts and these reasonable probabilities we know. We need not guess at them. They are obvious. We know them.

We know that San Diego needs Balboa Park, and that its need for this playground on hills will certainly increase, rather than decrease.

On the other hand, we do not know that the State of California needs any part of Balboa Park area for any purpose whatsoever. Although the resolution calling Tuesday's election infers the contrary, the State of California has not in any manner, official or unofficial, "expressed a desire" for a slice of our city park. Neither the state nor the administration of the San Diego State Teachers' College has ever intimated to the people of San Diego that there was any need to apportion a part of the park for State College purposes.

As a matter of fact, when possible new sites for the college were discussed last year with members of the State Board of Control, one board member expressly asserted that the State would not even consider accepting a site about which any municipal controversy might center.

In the face of these facts, we are asked to deed to the State of California 120 acres of the 140 acres which still remain undeveloped and capable of development in Balboa Park. We are asked to destroy the margin of the park's possible future growth --- to limit the park area for all time to its present size.

We know that San Diego needs this park --- that the greater San Diego will need a greater Balboa Park.

We do not know that the State needs this park. The chances are that, in view of legal considerations, the State wouldn't accept a slice of the park if we decided to give it. The whole matter of the State's possible need of the park site; its probable use of it; possible conflicts of municipal and state authority therein --- indeed, the very fitness of this park tract for college purposes --- all this is controversial matter deeply shrouded in doubt.

Shall we be guided by our knowledge or by our guesswork, when we go to the polls next Tuesday? That reduced to its lowest terms, is the question which the park-site proposal presents.

We credit sponsors of the park site with all sincerity, but we insist that they have utterly failed to prove their case. They have failed even to show that the State wants the park site --- let alone that it requires it. Their argument is eloquent, but doubtful.

As long as doubt exists, given your Balboa Park the benefit of it. Vote "No."

November 21, 1926, San Diego Union, 4:1. Letter from George W. Marston.

Declaring there is urged need for a public recreation center in the park on the site which it is proposed to give to the State College, George W. Marston, member of the Park Board, has written to **The Union** opposing the plan to grant his land to the state. Mr. Marston many years ago, at his own expense,

brought John Nolen, noted city planner, to San Diego and engaged him to lay out a plan for the development of Balboa Park. He also had a landscape architect draw plans for the beautification of the present State College grounds. In addition to being a leader in the development of Balboa Park, Mr. Marston is also a trustee of Pomona College, which, with an enrollment of 750 students, has just increased its site to 400 acres, with a view to future development. His letter is as follows:

In the course of twenty five years I have seen the west half of Balboa Park transformed from a wild condition to its present high state of cultivation and beauty. This great change has been wrought for the most part in only fifteen years.

If a city of 50,000 population could raise the funds to develop a full half of Balboa Park, is it unreasonable to expect that a city of 150,000 can in the next five years work a similar transformation on the east side? It will really require less than half as much money for the remaining half because much foundation work has already been done in the way of engineering, road construction, water mains and planting.

Just as the stage when the city is approaching the time when it can afford to complete the whole park it is proposed to give away to the state one of its choicest areas. Over a year ago the Park Board engaged John Nolen to lay out a design for its treatment. Mr. Nolen's plan is already in the hands of the commissioners and can be seen at their office by any persons interested. It is not a landscape treatment; it is designed as a recreational field and includes baseball grounds, hand ball and tennis courts, places and facilities for all kinds of sports and games. One of its features is a great swimming pool, a free bathing and swimming place for all children of the city. There are also picnic grounds, children's garden and parade center.

San Diego is one of the most deficient in the country in respect to its provision for public playgrounds. Progressive cities have recognized that playgrounds make for the physical and moral welfare of children and youth. Such a playground as might be built on this ground would be of inestimable value to the thousands of homes in the north and east park district. The state can acquire another site for the college as good or better than this one, but if this land is surrendered I question whether the city could ever get anything to compare with what it now owns. Why should we needlessly sacrifice this opportunity for having a great free, beautiful playground for the children of our city? There is serious need for it even now. Golden Hill playground is limited to a small area between canyons; the high school is asking for more ground for athletics and everywhere there is complaint of too little space. Why give away the one ample and suitable field that the city has received from the farseeing and wise men who set it aside for such purposes nearly sixty years ago?

There is comparatively little level land in Balboa Park and most of it is already occupied by exposition buildings, schools, hospitals, street car tracks, etc., or is under landscape cultivation, particularly on the west side. There are perhaps 150 acres of fairly level land left that can be used for building or for recreation purposes. One half of this, or more, is in the tract wanted by the advocates of the college in the park. It is, in fact, the only piece of land left in the park that is suitable for a great recreation field such as the city needs. I am unequivocally opposed to alienating this land for any other use, however good such use may be in itself. The northeast corner of the park was dedicated by the people of the city and the state legislature for its exclusive public use as a park and place for recreation. This proposed grant of 122 acres for the state college is a serious attack on the integrity of the park.

November 21, 1926, San Diego Union. Kate O. Sessions' plan to save Balboa Park; tells of fight to beauty land.

Interesting facts concerning the development of Balboa Park are given by Miss Kate O. Sessions, San Diego pioneer and leader in horticultural circles, in the course of a letter outlining her reasons for opposing the plan to put State College in Balboa Park.

"The first planting done in Balboa Park was by a group of women who spent about \$500 in planting trees along the west side of the park from Date to Laurel Streets," writes Miss Sessions. "The Ladies Annex of the Chamber of Commerce was the official title of the association.

“The next planting, I did in the northwest 10 acres of the park as rental for the land while occupying it with my nursery for 12 years.

“About 1899, Mrs. Mary B. Coulston came to San Diego from New York City. She was an experienced writer, having been connected with the best horticultural journal of the United States, maintained by Professor Charles S. Sargent of Harvard. For one year, she wrote articles for our local newspapers explaining the use of parks, their values and assets for city, and these letters were a real education and incentive to our citizens. Then followed in 1910, the intelligent development of the park under the able landscape architect Samuel Parsons, New York City’s general park superintendent. We all know how generous Miss Ellen Scripps has been to our park, and these few facts prove women’s initiative in the development of the park.

“If every voter Tuesday will protect the best interests of the park and also the best interests of the college, the vote “no” will give success.

“The best interests of the college demand other locations than the park. The argument that the real estate interests are purely selfish for one of the six offered sites, and that the street car owners will make more money, are very foolish reasons and not to be considered, for street car companies make lowest rates for students.

“But why not anticipate that in a few years our grandchildren will be flying to this college from all over these inland southern counties and an airport field will be needed like the level acres of Linda Vista! Dr. Hardy says that one half of the students now attend by their own autos.

“The future growth of our city should be the foremost thought in planning for the college, as well as the park or parks. In my lifetime I have seen Golden Gate Park in San Francisco grow out of waste sand dunes and windswept shores. I have seen our state university moved from the very center of the Oakland village to the hayfields and barren and rocky hills of Berkeley, with two small buildings, and have seen it grow to its present capacity and fine development. Certainly our college and our park have the opportunity and conditions to develop faster in the next 25 years than Golden Gate Park and our University of California in the past 40 years.

“How grateful we should be to E. W. Morse for his fine vision when he was the first person to suggest to the city fathers of San Diego, there at Old Town, that these 1400 acres should be preserved for park areas for the possible great future of San Diego. And also to A. E. Horton who saved and planted that bit of his 160-acre purchase, in front of the first hotel, the Horton House, now the U. S. Grant Hotel.

“Every loyal San Diego voter should vote ‘No’ Tuesday.”

November 21, 1916, San Diego Union, 4:7. George W. Wood requests slice of Balboa Park for auto yard.

Since it was suggested that what is left of Balboa Park be given free of charge to the State College, the “rush is on” and parts of the park are being sought for various purposes.

Not long ago a real estate man wanted to buy a couple of hundred acres, later a hospital association wanted a site for a hospital, and now comes George W. Wood, who wants to lease part of the big park for an auto parking place.

The idea seems to prevail that San Diego no longer needs its park and that “first come, first served.” Wood’s application to the Council, filed yesterday, follows:

Gentlemen:

In connection with the establishment of the State College in Balboa Park, which proposition is to be voted upon next Tuesday, I beg to state:

That in case such vote is carried and the college is to be located in the park, I hereby make application to your honorable body for 10 acres of park space adjacent to said college grounds for the purpose of establishing there an automobile parking space.

I would like a long-term lease and will build and maintain a thoroughly first-class auto park, and will, of course, expect to pay a reasonable rent as provided by your honorable body for said space.

George W. Wood.

November 21, 1926, San Diego Union. Henry Burr, Realtor, says chop size of park and delight city's competition.

Editor: The question as to whether San Diego gives away part of her park is fully included in the question whether it shall take a backward step at this, the most promising period of its progression, for, as such as the sun shines above, to do so would be a backward step and one that will be far-reaching in its effect. It is not a mere passing affair, but one that determines whether the voters of this city will be so far unmindful of its present prosperity as to put a permanent flaw in the priceless jewel that adorns the brightest star in the municipal firmament.

The very size of Balboa Park is one of San Diego's greatest assets. Any city can have a beautiful park, but what other city has a 1400-acre park in its center, where a million people could surround and enjoy it? This park, on account of its size, is known of and talked of throughout the nation, wherever people travel, wherever people are thinking of or are looking for the best place to live. It is known by the boosters of Florida, is recognized as a trump card by all the progressive cities of southern California and looked upon with envious eyes by them all.

While San Diego is a young giant with head up and pressing forward, it must not be forgotten there are other young giants also in the race who would be glad to see it break and stumble. Don't you forget there are. If it were put to the voters of Santa Monica, of Long Beach, of Pasadena, or Miami and Palm Beach, if you please, whether San Diego should cut down the side of the park, don't you know it would be unanimously in the affirmative, and that because it would diminish the greatest drawing card San Diego has today? Are you, Mr. Voter, going to stand flatfooted for the city that is your home, or are you going to do what its rivals want you to do? That is the question.

For if such a thing is done, the action will be hailed with joy, not only by rival cities of California, but will be received exultantly on the plains of Texas, along the bayous of the Gulf of Mexico and across the Everglades to the roaring east coast of Florida.

The citizens of this community may spend \$50,000 to make known the advantages of their beloved city, but it will take hundreds of thousands to overcome the handicap if the park is divided.

I hear you say it will save our taxes to give away part of the park. While I do not concede it, I think the answer complete that to cut down the park is to nick the present or subsequent value of every piece of property in the city.

The writer has carried a real estate broker's license in California and Illinois for the last five years and has studied the city from both sides of the fence, and as to what its assets really are, and, while it has many, the greatest of these is the big Balboa Park. This is the one outstanding capital feature that you can absolutely prove to the prospective resident no other southern California city has. Other cities can vie and contend with you as to climate, as to sea coast, as to location, and the countless other things, as to desirability; but when it comes to the size and grandeur of the big Balboa Park their mouths are closed.

Are you, Mr. Voter, going to turn your back on your own fair city's greatest asset, and let them, your rivals, open theirs? Are you willing to put this weapon in the hands of rival cities? I don't believe you will.

During off and on residence in the city for many years, I have met a great number of visitors and invariably the first thing in the city they want to see is the big Balboa Park. You have all had the same experience, but if you cut down this park, it will be heralded far and wide; it will be learned in the east, talked of in trains, exploited by rival cities, and in many ways will be brought to the mind of the newcomer to the Golden State, that San Diego with all its beauty and its comeliness, has misstepped and dimmed her crowning virtue.

San Diego is the white spot on the commercial map of the United States today. It is well in the lead, and as it comes down to the home stretch far ahead of her rivals, at this critical period in the race, is it possible that her own citizens will do anything that will, in any way, diminish her chance for the coveted first place? Only by the counting of the ballots can the writer be so convinced.

Henry Burr
2927 Fourth Street

November 21, 1926, San Diego Union. See also letters by John P. Mills, president John P. Mills Organization, Inc. and Judge C. H. Andrews urging vote against college in park.

November 21, 1926, San Diego Union, 4:6. Letter from Ed L. Head showing how San Francisco profits with famous gardens through barring area to school.

(Edited)

Editor: Having been born in California and having lived here more than 60 years, I have seen the wonderful growth of our state along educational and other lines.

I remember the time when the University of California was located at Berkeley. There was a strong agitation to have it located in San Francisco, where the center of population was, so that it would be convenient to the pupils who would attend it. After a full investigation by the director of regents of the university, it was decided that it was best not locate it in the city, but to chose a site away from the noises and contacts of a big city.

So the university was located over in the foothills of Berkeley, six miles from Oakland. Time has shown that the judgment was correct.

At the time that Senator Leland Stanford was formulating a plant for the erection of the great Leland Stanford, Jr. University, I heard him say that all colleges should be located away from the thickly-settled areas of the cities. He purchased 7,500 acres of land in San Mateo County, 30 miles from San Francisco, and today one of the most beautiful colleges in the world occupies that site.

I have had a somewhat similar experience as to the location of schools in public parks. In 1898, I was a member of the Board of Education of San Francisco. We had the Polytechnic High School located downtown in the business district. The grounds and buildings became too small for the increased attendance so the Board was compelled to seek another location for it. Golden Gate Park was in about the same degree of cultivation as Balboa Park is today, about one-half of it was in use. Our Board thought that if we could obtain 40 acres of the park, it would be an ideal location and we could get the ground free on which to build a new high school.

A meeting was arranged with the Park Board, of which W. W. Stow, chief counsel of Southern Pacific, was president. Adolph B. Spreckels, brother of the late John D. Spreckels, and William Metson, prominent attorney, were other members. I told the Park Board what the School Board wanted and Stow, speaking for the Park Board, said Golden Gate Park had been set aside as a heritage for the citizens of San

Diego of today and tomorrow, and, because of this, the Park Board would not grant one foot of the ground for non-park purposes. He said that while the city was then unable to improve all the park, the day would come when all the land would be needed and used by people. Recognizing the validity of Stow's argument, the School Board purchased a site outside the park.

This summer I drove through Golden Gate Park and saw thousands of boys and girls and men and women enjoying the beauties of an improved and an intact park and I thought how mistaken the School Board had been in wanting to take the land away for a school.

Now, voters of San Diego, let us not tray and take away any of the land or our beautiful Balboa Park. It was dedicated as a park for the benefit of people today and tomorrow. Let us keep that trust sacred and, in years to come, you will be proud of having stopped those who would take our heritage from us.

The State College should be located away from the bustle and noise of the San Diego that is to be. We must look forward to a city of 500,000 residents who will need every acre of ground in Balboa Park for their recreation and pleasure.

The State of California has not asked us for a site in Balboa Park and we have no assurance that, even if we given them the site, the college will be built on it. State institutions are not built at once, but by units based on the appropriations they receive every two years from the Legislature. It would be years before your State College would be completed.

I was a legislator from this county from 1920 to 1921 and I know how appropriations are made. I have seen other gifts of land to the state which never improved despite agreements to do so.

If you believe in a greater San Diego, protect your beautiful Balboa Park by voting "No" Tuesday.

Ed L. Head
4233 University Avenue.

November 21, 1926, San Diego Union. Letter from Leland Stanford urging San Diegans to beautify Balboa Park with a college in it.

Editor: Until now I've avoided speaking on the issue involving the State College and Balboa Park. I've tried to extract the truth from the bits of colorful propaganda that at times have been used to disgrace both sides of the controversy. It is only a matter of months since I would my way through one of the great universities of this state, so, perhaps, I have the student's viewpoint. Furthermore, except for my college days, I have lived the last 20 years of my life in San Diego. My home and school training have instilled in me a great love for his part and for the greatness that is to come. Here is my view of the present situation,

To me the greatest reason for placing the college in Balboa Park is the utter weakness of the arguments printed and shouted against it. I thought for a time that the slogan "Save the Park" certainly must have been behind it more than that stupid emotional appeal that led ancient mobs in frenzied madness to abandon reason, to poison a Socrates, to crucify a Christ, and to burn at the stake a Giordano Bruno. Today I doubt it. The thing that turns me in favor of placing the college in the park is the plain lack of common sense for which I listened in vain in the arguments of those who opposed it. There is too much emotion and sob stuff --- to few ideas.

Save the park? Well, who says destroy it? The plan that I have heard is this: Keep the park, develop it, beautify it, make it into a great garden spot not confined to a few Saturday afternoon paper-scattering picnickers; but put great buildings in it where the books and songs and paintings of the masters may be made available seven mornings, afternoons and evenings a week to the hordes of San Diego citizens who appreciate such things. Around these buildings, place lawns, flowers, trees. Make it a park, not a loitering ground. Make it a seven-days-a-week park. Don't confine its usefulness to Saturday and Sunday, make it work 365 days a year for youth and for ambitious manhood and womanhood. That is what I have

heard about the college in the park. It steals the thunder of the propaganda tosser. It says keep the park. Yes! But keep it seven days a week for usefulness, for beauty, for instruction.

I'm a bit familiar with three universities, Stanford, the University of Illinois and the University of California. Take the first mentioned, for example. Stanford University campus is the "park" of Palo Alto, and not only of Palo Alto, but of the heavily congested peninsula, for 30 miles in either direction. There picnickers come, there beauty seekers come, there great athletes and their worshippers come (recreation, if you please), there mighty intellects come. Some one says: Here is the wonderful chapel with its many hundreds of thousands in mosaics and murals; here is the room where William Herbert Carruth wrote and lived his poems; here is the auditorium where David Starr Jordan helped to mold the lives of two generations of Stanford students. Forget the students who have gone there! The Stanford campus has been the inspiration of uncounted thousands who have found it at once a park, a playground, a panorama --- a modern pantheon of culture and things worth while. The same could be true of a college in our park. Save the park? Of course, save it. But don't enslave it with mere chains or auto campers, bridle paths and concrete driveways. Have these, but make them the band of a ring with a diamond setting.

Opponents of this view have attempted to point out the future. They are poor seers. They shout: "San Diego will grow!" But where will it grow. Anyone knows that San Diego will never houses many more people within five miles of Balboa Park than it does today. Our city will grow in Pacific Beach, La Jolla, the Linda Vista mesa and Torrey Pines. We shall grow toward Lemon Grove and Grossmont --- toward Imperial Beach and Chula Vista. And will mothers seek their children on such long journeys to reach the park? And just to play for a couple of hours? Julius Caesar was the first great park builder that the world has known. That genius who overcame the Nervii, saw that the nerves of his own city-burdened people of Rome would have to be quieted and calmed. He did it. With one park? Of course not. With 20. They were all over the city. In places where boys and girls and tired businessmen and women could congregate within a few minutes, take a breath of fresh air and a glimpse of nature, and be again at their tasks. Why don't some of our energetic "park savers" see into the future as sensible persons must --- see that we must have a number of parks --- and themselves donate some of the land for additional park grounds in outlying districts where they honestly will be needed in another 20 or 10 years. Well, the answer to that point should be investigated. In the presence of their future, others would be glad to do it.

Does the same logic apply to a college site? No, because non one expects to have a score of colleges and universities scattered around the town. It follows then, that the one we do have should be in a central location, such as Balboa Park.

First, for the great night school and extension division classes the college must be convenient. If it serves the people it cannot be in the outskirts. The city will grow, but the park will always be centrally located.

Personally, I worked my way through seven years of college and I know what it means to have a job. It makes the difference between going to college and having to drop out. An outlying college increases distances between classroom and job and denies education to many who really are the ones who deserve it. Balboa Park eliminates that fault.

College work demands close touch with public records, with public libraries, with public men. At a conservative estimate, it would take \$?,000,000 more to equip a college on the outer edges of the city than to equip it in the present park, where so much already has been collected for study, and where there is such easy access to the very best that the whole city affords.

It's the old conclusion: Put the college in the park because it is better for the park. Park the college in the park.

Leland G. Stanford.

November 22, 1926, San Diego Union. Lincoln Rogers, architect, says State might fail to build on site.

Editor: We are on the even of an election and yet thousands of San Diegans have been misled into the belief that the State of California has asked us officially or unofficially for a large grant of land in Balboa park upon which the State desires to establish a college.

The State of California has made no such request of San Diegans for acreage for a college site in Balboa Park.

The above being true, when the election is over and the ballots are counted, we shall wake up on Wednesday morning and simply ascertain one of two things, whether we have deeded 125 acres of Balboa Park away or have decided to keep it. The election will decide that, in fact, and nothing more. Imagine our chagrin should we find the State in possession of our gift and have it later decided to establish the college on some other site more suitable to the future growth of the city and college.

The city is now pressing hard onto 200,000 population. What paradoxical situation has been brought about by less than three percent of this number in engineering an election, the result of which will merely give away 125 acres of Balboa Park or keep it?

Don't vote to give away park land merely with the hope that the State will build the college there for that may never happen and you would be in a similar situation to the man who locked the stable door after the horse was stolen.

The people who ask the great mass of common people to give away their recreation ground say you don't need this great breathing space as all you have to do is to get into your automobiles and go into the back country, the mountains or the seashore for your recreation. What about the 50 to 60 percent of the common people that do not have automobiles? Let the people who are urging you to vote to give the park away accuse the wealthy, who are well-supplied with automobiles and can motor anywhere, of sinister motives in fighting to retain the park when their act will assure the common people, for all time, an adequate recreation center. The shoe seems to be on the wrong foot.

Fellow citizens, heed the warning that comes to us so fresh from Los Angeles. A citizens' committee there, composed of D. F. Gairy, Lucius K. Chase and Shannon Crandell, has just finished a comprehensive survey of the park facilities for recreation and play. This report shows that due to the recent rapid growth, "the city is not now up to normal in park facilities and that there should be at least twice as much park acreage devoted to public recreation and play." The report shows that "immediately more land must be set aside for parks, playgrounds and recreation in order to promote the health and well being of the people."

Balboa Park was established and dedicated to the people as a park by its far-seeing founders. When, as a new and separate project, we hold the power to select an appropriate and adequate college site, let us not think of ourselves and our generation, but let us try to be as far-seeing and wise in the performance of that duty as were the founders of Balboa Park.

Lincoln Rogers
A. I. A., architect.

November 22, 1926, San Diego Union. Donation will bar tract's use until another election; lack of room for expansion seen as "strangulation" for college on proposed location; "Save the Park" Committee declares no assurance of beautification of grounds.

Should State College be placed in Balboa Park, when it reaches the limit of development of 125 acres, it then would be physically unable to expand, since the rest of the park is devoted to other purposes or is unsuitable for college buildings. This was pointed out yesterday in a statement from the "Save the Park" Committee.

“If a site other than the park is selected,” the Committee said, “the selection will be made with a view to future expansion. A college must be placed where it can grow, it cannot move around with the same ease that a small grocery or a householder can. To put the college in the park would strangle its growth.

“The modern practice of colleges is to go for their sites to outlying districts. A college in a congested district has many disadvantages. It must contend against noise, congested traffic, business encroachments, attractions which make studying difficult, lack of space for car parking, and many other handicaps.

“Students, graduates and educators agree that one of the most important benefits of a college education is the college spirit and campus life which the student absorbs under proper conditions. In order to foster this spirit, colleges are moving away from central locations.

“As a college moves, the dormitories, the boarding houses, the restaurants and the industries in which students engage to enable them to work their way through college follow the college.

“In conclusion:

“If the state refuses to accept the site, it cannot be used for any further park purposes without another vote of the people throughout the state.

“The slowness with which the state has developed the present college site gives little hope that in the new site it would provide the beautiful buildings and grounds the proponents of the ordinance claim.

“The park would be a ‘central location’ only for those students whose homes are near the park. For students living in other sections of the city, it would be inconvenient and costly.

“As the city expands, the park site will become increasingly inconvenient to all but those living near it.

“It is wrong to vote away for the benefit of a few students or of a small number of property owners or businessmen a place of ground which should be used for the benefit of all the people of San Diego.”

The Committee said that what the proponents of the college in the park are asking the voters to do Tuesday is to give away \$1,255,000 for which no one has asked, the people will later be asked to vote bonds to the sum of about \$500,000 to purchase the present site. This, it was shown, will be reflected in higher taxes, which can be avoided by having the college placed on some free site which will cost the taxpayers nothing.

November 23, 1926, San Diego Union, 8:3. Clara L. Pfister, pioneer property holder, opposed to college site in park.

Editor: In reference to the present controversy on giving away a portion of Balboa Park to the State of California for college purposes, permit me to state a few facts about this section of the city. For 39 years my family has owned property four blocks north of Balboa Park. We wish to go on record as being most emphatically opposed to voting any more of the park away for any purpose whatsoever.

Along about 1898, when a normal school was scheduled for southern California, several sessions of the state legislature worked hard for an appropriation. A real estate company donated 16 acres of ground and the foundation of their college. The late Judge Guy, a member of the legislature, who was successful in getting a bill passed for \$35,000 for the central section and \$15,000 for maintenance for one year, delivered the dedication address and told of the difficulty he had in getting that much. The wings and other buildings were added later.

This section suffered severely from collapse of boom, business depression and water shortage, particularly the latter. After the city purchased the old dilapidated Cuyamaca Company and replaced the stove pipe and wooden sieve mains with cast iron one, this section began to build up rapidly.

Hospitals are unfortunately a necessity, but I don't think a park is the proper place for them. The people are beginning to realize the mistake they made voting away the cream of the park. I was opposed to the Roosevelt School because it is surrounded by canyons and the children from the north will have to go through them. The proposed site in Balboa Park is mostly canyon or surrounded by canyons. If the State College is inadequate, there is plenty of room on the south side of the school to erect two buildings as large as the present one and still have plenty of room without touching the large campus in the rear. It is a beautiful location, four nice wide streets and car lines pass the building. Why not stay there and accept one of the six sites for future use?

The State is exceedingly economical when it comes to appropriating money for southern California.

The people who want high class lectures and musicals can bet them by joining some of the various clubs. There are plenty of amusement resorts that pay heavy taxes to carry on their business and [there is] no necessity for any more idle auditoriums and stadiums. Better rent these and make the interest on the bonds. Neither the College nor the State have requested park land, so why all this agitation and wasting of taxpayers' money? Tourists come here to escape the cold and severe climate, not to see skyscrapers and educational institutions. They have plenty of them.

A well kept geranium hedge, in its proper place, is all right and excites admiration and wonder to tourists coming from a land of snow and ice to sunshine and flowers. People that are in a rush to have the northeast corner of the park improved, let them adopt the Nolen plan and get up a drive for funds as we old timers and so-called "mossbacks" did in 1911. The nursery is full of trees. We do not own any land in either of the six proposed sites. Pacific Beach has always been a college town, and there is plenty of available land there that would make an idea site. We don't belong to factions of any sort and have not seen any of the slush fund that has been written about. We believe in letting the park grow with the town and indorse the Nolen plan of leaving it as natural as possible. If we have the area of London, we may get the population and need every inch of our park.

Balboa Park is the city's chief asset, and is the people's playground, and we wish to see it kept for park purposes only and have amusements for all classes of people. Dispose of all the public playgrounds on city blocks and use funds therefrom to establish one large municipal playground in the park for the children.

This will benefit children from all sections of the city and help reduce the expense of taxpayers; maintaining so many small parks.

Clara L. Pfister.

November 12, 1926, San Diego Union, 8:4-5. Mrs. A. O. Younkin, San Diego pioneer woman, pleads with voters to save Balboa Park.

Editor: I am writing this letter in the hope that some of the new citizens who favor giving away part of Balboa Park for a college site may understand, perhaps, the vigorous opposition which we older citizens have given to their project. I am 91 years old, with not many more years to give to my city, but I am hoping that when I pass on, the park for which I have worked and which I love will not have been encroached upon any further.

For 30 years I have worked for Balboa Park, through the Chamber of Commerce and, in later years, with the Floral Association. In rain and shine I have attended the various activities which have been given in the park for the enjoyment of the public.

Take away this park and you take away from us that which helps to make the road smoother, the dreams brighter, the memories sweeter. The little neighborhood parks, that some of the college site backers

mention so glibly, cannot take the place of the big park. They are merely breathing spots in the midst of the hurry of business.

To many of us the recreations and amusements furnished by a kindly city are all the amusement we get, because it is given to use without cost, and many old people could have no amusement at all if it had to be paid for because they could not afford it. Take away our chance for this recreation and you condemn us to lead colorless, uninteresting lives in our closing years.

Thirty years ago I was one of the loyal women of San Diego who planted trees at Sixth and Laurel Streets, a spot which the people of San Diego today find so beautiful and to which they point so proudly. We did not in those days believe in sitting back and criticizing our park board for its shortcomings. We got out and helped our park board. I was one of the members of the Ladies' Auxiliary, with Mrs. Gilman P. Smith and Miss Francis Bagby, a cousin of Miss Ellen Scripps, and Miss Kate Sessions. The spot where we planted the trees was opposite the old Sefton home. Mrs. Sefton did not like to look at the bare grounds of Balboa Park on the western side.

Instead, however, of trying to give her part away to some other community or faction or governmental body, she cooperated with her city to help make that which she wished beautiful to be beautiful. She sent her son, Joseph Sefton, to help us plant the trees. The spirit of helpfulness might well be shown by those citizens who now object to the bare acres of the northeaster section of Balboa Park.

Leave us old people our park. Let us have the happiness of knowing as our feet walk slower and slower, that the work of establishing a beautiful part for posterity is not to step where it was started, but that the newer generation will take up and continue the work until the entire park is a thing of beauty.

Mrs. A. O. Younkin

November 23, 1926, San Diego Union, 8:2. Park furnishes place for rest.

Who needs and uses the park most? Is it not those who do not have automobiles or opportunity for out-of-doors? Those who live in flats, apartments and tenements, without yards or gardens? The tourists who are searching for the beauty spots of the city? The children who lack opportunity to otherwise enjoy nature's playground of trees and flowers? Those who need a quiet hour of retreat from the noise and stress of city life? Seventy percent of sickness in the city originates from tired and jagged-out nerves, whereby the body becomes unable to resist germs or to throw off poison.

Is it not cheaper for a city to prevent rather than to minister to sickness? Should not a city furnish all opportunity possible for all sections to have relief from the great nervous strain and physical breakdown which comes from crowded city life?

The people who cannot afford automobiles or travel or membership in golf clubs have little opportunity for change of environment, except through the parks. The wealthy class do not make such use of parks because they have private gardens and walks and their own country homes. Those of the wealthy class who strive for more parks do so, not for themselves, but to give such advantages to all the people and to make the city attractive. Let us not be deceived by those who only call names without making logical arguments. They attempt to appeal to prejudice and passion only when they talk of "plutocrats" and "geranium growers." They endeavor, thereby, to mislead the people to act against their own interests.

Wherever you go, the first thing you hear said about San Diego is: "You certainly have the finest park system in the country." Would you now give away that fine park which extends in all directions sufficiently to accommodate the entire city with its future growth?

Any other place where a State College may be placed will increase property values and add to the assessed valuation of the city, thereby decreasing your taxes. That advantage would be entirely lost by giving away the park site. Place the State College in any of these other sites offered, but keep the park for the use of all of the people.

C. Crease.

November 23, 1926, San Diego Union,. Reader advises hit park site proposal hard.

Editor: Portland, Oregon laid out a solid tier of plaza blocks through the heart of the west side from north to south and later cut it in two by selling eight or ten blocks. And today it would take many millions to correct the evident blunder. It will, therefore, never be done.

A million population in San Diego in 1940 with no more than 1400 acres of park is equivalent to a 280-acre park. The child is now living who will see 2,000,000 here, even though it will take 100 years, and a population of 2,000,000 with no more than a 1400-acre park is equivalent to a 140-acre park with our present population. If the people want to confess publicly and widely to the world that they do not think San Diego is ever to be much of a city, then they are "hanging up the fiddle and the bow"; and that all their future plans are alike to be narrow and ill-considered, let them begin giving their park away. It is unthinkable that the people of San Diego are to suffer the inauguration of such a narrow and city-destroying policy. But there is danger that this futile attempt may not be sufficiently rebuked. My advice to San Diego is to turn over with the same determination of Lincoln when he once witnessed the sale of a slave from the auction block, resolved, now that he had the opportunity, to hit this attempt, to "hit it hard," as the great emancipator said. Don't be satisfied by merely defeating the attempt. Fire a shot of civic pride that, too, "will be heard around the world." It will be the best advertising San Diego will get in the next 10 years. The leading papers of all America are going to give the results of tomorrow's decision. If it be a weak vote, it will be "shame for the indolent set," if a landslide, a mass vote, if you please, those same papers will say to their readers: "The industrious, intelligent, forward-looking, forward-driving citizens of San Diego are resolved on a great city, and it invites you to become one of its citizens. It is resolved to give its children and yours something besides bonded indebtedness." It's to be a city of schools and churches, libraries, beautiful homes and parks for yourselves and children."

"In every place where humans toil, in every dream and plan, the laughter of the children shapes the destiny of man."

Fifty years ago the writer was in Los Angeles. It had a population, as I recall, of between 7,000 and 8,000. How is it today? Marvelous! And I have heard startling experiences of other men in other cities. The dream is yours, and to be realized right here in this beautiful city by the sea in one of the finest climates on one of the finest harbors, in a land of rich soil, boundless resources and charming scenery.

Now, whose counsel are you to follow at the polls, that of the well-meaning but callow youth, who looks at his feet instead of at the stars, as he will do later, or that of men and women of mature years, wide experience, travel and observation, who, along with the President of the National Scientific Association of Horticulturists, say, "Always keep your park inviolable?" Let your vote carry the glad tidings to the hundred and thousands of strangers who have visited your city in the past, one of whose cherished remembrances if of Balboa Park, who having seen it once, will see it ever. Don't plain them by marring a cherished memory by showing yourselves a bunch of stay-at-homes, when your glorious name is at stake to the end of the earth. Get out, and get the other fellow out! Don't be content with just signing a remonstrance. It is your duty as a good citizen to register to vote a hearty, lasting world-telling disapproval. A great American general, a man of spotless character, once said: "Duty is the sublimest word in the English language." If you don't vote hard, the world will think you are a sordid lot of dollar-chasers, who missed a glorious opportunity to get your city talked about all over the world. . . . Vote to tell the world it needn't be afraid to come to San Diego; that here heart is a big as her park, and that all good people will find a cordial welcome in both.

W. J. Peddicord.

November 23, 1926, San Diego Union, 8:1. Last call made upon San Diego to protect park; only 139 acres of land left for improvement, Committee says.

Climaxing its campaign to "Save Balboa Park," the "Save the Park" Committee issued a statement last night to the effect that assurances had been received from many quarters that the proposal to put State College in Balboa Park would be defeated today by a landslide vote.

A last-minute appeal was made by the Committee to all persons interested in saving the park against further encroachments, to vote, in order to indicate by an almost unanimous refusal by the people to give away parts of the park, that no such attempt would be successful.

With reference to the assertion that the location of State College in the park would serve to beautify it and to make education easily accessible to young people, the Committee pointed out the following factors:

"For more than two decades efforts have been made to get the state to beautify State College. To date these have been unsuccessful, and, in places, the State College grounds are as barren as at the beginning.

"Instead of beautifying Balboa Park, the college would bring hundreds of automobiles into a congested area, which would make for increased traffic accidents. Between January 1 and November 1 this year 36 people were killed and 886 injured in San Diego, it is reported. These deaths and injuries would not be diminished by increased hazards in the center of the city.

"Many people think that large areas of flat land in Balboa Park still are available for improvement, but this is erroneous, one member pointed out. The populated district of the city serves approximately 28,000 acres, he said. Park land, exclusive of canyon (this item includes the small outlying parks) covers 2,000 acres, and, in all this, land available for recreation totals only 130 acres.

"Why give away irrevocably our one undeveloped piece of land already valued at \$1,225,000, which John Nolen has planned as a recreation center, the Committee asked. The Park Commission and all right-thinking people realize its necessity for the safety, health and well-grounded development of our children.

"Many local civic organizations have been reported to the Committee as opposed to the State College going into the park. Joseph P. O'Toole, president of the Golden Hill Taxpayers' Association, brought to the Committee's attention last night the fact that the body went on record two months ago as unanimously opposed to the college in the park."

The point of view of John Nolen, famous city planner of Cambridge, Massachusetts, was brought out again yesterday when a statement from him made in San Diego several months ago was read.

(The Nolen statement can be found in **The San Diego Union**, February 6, 1926.)

The San Diego Women's Civic Center added support to the opposition of the college in the park with the following resolution:

"Whereas the recent unprecedented growth of San Diego is assurance that a college of university scope will be required within a few years to meet the demand of this part of the state, and

"Whereas the available space in Balboa Park would limit a growth of such an educational situation and would deprive the city of much-needed park area, therefore be it

"Resolved by the executive board of the San Diego Women's Civic Center in regular meeting assented that this Board opposes the section of the park for the site of the proposed State Teachers' College."

From an economic point of view, the Committee urged upon voters to consider the unnecessary waste of land and money which would be involved should the college be allowed to move into the park. Several other sites are available, it was pointed out, any one of which is offered (no cost to the taxpayers), and each would provide more land than ever would be available in Balboa Park.

Opposed to this, it was stated that should the college be allowed to move into the park, it will take forever land now worth \$1,225,000, rob the city of its last available recreation site, and place a continuing mortgage on each citizen in the form of increased taxation to purchase the present college site.

The best interests of both education and recreation will be gained if the college is developed elsewhere than in Balboa Park, and the Committee urges all voters to vote to keep the park intact for posterity.

November 23, 1926. Election to give away 125 acres of Balboa Park for site of State College

Yes	6,562	City Clerk's Tabulation	Yes	6,562
No	15,640		No	15,628

November 24, 1926, San Diego Union, 1:1. Park land donation beaten; citizens overwhelm proposal; people register disapproval of measure by 2 to 1; 17 precincts for plan; set new counting record.

November 24, 1926, San Diego Union, 1:4. Annual union Thanksgiving Service, sponsored by San Diego Ministerial Association, will be held at Organ Pavilion Thursday morning, beginning at 10:30 o'clock.

November 25, 1926, San Diego Union, 1:6-7, 3:5-6. Mayor announces plan to establish memorial for John D. Spreckels; chimes for California Tower in Balboa Park suggested; estimated cost is from \$30,000 to \$50,000.

November 25, 1926, San Diego Union, 4:1. EDITORIAL: Now Keep the Park

The overwhelming victory of save-the-park sentiment in last Tuesday's election makes Balboa Park fairly sure from invasion. The people of the city can be fairly sure that from now on the efforts to use park lands for other institutions and interests will fail. A hurtful precedent of the past has been destroyed, and a better precedent established. However, the people can also be sure that there will be future attempts to appropriate park property; and although it has been demonstrated that a strong sentiment can be aroused to oppose any scheme of the kind, the park would be safer if some organized and permanent safeguard were in existence to protect it.

The park board may, of course, be counted upon to resist any attempts of the kind that has just failed, but the park board is not equipped to carry on a protective campaign. It should be able to call upon some citizens' protective organization, ready at any time to take up the work of arousing this save-the-park sentiment whenever it becomes necessary to muster a vote at the polls.

The development of our park, like the orderly development of the city under the Nolen plan, demands an increasing vigilance against the schemes of exploiters and the campaign of busy bodies with pet hobbies. Balboa Park is for the people. The Nolen plan is for the people. Neither will have its full value, or anything like its full value, if it is plastered up with exceptions made to suit individuals or single-track minorities.

