March 18, 1967, San Diego Union, B-3:2-3. The San Diego Botanical Foundation notified the City Council yesterday that it has been unable to reach agreement with the 200th Anniversary Committee on plans for a Spanish pavilion in Balboa Park.

March 19, 1967, San Diego Union, F-1, F-9. Easter Lilies Debut in Park Display

It's Palm Sunday and in keeping with the season a mass of snowy white Easter lilies is the center attraction in the Botanical Building in Balboa Park today.

The lilies replace hundreds of daffodil blossoms that for nearly a month had given a golden glow to the high-arched lath structure behind the water lily pond off Laurel Street.

Still on display and about at their peak of beauty are displays of tulips. Reknown, a new orange variety, and Marje, which has large white blossoms.

The quick switch from daffodils to lilies was possible because the bulbs are grown in pots in the Balboa Park Nursery and taken to the Botanical Building for display as the various varieties come into their blooming periods.

Nurseryman George Kempland reports the Easter Lily (*Lilium longiflorum*) display will contain about 600 spikes, each of which will have ten to twelve blossoms. The show of the long, white trumpet blossoms will last about four weeks.

During that time, it is expected that many of the brightly colored Cineraria now budding in the nursery will be moved into the Botanical Building.

"Weather variations this year have confused the flowers on the season," Kempland reported.

But getting back to bulbs, Kempland explained that two factors account for the high color, size and quality of the spring bulb displays at the park this year.

The first factor is that new Holland bulbs are used each year. This is primarily an economic matter, Kempland said, pointing out that labor involved, handling and storing is more costly than new bulbs, the need for chilling is eliminated, and new bulbs are more dependable for production of bloom.

The second factor in the success of the bulb displays, Kempland credits to the mix they are planted in. Planting starts in October, the bulbs being potted in a mix of three parts leaf mold, one part peat moss, four parts sand, two parts soil and one part rice hulls. Small amounts of potassium sulphate and super phosphate are added to this mix

About the Botanical Building, garden columnist Arthur Otis popped up last week with a report, confirmed by Balboa Park officials, that the steel supporting the arching lath cover was designed and formed as the frame for a Santa Fe Railroad Station.

No one seems to know how, but the steel was diverted to construction of the park structure for the San Diego Exposition of 1914, and it has been rebuilt twice, one in 1935-36 and again in 1958-59, following use by the Navy during World War II. ----- Jack Knudson.

June 14, 1967, Minutes of Park and Recreation Board.

Mr. Delawie read the Committee's policy statement on this matter as follows:

STATEMENT ON BALBOA PARK ARCHITECTURE

"The Facilities Committee of the Park and Recreation Board is vitally interested in retaining the traditional beauty of Balboa Park and has continually urged the 'careful, sympathetic design of each new structure' in the Park. On July 7, 1965, the Facilities Committee of the Park and Recreation Board prepared a resolution endorsing the development of Balboa Park in accordance with the Master Plan approved by the City Council on September 14, 1961.

"At this time, following a careful review of the proposed architectural policy as presented by the 'Committee of 100', the Facilities Committee again reaffirms its endorsement of the Master Plan for Balboa Park and desires to express further that:

"The compatibility of new buildings in Balboa Park with the old, as called for in the Bartholomew Plan, should be achieved, not by any sort of imitation or reproduction of the old, in whole or part, but rather by

incorporating in fresh, creative designs those architectural principles that were basic to the charm and flavor of the old buildings and that are still valid and vital when adapted to contemporary conditions, outlook, and construction techniques. The interior and the exterior of a building should not be regarded as separate entities, but as part of a total plan, if maximum results are to be achieved aesthetically, structurally, and economically. Each building should be planned for its particular use and location, but also as a member of the group of buildings and in close relationship to the park landscaping in order to maintain the intriguing combination of variety and unity that has contributed so much to the romantic atmosphere of Balboa Park.”

This statement was accepted by the Board.

June 15, 1967. San Diego Union, B-1:4. The City Park and Recreation Board yesterday unanimously rejected plans by a private developer to build a 310-foot high observation tower in Balboa Park

June 18, 1967, San Diego Union, C-2:2. EDITORIAL: “Preserve Park Flavor”

The lyrical devotion paid to Balboa Park by a group dedicated to the preservation of its architectural flavor is hardly an exaggeration.

Overall, the park is a “symphony” and the “living room” of San Diego, unique among the cities of the world. And not the least of the qualities of the park is the architectural style which reflects at once great beauty and our Spanish heritage.

Unfortunately, the buildings constructed many years ago on a “temporary” basis, are deteriorating and must be replaced. Fortunately, modern technology has provided a method to duplicate the historic facades while rebuilding for modern, functional use.

To combine the needs of the present with the heritage of the past, this is the course San Diego must follow.

January 18, 1968, San Diego Union, B-9:2-8. State decision awaited on widening U.S. 395 in park.

January 19, 1968, San Diego Union, B-1:2-4. Two Gibraltar apes in new quarters at Zoo, by Homer Clance.

Richard, 5, and Garielle, 4, are a cute young couple who have been used to a peninsula for a playground.

Yet they were not too upset yesterday when they were confined to closer quarters.

The former residents of the Rock of Gibraltar, in fact, adapted quite well and seem quite content in their new quarters.

They are the occupants of a large corner cage at the monkey quad at the San Diego Zoo.

Dr. Charles Schroeder, Zoo director, called the pair “fascinating and unusual animals,” and said he hopes they will reproduce.

They are Barbary apes, who used to roam Gibraltar at their own pleasure, along with others of their dwindling species. In fact, a spokesman said, there are only 27 of them left on the rock.

The 20-pound apes were turned over to Schroeder and Dr. George Pournelle, curator of mammals, by Cmdr. Buy Morton Neely, Jr. commander of the destroyer. *Floyd B. Parks*, during ship-side pageantry at the Naval Station yesterday.

Schroeder explained that the crew of the destroyer voluntarily contributed funds to cover cost of flying the apes to San Diego after it was learned Navy regulations prohibited their transport aboard a Navy craft from their home.

Neely said the officers and men of the *Parks* were pleased to be able to assist the zoo in obtaining them.

A spokesman explained that the Zoo has been trying for some time to obtain a pair of the Barbary apes from Gibraltar but was unsuccessful.

Through Neely’s efforts, the young primates were donated to the zoo by the British Navy garrison on Gibraltar.

Pournelle said the primates are not actually apes, but heavy bodied monkeys known as Macaques. They are called apes because they lack a tail, he explained.

“Nothing is known about how they came to be in Gibraltar, or why,” Pournelle added. “It is thought they may have been introduced by the Moors from North Africa during 6th century conquests. Others consider this is a relic species.

“When the British took over the rock in 1704, they found the monkeys living in a wild condition and adopted them as mascots. There is a story that the animals once saved the British by alerting the garrison of a Spanish invasion.”

In any event, said Pournelle, there is a “British legend that when the Barbary apes leave Gibraltar, the days of the British there will be over, and this is taken quite seriously.”

January 19, 1968, San Diego Union, B-1:6-7, B-4:1. 395 ban on trucks termed unlikely, by Charles Ross.

Sacramento. - The state has the authority to ban or restrict trucks on the portion of U. S. 395 in Balboa Park, a spokesman for the Division of Highways said yesterday.

“It’s highly unlikely that it could be done,” he said, “since the criteria is that another and similar roadway be nearby and immediately available.”

The state suggestion to the congestion is enlargement of the freeway to eight lanes.

The city, however, has responded with a suggestion that it be widened to only six lanes to avoid marring the landscaped canyon in the center of the park.

January 19, 1968, San Diego Union, D-5:6 City Council sets Spanish as design for Prado.

The City Council yesterday adopted a policy which requires that all new buildings along the Prado area of Balboa Park conform architecturally with the Spanish colonial style of present buildings.

The policy was proposed by the Committee of 100, a citizens group which was formed to promote retention of the style of buildings erected for the 1915 California Pacific Exposition along El Prado between the Spreckels Organ and the Fine Arts Gallery.

Adoption of the policy was recommended by the city Park and Recreation Board and City Mgr. Walter Hahn.

The policy states that "the Spanish colonial architectural style of the 1915 California Pacific Exposition buildings shall be incorporated in new structures through the use of architectural design, style and ornament similar to or compatible with that of the other Spanish colonial buildings in the area."

The policy also notes that the park has been the center of the city's social and cultural life for more than half a century and that it is symbolized by the Prado area of avenues, gardens, plazas and Spanish Colonial buildings developed for the exposition.

"The remaining buildings present in their unity of overall concept, coupled with their diversity of individual architectural development, one of the best comprehensive expressions of Spanish Colonial architecture and the only such expression within a similarly confined area now existing in the Western Hemisphere," the policy said.

It said the guidelines set by the policy are to be used to insure that new buildings in the area "shall by their architectural style and their close relationship to the existing landscape of the area continue to enhance the intriguing combination of variety and unity that has contributed to the romantic atmosphere of Balboa Park."

January 24, 1968, San Diego Union, A-11:4. Planetarium is proposed for Balboa Park.

A proposed \$1.3 million "Space Theater" in Balboa Park is the topic for a public meeting at 7:30 p.m. Friday in La Sala Room of the Balboa Park House of Hospitality.

C. F. McMenemy, a director of the San Diego Hall of Science, will tell about his organization's plans to construct an astronomical planetarium with city and county help by the time of San Diego's 200th anniversary in 1969.

Friday's meeting will be conducted by the San Diego Astronomy Associates, an organization whose membership is open to persons interested in astronomy.

Astronomy Associates will conduct a San Diego City schools course in astronomy and telescope making from 6:30 to 9:30 p.m., beginning February 1 at Claremont High School.

January 26, 1968, San Diego Union, A-13:5-6. Old Globe Theater asks for tax refund.

January 26, 1968, San Diego Union, B-2:7. Mrs. W. P. Cronan writes rebuild park buildings.

January 27, 1968, San Diego Union, B-1:8. Planetarium project slated for April start; tell plan for park building, by Nancy Stanford.

The proposed \$1.8 million Balboa Park planetarium is scheduled for construction starting in April, a director of the nonprofit San Diego Hall of Science said last night.

C. F. McMenemy told members of Astronomy Associates meeting in the House of Hospitality that his group hopes to sign joint powers agreements with the city and county and arrange for funding within three weeks.

He said the group hopes to obtain \$1.3 million of the financing from a bond issue and provide the other \$500,000 itself.

The building will be situated on three acres opposite the Natural History Museum. Originally it was designed as a contemporary structure, but was redesigned after the City Council decided to adhere to Spanish Colonial architecture in the park. The architect for the project is Louis Bodmer who emphasized that trees on the site will be preserved.

The building would remain city property and would be operated by the Hall of Science. One section would be a space theater with 350 seats that will provide "as realistic a space flight as anyone will ever experience without moving out of his seat," McMenamy said.

Computers will be used to adjust the star field, and a black light gallery of astronomy displays will be at the theater's entrance so visitor's eyes can become accustomed to the darkness.

He said much of the \$500,000 raised by the Hall of Science would be used in the 24,000 square-foot theater section which also will include a lecture hall seating 125 persons.

Another 37,000 square-foot section of the building will house four classrooms accommodating 30 persons each, maintenance facilities, exhibits, workshops and meeting halls.

"It seems to us that all signals are go, as they say in space talk, and we hope to open in May or June of 1969," McMenamy said.

January 29, 1968, San Diego Union, B-8:4-5. Chamber of Commerce has asked the City to fix up the crumbling exterior of the Food and Beverage Building in Balboa Park for the 200th anniversary observance in 1969; request made by chamber president Joseph F. Sinnott in a letter to the City Council.

February, 1968, San Diego Magazine, Vol. 20, No. 4, 6. Letters:

Two articles in your November issue were enlightening indeed --- "The Fifty-Year War" and "The Grand Illusion" by Marilyn Hagberg presented an interesting picture to informed and uninformed readers. The words were enriched with excellent photography of the various types of . . . "Spanish-Moorish" ornate buildings of yesterday.

The Parks and Recreation Commission and the Parks Facilities Committee have been given little credit for their efforts to create a policy . . . of a unified and orderly development for the above area in Balboa Park. "The Grand Illusion" was not too familiar with the requirements of these bodies as to relocation of certain buildings.

Reference is made to the Hall of Science with Planetarium on a location well east of the Aerospace Museum (Electric Building). Months prior to the writing of the article . . . recommendations and compliance were effected . . . This building has been so oriented that the present magnificent growth of eucalyptus trees and low ground landscaping will be retained. An open free approach is well afforded with the 65-foot setback from El Prado's curb. Ample space is provided for an arcade, should it ever be built. The east wing will be set back another 54 feet, with the facade fronted with existing eucalyptus growth. An open terrace will face an eastern plaza with Bartholomew-suggested reflection pool and colonnade. With a colorful, ceramic-tile bedecked dome, the building will complement the Spanish domes on the California Tower at the west entrance to El Prado.

H. LOUIS BODMER, AIA.

February 28, 1968, San Diego Union, D-4:4. Panel Studies Plan to Raze Park Building

The Balboa Park Committee of the Park and Recreation Board has heard protests against razing the Food and Beverage Building and using the area as a parking lot.

The Committee voted to study the matter and ask the Park and Recreation Board to delay any recommendation to the City Council

The Park and Recreation Board previously has voted to spend \$24,000 for a face-lifting job on the building, more than 50 years old, and then referred the matter to the Balboa Park Committee.

Eventual Razing

The Committee chairman, Richard M. Bowen, said some members of the Park Board and others had protested spending money on a building that cannot be used during the 200th anniversary celebration next year and which eventually must be razed.

Representatives of the San Diego Council on Arts for Youth and the Committee of 100, which raises funds for park projects, appeared to protest razing the building. A letter of protest signed by professors of the art department at San Diego State was read at the Monday meeting.

Costs Cited

Lloyd T. Lowrey, superintendent of Parks and Recreation, told the Committee it will take \$24,000 to facelift the building and \$50,000 if the face-lifting includes fixing the roof, which leaks.

He said it would cost \$25,000 to raze the building and a total of \$61,000 to raze it and build a parking lot with temporary landscaping for the 200th anniversary celebration.

Mrs. Philip Martin, vice chairman of the Committee, said it would take at least \$250,000 to make the building usable.

April 14, 1968, San Diego Union, F-11:1-4. Botanical Building always has spectacular display of beauty, by Arthur F. Otis (illus.)

Happy Easter, everybody!

This whole thing started a few days ago when Joe Sally, who rides herd on those spectacular plantings at the Civic Center, broke in on my siesta with a potent suggestion.

Well, ordinarily I hate to have this sacred rite broken into, but I'm fond of Joe, and he did have a good idea. Seemed that the Botanical Building in Balboa Park was about to observe its 10th anniversary and if I would contact George Kempland up at the park nursery, he would give me a tour.

Investigating my records, I discovered that I had not done a column on the Botanical Building since July 2, 1961, so the whole idea appeared to be sound.

However, when I called George Kempland to make a date, he blushed a bit over the telephone and said he had goofed. The anniversary date was not April 23, as he had told Joe, but March 22, which was already a part of history.

I said aw shucks, what's a small discrepancy between friends? Let's do a piece anyway, I said. And George said OK, come on out.

But that wasn't the end of the comedy of errors. George, for all his having graduated from San Diego High School and majored in horticulture at the University of California at Davis, turned out to be as poor a mathematician as I am --- and you can hardly be any poorer than that.

I inquired as to the date the Botanical Building had been reopened, and he said 1959. At which point I mentioned that it couldn't have a 10th anniversary until 1969, which would be another

year.

I had counted on my fingers. George counted on his fingers.

“Well,” he said, “I have it on good authority that we had our first Easter lily exhibit in the building in 1959.”

“Fine,” I replied. “Then this year’s Easter Lily show will be the 10th such display, and we’ll make an occasion of that.”

We both counted fingers again, and sure enough it came out to 10. Try it, starting with 1959 and ending with 1968. You will get the same result, I hope.

If you have not visited the Botanical Building in Balboa Park, please do. This 10th Easter lily show is a fine pretext, if you need one. You’ll see something over 200 pots of lilies in full bloom --- nobody has bothered to count the stalks, but it’s a highly spectacular display.

You may or may not know that the framework of that building, which has originally a steel skeleton for a Santa Fe railroad station. [sic]

By some maneuvering, details of which are lost in antiquity, it was acquired for use in the Exposition of 1916-1917 [sic] and moved to its present location. Again, in the 1936-1937 [sic] Exposition it was a center of attraction. Then along came World War II when it ceased to be a horticultural building. People seemed to have other things than flower shows on their minds.

And not until that Easter show nine years ago was it reactivated as the colorful botanical exhibit it is today.

Along with the Easter lilies, you can view a colorful collection of some 300 gloxinias. And the gaudy colors of 450 cinerarias are there to dazzle you. Maybe you’d better take along your dark glasses.

But that’s by no means the end of the attractions.

George Kempland has been working for steady improvement of the Botanical Building for the past six years. He explained how, during that time, every bit of soil has been replaced --- to a total of some 136 cubic yards.

“Cubic yards of what?,” I wanted to know.

Well, it’s not river-bottom topsoil. It’s a kind of planter mix consisting of rice hulls, sand, peat moss, leaf mold, redwood shavings, and fir bark. There was no mention of a kitchen sink. But from the obvious results, as evidenced by all those growing things, it must be a good mixture.

Among the oddities you may encounter (and the plants are all clearly labeled) are a cotton tree, which sometimes has cotton balls on it, and a tomato tree which George swears up and down will bear actual tomatoes.

This is a formidable thing called, according to the label, *Cyphomandara betacea*, and it’s all of 12 feet tall with leaves 15 inches long and 12 inches wide. There must be an easier way to raise tomatoes.

You will also see a fuchsia tree probably 10 feet tall, with a 5-foot spread, loaded with handsome blooms. The remarkable aspect of this is that it is never without flowers, all year round.

There are formidable ferns, including gigantic staghorns --- which you won't believe, even while you are looking at them. And four lovely Abutilons, or Japanese maples. George has made trees out of them, although there are several others in the normal bush form. They are relatives of the hibiscus family.

George Kempland also took me through the nursery, where the beginnings of next fall's chrysanthemum show are already in evidence. You'd better plan to be there then, too.

It would be futile for me to tell you all that's going on in the several green houses of that nursery, but I must mention the anthuriums. I had always thought them to be natives of Hawaii, probably because the first ones I ever saw came from there.

So, imagine my surprise when George pointed out a quantity of pink ones, dating back to the 1916 Exposition, and said he had it on good authority that they pre-dated the introduction of this exotic flower to the Hawaiian Islands. Bailey says they originated in "tropical America," so I suppose it is easily possible that they reached San Diego before Honolulu knew about them.

In any case, be sure to get out to the Botanical Building between now and the end of April. It will be emphatically worth your while.

April 17, 1968, Minutes of the Park and Recreation Board.

Food and Beverage Building

Mr. Wilhelms stated that, in accordance with the recommendations of the Board at the last meeting, a Task Force had been convened composed of 2 architects, 2 contractors, 2 structural engineers, the Director of Building Inspection, the Fire Marshal, the Chairman of the Facilities Committee, the Chairman of the Park and Recreation Board, the Chairman of the Balboa Park Committee, the Director of Public Works, and the Assistant City Manager. The Task Force had made a report, copies of which had been furnished the Board. The recommendations of the Task Force were as follows:

1. "That public use of the Food and Beverage Building cease."
2. "The Park and Recreation Board and the City Council allow a 6-month period for interested citizen groups to raise funds to carry out desired objectives. In the event such action does not take place in this period of time, that the City demolish the building and landscape the area."
3. ". . . that the architectural ornamentation be preserved for any future building on the site. Steps should be taken to have molds prepared to preserve the ornamentation or investigate the possibility of preserving the ornamentation intact."

Mr. Wilhelm stated that on the recommendation of the Task Force, the building had been closed and the activities formerly housed in the building had been moved elsewhere.

Mr. Greer Ferver, member of the Task Force, then summarized the report of the Task Force. He stated that the building was in a serious state of disrepair and was considered unsafe for public use. The Task Force strongly recommended preserving the form of ornamentation of the exterior of the building. He said that the Task Force presented four alternatives as follows:

1. "Demolish the building and landscape the area. Provide other facilities for groups that are presently using the building. Estimated cost: \$75-80,000."

2. "Clean exterior surface, patch the stucco and ornamentation, paint the facility, make minimum repairs to roof and roofing, and close the building for any public use. This would allow the building to stand during the 200th Anniversary Celebration. Estimated cost; \$80,000."
3. "Rehabilitate the building to meet minimum requirements for occupancy of 15-20 years. Estimated cost: \$930,000.

"Work to rehabilitate would include: Replace roof, replace floor, replace exterior walls and salvage staff work, install fireguard ceiling and sprinklers, construct rest rooms and install plumbing, remove and reinstall heating, electrical wiring and reuse existing fixtures."

4. "Remove the existing building and construct a new facility. The estimate of the Botanical Society for the building they are presently proposing at this site is \$1,750,000. The estimate to demolish and reconstruct this building in the same site and type of use is 2.5 to 3.75 million dollars."

Mrs. Frank Evenson of the Committee of 100 presented a report stating that the Committee of 100 is strongly opposed to tearing down the Food and Beverage Building unless a structure of substantially the same size and architecture is built in its place. The Committee suggests that an identical building could be built for approximately \$1,003,300 which would admittedly be little more than a shell, but would be of tremendous value for a number of uses in Balboa Park. Mrs. Evenson said that the Committee of 100 had been working with the San Diego Botanical Garden Foundation and that the proposed "shell" building could be put to use by the Botanical Society. Mrs. Evenson further stated that the building as proposed by the San Diego Botanical Garden Foundation (the Hamill Plan) was not satisfactory to the Committee of 100 and that it was too small a building for the valuable property which it would occupy. The Committee of 100 recommends that the funds which were tentatively allocated for the "Patch and Paint" Job on the Food and Beverage Building be re-allocated at this time for the making of molds of the present building's decoration. These molds would then be used for making the ornamentation on the replacement building. The Committee of 100 is interested in making an appeal to the citizens of San Diego through a bond issue to assist in building a permanent useful structure of similar design to the present building.

The Chairman remarked that the proposal to construct a new building with General Obligation Bonds is not in accordance with current Council policy which, in effect, requires that construction of buildings for Cultural Institutions in Balboa Park will be by private subscription or by revenue bonds under a Joint Powers Authority.

Mr. Bowen remarked that he felt the Committee of 100 would like to be assured that the Park and Recreation Board would support any fund drive for the Food and Beverage Building.

The Chairman replied it went without saying that the Board would support such a drive. The Chairman then suggested that the Board defer action on this matter for 60 days at which time progress reports and proposals could be submitted by the Committee of 100 and the San Diego Botanical Garden Foundation.

August 8, 1968, San Diego Union, B-2:2. EDITORIAL: Heritage Lost

Nostalgia, regret and a touch of anger are prime emotions as razing crews begin to demolish the Food and Beverage Building; has the City of San Diego become concerned long ago, the building could have been saved; even today there is a lack of concern about other buildings in the park that will eventually fade into oblivion if nothing is done.

Had the city of San Diego become concerned long ago, the building could have been saved. Even today there is a lack of concern about other buildings in the park that will eventually fade into oblivion if nothing is done.

It behooves San Diego to capitalize on the regret that follows razing of the Food and Beverage Building, and the enthusiasm generated for a replacement.

The time to strike is when the iron is still hot.

September 12, 1968, San Diego Union, B-1:2-3. Two major projects for park advance; Plaza de Balboa, Hall of Science win Parks and Recreation Board approval of preliminary plans, by Frank Exarhos (drawing of proposed Hall of Science).

Preliminary plans for two major projects in Balboa Park --- the Plaza de Balboa and the San Diego Hall of Science --- were approved yesterday by the city Park and Recreation Board.

Board approval was unanimous after presentation of the plans by architects. The board also gave tentative approval to a speedup in the Plaza de Balboa project, directing its Balboa Park Committee to determine if funds are available for construction in 1968-69.

The Plaza de Balboa plan was outlined by architect Home Delawie of Delawie, Macy & Henderson. It calls for a large fountain or a grouping of small fountains as the focal point of huge, multilevel court at the east end of El Prado.

Delawie said the plan also envisions landscaping with mature trees, construction of a small concession stand to replace on which will be torn down to make way for the Hall of Science, and a curving footbridge over the new Park Boulevard.

Cost of the project has been estimated at \$369,000, said Delawie, who is a member of the board's Balboa Park Committee.

The city had planned to spread the project over several fiscal years, but the architect said consolidation of its phases would enable completion during San Diego's 200th anniversary next year.

The new Hall of Science design was presented by architect Louis Bodmer, whose company worked out the plans with the firm of Hatch, Heimerdinger & Associates, architects.

Bodmer said the Spanish Colonial building will house a 24,000-square-foot planetarium, lecture room, four classrooms, workshops and geophysical exhibits.

The facility will be on the Plaza de Balboa, opposite the Museum of Natural History.

The city and county are forming a joint powers authority to issue \$11 million in revenue bonds to finance construction of the Hall of Science. An additional \$350,000 to equip the facility is to be raised through subscriptions.

Mrs. Frank Evenson, representing the Committee of 100, asked the board to delay action on the plans for the Hall of Science to enable the citizens' group to review them.

Chairman Douglas Giddings, however, said the board's action would involve only approval of a concept and the committee will be able to review final plans when they are being considered by the board and its committee.

San Diegans seem to be reacting with enthusiasm to the plans for maintaining the grandeur of the world-famed Prado in Balboa Park; a bond issue to replace one of the principal buildings will be on the November ballot; but the Prado is not everything, though it is the jewel of a magnificent setting; another crucial decision is rushing upon us; the question of whether to permit the widening of Highway 395, or the Cabrillo Freeway, through the heart of the park.

December 11, 1968, Minutes of Park and Recreation Board.

Balboa Park Committee

Mr. Bowen reported that the Balboa Park Committee had considered uses for the new building to be built on the Food and Beverage Building site, but would take this up at a meeting to be held December 30.

Regarding the referral from the Chamber of Commerce expressing a desire for long-range planning in Balboa Park, the Committee is assembling data to make a study on this project.

Regarding the request of the Catholic Diocese of San Diego that the statue of Father Serra which was originally on the Food and Beverage Building be given to the Diocese for installation at the Mission San Diego de Alcalá, Mr. Bowen noted that the Committee had taken action on this matter at the October meeting. At that meeting, it was recommended that the statue be located at the Mission San Diego de Alcalá provided no expense is incurred by the City. Mr. Bowen reported that the Committee's recommendation still stands.

Mr. Wilhelms commented that the question of whether the statue could be donated to the Catholic Diocese could not be answered at this time since the architect has not decided as to whether or not it would be used in the design of the new building.

Chairman Giddings directed that this matter be held in abeyance until a decision is obtained from the architect on this matter.

Mr. Bowen reported that the Committee was concerned with the present state of development of the Florida Canyon slopes directly east of the new development of the east end of El Prado. The slopes are without irrigation at the present time. The Committee, following a summary report of the Park Superintendent, indicated their interest in the development of an irrigation system to encourage and preserve the present indigenous growth.

Motion

Mr. Bowen then moved that Staff study the development of the Florida Canyon slopes and present a plan for development to the Board. Mr. Fleming seconded the motion and the motion carried.

Mr. Bowen reported that the Balboa Park Committee considered that an appropriate name should be selected for the new building to be constructed on the Food and Beverage Building site and recommended that the Board contact the public for suggestions as to a name. Chairman Giddings suggested that the Balboa Park Committee undertake this task and recommend three possible names to the Board. The Board would then make a recommendation to the Council on this matter.

December 11, 1968, San Diego Union, B-1:1, B-5:5. Gala weekend set for 200th in Balboa Park.

December 12, 1968, San Diego Union, B-3:3-5. Park Board seeks study of smog in plan for U.S. 395.

Cabrillo Bridge face-lift (October 8, 1969)

Groundbreaking at Food and Beverage Building site (November 10, 1969)

City approves "Casa del Prado" name for building to replace
Food and Beverage Building (December 31, 1969)

December, 1969 - January, 1970, California Garden . . . San Diego Zoo Plantings, by Timothy Aller,
Zoo Horticulturist.

The zoo grounds have been vastly beautified the last few months by the addition of many beautiful and rare camellias, orchids and azaleas that have been donated, mostly by the Camellia Society.

Fern and camellia canyon has a new look with the addition in March and April of this year of an interesting collection of fine varieties of camellias, generously donated by Harvey and Margaret Short from their priceless collection at their home in La Mesa. Many 2 to 4 feet plants have been placed advantageously for the viewing public's pleasure. Also, a number of large specimens, 6 to 8 feet tall, are well oriented with our azaleas, rhododendrons and ferns in the canyon. Included in this grouping are several original seedlings --- "Masterpiece," "Bride's Bouquet," "Sunset Glory," "Pink Clouds," and "Guest of Honor," all of which, at some period in the last few years, have won awards of recognition as worthy introductions on the Pacific Coast. Zoo gardeners have taken a special interest in the maintenance (watering, fertilization and pest control) necessarily connected to those valuable plantings. Also, Mr. Short and Mr. Lucien Atherton of the Camellia Society are frequent visitors to the zoo. We are going to have a beautiful fall-to-spring "event of color" for the

visitor's appraisal and viewing pleasure. Several fine rhododendrons and many azaleas present a vivid color contrast in with the camellias.

Several container camellias and a good many orchids (also donated through the generosity of the Camellia Society) have been placed around the engawa of the Rondeval Room and immediate surrounding gardens.

Many beautiful camellias have been planted on the street side of the Penguin House at the exit breezeway and along the sides of the Jungle Trail.

The Zoological Society is very grateful for the interest and plants donated which are now combining to make the plantings at the zoo a truly "botanical garden." The many thousands of visitors to the zoo are in for a "rare treat."

January 22, 1969. 245-seat Cassius Carter Center stage opened.

January 25, 1969, (San Diego) Evening Tribune, A-16. Space 'Launchings' Planned for Visitors to Balboa Park, by John Farina (architect's sketch of Hall of Science).

You are about to embark on a space journey. Your destination is Uranus, one of the farthest planets in our solar system.

Listen to the countdown at mission control: five, four, three . . .

The rocket ship engines are burning, consuming three tons of fuel per second, developing launching thrust of 180 million horsepower. The sound is deafening.

Your seat shudders. Now the huge rocket, bathed in an eerie orange glow, slowly, ponderously lifts off, about to be hurled into earth orbit, and then . . .

You are on your way to explore space, to discover for yourself the mysteries of the universe.

Soon a strange sense of disorientation will overcome you temporarily as your spaceship rolls, yaws and pitches through course corrections.

You will experience these effects, and yet . . .

You will never have left earth at all.

The space trip will have been presented to you vicariously through the courtesy of the San Diego Hall of Science's Planetarium and Space Theater which will be constructed this year in Balboa Park.

That enlarging of Uranus you saw as your space ship approached the planet in simulated flight was only a film projection.

The shuddering was in your planetarium sat, rigged to tremble. The view of the earth receding behind you? Also a film. The changing pattern of the stars as you travel, the result of star projection on a large overhead dome in the darkened planetarium theater.

The rocket ship you saw at the gantry was merely a mockup behind the perforated 75-foot dome.

It would actually require many days to take the space journey to Uranus, but in the theater you complete it in less than an hour, because of a space transit simulator which projects the picture of the heavens above you, enabling the simulation of universe travel to point outward 1.8 billion miles. That is the approximate distance between earth and Uranus, the seventh planet from the sun.

The Reuben H. Fleet Planetarium and Space Theater (so named because of a \$350,000 donation for the space transit simulator by the Fleet Foundation) will be part of the \$1.5 million Hall of Science Building to be erected at the east end of El Prado, opposite the Natural History Museum and adjacent to the Plaza de Balboa.

Construction of the building will start in the spring. The ground was broken earlier this month. Architects are Louis Bodmer and Hatch-Heimerdinger & Associates of San Diego.

The blue-domed Space Theater will be at one end of the 25,000 square-foot Spanish Colonial Hall of Science. Besides the 350-seat theater, where three to four shows will be presented daily, depending on the season, the Hall of Science will include three classrooms, administrative offices, a gift shop, optical shop where mirrors will be ground for telescopes, exhibit preparation rooms, a 124-seat lecture hall, and 7,000 square feet of scientific displays.

The Musser planetarium, now located in the aerospace museum, will be moved into the lecture hall. A supplement to the space theater, it explains the rotation and revolution of heavenly bodies, the star field, and the planets.

The Hall of Science exhibit area will be under the supervision of Dr. Edward Creutz, exhibits chairman. He is vice president for research and development at Gulf General Atomic.

Exhibits will encompass the scientific areas of medicine, oceanography, space communications and manufacturing. There will be "audience-participation: displays with buttons and knobs that can be turned and pushed to set apparatus into motion, explaining scientific principles.

Eventually the Hall of Science hopes to add wings to the new building and construct a domed astronomical observatory with telescopes, both for research and general public viewing, said William Bridge, executive director.

The planetarium, space theater, will be different from most planetariums in that the universe will be viewed by the audience from a space position rather than an earth position.

Making that possible is the transit simulator which will project 10,000 stars (more than any other planetarium) and the overhead dome which is tilted 20 degrees to "drop" the horizon along the spectator eye level.

"By thus manipulating the planets, stars and other bodies in various positions, we can change perspective and simulate space flight, actually place ourselves in the universe away from earth," Bridge said.

"As we travel, we will see other rocket ships pass by (an accomplishment of rear-screen projection techniques). We will see the blue-and-white earth roll below us as we orbit our planet (the work of a 30-70 millimeter projector), and we will see the craters of the moon while in lunar orbit (that picture cast by an auxiliary projector)."

The spectators, sitting in tiered seats in the space theater, never leave the solar system, thus cannot closely approach stars other than the sun. The nearest other star is alpha centauri, 4.5 light years off.

Those in the audience may participate in the presentation by operating a manual control to direct space trips, Bridge said.

"The entire effect will be so realistic, I envision the National Aeronautics and Space Administration sending astronauts here for some initial training."

The space shows will be presented by an astronomer-lecturer. All of the equipment in the planetarium is designed for digital computer operation, but the equipment will be manually operated during the first shows until receipt of the equipment. The seats will shudder late, also not until equipment arrives.

The San Diego Hall of Science is a nonprofit corporation established in 1956 with Robert J. McPherson as the first chairman of the board. He still is active. Current chairman is Dr. Bernard Gross, president of Chem-Tronics, Inc., Santee, and president is Capt. Norval E. Richardson, USN, rtd., administrator of Vista Hill Hospital, Chula Vista.

The city and county have formed a Planetarium Authority to raise money for the building through revenue bonds. Chairman of the authority is Sheldon Campbell, regional vice president of Roberts, Scott & Co., Inc., and members are Glenn Havens, president of Havens International, San Diego, and Dr. Hugh Bradner, professor of aerospace engineering at the University of San Diego.

Admission to the space theater may be \$1.25, to amortize the revenue bonds. The Hall of Science is conducting a community fund drive to raise money to pay for some of the equipment and general memberships will be available later to help in financing the operation of the new building.

February 4, 1969, San Diego Union, B-8:1. City Council will be asked to allocated \$97,000 for architectural and engineering services of Hall of Science and Planetarium in Balboa Park.

February 5, 1969, San Diego Union, B-1:4-6, B-8:1. Mayor Curran presented Dr. Charles Schroeder, San Diego Zoo director, with "Try San Diego First" award.

February 6, 1969, San Diego Union, B-2:1-4. New \$25,000 pheasant house opened yesterday at San Diego Zoo.

February 6, 1969, San Diego Union, B-6:1-3. The Facilities Committee of the Park and Recreation Board approved unanimously yesterday a plan for a courtyard that would replace the lawn area in front of the Old Globe Theater.

The plan, by Bonita architect Victor Wulff, had the prior approval of the Balboa Park Committee, which advises the Board.

The plan calls for a sunken concrete courtyard for the Old Globe and the adjacent Cassius Carter Stage. It will cost \$30,000. Installation of a fountain called for by the plans will be delayed because of its \$3,000 cost.

February 6, 1969, San Diego Union, C-16:2. The City Council deferred action yesterday on the proposed allocation of \$97,000 for architectural and engineering services for the San Diego Hall of Science and Planetarium.

February 7, 1969, San Diego Union, B-3:8. Artifacts from the old Food and Beverage Building, the mold used to make them, and a replica of one of them are on exhibit in the main lobby of the City Administration Building.

February 8, 1969, San Diego Union, B-3:2-3. Representative Bob Wilson, Republican-San Diego, announced yesterday in Washington, DC, that a \$229,500 federal grant had been awarded for the development of a 20-acre park in Southeast San Diego.

February 8, 1969, San Diego Union, B-2:7-8. Work on San Pasqual Zoo may begin in ten days; awaits Council action on land use contract, by Peter H. Brown.

February 10, 1969, San Diego Union, B-1:1, C-4:2-3. The Museum of Man is one place where you can find out that the Indians are copying the cowboys in the Southwest.

February 10, 1969, San Diego Union, B-1:5. All-Breed Obedience Club of San Diego sponsored an obedience practice march in Balboa Park yesterday.

February 11, 1969, San Diego Union, B-6:8. Mrs. RWT asks City to use Final Report of the 1957 Balboa Park Citizens' Study Committee.

February 13, 1969, San Diego Union, B-1:1-3, B-15:1. The San Diego Department of Parks and Recreation voted yesterday to change the design of swimming pools in southeast San Diego after residents objected to the lack of a diving area.

February 14, 1969, San Diego Union, B-3:4. City Council okayed wild game park at San Pasqual yesterday.

February 14, 1969, San Diego Union, B-6:1. Junior Theater will present "Sleeping Beauty" in Puppet Theater beginning next Friday.

February 15, 1969, San Diego Union, B-1:7-8, B-9:1. State Park and Recreation Commission yesterday okayed Torrey Pines for underwater park.

February 18, 1969, San Diego Union, B-1:4-5l Mexican fine art at Museum of Man to salute "200th", by Dick Bowman.

February 19, 1969, San Diego Union, B-1:5. William Gerhardt, Special Projects Director, said ground will be broken in San Diego's 100th year for a building to replace the Food and Beverage Building in Balboa Park.

February 20, 1969, San Diego Union, B-6:2. City to review Planetarium fund request; major portion of the money requested would have to be diverted from capital improvements budget.

February 22, 1969, San Diego Union, B-2:3-4. Herds to roam at new zoo by summer.

February 24, 1969, San Diego Union, B-1:2-5. Three San Diego groups are making plans for open space and park area programs.

February 24, 1969, San Diego Union, B-1:6-7. Skyfari, 1,800 ft. long, 60' ft. high, newest attraction at Zoo.

February 26, 1969, San Diego Union, B-2:1. Permanent boat dwellers in Mission Bay alleged to be dumping raw sewage into recreational waters.

February 28, 1969, San Diego Union, B-3:1. City Council yesterday passed an ordinance establishing open space and park districts.

March 2, 1969, San Diego Union, B-6:1-2. Dinner, July 16th, when San Diego honors 200th anniversary of its founding will honor memory of George W. Marston.

March 3, 1969, San Diego Union, B-3:5-7. Architect Richard G. Wheeler submitted plans to city officials of structure to replace the Food and Beverage Building.

March 5, 1969, San Diego Union, B-1:6-7. Special Mexican art exhibit in Museum of Man, by Tina Qualls.

March 8, 1969, San Diego Union, B-1:3-4. B-7:2-3. Tiny Broadwick parachuted at 1915 Exposition, by Jamie Bryson.

March 10, 1969, San Diego Union, B-1:1-2, B-4:7-8. Fiesta Island, a gem in the rough, by Dick Barnes

March 11, 1969, San Diego Union, B-1:2-4. Governor Reagan opens Mexican art exhibit.

March 13, 1969, San Diego Union, B-1:1-2. Wolves, jackals get home at San Diego Zoo.

March 16, 1969, San Diego Union, B-1:1-2. Now the blind can "see" Zoo, by Joe Stone.

March 20, 1969, San Diego Union, B-2:5. The House of Ireland will open the summer lawn programs in Balboa Park.

March 21, 1969, San Diego Union, B-1:2-5, B-4:2. Skyfari rides open at Zoo.

March 24, 1969, San Diego Union, B-1:2-3. Irish open park's lawn programs.

March 28, 1969, San Diego Union, B-1:2-5. Three costly Siberian tigers join the Zoo, by Beverly Beyette.

March 29, 1969, San Diego Union, B-2:1. Balboa Bowl drum, bugle contest set.

March 30, 1969, San Diego Union, B-1:1-8, B-6:1-8. Architect's design for Food and Beverage Building replacement.

March 30, 1959, San Diego Union, B-1:6-8. New park building provides open view, by Homer Clance.

April 2, 1969, San Diego Union, B-5:4. Descendants of pioneers ask action to make Calvary Cemetery in Mission Hills a public park.

April 6, 1969, San Diego Union, B-1:5. Science Fair will open Wednesday in Federal Building, Balboa Park.

April 8, 1969, San Diego Union, B-1:2-4, B-10:1. Gymnasium in Balboa Park turned into Spanish culture display, by Carol Ritch.

April 10, 1969, San Diego Union, B-1:3. Economic Research Association said Planetarium will not need annual subsidy from City after its first two years of operation.

April 10, 1969, San Diego Union, B-1:4-5. City Council okays Plaza de Pantoja for USO building.

April 10, 1969, San Diego Union, B-1:7-8, B-5:1. Science stars at "Finest Science Fair".

April 10, 1969, San Diego Union, B-15:1. Harry L. Dale prefers open space to new structures in Balboa Park.

April 12, 1969, San Diego Union, B-1:3-5. Two thousand see "Spanish swirl" fashions, films, flamenco, by Bob Masullo.

April 13, 1969, San Diego Union, B-1:2. Anaheim group wins drum, bugle event in Balboa Bowl.

April 13, 1969, San Diego Union, B-1:7-8, B-3:4. California owes existence to Spanish epic.

April 13, 1969, San Diego Union, B-6:5-7. The City Council has accepted a Japanese gate for Balboa Park as a memorial to the late mayor Charles C. Dail.

April 14, 1969, San Diego Union, B-1:7. Science Fair all packed up until next year.

April 14, 1969, San Diego Union, B-1:8. Spanish crew attends special mass.

April 14, 1969, San Diego Union, B-6:8. P. H. Stephenson criticizes trip for museum plane.

April 16, 1969, San Diego Union, B-10:8. Mrs. Catherine Steel defends replacing Food and Beverage Building in Balboa Park.

April 17, 1969, San Diego Union, B-3:2-3. 60,000 orchids going on display in Conference Building.

April 18, 1969, San Diego Union, B-1:2-4. Israel cottage in Balboa Park depicts ancient, new nation, by Tina Qualls.

April 18, 1969, San Diego Union, B-2:7. Spanish ship sails today for Cadiz.

April 19, 1969, San Diego Union, B-2:1. Zoo gorilla dies, second becomes ill, by Cliff Smith.

April 21, 1969, San Diego Union, B-1:2. Composer Morton Gould will be in San Diego on May 8 for the premiere of his new symphony, "Troubadour Music", composed in honor of San Diego's 200th anniversary.

April 21, 1969, San Diego Union, B-6:8. Waldo Waterman presents Aerospace Museum facts.

April 22, 1969, San Diego Union, B-1:8. Attendance to view "This Is Mexico" at Museum of Man was 21,532.

April 23, 1969, San Diego Union, B-1:6-7, B-3:2-3. City Manager Hahn reports grass areas, trees would be destroyed by new USO building.

April 25, 1969, San Diego Union, A-19:1-3. "Don Quixote" gives touch of Spain to 200th, by Donald Dierks.

November 25, 1969, San Diego Union, B-6:1. EDITORIAL: New Park Plan Needed

The so-called Bartholomew Plan adopted by the City of San Diego in 1961 was to have provided an orderly blueprint for developing Balboa Park.

Some of its provisions have been followed, but developments in the intervening years have made the plan a questionable guide for further design and construction of park facilities.

The Bartholomew plan presumed that an extension of Maple Street would be constructed to carry some of the cross-park traffic that now makes a crowded thoroughfare of Laurel Street and the park’s familiar Prado. On this basis it was planned to create a plaza at the east end of the Prado.

But the Maple Street extension was later voted down in the interest of saving the park from further incursion of road building. Nevertheless, the city is now moving ahead with plans for the plaza, and a worsening of traffic problems in the Prado will be the inevitable result.

At the same time the Park and Recreation Board is giving consideration to plans to remodel the old Ford Building in the Palisades area of the park to provide a home for the Aerospace Museum. The idea is another departure from the Bartholomew plan, which called for razing the Ford Building to provide a scenic overlook.

It is plain that the Bartholomew plan is losing its currency. A new comprehensive plan is urgently needed if Balboa Park is to be saved from the kind of piecemeal improvements that may have individual merit but can prove to be a source of regret in the future.

November 27, 1969, San Diego Union, B-1:7-8, B-4:7-8. A specific definition of "open space" in state legislation condemning land for urban development was urged yesterday, by Vi Murphy.

November 27, 1969, San Diego Union, B-2:1. The San Diego Zoo's Board of Trustees has named the zoological preserve near Escondido the San Diego Wild Animal Park.

November 28, 1969, San Diego Union, B-1:5. Yule season officially opens today; Marines from Marine Corps Recruit Depot will help put up Community Christmas Tree in front of the Organ Pavilion this a.m.

November 30, 1969, San Diego Union, B-4:1-2. Mexican display in Museum of Man will close December 28; began March 12.

December 17, 1969, Minutes of Park and Recreation Board,.

Balboa Park Activities Building - Advertising.

Miss des Granges reported that this project is now ready to be advertised for bids for the actual construction of the building.

Mr. Cole and Mr. Wheeler, architects, presented the final plot plans and a perspective drawing of the building and pointed out that the north section of the facility has been placed

as far north as possible, and that the whole complex had been placed the maximum possible distance east from the lily pond. The stated that the front arcade along El Prado has been placed exactly on the same line as the previous arcade.

Miss des Granges mentioned that both the Facilities Committee and the Balboa Park Committee has previously approved these plans, subject to the two changes as presented to the Board on this date.

Old Globe Theater Mall.

With the unanimous consent of the Board, this matter was taken out of order.

Mr. Victor Wulff, architect, appeared to present the final plans for the courtyard area in front of the Old Globe Theater in Balboa Park. He stated that the previous plans had included balustrades surrounding the courtyard area, but that after numerous meetings with Old Globe representatives, the Balboa Park Committee and the Facilities Committee, the final plans as presented to the Board on this date, were recommended. The plans, as presented, depict a courtyard area surrounded by raised planter boxes and shallow steps leading down into the courtyard.

The Director reported that both the Balboa Park Committee and the Facilities Committee had approved these final plans.

Mr. Bowen stated that the Balboa Park Committee had discussed the desirability of placing a fountain in the pool in the center of the courtyard.

Miss des Granges mentioned that funds are not available at this time for the inclusion of a fountain, but that it might be an appropriate addition if and when funds are available.

December 17, 1969, San Diego Union, B-1:2. The City Council yesterday authorized preparation of preliminary plans and cost estimates for renovating the Ford Building as a new home for the Aerospace Museum.

December 17, 1969, San Diego Union, B-3:3-4. City Council votes funds for 200th.

December 20, 1969, San Diego Union, B-1:3-4, B-7:3. Grand Jury hits "200th"s planning.

December 22, 1969, San Diego Union, C-1:4-5. Santa Claus brings sun to fete in park.

December 24, 1969, San Diego Union, B-3:4. The City Council yesterday unanimously advertised for bids on a multipurpose activity building where the former Food and Beverage Building stood in Balboa Park.

December 26, 1969, San Diego Union, D-9. Pair of polar bears now on exhibit at San Diego Zoo.

December 30, 1969, San Diego Union, A-1:6-8, A-4:2. Model business area proposed for downtown.

December 31, 1969, San Diego Union, B-1:1-2, B-3:4-5. San Diego Zoo gives press a preview of 1970, by Joe Stone.

The foxy veterinarian who is director of the San Diego Zoo took the press on a special tour of the place yesterday and gave them a look at which his imagination sees in 1970.

After the tour Dr. Charles R. Schroeder turned the group over to Sheldon Campbell, vice president of the San Diego Zoological Society, who fed them and filled them with facts about the San Diego Wild Animal Park at San Pasqual.

Schroeder picked a day to show off the Zoo when there was an enormous crowd of visitors. They were lined up for everything from the bus rides to a look at the birds.

He briefed the reporters and photographers on Zoo policy, such as: Improvement of Dog and Cat Canyon ("This is a good example of a bad exhibition. We will improve it during the next year.")

It will look more like the peccary exhibits ("They are as fine as any you'll see. You can even smell 'em.")

There was a question about one of the better Zoo's stories of the year, "What is being done about the squirrels stealing nuts from the vending machines?"

Schroeder said some of the vending machines are fixed so squirrels can't steal from them, but never while he has anything to do with it will all the machines be so fixed.

"I think it is fun to have squirrels go in and steal the peanuts," he said. "I have seen them do it. It's hilarious."