Much good might be done by a permanent park protective association, and our successful Save Your Park Committee might well be the nucleus of such an organization.

November 25, 1926, San Diego Union, 15:1. Advisory board will consider college sites.

November 26, 1926, San Diego Union, 5:3. Three thousand San Diegans give thanks in union service; churches join in Balboa Park meeting; Reverend Atkinson delivers sermon.

November 27, 1926, San Diego Union, 11:1-2. City-County building architectural contest considered.

November 29, 1926, San Diego Union, 11:4-5. Colorful pageant in Balboa Park shows march of Congregational churches to "Plymouth of Pacific" yesterday afternoon at Organ Pavilion on 40th anniversary of the founding of the First Congregational Church of San Diego.

November 30, 1926, San Diego Union, 1:5. City Council indorses plan to honor John D. Spreckels.

November 30, 1926, San Diego Union, 1:1-6. People to vote on site of new combined city-county building.

November 30, 1926, San Diego Union, 1:7. College board offered new 125-acre site in the northeast corner of Talmadge Park.

November 30, 1926, San Diego Union, 9:1. City will place tablet honoring Balboa Park founders; solons eulogize trustees who set aside land; archives show that Board authorized establishment of reserve in 1868.

November 30, 1926, San Diego Union, 1:5, December 4, 1926, 12:1-2 and December 9, 1926, 16:8. Plan to honor John D. Spreckels with chimes in California Tower.

December, 1926, California Garden, Vol. 18, No. 6, p. 9. San Diego Parks, by John G. Morley.

The controversy in regard to the placing of the State College in Balboa Park has at last been settled by the decisive result of the election held on November 23rd, by a majority of two and one-half to one against further encroachments. The people of the city are to be congratulated for their loyalty, which we hope has settled forever the existing area of Balboa Park.

The topography of Balboa Park with its diversity of elevation and contour lends itself to many types of improvement on the hills, in the canyons and on the mesas, with a wide divergence in the character of the planting and recreational facilities. The former exposition grounds, containing the California and Fine Arts buildings now devoted to a Scientific Library and Archaeological Museum; the Natural History Museum, containing many of the finest collections on the Pacific Coast; the Botanical Building and Conservatory, with their large and varied collection of exotic plants; the Bridges Art Gallery, where many rare paintings and works of art are on exhibition, and the extensive Zoological Gardens, containing the largest and best collection of animals, birds and reptiles in the West, are several of the main features provided for the enjoyment of our citizens.

Progress in the continued development of Balboa Park as well as the other parks of the city as funds are available is the constant aim of the Board of Park Commissioners. About eighteen months ago, the Board engaged the services of Mr. John Nolen to make a new plan of Balboa Park on a comprehensive scale, not only in the landscape treatment, but also in the laying out of extensive recreational fields to provide baseball diamonds, tennis courts, bowling greens, roque courts, large swimming pool, children's playground and picnic grounds, and a large and modern municipal clubhouse building equipped with the best of indoor recreational facilities, with a large auditorium where interesting programs may be given for the enjoyment of our citizens. There will be a series of bridle paths for those who enjoy horseback riding; the golf links, and other features that will tend to make Balboa Park a wonderful place for out-of-door enjoyment in the early part of 1927.

December 1, 1926, San Diego Union, 8:5. Celebration of the 150th birthday anniversary of the nation officially ended today with a deficit of more than \$5,200,000 for the Sesqui-Centennial Exposition; Exposition opened May 31; it covered 1,000 acres; cost the city of Philadelphia \$17,000,000, exclusive of \$3,000,000 subscribed by business concerns and individuals; during the six months of the fair approximately 4,800,000 paid admissions were taken in at the gate, less than one-third as many as Exposition officials had expected.

December 4, 1926, San Diego Union, 12:1-2 and December 9, 1926, 16:8. Citizens' Committee approves chimes for Spreckels' memorial; fund of \$50,000 will be necessary; to be installed in California Tower; P. E. Darnall, treasurer of Memorial Committee.

December 5, 1926, San Diego Union, Classified, 1:1. San Diego Zoo gets three new polar bears.

December 5, 1926, San Diego Union, 4:1-4. Lincoln Rogers' drawings of \$65,000 banking house to be erected at 5th and University in Hillcrest; will be a replica of Security Commercial & Savings Bank building at 5th and E Streets.

December 6, 1926, San Diego Union, 9:5-6. San Diego Boy Scouts to hold largest Court of Honor in Council history at Indian Village Friday night.

December 9, 1916, San Diego Union, 16:3. Big evergreen tree in Balboa Park at 6th and Laurel Streets will serve the City of San Diego as the "tree of light" this year.

December 12, 1926, San Diego Union, Development, 14:3-5. Recent offer of Roy C. Lichty, business manager of Talmadge Park, to donate 120 acres for a state college attracts interest to northeastern part of city.

December 13, 1926, San Diego Union, 1:8, 3:5-6. Nolen plan to develop Balboa Park complete; City Board will study map today; project calls for beautification of every foot of area; network of roads and recreation grounds.

Members of the San Diego park commission will be called together at 3 o'clock this afternoon in the board rooms at Balboa Park to see the special Balboa Park plan worked out by City Planner John Nolen. The study, which has just been received here from the planner's office in Cambridge, Mass., is an elaborate and exhaustive plan for the best possible development of every foot of the park, and is the result of many months of study, both locally by engineers who have prepared the topographical and existing conditions maps, and in Boston, where the ultimate development has been worked out.

The study contemplates the development of Balboa Park as a whole, working the proposed projects in such a way as to take advantage of what has already been done and at the same time to make the whole plan _____ and unified. All of the various purposes of park development have been taken into consideration; recreation for both children and adults; roadways, both for utility and to make the most of Balboa Park's rare scenic opportunities; bridle paths, picnic grounds, lawns, and the planting of the whole area, so as to make the most of the beauty and the diversity of the plant and tree life in this region.

Of special interest is the plan for the development of that level field which was proposed as a possible site for a new state college campus, the only remaining available place of level ground in the park. On it Nolen has located a series of volley ball courts, tennis courts, basketball courts, roque courts, a bowling green, a swimming pool, a wading pool in the center of a special play area for children, a football field surrounded by a quarter-mile track, two large baseball grounds, and two practice diamonds, so arranged that four games can be played simultaneously. One of the baseball fields is located in the center of a large oval parade ground, which is encircled by a roadway for the use of automobiles. A picnic ground is located in another part of the area, and at the edge of the park, along Upas Street, is an area set aside for the parking of automobiles. A series of lawns and garden plantings is designed to make this section one of the prettiest and most attractive recreation areas in the country.

In working out what he conceives to be the ultimate destiny of Balboa Park, Nolen has made very effort to obviate what he has considered the main drawbacks. Untraversed by through highways, the park has served to divide the city into several sections, which could be reached only by going around the park. In connection with his studies of the whole of San Diego in the development of his city plan, he has laid out a series of highways that would best serve the kinds of traffic called upon to traverse the park in any direction, as well as roadways serving to make the park areas accessible to the people the whole park is intended to serve.

Pershing Drive, a highway already used to capacity, is doubled in width in the proposed plan. With a center parking, the drive would become two parallel one-way roads serving the same area and purposes it now serves, but with a much greater capacity. The much needed and equally demanded truck highway would be provided up the bottom of Switzer Canyon, from Twenty-second Street on the south to Florida Street on the north. This road would not interfere with any of the other thoroughfares in the park or with any of the proposed developments of any of the park areas.

Another important road is located in Dehesa Canyon to the west of the present Twelfth Street pavement that parallels the street car tracks. The Dehesa Canyon road would run from the southwest corner of the park up toward the north, and then swing east between the present Pepper Grove area and the Girl Scout Camp, across Twelfth Street a short distance, above the Naval Hospital grounds, and then over a bridge across Switzer Canyon to join with Pershing Drive. This road would thus, in connection with Laurel Street, provide a way across the park from east to west, where the park is at present impassable.

Two roads, one of which is already partly in existence, are designated as North Boundary and South Boundary roads, and they run east and west along the north and south boundaries respectively of the area set aside for the zoo. The South Boundary road would branch off from Cabrillo Canyon road following the contours upward toward the east, just north of the California Building, the Fine Arts Buildings and other Exposition structures, crossing the Calle Cristobal and Twelfth Street just north of the Yorick Theater and

continuing on across Switzer Canyon and the truck thoroughfare to a knoll designated as "Desert Hill," and then north to a connection with the roads laid out in the recreation area and about the parade ground. This would give another cross-park artery.

The North Boundary road, part of which is already in existence, would run from Cabrillo Canyon road eastward to the Calle Cristobal just at the north edge of the zoo and near the Painted Desert. Other roads, chiefly for scenic purposes and for intercommunication within the park, will connect the new Dehesa Canyon road with the large level area variously known as Inspiration Point and the old marine camp, another starting from an existing road just about at the 11th green of the golf course and running in a northerly and easterly direction up to Pershing Drive, with a branch connecting with the recreation area, and another running eastward through the Thirtieth Street canyon.

When he was here some months ago, Nolen suggested that the Thirtieth Street canyon should be acquired and added to the park as it is a logical part of the park area, is capable of excellent park treatment in connection with the general plan, and is of little value for other than park purposes. The proposed roadway would run along the bottom of the canyon.

The studies prepared by Nolen include three main maps, one a general plan, one a planting plan, and the third a topographical map showing the engineering problems with which the planner is confronted in the employment of land areas, the building and locating of roads, and the planting. The general study and the particular studies are made by Nolen entirely separate from his general city plan, and are the result of a separate agreement between him and the park commission, the chamber of commerce, and certain public-spirited citizens who are footing the bill jointly. It is developed in much greater detail than the general plan made in connection with the city plan but it includes the city plan featured demanded for the handling and proper routing of traffic to and through the park and other features which make the park an integral part of the city development.

The planting study is a result of long investigation of soil and water conditions, and contemplates the development of the park as a horticultural beauty spot and as a veritable botanical museum of the wild shrubs, flowers and grasses indigenous to this region. Many of these plants grow well with very little water, and are suited to the beautification of canyons and areas which will be left as nearly as possible in their native state. There will, of course, be some beautifully developed lawn and garden areas, such as have already made the developed portions of the park famous all over the world for their grace and beauty.

It is expected that the park commission will get its first view of the plan this afternoon, and will have an opportunity to study its many features at its leisure. The plans submitted are only preliminary studies, and will be subject to the modifications which the commissioners feel that special conditions should dictate. Its main features, however, are expected to be permanent and subject to incorporation in the final plan. The project outlined in the maps and charts prepared by Noel is, of course, too expensive to be realized all at once. It is to be used when complete as a guide for the development of park areas as the money for development becomes available, the judgment of the park commissioners determining which of the various developments shall be undertaken and in what order they shall be completed.

December 14, 1926, San Diego Union, 10:1-6. Commission approves Balboa Park plans; development will be completed as funds are provided for work.

John Nolen's special plan for the complete development of Balboa Park has been accepted by the board of park commissioners "in principle," as the diplomats say. After an extended study of the plan yesterday afternoon and a conference with Hale J. Walker, who is an associate of Mr. Nolen, and who brought the plan to San Diego from Cambridge, Mass., the board outlined several changes that are desired before the plan is accepted as final, and gave its approval to the general outline of the plan and the several projects it entails.

Mr. Walker, who will return to Cambridge tonight, will take a report of the board's requested changes, together with his own ideas of the conditions the changes are designed to correct. He was also requested to make rough estimates of the cost of the various projects included in the whole plan so that the

commissioners can work out a development schedule which will enable the board to proceed to put the plan into execution as the funds become available for the work.

"I am confident after a study of this plan, and considering our experience in past work in Balboa Park, that the rest of this development will be about as expensive and twice as easy as what we have already accomplished," declared Commissioner George W. Marston yesterday afternoon. "I remember when we were starting to develop the west side of the park and were forced to do a lot of blasting to make the hardpan plantable. Friends used to tell men that we were wasting our money and that the park would never amount of anything if we had to blast to plant. But we learned a lot in that work, and the rest of the development will be cheaper and easier."

"Most of the people will never realize," said Superintendent Morley, "what a big part black powder played in the making of Balboa Park."

Emphasis was placed by the commissioners on the fact that the east borders of the park will be developed into lawns and park plantings like those on the west side, so that there will be broad stretches of tree-shaded grass where people may meet and rest and take little children for informal recreation. Knolls and jutting points commanding particularly lovely views of park areas, the city and the bay, will be developed as little observation points with benches and vine-covered pergolas, and there will be many attractive foot paths connecting these vantage points and other spots of interest, while the whole park will be covered with a network of bridle paths for those whose delight is horseback riding.

The main projects naturally came in for the first consideration by the commissioners, and the arteries and park roads, especially their connections with the city streets, seemed to be the most important in many respects. One change suggested was that Pershing Drive, which the plan contemplates making a double road divided by a parked area, should swerve over toward the east as it emerges from the south side of the park, connecting with Twenty-second Street, allowing the proposed truck highway up Switzer Canyon to enter the park at the present Pershing Drive entrance and so avoid a grade crossing with Pershing Drive, as shown by the preliminary study.

The proposed change would be an improvement in other ways, and would give opportunity for a planting and parkway treatment of the space between the two thoroughfare entrances that would make an attractive southern gateway to the park. The doubling of the width of Pershing Drive would, according to the plan, have the up or north bound road and the down or south bound road on separate grades, and each would be 26 feet in width, which is four feet more than the present pavement width on Pershing Drive. The separate grade treatment would be easier and more attractive than simply doubling the present width of the drive on the same grade.

Commissioner E. N. Jones expressed the belief that the proposed south boundary road, that will mark the south boundary of the zoological gardens and will provide an east-west park highway, will be one of the most important projects, if not the most important that the plan contemplates. This road is shown on the accompanying view of the plan as a winding line just above the lower portion of the pointer stick and crossing the stick at about its middle. It will be a pretty, winding, tree-shaded roadway that will be more of a park drive than a thoroughfare, really the first true park drive. One of the changes for which the completed plan will provide is the continuation of the road which now starts in the bottom of Cabrillo Canyon up the west slope of the ravine to a junction with Nutmeg Street at Sixth Street.

The truck driveway, it was agreed, will be an important improvement, but one of the least difficult, as it will follow the canyon from the south end of the park practically all the way to the north end. The problem in connection with that road, said the superintendent, will be to control the rain waters from the north and east part of the city, all of which pour down Switzer Canyon. Uncontrolled, the water would wreck any roadway in the canyon in a very short time.

A part of the plan calling for a roadway along the north edge of the park along Upas Street, which is admittedly an important link in the park communication system, will have to be postponed for some time, the commissioners said, because of the prohibitive cost of a Upas Street bridge. Instead, a contour road will be

included in the plan to join the Twelfth Street thoroughfare with the truck road and the other roads with which it connects, the new road to be approximately east of the north end of the zoo.

The general problem of automobile parking came in for plenty of discussion, and it was suggested that the area used either as the camp ground or parade ground by the marines during the Exposition would make an excellent parking place. Another place suggested was the area across the street to the east from the old civic auditorium. Such a place as this, and others located in similar convenient places, could be given a special treatment, suggested Mr. Walker, who pointed out the advantages of separating the automobile parking spaces wherever possible from the plazas or highways by means of hedges, planted areas and trees, so as to avoid the large, flat and decidedly undecorative bare areas. These would be hidden from the casual view and would not be a part of the general pleasing vista.

A request for permission to erect a large flag pole in the park to commemorate the 150th anniversary of the adoption of the flag precipitated discussion as to the best place to locate such a pole.

Walker recommended that if the pole is simple and inexpensive it should be located at the center of some large open space, such as a parade ground. If it is to have a large bronze or stone base, it might be located near some of the architectural developments in the park and be in keeping with them. Two poles in the Plaza de Balboa, the eastern end of the Prado, were suggested as being a suitable and decorative place. A further study will be made before a decision is reached.

Attention was called to the fact that the park board will seek to develop the area north and west of the high school as an athletic practice field. This area is now known to high school students as the "rock pile" and is used for some physical education classes.

Development of the park projects can be carried on in several ways, said the commissioners, who are anxious to know about what the various projects will cost so that they may plan a program in accord with available funds. Walker called their attention to the fact that the truck road and the Pershing Drive projects should be paid for by the city at large, not the park, as both are a part of the general city plan, and as such will not be a logical charge against limited park funds.

CAPTION BENEATH MAP: The preliminary plan for the complete development of Balboa Park, as drawn up by John Nolen, author of San Diego's city plan, is shown here. The map is in several colors, which distinguish between existing conditions and the plans proposed. Persons familiar with the park, however, will recognize the present roadways and will be able to pick out the through roads which are to be added. The heaviness of the Pershing Drive location indicates how it would be widened. Hale J. Walker, Mr. Nolen's associate, who brought the plans out here, is shown pointing to the area which was sought as a possible college site. Due to the large size of the map and its necessary reduction here, only the roadways outlining the proposed development of the area can be seen.

December 18, 1926, San Diego Union, 17:5 and December 19, 1926, 15:1-3. Girls Club to sing carols at Balboa Park Sunday afternoon.

1927

Summary of Events in 1927

(Note: Dates of events are approximate only.)

Fire Chief Algren Wants Fire Alarm Station in Park (January 13, 1927)
San Joaquin & Kern County Buildings Set Aside for Music Center (January 16, 1927)
Application for a Riding School in Park Stables (January 20, 1927)
Merry-Whirl to be placed in Pepper Grove (January 20, 1927)
Truck Road in Powder House Canyon (February 8, 1927)
Widening of Pershing Drive (February 8, 1927)
Floods (February 16, 1927)
Zoo's Objection to Road as Recommended in Nolen Plan (February 25, 1927)
Entrance to Zoo Opened at Research Center (March 27, 1927)
Amendment Giving Certain Lands in Park to Zoo and
Providing for a Percentage of Property Tax Assessment
Approved (April 5, 1927)
Drive to Save Indian Village (April 17, 1927)
Spring Rose and Flower Show in Indian Arts Building (April 24, 1927)
Better Homes Exposition (May 8, 1927)
80-ft. Flagpole Erected at Marston Point (May 10, 1927)
Zoo Raises Admissions (May 22, 1927)
Argentine Ants (June 7, 1927)
Civic Orchestra Concerts (July 4, 1927)
Move to Establish Bridle Paths (July 24, 1927)
Proposal for New Switzer Dam (July 28, 1927)
Plans for Lakes in Park (August 16, 1927)
Swimming Pool Dedicated at Indian Village (August 21, 1927)
11th Cavalry in Park (September 9, 1927)
Fall Flower Show (September 11, 1927)
County Fair (September 13, 1927)
Dispute Between O'Rourke Institute and Zoological Society
Over Ownership of Nevada Building (October 11, 1927)
Natural History Museum Requests City Funding (October 13, 1927)
European Squirrels Introduced to Park (October 30, 1927)
Voters Reject Widening of 6th Street and Pershing Drive
and Construction of Golf Courses (November 22, 1927)
New Ford Car on Display in American Legion Building (December 1, 1927)
Julius Wangenheim Gives Sun Dial to Park (December 11, 1927)
Silvergate Players Use New Mexico Building (December 18, 1927)
Nativity Tableaux (December 25, 1927)
Proposal to Broadcast Organ Recitals (December 28, 1927)

January 1, 1927, San Diego Union, 7:7. San Diego's Zoo provides natural habitat for birds and beasts of many climes.

Located in the center of Balboa park, San Diego boasts of a Zoological garden in fact as well as name. It is unique among the zoological gardens of the world in that its many varied exhibits are not crowded into gruffy animal houses but are outdoors, living in almost natural conditions, each den or cage arranged to give the nearest possible reproduction of the native habitat of the occupant, the whole arranged in a garden setting that is incomparable.

Due to the mildness of the San Diego climate and its equability, the various animals located in the San Diego zoo live in health and comfort, and the exhibits range from arctic polar bears to the exotic and unusual birds and beasts of the tropics and of far away Australia. The polar bears do not suffer from the heat. The tropical exhibits are not stiffened with the cold. The rare little Koala bears from Australia live in comfort here, subsisting on their native eucalyptus, which grows luxuriously.

The zoo grounds extend over 150 acres, giving ample room for deer paddocks and buffalo range. More than 1500 specimens occupy the dens, pens, pools, paddocks and cages, and many of them are so prolific that their numbers are increasing steadily, the zoo trading off the younger generation for rare specimens on which other zoos have a monopoly. During the past year 40 deer and antelope yards have been built, and more than 800 trees have been planted in the development of the garden feature of the zoo. Four miles of road were built within the zoo enclosure, and 31 finch cages of concrete and rat proof wire were constructed. The deer pastures are without question the finest in the world. Nothing in the United States even compares with them.

The most important addition during the past year has been the erection of an animal hospital and research laboratory, which will be in use in another month, giving the zoo national and probably international significance. It is one of the most important additions since the zoo was founded, and as the completion of a four-year development program brings the zoo investment up to a third of a million dollars.

The zoo is unique in more ways than one. In addition to being the only real outdoor zoo with a 12-month garden setting for the pens and cages, the collection includes several animals not found in captivity anywhere else in the world. The most notable of these is the elephant seal or the sea elephant. These animals are extinct save for a colony on Guadalupe island, 150 miles off the coast of Lower California, which has been made a sanctuary by the Mexican government for the protection of the long-nosed monsters that have escaped slaughter. Originally there were plenty of the sea elephants in the Pacific, but they were slaughtered for the oil in their blubber, and only a few are left. The zoo secured permission from the Mexican government to capture a pair, and an expedition of naval reservists made a cruise to Guadalupe to capture the specimens now on exhibition here.

In the world's highest flying cage are many rare tropical birds, waders and flyers, living in quarters large enough to enable them to get real exercise and to enjoy an environment very much like their native habitat.

Every year sees an increase in the number of interesting and rare exhibits. There are already eight varieties of deer. The ugly wart hog was added last year. New varieties of monkeys have been brought here, and the reptile house has some fine specimens of serpents from all over the world. Another expedition to Australia is planned for the coming year and more rare exhibits will be added.

San Diego people are not only proud of their zoo, but they are interested in it as well. More than 275,000 visitors passed through the turnstiles the year just past. The children, who are naturally especially fond of the animals, form the bulk of the crowds, but parents never seem averse to accompanying their youngsters to the zoo. Several of the animals, notably the camels and the elephants, have been gifts to the children of San Diego, who regard them as their special property.

No San Diegan thinks of the San Diego Zoological gardens without thinking of the president of the Zoological society, Dr. Harry Wegeforth, whose enthusiasm and interest in all animals, generosity and unremitting labor have built the institution.

January 1, 1925, San Diego Union, 7:8-3. Fine Arts Gallery fills popular need.

January 1, 1927, San Diego Union, 7:5-6. Natural History Museum tries to cover southwest United States.

January 1, 1927, San Diego Union, Recreation, 2:2-6. Balboa Park affords splendid setting for cultural activities of city, by Gertrude Gilbert.

For many years music has taken the lead in the cultural life of San Diego, and the many successful organizations of the city which has fostered the musical activities have been the life and strength of its successful musical development.

This last year has been a momentous one in the cultural progress of San Diego, for the completion and opening last February of the Fine Arts Gallery in Balboa Park, the gift of Mr. and Mrs. A. S. Bridges to the city, has given a tremendous impetus to the interest and enthusiasm of the public for pictorial and sculptural art, and has brought a long step nearer to reality the dream of many of our citizens that a unique and permanent center may be developed in the park which shall represent all the arts, and shall give San Diego a distinguished position among the cities of the country.

The Fine Arts Society, of which W. S. Dorland is president, has already a valuable collection of pictures, tapestries, sculpture and other objects of art.

The untiring energy and enthusiasm of the director, Reginald Poland, has in these 10 months created an active organization which is carrying on an extensive work at the gallery, with constantly changing exhibitions of classical, modern and contemporary art, daily lectures on various art subjects, and a weekly education program especially arranged for the children of the county schools.

The Fine Arts Gallery with its interesting exhibitions, the San Diego Museum with valuable archaeological collections and reference libraries, the Natural History Museum with an instructive display of bird and animal life from all over the world, the Floral Association with its lectures and studies of California flora, the organ recitals at the Spreckels outdoor organ, are already established in the park and form a group of cultural and educational activities which are of inestimable value to the city and give promise of a unique development.

The story of San Diego's musical progress during the last year is told in the activities of these organizations and individuals whose artistic and successful achievements have been responsible for the high standard of its musical development.

Musical development through cooperation has been the spirit which has characterized the policy of San Diego musicians and organizations, and it is this spirit which has made success possible.

The San Diego Oratorio Society, Mrs. William Hobart, president, is one of the youngest of San Diego's music family, but in the three years of its existence has proved itself one of the most valuable additions to the musical life of the city. Under the direction of Nino Marcelli, the society has presented three oratorios each year, which have been artistic and inspiring performances, reflecting the greatest credit upon the director and officers of the society, who have been able to attain such unusual results in so short a time.

The San Diego Philharmonic Orchestral Society has brought the Los Angeles Philharmonic to San Diego in its annual series of six concerts and the interest in these concerts increases year by year. With A. D. LaMotte as president and many prominent men and musicians of the city on the board of directors, a strong organization has been developed for the management of this society, and the Women's Auxiliary, under the leadership of Mrs. John Vance Cheney, has been a great stimulus to the public interest.

(The article goes on to describe the musical activities of the Amphion Club, the San Diego Musical Teachers' Association, the Musicians' Guild, the Cadman Club, the Morning Choral Society, the Rike Chanters, the San Diego High School Orchestra, the San Diego Opera Society and the San Diego Mastersingers.)

A Christmas pageant which has been given every Christmas night for the last 10 years at the Organ Pavilion, was presented again this year, as usual under the auspices of the Fine Arts Society, which sponsors the tableaux and the staging, and the Amphion Club, which is responsible for the music.

These tableaux of the Nativity, with accompanying carols and program of Christmas music, are witnessed each year by a silent and reverent crowd, which fills the space before the organ to capacity, has become one of the artistic events of San Diego's civic life. This Community Christmas Festival, inaugurated

the first year of the Panama California Exposition in 1915, staged by a committee including Mrs. Fred M. Gazley, chairman, Mrs. C. Fred Henking and Miss Gertrude Gilbert, representing the Fine Arts Society and the Amphion Club. It is an interesting fact that not once in three years has inclement weather interfered with this presentation, the climate of San Diego, the beautiful setting in Balboa Park and the great outdoor organ providing ideal conditions for this community celebration of Christmas.

For 10 years Dr. H. J. Stewart has given daily concerts at the great Spreckels organ in Balboa Park, which have attracted thousands of our citizens and visitors to the city and has proved one of San Diego's greatest musical assets. To be able to sit out-of-doors in December or January sunshine, listening in comfort to an organ recital, while other parts of the world are wrapped in a mantle of winter snow, is an attractive experience which is taken advantage of daily by an appreciative public.

One cannot review the events of the past year without expressing sincere regret for the death of John D. Spreckels, who contributed so greatly to the musical life of San Diego, when he presented to the city in 1915 the wonderful outdoor organ which has given pleasure to so many thousands of citizens and visitors through these daily concerts by Dr. Stewart and the many interesting and important events which have been held there.

January 1, 1927, San Diego Union, Building, 2:5-6. Balboa Park exceptional in topography and flora.

January 1, 1927, San Diego Union, 11:1. Beauties of Balboa Park attract thousands of visitors to San Diego.

January 2, 1927, San Diego Union, Society-Club, 11:1-2. Natural History Museum outlines busy program.

January 7, 1927, San Diego Union, 7:1. Planning Commission to choose tideland site for Civic Center.

January 7, 1927, San Diego Union, 7:1. Fire Chief Algren asked City Council to request Park Commission to set aside small piece of ground in Balboa Park for a fire station yesterday; station will house central apparatus of alarm system for all parts of San Diego.

January 13, 1927, Minutes of the Board of Park Commissioners.

Present: Commissioners Johnson (president), Marston and Jones.

Mr. Louis Algren, Chief of the San Diego Fire Department, appeared before the meeting relative to locating a Central Alarm Station in Balboa Park.

Resolution No. 10274 of the Common Council, requesting the Board of Park Commissioners to set aside a suitable site for such a station was presented at the meeting.

At the request of Mr. Algren, the secretary read a recommendation contained in the Report of the National Board of Underwriters that a central Fire Alarm Station be located in Balboa Park.

Mr. Morley, superintendent of parks, stated that Mr. Algren and he had looked over three sites: one near Pershing Drive and Upas Street; one near Vermont and Upas Streets; and one south of Upas Street, between Park Boulevard and Indiana Streets.

Upon motion of Commissioner Marston, duly seconded, the matter was laid on the table until next meeting in order to give the commissioners a chance to look over the ground.

In the matter of a table commemorating the act of the trustees of San Diego in dedicating Balboa Park, suggested inscriptions were offered by the commissioners. The matter was carried over to another meeting.

The secretary presented a check for \$150, being a donation towards the two additional Roque Courts. The secretary was instructed to hold the check for further consideration of the subject.

The secretary having reported that Mr. Stewart had not signed the lease for rental of the stables, he was instructed to request Mr. Stewart to be present at the next meeting of the Board.

Mr. Morley, superintendent of parks, submitted an estimate of the cost of a road from the former Marine Camp to and in Dehesa Canyon to Cabrillo Canyon, as follows: 18 ft. road, \$1,746; 20 ft. road, \$1,910. Action on the estimate was carried over to the next meeting.

Communication from Mr. A. H. Knoll, cornetist, relative to giving a concert at the Spreckels Organ was referred to Dr. Stewart.

January 16, 1927, San Diego Union, Classified, 3:1-5. Report of Zoo officials shows progress in 1926; many plans outlined for 1927.

Accomplishments of the Zoological society during 1926 and the plans for 1927 were related by Dr. Harry Wegeforth in his annual address as president of the society last Monday. At this meeting the present officers of the society, headed by Dr. Wegeforth, were unanimously re-elected.

A. T. Mercier is now vice president, D. R. Wray secretary and Rank Spalding treasurer. Gordon Gray is the fifth director.

Following are Dr. Wegeforth's report and the report of the curator of reptiles:

"Of the contemplated improvements and additions mentioned in my last report, we have been able to complete or nearly complete them all. The first of the year found us hard at work upon the second unit of our deer paddocks. These were ready for occupancy late in the summer. By careful expenditure we were able to build four fine enclosures, containing craglike shelters for sheep and goats, animals famous for their climbing propensities. We have added to our possessions in this line a trio of Rocky Mountain sheep, the gift of the Canadian parks, and a pair of Barbary sheep. These may frequently be seen standing high on the ledges and shelves of their artificial homes.

"The new paddocks have afforded room for many of the rarer and for that reason more interesting varieties of the antlered family. These include the Indian Muntjac, Barasingha deer, Axis, Hog and European red deer, as well as numerous increases in the varieties of Fallow and American deer that are already in the garden.

"I think it is not untimely to acknowledge at this time the gift of a large new elk paddock made by the Elks' club. We have been anxious to put these animals in a larger enclosure in order that with freer range we could safely enlarge our herd. A membership drive as put on by the officers of B. P. O. E. Lodge No. 168, which resulted in a generous fund being raised, ample for its purpose.

"Several miles of new roads and trails have been added, costing over \$8,000 in all. The washouts suffered in April cost us another \$2,000 in repairing the already existing roads, which we greatly widened and improved at the same time.

"The heating plant which we promised for the reptile house was completed and has been in constant operation since December 1.

"The research building is nearing completion and will be ready for occupancy early in February. Complete equipment has been ordered and will be installed at once. It is a building we have every right to be proud of and is a handsome addition to the park as well as to the zoo. Situated just back of the California Building, in the main part of the park, it is easily accessible to all.

"The two buses, money for which was donated early in the year, began operation in the middle of June. These proved even more successful than we had anticipated, both in the pleasure and comfort given to

our visitors, and from a financial standpoint as well. The net earnings from these two buses had been designated by their donor for the building of additional bird cages.

“Now under construction, just back of the monkey enclosures, is a substantial and attractive bird cage group. In this will be housed all the many varieties of small birds which are now crowded together in the horse-show group. This will greatly facilitate breeding and enable us to enlarge our bird groups at little or no expense.

“Under general supervision of Mr. Morley, part superintendent, about 5,000 trees have been planted during the year. The hillsides in the vicinity of the lion and tiger grottoes have been cleared and planted to trees and shrubbery. The planting of the deer mesa has been planned not only for the beauty of the grounds and the comfort of the animals, but in such a manner, that in a sort while the walks and roads will be shaded at all times of the day.

“Several interesting and valuable exhibits, in addition to those already mentioned, have been added this year. Probably the most noteworthy would be considered the trio of warthogs, an Indian elephants, a pair of young yak and out much advertised elephant seal.

“In November, J. W. Coffroth was the donor of \$9,000 (?) to be used for the purchase of the bark “Star of India.” This will soon be brought down from San Francisco and stationed on the bay front, where it will be converted into a maritime museum as unique as it will be interesting. Further plans in regard to this will be announced when they are sufficiently matured to be accurate.”

“The second expedition to Australia, although the sailing was unavoidably delayed until after January, rightfully belong to the last year, the collection of animals and plans for the trip having all been consummated during the year just closing. Three hundred and seventy-eight animals, birds and reptiles make up the shipment which left San Pedro January 3 under the direction of Robert Bean, superintendent of the garden. Aided greatly by the experience already gained on the first trip by Mr. Faulconer, every provision for the crating, feeding, provision and comfort of the animals in transit each way has been made. We have every right to feel confident that this expedition will prove even more successful than the first.

“During the last year our program has necessarily been one of forced and intensive expansion. Starting with little more than the wonderful natural conditions our seal for the cause and the loyal support and interest of our friends, we have succeeded in building a zoo which ranks among the first five in the United States in size and interest. To expand as rapidly as we have, has of necessity forced us to sacrifice some things we would have liked to do, to advance the greater good of the whole.

“Now we feel that the time has come when the exhibit of animals justified a slowing up in that line. We do not meant by that statement that new exhibits will not be added; our desire for hippopotami and giraffe and other longed for things, is only held in abeyance. We feel, however, that more urgent than any of these things is the need for improving some of the now existing conditions. Therefore you will see that in the announcement of next year’s plans the nature of our projects is somewhat different than heretofore.

“Provision has been made in our budge for the repainting as well as further strengthening and beautifying the large Scripps flying cage. All of the ponds and dams are to be cemented, equipped with subterranean drainage and generally improved this year. Money has been set aside for these purposes. We are also planning the construction of small cages and dens for the coyote, coon and other species of animal now improperly housed with the primate group. These will be constructed along the lanes leading to the deer mesa, adding interest and variety to that walk.

“The enlargement of the ice plant enabling us to handle our own fish and meat looms as an immediate necessity. Repairs to many of the now existing cages and grottoes must be provided in the near future.

“The planting this year includes the completion of the work long under way of beautifying the grounds in front of the main entrance.

“One of the most interesting of our plans perfected during the last year, operation of which will begin at once, is the educational work in connection with the city schools. This consists of regular class and lecture work, as well as project work, under the direct supervision and with full cooperation of the nature study and visual educational departments of the city system and will gradually be extended to include the entire county. Classes are brought to the zoo in our buses, together with their teachers, where they are taken in charge by our assistant superintendent and educator, who gives them interesting and accurate instruction in the desired subjects. Two such expeditions have been made for the purpose of experimentation and have proved highly successful. It is fitting at this time to acknowledge our appreciation of the work accomplished by the educational committee this year under the direction of Dr. Myrtle Johnson of state college. We also wish to thank the officers and teachers of the city school system, especially Mr. Scott and Miss Evans for their hearty support and cooperation.

“During the past year our turnstile record shows an increase of 21,008 visitors; 78,425 children have been in the gardens. Our attendance still largely consists of out-of-town folk. We would like to see more of the townsmen visit the zoo regularly. We appreciate the fact that the thing at hand is often neglected, but your time is well spent anywhere in the grounds of Balboa park. We invite each member to visit the garden at least once during the year, then we are sure you will come not once but many times.

“I wish to thank the members of the various city departments who have assisted us so generously again this year in every way they were able. I want to thank the council of the city for their timely aid at the time our grounds were so nearly destroyed by floods.

“The support, encouragement and cooperation that I have received at all times from members of the society and the standing committees throughout the year has been a source of constant pleasure and gratification to me. I am, I feel sure, only voicing the thought of all the directors in saying this tonight. I wish to again thank the board for its unfailing loyalty and interest, and their unselfish efforts on behalf of the society during the last year.”

REPTILE DEPARTMENT

L. M. Klauber, curator of reptiles, gave the following report:

“During the last 12 months the reptile department has had one of the most successful years in its history. There is some evidence that snakes were unusually plentiful in San Diego county, this being borne out not only by our own collection, but by the observations of others in southern California.

“During the year 748 snakes were brought into the zoo from San Diego county, in addition to which the writer recorded 93 live and dead specimens in the county, bringing the total for which locations records were obtain to 841. This figure is to be compared with 703 in 1925, 443 in 1924, and 477 in 1923. It will be seen that there has been a substantial increase. It is hoped that by continued stimulation of amateur collectors, large numbers of specimens will be brought in during the coming year. There have been 2464 specimens recorded during the last four years.

“In addition to the San Diego county specimens we secured from adjacent localities in southern California, Arizona and Lower California 55 specimens. There were also a considerable number of lizards and amphibians brought in, together with 21 turtles and tortoises.

“From eastern collectors, dealers and scientific institutions we received through trades and purchases 301 snakes, two lizards, 33 amphibians and 193 turtles. Likewise we received a number of specimens from Europe through trade, totaling 52 snakes, 24 lizards and 35 amphibians.

“We sent out as trades and donations to eastern and European zoos, museums, universities and natural history societies 322 snakes, 151 lizards, 24 turtles and 383 amphibians, these being live specimens. In addition, we forwarded a number of preserved specimens.

"Altogether in number of specimens, our results were better than those of any previous year. In rarities we secured two live and one dead specimen of California Trimorphodon vandenburgi, these being so far as I know the fourth, fifth and sixth specimens taken in California. All were taken by the writer personally.

"The heating plant in the reptile house has now been completed and on the date of this report is being operated in an entirely satisfactory manner. It is hoped that this will change the winter character of our exhibition from one which has been comparatively poor in past years to an exhibit which will be almost equal to that shown in spring and summer.

"Our annual prize award unquestionably stimulates interest and brings us a large number of specimens. Prizes for 1926 were offered as follows:

"For the individual bring in the greatest number of snakes, \$35.

"Next largest number, \$20.

"Most unusual specimen, \$10.

"A total of \$65.

"Similar prizes were offered in 1925.

"The prizes for 1926 should be awarded as follows:

"First prize, for the largest number of specimens, to F. E. Walker of East San Diego, who brought in 205 snakes.

"Second prize to L. F. Faidberg of Chula Vista, who brought in 116 specimens.

"The prize for the most unusual specimen should go to Frank Stephens of San Diego for a sidewinder from Mason valley. While sidewinders are quite common in Imperial Valley we have had during the past four years only three specimens from San Diego county.

"For the year 1927 I would recommend similar prizes. However, I would change the award for most specimens, making it on a basis of points, these points to be based on the rarity of the specimens brought in. In other words, a common snake, such as a San Diego gopher snake, would give the donor one point toward the prize, while a rare snake, as for instance a western faded snake, would give the donor 30 points. In this way we would stimulate an interest in the collection of the rarer species. If this plan meets with your approval, I would be glad to arrange a fair schedule of points.

"I again recommend the possibility of interesting county schools in the collection of snakes, lizards and amphibians (rattlesnakes excluded), by which means we might be able to secure a large number of specimens and many important locality records. Particularly is it desirable that we do more work on the lizards and amphibians in the future.

"During the last year there has been established at Glenolden, Pa., the Antivenin Institute of America, under the directorship of Dr. Afranio de Amaral, late of the Institute de Butantan, Sao Paulo, Brazil. We are cooperating with the new institute to the extent of securing rattlesnake venom from our local species, whereby the institute may be able to manufacture antivenins, particularly designed to counteract the bites of our local snakes. Thus far we have forwarded to the institute the venom from 130 rattlesnakes. We hope to continue this work next year and every effort should be made to secure a large number of local rattlesnakes, as it will be greatly to our benefit, both from a scientific and practical standpoint to aid in the work of the institute.

“Two brief papers were published in Copeia last year, these being entitled :The Snakes of San Diego County, California” (a table), and “Field Notes on Xantimia henshawii.” The writer has prepared a paper on ‘Rattlesnakes of the Extreme Southwest’ for the Bulletin of the Antivenin Institute, which will probably appear in 1927.”

January 16, 1927, San Diego Union, Society- Club, 1:1, 3:1-2. Dr. Stewart wants San Joaquin and Kern and Tulare County Buildings set aside for Music Center in Balboa Park; need about \$25,000 to restore.

January 16, 1927, San Diego Union, 11:1-2. **Good Housekeeping** magazine starts story of life of Mme. Schumann-Heink.

January 20, 1927, Minutes of the Board of Park Commissioners.

Present: Commissioners Johnson, Marston and Jones.

Mr. W. D. Stewart, applicant for lease of County Fair Farm Bureau Stables in Balboa Park, appeared before the meeting relative to signing of lease. After discussion of the form of lease drawn up by the Board, Mr. Stewart agreed that a form of lease revised as follows would be acceptable to him:

1. Rental of stables for use as Riding School at monthly rental of \$50.00 for first year and \$75.00 per month thereafter.
2. Authorizing Lessee to act for and in behalf of Board of Park Commissioners in renting stalls or groups of stalls in the other stable at rates to be prescribed by the Park Commission.
3. Requiring the Lessee to keep all grounds around premises in clean and sanitary condition.
4. Lessee not to be held responsible for conduct of persons renting stalls or groups of stalls in other stable or their stable attendants.

Mr. Stewart was informed that the lease would be restated, and submitted to him.

In the matter of location of a Central Fire Alarm Station in Balboa Park, upon motion duly seconded, Mr. Morley, park superintendent, was made a committee of one to confer with Fire Chief Algren and report back to the park commission regarding architecture of building.

It was the sense of the meeting that any building erected for the purpose should conform to the architecture of other park buildings and be planned by a certificated architect.

Report and estimate of Superintendent of Parks on road through Dehesa Canyon was held over for another meeting.

The matter of inscription for tablet commemorating dedication of Balboa Park was carried over to next meeting.

The matter of additional Roque Courts was carried over to next meeting.

The secretary reported that a Merry-Whirl, authorized to be placed in the Pepper Grove on 90-day trial, had been shipped from Milwaukee with freight charges of \$40 - \$43 due; that the shipment had been billed to the Board of Park Commissioners at \$175 and is now in the railway depot; that he had tried to located Mr. De Sommers at the location given, but found him out of town. Instructions were

given to communicate with the shippers and inform them that the order was not placed by the park department and that the shipment is held by the R. R. Co., subject to their order.

Letter was received from Community Service, Miss Alice Lee, president, requesting use of space in one of the park buildings to accommodate wardrobe and properties, Bureau of the Community Service.

Commissioner Marston moved that the secretary ask Miss Lee and Mr. Deering to look at the old Natural History Building in conference with Mr. Morley and report back to the board. The motion was carried.

January 23, 1927, San Diego Union, 14:1-3. Nemestrine pig-tailed monkeys proud parents at San Diego Zoo.

January 23, 1927, San Diego Union, Development, 17:2-5. Richard S. Requa urges Mediterranean architectural style for San Diego (illus.).

January 25, 1927, San Diego Union, 8:1. Councilman Heilbron criticized efforts of Park Commission to pay John Nolen an additional \$1,000.

January 27, 1927, Minutes of the Board of Park Commissioners.

Present: Commissioners Johnson, Marston and Jones.

On the subject of Roque Courts, the secretary reported that the committee from the Roque Courts reported collection of around \$200 to apply on construction of two additional courts. Mr. Morley reported that the cost would be around \$900. Commissioner Marston moved that the park department do the work, provided the committee will contribute \$350. The motion was duly seconded and carried.

Mr. Morley, part superintendent, reported that he has seen Mr. Almgren regarding plans of Central Fire Alarm Station and had advised him to see Commissioner Johnson. The matter was held over for another meeting.

In connection with repairing the curtain at the Organ Pavilion, Mr. Morley reported that he has an engineer look the situation over, and he had advised that nothing be done until detail plans and drawings can be secured.

Consideration of Dehesa Canyon Road was carried over to another meeting.

Further consideration of tablet and inscription commemorating dedication of Balboa Park was held over for another meeting.

Letter was received from Grant Circle of the G. A. R. offering gift of new flag to replace the one at the organ. The gift was accepted with thanks.

The secretary presented letter from Mr. John Nolen stating that he is planning to complete the General Plan of Balboa Park and details in time to come to San Diego in the middle of February.

Upon motion, duly seconded, the following increases in pay of park department employees were authorized:

Bookkeeper clerk, \$10.00 per month; Manager Refreshment Stand, \$15.00 per month; Foreman Nursery, \$5.00 per month.

Mr. Morley reported that the manager of operations has raised his daily men 25 cents per day to take care of pension deductions and that the park employees were asking for a like increase. The matter was held over for further consideration.

February 22, 1927, San Diego Union, 7:2-3. Zoo amendments will be put on ballot in April election.

February 25, 1927, San Diego Union, 1:3, 4:4-5. Zoo friends win first round in fight to keep roads from cutting gardens; Council refuses to reword agreement as Marston leads Park Board's plea to aid Nolen's City Plan.

Battling against the encroachment of roadways through the San Diego Zoological gardens before the city council yesterday, in the face of a united attack by the city park commissioners, Dr. Harry M. Wegeforth, president of the zoo, came out with colors flying.

The park commissioners appeared in support of the Nolen plan, which would run roadways through the south and north ends of the zoo, but were unable to convince the council that alterations should be made in a proposed charter amendment setting aside all ground now occupied by the zoo for zoo purposes exclusively.

Council voted last Monday to submit this amendment to the voters at the April election, and City Attorney Higgins yesterday ruled that it is now too late to change the legal description of the land, unless there had been a "clerical error." Dr. Wegeforth had no difficulty in proving to the council that there had been no such "error." The commissioners made a determined effort to have certain land at the south end of the zoo, which they desire for one of Nolen's proposed roads, eliminated from that area which the voters will be asked to set aside for the zoo, but it was a waste of breath.

Dr. Wegeforth declared that the proposed Nolen road entering the park at Nutmeg street would destroy every pond and en in the canyon. He said that the road proposed by Nolen to cut across the north end of the zoo would cut through land deeded to the zoo by the board of education.

Park commissioners were accused by Dr. Wegeforth with taking little interest in the zoo.

"They know nothing about animals," he said. "Not one of them has been in the zoo for a year. It seems to me that when we give them a fine institution like the zoo, they would at least meet us half way."

Dr. Wegeforth further charged that funds which should have gone to the zoo were given to the art museum and other institutions. Citizens, he declared, have spent \$330,000 on the zoo while the city had only provided \$60,000. He explained the popularity of the zoo with the people by declaring that 800,000 people visit it annually.

"This proposed road at the south end," he continued, "is merely a road to cut our research building and hospital off from the main zoo."

The doctor declared that it was much better to set aside 80 acres for a zoo then to let it go to sagebrush. "You can't play golf on the park golf course without breaking a stick," he added.

George W. Marston, W. Templeton Johnson and Colonel E. W. Jones, all members of the park commission, each spoke at length. Mr. Marston defended the Nolen plan and told of the commission's hope to follow out that plant to successful conclusion. He said all roads suggested by Nolen are needed.

"All friction the park commission has encountered is with the board of education and the zoo," continued Mr. Marston.

Councilman Held said that the zoo is the greatest attraction in the park, and that all city officials ought to cooperate in every way with the people who "put the zoo across."

Dr. Wegeforth insisted that the Nolen plan for park improvement is a "beautifully colored' thing and looks fine as a map, but that it has faults. Nolen, he declared, should have designed a road to run through from Upas street and not from Nutmeg street through the seal ponds of the zoo.

"If the road would interfere with the seals, the doctor could remove them," suggested Mr. Marston, who then told of his 20 years of service in developing Balboa park.

The park commissioners asserted that the ground through which the south road would pass was never intended for zoo purposes, but Dr. Wegeforth declared that it was granted to the zoo by a former park commission, and allowed a letter as evidence.

"Is something they gave you in writing worth only a pinch of snuff?" asked the doctor.

As the thing now stands, two zoo amendments will be submitted to the voters in April. One sets aside that ground now occupied by the zoo, including the land near the new research building, over which yesterday's discussion originated, to be used exclusively for zoological purposes. If this amendment is approved by the voters, the park commission will not be able to put roadways through the zoo.

The second amendment allows the zoo 2 cents annually on each \$100 assessed valuation, to which Dr. Wegeforth asserts the zoo is already entitled, but is unable to get in full from the park authorities.

Another proposed amendment operating a zoo commission was turned down by council last Monday, the councilman believing that everything in the park should be under one head.

February 27, 1927, San Diego Union, 5:5-6. Tom Isabell calls proposed street through Zoo "spite" road.

March 14, 1927, San Diego Union, 9:1. Board of Park Commissioners issues comprehensive report on Noel plan to make Balboa Park world's loveliest.

March 15, 1927, San Diego Union, 7:4. Zoo directors get inquiries about contest.

March 16, 1927, San Diego Union, 1:5, 2:4. Zoo fight ended with compromise; directors of Society and Park Board agree on all points of difference; as public to vote tax.

The zoo fight is over. Members of the park commission and the directorate of the San Diego Zoological society met yesterday afternoon to consider the matter of compromise and the park commissioners agreed to a compromise road and to set aside land asked for zoo purposes. Both parties agreed that the two-cent tax asked in charter amendment No. 4 is a desirable measure and should be voted.

The principal objection offered by the zoo to the running of a road through the park at the location mentioned by the Nolen plan was that it would isolate from the zoo the beautiful new hospital and research building now nearing completion, and that it would destroy important pools, cages, pens and planting in the zoo.

The park commission generously agreed to meet the zoo half way and compromised on the road location, bring it up just south of the research building and behind the California Building, thus providing an entrance to the zoo through the building. Such a location for the road will neither disturb present developments nor the birds and animals along the southern boundary of the zoo.

On the matter of the two-cent tax, the park board decided that such a tax is a reasonable amount to ask for zoo support, and agreed that so large an institution as the zoo cannot be dependent on a variable income when the lives of so many valuable animal specimens are dependent on the proper funds and upkeep. Both the zoological society and the park board will accordingly urge the citizens to vote for charter amendment No. 4 on the ballot next month.

The agreement regarding the road and the setting aside of zoo grounds for zoo purposes was outlined by the meeting and put into the hands of a joint committee, Colonel E. M. Jones representing the park board and Gordon Gray the zoo, to be drawn up in proper form. The legal agreement will be published as soon as it is completed, it was announced, so that the people may know just what the two important park bodies recommended in the way of votes on the municipal ballot.

"We are happy that an agreement has been reached," said Dr. Harry Wegeforth,, president of the Zoological society, last night. "Both the park and the zoo will profit by it."

"It is a matter of great gratification that our differences have been reconciled and that the park and the zoo will work together in harmony," declared members of the park commission.

March 27, 1927, San Diego Union, Classified, 1:2. South entrance to Zoo will be opened today.

Providing a short and interesting road to the zoo a new entrance to be known as the south entrance will be opened to pedestrian traffic today.

The entrance is reached by passing north through the east arcade of the California Quadrangle just at the foot of the California tower and is intended only for foot passengers. It will make the gardens more accessible for pedestrians crossing the Cabrillo bridge.

The new entrance reached the Zoological gardens at the zoo research building as is the focal point for zoo roads. The bus, which makes the rounds of the gardens, stops at the new entrance.

The zoo directors urge that those who come to the park in automobiles continue to use the main or east entrance of the zoo, as ample parking space for cars is provided there.

The board of park commissioners and the directors of the Zoological society have reached an agreement in regard to the territory occupied by the zoo and it is by this agreement that the board is allowing the zoo to open the new south entrance.

As this same agreement provides that the road proposed in the Noel plan will be constructed south of the zoo research building and not through zoological territory, the directors of the Zoological society are asking the people to vote No on Proposition No. 3 at the general election April 5.

However, the directors feel that it is essential that everyone vote Yes on No. 4 as this insures the continuance of the present financial arrangement whereby the city provides a portion of the zoo's upkeep. This amendment has been indorsed by the park board, the chamber of commerce and many other organizations in the city.

March 31, 1927, Letter, J. W. Sefton, Jr., President, San Diego Society of Natural History, to Board of Park Commissioners, Balboa Park, San Diego, California (Board of Park Commissioners, Correspondence, Box 1, San Diego Public Library)..

Gentlemen:

When representatives of the Fine Arts Society, the San Diego Museum Association and the San Diego Society of Natural History called upon you recently, it was agreed that, for the present, institutions in Balboa Park should seek support through the Park Board rather than attempt a charter amendment for a direct tax levy. The San Diego Society of Natural History has not hitherto shared in city funds, although we believe that the records of the Park Board for the year 1925 will show that the Board was unanimous in recognizing the principle that the Society of Natural History stands in a position no different from that of the Fine Arts Society and the San Diego Museum Association in maintaining one of the "exhibits in Balboa Park," referred to by the City Council in that year.

As the increasing cost of keeping its building in repair and the uncertainty of private subscriptions, upon which the Society has been dependent, render continuance of its work s one of the major attractions of Balboa Park exceedingly difficult without financial help from the City, the San Diego Society of Natural History hereby respectfully makes formal application for a share of the city funds allotted to the Park Board. The Society does not at this time request a definite sum, and will use its influence toward securing the largest possible apportionment to the Park Board under the new City assignments. The Society feels, however, that its work justifies an amount an least equal to that made available to the San Diego Museum Association.

Very truly yours,

(Signed) J. W. Sefton, Jr., President
San Diego Society of Natural History.

April 1, 1927, San Diego Sun, 4, 10:2-3. Park and Zoo agree on vote.

A joint appeal to the citizens of San Diego urging them to vote "No" on Proposition No. 3 and "Yes" on Proposition No. 4 of the proposed charter amendments at the election next Tuesday, has been issued by the park commissioners and the zoo directors.

Proposition No. 4 sets aside two cents of the tax levy for the exclusive use and the maintenance of the zoo. The request to the people to vote "No" on No. 3 came as the result of a conference held recently between the park board and the zoo directors. This conference brought about an agreement whereby the park board promised to allocate additional land to the use of the zoo, if the officials of the zoo would agree not to press their demands for concessions which would interfere with the successful carrying out of the Nolen plan.

The zoo officials proposition was to have set aside for the zoo's exclusive use the land it now occupies and an additional nine or ten acres. This was opposed by the park board and the save-the-park committee on the ground that the additional land sought would forever block construction of the proposed east and west highway through the park, which was considered a vital part of the Nolen park plan. As a result of the conference, the zoo officials gave up their claims for this particular land in return for the park board's agreement to set aside land for the zoo's use in a location that would not interfere with the proposed cross-town highway.

April 3, 1927, San Diego Union, 8:1-4. Rain menaces San Diego Boy Scouts' Indian Village; lack of funds prevents restoration of picturesque exposition group.

(Photographs of two rooms in the Indian Village which have gone to ruin.)

When the Panama-California Exposition opened its gates in 1915, one of the largest, most important and interesting exhibits on the grounds was the Indian Village which had been located at the north side of the exposition by the Santa Fe Railway.

In the erection of the buildings of the Indian enclosure, the Santa Fe has not only considered their adherence to the very details of the New Mexico villages, but it had made them more than semi-permanent. When, therefore, the exposition days were over, the Indian Village, including the residence houses, the kivas and the imitation boulders of the fence and the grounds were in good condition and fitted for occupancy, at least _____.

After careful consideration, the Indian Village, which was too fine a thing to be destroyed, was turned over to the San Diego Boy Scout troops as a permanent headquarters, and immediately it became apparent that the San Diego Boy Scouts had a headquarters that was unique in the United States and which was worthy of permanent preservation.

The enclosure, made by the walls of the village, was large enough for two or three athletic fields, a swimming pool, and spaces for the exemplification of Boy Scout activities. Some of the rooms of the village were large enough for assembly work, and from the beginning it was seen that the gift of the village to the

Boy Scouts had been in reality a gift to all the scouts of southern California, and a rallying ground such as no other city in the country could afford.

After a short time, however, it was seen that the buildings needed supervision and repairs, and for this work there was no money. Many of the roofs of the village had been covered deeply with earth to carry out the Indian idea of roofs and the weight of this earth began to destroy the roofs. The plaster fell away from the walls of the rooms, floors were rotted through, and the ravages of time became increasingly severe until now the Boy Scouts are able to use only one or two rooms of what would be the largest and most complete Boy Scout headquarters in the possession of the organization.

The work of the Boy Scouts, it has been said by men and women who have concerned themselves with the scouts and the Indian Village, is being supported by the Community Chest, but in the chest there are no funds for the repair and maintenance of the buildings or grounds of the headquarters. The result has been, it is pointed out, that interest in scouting in San Diego is dying, the boys are losing their former lover for their rallying ground in Balboa Park, and visiting troops here on vacation trips and hikes, find their accommodations worse than poor.

The space allotted in the grounds for a swimming pool for the scouts, it was also remembered yesterday, has never been used for that or any other purpose, although the scouts have been promised a swimming pool every year since they first took over the grounds. What may be done to remedy conditions for the Boy Scouts is now a matter of deep consideration to Boy Scout executives and friends of boys in general who fear that unless definite steps are taken in the immediate future to repair the buildings of the Indian Village, the magnificent gift which has been made to the Boy Scouts will in a short time be reduced to such a condition as will demand its destruction because of unsightliness and real danger to those who frequent the inclosure.

April 4, 1927, San Diego Union, Classified, 13:3-4. Zoo heads explain purpose of Charter Amendment No. 4.

Because of a certain amount of misunderstanding among the voters of the city regarding the intent and the effect of charter amendment No. 4 on tomorrow's ballot, officials of the San Diego Zoological society are anxious to straighten the matter out, and to contradict some erroneous advertising that has been done by opponents of the measure, they announced last night in this statement:

"The amendment, providing that two cents of the 16-cent tax levied for park purposes shall be set aside for the use of the zoo, does not add a cent to the taxes of the city or increase the revenues of the zoo a nickel. Despite some advertising to the contrary, the amendment will neither raise more revenue nor give more of it to the zoo.

"The purpose of the amendment is to make certain that the zoo will never get less than a certain amount, so that the many valuable animals in the zoo will not be dependent for their lives upon the whim of any group that might control the appropriation of zoo funds from the park funds. The zoo is now getting the two cents for which it asks, but there is no legal requirement that the park board give the zoo the two cents. The amendment seeks to make permanent the income it now has by agreement.

"The members of the Zoological society's directorate and the members of the park commission are agreed that the amendment is desirable and that the zoo should be assured of a revenue by law. Both bodies are advocating it."

"We are not asking for more money or a higher tax," said Dr. Harry Wegeforth, president of the Zoological society yesterday. "We merely want our income settled upon us by law. The park is already getting 16 cents. It will continue to get 16 cents, not a penny more. The zoo will get the two cents it is already getting, not a cent more. As far as the general tax rate is concerned, the amendment will not affect it."

April 5, 1927, ELECTION

Proposition 3 --- sets aside a portion of Balboa Park as a Zoological Garden and prohibits the land so used from being crossed by highways or used for any purpose inconsistent with a Zoological Garden.

Yes	9,610
No	9,368

Proposition 4 --- not less than 10 cents and not more than 16 cents of each \$100 valuation of property for maintaining parks, plazas and squares, at least 2 cents to be used for Zoological exhibit

April 17, 1927, San Diego Union, 8:1-4. San Diego Council, Boy Scouts, ready to open campaign April 23 to rehabilitate Indian Village headquarters; buildings erected by the Santa Fe Railway Company at a cost of \$150,000; "Jamboree" at Boys' Headquarters Will Be Opening of Committee's Campaign..

(Photographs of Boy Scouts signaling from the Hopi kiva in the center of the Indian Village; rescue practice from one of the cliffs in the Indian Village enclosure; inspection in front of one of the communal buildings of the Village.)

Designed to rehabilitate permanently what is generally described as one of the superlative beauties of Balboa park as well as the most distinctive and unusual Boy Scout headquarters in the world, the San Diego County Council of the Boy Scouts of America, acting through a special campaign committee, will begin on Saturday, April 23, the solicitation of funds with which to put the Indian Village at Balboa Park on a continuing basis of usefulness and beauty for the Boy Scouts of San Diego county and the public in general.

The campaign, which will continue from next Saturday to the following Saturday, will have for its object the obtaining of \$39,274.50, the sum estimated to be necessary to repair and preserve the buildings of

the Indian Village, to built an all-year swimming pool for the boys of the city, and to restore the Village to the attractiveness which was its during the two years of the Panama-California Exposition.

The sum required has been arrived had after a careful examination of the Indian Village and its buildings by a group of local contractors and engineers. Their investigations included all the walls surrounding the Village and the artificial stone formations, boulders and cliffs of the inclosure, and the net result of their work was a verdict either to rehabilitate the Village by permanent renewals and repairs or destroy it.

The Village, it will be remembered, was built by the Santa Fe Railway Company to be a residence place for the members of a number of tribes of Indians brought here during the Exposition to give, under natural conditions and in natural surroundings, a complete and true presentation of their lives on the desert. For two years the Indian Village was one of the most popular and attractive features of Balboa Park, and tens of thousands of visitors learned then to admire the really great work of the Santa Fe Railway Company in building, amid the verdure and softness of Balboa Park, so true and so large a replica of the communal Indian dwelling places of New Mexico.

When the Exposition closed its gates the Indian Village became the possession of the city park commission, which in turn gave it to the San Diego County Council of the Boy Scouts of America. At once it was recognized that in the Indian Village the San Diego Scouts had a headquarters and rallying group superior in beauty and value to that of any other troop in the world.

After some time, however, it became apparent, even to the boys, that the Indian Village needed attention and money. No definite effort to provide either of these was made. Time and the elements started their ravages, walls started to crumble, foundation rotted away, roofs fell in, the grand total of devastation having been reached during the past year, when it was found that the Village had become a menace to the limbs and lives of the boys.

Two course of procedure were open. Either the Indian Village would be repaired, or it would have to be destroyed. Under the direction of Charles E. Rinehart, president of the executive board of the San Diego Council of Boy Scouts, an investigation of conditions was started and with the result of this in hand the members of the board decided to make an effort to rehabilitate the Village, not only for the boys, but for all Southern California, and to perpetuate a feature of Balboa Park which cannot be duplicated.

The present campaign will open at the Indian Village, Balboa Park at 1 o'clock next Saturday afternoon with a Boy Scout jamboree, band music, and a general afternoon of show, free to the public. The program has been prepared by the Boy Scout executives of the county, with a view not only to giving a real presentation of the work to be done by the organization for the boys of the county, but of providing an afternoon of entertainment which will be so attractive as any outdoor offering of recent months in this city.

The Boy Scout program Saturday, in addition to the band music, addresses and special entertainment which will be provided for the public will include the following parts:

Grand entry of the Boy Scouts of the city and county, headed by the national colors review of the scouts and a massed pledge of allegiance to the flag. Then there will be a band selection, and then, in three rings, in which there will be simultaneous exhibitions of Boy Scout work, there will be three series of thrilling presentations by the boys. These will include tent pitching, signaling drill, pyramid building, wall scaling, fire by friction, staff drill, scout drill, tournaments and first aid.

After this big show is finished, there will be the assembling of the council, the scout benediction and the exit march. Interspersed among all the numbers there will be band selections, special announcements and special features which are now being arranged by the committee in charge. The band of the day will be the organization of the San Diego Army and Navy Academy, Pacific Beach.

The work of the campaign will be under the general direction of an organization headed by Milton A. McRae, national vice president of the Boy Scouts of America, as director-general of the work, and Charles

F. Rinehart, president of the San Diego Council of Boy Scouts as chief executive. The secretarial management of the campaign will be in the hands of John Lawrence Fox, and the various divisions of the work will be cared for by the following executives as "eagle scouts."

(List of "Eagle Scout" workers follows.)

There are no funds in the Community Chest for the repair of buildings, nor is there any agency in the city through which the work can be done except the Boy Scouts, although the Boy Scout executives are undertaking the work of preservation of the Indian Village for all San Diego.

April 26, 1927, 8:1-2. Local Zoo leading county in activity, says Wegeforth; San Diego supplies world with trained seals; drops unscientific methods.

San Diego Zoo is a step ahead of the rest of the zoological gardens in the country, according to Dr. Harry M. Wegeforth, president of the San Diego Zoological society, who spoke at the Hammer club meeting in Seltzer's Café yesterday noon. The point of this city's greatest zoological superiority, he said, lies in the newly completed hospital and research building, where the society expects to learn a great deal about the habits, needs and diseases of animals kept in captivity.

Wild animals have been kept in captivity for educational, entertainment and religious purposes for many centuries said Dr. Wegeforth, adding that only in recent years has any serious effort been made to understand the animals and their needs, to make them comfortable in their captivity, and to learn more about their habits and demands. The increasing demand of wild animals has led to the organization of networks of animal dealers' agencies which cover the world. Hagenbeck was the first of these dealers to modernize and humanize the treatment, care and training of wild animals, and his methods are now widely used.

Torture methods of handling animals have been abandoned, said the doctor, and the dens now built for captive animals are of the moat type, giving greater freedom and more nearly natural surroundings. Medical interest in captive animals has increased and medical men the world over are studying animal diseases with a view to preventing them, just as human diseases are prevented, through quarantine, isolation, sanitation and diet. The new hospital and research building here will enable scientists to do more along this line than has ever been done before.

In the matter of education, the Zoological gardens of the country are taking a leading part. Here the children are taken on regular trips to the zoo, where the education director lectures on the subjects they happen to be studying: if it is geography, he tells about the animals in the region they are studying, showing the animals and telling of their habits. Through such agencies, the school children of the country are learning more about animals and are more interested in them and kind to them as a result.

The doctor then told some interesting stories of the capture of wild animals from elephants to cats and monkeys, how they are shipped and trained. San Diego, he said, provides practically all the trained seals seen in circus and vaudeville acts in this and even in other countries. A careful method of selection and training is used to the end that this zoo has a reputation for furnishing healthy, intelligent, well-trained animals. They are valuable for trading also, the local zoo receiving many fine exhibits in trade for the sea lions captured off this port.

Dr. Wegeforth concluded by urging greater interest in the San Diego Zoo, which has one of the most beautiful locations and arrangements of any zoo in the country. It will be one of the show spots of the county if it continues to develop as it has in the past, he predicted.

April 26, 1927, San Diego Union, 9:1. Scouts pledge selves to save Indian Village; luncheon at noon at the San Diego Hotel; prominent citizens, firms praise good work done by organization; opening day receipts \$5,245.84.

Mayor John L. Bacon said that Herbert Hoover had told him in Washington, D. C., recently that in tests made recently the percentage of honesty in boys of the public school who were not boy scouts was 60, while boy scouts rated 90 percent in the same tests.

June 3, 1927, San Diego Union, 5:3. Masons of city to dedicate flag pole on June 14 on Marston Point; big parade planned.

June 5, 1927, San Diego Union, Development, 12:2-5. Drawing of Cuyamaca Club by Frank P. Allen, Jr., new \$500,000 home to be built at Second and A Streets.

June 7, 1927, San Diego Union, 7:2-3. Bids for fight on Argentine ant pest in park demanded by Council.

June 8, 1927, San Diego Union, 5:5. Three school bands to give program at park Sunday.

June 10, 1927, San Diego Union, 11:5. City Park Board plans projects costing \$900,000.

June 11, 1927, San Diego Union, 7:7-8. Fire Chief and Park Officials look horns on Balboa Park site for proposed fire alarm station.

June 12, 1927, San Diego Union, 13:3-4. Free cooking school tomorrow in American Legion Building, sponsored by **Union-Tribune**.

June 12, 1927, San Diego Union, 24:1. Royal A. Brown to give his final concert at Organ Pavilion.

June 12, 1927, San Diego Union, Classified, 1:4-5. John Austin, Spreckels organ builder, returns; finds work good.

June 17, 1927, San Diego Union, 5:6. A delegation of citizens from the northeast section of the city will ask the City Council Monday morning that a bond issue be submitted at the approaching election for the widening of Pershing Drive through Balboa Park; work would cost about \$60,000.

June 18, 1927, San Diego Union, 5:5. Minnesota Society plans to plant trees in Pepper Grove next Saturday in honor of Charles Lindbergh and father.

June 18, 1927, San Diego Union, 8:5-6. George W. Marston pays tribute to memory of Russel C. Allen of Bonita who died last Saturday.

June 18, 1927, San Diego Union, 10:1. St. Francis Chapel will be setting for wedding tomorrow.

June 19, 1927, San Diego Union, Classified, 6:2. Colonel John A. Griffin, former Los Angeles city engineer, visualizes plans for beautification of Mission Valley and future city growth; would establish new park between Linda Vista mesa and San Diego proper. (illus.).

June 19, 1927, San Diego Union, Society-Club, 5:1. Combined orchestras of Senior Junior Schools to present annual symphony this afternoon at park organ (illus.).

June 21, 1927, San Diego Union, 16:4. Pershing Drive will get place on bond ballot in August; City Council agrees to add \$60,000 to issues for proposed improvements.

June 28, 1927, San Diego Union, 7:2-3. A dance in honor of all the enlisted men in the destroyer fleet now in San Diego will be staged at the American Legion auditorium, Balboa Park, Wednesday night, from 8 until 12 o'clock under the auspices of the Chamber of Commerce.

July 1, 1927, San Diego Union, 7. C. A. Gummere of La Jolla told San Diego Rotary Club yesterday to sell San Diego through fame of park.

July 3, 1927, San Diego Union, Classified, 1:3-4. Outdoor evening recitals to be given at Organ twice weekly by Miss Gladys Hollingsworth.

July 4, 1927, San Diego Union, Classified, 11:8. Civic Orchestra in Park concert yesterday.

July 7, 1927, San Diego Union, 11:4-5. Hopi Indians will stage tribal dances at Organ Pavilion tomorrow; program offered by Natural History Museum, San Diego Museum and Fine Arts Society; no admission will be charged; contributions may be made to restoration fund.

July 8, 1927, San Diego Union, 11:3-4. Philharmonic Orchestra to offer second concert of summer series at Organ Pavilion Sunday; nominal admission charge.

July 12, 1927, San Diego Union, 5:4-6. Organized labor lends Boy Scouts hand in building Indian Village Mess Hall; roofers and lathers turn to on work sponsored by "40 and 8"; plasterers to complete construction Sunday (photographs of building as it is being finished by members of the American Legion and organized labor; of work starting on the mess hall a little more than a month ago, and of people prominent in the construction of the building).

The completion of the mess hall will be the first step in the improvement and rehabilitation of the Indian Village for the use of the Boy Scouts

The second step will be the construction of a swimming pool and bluejackets from the naval training station have been busy excavating for the last week.

The San Diego Pyramid of Sciots will have charge of the third step in the reconstruction and it will take the form of the conversion of the northern portion of the Zuni pueblo into sleeping quarters, offices and work rooms for the Boy Scouts who may be quartered in the Indian Village.

July 13, 1927, San Diego Union, 12:1-2. Mrs. Kent Hamilton Abbott, Ohio resident, donated \$500 "toward a permanent museum building"; announcement by Clinton Abbott, director, Natural History Museum.

July 15, 1927, San Diego Union, 1:2. 2:6. O'Rourke suit puts crimp in city park work; curtailment of budget fund releases 22 workmen; action proves boomerang; action to restrain City Council from making any appropriations in addition to the original budget established last December.

July 17, 1927, San Diego Union, 5:6. Patrick F. O'Rourke asserts ample cash left for park.

July 17, 1927, San Diego Union, Classified, 1:1. Fire damaged local zoo warehouse last night; caged animals are crazed by smoke clouds; trapped dog victim in blaze doing \$2,500 damage; caretaker burned in dash to save park bus.

Crazed by the smell of smoke pouring from the burning warehouse of the zoological gardens last night, elephants trumpeted and lions roared from their compounds only a few blocks away from the burning building, enacting realistically the pandemonium depicted in the fabled circus tent filled with performing animals.

Less fortunate than the caged animals a dog, placed in one of the rooms earlier in the day after he had been chasing deer in the zoo, paid with his own life when the flames reached him. His owner remain unidentified last night.

Believed to have been caused by spontaneous combustion in a first floor room of the warehouse containing paints and oils, the fire which broke out at 7:30 last evening, destroyed part of 15 tons of hay

stored in the loft of the building, damaged the wall of the structure, and almost completely destroyed the body of one of two motor sightseeing buses parked in the building. The other, which was removed from the burning house when the fire was first discovered, was undamaged.

Causing flames that were clearly discernible in the University and park areas of the city, the building, which is located at the north end of the zoological gardens, was saved only from total destruction by the combined efforts of four engine companies from throughout the city. Although the walls were severely damaged, belief was expressed by Battalion chief J. A. Wood, who placed the total loss in the neighborhood of \$2,500, that the structure can be repaired without necessitating a complete rebuilding.

To prevent another outbreak during the night in the smoldering hay, Wood said engine company No. 3, from Fifth and Palm, would probably remain at the scene most of the night.

Harry Edwards, laborer and night watchman, was painfully burned on the hands while trying to drive the second bus from the flaming building.

The fire, which burned more than two hours, attracted a crowd, nearly a replica of that seen in the park two years ago when the civic auditorium burned to the ground in the central portion of the old fair grounds.

July 17, 1927, San Diego Union, Classified, 3:3-5. Stock converts Zoo corner into nursery for 16 deer; babies of Japanese, English, Mexican and Asian extraction cavort for visitors in paddock (illus.)

July 17, 1927, San Diego Union, Society-Club, 1:1. Balboa Park is scene of pretty wedding; 100 guests at St. Francis Chapel ceremony.

July 18, 1927, San Diego Union, 5:5. Zoo warehouse is total loss; no insurance held; fire believed to have been caused by spontaneous combustion.

July 19, 1927, San Diego Union, 4:2. City Attorney Shelly Higgins yesterday made a ruling that the Park Commissioners had no legal right to grant the use of the old Nevada State Building to the O'Rourke Zoological Institute without the consent of the Zoological Society of San Diego; Dr. Wegeforth needs the building.

July 19, 1927, San Diego Union, 7:1. Demurrer filed in O'Rourke suit; action expected as City declares attack on appropriations are groundless.

July 20, 1927, San Diego Union, 11:1-2. Spreckels Organ program notes for free recital this evening by Gladys Hollingsworth.

July 24, 1927, San Diego Union, Classified, 1:2-3. Lovers of horseback riding plan move to establish bridle paths in park by raising fund of \$1,000.

July 24, 1927, San Diego Union, Society-Club. Philharmonic Orchestra to give 4th concert of series this afternoon at Organ Pavilion.

July 26, 1927, San Diego Union, 7:4. O'Rourke loses Zoo building by Council's order; Park Commission's transfer declared illegal.

July 28, 1927, San Diego Union, 1:5, 3:6. New Switzer Dam proposed; park lake to be provided; canyon dams would save \$500,000 for drains, Council told; property owners protesting the plan urged to file objections; hearing scheduled next Monday.

July 29, 1927, San Diego Union, 3:3. Mayor Clark declares present Council is not responsible for canyon plan; protest meeting announced for tonight.

July 29, 1927, San Diego Union, 3:4-6. Map of boundaries of assessment district, formed under provisions of Mattoon act, for payment of costs estimated at about \$653,000 of proposed Switzer Canyon drainage district .

July 30, 1927, San Diego Union, 5:6. Judge Shortall in Superior Court yesterday sustained city demurrer in O'Rourke action; extra expenditures authorized legally; funds still tied up; O'Rourke given five days to amend his complaint.

July 30, 1927, San Diego Union, 7:1. Sunday Balboa Park concert will end season of Philharmonic.

July 30, 1927, San Diego Union, 9:4-5. Switzer Canyon plan protests our in as petitions circulated; housewives work early to get signatures of owners objecting to assessment district; Council action to be taken at meeting Monday.

July 30, 1927, San Diego Union, 12:5. Golden Hill body enters protest on Switzer Canyon drain.

August 1, 1927, San Diego Union, 1:6, 2:2. Crowd to hear Council action on storm drain project today; property owners will back up protests with presence.

August 1, 1927, San Diego Union, 8:6-8. Colonel E. N. Jones, park commissioner, defends Nolen plan and cotton warehouse on tidelands.

August 2, 1927, San Diego Union, 1:5, 2:5-6. City Council kills Switzer Canyon, Chollas Valley drain projects; only one man speaks in favor of projects; City is out \$4,640 for surveys.

August 4, 1927, San Diego Union, 10:4. O'Rourke amends original suit; charges duty dereliction on part of Mayor in allowing "extra budget."

August 5, 1927, San Diego Union, 12:5-6. Natural History Museum is back with many Mexican exhibits.

August 7, 1927, San Diego Union, 3:3-5. Sick, lame and lazy fill zoo hospital.

August 7, 1927, San Diego Union, Society-Club, 1:1. John Doane recital at Organ Pavilion Thursday evening for benefit of Christmas pictures.

August 7, 1927, San Diego Union, Society-Club, 4:5. Committee in charge of card party to be given by Girl Scout executive board tomorrow afternoon at Girl Scout Headquarters in Pepper Grove has completed plans.

August 8, 1927, San Diego Union, 8:2. City Council intends to widen 6th Street at some future date from Upas to University and to establish a set back line on the east side of that street 26 feet from property line.

August 12, 1927, San Diego Union, 10:4. Doane concert in park.

August 12, 1927, San Diego Union, 13:2-3. "Diablo," zoo python, to be "stuffed" while dozen men hold him Sunday afternoon.

August 14, 1927, San Diego Union, Development, 1:2-6. San Diego prepares to build nation's finest airport.

August 16, 1927, San Diego Union, 1:4, 2:3. City Officials order plan for lakes in Balboa Park; canyon dams would eliminate need for drainage system and provide irrigation; will consult Park Board.