Said Kenneth S. Warfield, boss of the Zoo's witty bus drivers, "The bus drivers get free peanuts by catching the squirrels after they have stolen them from the machines."

Schroeder said the Zoo will propose a new terraced parking lot across Park Boulevard from the present one, with a tunnel under the boulevard for pedestrian traffic.

In 1970 fences will disappear from the first canyon bus riders enter on tour. "It is not a handsome area now," said Schroeder. "It will be."

He showed the site for a new flight cage for birds of prey, said new exhibits will be placed about the west terminus of Skyfari and nearby an educational display of rhesus monkeys, benefactors of man.

Campbell said the San Pasqual park is to open in 1972 with 3,000 animals to be seen, probably by people riding steam trains or electric trains which look like steam trains.

The tour will have a "main system" taking 45 minutes with "subsystems" which will allow a visitor to stay all day, seeing something different all the time.

Visitors will not see fences, but carnivorous cats from all over the world will be separated from their natural prey, the hoofed animals, by invisible barriers.

"When we open we must know that we have enough there so that people will leave satisfied, and yet will be growing and improving," he said. "They'll see that when they return."

Schroeder revealed to newsmen that they were touring in a new smogless bus powered by liquid petroleum gas rather than gasoline. If experiments with two such buses are successful, but entire fleet of 18 will be converted to the smogless fuel.

December 31, 1969, San Diego Union, B-2:6-7. The City Council yesterday awarded contracts worth \$490,000 for improvement work in Balboa and Kearny Mesa Parks.

The Balboa Park project will be south of Laurel Street and east of Sixth Avenue. It will include an irrigation system, two comfort stations, parking spaces for 75 cars, colored concrete walkways and other structures.

December 31, 1969, San Diego Union, B-2:8. City approved "Casa del Prado" as the name of the new building to be erected on the old Food and Beverage Building site in Balboa Park.

1970

Summary of Events in 1970

(Note: Dates of events are approximate only.)

San Diego Zoo Expansion Plans (January 4, 1970)

San Diego Serra Club defends Florida Canyon (January 22, 1970)

Cage for birds of prey at San Diego Zoo (July 16, 1970)

Sculpture on Casa del Prado reproduced (September 2, 1970)

San Diego Wild Animal Park on ballot; approved (November 3, 1970)

January 4, 1970, San Diego Union, B-1:2-6, B-13:1-2. Expansion Project: San Diego Zoo plans include new parking lot, by Joe Stone.

The man who knows the San Diego Zoo best took the press on a tour of the world famous place last week and, with candor, talked about the future of the Zoo here and in San Pasqual Valley.

The plans which probably has the most potential for controversy, as revealed by Dr. Charles R. Schroeder, Zoo director, is the one for more parking space in Balboa Park.

Schroeder was careful to make clear that the Zoo does not seeking parking space only for the Zoo. Parking space is for all people visiting Balboa Park, for whatever reason.

The plan is to double the capacity of what commonly is called the Zoo parking lot from the present 3,000 to 6,000 cars by putting in a terraced parking lot across Park Boulevard from the present one.

Frankly anticipating opposition and the customary charge of covering the park with asphalt, Schroeder said the plans call for plantings and picnic tables in the proposed new parking lot, and a pedestrian overpass at Park Boulevard.

His argument:

Money is being spent to persuade people to come to San Diego to see, among other things, the world-famed Zoo.

"If they come here and can't find a place to park they will leave and not return," said the Zoo director. He mentioned some growth figures in support of parking expansion.

The parking lot usually is filled Saturdays and Sundays. Zoo attendance topped 3 million for fiscal year 1968-69. Projections see it topping 5 million in 1975.

As the press party took a bus tour with Schroeder as barker, he remarks progressed like this:

The Zoo collection exceeds 5,500 animals, 1,680 species. It is the largest in the world, the largest ever exhibited at one time. It is more than twice as large as the next largest collection in the United States.

Two tour buses have been added to the fleet which now totals 18. The bus on which the press rode was powered by liquid petroleum fuel which is smogless. If the experiment with it is successful, the entire fleet will go to liquid petroleum.

Forty percent of Zoo visitors ride the buses. Thirty-eight percent ride Skyfari, the cable life across the Zoo. Bus riding in on the increase. Not yet sure about Skyfari riding.

Skyfari is, however, distributing more people at far corners of the Zoo. This makes a need for more food services in those parts of the Zoo.

The big cost is taking care of people, not animals or exhibit. The \$130,000 annual food and water bill for animals is a small part of the \$6 million budget.

The first canyon entered by the bus tourists is "not a handsome area" and is to be changed during 1970. Aardvarks will be moved to deer mesa and their space used for giant armadillo, Fences will disappear.

Plantings in the Zoo are all exotic and in value far exceed that of the animals on display.

People from Africa visit the Zoo and remark that African plants, such as the Natal plum, growing there look better than they do in Africa.

Dog and cat canyon will be changed drastically in 1970 because it is "a good example of a bad exhibit." Fences and cages will disappear.

There is a brand new exhibit of swamp antelope from Africa. Their hooves are built to allow them to walk through mud.

Utilities in the Zoo are all on or under the ground and all are in tip-top shape. The 86 pieces of automotive equipment are equally well maintained.

Horses no longer are butchered at the Zoo. Boneless horse meat for animal food can be delivered from Omaha at less cost.

The African veldt exhibit is not improved upon anywhere in the world.

Some crowding of herds is being allowed. This helps to develop herds to be sent to stock the Wild Animal Park as San Pasqual due to open in 1972.

Squirrels will be allowed to steal peanuts from some vending machines because it is fun.

Pigeons are expensive pests in the Zoo, but "we'll never get rid of them>"

The speed ramps were costly, but they are successful in moving people about the Zoo.

Twice a month surveys taken continuously show 30 percent of Zoo visitors are from San Diego County, 35 percent from the Los Angeles area, and 60 percent have never visited the Zoo before, or have not visited it in three year.

The Zoo has the world's only exhibit of Cretan goats.

New exhibits are to be placed about the west terminus of Skyfari to give riders something to see while they are waiting for their return ride. One will be flying mammals --- like bats.

Across the road from the terminus is to be an island for rhesus monkeys. It will be surrounded by water. It will be an educational exhibit, showing the contributions of this monkey to mankind because he was subject to experiments in polio prevention and other research.

Zoo curators sometimes oppose displaying such common animals as rhesus monkeys and coyotes and there is conflict but not much. Schroeder believes people want to see them, and they are displayed in San Diego.

An area near Cabrillo Freeway used to be a catchall. It is beautiful sheep and goat canyon now.

The Zoo will ask the City Council to raise admission prices to adults from \$1.25 to \$1.50 on July 1, 1970. The raise is necessary because cost of operation has increased \$500,000 annually.

During the tour and a luncheon which followed, Schroeder and Sheldon Campbell, vice president of the Zoological Society, said of San Pasqual:

It is now called the San Diego Wild Animal Park and Schroeder is set on the name but others are not. A suggestion by a reporter that it be called Battleground Zoo, after the Mexican War battle there December 6, 1846, was not enthusiastically received. There is pressure from Escondido to be included in the name.

Plenty of water is assured for San Pasqual --- not from wells but from a share of imported water.

There are 90 animals at San Pasqual now, including 30 ground birds. They are cared for by two employees called rangers.

There will be 3,000 animals on exhibit there when the park is opened in 1972. The critical proposition is having enough exhibits for a first class show which will satisfy people and encourage them to return.

There are 1,800 acres at San Pasqual, which is about six times larger than the San Diego Zoo. The San Diego Zoo will not need more land, in part because of San Pasqual.

San Pasqual will display the animals of the world behind moats and concealed fences which will separate exhibits from people and carnivores from prey.

There will be lions, tigers, leopards and cheetahs. There will be giraffe, zebra, impala and many other hoofed animals and ground birds.

People will see the exhibits aboard a train, either steam or electric, simulating steam. An atmosphere of Kenya in the 1920s is sought.

January 6, 1970, San Diego Union, B-2:1. 200th to seal time capsule Wednesday.

January 6, 1970, San Diego Union, X-13:1. Growth of military here slows down; Naval Hospital gained a \$1.4 million outpatient clinic in 1969 and a \$340,000 corpsmen quarters.

January 8, 1970, San Diego Union, B-1:7-8. Mayor Curran says open space to cost city, by Nancy Ray.

The city will have to pay developers for restricting their property rights in Tecolote Canyon, Mayor Curran told the Advertising and Sales Club of San Diego yesterday.

January 13, 1970, San Diego Union, B-3:6-7. "Spin-Dye-Weave," a demonstration of the ancient art of fabric making will be featured Saturday and Sunday at the Museum of Man.

January 13, 1970, San Diego Union, B-3:6-7. Like most areas in the city, the Kearny Mesa area at Clairemont is experiencing a growing shortage of space for organized youth sports activities.

January 14, 1970, San Diego Union, B-3:5. A proposed city ordinance which would require subdividers to donate land or money for neighborhood parks was ordered placed on a future City Council docket yesterday.

January 21, 1970, San Diego Union, B-1:6-7. The City Council yesterday authorized a 25-cent increase in the San Diego Zoological Zoo admission fee.

The entrance fee will be raised April 1 from \$1.25 to \$1.50 a person. Persons under 16 years of age will continue to be admitted free.

Dr. Charles Schroeder said the extra 25 cents will increase revenue by an expected \$250,000 to \$400,000 a year.

"This is essential to balance the budget," Schroeder said. He said the budget for the fiscal year beginning July 1 will be \$6 million.

Attendance at the zoo has increased annually by about 7 percent in recent years, Schroeder said. The number of persons to visit the zoo in 1969-70 will exceed 3 million more than any other zoo in the world, he said.

He said about half of the persons who enter the zoo pay. Others are students, servicemen and other persons with free admission or passes.

January 22, 1970, San Diego Union, B-3:2-3. The Sierra Club of San Diego has asked the city Park and Recreation Board to help save part of Florida Canyon in Balboa Park from becoming a paved parking lot.

"The current proposal of the San Diego Zoological Society to terrace a major portion of 154 acres of the Florida Street Canyon for a parking lot is an excellent example of the creeping destruction of Balboa Park," said Sierra Club Chairman Richard G. Rypinsky in a letter, read to the board yesterday.

Chairman Douglas R. Giddings referred the letter to the board's Balboa Park Committee, which also is to receive the results of a city study on all parking in the park.

January 22, 1970, San Diego Union, B-3:8. Plans for mini-parks in crowded areas approved by Park and Recreation Board yesterday; half costs pledged by the U. S. Department of Health, Education and Welfare; six of the proposed park sites are in Southeast San Diego.

January 23, 1970, San Diego Union, B-3:5. Room tax to help pay for 200th, by Bill Long.

January 27, 1970, San Diego Union, B-1. City Council authorizes 25-cent increase in San Diego Zoo admission fee.

The entrance fee will be raised April 1 from \$1.25 to \$1.50 a person. Persons under 16 years of age will continue to be admitted free.

Dr. Charles Schroeder, zoo director, said the extra 25 cents will increase revenue by an expected \$250,000 to \$400,000 a year.

"This is essential to balance the budget," Schroeder said. He said the zoo budget for the fiscal year beginning July 1 will be \$6 million.

Attendance at the zoo has increased annually by about 7 percent in recent years, Schroeder said. The number of persons to visit the zoo in 1969-70 will exceed 3 million, more than any other zoo in the world, he said.

He said about half of the persons who enter the zoo pay. Others are students, servicemen and other persons with free admission or passes.

January 27, 1970, San Diego Union, B-2:4. Food, Beverage Building Decorations Reproduced, by Joe Stone (illus.).

In a warehouse off Morena Boulevard in Old Town a start is being made toward fulfilling the goal of the Committee of 100.

The committee's goal is to preserve the Spanish colonial architecture which was the style of structures built in Balboa Park for the Panama-Pacific Exposition [sic] of 1915-16.

The project in the warehouse is restoration of architectural sculpture which adorned the Food and Beverage Building, built for the 1915-16 exposition and recently razed.

Involved in the project are the L. J. Ninteman Construction Co., in whose warehouse the work is being done; Richard George Wheeler, architect; Christian (Chris) Mueller, supervisor, and five model makers.

Mueller divides his time between the local project and the WED Co., of Glendale. WED stands for Walt E. Disney.

Right now Mueller is working on designs for a palace in the Florida Disneyland. In the past he has created for Disney projects such things as the giant squid in "20,000 Leagues Under the Sea."

His handiwork also can be seen on sets of the motion pictures "Camelot" and "Hello Dolly." Mueller, 63, has spent half his life in such work, but he has never seen anything quite like the Food and Beverage building project.

"This is risky," he said. "There are so many unknowns. It took courage to put a price tag on it."

The price tag is \$98,000.

The work started with the removal of the architectural sculpture from the Food and Beverage Building. Each piece was given a _____ number, then placed _____ cant structure in Balboa Park.

A written schedule was prepared. It accounts for the withdrawal of items from Balboa Park, their arrival at the Ninteman warehouse, their reproduction, and the return of the reproductions to Balboa Park.

There they await the construction of the replacement for the Food and Beverage Building. They will adorn the replacement.

The original structure was intended for the 1915-16 exposition. It is made of plaster, reinforced by wood and fiber. It is 55 years old now, and some of it is badly deteriorated.

However, it is to be the pattern for concrete replicas, so the deteriorated parts must be rebuilt with plaster before they can be used as patterns.

The rebuilding follows a thorough cleansing with a paint removing chemical, blasts of compressed air, and finally jets of water.

Once the pattern is rejuvenated, a mold is made into which concrete is poured. The concrete 1970 replica looks like the plaster 1915 original. It is more than three times heavier than the original and is reinforced with steel instead of wood and fiber.

January 28, 1970, San Diego Union, B-2:7. The City Council yesterday introduced an ordinance to create a Department of Parks and Public Facilities.

March 3, 1970, ELECTION: Gives San Diego Unified School District permission to continue a previously authorized tax override that expired July 30 and also authority to raise the tax rate by 35 cents (money needed for operation of schools).

April, 1970, San Diego Magazine. Putting Balboa Park Back Together Again, 47, 49, by Marilyn Hagberg.

After years of mindless neglect and destruction, there's a golden decade ahead for El Prado. The citizens of San Diego have forced the partial restoration of its Spanish splendor. Next step: controlling the automobile.

The decade of the Sixties was a schizophrenic one for Balboa Park, an era of erratically juxtaposed development and decay, of pressing problems and pathetic procrastinations. The dashing Spanish splendor and magnificent varied symmetry of Bertram Grosvenor Goodhue's world-famous Prado were disrupted by destruction and deterioration only slightly compensated for by the construction of the Timken Gallery and Fine Arts Gallery West Wing and the renovation of the House of Hospitality. Landscapes and gardens once lush and well manicured were left to become dirty and dried out as more and more people came to San Diego in search of the Good Life and to the Park in search of beauty.

The disappointing decade, which began so promisingly with the approval by the City of the Bartholomew Master Plan for the Park, did manage, however, to end as well on a positive note. Thanks largely to the efforts of Bea Evenson and her determined Committee of One-Hundred and of the Balboa Park Committee of the City's Park and Recreation Board, the City and citizens of San Diego agreed to preserve what was, and to restore some of what wasn't, left of the Spanish-Colonial heritage of El Prado, that incredible avenue which art and architecture critic James Britton, former associate editor of this magazine, once called "the boulevard of broken dreams."

Now a new era appears to be bursting into the Park, renewing old hopes. The bulldozers are there again, not to destroy it this time, but to put it back together. The fights over the final fate of Downtown's only breathing space may be far from over, but arriving with the Spring is the first blossoming of what could be a new Golden Age of action for Balboa Park. After years of fooling around the City seems to have tuned in on the most dramatic domestic issue of the day --- the environment --- and seriously set to work implementing the Bartholomew Plan and spending some of the millions earmarked for Park construction and improvement from 1966 and 1968 bond elections.

The most spectacular activity is occurring at the long neglected east end of El Prado. There, last month's construction began to replace Carleton Winslow's flamboyantly baroque Food and Beverage Building with a stunning permanent structure which will combine the classical spirit of the old plaster palace with contemporary substance and significance. This Summer, work will start east of the Aerospace Museum, opposite the Museum of Natural History, on a Hall of Science and Planetarium which could become world-renowned. The end of the year will witness the beginnings of the exciting new Plaza de Balboa, which will return a terminus missing from the Prado since the old arcaded bus stop was torn down in 1966.

In the Palisades area, the City's Park Division will start this Summer to replace the dirt expanses behind the Ford and Federal Buildings, Municipal Gym and Balboa Bowl with lawns, scattered groupings of eucalyptus and palm trees and clusters of shrubbery. The San Diego firm of Paderewski, Dean and Associates, AIA, is currently at work on studies to determine the feasibility of rehabilitating the empty Ford Building, possibly as a future home for the Aerospace Museum (not a bad idea: since the Ford rotunda is right under the path of jets landing at Lindbergh Field, I doubt if any organization that wasn't crazy about planes would want to inhabit the place.) If such a project could be accomplished within the next couple of years, then the Prado's Electric Building, now holding the Aerospace Museum, could be structurally and architecturally rehabilitated for other museum use, or perhaps for a performing arts center.

Elsewhere in the Park, numerous projects are planned or are in progress. The Pepper Grove picnic area is being perked up, and the Morley Field recreational area is being landscaped with lawns and groves of eucalyptus. In several sections, remedial pruning and planting of trees and shrubs is going on, walks are being improved, and additional lawns, comfort stations and parking areas are being provided. This Autumn, the "green" in front of the Old Globe and Cassius Carter theaters will be replaced by a sunken, integral-color, textured concrete courtyard with tree and shrub plantings, designed by Victor Wulff, AIA. Plans also are in progress for a Japanese tea garden on the hillside between the House of Hospitality and the Organ Pavilion.

All this is merely a beginning, though, for the development and maintenance of Balboa Park will be a continuing and costly challenge throughout the seventies and many decades to come. Much more needs to be done. One can wish, of course, that it all could be done quickly and wisely, without the fund-finding dilemmas and bureaucratic delays and compromises that characteristically plague critical, aesthetic, cultural and educational projects in San Diego. Nevertheless, a start has been made. The City has finally rolled up its sleeves to coax a new flowering in its only garden.

April, 1970, San Diego Magazine. By Fall, 1971: Casa Del Prado, a splendid replica, a victory for the people, by Marilyn Hagberg, 47, 48.

The greatest victory in the fifty-year war to save the lyrical Spanish Colonial architecture of Balboa Park is taking concrete shape this Spring; a splendid replica of the robust Food and Beverage Building is being built by the Nielsen Construction Company to fill the gap east of the lily pond after the crumbling old palace was torn down last year to make way for a multi-functional new building with a new name. The Casa Del Prado, scheduled for completion by the Fall of 1971 at a total project cost of 3.5 million dollars, will be a flexible modern building inside a magnificent facade which will repeat in permanent form most of the exuberant baroque ornamentation that gave the former palace its much-loved romantic spirit.

In many ways, the new palace will be a better structure than the old one. Designed by Richard George Wheeler & Associates, AIA, with the assistance of consulting architect Samuel Wood Hamill, FAIA, the L-shaped Casa Del Prado actually will be two buildings connected by an airy, arcaded patio; in the center of the larger building will be another arcaded patio. The complete complex, which follows basically the plan drawn by Sam Hamill two years ago (*San Diego Magazine*, May 1968), will consist of about 61,000 square feet of enclosed space and 27,000 square feet of arcades. While the new exteriors will echo the rich ornament of the old structure, the contemporary interior will be a far cry from the barn-like caverns of the Food and Beverage Building.

Except from some elaborate ornamentation around second-story windows, the new Casa's walls and arches of tan-tinted, off-white stucco over concrete will be much trimmer and simpler than those of the former palace, which tended to be a bit busy. The focus thus will be on the lusty, whimsical, cast-stone ornamentation copied faithfully from the entrance and the eighty-foot-tall twin towers of the "Church" facing Zoo Drive from the "Prado" building's two main entrances, and east side entrance, and from the ends of the long line of arcades fronting El Prado. Heavily paneled wooden doors will give additional ornament to the exterior, and final-capped pilasters will interrupt the smooth horizontal expanses of the north and west elevations.

Through the City's Recreation Department, many groups and organizations will be able to schedule activities in the numerous interior spaces. Priority, though will go to San Diego's Botanical Garden Foundation, which will have its offices and horticultural library in the Prado building, and to the San Diego Civic Youth Ballet, Youth Symphony, Youth Chorale and Junior Theater, which used the Food and Beverage Building. Both buildings will have air conditioning and special acoustical walls and ceilings designed by Purcell + Noppe + Associates of Los Angeles.

The 17,000-square foot "Church" will house a multi-purpose auditorium with a stage, a small orchestra pit and a flat wooden floor which will seat a thousand in movable chairs. It will be suitable for concerts, dramatic productions, orchestra rehearsals, lectures, slide and film presentations, and folk and square dancing. The building also will have rest rooms, five rooms for instrumental and ensemble practice, and a light-sound and projection-control room above the foyer.

Wrapped around a double-arcaded patio, the Prado Building's two stories will contain twelve large rooms in addition to dressing and rest rooms, storage areas and a catering kitchen. Although most of these will be adaptable to a wide range of functions, one is designed primarily as an exhibition hall with special accouterments for floral displays, one as a choral rehearsal room, and several others as drama and ballet classrooms, the latter with mirrors and practice bars.

The Casa Del Prado will be given a light, airy atmosphere by its two courtyards. The 112 by 48-foot, textured concrete South Patio will be enclosed on all sides by two levels of 16-foot wide arcades and will have large planters of flowering shrubs in each of its four corners. The 102 by 79-foot North Patio, open to the east and west, will be framed by arcades, 16 feet wide and 19 feet high, and will offer a superb see-through view to the Timken Gallery, Fine Arts Gallery and California Tower. It is to be landscaped with lawn and hardy trees and shrubs.

The entire palace will be surrounded by lawns and shrubbery. Saved will be the south facade's *phoenix reclinata* palms and many other stately trees which provided intriguing shadow plays on the former building's walls and ornament. All the landscaping will be done by the City's Park Division.

Easily the most outstanding feature of the Casa Del Prado, though, will be its opulent ornamentation. To facilitate the reconstruction in cement of the splendid statuary and elaborate decorative motifs of the Food and Beverage Building, the L.J. Ninteman Construction Company has been making models from the old building's incrustations since last October, and has been awarded the contract to make the molds, cast the ornament and set it on the new palace.

From two-hundred specimens taken from the Food and Beverage Building in August 1968 and photographed, labeled, catalogued and stored in Balboa Park, about 140 models are being made for all the Casa Del Prado's ornamentation. The specimens, most of them badly damaged, have had to be cleaned up, patched up, built up and in some cases re-created in clay from scratch. Molds will be made from the finished plaster and clay models with a flexible, rubber-like plastic, which reproduces exactly even the most minute details and which can be reused countless times. The final castings will be textured, giving the ornament not a shiny new look, but the authentic weathered appearance of the old palace's rich facades before they became sadly deteriorated from years of neglect.

Supervising the restoration has been Chris Mueller, sixty-three, an architectural sculptor from Burbank whose credits include the sets for *Camelot*, *Hello Dolly* and scores of other major motion pictures. Mueller, who first came to San Diego in 1924 to work on the facade of the Fine Arts Gallery as an apprentice to his father, also was consultant to Ninteman on the University of San Diego and on San Francisco's Palace of Fine Arts. He has spent almost every weekend in the Ninteman warehouse on Custer Street, overseeing the progress of a five-man team of local model-makers and himself sculpting fresh features for critically damaged specimens. For him, as for the scores of others who have worked hard and long to see the fabulous Food and Beverage Building rebuilt, it's truly been a labor of love.

April, 1970, San Diego Magazine. By Winter, 1971. A Spanish Colonial Hall of Science and Planetarium at Prado's end.

By the winter of 1971, the impressive 35,000-square foot City of San Diego Hall of Science and Reuben H. Fleet Planetarium and Space Theater will fill the space adjoining the green grotto immediately east of the Electric Building on El Prado. Construction of the long, one-story building designed by two San Diego architects, Louis Bodmer and Match Heimerdinger & Associates, both

AIA, is stated to cost between 1-1/4 and 1-1/2 million dollars from revenue bonds to be sold by the City and County joint power Planetarium Authority. Furnishing, equipping and operating the building will be the San Diego Hall of Science, a non-profit corporation organized in 1957 to develop a science-oriented center for the City.

In its exterior design the new building will be compatible with the other Spanish Colonial palaces along El Prado. The walls, windowless except at the south side, will be of tannish, off-white stucco over concrete. Baroque ornamentation will adorn the surface in the form of cartouches at the center parapet of each wall of the octagonal Space Theater; a large finial at the apex of the Planetarium's angled tile roof; and a balcony-like roof railing with crests and finials above the glazed 9-1/2 by 18-foot arches at the main entrance from the Plaza de Balboa and at a secondary entrance from the parking lot to be constructed immediately south of the building. The expanses of wall will be broken further by ornamental pilasters. Landscaping will relate closed to the Plaza de Balboa, with as many of the area's existing trees retained as possible.

Inside will be a large, rectangular (90 by 78 by 18-foot) Exhibit Hall to house permanent and temporary displays of phenomena in the fields of physical science and the spectacular, oval (75 by 70 by 50-foot) Fleet Planetarium and Space Theater. Between these two main facilities will be a pie-shaped lecture hall seating approximately 150, and a large lobby area including a store for books and scientific models and memorabilia. South of the Exhibit Hall will be rest rooms, a staff lounge and an exhibit preparation shop on a lower level, and three small classrooms and the Hall of Science's administration offices and reference library on a mezzanine level. All major facilities will have air conditioning and special acoustical design by Purcell + Noppe + Associates of Los Angeles.

The Space Theater will be the building's most remarkable feature --- and an important first for San Diego. It will contain the world's first tiled dome, the concept of which has been designed by the Hall of Science. It also will have a 10,000-star Space Transit Simulator (star projector) and several planet projectors, as well as 70 mm movie projection which, combined with the other computer operated equipment, will enable a wide variety of effects to be presented on the 75-foot diameter dome. The Planetarium's major instrumentation, which is being built by Chadds Ford, Pennsylvania, will be purchased with a \$350,000 donation from San Diego's Fleet Foundation.

Audiences of about 360 will be entrained in the Space Theater in two stepped levels of fixed, one-directional, comfortably upholstered seating. According to William D. Bridge, executive director of the Hall of Science, the special dome and sophisticated instrumentation will create an entire new way of viewing the heavens. "The horizon line has been eliminated as a point of reference," he says, "and instead of seeing the stars and planets from the earth underneath, the audience will see them from shifting vantages in their midst. Viewer-orientation will vary as the projections simulate space travel."

April 24, 1970, San Diego Union, B-3:1-2. The City Council yesterday authorized bidding for contracts to build five new parking areas with spaces of 1,118 cars in Balboa Park's central area; the central --- Prado and Palisades --- are currently has 1,786 parking spaces according to Vince Marchetti, city park design engineer; Marchetti said the new parking areas would cover about seven acres with asphalt and will cost an estimated \$748,000.

202 cars east of Park Boulevard and south of carousel

457 cars near Balboa Park Bowl, west of Park Boulevard, on a graded, unpaved field

187 cars south of planetarium site

123 cars south of Aerospace Museum (Electric Building)

49 cars in Gold Gulch, west of Pepper Grove

Bridge over Gold Gulch to provide access to Aerospace lot

Marchetti said projects comply with Balboa Park Master Plan.

April 26, 1970, San Diego Union, G-1:3 Balboa Park and how it grew, by George Lundgren.

May 20, 1970, Park and Recreation Board Minutes

CORRESPONDENCE

- b. Request for use of Administration Building --- Museum of Man
Museum of Man has requested use of building in Balboa Park upon vacation by Recreation Department in fall of 1970.

At the suggestion of Mr. Giddings, this matter was referred to the Balboa Park Committee for comment.

- c. Florida Canyon Development Plan - Botanical Garden Foundation and Natural History Museum staff.
Support by both groups of the creation of a citizens committee to develop a plan for usage of Florida Canyon.

At the suggestion of Chairman Giddings, and with the unanimous consent of the members, the Board referred these communications to the Balboa Park Committee.

June 21, 1970. Report on Roads in Florida Canyon and Adjoining Areas, by Philip P. Martin.

I move that Mr. Lloyd T. Lowrey be asked to develop a plan for Florida Canyon, utilizing the help of the City Engineering Office and, if more expert help is needed, being empowered to retain local men like Glen Ricks and/or Harold Curtiss.

As a user of Balboa Park and its roads since 1910, I submit the following recommendations:

1. Eliminate Switzer Canyon Freeway. No need has been shown.
2. Maintain and improve Pershing Drive. This drive serves well an area east of Balboa Park and has been an easy road to maintain due to its decomposed granite base and good drainage.
3. Retain present Florida Drive two-lane road. This should be maintained and improved, but while future traffic might necessitate expansion, I do not believe that the present traffic demands a much wider road. Therefore, I suggest that the west shoulder be built up to at least a thirty-foot width with decomposed granite. This would be used for parking until such time as the traffic patterns to the east and north demand a wider road. Tree-planting would have to consider the future widening of the road.

The following notes are offered as well:

1. Retain the four-way boulevard at Morley Field Drive and Florida Drive.
2. At some future date Upas Street could be improved by a bridge over Florida Street. Traffic today does not warrant the cost.
3. Bridges for foot traffic only could be constructed over the stream bed at two or three selected spots to picnic areas, walks or paths. These would all be constructed on the west side of Florida Drive.
4. The wide shoulder on the west side of Florida Drive could be built only to Zoo Place, if no need for parking could be shown to the south. This would not only provide access to picnic areas in Florida Canyon but also could be used by the Zoo as an auxiliary parking lot on those days during the year when the Zoo lot is over-crowded. On such days buses could come down

Morley Field Drive to Florida Drive, go south on Florida Drive to Zoo Place, and then up to the Zoo.

5. The east side of Florida Drive should be planted in oak or cork oak trees, or both. The west side on both sides of the stream bed could be planted in sycamores. At lower levels, other trees that have done well locally in my experience, are Hollywood Plums, Liquid Ambers, Chinese Elm, Brazilian Pepper, Acacias, Cedar Deodara, and Jacaranda. Eucalyptus and palms, perhaps, should be reserved for the top of the canyon, east of Park Boulevard.

(Signed) Philip P. Martin.

June 26, 1970, San Diego Union, B-2:4-5. City Council awarded \$488,185 contract for Balboa Park improvements, including 739 parking spaces.

July 3, 1970, San Diego Union, B-1:7. Terms okayed for Chicano Park here; City Council tells City Manager Hahn to sign state pact for California Highway Patrol held land, by David Brownell.

July 16, 1970, San Diego Union, B-2. Birds of prey in unique cage at San Diego Zoo.

A unique cable-suspension flight cage for birds of prey was dedicated at the San Diego Zoo yesterday.

K. C. Lint, curator of birds at the Zoo, cut the ribbon on the new exhibit, which was built at a cost of \$100,000. Special guest at the ceremonies was Monte Kirven, who is in charge of educational activities at the San Diego Natural History Museum and an expert on birds of prey.

The vinyl-covered wire mesh of the cage, which is 85 feet long, 60 feet deep and 40 feet high, is held up by 66 wooden poles, 12 inches in diameter. Eucalyptus trees, already growing on the site, were integrated into the exhibit by designer Charles Faust. The birds perch on simulated rock roosts and caves provide nesting places.

In front of the cage a pedestrian catwalk, at its highest point 35 feet above the roadway, provides visitors with a front row seat.

The stars of the exhibit are the rare Andean condors, the largest birds of prey, with a wingspread of up to 10 feet. Also in the exhibit are the eastern fishing eagle and white-headed vulture of Africa; the Pallas' sea eagle from Asia; and the American golden eagle; Patagonian buzzard eagle, northern black vultures and western red-tailed hawks from the Americas.

July 21, 1970, San Diego Union, B-3:1-4. A city park committee announced last night it will request an up-to-date report on freeway landscaping adjacent to San Clemente Canyon Natural Park, near Clairemont.

July 21, 1970, San Diego Union, B-3:2-4. \$60,000 National Aeronautics Space Administration exhibit; Apollo 11 flight plant shown in Aerospace Museum display here (illus.)

"We have roughly 50,000 visitors a month in this building," said Colonel Owen Clarke, "and probably 100,000 more persons will see this exhibit during its stay here."

July 23, 1970, San Diego Union. Committee of 100 wants ornamentation, \$70,000 sought for Casa Del Prado, by Jeannette Branin.

An all-out campaign to raise \$70,000 in 30 days to ornament the second-floor loggia of Casa del Prado, now under construction on El Prado in Balboa Park, is being announced by the Committee of 100.

The Casa del Prado is being erected on the site of the old Food and Beverage Building, a structure condemned as unsafe for public use, but considered a unique example of architecture of Churrigueresque style.

In November, 1969, the committee succeeded in having a bond issue placed on the general election ballot to provide \$3.5 million for the duplication of the old building in permanent construction.

In a newsletter being circulated to members and friends, the committee states that "a large segment of the extraordinarily rich original ornamentation of our beautiful Casa del Prado has been eliminated."

According to present plans, the newsletter reports, the fluted, striated columns with capitals of cupids will be replaced by plain unadorned square columns, and iron balcony railings will be substituted for the "elegant" ornate balustrade.

"We are deeply disturbed by the substitution of a rather solid arcade for the exuberant loggia . . . one of the most distinctive features of this building," states the newsletter distributed at the suggestion of Mrs. Frank F. Evenson, committee president and founder.

Mrs. Evenson explains that the city has said no more money can be spent on the new building than the amount now designated.

Bill Gerhardt, city director of parks and public buildings, confirms the statement that there is no money for loggia ornamentation.

Between the passage of the bond issue and the time of the award of the contract, Gerhardt said, "The cost of ornamentation just went out of sight."

Gerhardt explains that only one subcontractor for ornamentation presented himself to all the bidders.

"At the time we began the design, the subcontractor estimated a cost of \$250,000 to duplicate ornamentation," relates Gerhardt.

"By the time the contract was awarded, the cost of ornamentation has risen to more than \$750,000."

Consequently, the committee members are distributing a list of needed ornaments, broken down by type, number and cost.

For example, an elaborately sculptured column and base will cost \$1,850. Seven are needed to support the six arches of the loggia.

Cupid capitals, to surmount the columns, will cost \$1,200 each. Six are needed.

Six central panels over the arches, with medallions, will cost \$580 each; six metopes, or division panels, will cost \$190 each; balusters will cost \$98 each, and 72 are needed; the balustrade rails will cost \$530 each, and six are required.

Other ornamentation for which funds will be raised are six triangular spandrels with Neptune heads, \$340 each; six arches at \$1,856 each; and seven base ornaments at \$320 each. Other expenses will be for engineering and construction.

Frederick Kunsel, treasurer of the committee, will accept donations of any amount mailed to him at 1310 U. S. National Bank Bldg., San Diego, 92101, and made payable to the Committee of 100.

Donations of \$500 or more will be noted on an engraved bronze plaque in the loggia, said Mrs. Evenson.

“Now we hope for another miracle in trying to raise \$70,000 by mid-August.

“We will name the entire loggia in honor of any public-spirited person who will donate a major portion of the total cost.”

July 24, 1970, B-1:3. The City Council yesterday passed three resolutions that clear the way for placing a \$6 million bond proposal for the San Pasqual Wild Animal Park on the November 4 ballot.

Funds from sale of the general obligation bonds would be used for development of the 1,800-acre park, which is operated by the San Diego Zoo.

The San Pasqual preserve, scheduled to open in 1972, is on city-owned land and all structures built on it will belong to the city.

The preserve, which is the largest of its kind in the world, will have an ultimate investment of \$25 million.

A 2-cent tax per \$100 assessed valuation is now levied by the city to help finance operation of zoo facilities. The Zoological Society has told the City Council that none of that money would be used for repayment of the San Pasqual bonds.

Instead, the society will pledge its income from admissions to the park to pay off the bonds in a 15-year period.

The council informally approved the bond issue at its June 23 session. The issue will need a two-thirds majority vote for passage.

July 28, 1970, San Diego Union, B-1:2-4, B-5:2-3. International food display; Balboa Park's Museum of Man trap for weight watchers, by Carol Ritch.

July 30, 1970, North Park Independent. Committee angered by “Casa” design.

San Diego. A storm of protest blew up last week when members of the Committee of 100 discovered that the new Casa del Prado Building in Balboa Park will be constructed without large segments of the original ornamentation removed from the old Food and Beverage Building.

It was the committee that sparked the 1968 bond election drive which raised \$3.5 million for the new building. The old Food and Beverage Building was razed because of age and structural weaknesses.

Flyers sent out by the committee are asking San Diegans to donate funds for the addition of the left-out cupids, fluted striated columns, figured panels and other architectural decorations.

Dedicated to the preservation of Spanish colonial architecture, the committee complains that the elimination of the pieces will destroy the total effect of the new building.

“We did not fight for the bond issue for just another building on this site,” a spokesman said. “This building is being constructed to last thousands of years. It should be an elegant finished work of art.”

City director of parks and public buildings, William Gerhardt said, “We just ran out of money, for one thing, however, architect Richard Wheeler said the new building will be closer to the actual design of Spanish Colonial architecture than the old building was.”

Gerhardt also pointed out that the original building was designed as a "stage setting."

"It was overly ornamental to give a quick impression. It apparently wasn't too authentic for that reason," he added.

He estimated it would cost about \$85,000 to include the pieces omitted from the project.

"We've already spent about \$75,000 on the ornamentation," he said, "including beefing up the building structure to support the ornaments we will use and duplicating and preserving the old ornamentation."

The initial bond issue called for the construction of the new building on the site at Zoo Avenue and El Prado and for "other park projects."

"All of the money is used up on this one project," Gerhardt said. "The biggest surprise in cost was the ornamentation. It cost almost three times the estimated expenditure."

At present about 50 to 60 different types of Spanish and Moorish ornamentation will be included in the building.

Meanwhile, committee members are pleading for funds to see that all the exterior decorations are included. In a unique approach to fund-raising, the cost of each ornament is included and donors may specify how they want their donation spent.

For example, a central panel with medallion is \$580, a column and base run \$1,850 a set, and balusters are a bargain at only \$98 each.

July 24, 1970, San Diego Union, B-1. City Council puts Wild Animal Park bond issue on ballot.

The City Council yesterday passed three resolutions that clear the way for placing a \$8 million bond proposal for the San Pasqual Wild Animal Park on the November 4 ballot.

Funds from the sale of the general obligation bonds would be used for development of the 1800-acre park, which is operated by the San Diego Zoo.

The San Pasqual preserve, scheduled to open in 1972, is on city-owned land and all structures built on it will belong to the city.

The preserve, which will be the largest of its kind in the world, will have an ultimate investment of \$25 million.

A 2-cent per \$100 assessed valuation is now levied by the city to help finance operation of Zoo facilities. The Zoological Society has told the City Council that none of that money would be used for repayment of the San Pasqual bonds.

Instead, the society will pledge its income from admissions to the park to pay off the bonds in a 15-year period.

The council informally approved the bond issue at the June 23 session. The issue will need a two-thirds majority vote for passage.

San Diego Union, August 2, 1970, B-1, B-6. 'LATH HOUSE' --- Park's Botanical Garden Has Some Problems by Chet Dinnell

Its balustraded walkways, flanked by the cubistic architecture of the '70s, seem to have lost their romantic flavor of yesteryear.

Pond lilies, in delicate hues of blue, yellow, pink and white, still cruise lazily on the Laguna de las Flores --- Lake of the Flowers --- but the sparkling fountains have disappeared. Where to, or exactly when no one knows.

DOME REFLECTED

Yet thousands of yearly visitors, San Diegans and tourists alike, remain enthralled at the early century charm of Balboa Park's Botanical Garden.

The 200-foot rectangular lily ponds still reflect the large American-railroad style dome atop the structure, truncated into the building's facade and forming a pseudo-proscenium arch to welcome visitors.

From within, tall feather palms besiege the redwood-latticed dome, while beneath, in riotous profusion, are nurtured rare and exotic plants from tropical climates around the world.

Constructed as a temporary building for the 1915-16 Panama California Exposition, the "lath house," as it is affectionately known to San Diegans, has seen its fortunes rise and fall through its 56 years of existence.

Balboa Park Supervisor Ernest Chew, and various historians, note that the old building has not always performed the useful function that it does today. It has fallen into periods of disuse and neglect, served as a haven for convalescing sailors, and experienced a middle-age face lifting.

ONCE SWIM POOL

The lily ponds, described by San Diego author Lillian Pray Palmer as "A Cameo in Eden's Garden Set," became a swimming pool for Naval Hospital patients during World War II. Historian Florence Christman notes in her book "The Romance of Balboa Park," that the ponds were used as a swimming pool for San Diego youngsters in the summer of 1945, and 22,686 children swam there that year.

Chew relates that a glass nursery once adjoined the old structure, but deteriorated during the Navy years, and a parking lot now stands where exotic plants once were nurtured under controlled climate conditions.

Following the Navy's postwar departure, the building stood neglected until 1957, when the San Diego City Council appropriated \$63,500 for its renovation.

12 MILES OF LATH

More than 70,000 feet, or 12 miles of redwood lath, was installed in the remodeling, and private nurseries contributed plant exhibits to start the building's new career in the San Diego park system.

In 1964, San Diegan Robert M. Golden contributed \$15,000 for restoration of the 50-year-old balustrades and giant urns adorning approaches to the building.

Today, more than 2,000 variety of plants, usually in bloom, grace the cool, lava-studded interior of the Botanical Garden. For added beauty, the east end of the huge display contains a bathtub-size, cascading series of ponds. And herein, according to Supervisor Chew, lies a problem.

"It's the hippies," he explained. "So many of them live in the park. We don't know how many of

them there are. They live in the park and in the adjoining canyons, and many of them have little children.”

CHILDREN BATHED

“They are always bathing their little ones in the ponds.”

But Bob Myers, the Botanical Garden superintendent and Chew agreed that this is not the major problem.

“Our number one problem, Myers said, “is shoplifters.”

“That’s right,” Chew added. “Little old ladies. They’re our biggest problem.

“They pull plants right out of their containers, roots and all, and put them in their shopping bags. What can we do about it? Nothing, really.

“Who wants to put a little old lady in jail?”

Myers interjected that in at least one case, such a situation resulted in recovery of the kidnapped exotics.

THEFT EXPLAINED

“That’s right. I remember that,” Chew recalled. “A lady took a plant, and the pot too. When apprehended she offered an interesting explanation.”

“She said the plant belonged to her because she paid her taxes.”

Such temptations are understandable when one views the rare blend of showmanship and horticulture within the “lath house.”

Chew explained that only plants in bloom are displayed here, and when the bloom disappears the plant is taken to the park nurseries until it blooms again, or is planted elsewhere in the park system. The building is primarily an experimental center for plants arriving from far away places.

HALFWAY HOUSE

Here, in a kind of “halfway house,” Chew said, plants from such distant places as Mauritius, South Africa and China are nurtured and observed constantly to see if they are capable of adapting to the San Diego climate.

If the plant thrives, it is installed within the park system and a new plant is brought in to take its place.

Chew describes the Botanical Garden as the “most photographed” area in the park, and adds, “We are seldom required to buy plants. Most are contributed by nurseries and private citizens.

“A recent example,” he said, “was a retired couple in Del Mar. They gave us more that \$7,000 worth of orchids, which now comprise the nucleus of all of our orchid displays.”

Chew went on to say that in the near future the building will display an exhibit primarily for students of horticulture, including “half-hardy” specimens --- plants incapable of surviving cold weather --- and examples of grafting techniques.

Visitors who might have noticed the Botanical Garden's resemblance to an early-century American railroad station are perceptive indeed.

The building, according to Mrs. Christman, is exactly that --- a converted railroad station. In her book she relates that the Santa Fe Railroad had the skeleton fabricated to be a railroad station somewhere other than San Diego.

Directors of the Panama-California Exposition purchased the unassembled framework, and constructed it, latticed with lath, in Balboa Park for Exposition plant displays. Designed by Carleton M. Winslow, its construction was supervised by Frank P. Allen.

BECOMES MECCA

In recent years the Botanical Garden has become a mecca for flower enthusiasts, who have flocked in increasing numbers to its seasonal displays of Easter lilies, poinsettias, chrysanthemums and spring bulbs.

All of which would not have been possible were it not for the dedicated efforts of the 30,000 citizens of San Diego who promoted and financed the Panama-California Exposition of 1915-16.

But more important a debt of gratitude is owed to that same generation of San Diegans who, in appreciation of Balboa Park's potential as a social and cultural center, almost unanimously

adapting to the San Diego climate.

If the plant thrives, it is installed within the park system and a new plant is brought in to take its place.

Chew describes the Botanical Garden as the "most photographed" area in the park, and adds, "We are seldom required to buy plants. Most are contributed by nurseries and private citizens.

The council informally approved the bond issue at the June 23 session. The issue will need a two-thirds majority vote for passage.

San Diego Union, August 2, 1970, B-1, B-6. 'LATH HOUSE' --- Park's Botanical Garden Has Some Problems by Chet Dinnell

Its balustraded walkways, flanked by the cubistic architecture of the '70s, seem to have lost their romantic flavor of yesteryear.

Pond lilies, in delicate hues of blue, yellow, pink and white, still cruise lazily on the Laguna de las Flores --- Lake of the Flowers --- but the sparkling fountains have disappeared. Where to, or exactly when no one knows.

DOME REFLECTED

Yet thousands of yearly visitors, San Diegans and tourists alike, remain enthralled at the early century charm of Balboa Park's Botanical Garden.

The 200-foot rectangular lily ponds still reflect the large American-railroad style dome atop the structure, truncated into the building's facade and forming a pseudo-proscenium arch to welcome visitors.

From within, tall feather palms besiege the redwood-latticed dome, while beneath, in riotous profusion, are nurtured rare and exotic plants from tropical climates around the world.

Constructed as a temporary building for the 1915-16 Panama California Exposition, the "lath house," as it is affectionately known to San Diegans, has seen its fortunes rise and fall through its 56 years of existence.

Balboa Park Supervisor Ernest Chew, and various historians, note that the old building has not always performed the useful function that it does today. It has fallen into periods of disuse and neglect, served as a haven for convalescing sailors, and experienced a middle-age face lifting.

ONCE SWIM POOL

The lily ponds, described by San Diego author Lillian Pray Palmer as "A Cameo in Eden's Garden Set," became a swimming pool for Naval Hospital patients during World War II. Historian Florence Christman notes in her book "The Romance of Balboa Park," that the ponds were used as a swimming pool for San Diego youngsters in the summer of 1945, and 22,686 children swam there that year.

Chew relates that a glass nursery once adjoined the old structure, but deteriorated during the Navy years, and a parking lot now stands where exotic plants once were nurtured under controlled climate conditions.

Following the Navy's postwar departure, the building stood neglected until 1957, when the San Diego City Council appropriated \$63,500 for its renovation.

12 MILES OF LATH

More than 70,000 feet, or 12 miles of redwood lath, was installed in the remodeling, and private nurseries contributed plant exhibits to start the building's new career in the San Diego park system.

In 1964, San Diegan Robert M. Golden contributed \$15,000 for restoration of the 50-year-old balustrades and giant urns adorning approaches to the building.

Today, more than 2,000 variety of plants, usually in bloom, grace the cool, lava-studded interior

of the Botanical Garden. For added beauty, the east end of the huge display contains a bathtub-size, cascading series of ponds. And herein, according to Supervisor Chew, lies a problem.

"It's the hippies," he explained. "So many of them live in the park. We don't know how many of them there are. They live in the park and in the adjoining canyons, and many of them have little children."

CHILDREN BATHED

"They are always bathing their little ones in the ponds."

But Bob Myers, the Botanical Garden superintendent and Chew agreed that this is not the major problem.

"Our number one problem, Myers said, "is shoplifters."

"That's right," Chew added. "Little old ladies. They're our biggest problem."

"They pull plants right out of their containers, roots and all, and put them in their shopping bags. What can we do about it? Nothing, really."

"Who wants to put a little old lady in jail?"

Myers interjected that in at least one case, such a situation resulted in recovery of the kidnapped exotics.

THEFT EXPLAINED

"That's right. I remember that," Chew recalled. "A lady took a plant, and the pot too. When apprehended she offered an interesting explanation."

"She said the plant belonged to her because she paid her taxes."

Such temptations are understandable when one views the rare blend of showmanship and horticulture within the "lath house."

Chew explained that only plants in bloom are displayed here, and when the bloom disappears the plant is taken to the park nurseries until it blooms again, or is planted elsewhere in the park system. The building is primarily an experimental center for plants arriving from far away places.

HALFWAY HOUSE

Here, in a kind of "halfway house," Chew said, plants from such distant places as Mauritius, South Africa and China are nurtured and observed constantly to see if they are capable of adapting to the San Diego climate.

If the plant thrives, it is installed within the park system and a new plant is brought in to take its place.

Chew describes the Botanical Garden as the "most photographed" area in the park, and adds, "We are seldom required to buy plants. Most are contributed by nurseries and private citizens."

"A recent example," he said, "was a retired couple in Del Mar. They gave us more than \$7,000 worth of orchids, which now comprise the nucleus of all of our orchid displays."

Chew went on to say that in the near future the building will display an exhibit primarily for students of horticulture, including "half-hardy" specimens --- plants incapable of surviving cold weather --- and examples of grafting techniques.

But more important a debt of gratitude is owed to that same generation of San Diegans who, in appreciation of Balboa Park's potential as a social and cultural center, almost unanimously refused to let the temporary structure of that time be destroyed.

September 25, 1970, (San Diego) Evening Tribune, C-1, C-3. Casa del Prado Building slowed by weighty decorative facades; old sculpture reproduced in concrete; design reflects Balboa Park's Spanish influence, by Mike Konon (illus.).

The decorative facades being hoisted into place on the Casa del Prado Building in Balboa Park will lead many people to remark that "they just don't build them that way anymore," and contractor S. Falck Nielsen knows way.

Nielsen, head of the 25-year old contracting firm bearing his name, is prime contractor on the \$2.9 million project, rising on the site of the former Food and Beverage Building.

While structural work on the project is 50 percent done, completion is till about a year away, according to Nielsen.

"The ornamentation is slowing us down," Nielsen said. "They say the don't build them that way anymore, and that is why."

As designed by Richard George Wheeler & Associates, AIA, the structure is a mixture of precast concrete elements, load-bearing masonry and poured concrete. The strengthened frame is required to support tons of sculptured elements reproduced in concrete --- faithful to the Spanish Colonial influenced sculpture of the old Food and Beverage Building, built in 1915 and torn down last year to make way for the new structure.

Some of the prestressed concrete elements designed to provide clear spans for social activities in the Casa del Prado are up to 70 feet long, Nielsen said.

Construction on the site started in March.

The ornamental plaster elements were preserved through public donations and a special contract went to L. J. Ninteman Construction Co. for reproduction of the elements in concrete.

The building design is intended to reflect the flavor of the Spanish-influence park buildings while providing facilities for group meetings. Two patios, one completely enclosed and one suitable for open-air meetings are included in the design.

Casa del Prado is only the third postwar structure to be built in the park, joining the Timken Gallery and the west wing of the Fine Arts Gallery as new Balboa Park buildings.

September 27, 1970, San Diego Union, B-1, B-5. Golden days in Golden Hill recalled as changes come, by Peter Brown (illus.).

Ironically, it is the big orange bulldozer (under Sally Ann Forster's tea umbrella tree) that is reviving the park's little history as the neighborhood pioneers come out to watch a \$500,000 federal urban development project change the face of the 60-year old park.

The park is a tiny scrap of land --- 519 eucalyptus trees, the "yongie-bo" monkey tree and 47 palm trees.

October 8, 1970, San Diego Union, D-1:3 and October 21, 1970, D-1:6-8. Balboa Park Committee to present plans for development of Florida Canyon to Park and Recreation Department for submission to City Council.

October 21, 1970, Park and Recreation Board Minutes

USE OF FOR BUILDING --- LOS TOLTECAS DE AZTLAN

Alurista appeared before the Board members regarding use of the Ford Building by a Chicano cultural group known as Los Toltecas de Aztlan. He stated that the group had been granted temporary use of a portion of the facility but due to a confrontation with another group, had been asked to vacate the facility. He mentioned that the City Manager's office was working with Los Toltecas de Aztlan in attempting to find another temporary facility for their use.

Alurista made three requests of the Board on behalf of the cultural group:

1. that a "Centro Cultural de la Raza" be established for use as a Chicano cultural center
2. that Miss Pauline des Granges be dismissed from her official duties as Recreation Director
3. that until the Aerospace Museum makes actual renovations in the Ford Building, the cultural group be allowed to lease that portion known as the rotunda for \$1.00 per year, and upon commencement of renovation by the Museum of the Ford Building, the cultural group be allowed to lease the Electric Building for \$1.00 per year, said building now occupied by the Aerospace Museum.

Chairman Giddings mentioned that although this entire matter was within the jurisdiction of the City Manager, since it involved use of buildings in Balboa Park, perhaps this should be referred to the Balboa Park Committee for evaluation and recommendation back to the Board, with two proposals in mind:

1. the request to occupy the Ford Building until it is renovated at a rental rate of \$1.00 per year
2. upon renovation of the Ford Building, permission to occupy the Electric Building at a rate of \$1.00 per year.

Mr. Graham mentioned that several items of importance should be made known to the City Manager and the Balboa Park Committee prior to proper evaluation of these proposals, such as hours of operation, requirements for square footage, etc. Alurista said this information would be made available to Mr. Graham and the Committee as soon as possible.

Mr. Bowen expressed his cooperation in meeting with the Chicano group and invited them to attend the next Balboa Park Committee meeting, to be held on Monday, November 23, 1970 at 3 p.m. in the Recreation Administration Building in Balboa Park, at which time the group could make their presentation to the Committee.

Upon unanimous consent, the subject of the establishment of a "Centro Cultural de la Raza" in Balboa Park was referred to the Balboa Park Committee for evaluation and recommendation.

November 3, 1970, ELECTION: Historical, cultural, educational and recreational proposal (\$4.0 million); erect a cultural complex in Old Town for showing early modes of western travel.

December 16, 1970, San Diego Union, B-3:7-8. City councilman yesterday certified the result of the November 3 municipal election, leave open the possibility that Proposition D, the museum bond issue may in the future be declared to have passes.

While Proposition D failed to get a two-thirds majority, cases are pending before the Supreme Court of the United States which may resolve that only a simple majority is required to pass bond issues.

On the November 3 ballot was a statement to the effect that under present law, it is now uncertain whether the bond issue must be authorized by a simple majority or by a majority of two-thirds.

In accordance with that statement, the council yesterday resolved to declare the bond issue passed and issue bonds for the project, if the law is resolved so that only a simple majority is required.

If the bond issue is declared to have passed, the city will incur a bonded indebtedness of about \$4 million to construct the transportation museum.

Summary of Events in 1971

(Note: Dates or events are approximate only.)

Centro Cultural de la Raza leased water tank from city
(January 29, 1971)

City Council approved plans for Planetarium and Hall of Science
(February 3, 1971)

Proposition A (Museum Bond Issue) defeated (November 2, 1971)

Casa del Prado dedicated (November 14, 1971)

January 7, 1971, San Diego Union, B-1:5. The San Diego Stadium Authority yesterday approved a proposal to add 6,000 permanent seats to the east end of the stadium and referred the plan to city staff for study.

January 7, 1971, San Diego Union, B-1:6-7. Park Board Backs Chicano Planning; Federation's proposal to use water tank in Balboa Park now up to City Council.

A proposal of the Chicano Federation of San Diego County to transform an unused water storage tank in Balboa Park into a Mexican-American culture center was approved by the city Park and Recreation Board yesterday.

Jessie Ramirez, executive director of the federation, has requested that the city allow his organization to use the tank, which is a large concrete structure with a wood roof, for promoting Chicano art.

Contemplated for the mini-center are various forms of Mexican-American art, including painting, leather work, music, dancing and murals on the walls of the two-story structure.

After voting to "approve the federation's occupancy" of the unused water tank, the park board referred the matter to the City Council for the final decision.

Ramirez also told the Balboa Park Committee of the park board that the federation hopes to eventually build a replica of an Aztec pyramid somewhere in the park.

In other action, the board reviewed plans for a new mall in front of the Old Globe Theater in the park. The proposed mall will involve elimination of several palm trees and shrubs, and installation of concrete walkways around expanded lawn areas.

According to a city spokesman, the trees will be replanted elsewhere in the park. He said the project, which includes special lighting, raised planters and a new irrigating system, would result in increased open area.

Board members next turned to the question of whether Balboa Park Bowl is worth salvaging.

The Bowl, which for years was the site of the Starlight Opera, has fallen into disrepair. The board asked city staff to prepare a report on the cost of bringing the facility up to usable standards.

January 9, 1971, San Diego Union, B-1. San Diego Zoo installing higher fence to prevent new tapir attack.

Higher fencing around the home of the Baird's tapirs at the San Diego Zoo was being installed yesterday to prevent the recurrence of a mishap which hospitalized three persons Wednesday.

A Zoo spokesman said it no longer will be possible for visitors to extend their arms into the enclosure.

This is the mating season for the Zoo's pair of Baird's tapirs, a fact apparently unknown or disregarded by Mrs. Shirley Wilson, 21, of Claremont, who reached over a waist-high fence to pet the male.

The tapir bit down on one of her fingers and when he wouldn't let go keeper Richard Sweeney, 40, leaped into the enclosure to help.

The 500-poung animal, a relative of the horse, turned on Sweeney and inflicted severe wounds on an arm and thigh.

An associate curator of animals, Clyde A. Hill, 35, seeking to rescue Sweeney, suffered deep wounds on both hands. The tops of two fingers on his right hand were severed, but restored through surgery.

All of the victims were reported in satisfactory condition at Mercy Hospital, where each underwent surgery for repair of the bite wounds.

A Zoo spokesman said, although the tapirs had never before bitten anyone, the animals are dangerous during the mating season.

January 10, 1971, San Diego Union, E-1:1-2. Badminton players in Federal Building.

January 15, 1971, San Diego Union, B-3:1. City Council told yesterday plans and specifications for \$3 million planetarium and hall of science are complete and now is the time to sell bonds.

City councilmen yesterday were told that plans and specifications for a \$3 million planetarium and hall of science proposed for Balboa Park are complete and now is the time to sell bonds to fund the project.

According to William Gerhardt, parks and public buildings director, the city's bond counselors have advised that interest rates now are favorable for the project, which has been in the planning stage since 1968.

"This is the time to hit the market. We don't think it will improve," said Gerhardt.

Councilman agreed to place on their January 23 docket a resolution approving the plans and specifications and seeking bids for the construction of the planetarium and adjoining exhibit hall.

Once it is known how much the project will cost bonds will be sold.

"The planetarium will be the first of its kind in the world," councilman were told yesterday.

William D. Bridge, executive director of the San Diego Hall of Science, described the proposed facility.

In addition to a 350-seat "space theater," there will be 8,000 square feet of science exhibit room," said Bridge.

Bridge said a computer operated "star ball" and 70mm projection system will allow a visitor to the planetarium to travel anywhere in the heavens within 9.3 million miles of the sun.

The zoom projection system and the planetarium's tilted dome will give the visitor the effect of being in space, said Bridge.

Bridge told councilman the star ball's 10,000 stars will be supplemented by films which can be superimposed in such a way as to simulate actual landing on the moon and close inspection of the stars and planets.

Bridge's presentation was interrupted by councilman asking how much the planetarium will cost the taxpayers.

"It can be self-supporting," said Gerhardt.

He described how the planetarium is to be funded.

The Planetarium Authority, an independent body set up by the city and county jointly to draft a plan for the project, will sell bonds and build the planetarium.

In order to sell its bonds, the Planetarium Authority enters into an agreement with the city whereby the city promises to lease the planetarium from the authority. The Planetarium Authority will own the building and pay a nominal lease to the city for the ground on which the planetarium is built.

The amount of money the city will agree to pay annually to lease the planetarium depends upon the cost of the bonds, said Gerhardt. The annual lease payment will be equal to the principal and interest on the bonds.

Over a 30-year period, this amount would be between \$200,000 and \$250,000 a year, depending on the rate of interest to be paid.

To get back the cost of leasing the planetarium, the city will enter into an agreement with the Hall of Science. The Hall of Science will operate the planetarium and collect admission, which goes directly to the city to pay the annual lease payment.

January 29, 1971, San Diego Union, B-4. Chicano Cultural Center Plan Okayed.

As a result of City Council action yesterday, a large concrete tax which once held the entire water supply for the 1915 Pan American Exposition [sic] in Balboa Park, will be renovated to accommodate the Chicano Federation, Inc., which plans to paint the interior with murals depicting San Diego's Mexican heritage.

February 3, 1971, San Diego Union, B-1:6-7. City Council approved plans for planetarium and hall of science yesterday; \$3 million project in Balboa Park called "first of its kind."

Plans for a \$3 million planetarium, termed "a first of its kind," were approved by the City Council yesterday, and bids were called for its construction in Balboa Park.

The building, containing 46,805 square feet of floor space will be located across from the Natural History Museum and adjacent to the Plaza de Balboa.

One wing will house a 8,250-square-foot exhibit hall and the other wing will hold a 355-seat planetarium and a 120-seat lecture hall.

The computer-controlled planetarium is capable of projecting more than 10,000 stars, the planets and special effects on the walls of the Space Theater, City Manager Walter Hahn said.

The planetarium equipment, being manufactured by Spitz Laboratories, Inc., represents “a first of its kind” in design, Hahn said. It should be completed by September.

The three-level central section of the building will contain a technical reference library, classrooms, an exhibit hall, shop, administrative offices, and other support facilities.

Financing will be from the sale of revenue bonds to be issued by the San Diego Planetarium Authority after a firm construction cost figure is established by sealed bids but before a construction contract is awarded.

However, the planetarium projector is being financed through a \$35,000 grant from the Fleet Foundation.

City bond counselors approved the project, in planning since 1968, after a favorable turn in the bond market several weeks ago.

February 17, 1971, Park and Recreation Board Minutes.

DIRECTOR'S REPORT

- d. Planetarium - Association to advertise for bids: On February 2, 1971, City Council approved an agreement for the design of San Diego Planetarium and Hall of Science. Plans and specifications have been completed and approved.

February 10, 1971, San Diego Union, B-1. Figures restored --- panel shows triumph over Del Prado No-sayers, by Michael Scott Blair (illus.).

Fifty gallons of bubbling green rubber slopped into a plaster and fiber mold in one of the final stages of a dream in concrete for Balboa Park.

The green rubber slowly set hard to become the pattern from which the ornate decorations are being cast for the new Casa del Prado, which is rapidly doing a Phoenix-like rebirth on the site of the old Food and Beverage Building..

“This is probably the most relaxed meeting we ever had. Now we know that the job of replacing the beautiful moldings of the old building will be finished,” said Mrs. Frank (Bea) Evenson, chairman of the Committee of 100.

The committee members were holding a luncheon in the workshops of the L. J. Ninteman Construction Company, surrounded by dusty benches and a plaster-covered floor.

“Isn’t this just marvelous,” said Mrs. Evenson.

Plaster columns and green rubber cornices; cherubs; bunches of grapes and scroll work littered the workshop. More than 1,800 pieces will ultimately be made from more than 400 different shapes of mold.

The Committee of 100 made it a goal to save the ornamental decorations from the old Food and Beverage Building and make sure that the new building bore the same appearance.

“Officials told us that it just could not be done. The people of San Diego have shown them that it can,” said Mrs. Evenson.

The building is being constructed through a public bond issue and will cost \$3.5 million. In addition, the Committee of 100 has raised special funds for studies of the feasibility or re-molding the decorations and for some of the special work needed in the reconstruction.

This is the biggest reconstruction of such ornate work ever undertaken in the county. A comparable job was done on the Palace of Fine Arts in San Francisco but only 20 percent of their decoration was retained while we will save more than 95 percent here," Mrs. Evenson said.

The Ninteman company was involved in the San Francisco project and Dean N. Ninteman, executive vice president of the company said that this really set the pattern for such restoration work.

He explained to the committee members how the old stonework was removed and a plaster cast was made from it.

Rubber is then poured into the cast, filling every detail of the mold. This is used by the Western State Cast Stone Company of Chula Vista to create the final moldings in rock and concrete.

"Some of them will weight up to eight tons, which raises its own construction problems," said Ninteman.

He explained that usually the building is constructed and the ornate decorations added later. In this case many of the decorations are so large that they are set in place first and the wall poured behind to give a solid bonding between the two.

Ornate work along Zoo drive in Balboa Park is substantially completed and work is about to start on the decorated entrances along Laurel Street, he said.

Under the present schedule it is expected to be finished in October.

"Sometimes we thought we might never see it. But now we know it will be finished," said Mrs. Evenson.

And then they start again.

"We are already looking toward saving the Electric Building (now the Aerospace Museum), the House of Hospitality and the San Diego Art Institute Building, Mrs. Evenson said.

February 18, 1971, San Diego Union, B-1. Quickly corralled; gorilla gambols outside San Diego Zoo pen (illus.).

Vila, 13 years old, ran away from home yesterday.

She didn't get far, but she did cause a few hearts to skip a beat.

Vila is a female lowland gorilla and her home is the San Diego Zoo.

"We're not sure how she did it," said George Gillespie, chief mammal keeper at the Zoo. "But we're sure going to find out and fix it so it can't happen again before we put any gorillas back in that enclosure."

As near as Zoo officials could determine last night, Vila climbed out of the concrete moat surrounding her enclosure by wedging herself up a corner of the moat.

Then she climbed over the top of a nearby enclosure for chimpanzees and down a tree into a wooded, hilly area at the rear of the exhibit that is closed to the public.

She was captured again after about 15 minutes of freedom when Dr. Charles Sedgwick, resident Zoo veterinarian, shot her with a tranquilizer-dart pistol.

"She was scared to death, hanging around right outside the keeper's door into the rear of her enclosure when I got there," Dr. Sedgwick said.

He was called by security officer Louis Franco after a visitor told Franco the gorilla had escaped.

"It was just about closing time (4 p.m.) and there were only about 200 people in the whole Zoo at the time," Franco said. "We did ask a few people to move to another area but there was no real danger."

"Gorillas," the officials agreed, "are very shy animals anyway."

Still, everyone breathed easier when the sleeping Vila, who weighs about 180 pounds, "because she's been on a diet," was safely locked up in her sleeping room.

March 12, 1971, San Diego Union, B-4:4-5. Two city bond issues to finance open space acquisition and to renovate a Balboa Park building for an aerospace museum were considered yesterday for submission to the voters next fall.

April 2, 1971, Christian Science Monitor, Real Estate. San Diego clings to ornate; Casa del Prado duplicates original in minute detail, by P. L. Penney (illus.).

San Diego, Calif. - San Diego likes to bill itself as the "City in Motion," but it's determined not to move so fast that it outruns its Spanish heritage or the past glory of the richly ornamented buildings in the city's Balboa Park.

Some of these buildings are being replaced now, but the baroque architecture is being reproduced in exact detail so that the new structures, more suited to today's needs, will retain the charming adornment that so endeared them to San Diegans and visitors.

The first of these, the old Food and Beverage Building, was razed in 1968 to make room for a new Youth and Cultural Center.

During the demolition, 185 pieces of ornamentation were carefully removed and stored until the day stone casters could begin the task of recreating the rococo plaster pieces in concrete.

The old Food and Beverage Building, a stately example of Spanish Renaissance architecture, was originally built as one of several buildings to house the Panama-California Exposition of 1915-16 celebrating the opening of the Panama Canal.

Most of the buildings were hurriedly constructed and scheduled for demolition with a year or two after the exposition closed.

They were still standing, however, in 1935 when more structures were added and the city hosted the California Pacific International Exposition.

The Spanish colonial theme, emphasized in the first exposition and carried out in modified form in the second, is said to be unequalled in any other group of buildings, including those in Spain.

The Spanish Renaissance architecture reflects the influence of Mexican Indian artisans on the classic Spanish styling.

Since most of the structures were temporary nearly 60 years ago, time has taken its toll and several have been scheduled for replacement.

The Food and Beverage Building, renamed Casa del Prado (House of the City Walk) is scheduled to open in June as part of a redevelopment plan to turn the Prado area of Balboa Park into a complex of museums.

Restoration of the rococo ornamentation is under the direction of Ninteman Construction Company and has posed some problems in recreating the artistry of 1915. But today's artisans find particular satisfaction in the work.

John Clark, Jr., foreman of the project and a second-generation stone carver, pointed out that stone carving, especially this job of recreating pieces, is one of the last jobs in construction where a man can still use his creativity.

W. Earl Hayden of the city's special projects department, who is working closely with Mr. Ninteman, said:

"Even with all of the research that Ninteman and the city put into the restoration there were many unknowns because it is such an unusual type of construction.

"The original drawings are still extant, but we were forced to use old photographs because there were so many changes made 'on the bench' as the work progressed that were never incorporated into the original designs.

"The pieces that were saved from the original building were completely restored, patched where time had deteriorated them, and even the artists' original tool marks were retained when possible.

"Layers and layers of paint, which probably held the building together, had to be removed."

In order to duplicate the original in minute detail, the piece is first covered with a half-inch layer of modeling clay.

A plaster mold is then poured over this; and when the clay is removed there is a space between the mold and the original. This space is filled with a rubber compound. The rubber reproduces the original in exact detail --- even to the artist's tool marks. The plaster mold liner, reinforced with hemp, forms a rigid backing for the rubber mold which is filled with a concrete aggregate in the final step.

The concrete can be colored, reinforced, and attachments can be placed in it for hold the completed ornament to the new building.

About half of the ornamental work recurs again and again on the building's facade so that the rubber molds can be reused. There are numerous cherubs, bishop's heads, and elaborate scrollwork.

Most of the figures were never keyed and apparently have no significance other than decoration. One figure, however, does represent religion. There is a bas-relief of a woman with two children --- one Anglo and one Indian --- the personified California.

Flanking these are two queen-like figures with scepters that are said to depict the Anglo and Spanish heritage of the state.

The old Food and Beverage Building, relic of a bygone era, has disappeared from the scene, but San Diego has cast in stone the plastered remnants of ornamentation that made it so dear to the hearts of her citizens. Thus, the "City in Motion" has made sure that the glory that was yesterday will live through all tomorrows.

April 9, 1971, (San Diego) Evening Tribune, C-1. Space theater set to take off, by G. L. Schultz (photo of architect's model of the San Diego Hall of Science and Reuben H. Fleet Planetarium and Space Theater).

The San Diego Hall of Science and Reuben H. Fleet Planetarium and Space Theater, will have something old and something new when it becomes part of the Balboa Park scene next year.

In addition, it probably will be the pattern for planetariums of the future.

Its design already has been adopted for construction of the McGraw-Hill planetarium in New York.

That's fast acceptance for a design concept which is still approximately 18 months away from becoming a reality in the city where it was formulated.

A sloping floor which provides mono-directional seating (allowing everybody in the space theater to look in the same direction at the same time) is behind it all.

"This is the prototype for this kind of planetarium construction," said architect George C. Hatch of Hatch, Heimerdinger & Associates. That firm and H. Louis Bodmer, AIA, collaborated on the design of the unique project. Bodmer is a long-time member of the board of directors of the San Diego Hall of Science.

"The sloping floor will allow simulation of space travel and this should be one of the outstanding features of the planetarium," Hatch said. "The sloping floor construction is being called the San Diego plan for planetarium construction across the country."

Dr. Edward Creutz, who has been active in getting support for the construction project, came up with the concept.

The project is to be financed through \$3 million worth of bonds issued by the Planetarium Authority, a body formed through a joint powers agreement between the city and the county. The arrangement is similar to the one through which San Diego Stadium was financed, Hatch said.

Bids on the bonds are to be opened Tuesday during a joint meeting of the authority and City Council. The bonds will be awarded about two weeks later along with the construction contract, according to William Gerhardt, city director of parks and public buildings.

"It should take about two weeks to get the bonds and construction contract out if everything goes smoothly," Gerhardt said.

"Then the contractor will have 18 months to complete the project."

The bond package includes funds to cover the costs of furnishings, financing charges and other contingencies. The estimated construction cost is \$1.6 million.

The Reuben H. Fleet Foundation will give the planetarium equipment valued at \$350,000. The "star ball" (space transit simulator) will be purchased with these funds.

While the planetarium features inside the building will be new, the building's exterior will feature some old touches of Balboa Park history.

The building is to be constructed on the south side of Laurel Street, directly across from the Natural History Museum.

"The dome centers on the front door of the museum and the rest of the building will be to the east, toward Park Boulevard," Hatch said.

“We’ve designed the entrance to relate to the Plaza de Balboa and the building is designed to fit the Spanish-colonial theme in the park. We’ve used arches and elaborate cresting around the entrance to get this effect.”

Hatch has personally reproduced several pieces of exterior ornaments from the old Food and Beverage Building for use on the planetarium building. In addition, some of the actual ornamentation from the old building will be used in the new project.

“These ornaments aren’t y style, really, but it’s fund making these elaborate pieces,” Hatch said.

“The building will be constructed in two basic sections. One will house the planetarium and space theater and the other will house the exhibit area.”

A lobby will separate the exhibit hall and theater. A lecture hall, with accommodations for 120 persons, also will be off the lobby. There will be office space and a shop area for preparation of exhibits.

The building will have a total of 46,605 square feet, with the exhibit hall utilizing one third of the area, the theater one third, and the space for offices, lecture hall, lobby and shop taking up the balance, Hatch said.

The designers have left an open space area under the floor of the exhibit hall so service lines for gas, compressed air and water can be easily moved to accommodate different kinds of displays.

The planetarium will have seating for 360 persons. The mono-directional seating and use of films to illustrate space phenomena, such as comets, sun spots or an eclipse, will put the planetarium observers where the action is --- in space.

“This will be especially true in simulating space flight,” Hatch said. “Be being able to create an Earth horizon, viewers will get a natural look at what the phenomena look like in space.”

About 11 percent of the planetarium dome will be made up of tiny holes, though the use of perforated aluminum.

“This will enable objects behind the dome to be strongly lighted and viewed from inside the dome,” Hatch said.

While some space phenomena will be projected through the standard star ball, a number will be projected from light reflected off thousands of small ball bearings by making optical adjustments to the dome.

The planetarium has been a dream of astronomy buffs here for more than nine years, since civic leaders first started looking for ways to get it built.

The awarding of bids this month will bring it a step closer to reality.

Completion will give San Diego a space-age planetarium to display the wonders of the heavens.

April 14, 1971, San Diego Union, C-6:5. Planetarium authority yesterday sold \$3 million in bonds.

April 29, 1971, San Diego Union. Use of Casa del Prado Takes Controversial Turn; meeting held at City Hall, April 28, 1971.

Mayor Curran said he regarded the proposed use of the building by a number of youth-oriented activities on a reservation basis to be “in effect, an exclusive use of the building.”

It was designed to accommodate no one group, but rather to serve as many uses as possible according to William Gerhardt, Park and Public Building director.

Curran is advocating that 4,100 square feet of floor space be given to the Botanical Foundation for their exclusive use for a library and office to house *The California Garden* magazine.

According to Gerhardt, Casa del Prado cost approximately \$50 a square foot to construct, which he acknowledged was "very expensive" construction.

The 4,100 square feet Curran proposes for exclusive use of the Botanical Foundation bears a price tag of about \$200,000.

At one point in yesterday's meeting, Larry L. Sisk, vice president of the Botanical Foundation, asked for exclusive use of three rooms, totaling 4,866 square feet and a first priority on the use of a fourth for fifty-nine meetings a month.

He said there were 37 separate botanical groups, comprising 3,000 members, using the one assembly room for their meetings.

"The room would not then be available to the public," noted Pauline des Granges, director of the Department of Recreation.

May 3, 1971, San Diego Union. "Many seek space in Casa del Prado," by Larry Thomas.

May 4, 1971, San Diego Union, B-1:5-7. Mayor Curran has asked youth cultural groups who were shut out of a meeting last week on use of Casa del Prado to attend another conference.

May 8, 1971, San Diego Union, B-10:4. City Council voted yesterday to award contract for construction of Hall of Science to the Nielson Construction Company.

Summer, 1971. Committee of 100: Objectives and Accomplishments to Date

Dedicated to the Preservation of Spanish-Colonial Architecture in Balboa Park

These buildings are the only Spanish-Colonial complex in the Western Hemisphere. They are relics of the greatest civic effort of San Diego (a town of 35,000 people at that time) for its 1915 Exposition.

Because of lack of funds, only one building, the California Building, was built to be permanent. Six different times efforts have been made to save the four temporary buildings.

The Committee of 100 has been the only group which has succeeded in rebuilding a duplicate of an original, the old Food and Beverage Building, now the Casa del Prado.

The Committee of 100 was organized in 1967 when there was talk of replacing the Food and Beverage Building with a modern structure. The Committee went before the City Council to protest.

During the first Civic Luncheon in June 1967 petitions were circulated for signatures to support the preservation of this unique piece of architecture. Support of clubs, organizations and historical groups was solicited.

Members of the City Council were approached and made aware of the people's desire to preserve the Prado as a complex of Spanish Colonial architecture.

The San Diego City Council adopted the Architectural Policy:

NO BUILDINGS WOULD BE BUILT ALONG EL PRADO WHICH DID NOT INCORPORATE 1915 DECORATIONS AND DESIGN OF THE EXISTING SPANISH COLONIAL BUILDINGS.

The Committee of 100 asked the City to renovate the Food and Beverage Building, as neglect was causing it to fall into disrepair. The Building was very unsightly for San Diego's 100th Celebration. City Recreation groups were occupying the building.

The City Manager appointed a Task Force to inspect the Food and Beverage Building. They declared the building unsafe and promptly condemned it and moved all the Park and Recreation groups to the Balboa Park Club.

The Committee of 100 decided to raise funds for a new building.

The Fiesta 1915 (nostalgic of the 1915 Exposition days) helped focus public attention on the plight of the condemned building.

The Committee of 100 appeared:

Before the Park and Recreation Board for their recommendation that a new building should go up on the Food and Beverage Building site.

Also, before the City Council to ask for permission to remove 200 specimens of sculpture from the building.

Permission was granted and the City voted to spend \$5,000 for photographing and numbering the specimens which it offered to store in the old tank in the park.

The Committee of 100 contracted with and paid Ninteman Construction Co. \$10,000 to remove specimens. Another \$2,500 was paid by the Committee for research as to the best means of restoration of the pieces of sculpture.

The Building was sold for \$25.00, as it was cheaper for the City to sell it than bulldoze it down. Mexican sub-contractors took the Building apart, and the redwood and other materials were trucked down to Tijuana to build houses for the poor.

The City Council and Mayor Curran decided to put a bond issue for replacement of the Food and Beverage Building on the November ballot in 1968.

The Committee for Proposition M was endorsed and supported by Committee of 100 members.

This Committee raised more than \$14,000 to help pass the bond issue.
Specimens from the destroyed building were auctioned at Charley Brown's Windjammer (this restaurant and food were donated for the affair).
Mailers explaining the Proposition were sent to each registered voter.
The newspapers in the city gave tremendous support.
All the Youth and Dancing groups, the Botanical Foundation and Garden Clubs, Senior Citizens and P. T. A. gave extra-special help.
The Bond passed by 72 percent.

Richard J. Wheeler was selected by the City as the architect for the new building.

In June 1969 twenty citizens went before the Council asking that the Food and Beverage Building not be replaced on the same site.

A concerned city and the Committee of 100 sent many letters and cards to the Council.

Mayor Curran and Council decided that it would be replaced on the same site or the voters would be betrayed.

The groundbreaking ceremony was held November 9, 1969.

Nielsen and Co. were awarded the contract in March 1970.

Ninteman Construction Co. was given the ornamentation.

When Section "A," a big statuary facade on Zoo Drive, a large area of ornament with statuary, was about to be deleted for economy, representatives of the Committee of 100 met with the City Manager, who agreed to replace it.

The Committee raised \$75,000 in the summer of 1970 for the replacement of the ornate loggia on El Prado, which had been eliminated from plans without the Committee's knowledge.

In this building, some 90 percent of the original Spanish Colonial ornamentation is restored.

The new Casa del Prado is now in solid concrete and quite permanent.

The ephemeral building of the 1915 Fair, which captured the love and admiration of generations of San Diegans, is now a permanent asset and a daily reminder of our rich heritage.

THREE TEMPORARY BUILDINGS NEW REMAIN ON EL PRADO:

The ELECTRIC BUILDING which will become an orphan the minute the Aerospace Museum moves to the Ford Building. The Electric Building is in just about the same condition as the Food and Beverage Building was.

The HOUSE OF CHARM which is across the street from the Fine Arts Gallery.

The HOUSE OF HOSPITALITY which was given a temporary new lift when the Junior League restored and painted it.

The Committee of 100 will probably play a great part in the future of these buildings.

June 4, 1971, San Diego Union, B-7:3. The City Council has authorized a land use study of Florida Canyon in Balboa Park.

June 5, 1971, San Diego Union, B-7:1-2. The vision for El Centro Cultural de la Raza is a community of a dozen workshops where graphic artists, ceramists, sculptors, painters, actors, dancers, film makers, musicians, and folk dancers will expound their Mexican-American heritage; at present about all there is to enhance that vision is a large, green concrete tank in Balboa Park's Pepper Grove; the Chicano Federation leased the structure from the city about 2 months ago.

June 9, 1971, Letter, Dale A. Pursel, Vice Pres., Estimating, Nielsen Construction Company, to City of San Diego, Park & Public Fac. Dept., Community Concourse, San Diego, Calif.

Attention: Project Engineer, Re: Job #785, Casa del Prado, C & CL #53.

Gentlemen:

Please be advised that providing the Father Serra Memorial Fountain in accordance with C & CL #53, and related drawings, will result in a net increase to our contract of \$31,288.00, and an extension of time of performance of sixty (60) calendar days. Following is a breakdown for your information:

Labor	\$1,928.00

Fringes, Ins., Txs.	744.00
Equipment	239.00
Material	485.00
Rebar, Brawley	187.00
Cast stone, Ninteman	17,422.00 (including art and design work)
Waterproofing, Brown	190.00
Sheet Mtl., Secor-Steele	47.00
Ceramic Tile, Capri	2,200.00
Mech., A O Reed	724.00
Financing	<u>2,751.00</u>
	26,917.00
Contr's fee	<u>4,041.00</u>
	30,978.00
Bond	<u>310.00</u>
	\$31,288.00

Enclosed is a copy of breakdown where applicable, for your information. Above price is based on City's approval of the design and art work, as prepared by Ninteman, and approval and authorization to proceed by June 22.

Very truly yours,

NIELSEN CONSTRUCTION COMPANY

June 22, 1971, San Diego Union, B-1:1-2. Work underway for \$4.5 million hall of science and planetarium.

June 26, 1971, San Diego Union, B-1, 2-5, B-2:5. Park "trip" described; Countdown goes smoothly for Space Theater here, by Cliff Smith.

The closest thing to a space trip most people now living will ever take is coming soon.

Countdown for the first liftoff is minus 553 days and counting. Barring delays the initial launch will be on Christmas 1972 from the Reuben H. Fleet Space Theater in Balboa Park.

Reservations for 360 seats are not taken but additional flights are scheduled almost daily. Itineraries also are open but a typical flight will go something like this:

Excursionists will pay a fare of about \$1.25. It will be a smog-free night as they come aboard.

Everyone will have a panoramic, three-dimensional view of the sky extending to the limit of their peripheral vision.

Ignition is followed by the dampened rumble from rocket engines below. The seats shake and an orange glow temporarily lights the near sky. The San Diego skyline disappears.

As the ship turns into earth orbit, passengers will get their first view of the home planet. Coasting around earth, passengers make a passing inspection of an orbiting laboratory.

Rockets are re-ignited and the burn puts the ship into trans-Mars injection. As the firmament rotates a meteor shower occurs.

A midcourse correction takes the ship safely through the asteroid belt. Passengers get a look at a planetoid 50 miles away.

The Mars orbit insertion burn is initiated. The ship is programmed for the slingshot technique. It circles Mars and is whipped with a gravity assist from the red planet onto a course for Mercury.

An evasive maneuver enables us to avoid an approaching comet. The comet's luminous tail seems infinite. A telescope aboard zeros in on the murky atmosphere of Venus.

Atmosphere-free Mercury is better seen. We pass within 600 miles of the innermost planet and are able to see the 45 percent lighted by the sun.

On the way home there is a different, ever-changing view of the stars. Powered descent initiation brings another rumble and seat-shaking episode.

The touchdown is soft. The Grand Tour is completed. The two-month's trip has required less than an hour in the Space Theater. The experience has seemed incredibly realistic.

The theater will be part of the San Diego Hall of Science. Construction of the complex is underway now south across El Prado from the Natural History Museum.

Completion of the \$4.5 million facility has been assured by a \$350,000 gift from the Fleet Foundation and by the sale of \$3 million in bonds to be repaid by theater admissions.

Has this removed the need for raising of funds for the project.

"No," replied William D. Bridge, executive director of the Hall of Science organization. "We are facing many large expenditures between now and the time the new facility starts earning money.

"Extra staff will have to be employed to provide a computer program for the space theater and exhibits for the Hall of Science.

"This is to be done through a membership appeal made to the citizens of the community to participate in a community project of startling originality and interest.

"Directors of the hall believe it will rank among other planetariums as the San Diego Zoo ranks among other zoos of the world."

The Hall of Science organization is a nonprofit corporation composed of leaders in education, science, religion, industry, business and government of the San Diego area.

Bridge said the hall is dedicated "to the enjoyment of learning and the development of scientific knowledge."

July, 1971, Concrete Products, 30 (incomplete) Western States Cast Stone Co. recreates structural landmark; firm pre-casts nearly 2,000 pieces of ornate sculpture work for Casa del Prado in San Diego, Balboa Park (illus.).

A Chula Vista, Calif., precast concrete company is making a major contribution toward rebuilding one of San Diego's monuments to a colorful past.

The work being done by Western States Cast Stone Co. might be called "instant sculpture." However, that is not quite accurate because of the long hours and effort required for the unique project centered at beautiful Balboa Park in the heart of San Diego.

Western States, working with L. J. Ninteman Construction Co. of San Diego, has been recreating in concrete the ornate beauty and elaborate trim and sculpture of the park's old Food and Beverage Building. The new structure named Casa del Prado, intended for use as a cultural activities center, will be almost a duplicate of the exterior of one of the structures built in 1915 for the city's world's fair.

None of the buildings were designed to stand more than the few months during the run of the exposition. However, because the structures --- constructed mainly of wood and plaster using Spanish mission style architecture --- were designed so beautifully by Italian architects and sculptors, the people of San Diego would not allow them to be torn down.

The original fair buildings were put to a variety of uses from museums to entertainment centers as patch after patch and coat after coat of paint were applied to keep the decorations from crumbling. Finally, in the mid-sixties the Food and Beverage Building was in such sad condition that it had to be condemned and was ordered demolished.

At this point, several concerned San Diego residents moved in to save the past from being replaced by modern glass boxes.

In 1968 the citizens formed a Committee of 100 to study the feasibility and costs of recreating the building, complete with 95 percent of its ornaments including statues, sunbursts, vine-covered columns and other trim work.

Working together, Western States and Ninteman devised a method of making molds of the ornamental work

August 20, 1971, San Diego Union, B-5:3. Samuel W. Hamill elected president of Botanical Unit.

August 20, 1971, San Diego Union, B-3:8. A \$7.3 million bond issue has been proposed for the November ballot funding construction of a western museum in Old Town and remodeling and refurbishment of selected buildings in Balboa Park.

August 25, 1971, San Diego Union, B-2:6. Councilmen will decide tomorrow whether to place a \$6.2 million bond issue on the November 2 municipal election ballot to fund construction and rehabilitation of various cultural complexes.

August 27, 1971, San Diego Union, B-3:8. A \$2.8 million bond issue for rehabilitation of the Ford Building and construction of an east wing to the Fine Arts Gallery in Balboa Park will go to a vote of the people November 2.

September 1, 1971, San Diego Union, B-1:5. Park buildings bond issue due on ballot November 2.

September 5, 1971, San Diego Union, B-1:5. On November 2, when voters decide the fate of the \$2.8 million bond issue to refurbish the Ford Building and construct an east wing on the Fine Arts Gallery, they will be deciding the future of two outstanding collections.

September 15, 1971, San Diego Union, B-3:5. San Diegans this November 2 will have an opportunity to transform a "white elephant" into a multi-million dollar asset at no additional cost to the taxpayer, according to proponents of Ford Building rehabilitation bond issue.

September 23, 1971, San Diego Union, B-2:1-2. Movie of earth orbit by Apollo crew gift to Reuben H. Fleet Space Theater, by Frank Rhoades.

September 28, 1971, San Diego Union, B-1:6-7. The council announced yesterday that Dr. Malcolm A. Love will head the newly-formed Aerospace and Arts Council in support of a \$2.8 million bond issue to fund Balboa Park museum improvements.

October 1, 1971, San Diego Union, B-1:3-4. City may obtain two top collections; Toulouse Lautrec, vintage plane acquisitions hinge on Proposition A approval.

October 12, 1971, Letter, Chris Mueller, Architectural Modeler and Sculptor, TRAVART, Artistry in Concrete, to Mrs. Frank Evenson, Chairman Committee of 100, San Diego, Calif.

SUBJECT: Deterioration of the staff architectural decorations removed as specimens from the 1915 World's Fair building known as the Food and Beverage Building. Staff on existing 1915 buildings in Balboa Park, San Diego.

Dear Mrs. Evenson:

In response to your request, I present the following:

The most vivid visual record of the staff specimens condition can be seen in the recorded catalog that the L. J. Ninteman Construction Company, Inc. of San Diego made at the time of their removal from the building in August 1968. Mr. and Mrs. Frank Evenson also made a film of the staff specimens removal at this time.

I will partially describe my apprehension and the danger in removing this neglected deteriorated staff.

Staff is a building material made of a composition of casting plaster and hemp fiber, cast in molds and wired or nailed in place. It never was nor will it ever be a permanent exterior building material.

The Food and Beverage Building's ornamentation was made of staff, made to last one year in 1915. In August 1968, fifty-three years later, this staff was in an extreme state of decomposing. The City of San Diego had condemned the structure as unsafe, guard rails were placed to keep the public away from the danger and hazards of falling staff. There was visual evidence that more pieces of staff were loose and could fall at any unpredicted moment.

While supervising the removal, I noted that the hemp fiber ties were rotten and had no holding strength, the wires and nails were badly rusted, the wood backing in most cases was so badly eaten by termites that I could crush it with one hand. There were some protected areas where the staff wood and nails were in surprisingly good condition although this percentage was very small. The redwood removed from the structure was in good condition --- redwood resists rod and termites. However, redwood was not used behind the staff to support it.

The surface of the plaster was badly pitted with various sizes of holes through it with whole sections gone. This was caused by rain, weather in general, and neglect in maintenance. There was a type of casein paint used at some undetermined time. This was very scaly, powderlike and peeling, adding little to surface preservation or as a water repellent to the staff..

In removing the specimens, many crumbled to bits. The largest finial that was rigged ready to remove, fell apart when the crane made its first gentle attempt to lift it. It disintegrated practically into dust and cascaded like a waterfall over the surrounding braces. This bring out the fact that staff of that age, regardless of its appearance, cannot be considered safe. The specimen removal is a hazardous undertaking. Many tries to obtain a specimen had to be made from the three facades to make an assembly that could be restored.

The towers of the church were so dangerous and costly to remove, most specimens were left in place and the decision was it was far safer and less costly to make then new from the original plans. *The San Diego Magazine*, November 1967, pages 55 and 55, plainly shows this.

The statue "Religion," the arms and face had fallen away, the balance of the head collapsed and fell down through her neck with the first gentle left of the crane.

The Palace of Fine Arts in San Francisco was a staff and wood structure erected in 1915. It was condemned also and closed off from the public for at least fifteen years before the Food and Beverage Building was condemned. A difference of climate and salt air brought this on more rapidly. Staff is not an exterior building material.

Now, fifty-six years later, the Electric Building, House of Hospitality and other 1915 structures in Balboa Park have been painted and have had some rehabilitation; basically they are of the same construction --- chicken wire, nails, baling wire, hemp fiber, casting plaster, wood and paint. Paint gives the staff the appearance of being sound and safe but paint has no structural value. It preserved the surface of the staff ornamentation to some extent. Paint sealed the surface; however, moisture going in through the numerous cracks is also sealed in between the exterior and interior walls which rusts the nails and wire, rots the hemp fiber more quickly and it also softens the plaster.

The sagging and misalignment of these buildings clearly show the various stresses that are at work slowly but surely bringing them down. I know they are all substandard structures and that the present building codes would not allow this type of construction for public use today.

I do not have the original 1915 cost of these buildings but the point here is that if over a period of fifty-six years, this cost was pro-rated, how cheap for a year's service would it be? To expect more low-cost service from these tired, overworked temporary structures is putting an undue strain upon them while exposing the public to many hazards, including fire.

Flying termites enter the buildings through cracks and attack the wooden roof beams. I have evidence of a huge sound stage roof collapsing in the motion picture industry. The entire roof fell without warning.

"Shoring up" only loosens the staff more causing more cracks and a shifting of stress and strain elsewhere. It is impossible to make a determination of the safe condition of these buildings without making a study of each square foot of the entire building. It is impossible to get behind the staff and study each plaster tie, nail and wire that attaches it to the wooden frame work. You cannot get between the staff and the inner supports.

My final opinion from experience is that these buildings have outlasted their safety for public use and should be replaced the same as the Food and Beverage Building was replaced with concrete and steel. Much was learned by everyone from the Casa del Prado. This combined experience can reduce cost and misunderstandings in future reconstruction replacements in Balboa Park.

Respectfully yours,

(Signed) Chris Mueller
Architectural Modeler and Sculptor.

October 12, 1971, San Diego Union, A-3. Renaissance of Ford Building sought.

October 12, 1971, San Diego Union, B-1, B-3. Proposition A: Building's fate rests with vote, by David Brownell.

Squatting on a palisade at the outskirts of Balboa Park overlooking San Diego's downtown business district, the one "modern" Ford Building has become the city's white elephant.

Occupying a land area the equivalent of a downtown square block, including the four peripheral streets, the building in recent years has been used for little more than storage and a working area for theatrical set designers and artists.

As the few persons who have had occasion to go inside have found, time has not been kind to the building's interior. The relatively clean exterior of the buff-colored edifice gives little clue to the shabbiness within.

But then, the building was not constructed to stand forever as a monument to the Ford Company.

The city for awhile considered demolishing the building but the San Diego Aerospace Museum showed continued interest in utilizing the facility.

Currently located in the Electric Building, another temporary structure that predates the Ford Building by 20 years, the museum will move if the voters pass Proposition A on the November 2 Municipal ballot. Proposition A would rehabilitate the building.

According to City Manager Walter Hahn, the Ford Building, now essentially useless, would be worth more than \$4 million if restored. The cost of refurbishing the structure is \$2.1 million.

When Cris Larsen built the doughnut-shaped Ford Building, it was to have been a temporary exhibit-hall for the Ford Motor Company's display at the 1935 California Pacific International Exposition.

Ford vacated the building in December of 1935 and the structure reverted to the city.

In 1936 the building was redecorated and on the interior wall was painted "The March of Transportation" mural which survives today, albeit in disrepair.

The Ford Building was renamed the Palace of Transportation and the mural depicted the development of transportation from the caveman to the 1936 artist's conception of future rocket travel.

During a brief tour of the building yesterday, a reporter discussed the mural with a scenic artist who is work on sets for the San Diego Opera Company.

"You can tell a theater man painted it," said the artist Dave West, motioning to a section of the 20-foot high and 450-foot long mural.

"In its day it was great. Not too many went beyond that in that day," he said.

West raised a question as to the ease with which the original can be saved.

"It was done with dry pigment and animal glue," said West. "You could remove it with a mop.

"See that horse's hoof, how white it is. That's where I tested it with a wet sponge."

West said the materials used in the mural were extremely short-lived.

"They must have had a crew continually mixing colors.

"One thing is for sure," said West, looking up at the 35-year mural, "they damn sure knew how to work together."

Used variously to house war materials and as a school for training defense plant workers, the Ford Building came out of the war years suited for little else than storage.

In the last decade, the mammoth structure has been used for designing, constructing and storing sets for various theatrical productions.

While the building, with its generous skylight, is ideally suited for its most recent use, city officials are quick to admit that the potential of the massive structure is not being realized.

Structurally sound, the giant was built of steel. It is the wood roof and ceiling that need to be rebuilt. Interior walls, which in some places have holes large enough for a man to step through, must be patched. A new floor is needed.

To convert the building for public use again, plumbing must be installed and exits excavated from the central courtyard to the building's exterior.

In the architect's preliminary report on rehabilitation of the Ford Building, it was noted that "the most interesting feature will be the restored mural on the inner wall of the main exhibit area."

October 12, 1971, San Diego Union, B-1:7. If voters pass Proposition A and the \$2.1 million rehabilitation of the Ford Building goes forward, the people will be saving a treasure few San Diegans have seen and not many know.

October 16, 1971, San Diego Union, B-10:1-2. EDITORIAL: Proposition A Can Halt Trend: Balboa Park is Getting Seedy, supporting Proposition A.

As San Diegans consider the future of their city they must think about safety, convenience, utility, beauty, and culture.

Proposition A on the November 2 general election ballot addresses itself to the latter. The proposition seeks authorization for a \$2.85 million bond issue. Of the total, \$2.1 million would be used to reconstruct the Ford Building to house the aerospace museum. The remainder would construct an east wing on the Fine Arts Gallery.

In community discussion of the proposition, nobody has said that the better aerospace museum and the new fine arts gallery would not add substantially to the quality of life in San Diego.