August 17, 1927, San Diego Union, 1:3. Scientists seek hairy tiger from Orient for Zoo; shipping board in Washington, D. C., authorizes use of ships on expedition asked by Senator Shorridge.

August 19, 1927, 26:1. O'Rourke files appeal notice in budget fight.

August 21, 1927, San Diego Union, Classified, 1:4-7. Big boys make play easier for little boys; swimming pool dedicated at Indian Village; electrical workers, members of the electrical contractors association of San Diego and electrical workers comprising Union No. 569, spend day wiring headquarters; labor and materials donated (illus.).

The fine new swimming pool in the Indian Village was dedicated to the use of the Boy Scouts of San Diego yesterday, and with a short time after the brief ceremony it was in full use by many eager scouts of the organizations.

August 21, 1927, San Diego Union, Development, 6:2. Interest keen as San Diego County Fair opening nears; El Cajon and Chula Vista to be strong competitors for best agricultural exhibit staged at fair honors; \$5,000 offered for best farming exhibits; fair will be held September 13 to 17.

August 25, 1927, San Diego Union, 7:2-4. Sailor radioman wins love of doe by saving her life from dog in Panama Canal zone; to be given to local Zoo (illus.).

August 26, 1927, San Diego Union, 22:5-6. County Fair's attractions to eclipse previous years.

August 28, 1927, San Diego Union, 5:4-6. Aeolian Quarter to aid Austin D. Thomas, organist, in recital Wednesday night.

August 28, 1927, San Diego Union, 16:1-4. Art Gallery announces changes for September, large collection of canvases by French and American artists, groups of Japanese prints, and interesting monotypes to be on display for month at museum, by Reginald Poland.

The Fine Arts Gallery of San Diego is making radical changes for the exhibitors for September. The temporary exhibits which will be on view for that month include a large collection of French and American paintings, drawings and prints from some of the more advanced American and French artists. There will also be a small collection of painting by Helen Forbes, president of the Society of Women Artists, located in San Francisco. A very carefully selected group of Japanese prints from the best epoch, by the leading artists have been sent by Goodspeed's of Boston. The fourth special exhibition is by William H. Clapp, creative artist and director of the Oakland Art Gallery. These will be on view just after September 1.

In the big gallery of permanent acquisitions will be installed the fine old master portrait of Queen Isabella by Coello of 16th century Spain, recently given by the Misses. Putnam of this city. The El Greco "St. Francis of Assisi" from the same school and time, will again appear upon those walls as well as the delightful "Girl with Pet Dog" by Nicholas Maes, associate of Rembrandt. More and more the gallery will try to keep the older paintings together, and the more modern works by themselves. No doubt visitors will be most happily surprised to see what a glorious nucleus the Fine Arts Gallery already owns, a collection which already definitely counts in the field of Spanish art.

The California art will also be segregated, so that it may thus be still more effective. Again we are sure that the citizens and others will be impressed with the way in which the San Diego Gallery is patronizing not only early American art, but very specifically the contemporary Southern California painting. The purchases from the second annual Southern California exhibition are an indication of one of the policies.

One of the galleries has been set aside for the month for the exhibition of art given by the University Women's Club. This club is interesting itself in fine prints, of which it has given a number, including the work of Rembrandt, Zuloaga, Gordon Craig, Rockwell Kent, and George W. Bellows. The club is already planning meetings at the gallery for the study of prints and their execution.

Another gallery will be devoted to Eastern and Near-Eastern Art. There will be shown not only the glorious early Chinese landscape, jades and porcelain, given by Mr. and Mrs. George D. Pratt, but the selected Japanese prints from Goodspeed's and an interesting Gubri vase of the 10th century or earlier, given by M. Demirdjian of Paris.

A number of pieces of English furniture loaned by Joseph Torrey, of colonial household objects, and a few of the earlier English and American pictures will be assembled in one of the long galleries.

The modern French and American art will be reviewed when installed in one of the big galleries. It includes 230 items and will thus offer a large enough representation to be significant of some of the advanced tendencies of the day.

A number of the artists are already well-known. There is Rockwell Kent, for example. He is represented by oils, water colors and lithographs, including some of his noted Alaska themes. Arthur B. Davies, whose work has been called "as good as government bond," also exhibits oils, water colors and lithographs. Maurice Sterne is showing a group of drawings made in Greece, New Mexico and Bali. Albert Zorach has both prints and drawings while the three French painters, Dufy, Vlaminck and Signac, are also on the list of the better known.

Among the sculptures, Malliol is fortunately included. There will be five of his most recent bronzes, including a life size bust of the late French painter Renoir.

(See original for balance of article.)

August 29, 1927, San Diego Union, 5:2. Exhibit space in County Fair building at County Fair is going rapidly; most of available industrial area already contracted for, says Manager J. D. Pritchard.

August 29, 1927, San Diego Union, 15:1-4. San Diego plumbers of Local 230 of Journeymen plumbers and supply houses aid Boy Scouts to realize dreams of modernized Indian Village; workmen's services donated to provide sanitation and outdoor bathing pool (illus.).

The result is a perfect system of sanitary plumbing, with numerous showers, toilets, sinks, floor drains and last, but not least, the largest outdoor swimming pool south of Hollywood. The pool is supplied by three direct water lines.

August 29, 1927, San Diego Union, 15:3. Unions set pace in rehabilitating Scout's Village.

September 2, 1927, San Diego Union, 8:1-2. Federated Trades to stage park Labor Day celebration; San Diego Council arranges program featured by sports; addresses to be given by Senator Johnson, Oil Workers' chief, and Mayor Clark; band concert and picnic lunch will have place in day's events.

September 3, 1927, San Diego Union, 8:1. Rabbit exhibits to be featured at County Fair.

September 4, 1927, San Diego Union, 1:7. Park Commission notifies City Council of determination to handle parks; should be consulted in matters affecting city recreation grounds.

September 5, 1927, San Diego Union, 1:3. Labor Day observances at Organ Pavilion.

September 6, 1927, San Diego Union, 9:1. Every convenience planned for crowds visiting annual County Fair next week.

(Photograph: Over the top! Members of Troop B, United States cavalry, stationed at Camp Hearn, executing one of the many dare-devil riding stunts which thrilled the huge crowd at the San Diego County Fair last fall. Captain Fenton S. Jacobs has drilled his troops daily during the past few months for a more extensive and diversified program at the fair this year.)

Parking space, sufficient for the biggest crowds that every attended the county fair, will be available next week in Balboa Park, close to livestock barns, show rings and grand stand. There will be little walking for people.

Two parking spaces will be established, one along Park boulevard from the tennis courts south, the other will extend from the Roosevelt Junior high school to the boy scouts Indian village and zoo.

Inclines are being installed along the curbing to make the park space readily accessible from any point along the pavement. Both areas will be served by entrance gates which put the visitors immediately at the livestock stables, show ring, or grandstand.

The parking space will be well lighted, policed and free. Accommodations will be available for thousands of cars in anticipation of the largest crowd in the history of the fair.

Afternoon fair concerts this year are expected to be unusually large because of the attractive program that is being arranged. The events at the grandstand will be free in the afternoon. In addition to the cavalry program to be staged by the Camp Hearn unit, there will be many trick and fancy riding stunts by men and women horsemen.

Old Timers' Day on Friday will be one of the special days that will afford a change from the usual list of events. Every day of the fair week which runs from next Tuesday to Saturday will feature some special activity.

September 8, 1927, San Diego Union, 18:4-5. Twenty-first annual flower show to open in Balboa Park Saturday.

September 8, 1927, San Diego Union, 21:1. Want 2,000 girls to dance with the enlisted men of the fleet at dance which is to be given Saturday night in the American Legion Hall.

September 9, 1927, San Diego Union, 12:6. Troop B, 11th Cavalry will be slated at Balboa Park for the following two Sundays, where it will take part in County Fair activities and attend Sunday morning services at Organ Pavilion

September 11, 1927, San Diego Union, Classified, 1:1-5. Fall flower show mirrors charm of county.

September 11, 1927, San Diego Union, Classified, 4:3. Preparatory to participating in both special exhibition stunts and the nightly horse show at the County Fair, opening in Balboa Park Tuesday evening, Regiment B of the 11th Cavalry went into camp in the park yesterday.

Forty-eight men are in the camp with their mounts. Six men have been left at Camp Hearn, Imperial Beach, where the 11th Cavalry is stationed.

September 11, 1927, San Diego Union, County Fair Section, 3:1-2. Horse show big event with many popular attractions signed up, by Arthur G. Mathews.

September 11, 1927, San Diego Union, County Fair Section, 6:1-2. Special events planned for each Fair day; will stress aviation exhibits with stunt features.

September 11, 1927, San Diego Union, County Fair Section, 7:1-2. "Best Fair Ever" is promise to public.

September 11, 1927, San Diego Union, County Fair Section, 8:1-4. Prizes offered to best domestic breeders; merchants are donors in local rabbit, poultry exhibit.

September 12, 1927, San Diego Union, 1:1-4. "Bounding mane" artists pitch pointed tents in Balboa Park.

September 12, 1927, San Diego Union, 13:5-6. Completion of rehabilitation work on Indian Village brings influx of boys wanting to be scouts.

Only registered scouts will be permitted to use the swimming pool, building or equipment at the Indian Village.

Every day brings the rehabilitation of the Indian Village nearer completion. Two groups of rooms in the Zuni pueblo were completed last week and are now open for inspection. The truck garage and work shop were also completed during the week. A large amount of work on the Taos pueblo has been done, a big percentage of the new concrete footings being in place. This week work will start on the troop rooms in the Taos building. The finishing touches were put on the swimming pool last week and scouts are now enjoying a swim every afternoon after school hours. The mess hall has been completed and furnishings for it will be started, it is expected, this week.

September 13, 1927, San Diego Union, 1:6, 2:5. Appeals to City Council against horse show ban at County Fair; John P. Mills says wife and daughters are barred from exhibiting; trainer ruled off, Manager states.

Several society women who own fine horses, including Mrs. Mills, are said to have applied for permission to exhibit their horses at the fair, provided the animals may be placed in charge of F. W. Robinson, a horse trainer, who at one time conducted a stable of saddle horses in Balboa Park.

The county fair authorities, headed by Felix Landis, are said to have refused to allow Mrs. Mills and other women to exhibit their horses if Robinson has anything to do with it, owing to difference between Robinson and the fair officials a year ago.

September 13, 1927, San Diego Union, 9:1-3. Doors of County Fair to open tonight; more attractive than any event of kind in past; 50-piece Santa Ana Band to appear in concert; horse show tomorrow.

September 14, 1927, San Diego Union, 1:3-6, 9:1. Holiday spirit animals crowd as gates open for County Fair; Army and Navy to be favored on bill today; fine horses and wide range of exhibits attracting much comment; industrial and agricultural exhibits in main building.

September 14, 1927, San Diego Union, 8:2. New Zoo gate closed for County Fair.

September 14, 1927, San Diego Union, 24:2. City Council files Mills' protest on Horse Show.

September 15, 1927, San Diego Union, 12:1-4. Horse Show attracts 2,300 persons to Balboa Park annual program; today set as "Service Club Day."

September 16, 1927, San Diego Union, 9:1-3. Bronco events, spills offer thrills at County Fair.

September 17, 1927, San Diego Union, 12:1-2. County's greatest Fair closes tonight; snappy program, horse show will be final day features; thousands from outside communities have made their plans to attend.; golf-putting contest on the green at the side of the Midway; doll and doll buggy contest; Mutt dog parade.

September 17, 1927, San Diego Union, 12:3. Encinitas gets second honors in "Boost" talk; handsome silver loving cup given James Love for his speech favoring La Mesa.

September 17, 1927, San Diego Union, 12:4-5. Half Minute Interviews: On a Trip to the County Fair, by Forest Warren.

September 18, 1927, San Diego Union, 14:4-6. Bears at Zoo offer exhibit to public (illus.).

September 18, 1927, San Diego Union, Classified, 1:2-5. 12,000 persons pass through County Fair turnstiles to set new day's record for annual San Diego event; estimated crowd of 4,000 witnessed the final night horse show last night; dance pavilion popular; hundreds of men from the fleet were on the grounds all day.

September 20, 1927, San Diego Union, Classified, 1:1. Fair surpasses previous years' exhibits, report; attendance failed to equal last year's; horse show, the outstanding feature.

September 22, 1927, San Diego Union, 1:1-2, 14:4-5. San Diego welcomes Lindbergh here; 150,000 greet him; 60,000 at Stadium.

September 22, 1927, San Diego Union, 8:1-8. 60,000 hear Lindbergh at Stadium.

September 27, 1927, San Diego Union, 1:7, 2:5. \$128,250 given as costs of two dams proposed in Balboa Park; Council favors Seifert's flood control plan on ballot; will confer with Park Commissioners.

September 29, 1927, San Diego Union, 7:1-2. \$1,575,000 Bond Election to be Held Early in December; Airport to cost \$650,000 major item on ballot; Council votes to eliminate Seifert plan for control dams in Balboa Park.

The list includes:

Paving of Sixth and Date Street along park, \$45,000
Widening Pershing Drive, \$65,000
Municipal golf course, \$150,000

Dams Not Included

Councilman Seifert's plan for constructing two flood control dams in Balboa Park canyons, at a cost of \$128,000, was not included in the bond proceedings by the council yesterday, although Seifert made a determined fight for his project. Bruschi voted with Seifert to place this item on the ballot but McMullen Maire and Dowell opposed it. The vote was taken after members of the park commission, George W. Marston, Colonel E. N. Jones and W. Templeton Johnson had expressed opposition to the plan.

The commissioners declared that the construction of dams in the canyon would interfere with the Nolen plan for park development, and that other park experts has opposed any such plan of drainage. John Morley, park superintendent, said that if such dams are built at all, park shrubbery along the water courses of the canyons would be ruined. Commissioner Marston said the same plan was considered 20 years ago, but rejected as not feasible.

Councilman Seifert continued yesterday to maintain that the dams proposed by him in Balboa Park were the logical means of much-needed flood control. He declared that he had not given up the fight and that the dams will be built in time as thousands of citizens favor the project.

October 2, 1927, San Diego Union, 5:4-6. Baby buffalo arrives at Zoo; addition first ever born in captivity here.

October 2, 1927, San Diego Union, Development, 4:3-4. Furnishing the California home, by Richard S. Requa.

October 11, 1927, San Diego Union, 7:1. Zoo action urged; City Council asked yesterday to speed up Board of Park Commissioners in returning old Nevada Building, known as O'Rourke Institute Building, to Zoological Society.

October 13, 1927, Letter, J. W. Sefton, Jr., President, San Diego Natural History Society, to the Board of Park Commissioners, Balboa Park, San Diego, California.

When we presented to you our letter of March 31, 1927, and at other times, your Board has recognized the principle that the Natural History Museum, in maintaining an important public exhibit in Balboa Park, and in conducting an extensive educational program in the City of San Diego, is in a position similar to that occupied by the Zoological Garden, the Fine Arts Society and the San Diego Museum, and is entitled to some support from city funds. Inasmuch as your Board has stated that, for the present, it would seem advisable for institutions in Balboa Park to seek city support through the Park Board, we respectfully submit herewith a proposed budget of the Natural History Museum for the year 1928, amounting to \$10,000, which we earnestly urge that you include in the total Park budget.

We would call to your attention that the items listed in the budget are confined to the minimum requirements necessary to maintain our public exhibits, to continue our city educational work and to keep our building and equipment in repair. Expenditures for administration, research, exploration, securing of specimens and scientific publication will be met by membership fees and other contributions.

Should you desire, we should be most pleased to appear before your Board at a regular or special meeting and answer fully any questions which you may care to ask. In any event, we shall desire to urge our claims as strongly as possible before the City Council, and thus add our plea to securing for the Park Board the full sum that it is seeking.

We might add that we understand and are ready to meet the City's requirements, in such matters as civil service and use of City money only for City property.

Very truly yours,

(Signed) J. W. Sefton, Jr., President
San Diego Society of Natural History.

November ?, 1927, Statement from the Board of Park Commissioners.

(Note: see **San Diego Union**, November 19, 1927, 12:7-8.)

The Board of Park Commissioners deems it a duty to the voters of the City to submit a brief introductory statement as to the merits of Propositions 6, 7, and 8, to be voted upon at the Special Bond Election next Tuesday, November 22nd, 1927.

The Park Commission recommends that you vote YES on Proposition No. 6 for paving the east half of Park Avenue (Sixth Street) abutting on Balboa Park. This half street should be paved in order to better traffic conditions and also to finish off and beautify this border to Balboa Park. The abutting property owners have borne the expense of paving the west half of the street; and inasmuch as Balboa Park is the only property abutting the east half, the City (which owns Balboa Park) should, in all equity, bear the expense of paving that half abutting on its property. For the same reasons, the north half of Date Street, between Sixth and Ninth Streets, which abuts on Balboa Park, should be paved at the expense of the City.

Pershing Drive is a city thoroughfare connecting the fast growing north and east sections of the city with the downtown business district, and is the shortest available route between these points. It is, therefore, dangerously crowded by people going to and returning from business. Regardless of the fact that many of the accidents which have occurred thereon were due to reckless driving, it cannot be disputed that the narrowness of this thoroughfare is a contributory cause of all these accidents. If Pershing Drive is widened, traffic can be speed up with safety and with resulting economy of time. We recommend that you vote YES on Proposition No. 7.

We have collected much data as to the financial operations of Municipal Golf Courses. Highly developed Municipal Golf Courses, without exception, show net profits over and above maintenance expenditures amounting to from ten to sixty thousand dollars per year. This will be sufficient to pay off the bonds and provide a surplus to be used in further park development. Golf players willingly pay for the privilege of playing over high developed golf courses; and if Proposition No. 8 carries, we do not believe that it will cost the taxpayers one cent. Those who do not play golf should vote YES, knowing that fees paid by the golf players will pay off the bonds; and in addition will provide a handsome fund for park development.

We have limited our official recommendations to those propositions affecting our City Park System.

Respectfully,

John G. Morley
Park Superintendent
A. S. Hill
Executive Secretary

Wm. Templeton Johnson
George W. Marston
E. N. Jones
Park Commissioners, City of San Diego.

November 6, 1927, San Diego Union, 5:4-6. Monkeyville at Zoo takes on new interest when babies appear (illus.).

November 6, 1927, San Diego Union, 8:4. Museum of Natural History cancels lectures when funds run low.

Educational lectures which have been held each Sunday during the winter from November to April at the Natural History Museum in Balboa Park have been canceled for the forthcoming winter and will not begin this afternoon as previously planned, it was announced yesterday by Clinton G. Abbott, director of the museum.

Several causes have combined to necessitate the discontinuance of the lectures which each winter have been an important feature of the park, Abbott stated. Chief among the causes is the financial liability of

the lecture course, for the collections have never met the fixed expenses, despite that most of the speakers donated their time, it was stated.

“The constant difficulty of getting lecturers with no fund available for their remuneration, the general burden of the course upon the shoulders of the already occupied staff, and the unsatisfactory ventilating conditions of the lecture hall have all contributed to the decision,” Abbott said.

It was pointed out by Abbott, however, that if adequate funds every become available to re-establish the lecture course on a proper basis, the series will be renewed. Meanwhile, the Natural History Museum will confine itself to special lectures when unusual opportunity presents itself, in addition to its regular walks and excursions.

“The increasing demands of a growing city have outstripped the income derived by strenuous efforts from membership fees and private contributions,” Abbott announced. “The Natural History Museum, therefore, is making an earnest appeal at the present time to the city council for an appropriation of \$10,000 from city funds for 1928, and continuance of the museum’s operations is vitally dependent upon their favorable action,” he said.

November 6, 1927, San Diego Union, Development, 7:6-7. Learning Color Harmony, by Richard S. Requa.

November 8, 1927, San Diego Union, 7:1-2. Park Board refuses to permit chest “scoreboard” in Horton Plaza.

November 11, 1927, San Diego Union, Planning to wide Zoo road; and it’ll save lots of fenders, too, by John J. Observer.

I was glad to learn yesterday that the park department is willing to do its share to alleviate those constricted road conditions in front of the zoo. Also, to put sidewalks along the road so the people won’t have to give the Sharpshooters to much of a handicap.

The park board, in a letter to the safety committee, said it would do its share by giving the matter consideration in budget making. The next move is up to the council. I suppose I’d be glad to see that road widened a bit so I wouldn’t get the fenders of the Observer’s bus bent every time I traveled that Alameda calle, or whatever it is called. The last time I talked with the park board members they said they felt the widening was a needed improvement.

January 1, 1928, San Diego Union, Industrial Section, 16:3-4. Natural History Museum part of cultural center in Balboa Park, by Clinton G. Abbott, director.

January 1, 1928, San Diego Union, Industrial Section, 16:5-6. San Diego Art Society in Balboa Park object of gifts, by Reginald Poland, director.

January 2, 1928, San Diego Union, 4:5. Star of India makes splendid marine museum.

January 2, 1928, San Diego Union, 7:1-3. San Diego's cultural life enjoys unique advantages, by Gertrude Gilbert, president Amphion Club.

January 2, 1928, San Diego Union, 7:4-5. Yorick Players' Little Theater in Balboa Park, by Havrah Hubbard.

January 2, 1928, San Diego Union, 11:3-4. Outdoor Christmas pageant beautiful feature in Balboa Park, by Reginald Poland.

January 2, 1928, San Diego Union, 11:5-7. San Diego Zoological Gardens provide natural habitat for remarkable collection.

Probably the most interesting institution in San Diego, the one claiming the greatest amount of attention, week in and week out, is the San Diego Zoological Society, with its extensive gardens in the heart of San Diego where the Society houses one of the finest collections of wild animals in captivity. Not only is the Zoo interesting for itself, for its natural charm of its location and a landscape development that makes the most of the natural advantages, but it is also interesting because the San Diego climate makes it possible to keep happy and healthy a wider variety of animals that can be kept anywhere else in the United States.

There are the snowy polar bears from the Arctic, and the elephants and lions from tropical jungles, the camels from the heated deserts, apes from all climes, kangaroos from the antipodes, pythons from the torrid swamps and forests of India and the birds from all over the world. San Diego has in its Zoo a number of animals which have never been kept successfully in captivity anywhere else in the world.

During the past year the Zoo has largely increased its facilities, mostly due to the generosity of individual benefactors, but in no small part because of the interest and support of all the people of the city. The greatest single addition to the Zoo has been the beautiful new hospital and research building, perfectly arranged and equipped for the care of the animals in the Zoo, and for the most exacting scientific research in plant and animal disease for the benefit of agriculturists and cattlemen of this part of the state. The building and its equipment were the gift of Miss Ellen B. Scripps.

Last spring the citizens of San Diego showed their faith in the Zoo by going to the polls and voting a charter amendment making the Zoo for all time secure in the possession of the land it now occupies. Through a technicality, the amendment was ruled illegal, but it is expected that the people will show the same enthusiasm for the Zoo when the matter comes up for a vote next time.

Arriving in San Diego at the exact hour that Colonel Lindbergh arrived in Paris, the largest shipment of animals and birds ever sent out of Australia came to the San Diego Zoo last spring. This shipment included many rare specimens, one of the smallest primates in the world, the "night ape," about as big as a chipmunk, magnificent tigers, rare black panthers, the comical cassowaries, deer, wallabies, kangaroos, and a host of brilliantly colored birds, some as rare and difficult to capture as they are beautiful to look at.

This shipment added enormously to the prestige of the Zoo and to the quality and extent of its exhibits. Now, in order to maintain its leadership, the Zoo has sent another expedition to the South Sea Islands, the East Indies and the Malay peninsula, whence will be brought back more birds and beasts, and some extensive efforts are to be made next year to breed these valuable birds in captivity.

The Zoo has also acquired during the past year the old emigrant clipper ship Star of India, formerly the Euterpe, which is being overhauled and converted into a permanent marine museum. The vessel was the gift of James W. Coffroth, and was brought into port from Oakland by the local naval reservists. Eventually the Star of India will have a permanent location on the waterfront as the central exhibit of a great aquarium.

The Society carried on an extensive and well-planned educational campaign, and is accordingly a valuable addition to the city school system as well as one of the most popular places in the city for whose who visit San Diego and for those who like to wander about the pathways and watch the animals from many lands.

January 7, 1928, San Diego Union, 1:4. Holdup uses red light on car in park; gets \$60; robber then drives from 6th and Laurel Streets in Real Estate man's auto.

January 7, 1928, San Diego Union, 5:5. Yorick Players do well in "Anything to Oblige" by Austin Adams.

January 9, 1928, San Diego Union, 1:8. Mrs. A. O. Nelson, San Diego policewoman, told a man rushing at her in Date Street Canyon to stop. He came on. She put a bullet through each of his right legs and shattered his right heel with three shots from her revolver.

January 21, 1928, San Diego Sun, 12:2. "Zoo" wrangle before Council; ouster move is started against O'Rourke employee.

Demand that Dr. W. H. Raymenton vacate the Nevada building in Balboa Park, part of which his is using for living quarters, was filed with the City Council today by Dr. Harry M. Wegeforth, president of the Zoological Society of San Diego.

Dr. Raymenton, an employee of P. J. O'Rourke, head of the O'Rourke Zoological Institute, occupies for building for carrying on experimental work with insects.

Last October, the park board passed a resolution asking Dr. Raymenton to vacate the premises within 90 days. More than this time has elapsed now the communication states and Dr. Raymenton is still in the building.

January 22, 1928, San Diego Evening Tribune, 1:5-8, 2:1-2. Citizens laud **Tribune's** suggestion for great Exposition here in 1942.

January 22, 1928, San Diego Union, 1:8, 2:4-5. Colonel Ira C. Copley purchases **Union** and **Tribune**.

January 22, 1928, San Diego Union, Classified, 2:3-4. Dr. Harry Wegeforth asked City Council to oust Dr. W. H. Raymenton from his headquarters in the old Nevada State Building yesterday.

January 22, 1928, San Diego Union, Classified, 2:5. Fine Arts Society gives out names of new officers.

January 22, 1928, San Diego Union, Development, 4:1-3. Balboa Park ranks seventh as play area, by F. J. Haskin; Philadelphia as largest of playgrounds in nation; Los Angeles is second..

January 24, 1928, San Diego Union, 15:2-3. Equestrian Club has supper in Balboa Park after drive.

January 25, 1928, San Diego Union, 7:2-3. Zoo's "Big Bertha" is useless as Dr. Raymenton digs in; City Council washes hands of O'Rourke squabble.

With Dr. W. H. Raymenton still holding the fort at the O'Rourke Zoological Institute building in the Zoological Gardens, Balboa Park, despite efforts of the Zoological Society to make him vacate, the City Council yesterday adopted a "hands off" policy and declared the O'Rourke forces and the Zoological Society forces can "fight it out."

Efforts of the Zoological Society to oust Dr. Raymenton, who is director of the O'Rourke Institute, fell flat before the council at yesterday afternoon's session, as did also the demand of O'Rourke's attorneys to know just "what is the legal status of the Zoological Society, under the charter, in Balboa Park." Nor was any attention paid by the council to a suggestion by O'Rourke's legal forces that the city reimburse Mr. and Mrs. O'Rourke for the money invested in the institute building.

Boiled down, facts in the case are briefly as follows:

At an investment of approximately \$50,000, Mr. and Mrs. P. F. O'Rourke sometime ago moved the old Nevada State building into the Zoological Gardens and extensively remodeled it for institute purposes.

Friction arose between the O'Rourke forces and the Zoo forces, and, after long controversies, a ruling finally was made by S. J. Higgins, then city attorney, that the building, because it was on Zoo grounds, belonged to the Zoological Society. The park commission, last October, acting on this opinion, adopted a resolution declaring that the building belongs to the Zoological Society and giving the O'Rourke organization 90 days in which to vacate.

This 90 days was up a few days ago, but Dr. W. H. Raymenton, director for O'Rourke, who has living quarters as well as offices in the building, has not vacated, and efforts of Dr. Harry Wegeforth, president of the Zoo, to dislodge him have proved futile. Dr. Wegeforth last Friday sent a letter to the City Council asking that the city attorney be instructed to oust Dr. Raymenton.

When this letter came before the council yesterday, Councilman McMullen immediately moved that the request be disregarded, declaring that the council has not business mixing up in the affair.

"Don't you wish to get into this fight?" demanded Mayor Clark.

"I do not!" declared McMullen. "Let 'em fight it out."

The council then voted to wash its hands of the entire affair.

Attorney Whelan, in his communication, outlined in some detail the expense the O'Rourkes have been in to give the children of the city an institute in Balboa park. The tenor of his communication indicated that court action may result if any attempt is made by the Zoological Society to oust Dr. Raymenton.

March 4, 1928, San Diego Union, 1:4, 2:4. Mayor Clark urges permanent structures for group in park.

Hoping to create a comprehensive system for the permanent location of institutions in the section of Balboa Park once used as the exposition grounds, Mayor Clark is working on a plan under which the various organizations now housed there may unite for their common good and establish some definite program of development.

Under this plan some of the institutions, whose purposes are similar, would be consolidated, and all would be allotted permanent sites for future development. Maps would be prepared showing the location of the various institutions as definitely agreed upon.

The old exposition buildings, which now shelter most of the organizations having displays and meeting places in the park, are rapidly going to decay, some faster than others. One by one these buildings must be replaced by permanent structures when the organizations occupying them are able in some way to finance the improvements. When permanent locations have been decided upon, it is believed that funds can be raised by public subscription and in other ways for the erection of new buildings.

Several wealthy citizens are said to be considering donating funds for new buildings, provided suitable sites are offered, just as A. S. Bridges financed the construction of the art museum which bears his name, and as John D. Spreckels built and presented the great Organ Pavilion to the city.

The old exposition buildings are mostly still beautiful from an exterior standpoint and look quite substantial to the casual observer, but their underpinning is becoming weakened and several of them are in bad condition. Further repairs to these buildings, which were erected as temporary, but which have stood for upward of a decade, would be expensive and far from enduring. Hence, the desire to arrange the various organizations under some sort of a board of control, providing proper sites for each, and eventually erecting suitable permanent structures.

May 16, 1928, San Diego Union, 1:1. San Diego yesterday approved school bond issues by majorities ranging from 4 to 1 to almost 6 to 1 with the State College proposal having the biggest majority; \$150,000 for new high school buildings.

May 18, 1928, Letter, Clinton G. Abbott, Director, San Diego Natural History Museum, to Board of Park Commissioners (C. Box 1, Board of Park Commissioners, Correspondence, San Diego Public Library; File: San Diego Society of Natural History, 1916-1929).

Gentlemen:

Pursuant to provision made by the City Council in the Supplemental Budget, May 14, to the amount of \$4,000 for the San Diego Natural History Museum during the remainder of the year 1928, we hereby request that an ordinance be prepared creating the following new positions under Civil Service requirements:

Curator of Birds and Mammals. Requirements: Ability to secure specimens of wild birds and mammals and to prepare them according to accepted museum standards; ability in osteological preparation; curatorial charge of the Museums' collection of birds and mammals, including labeling and indexing; knowledge of the sciences of ornithology and mammalogy, with ability to diagnose material collected and describe new species; experience in the maintenance of field camps and in packing; knowledge of all branches of photography.
Salary \$2,750 per annum.

Museum Custodian. Requirements: Complete janitorial care of museum building, including sweeping, cleaning glass, washing paint, etc.; ability as carpenter and cabinet maker in the manufacture of cases, etc.; familiarity with fumigation methods with Mercurial and Bisulphide solutions; familiarity with recharging of chemical fire extinguishers; ability as stereopticon operator, automobile driver, and of sufficient intelligence to be in complete charge of building on Sundays and holidays.
Salary \$1,329 per annum.

Librarian to Scientific Library. Requirements: Training in and knowledge of librarianship methods; familiarity with cataloging, shelf-system, typewriting, correspondence, and personal service required in a reference library; knowledge of foreign languages and familiarity with technical literature sufficient for the requirements of a library wholly devoted to the arts and sciences.
Salary, half time: \$900 per annum.

Curator of Plants. Requirements: Familiarity with the characters and identity of native and cultivated plants of Southern California; ability to prepare herbarium specimens; curatorial charge of the Museum's herbarium, including accessioning, indexing, etc.; collection and maintenance of a continuous exhibit of fresh wildflowers and plants; ability to conduct public walks for the study of plant life.
Salary, part time: \$840 per annum.

I am

Very truly yours,

(Signed) Clinton G. Abbott, Director.

May 29, 1928, San Diego Union, 1:4. Ejectment suit to settle row over Institute in Balboa Park; City Councilmen vote to start action against O'Rourke interests, following appeals.

Determined to settle definitely a controversy of long standing, the City Council yesterday by unanimous vote, instructed the city attorney to start proceedings for the ejectment of the O'Rourke Institute from the Zoological Gardens in Balboa Park.

The action was taken after an earnest appeal had been made to the Council by Gordon Gray, T. T. Mercier and other prominent members of the Zoological Society, who declared that such a step is necessary or the work, development and progress of the Zoo will be retarded. Councilman Frank W. Seifert made the motion to start the ejectment proceedings and Councilman Louis C. Maire seconded the motion.

It was reported, although no formal announcement was made, that Dr. Harry M. Wegeforth, founder and guiding spirit of the Zoo, had tendered his resignation to the Zoological Society because of the previous failure of municipal officials to evict the O'Rourke forces, but that the Society had refused to accept his resignation. Directors of the Society paid many high compliments to Dr. Wegeforth when they addressed the Council yesterday.

In urging the removal of the O'Rourke organization from the Zoo grounds, A. T. Mercier said, "With conditions as they are, we meet obstacles every time we attempt to make a step forward."

"We are all proud of the Zoo," said Gordon Gray, "and of Dr. Wegeforth, the man who made it possible. Thousands of children and adults enjoy this great attraction and anything that interferes with its success is working against the best interests of the city. Dr. Wegeforth has given more time to the work than any other citizen would have given. This O'Rourke building, the old Nevada building, is on ground set aside for the Zoological Society. A resolution passed by the Park Commission turning the building over to the Zoological Society has not been obeyed by Mr. O'Rourke. I cannot see that the O'Rourke Institute has any standing in the face of the city attorney's opinion and the Park Commissioner's action."

"It has reached a point where it is going to be either the Zoo or the O'Rourke Institute," declared Mayor Clark.

Councilman Dowell remarked that O'Rourke had announced that he wanted to be heard before any action was taken by the council.

"Our only remedy is to get the O'Rourke Institute out," replied Mr. Gray. "I don't see that O'Rourke is entitled to any more consideration in this matter."

Dowell wanted to lay the entire matter over until Councilman Bruschi returns from the east, but Gray asserted that the council already had delayed its action too long.

"I am informed that the O'Rourke forces are circulating petitions demanding that admission free to the Zoo be done away with," said Gray. "Children and men in service uniforms, you know, are admitted free."

Stanley Hale, presumably representing the O'Rourke forces, told the council he had been asked to request that no action be taken until Attorney Whalen, representing the Institute's interest, returns from a trip out of the city. Hale said that, as he understood it, petitions being circulated by O'Rourke do not ask that the admission fee be abolished.

“What difference does it make if Whalen is here or not,” asked Mayor Clark. “O’Rourke told me, and so did his attorney, that they would get out when the city put them out and not before. I cannot see any chance to compromise this matter.”

“Investigations have convinced me that proceedings for the ejectment of the O’Rourke forces are necessary for the best interests of our Zoological Gardens,” said Councilman Maire. “At first, I thought it might be only a personal quarrel, but I have been convinced to the contrary.”

The history of the case is briefly this:

Several years ago, Mr. and Mrs. P. J. O’Rourke, at considerable expense, moved the old Nevada building from its exposition site in the park to the Zoological grounds and fitted it up as an institute. For a time things went well, but later disagreements arose between O’Rourke and the Zoological Society, particularly between O’Rourke and Dr. Wegeforth, president of the society.

The Zoological Society decided to take over the work of the institute and the city attorney ruled that the building belonged to the park, not to O’Rourke, and was subject to the wishes of the Park Commission. The Commission then ordered it turned over to the Zoo. Employees of O’Rourke refused to vacate and Dr. Wegeforth appealed to the Council to eject them. The Council at that time refused to act.

Further appeals were made recently. Mayor Clark, announcing that he had been informed that Dr. Wegeforth would throw up the Zoo management unless the Council took action. The Council then asked for a written report on the activities of the O’Rourke Institute, which has not been filed. Instead, petitions favoring the Institute have been in circulation in various parts of the city. About a week ago it was announced that Dr. Wegeforth had sent in his resignation, but the directors of the Society, instead of accepting it, decided on one last appeal to the Council, which yesterday had the desired effect.

May 29, 1928, San Diego Union, 8:1-2. City to honor dead of all wars tomorrow; four-division parade; services at Organ Pavilion.

June 17, 1928, San Diego Union, 5:4-6. Zoological Institute founder tells of fight to maintain children's center work in park; San Diego woman has spent \$50,000 on building City Council would take away, by Mrs. P. F. O'Rourke., honorary president of the Zoological Institute of San Diego.

"Do you know what is the real trouble between the Zoo and the O'Rourke Zoological Institute?" is a question asked by many citizens of San Diego.

I will tell you something of this affair. Several years ago I was working for the Children's Center in a building in the pepper grove. It was taken over by the Girl Scouts as a headquarters building. In New York they have a similar one. At that time Dr. W. H. Raymenton, then a director in the Zoological Society and the educator in the Zoo, was conducting classes and lectures in the Standard Oil building, a building left over from the exposition.

Knowing of my interest in children and my various activities in their behalf, he asked me for the money to move the building across the street to the Zoo grounds and reconstruct it, whereby it should be used in part for a Children's Center and in part for educational purposes, similar to that now carried on by the O'Rourke Zoological institute.

Dr. Wegeforth, president of the Zoo, joined in the request and persuaded me to move the building onto the Zoo grounds, with the understanding that my purposes were to be carried out. Plans were drawn and published in the newspapers. In **The Union** of May 18, 1923, a ground plan shows an auditorium and moving picture room, library, exhibition room, stage, dark room for photography, and two rooms for offices.

Dr. Wegeforth came to me at various times suggesting various modifications. He asked for one end of the building for a concession for ice cream cones and refreshments. To this I consented, but the entrance to the Zoo grounds was to be outside the building. When I went to view the building, I found he had taken three rooms for offices and ticket office, with turnstiles admitting visitors through the building into the Zoo. In all the rest of the building was installed a lunch counter and kitchen, just as it is now. It was done and so I submitted to it, with much dissatisfaction. It had cost me about \$7,000.

Dr. Raymenton was naturally very much disturbed in having the education plans of the Junior Zoological Society for children so arbitrarily thwarted, and expressed his feelings most vigorously to Dr. Wegeforth and me.

I told him to be patient and I might be able to do much better for the cause. I had become very much interested in his educational work for the children, which has received the written indorsements of our leading educators at home and abroad.

For more than 20 years he was the president and director of the Natural History Society of Worcester, Mass., and has a score of letters testifying to the great value of his educational work for the children of that city, written by its representative citizens and educators.

His educational plans for the children appealed to me. I was about to go east. On my return in the fall, I again discussed with Dr. Raymenton a Children's Center and an educational institution.