The present aerospace museum is a fine embryonic institution, but it has not begun to scratch its potential. It is severely limited by the confines of the shabby 57-year old "temporary" Electric Building, a structure that has been condemned for use. By moving into the Ford Building, the museum could enlarge its association with the Smithsonian Institution and eventually become the outstanding credit to San Diego that it deserves to be.

As exciting is the prospect of another wing to the growing Fine Arts Gallery, an outstanding cultural institution in the Southwest. The \$750,000 that Proposition A allocates for the wing would be more than matched by private funds. Together the money would provide a museum that could obtain for San Diego a home for the permanent display of art collections valued in the millions.

Both of the museums envisioned in Proposition A would add immeasurably to the inspiration, tranquillity, beauty and sense of well-being among San Diegans of all ages and in all walks of life. Neither museum charges admission; both are easily accessible to all citizens.

However, more than the addition of new cultural dimensions is involved in Proposition A. Whether we like to admit it or not, it is a fact that despite the best efforts of the city Balboa Park is getting seedy.

There is no mystery why. It takes more than the best of intentions on the part of everybody to build and maintain a park of this dimension, which is unique in the world. Balboa Park, like safety,

convenience, utility and other city functions, deserves a high place in the priorities of civic resources. It has not been such a place in recent years.

Proposition A would be but a small step to redress the balance. We strongly urge its approval on November 2.

October 17, 1971, San Diego Union, B-10:1. Art, music contest to aid Proposition A.

October 17, 1971, San Diego Union, F-1, F-6, F-13. Casa del Prado --- Fabric of a Dream, by Marie Stanton (illus.).

“The fabric of a dream.”

That was how architect Bertram Grosvenor Goodhue described San Diego’s exposition architecture back in 1915 when he designed the Balboa Park buildings of the Panama-California Exposition.

But although Goodhue had in mind that the dream would last only two years and then the buildings would be taken down, his dream caught the imagination of San Diegans and visitors to the exposition as well as those of succeeding generations who though the years have visited the 1,400-acre [sic] Balboa Park and have come to regard the buildings as a symbol of the city and a precious heritage.

One month from today, the citizens of San Diego will dedicate a building which grew out of that fabric of a dream and into reality. The building is called the Casa del Prado, the house of the great avenue, and it stands at the northeast corner of El Prado and Village Place on the site of the former Food and Beverage Building.

On Sunday, November 14, at 12:30 p.m. the massive oak doors of Casa del Prado will open to the public, a public which voted overwhelmingly in a 1968 bond issue election to replace the then 53-year old crumbling Food and Beverage Building, conceived as only a temporary structure.

The new structure, Casa del Prado, built of concrete at a cost of \$3.5 million, was designed to look as similar as possible to the former building on the exterior and from El Prado it is a near-reproduction. From Village Place the building looks somewhat different, revealing a 110 by 128-foot courtyard surrounded by arched walkways, which the original did not have. The earlier L-shaped building was completely enclosed. What does give the building its similar character is the elaborate Churrigueresque ornamentation that characterizes much of Balboa Park’s architecture. This unique reproduction of ornamentation is but a part, but perhaps one of the most significant parts, of how the building came to be in its new form.

The building, basically a mixture of pre-cast concrete elements, load bearing masonry and poured concrete, was designed into sections connected by arcades and the large courtyard. The northern section of the building fronting on Village Place contains a 9,600-square foot, 1,500-seat auditorium, including a 80 by 35 foot stage, a 10 by 40-foot orchestra pit, a foyer with ticket booths, rest rooms, men’s and women’s dressing rooms, five practice rooms and two storage rooms. The auditorium with a flat hardwood floor is 80 by 80 feet and was designed as a multi-purpose facility for youth and adult cultural and theatrical activities. Spanish wainscoting on walls is topped by white acoustical material in the auditorium’s interior. Stage lighting may be operated from a rear sound and projection room or from the stage.

The auditorium will become the permanent home of four San Diego City sponsored youth cultural organizations, the San Diego Civic Youth Ballet, the San Diego Youth Symphony, the San Diego Youth Chorale and the San Diego Junior Theater, as well as adult folk dancing groups.

Adjoining the auditorium is an arcade opening into the north courtyard which connects the auditorium with the southern section of the building fronting on El Prado.

The two-story south buildings is designed as a hollow rectangle and features a 136 by 84-foot landscaped open courtyard with first floor rooms opening out onto it and second-story rooms opening onto wrought-iron decorated balconies surrounding the upper story and giving monumental scale to the interior of the building.

The eastern leg of this building is a 4,432-square foot meeting room with kitchen designed for catered meals and extensive storage. The primary users of this room will be representatives of 37 horticultural groups, which comprise the San Diego Botanical Garden Foundation.

Special storage facilities will be allotted to the floral groups for their use by the foundation. The room contains certain facilities specially designed for horticultural enthusiasts, including special flower arranging and displaying counters of plastic laminate with work space, sinks and water in wall cupboards which can be closed off when not in use. In addition, special incandescent lights are being installed to simulate daylight for flower shows and displays. Fluorescent lamps also have been installed throughout the building as has air conditioning. This new room is twice the size of the San Diego Floral Association building (located just southwest of the Organ Pavilion) which has been home to the botanical groups since 1916, excepting intermittent periods.

The Botanical Foundation plans that member groups will hold an open house each weekend throughout the year on various horticultural subjects, with displays and demonstrations by members, according to Larry Sisk, vice president of the Botanical Foundation.

The southern portion of the building is devoted to the two massive entrances leading into Casa del Prado from El Prado as well as an elevator.

The western portion of the building contains a senior citizen lounge for the public with immediate access to El Prado, designed as a rest stop of senior citizens participating in activities in various parts of the park, according to Pauline des Granges, city Recreation director. Adjoining the lounge will be a Botanical Foundation Library and small sales area of articles relating to floral activity, a Park Department administrative office, a Botanical Foundation office, and the offices of the San Diego Floral Association, which publishes the magazine, *California Garden*.

Across the northern wing of the building are two other multi-purpose meeting rooms, one 25 by 44 feet and another 40 by 42 feet.

The upstairs of the building contains seven assembly rooms, ranging in size from 24 by 46 feet to 69 by 76 feet, storage and an 80 by 16 foot loggia which opens out onto El Prado. Four of the second-story assembly rooms include floor to ceiling mirrors and bars for ballet practice and one 64 by 40 foot practice room contains a hardwood floor for the young dancers. Other floors in the south building are concrete covered with neutral shades of asbestos tile. Special removable wood platforms are being designed for three of the rooms where dancers will be practicing, a sore point with youth spokesmen who fought but lost their battle for wood floors for all rooms to be used by the ballet youngsters, according to Mrs. Don DeMarce, president of the San Diego Civic Arts of Youth. Most walls of the building are pale beige plaster with vinyl wainscoting covering the lower portions of the walls in shades of blue, beige and orange.

The multi-purpose rooms are expected to be used extensively by the four youth cultural organizations seeking meeting space, said Miss des Granges. In addition, other types of dance groups, such as the Highland dancers, round and folk dancers will be users, she said. 'These are the cultural and horticultural nucleus of groups already established and ready to move in to make this a lively center. However, there are additional space and hours in the building for other groups, Miss des Granges added.

“We’re extremely pleased with the building and interested in its multi-use capability because of the heavy demand for space created by the many activities in Balboa Park,” said Earl Hayden, project officer for the city Parks and Public Buildings Department. “We expect to have the building open on a seven-day-a-week schedule with full occupancy,” he said.

Casa del Prado, only the third new building to be built in Balboa Park since World War II (others were the Timken Gallery and the Fine Arts Gallery’s west wing) is a part of the Bartholomew Plan adopted by the city in the 1960’s which recommended that the Food and Beverage Building area be devoted to horticultural and botanical interests because of its proximity to the Botanical Gardens and major garden areas.

Casa del Prado was suggested as the name of the new structure by artist-educator George Worthington, a long-time San Diegan and member of the Balboa Park Committee, a citizen’s advisory organization.

For the Sunday dedication, the youth and dance groups and botanical organizations will showcase the building with entertainment and exhibits from 12:30 to 4:30 p.m., with representatives of these groups explaining the facilities to the public.

During the open house continuous entertainment will be presented in the auditorium by the youth ballet, orchestra, chorale and theater, with 20-minute programs planned by each group. In the north courtyard four square dance groups, which will be regular occupants of the building, will be performing in the evening exhibition dancing.

Seventeen floral groups will present a floral show in the large botanical room (Room 101) and Ikebana International will show arrangements and relative artifacts in the Botanical Foundation Library.

At 2 p.m. a special dedication ceremony will be held in the south courtyard co-sponsored by the Committee of 100 and the City of San Diego. A highlight of the half hour ceremony, arranged by Mrs. William Betts, a director of the Botanical Foundation and member of the Committee of 100, will be the unveiling of a bronze plaque to be erected in the northwest corner of the building. The plaque reads, “dedicated to the citizens of San Diego and the Committee of 100 whose vision made this building a reality.” The names of the council members of 1968 and 1971, the city manager and city attorney also appear.

Speakers will include Mrs. Frank Evenson, president of the Committee of 100, and Mayor Frank Curran, who will each release 1,000 balloons, climaxing the dedication ceremony --- 1,000 balloons of blue and gold (the city’s colors) and 1,000 balloons in red, white and blue (colors of the Committee of 100, used at the groundbreaking of the new building on November 9 1969).

For Mrs. Evenson, a petite gray-haired San Diegan, Casa del Prado stands as a civic accomplishment. For it was Mrs. Evenson, hearing that the old Food and Beverage Building was to be torn down, who conceived the idea of a citizen’s committee to help preserve the Spanish Colonial architecture of Balboa Park.

“I saw Sam Hamill (a San Diego architect who has contributed much to the city and park’s architecture) at a meeting and I asked him if he thought it would be possible to preserve this magnificent piece of architecture in the park. He said he thought so and came up with the name “The Committee of 100,” which before its work was completed on Casa del Prado had grown to many times that size and raised over \$113,000 for the project,” Mrs. Evenson related.

In 1967 the committee was incorporated and set to work campaigning for what was the eventual City Council policy that all future buildings on El Prado be similar to 1915 Exposition style and use similar ornamentation.

“At first we thought it would be possible to restore the building but that proved too costly. Finally the Food and Beverage Building, with its falling plaster and leaking roof, was condemned and closed. The committee immediately raised \$10,000 and appealed to the council, receiving permission to remove some 200 ornamental specimens from the condemned building before its demolition began. The committee then went ahead to raise money for research on the restoration of the old crumbling plaster and hemp ornamental specimens to prepare them for re-casting on the new building,” she added.

In 1968, a \$3.5 million dollar bond issue to finance the rebuilding of the Food and Beverage Building was placed on the ballot with the Committee of 100 joining with youth and botanical groups to campaign for passage of the measure. The result: 72 percent voter approval.

Despite opposition by some citizens that the Food and Beverage Building need not be placed on the same site, the council went ahead with construction plans. Richard George Wheeler was selected to reproduce the Casa del Prado, which has been described as one of the largest and most heavily ornamented of the 1915 Exposition buildings. Acting as a consulting architect was Hamill, who is president of the Botanical Foundation and served on numerous committees concerned with park architecture.

Nielsen Construction Co. was awarded a \$2.9 million contract for the construction of the concrete structure and L. J. Ninteman Construction Co. became a subcontractor with a bid of just over \$600,000 for the extensive cast ornamentation of the building (which amounted to approximately 18 percent of the total cost of the building.)

Wheeler, the son of architect William Henry Wheeler, who practiced in San Diego from 1913 to 1950, was familiar with Goodhue’s exposition architecture because, as a young architectural student in the 1930’s, he had copied sketches of the buildings under his father’s tutelage.

“I have always thought that these buildings were charming and that it was charm that had made them so long lasting,” Wheeler said. Wheeler sees Casa del Prado as a tremendous influence on the park and feels the retention of El Prado’s architecture is important to the total atmosphere of the park. He said he hoped the Casa del Prado sets the pace for other park buildings and that the elaborate facades will be reproduced in other buildings.

Recreating a building is quite a different approach for most contemporary architects today but “I think I approached it in a sentimental way. You have to have a love for the old building to reproduce it in its original,” he added.

Despite its look alike nature on the exterior, the interior is quite a new design. The building has to serve many uses and so the need was for flexible space, Wheeler said. The open courtyard and the many multi-purpose rooms were selected to accomplish this, producing a building with 30,000 square feet less than the old one-story, loft style, 90,000-square foot Food and Beverage Building.

S. Falck Nielsen in producing Wheeler’s design, said he is tremendously satisfied with the structure and found it was a challenging project. Because the type of construction used was not common, it was difficult to find persons sufficiently qualified to do the work, Nielsen said.

Dean N. Ninteman, executive vice president of Ninteman Construction Co., whose firm recreated more than 800 pieces of ornamentation for the building said, “We are well pleased with the structure, and think the people of San Diego can be proud of it. We hope this is the forerunner of restoration of other buildings in the park, whether our firm is involved or not. We think it is the proper thing to do,” Ninteman said, speaking of the retention of the Spanish colonial architecture.

Vincent J. Ninteman, president of the firm, has established experience in the area of ornamental sculpture and cast decorations because of the firm’s work on the University of San Diego, which

contains vast amounts of pre-cast ornamental work of a similar nature. His firm also was heavily involved in restoration work on San Francisco's Palace of Fine Arts.

However, San Diego's Casa del Prado offered special challenges, partly because of the size and weight of some of the case pieces, Dean Ninteman said. For example, the three cast stone frames surrounding the three rose windows above each of the entrances weighed eight tons each, he said.

"A majority of our work went up first and then the building went up behind it. The back side of our large cast pieces, in many cases, presented the front form for the concrete wall," he said.

The specific techniques that were developed for recreating the Spanish Colonial baroque design of the original building have become a fascinating chapter in the Casa del Prado's story.

Basic techniques used by Hollywood set designers provided a starting point beyond which the Ninteman firm developed its own process, which included working with a chemical company to develop a vinyl material of making the ornamental molds. We had to have a material that was flexible enough to stretch and pull off the newly cast piece and it had to return to its original shape so the mold could be reused because there are numerous repeats of motifs on the building," Ninteman said.

After research, the firm came up with a three-part method for casting the work, which was under the direction of Christian Mueller, a specialist in ornamental casting, and five model makers. The first step was to restore the old plaster piece to be copied close to its original condition (a considerable job since many pieces were badly deteriorated.)

In the next step --- that of mold making --- a layer of modeling clay was applied directly to the ornament in a thickness that the vinyl mold was to be, which varied from about ½ inch to 1 inch. A plaster case in two parts entirely covered the clay. When the plaster was hardened the clay was removed and the plaster back replaced. Then the liquid vinyl material, heated to 350 degrees, was poured into the void left from the removal of the clay. When the vinyl hardened it was locked into the plaster case. Then the original piece was removed.

The third step was to pour the concrete into the vinyl mold. When the concrete was poured, metal reinforcement and anchoring devices were inserted into the concrete.

In addition to the pre-cast stone ornamentation is extensive molding and coping around the tops of the building and this was cast horizontally in Fiberglass forms, Ninteman said.

Originally designed by architect Carleton Monroe Winslow, under the director of Goodhue, advisory and consulting architect of the Exposition, the former building has had numerous names. On working drawings in 1913 it was called the Agriculture Building. When it opened in 1915 the south portion was known as the Varied Industries Building and the north portion the Food Products Building. In 1916 it became the Foreign and Domestic Products Building and in 1935 the Food and Beverage Building.

And during the past half century the building has housed the County Fair, served as a barracks during World War I, as a hospital during World War II, as the city library during construction of the present facility, and was used by recreational groups, the city engineer's office and the San Diego Zoo, according to Barbara Jones, editor of *California Garden*, who is preparing a historical booklet on the building.

It was Goodhue's original intention for the 1915 Exposition Buildings to create a city in miniature, one that reflected the gaiety and excitement of a fabled Spanish city. His intentions were graphically seen in the elaborate frontispiece of the auditorium area of Casa del Prado, which was inspired by the Spanish Colonial architecture of Mexico's churches. The similarity is seen in the ornate facade flanked by two bell towers domed with blue and yellow tile.

The southern portion of the building features two highly ornamented entrance pavilions with a second-story pillared loggia overlooking El Prado. The entrance decorations are identical, each with three massive arches decorated with fruits and vegetables, cherubs, crowns, urns, shields, olive leaves and grapes entwined around many pillars. The grape and olive are significant motifs, having been brought to California by the Spanish and becoming an important and early contribution to the state's agriculture.

Between the two entrance pavilions are six round discs representing such designs as a sheaf of bound wheat, a grape vine, a fruit-laden tree and a trio of gourds. The loggia architecture is typical of the patio portals of Mexico, and recalls the 18th century work at Queretaro, Mexico, according to historical documents.

When the loggia was planned to be excluded from the building because of costs, Mrs. Evenson and her Committee of 100 began a campaign to raise \$75,000 for its inclusion. The largest single donor to the campaign was Mrs. Jeannette Pratt, a San Diegan and widow of a bottling company executive, who contributed \$50,000 to the project.

Ornamentation on the west and east ends of the arcade of the south building represents Father Junipero Serra carrying a cross and a sailing ship passing through the Panama Canal.

The symbolic statuary on the building ornamentation on Village Place includes six figures including an Indian child and an Anglo child, representing the contribution of the two races to California history. Another figure on the south side of the cartouche is thought to represent Columbia and the United States Government. The northernmost figure with globe and cross is said to represent the church. At the very top of the ornamentation stands a draped female figure thought to represent religion.

Although 90 percent of the old building has been preserved, two elements are missing because of cost cutting, these are the apse and choir section, which decorated a corner of the northern portion of the building and the memorial to Father Serra, which was mounted on this section of the structure.

Preserving the Spanish Colonial 1915 buildings on El Prado isn't really anything new. Six efforts have been made through the years, says Mrs. Evenson. Once in the 1920's all of the temporary buildings were condemned and through the efforts of civic and cultural leader Gertrude Gilbert, they were saved. The leading towers were propped up, the sagging facades were shored up and the crumbling ornaments repaired by citizen subscription, government help and W. P. A. labor, Mrs. Evenson said. And though they were not made permanent, they did serve for the second exposition in 1935, the California-Pacific International Exposition.

And the magical architecture of Balboa Park has remained to inspire and remind San Diegans of their historical past. But the Casa del Prado, while its heritage is of the past, its function is of the future.

For succeeding generations of San Diegans and visitors to Balboa Park, Casa del Prado will be a reflection of Goodhue's "fabric of a dream"; a dream shared by hundreds of thousands of San Diegans --- a civic dream that came true.

October 28, 1971, San Diego Union. San Diego Historical Society backs Proposition A, but opposes plans.

The San Diego Historical Society has endorsed the passage of Proposition A, the \$2.85 million Balboa Park bond issue to be voted on November 2, but it is opposed to some of the proposed changes.

The action occurred at the society's October executive committee meeting.

The proposition calls for the preservation and rehabilitating of the Ford Building for use by the Aerospace Museum as well as construction of a new wing for the Fine Arts Gallery.

The society is opposed to preliminary architectural drawings which would remodel the Ford Building in a Spanish-Colonial style, according to James E. Moss, executive director of the organization.

"They are going to try to take a 1935 building and make it something it is not," Moss said. "This is bastardizing a form of architecture."

The addition of an arcade called for in preliminary sketches would only cheapen the building according to recommendations adopted by the executive committee at the suggestion of Robert D. Ferris, an architect and member of the society's board of directors.

Public money for unnecessary exterior work should be saved or used to facilitate the museum's program, the Committee reported.

October 31, 1971, San Diego Independent. Park Building Stands Despite Impossible Odds.

San Diego --- The successful completion of an impossible chore will come November 14 when a restored Food and Beverage Building is dedicated in Balboa Park.

Condemned as an eyesore and razed for the 200th anniversary celebration, the building and its ornate statuary stands again in tribute to unceasing efforts against overwhelming odds.

The story of the building's restoration goes back to 1967 when Bea Evenson organized the Committee of 100 to preserve the Spanish Colonial architecture of El Prado.

The committee, which actually numbered many times more than 100, circulated a petition asking that Spanish Colonial architecture be made mandatory along El Prado.

Petitions in hand, the City Council was persuaded to establish such a policy.

The original buildings, constructed in 1915 for the exposition honoring the opening of the Panama Canal, were built as temporary structures. Over the years many had to be shored up and restored.

A city task force, however, decided the largest of them, the Food and Beverage Building, was beyond repair.

"When the building was condemned, the committee raised over \$10,000 to take the ornamental specimens from the building so they could be saved," Mrs. Evenson said. "The city agreed to put up \$5,000 to catalog and photograph the items."

Faced with the ornamentation in storage and no place to put it, the City Council, in a surprise move, placed a bond issue on the 1968 ballot to restore the building.

The Committee of 100 was caught unprepared.

"It looked like it would be impossible to pass the bond issue and, at first, we didn't know what we should do," Mrs. Evenson said. "But we wanted it so badly, we decided to go ahead and try to get the proposition passed."

The bond issue passed by an overwhelming 72 percent.

"It was a miracle," Mrs. Evenson said.

The work, however, had just begun. The statuary has to be restored and put in place on the new building. Architectural sculpture, it was found, is a lost art.

Chris Mueller was finally brought in from the Disney studios to take on the job of head sculptor. The statues were repaired and cast in stone and finally restored to their place on the building.

"No one will ever understand how much of a monumental task that was," Mrs. Evenson said.

Along the way, the committee found that the city was considering not restoring an ornate facade, fronting Zoo Drive, in an economy move.

"We got to work and had it re-included," Mrs. Evenson said.

The Committee also found it necessary to raise an additional \$75,000 to have a loggia on Prado side restored. A total of \$50,000 was donated by Jeannette Pratt, for the loggia, now known as the Pratt loggia.

October 31, 1971, San Diego Union, B-1:5. Bond issue financing analyzed; Proposition A proposal involves small cost to taxpayer, by David Brownell.

November-December, 1971, California Garden, 186-188. El Prado Walk.

The building on the north is the Casa del Prado, restored completely on the Prado side. The building was designed like a great convent. The arcades on the front are adapted from the patio of St. Augustine at Queretaro, Mexico. On the east side, the large ornamental facade is centered with a statue of the goddess of California, with an Indian and a Spanish child. The female figures on each side are (L) an Anglo-Saxon woman and (R) Queen Isabella of Spain. The female figure at the top symbolizes universal religion.

The auditorium front is in the style of a Spanish-Colonial church and the central figure is St. Jerome.

November, 1971, City of San Diego Recreation Department: Casa del Prado --- Operating Policies and Procedures.

The Casa del Prado is a major recreational facility located in Balboa Park intended for use by social, recreational, cultural, and educational groups and organizations. Use of the Casa del Prado facilities will be made in accordance with Council Policy 700-4, "Balboa Park Leases and Rentals." Under this Policy, the following regulations have been established by the Recreation Department.

1. Exclusive use of certain Casa facilities have been assigned certain designated organizations and activities sponsored by the City of San Diego's Recreation Department.
2. Organizations and activities sponsored by the City of San Diego through the Recreation Department will have priority in scheduling the use of facilities as follows:

San Diego Botanical Gardens Foundation, Inc.,
San Diego Floral Association and affiliated organizations: Majorca (Room 101)

Junior Theater: Granada (Room 102)
Barcelona (Room 103)
Valencia (Room 204)
Madrid (Room 205)
Saragossa (Room 207)
Practice Rooms 12 and 1.

Youth Ballet: Santiago (Room 201)
Guadalajara (Room 202)
Seville (Room 203)
Salamanca (Room 206)

Dance: Granada (Room 102)
Barcelona (Room 103)
Santiago (Room 201)
Valencia (Room 204)

Youth Chorale: Saragossa (Room 207)

Youth Symphony: Saragossa (Room 207)
Practice Rooms in Auditorium

3. Scheduling of Facilities

- a. Designated groups may make reservations for facilities 18 months in advance of requested activities date.
- b. All groups and organizations may make reservations 18 months in advance for "non-priority" facilities.
- c. Non-designated groups may make reservations for "priority rooms" if available 60 days prior to the date of the activity.

- d. Reservations may be made in the Building Director's office --- 9 a.m. to 5 p.m. --- Monday through Friday. The reservation schedule will be maintained in this office and posted for general information.
 - e. Designated groups and organizations, meeting requirements in Council Policy 700-4, may have free use of facilities. All other organizations will be charged for the use of facilities, in accordance with rates established by the City Manager (see attached Rental Rates).
 - f. Building is available for use 9 a.m. to 10 p.m. seven days a week.
4. Kitchen Use and Meals
- a. Meal service is permitted in the building for designated groups only, in conjunction with scheduled meetings or special events held in the Casa del Prado.
 - b. Food in the main auditorium is restricted to table service.
 - c. Refreshments are permitted in conjunction with meetings and special events scheduled in the building (all groups).
 - d. Access to the kitchen will be available from building staff --- 9 a.m. to 10 p.m. seven days a week. Kitchen equipment, including china, will be available for use. Food may not be stored in the kitchen. Dishwashing and general clean-up will be the responsibility of groups using the facility
5. Patio Use: Patios will be open and available for public use and enjoyment at all times the building is open. They may be used in conjunction with meetings and special events scheduled in the building. Activities which would, by their nature, restrict use --- will not be permitted, i. e., weddings, luncheons, dances, demonstrations, etc.

RENTAL RATES - CASA DEL PRADO
(Approved December 17, 1971)

Assembly Room 101 - Capacity 300: \$45 for 3 hours; \$7.50 each additional hour.

Assembly Room 102 - Capacity 105: \$20 for 3 hours; \$5 each additional hour

Assembly Room 103 - Capacity 75: \$20 for 3 hours; \$5 each additional hour

Assembly Room 204 - Capacity 75: \$20 for 3 hours; \$5 each additional hour

Assembly Room 205 - Capacity 75: \$20 for 3 hours; \$5 each additional hour

Assembly Room 207 - Capacity 280: \$40 for 3 hours; \$7.50 each additional hour

Multi-Purpose Auditorium - Capacity 952

<u>Performance Day</u>	<u>Clear Floor</u>	<u>Flat Floor-Chairs</u>	<u>Full Riser</u>
Basic rate - No Admission	\$75	\$130	\$195
Charity, Non-profit, Admission	\$130	\$195	\$255
Commercial, Admission			
10 % of gross admission			
sales but not less than	\$195	\$260	\$320

Non-performance day - 50% minimum rental.

Move In: Events with two or more single performances will be allowed one move-in and one move-out day at no extra charge.

November, 1971, San Diego Botanical Garden Foundation, Inc. Your Are Invited to San Diego Garden Cultural Center, Balboa Park . . . leaflet with drawings and floor plan

November 1, 1971, San Diego Union, B-6:2. EDITORIAL supporting Proposition A.

November 2, 1971, San Diego Union, A-1. Proposition A to expand Fine Arts Gallery and rehabilitate Ford Building for Aerospace Museums

YES	106,260	60 percent
NO	70,799	

(No organized opposition.)

November 3, 1971, San Diego Union, 1:5-8. Proposition A, museum bond issue, defeated, by David Brownell.

Proposition A --- the Ford Building rehabilitation and Fine Arts Gallery addition --- went down to defeat last night when it failed to gain the necessary two-thirds margin for passage.

With all 634 precincts reporting, the \$2.8 million bond issue garnered 60 percent for approval, 106,200 to 70,799.

Spokesmen for the immediate beneficiaries of the bond proposal --- the San Diego Aerospace Museum and the Fine Arts Society --- last night said they would independently pursue their goals with the new City Council.

Colonel Owen Clarke, USAF, retired, museum director, told a reporter the aerospace museum will likely seek minimum refurbishment of the Ford Building.

Cost of the "bare bones" rehabilitation would be \$500,000 according to Clarke, who said the funds could come from the city's capital improvement budget.

Philip Gildred, Sr., president of the Fine Arts Society, last night said the society will ask the council to consider placing the gallery addition on a ballot in the near future.

He indicated he thought the art gallery wing would have a good chance of passage if it were placed on the ballot separately.

"Matching funds speak more loudly," said Gildred when asked if he thought the gallery's project was hindered by its association with the aerospace museum proposal. The society had pledged \$750,000 for the east wing, half of the \$1.5 million cost.

Asked if he thought the pairing of the proposals had hurt the museum's chances, Clarke said he didn't think it had hurt his organization.

Pressed for details of his minimum rehabilitation proposal, Clarke said the museum had an estimate of \$500,000 to bring the 36-year-old structure up to a standard where it could be used to exhibit the museum's collection of vintage aircraft.

Of the new proposal, Clarke said:

"It wouldn't be something that San Diego could be proud of, but it would give use a place to house our collection."

According to Clarke, the collection, which includes such irreplaceable pieces as an 1883 Montgomery Gull Glider, a 1903 Wright flier, and a 1927 Ryan NYP "Spirit of St. Louis" are "in

constant jeopardy.” This is due to the leaky roof and shaky floors of the museum’s current quarters, the 56-year old Electric Building.

While there was no organized opposition to the Balboa Park proposal, the San Diego Taxpayers Association last Friday issued a statement to the effect the organization could not support the bond issue.

The association said it could not recommend approval of the bond issue because the city had not properly evaluated its improvement priorities.

The association called for a more in-depth study of the city’s improvement needs before any more bond issues are put to a vote.

November 4, 1971, San Diego Union, B-3. Museums face tight future.

The Aerospace Museum may move to the creaking Ford Building after all.

And the fabulous Toulouse Lautrec collection of the Baldwin family as --- at least --- a very good chance of remaining in San Diego permanently.

These possibilities were voiced late last night despite the defeat of a \$2.85 million Proposition A on Tuesday’s ballot.

As city cultural leaders mopped up from that loss they admitted cultural disaster might not follow.

“Bare bones budgets” might be used to build a new wing for the San Diego Fine Arts Gallery, and the Aerospace Museum Board will consider renovating the Ford Building “just enough to make it usable,” according to leaders.

Proposition A would have provided \$2.1 million to refurbish the unused Ford Building in Balboa Park for the museum, and the Fine Arts Gallery would have received \$750,000 to match \$750,000 it held in private contributions to add a new gallery wing.

The measure received 106,200 votes Tuesday. The “no” vote was 70,700, giving the proposition a 60 percent majority --- short of the required two-thirds for passage.

Here are the possibilities now that the \$2.85 million in bonds have been canceled:

- Both agencies expect to ask the city for capital improvement funds to let them proceed “in some manner” on their plans.
- The Fine Arts Gallery --- according to director Henry Gardiner --- may try to build some sort of addition with the \$750,000 it already has. “Or we may try and raise more money from private or government sources to finance an addition,” he said.
- John P. Starkey, president of the Aerospace Museum Committee, said his first recommendation will be that the “museum try and move to the Ford Building anyway and renovate it just enough to make it safe and useful for the exhibits.”
- But, since the Aerospace Museum will need money to do even this housecleaning of the Ford Building, the committee might have to find another location besides Balboa Park, Starkey said.
- As for the Toulouse-Lautrec collection, it will be here on loan from the Baldwin family of Newport Beach for two years. “I have talked with Mrs. Baldwin in Newport Beach yesterday and the collection might have a permanent home here if it is appreciated,” Gardiner said.

“However, we will eventually have to build a permanent wing to house the collection.”

What about money from the City of San Diego budget?

It is a possibility only if something else is taken out of the capital improvement portions of the budget according to Floyd Moore, who draws up the long-range capital budgets. “There is nothing earmarked now for these improvements so something would have to be sacrificed.”

Both Gardiner and Starkey feel San Diego lost a great chance to gain a major package in defeating the bond issue. And both say things cannot remain as they are right now.

“We cannot leave the collection of planes where it is,” said Starkey. “Something will have to be done.”

November 5, 1971, San Diego Union, B-10. EDITORIAL: Another Proposition.

There is a feeling among members of the San Diego Fine Arts Society that a proposal for a \$750,000 city bond issue to expand the Fine Arts Gallery in Balboa Park might have been approved in Tuesday's election if it had appeared on the ballot as a separate item. This could well be the case, and the idea should be pursued.

The Fine Arts bond proposal was conditioned on the availability of matching funds from other sources to make up the full cost of adding an east wing to the gallery. Its ballot companion asked taxpayers to underwrite the entire \$2.1 million cost of rehabilitating the old Ford Building to serve as a home for the San Diego Aerospace Museum. Unfortunately, the combined proposition was rejected by the voters.

Both of these projects are of prime importance to San Diego and the future of Balboa Park, but the message at the polls Tuesday may have been that citizens want to see more private support to match public support of institutions in the park.

The Aerospace Museum could profit by the example of the Fine Arts Society. If it could find private resources to help meet the cost of its building needs --- resources that lie within the aerospace industry, for instance --- the taxpayer might be more willing to help.

Defeat of Proposition A was a bitter disappointment for those who believe in the future of San Diego's great Balboa Park, but the disappointment should not deter either the Fine Arts Gallery or the Aerospace Museum from their goals.

November 13, 1971, San Diego Union, B-1:3-4. Casa del Prado officially opened in Balboa Park.

November 14, 1971, Committee of 100 Release . . . Casa del Prado, Balboa Park, San Diego, California.

The Casa del Prado, designed by Carleton Monroe Winslow, under the supervision of Bertram Goodhue, for the 1915 Exposition, and now rebuilt in permanent materials, will be formally dedicated by the City of San Diego and the Committee of 100 on November 14, 1971, happily ending the last great struggle to preserve it, and make it a splendid heritage for future generations of San Diegans. It is one of the most magnificent of the buildings remaining from the enchanting Spanish colonial “Dream City” which captured the hearts and imaginations of all who visited the 1915 Exposition, and which left a consequent impression on much of California's later architecture.

The building was temporary, designed to last for the duration of the Exposition, but its beauty, combined with that of the entire complex with its luxuriant landscaping, was such that the buildings were preserved, despite their flimsy construction to become the cultural heart of the city.

Six different times this particular building was threatened with destruction, but was saved by the love and concern of San Diegans.

From the first working drawings in 1913, to the 1971 building it has had five different names and many different occupants. In 1913 it was designated the Agricultural Building (which explains many of its decorations). In 1915 it became the Varied Industries Building, in 1916 the Foreign and Domestic Products Building, for the 1935 Exposition the Palace of Food and Beverages, and it is now to be dedicated as the Casa del Prado. Many of the youth, civic and botanical organizations who had occupied the ramshackle original building, and who fought for its preservation, are now occupants of the permanent building.

The story of the rebuilding of the Casa del Prado in permanent form is the story of citizen concern and dedication to the project. In 1966 Mrs. Frank Evenson, alarmed by the destruction of several of the old buildings and the serious neglect of others, formed the Committee of 100 to preserve the Spanish colonial architecture of the Prado area.

In 1967, through the efforts of the Committee, the Prado area was declared an Historic Site by the City Council. The same year the Food and Beverage Building was suddenly condemned and closed, and the youth groups using it were moved to smaller quarters. The Committee of 100 quickly raised \$10,000 through subscription and a 1915 Fiesta, and got permission of the City Council to remove some 200 specimens of the building's opulent ornament for future use. Then the building was demolished.

Despite claims that it would be impossible, or prohibitively expensive, to rebuild the building and preserve its rich Baroque ornament, the Committee raised more money for research on the restoration and duplication in concrete of the plaster decorations. These efforts proved that the total cost of the entire building with restored facades would be little more than an ordinary building of the same type and area.

In a surprise move the City put the rebuilding of the building on the November, 1968 ballot as a \$3.5 million bond issue. The Committee of 100 held an auction of plaster ornament scavenged from the demolition site. This money, plus many generous donations, made possible the sending of a mailer to all voters explaining the importance of the bond issue to the city. With the enthusiastic support of the newspapers, publications, dance, youth, garden and other civic and cultural groups, and the Parent Teachers Association, the bond issue was passed with a record 72 percent of the voters in favor of it, indicating the great pride of the citizens in this magnificent building.

Since the passage of the bond issue, moves to put the building on a different site, to eliminate some of its rich ornamental detail for economy's sake, and to eliminate the elegant second floor loggia along El Prado have been averted by the Committee of 100. To restore the loggia to its original state, the Committee had to raise an additional sum. Through the generosity of many donors, and particularly Mrs. Jeanette Pratt, for whom the loggia has now been named, the money was raised. Certain changes have been made to the original plans, such as the creation of the two patios, which have added to the grace and usefulness of the building, but the facade along El Prado and that of the auditorium along Zoo Drive are almost exact duplicates of the originals, except that what was once chicken wire, plaster and illusion is now solid reality.

CASA DEL PRADO 1971

HISTORY

Built for the 1915 Exposition.

Designed by Carleton Monroe under the supervision of Bertram Goodhue.

Condemned to be destroyed six different times. The last time it was saved by

THE COMMITTEE OF 100

Formed by Mrs. Frank Evenson in 1967 when there was talk of replacing the building with a modern one.

The Committee received permission from the City Council to remove 200 specimens of sculpture from the building. Ninteman Construction Company was paid \$10,000 to remove these specimens. Another \$2,500 also paid by the Committee, was paid for research as to the best means of restoration of the pieces of sculpture.

Building put on the November 1968 ballot as Proposition "M," bond issue for \$3,500,000 for its replacement.

Youth and Dancing groups, the Botanical Foundation and Garden Clubs, Senior Citizens and P. T. A. worked along with Committee member for passage of the bond issue.

The bond issue passed by 72 percent.

Ground breaking ceremony was held November 9, 1969.

The Committee has raised \$113,000 toward this building.

BUILDERS

Richard George Wheeler, architect
Sam Hamill, consulting architect

Nielsen Construction Company awarded contract.

L. J. Ninteman awarded subcontract for casting 1,800 pieces of ornamentation. This firm was also involved in the restoration of the San Francisco Palace of Fine Arts.

Ninteman developed a process (working with a chemical company) to develop a vinyl material for making ornamental molds. A material flexible and strong enough to be used over on repeat motifs was used.

The first step was restoring the old plaster and hemp decorations, many of which were badly deteriorated.

Molding and copying around the top of the building were cast horizontally in fiberglass forms.

BUILDING

The building is a complete restoration on the El Prado facade. The new building has two patios where the former L-shaped building was completely enclosed.

The cast stone frames surrounding the rose windows above the entrances weigh eight tons each.

The building is basically a mixture of precast concrete elements, load bearing masonry and poured concrete, designed in two sections connected by arcades and the large courtyard.

Auditorium: 9,600 square feet, 996 seats, 80x35 foot stage, 10x40 orchestra pit.
Flat 80x80 hardwood floor designed for multipurpose use.

Eastern part of building: San Diego Botanical Garden Foundation, representatives of 37

horticultural groups will be primary users. Special incandescent lights to simulate daylight for flower shows and displays.

Western part of building: Senior Citizen Lounge, Botanical Foundation Library and small sales area.

Upstairs: Seven assembly rooms, four with floor to ceiling mirrors for ballet practice.

All of building: Air conditioned.

USES

1915 and 1935 Expositions, County Fair, World War I barracks, World War II hospital, temporary library, and finally City recreational and botanical groups.

ARCHITECTURAL FEATURES

Has elaborate Churrigueresque ornamentation.

Auditorium: Elaborate facade is inspired by Spanish Colonial architecture of Mexico's churches. Similarity is also seen with the two bell towers domed with blue and yellow tile.

Southern Portion: Copy of a Mexican Spanish Colonial Government place, with the second-story pillared loggia overlooking El Prado. The City had eliminated this loggia until the Committee of 100 raised \$75,000 to have it replaced.

Entrance decorations are identical, each with three massive arches decorated with fruits and vegetables, cherubs, crowns, urns, shields, olive leaves and grapes entwined around many pillars. The grape and olive are significant motifs, having been brought to California by the Spaniards and becoming an important and early contribution to the State's agriculture.

Between the Two Entrance Pavilions are six round discs representing such designs as a bound sheaf of wheat, a grape vine, a fruit-laded tree and a trio of gourds. The loggia architecture is typical of the patio portals of Mexico and recalls the 18th century work at Queretaro Mexico, according to historical documents.

West End of Arcade of South Building represents Father Junipero Serra carrying a cross, and the East End represents a sailing ship passing through the Panama Canal.

On Zoo Drive: The symbolic statuary includes six figures consisting of an Indian and an Anglo child representing the contribution of the two races to California history. Another figure on the south side of the cartouche is thought to represent Columbia and the United States Government. The northernmost figure with globe and cross is said to represent the church. At the very top of the ornamentation stands a draped female figure, also thought to represent religion.

Although 90 percent of the old building has been replaced, two elements are missing because of cost cutting. These are the apse and choir section which decorated a corner of the northern portion of the building, and a memorial to Father Serra, which was mounted on this section of the structure.

NOVEMBER 14, 1971. CASA DEL PRADO DEDICATION BOOKLET, by Barbara Jones.

History of Balboa Park

History of Casa del Prado

Ornamentation

Committee of 100

November 15, 1971, (San Diego) Evening Tribune, B-1. New "Palace" Dedicated in Balboa Park; Casa del Prado opens with swirl of color; folk dancers, soaring balloons (illus.).

Casa del Prado, youth and cultural center, opened officially yesterday at Balboa Park amid a swirl of folk dancing and 2,000 rising balloons.

The building, its beautiful courtyards and its spacious lawns, are the result of a restoration project financed by a \$3.7 million bond issue approved by city voters three years ago.

On hand for the dedication was Mayor Curran, who said the Prado is "a brand new palace --- the beginning of something good and the end of something not so good."

The "not so good" was the Food and Beverage Building, one of several structures used for the Panama-California Exposition of 1915-16 which celebrated the opening of the Panama Canal.

The Food and Beverage Building was torn down in 1968 after building inspectors determined that it was structurally unsound.

Casa del Prado (House of the Promenade) is a 60,000 square-foot reconstruction of the 56-year old Food and Beverage Building, whose exterior ornamentation was duplicated in the new structure.

Curran presented Mrs. Frank Evenson, chairman of the "Committee of 100," a key to the city during the dedication. The committee was instrumental in gaining public support for the restoration project.

The Prado will contain display rooms for the San Diego Botanical Garden Foundation's horticultural groups and will provide practice rooms for the Youth Symphony, Youth Chorale, Junior Theater, Youth Ballet and city folk-dancing groups.

November 15, 1971, San Diego Union, B-1. Casa del Prado officially opened in Balboa Park, by Steve Stibbens (illus.).

Almost on cue the dreary hanging clouds parted over Balboa Park yesterday afternoon and Mayor Curran sent 2,000 balloons fluttering into the sunshine to officially open the Casa del Prado Youth and Cultural Center.

A crowd, many in gaily-colored folk-dancing costumes, filled the Casa's several courtyards and manicured lawns to celebrate "the fabric of a dream."

The Casa is a 60,000 square foot reconstruction of a 56-year old "temporary" building that had served since 1915 as an exhibit house, a World War I barracks, a World War II hospital, and briefly as the city library.

The new structures, which meticulously retained the elaborate Spanish architecture of the old, are the result of a \$3.7 million bond issue voted in 1968.

The Casa del Prado (House of the City Walk) will afford display rooms for the San Diego Botanical Foundation's 37 horticultural groups and provide practice rooms for the city's Civic Youth Ballet, Youth Symphony, Youth Chorale, Junior Theater and folk dancing groups.

Perhaps the biggest smile in the crowd Sunday was that of Mrs. Frank Evenson, chairman of the "Committee of 100" which campaigned successfully for public support of the project.

Mayor Curran called the Casa “a brand new palace --- the beginning of something good and the end of something no so good.” Curran said he suggested the restoration project 16 years ago.

He presented the Committee of 100 a “key to the city in the name of young people” and said the buildings should “serve to train young people in the skills of the arts so they can grow and mature and become beneficial to the community.”

The multi-purpose building will offer “not only utility but nostalgic dreams of the past,” Curran said.

Casa del Prado replaces what was last known as the Food and Beverage Building, one of several structures used to house the Panama-California Exposition of 1915-16 which celebrated the opening of the Panama Canal.

While the interiors of the buildings are most modern, the exact duplication of the original ornamentation outside became a challenge to the construction contractor.

“They don’t build that way anymore,” said the contractor.

The design called for a mixture of precast concrete elements, load-bearing masonry and poured concrete.

Before the Food and Beverage Building was razed in 1968, a half-inch layer of modeling clay was placed on the elaborately ornamented facade, followed by a plaster mold. The clay then was removed and a rubber compound was poured in to cast the design. Finally, a concrete aggregate was poured into the cast.

Richard Pourade, editor emeritus of *The San Diego Union* and author of several books on San Diego history, applauded the public support of the Casa del Prado project.

“I hope this marks the end of an era of counting progress by population,” he said.

November 15, 1971, San Diego Union, B-3. Apollo 11 astronauts Neil Armstrong, Edwin Aldrin and Michael Collins were inducted yesterday into the International Aerospace Hall of Fame.

Portraits of the three, painted by Spanish artist Sebastian Capella, were unveiled today at a special ceremony in the hall, located in the Aerospace Museum in Balboa Park.

November 26, 1971, San Diego Union, B-1:6-7, B-4:2. Old organ in music room of Spreckels mansion in Coronado is offered to Museum of Man (illus.)

FOUND IN BASEMENT: Rare Old Organ Offered Museum

A musical dinosaur --- the old Spreckels mansion organ --- has been found here and was offered this week to the Museum of Man in Balboa Park.

The organ, which would cost an estimated \$125,000 to build now, recently was discovered to be intact and still operable, in the basement of the Coronado Glorietta Hotel --- once the fabled Spreckels Mansion.

Edward S. Barr and Wendell N. Shoberg last week acquired title to the 2,000-pipe organ and began scouting for a location.

Yesterday they said they found the perfect place --- the Spanish Center of the Museum of Man.

The Museum of Man Board of Directors voted at noon yesterday to form a study committee on the proposal. Although the organ would cost only \$400 in purchase price, it would take about \$28,000 to refurbish the instrument and install it in the museum.

"The instrument is believed to be one of less than ten remaining in the world," said Barr, who formed Organ Power Productions with his partner Shoberg.

Built in 1910, the organ was made by Aeolian Organs of New York. Factories in that state made an estimated 2,500 residence type organs near the turn of the century.

When John D. Spreckels built the music room in his mansion in Coronado, he excavated a special section to house the organ. A sub-basement, the room was completely filled with the organ which piped music up to the reception room through brass grills.

Barr, a stockbroker, joined with Shoberg, a professional organist, to save the instrument.

Barney Padway, head of the Glorietta Bay Hotels, Inc. said he donated the organ to the firm "provided it is placed in Balboa Park --- which is an ideal location for the instrument."

Padway said the organ had to go because of building plans for the basement section of the old mansion, which now forms the center of the hotel.

Barr said the organ is the fourth largest in California and one of the few "that can play classical music at the proper tone levels."

A bonus was found in the cabinets of the old music room on Monday of last week --- a cache of 150 music rolls which can be run through the organ to make it work like a player piano.

Shoberg said the organ's condition is "excellent."

"It has never been touched or changed since it was installed," said Shoberg. "Its tone is perfect, but it needs extensive refurbishing of the leader parts that control the air blasts."

In the presentation to the Museum of Man, Organ Power Productions stipulated that they be the supervisors for the rebuilding, and installation of the organ.

Also, the organ is to be played at 'least once each day the museum is open to the public."

"If the organ is ever sold or given away, Organ Power Production has first refusal rights."

December 8, 1971, San Diego Union, B-4:8. City Council authorized study to determine feasibility of adding a \$250,000 film projector to planetarium to show space-related films.

December 20, 1971, San Diego Union, 3:1. Construction of Hall of Science and Reuben H. Fleet Planetarium and Space Theater 37 percent complete and 2 months ahead of schedule.

San Pasqual Wild Animal Park dedicated (May 10, 1972)

Plaza de Balboa dedicated (October 21, 1972)

Propositions to replace Electric Building and rehabilitate Ford Building,
defeated (November 8, 1972)

Ballot propositions to renovate Electric and Ford Buildings, defeated
(November 7, 1972)

January, 1972, San Diego Magazine. The Restoration, by Robert Ward (illus.).

Due in large measure to the prodigious efforts of Mrs. Frank Evenson and her Committee of 100, San Diegans can now, after 50 years of vacillation and uncertainty, walk along Balboa Park’s El Prado and see the first tangible evidence that their “boulevard of broken dreams” may become whole again. What she had done, simply, is to take her memories of Balboa Park and the Prado area in their early days and convert them, through passionate concern and determination, into the first, realized part of a dream that all of us may now share.

Formed in the spring of 1967, the committee set out to enlist the support of San Diegans in a crusade to preserve as much as possible of the remarkable, visionary “city-within-a-city” designed and executed by Bertram Grosvenor Goodhue for the 1915 Panama-California Exposition. Much of his original conception has already disappeared under the ravages of time and neglect, and plans were then afoot to replace the aging, soon-to-be-condemned Food and Beverage Building with variously, some sort of more modern “Spanish-influenced” structure or parking lot, and the signs were that the other temporary buildings of the Exposition were earmarked for this fate also.

Built of lath and plaster, these whimsically baroque plays on a Spanish-Colonial theme (the Food and Beverage Building, the House of Hospitality, the House of Charm, and the Electric Building) were never intended to remain standing after the 1915 Exposition, but the sentimental pressure of generations of San Diegans had kept them, if not exactly intact, at least erect.

The committee felt that the city should undertake to replace the Food and Beverage Building, and eventually the others, with completely new structures, which remained true in outward appearance to the conception of the originals but which, through interior modifications, would be far more functional than the barn-like shells they would replace. Eventually they succeeded in initiating and shepherding through the electorate a \$3.5 million city bond issue for this purpose, and the Casa del Prado is the happy result of their efforts.

The new structure, designed by Richard George Wheeler & Associates, AIA, with the consultation of Samuel Wood Hamill, FAIA, is perhaps the single most encouraging thing to happen in San Diego in the last decade, at least from a romantic or visionary point of view. Adhering closely to the initial design by Carleton Winslow, for which the architect was fortunate to have available the original drawings on linen, it is somewhat smaller in overall dimensions, but has been provided with substantially more usable interior space.

The ornamentation of the old Food and Beverage Building was removed before the site was leveled, and castings from these ornaments have been used to faithfully duplicate much of the old facade on the new building. The overall sense of the Winslow design is preserved, but the tendency is toward a leaner, more simplified structure which displays to best advantage the whimsical complexity of the sculptural motifs. The building so perfectly attains its ideals that it is difficult to believe that it has not been in the park for 50 years or more, along with its neighbors.

Of the many San Diego residents who cherish memory images of the original Prado, the committee singles out Mrs. Arthur Pratt as one to whom future generations owe a special gratitude. Mrs. Pratt first saw the Food and Beverage Building in 1935 and as an artist was enchanted with the ornate beauty of the structure. Now in her 80's, she remembers the building in detail. Her contribution of \$50,000 made possible the exact reproduction of the original loggia for Casa del Prado. And with extraordinary generosity, she has made an additional contribution of \$50,000 to the committee for the recreation of the Electric Building, directly across from Casa del Prado.

Having proven that it is possible to undertake a project of the magnitude of Casa del Prado, and see it through to its full fruition, the committee has now taken on a similar task with the Electric Building. Designed for the same 1915 Exposition by Frank P. Allen, who also did the Cabrillo Bridge, the Electric Building, which now houses the Aerospace Museum, is in at least as bad condition as the Food and Beverage Building was when the city condemned it and precipitated the reaction which resulted in the Committee of 100's formation.

The committee hopes to put through another bond issue in November for about \$3 million, and use these funds to undertake the same sort of program with the Electric Building as proved so successful with the Food and Beverage Building. They would like to see another, totally new structure outwardly identical to the old one in conception but with a large all-weather skylight-covered atrium in the center to open up the gloomy, overwhelming reaches of the former interior. Once again they would like to see all of the ornamental art of the original design retained but the basic structure that bears these sculptures refined and simplified around its original form.

If they should be successful in their efforts, and there is every reason to believe they will be, the two new structures face-to-face across El Prado and the new Plaza Balboa and planetarium under construction a few yards to the east will tie together into a unified visual whole and provide a stunning climax to the long flow of El Prado, the boulevard of one-broken and now-mending dreams.

January 20, 1972, San Diego Union. B-1. Landmarks Favored by Park and Recreation Board Yesterday; Saving Ford, Electric Buildings Urged in Proposal to City Council.

The vote on the issue was 7-2, with Richard Lustig and Dr. Louis Robinson voting against the recommendation to the City Council that the structures be left in the park.

January 30, 1972, San Diego Union, B-3:4. Norval Richardson, president of Reuben H. Fleet Space Theater and Hall of Science, spoke at Café del Rey Moro; fund raising has goal of \$750,000; \$100,000 raised.

February 4, 1972, San Diego Union, B-3:1-2. City Council yesterday authorized call for bids on construction of inner dome of Planetarium.

March 23, 1972, San Diego Union. B-3. Committee of 100 hopes to replace park's Electric Building, by Beverly Beyette.

Reconstruction of Balboa Park's Electric Building --- hopefully with some federal and state funds and with a November bond issue -- is the next project of the Committee of 100.

The committee, which now numbers 1,000 persons dedicated to the preservation of Spanish-Colonial architecture in Balboa Park, was the driving force behind reconstruction of the Food and Beverage Building, now called Casa del Prado.

Architect Richard George Wheeler, who designed Casa del Prado, has been working on preliminary sketches for a replacement for the Electric Building which he would like to see called Casa del Pacifico.

Wheeler is thinking in terms of a rectangular building, two stories, with a large glass-roofed patio, similar in concept to the famed Gallery of Victor Emmanuel in Milan, Italy.

On the ground floor might be shops and displays of the wares of all the nations that border on the Pacific Ocean and several restaurants. In a landscaped center courtyard there might be kiosks for dining.

The second floor, says Wheeler, might contain meeting rooms overlooking the glass-roofed patio. Wheeler says there would be room to park about 325 cars, some underground.

The building, says Wheeler, would contain about 60,000 square feet of usable space, whereas the present Electric Building has 52,000 square feet.

March 23, 1972, San Diego Union, B-14. EDITORIAL: Spirit of '76

The proposal by the Committee of 100 to replace the shoddy Electric Building in Balboa Park with a Casa del Pacifica to house exhibits from Latin America and nations on the Pacific littoral is an idea whose time should be here.

April 5, 1972, San Diego Union, B-1:3-4. Mrs. Jeanette G. Pratt donates \$50,000 to assist the Committee of 100 to duplicate ornament on Electric Building; ornament to be removed from building and duplicated in permanent form for new building,, which may be called "Casa del Pacifico."

April 23, 1972, San Diego Union, B-13:1. San Diego Downtown Association supports construction of a \$3.5 million educational and cultural center in Balboa Park, which may be called "Casa del Pacifico."

May 2, 1972, San Diego Union, B-1:2-4. Films by Roger Tilton on Hawaii and Apollo 16 liftoff to be shown at Reuben H. Fleet Space Theater.

June 2, 1972, San Diego Union, B-3:6-7. The San Diego Zoo's reserve account should be used to enhance and increase the overall public appeal of Balboa Park, according to Michael Babunikis, city's legislative analyst.

July 13, 1972, San Diego Union, B-5:1-3. A class from Morse High School yesterday took an inspection tour of the Electric Building as part of a project in their independent studies program; the students hope to make recommendations that will be incorporated in renovation plans for the historic building.

July 15, 1972, San Diego Union, B-2:1-2. John Mulligan to be in charge of developing audio-visual program for Reuben H. Fleet Space Theater.

July 16, 1972, San Diego Union, B-1. Confrontation recalled; changes bring welcome clam to Southeast Park, by Michael Grant.

July 21, 1972, San Diego Union, B-1:2-3. A \$5 million bond issue for the renovation of the Electric Building is one step away from the November ballot; the City Council yesterday agreed to docket the item for consideration at its August 10 session but, at the same time, councilmen expressed doubt as to its appropriateness.

July 22, 1972, San Diego Union, B-1:4. The proposal to place a \$5-million bond issue on the November ballot to rebuild the Electric Building has run into strong opposition; Mrs. Bea Evenson, president of the Committee of 100, is spearheading the drive; she is opposed by Mayor Wilson, a majority of the City Council, the Parks and Recreation Board and the Inter-Museum Council; they oppose placing this single issue before the voters in November.

July 28, 1972, San Diego Union, B-3:1-3. Several organizations which are backing efforts to renovate the Electric Building have reached an accord on details of the proposed budget it was announced yesterday; the Klee Wyk Society, San Diego Historical Society, Historic Sites Board and Committee of 100.

August 11, 1972, San Diego Union, B-1:8. A bond issue is headed for the November ballot; the Council supplied the 6 votes necessary to adopt a resolution of necessity and convenience for a \$2.2 million proposal for the renovation of the Electric Building and a \$1.6 million proposal for the renovation of the Ford Building; adoption of the resolution is required before the city can officially place the issues on the ballot.

August 23, 1972, San Diego Union, B-1:3. City ballot propositions were officially placed on the November ballot by the City Council.

August 31, 1972, San Diego Union. Balboa Park Electric Building bonds stirs sharp controversy.

The Electric Building at Balboa Park should not be rebuilt but instead should be destroyed as it was originally intended to be, Philip L. Gildred, president of the San Diego Fine Arts Society, said yesterday.

September 1, 1972, San Diego Union, B-1:2. Family of Major Reuben H. Fleet gave \$400,000 for exhibits in Hall of Science.

September 6, 1972, (San Diego) Evening Tribune, B-4. The Inter-museum Council supports Propositions B and C on the November 7 ballot, architect Robert D. Ferris said yesterday at a conference in the Electric Building, Balboa Park.

Date ?, Source ?. Proposition C seeks city bond issue for \$1.67 million to refurbish the Ford Building as the new home of the Aerospace Museum.

September 23, 1972, San Diego Union. Letter, Elizabeth Eager: ". . . our world-famous Spanish baroque complex in Balboa Park . . . Our dedicated Committee of 100 has worked . . . to save our cultural-centered Balboa Park buildings. A monumental result is the handsome, authentic Casa del Prado.

October 3, 1972, San Diego Union. Letter, Elizabeth Davidson: "Several times I have driven to town with my friends and they always wish to see our beautiful Balboa Park. I have never once asked them to see the high-rise along the waterfront."

October 6, 1972, San Diego Union. Letter, Hamilton Marston: "Hopefully . . . we will not make major commitments of a piecemeal nature and questionable priority like the current proposals to replace the Electric Building or replaced the Ford Building."

October 8, 1972, San Diego Union, D-2:3-4. Women's groups associated with four San Diego museums will jointly sponsor a dedication party for Balboa Park's new completed Plaza de Balboa from 5 to 8 p.m., October 20; sponsoring groups are the Covey of the San Diego Natural History Museum, the women's committees of the Fine Arts Gallery and the Serra Museum and the Museum of Man's Klee Wyk Society.

October 8, 1972, San Diego Union, AA-7:5-7. Plaza de Balboa, the newest addition to Balboa Park, will be dedicated in a ceremony October 20; the illuminated 60-foot fountain at the center of the plaza will be officially turned on by Mayor Wilson and water development pioneer Fred Heilbron during the ceremony at 5 p.m.; A cocktail buffet supper to celebrate the dedication is being planned the same evening by leaders of the Natural History Museum, the Fine Arts Gallery, Serra Museum and Museum of Man; Mrs. Carlton Sell and Mrs. Dwight Warner are co-chairman for the party.

October 9, 1972, San Diego Union. Letter, Robert L. Wallace, Professor of Art History, San Diego State: "El Prado will be one of the finest educational complexes in the nation."

October 10, 1972, San Diego Union, B-1:2-6. Planetarium Spectacular: 70-millimeter IMAX projector under construction for Reuben H. Fleet Space Theater.

An audiovisual spectacular that will make Hollywood's silver screen seem like home movies is coming to town.

The world's most sophisticated motion picture system will be installed in the new Reuben H. Fleet Space Theater and Science Center, nearing completion in Balboa Park. It will open next March.

The heart of the system is a specially-designed, 70-millimeter IMAX Projector, now under construction in Gault, Ontario, at the laboratory of Multi-screen, Inc.

The projector will have a 180-degree fish-eye lens as do the cameras that have been at work for months filming everything from Apollo blastoffs to Hawaiian dance festivals for the planetarium.

"The image from this unusual projector will cover some 80 percent of the dome surface," explained planetarium executive director Michael Sullivan.

A single frame of the color film being made for unique San Diego productions has a picture image measuring 2 by 2 and $\frac{3}{4}$ inches.

"This is the largest film format ever shot," Sullivan said. "As a result the picture quality on the dome is going to be just spectacular."

The film actually dwarfs anything ever projected in any conventional movie theater, including shows like Cinerama and Panavision.

This will give planetarium visitors an eye-popping, three-dimensional, wrap-around experience. The picture from the projector will extend to the limit of the viewer's peripheral vision – side-to-side, down, in back of his head.

"You can imagine what this is going to be like for viewers when we project such scenes such as one shot for us from a B-25 winging through the Grand Canyon," Sullivan said.

"I think a lot of people are going to grab their seats, it will be so realistic."

Sullivan said the planetarium will pay \$235,000 for the unique projector. Announcement of plans to acquire it, he explained, was withheld until negotiations on the contract were complete.

The size of the projector, not including film storage and delivery units, will be 67 inches high, 68 inches wide and nine feet long. The projector will weight 3,000 pounds. The film will be spooled on reels 42 inches in diameter.

The film will run horizontally through the machine at a rate of six feet (24 frames) a second. This is three times more footage than used by Cinerama-type projectors.

A 15,000-watt xenon arc lamp in the illumination system generates so much heat that the projector will be cooled by water flowing at a rate of 10 gallons a minute.

Sullivan said there is one other IMAX projector in operation today. That machine is featured in the Cinesphere at Ontario Place, an entertainment center in Toronto.

The Toronto projector produces a picture on a curved screen which is very wide by cinema standards but not nearly so expansive as the San Diego picture will be.

"This is the first time the IMAX has been adapted with a fish-eye lens that will put a good sharp image on a true dome," Sullivan explained.

In addition to the IMAX, the planetarium also will have standard 70-millimeter projectors of Cinerama type in addition to the 10,000-star Spitz planetarium projector being built for the space theater.

All these projection machines will be employed in a typical show at the park facility. At certain times, they will run simultaneously, coordinated by computer.

The films of earthy scenic wonders are being integrated into the planetarium shows very purposefully to make visiting the center a rewarding, memorable experience.

There also will be highly realistic space travel simulations in the shows.

"One of these we are making now is called 'Voyage to Outer Planets,'" Sullivan described. "In one scene, I think is particularly good, we land on a moon of Jupiter. After landing, we see Jupiter come around and eclipse the sun. The atmosphere kind of freezes out . . . It's really beautiful"

Sullivan said some of the scenes being made are reminiscent of some of those in the cinema "2001."

There also will be plenty of the traditional planetarium show, in an improved way. Education and scientific authenticity will be prime goals of the planetarium, Sullivan assured.

But, innovations have been added to get the planetarium off the ground, into space, to simulate orbits about the earth, moon and planets and to reproduce the roll, pitch and yaw of space craft.

Add a dash of entertainment and you have the billing for next March in the park.

Sullivan has no illusions about other institutions standing still with the old-fashioned planetarium show. He believes other space theaters as good as San Diego's eventually will follow.

Sullivan, however, is equally certain that when it opens the planetarium here will be No. 1 in the world.

"It is not only a new generation of planetaria," he said, "it is a beginning of a new medium."

October 11, 1972, San Diego Union, A-3:1-5; B-1:4-5. Walk-through of \$4.5 million Hall of Science and Space Theater, by Cliff Smith.

Balboa Park's Reuben H. Fleet Space Theater is being constructed something like a fine Swiss watch --- the hard way.

The theater building, comparing with the artfully-styled gold watch case, is finished, and it is beautiful.

But inside the theater still is virtually a shell.

Installation of the works to make the theater tick --- a works far more complex than any watch movement --- is just beginning.

The charge of the workers is to construct the best audiovisual system in the world. The goal is to project the theatergoer into space and through time, to move him freely throughout the solar system and plunge him into spectacular earthly scenes, all with the most realistic degree of simulation ever achieved.

Yesterday area newsmen got a glimpse of the work going on in the theater and a detailed briefing of how the system will work during a preview "walk-through" of the \$4.5 million facility.

There is an interesting story in almost every part of the theater-equipping process.

Right now workers are erecting a hemispherical projection dome, 76 feet in diameter, inside the theater. The dome will be unique in several ways.

For one thing, explained theater director Michael Sullivan, the theater will be the first planetarium without walls and have a "sky" extending all the way to the floor.

"In the typical planetarium the viewer has the feeling of being in a dark well looking up," Sullivan said.

He said that the worst part of this typical situation is that, no matter what image is projected onto the dome, the viewer remains fixed to earth. This is because of the dark surrounding walls that serve as ever-present visual reference.

In the new theater, viewers no longer will be grounded because there will be no walls in view.

To achieve this, both the dome and the theater seating floor had to be designed with a 25-degree downward tilt. Thus, the theater seating arrangement is like a steeply tiered amphitheater inside a ball that extends down under the front row, overhead behind the last row, and down to the floor on both sides.

The material had to serve as a brilliant projection surface, like the movie screen, suitable for several types of projection equipment. There will be a star projector, a planet projector, at least two Cinerama-type motion picture projectors, a 70 millimeter IMAX projector with a lens that will cover 80 percent of the dome with a movie and special zoom projectors with a 1 to 22 image size variability.

The dome surface also had to be acoustically transparent. The theater will have a three-dimensional "moving sound" system to go with the 3-D visual imagery. Seventeen big speakers will be scattered behind the projection dome. More speakers will go under the theater seats.

There also was air conditioning to worry about. Massive penetrations of the dome for air ducts was out of the question.

To satisfy all these requirements the cone surface will be constructed of a "scrim" material which is simply sheet metal with small, even-spaced holes drilled through 22 percent of the material surface.

museums.

Letter, Spencer L. Rogers, explaining purpose of shift in

October 13, 1972, San Diego Union.
shifted.

Letter, E. Miles Harvey, explaining why museums are to be

October 17, 1972, San Diego Union. Letter, Ferdinand F. Fletcher: "Six times "special interests" have tried to destroy the beautiful Spanish-Colonial architecture in Balboa Park and the adopted Bartholomew Plan. Six times the people of San Diego have said 'No, this is our park and these are our buildings which we love.' The issue of Proposition B is clear. The Electric Building must be replaced. Do you want to replace it with a landscaped parking lot, or do you want to replace it with a beautiful, useful building, displaying museum treasures which heretofore we have never had the room to display?

October 20, 1972, San Diego Union, B-4:5 and October 21, 1972, D-1:3. The new Plaza de Balboa and fountain --- in front of the Natural History Museum in Balboa Park --- will be dedicated from 5 to 8 tonight; the fountain will be started by Fred A. Heilbron, longtime chairman of the San Diego County Authority, and representative of Mayor Wilson; the fountain highlights the 120,000 square foot plaza; flower beds, trees and russet inlaid tiles dot the plaza.

October 20, 1972, San Diego Union, B-19:5-7. Representatives of the San Diego Civic Arts for Youth will entertain at the dedication of the new Golden Fountain in Balboa Park's Plaza de Balboa this evening; Mayor Wilson will be the featured speaker for the dedication beginning at 5 p.m. today; the Women's Committee of the San Diego Natural History Museum is sponsoring the ceremony.

October 23, 1972, San Diego Union. Letter, Richard Amero . . . Park Rebuilding Plan Draws Fire.

Editor: Balboa Park is overcrowded with buildings.

To rebuild the Electric Building is contrary to the advice of the original architect Bertram Goodhue. The Museum of Natural History and the Aerospace Museum has found this building inadequate.

What miracle of architectural drawing can reconvert what originally was a town hall in Majorca into a modern museum when its floor plan, windows and arcade were meant for something else? The same argument also applied to the California Building, for its rotunda is awkward for the uses of the Museum of Man. It will be equally awkward for the Serra Museum.

As for the Ford Building, there is already a sufficient body of evidence detailing its inadequacies and incongruity.

October 26, 1972, San Diego Union. Letter, William C. Knotts: "Let's get behind and preserve the cultural heritage we have on hand."

October 26, 1972, San Diego Union. Letter, Mrs. Victoria Devinne: "Unless Mr. Richard Amero is in communication with the spirit world, it is hard to see how he is so sure of the opinions of the long-deceased Bertram Goodhue, who designed our universally-admired Prado in Balboa Park. It is sad when a man is not longer around to defend his work, especially when the criticism comes from a few nit-picking modern architects who were trained in the building block school and have no sense of history."

October 31, 1972, San Diego Union. Letter, Harry R. Hughes: "The important improvements which have been made in the park have been brought about by individual citizens and the taxpayers who supported them."

November, 1972, San Diego Magazine. Publisher's Point, by Edwin Self --- Restoring the Boulevard of Broken Dreams.

On the issue of whether to faithfully rebuild the baroque dream palace now called the Electric Building in permanent form along Balboa Park's El Prado (Proposition B), people seem either to instinctively dig the romantic beauty and Spanish splendor of these buildings or they do not.

Happily, whenever the people of San Diego have been consulted the majority has voted to preserve and to restore Architect Bertram Goodhue's magnificent conception of a Spanish-Colonial city-within-a-city created for the 1915 Exposition.

Oddly, it has most often been City Hall and other "practical" leaders through the years who have seemed blind to El Prado's haunting architectural symmetry and to the deep psychological and emotional needs for beauty and harmony these exquisite old structures have filled for San Diegans for half a century.

November, 1972, San Diego Magazine. The Love for El Prado, by Bea Evenson, co-chairman, Committee for Yes of Proposition B.

Six attempts have been made in the past to destroy the 1915 Exposition buildings in the El Prado area of Balboa Park, but each time the people have risen up to defend them. Without El Prado, there would be no Balboa Park.

There was a similar outcry when the old Food and Beverage Building was condemned and the proposition to replace it was put on the ballot in 1968. The people again spoke to defend their park and passed the bonds by 72 percent.

November, 1972. Pamphlet: VOTE 'YES' ON PROPOSITION "B" --- SAVE YOUR PARK.

November, 1972 - May, 1973. San Diego Junior Theater . . . an activity of the San Diego Recreation Department.

PURPOSE: To provide the young people of San Diego with the widest and most meaningful theatrical experience possible. These experiences shall be derived from a balanced offering of:

1. Major productions whose specific aim is to instill an abiding appreciation of live theater, which will continue to enrich youthful lives into maturity thereby contributing to the cultural heritage of the community.
2. A workshop curriculum incorporating classes, a specific goal of which is to provide practice in the skills of theater for those young people who desire active rather than vicarious participation.

DRAMA WORKSHOP: San Diego Junior Theater's vigorous year-round program features workshops in creative dramatics, formal dramatics, voice and diction, choral speaking, pantomime, body movement, and stagecraft. These classes are open to young people ages 8 to 18. The semester fee of \$20.00 is payable in September, February and June. All classes are held in the Casa del Prado in Balboa Park. During the school year, classes meet on Tuesday afternoons, Thursday afternoons, and in two sessions on Saturdays. The classes, which are divided into age groupings, meet once a week for two hours.

PRODUCTION SCHEDULE FOR 1972-1973:

RUMPLESTILTSKIN	November 10, 11, 12 - 17, 18, 19
SNOW WHITE	February 2, 3, 4 - 9, 10, 11, 12
CINDERELLA	March 16, 17, 18 - 23, 24, 25
BYE BYE, BIRDIE	May 11, 12, 13 - 18, 19, 20

November 1, 1972, (San Diego) Evening Tribune, A27. Proposition B leads propositions in financial support.

Date ?, Source ?. The man who served as the attorney for the 1935-36 exposition --- Walter Ames --- said yesterday proponents of city Proposition B have misrepresented the \$5 million bond issue as a matter of saving the park.

November 2, 1972, San Diego Union. Letter, Frederick L. Ryan, Professor Emeritus, San Diego State: "We should make the best use of the valuable resources that have been handed down to use, particularly in the choice we must make about the Electric Building. Here is a valuable resource that can be rebuilt to house another valuable resource, the Museum of Man."

November 5, 1972, San Diego Independent. Balboa Park to celebrate 104th birthday this afternoon at 2 at the new Plaza de Balboa in front of the fountain.

November 6, 1972, San Diego Union, B-3:3. Birthday party at new Plaza de Balboa sponsored by Committee of 100.

November 7, 1972, ELECTION: Proposition B --- replace Electric Building (\$5 million)

YES	132,615 (45%)
NO	161,292 (55%)

Proposition C --- rehabilitate Ford Building for Aerospace Museum

YES	160,785 (55.3%)
NO	129,729 (44.6%)

November 9, 1972, San Diego Union, B-7. Balboa Park buildings backers determined.

San Diego city voters said no to two bond issue propositions for remodeling two Balboa Park buildings on Tuesday's ballot.

With final returns counted, Proposition B, a \$5 million bond issue to rebuild the Electric Building and preserve its ornate Spanish-Colonial facade, received 131,179 votes, or 45.1 percent in favor, and 150,721 votes, or 54.8 percent against.

Proposition C, a \$1,670,000 bond issue for updating the park's Ford Building as the future home of the Aerospace Museum, received 160,785 yes votes, or 55.3 percent, and 129,729 no votes, or 44.6 percent.

"The voters may have been confused by this moving of museums," said Mrs. Bea Evenson, chairman of the Committee of 100, which backed the plans to restore the Electric Building.

"We don't intend to give up at all," she said. "We feel that there was something in the measure the voters didn't like and we intend to research to find out what it was."

The vote she said, "wasn't a refutation of Balboa Park or the building. But the ballot was too crowded, and that may have been a factor."

Colonel Owen Clarke, USAF, retired, director of the Aerospace Museum, said he was very disappointed. "We have no immediate plans except that we will remain in an unsafe, inadequate building."

The museum board of directors "will try to formulate some type of plan to safeguard the priceless collection of aircraft, books and library," Clarke said. That plan might be seeking help from foundations supporting educational and cultural institutions.

James Milch, chairman of the Park and Recreation Board, who had advised the City Council against placing both bond issues on the ballot, said Tuesday's vote indicated "people are interested in parks that are more germane to everyone's interest.

"They are interested in parks for greenery, for trees, for playing fields and recreation centers and not to special interest concepts."

Milch had said putting the issues on Tuesday's ballot was ill-advised because the city was developing an overall priority list for all park and recreation needs to be placed before the voters in a bond measure on the 1973 ballot.

Philip L. Gildred, president of the Fine Arts Society of San Diego and co-author of a ballot argument against Proposition B, said its defeat showed the voters are more concerned with parks and open spaces rather than congesting any area.

Major General Lowell English, USMC, retired, director of the Museum of Man, said he was "naturally disappointed on the defeat of Proposition B. We will just have to find some other solution to our problems of space."

November 9, 1972, San Diego Union, B-7. Toa, Kiwi bird, given to San Diego by the New Zealand government as part of the city's 200th anniversary celebration, died Tuesday at San Diego Zoo; had been under treatment for an infection for several weeks.

November 11, 1972, San Diego Union. EDITORIAL: Balboa Park Vacuum

Defeat of Proposition B last Tuesday is a disappointment to those who hoped to see the old Electric Building in Balboa Park razed and rebuilt. Failure of Proposition C to muster a two-thirds majority also shelve a plan to refurbish the Ford Building as a new home for the San Diego Aerospace Museum.

We are reluctant to conclude that either of these votes reflects a lack of concern by San Diegans for the future of Balboa Park. It might be more accurate to judge that the two bond proposals failed because San Diegans are very much concerned about the future of the park, whether these projects fit properly into long-range plans for development of the park and, if they do, whether the scale of priorities justifies undertaking them at this time.

In 1961 the city council adopted a master plan drawn up by the consulting firm of Bartholomew and Associates to guide development of Balboa Park over a fifteen-year period. The Bartholomew plans has been followed in some park developments, but ignored in others.

Tuesday's election could serve as a mandate to city officials to review the Bartholomew plan and adjust it where necessary to accommodate new thinking about the future of the park.

If San Diego knows exactly where it wants to go with Balboa Park, which institutions should be there, and the facilities they will require, it will be easier to place proposed projects in perspective in the city's capital improvement program. The existence of a viable plan for the park, and a commitment to follow it, should make voters more inclined to support any projects that require financing with bond issues.

November 12, 1972, San Diego Union, 23:1-5. Casa del Prado fete planned, by Marie Stanton (illus.).

One year ago the smell of fresh paint was still fresh. The landscaping had a newly planted look. And the rooms were quiet except for an occasional hammering of a workman.

But that was before November 14, 1971, the day the big black wrought-iron gates and massive wood doors of Casa del Prado swung open to the public. Today, the fresh paint has a somewhat

worn patina, the landscaping is luxuriant and the rooms are filled with noises, the noises of children and adults doing active things, such as rehearsing a play or a new ballet or conducting a demonstration of bare root planting.

In fact, thousands of San Diegans over the past year have used the building. A survey for five months of the building's operation (conducted from April through August) showed more than 82,000 persons used the building. That's about 16,500 persons a month and a considerable increase for the building which replaced the old Food and Beverage Building where, in its last stages, young aspiring ballerinas danced around buckets on rainy days when the roof leaked.

The transformation from a condemned building which had limited use to a multi-purpose structure to fill the needs of contemporary San Diegans of all ages was a story of civic pride for thousands of San Diegans including the Committee of 100, the Botanical Garden Foundation and numerous arts and recreation groups which worked for the passage of a bond issue to finance the construction.

That is history now. And on the weekend the Casa del Prado will celebrate its first birthday, Saturday and next Sunday, the anniversary will be marked by an open house in the building with attention centering on the Garden Center rooms of the first floor.

The open house will be from 1 to 5 p.m. on Saturday and from 11 a.m. to 5 p.m. on next Sunday. Sponsoring the event will be the San Diego Botanical Garden Foundation, Inc. and its 43 affiliated groups with the cooperation of representatives of the other recreational organizations using the building.

"In observing the first anniversary of the building, the foundation and affiliated groups will be expressing their gratitude to the voters for providing the recreational and cultural headquarters in their passage of the bond issue to replace the old Food and Beverage Building," explained John Farleigh, open house chairman.

The open house is planned to show off the rooms used by the gardening and other groups to launch the Botanical Foundation Memorial Library, according to Mrs. William E. Betts, Jr., Botanical Library chairman and Foundation social chairman.

The open house will include a public display of the Botanical Memorial Library in Room 104 where new custom-made bookcases and the first donation of books, paintings and other items will be shown. Wood paneling has been installed in the library by foundation volunteers to complement the bookcases. The library committee will accept donations of books and other items during the open house.

The library is intended to provide the San Diego area with a central library covering all botanical, flora, horticultural and related subjects, Mrs. Betts said. The idea for a comprehensive botanical library has long been a dream of local horticulturists, dating back to when the garden center was proposed on the site of the Casa del Prado. "It is our hope that local botanical minded persons will give, loan or bequeath to use their collections of books and related materials for use by all San Diegans interested in horticulture," Mrs. Betts said.

In addition to remaining open during the open house hours, the library will be the location for a brief 3 p.m. ceremony next Sunday when three outstanding friends of San Diego home gardeners and floriculture groups will be honored, Mrs. Betts said. Their identity will be kept secret until the special ceremonies, she said. Refreshments will be served in the library before and after the ceremonies.

Other special events of the weekend will be the San Diego-Imperial Counties Iris Society fall show in Room 101 during open house hours. Iris blooms will compete for prizes as will flower arrangements.

Other garden center rooms on the first floor of the Casa del Prado will have artistic displays, demonstrations and educational exhibits reflecting their various interests and showing their activities. These will be open during both open house days.

Open house visitors on Saturday are invited to drop in on youth classes in the building, according to Mrs. Donn DeMarce, president of San Diego Civic Arts for Youth. Ballet, theater, orchestral and vocal groups will be studying and practicing at regular scheduled Saturday classes on both the first and second floors, Mrs. DeMarce said.

On Sunday from 2 to 3 p.m. a special program will be presented by youth groups which made Casa del Prado their home. The program is scheduled for presentation in the south patio unless inclement weather forces it inside to Room 101.

For the program the San Diego Civic Youth Ballet will give a preview of a new Christmas ballet it will present in December, Mrs. DeMarce said. The San Diego Junior Theater will present an excerpt from one of its four plays of the season. The San Diego Youth Chorale will sing selections from its repertoire and instrumentalists from the San Diego Youth Symphony also will perform.

During the past 12 months since the completion of the building, the San Diego Botanical Garden Foundation has been working to supply the Garden Center rooms on the first floor with equipment and facilities not provided by the city. These include a large projection screen, a large ceremonial flag, kitchen supplies and equipment and props for displays and exhibits.

The foundation also has obtained and installed with city help more than 100 storage lockers for use by affiliated groups and is currently cooperating with the city to build additional storage facilities for bulky display materials used by all of the groups for their public exhibits.

The six-year foundation organized by the San Diego Floral Association is headed by president Stanley W. Miller. Other officers include Larry Sisk, first vice president; Mrs. Joseph J. Kenneally, second vice president; Harry Haelsig, treasurer; and Mrs. Walter E. Bunker, secretary.

The foundation recently reported that during the first nine months of this year there were 330 garden group meetings in the building. This is just more than 35 meets per month, or just over one a day. And in its five-month survey, the city found the building had been used 1,563 times or 313 times per month by all groups.

Garden groups which meet in the building have a total membership of about 1,500 and youth groups using the building have up to 2,000 youngsters participating. In addition more than 10 other city-sponsored groups use the building, including Senior Citizens, round dancers, playground dance, square dancers, Highland dancers, folk dancers and the Congress of History.

i. Facilities Committee

5. Balboa Park - Gold Gulch Area - General Plan

David Roberts displayed and explained a proposed General Development Plan for the Gold Gulch area, which is the major under-developed area in central Balboa Park and calls for an area for active and semi-active group activities, a Japanese Garden,

Australian Garden and Shade Garden. The steep grade in the south end of the canyon would be modified by importing fill to provide a usable slope. Large groves of Australian trees will be planted in this area. The fill would also permit the completion of the formal avenue tree planting on the northeasterly side of President's Way, improving the appearance of a major entrance to the Park. The south entrance of the Organ Parking lot will be relocated and an adjacent small semi-developed parking lot will be landscaped. Grassy meadows will be developed in the group activities area which will also contain a meeting circle and an area which can be used for group picnics or handicraft activities. The Zoro Garden area will be developed into a Shade Garden, planted with ferns, begonias, fuchsias, etc. Interesting water features will be included in the Shade Garden and the area between the House of Hospitality and the Electric Building. Mr. Roberts said the only real modification would be the filling of the area at the southern point at President's Way.

Mr. Yamada moved that the General Development Plan be approved in concept, subject to landscape plans, the motion was seconded and carried unanimously with one abstention (Leyton).

November 23, 1972, San Diego Union. Letter, John Kuzma, Sub-Dean, San Diego Chapter American Guild of Organists, does not want new road near Spreckels Organ.

November 23, 1972, San Diego Union. Letter, Edward S. Barr, objects to new road near Spreckels Organ: The Organ Pavilion is the only park building with a musical voice, designed to beautify and enrich our environment. Why further suffocate her with car noise?

November 25, 1972, San Diego Union. The proposed \$1 million expansion of Balboa Park's Fine Arts Gallery is not subject to a vote, City Attorney John Witt said yesterday.

"I presume the museum expansion is for park purposes," said Witt. "It is common around the country for city parks to have galleries in them."

"You don't have to have a vote of the people to build a street through the park," Witt added. "Quite contrary, I draw the conclusion that if the building is for park purposes, you could clearly build it."

Witt's response was to questioning from Larry Sisk, an interested citizen who contended the city charter requires a two-thirds vote on any park land used for building.

"The Fine Arts Gallery proposal for a new building would remove a large portion of land at the eastern end of the present gallery from park purposes," said Sisk. "Every effort must be exerted to enlarge the park's open space when possible."

Deputy City Manager John Lockwood said the park land is not being conveyed to the gallery. "We are permitting a structure in the city park which they'll turn over to us," he said. "We get the building in return for maintenance."

November 27, 1972, San Diego Union, 10:1. William Cox appointed director of public relations for Reuben H. Fleet Space Theater.

December 6, 1972, (San Diego) Evening Tribune, C-1. Space theater dome finished with ceremony (illus.).

The last of 900 panels which form the geodetic dome of the Reuben H. Fleet Space Theater in Balboa Park was slipped into place yesterday.

Three times to be exact, as cameras clicked.

It was the symbolic finishing of the dome which forms the projection screen for the theater.

Members of the planetarium board gathered in the unfinished structure --- which will be open to the public in the spring --- to watch the final plastic triangle taped into position by Capt. Norval R. Richardson, H. Louis Bodmer and Joseph Hojnicke, technical representative of the Spitz Corp., which built the dome and is building the two-ton star ball projector.

Richardson, president of the board of the Hall of Science, which forms the other half of the structure at the east end of the Prado, said the dome is the best in the country and is unique in that it tilts at a 45-degree angle.

This permits the audience seated on the carpeted tiers of seats to look straight ahead at the hemisphere, rather than looking up as in most theaters.

Bodmer, who has been associated with the project since its earliest plans in 1957, said all of San Diego and the state will benefit from the space programs to be presented there.

The giant, complex star ball, capable of projecting a view of the night sky of an part of the earth at any time of the year, is due to arrive in mid-January, Michael Sullivan, executive director said.

It will be shipped in two air-conditioned vans and will be insured for \$1 million.

Yesterday as the 25 men connected with the building praised the progress, workmen were laying carpeting in the entry hall. In the space theater, the walls, floor tiers and stairs will be carpeted for extra sound insulation.

Sheldon Campbell, president of the planetarium board, said one of the remarkable things about the building is that the bid contract price of \$1.8 million is less than was projected. That figure does not include the star ball and other projectors as well as the computers which program them. George Hatch was architect for the building.

December 6, 1972, San Diego Union, B-3:4. Newly constructed dome inside Reuben H. Fleet Space Theater.

Busy executives took time out here yesterday to make like tourists in the Vatican's Sistine Chapel.

Instead of Michelangelo's paintings, the executives craned their necks to marvel over a completely blank ceiling.

The focus of interest was a newly completed dome inside the Reuben H. Fleet Space Theater in Balboa Park.

The admirers, mostly officers of the non-profit theater and its adjoining Science Center, gathered mainly for a ceremonious installation of the last dome panel.

Photographers of several varieties were present to record the event for posterity.

Board chairman Dr. Bernard Gross proclaimed the dome "the first of its kind in the world and the finest of any kind."

Another board member calculated that the white hemisphere encompassed about 8,500 square feet. He ventured that the 22-percent-perforated-dome paneling, called "skrim," was pierced with nearly 100 million holes.

Most of those who came stayed for the better half of an hour. They watched the dome from different viewpoints on the floor. They exchanged assurances that all was right. The house lights were dimmed and raised in all possible combinations for the inspection.

A casual observer might be justifiably perplexed over how a bare ceiling could command such attention.

One reason is that the dome is tilted down 25 degrees. No planetarium has ever done this before and it will dramatically improve the show.

Another reason is that the dome is big, 76 feet in diameter, the largest in the Western Hemisphere and the third largest in the world.

Most important, however, is that the dome is a high-precision engineering marvel of precise curvatures forming a projection surface for the most complex "movies" ever attempted.

As such, the dome is the first critical element of production hardware, installed in the theater. Other key elements, like super-wide angle projectors, unique star and planet projectors and a big computer, are still to come.

Next March the theater will open and people will be able to take the most realistic simulated space trips ever offered.

"I have put in several planetarium domes," noted Joe Hojnicke, a supervising engineer for Spitz Laboratories, Inc. of Chaddsford, Pa. "But this is the finest and biggest I have ever had the pleasure of installing."

"It is the largest Spitz has ever constructed and installed. Almost everything about this project is unique.

"This will be the first space flight simulator in the world capable of putting the viewer out into deep space. There are one or two facilities that can get you out as far as the moon but no farther."

Date ?, Source? City Council to study Balboa Park road closure.

Two basis plans for closing the Prado are of Balboa Park to auto traffic will be presented to the City Council at a conference tomorrow.

The options are the result of a study made after the City Council agreed at a November 22 meeting to close the Prado area to through traffic on an experimental basis.

Deputy City Manager John Lockwood said he would recommend to the council that the one-month experimental closing be scheduled for February.

Access to parking lots in the central Prado area is the major difference in the two plans. One would allow autos into those lots including the Plaza de Panama from the east; the other would close the central area to autos entirely.

The latter plan, Lockwood said would almost certainly require setting up an intra-park transportation system to carry park goers from distant lots to the central area.

Both plans would close Laurel Street westward across the Cabrillo Bridge, blocking western access to El Prado except by foot or bicycle.

Lockwood said the February closing date would be recommended to give activities in El Prado time to advise their patrons of the change in traffic and parking procedure.

Date ?, Source ?

Laurel Street Closing Planned in Park.

The Laurel Street extension will be closed to traffic on an experimental basis for one month early next year, the City Council decided yesterday.

The Council directed City Manager Kimball Moore to prepare reports on the closing of the street and on transportation systems within the park after citizens' objections were heard on proposals for a new road in the park.

The one-month experiment, expected in January, would allow bikes and pedestrians on the street.

The action came after a council conference session to discuss a city Parks and Recreation Department report calling for a two-lane overpass crossing the Cabrillo Freeway at Upas Street, an extension road off Cabrillo Bridge south around El Prado into President's Way in front of the Organ Pavilion, and the closing of Laurel Street to all traffic going through the park.

The report also called for additional parking in the Morley Field area.

Heinz Wolf and his son Charles of 1529 Upas Street, opposed the development which would "cut up the park, damage shrubs, create air pollution and further shake the foundations of the buildings in the area."

"It seems wrong to continue letting people drive their cars straight through the park with no intention of stopping to enjoy it," Heinz Wolf said.

Councilman Jim Bates said the park is for the people.

"Stop accommodating the auto. Let's close El Prado on a trial basis," he said.

Bates then made a motion to close the street for six months.

Councilwoman Maureen O'Connor said she was concerned with possible traffic congestion in the area if the streets were closed.

Councilman Gil Johnson said he was in favor of the street closing on an experimental basis as long as there were adequate signs showing persons how to get to other parking facilities.

Assistant City Manager John Lockwood suggested the council not close the street until after the Christmas season. The councilmen unanimously agreed to close the street after the January conference.

December 13, 1972, San Diego Union. City Council to study park traffic plans; implementation of experiment to close Laurel Street entrance on agenda (map showing options of trial closing of central Balboa Park to autos).

The city today will take its second tentative step into exploring the ways and byways of the Balboa Park of the future.

The City Council already has agreed to close Laurel Street (El Prado), the main traffic artery through the park, for one month on an experimental basis.

Today it will consider various plans on implementation of the experiment. The desired result is a plan to turn Balboa Park back into what is called a "people park: while at the same time avoiding the requirement of taking a long hike just to get there.

Accessibility is a key question. It also is the primary difference between the two basis plans to be laid before the council today, according to city officials.

Both plans would block Laurel Street to the west of the Cabrillo Bridge. One plan would allow autos to enter the centrally located Plaza de Panama parking lot from Park Drive and President's Way.

The other plan would shut off the central Prado area completely, forcing park goers to use parking lots considerably farther away.

The second plan almost certainly would require installation of an intra-park transportation system, Deputy City Manager John Lockwood said.

In its 1972 Balboa Park Traffic and Parking Report, the Parks and Recreation Department recommended that such a system be implemented in the future and that the eastern end of El Prado be closed to autos.

However, setting up such a system for only one month would be expensive, Lockwood said.

Whatever implementation, the council chooses, Lockwood said he would recommend the experiment be conducted during February, which would allow park activities ample time to advise their patrons of the temporary changes in traffic procedure.

December 13, 1972, San Diego Union, B-1:3. The new \$3 million dollar planetarium scheduled to open early next year is facing a higher operating deficit than anticipated. City asked to boost its one-only subsidy from \$103,000 to \$203,000. City Council must approve request.

December 13, 1972, San Diego Union, B-4:3. National Endowment for the Arts awarded \$5,500 federal grant to Hall of Science for displays.

December 14, 1972, San Diego Union, A-37. The Globe Theater has been encouraged to begin plans for a third theater by the Balboa Park Committee of the San Diego Park and Recreation Board.

A proposal to build an 800-seat theater adjacent to the Globe's present plant in Balboa Park was presented to the committee Monday by Lowell Davies, Globe president, and the committee voted five to three with two abstentions, for a motion to encourage the project.

The Globe proposal, which has been discussed for several years, would call for the new house to be built in the small canyon just east of the Globe's Cassius Carter Center Stage.

December 14, 1972, San Diego Union. A Navajo loom, made as the Indians made them with found objects, was manipulated in traditional Navajo techniques by C. Norman Nicks at a meeting of San Diego Creative Weavers Guild at the War Memorial Building, Balboa Park, yesterday (illus.).

December 14, 1972, San Diego Union. Letter, Mary Jessop, proposing park bicycle, jog tracks.

The City Council will close Cabrillo Bridge and El Prado in Balboa Park to cars experimentally in February rather than build another road and three bridges in the developed west side of the park.

The money saved might be used to provide a shuttle bus for people not wanting nor able to walk, run or bicycle from parking areas. There are plenty of parking places and accesses to them from Park Boulevard.

Congestion on weekends and holidays occurs because bicycles, pedestrians and joggers increase, not because more cars use El Prado them.

The undeveloped area east of Park Boulevard includes facilities for outdoor recreation and space for more when funds become available. A track for marathon running and bicycle racing are properly used for Balboa Park. More roads for cars are not.

December 14, 1972, San Diego Union. Letter, R. Affleback, opposing Laurel Street closing.

Editor: Regarding the City Council's actions to close Laurel Street to automobile traffic. *The Union* reported the action after the council heard "citizen's objections." As far as can be determined from the article, the term "citizens" is defined by Heinz Wolf and his son, Charles.

Did the City Council hear from any other citizens who might be affected by this order?

The owners of Café del Rey Moro, Old Globe Theater or citizens who reside in west San Diego who would be denied access to Balboa Park by closing the only access to the park from the west also should have been heard.

It is possible the action taken by the council is not entirely legal. Many citizens are being denied their right to park access without due process.

It appears that the City Council has completely ignored the recommendations of the Balboa Park Commission and the City Park and Recreation Department.

December 14, 1972, San Diego Union, B-1. City Council delays Balboa Park traffic test; City alters Laurel Street shutdown; conference yesterday was set to work out final details; number of persons involved with Balboa Park spoke in opposition to council plan to close the street west of the Cabrillo Bridge..

The City Council yesterday delayed its experimental closing of Balboa Park's Laurel Street extension until March and directed the city manager to develop a "people-moving" system to the park's El Prado area.

The council, after a special conference, and the Parks and Recreation Board to review the following plan:

- Close the main traffic artery to traffic until 7 p.m. and forbid parking on Plaza de Panama.
- Allow for passenger drop offs at Plaza de Panama, but direct traffic back across Cabrillo Bridge west of the park or southbound to parking lots along President's Way and Park Boulevard.
- Close the eastern section of El Prado to the Natural History Museum area.
- Asked City Manager Kimball Moore to report on a possible "people-moving" shuttle system from outlying parking facilities now little used.

December 14, 1972, San Diego Union, B-2:1-2. City yesterday told Balboa Park planetarium to trim its budget.

The city yesterday told the new Balboa Park planetarium to trim its budget, use allocated unused funds and open its doors in January before considering a working capital advance.

City property director William MacFarlane, in a letter of San Diego Hall of Sciences president Norval Richardson, outlined "corrective measures" for the planetarium to take before city officials will look into a request for \$100,000 advance money on the new operation.

"As seen as we have received our commitment to implement the recommendations, we will reconsidered a request to the City Council for a working capital advance," the letter said.

Richardson could not be reached for comment last night.

The planetarium, which received a once-only subsidy of \$103,000 from the city for its first year operation last June, has requested the \$100,000 loan to offset lower than anticipated income from private sources.

One problem is the planetarium now foresees and income of only \$305,000 for the fiscal year. Last June the projection was about \$425,000 from private income, including income from ticket sales and concessions.

The 350-seat facility is scheduled to open its doors across from the Natural History Museum March 10.

However, MacFarlane said in his letter the planetarium is advised to open at least, in part, in January when the \$3 million facility is expected to be ready. This would crate added revenues, he said.

MacFarlane also requested a reworking of the cash flow at the non-profit organization and "a closer review of estimated expenditures from January to June, 1973."

The city officials also suggested that \$50,000 set aside for a special fund raising activity --- but apparently not used --- be included in the Hall's cash flow. The money was budgeted last June by the city for a special science display but the event was not held.

"This revenue allocation should be reflected in your cash flow statement under other revenue," MacFarland said.

The small Hal of Science exhibition now stored in the park's Electric Building is scheduled to move to the new facility early next year.

Money for construction, raised through a revenue bond, is not affected by the operating money shortage. Another \$750,000 for purchase of equipment and property development is also proceeding on schedule.

The city gave \$103,000 last year to get the operation going. Four separate studies have been conducted which concluded the planetarium would be self-sufficient, like the San Diego Zoo, after its first year of operation.

December 19, 1972, San Diego Union. Letter, Judy B. Reaves, happy City Council has had the courage to close Laurel Street to through traffic.

December 19, 1972, San Diego Union. Letter, G. R. J., suggests building a bridge across 395, a tunnel under the park at Upas Street, and exit on Florida Drive.

December 20, 1972, San Diego Union, B-7. Art Gallery annex okayed.

December 24, 1972, San Diego Union, A-37. Old Globe studies proposals for new theater.

December 24, 1972, San Diego Union, C-2. EDITORIAL: Too Many Cooks . . . Balboa Park Needs Firm Plan.