We learned that the fine Nevada building had been sold to the wreckers and was to be destroyed. I decided to buy it back from the wreckers and endeavor to carry out my original plan. I bought the building and we planned to move it down to the pepper grove next to the Girl Scout headquarters. Various sites were discussed. Dr. Wegeforth came into the discussion. He was very desirous and insistent that the building should be moved onto the Zoo grounds, and that the two organizations should cooperate. This I did not want to do, but he promised hearty cooperation with our educational plans and said he would fence off the building from the Zoo grounds. This he did, but he did not cooperate with our educational plans.

Owing to our experience with Dr. Wegeforth in the Standard Oil Building, Mr. O'Rourke and I decided we would never lost control of the building. For convenience, Dr. Wegeforth volunteered to act as my agent and purchased the building with the check I gave him, but all subsequent bills for the reconstruction of the building were paid directly to the subcontractors. Any bill that was sent to the Zoological Society was returned to be directed to me personally. The purchase, removal, reconstruction and equipment of this building has cost me more than \$50,000.

Dr. Wegeforth professed cooperation, but there were many broken promises and utter disregard of my wishes. The educational work was hampered in many ways. We had to abandon the idea of future cooperation with Dr. Wegeforth.

After consulting various influential citizens, we decided to incorporate the Junior Zoological Society under the name of the O'Rourke Zoological Institute of San Diego, a distinct legal entity with a separate board of directors, an advisory board, and an educational committee of representative citizens.

Neither Mr. O'Rourke nor myself ever intended to present nor did present the building in question to the San Diego Zoological Society. As indicated by the bronze tablets placed on the building, it was dedicated by Mr. O'Rourke and myself to the little children of San Diego.

It was the intention of Mr. O'Rourke and myself and was so understood by Dr. Wegeforth that the building in question was to be used by and equipped for an organization separate and distinct from the San Diego Zoological Society. It has, however, always been our wish and expectation that the two organizations would be able to work in harmony and in conjunction with one another, and the two organizations would have done so, if Dr. Wegeforth had not almost immediately after our establishment in the building, tried to destroy the institute.

The City Council, listening to only one side of the controversy, presented by the attorney of the Zoological Society, decided to evict the O'Rourke Zoological Institute from this building so that the courts may decide on a technical point as to the ownership of the building.

This eliminates wholly the equity in the building and justice toward citizens who have spent generously and patiently of their time and money in spite of the many handicaps, annoyances and obstacles, in carrying out a plan for the education and betterment of the children of San Diego.

If the institute is evicted from this building, do you think it will be conducive to inspiring other public-spirited citizens to contribute money for a like purpose?

We have asked for no help from the city. We have an excellent curriculum. We have many letters from parents, visitors and the leading educators of the city as to the educational value of the work at the institution for the children.

The work has been carried on and financed wholly independent of the taxpayers. This I believe to be the only institution of its kind in the city that has not asked aid from the taxpayers. We have done much and have only asked for the privilege of continuing and extending this work for the children of San Diego.

This week from San Francisco comes the notice that Frank Forrest Gander, instructor in the O'Rourke Zoological Institute, has won the adult prize of \$100 in a statewide contest for the naming of a state bird and Jack Binkley, age 13, a student in the institute, the children's prize of \$50. The friends of the institute have a right to feel proud of the record it has made in the last three years as an educational institution in our city.

June 17, 1928, San Diego Union, 20:4-6. Zoo python consents to bath but will take meal from sausage grinder as usual today; huge serpent will be stuffed in public this afternoon after sun bath on lawn.

June 24, 1928, San Diego Union, Classified, 3:1-4. Board of Directors of Zoological Society replies to Mrs. O'Rourke in Institute row; states its side of controversy over rights to Nevada Building in park.

Submitted by the board of directors of the zoological society: A. T. Mercier, vice president; D. D. Wray, secretary; F. C. Spalding, treasurer; Gordon Gray.

The question being asked by so many interested citizens, "What is the trouble between the zoo and the O'Rourke Zoological Institute?" was so ably and fully answered in the article beginning with these words appearing under the name of Mrs. P. F. O'Rourke in **The San Diego Union** of June 17, that it only remains for us to reiterate some of the points which she so clearly set forth and upon which the Zoological Society of San Diego bases both its moral and legal claims to the Nevada Building, and upon which the officials of the City of San Diego have seen fit to order the return of the building to the Zoological Society.

As Mrs. O'Rourke states, it was through the work of "Dr. Raymenton, a director of the Zoological Society and educator in the zoo," that she became interested in the nature work that the society was already doing among the children of San Diego. To head this work Dr. Raymenton has been appointed by the directors of the Zoological Society, and under its auspices, he was "conducting classes and lectures in the

Standard Oil Building, a building left over from the exposition.” This same building had been offered to the Zoological Society several times for whatever use could be made of it, the first offer being contained in a letter from the Board of Park Commissioners, dated May 15, 1917, offering the use of the building to the Society as soon as it was vacated by the 21st Infantry. Dr. Raymenton in dealing with Mrs. O’Rourke, therefore, as she states, until 1926 was acting in the capacity of a director and educator of the Zoological Society and accepted her gifts as an agent of the Society. The work was one of the Society’s activities, widely advertised by him as such and he could not, acting in good faith with the Society, direct any of its work into foreign channels without the consent of the officials of the Society.

When he announced Mrs. O’Rourke’s intention of purchasing and restoring the State of Nevada building for the educational work at a meeting of the Board of Directors of the Zoological Society on September 18, 1923, Mr. O’Rourke moved that Dr. Raymenton, then a member of the Board of Directors, be made manager of the Junior Zoo and Children’s Center under “the direction and control of this Board.” This motion was seconded by Mr. Burnham and unanimously carried. Therefore, when Dr. Raymenton became “much disturbed by having the educational plans of the Junior Zoological Society thwarted” by Dr. Wegeforth, it would seem that the proper place to air such feeling would have been to the Board of Directors to which he was officially responsible and of which both he and Mr. O’Rourke were members; failing to agree with the body’s plans and directions, the honorable and natural course would have been to have resigned from an organization with which he was so entirely out of sympathy before starting another.

On December 17, 1925, however, Dr. Raymenton, feeling thus “thwarted” by Dr. Wegeforth, “expressed his feelings most vigorously” by the following letter:

December 17, 1925

“Dear Dr. Wegeforth:

“I have been working along the lines that you suggested in your letter of December 7, and I think you will be pleased with what I have done in the interests of the Zoological Society, the Institute and the educational part of our work.

“You say that you feel I should be ‘one of the watch dogs of our interests, and the interest of the educational end of it.’ That is exactly what it has been my aim to do. If we can carry out the educational plans that I have in view, and of which I have the written indorsement of some of the foremost educators in America, I shall feel that the time and strength I have put into the cause has been well worth while and the result will rebound greatly to the success of your administration in making the Zoo one of the great educational assets of the City of San Diego.

“I am going out of the city for the day, but I shall hope to see you again and go over the situation in the interest of bigg and better work.

Sincerely yours,

(Signed) “W. H. Raymenton.”

Hardly a letter that would indicate much mental disturbance or dissatisfaction with the conduct of the person to whom it was addressed.

“After consulting various influential citizens,” Mrs. O’Rourke decided, in 1926, “to incorporate the Junior Zoological Society under the name of ‘O’Rourke Zoological Institute.’” Rather a peculiar decision for a private individual to make in regard to a branch of a society over which she had been given no jurisdiction; The Junior Zoological Society was started January 23, 1917, by Dr. Fred Baker and the late W. H. Porterfield, upon which date the by-laws being prepared for the newly organized Zoological Society were ordered changed to include such an organization. As adopted by the Society in 1917, the by-laws contained three sections of Article 12 which provide for the Junior Zoological Society and the status of its members as part of the society. Upon whose authority and by what right Mrs. O’Rourke and these influential citizens

could assume control of any part of the Society and convert it into a private corporation, in 1926, she fails to make clear.

Having moved the Nevada Building, already in Balboa Park, into the Zoological Garden, to quote again, "Mr. O'Rourke and I decided that we would never lose control of this building." To just what extent are Mr. and Mrs. O'Rourke superior to the authority of the state of California and the charter of the City of San Diego? A building placed in the park, except under an act of the legislature of the state of California providing for the original ownership of the buildings used for the exposition, becomes ipso facto, the property of the City of San Diego for park purposes. This building was moved onto territory, controlled, through agreement with the Board of Park Commissioners, by the Zoological Society of San Diego, for the purpose of maintaining therein a zoological exhibit. Therefore, according to the opinion of the city attorney, 'since the Board of Park Commissioners was acting within its rights in setting aside territory for the Zoological Society to maintain such an exhibit, and since a most creditable exhibit is being maintained, and since the agreement is still in force, it includes the control, management and possession of the old Nevada Building, which has been moved onto this territory with the official consent of the Park Board. So it clearly appears that the Board of Park Commissioners and city officials have agreed that the Zoological Society, and not Mr. and Mrs. O'Rourke, has the right to determine the control, management and occupancy of the Nevada Building.

Although the active management of the Zoological Garden has been invested in Dr. Wegeforth, and to that extent he has appeared to be the person most concerned in this controversy, and through his intense interest in the development of the zoo he has made most of the overtures toward reconciliation, it is a matter of the utmost concern to the entire membership of the Society. The Board of Directors of the Zoological Society has unanimously agreed upon all action take in regard to this building. So concerned has the Board of Directors been at the disruption of so vital a part of the Society that the matter has been brought up at nearly every Board meeting for discussion beginning with the spring of 1926. At this time, Mr. O'Rourke was one of the Board of Directors and vice president of the Society, taking an active part in the discussions and clearly stating his opposition to any break in the Society and assuring the Board of his efforts to restore harmony and his personal regret at the rupture fostered by Dr. Raymenton.

Mrs. O'Rourke states: "It has, however, always been our wish and expectation that the two organizations would be able to work in harmony and in conjunction with each other, and the two organizations would have done so if Dr. Wegeforth had not almost immediately after our establishment (apparently meaning the Zoological Society's pre-empted Junior Department) in the building tried to destroy the Institute." The following letter might indicate the direction of Dr. Wegeforth's efforts.

March 1, 1926

Mrs. Patrick O'Rourke
2900 Park Avenue
San Diego, California

"Dear Mrs. O'Rourke:

"The situation which has arisen in regard to the O'Rourke Institute and its relation to the Zoological Society has caused some of the directors to request me to call a special meeting to consider the matter.

"Personally, I am sure your wishes are not to hurt the Zoo but to foster its work and I know that if you are in full possession of all the facts we can rely upon your cooperation. I know that you, like ourselves, seek only what is best for the interest of the Zoo, the park and the people of San Diego.

"I wish you to feel that you can call upon me at any time and I personally appreciate everything that you have done. If there is any information that I can give you to help clarify the situation I will be glad to do so.

"Yours very sincerely,

“Harry M. Wegeforth, M. D.
“President, Zoological Society of San Diego.”

To this letter Dr. Wegeforth received the following replay:

2900 Park Avenue
March 1st, 1926.

“My dear Dr.

“Your letter dated March 1, I received in my mail this morning. I will refer it to the Board of Directors of the O’Rourke Zoological Institute for consideration. Expecting excellent cooperation and harmony, I am

“Very sincerely yours,
(Signed) “Maude O’Rourke

What consideration this matter received: when, or if, the Board of Directors of the O’Rourke Zoological Institute met, and what the results of such consideration were, was never communicated to the directors of the Zoological Society of San Diego nor to its president. Perhaps, Mrs. O’Rourke’s efforts and wishes for harmony and cooperation met with disaster from within her own organization --- the article seems a little indefinite upon this point.

Every zoological park has depended largely for its initial development upon donations made by public-spirited citizens, interested in see such public enterprises prosper. Money donated for such purposes, however, does not vest the control of the grotto or building in the individual making the donation; established custom and precedence in such matters precludes the possibility. Nor have any other of the persons making these contributions sought to control or disrupt the organization because of their financial assistance.

To quote again, “Neither Mr. O’Rourke or myself ever intended or did present the building in question to the Zoological Society.” But at the Board of Directors meeting which we have mentioned before, on September 18, 1923, Mr. O’Rourke allowed himself to be appointed by the president of the Zoological Society on a committee to take care of the removal and restoration of the Nevada Building, and throughout the period of reconstruction, was thus acting in the capacity of agent or representative of the Zoological Society. “As indicated by the bronze tablets placed on the building which “dedicated to the Children of San Diego” and is maintained and developed for their education and pleasure by the Zoological Society of San Diego, as set forth in the by-laws adopted in 1917, reads similarly.

Because the Zoological Society appreciates so fully and wishes to acknowledge in a way that will be perpetually before the public, the generosity of those who have contributed so generously of their means to its support and development, it has from the beginning chosen to mark every gift to the Society for the children of San Diego with a permanent and dignified bronze plaque, in addition to publication in the newspapers. Nearly every cage bears this uniform tablet, naming someone who has become interested in the work being done through the solicitation of some member or officer of the Society, principally Dr. Wegeforth, and who has contributed funds toward the maintenance and development of the part of the work in which they are most interested for the good of the whole. The gift of Mr. and Mrs. O’Rourke was given the same recognition in the same spirit that all others have been received, and it is “dedicated to the children of San Diego” with the rest of the Zoological Garden by the Zoological Society of San Diego.

June 24, 1928, San Diego Union, Classified, 5:6-7. Rocky Mountain sheep at Zoo increased to five.

June 25, 1928, Letter, E. N. Jones, president of the Board of Park Commissioners, to Colonel Milton A. McRae, president Fine Arts Society of San Diego (C. Box 1, Board of Park Commissioners Correspondence, San Diego Public Library; File: Fine Arts Society, 1922-1930).

It is with sincere regret that I feel compelled to inform you that, after a careful and detailed examination of our budget estimates for the ensuing year, I do not see my way clear to increase the budget estimate for the Fine Arts Gallery beyond the sum of \$20,000.

June 30, 1928, San Diego Union, 7:2-3. Council creates position of City Playground head; takes position out of Civil Service; job will probably go to J. Kearns.

July 1, 1928, San Diego Union, 1:4. Naval Hospital to concentrate training school activities here; Commander Daniel Hunt assigned to command local unit scheduled to start work in new building August 1; Navy will abandon present training school at Mare Island; building to be used for training school has been erected at the Hospital at a cost of \$136,000; it is 220 feet long and 40 feet wide with two wings, each 100 feet long and 40 feet wide; has four floors.

July 1, 1928, San Diego Union, 15:1. New Civic Symphony Orchestra to give first concert today at Organ Pavilion; Nine Marcelli will conduct opening program starting at 4:45 o'clock.

July 1, 1928, San Diego Union, Classified, 1:3-6. Airplane and speedboat used to capture 70 white pelicans on Salton Sea for San Diego Zoological Society (illus.).

July 1, 1928, San Diego Union, Development, 1:1. William H. Wheeler, architect, has drawn up preliminary plans and submitted a design to the Chamber of Commerce for a municipal auditorium and convention hall; no site has been selected.

July 2, 1928, San Diego Union, 5:1. Applause greets Civic Symphony's first concert.

July 3, 1928, San Diego Union, 1:2. Navy expends \$1,304,000 on buildings here during last 12 months, including seven buildings at the Naval Hospital.

July 8, 1928, San Diego Union, 9:1-3. San Diego Zoo asks cooperation of public in halting vandalism, cruelty to animals, by Belle J. Benchley, executive secretary.

July 8, 1928, San Diego Union, 19:3-5. Anna O. Shepard, curator of anthropology at San Diego Museum, returns with information on Mimbres tribes of New Mexico Indians (illus.).

July 8, 1928, San Diego Union, Classified, 4:2-5. Civic Orchestra to give second concert at park today, by Wallace Moody.

July 13, 1928, San Diego Union, 1:4, 2:3. Park Board cuts \$164,170; responds to City's request by reducing estimate of \$388,170 to \$224,000; largest item lopped off was \$45,000 for municipal golf course; Park Commissioners Colonel E. N. Jones and George W. Marston, Superintendent John G. Morley and Executive Secretary A. H. Hill attended yesterday afternoon's session; estimates made for institutions in park were cut 20 percent while operating and maintenance budget was cut about the same amount.

July 13, 1928, San Diego Union, 2:3. Park Budget Cuts: It was decided to ask for \$29,280 for the Zoo; \$16,000 for the Art Museum; \$9,600 for the San Diego Museum; \$6,000 for Natural History Museum; and \$2,580 for Organ Pavilion.

July 15, 1928, San Diego Union, 3:3. Miss Ruth Haroldson, violinist, and her sister Miss Gail Haroldson, pianist, pleased audience at Organ Pavilion in free concert yesterday afternoon through the courtesy of the State College summer school.

July 15, 1928, San Diego Union, 13:3-5. World's youngest trained lion is to be placed on exhibition at Zoological Gardens today; animal, adopted by Mrs. Johnson, wife of Zoo foreman, is fed on cow's milk and olive oil (illus.).

July 15, 1928, San Diego Union, 14:6. Dr. H. J. Stewart goes on vacation.

July 15, 1928, San Diego Union, 18:1-4. Annual report of directors outlines progress and efficiency of Children's Home.

July 16, 1928, San Diego Union, 5:1-2. Civic Orchestra wins hearty applause for concert at Organ Pavilion yesterday, by Wallace Moody.

July 16, 1928, San Diego Union, 5:4. Archers hold shoot at 6th and Laurel Streets.

July 22, 1928, San Diego Union, 8:1-4. Pioneer from New England credited with saving Balboa Park for San Diego, by Daniel Cleveland.

July 22, 1928, San Diego Union, 11:1. Russell Keeney, civic orchestra violinist, to play solo this afternoon at Organ Pavilion.

July 22, 1928, San Diego Union, 12:4. Skeleton found June 27 in Balboa Park has been identified as Walter Williams; foul play suspected.

July 23, 1928, San Diego Union, 3:4-5. Great ovation given City's Civic Orchestra, by Wallace Moody.

July 23, 1928, San Diego Union, 10:3-4. Wedding at St. Francis Chapel in Balboa Park.

July 26, 1928, San Diego Union, 2:2-3. Brush fire blackens 30 acres in Powder House Canyon in Balboa Park yesterday afternoon.

July 27, 1928, San Diego Union, 1:3, 2:1. City planners want uniform color scheme in port buildings.

July 27, 1928, San Diego Union, 1:6. Radio broadcast of Balboa Park organ to begin August 10; KFSD granted permit after guaranteeing park of fund for service.

July 27, 1928, San Diego Union, 5:2. Skeleton found on municipal golf course June 27 listed among unsolved mystery cases; police fail to identify remains.

July 27, 1928, San Diego Union, 5:6. William Templeton Johnson to quit as member of Park Board.

July 28, 1928, San Diego Union, 3:1. Governor C. C. Young speaks at opening of Pacific Southwest Exposition in Long Beach.

July 28, 1928, San Diego Union, 20:1. Believe park body is that of E. J. Marks; hinted at suicide.

July 29, 1928, San Diego Union, 10:2-4. New "three-room bungalow courts" ready for occupancy of primates at local Zoo; Mischief-proof cages of flexible wire have latest built-in features.

The three-room bungalow courts, which have been under construction for the last few months at the Zoological Garden, are now ready for occupancy. This is a model bungalow court, designed for the exclusive use of primates, each unit containing a large living room with latest designs in built-in features, a

dining nook and upstairs sleeping room. There is no kitchen, as the meals are furnished and served without any additional charge. Children permitted. No dogs allowed.

So might read an advertisement for the new series of cages in the northeast corner of the primate cage, which has been recently remodeled. These are cages which have no equal and have been made as nearly mischief proof as it is possible to construct them. Soon after the monkey cage group was constructed the management of the zoo realized that it has made a grave mistake to construct them of anything but flexible wire. All of the monkeys, but especially the large baboons, began at once to work upon the wire, shaking, pushing and pulling with all their strength. Any rigid wire will break under such strenuous abuse so it was not long before the work of patching and repairing had to begin.

It was not until this year, however, that the society could afford the necessary funds to replace all of this wire, and it was urgent that other improvements in construction be made at the same time. These new cages are built so that the animals are fed in the back of the cages in the lower compartment, which also is enclosed in heavy chain link wire.

The sleeping quarters, which may be opened to the sun, are built above this outdoor eating room and the entire center of the yard is cemented in order that it may be cleaned by hydraulic pressure. In these cages you will see some of the monkeys you have been missing of late.

July 29, 1928, San Diego Union, 14:1. Nature classes hear address at Zoo Institute. At a joint meeting of the boys' and girls' nature classes of the O'Rourke Institute yesterday, W. B. Wright of the Natural History Museum staff talked to the students about butterflies, answering their questions and telling them many interesting things. . . . His talk was illustrated with specimens from the study collection of the O'Rourke Institute.

After Mr. Wright's talk, Frank P. Gander, who has charge of the free nature classes held daily at the O'Rourke Institute, conducted a contest between the boys and girls. This was to determine which of the classes was the most expert in identifying the natural history specimens in the study collection.

The free nature classes of the Institute are open to all the boys and girls of the city who are interested in nature, and are held daily, except Saturday.

July 31, 1928, San Diego Union, 12:3. Art body seeks cent tax-levy on each \$100 valuation from County Supervisors for budget next year; plans outlined for free classes Saturday morning for creative work of County School children.

August 26, 1928, San Diego Union, 18:3. Society of Our lady of Perpetual Help will hold a bazaar at American Legion Hall, Balboa Park, Saturday and Sunday, September 1 and 2.

August 26, 1928, San Diego Union, 10th Annual County Fair Section

2:1-2. Large exhibit of pigeons will be featured at Fair.

2:3-5. 10th annual San Diego Fair promises best attractions in County history, by Felix Landis, manager of Fair.

2:5. Electric washer to be featured at County Fair.

5:1. Many take space for exhibits.

5:2-3. Fireworks display to portray history of California for County Fair visitors (illus.).

6:1. Plenty parking spaces allowed for Fair guests.

August 27, 1928, San Diego Union, 1:3-4. Admission to County Fair will not admit bearer to Zoo.

Starting tomorrow the County Fair will be held in Balboa Park directly north of the main entrance of the Zoological Garden. Persons who wish to go to the zoo, but are not interested in seeing the fair, can enter by this gate without paying the admission fee into the fair grounds, as the gate is out of the fair territory.

The price of admission to the zoo through the south gate does not include the entrance to the fair, and for the five days that the fair is in session the exit gates opening into the fair grounds will be closed, unless proper credentials admitting the bearer to the fair are shown. This precaution is taken so the fair association will not suffer financially from the arrangement. Extra pains will be taken to have a bus available for those who go to the zoo by the south gate. A temporary station will be arranged at the foot of the hill and regular trips will be made.

August 28, 1928, San Diego Union, 16:2-3. County Fair and Horse Show to open tonight with parade; history of state will be presented in fireworks at 8 o'clock.

August 29, 1928, San Diego Union, 8:1-2. Attendance records broken at County Fair opening.

August 30, 1928, San Diego Union, 10:1. El Cajon wins community sweepstakes at Fair.

August 31, 1928, San Diego Union, 1:4-5. Buildings in village museum planned by Henry Ford to portray historical periods in England and United States.

August 31, 1928, San Diego Union, 8:3-4. Park Board opposes new road in Torrey Pines; would mar scenic beauty of natural preserve.

August 31, 1928, San Diego Union, 8:6-7. Women to hurl rolling pins in contest at Fair today.

August 31, 1928, San Diego Union, 8:8. Board will ask Council for more park funds.

August 31, 1928, San Diego Union, 22:5. George W. Marston urges City to preserve beauty of Sunset Cliffs.

September 1, 1928, San Diego Union, 1:5. Howard S. Reed returned from Siberia and Siam with skulls and skins of tigers for California museums.

September 1, 1928, San Diego Union, Classified, 13:2-3. Many features will make last program of County Fair.

With all attendance records shattered, the county fair and horse show will close this evening at 11, with the largest array of live stock, the finest horse show yet seen, the largest amount of industrial exhibits and a better showing of county produce than ever before.

The attendance record fell Friday night, and it is estimated that a 35 percent gain will be made this year. The entire showing this season will set a mark hard to compete with next year, but fair officials say that with the interest shown this year, next year will see many improvements. More room for exhibits and live stock will be needed next year, and Felix Landis says that plans will be made to enlarge the grandstand for the horse show.

Today the fair offers its final program of amusements and entertainment. At 2 p.m., in the arena, the Camp Hearn troop, which has been highly entertaining all week, will present its final efforts. With expert horsemanship and exceedingly fine animals, this company of man has won the praise of the crowds each day.

Following the exhibition at 3:30, the Robin Hood Archery Club will present a contest of skill and daring. The club will be out in full force and Joseph Jessop, president of the club, assures the crowd of a demonstration well worth while. The bowmen will be so placed in the arena that all parts of the grandstand will be good vantage points for viewing the targets.

The last event of the horse show will take place in the arena at 8. At 8:30 free dancing will be in order and Wonderlich's orchestra will furnish the music.

September 2, 1928, San Diego Union, 12:2-7. Kenneth Gardner makes plans for completion of city's major thoroughfares (illus.).

October 26, 1928, Letter, A. S. Hill, Executive Secretary, Park Department, to Mr. Frank W. Seifert, City Councilman, San Diego, Calif.

Dear Mr. Seifert:

In compliance with your request for a statement in the matter of construction of Bridle Paths in Balboa Park, I submit the following:

One and three-quarter miles of Bridle Paths were constructed at a total cost of \$5,482.99 --- which included engineering services, labor and material for grading, drainage system, etc.

Funds for the work were supplied as follows:

Appropriated from city funds	\$2,000.00
Donation by Cabrillo Riding and Driving Association	<u>1,809.00</u>
Total	\$3,809.00

An appropriation of \$4,000.00 for the work was provided in the Park Department Budget for the Fiscal Year 1928; but owing to the change in Fiscal Year, only half of that amount was available to June 30th, at which time the new Fiscal Year became effective. It will be seen, however, that the Park Department actually spent \$3,673.99 in this construction after using the entire donation of the Riding and Driving Association.

Yours very truly,

(Signed) A. S. Hill
Executive Secretary,
Park Department.

October 28, 1928, San Diego Union, Development, 1:1. Torrey Pines, Mesa Artery and Pershing Drive plans studied; early start promised on Seifert's plan to construct dam in Power House Canyon and another lower down in the park. Hydraulic engineer H. N. Savage studying situation.

October 29, 1928, San Diego Union, 1:4. Mme. Schumann-Heink will sell Grossmont place; proceeds to go to World War Veterans of Minnesota.

October 30, 1928, San Diego Union, 5:2. Louis Algren, Fire Department Chief, several months ago recommended a reservoir be constructed in Balboa Park to supply water for emergency; D. L. Bissell, deputy city engineer, W. W. Albin, water superintendent, and Algren yesterday made a survey of proposed Switzer Canyon dam site in park; will hold 100,000,000 gallons at a cost of \$275,000.

October 31, 1928, San Diego Union, 8:3. Yorick Players initial date for season changed from November 3 to December 8.

November 11, 1928, San Diego Union, 1:7-8. Balboa Park Armistice Day program to start at 10:30 a.m. at Organ Pavilion.

November 15, 1928, San Diego Union, 9:5. At a meeting Tuesday night, Committees representing Improvement Associations indorsed Councilman Frank W. Seifert's plan for controlling flood waters of Switzer Canyon by building a dam at the upper end of Balboa Park.

November 25, 1928, San Diego Union, Development, 1:1, 2:3. Park Improvements outlined.

Complete transformation of the northeastern part of Balboa Park from its present wild state to one of the most attractive areas in San Diego's big playground is part of the program of the Park Commission for the coming year. All that has held this work back has been the temporary shortage of funds due to the changing of the fiscal year and consolidation of the city and county tax agencies.

Revaluation of the property in San Diego will show, it is believed, a much higher valuation than in the past and consequently more liberal appropriations for public work is looked for by officials.

It is the park commissioners' belief that the residents bordering on the northeastern part of the park are entitled to the improvements that have been outlined for the coming year. Landscape architects have been busy for months in the administration building on plans for park development which it is expected will show greater results than commensurate with the money expended over a large area.

The program for the northeastern area includes the laying out of new walks and drives, setting out of shrubbery and plants and the planting of lawns. The undulating surface of the land with its hills and shallow gulches, together with the numerous level spaces, affords opportunity for the work of the landscape architect, and when the plans are carried out it will not be many years before the northeastern section of the park will rival in beauty the older areas which have won praise from the thousands of visitors to Balboa Park since the days of the exposition.

Adding to the beauty of the extensive garden area south of the Organ Pavilion, it is the plan of the Commissioners to work in cooperation with the Rosarians of the United States in establishing here a rose test garden similar to those in France and England. This can be accomplished if the proper spirit is shown, said J. G. Morley, park superintendent, recently, and San Diego may have a rose garden, which for rarity and beauty of culture, will not have an equal anywhere on the Pacific coast.

It is the anticipation of the Park Commission to improve the municipal golf course along the plans designed for that work a year ago when it was proposed that bonds be issued to provide the necessary funds. The bond issue having been defeated, the Commission hopes to accomplish the improvement by other means which it is believed will make the golf course self-supporting. It is the desire of the Commission to provide a course that will add to the generally high standing of Balboa Park among the great parks of the country.

Sunset Cliffs come in for a generous share in the improvement program. IT is planned to improve the parking places along the top of the cliffs and to set out gardens and shrubbery, thus combining a view of sea and landscape that will be unequaled on the Pacific coast.

Provision has been made in the improvement program for the construction of several miles of bridal paths, made possible through budget and appropriation by the Silver Gate Riding and Driving Association. The bridal paths, of which already there are many miles, will penetrate parts of the park which heretofore have been accessible only by trails and never by automobile.

Plans which have been under consideration for the improvement of Torrey Pine Park soon will be carried into effect, according to Morley. While having in mind the preservation of the natural beauties of the Torrey Pines park, covering approximately 800 acres of undulating land, the landscape artist has not lost sight of the fact that its beauties can best be brought out by a system of trails and drives.

The plan of development includes a scenic drive along the cliffs as near to the coast line as possible. At an elevation of several hundred feet above sea level, this drive will give a magnificent view of both the ocean on the west and the mountains of the back country on the east. Trails and bridal paths will carry visitors to many interesting view points which have become famous for the magnificent growth of *pinus torreyana*, a pine tree found only in this vicinity.

Work in the Old Town Park, which was suspended several weeks ago because of shortage of funds, has been resumed and probably will be finished before spring. This improvement includes the installation of a sprinkling system and a new landscape effect. New lawns are being planted and shrubbery and trees are being set out.

Other park work included in the general program is improvement of De la Cruz Park in East San Diego; beautification of the waterfront from Hotel Casa Manana up the shore and restoration of the caves at La Jolla. A survey has been made of Hermosa Park, but no estimate of the cost has yet been made. Mountain View Park, at Boundary and Woolman Streets, is to be improved when funds are available, and the lawns in Golden Hill Park are to be extended and the landscaping remodeled.

November 30, 1928, San Diego Union, 5:1-2. Thousands join Balboa Park Thanksgiving service at Organ Pavilion yesterday morning.

December 2, 1928, San Diego Union, 4:3-5. Twenty-five varieties of ungulata at San Diego Zoo (illus.).

December 4, 1928, San Diego Union, 9:4. High School gym contract let at \$11,000 savings; building to cost \$68,900; other additions approved by Board of Education; Jarboe Construction Co. awarded contract; Frank P. Allen, Jr. drew plans; gymnasium will be divided into girls' and boys' sections.

December 8, 1928, San Diego Union, 1:4, 3:5. George W. Marston elected chairman of body to obtain state park for San Diego County; Tam Deering, secretary.

December 16, 1928, San Diego Union, Society-Club, 18:6. Living Nativity pictures, carols, pageant to be given again at Balboa Park; rain interfered with presentation last year; will be presented New Year's night if weather does not permit on Christmas night.

December 16, 1928, San Diego Union, 5:2. Albatross added to Zoo attractions.

December 17, 1928, San Diego Union, 2:4. Large audience hears "Messiah."

December 23, 1928, San Diego Union, Society-Club, 8:4. Nativity Story to be depicted Christmas night; history of observance given.

December 23, 1928, San Diego Union, Development, 1:2-6. Drawing of new Fox Theater on block bounded by 7th and 8th and A and B Streets; Weeks and Day and William Templeton Johnson, architects.

December 23, 1928, San Diego Union, Development, 3:2-5. Photograph of Hamilton's new building at 7th and C Streets; Frank P. Allen, Jr., architect.

December 26, 1928, San Diego Union, 8:3. Thousand view Nativity scenes at Organ Pavilion.

December 28, 1928, San Diego Union, 12:1. Pershing Drive widening awaits Council's okay; Councilman Frank W. Seifert and Frank M. Lockwood, chairman of operations, indorse proposal to widen drive to 40 feet with shoulders two or three feet on the sides; drive will be straightened in several places.

December 29, 1928, San Diego Union, 9:1-6. Drawing of Spanish-Renaissance style structure on southwest corner of 29th and University Avenue designed by Quayle Brothers.

December 31, 1928, San Diego Union, 9:2-3. Advancement of science first objective in maintenance and management of San Diego Zoo.

"Maintaining a zoo." How simple it sounds, how intricate it is in reality. Maintaining a zoo is not just keeping a collection of wild animals in inclosures in new, attractive and interesting ways. It consists not entirely in caring for these same animals, feeding them, doctoring them, cleaning their homes, adding to their numbers, or replace those who die. All of these do enter into the maintenance of a zoo in a large measure, for the exhibition feature is the best known and is, perhaps, the root of all the others. But the objects and aims of

the Zoological Society of San Diego, stated in bylaws when it was incorporated, appear in the following order:

First, to advance science and scientific study of nature; second, to foster and stimulate interest in the conservation of wild life; third, to maintain a zoological exhibit; fourth, to stimulate public interest in the building and maintenance of a zoological hospital; fifth, to provide for the delivery of lectures, exhibition of pictures, publication of literature dealing with natural history and science; sixth, to operate a non-lucrative society for the mutual benefit of its members.

The results obtained in some of these directions, the phenomenal growth and the unique arrangement of the zoological exhibit, are too well known all over the world to need further mention. The San Diego Zoo is featured all over the United States and Europe as the outstanding zoo of the entire western part of the United States and the best example of open-air installation in the world. The famous zoological hospital has been built and is in operation. But its first object to advance science and the study of science. What has been done with that?

It enters everyday into the life of the zoo. First, so they may have to the fullest the advantages that the zoological garden has to offer, all children up to the age of 16 are admitted free. School classes of any age are not only admitted free with their instructors, but a lecturer and guide and buses are provided for their use. Children being admitted free, and constant visitors, they are protected in every way possible. There is not danger to them from auto traffic in the grounds and there is not a single record of a child, unaccompanied, being injured in the garden. They are as safe here as in their own back yards, and many parents recognizing this fact, bring them here in the morning with their lunch and leave them the whole day. Unconsciously as they watch the animals for their pleasure, they become familiar with them, their names, habits and native habitat. Hundreds of questions are answered everyday, for the children come to the zoo for information as to the care of pets, the classification of animals, birds and insects which they find about them, and for instruction and help in winning their Scout merit badges. The classes from the high schools and colleges of all southern California use the zoo not only in classwork but for individual project work and concrete information.

Through the research work being done in the study of animal diseases, there promises great advances in the cure and prevention of disease among domestic animals and wild species. There is little doubt in the mind of most nature students that the complete extermination of a species is due only in part to the hand of man and finally by the depredation of disease or some sort of cataclysm. If the disease can be eliminated wholly or in part by the scientific study and the development of remedies for it, great strides have been made toward the ultimate preservation of the species. This work naturally correlates with the second of the important aims of the Zoological society. Even the children know --- perhaps they know better than anyone else in the community of the work that is being done to preserve and benefit wild animals in captivity and in the wild.

Many varieties of birds are being fostered in the zoo; in fact, it is becoming quite a game refuge, and ring-necked doves, quail, bob white, pheasants, guinea fowl, chachalacas, coots, wild turkeys, peacocks roam at will throughout the grounds. The children being in all of the injured squirrels, rabbits or deserted baby birds, wounded pelicans and sea gulls to be taken care of at the zoo, knowing that every effort will be made to feed the nestlings and cure the injured for the sake of preserving life.

Following this into a wider field, the Zoological society has come to be recognized, through the work of its officers, as one of the strongest agencies in the state working for the conservation of life. At the present time, it is the saving from wanton destruction the sea mammals of the Pacific coast, which is occupying the attention of many nature students and lovers. Thorough investigation is being made into the real amount of damage done to the fishing industry by these creatures and the best way to curb either the destruction of the animals or the industry. But the protection of such creatures as the Guadalupe fur seal, the Northern Elephant seal, the few remaining sea otters, must not be left to chance, and the Zoological society is bending every effort to prevent pelagic killing of all sea mammals, lest some of these rare ones be mistaken for the sea lion, which they aim to kill.

Consideration is extending farther from home and effort is being made to increase the numbers of the rare birds and animals which are threatened with extinction in lands even as far away as Australia. Climatic conditions here aid these attempts to foster life and great interests in being shown in the experiments. The animal under study just now is the kangaroo and its kin which suffer from a disease distinctive to their species, both in captivity and in the wild. A serum is being made in the laboratory which has been found to prevent further recurrences of the disease. These interesting animals breed and thrive well in the roomy pens at the Zoological Garden, and this may, in all probability, become not only a world market, but the depot where the species is kept from the extermination which is threatened them in their native land.

Added to the work in conservation is the effort being made constantly to secure new species or subspecies and to recover old ones. Reports of unusual birds and animals are brought to the zoo every day. Sometimes specimens are brought in, but every report is carefully checked and followed up. During the last year two varieties of snake heretofore unrecorded in San Diego County, though indigenous to the state, were brought into the zoo. These discoveries were directly due to the efforts being made by the society to eradicate fear of snakes and to stop the destruction of the harmless ones by offering prizes for their collection each year.

1929

Summary of Events in 1929

(Note: Dates of events are approximate only.)

Pershing Drive Widening (January 20, 1929)
City Takes Over California Building (January 22, 1929)
O'Rourke Institute Eliminated from Area to be Given to
Zoological Society (February 12, 1929)
Council Rules Park Board Must Retain Jurisdiction of
All Parts of the Zoo Tract (February 16, 1929)
Amendment Increasing Zoo Allotment from Assessments
Approved (April 2, 1929)
Dr. Hewett Resigns as Director of San Diego Museum; Succeeded by
Lyman Bryson (April 5, 1929)
Spreckels Company Discontinues Paying Dr. Stewart
for Organ Concerts (April ?, 1929)
City Planning Board Wants 80-foot Artery on 28th Street (May 12, 1929)
Dr. Steward Honored on Birthday (June 3, 1929)
Zoo Displays South American Condor (June 23, 1929)
Hopi Indians at Park Organ (August 4, 1929)
Vandalism at Zoo (August 4, 1929)
Landscaping at Zoo (August 12, 1929)
City Assumes Jurisdiction of Outdoor Organ
on September 1 (August 13, 1929)
23rd Annual Flower Show (August 18, 1929)
Private Permit for Grass Golf Course in Park Issued (August 20, 1929)
Offer to Rebuild Golf Course Withdrawn (August 28, 1929)
Citizens Pledge Money to Building Golf Course (August 31, 1929)
Alfred Hertz Leads San Diego Civic Symphony (September 1, 1929)
County Fair (September 10, 1929)
Plans to Widen 6th Avenue (September 26, 1929)
Tentative Agreement With Financiers to Build
Golf Course (October 22, 1929)
Christmas Concert at Organ ---Nativity Pictures (December 22, 1929)

January, 1929, California Garden, Vol. 20, No. 7, 11-13. Balboa Park --- An Asset to San Diego, by John G. Morley (San Diego Union, January 1, 1929, Annual Edition, 5:1-8).

Annual Edition

(Check newspaper for correct sequence of page numbers.)

January 1, 1929, San Diego Union, 3:1-2. Growth of San Diego Zoo reads like fairy tale; institution is valuable factor in education of children in San Diego.

The name of Hagenbeck forever will be associated with the outdoor zoological exhibit and the barless type of installation for wild animals in captivity, but it remained for the Zoological Society of San Diego to apply this principle to a zoo in a way which has produced what is considered by many authorities to be the finest example of open-air installation in the world. When Charles M. Lee, for many years a member of the Board of Directors of the Zoological Society of Philadelphia, made the statement to the officials of the San _____nageries: San Diego has a zoological garden," he conveyed the meaning of the words, perhaps in a clearer way, than any other person has done.

The comparatively young organization has taken a rough, uncultivated piece of ground, consisting of approximately 150 acres, and taking advantage of every opportunity offered by nature, has converted it not only into a remarkable series of animal enclosures, but into a garden spot which is entirely in keeping with the justly famous Balboa Park in which it is located.

To the lay person and even to some of the professional zoo men, the striking feature of the exhibit is the nearness of the animals to the observer, and their seemingly unconfined condition. For, unlike other open-air grottoes, you are unconscious of the moat which separates you from the beasts, so cleverly is it concealed.

Many interesting comments arise from this feature, from the lady who returns to the office to report that the lions are unlocked, but as they have not discovered it, they have not made their escape, or the man who comes in to demand that the guinea fowls be prevented from flying over the moat into the lion grotto for fear they will be killed and eaten, to the prominent member of the National Association of Park Executives, who refused to stand and watch the huge cats until he had "picked out his tree," there is every sort of comment and question.

To see the lions rolling and stretching on their benches, just a few feet away from you, with nothing visible to restrain them, is to enjoy all of the thrills of an African adventure.

The real animal man, however, is more impressed with the condition of the animals and their contentment and unconcern, and their total disregard of the observer, so close at hand. Those who are familiar with this feature of the Zoological Garden could not but be impressed with the marked similarity between the habits and actions of the lions in the exhibit here and the pictures of "Simba," in the wonderful African film exhibited by Martin Johnson.

The lazy contentment is characteristic of all cats when they are unmolested and satisfied with their lot. The director of one of the largest zoos in the world when seeking fresh stock for his lion exhibit, after visiting all the other lion farms and exhibits in the southwest, selected, without a minute's hesitation, the young pair of lions which had been born and raised in the San Diego Zoo.

Upon his return home, the purchaser, in an interview to the press, remarked: "You think it strange for an east coast man to go to San Diego for his lions, but in no place in the world, except on the African veldt, will you ever see such African lions as they have at the San Diego Zoo, and that is not all, for there in San Diego they raise the biggest and finest sea lions in the world. Also, I know, for I just bought the biggest one in captivity and brought it home with me."

Aside from the open grottoes, however, there are several other features in the Zoological Garden which are just as unique and startling when compared to enclosures elsewhere, even though they are not as widely advertised nor so widely copied. Many of the visitors to the Zoo become so interested in the activities on the nearest mesa that they do not reach any other part of the grounds unless they happen to look over toward the north end of the garden and see four mysterious towers rising among the trees of the deer mesa.

A few come to the office to inquire about what they see, but many more investigate for themselves and thus discover one of the most interesting exhibits to be seen in any zoo in the world.

The mountain sheep and goats have been gathered together from all the far corners of the world and brought here for exhibition purposes. For their delight and good health they have been furnished with a high mound of steel and concrete which extends 80 feet straight up into the air. With a base about 10 feet square and a top of not more than four square feet, the side provided for the convenience of man with a slanting runway and many jutting rocks and corners, these make admirable substitutes for the crags of their own selection in their natural habitat.

It seems incredible that anything except a cat could cling to the steep sides and ledges, but both the sheep and goats run or leap from ledge to shelf with perfect ease, balancing on their sharp hoofs on minute

projections until they reach the top, whence they survey the world about them intently, as if forced to protect themselves and their flock from the approach of danger.

Scorning the easier and _____ method of descent, they furnish _____ a thrill by leaping straight down the steepest sides of mound, either to the ground, or, bringing themselves up with a sudden jerk, they come to a full stop at the very edge of a narrow shelf, all four feet occupying a space less than six inches square, then with a breathtaking leap they land on the earth 10 or 15 feet below.

Those who see this sight never forget to return to the deer mesa for further thrills. Not content with the means at hand furnished for their climbing habits, the goats have developed the bad habit of climbing the wire mesh fences which are put there for the protection of trees and walking sedately on this tight wire, they browse on the young trees, keeping them in a constant state of dilapidation, but adding, nevertheless, to the pleasure of visitors.

Another triumph of zoological exhibit with which the whole world has become acquainted by the thousands and pictures and stories which have been published about it, and is surpassed by nothing of its kind in the world. It is constructed over a ravine, or "Barranca," as they say in California, which faces toward the sunny south, and is, therefore, suitable for birds from all over the world.

By keeping the top line of the cage horizontal and lengthening the arches to correspond with the slope of the hills, an enormous height has been attained, while at the same time at the upper, one may stand on a level with the birds, flying or perching at the very top of the cage. The hillsides, thus enclosed, are terraced in their natural contours, while the surfaces of the ledges are of earth to permit of digging and scratching for worms.

Trees have been planted in anticipation of its location. So full grown trees lift their heads nearly to the top of the cage, but not quite, for in this cage are many birds which are accustomed to long flight, and, as it is kept, the wood ibis, the frigate birds and the white egret can extend their huge wings without fear of wire or steel support because this cage is so constructed that not an interior support nor guy wire is contained in the whole cage.

There are now more than 220 birds comprising 20 species inhabiting this aviary. The trees furnish shelter and nesting places and, in addition, caves are built into the terraced walls. Running water and pools add to the natural setting for the wading birds, such as egret and flamingo.

Frigate birds, which never have been successfully kept in captivity, thrive here and feed from the air, receiving the fish thrown by their keepers as they circle in gigantic arcs. Of all the birds in the wild state here, they are the quietest and most law-abiding of creatures.

Ruby-eyed Kagu from the island of New Caledonia lurk in the undergrowth during the day and at sundown come forth to entertain the visitors with their mating dance, their crests elevated, and their spotted wings outspread.

A crested curassow builds her nest just as she would in the tropical forest of her birthplace, and down on the stoniest of ledges, a thick-kneed stilt laid her egg among the brown stones from which it was indistinguishable, brooding in all sorts of weather and protecting her home fiercely until she hatched out a downy speckled chick.

Golden pheasants, purple gallinule, Java peafowl, and roseate spoonbills add color to the cage, while sooty tern, whistling tree ducks and cooing doves furnish noise to the silent collection in this marvelous aviary.

No exhibit, with the single exception of the reptile collection, is housed entirely indoors nor supplied with artificial heat. On the other hand, every specimen in the collection is provided with a shelter into which they may retire. Most of the exhibits are arranged so that they may be cared for and fed from the inside, an arrangement which is better for the animals and keeps a more sightly enclosure. The monkey

cages are arranged in a hollow square with inside enclosures open to the sun for those which receive the least sun in the exhibition cage.

Between the series of grottoes, which are built in the canyons, pools for water animals and birds have been planned, and, though the series of grottoes are incomplete, there are at present seven such ponds, containing water fowl and seal, sea lion and alligators. The two largest are exact replicas, built to scale of two of the dams in the city's impounding system, so without any effort except the short trip into the Zoo, one interested in the subject could form a very good idea of the means by which the city provided itself with sufficient water for its long dry seasons.

The whole garden has been laid out along a line of development planned in the beginning by competent landscape engineers, and this plan has been strictly adhered to, thus accounting for some of the present barren stretches which will be later filled with the proper species.

No matter how complete it becomes, however, it will always be different from other zoos, for the individual creature is placed in its proper surroundings. Nocturnal animals are provided with logs and caves for their daily sleep, and if you are disappointed in seeing nothing but the back of a woody opossum, or the quills of a sleeping porcupine, remember that it is more than cruel to force them to change their natural habits, and a return trip to the Garden after sundown will more than reward you for waiting, for then they will be abroad and stirring as they would in the wilds.

The Zoological Garden was built to show the public things of nature as they are, not as man compelled them to exist, and to create in the public, especially for children, a love for and interest in the creatures which will _____ to their preservation in nature. Many visitors have found in it the fulfillment of their ideals and are taking to other places the story of its collection so that it may be copied in many places and in many ways.

January 1, 1929, San Diego Union, 3:5-6. Some animals wander loose around local zoo grounds.

An interesting and unusual feature of the San Diego Zoo is the number of animals turned loose to wander around the grounds and perhaps the most popular and best known of these is "Moses," the little fox squirrel.

He greets the visitors to the entrance and escorts them to the peanut case, then he stands up and begs for them so prettily that no one is hard-hearted enough to refuse the appeal.

The most common of these uncaged exhibits are the pigeons, the peacocks, the guinea fowl and wild turkeys, but if you are a careful and quiet observer, you will see the Bob-white quail, the California valley quail, the African Vulturines, chucacalas, pheasants and water guan wandering about on the edge of the undergrowth.

January 1, 1929, San Diego Union, 3:1-8. Mission Cliff Gardens, on rim of valley, one of City's show places.

January 1, 1929, San Diego Union, 5:1-8. Balboa Park is gem of southland; lawns and trees form emerald background for eye-pleasing buildings, by John G. Morley.

In submitting this article for the perusal of readers of the **Union** Annual, I am writing more from the viewpoint of Balboa Park as a commercial asset than from its horticultural beauty or influence, which has been written of so frequently.

In the Magazine Section of the **Los Angeles Times** of September 20, 1928, George H. White writes as follows in regard to Balboa Park and the San Diego Exposition of 1915-1916:

"As a small city undertaking an international exposition, San Diego probably had more to gain than any of the larger cities which have held expositions in the last quarter of a century. Certainly the greatest

civic asset which San Diego boasts at the present time is a legacy of its Exposition --- Balboa Park improved . . . transforming a sage-grown waste of park lands in the center of the city into a beauty spot of landscaping and architecture that wins acclaim of world travelers.

“Architecturally, the Panama-California Exposition, by its permanency, has been a genuine influence in general for the adoption of a Spanish type of architecture that as now come to be known . . . as the Southern California style. The landscaping and plantings at the park exposition played a big part in the architectural influence through the exemplification of harmonious gardening. Flowers, trees and shrubs from all parts of tropical, sub-tropical and temperate zones embellish not only the exposition site, but have been extended over 600 acres of the 1400-acre park that borders the business district and is surrounded by residential areas.”

Continuing, Mr. White writes of a fine arts gallery, natural history museum, scientific library, archaeology museum, outdoor organ, zoological garden and a stadium. Facilities for the enjoyment of the people in addition to those mentioned are roque courts, tennis, golf course, horseshoe pitching and bridge paths; and continued improvements have produced for San Diego one of the famous parts in America.

Balboa Park by the visitation of hundreds of thousands during the exposition and the last 12 years since its close, has been one of the causes for many new residents locating here. While many have come because of the naval activities, both on sea and in the air, it was nevertheless large due to the prominence given San Diego during the World War when the main buildings of the former exposition in Balboa Park were made available for use as a naval training center. This brought to the attention of the government the possibilities of San Diego as a base for navy, marines and the aviation departments of the army and navy.

Through the efforts of Congressman Kettner and other influential citizens at the time, who realized what an asset San Diego possessed in its land-locked harbor and equable climate, have led to the establishment of permanent bases for all these branches of the government together with the immense naval hospital in the park.

That the improvement of Balboa Park for the 1915-1916 exposition and continued upkeep and development has been the means of selling San Diego not only for the government departments, but also for numerous business enterprises cannot be denied. Its temperate climate and scenic beauty have been the means, to a great extent, of the increase in population from that of a small town in 1911, when the building of the exposition was commenced, to a city of around 160,000 people at the present time.

The article of Mr. White --- the views expressed by many visitors from all over the United States and other countries, who have marveled at the horticultural beauty contained within this centralized area, all proclaim Balboa Park to be the chief asset of the city, and as the accepted plans for the continued development of the recreational facilities and the horticultural beautification of Balboa Park are gradually completed, it will continue to be the chief attraction from the esthetic standpoint and a commercial asset of undoubted value.

The public park system of San Diego includes 28 separate parks covering a total of 2,600 acres and ranging in size from the mere “breathing space,” a block square at the Plaza to Balboa Park’s 1,400 acres, around which the city is built.

Dividing to some extent the business and residential sections, Balboa Park lies on a table land corrugated by deep canyons which burrow towards the bay and ocean, thus affording many an exquisite vista. Six hundred acres of this park are highly developed, having been superbly landscaped and plotted for the great international exposition of 1915-1916. The beautiful buildings are now converted to the use of numerous cultural organizations and supply splendid facilities for the proper presentation and enjoyment of music, art, drama, museum, zoo and other educational features.

Any attempt to picture the charm of this great park, its buildings, its drives and walks, its gardens, shrubs or trees, or even to pick out its greatest feature, would be futile in the extreme, because to each individual Balboa Park offers too wide an appeal and he must, of necessity, center his approbation on one or

two details which, like at not, another overlooks entirely in his particular admiration of something else. Six hundred acres intensely developed both in landscaping and architecturally is more than one mind can encompass though visited regularly over a long period, for each day brings forth its quota of shrub or flower and even the architect is contriving his frequent contribution through the courtesy and financial aid of an interested citizenship which is constantly adding to what the park officials are able to do for the upkeep, maintenance and improvement of this great park.

The topography of the park while difficult to handle in some respects with its deep canyons cutting through here and there offering road-building obstacles, is on the whole an advantage which has afforded exceptional opportunity for pleasing diversity in landscaping. The character of the climate, too, makes it possible to utilize with success a wider variety of flora, perhaps, than any other park in the country. In addition to these natural advantages, the erection of the beautiful exposition buildings adds still another exceptional feature to this great park. Built and grouped with an eye to adornment but still not particularly with the thought of permanency, the idea of preserving them gradually grew upon the community after the exposition has come to an end and nearly a score of these buildings have now been restored and occupied under the practical control of certain organizations for the public good.

Owing to this liberal policy of the park board, thousands of public-spirited citizens have given of their energy, time and money for the establishment and upbuilding of a variety of cultural institutions which are lending their influence in the development of the finer side of the community, and affording pleasure to thousands of visitors.

Artists from the east and from the capitals of Europe have visited San Diego that they might put upon canvas the charm that has made this spot a lure to lovers of beauty from the ends of the world, and many of these canvases have been admired in the galleries and salons of Paris, London and Rome.

Nowhere in this country has nature so favored the horticulturist and the profusion of blossom never wanes. The seasonal flowers of summer and spring are literally crowded out by the no less prolific growth of fall and winter. The procession is endless and of infinite variety. Stately yuccas from the arid desert grow among the massed foliage of jungle origin., and tropic llanas bind the tall trunks of pines that germinated beneath the snows of the far north. Flaming hibiscus from the South Seas flaunts its radiance amid roses and lilies, against a background of graceful palms.

The main entrance to the park is by way of Laurel Street, which leads to Cabrillo Bridge, whose quarter-mile span connects the Exposition grounds with the western part of the park. From this bridge the view is one of the most delightful to be had in the city. At 112 feet straight below may be seen the lotus pond where in season lotus and pond lilies spring in thousands, casting their reflection upon the quiet bosom of the pool.

To the north, bison and other ruminants are seen grazing in their paddocks at the Zoological Garden, and the southern outlook embraces the downtown district of the city, the San Diego Bay, and beyond that, the Silver Strand of Coronado, ruffled with the silvery lace of breaking surf and the still more distant Coronado Islands of Old Mexico.

At the east end of the bridge stands the Administration Building, flanked by the majestic tower of the California State Building, housing the San Diego Scientific Library. Facing the California Building and with it forming a small plaza, is the Fine Arts Building, with exhibition galleries and the Academy of Fine Arts.

East of these and facing each other on either side of the main street or Prado are the Science of Man and Indian Art Buildings, in which are shown the archaeological, anthropological and Indian Arts exhibits of the San Diego Museum. The buildings form the western wall of the Plaza de Panama, a paved court where public festivities, outdoor dancing, fiestas and similar entertainments are of frequent occurrence.

The American Legion Building, at the northeast corner of the plaza, reconstructed for activities of the Legion, contains one of the finest museums of World War relics in the west.

The Foreign Arts Building, at the southeast corner of the plaza, has been reserved for expansion of the Natural History Museum, which now fills to overflowing the old Canadian Building of exposition days. The mounted specimens of native animals, current and extinct varieties, the herbarium and other exhibits form an exceedingly interesting display of the fauna and flora of San Diego County.

South of the Plaza de Panama, flanked by its graceful peristyle framing glimpses of the blue Pacific, the great Spreckels organ commemorates the love of two brothers for their fellow citizens. The largest outdoor pipe organ in the world, a gift to San Diego of John D. and Adolph Spreckels, is heard daily in concerts throughout the year, and is a source of unending delight to San Diegans and visitors from elsewhere.

Just north of the Prado and east of the American Legion Building, the Lagoon, with its thousands of pond lilies and lotus blossoms, mirrors the lath dome of the Botanical Building, through which giant bamboo, nearly 70 feet in height, poke their fronded heads. In this building and in the adjoining conservatory are displayed the luxuriant tropical planting that would not thrive even in the mild climate of San Diego. Rare exotics and the more delicate native flowers are shown here under the most perfect growing conditions and are the subject of admiring comment the year round.

The Domestic Arts Building, one of the largest and handsomest of the Exposition group, is in frequent use for industrial and agricultural exhibits, the annual county fair being the most important of these features.

The Pepper Grove picnic grounds is one of the most popular sections of the park. Groups of tables in shaded nooks, convenient drinking fountains, playground apparatus and other equipment attract to this spot many picnic parties each day. The local Girl Scouts occupy two buildings in the Pepper Grove, and their activities add greatly to the life and spirit for which this part of the park is noted.

The Zoological Society has taken over three of the Exposition buildings and have restored them for use in administrative, education and exhibit purposes, in connection with the 150-acre tract that has been transformed into an extensive zoological garden. The largest group of animals, birds and reptiles in the west is maintained in this zoo.

The Painted Desert occupies a large area in the north end of the park and comprises a group of replicas of Indian community houses. This during the exposition was regarded as one of the greatest attractions ever shown, and it was considered of so great value to the community that the Atchison, Topeka and Santa Fe Railway, by whom it was built, was prevailed upon to donate it to the city. The Painted Desert is now occupied by the Boy Scouts, for whom it makes an ideal group.

In addition to its supremely beautiful landscape effects, its museum exhibits and its attractions for lovers of art and music, Balboa Park provides facilities for those who have athletic tendencies. An 18-hole golf course, a battery of six concrete surfaced tennis courts, horseshoe pitches, miles of dirt road for equestrians, and many more miles of quiet trails for pedestrians afford ample encouragement for outdoor exercises.

Baseball and football, track meets and similar sports may be indulged in on the several fields located in the park, while the huge concrete bowl stadium, seating 35,000 people, is reserved for the more important football and baseball matches.

January 1, 1929, San Diego Union, 6:8. Annual County Fair attracts record crowds.

(Note: the following article is copied from an undated clipping and included here as the most likely source.)

ANNUAL COUNTY FAIR IS GREAT AID TO SUCCESS

Generous Display of Varied Products Indicates Prosperity of District, by Felix Landis, Secretary County Farm Bureau.

For the past 11 years the San Diego County Farm Bureau has conducted a county fair in Balboa Park. Starting in a small way with no capital save a subscription fund of \$3,000 furnished by individuals from all sections, the fair has steadily advanced until it has become one of the major fairs of the state.

The fact that Balboa Park had been developed for the Panama Pacific exposition [sic] and that several buildings, not in use, were so grouped as to lend themselves to the needs of a fair, made it possible to launch the enterprise on little more than a desire. That desire was not for a mere celebration, or carnival of fund, nor was it just for a temporary business stimulant by bringing people into the city for a few days of sightseeing and spending. The impelling thought was to furnish an urge to agricultural and industrial development by exhibiting yearly to the public, the finest and best products that come from our farms and factories.

It was also recognized that the strongest motive for improvement springs from a desire to excel. The competitive showing of products therefore not only acquaints all people who attend with the possibilities of the county's production, but also brings about more thoughtful effort on the part of the producer, with better products the result.

As there had been no fairs or exhibits within the county for many years, and no special inducement toward quality production, it was wisely determined to protect local exhibitors from competition with other sections of the state, where the influence of past competition was plainly noticeable in the quality of the livestock and farm products available.

For eight years entries at the San Diego county fair were confined to those that were produced or owned by the citizens of the county. The result was an immediate and general response on the part of local people. The number of entries and the number of producers participating increased rapidly, the fair expanded and attracted attention throughout the state. A decided improvement in the quality of exhibits was plainly noticeable within five years. This was especially apparent in all livestock classes, as the field and orchard products of San Diego county lands have ever been of good quality. As the worthiness of local livestock became more pronounced, local exhibitors, prideful of their animals, professed a willingness to compete on harder terms, and with the eighth fair, all livestock classes were opened to competition from the world.

The result has been gratifying. San Diego county exhibitors have been able to win consistently from outside invaders and are now going afield themselves in search of contests. Poultry, rabbits, pigeons, cattle and horses from San Diego county win premiums in fairs throughout the coast states and are factors in any competition in which they are entered.

As a direct outgrowth of the San Diego county fair, the county government now sponsors exhibits in the national orange show, and the California state fair. Thousands of people are shown the superior products of our orchards, our fields and our gardens, and our products are awarded many premiums.

One by one, the exposition buildings used by the fair for the first few years have been moved away or destroyed. Today only the old domestic industries building of the Panama Pacific exposition [sic] times remains for use. This has become the county fair building by common usage.

Year by year the fair has created buildings for its needs. Barns for cattle and horses, light and well ventilated, have been built. Sheltered pens for swine and goats have been added. The best type of poultry house to be found on any southern California fair grounds was constructed. This was followed a year later by a pigeon house of equal quality. The latest bit of permanent construction houses the rabbit exhibit, and is not equaled by any nearby fair. It is a fact that no fair in California, not even excluding the state fair, houses all of its livestock in permanent buildings as suitable for the purpose as those of the San Diego county fair.

Although the purpose of the fair is serious and constructive, it is not practicable nor economically possible to stage such an exhibition unless it is well patronized. The average citizen is not content with recreation that is serious and constructive only.

It is necessary to provide amusement, entertainment and play. Music, dancing, novel contests are regular features. Off times boxing and wrestling are programmed. Rodeos have been leading attractions at times and fireworks displays, or tableaux in fire, have been used in recent years. Experience indicates that the night horse show, in a well-lighted arena, finds greater favor than any other single effort and will be continued. The public demands variety, however, and additional diversions must be provided.

Each of the 11 years that the fair has been held, it has been to some degree a celebration, a suggestion of carnival has been apparent, people have come to San Diego from the country and neighboring counties, and retail business has been benefited. San Diego, city and county, have surely profited by the advertising that has been derived from the fair, but mainly, the influence of holding this yearly exposition has been one of self improvement and internal development. This community has progressed faster as a result of the fair and will achieve still more through its continuation.

January 1, 1929, San Diego Union, 7:1-2. Natural History Museum is place of wonders.

January 1, 1929, San Diego Union, 7:3-4. Museum's taxidermy shop is interesting establishment

January 1, 1929, San Diego Union, 7:5-7. L. M. Huey, field collector, is employed by museum.

January 1, 1929, San Diego Union, 7:8. Marine Museum is feature of Star of India.

January 1, 1929, San Diego Union, 9:1. Naval Hospital in Balboa Park largest in United States; 1000-bed institution erected on hilltop overlooking city and beyond.

Located on an imposing site in the center of Balboa Park, the local naval hospital has grown to a 1000-bed institution, and is now the largest naval hospital in the United States.

In the last year, the frontage of the hospital has been almost doubled. A building for officer patients, with a capacity of 100 officers, a contagious ward with a capacity of 185, and a building to accommodate 150 students, and new officers' quarters are among the projects of the last year.

The school for hospital corpsmen, formerly at Mare Island, has been moved to San Diego, largely because of the presence here of the naval training station. Not only are hospital corpsmen given their training there, but advanced courses are offered for pharmacists' mates from the fleet.

The hospital with its extensive buildings, is one of the scenic spots of the city. In 1925 the city gave the navy five and one-half acres more land, so that the hospital grounds now include 22 and one-half acres. It would be difficult to find a better location for a hospital than the location of the one here, on its hilltop overlooking the city and the sea beyond.

Expenditures for new work at the hospital reached \$750,000 last year, and many other units are planned. Among these are a ward to accommodate 175 more patients, a hospital corps barracks with a capacity of 300, and a complete modern laundry to take care of the hospital needs. The hospital corps barracks, to cost \$300,000, will contain a garage, blacksmith shop, paint shop and storage rooms. If the families of officers and enlisted men are taken into the hospital, it will necessitate another building, probably about the size of the new sick officers' quarters, and costing around \$150,000.

A new outpatient department has been installed for the treatment of officers and enlisted men's families. This unit consists of 14 examining rooms and doctors' offices, with a small operating room. Four doctors are on duty here, and, during the last year, 21,419 office calls and 5,765 home calls were made by this department.

Approximately \$1,000,000 per year is disbursed by the navy paymaster at the hospital. The cost of good in the last year was about \$150,000, drugs and supplies amounted to \$35,000, and the pay of the 117 civilians at the hospital came to \$145,000.

The "Ship's Service Department" of the hospital operates two canteens, a soda fountain and restaurant, a laundry, cleaning and pressing agency, pool room and a gasoline filling station. There is also an athletic unit consisting of a combined tennis and basketball court, a handball court and a clubhouse. Baseball and basketball teams, made up of the hospital corpsmen and others on duty there, are regularly entered in the 11th naval district athletic tournaments.

A large force of doctors and intern operated at the hospital, under the direction of Captain Raymond Speak, medical corps. The hospital is on the approved list of the American College of Surgeons and the professional work, both medical and surgical, ranks well with that of any civilian hospital. As all of the medical profession are there on full time with no outside interests, they can devote their entire efforts to the study, care and treatment of their individual cases.

February 3, 1929, San Diego Union, II, 3:4-7. New Russ High School annex recalls original unit (illus.).

February 5, 1929, San Diego Union, 6:1. Council places Zoo amendment on April ballot; voters to register wishes on apportioning share of park taxes to Gardens.

Request of the San Diego Zoological Society that a proposed amendment to the city charter, setting aside a certain area in Balboa Park to be used as a zoological garden, be placed on the ballot at the April election was granted yesterday by the city council. A resolution also was adopted placing on the ballot whether 8 cents out of the annual appropriation for Balboa Park shall be used for maintenance of the zoological gardens.

Both of these amendments were voted upon favorably at the city election two years ago, but due to an error in advertising the election was declared illegal.

The first amendment merely preserves to the San Diego Zoological Society the right to maintain its gardens in Balboa Park without fear of ejection at the caprice of any administration. The second amendment assures it a fixed amount which may be depended upon to aid in maintenance.

Adoption of the first resolution, asking for the vote of the people on the question of giving the society a certain area in the park was bitterly opposed by P. F. O'Rourke of the O'Rourke Zoological Institute, who insisted there is no legal method by which any private corporation could be given territory in Balboa Park. He said the park belongs to the people, and that he will fight the proposed amendment to the last ditch.

O'Rourke also declared that an appropriation could not properly be made for maintenance of the zoological gardens while operated by a private corporation, which he insisted the zoological society is, and if an appropriation were made for the zoo it should be provided for in the budget.

February 5, 1929, San Diego Union, 15:1. Zoo's directors named; \$30,000 increase shown

Directors were elected last night at the 12th annual meeting of the Zoological Society of San Diego.

Alda Ferris was elected to the Board to replace D. D. Wray, who declined re-election on account of other activities. Dr. Harry M. Wegeforth, A. T. Mercier, Gordon Gray and F. C. Spalding were re-elected. The directors will meet, probably today, to elect officers.

Twelve members of the society attended the meeting while 232 others were represented by their proxies. Reports submitted at the meeting showed the zoo inventory increased \$30,000 during the last year and current indebtedness was slashed \$2,000.

After the business section, motion pictures taken in the Zoological Gardens and on Guadalupe Island were shown.

February 9, 1929, San Diego Union, 6:5-6. Thousands visited Boy Scout exposition and honor court at Indian Village last night.

February 10, 1929, San Diego Union, II, 6:8. Frank W. Seifert to seek return to place on City Council; record in office cited as reason for his re-election for four years; has led the promotion of the lakes in Balboa Park and the widening of Pershing Drive; has fought every effort to remove the Zoological Gardens from Balboa Park..

February 10, 1929, San Diego Union, 12:1. Zoological Society explains amendments it seeks for Zoo; One fixes present site; Other determines money to be appropriated by City.

Two of the amendments to the charter of San Diego which will appear upon the ballot at the primary election of April 2, are those offered by the Zoological Society at the election of April 6, 1927, and which received a favorable vote. Due to an error in advertising the amendments, they could not legally be ratified by the state legislature when they were presented to that body. Because of this condition, the Zoological Society Board of Directors decided that these two amendments again should be submitted to the people. This act of the directors was ratified at the annual meeting of the members held in the Research Building on February 5.

The society has issued this statement:

“Neither of these amendments changes the present relations existing between the Board of Park Commissioners and the Zoological Society. The first establishes by vote of the people the present site, which was set aside exclusively for zoological purposes by the Board of Park Commissioners and, at the request of that Board, was confirmed by resolution of the City Council. It prevents any use of this territory for purposes inimical to the development and maintenance of a zoological exhibit. The second will establish by vote of the people the proportion of tax money now with the consent of the Board of Park Commissioners being set aside each year for the use of the Zoological Garden by the City Council. To make these two measures a part of the city charter will take the support of the Zoological Garden out of politics, but will not remove one square inch of Balboa Park nor one cent of tax money from the control of the Board of Park Commissioners, for everything that is done in the Zoological Garden has to be subject to the approval of the Board of Park Commissioners, and every cent of city tax money has to be spent through the Park Commission, as provided by law.

“Every structure that is built in the Zoological Garden has to receive the approval of the Planning Commission before it is begun, for everything which is built in Balboa Park becomes by law the property of the Park Department of the City of San Diego. Therefore, the thousands of dollars that are spent every year by the Zoological Society in improving the grounds, building of grottoes, and planting of trees are in reality donated by the Zoological Society to the citizens of San Diego.

“The actual maintenance of the Zoological Gardens is necessarily much greater than that of any of the other organizations operating under the Park Department, for the feeding and caring for 2,000 living creatures necessarily entails the expenditure of an enormous amount of money. At the present time, the

amount appropriated out of city tax money for the operating of the Zoological Garden amounts to less than one-third of its actual operating cost. During the year of 1927, the actual operating cost of the Zoological Garden was \$74,969.18 (?), and an additional amount of \$86,286.70 (?) was raised and expended by the Zoological Society in improvements and in collection and purchase of animals; during the same period the appropriation from the City of San Diego was \$23,600.00 (?).

“During the year 1926, due to the unfortunate conditions over which no one had any control, the proportion of money used for operating the zoo obtained from the City of San Diego was necessarily smaller.

“A careful financial budget is prepared by the Society each year, for it is necessary that an organization having so much important business at stake as is involved in the maintenance of a large zoological exhibit cannot leave the amount of its income to chance. A certain amount, that is in some degree commensurate with the cost of maintenance must be firmly established, beyond the influence of any uncertain elements. The Zoological Gardens of San Diego is also a growing concern and must know that its future income will show a certain amount of increase. It is for these two reasons that the Zoological Society wishes to establish an income which will gradually grow with the growth of the community, instead of depending upon a request each year for a certain estimated amount. After a certain period the money received thus from taxation will grow, as in the case of the New York Zoological Park, until it becomes possible to open the gate at least for several days a week without charge to the public. At present there are only two days a week upon which a gate charge is made in the Bronx zoo, but the income from the City of New York has grown over a period of 25 years from a few thousands to \$890,000.

“The history of zoological exhibits has proved that only those which are operated under the jurisdiction of a zoological society are truly successful. Those operated under City Park Commissions, or directly under City Commissioners, are of uncertain growth. These officers are not vitally interested, from a scientific standpoint, in the maintenance of a zoological exhibit; consequently the zoological exhibits progress depends upon the indifference or enthusiasm of a constantly changing group. If a favorably inclined administration is in power, the zoo grows rapidly for a year or two, while a change in the administration may result in a period of stagnation or actual deterioration.

“To the tourist, upon whom this community depends for a great deal of its support and growth, a great variety in the way of entertainment or interest must be offered to keep them in the community for any length of time. There is nothing that goes farther in filling this need here in San Diego than the exhibits maintained by these various organizations operating in Balboa Park. It is in recognition of the vast amount of pleasure and value derived by the community from these sources that the Board of Park Commissioners has been willing to set aside certain funds to held in the support of the societies. In return each of them raises and expends vast sums of money for improvements and exhibits which become a perpetual part of the park, and thus of the city’s actual assets. Each year the value of improvements made by the Zoological Society is included in the assets of the Park Department as shown in its annual report, while upon the books of the Zoological Society, as shown in the auditor’s statement, these appear as assets of the Zoological Society contingent upon its remaining in the present location.”

February 12, 1929, San Diego Union, 2:5. School Board accepts Lease on park Stadium for a yearly payments of \$2,400.

February 12, 1929, 6:5. City takes over California Tower; Council orders payment for upkeep when State cuts off further cash; appropriation of \$2,100 made to pay the salaries of a curator, custodian and janitor.

February 12, 1929, San Diego Union, 6:5. Zoo Institute won’t be ousted; O’Rourke site eliminated from area to be given Zoological Society.

Insuring the O’Rourke Zoological Institute against possibility of being ousted from that portion of the grounds in Balboa Park within the area that has been claimed by the San Diego Zoological Society, the City Council yesterday ordered a change made in the resolution defining the territory ceded to the Society.

Councilman Louis C. Maire moved that the two acres occupied by the O'Rourke Institute be eliminated from the area which it is proposed to give the Park Commission the power to allocate to the Zoological Society, and on which the people will vote next April. The motion carried.

February 13, 1929, San Diego Union, 7:1. Oppose Pershing Drive work fund; Mayor tells Councilmen city finances unable to stand strain of \$3,000.

February 13, 1929, San Diego Union, 10:1-2. San Diego honors memory of Lincoln at Organ Pavilion.

February 16, 1929, San Diego Union, 1:7, 2:5-6. Council repeals ballot issue on giving Zoo full charge of area; rules Park Board must retain jurisdiction over all parts of tract; also kills Natural History Museum site vote.

Jurisdiction over every part of Balboa Park must remain with the Park Commission, according to a decision made by the City Council yesterday when it repealed a resolution adopted last week, placing on the ballot for the spring election the proposition of giving the San Diego Zoological Society complete control over the area occupied by it.

The proposition was opposed by Colonel E. N. Jones, president of the Park Commission, on the ground that to give the Zoological Society absolute control over the grounds occupied by it, would establish a poor precedent, and hamper the Commission in its functions. He said the city government had come to a bad pass if the mayor could not appoint proper men on the Commission who could be depended upon to serve in the best interests of the city.

George W. Marston, of the Commission, pointed out that the Zoological Gardens are in Balboa Park under the sanction of the Park Commission, as all other organizations are under a certain kind of control of the city government. The administration has the power to oust all organizations from the park, he said, but does not exercise that power in an arbitrary way.

Mr. Marston complimented the Zoological Society for the work that it has done in establishing the gardens, but said that to grant its petition for control of the area by definite allocation would alienate the land to a private corporation. The proposed amendment to the city charter, he said, would take away the power of the city.

The point made in the resolution by the Zoological Society, said Mr. Marston, is that no highways are to be built through the Zoological Gardens. The Nolen plan, he asserted, provides for a road running through the Gardens from east to west other than Laurel Street. Another east and west road, Mr. Marston declared, is necessary to open up the most picturesque portion of the park.

In support of his appeal for control over the area occupied by the Zoological Gardens, Dr. Harry Wegeforth said that an agreement regarding construction of the road had not been kept by the Park Commission. Under the agreement, he said, a road was to have been built to run up to the Scripps research building, and which would not interfere with the seal ponds. The stakes had been set for the road, he said, but nothing further had been done.

If the Park Commission was willing to live up to that agreement, made two years ago, Dr. Wegeforth said he would be willing to withdraw his proposition of amending the city charter authorizing the Commission to set aside a certain area and giving the Zoological Society control over it. Dr. Wegeforth said the Zoological Society had spent more than \$1,000,000 building up the zoo and he did not think it fair to withhold any measure which would make that investment certain for years to come.

Colonel Jones said the Commission is willing to stand by the agreement of two years ago, base on the Nolen plan, which provides for a road through the Zoological Gardens. He insisted that control over the Gardens area should not be turned over to any corporation, even if \$10,000,000 had been spent on improvements.

Dr. Wegeforth said that one of his reasons for requiring the Park Commission to set aside a certain territory for the gardens was to prevent interference from future city administrations.

Mr. Marston offered personally to reimburse the Zoological Society for any damages that may result from constructing a road down the canyon in which the seal ponds have been constructed, and on which Dr. Wegeforth declared about \$7,500 had been spent. He said he would abide by the decision of the Council as to the amount of the damages.

He asserted that the Zoological Society had hampered the Commission in harmonious development of the park and that the research building was constructed against the protests of the Commission. Dr. Wegeforth insisted that the research building was built with the consent of the Commission. He declared that the Society was not asking for the Zoological Gardens to be taken completely out of control of the Park Commission, and that his only desire was to remove it from arbitrary changes that might come with changes of administration. He said it was not a question of whether a road should be built through the gardens, but who should decide, the Park Commission or the Zoological Society.

Refusal of the Council to ask the electors to direct the Park Commission, through amendment to the charter, to set aside the Zoological Gardens, placing it under control of the Zoological Society, leaves the two acres occupied by the O'Rourke Zoological Institute within the zoo grounds.

Seeking action of the Council in deciding the ownership of the Nevada Building, now occupied by the O'Rourke Zoological Institute, Dr. Wegeforth called attention to an extract from the minutes of the Park Commission, October 6, 1928, showing that the Nevada Building was purchased for the Zoological Gardens and, under the direction of the Park Commission, was moved from its original site into the zoo grounds. He also directed attention of the Council to the fact that on May 28, 1928, the City Council directed the City Attorney to take the necessary steps to oust the O'Rourke Institute from the Nevada Building. This order, he declared, had never been carried out and was still in force.

The Council also repealed a resolution placing on the March 19 ballot the proposition authorizing the Park Commission to set aside a certain site for construction of a \$500,000 building by the San Diego Natural History Society.