One of the unique qualities of Balboa Park has been its ability to accommodate so many disparate interests and activities of San Diegans and their visitors. It is roomy enough for Sunday strollers and picnickers, for tennis players and golfers, for the nation's most distinguished zoo and the crowds it attracts, for a cluster of fine galleries, museums and theaters, for meeting facilities and for recreation.

Now Balboa Park is confronted with two additional problems which it finds more difficult to accommodate. One is the growing pressure of automobile traffic.

Something certainly needs to be done. However, the experimental closing of Laurel Street, cutting off the only traffic artery through the park, is a drastic step, one which may damage substantially the usefulness of the park.

Of even greater significance, in the long term, is the hazard of piecemeal development, following no plan reflecting a consensus of what San Diegans want Balboa Park to be in the future.

The Bartholomew Plan, adopted in 1960 as a blueprint for park development, has not been followed. Without a master plan and a commitment to follow one, it is inevitable that disputes will arise in making changes in the park, and we are seeing symptoms of that today. A planned expansion of the Fine Arts Gallery has raised a cry of over-building. A plan to raze and rebuild the old Electric Building has been challenged as not in keeping with the general architectural pattern of the Prado area and as violating the open space concept. The hopes of the San Diego Aerospace Museum to move into the old Ford Building runs counter to the Bartholomew recommendation to tear that building down.

San Diego has many public-spirited citizens sincerely concerned about the future of the park and its institutions and facilities. Indeed, there may well be too many cooks hovering over the civic broth. The city government receives advice on Balboa Park from an 11-member Park and Recreation Board, a 19-member Balboa Park Committee, the governing boards of museums in the park, and its own staff specialists in planning. It is no wonder that differences arise.

Planning studies are expensive and time-consuming, but it is hard to see how the city can resolve the kind of conflicts surfacing over the future of Balboa Park and avert mistakes in development without reviving the concept of a master plan. The plan could deal with the problem of access to the park and the movement of traffic within it, as well as the fate of present structures and the space requirements of institutions located there or hoping to be located there in the future.

Whether the Bartholomew Plan is to be revised or whether a fresh plan is to be developed is not as important as assuring that San Diego knows where it is going with Balboa Park and commits itself to getting there.

December 25, 1972, San Diego Union, B-16:1. Star projector on way; will display 10,000 stars on dome of theater.

The star projector for the new Reuben H. Fleet Space Theater-Hall of Science in Balboa Park is scheduled to leave Chaddsford, Pa., in two vans on Wednesday.

Joseph Hojnicke, installation supervisor for Spitz Laboratories, Inc., said the vans will arrive here January 3.

The projector will display 10,000 stars on the dome of the theater with unrivaled accuracy and clarity, according to Hojnicke.

He said the instrument will be insured for \$1 million during the journey. He said the inside of each van will be kept at a constant temperature of 72 degrees to protect sensitive lenses.

1973

Summary of Events in 1973

(Note: Dates of events are approximate only.)

Reuben H. Fleet Space Theater dedicated (March 10, 1973)

Ford Building accepted into National Register of Historic Places
(April 26, 1973)

House of Italy opened (August 20, 1973)

Directional markers placed in Balboa Park (September 7, 1973)

Propositions for park improvement, defeated (September 18, 1973)

City Council decided to create a pedestrian mall on El Prado
from Plaza de Balboa to Plaza de Panama
(September 27, 1973)

Hall of Nations dedicated (September 29, 1973)

January 9, 1973, San Diego Union, B-1. The Ford Building in Balboa Park has been nominated for the National Register of Historic Places by Robert D. Ferris, a San Diego architect.

January 4, 1973, San Diego Union, B-1:2-4, B-5:1. \$270,000 star projector delivered yesterday (photos of half of star projector), by Betty Peach.

The "star ball," heart of the projection system for the Reuben H. Fleet Space Theater and Science Center, was unloaded yesterday and stored in a basement room.

The two hemispheres, parked side by side on wooded pallets, look like a relief map of the earth with its giant cities emphasized out of proportion.

The bumps and projections are capable of projecting 10,000 stars on the dome of the space theater.

The two hemispheres will be mounted on a pedestal with arc-shaped arms to support it as pivots. A motor in the interior will move the ball.

The "star ball" is unique. It was designed by scientists of the center in conjunction with the Spitz Laboratories in Chadds Ford, Pa., specially for the space theater.

With it in the air-controlled ban, which was gradually changed to match the atmospheric conditions in San Diego were some computer elements, planet, solar and spot projectors.

The entire system, which will include 70-mm film projections with the star projections, will be connected to its computer system and is expected to be operative by mid-March.

Michael Sullivan, executive director, said the system will be able to project such combinations as a trip to the moon.

James Crooks, a board member involved in the star ball design and manufacture, said the larger protrusions on the sphere contain angled mirrors capable of making minute adjustments once the system is installed.

“No other system has the capabilities of this one,” he said. “For example, if we wish to drop down to show the stars along the horizon, the ones which would drop below the horizon can be masked and will not project onto the earth picture on the screen.”

Crooks said standard projections, in all other planetariums, have been from two balls, each representing half the sky, and balanced at opposite ends of a rod.”

January 16, 1973, San Diego Union, B-1:6-8. Space Theater to show new dimensions in sound and visual experience.

January 17, 1973, San Diego Union, B-3:4-6. Sheldon Campbell turned theater keys to directors in ceremony yesterday.

January 25, 1973, (San Diego) Evening Tribune, B-1. Closing of Laurel Street section planned to curb park traffic; five members of the council, a bare majority, agreed yesterday to an experimental closing of a key road in the park’s crowded central area for March.

January 25, 1973, San Diego Union, B-1:7-8. Park Road Closing Plan Gains --- City Council yesterday endorsed closing of El Prado to auto traffic during March.

January 26, 1973, San Diego Union, B-5:1. Space Theater will feature trip to Saturn.

February 8, 1973, San Diego Union, B-2:1-2. Motion picture projector arrived at Space Theater yesterday.

February 9, 1973, San Diego Union, B-6. The Balboa Park Committee has recommended that \$1.7 million be included for the rehabilitation of the Ford Building in a \$25 million park and recreation bond issue to be placed on the November ballot.

February 21, 1973, San Diego Union. Park Board airs bond issue plans; Ford Building’s renovation for museum rejected, by Otto Bos.

The board voted 5-4 not to spend the \$1.7 million deemed necessary to restore the Ford Building and instead endorsed 10 projects which will begin development of the eastern section of Balboa Park, including the Morley Field area and creation of a botanical garden in Florida Canyon.

Board chairman James Milch, noting that voters twice had failed to give enough votes to the restoration in 1971 and 1972, said inclusion of the Ford Building would jeopardize the entire bond package.

February 24, 1973, San Diego Union, B-2:6-7. Michael Sullivan, theater director, said potential of Space Theater is staggering.

February 28, 1973, San Diego Union, B-3. The Park and Recreation Board yesterday included \$850,000 in the November 6 \$25 million bond package for renovation of the Ford Building on a condition that private sources would raise the same amount over the next four years.

February 28, 1973, San Diego Union. (?) Park’s undergoes a facelift . . . It looks as if Guy Schulmeister, a city worker is puzzling his way up a maze, but it’s the Balboa Park Botanical Garden. The scaffolding Schulmeister is climbing has been erected for repairing the structure, erected “temporarily” [sic] in 1915 (illus.).

March, 1973, San Diego Magazine. Moving Through Space and Time, by Herbert Fredman (illus.).

The bon voyage ceremonies and the blast-off last November 1 are still vivid in your memory, even though you are now 153 days out in space. So far all systems have operated smoothly. Now the

immense mass of Jupiter, the largest planet, looms ahead. Its 12 satellite moons are an awesome sight; you speculate briefly whether life is emerging on Ganymede. But now you must plan on using Jupiter's gravity as a giant slingshot to gain added velocity as you aim for Pluto, another 487 days away in space.

A new adventure of Walter Mitty? Too much like late night television? Neither. You are in the Reuben H. Fleet Space Theater and Science Center in Balboa Park, a sensational new facility for San Diegans and for visitors that makes travel through the vast reaches of space more "real" than, say, a jaunt through Mission Valley.

The new development is particularly important because, like the neighboring Zoo, it manages to blend the very best of entertainment with painless education --- a combination rare enough so that it should entice vast numbers of tourists and residents.

The current opening of the Space Theater/Science Center complex is the culmination of an undertaking that started 16 years ago, when a committee was formed to create a Hall of Science and Industry here. Over the years the enterprise grew to involve the most advanced technology of any similar project anywhere. "In the Space Theater we have a totally new audio-visual medium," Michael Sullivan, executive director says. "We have the first Space Transit Simulator, a new kind of star projection system that gives the sensation of space travel. And we have many other kinds of highly sophisticated visual and sound equipment. Altogether we have 88 different projectors simultaneously controlled by a computer."

Along with the Space Theater, seating 350, is a Science Center, with 8,500 square feet of exhibit space, a lecture hall with 120 seats, and meeting rooms, work shops, library and offices, all housed in an attractive new structure designed by the San Diego architectural firm of Hatch, Heimerdinger & Associates, with Louis Bodmer, AIA, as consulting architect.

The building complex faces the Plaza de Balboa at the end of El Prado and is directly across from the Natural History Museum. Also in the Plaza, where El Prado formerly cut through to join Park Boulevard, is the beautiful new fountain, designed by Delawie, Macy & Henderson.

Incongruously enough, the Space Theater and Science Center is located where the nudist colony entrance was in the 1935 San Diego Exposition. Sheldon Campbell, president of the San Diego Planetarium Authority and an eloquent booster of the Space Theater and Science Center, was an equally fervent fan of the nudist colony in 1935. (He was 38 years younger then.) Campbell recalls that he was a Zoo guard during the Fair, and worked nights to keep enthusiastic fans from climbing the Zoo fences to gain free access to the lurid delights of the Expo grounds.

"The Space Theater and Science Center is the most advanced institution of its type in the world," Campbell says. "You know how much the San Diego Zoo overshadows the Los Angeles Zoo? Well, the Space Theater outclasses the Griffith Park Planetarium to an even greater degree. For the first time the viewers will not be restricted to seeing the stars and planets from a vantage point on earth --- instead we will move through space and time at will."

The Planetarium Authority was created two years ago by a joint-powers agreement between the city and the county to finance the Space Theater/Hall of Science structure. The Authority sold \$3 million in bonds to raise money for the building; it is anticipated that the bonds will be repaid from the new facility's revenues. Actual operation of the Space Theater and Hall of Science is carried out by the San Diego Hall of Science, a non-profit organization made up of local community leaders. Dr. Bernard Gross, chairman of the board of Chem-Tronics, heads the group.

Along with the \$3 million expenditure for the building and related items, another million dollars is being invested in the projectors, sound system, computer and other instrumentation of the Space Theater. Much of this cost has been covered by donations from the Fleet Foundation and from

members of the Fleet family. Reuben H. Fleet, an aircraft industry pioneer, is the main who brought Convair to San Diego.

Michael Sullivan, who heads up the newest Balboa Park attraction at the age of 31, is the master of a unique specialty --- he has been involved in the development of four different planetariums. After getting a college degree in physics, while discovering an active interest in show business, he started seven years ago with the Denver school system planetarium. He then went to the Museum of Science in Miami as staff astronomer, and opened a planetarium there. Next he started the Andrus Planetarium at the Hudson River Museum in Yonkers, New York, and then came to San Diego, to the Space Theater and Hall of Science, a year ago.

"The Space Theater is both a traditional planetarium and a highly innovative film theater," Sullivan says. "As a result the design had to be a major departure from convention. In the past, planetariums were centered on the elaborate projection hardware, which was surrounded by rows of concentrically-arranged seats. In the Space Theater we have an amphitheater with all the seats facing the same direction, enclosed by a hemispherical projection dome. To handle the high sound levels, the dome had to be acoustically transparent; to accomplish this the dome is covered with thousands of tiny holes so that the empty space covers 22 percent of the surface. There are no walls in the projection dome --- the 76-foot diameter dome comes all the way to the floor, and the dome is tilted 25 degrees from the horizon."

The tilted-dome design allows the Space Theater to have three separate projection areas. One houses 70-millimeter Cinerama-type projectors, Another has a very unusual 70-millimeter IMAX projector with a fish eye lens --- a machine that will cover 80 percent of the dome's surface with a picture that gives the viewer the sensation of being literally surrounded by the action.

Along with these two projection room facilities will be, at the geometric center of the dome, the Space Transit Simulator. This consists of a whole assembly of projection equipment --- the four-foot diameter Star Projector or Star Ball, plus planet projectors, image projectors for the earth, moon and sun, and additional zoom projectors. All of these very complex instruments are controlled by a computer and are programmed from a control console located at the rear of the theater.

The first show at the Space Theater consists of two films specially commissioned. One is called *Voyage to the Outer Planets*, and the other is *Garden Isle*, made on the island of Kauai, Hawaii. There will also be the standard planetarium fare, enhanced by all the new devices. The two special IMAX films cost the Space Theater about \$175,000; they are expected to draw crowds for at least a six-month run and the films eventually may find markets as other similar IMAX machines are installed elsewhere.

All of the Space Theater razzle-dazzle overshadows the Science Center --- unfortunately, since the exhibit hall contains a variety of exciting displays with visitors actually invited to touch, try out, participate. A pair of huge parabolic dishes form a whispering gallery where a murmur can be heard 70 feet across the room. An electric stethoscope lets you listen to your own heartbeat. Another display allows you to see how the iris and pupil of your eye operate. You can match wits with a computerized teaching machine; you can make your own op-art posters with a dynamic art machine; you can make music on an electronic device, the theremin, by waving your hands over its plates. The Science Center uses the same show business principles as the Space Theater to make learning things fun. Use of the new facilities for educational purposes will be extensive.

Backers of the new institution think it will give Balboa Park a strong impetus as an attraction both for local residents and out-of-town-guests. Sullivan expects the attendance in the first full year to number 500,000. He plans to present 1,800 full shows a year; each show will last about 45 minutes.

The first optical planetarium was developed by Zeiss in Germany about 50 years ago. It was able to project stars on a ceiling. In the age of radio, people were content with simple sights, and

planetariums didn't change much for a long time. Now, in the age of television broadcasts from the moon, more is demanded by the public --- and the Space Theater fills the bill.

March 10, 1973, (San Diego) Evening Tribune. Black tie dinner and reception last night honoring Major Reuben H. Fleet, major donor of the Space Theater and Science Center; Center opens to public today (illus.).

March 10, 1973, San Diego Union, B-1:8; D-1:3-8. Reuben H. Fleet Space Theater to open today; dedication ceremony open to public.

March 11, 1973, San Diego Union, D-1, D-3, D-12. Old ornaments --- Greece of San Diego? by Jeannette Branin (illus.).

The crumbling statue of a goddess stands serene, as if surveying the hillside, the city and the glinting ocean.

At her feet lie heroic fallen columns, ornamented with twining vines and clusters of grapes.

All around her, on the hilltop mesa, are remnants of great baroque pediments and capitals, elaborately shaped frames for windows and doors, and heraldic shields.

In the dust, snagging windblown weeds, are leering gargoyles and satyrs, simpering cherubs, posturing conquerors.

Is this the promontory of "sweet Sounion" in classic Greece, beloved by the poets?

No, it is not Greece. It is the Chollas Sanitary landfill storage yard on Ryan Road.

The statuary and the carvings are the cast-offs of the demolished Food and Beverage Building in Balboa Park.

The elaborate ornamentation of the building, on facade, balconies and towers, impressed visitors to the park during the California Pacific International Exposition in 1915.

They had been constructed for that purpose, a very temporary one, from chicken wire, plaster and sisal.

The building and its convoluted decorations were repaired and shored up for the 1935 California Pacific International Exposition.

But soon after that, passerbys in the park began to notice bits and pieces of plaster in the lawns and on the sidewalks.

Inspection of many of the buildings constructed in 1915 revealed that they were in most precarious condition, "held up only by force of habit," according to one inspector, and responsible city officials shuddered, considering the possibility of injuries and law suits.

Eventually the building was condemned and doomed to be razed.

That was the moment, six years ago, when the Committee of 100 was created as a result of widespread sentiment and indignation.

Mrs. Frank Evenson founded the committee which promoted a successful \$3.5 million bond issue to replace the Food and Beverage Building on its site, with as near a replica as possible but of permanent materials.

The ornaments were removed from the old building and used as molds for new ornaments for the new building, Casa del Prado, by Chris Mueller, one of two architectural sculptors in the nation.

After that they were thought to be of no value, no use, and they were hauled away to the storage yard.

But city officials had not considered the souvenir hunting mania of the great American public.

Vehicles ranging from small compacts to pick-up trucks have been driving up to the yard, and their drivers have wrestled and tugged at the smaller pieces and then taken them away.

"Quite a lot was taken away by some students at State, for reasons best known to themselves," said Bill Gerhardt, construction director of the City of San Diego.

What remains also is of large size, exceedingly cumbersome and heavy as well as crumbling and the would-be salvager would be wise to employ heavy moving equipment and a truck.

Ordinarily anything taken to the landfill is compacted and covered with earth the same day, said Gerhardt.

"But Mrs. Evenson suggested that somebody might enjoy taking a rosette or a cherub carving or some such for their own pleasure," he said. "She hated to have it all thrown away."

"We agreed to store it instead of bury it," said Gerhardt.

"We try to please the public. We don't always succeed, but we try."

Gerhardt said that one request would be made of souvenir hunters; anyone intending to sort through the discards should first check at the administration building with Supt. Ed. Mendoza.

"We need to know who's in there and for what purpose," he said.

Some of the best of the statuary will be displayed at the annual membership tea of the Committee of 100 at the home of Mrs. Lawrence Klauber from 2 to 4 p.m., March 29.

Mrs. Verne Ridout and Mrs. David Means Miller are cochairmen of the tea which will have as its theme, "The Magnificent Avenue," El Prado the main boulevard in Balboa Park.

Films of Casa del Prado, the replacement of the old Food and Beverage Building, will be shown, a youth chorale will sing, and original ornaments will be exhibited.

Not among them will be the statue of the personification of California . . . a fully-formed female who embraces the figures of an Indian child and a Caucasian child.

She presides on the windswept hilltop.

For almost 60 years she turned her sightless eyes and benevolent smile on residents and visitors to the park alike

But now her destiny is one with the statues that once stood in the temple at Sounion . . . a return to the earth and oblivion.

Fleet Space Theater show "Out of this World," by Michael Grant

After 15 long years of planning, invention and work, the Reuben H. Fleet Space Theater yesterday was ready to open its doors to the public.

The public, however, was not ready for the Space Theater.

They came expecting to see a well-equipped planetarium, and they were not disappointed. But they did not expect to be absorbed in an audiovisual experience that could revolutionize not only planetaria but cinematography as well.

Typical of the reactions were those offered by two ex-prisoners of war, to whom yesterday morning's special grand opening screening was dedicated.

"Spectacular," Navy Capt. Howard E. Rutledge said.

"Really fabulous," Navy Capt. Harry T. Jenkins added.

Jenkins and Rutledge were given a thunderous standing ovation by the audience when the dedication was announced just prior to the beginning of the 43-minute show.

After morning ribbon-cutting ceremonies and two special performances for city officials and dignitaries, the \$4.5 million center on Plaza de Balboa opened its doors to the public for the first time.

The Science Center, across the building's foyer from the Space Theater, is not completed yet. It is expected to open next month.

Mayor Wilson keyed the dedication ceremonies by proclaiming yesterday "Reuben H. Fleet Space Theater and Science Day" in San Diego.

Joining him on the podium were Dr. Bernard Gross, chairman of the Hall of Science board of directors, Capt. Norval R. Richardson, USN (ret.) and Sheldon Campbell, chairman of the Planetarium Authority.

Walter Ames, president of the Fleet Foundation, spoke in behalf of Reuben H. Fleet, who with members of his family contributed \$800,000 to construction of the center.

The show offered two films projected onto the Space Theater's dome by a special projector with 180-degree capability. It is the only such system in the world.

The effect, which has been described as "super-super Cinerama," left some spectators clutching their armrests, particularly during sequences shot from a helicopter which was zooming over, around, and in one cast through the craggy terrain of the Hawaiian island of Kauai.

That is just the effect Edward Creutz had hoped for.

Now assistant director for research of the National Science Foundation in Washington, D. C., Creutz, a former San Diego businessman, was instrumental in the planning that led to the theater's unique tiled-dome configuration.

He made a special trip to San Diego this weekend to see how his idea, which his contemporaries came to call the "Creutz Effect," worked.

It succeeded beyond his expectations.

"I didn't anticipate how useful it might be for other things besides space," he said.

The Kauai footage, 18 minutes in length, was the hit of the show.

Jenkins and Rutledge, both Navy aviators, particularly enjoyed it.

"I've flown all over that island but I haven't quite taken a trip like that," Rutledge said.

"The three-dimensional effect was extremely real," Jenkins said. "A sand blower, that's what it felt like," he said, referring to low-level flying.

Mayor Wilson was similarly impressed.

"How did you like your flight?" he greeted a fellow spectator after the show.

"The word 'spectacular' comes to mind, but it isn't adequate to describe the sensation," Wilson said.

A second film took the audience on a realistic "Voyage to the Outer Planets," a simulated treat, with careful attention to scientific detail, to the edge of our solar system.

Both films were embellished with dramatic scores designed to make full use of the theater's "circle of sound" system.

The first public showing was sold out yesterday afternoon with 150 persons still waiting in line to buy tickets.

Steven Marks of San Diego was one of the 350 to get in for the first show. He said astronomy was his hobby and that's why he came.

It was apparent when he and his wife emerged from the theater that he got more than he bargained for.

"This is fantastic," he beamed. "I've never seen anything like it. Was it entertaining? Oh, yeah."

The program had some bugs in it yesterday. Technicians have been racing against time to have the program ready and they have been polishing it from day to day. Small segments were added, for example, between a preview showing Friday night and yesterday morning.

"We've got some work to do yet," Dr. Leonard Skolnick of Spitz Space Systems, which built and installed most of the Space Center equipment said.

He said the audience would not notice most of the problems. "It's the type of thing where the artist knows what's not quite right."

"We've been working on it 24 hours a day," Skolnick said, "but it's still not quite up to snuff."

The public was not complaining yesterday.

March 11, 1973, San Diego Union. "Not a Word"; Man who made it all possible --- Reuben H. Fleet, by Lew Scarr (photo).

When the Reuben H. Fleet Space Theater and Science Center is dedicated, the man who made it all possible will be there but has vowed to make no speeches.

"Not a word," Reuben Hollis Fleet insisted in an interview. "I'll be there, but I don't want to be part of the show."

Fleet, called Major from World War I days (“I can’t seem to shake that name although I’m not ashamed of it.”), 86 on March 6, is in robust health and his reluctance to speak has nothing to do with any infirmities.

It’s just that he will let his public speaking laurels rest with the last address he made, on May 15, 1968, on the 50th anniversary of the United States Air Mail Service. Fleet was the nation’s first air mail pilot.

In a speech of 185 words delivered in the Smithsonian Institution he officially turned over Old 249 the Postal Service’s last mail airplane, to the National Museum, as he said, “To inspire faith in God in whom we trust, courage to strive, and again courage to act, with hope and love for all mankind.”

Those words, although Major Fleet won’t be saying them at the dedication of the space theater and science center bearing his name could well be used again.

It was the Fleet Foundation that advanced funds for construction of the facility. Oddly, Fleet is not a member of the foundation’s board.

“I just supply the money and let them worry about it,” he said with a chuckle.

But why did he supply the money? Why the space theater and science center?

“Yes, you ask me that,” he said slowly, trying to understand himself why he did.

“Perhaps it’s because I think San Diego is the finest city in the world and I wanted to do something worthwhile for it.”

Actually, Fleet, the founder of Consolidated Aircraft Corp., which became the Convair division of General Dynamics Corp., has devoted all of his working adult life to aviation.

To Reuben Fleet, space is a natural extension of that life and with the magnificent space theater and science center he can be sure that it will go on forever.

“The building is divine for it,” he said. “I hardly known any of the (city) council, but they have been wonderful with all of their cooperation.”

Still, Fleet concedes that the enterprise has been a worry. He has fretted right to the last minute about things, such as the late arrival of the theater’s lens.

“You can’t do very much without that,” he said.

Reuben Fleet has lived an ordered life, partly because of military training, but mostly because he has made things work better that way.

March 11, 1973, San Diego Union.

Admission Fees on Sliding Scale.

Admission charges to the space theater will range from \$1.25 to \$2, depending on your age and the time of performance.

The charges for daytime shows on weekdays will be \$1.75 for adults and \$1.25 for persons under age 18. The charges for weekend and evening performances will be \$2 for adults and \$1.50 for youngsters.

Possession of a space theater also will get you into the Science Center, a hall filled with unique and dynamic exhibits that will involve visitors in their happenings.

Admittance to the Science Center alone will cost between 35 and 90 cents again, depending on age and time. The details haven't been worked out yet.

"It may be the best \$2 you ever spent," said theater center director Michael Sullivan. "I don't think anyone will be disappointed."

March 11, 1973, San Diego Union. Everyone can go on space trips, by Steve Stibbens.

Comparative education programs offering a lifetime of space trips will be a key element of the Reuben H. Fleet Space Theater and Science Center.

Joe Harrington, of the center's staff, said he has planned three educational programs already and more are in the works.

During the week, students of all ages, from pre-kindergarten through adult school, will use the center.

"We have two courses planned for kindergarten through third grade students and fourth through sixth grades," he said. "The courses are identical but the vocabulary will change to fit the student's level."

Harrington said the course will introduce students to the San Diego skies at the current season, noting position of the sun, moon and stars.

"We want to show the relationship between the earth, sun and moon, proving to the children they all work together as a family," he said.

Several adult school programs, including evening classes of three or four weeks duration, will offer beginning astronomy and navigation. Harrington said he expects San Diego's yacht and sailboat community will welcome the courses.

Saturday morning classes in such crafts as model rocketry will be conducted by the center staff. The San Diego Astronomy Club will continue to offer its members guidance in the art of telescope making.

March 11, 1973, San Diego Union. Show time for theater.

The Reuben H. Fleet Space Theater and Science Center will open to the public at noon today.

Shows in the theater will start at 12:30 p.m. and continue hourly through 4:30 p.m. Two evening shows will start at 7:30 and 9.

Public programs on weekdays will begin at 2:30, 4, 7:30 and 9 p.m. Saturday showings will be at 10:30 a.m., 11:30 a.m., and at 1, 2, 3, 4, 7:30 and 9 p.m.

March 11, 1973, San Diego Union, X-2, X-7. Quarter of a century in Development, Fleet Space Theater Unique, by Cliff Smith (illus.).

Like a rare gem, the Reuben H. Fleet Space Theater and Science Center developed slowly, dependent on the presence of great energy and just the right combination of elements.

The evolution of the center spanned more than a quarter century. The main sustaining force was the stuff of dreams, faith and a brand of cooperative effort that was uncanny in its scope and duration.

The crystallization process seemingly also was dependent on tenuous, unrelated events --- the collapse of an industry, a 1956 TV broadcast, a scientist's venture to the top of a shaky ladder in an old snuff mill in Delaware.

Execution of a concise plan didn't begin until 1957. But leaders in the project now recognize events much earlier as having had a stage-setting importance.

According to Dr. J. C. Almy Harding, the starting point was the ruins of San Diego's World War II defense industry. If it hadn't been for the postwar recession, TESSIE would never have been created.

TESSIE, he explained, was the dubious acronym for Technical and Scientific Societies Council.

"Chamber of Commerce president Albert Reader asked Dr. (Bernard) Gross to form the group to help cope with local economic problems," Harding recalled.

"One thing that came out of TESSIE was the idea of creating a kind of scientific and technical museum. The name for this institution selected in 1947 as the Hall of Science and Industry. Most people envisioned it going into the Ford Building."

The scheme died but TESSIE thrived on for several years. Many of the members were scientists and engineers.

Some of them were destined to become the organizational nucleus of the world's first true space travel simulator.

Another event of 1947 that may have been influential was an abortive effort to buy and install a sizable planetarium in an old Balboa Park building. The proponents included San Diego Museum Association, the Astro-Physical Society and the San Diego Junior Chamber of Commerce.

The beginning of a successful planetarium movement had to wait until Christmas Day, 1956. Headlined rather prominently in local newspapers was a proposal to build a "multi-million-dollar science museum for teenagers." The proponents were identified as Dr. Glenn Havens and Robert J. McPherson.

Today, McPherson recalls that the idea for the institution came to him as he watched a television program depicting youth-oriented exhibits in the Boston Museum of Science.

"The concept we started with was limited to an exciting museum with lots of hand-on exhibits," McPherson said. "The idea of adding a planetarium to the project came later from Joseph Dryer."

On March 17, 1957, plans for a public meeting to discuss both the museum and planetarium ideas was announced. The meeting was held in the San Diego Hotel on March 20.

Many of those who received special invitations to attend were drawn from the membership list of TESSIE, which had recently been disbanded, because of their expertise in scientific fields.

The minutes of that meeting identify 34 persons who attended. Several of those present now are directors and officers of the San Diego Hall of Science, Inc., the governing body of the new center, and of the city-county Planetarium Authority.

McPherson was named acting chairman and presided at the initial meeting. The organizational name of San Diego Hall of Science and Industry borrowed from TESSIE was adopted and plans for regular monthly meetings were made.

Dryer described his ideas about a major planetarium for San Diego. According to a newspaper account of the meeting, McPherson proposed an immediate merger of the two projects but Dryer said each plan should be pursued separately for the time being.

McPherson recalls that the merger was effected a few weeks later.

Havens became the first president of the organization on August 7, 1957. Two days later the Articles of Incorporation were signed establishing the organization as a non-profit California corporation.

Straightforward execution of the organization's plans were thwarted for years by various difficulties, including a very large financial need.

The delay proved a blessing because during this period two men who were to become indispensable in upgrading the planetarium in a history-making way joined the project.

They are James Crooks, Jr., an electronics engineer, and Dr. Edward Creutz, a nuclear physicist, who now is associate director of the National Science Foundation.

Together they conceived and developed the idea of building the planetarium with the dome tilted downward before the audience so that the stars would appear ahead and below the horizon as well as overhead.

Additionally, Crooks is credited with conceiving the idea of bringing all of the planetarium equipment under the control of a single computer.

The turning point in adoption of the tilted-dome design concept came one day in the late spring or early summer of 1964, the exact date is uncertain.

That was the day that Creutz climbed the ladder. At the time, the headquarters of Spitz Laboratories, Inc. was in Yorklyn, Del.

Creutz was there to discuss the design of planetarium hardware.

Dr. Armond Spitz arranged to put a star field projection up on the test dome and Creutz climbed to the top of the ladder for the perspective that would give him a fair idea of what a real tilt-dome planetarium view would be like.

"Ed's experiment on that ladder was the key event," Crooks recalled. "It led directly to the tilted dome."

Today the tilted-dome concept is known to planetarium authorities around the world as "the Creutz effect."

There were many other important steps after that but none with so revolutionary an impact.

Also, by that time the die was cast and nothing could really stop the completion of our jewel in Balboa Park.

March 11, 1973, San Diego Union, X-4:1-2, X-11. Entire section devoted to Space Theater and Hall of Science.

X-4. New center costs \$45. Million (photo of Michael Sullivan holding \$19,000 fish-eye lens).

The cost of the Reuben H. Fleet Space Theater and Science Center is estimated to total \$4.5 million.

Three million dollars of this was obtained from revenue bonds sold in 1971. This paid for the construction of the building in Balboa Park, construction of the inner dome in the theater, part of the sound system and most of the furnishings.

The other \$1.5 million went for theater equipment, science center exhibits, production of theater films and operating expenses. Most of this money has come in the form of outright donations.

The largest contributors have been members of the Fleet family. The Fleet Foundation gave \$400,000. Reuben Fleet, his sons and daughter matched this with another \$400,000.

Many of the officers and board members of the San Diego Hall of Science have made large donations. The hall is the governing body of the center and theater.

The bond issue was made possible by a joint powers agreement between the city and county governments in July 1958. This created a city-county Planetarium Authority, a financial agent authorized to sell the bonds.

The city leased the land in Balboa Park to the authority. Later the authority subleased the land and new building back to the city.

Then the city gave the Hall of Science, a non-profit corporation, a contract to operate the theater and center. The professional staff to run everything answers to the hall.

March 11, 1973, San Diego Union, X-4, X-11. Executive Director is young veteran; Sophisticated Systems Blaze a Space Trail, by Connie Bruck.

It is truly appropriate that W. Michael Sullivan, executive director of the Reuben H. Fleet Space Theater and Science Center, is as anomalous as his facility. Abandon, all who enter this cosmic-transit dome, any pre-conceived notions of planetariums or their directors.

My planetarium experience, for example had been limited to New York's Hayden: darkened room, mysterious planetarium machine slowly rotating stars above, and mainly the Voice --- informative drone of the indefatigable astronomy lecturer, dully synchronized with soporific music.

But here we sit in the tilted dome of the Space Theater, and Sullivan --- who is decidedly not the Voice --- is describing how the audience in this audio-visual spectacular will be literally surrounded by multi-projections and sound, as they grip their seats with the sensation of moving forward through space, earth-bound no longer.

Dazzling apotheosis of the New Age, this futuristic Space Theater rises out of the archaic planetarium of yesterday.

When plans for this facility first began to germinate 15 years ago, Sullivan was a high school sophomore. Today, at age 31, he is opening his third planetarium, one which has the most sophisticated, innovative equipment and design in the world. Sullivan is, in effect, trend-setting in a new media, and his own rapid stellar ascent bears some re-tracing.

He attended Adams State College in Alamosa, Colo., on a theater set design scholarship, took every astronomy course, majored in physics, decided not to go to graduate school and began practice teaching in a Denver High School and nearby planetarium, Sullivan recalls, with characteristic candor, that he started out docile enough ("I regurgitated what they told me to do, how they would do a show,") not immediately realizing what a natural arena was the planetarium for his experience in theater.

By the time 24 year-old Sullivan went to a new planetarium in the Museum of Science in Miami, Fla., however --- the largest Spitz installation in the country until the opening of the Space Theater -

-- the light had dawned. Within a year he was in charge of his facility, and equipped it with the Spitz Transit Planetarium (STP). Sullivan concentrated on simulating space flight. Five other planetariums in this county has been similarly equipped but none had done flight simulation.

The life of a pioneer, however, cannot be all halcyon. Sullivan enjoys recalling one particularly stormy day. Florida's Governor Kirk was in the audience and the space flight simulator was at his control, via a portable joy stick. He was given instructions about the basic motion capabilities --- roll, yaw, pitch --- and the audience waited for their representative to move the world, guide his ship of state, but all was still.

After much encouragement, repeated instruction and some embarrassment on the Governor's impotent part, a faulty connection was discovered and hastily remedied, at which point Kirk's anxious, over-compensating manipulation of the joystick paid off and his ship indeed moved in a storm-tossed, sickening simulation of rolling, yawing and pitching.

From Miami, Sullivan went to Yonkers, N. Y., to open the Andrews Space Planetarium, part of the Hudson River Art School. The artistic environment provided idea work conditions and resources for Sullivan who for the next four years --- with critical acclaim --- used his facility as a laboratory, experimenting with further techniques of space flight simulation in inter-media environments, substituting rock and electronic music for traditional classical.

All that experimentation will climax, continue and re-climax at the Space Theater, where Sullivan has spent the past year.

Now, his eagerness for the creative involvement of producing on-going shows is almost tangible. Low-keyed no longer, Sullivan becomes vibrant, electrified, as he talks happily of the future he can invent here, of the light shows and the chamber music, of the oceans, galaxies and bursting novas that will fill this ever-expanding universe of a dome.

March 12, 1973, San Diego Union. Space Theater opening draws sellout crowds.

All the indicators of a hit show were there at the Reuben H. Fleet Space Theater yesterday.

The first show of the day, at 12:30 p.m., was a sellout.

A throng of people stood patiently in the lobby, waiting for the 2 p.m. show, which also was a sellout.

A long line waited to buy tickets for the 3:30 show, which eventually was a sellout.

Tickets were being sold for the 5 p.m. show.

The cash register was running short of change. There were muted squabbles here and there.

All of the shows on Saturday --- the theater's opening day --- were sellouts, too, director of operations Gene Partyka said.

March 13, 1973, San Diego Union. Offer is made for discarded statues.

The Committee of 100 has received a tentative offer for purchase of the discarded statuary and ornamentation that was removed from the Food and Beverage Building in Balboa Park at the time of its demolition.

A number of the pieces, removed from the old building and used as molds for ornamental pieces for the Casa del Prado, which replaced the original building are in the storage yard at Chollas Sanitary Landfill.

A story Sunday in *The San Diego Union* stated that the discarded ornaments were available to the public, but Mrs. Frank Evenson, chairman of the Committee of 100, subsequently received the tentative purchase offer which she said could mean "as much as \$75,000" to the committee.

Said Mrs. Evenson, "I'm very appreciative of the beautiful article that was written. If this does not work out, we will revert to the original idea" of offering the pieces to the public.

Mrs. Evenson said the committee should know within three or four days whether the sale goes through. The tentative purchaser wants the ornaments to use as molds for a project in Arizona. Meanwhile, the artifacts are being held in reserve. Any money realized by the Committee of 100 would be used, said Mrs. Evenson, to further the committee's work of preserving the Spanish Colonial architecture in Balboa Park.

March 13, 1973, San Diego Union. Extension of traffic ban urged.

Satisfied with the test closing of El Prado area of Balboa Park to traffic, the Balboa Park Committee yesterday voted to recommend the City Council extend the one-month trial period until the closure can be made permanent.

March 16, 1973, Source ? City Plans Mall in Balboa Park . . . The city is moving ahead with plans to permanently convert Balboa Park's El Prado area into a pedestrian mall and to construct alternate car routes through the park.

March 17, 1973, San Diego Union. Space Theater will feature sun fire gales.

Visitors to the Reuben H. Fleet Space Theater and Science Center will be able to watch fire storms on the sun starting this weekend.

The new Balboa Park facility announced yesterday that it has installed a \$25,000 solar telescope and connected it to a closed circuit television monitor in the science center.

"Special lenses will enable people to see solar flares, as well as swirling gas clouds," said Greg Paris, a science lecturer for the facility.

Solar flares are enormous fire storms on the sun's surface which expel streams of radiation into space.

Radiation from the flares in the radio spectrum of electromagnetic energy causes noise that disrupts earth communications.

Large sun flares also emit high-energy atomic particles which can be harmful to space travelers.

Thirteen showings of "Garden Isle: and "Voyage to the Other Planets" were scheduled for today and tomorrow in the space theater.

March 25, 1973, San Diego Union. Letter, C. E. G., claiming street closing will split park: The present closure of one block is deceptive in that the park, east and west of Cabrillo Bridge, is still tied together. Complete blockage of the street means going up and around Robinson Street to get from one area to the other.

March 26, 1973, San Diego Union, B-1. Park Traffic Ban Pleases Most Visitors.

April 10, 1973, San Diego Union, B-3:8. National Endowment for the Arts awarded Space Theater \$9,560 to aid in the installation of Spanish programming.

April 11, 1973, San Diego Union, B-10:2-3. EDITORIAL: Prado Closing.

The success of closing a key artery in eastern Balboa Park [sic] to traffic should not blind us to the fact that some problems have surfaced during the experiment.

For example, if private vehicular traffic is prohibited from areas of the park, it is clear that some provisions should be made to assist the elderly and the handicapped to reach them. Additionally, if more people are going to be walking through the park, particularly at night, additional lighting and security will be necessary.

These, however, are problems easily susceptible to solution. They have been far outweighed by the benefits already visible as a result of some traffic restrictions in Balboa Park --- cleaner air and a more enjoyable recreational area.

April 11, 1973, San Diego Union, C-6:2. Thursday Club Juniors present check of over \$1,000 to Space Theater.

May ?, 1973, San Diego Union. Park event to benefit 8 projects: San Diegans will make their way to Balboa Park tomorrow riding bikes, scooters, and other vehicles --- the more unusual the better --- for Convergence '73, sponsored by the United Nations Association of San Diego.

May 3, 1973, San Diego Union. Letter, M. L. Jannoch, favoring High School shift from park . . . "Let the 'Old Gray Castle' pass with dignity into memory and give Balboa Park back to the people of San Diego."

May 4, 1973, San Diego Union, B-3:6. A San Diegan will be honored by the Institute of Electrical and Electronic Engineers tonight at a meeting in Honolulu; James W. Crooks, Jr., and engineer for General Dynamics Corp., Electronics Division plant in San Diego, will received the 1973 western region award for outstanding community service; Crooks will be cited for "promoting better general public understanding of science" in connection with his efforts in helping develop the Reuben H. Fleet Space Theater in Balboa Park.

May 7, 1973, San Diego Union, D-3:1. A seminar designed especially for women on "Energy Problems and the Environment" begins today at the Reuben H. Fleet Space Theater and Science Center; sponsored and conducted by the U. S. Atomic Energy Commission, the program will be a three-hour workshop, repeated four times a day, Monday through Friday, with sessions beginning at 9 a.m., noon, 2 p.m. and 7 p.m.

May 13, 1973, San Diego Union, B-13. The two-acre, \$140,000 (rose) garden is planned for the area across from the Reuben H. Fleet Space Theater and Science Center and fountain. David Roberts, park division superintendent, said he hopes to start planting by February and have the garden open in the summer of 1974.

Roberts said the city has set aside \$47,000 to pay for the project, but has a tentative offer of a foundation grant to pay for the difference.

May 15, 1973, MINUTES OF THE PARK BOARD

COMMITTEE REPORTS

c. Facilities Committee (cont.)

5. Botanical Building

Mr. Yamada reported that major repairs to the Botanical Building are in progress. The heavy redwood timbers were deteriorated with dry rot and contained active colonies of termites, and the lath had deteriorated around the nails securing them to the heavier timbers and was the cause for many of the lath popping loose. The best redwood available was obtained although it is still far from the clear uniformly colored wood originally used. The unavailability of the highest quality material dictated the use of battens to hold the ends of the lath in place and the use of a pigmented stain to give the finished building a uniform appearance that would not have been the case if a clear stain had been used.

Mr. Yamada stated that the Facilities Committee would like to go on record that any changes to the fundamental appearance of any public buildings should be brought to the attention of the Committee. He said, regarding the Botanical Building, that as important a building as it is, the Committee felt it should have been brought to their attention before

any action was taken to repair or change it in any way. Mr. Yamada explained that the Facilities Committee was concerned because they felt the material used was not appropriate.

MOTION Mr. Yamada moved that the Park and Recreation Board and the Facilities Committee review any proposed changes in the fundamental design of any public building and, further, that the Construction Department and Public Works Department be made aware of this motion. The motion was seconded and carried.

] MOTION Mr. Leyton asked if it is too late to repair the Botanical Building correctly and moved that the Manager's staff review the current construction and the costs to repair the building with the proper materials as it was originally designed. The motion was seconded and carried.

REFERRAL The Chairman referred the matter to staff to prepare a report on what it would take to repair the building properly. The report is to include cost, the time involved in locating (if possible) the appropriate material, and what management would recommend.

May 26, 1973, (San Diego) Evening Tribune, A-11:4. A series of six Sunday morning services at the Balboa Park Organ Pavilion has been scheduled by the downtown San Diego Inter-Church Council.

May 27, 1973, San Diego Union, B-2:4-5. The Committee of 100 is scheduled to hold its annual business luncheon June 12 at the House of Hospitality.

May 27, 1973, San Diego Union, B-4:6-8. Elaborate plans are underway to film the June 30 solar eclipse in Africa for another audiovisual spectacular in the Reuben H. Fleet Space Theater; cinematographers will record the eclipse from the edge of Lake Victoria in Kenya in 70 millimeter, super-wide angle Omnimax color, which is the largest film format in motion pictures; the filming production will be part of a three-week African Eclipse Safari in Kenya organized by officers of the new institution in Balboa Park.

June, 1973, Booklet "San Diego Summer - 1973," published by the Parks and Recreation Department.

June 13, 1973, San Diego Union, B-6. The Committee of 100 yesterday received a \$2,500 check from George A. Scott, president of Walker Scott Stores, to aid in the preservation of the Spanish-Colonial architecture along the Prado.

June 14, 1973, San Diego Union, E-1. Florida Canyon in rebirth, by Jeannette Branin (illus.).

A preview of Florida Canyon Nature Trail One was held yesterday. Guided tours, open to the public, will be offered every Friday through Monday beginning in November.

June 15, 1973, San Diego Union, B-9:3. Reuben H. Fleet Space Theater announced that it will substantially expand its program schedule to 54 shows a week beginning tomorrow; a spokesman said shows will be offered Monday through Saturday at 10:30 and 11:30 a.m. and hourly from 1 to 4 p.m.; Sunday presentation will be hourly from 12:30 to 4:30 p.m.; there also will be shows nightly at 7:30 and 8:30.

June 16, 1973, San Diego Union. Summer worship services in Balboa Park organ pavilion will begin June 24, the Rev. Dr. Robert H. Mayo, pastor of First Presbyterian Church and chairman of the Inter-Church Council sponsoring the services, said yesterday.

June 19, 1973. MINUTES OF THE PARK BOARD

DIRECTOR'S REPORT.

a. Botanical Building - Balboa Park

At the last Board meeting, staff was asked to review the possibility of the restoration of the Botanical Building with identical materials and in the same way it had been originally constructed. The Board also recommended that any future restoration in public buildings be brought to the attention of this Board prior to the initiation of work. This recommendation was accepted by the City Manager and the Buildings Division has been so informed.

The issue in the relationship of the restoration of the Botanical Building has been studied. At this time, the east wing is renovated and the lath and the horizontal battens are in place. If this material is to be removed, and replaced with clear redwood lath, as used originally, it would cost approximately an additional \$169,000. Miss des Granges stated that Management recommends that the renovation continue in the way it is now being done. Deteriorating conditions of the beams and lath were displayed and pictures were distributed to show two types of construction.

MOTION Mr. Leyton moved that the Board approve Management's recommendation to continue with the renovation of the Botanical Building, the motion was seconded by Mr. Yamada and carried.

b. San Diego Zoological Gardens Admission Fee

Council approved the request by the Zoological Society to increase its admission fee from \$1.50 to \$2 for adults. Admission is still free for persons under 16 years and service personnel in uniform.

June 20, 1973, San Diego Union, B-2. Hearing slated on park roads . . . A city proposal to build two new roads through relatively undeveloped sections of Balboa Park will be studied at a public meeting tonight at the House of Hospitality, sponsored by Citizens Coordinate III.

The roads, one running east of the Cabrillo Bridge to President's Way and the other connecting Richmond Street and Quince Street have been proposed in the event that El Prado is closed permanently.

June 21, 1973, San Diego Union, B-16:1. Tom Sawyer, your world of adventure will never be the same again; the Reuben H. Fleet Science Center has injected a super sonic jolt into your childhood experiments near the banks of the Mississippi; remember the time you talked into the Cave and heard Becky Thatcher answer by whispering into the rocks" The Science Center has taken that whisper into the world's largest parabolic dishes and gossip with a friend 80-feet away in from of a twin disc.

June 27, 1973, (San Diego) Evening Tribune. Letter, Robert G. Case, suggesting tunnel for park traffic: . . . build a tunnel from the Cabrillo Bridge along the Laurel Street route under Pacific mall and under Park Boulevard to exit near and join Zoo Place road.

June 27, 1973, San Diego Union. Letter, V. R. Santalo, issuing warning on park roads: Trees uprooted and concrete poured is not something that can be undone quickly if at all. We seem to be so dissatisfied with the natural beauty around us that we are ready to sacrifice all on a shrine to the automobile.

July 3, 1973, San Diego Union, B-1:8. City planning commissioners yesterday urged the City Council to reopen all of El Prado to automobiles for the benefit of visitors and senior citizens but to leave it closed to through traffic.

A cul-de-sac should be built at the present corner of El Prado and Zoo Drive, by the Natural History Museum, the commission said.

July 7, 1973, (San Diego) Evening Tribune. Space theater turns in loss of \$131,065.

The Reuben H. Fleet Space Theater, the new planetarium in Balboa Park, has ended its first four months of operation with a lot of unexpected red ink.

Deputy City Mgr. Ray Blair told the City Council yesterday that an audit showed the facility ended the fiscal year with \$148,503 in unpaid bills and a net deficit of \$131,065.

Blair said a small surplus has been expected.

Blair said yesterday attendance for the four-month period was not as high as officials predicted, but he did not present any figures.

The city gave the theater a subsidy of \$103,000 last year and some \$204,000 was proposed for this fiscal year.

Blair said city officials would have to get together with planetarium officials to try to work out a method of making up the deficit.

The planetarium has been troubled by numerous problems since its opening in March.

In April, a short circuit in the machinery snuffed out the star show for five days. There were problems with the telephones, problems in the sound tracks, some of the exhibits didn't work and there were technical problems in producing the show.

The planetarium officials, however, had still painted a bright picture.

July 7, 1973, San Diego Union, B-3:1-2. The Reuben H. Fleet Space Theater in Balboa Park is \$131,065 in debt and is seeking additional money from the city to clear its deficit; the money is in addition to the \$103,000 the city gave operators of the \$3 million facility last year and the \$204,510 being allocated for the new fiscal year.

Deputy City Manager Ray Blair released an audit to city councilmen yesterday which showed unpaid bills total \$148,503.54 as of July 1.

"As can be seen . . . additional cash in the amount of \$131,065.55 will be needed to pay all outstanding obligations," the audit said.

A \$198 estimated surplus was forecast in the budget last year for the planetarium by several independent studies.

The problem is the lack of attendance and repeated breakdowns of equipment, Blair said.

City Manager Kimball Moore said the planetarium may be becoming "a perennial cash problem."

"We may be stuck having to take a big bite out of our contingency reserve for this," he said.

Blair was directed to meet with the auditor and members of the Hall of Science to work out the financial problems.

The 350-seat facility opened in March. It was built through a special revenue bond which the city also is repaying. The operating deficit is not related to the building bonds.

July 7, 1973, San Diego Union, B-13:2. Casa del Prado play reading set tomorrow in the Valenica Room.

July 8, 1973, San Diego Union, B-5. The City Council has allocated more than \$7,000 to keep the carillon concerts and organ recitals going in Balboa Park.

July 9, 1973, San Diego Union, B-1:8. City planners have recommended against a height limit around Balboa Park.

July 13, 1973, San Diego Union. El Prado hearing set . . . A July 31 hearing has been set by the City Council to determine whether El Prado in Balboa Park should be permanently closed to the automobile.

July 13, 1973, San Diego Union, B-1. The City Council yesterday formally placed two bond proposals on the September ballot. If passed they would add \$47.5 million in park and recreation land and facilities to the city.

July 19, 1973, Smart Shopper. The Board of Directors of the Museum of Man has announced its new slate of officers for 1973 and 1974. Mr. John P. Starkey has been elected President.

July 19, 1973, San Diego Union, B-17:1. Retired stockbroker Ken Rearwin will head the Citizens Committee for Propositions A and B, the two park proposals on the September 18 municipal ballot, James S. Milch, chairman of the city Park and Recreation Board said yesterday.

July 20, 1973, San Diego Union, B-5. Mayor Wilson yesterday introduced chairmen of the citizens' committee for passage of Propositions A and B, the city park and open space bonds on the September 18 ballot.

July 21, 1973, San Diego Union, B-9:2. Zoltan Rozenyai, whose original compositions provide the background music for the Reuben H. Fleet Space Theater show "Garden Isle," will be at the theater in Balboa Park from 3 to 5 p.m. today to autograph record albums of his score.

July 27, 1973, (San Diego) Evening Tribune. Pat Quinlan writes surplus remaining in city park bond fund could be used to rehabilitate Ford Building.

July 27, 1973, San Diego Union. Letter, Carolyn B. Vega, Del Cerro, assailing park shuttle tram program: Why not leave our park a peaceful, quiet, clean place unmarred by the noise and exhaust of those city Jeeps and the voices of tram drivers?

July 27, 1973, San Diego Union, B-1. Finding of Japanese beetle in Balboa Park stirs alarm.

July 27, 1973, San Diego Union, B-12:1-3. A plan has been worked out to help Balboa Park's new Reuben H. Fleet Space Theater get out of debt; a late opening date and a shortage of advance chase had caused a \$74,378 deficit for the Hall of Science, operators of the \$4.5 million facility said yesterday; Mike Sullivan, the planetarium's executive director, told members of the San Diego Planetarium Authority his organization will ask the City Council for \$49,689 to get out of the financial squeeze while the Hall of Science will be asked to contribute the remaining \$24,689.

City Property Director Bill MacFarlane said he would advance the proposal to the City Council and added the city manager's office is receptive to the plan.

"The proposal appears reasonable," said MacFarlane.

"Had they (the theater) been open in January as planned, I think they would have exceeded their revenue projections."

The theater operators earlier this year asked the city for additional money but at that time were turned down until the doors were opened and until tighter fiscal operations were started. The manager's office also asked the Hall of Science to make some contribution toward the deficit.

Sullivan dispelled rumors that attendance had been low and that periodic equipment breakdowns have plagued the theater operations.

Attendance has been better than expected and the show efficiency has been 99 percent, "which is pretty good at eight shows per day," Sullivan said.

The January opening date, which the theater could not keep, hurt the budget and so did lack of "upfront" money --- those funds needed to buy equipment and spare parts, he said.

The theater finally opened in March and has since been hailed nationwide as the most outstanding theater-planetarium in the country.

The city has pledged operating support to the hall during its infancy. Private funds thus far have contributed nearly \$1 million to the complex, Sullivan noted.

The city for the fiscal year of 1973 contributed \$103,000 out of a \$575,000 total budget. The \$49,689 would be an additional subsidy.

The planetarium next year will also be asking for some city support, Sullivan said, but it is forecast the facility will soon be self-sufficient.

Meanwhile, the hall has launched a campaign to recruit more backers. It already has 1,043 paying contributors. A mail campaign has also been started asking persons to contribute in return for a film credit during a space show.

Sullivan said his organization has asked the Convention and Visitors Bureau to help recruit business organizations to use the facility when not in public use.

He said recently the theater received an additional source of income when a jewelry organization used the show for a sales presentation.

The planetarium board took no formal action because no quorum was present.

July 28, 1973, San Diego Union, B-8. Final park service sponsored by Inter-Church Council at Organ Pavilion today.

July 29, 1973, San Diego Union. Letter, Clifford Graves, La Jolla, expressing dislike of the constant blaring of loudspeakers on the minibuses that circle the Prado and environs in Balboa Park; notes that the average age of the occupants of the buses was "probably 35."

August ?, 1973, (San Diego) Evening Tribune. Richard Amero writes letter opposing the remodeling of the Ford Building.

Editor: I urge the people of San Diego to vote on Prop. A in the Sept. 18 election as it includes a provision for reconverting the Ford Building.

The Prado and the Palisades areas of Balboa Park already have too many buildings. Whatever one may think of the Spanish-Renaissance architecture along El Prado, the Ford Building is at odds with all the buildings in the park.

On Jan. 20, 1972, R. E. Graham, assistant city manager, stated that proposals for reconverting the Ford Building would produce "a usable building . . . Not necessarily a thing of great beauty or great joy."

Architectural historians John Ely Burchard and Albert Bush-Brown refer to Walter Teague's Ford Building as an example of corruptible and fraudulent "new packaging," and Arnold L. Lehman considers it with others, as an example of the "adolescent excesses of the industrial designer's art."

August 1, 1973, San Diego Union, B-1:3:4. The experimental daytime car ban on El Prado will continue for at least two more months, the City Council said yesterday, at least until a shuttle tram service is fully tested.

August 1, 1973, San Diego Union, B-1:3. The state Department of Transportation yesterday approved the City Council's ordinance banning trucks from the southbound lanes of State Highway 163 through Balboa Park during the morning rush.

August 1, 1973, San Diego Union. Letter, Caryl H. Goldsmith doesn't like the "noise pollution" from the people movers; she is a volunteer working in the House of Hospitality.

August 1, 1973, San Diego Union, B-3:5-6. The proposed \$25 million bond issue for park and recreation facilities on the September 18 municipal ballot would increase city taxes, city Auditor Bill Sage said yesterday.

August 1, 1973, San Diego Union, B-3. The City Council yesterday adopted a policy whereby in some instances neighboring homeowners will be asked to help purchase open-space park lands.

August 8, 1973, San Diego Union. Letter, Ro. D. Boswell, criticizes City Council on park action: The daily shutdown of El Prado in Balboa Park and the substitute transportation provided is just one more example of the city councilmen's interference supposed to improve that which has been pleasing and satisfactory for the majority.

August 8, 1973, San Diego Union, B-9. Debate Travels Down Balboa Park Road Plans: Park Needs South Road, by James S. Milch, chairman San Diego Parks and Recreation Board.

August 8, 1973, San Diego Union, B-9. Band-Aid Cures Won't Solve (Traffic) Problems, by Olive Wehbring, president of Citizens Coordinate for Century 3.

August 9, 1973, San Diego Union, B-1. The city yesterday acquired another 145 acres of former Camp Elliott land from the federal government to add to a natural park in the Fortuna Mountain-Mission Gorge area.

August 9, 1973, San Diego Union, B-2. Beer-drinking tennis players won a victory before the City Council when the council voted to allow beer sales at the Morley Field tennis court snack bar in Balboa Park.

August 9, 1973, San Diego Union, B-18. Richard Amero says Proposition A bad for park.

Editor: Passage of Proposition A would be bad for Balboa Park. In 1925 George W. Marston wrote, "Balboa Park is primarily a place for natural beauty. Although it is one of the largest parks in the country, the time is coming when the building of hospitals and school houses, or even libraries and museums, must case or else we shall have a city there instead of a park."

Marston's prediction has come true. There are too many buildings in the center of Balboa Park. For this reason the 1960 Master Plan recommended removing the Ford Building.

The Park and Recreation Department should listen to the advice of landscape architects and not the wishes of those to whom undeveloped land is a challenge.

August 9, 1973, San Diego Union, B-18. Marie Widman, member, Parks and Recreation Board: . . . Prop. A does not increase the tax rate over that established by the voters in the 1966 election. Parks and Recreation are important to all San Diegans.

August 11, 1973, (San Diego) Evening Tribune, A-9. Christian Science Lecture at the Organ Pavilion, April 12 at 6:30 p.m.

August 11, 1973 (?), San Diego Union, A-9. Free Service For All; Balboa Park Trams Start All-Day Sightseeing Trips, by Lee Grant.

August 15, 1973, (San Diego) Evening Tribune, B-1, B-6, B-12. Price tag --- 47.5 million; open space, park bonds on city ballot September 18, by Tom Blair.

August 16, 1973, San Diego Union, B-5. The San Diego construction trade will back additional city park fees as long as the increases are used to develop facilities in areas the money was collected from, industry spokesmen said Tuesday.

August 18, 1973, San Diego Union, A-5. Park-bond propositions endorsed by four San Diego legislators.

August 19, 1973, San Diego Union, B-1, B-7. Seventy nine city park projects; Proposition A asks approval of \$25 million bond issue.

August 20, 1973, San Diego Union, B-1. No tax increase --- Proposition B asks \$22 million for open space preserves.

August 20, 1973, San Diego Union, B-3. House of Italy Cultural Center to open soon.

San Diegans of Italian descent will have new cultural headquarters with opening of the House of Italy at Balboa Park Saturday.

Italy will become the 20th member country of the House of Pacific Relations, the ruling body for cottages in Balboa Park that house arts and crafts representative of the United States and other nations.

The new House of Italy is located in a section of the old floral building. It will share space in the building with the Hall of Nations, which will have items on display of all member countries of the House of Pacific Relations.

Although the House of Italy will have opening ceremonies at an invitational gathering at 8 p.m. Saturday and a public opening at 1:30 p.m. Sunday, the Hall of Nations is not scheduled to open until September 1.

Work on the House of Italy has been accomplished most by volunteers, according to John Curiale, vice president of the house. The House of Italy is Italian in design and furnishings.

Entry steps to the house were paved with Padre brick.

“Used in conjunction with the brick are Padre pavers in matching colors, all contributed by Ben and Ralph Pastore,” according to Mrs. Kay Sanfilippo, spokesman for the House of Italy.

Two lions, each weighing 200 pounds, sit on pedestals on each side of the 10-foot wide entry steps. The lions were a gift to the city by Mr. and Mrs. Joe McLain and Anna Motizi and have already become a favorite of children, according to Mrs. Sanfilippo.

Wrought-iron railing surrounds the patio. The entry gate to the house also is of wrought-iron and is the work of Joe Viasuso.

The interior of the building has been laid out with Italian ceramic tile in soft browns and creams. The tile work was done by Dominic LaRusso and G. Pippo Sanfilippo. The building will include two golf-leaf chandeliers that were imported from Murano, Venice. The west wall, near, includes a built-in cabinet, the work of Tommy Crimi.

Curiale said that if work and material were contracted, time remodeling would cost about \$10,000.

"We hope this will prove to be an adhesive bond to bring the Italian community more closely together to carry on their Italian heritage," he said.

Residents of San Diego County who have arts, crafts and other items representative of Italian culture are invited to display them at the House of Italy, Curiale said.

"Every Italian should participate in the House of Italy because it belongs to them," Curiale said. Membership dues to join the association is \$3 a year, he said.

After the formal opening Saturday, the House of Italy will open to the public on Sunday at 1:30 p.m. A lawn program with the House of Italy participating has been scheduled at 2 p.m. Chairman is Mrs. Valla Berardinelli. The program will include singing and performing of an Italian dance.

Presiding over both programs will be Felix Motisi, president of the House of Italy.

August 20, 1973, San Diego Union, D-2:1. When the multi-media production, "Capture the Sun," is presented at Reuben H. Fleet Space Theater and Science Center, October 13, the film credit will list the associates for Contemporary San Diego; the associates group sponsored the world premiere of the theater and science center in March.

August 21, 1973, San Diego Union, B-12:1. Straws in the Wind: The premiere October 12 of the most exciting show to be presented at the Reuben H. Fleet Space Theater will benefit the educational program of the theater which is host to about 10,000 school children each month; the event will be in the form of a cocktail dinner and will feature two shows, "Capture the Sun," taken in June and July in Africa, and "Standing Up Country" (Utah, Colorado, New Mexico and Arizona); the African film, a multi-media project, covers the eclipse of the sun.

August 22, 1973, San Diego Union, B-3. Rallies push parks, land propositions.

August 24 - 31, 1973, America's Finest City Week.

August 24, 1973, (San Diego) Evening Tribune, A-7. Ford Building sought --- Flight museum's hopes fly with Proposition A bonds, by Tom Blair.

August 26, 1973, San Diego Union, A-10. Guided tours of the Natural History Museums' new Tree Walk in Balboa Park will be conducted tomorrow and Sunday by members of the San Diego Botanical Garden Foundation.

August 26, 1973, San Diego Union, B-1, B-6. Bond issues of past made dream reality.

August 26, 1973, San Diego Union, B-1, B-6. Park bonds called vital to keep quality of life, by Otto Kreisher.

August 27, 1973, San Diego Union, B-1. Proposition A can open new beach area (illus.).

August 28, 1973, (San Diego) Evening Tribune, B-1. Most primary entries back Props A, B.

Propositions A and B --- the open space and bond issues on the September 18 city primary ballot --- have been endorsed by all eight city councilmen, Mayor Wilson and 40 of the 46 candidates for city posts, according to the chairman of the bond drives.

Kenneth Rearwin said incumbent councilmen Leon Williams, Henry Landt, Maureen O'Connor, Allen Hitch, Floyd Morrow, Gil Johnson, Bob Martinet and Jim Bates favor the propositions.

Council challengers endorsing the propositions include John Sneed, district 1; Ron Breen, Lee Hubbard, Bill Martinez and Jim Wood, district 3; John Arvizu, Ted Gavett, Ray Lussa and Vic Miranda, district 5; and Larry Barnes, Jim Ellis, John Hobbs, Kenny Olson, Evonne Schultze and James Sheremeta, district 7.

All candidates for Community College Board have endorsed Props A. and B and both incumbent city attorney John Witt and challenger Jim Webb are behind them, Rearwin said.

All Board of Education candidates, with the exception of Dwight Twist, have endorsed the bond issues, he said. Rearwin said three candidates contacted for endorsements failed to respond.

Prop. A is a \$25-million bond proposition for acquisition and development of neighborhood and community parks and improvements to Balboa and Mission Bay parks.

Prop. B authorizes a \$22.5-million bond debt for acquisition and improvement of 16 community parcels and for acquisition of four major parcels.

Helen Scantlin, a candidate for councilman in the 1st district, has endorsed Prop. B. only.

August 28, 1973, San Diego Union, A-3. Proposed improvements for Balboa Park.

August 28, 1973, San Diego Union, B-1. Balboa Park projects sought; Prop. B would give \$4.5 million to beauty.

Balboa Park, long the jewel of San Diego's park system, would be further enriched with \$4.5 million in improvements if Proposition A is approved by city voters Sept. 18.

The money for Balboa Park is part of the \$25 million in proposed bond issues for parks and recreational facilities set out in the proposition, one of two on the primary election ballot.

Most of the money from Proposition A, nearly 69 percent, would go for neighborhood and community parks, bringing park facilities near to home for many more San Diegans.

The next biggest share, 18 percent, is for refinements in Balboa Park.

The \$4,529,435 proposed for the park covers projects to serve a wide spectrum of individual interests. There would be a botanical preserve and natural landscaping areas, for those who want to quietly contemplate nature. There would be jogging paths and athletic fields for more active individuals. And there would be matching funds to help provide a new home for the Aerospace Museum, which is a hit with both local residents and tourists alike.

In cast outlay, the biggest project would be at Morley Field, the spacious picnic and athletic area east of Park Boulevard. About \$1,167,975 would be spent to expand and improve this area.

Another \$33,600 is proposed to expand the men's locker room at Morley Field tennis clubhouse.

The next biggest share of Balboa Park money, \$1,011,160 is proposed for improving the irrigation, sewage and draining system and the lighting in numerous areas of the park.

A fund of \$282,075 is provided, in addition, to improve roads within the park.

Other forms of transportation also would get improved facilities. About \$453,225 would be allocated for building or improving pathways for bicycles, joggers and pedestrians throughout the park.

Passive enjoyment is the purpose of most of the other projects proposed for the park in the bond issue. Florida Canyon, the large open area between Park Boulevard and Morley Field, would be developed further into a natural botanical preserve.

Eight to 12 acres of this canyon would be developed with about \$193,475 from Proposition A. The natural chaparral growth in the area would be augmented with other native plants and trees.

Proposition A, if passed, also would provide about \$114,875 to continue the development of Gold Gulch, a rambling canyon east of the Organ Pavilion and south of the buildings along El Prado.

Desert lovers would have a mini-desert close at hand if the proposition is approved by two-thirds of the voters.

Palm Canyon, started with 1966 park bond funds, would be completed for the area northwest of the Organ Pavilion.

Another exotic area, a shade garden with a Japanese theme, would be developed in a canyon south of the House of Hospitality. An estimated \$114,875 would be spent for this area.

Rose lovers would have something to gain with an estimated \$89,875 going into continuing the development of more than two acres of rose garden, southeast of El Prado-Park Boulevard intersection.

The crowded Aerospace Museum, now jammed into the crumbling Electric Building, would have a new home with the help of \$850,000 from Proposition A.

August 29, 1973, San Diego Union, B-1. Proposition A will bring parks close to all San Diegans.

August 29, 1973, (San Diego) Independent. Richard Amero advocates defeat of Props. A because it includes provision to renovate the Ford Building.

Propositions to remodel this building were rejected by the voters in 1971 and 1972. Further decreasing the cost is not the answer.

Balboa Park's main purpose is to provide a place for recreation and relaxation in country-like surroundings. This was recognized in 1870 when the California State Legislature set aside 1,400 acres for "a free and public park" and has been conformed by park experts over the years. Twice before San Diego voters have defeated efforts to use Balboa Park land for buildings.

The 1960 Master Plan recommended tearing down the Ford Building --- because it is unsightly; adds to the congestion in the Palisades area; and occupies land that would be better used as a scenic overlook with a fountain centerpiece.

Scaled-down, low-cost plans for reconvertng the Ford Building will not produce a building serviceable by the Aerospace Museum without costly and extended modifications.

August 30, 1973, San Diego Union, A-3. Mission Bay, Beach proposed improvements.

August 30, 1973, San Diego Union, B-1. Mission Bay Park aided by Proposition A; \$3.3 million in further developments face decision by city voters September 18.

August 30, 1973, San Diego Union, B-16. Sunbathers seek defeat of Proposition A.

August 31, 1973, (San Diego) Evening Tribune, B-1. \$17 million for 60 neighborhoods; Proposition A provides parks close to most city homes.

August 31, 1973, San Diego Union, A-3, B-5. Ford Building in your future; Aerospace home sought.

August 31, 1973, San Diego Union, A-12:1. Beginning September 4, the Reuben H. Fleet Space Theater will offer shows weekday and Sunday afternoons, all day Saturday, and each evening; an additional 9:30 p.m. performance will be scheduled Fridays and Saturdays; the current summer schedule features wraparound screenings of "Voyage to the Outer Planets" and "Garden Isle"; Monday through Saturday at 10:30 a.m. and 11:30 a.m. and hourly from 1 to 4 p.m. with Sunday performances hourly from 12:30 to 4:30 p.m.

September, 1973, San Francisco Magazine. Letter comparing Golden Gate and Balboa Parks.

Lawrence Siegel's article, "The Guardian of Golden Gate Park" (July '73), describing the activities of Ray Clary, accurately assesses the situation not only for Golden Gate Park but for other parks as well. I note that Mr. Clary acts as an individual, not as a member of a committee.

Balboa Park in San Diego, originally laid out in 1903 by Samuel Parsons, Jr., after consulting John McLaren, is an example of what can happen to a municipal park when professional advice is ignored. The original 1400 acres has been whittled down to little over 1000. Acreage given away to such worthy groups as the campfire girls, boy scouts, etc., to high schools, a hospital, a fenced-in zoo, golf courses, museums, theaters, conference rooms, assembly halls, roads and parking lots reduce the free and public park given to San Diego by the California State Legislature of 1870-71 to minuscule proportions.

The pedestrian cannot walk the entire park as he can Golden Gate or Central Park as the fragmentation has destroyed all sense of unity. Through ignorance, lack of money, a failure to appreciate nature, and the misapplied zeal of committees, made up of the park's self-styled "protectors," San Diego's great park is now "a city within a city." Year by year the museums continue to grow, and the lawns, canyons, ridges and mesas disappear or are bulldozed into plastic and tame mediocrity.

September 1, 1973, San Diego Union, B-3. The city has received an estimated \$2.5 million in gifts from citizens since 1966, City Manager Moore has reported.

And in order to promote more gift revenue to the city, Moore has told the City Council he is recruiting a full-time endowment officer.

September 3, 1973, San Diego Union, B-1. Needed --- path to fun, health; routes must satisfy hiker, jogger, cyclist.

September 3, 1973, San Diego Union. EDITORIAL: Prop. A Is "Good Buy"

The bond issue (Proposition A) will be reflected in the city tax rate. Nothing worthwhile is free. However, the city is retiring old bond issues regularly, and the city auditor estimates that adding this bond issue will not increase our total bond obligation above a "ceiling" set back in 1966.

September 5, 1973, San Diego Independent. EDITORIAL: Byline by Lil Wagner, managing editor.

The proponents of this bond issue (Proposition A) would have you believe that the acquisition of even more land will give San Diegans a better quality of life. Isn't it just possible that this better quality of life could come from having a few more dollars to spend as the individual might desire?

September 6, 1973, (San Diego) Evening Tribune, B-1. Improvements slated at lakes under Proposition A, by Tom Blair.

September 7, 1973, (San Diego) Evening Tribune, A-13. Sunbathers push effort to "Save Black's Beach," by Tom Blair.

September 7, 1973, (San Diego) Evening Tribune. EDITORIAL: Prop. A would give 'backbone' to San Diego park system "by making funds available for development of 60 neighborhood and community parks over the next five years."

September 7, 1973, San Diego Union, B-1. One hundred and twenty-four directional makers placed in Balboa Park to guide tourists to attractions. The signs cost \$26,400 and were designed by artist W. Noonan (illus.)

September 7, 1973, San Diego Union. James L. Jordan considers Mission Bay park to be a "dream of corporations; urges "No" vote on :Prop. A.

September 7, 1973, San Diego Union. Letter, James L. Jordan: "Now they are asking Joe to develop the unsightly mud flats adjacent to Hilton's Inn. Think about it Joe when you vote on Proposition A."

September 8, 1973, San Diego Union. Letter, H. E. Kennedy urging "No" vote on Props. A and B because of his disagreement with city zoning practices and the selling for non-park purposes of Pueblo lands.

September 9, 1973, San Diego Union. Proposition A would produce parks for senior citizens.

September 10, 1973, San Diego Union, B-1. Aerospace Museum seeks home in Ford Building, by Peter H. Brown.

September 11, 1973, (San Diego) Evening Tribune, B-1. Nude sunbathers relax efforts to defeat Proposition A, by Tom Blair.

September 11, 1973, (San Diego) Evening Tribune. Mrs. Athlene Villarino opposes bond propositions: With the high cost of food, housing and other necessities, many people on limited income are forced to sell, not maintain, lose their homes, rent slums and live frugally because of high taxes.

September 12, 1973, (San Diego) Evening Tribune, A-13. Meeting halls, game areas planned; Proposition A offers special senior citizen facilities, by Tom Blair.

September 12, 1973, (San Diego) Evening Tribune. Neil Morgan on origin of name for Black's Beach.

September 12, 1973, (San Diego) Evening Tribune. Robert L. Reyburn writes the high rate of unemployment will not be alleviated by buying land for parks if you have no job or money to live here.

September 12, 1973, (San Diego) Independent. Edith J. Pearman wants Props. A and B defeated; says "free funds" from the state and federal governments are not free.

September 12, 1973, (San Diego) Independent. Robert L. Reyburn writes kill the bond issues of you want to be able to own your home, else taxes will take it.

September 12, 1973, (San Diego) Independent. Letter, George w. Tyler and Viola M. Tyler: Milch has said "this is the kind of campaign that's like giving a child medicine. You know it's good for them, but it's hell getting them to open their mouths and forcing it down their throats."

Do we want or need one of this attitude and caliber looking out for our best interests? I think not.

September 12, 1973, San Diego Union, B-2. Black's Beach regulars ease Proposition A war.

September 12, 1973, San Diego Union, B-3. La Jolla Town Council backs Propositions A and B.

September 12, 1973, San Diego Union, B-3. Black's Beach sanitation peril cited.

September 12, 1973, San Diego Union, B-6. City council candidates list gifts, expenses.

September 13, 1973, (San Diego) Evening Tribune. Peter Nelson writes the San Diego chapter of the Sierra Club supports Propositions A and B.

September 13 1973, San Diego Union, B-14. EDITORIAL: Muddying the Waters

Those urging a “no” vote on Proposition A next Tuesday to “save” Black’s Beach in La Jolla are muddying the water. Save it for what! For whom?

September 14, 1973, (San Diego) Evening Tribune, A-27. Installment plan for parks; it’s a matter for your interest.

September 14, 1973, (San Diego) Evening Tribune. Lt. Col. R. C. Vancey, Retd., writes of opposition to Props. A and B.

To date the income from the stadium has just covered the operating expenses. The interest and bond retirement has been paid by the homeowner taxpayers to the tune of millions.

There is no iron-clad guarantee that Props. A and B will not be on the back of the homeowners.

September 14, 1973, (San Diego) Evening Tribune. George T. Burham reiterates his opposition to Beach plans.

There will never be beach-level parking at Black’s Beach. Black’s is also narrow, dangerously close to occasional rocks falling from the cliffs.

September 14, 1973, (San Diego) Evening Tribune. EDITORIAL: How to save Black’s Beach.

It is not necessary for those who want the opportunity for nude bathing in the Pacific to oppose the entire bond issue in order to stop plans for a road and a parking lot at Black’s Beach.

September 14, 1973, San Diego Union. Violet Beck does not like high-rise close to Grant Hill Park.

September 14, 1973, San Diego Union. Gregg Chipps wants Prop. B. passed because it will protect canyons.

September 14, 1973, San Diego Union. Marianne C. Hale claims Prop. B is only for “privileged” areas, such as Tecolote Canyon.

September 14, 1973, San Diego Union. Fred Bowles asks why the city should acquire more beaches when it cannot service the ones it already has.

September 15, 1973, San Diego Union. Helen D. Edmonds writes changes to Mission Bay have been made to benefit tourists and hotel owners rather than San Diego residents.

September 16, 1973, San Diego Union, B-7. Growth issue is election key.

September 16, 1973, San Diego Union, C-3. Drawing by Dr. Seuss (Theodore Geisel) of La Jolla in support of Propositions A and B.

September 16, 1973, San Diego Union, E-1. 24th Globe season . . . Dynamite, by Welton Jones.

“Hamlet,” “Twelfth Night,” and “Troilus and Cressida” will be the plays making up the Old Globe’s Silver Anniversary season next summer.

September 17, 1973, San Diego Union, A-19. ADVERTISEMENT: Vote Yes on September 18.

September 17, 1973, San Diego Union, 11:1-2. Two new attractions will be presented at the Reuben H. Fleet Space Theater and Science Center this week: "Journey From Infinity," a production by the center's staff dealing with the creation of the universe, and the award-winning Cinerama feature, "A Place to Stand" will be screened at 1, 2:20, 4, 7:30 and 8:30 today through Friday, September 21.

September 17, 1973, San Diego Union, D-2:6. A volunteer auxiliary to the Reuben H. Fleet Space Theater and Science Center, "The Satellites," will be formed at a meeting at 10 a.m. today at the lecture hall of the center; Mrs. Thompson Fetter will serve as organizing chairman; interested women are invited.

September 18, 1973, ELECTION: Proposition A --- Park and Recreation Bonds (\$25 million --- 69% for neighborhood parks, 18% for Balboa Park, 13% for Mission Bay Park)

YES	61,794 (54%)
NO	52,585 (46%)

Proposition B --- Use of two-thirds of City's Environment Growth Fund, derived from Gas & Electric franchise fees, to pay debt service on bonds used to acquire, improve and maintain reserve park lands for park and recreation purposes

YES (56.1%) Failed.

September 19, 1973, (San Diego) Evening Tribune, A1. Bond issues rejected by city voters, by Tom Blair.

September 20, 1973, (San Diego) Evening Tribune, C-9. Park and Recreation Board approves plan to close most of El Prado and to construct a new south road from the east end of Cabrillo Bridge to Pan-American Road East (connecting to parking area north of the Spreckels Organ).

September 20, 1972, San Diego Union, B-1. Proposition Losses renew talk, two-thirds vote issue backed, by Otto Kreisher.

September 21, 1973, (San Diego) Evening Tribune, B-1. Skinny-Dip Tiff Goes to State Level, by Tom Blair . . . Committee to Save Black's Beach won a battle with the city Tuesday by helping to defeat Proposition A.

September 21, 1973, (San Diego) Evening Tribune, B-2. EDITORIAL: Defeat of Props. A, B crimps city's future: Only 34 percent of the city's registered voters went to the polls Tuesday. That made it possible for 12 percent of the electorate to veto the bond issues.

September 21, 1973, San Diego Union, B-1. New state law aids city in park financing; majority votes to suffice, by Donald H. Harrison.

Legislation signed into law by Governor Reagan yesterday provides the City of San Diego with a new vehicle for financing the purchase of recreational park land.

As a result, Mayor Wilson said yesterday, a new ballot measure for land purchase may come as early as next June.

The land could be acquired by majority vote of the people, instead of the two-thirds vote requirement which torpedoed a \$25 million bond issue last Tuesday, under the legislation by Senator John Stull, Rep., Leucadia, which goes into effect January 1.

Local agencies long have been empowered to form joint power agencies, but never before for the acquisition land by revenue bond, Stull said.

September 21, 1973, San Diego Union, B-6:2-4. The "Big Bang" birth of the universe, as it is thought to have happened approximately 13 billion years ago, is re-created in a new multi-media show at the Reuben Fleet Space Theater; the program, called "Journey from Infinity," is the first in the new Balboa Park planetarium that features the theater's one-of-a-kind star projector; the show was added early this week to the regular bill, giving visitors a triple feature, together with "The Golden Isle: and "Voyage to the Planets."

September 21, 1973, San Diego Union, B-10. EDITORIAL: Serious Setback.

Historically, bond issue proposals fare best in elections in which there is a heavy turnout of voters. This raises the possibility that our city park program might yet be salvaged if offered to voters next year when there will be state and federal elections.

September 23, 1973, San Diego Union, D-2:2-3. The Reuben H. Fleet Space Theater and Science Center will benefit from a "Gala Dinner and Premiere" to be held October 12; Mrs. Philip M. Klauber is chairman and Mrs. Machlin B. Laddon, cochairman of the black-tie event which will benefit educational programs produced by the center; the party begins with a 6 p.m. reception in the Majorca Room of Casa del Prado, Balboa Park, where dinner will be served at 7 p.m.; the premiere at 8:30 p.m. at the Center will present two new films, "Capture the Sun" and "Standing Up Country.

October 4, 1973, San Diego Union, B-5. Supervisor Lee Taylor seeks beach nudity ban.

October 7, 1973, San Diego Union, B-3:1-2. Theater director Michael Sullivan is confident that audiences will be pleased, if not mildly stunned, when they view the documentary film, "Standing Up Country"; the wrap-around picture creates an effective illusion of depth and in a sensory way tends to project viewers into the scene; the film opens in the park planetarium on October 18; the film was made by Roger Tilton's filming crew and involved at least five full weeks on location in Utah, Colorado, Arizona and New Mexico; article by Cliff Smith.

October 8, 1973, San Diego Union, B-4:2-3. A new planetarium spectacular will open October 13 in Balboa Park's Reuben H. Fleet Space Theater, it was announced yesterday; W. Michael Sullivan, executive director of the theater, said the new shows are titled "Standing Up Country" and "Capture the Sun."

October 13, 1973, San Diego Union, B-15:3. An \$806,000 project to develop recreational facilities around Morley Field has been approved by the City Council; 48 acres are involved. Grading at the site, in the park's northeast section, has been completed; the expenditure will build 5 baseball fields, a multi-purpose sports field, a fishing pond, an archery range, a parking lot, and an access road.

October 14, 1973, San Diego Union, B-8:5. Computer Talk Set: Registration is underway for the astronomy and computers fall education series at the Reuben H. Fleet Space Theater and Science Center in Balboa Park.

October 28, 1973, San Diego Union, E-1:1-5. "Capture the Sun," a new film at the Reuben H. Fleet Space Theater, captures the imagination, article by Cliff Smith.

October 30, 1973, (San Diego) Evening Tribune. Balboa Park celebrates 105th birthday on Sunday.

November 1, 1973, San Diego Union, 14:2. Strews in the wind: Mrs. Merlin H. Gale is chairman of the benefit premiere to be given at the Reuben H. Fleet Space Theater November 9 at 6:30 p.m., after a 5:30 p.m. reception; the current shows "Standing Up Country" and "Capture the Sun," will be presented for the first time in Spanish and the premiere will help supply other Spanish language films for the theater; the Department of Tourism of Baja California is assisting with the premiere, which is being cosponsored by the department.

November 2, 1973, San Diego Union, C-1, B-2. Committee of 100, Park . . . Synonymous by Noel Osment.

November 2, 1973, San Diego Union, D-1. Public remains in dark (over city's negotiations with Padres), by Jack Murphy.

The cost to the taxpayers for debt service on the stadium is around \$1.2 million annually. In a narrow sense each of the three tenants --- Padres, Chargers and San Diego State University Aztecs -- - cost the community \$400,000 annually. But the facility and the teams, even poor teams, enhance the community and the stadium was built after a landslide election mandate of 73 percent.

The view here is that the stadium is a public service and at least as worthwhile as golf courses, tennis courts, libraries and public parks.

"Yes," says one of a differing view, "but libraries don't threaten to leave town if they are disappointed by attendance."

November 3, 1973, Weekender Independent. Balboa Park will have 105 candles on tomorrow's birthday cake; city to honor favorite landmark (illus.).

November 3 - November 17, 1973. Door. Balboa Park, by Lee Anne Wynn (map show the proposed new roads)..

Come January, Balboa Park may be on its way out, if bulldozers begin to dissect the land in preparation for two new roads.

November 4, 1973, San Diego Union, E-1, E-3. San Diego Parks, not just a summertime thing, by Jeannette Branin.

A modern philosophy of park usage is voiced by members of the park department.

"If kids want to play touch football on the lawns, fine. If they wear the lawn out, we send out a maintenance crew to keep it in reasonable condition, but we don't drive the kids away, Parks are for people," said Dave Roberts.

November 5, 1973, San Diego Union. A happy day at the park; dancers, clowns on hand for 105th fete, by Lee Grant (illus.).

November 5, 1973, San Diego Union, D-1:6-7. Getting film crews to locations from Stonehenge to Kenya was just part of the work for Helen Azevedo in preparing for the two new shows at Reuben H. Fleet Space Theater and Science Center; her name appears in the credits as film production coordinator for "Standing Up Country" and "Capture the Sun," along with those of two other women --- Ruth White, writer of the music score, and Veronica Tagland, artist for the latter film, article by Rita Gillson.

November 18, 1973, San Diego Union, G-1, G-2. Two canyon Trails open today in Florida Canyon; for natural park fans, by Craig MacDonald.

Mrs. Helen Witham, associate curator of botany for the Museum of Natural History, said Florida Canyon provides "the only natural area left in Balboa Park. It is typical of a San Diego canyon 500 years ago."

November 24, 1973, (San Diego) Evening Tribune. J. L. M. declares the Aero-Space Museum is a fire hazard.

I call upon the City Council to vote the necessary funds to renovate the Ford Building for the Aero-Space Museum before it is too late. Public-spirited labor unions have agreed to donate their time to help this job. Now it is up to the contractors to offer free material and thus relieve the cost.

If you want the park to remain unblighted by roads and parking lots, voice your dissent via letter to the Councilman. And sign the petitions which are currently circulating.

November 26, 1973, San Diego Union, B-3. Park Plans take "tern" --- A leading protector of least terns has asked the San Diego Coast Regional Commission to revoke a permit for landscaping in Mission Bay Park.

November 26, 1973, San Diego Union, B-6. County supervisors have scheduled a December 6 conference to hear a staff report on implementing a federal matching funds program for acquiring and developing park land.

November 27, 1973, San Diego Union, B-6. Paid: "An Open Letter to Mayor Wilson and City Council of San Diego," from Frederick Schnaubelt, President, Taxpayers Concerned.

How many Schools, Parks and Libraries could be built with the millions of dollars misappropriated from city employees retirement fund for the downtown Convention Center that for 3 years had virtually no conventions?

November 28, 1973, (San Diego) Evening Tribune, A-21. Owners of almost 50 percent of property within a proposed special park assessment district in the Navajo Canyon area have signed petitions supporting the park plan and asked for city action on it.

November 28, 1973, San Diego Union, B-3. Los Angeles --- A land merger between San Diego State University and the state Department of Parks and Recreation could result in the establishment of a 5,000-acre state park near Temecula on the Riverside-San Diego County lines.

November 30, 1973, (San Diego) Evening Tribune, A-20. The City Council yesterday authorized construction of a recreation area for the handicapped in Presidio Park.

November 30, 1973, (San Diego) Evening Tribune, B-1. County's park program termed "out of touch," by Tom Blair.

December 3, 1973, San Diego Union, B-3. San Diego County officials say they are moving ahead with plans to expand El Monte Regional Park four miles east of Lakeside to relieve overcrowding on weekends.

December 4, 1973, San Diego Union. Letter, Thomas L. Baxley, Jr. praising Donald Dierks' suggestion that San Diego build a new theater for the performing arts; perhaps COMBO should take on the new theater as a project.

December 5, 1973, San Diego Union, B-16:1. Nicolaus Copernicus, Polish astronomer, was remembered yesterday by 250 youngsters who attended a birthday party in his honor at Reuben H. Fleet Space Theater and Science Center; the party marked the opening of a Copernicus exhibit at the Space Theater, here through January 20.

December 7, 1973, San Diego Union, D-7:7-8. Retail trends: The gift shop in the Reuben Fleet Space Theater has about the most outstanding collection of both "executive toys" and educational kits for kids with inventive minds, in San Diego; the educational/experimental gifts for kids include a variety of science kits such as Experiments in Optics, Experiments in Electronics, Experiments in Aeronautics, etc.; the optical lab alone has 135 experiments with 114 precision components.

December 12, 1973, San Diego Union, B-13. Sports should not be subsidized, by Mac Strobl, manager of the San Diego Taxpayers Association.

The San Diego Taxpayers Association appeared before the Board of Supervisors in opposition to county acquisition of the Sports Arena, noting that public tax dollars should not be used to subsidize professional sports.

December 12, 1973, San Diego Union, B-13. Government can be part of team, by Jim Bear, representative of the 4th District, County Board of Supervisors.

The question is not whether government should become involved in professional sports.
Government participation in sports is a reality.

December 17, 1973, (San Diego) Evening Tribune, B-8. The Café del Rey Moro, which has been closed since Thursday, is expected to reopen this week under new management.

December 19, 1973, (San Diego) Evening Tribune, B-10. The City Council was told yesterday that the city would be liable for any damages that might result from exploding bombs or other ammunition that may still be buried on the 141 acres donated by the federal government, a former artillery range for Camp Elliott.

December 22, 1973, (San Diego) Evening Tribune, A-7. Former Atlas Hotels executive John E. Cox has taken over management of the Café del Rey Moro in Balboa Park.

December 26, 1973, San Diego Union, B-1. Council approves playground plan for Balboa Park.

The City Council has approved a construction contract to convert a former landfill in the eastern portion of Balboa Park into a tree-studded playground next year.

The council authorized Mailcraft, Inc. to use \$739,000 to build 48 acres of new recreational facilities in the Gold Gulch-Pepper Grove area of the park, the undeveloped section of the park south of Morley Field [sic].

The project, expected to be completed within seven months, is located between Upas Street, Florida Street and Pershing Drive and will contain baseball fields, an archery target range, a fly-casting pool for fishermen, a 265-space parking lot, about 20 new trees and other landscaping and a children's play area.

The only other development in the eastern portion of the park is around the north end of Morley Field, where a swimming pool, tennis and shuffleboard courts have been developed.

The new development will extend from Morley Field south to a point east of Zoo Place.

December 30, 1973, San Diego Union, B-1:3-4. A Renaissance faire featuring medieval entertainment yesterday helped swell attendance at the Reuben H. Fleet Space Theater to more than 2,500 for the third day in a row; the Renaissance faire and an exhibit commemorating the 500th anniversary of the birth of Copernicus may help the new facility in Balboa Park rank among the nation's top five planetariums in popularity, assistant director Bill Bridge said.

1974

Summary of Events in 1974

(Note: Dates of events are approximate only.)

Naval Hospital proposal to build hospital in Murphy Canyon (April 8, 1974)

East (Gildred-Parker-Grant) Wing of Fine Arts Gallery dedicated (April 19, 1974)

Pauline des Granges retired as San Diego Park and Recreation Director
(April 19, 1974)

School Board got 50-year lease on site for San Diego High School in Balboa Park
(April 13, 1974)

Park and Recreation administrative personnel moved to Balboa Park
(July 9, 1974)

America's Finest City Week Festival in Balboa Park.(August 16 - 18, 1974)

Virgil Fox at Organ Pavilion (August 27, 1974)

Rose Garden plans (September 15, 1974)

Toiletcas in Aztlan Mural dedicated (September 8, 1974)

Gold Room, House of Hospitality, remodeled as cocktail lounge
(September 15, 1974)

Mini-bus service to Balboa Park (November 10, 1974)

City Council designated Ford Building for use as an aerospace center
(December 9, 1974)

January 1, 1974, San Diego Union, B-12:1. The Reuben H. Fleet Space Theater, which has had 325,000 visitors since opening in March, is proving to be one of the nation's most popular planetariums; W. Michael Sullivan, executive director of the facility, said the attendance figure includes 21,130 students in school science programs and "it doesn't include 24,000 people who have attended our Science Center"; last year Griffith Observatory in Los Angeles and Adler Observatory in Chicago has about 300,000 visitors, Sullivan said.

January 2, 1974, San Diego Union, B-2:3. Special briefings on Comet Kohueteh will added to all Reuben H. Fleet Space Theater shows next week; the theater also announced plans for a comet viewing party open to the public.

January 5, 1974, San Diego Union, B-2. Permanent park buses proposed.

Balboa Park's shuttle tram service has been a success and city officials yesterday recommended that a permanent intra-park bus service be provided.

Deputy City Manager John Lockwood told councilmen in a report that extending a new San Diego Transit Corp. mini-bus route into the park next spring would be the least expensive way to provide a permanent shuttle service.

In the interim, the city ought to spend \$1,500 to purchase the four trams in use since last summer to haul people from parking lots to El Prado, the park's center, Lockwood said.

The trams have carried nearly 57,000 people since they became operational in July, Lockwood said, shortly after the council banned automobile traffic from El Prado.

If the bus or tram won't do the job, the city could spend much more money on transportation systems, Lockwood reported, outlining a \$7 million subway monorail system for a \$2 million sidewalk moving mechanism.

In any event, the city should invest the \$1,500 because the bus company won't have its 33 new mini-buses available until spring, Lockwood said. Since these buses, seating 25 to 30 persons will be utilized in the downtown and immediate areas, a short loop through Balboa Park would fit in perfectly, he said.

This could save the city at least half what the present system cost, about \$154 per day.

The trams are currently being used on weekends only after having run daily during the height of the tourist season. Because of the demand, "it is our view that a permanent system should be installed," Lockwood reported.

A \$3.5 million subway system paralleling El Prado is feasible, Lockwood said. A monorail, connecting parking lots at the Zoo, Organ Pavilion and President's Way could also be provided at an estimated cost of \$4.2 million.

January 7, 1974, San Diego Union, D-1:2-5. Now on display at the Reuben H. Fleet Space Theater and Science Center are winning entries in its "Magic Sky" drawing contest; winners with their entries from Palisades Pre-School are Tracy Hyde, 4, and Mark Dunlap, 4; first grade divisions winners were Tricia Green, Mason Elementary, and Mark Thomas, Bayside; the children drew whatever they imagined as a "Magic Sky," the sun, the moon and the planets.

January 8, 1974, San Diego Union, B-3. Starlight Operetta searches for home; new site in park proposed, by Michael Grant.

Even though there are three amphitheaters in the city, the Starlight Operetta does not have a good place to stage its summer productions, its president told the Balboa Park Committee yesterday.

Bruce F. Farley, president of the San Diego City Light Opera Association, asked the committee if it might consider building a new amphitheater somewhere in the northern section of Balboa Park, possibly in Florida Canyon.

Committee members replied that they probably would not consider such a project, and certainly not in Florida Canyon.

"That would generate a storm of protest," Dr. Bob O'Brien told Farley.

"The committee has been on record for a long time as favoring the preservation of Florida Canyon," added Mrs. Delza Martin.

Without taking any official action, the committee suggested Farley ask the San Diego Zoo to let Starlight use the Wegeforth Bowl, its home until two years ago.

A Zoo spokesman said Starlight was asked to leave Wegeforth Bowl because it was creating difficulty with the daily presentation of the Zoo's shows.

Farley said he queried the Zoological Society last fall about using Wegeforth Bowl for the 1974 Starlight season and received a negative response.

The Zoo spokesman said Farley had been informed that the operetta productions were not compatible with the regularly scheduled seal shows.

Individual committee members said they would sent letter to the Zoological Society urging rapport with Starlight, and committee chairman, Colonel Irving Solomon, said he would raise the subject at the next meeting of the Zoo's exhibit committee, of which he is a member.

Farley said the Wegeforth Bowl was the only one now in existence where the Starlight could make a profit.

The Greek Bowl at San Diego State University, where Starlight has been produced since it left Wegeforth Bowl, has proven unsatisfactory, Farley said, because it is too deep.

"Moving sets in and out was a logistical nightmare," he said, and older persons, the backbone of Starlight audiences, did not like the steep aisles. The Greek Bowl's location also was not attractive to the tourist trade, Farley said.

He described the Ford Bowl, at the southwest corner of Balboa Park, as the ideal location for an outdoor musical if it were not for one thing, a steady stream of jets passing low overhead toward Lindbergh Field.

He said any location in Balboa Park north of the south boundary of the Zoo would be far enough removed from the landing pattern to allow a successful presentation.

January 10, 1974, San Diego Union, B-3:5. About 100 elementary school students escaped the confines of the earth to visit its sister planets yesterday --- but never left the soft-cushioned seats of the Reuben H. Fleet Space Theater in Balboa Park; the pupils from Encanto, Rancho Santa Fe and Lincoln Juarez schools were the first to preview the theater's show, "Other Worlds, Other Life."

January 10, 1974, San Diego Union, D-7:4-5. Unidentified flying objects are explored in a new multi-media show being added to the regular program of the Reuben H. Fleet Space Theater in Balboa Park; the added feature, "Other Worlds, Other Life," will run for five days starting Monday; W. Michael Sullivan, executive director, said background and research on previous UFO sightings are given as well as the proper procedures for reporting suspected USO phenomena.

January 13, 1974, San Diego Union, B-4:1. The Hall of Science has received a \$38,272 grant from the City Council to help clear a first year debt for Balboa Park's new Reuben H. Fleet Space Theater; a late opening date last year caused a \$75,000 net deficit for the Hall of Science during 1973, according to planetarium and city officials; the city last year agreed to subsidize the \$4.5 million facility with \$200,000 for the first year; it is projected that attendance will eventually make the theater completely self-supporting, officials said.

January 13, 1974, San Diego Union, D-1. Retired citizens aid in park activities, by Rita Gillmon (illus.).

January 20, 1974, San Diego Union, B-1, B-2. Natural History, People Planning Makes Museum Center for Fun, by Jeannette Branin (illus.).