It was explained by Colonel Jones that the Park Commission is always willing to cooperate with the Natural History Society and will set aside a site for the proposed new museum without submitting the matter to a vote of the people.

It was pointed out by Councilman Seifert that a point of law was involved in the proposition, the same as in the matter of allocating certain land to the use of the Zoological Society, and that if the appeal of the Zoological Society could not be entertained, the request of the museum organization should not be granted.

February 17, 1929, San Diego Union, 6:2-3. Story behind purchase of Presidio Park told; City not ready to take over property when first offered by four wealthy men so George W. Marston shouldered responsibility for several years.

February 17, 1929, San Diego Union, 9:3-9. Advertisement for Patrick Francis O'Rourke for mayor stating his position of Balboa Park . . . in favor of equal distribution of funds for park purposes giving all sections of the city the same treatment as is given Balboa Park.

February 17, 1929, San Diego Union, Development, 1:8. Early funds for widening Pershing link are promised; Mayor Clark lauds recent development work on cut-off and says money to complete project due in July.

From 18th Street to the top of the heaviest grade, a distance of about three-quarters of a mile, the road has been widened to 52 feet, including shoulders on either side and the sharp curves have been reduced.

The half-mile stretch from that point to Redwood Street has not been given much attention, but from Redwood north it is being widened.

Widening of the road was made possible about one month ago by appropriation of \$5,000 by council after repeated efforts to get the adoption of a resolution offered by Councilman Frank W. Seifert providing an additional \$3,000 for completion of the work, had been held up pending improvements of the city's finances.

February 19, 1929, San Diego Union, 1:2. Park will lose \$750,000 plant for new Museum; another site to be sought because Council refuses to grant ballot request.

Balboa Park is to lose the museum conducted there for many years by the San Diego Society of Natural History and the \$750,000 building which the society had planned to erect within the park and donate to the city, will be constructed in some other part of the city.

This announcement was made yesterday by Joseph W. Sefton, president of the society, following the refusal of the city council to place on 5 the April 2 ballot the proposition of amending the city charter to give the park board power to allocate a piece of ground within the park on which the society might place its proposed new museum building.

The city council acted on the protest of the park commission, represented by Colonel E. N. Jones, president of the commission, who said the proposed amendment was so similar to that presented by the San Diego Zoological society, asking the commission be authorized to set aside the area occupied by it for zoological gardens, that he would suggest the request be denied.

In asking that the council reconsider its action of a week ago in refusing to place the proposition on the ballot, Mr. Sefton said that it was not the desire of the society to have control over the property, which would be deeded over to the city, further than to be sole occupants of it with the assurance that it would not be disturbed in its activities by future city administrations.

In face of the protest made by the park commission, he said he would not urge adoption of a resolution placing the proposition on the ballot, but the action, he said, would mean a great loss to the city.

Mr. Sefton said the contributions to the building fund, which already had reached about \$200,000, had been made with the understanding that the society that the society was to be forever in control of its activities and that it was to be beyond political control. If this assurance cannot be given, said Mr. Sefton, the society will abandon its plans for erecting its new museum building in Balboa Park.

Further than this, Mr. Sefton said, it will delay the plans of the society for four or five years. He said that one of the purposes of the new building would be to place the museum on which the society had spent more than \$250,000 in a fireproof structure and one adequate in space to permit of growth.

Mayor Harry C. Clark suggested that just such a contingency as that with which the society is confronted would be remedied in the new charter. He recommended that all the organizations in Balboa Park join in plans contemplating a complete remodeling of the area now occupied by the various buildings. None of the buildings is suitable to the purposes to which it is devoted, he said, and modern structures must soon take the place of those temporary buildings. The new plans, he said, should provide for growth and expansion.

These emergencies would be met, Clark said, in the new charter.

February 21, 1929, San Diego Union, 15:3. Pacific Beach wants Natural History Museum; North Shore Federation hears proposal to use 80 acres of land for site.

March 3, 1929, San Diego Union, 12:5. John Nolen due tomorrow; to advise plans for development of new Presidio Park.

March 7, 1929, San Diego Union, 1:8. Four hurt as six gymnasium girders crashed to ground yesterday; walls bend as 40 tons hit them; roar heard all over high school campus as big roof trusses give way; fail to fix blame; only one of the men was badly injured; Carl Jarboe, brother of the contractor erecting the gym, was foreman on the job; Harry Young injured the most seriously; 133-foot Senior High Gym truss was the largest span of its kind in San Diego construction; L. D. Martin, inspector on the job for the School Board, declared that "defective designing" was the cause; Frank P. Allen, architect, and Oscar Knecht, city building inspector, said crash was due to "lack of sufficient bracing" to hold the beams in place before being made permanent.

March 8, 1929, San Diego Union, 2:5. Oscar Knecht, city building inspector, blames girder crash on steel span's swaying; inspector says fabric of new high school gymnasium was not securely anchored; arches with a span of 180 feet, such as those in the high school gym, are almost as flexible as a fishing rod until the longitudinal trusses stiffen them said Frank P. Allen; Allen is satisfied his design was not faulty; Knecht concurred with this opinion.

March 8, 1929, San Diego Union, 10:4. John Nolen says proper spending needed for city at meeting of the planning, park, harbor and tree planting commissioners yesterday; Lindbergh flying field ideally located; tidelands location of Civic Center praised.

March 10, 1929, San Diego Union, 8:1. Frederick Law Olmsted, Jr. favors three parks in San Diego area; advises County to act quickly; finishes survey of sites.

San Diego County should lose no time in acquiring sites for state beach parks, is the opinion of Frederick Law Olmsted, landscape architect and director of the state park survey authorized under the recent \$6,000,000 bond issue. In company with Henry O'Melveney, chairman of the commission, Olmsted completed a survey last week of available sites in the county. He has recommended acquisition of a park site in the "southwest boundary" section; another on one of the estuaries in the northern part of the county and a desert-mountain park in the Borrego-valley section of the county.

The findings of the commission will not be made available until July, it was indicated by O'Melveney, but members of the board have gone on record as declaring that the southern portion of the state will receive first consideration. . . . It is advisable to secure beach areas before the ocean frontage is "fenced off" by subdivision development, it is pointed out.

March 10, 1929, San Diego Union, II, 1:6. San Diego Electric Railway Company donated herd of deer to Zoo; abandons Mission Cliff Gardens but keeps animals in San Diego; eleven Panama and Virginia deer in group; took two weeks of effort to capture adult buck in pen; silver pheasants also moved; public again asked not to feed grasses to the deer, which they do whenever a keeper is not present; tree deer and two antelope have been sick more than two weeks from the poison thus engendered in their systems.

March 15, 1929, San Diego Union, 3:3. Balboa Park considered for honor place on world list; San Diego park presented to jury as example of landscape art.

March 17, 1929, San Diego Union, 12:1. Varied exhibits of San Diego Academy of Fine Arts draw interest in Art Gallery; lifelike quality of motion in Allan Clark sculptures bring much comment; drawings by Mr. Bohene, paintings by Henri De Kruif, caricatures by Hallathamar intrigue, by Ralph Morris, Assistant Director, Fine Arts Gallery.

March 17, 1929, San Diego Union, Society-Club, 12:4-7. Richard Requa's book of Spanish views out.

March 17, 1929, San Diego Union, Development, 4:2-5. Southern California Architecture, by Richard S. Requa.

March 20, 1929, San Diego Union, 1:1-2. Mayor Clark re-elected; Ira S. Ireys, Maire lead in primary Council race; pipe line and reservoir lack several hundred votes of necessary two-thirds; special Counsel item

rejected; Jack Millian made treasurer again, with big figure in election; Woolman heads School Board; Charter amendment No. 1 increasing bonding margin for water development carried by a big majority; sale of pueblo lands reserved until 1940 by a two to one majority.

March 24, 1929, San Diego Union, 6:3-4. Pleads for support of Zoo as major San Diego attraction.

Editor: W. J. Black, passenger chief for the Santa Fe railroad, says in an interview in **The San Diego Union** of March 19, 1929, "Create attractions. You can't have too many attractions for the tourist and his family.

What better attraction can you have for an entire family, than the zoological garden? There is no other city in California that has a zoological garden or even a comprehensive zoological exhibit, and this is the only attraction that San Diego has that no other place in the southwest can equal. The advice of Mr. Black could with much profit to the community have gone still farther and said, "Create attractions. But keep and support those you have."

The register of visitors to the zoological gardens is a direct indication of the pleasure that tourists find in the zoo. It is not largely supported at the gate by the citizens of San Diego, or they are not the people which constitute the greatest proportion of its visitors. Out of 28 names on the last six pages of the register, 18 were from San Diego; verification revealed that three of these were visiting at the addresses they gave in San Diego. We believe that the zoo is not supported at the gate by the people of San Diego because it is always here and they feel that they can see it whenever they choose, but it is and should be supported by them in the form of taxation.

Two cents on every \$100 assessed valuation is levied for the zoological garden, and comes out of the fund provided for parks, for it is truly a park function and that is the proper place for its support to be provided. This two cents is now being received, but that is not the minimum fixed by the charter. Make it such by voting for the amendment which provides that not less than two cents out of the 16 cents provided for park purposes shall be used for the support of the zoo.

In return, you receive from the zoological society the development along park lines of 160 acres of Balboa Park that would otherwise be barren as the tract directly across from the zoological garden. You receive in the form of buildings and a zoological exhibit an attraction which it costs three times the amount of tax money received to maintain. You have an educational feature which no other city of southern California has, and your children are brought with their teachers into the garden every school day for visual instruction which no other children of California obtain. It is true that many of the schools of neighboring counties send classes of older children many miles to our zoo, but one of the San Diego children is denied this privilege.

You have maintained for yourself an advertising feature that spreads the name of San Diego all over the civilized world, for there is nothing that receives as much unpaid publicity as the zoo; it is pictured in magazines, Sunday supplements and news reels all over the world. It is written up in every sort of publication that it known and all of it draws attention to the community which contains such an institution. It draws hundreds of visitors to this city and keeps most of them days and even weeks.

Keep the "biggest zoo in the west" in San Diego.

Give it your support by establishing beyond the reach of politicians, the nucleus of a fund for its support. The zoological society raises nearly \$100,000 each year for its development. Show that you are alive to its importance.

Vote YES on Proposition No. 3 on April 2.

Create attractions for the tourist.

But support those that you already have. Other cities are interested in securing such an attraction as our zoo. Keep it in San Diego.

DR. HARRY M. WEGEFORTH.

March 24, 1929, San Diego Union, Development, 6:2-5. Southern California Architecture, by Richard S. Requa.

March 24, 1929, San Diego Union, II, 1:6. John Nolen opposes proposed new Torrey Pines highway.

March 31, 1929, San Diego Union, II, 1:4. Directors of the Chamber of Commerce have indorsed proposition no. 3 on the ballot of Tuesday's election so as to allocate 2 cents instead of one cent, as at present, from the 16-cent levy for parks, to the zoological exhibit.; item has appeared on the ballot twice both and each time has carried, however, each time the action has been nullified through some technicality.

March 31, 1929, San Diego Union, II, 1:5-6. Coming two months good ones for collection snakes for San Diego Zoo, by "The Snake Man."

Every snake destroys a large number of rats, mice, gophers, squirrels and rabbits which would otherwise live to ruin crops or multiply in number until they were themselves exterminated by some expensive process.

March 31, 1929, San Diego Union, Development, 6:2-7. Southern California Architecture, by Richard S. Requa (illus.).

April ?, 1929. Spreckels companies discontinues paying for Dr. Stewart's organ concerts.

April 2, 1929, ELECTION

Proposition 3: Tax of not less than ten cents or more than sixteen cents of each \$100 valuation or property for improvement and maintenance of parks, plazas and squares, two cents of each \$100 to be used for Zoological exhibits.

YES	12,601	NO	10,837

April 3, 1929, San Diego Union, 1:1-2. Urey, Alexander, Maire win in Council fight; Freeholder Ticket to draft a new charter in; Bruschi and Seifert to leave City Hall as result of final election in which light vote is cast; Civil Service appropriation defeated; Zoo measure favored; Mrs. Hale and Claude Woolman lead for School Board.

April 5, 1929, San Diego Union, 7:1. Dr. Edgar L. Hewett resigns office at San Diego Museum; archaeologist is succeeded by Lyman Bryson; Hewett takes title of director emeritus; resignation from San Diego post made necessary by the growth of scientific work under his direction in New Mexico; Lyman Bryson, the new director, is lecturer in anthropology at the State Teachers' College, extension lecturer for the University of California, and contributor to magazines.

The San Diego Museum is visited by more than 250,000 persons annually and its main building, the California Tower, is, perhaps, the best known structure in the city.

April 27, 1929, San Diego Union, 5:4 and April 28, 1929, 19:1. San Diego Floral Association will present its 22nd annual spring showing of roses in building on southwest corner of main plaza in Balboa Park this afternoon and tomorrow.

April 28, 1929, San Diego Union, Development, 1:1. Lion Company \$500,000 store designed by William Templeton Johnson.

April 28, 1929, San Diego Union, Development, 5:2-5. California Architecture, by Richard S. Requa.

April 29, 1929, San Diego Union, 8:1. Enthusiasts say rose exhibits beat Pasadena's; 22nd annual display attracts lovers of blooms from far away; held in the large building on the southwest corner of Plaza de Panama.

April 30, 1929, San Diego Union, 3:4. School Board asks agreement by contractor; shifts placing of responsibility for collapse of six steel trusses on the new high school gymnasium upon arbitrators.

April 30, 1929, San Diego Union, 5:2-4. Two women join in horseshoe meet in Balboa Park (illus.).

May 1, 1929, San Diego Union, 3:3. Cooking class arranged for tonight at American Legion Hall in Balboa Park.

May 4, 1929, San Diego Union, 1:1. Bank of Italy purchased John D. Spreckels Building.

May 5, 1929, San Diego Union, 2:2-4. Miss Maxine Edmonds, Queen of May, at program arranged by Fine Arts Society in the Court of Honor, Balboa Park Thursday; Savoy Players presented "Pyramus and Thisbe" from Shakespeare's "A Midsummer Night's Dream" (illus.).

May 5, 1929, San Diego Union, 14:2-3. Zoo trades small animals and birds for two African leopards and one female Indian leopard of "Big Otto's Famous Cats"; huge spotted leopards worth \$300 or \$400 apiece; arrived in San Diego from Redondo Beach this week; cats sold as part of "Big Otto's" estate; new owner made trade for birds and monkeys; cages will be completed with the next few months; four new grottoes will be built between the present leopard and peccary pens; because of their ability to climb and jump, leopards cannot be kept in open grottoes; series of cages will hold black leopards, the Indian and African leopards, and the puma, the American form of the same animal.

May 5, 1929, San Diego Union, Development, 1:3-7. "Bungalow" on top Bank of Italy Building, part of office of architecture firm of Requa and Jackson; sketch by Samuel W. Hamill.

May 6, 1929, San Diego Union, 5:1. Colorful scene enacted in May Festival; thousand honor students representing 30 schools participate in program in shade of tall trees of Montezuma Gardens, Saturday afternoon; Dorothy Simms of Normal Heights School, crowned May Queen, by Marjorie M. Mohler.

May 7, 1929, San Diego Union, 5:2. Failing to receive an answer to the letter sent last week to the Jarboe Construction Company relative to the latter's unwillingness to submit all matters concerning the collapse of the trusses in the Senior High School Gymnasium to a Board of Arbitration, the Board of Education last night authorized a recommendation by Walter R. Hepner, Superintendent of Schools, to order the Construction Company to proceed with the building of the gymnasium according to the contract.

May 12, 1929, San Diego Union, Development 1:1. City Planning Body will urge 80-foot artery on 28th Street; proposal calls for paving of thoroughfare entire distance; would create fast route from Adams Avenue.

Twenty-eight street, said Robert M. Gregory, superintendent of streets, is the only street that offers a continuous stretch of highway from the bay almost to the northern county line with a break except for a small canyon, diverting it to the east side of Balboa Park for about two blocks beginning at Laurel Street.

The project is understood to have the approval of the Park Commission. The road faces Balboa Park on the east side about one and one-half miles, and provision probably will be made, according to the city operating department, by which the paving of part of the street facing the park may be done at the expense of the Park Board. The condition is the same as that which prevails on the west side of the park from Date Street north.

May 12, 1929, San Diego Union, Development, 3:2-4. California Architecture, by Richard S. Requa.

May 12, 1929, San Diego Union, City-County Section, 10:1. Sumatran tiger and Binturongs arrive safely; little howling gibbons are dubbed "two black crows"; one group filled.

The shipment of animals, which arrived on the S. S. *Siantar*, of the Java Pacific Dutch Lines, added another interesting group of animals to the collection already on exhibit at the San Diego Zoo and has completed one or two groups which have been on exhibit for the last two years. This collection was brought in by Henry T. Steats, who took some animals and birds over to exchange for them in January.

The tiger group has been completed by a handsome adult Sumatran, and now consists of a pair each of Sumatran and Bengal tigers. Wild Java dogs, gibbons, a pair of binturongs, birds of various kinds, among them several species of birds of paradise, eagles, owls, kites, a hornbill and a pair of cassowary make up the greater part of the shipment

Most of them have been put on exhibition since their arrival, but a few will have to remain in seclusion a little longer --- many of these specimens have never been on exhibit before in the San Diego collection, so they will prove of unusual interest locally.

Among the birds which deserve special attention are the birds of paradise. They are rather dirty from their long trip in the small cages, but they are preening their feathers and cleaning up at such a great rate that they will soon deserve their reputation for being the most beautiful of all birds. In this group are included one pair of the greater bird of paradise and one pair of the magnificent. The cassowaries will be welcome by all who knew and loved old "Casey," who roamed at will in the garden for more than three years.

The new ones are young birds and will not be turned out at present, for they are not accustomed to people. In the pen above the alligator pond, where they will be placed, they will complete the large bird group, and be a connecting link between the ostrich and the emu in one canyon and the storks and cranes in the other.

The zoo is particularly happy about this pair, because they are the first ones to be received with perfect bills.

One glance will convince you that the plans and specifications for the first hornbill must have been drawn up by a practical joker.

The binturong, which is on exhibit in the McRae cages at the brow of the hill, below the turtle pens, is a carnivorous animal which belongs to the civet family. It is nocturnal and arboreal in its habits. It also has a prehensile tail which it uses to great advantage.

So far as the children of San Diego are concerned, the prize for greatest popularity will be awarded to the little, black, howling gibbons.

They are the rarest tribe of gibbons, found only in Cochin China, and it has been considered well nigh impossible to keep them alive in captivity.

The "Two Black Crows" will have to stay in one of the monkey cages until the new orang and chimp cages, which have been donated by the Standard Iron Company, are completed. They will be moved next door to the other gibbons, where they will become the second unit in a row of these exhibits.

May 12, 1929, San Diego Union, World-Wide Features: "Realm of Music and Art."

This month's number of **Art and Archaeology**, published in Washington, contains an article by Mrs. Maurice Braun upon the development of the Art Gallery of San Diego.

May 19, 1929, San Diego Union, Development, 1:8. Frank P. Allen, architect, designed new structure for Whitney and Company to occupy site of old Colonial Theater, between C and B Streets from 4th to 5th Avenue; 4th Street front will be mostly of glass; window and door margins will be of black tile.

May 26, 1929, San Diego Union, City-County Section, 1:1. City to honor all war dead Thursday; veterans' parade to move along Broadway and into Balboa Park under flags; memorial service at Organ Pavilion.

May 26, 1929, San Diego Union, City-County Section, 1:2. Flag Day to be observed at Balboa park June 14.

May 26, 1929, San Diego Union, Development, 4:2-4. Frank P. Allen's sketch of the store building Whitney and Company will erect on the site of the old Colonial Theater building.

May 30, 1929, San Diego Union, 7:1. "Agnus Dei" from "The Hound of Heaven," a musical setting by Dr. Stewart for the poem by Francis Thompson to be performed in program of the San Diego Oratorio Society, Nino Marcelli, conducting in park Sunday; also on program, "The Legend of Yosemite" and "The Flag of the Brave"; Mayor Harry C. Clark will preside and will offer an address in honor of Dr. Stewart.

May 31, 1929, San Diego Union, 5:6. Hundreds accord war dead honor at service at Organ Pavilion yesterday; Rev. Lawrence Wilson urged that sacrifices of veterans be not forgotten.

"The value of memory today is that it causes us to stop and ponder. We are pledging our lives today that we do care."

At noon the entire audience stood at attention while the flag was raised from half to full staff and guns boomed salutes in the harbor.

June 2, 1929, San Diego Union, 5:3. Huge tortoises at San Diego Zoo unchanged in character since earth's early days.

June 2, 1929, San Diego Union, 10:8. F. E. Walker named regular snake collector; bring sin 150 reptiles despite cold weather in April.

June 3, 1929, San Diego Union, 2:2-6. San Diego honors Dr. Stewart on his birthday; crowd gathers at Organ Pavilion to hear composer's works ably given, by Wallace Moody.

June 8, 1929, San Diego Union, 10:1. San Diego Museum may buy Babylon relics; documents dating back to 2250 B. C. offered for sale at \$2,800; funds are sought by Director Bryson.

June 8, 1929, San Diego Union, 10:2. Culver Auxiliary, United Spanish War Veterans, to dedicate a palm tree; ceremony will be carried out tomorrow afternoon at the right of the street leading to the Organ Pavilion.

June 9, 1929, San Diego Union, City-County Section, 1:1. Flag Day Service will be held a flagpole on Marston Point next Friday.

June 11, 1929, San Diego Union, 1:3. Deficit compels San Diego Railway Company to close Mission Cliff Gardens; 41-acre beauty spot to be sold because of lack of patronage; closed last Sunday night; Company has been standing a loss of from \$10,000 to \$12,000 a year in maintaining the gardens; John D. Spreckels started the gardens 25 years ago; Superintendent John Davidson spent two or three days a week looking after the plantings; collection of birds in the bird cage; deer that were in the Gardens were transferred to the San Diego Zoo several months ago; no admission was charged to the Gardens, all that the Street Car Company

required was that visitors patronize the street cars; ostrich farm maintained separately from the Gardens by H. J. Pitts; Superintendent Davidson will be pensioned off if the property is sold.

Mr. Spreckels had planned to install the big Balboa Park organ in Mission Cliff Gardens, according to S. E. Mason, general manager of the San Diego Electric Railway Company, but his plans were changed by the exposition, and the organ was built in Balboa Park.

June 18, 1929, San Diego Union, 7:1. Banner raising, colorful parade feature services; birthday of Old Glory fittingly commemorated at Marston Point exercises; Flag Day exercises conducted by Masonic bodies; parade moved up Broadway at 4:30 p.m.; R. O. T. C. band a company; Knights Templars; Shriners, Sciots; Masons; Bonham Boys' Band; Maj. Gen. J. H. Pendleton, U. S. M. C., retired, hosted flag; pledge of allegiance; address by Maj. Gen. John A. Lejeune, U. S. M. C.

June 18, 1929, San Diego Union, 7:6. Throng attends Elks' Flag Day service at Organ Pavilion; John D. Osborn recounts history of Star Spangled Banner; Carl H. Heilbron, past exalted ruler of the San Diego lodge of the Elks, was the speaker of the day; Dr. Stewart and San Diego High School Band played selections; Leona F. Shaw, soprano, sang.

June 18, 1929, San Diego Union, 14:1. Plan sewage purification plant in Balboa Park; may start work soon if Council can find \$250,000; backers point out that big saving of irrigation water would be effected; Curtiss Engineering Company of San Bernardino offered to prepare plans and specifications and superintend construction for 7 percent of the construction cost; cost of operating the proposed plan would be approximately \$10,000 a year; saving from water now served to the park would be from \$45,000 to \$65,000 every year; Mayor Clark said financing the proposition this year would be a hopeless task.

June 18, 1929, San Diego Union, 14:1. Consider plans for park links; City Council referred to City Attorney and Park Commission yesterday application of Recreational Development Company, represented by Paul Healy, for two leases on two pieces of land in Balboa Park.

June 19, 1929, San Diego Union, 6:5. READERS' VIEWPOINT: Praises Citizens' Plan To Improve Park Area

Editor: At last a group of prominent citizens, headed by Paul and Martin J. Healy, have outlined a wonderful plan to improve the east side of Balboa Park by removing the present unsightly brush and building golf courses, playgrounds, swimming pools and baseball fields to make that part of beautiful Balboa Park more beautiful at no expense to the taxpayers.

Not alone will their plans advertise this wonderful city as the playground of the world but it will be the means of creating wholesome and healthful recreation for thousands of officers and enlisted men of the army, navy and marine corps based at San Diego, many of whom, like the writer, will make this their permanent home.

It is gratifying to know that the plans have met with such popular approval and it is hoped that no difficulties will arise to discourage this grateful work. When completed San Diego can rightfully aim to be the playground of the world.

M. E. Throneson.

June 19, 1929, San Diego Union, 7:3. Governor Young signs bill setting aside park of shore and body of water at Mission Bay for park.

June 25, 1929, San Diego Union, 26:1-4. Identity of donors of fine collection of paintings at Fine Arts Gallery revealed as Mr. and Mrs. Bridges.

June 27, 1929, San Diego Union, 5:5. Clubs support move to widen Pershing Drive; paving east side of 6th Street included in budget plea for \$100,000 allowance.

The appeal is made by Charles A. Small, manager of Bishop & Co., who about five years ago was chairman of the Pershing Drive committee that raised approximately \$16,000 for paving the highway through the park., city council at the time adding a small amount. A 20-foot strip of paving was laid down with the cooperation of the operating department which donated labor and equipment.

The cost of widening Pershing Drive to 40 feet and straightening out the dangerous curves has been estimated at about \$70,000 and paving of 6th Street on the west side of the park at about \$33,000.

At a cost of about \$3,000 a small amount of work was done on Pershing Drive earlier this year.

June 30, 1929, San Diego Union, Development, 3:1-4. "Art Moderne" for downtown area; architect Herbert J. Morris' sketch of Fourth Street facade of building for Grand Rapids Home Furnishing Company (illus.).

July 1, 1929, San Diego Union, II, 6:5. Special courses to open Mondays at playgrounds; variety of subjects to be taught during vacation by competent instructors.

Among the courses scheduled are: Drama, art, toy making, folk dancing, games, plays, kindergarten, story telling, marionettes, handicraft, dancing, boat building and shop work, tumbling, woman's gym and piano.

July 1, 1929, San Diego Union, II, 8:2-3. San Diego Zoo displays young condor with amputated wing; bird is one of few surviving survivors of hunters.

Even now, as witnessed by the wounded bird on exhibit, the hunter does at intervals kill or injure one of the two dozen birds which remain of the most spectacular bird which has ever inhabited the western world.

July 7, 1929, San Diego Union, 8:2-3. San Diego Zoo displays young condor with amputated wing; bird is one of few remaining survivors of hunters.

July 7, 1929, San Diego Union, 15:2-3. Baby black panthers at San Diego Zoo decide to make friend out of man, but mother still holds old hatred.

Two years ago a pair of very rare black panthers or leopards was brought from Sydney, Australia to be placed upon exhibit in the San Diego Zoo. Now these two are introducing to the people of San Diego their first American-born offspring. The San Diego Zoo was very fortunate in obtaining these leopards as it was only because the Taronga Park Zoo at Sydney had followed the pattern of barless grottoes for cat animals one step too far that this was possible. Leopards and panthers, the most agile and fierce of all the cats, laugh at moats and steep walls; they can spring up and over the sides of the steepest precipice with scarcely a visible foothold to catch upon in their flight. The pair of black leopards had escaped twice from the grotto in Sydney. Their owners became discouraged and sent them along with other exchanged animals.

The type of grotto adopted by the San Diego Society precludes any possibility of escape, for they are arched cages of grotto type, covered with heavy, chain-like wire. This gives much freedom and natural caves and dens are built for shelter; large logs and tree trunks are provided for their climbing, but escape is impossible.

The black leopard is almost as rare as the beautiful snow leopard; it has indeed never been proved that they are a distinct species and not a freak of nature, for they are found in every natural habitat of the spotted leopard. There are instances of black leopards being born in families where both parents are spotted. It is rare also to have both offspring even of two black parents truly black, so it was with much anxiety that the expected kittens in this family were awaited. The leopards never have become reconciled to their captivity nor to the proximity of the public, so they have been allowed perfect freedom in their cage, which is temporarily located in the monkey group. They have not been shut out of their sleeping quarters and have spent most of the daylight hours out of sight, coming out late in the afternoon to growl and hiss at the venturesome "enemy" who approaches too close.

Since the birth of her cubs on May 17 the female has been so nervous that she has even been shut away from her mate and the sleeping quarters covered with canvas that not an unwelcome sight nor sound could threaten her and cause her to abandon or kill her cubs.

All sorts of delicacies have been provided for her, such as chicken, pigeons and the best of the meat. She has guarded her young and sought to instill in them her hatred and fear of man, but the babies have settled the matter in their own way and for the last week have been spending more and more of their time out in the open part of the cage. They appear about as large as an ordinary black house cat, provided you do not look at their feet, which are huge. They are true black with the underlying marking of brown spots which characterizes both of their parents and which are only evident when they are in strong light. They are beginning to eat by themselves and make valiant attempts to conquer the huge bones tossed in to their mother. They already love to lie up in the crotches of the logs piled into their pen. They pay no attention to spectators.

Many visitors pass by this cage with hardly a glance, seeming not to realize that they are looking upon something not only rare, important and expensive, but something which is exceedingly amusing and well worth stopping to see.

July 14, 1929, San Diego Union, Development, 7:1. Marston orders five trees moved to Presidio Hill, by Ada Perry.

July 14, 1929, San Diego Union, Development, 7:3-4. Woman's Auxiliary of Chamber started beautification asserts Kate O. Sessions, by Julia T. McGarvey.

Miss Kate O. Sessions came through the varied profusion of growing plants in her nursery at Pacific Beach, giving energetic orders for the tying up of a crooked rose bush, as he hurried to greet her interviewer. "You want to know about the early development of Balboa Park?"

She drew a stool confidentially close, and with a mild but direct look, from kindly blue eyes inquired: "Aren't you going to take notes?" Assured that --- since she was not pencil shy --- business could go forward without preamble, she went straight to her story.

"The first planting in Balboa Park was done by the woman's auxiliary of the chamber of commerce, along the western drive, about 1890 Eucalyptus and peppers were planted. About the next year the city gave me the use of 80 acres of ground in the northwest corner of the park, with the understanding that as rental I was to furnish trees when needed in the park and for public schools and streets. Some of the largest trees growing in the park now are the ones I planted then.

"In about 1920 George W. Marston, myself and others became interested in the development of the park, and Mrs. Mary B. Coulston of New York, who had been editor of the **Garden and Forest** was asked to come to San Diego and educate the people in parks and their value to a city. She came; and her able articles in local papers during the year that she was in Mr. Marston's employ, helped a great deal in molding public sentiment.

"A park committee was formed. Among those who served were Mr. Marston, Julius Wangenheim, Ernest White and myself. A topographical map of the park was drafted by Samuel Parsons, superintendent of park work in New York City, who came out to see the park and was tremendously impressed with its possibilities. George Cook, his assistant, was placed in charge of the work when about \$20,000 had been collected. Cook later became superintendent of park work in San Diego. About three years later, the park commission of three members was formed, and J. G. Morley appointed park superintendent.

"The first Arbor day celebrated in San Diego was May 7, 1903. We planted Monterey cypress and some pines. We had quite a big celebration and received congratulatory telegrams from President Roosevelt, the governor and others. A great part of the park is just as it always has been, covered with brush and no big trees --- the canyons, especially.

"Work in the park dragged slowly along for a few years until about 1911 or 1912 when it was decided to hold the exposition. Then the city bonded itself for \$1,000,000 and the citizens raised \$1,000,000. Mr. Morley was put in charge of the work. Pines, eucalyptus, peppers and oaks were planted. In fact, the park was over-planted. It needs to be thinned out now in many places, but that is an expensive proposition. The gale a few years ago did good work in that respect. It really was a blessing in disguise.

"We did not have the problem that San Francisco had with Golden Gate Park. They had to plant lupine, acacia and Monterey cypress in succession before they could anchor the sand. We had hard pan instead. But where the soil was shallow, we were able to add more soil from deeper places in the park.

"George Cook planted the first acacia trees --- *Acacia Baileyana* --- along the western drive of the park in 1903. They were 18 inches high and cost 60 cents apiece. Now they are so large and so old that they should be torn out.

“I think placing the exposition buildings in the center of the park was a mistake. Only their attractive architecture saved the situation. Buildings should always be on the edge of a park. A park is intended for people who want to get out in the open, away from civilization.

“George Marston was the first man in San Diego to plan large grounds around his home. His home adjoined the park on the northwest corner, and the more he planted, the more extensive his plans became.

“When did I come to San Diego” About 1884. I was born in San Francisco, and I was living with my people in Oakland then. I came to teach in the San Diego high school, and I was principal the second year.

“Why did I quit teaching? Well, I had a friend who kept saying ‘Do stop teaching. If you don’t stop pretty soon, you’ll be at it forever.’ And then I met an old Grand Army man and his wife. We met gathering ferns and other things like that out in quiet beauty spots. They wanted to start a nursery, and I said that was exactly what I always wanted to do. So we went into partnership, and converted an old beer garden at Fifth and B streets into a nursery.

“They were old people and conservative. I was from San Francisco, young and full of ambition. The partnership did not last very long; but we divided assets, and I had my start. I have been in business now for more than 40 years.”

July 14, 1929, San Diego Union, City-County Section, 12:4. Sciots to give band and glee club concert at Organ Pavilion Thursday night.

July 16, 1929, San Diego Union, 1:4, 2:3. All-day program will mark 160th anniversary of city.

August 27, 1929, San Diego Union, 6:1. Healy proposes \$25,000 match with O'Rourke; will put that amount into city golf course if objector will do the same.

August 28, 1929, San Diego Union, 1:3, 2:4. Recreational Development Company withdraws offer to rebuild and grass golf links in Balboa Park; will cooperate with anyone who will carry out projects.

August 29, 1929, San Diego Union, 1:6, 20:1-2. Mayor, Realtors, head of Chamber of Commerce urge Healy park plan; call obstacles unwarranted; claim fine golf links a real city need.

August 30, 1929, San Diego Union, 1:6, 2:3. Julius Wangenheim offers private funds to build golf course in Balboa Park; says public-spirited men will furnish \$150,000, take payment from receipts.

August 30, 1929, San Diego Union, 9:1. Special events to be provided at fair grounds; everything free after general admission with one or two exceptions.

August 30, 1929, San Diego Union, 11:4. Joseph Roche writes city needs golf course in Balboa Park.

August 31, 1929, San Diego Union, 10:4. Martin Healy, W. Templeton Johnson and one other citizen have joined with Julius Wangenheim in pledging \$35,000 each toward financing a golf course in Balboa Park.

September 1, 1929, San Diego Union, 3:2-4. Alfred Hertz guest conductor at Organ Pavilion today, by Irene M. Clark.

September 1, 1929, San Diego Union, 5:8. Den prepared for raccoons at San Diego Zoo.

September 1, 1929, San Diego Union, World-Wide Features, 4:1. Acquisitions show esteem for director; A. B. Titus, chairman Fine Arts Gallery committee, says Poland's work recognized in gifts.

September 1, 1929, San Diego Union, Classified, 1:4-5. Radio showing to be held as feature of County Fair; many receiving sets will be shown under auspices of San Diego Trades Association.

September 2, 1929, San Diego Union, II, 1:5-6. Alfred Hertz leads San Diego Civic Symphony, by Wallace Moody.

September 4, 1929, San Diego Union, 5:5. W. Templeton Johnson tells Kiwanians of expositions staged in Barcelona and Seville, Spain at meeting yesterday.

September 4, 1929, San Diego Union, 10:2. O'Rourke scores estimate of \$150,000 on grassed golf course; tells Council proposed links should not cost beyond \$50,000; recently obtained an injunction halting plans for Recreational Development Company for building a course in the park; Company withdraws its offer.

La Mesa built a course for \$25,000 and La Jolla one for \$84,000.

September 7, 1929, San Diego Union, 1:7, 2:4. Opinion opens wide for golf links in park; City Attorney Charles C. Quitman says it is legal for local group to proceed with project.

Legality of private enterprise plans for developing an up-to-date grass golf course in Balboa Park was upheld in an opinion rendered yesterday by Charles C. Quitman, assistant city attorney. The opinion was asked by the park board several days ago and it will be in the hands of that body today. It opens the way for four or five men, who are willing to furnish funds, to proceed along lines similar to those offered in the Healy plan, under direct supervision of the park board.

Quitman has studied the problem since the withdrawal of the Healy plan a week ago, after it has been criticized as an illegal undertaking for the city. He holds that any question of illegality can be obviated through contract procedure with a group of individuals, either as a grouped body or as individuals.

"I suggested such a contract arrangement to the park board a few days ago," Quitman said. "I find that the board can enter into a contract with a group of four or five individuals and grant those individuals the concession of the golf course. I suggested further that the park board, through its contract, may reserve the privilege of keeping up the course, doing all the work attached to development and upkeep, but not the collecting of fees. That would have to be done by the concession holders because of certain charter provisions which prevent the board from receiving funds."

Quitman explained that a plan identical to the one which he submitted to the board was used in Los Angeles when the coliseum was built. Under the plan the concessions holders or those who finance the project, collect all revenues and withhold a certain amount each year until the capital investment, plus interest, has been paid back, when the contract becomes amortized.

September 7, 1929, San Diego Union, 5:6. Harry Fuqua, radio humorist, hurls self from Cabrillo Bridge.

September 8, 1929, San Diego Union, 17:1-2. Two double-wattled cassowaries grace circular pen at San Diego Zoo and are ready to greet visitors.

Several years ago there was in the Zoological Garden running loose and friendly with everyone, a large cassowary. He was somewhat of a pest because he was too friendly, he followed the employee around and knew his name. He feared not the visitors and entertained the children by swallowing half an orange, or a small apple, or a bun at a single gulp. He was, alas, too popular for his own good, and one day he followed some of his friends out of the grounds through a gate which they were able to open in some mysterious way. In attempting to chase him back into the grounds, he was run to the point of utter exhaustion and killed.

It is not difficult to obtain cassowaries, but it is hard to secure perfect specimens which are tame and inoffensive as was "Cassie," the beloved pest of the garden. This spring, however, two young, double-wattled cassowaries came over in a shipment from the Sourabaya zoo in exchange for some American birds and animals. These are tame as two little chickens, they come to the fence begging for food and stick their heads out to be petted, but they are not allowed to run loose for they must be protected from the public. For this, like many of the fences, serves a double purpose to protect the public from the animal and to protect the animal from the public.

The cassowaries, like all the large wingless birds, are well armed. In the wild they are aggressive and do not hesitate to use their weapons in defense. Like the emu, the cassowary has three forward pointing toes on its foot, the center being very large, bearing a heavy nail which can tear great holes in the flesh of its adversary, who is attacked by kicking forward. It lacks entirely any backward pointing toes or spurs, and when resting sits on its haunches with its awkward feet extended before it. Their plumage, for it can hardly be called feathers, is very similar to that of their relations, the emus, but, while there is no visible wing on the emu, the cassowary has several stiff black quills which look as though they might have been filched from an African porcupine. These quills are apparently only useful in making a noise. Whether this is their purpose is difficult to say.

The present cassowaries are still immature, but they are of different sex, and it is hoped that they will be a true pair; for other zoos have been successful in raising both cassowaries and emus. The egg is similar to that of the emu, rough, large and a vivid green. The eggs are incubated and the young care for by the male parent.

There are many species of cassowary found in the groups of islands lying between Australia and the Asiatic continent. The two on exhibition at the zoo are the double-wattled cassowary from New Guinea. . . . They are in the circular pen at the foot of the hill and are always at home to anyone who cares to come with an offering of stale bread, fruit or a head of lettuce.

September 8, 1929, San Diego Union, City-County, 1:1. County Fair will open gates Tuesday; varied exhibits promise to set new high mark for attendance; elaborate entertainment programs arranged.

When crowds storm the gates at the San Diego County Fair at the opening Tuesday evening at 6 o'clock they will find one of the finest exhibitions ever presented to the people of this county. For five nights and four days the large crowds will continue to surge through the gates, viewing the interesting live stock, agricultural, industrial, horticultural and domestic science exhibits.

The San Diego County Fair this year will be virtually a number of expositions combined into one big show with one admission price. It will provide education, diversion, entertainment fun. Each afternoon and evening a varied program will be presented, making it possible for visitors to attend every day and still see something new and hear something different.

Many new attractions have been secured for the fair this year. One of the leading ones is the first annual radio exposition, sponsored by the Radio Traders' Association of San Diego. This mammoth show not only will include presentation of the newest in radio but also will give visitors an opportunity to get a close-up of radio stars and hear them perform in the studio at the show by remote control over stations KFSD and KGB.

The feature attraction for the opening night, Tuesday, will be the spectacular pyrotechnic display. This display will depict in fire the history of San Diego from the time of Cabrillo to the start of Colonel Lindbergh on his epochal flight to Paris.

The program for Tuesday evening will include a sensational straight-jacket release by Mrs. W. King, who has been declared by many to be the successor of the late Houdini.

Free dancing, which will be a feature each evening during the fair, will start Tuesday evening at 8:30 and continue until 11 o'clock.

The County Fair this year will include the fifth district meeting of the American Kings, an organization that comprises breeders of King pigeons. The judging of the pigeons will be done Tuesday morning so that everything will be ready for the exhibition Tuesday evening.

Provision has been made to care for large crowds in the parking spaces. The parking will be without charge and will be lighted and policed.

Frequent street car service will be provided.

September 8, 1929, San Diego Union, City-County, 3:4. Extra entrance arranged for Zoo; visitors may enter back of California Tower during progress of Fair.

The San Diego County Fair, which will open in Balboa Park for four days, will close all of the roads and walks leading to the main entrance of the Zoological Garden. The general admission fee of 50 cents to the County Fair will have to be paid by anyone wishing to enter to zoo by this gate, but this 50 cents does not include the price of admission into the zoo.

The management of the zoo calls the attention of zoo visitors to the entrance which is located back of the California Tower. This entrance is just one block off Laurel Street and outside the County Fair grounds; therefore, visitors to the zoo may use this gate without paying admission into the fair.

It is impossible to reach this entrance with the bus, but a station will be established at the foot of the hill, near the pen containing the boobies and cormorants, and for the period of the fair the round trip from this point and return will be 15 cents. The buses will leave the station on the hour promptly, but will follow the usual plan of accepting passengers any place in the grounds. All of the exit gates from the zoo leading into the fair grounds will be closed from September 10 to 14 because admission to the zoo from the south gate does not include admission into the fair. Only those persons presenting proper evidence of having paid admission into the fair may enter the grounds through the exits of the zoological society.

There are, however, exits from the zoo outside the boundaries; in addition to the ones at the research building, there are two at the north end of the grounds, which are close to the street car stops. These may be used by anyone not wishing to return to the south entrance.

September 8, 1929, San Diego Union, World-Wide Features, 4:8. "Pinafore" to be given on board ship "Star of India: to raise funds for a maritime museum.

September 10, 1929, San Diego Union, 1:4, 2:3. 11th annual county fair will open tonight with fire tableaux; workmen place finishing touch on many booths; new feature this year will be Radio Exposition; Horse Show to start tomorrow; ample free space provided near entrance.

September 10, 1929, San Diego Union, 4:1. EDITORIAL: The Fair

We have a hunch that our friends from the county communities get the most fun out of the fair, but the exposition is a liberal education to the average city dweller. Along with his fun, he learns a new admiration and respect for San Diego's productive and progressive county districts.

September 14, 1929, San Diego Union, Special Features, 11:1-2. Special Features will mark closing day of County Fair; women to compete for rolling-pin championship; men to battle for hay-pitching prize and boys and girls for bicycle awards; horse show winner list given.

September 25, 1929, San Diego Union, 2:4. Patrick F. O'Rourke will advise the City Council as to the manner in which the city may finance the building of a green golf course in Balboa Park today.

September 26, 1929, Minutes of the Board of Park Commissioners.

The Park Superintendent reported that the New Mexico Building would need considerable repairs this year and that he proposed to do the work with park labor, charging the Museum budget with the cost.

The Chairman reported that the City Attorney would prepare a form of concession agreement for the construction of golf course with private capital and test it out in the courts; he would probably get a decision in about 3 months. He preferred to do this rather than approve the Quitman opinion on the subject.

The secretary then read copy of a letter from the City Clerk to the City Attorney stating that the council had asked that a form of concession suitable to all parties be worked out with the Park Commission; report to be made to council meeting, October 7th; also to submit report on new statute providing for the issuance of bonds against expected income for such projects as golf courses.

A meeting with the City Attorney had been arranged for Friday, September 27th, to discuss a concession form.

Request of the Mayor that Pepper Grove be reserved for entertaining the Florida Motorcade, October 13th was approved.

Request of the executive committee of San Diego Symphony Orchestra Association that 10 percent fee to the park department from receipts of concert course be remitted on account of deficit was denied. The secretary to submit memorandum of cost to department as reason for action of board.

Request of Mrs. Rue for flowers for distribution during Realtors' Convention, October 8th-12th, was referred to the Park Superintendent to do the best possible for the committee.

September 26, 1929, San Diego Union, 9:4. City draws plan to widen 6th Avenue; 80 foot arterial freeway contemplated to relieve traffic from north.

September 30, 1929, San Diego Union, 1:3, 2:2-3. Land four giant elephant seals here for San Diego Zoo; 5,000 pounder largest specimen every captured.

September 30, 1929, San Diego Union, 4:1. EDITORIAL: To Solve a Puzzle

A curious impasse confronts the San Diegans who sponsored the recent summer season of outdoor concerts by the Civic orchestra. They have before them the fact of a deficit --- but the real impasse is embodied less in the deficit than in the riddle of what the deficit may mean. The several thousand auditors who heard the concerts did not pay the cost of the season --- yet they cannot be accused of taking charity, for they paid for their tickets. The other thousands who did not attend the concerts, or the people of the city generally, cannot be accused of accepting charity, either, for they are obviously under no obligation to pay for what they did not order.

If the city does not want a symphony orchestra, is there any point in trying to maintain such an institution? If the city does not want an orchestra, why the annual struggle to raise funds sufficient to pay for it?

There is not good and sufficient answer to either of these questions. In addition, there is no convincing evidence that either of these questions is a fair one --- a question, that is, upon the answer to which the future of the orchestra ought to depend. There is room for a variety of definitions as to just what one ought to mean by "the city," and there is also latitude for discussion of discrepancies between what the city wants and what it ought to want or what it could be educated or persuaded to want.

The Civic orchestra probably is one of those brace and stubborn enterprises that will not accept failure. There are plenty of life's good things which do not pay for themselves at the box office. And sponsors of the orchestra are more likely to outwit the box office than to permit the box office to master them.

October 1, 1929, San Diego Union, 1:8. John P. Mills sues city for \$1,250,000 damages; demands return of Cliff Park; action based on allegations of breach of contract for care of property.

October 1, 1929, San Diego Union, 13:2-3. O'Rourke explains his opposition to park golf course concession; no limit on amount golf course is going to cost except that it is going to cost less than \$100,000; City reserves control over salaries to be paid and prices to be charged, but reserves no control over any other matters of expenditure; City helpless to do anything unless it reimburses the concessionaires all their expenditures plus 7 percent; concessionaires can make golf course an exclusive club.

October 3, 1929, Minutes of the Board of Park Commissioners.

Present: Commissioners Jones, Marston and Olmstead.

Chairman of "Light's Golden Jubilee" requested permission to use Stadium October 21st.

Approved, provided it does not interfere with High School activities.

The secretary presented draft of concession agreement for construction of golf course, prepared by City Attorney Conklin. The chairman stated that Mr. Byers, Assistant City Attorney, had answered the original complaint of Mr. P. F. O'Rourke that the board had not entered into such an agreement as the complaint recited; and that he had submitted the agreement as now drawn to be tested out in court. The case had been held over to give Mr. O'Rourke time to amend his complaint.

Letter was received from MacKenzie and Egan, Architects of San Francisco, relative to plans and specifications for municipal golf course in Balboa Park, enclosing folder giving list of courses constructed and charges for services. The letter was ordered filed, secretary to acknowledge receipt, stating that consideration will be given same when course is to be constructed.

Mr. W. A. Huggin requested free use of Stadium October 31st for Halloween Celebration. Use of stadium was denied, permission being given to hold the event along Park Avenue, between Juniper and Quince.

Mr. Olmstead brought up the matter of occupancy of part of the Zoological Gardens by O'Rourke Zoological Institute. After a discussion of the history of the case, Mr. Olmstead moved that the City Council be asked what action, if any, has been taken to carry out the intention of Resolution of the Council No. 45803, May 28th, 1928, whereby the City Attorney was instructed to have the Nevada Building vacated by its present occupants, the O'Rourke Zoological Institute. The motion was seconded by Colonel Jones; and being put by Mr. Marston, the motion prevailed.

Mr. H. C. Jackson, Wilson's Auto Park, 4th and Ash, appeared before the meeting regarding installation of Shuffle Board in Balboa Park. If the park department cannot do the work, he will stand the expense of construction of one course. The matter was laid on the table, to be taken up in two weeks.

Mr. Morley, park superintendent, reported that when work on New Mexico Building and American Legion Building is completed, he would be ready to go ahead with construction of Comfort Station at Horseshoe Pitch. His program met with the approval of the board.

October 6, 1929, San Diego Union, Classified, 1:5-6, 2:1-2. Nate Kaufman plays fiddle for San Diego Zoo animals.

October 7, 1929, San Diego Union, 2:6. Edwin H. Lemaire played selections at park organ yesterday afternoon.

October 9, 1929, San Diego Union, II, 12:4. Zoo Institute ouster up again; Park Commission asks City Council for report on 1928 action.

Reviving the dispute which has existed for several years regarding the right of the O'Rourke Zoological Institute to occupy the Nevada Building within the grounds of the San Diego Zoological Society in Balboa Park, the Park Commission yesterday asked the City Council for a report on the demand of the Council on May 28, 1928, that the O'Rourke Institute be ousted from possession of the Nevada Building.

A resolution was adopted by the Council in May of last year directing James E. O'Keefe, then city attorney, to take the necessary steps to force the O'Rourke Institute to vacate the building. There is nothing in the city attorney's office to show that any action was taken to carry out the instructions of the Council, and the O'Rourke Institute has continued to occupy the Nevada Building.

The resolution was a result of a complaint by Harry Wegeforth, president of the San Diego Zoological Society, that the O'Rourke Zoological Institute was occupying the building without authority.

It was contended by P. F. O'Rourke, representing the Institute, that permission to use the Nevada Building was granted by the Park Board, and that at an expense of \$50,000, Mrs. O'Rourke had moved the building from its former location among the exposition buildings and had remodeled the building to suit the purposes of the Institute.

October 15, 1929, San Diego Union, 8:1. Council to act of park golf lease Monday; Colonel Jones recommended operation of links in Balboa Park; concession for course will be granted to Julius Wangenheim and his associates if Council approves; Concessionaires will expend not less than \$100,000 in laying out and equipping the course; water will be furnished free to concessionaires; Assistant City Attorney C. L. Byers makes distinction between "lease" and "concession."

October 15, 1929, San Diego Union, City-County, 1:2. Asks information on O'Rourke row; Park Board "wants to know" what became of ouster; notation reads "forget it."

The request of the Park Commission for information on action taken by the City Attorney in response to instructions to oust the O'Rourke Zoological Institute from the Nevada Building was referred back to the City Council yesterday by the City Attorney.

Two years ago, James E. O’Keefe, then City Attorney, was directed by Council to take the necessary steps to force the O’Rourke Institute to vacate the Nevada Building. An investigation was made by one of the Deputy City Attorneys and a report was submitted to Council.

The final notation on the records in the City Attorney’s office is “forget it,” as having come from the City Council.

October 19, 1929, San Diego Union, 10:4. City Council and Board of Supervisors favor Nolen plan for Mission Valley highway; Mission road cut to 26-foot width temporarily to reduce cost of project.

October 20, 1929, San Diego Union, 16:1. New Fox Theater will open at 7th and B Streets nights of November 6; designed by William Templeton Johnson; style of French Renaissance of Francis I period; decorative details copied from places of the Loire.

November 29, 1929, San Diego Union, 12:3-6. Thanksgiving Day service in Balboa Park yesterday joined by all denominations.

December 1, 1929, San Diego Union, 12:4. New high school gymnasium will be formally opened by students December 15.

December 1, 1929, San Diego Union, 1:2, 3:6-7. Requa and Jackson announce plans for 21 new homes costing up to \$75,000 (illus.).

December 2, 1929, San Diego Union, 10:2-3. Thomas Edison, in letter of Dr. Raymenton, praises work of O'Rourke Institute.

December 3, 1929, San Diego Union, 5:3. New high school gym closed to outside dancers; bids opened last night for installation of bleachers.

December 6, 1929, San Diego Union, 8:8. Frank W. Seifert, former Councilman, offers new plans for golf course and water plant; an 18-hole golf course in Balboa Park combined with a water reclamation plant in Switzer Canyon would save water for city; appeared before Park Board yesterday; sewage treatment plant and a reservoir near Pershing Drive; syndicate to build; would take 10 to 15 years to amortize costs.

December 7, 1929, Letter, C. L. Byers, Assistant City Attorney, to A. S. Hill, Executive Secretary, Board of Park Commissioners (C. Box 1. Board of Park Commissioners Correspondence, File: Fine Arts Society, 1922-1930, San Diego Public Library).

In answer to your inquiry as to whether or not claims of the nature submitted, whereby expenses of lectures given in the interests of art to the members of the Fine Arts Society are proper charges against City Funds provided for the maintenance of the park, I have to say that it is my opinion that there is no provision made under the charter or under the Budget Ordinance which would authorize the Board of Park Commissioners in paying claims for the benefit of members of the Fine Arts Society. Board of Park Commissioners are authorized to incur liabilities for the maintenance of the park and its different departments, and the Budget Ordinance provides funds for the payment of the same; but it is my judgment that charges of the nature above mentioned do not come within the provisions applicable to the maintenance of the park.

December 8, 1929, San Diego Union, II, 1:3-5, 6:4. Park polar bears to "receive" today.

December 8, 1929, San Diego Union, Development, 1:1. Council will hear park irrigation plan; Seifert to present project tomorrow.

December 10, 1929, San Diego Union, 11:5 Council refers Balboa project to Park Board.

December 14, 1929, San Diego Union, 14:5. Special program opened new gym at high school last night.

December 15, 1929, San Diego Union, 8:6-7. Zoological Institute courses interest hundreds of children.

December 15, 1929, San Diego Union, World-Wide, 4:1. Reginald Poland details Yule rites, beauty assets of park; pleads to save Torrey Pines.

December 15, 1929, II, 8:6-7. Zoological Institute courses interest hundreds of children.

A program of nature study second to few in the country and with interest continually increasing among children of the community is being developed in San Diego at the O'Rourke Zoological Institute in Balboa Park, unique among institutions of its kind in the work, according to Dr. W. Raymenton, director and child educator.

Attendance figures for eight weeks in the summer of 1929, as compared with figures for a corresponding period in 1928, show a growth of from slightly under 800 to more than 2,600; while in the fall period during school session the increase has been as great in proportion, Dr. Raymenton declared.

Much of the program is carried out in nature study groups arranged in private homes, to which are invited children of the neighborhood. This serves as an elementary interest factor, spurring the child on to further study, much of which is conducted in field work under the tutelage of Frank F. Gander, head institute instructor, and in advanced study classes for research purposes in the Institute's class rooms.

No subjects foreign to the child's environment are considered at first, but the attempt is made to awaken interest in the nature that surrounds him. Studies of familiar birds, their calls, habits, idiosyncrasies; this is followed by mounting and classifying specimens. In a short time, Dr. Raymenton declared, the child develops a knowledge of nature surprising in its extent and accuracy.

(A letter from James F. G. Hunter of San Diego thanking the O'Rourke Zoological Institute for tutoring his son follows.)

December 15, 1929, San Diego Union, World-Wide, 4:5-6. Matters Musical, by Wallace Moody

December 24, 1929, San Diego Union, 10:4. City Council agreed yesterday that Park Department will not be permitted to transfer \$700 from salary funds to purchase chairs and supplies for Fine Arts Gallery; Council members held putting wages in pockets of workmen was more important than furniture.

December 29, 1929, San Diego Union, II, 8:5-8. O'Rourke Zoological Institute offers varied program for next month; children and adults provided with chance to learn free about wild life (photo of the O'Rourke Zoological Institute building)..

Proof that instruction in nature lore is offered in varied and interesting ways at the O'Rourke Zoological Institute is to be found in the schedule for the month of January which has just appeared on the bulletin board. The first event of the month is the meeting of the O'Rourke Garden Club Saturday morning, January 4, at ten o'clock. The club meets to study plants and to learn how to grow them. It is open to all boys and girls of the city. Saturday afternoon instructor Gander will visit the Blue Bird troop of Girl Scouts to instruct them in the ways of bees and birds and butterflies.

Monday, January 6, and on each subsequent Monday throughout the month, a class in nature lore for children of grammar school age is held at the Institute from 3:30 to 4:30 p.m.. On the morning of Wednesday, January 8, at 9:30 a one-hour class in nature lore for adults will be offered. This will be the first session of the class and it will be followed by meetings every Wednesday morning until the summer vacation period. This class is primarily for mothers of students at the Institute and Girl Scout leaders, but all adults who are interested in nature are invited to attend. Wednesday afternoon at 3:30 the Junior Audubon Club holds its meetings at the Institute. This is a club of junior and high school students who meet to study birds.

Thursday, January 9, at 7:30 p.m. a free motion picture and illustration lecture on birds of prey of San Diego County will be given at the Institute. This is the second of a series of lectures on the wild life of this region. Instruction in nature lore will be given to the children of Beach school in Coronado. On the night of the 10th and Investiture ceremony will be staged by the Boy Scout Troop 41, which is sponsored by the Institute. Parents of the boys are especially invited to attend this meeting.

The highlight event of the month will be the entertainment to be given at the Institute by Captain Hugh Voorhies on Saturday, January 11, at 2 p.m. Since moving to San Diego a few months ago, Captain Voorhies has become well-known as a lecturer on the outdoors and as an imitator of outdoor sounds. He is also famed for his performance on the banjo, fiddle and flute. For this last instrument he has composed several beautiful pieces derived from the songs of birds. An admission charge of 25 cents will be made for this performance, which is the only event of the month that is not entirely free. Following Captain Voorhies' exhibition, a motion picture of birds will be shown.

The rest of the schedule includes a talk on nature lore by instructor Gander for the children of Nazareth House in Mission Valley on Thursday morning, January 16, a hike with the Boy Scouts on Saturday, January 18, and a trip to the beach to gather sea shells and to study birds and other wild life of the beaches on the 25th. On the 28th, instructor Gander will make a talk on birds before the San Diego Women's Club.

Through the work of Carroll De Wilton Scott in the public schools a large number of children have been awakened to an interest in nature, but unfortunately many of these children live too far from the Institute to attend the classes there. To meet the needs of these children, nature study clubs have been organized and meetings are held in several public schools, just after school is dismissed in the afternoon. The work of these clubs is supplementary to the regular nature study taught in the classroom and is for those who have a special interest in the subject.

Dr. W. H. Raymenton, director of the Institute, has organized and directs the work of the Children's Home Science Circle. Members of the Institute and volunteer tellers of nature stories visit homes and the very young children and the parents benefit from these visits.

All this class and home instruction is a gift to the children of San Diego by the O'Rourke Zoological Institute.

The San Diego Aquarium Association meets at the Institute the first and third Monday of each month and anyone interested in the propagation and care of the inhabitants of the aquarium are cordially invited to be present at these meetings.

December 29, 1929, San Diego Union, World-Wide, 4:1. Prominent visitors express views of gallery exhibits, by Reginald Poland.

(Annual Edition: Page sequence is confused as sections improperly described.)

January 1, 1930, San Diego Union, 6:7-8. Nature Guide Service, by Clinton G. Abbott, Director Natural History Museum, Balboa Park.

January 1, 1930, San Diego Union, 8:4. Miniature golf course opened at 6th and Grape Streets paralleling for a block the lower end of Balboa Park.

January 1, 1930, San Diego Union, 2:4. Local archery club is active on lawn of Balboa Park along 6th Street, near Laurel Street.

January 1, 1930, San Diego Union, Life-Industry, 9:1-6. Municipal tennis courts feature of Balboa Park.

January 1, 1930, San Diego Union, 6:1-2. Balboa Park Stadium scene of thrilling contests; recently constructed Gym aids in promoting all sports at "Hilltop."

January 1, 1920, San Diego Union, 10:2. 18-holes in Park; proposals for grassing offered.

January 1, 1930, San Diego Union, 9:1-5. Balboa Park is one of San Diego's show places.

January 1, 1930, San Diego Union, 6:1. Navy operates hospital in Balboa Park; imposing group of buildings overlooking city and bay.

January 1, 1930, San Diego Union, 2:1-2. Recitals on Spreckels Organ; programs arranged to develop taste for classical compositions, by Dr. Humphrey J. Stewart.

January 1, 1930, San Diego Union, 3:1-2. San Diego Zoo has attained fame throughout world; system of cages unique feature.

January 1, 1930, San Diego Union, 4:1-3. Art Gallery is treasure house of masterpieces, by Reginald Poland.

January 1, 1930, San Diego Union, 6:7. Study of nature promoted by O'Rourke Zoological Institute in Balboa Park, directed by Dr. W. H. Raymenton.

January 1, 1930, San Diego Union, 8:8. View from California Tower.

January 1, 1930, 10:1-2. San Diego is proud of its Natural History Museum, by Clinton G. Abbott, Director.

January 7, 1930, San Diego Union, 8:4. Park Board approves nature study museum; authorizes new children's room at Indian Arts Building.

January 7, 1930, San Diego Union, 12:5. E. R. Lockheart, 70, leads to death off park bridge.

January 10, 1930, San Diego Union, 8:2-3. Park Board hears Torrey Pines grade arguments.

January 11, 1930, San Diego Union, 3:3. Park Board tables request to build Torrey Cliffs highway.

January 12, 1930, San Diego Union, II, 3:1. Natural History Museum names new directors; annual report shows amount of work accomplished by institution.

January 17, 1930, San Diego Union, 1:6, 2:2-3. Park Commission delays action on cliff side road for two weeks.

January 18, 1930, San Diego Union, 11:4. Julius Wangenheim elected president of Fine Arts Society yesterday.

January 19, 1930, San Diego Union, World-Wide Features, 4:1. Annual report shows progress at Art Gallery, by Reginald Poland.

January 21, 1930, San Diego Union, 6:2. The City Council decided yesterday that San Diego Museum must get along without a field archaeologist; Councilman Maire did not know what an archaeologist was; hurls charges of budget peddling and misrepresentation.

January 26, 1930, San Diego Union, World-Wide Features, 1:1-2. Chicago to entertain at \$30 million "Century of Progress" Fair in 1933.

January 28, 1930, San Diego Union, 10:2. Council yesterday voted against employment of a field archaeologist at San Diego Museum.

January 30, 1930, San Diego Union, 2:3. William Templeton Johnson opposes Torrey Pines cliff road.

January 31, 1930, San Diego Union, 1:7. Park Board offered to cooperate to provide a "bread basket" for victims of involuntary unemployment by improving a road through park.

February 2, 1930, San Diego Union, 14:1. Drop around zoo and see what ground hogs will do on February 2 (illus.)

February 2, 1930, San Diego Union, II, 8:2-3. Arthur H. Hill urges scenic improvements along park trolley line; on each side of the track in the vicinity of the old Yorick theater are unsightly stretches of ground covered with old concrete blocks, torn-up cement walks and a few sickly shrubs.

February 7, 1930, San Diego Union, 12:4. Dr. R. D. Hollington, head of the Theological Department of Northwestern University at Evanston, Illinois, painted a glowing picture of San Diego when he addressed the Rotary Club yesterday at the San Diego Hotel.

February 9, 1930, San Diego Union, Development, 1:7. Mission Bay development is pictured. Completion of causeway expected to open way for big area adjacent to water.

February 14, 1930, San Diego Union, 13:5. Council delays action of park water project; awaits recommendation of Park Commissioners on sewage disposal; proposed plant would tap city sewage lines and recover the water for park and golf course irrigation.

February 16, 1930, San Diego Union, II, 1:4-5. Wild ducks come home to roost at San Diego Zoo.

February 16, 1930, San Diego Union, Water Progress Section, 1-6.

February 20, 1930, San Diego Union, 2:1. Colonel W. W. Crosby reports to Park Board today on Torrey grade.

February 20, 1930, San Diego Union, 9:2. Miss Helen Ramage, executive secretary of County Welfare Commission, says County-City emergency employment measure to provide temporary employed on Balboa Park roads to those in need is a success.

February 21, 1930, San Diego Union, 1:6-7, 12:1-8. Colonel W. W. Crosby, engineer, reports against proposed cliff side highway.

February 13, 1930, San Diego Union, 5:1. Building of a dam and a bulkhead asked for at Mission Bay.

February 23, 1930, San Diego Union, World-Wide Features, 8:1. Fine Arts group to hear lecture by William Templeton Johnson, by Reginald Poland.

February 24, 1930, San Diego Union, 10:6. William Templeton Johnson to tell of Spanish fair in talk at Art Gallery tonight.

February 25, 1930, San Diego Union, 1:5, 6:2-5. Park Board refuses to permit cliff road on grade; Commissioners Olmstead and Marston align against Crandall.

February 25, 1930, San Diego Union, 11:1. Council orders plan to build dam across Mission Bay.

February 25, 1930, San Diego Union, 11:4. Requests of the Park and Playground Commissions for transfer of funds within their own budgets aroused the ire of Councilman Alexander yesterday and caused him to renew his demand for Budget Control Officer to oversee the financial workings of the city departments.

February 28, 1930, San Diego Union, 1:4, 2:6. Park Commissioners will not sanction a commercial highway through Torrey Pines unless it has been submitted to a vote of the people; Crandall was not at meeting.

February 28, 1930, San Diego Union, 11:3-5. Natural History Museum will receive three mounted animal groups from University of California.

February 28, 1930, San Diego Union, 11:6. Captain J.H. Matheson appointed manager of Star of India.

March 3, 1930, San Diego Union, 6:3-4. Dr. Humphrey J. Stewart's composition played at opening of Balboa Park music series.

March 4, 1930, San Diego Union, 1:8, 2:5-6. City Attorney M. W. Conkling informed City Council yesterday that the Park Board has no jurisdiction over Torrey Pines Park as the area was never legally set aside as a preserve.

March 5, 1930, San Diego Union, 1:6, 2:5-6. Council takes Torrey Pine area from City Park Control; rescinds ordinance of 1899 and instructs Manager Lockwood to proceed with construction of highway.

March 7, 1930, San Diego Union, 8:5. The Park Board raised no objection to the construction of a water reclamation plant in one of the park canyons provided the plant complies with the restrictions of the State Sanitary Engineer; the Board does not want the cost of water delivered from the plant to park lands to be charged against the park's budget; cost of project estimated at \$500,000 by the promoters; reclamation plant and 18-hole golf course would revert to the city after 15 years.

March 8, 1930, San Diego Union, 5:2-3. Captain D. N. Carpenter tells Sciots that Naval Hospital is an asset to city.

March 16, 1930, San Diego Union, II, 1:4. Huge Ensenada beach resort nearly ready.

March 21, 1930, San Diego Union, 1:6. Fate of Torrey Pines road in hands of court; Judge Haines to decide suit.

March 23, 1930, San Diego Union, II, 3:2-5. I. E. Lovell, architect who prepared plans for restoration of Mission San Diego donates \$600 to restoration fund.

March 23, 1930, San Diego Union, II, 12:3. Richard Requa to show films of Mexico in Fine Arts Gallery, Balboa Park, Tuesday night.

March 26, 1930. Board of Park Commissioners granted U. S. Naval Hospital right to use the field known as "the rockpile" to the right of the highway leading from the Hospital to A Street, formerly used by High School as a football field.

March 26, 1930, San Diego Union, 12:5. Council to take action on park sewage project; would reclaim 1,500,000 gallons of water daily for use on city land.

Proposed plans for a treatment plant for sewage water to be used for irrigation purposes in Balboa Park, with sufficient water left over for the upkeep of a municipal golf course, were discussed yesterday by the city council.

The plan, as presented, calls for a treatment plant, which would be built in one of the park canyons, capable of handling about 1,500,000 gallons of water daily. Tentative figures show that the city could buy the water from a syndicate formed to treat the water at about 20 cents per 1,000 gallons. This figure, it was pointed out, is slightly less than it now costs the city to get water from the San Diego river.

As a result of yesterday's conference, the city attorney was instructed to prepare an ordinance, which would permit the city to enter into negotiations with the park board. J. V. Alexander, councilman, was appointed to investigate the manner in which water for municipal golf courses is handled in other cities, also to ascertain facts about charges for playing on such courses and other costs connected with such a plan.

Whatever is done, according to Mayor Clark, the plant will have to be approved by the state board of health. The water from one of the large sewer lines would be diverted into the treatment tank, purified, and then distributed through the park in separate pipes. The mayor explained that by this system about 1,500,000 gallons of the city's water resources could be saved for other purposes. It was announced at the

conference yesterday by R. F. Goudy, connected with the water development bureau of Los Angeles, that a similar plan is being built in Griffith Park and that it will be ready for operation in two or three weeks.

With the syndicate's proposal was seen another opportunity for the city to have its much talked of grass golf course. The city, according to the proposal, would be protected from all liability and it could take over the course at any time it sees fit, provided the investors are paid the money spent on building up the course. The charge for playing on the course would be arranged to meet the pocketbook of all players, \$1 a round being suggested by members of the council as a fair charge. Other tentative fees discussed at \$5 a month and \$60 a year.

M. W. Conkling, city attorney, regarded the treatment plant as a means for saving the city money, besides affording an up-to-date golf course. If successful, he said, that such a system for purifying water might develop into a broader plan for saving the city much of its water resources.

March 30, 1930, San Diego Union, II, 1:3. Contract ready for golf course; Council to consider plan of Seifert and associates for water plant tomorrow.

April 4, 1930, San Diego Union, 11:3. O'Rourke accuses Park Directors Crandall and Marston of serving two masters.

April 8, 1930, San Diego Union, 6:1. Council approves \$600,000 park plant; reclaimed water will cost the City \$100,000 yearly; grassed golf course to be part of contract and revert to public in 15 years.

The council voted unanimously yesterday to sign a contract providing for construction of a water salvage plant and a grassed golf course in the park, to be financed by city purchase of the reclaimed water for irrigating the park.

Details of the contract will be worked out at an adjourned meeting of the council and promoters of the reclamation project at 10 o'clock this morning. Under an agreement already reached the price to be paid by the city for the reclaimed water must not be more than 18 cents a hundred cubic feet. The contract will run for 18 years and the city may take over the plant at any time by paying the unamortized cost of the project plus 5 percent for anticipation of bonds that would be issued to finance the proposition.

Under the tentative set-up the city would pay the reclamation plant operators around \$100,000 a year for the water recovered from sewage and used for irrigation in the park. Filtered water at present used for irrigating the park could be diverted to domestic use, it was asserted.

The project will cost between \$500,000 and \$600,000 to install. Frank W. Seifert, former councilman said. The city, he said, would get 10 percent of the gross revenue of the golf course and at the end of 15 years would have the whole plant turned over to it free. During the 15 years the promoters of the plan hope to recoup their investment and make a profit.

It is the intention of the promoters to institute a friendly suit to adjudicate the contract immediately after the council signs it. After adjudication of the suit construction will start if the suit is decided favorably for the project.

Efforts to have the ordinance authorizing the council to sign the contract made an emergency measure were blocked by the mayor and several councilmen and the ordinance was made the usual 30-day measure, giving citizens an opportunity to start a referendum if they so desire. So far no protests have been made against the plan.

April 9, 1930, San Diego Union, II, 1:2-3. Martin J. Healy says city's future welfare demands water plant.

April 13, 1930, San Diego Union, 16:2-3. Reptile House in San Diego Zoo is like buzzing beehive as new rattlers obtained.

April 19, 1930, San Diego Union, 8:8. Rabbit breeders open 6th show on County Fair grounds across from Zoo.

April 20, 1930, San Diego Union, 8:6. Three great life groups exhibited at Natural History Museum here; new sea lion and mountain sheep specimens reassembled; donated by University of California.

April 22, 1930, San Diego Union, 1:5, 8:1-2. Court holds Park Board has full jurisdiction over Torrey Pines area.

April 22, 1930, San Diego Union, 10:3. William Templeton Johnson, local architect, honored by Spain.

April 23, 1930, San Diego Union, 14:1-6 and April 27, 1930, II, 1:8. City Attorney to appeal Court's decision on Torrey Cliff highway.

April 23, 1930, San Diego Union, Classified, 9:8. Yorick Players to resume work at Wednesday clubhouse.

April 25, 1930, San Diego Union, Classified, 10:2-8. H. K. Trask, secretary of League to Save Torrey Pines Park, defends Park Board.

April 26, 1930, San Diego Union, 6:1 and April 27, 1930, 4:1. Annual flower show on main plaza in Balboa Park will open this afternoon.

April 26, 1930, San Diego Union, 8:1 and April 29, 1930, 8:1. Door of Hope, welfare house at Ocean Beach, is on land that is part of a city park created by ordinance on April 12, 1909, now known as Collier Park.

April 29, 1930, San Diego Union, 8:1. Council orders opening of 7th Street across canyon to make a continuous roadway from Upas to University.

April 29, 1930, San Diego Union, 9:4-5. Blaze of color features O'Rourke students first annual wild flower show.

April 30, 1930, San Diego Union, 10:1. Council and mayor to ask people to vote right-of-way out of Torrey Pines Park; Mayor expects two members of Park Board to resign if people approve measure.

May 2, 1930, San Diego Union, 7:3. Clash features hearing on park sewage project; Seifert outlines plan before Chamber board; Lessem, city health officer, points out "menace."

Engineering and other details of the proposed reduction plant and 18-hole golf course in Balboa park to be constructed by Frank Seifert and his associates were outlined to members of the board of directors of the chamber of commerce yesterday afternoon. The entire session was taken up by proponents and opponents of the proposed project.

Dr. Alex M. Lessem, city health officer, differed sharply from the statements of R. F. Goudey, former resident engineer of the state board of health, who in describing the engineering details of the reduction plant, said they represented the highest type of reclamation and were being successfully used in 20 American cities.

Dr. Lessem said that all these plants constitute a public nuisance and that the chief danger of the Balboa Park project was the danger of pollution of domestic drinking water from the lines paralleling those that will be used in carrying irrigation water from the reduction plant. "The board of health has gone on record as opposing this plant," he said.

Frank Seifert recited in detail the amount of money now required to operate Balboa Park. He declared that 12,000,000 gallons of sewage are being emptied daily into San Diego bay and that in a very few years the city will have to do something to eliminate this menace to the public health.

Seifert said the proposed reduction plant and golf course would be an asset to the city and would be the means of saving the taxpayers a large sum annually. The company with which he is associated, Seifert declared, is preparing to expend \$150,000 on the golf course, \$250,000 on the reduction plant and \$50,000 for buildings and water mains.

The board of directors took no action on the project.

May 8, 1930, San Diego Union, Classified, 2:5. Will open new horseshoe club in park Sunday; chess and checker groups also included in recreation center at 8th and Date Streets.

May 10, 1930, San Diego Union, 6:3. No compromise seen in Torrey Pines road row; Mayor Clark says voters will have to decide.

May 11, 1930, San Diego Union, 1:7-8. Manager F. M. Lockwood would remove Pershing Drive, the east side of 6th between Date and Upas Streets, and the north side of Date, between 6th and 10th Streets, from city park system so improvements can be conducted.

May 11, 1930, San Diego Union, 13:1. New clubhouse is dedicated at Horseshoe Court; Mayor Clark and B. W. Sinclair praise project as boon to tourists.

May 11, 1930, San Diego Union, II, 1:4. Indian meeting set for June 1 at Organ Pavilion; Federated Women's Clubs plan program to aid Indians with their problems.

May 13, 1930, San Diego Union, 1:2, 3:2. Council to ask withdrawal of five park strips; adds extensive scheme of street improvement if voters grant authority.

May 13, 1950, San Diego Union, 5:3-4. Park Board closes Door of Hope on Salvation Army in Ocean Beach.

May 13, 1950, San Diego Union, 5:5. Public hearing set for Tuesday on golf project; contract for course and water reclamation plant in park filed with Council.

With the filing of a proposed contract for construction of a golf course and water reclamation plant in the park to be financed by sale of water reclaimed from sewage, the council yesterday set next Tuesday morning at 10 o'clock for a public hearing in the city hall.

With the contract was filed the opinion of the city attorney's office on the contract. The project is estimated to cost \$500,000.

The contract provides that the promoters shall erect a treatment plant to reclaim water; an 18-hole grassed golf course and a distribution system to carry the reclaimed water through the park for irrigation purposes.

The contract also provides that the city shall buy 1,250,000 gallons of reclaimed water a day, at 16 cents a hundred cubic feet. If the city buys the contract amount per day for 15 years the reclamation plant and golf course will be turned over free to the city.

If the plant is declared a nuisance, the city may require its removal at the expense of the builders and with no obligation on the part of the city. Then the city would be required to pay the project promoters the unliquidated capital investment on the golf course, but the payments would have to be made only from revenue of the course after it was taken over. If the court decides that the contract, as it relates to construction and maintenance of the golf course, is illegal, the city would take over the course and pay for it from revenues, purchasing water from the reclamation plant.

The contract also provides that the city may take over the plant at any time after it is built on paying the capital investment plus 5 percent for anticipation, or before the end of the 15-year period, provided the capital investment is recovered before that date.

The opinion on the contract was written by C. L. Byers, assistant city attorney. He reports that the contract is in a form which he approves, but he admitted there is no parallel under consideration anywhere in the state. Until there is a court finding, he says, the matter probably will be open to argument.