January 22, 1974, San Diego Union. Mayor Wilson asks cooperation as paper project begins; program will extend life of city's three landfill sites (illus.).

January 25, 1974, (San Diego) Evening Tribune. Letter, George F. Burger deplores the Park and Recreation Department cutting a small group of trees next to the comfort station out in Morley Field where the new little league baseball fields are planned.

January 26, 1974, San Diego Union,. Children's gardening class et sponsored by the San Diego Botanical Garden Foundation (illus.).

January 28, 1974, San Diego Union, B-4. The state plans to spray parts of Balboa Park again in May to make sure the destructive Japanese beetles have been destroyed.

January 31, 1974. National Register of Historic Places Inventory --- Nomination Form: California Quadrangle; prepared by James A. Lester, Coordinator, Intergovernmental Relations, City Manager's Office, San Diego, Calif.

January 31, 1974, San Diego Union, B-1. Plan okayed to protect canyons; Council action focuses on 11 periled areas, by Otto Bos.

January 31, 1974, San Diego Union, B-3. City Council sets Balboa Park tram fares; a dime should be charged until San Diego Transit Corp. provides a minibus loop through the area this fall.

February 1, 1974, San Diego Union, A-15. Starlight is looking at Balboa Park Bowl as a site for its 1974 summer season of musicals.

February 1, 1974, San Diego Union, C-3:6-7. City staff members were authorized yesterday to seek action on contracts for the completion of projects at the Reuben H. Fleet Space Theater; by a 3-0 vote, the San Diego Planetarium Authority ordered the staff to notify Spitz Laboratories, Inc., that if contracted work at the theater was not completed immediately, three contracts totaling more than \$300,000 could be declared in default.

The contracted work was for a new dome in the theater, a multimedia control system and space transit simulator equipment. Bill Gerhardt, construction director for the city, said. All of the projects should have been completed last year, he said.

The authority's vote represents the first step in legal proceedings in an attempt to get Spitz to complete its work according to contract specifications, Gerhardt said.

The contractor will be notified today of the authority's action, he said.

The city staff also was authorized to request the City Council to find the contract in default. if necessary giving the city attorney the power to start legal action against security bonds posted by Spitz Laboratories, Gerhardt said.

In the meantime, the city and the San Diego Hall of Science have withheld more than \$100,000 from the contractor until projects are completed.

Gerhardt said Spitz completed work on the theater's dome, but not within the specifications of the contract. Work on the multimedia project and the simulator equipment is near completion, but behind deadline, he said.

"The trouble is a thing like that is either completed or not completed. Either you can use it or not," Gerhardt said.

In other news, facility executive director W. Michael Sullivan predicted attendance figures for the first year of operation will be the highest in the nation.

The theater will have attracted more than 400,000 customers by its first anniversary, according to his projections, "making us the No. 1 drawing facility in the country," Sullivan said.

February 1, 1974, San Diego Union, B-3. Action on plans to build homes in a portion of Tecolote Canyon was delayed for at least four months by the City Council yesterday to permit nearby residents a chance to save the area as an open-space park.

February 2, 1974, San Diego Union, B-8:3. The Reuben H. Fleet Space Theater and Science Center in Balboa Park will bring a policy of one weekly presentation in Spanish tomorrow at 11 a.m.; Spanish soundtracks for the current features at the theater --- "Standing Up Country" and "Capture the Sun" --- will be offered each Sunday at 11 a.m., under a grant from the National Endowment for the Arts, according to Michael Sullivan, executive director.

February 3, 1974, San Diego Union, B-4. Camellias on display at the 27th annual show of the San Diego County Camellia Society in the Conference Building.

February 3, 1974, San Diego Union, B-4. The San Diego Zoo is operating on the spring schedule and the gates will remain open an hour later daily; gates will close at 5 p.m.

February 10, 1974, San Diego Union, E-1. The people who donate time, money, by Craig MacDonald . . . John D. Spreckels, George W. Marston, Dr. Harry M. Wegeforth, E. W. Scripps, Dr. Edgar L. Hewett, et al (illus.)..

February 14, 1974, San Diego Union, C-21. Five family history research sessions, sponsored by the San Diego Genealogical Society, will begin February 16 in the Puppet Theater.

February 15, 1974, San Diego Union, B-2. The City Council yesterday approved \$40,000 in federal revenue-sharing funds for distribution to the city's six museums.

February 17, 1974, San Diego Union, B-7:3. Free showings of a new documentary film depicting Mars will begin Tuesday, February 19, and continue through February 28 in the lecture hall at Reuben H. Fleet Space Theater and Science Center; the motion picture "Mars --- the Search Begins," was produced by the National Aeronautics and Space Administration and the Jet Propulsion Laboratory in Pasadena; the film is to be shown on a limited seating basis on weekdays at 3 and 7:15 p.m. and on Saturday and Sunday at noon, 3 p.m. and 6:30 p.m.; the lecture hall seats 100 persons.

February 17, 1974, San Diego Union, G-8. A Few Men Worked Miracles --- San Diego Zoo. Museum of Man, Reuben H. Fleet Space Theater and Science Center.

Not far from the Museum of Man is the Reuben H. Fleet Space Theater and Science Center, which came into being because of the efforts of a group who wanted to design a planetarium unlike any existing one.

Dr. J. C. Almy Harding, said in an earlier interview, that the start of the project came in the ruins of San Diego's World War II defense industry.

If it had not been for the post-war recession, TESSIE (Technical and Scientific Societies Council), may not ever have been created.

"Chamber of Commerce president Albert Reader asked Dr. Bernard Gross to form the group to help cope with local economic problems," Harding recalled.

"One thing that came out of TESSIE was the idea of creating a scientific and technical museum. The name, selected in 1947, was the Hall of Science and Industry," he said.

Although the scheme died, members of TESSIE formed the nucleus of the world's first true space travel simulator. The successful planetarium movement waited until 1956 before catching the public's attention again.

In 1956, Dr. Glen Havens and Robert J. McPherson proposed to build a science museum for teenagers. Joseph Dryer added a plan for a planetarium.

On March 20, 1957, a public meeting was held in the San Diego Hotel to discuss the museum and planetarium ideas. Several people who attended became directors of the San Diego Hall of Science and Industry, Inc., the governing body of the center and of the city-county Planetarium Authority.

Havens became the first president of the organization on August 7, 1957, and two days later it became a non-profit corporation.

Financing and other problems delayed the group's plans, allowing two creative men to add their skills to the planetarium projects.

Dr. Edward Creutz, a nuclear physicist and James Crooks, Jr., an electronics engineer, conceived and developed the idea of building the planetarium with the dome tilted downward before the audience.

Crooks is further credited with creating the idea to bring all of the equipment under the control of one computer.

Planetarium authorities today speak of the titled-dome concept as the "Creutz effect," in honor of the scientist.

However, one of the major obstacles was financing and it was not until the 1970s that the theater-science center became a reality.

In 1971, \$3 million of revenue bonds were sold in San Diego to pay for construction and furnishings. An additional \$1.5 million was needed for the theater's equipment and operating expenses.

Much of this money came from Reuben H. Fleet, a distinguished aeronautical pioneer, and his family who donated \$400,000, which was matched by the Fleet Foundation.

The theater, with its awesome 76-foot geodesic dome, largest in the United States, and the science center are open from 10 a.m. to 8:30 p.m. daily.

February 22, 1974, (San Diego) Evening Tribune. Letter, D. J. says the bulk of 3.8 acre Mt. Etna Park in Clairemont has been given to baseball (3.3 acres); City says \$70,000 is being spent to improve the park, yet the parking lot is almost as big as the park.

February 24 1974, San Diego Union. Letter, William J. Sambieda, La Jolla, lauds facilities (zoo, mime performance in front of art museum, smiling and happy people) in Balboa Park.

February 24, 1974, San Diego Union, E-3. Ephraim W. Morse, the "Father" of Balboa Park, by Craig MacDonald . . . (mostly about the history of Balboa Park, not much about Ephraim W. Morse).

February 28, 1974, (San Diego) Evening Tribune, B-10. The City Council has agreed to study the legal and financial problems of renovating the Ford Building as a historic site and possible future home of the Aerospace Museum.

The building . . . was designated a historical site in 1972 by the city Historical Site Board and is listed on the National Register of Historic Places with the Department of the Interior.

February 28, 1974, San Diego Union, B-1. A new search for money to refurbish the Ford Building was begun yesterday by the City Council.

February 28, 1974, San Diego Union, B-3. City Parks and Recreation Director Pauline des Granges yesterday announced her retirement after 33 years of service and nine and one-half years as the recreation chief for the city; Ed Mendoza of the city street's division will take over the post in April.

March 7, 1974, San Diego Union, C-16. The Chicano Cultural Arts Center in Balboa Park may get a face-lifting --- maybe even a whole new multi-colored face.

Balboa Park Committee members have approved in concept a plan to sandblast the cylindrical building's exterior and turn it into a 360-degree mural.

March 7, 1974, San Diego Union, E-1. Museum of Man library attracts world experts, by Jeannette Branin (illus.).

March 8, 1974, (San Diego) Evening Tribune, C-19. A color slide program on collecting plants in the highlands of Mexico's rain forest will be presented at the Tuesday morning meeting of the Alfred D. Robinson branch of the American Begonia Society in the Casa del Prado.

March 10, 1974, San Diego Union, F-1. Seventy-five thousand flowers bloom Friday at the annual Orchid Show sponsored by the San Diego County Orchid Society in the Conference Building, by Clyde V. Smith.

March 11, 1974, (San Diego) Evening Tribune, B-2. EDITORIAL: Restore Ford Building.

The whole building is strongly suited to house the aerospace collection which deserves a better showpiece than its present cluttered, crowded quarters in the Electric Building, a stucco firetrap.

March 11, 1974, San Diego Union, B-3:2-5. The Reuben H. Fleet Space Theater and Science Center celebrated its first birthday yesterday with a party for children; its featured clowns, magic acts, a pantomime show, music and 1,400 free ice cream cones; the center is dedicated to the theory that science education can be fun.

March 12, 1974, (San Diego) Evening Tribune, B-2. Letter: Edna F. Walton backs idea of a mural depicting the heritage and traditions of Mexico in Balboa Park.

March 14, 1974, San Diego Union, B-16:8. A \$10,000 "sideshow: at the Reuben H. Fleet Space Theater and Science Center will open this weekend; the new exhibit is a 10-minute laser demonstration; executive director Michael Sullivan said \$10,000 worth of argon gas laser equipment has been set up to dramatize the versatility of coherent light beams which can carry hundreds of telephone messages, perfectly erase a typewriter error, cut out a tumor, pierce a diamond or melt a tank.

March 14, 1974, San Diego Union, E-11 Fine Arts Gallery spreads its wings; east wing will be previewed by members Friday from 5 to 7 p.m., by Richard Reilly.

March 15, 1974, (San Diego) Evening Tribune, B-3. Another view: Ford Building not adequate for museum.

Editor: In reference to your editorial of March 11, advocating restoration of the Ford Building for use as an aerospace museum, your argument is not new, for it was used in 1959 by the tourist, business, industrial and political leadership of San Diego in an attempt to turn the Ford Building and the entire Palisades into a gigantic convention center; again, a similar argument was used in 1933 and 1947 by civic leaders who wanted to put public buildings in Balboa Park.

The Ford Building is not a "palace" or "one of the most splendid examples of art deco architecture in America." These words have a familiar ring, for they or their equivalents are trotted out whenever vested interests want to acquire an empty building on public park land.

The St. Louis engineers who produced the 1960 Master Plan for Balboa Park, adopted by the city council as the official plan, examined the Ford Building in some detail; their analysis disagrees with your contention that “the concrete structure is sound.”

The mural, “The March of Transportation” is not intact. The paint can be rubbed off with a damp cloth; it adheres to walls which have huge gaping holes and are in danger of tumbling down. It is not a first-class mural, even by 30’s and WPA standards, for it is, in large part, a catalogue of simplified illustrations of a type that can be found in children’s story books.

The Aerospace Museum is a private enterprise promoting a limited special interest. The attendance figures they keep are not realistic because valid attendance counting systems for passive and active Balboa Park activities do not exist; and the present location of the museum on the main axis of El Prado, its open doors and its free admission attract many visitors merely from motives of idle curiosity.

Park lovers in San Francisco are fighting an attempt to put a Senior Citizens’ Center, gift of a wealthy donor, in Golden Gate Park. A citizens’ advisory committee in Los Angeles has stopped a plan that would have drastically altered the natural character of Griffith Park. An attempt by Columbia University to put a massive gymnasium in Morningside Park in New York City triggered the Columbia University riots of 1968.

Parks mean something to city people who go to them because they like to be near the earth, like the smells and sounds of nature, and like seeing the open sky. Because the occupants of the buildings in the park do not realize this, they would replace something that is natural, free and democratic with man-made buildings and paved parking lots that do not belong in public parks and that cater to select and exclusive interests.

Strong pressure groups have diverted and will continue to divert Balboa Park land to their own use. Jack Smith, Los Angeles reporter, has written, “the beauty of Elysian Park may be owed to the fact that it has been so long neglected . . . that it has escaped the lust of land developers and the venality of politicians” (*Westways*, June 1973). If we cannot say the same for Balboa Park, we can at least try to undo some of the damage that has already been done.

A park is supposed to offer harassed city dwellers relief from crowded city streets,, buildings, and the aggravation of commerce and densely populated neighborhoods. It is not the city’s extension, but the city’s complement, where fields, meadows, prairies, green pastures and still waters are meant to fulfill physical and psychological needs that cannot be satisfied by smog, speed, internal combustion engines, and jet exhausts.

March 16, 1974, San Diego Union, B-6. “Flash to the Past,” a musical revue will inaugurate the dinner theater policy at Café del Rey Moro tomorrow at 8:30 p.m.

March 17, 1974, San Diego Union, E-3. Philip L. Gildred speaks of new Fine Arts Gallery east wing; a beautiful gift to city (illus.).

March 17, 1974, San Diego Union, F-27. Japan in the Park, by Ada Perry.

There’s another flower show next weekend and it sounds like a visit to Japan without a passport. Would you like to go to Japan in Balboa Park? Not only that but in the beautiful Casa del Prado building.

No charge for passage, either. The event is the Ikebana festival of Japanese arts and it’s free.

There will be a Japanese garden and tea house, miniature tray landscapes, dolls and 80 flower arrangements from seven schools of Japanese flower arranging.

Music and dancing is promised and there will be a tea table. Hours are 11 a.m. to 4:30 p.m., Saturday and Sunday, March 23 and 24.

I suspect that I should have used the wording "festival of Ikebana and Japanese arts" but the whole thing sounded like so much fun that I was in a rush to tell about it.

It is sponsored by the San Diego Chapter of Ikebana International and is the sixth annual occasion for the group. Members now number 140 with Mrs. Peter T. Jordan of the San Carlos area, president.

March 18, 1974, (San Diego) Evening Tribune. Space theater tells anniversary plans.

The Reuben H. Fleet Space Theater and Science Center brings back its inaugural "Voyage to the Outer Planets" today for a one-week run as part of month-long first anniversary activities.

"Returning by strong public demand," executive director W. Michael Sullivan said. " 'Voyage' additionally salutes Wednesday's Earth Day activities as the presentation concludes with an ecological message."

Employing the domed wrap-around theater's Space Transit System (STS), "Voyage to the Outer Planets: takes viewers on a simulated trip to the edges of the solar system beginning in the year 2350.

Sullivan said that the presentation places the audience on a futuristic launch pad leading to shuttle craft rendezvous with the Delta V spacecraft for the planetary tour.

The condensed three-year trip includes vistas of the earth from orbit, a stop at one of Jupiter's moons and a close-up look at Saturn's rings.

"On coming back to the earth," he said, "the travelers are reminded of the delicate balance required to preserve the home that tomorrow's space tourists will return to."

The 20-minute space offering will be shown through Sunday in conjunction with "Harmony of Nature and Man," a cinerama motion picture exploring the bounties of the American northwest.

A Roger Tilton Film Co. production, the "Harmony" feature was premiered at Japan's Osaka world's fair.

The one-week only bill will be offered for a total of 42 screenings, with weekday performances at 1, 2:30 and 4 p.m.

Saturday showings are at 10:30 and 11:30 a.m. and from 1 to 4 p.m. with Sunday offerings hourly from 12 noon to 5 p.m.

Evening showings are given each night of the week at 7:30 and 8:30, Sunday through Thursday, with Friday and Saturday features at 7:30, 8:30 and 9:30 p.m.

March 18, 1974, San Diego Union, B-1. Irish celebrate: "Bit of Heaven" in Balboa Park yesterday celebration of St. Patrick's day in House of Pacific Relations, by Robert P. Laurence (illus.).

March 18, 1974, San Diego Union, B-5. New dinner policy at Café del Rey More --- dinner performers lack direction, by Welton Jones.

There's practically nothing in the way of continuity and the routines vary from acceptable to awful.

March 18, 1974, San Diego Union, B-5. A beginner's course in sign language is underway at Casa del Prado on Monday and Friday nights.

March 19, 1974, Park and Recreation Board Minutes:

a. Mural - El Centro Cultural de la Raza

MOTION: It was moved by Mr. Muth, seconded by Mr. Jensen and carried that the Board recommends approval of the mural as presented.

MOTION: It was moved by Mr. Brandenburg, seconded by Mr. Butler, that the Board recommends that the City provides assistance for sandblasting the El Centro Cultural de La Raza building; the motion carried.

b. 1966 Balboa Park Funds

Robert Teaze, of the City Attorney's office, appeared before the Board to explain the attorney's opinion on the validity of using funds from the 1966 bond issue for rehabilitation of the Ford Building. He advised a written opinion would be prepared for the City Council. However, he indicated that in the bond proposal there was no indication that any money would be used for remodeling the Ford Building. If the Ford Building has been specified there would be no question. The renovation of the building has been before the voters three times since 1966 and turned down each time. In the past, law suits have been filed as to the legality of using bond funds, and Mr. Teaze cited the Metropolitan Sewer District as to the right of the City to issue revenue bonds for that purpose. He suggested that a test suit should be filed before 1966 bond money is authorized for the renovation of the Ford Building. Mr. Milch stated that in the Master Plan for Balboa Park it provided for the demolition of the Ford Building but that it has subsequently been restored to the Master Plan.

Miss des Granges commented that the Board had approved inclusion of up to \$850,000 for the renovation of the Ford Building in the 1973 Bond Proposal and that this amount was to be matched by the Aerospace Museum. After discussion, the following motion was made:

MOTION: It was moved by Mr. Leyton, seconded by Mr. Butler and carried unanimously that the Board recommends the proposed Balboa Park Capital Improvements Program for 1975 be approved and that the City Council be requested to look to other sources for funding the rehabilitation of the Ford Building.

The Board did feel, however, that the Aerospace Museum should be given an exclusive option on the Ford Building to enable them to raise money for its rehabilitation.

March 19, 1974, (San Diego) Evening Tribune, B-1, B-4. Setting ready for new "jewel" at Fine Arts Gallery; new (east) wing almost ready, by Betty Peach (illus.).

March 19, 1974, San Diego Union, D-1:4. An auxiliary for men and women is being organized at the Reuben H. Fleet Space Theater and Science Center to provide some volunteer support for the center; Mrs. Thompson Porter of La Jolla is president of the board of the Satellites, auxiliary to the center; individuals of all ages are being sought for membership in the Satellites, to assist with volunteer programs being initiated at the center; other officers name.

March 23, 1974, San Diego Union, Flowers abloom; walkers, lookers welcome --- Wild flower pageant underway in city's canyons and parks (illus.).

March 27, 1974 (San Diego) Evening Tribune. Letter: Frank Hogya opposes moving U. S. Naval Hospital: "Its present location is ideal. It meets with the needs of the fleet and is centrally located for all hands with good public transportation."

March 28, 1974, (San Diego) Evening Tribune. P. W. Quinlan supports renovation of Ford Building.

Editor: I was about to congratulate you on your recent editorial supporting rehabilitation of the Ford Building in Balboa Park. However, on March 14 I noted the letter by Richard W. Amero and felt compelled to demand equal time in rebuttal.

Anyone who has read the took *The Romance of Balboa Park* by Florence Christman, second edition, cannot but realized the Ford Building is just as much a part of the park as all the other buildings. The story of Balboa Park is so intricately bound to the history of the lives of the city leaders and to that of the city itself that some people should realize that the park is San Diego.

The Ford Building is structurally sound. Read the Pederewski, Dean and Associates many architectural studies since 1960. "The March of Transportation" mural is nearly intact and can be restored with accuracy. It may not be a first class mural, but it is indeed such in the eyes of the grandchildren of the painter, who recently were allowed entry into the Ford Building to view and take pictures of their grandfather's treasure.

The Aerospace Museum is not a private enterprise. It's the third ranking visitor attraction, after the zoo and the space and science building.

The entire palisades area will become a viable part of the park when the Navy hospital property is returned to the park for future use. The starlight theater will reopen and other activities will be activated for our people.

The Ford Building will be rehabilitated with a giant force of public spirit and the donated services of our trade union representatives. The labor of love by the people will show San Diegans what "people power" can do. The savings to the taxpayer will be \$2 million plus and San Diego will again make its mark on the map

To quote Florence Christman: "The park has been noted as becoming more and more the social club of the city, a setting where several important events occur on one evening." And last of all, Balboa Park continues to receive wonderful gifts. The Thursday Club gave ornamental benches and chairs for the Casa del Prado. The Senior Citizens' Lounge there was furnished by different members and branches of this group, organizations planted trees in the park and gave tables and benches for picnic areas. And another name, that of Reuben H. Fleet was added to the illustrious list of those who have already become part of the park heritage.

Balboa Park was 150 years old on May 26, 1968. In the early days of park development, and for many years afterward, George Marston stood above all others in his protection and concern for the park. Today there are several Marstonian groups dedicated to the protection of the park.

The continued watchfulness of all is needed to protect these priceless acres from any further encroachment.

The Ford Building will remain as well as all other buildings in the park.

"Long live the Ford Building!"

March 27, 1974, (San Diego) Evening Tribune. Frank Hogya says "it would be a terrible waste of taxpayers' money and criminal to destroy the Balboa Naval Hospital, a beautiful and functional complex, and rebuild elsewhere.

March 28, 1974, (San Diego) Evening Tribune. Frank W. Wilson urges improvement for Ford Building.

Editor: Richard W. Amero's letter was well written. However, Amero seems to be one of those persons that looks on horrified that someone might be able to make a living off a museum on public ground.

Naturally the Ford Building is not a palace new because it has sat in disrepair all these years.

I have no connection with the Aerospace Museum except that I have been there several times and boy, is it crowded! I enjoyed all the exhibits and I was disappointed to find out that there were many more exhibits that could not be displayed for lack of space.

Mr. Amero mentions how citizens of other cities are fighting to prevent buildings in their parks. I can't quite buy that idea. I will agree that wilderness should stay wilderness but there are some buildings that enhance a park.

The Ford Building is there now. What are we to do, close our eyes and hope it disappears? It belongs to the city. The city can't seem to scrape up enough money to pay her employees. How can she ever get enough money to pay for the demolition and clearing the ground? Unfortunately San Diego is filled with many people who don't like what happened in the past, denounce the future because "It happened in some other city; therefore, it will happen here," and live among the deteriorating present because they are afraid to make a move. I say, improve the Ford Building now!

March 28, 1974, San Diego Union, B-3. Japanese beetle drive told.

Kenneth K. Little, Jr., county agriculture commissioner, said the eradication drive will resume about April 15, with state and county crews putting out 3,300 beetle traps in and around the park.

March 31, 1974, San Diego Union, B-22:3. Six educational courses will be offered by the Reuben H. Fleet Space Theater and Science Center beginning in mid-April; a seven-session class of "Lasers and Holography" will be held on Thursday evening starting April 18; the instructor will be Bruce Wegemann, who said students will learn how to build their own lasers as part of the curriculum.

April 1, 1974, San Diego Union, B-6. EDITORIAL: Beetle Program.

We see no reason for residents around Balboa Park to worry about plans by state and county agriculturists to apply pesticides against the highly destructive Japanese beetle.

April 7, 1974, San Diego Union. Letter: Mrs. Estelle Yager, Chula Vista, claims debris Sunday in the parking area in front of the Balboa Club spoils her Sunday in the park.

April 7, 1974, San Diego Union. Balboa Park: A place for all seasons, by Elaine Smyth . . . San Diego mini-tour.

April 7, 1974, San Diego Union, D-5. To mark 25th year: Junior Theater reunion slated Saturday, May 18, at Casa del Prado.

April 8, 1974, (San Diego) Evening Tribune. Letter: Ernest C. Schaffert opposes the move to build a new Naval Hospital in the Murphy Canyon area.

The solution to preserving San Diego's present semi-sane atmosphere is for the taxpayers to rearrange priorities toward maintaining existing structures, limiting growth, and striving toward self-sufficiency.

April 8, 1974, San Diego Union, 10:3. The Reuben H. Fleet Space Theater and Science Center begins an expanded Easter week schedule today that includes lecture hall showings of a NASA, JPL film about

exploring Mars and continuous laser demonstrations in addition to the theater's usual day-long showings of "Standing Up County" and "Capture the Sun."

April 9, 1974, San Diego Union, A-15. Starlight will probably return to the Balboa Park Bowl again this summer, eight years after leaving the facility due to noise from low-flying airplanes.

April 9, 1974, San Diego Union, B-3:2. Last year the Reuben H. Fleet Space Theater and Science Center in Balboa Park earned \$820,000 in revenue, but its director said yesterday he will need at least four of five more years of financial aid from the city before the theater can get on its feet; "We are considering our first year a successful one," Michael Sullivan, executive director, told members of the Planetarium Authority.

Sullivan said last year's revenue was just enough to handle operating expenses at the theater.

"Any subsidies we receive from the city will go toward insurance, electric and gas bills, and the cost of the building," said Sullivan.

Last year the city issued the space theater \$204,000 in funds, but "we used only about \$170,000 and the city took the rest back," said Sullivan. "This year the city has awarded our program \$231,000."

Other business at the Planetarium Authority meeting yesterday included a proposal by William MacFarlane, theater property director, for the construction of a box office in the building..

"All we now have is a cashier's deck and last Labor Day we were robbed and the bandit took nearly \$10,000," said Sullivan. "We are in hopes the new box office, which will have a drop safe in the floor, will prevent this from happening again."

The Planetarium Authority unanimously approved the proposal for the \$8,000 needed for the construction.

"The money will come out of the capital improvement fund," said MacFarlane.

April 9, 1974, San Diego Union, B-3. The city has purchased a 50-foot Atlas cedar Christmas tree for \$1,900, to be planted at the Organ Pavilion.

April 11, 1974, San Diego Union, 21:1. Straws in the wind by Opal Crandall: The gala preview party, "Adventures of Cosmos," planned as a prelude to the opening of the film, "Cosmos," at the Reuben H. Fleet Space Theater, is being postponed from May 24 to June 16, according to Mrs. Judy Hodges chairman; the change was necessitated by rains which held up production of films to be shown at the private party, Mrs. Hodges said; the opening is sponsored by the Junior League, which has taken on the responsibility of openings before all new shows at the Space Theater.

April 13, 1974, (San Diego) Evening Tribune, A-3. Assistant City Attorney Robert Teaze has advised against use of some \$2.6 million in surplus bond funds for renovating Ford Building as a historical site.

April 14, 1974, San Diego Union, B-3. Fund issue cited on Ford Building.

The city attorney has advised against using 1966 park bond issue money for restoration of Balboa Park's Ford Building unless a court determines otherwise.

April 14, 1974, San Diego Union, D-1. New wing of San Diego Fine Arts Gallery to be dedicated at reception on Friday, April 19; its valued workers will be proud participants, by Jeannette Branin (illus.).

April 15, 1974, San Diego Union, B-8:7. The Reuben H. Fleet Space Theater and Science Center in Balboa Park will show two films, "Skies Over Holland" and "Swiss Fortress of Peace" in addition to the current features, "Standing Up Country" and "Capture the Sun," today through Sunday only; the two new films will be shown a total of 27 times this week as part of the theater's spring variety schedule.

April 17, 1974, San Diego Union, B-1. Fine Arts Gallery takes wing; size, grace shine at new facility in Balboa Park, by Peter H. Brown.

April 18, 1974, San Diego Union, B-3. City lauded Pauline des Granges, retiring park chief yesterday; more than 300 San Diegans filled the U. S. Grant Hotel's Grand Ballroom.

April 19, 1974, San Diego Union, B-3:5. A blooming orchid brought a Hollywood film crew to San Diego yesterday to shoot a segment for a film that will be shown beginning this summer at the Reuben H. Fleet Space Theater and Science Center; the orchid, *Brassica longissima*, commonly known as a spider orchid, belonging to Mr. and Mrs. A. P. (Jack) Donis of 1411 Torrance Street, plays a part in "Cosmos," the space theater film that is being shown by Graphic Films of Hollywood.

April 21, 1974, San Diego Union, B-1. Balboa Park Science Fair in Federal Building ends today.

April 21, 1974, San Diego Union, F-33. A landscape design study course will be presented by California Garden Clubs, Inc., May 7-9, at Casa del Prado in Balboa Park.

April 23, 1974, (San Diego) Evening Tribune, B-2. Letter: Mr. and Mrs. R. E. Rolfe upset by unfriendly attitude of bowler after a young Navy man took a picture of bowlers.

April 23, 1974, San Diego Union, B-1. City and school officials have reached a tentative settlement of a long-standing dispute over ownership of the San Diego High School site that would clear the way for construction of a new school.

Under terms of a pact to be outlined to the city Board of Education today, the school district will acquire a 50-year lease on the Balboa Park property for \$10,000 and, at the same time, give up any claim or title to the land.

April 13, 1974, San Diego Union, B-3. Inflation stirs budget pleas by museums.

The high cost of living hits all San Diegans in the pocketbook, including the city's museums and other city-supported institutions, city councilmen were told yesterday.

April 24, 1974, (San Diego) Evening Tribune, E-4. The San Diego Park and Recreation Department will present an illustrated lecture series, "Pre-Columbian Cultures of Mexico. Central America and South America" beginning April 26 at the Puppet Theater in Balboa Park.

April 24, 1974, (San Diego) Evening Tribune, E-4. The Committee of 100 will sponsor a Balboa Park Summer Festival, August 16-18, Anderson Borthwick festival chairman announced today.

April 24, 1974, San Diego Union, B-1. The School Board yesterday agreed to a pact with the city that will allow San Diego High School to be rebuilt on its present site and remain there for 50 years.

April 25, 1974, San Diego Union, E-1. At a recent work and luncheon meeting in the home of Mrs. Henry Hedges, members of the Committee of 100 addressed handsome invitations for the official dedication May 10 of the Panama-California Sculpture Court-1915 Exposition at Casa del Prado.

April 30, 1974, (San Diego) Evening Tribune, April 30, 1974. Art Arena: Sculptor "revives" Father Serra, by Jan Jennings (illus.).

The Father Serra sculpture from the old Food and Beverage Building in Balboa Park has been restored by architectural sculptor Criss Mueller. The finished piece will go on view in the new sculpture court of Casa del Prado.

May 1, 1974, San Diego Union, B-8:7. The Reuben H. Fleet Space Theater and Science Center in Balboa Park will open a week-long festival about gardens today; films to be shown are "Garden Isle," about Hawaii, "My Garden Japan," "This Garden England," and "On the Third Day," which depicts South Africa.

May 2, 1974, (San Diego) Evening Tribune, May 2, 1974, Arts seminar slated in park next week . . . "Expanding Audiences and Participation in the Leisure Arts," a two-day seminar with panel sessions will be held May 8 and 9 in Casa del Prado.

May 2, 1974, San Diego Union, D-13. Gardening classes set . . . Four 2-hour free garden classes, sponsored by the San Diego Botanical Garden Foundation, have been scheduled for the next four Saturdays at the Casa del Prado Garden Center.

May 3, 1974, San Diego Union, B-3. Complex near park given OK: The city Council yesterday approved a revised plan for a 16-story apartment complex to be build near the northwest corner of Balboa Park.

May 5, 1974, San Diego Union, E-1. Court dedication display planned; "discarded" sculpture saved, restored by students, by Jeannette Branin (illus.).

The sculpture seemed to be up for grabs --- hundreds of medallions, statues, pillars and ornaments, made of plaster of Paris on frames of wood and chicken wire.

It was funky junk to dozens of people who scaled the fence at the Chollas Sanitary Landfill to pick over the statuary that once had graced the Food and Beverage Building in Balboa Park.

Casts had been made of the more important pieces so they could be duplicated in lasting materials and placed on the Casa del Prado, which replaced the Food and Beverage Building after it was demolished.

There seemed to be a general understanding about the ultimate disposition of the pieces at Chollas. City officials understood that they had been dumped there, to be used for landfill. But members of the Committee of 100, which had raised the funds to construct the new building with ornament, expressed dismay that the statuary was being hauled off by souvenir hunters.

One of the more serious collectors of the discards was Dr. Fay Frick of the art department at San Diego State University.

Dr. Frick realized that the sculpture would be of value in her current art department project," Seminar of Modern Art in San Diego from 1850 to 1950."

It was to include architecture, sculpture, paintings and ceramics from San Diego buildings during that century. Dr. Frick and her students chose pieces from Chollas to renovate and catalog.

Eleven pieces were painstakingly cleaned with soft brushes and air blasting; frames were made for wall pieces; and larger pieces were appropriately mounted.

At about the same time, an artist from the Walt Disney Studios, Chris Mueller, was brought to the city by the committee to restore a plaster bust of Father Junipero Serra, who had established Mission San Diego de Alcalá.

Other artists involved in the renovation project were Lambert Ninteman, Everett Gee Jackson, Charles Faust, Arthur Loring and Vickie Nelson.

From the time that she had founded the Committee of 100 seven years ago, Mrs. Frank F. Evenson has been assisted by her husband, a retired civil engineer, in the full-time tasks of telephoning, organizing and preparing for the successful bond election to construct the Casa del Prado.

Her husband was her constant companion and coworker, and was a proud partner four years ago when Mrs. Evenson was honored by the California Federation of Women's Clubs at convention in San Francisco, and received an award for outstanding service to her community.

Evenson lived to see Casa del Prado finished and dedicated. After his death June 14 of last year, Mrs. Evenson directed that all moneys given in memory of her husband be used to complete a sculpture court at Casa del Prado.

The court will be named the Panama-California Sculpture Court, recalling the Panama-California Exposition of 1915 when many of the Spanish-Colonial buildings in Balboa Park were erected, including the now replaced Food and Beverage Building. The sculptures renovated by the university art department will be among those displayed.

The court will be dedicated to the memory of Mr. Evenson at 5 p.m., Friday, May 10. The Rev. Msgr. I. Brent Egan, chancellor of the Diocese of San Diego and pastor at Mission San Diego de Alcalá, will give the invocation and unveil the bust of Father Serra.

Mrs. Harold B. Williams is chairman of the court dedication event, assisted by Mrs. Charles Cheyney.

Mrs. William E. Betts will fill the courtyard with banks of flowers arranged by the San Diego Floral Association, the San Diego chapter of Ikebana International, San Diego Botanical Garden Foundation and the San Diego Park Department. Guests have been asked to come in costumes of 1915 if they desire.

The Harmony Express Barbershop Quartet from Cypress, winners of the Far Western Championship among members of the Society for the Preservation and Encouragement of Barbershop Quartet Singing in America will entertain. The San Diego Youth Symphony String Quartet will play.

The antique car collection of Dr. and Mrs. Roy M. Ledford, Jr. will be on display.

May 8, 1974, (San Diego) Evening Tribune. City takes new analytical look at visitors; pays \$100,000 for survey of impact of tourists.

The report (by Arthur D. Little, Inc. of San Francisco) recommended that allocation of the city's transient occupancy tax --- collected from guests at hotels and motels --- focus on tourists who benefit the city the most and the city contributions to the Convention and Visitors Bureau be matched by industry contributions.

May 10, 1974, (San Diego) Evening Tribune, B-4. City Council approves agreement for rebuilding of San Diego High School.

May 13, 1974, San Diego Union, B-1. City ranks 22 in survey of U. S. economy; check of 31 cities includes jobs, income improvement since 1960.

May 14, 1974, (San Diego) Evening Tribune, B-1. The City Council's Public Facilities and Recreation Commission unanimously adopted a resolution yesterday urging the council to instruct the city attorney to seek an injunction to halt the county's use of pesticides in Balboa Park against the Japanese beetle.

May 14, 1974 (San Diego) Evening Tribune, B-1. Big shift in priorities urged as priority sub-committee of the Balboa Park Committee views Balboa Park projects, by Betty Peach.

Repair and preservation of the Ford Building and construction of two major parking facilities are the first three items on a new list of priorities for projects in Balboa Park.

May 14, 1974, (San Diego) Evening Tribune, The City Council's Public Facilities and Recreation Committee yesterday voted to recommend that the council seek a national cemetery on federal land on the old Camp Elliott site near the Tierrasanta development.

Councilman Jim Ellis suggested the action.

May 14, 1974, San Diego Union, B-2. Council seeks bids: The City Council has put out to bid proposed improvements of the federal building and gymnasium in Balboa Park.

May 15, 1974, San Diego Union, B-13. Citizens should reject ballot bid for funds for school facilities until drastic changes are made in district procedures, philosophy and administrative personnel, by Debbie M. Dale.

May 18, 1974, San Diego Union. Letter: Richard Amero protests over changing the name of Community Concourse to Mayor Charles C. Dail Concourse.

May 19, 1974, San Diego Union, B-6:5. Deputy City Manager John Lockwood has recommended that the City Council seek action to force a contractor to complete his projects at the Reuben H. Fleet Space Theater; the contracted work is for a new dome in the Balboa Park theater, a multi-media control system and a space transit simulator, projects that were supposed to be completed last year.

May 20, 1974, (San Diego) Evening Tribune. Letter: J. M. says Electric Building a fire hazard for 14 years; smoking should not be permitted inside building.

May 21, 1974, Park and Recreation Board, Minutes.

d. Balboa Park Project Priorities

The Chairman mentioned that he asked for this item to be discussed because of an article that was printed in the newspaper regarding this subject. Mr. Butler stated the projects cited in the paper were part of a longer list of Balboa Park projects discussed by his Committee. Mr. Milch asked Mr. Larry Sisk, a member of the Balboa Park Committee, for his comments. Mr. Sisk stated the Balboa Park Committee recommended priorities for projects after the 1966 Bond Money is spent; included were projects to rehabilitate the Ford Building, rebuild the Electric Building, and removed the Administration Building. Mr. Sisk said the Committee had discussed the priorities with the assumption it is highly unlikely the public will vote a bond issue for such projects. Mr. Milch asked if this priority list was intended to be for the Committee's use only; Mr. Butler replied that the list was presented to the Board for their information. Mr. Mendoza recommended that the priority list be accepted with thanks and that it be filed until such time as the Board is requested to present additional priorities for the development of Balboa Park.

May 21, 1974, (San Diego) Evening Tribune, B-1. Councilmen dabble in show biz-space style.

The City Council's Public Facilities and Recreation Committee yesterday voted to recommend approval of a \$236,000 city contribution to the Reuben H. Fleet Space Theater and Hall of Science in fiscal year 1975.

May 21, 1974, San Diego Union, X-6. Council approves accord on San Diego High site.

May 22, 1974, San Diego Union, B-1. Spraying for Japanese beetle underway; crew conducts 8-day project in Balboa Park

May 22, 1974 (San Diego) Evening Tribune. Letter: Richard Amero says Chris Mueller's statement "there isn't an equal to the Spanish Colonial complex in Balboa Park" does not resound to the credit of San Diego in the outside world.

May 24, 1974, (San Diego) Evening Tribune, A-14. "Squatters" get Superior Court okay for high school site; lease arrangements worked out by the Board of Education and City Council approved.

May 24, 1974, (San Diego) Evening Tribune, B-9. The Committee of 100 and the San Diego District California Federation of Junior Women's Clubs will sponsor the eighth annual luncheon honoring "Balboa Park, Symbol of San Diego," at noon June 11 in the House of Hospitality.

May 29, 1974, San Diego Union, D-2:3. Tours of the Reuben H. Fleet Space Theater and Science Center are now being offered to school children between 9:30 a.m. and noon; Satellites, volunteers who aid the theater and center, will guide the tours until mid-June and will resume again in September.

June 2, 1974, San Diego Union, B-12:5. The City Council has authorized legal action to force a contractor to complete three projects at the Reuben H. Fleet Space Theater; the council declared Spitz Laboratories, Inc., of San Diego, to be in default of its contracts, which include a projection-screen dome structure, a multi-media control system and a space transit simulator; the projects were supposed to be completed last year.

June 6, 1974, San Diego Union, B-3. Museum funding study set: The city and county plan a study to provide a new basis for aid to Balboa Park's museums next year.

June 6, 1974, San Diego Union, B-3:3. The National Endowment for the Arts tomorrow will announce a grant of \$8,212 to the Reuben H. Fleet Space Theater and Science Center in Balboa Park; the grant was earmarked to finance the preparation of Spanish-language versions of planetarium show soundtracks and the translation of printed media; a spokesman for the space theater noted that current shows, "Standing Up Country" and "Capture the Sun," already are being presented in Spanish at 11 a.m. Sundays.

June 6, 1974, San Diego Union, Committee of 100 to meet Tuesday; Dr. Brage Golding, president of San Diego State University, will speak.

June 7, 1974, (San Diego) Evening Tribune, C-18. Architect's Perspective --- Human scale, form, interest keys to open space, by John R. Mock.

The reality of external beauty and its appreciation, as recognized by the layman, isn't necessarily that of the architecture itself, and most likely he doesn't really know exactly why he likes a certain achievement of architecture, nor is he ever required to know why. For instance, the beauties of the land within Balboa Park more often are responsible for cries of "save the lovely Spanish revival architecture" than the architecture itself. The fact that the quaint and interesting Japanese Garden and Tea House, constructed for the San Diego Exposition within the park, almost had to be removed by force to make way for the Children's Zoo, provides the idea that some people do not necessarily feel that sidewalk planters are the only successfully conceived solutions to planting of open spaces,

June 8, 1974, San Diego Union, B-4. Maritime Museum has become the 10th member of the Inter-Museum Council.

June 9, 1974, San Diego Union, G-8. Balboa Park can be a do-it-yourself "happening," by Karen Kenyon.

Balboa Park is alive with spring, with people, and with new discoveries.

June 12, 1974, (San Diego) Evening Tribune, A-31. Mrs. Frank Evenson moved backed into a familiar role as president of the Committee of 100 at the annual meeting yesterday and promptly promised a fight to replace the Electric Building.

June 13, 1974, (San Diego) Evening Tribune, B-1. Fund pinch grips museums; county asked for more cash.

June 13, 1974, San Diego Union, E-20:4-6. A new show, "Cosmos - The Universe of Loren Eiseley," will open Monday, June 17, at the Reuben H. Fleet Space Theater in Balboa Park; six months in the making the production is viewed by officers of the year-old institution as a major advance toward the kind of scientific

fare originally planned for the theater; narrated with writer Eiseley's poetic view of natural phenomena, the show deals with the universe and man's place in it, ranging from the galactic to the sub-microscopic.

June 13, 1974, San Diego Union, F-20. SDSU President Brage Golding recalled history of San State, Balboa Park Tuesday in talk at the Committee of 100's annual luncheon.

June 14, 1974, San Diego Union, B-3. New fee mulled for park funds: A new building permit fee, estimated to raise more than \$1 million a year to develop park facilities in both established and fast-growing areas of the city, was given initial approval by the City Council yesterday.

June 14, 1974, San Diego Union, B-3. Construction of a new rose-lined garden in Balboa Park at a cost of \$175,000 was approved by the City Council yesterday.

The Parker Foundation, which donated \$93,000 toward development of the garden at the Park Boulevard site, was told the development will be called the Inez Parker Memorial Garden.

June 17, 1974, B-2. Councilman Jim Ellis yesterday said he is seeking county support for a joint powers agreement to help acquire Cowles Mountain in East San Diego as a regional park.

June 21, 1974, (San Diego) Evening Tribune, B-6. City Council approves hike in golf fees at Torrey Pines and Balboa Park municipal golf courses; city residents and owners of property in the city will be allowed to use the courses at present fees.

June 24, 1974, San Diego Union, A-4. Two policemen and a fire unit were attacked by rock-throwing youths in Southeast San Diego yesterday after a melee broke out when two officers attempted to arrest a woman in a park for possession of marijuana.

July 2, 1974, San Diego Union, B-8. Urban planners Kevin Lynch of Boston, Mass. and Donald Appleyard of Berkeley, told the City Council Thursday San Diego's natural charm is in danger; will make suggestions this fall on how San Diego's quality of life and be preserved and upgraded.

July 9, 1974, (San Diego) Evening Tribune, A-4. Way sought to trim planetarium subsidy, by Robin Maydeck.

Park and Recreation personnel have already been moved to Balboa Park in an administrative move, Financial Management Director Larry Haden said yesterday.

During a special meeting of the governing body yesterday, City Property Director William MacFarland told members the time has come to study more flexible methods of funding science and theatrical programs than the city budgeting process.

July 9, 1974, San Diego Union, B-3. Two hundred and fifty thousand dollar tag places on City Hall office space effort, by Otto J. Bos.

July 9, 1974, (San Diego) Evening Tribune, B-11. Three hundred thousand expected at Summer Festival: Mayor Wilson will officiate at opening ceremonies of the Balboa Park Summer Festival scheduled for August 16-18.

The event, sponsored by the Committee of 100, a nonprofit organization of local citizens interested in preserving Balboa Park, is expected to draw 300,000 persons, a committee spokeswoman said.

Total expenditures, provided through donations from local businesses, organizations and private citizens, are estimated at \$125,000.

Festival events will include an opening day parade, concerts, films, art exhibits, musical shows, dancing and fireworks, she said.

Museums and attractions in the park will be open during evening hours and those charging admission will offer 20 percent discount tickets, according to the spokeswoman.

All other festival events will be free to the public, she added.

The festival, which planners hope to make an annual event, opens at 3 p.m., Friday, August 16 and closes at 11 p.m., Sunday, August 18.

July 9, 1974, San Diego Union, C-7. Free public dancing to recordings from the Big Band era has been started Saturday beginning at 7:30 p.m. at the Organ Pavilion.

July 10, 1974, B-2. Park Shuttle losing up to \$130 a day in spite of a new 10-cent ridership fee, city Parks and Recreation Director Ed Mendoza said yesterday.

July 12, 1974, (San Diego) Evening Tribune, B-3. The Committee of 100 yesterday sought city \$14,230 financial backing of an August festival in Balboa Park and assurance that the Prado promenade will not be substantially altered; \$110,000 being raised from private sources.

July 12, 1974, San Diego Union, C-8. Park Lawn Set: The City Council has authorized a \$55,000 project to provide 6.5 acres of turf and lawn at Morley Field.

July 13, 1974, San Diego Union. R. D. Boswell doesn't like getting a ticket for illegal parking in Balboa Park.

July 16, 1974, San Diego Union, A-7. Performing groups of all types are being sought by the Committee of 100 for a three-day festival in the park next month.

A suggestion has been made that the Marston family home, which eventually will become property of the City of San Diego could be used as a residence for the mayor.

August 14, 1974, San Diego Union, B-6 (Wednesday). Finest City Week: Mayor Wilson to lead grand opening parade Friday.

A 1939 Mercedes Benz bearing Mayor Wilson in period costume will lead off the grand opening parade for America's Finest City Week starting at 3 p.m. Friday in Balboa Park.

The parade, following a 2:30 p.m. fly-in of antique planes over the park, will initiate San Diego's largest and longest celebration of itself, an annual event since 1972 when Mayor Wilson proclaimed America's Finest City Week here after the Republican National Convention was transferred to Miami Beach.

The week, to be officially observed this year August 16-25, features special events highlighting the people, places and attractions that make San Diego "America's Finest City," Mayor Wilson said.

Friday's opening parade will consist of 55 individual divisions, starting at Sixth Avenue and Juniper Street. The route will be north on Sixth to Upas, Balboa Park Drive north to El Prado and east on El Prado to Park Boulevard.

The parade also opens the Balboa Park Summer Festival, a celebration being sponsored by San Diego's Committee of 100 to coordinate with America's Finest City Week.

Bea Evenson, founder of the Committee of 100, will be hostess at an opening ceremony for the observances at 4:30 p.m. in the Plaza de Balboa.

Other opening day festivities will include a 5 p.m. reception at the Casa del Prado, a folk and pop music concert at Morley Field from 5-9 p.m., a fireworks display in Balboa Park at 9 p.m., an outdoor showing of "Some Like It Hot" at 9:15 p.m. at Sixth Avenue and Balboa Park Drive and dancing to the big band sounds of the 1940s as played by the Don Reed Band. Dancing will begin at 9:30 p.m. in the Spreckels Organ Pavilion, Balboa Park.

Among other highlights of America's Finest City Week and the Summer Festival in Balboa Park will be performances by organist Virgil Fox, the Southeast Community Theater, the San Diego Youth Ballet, the Sun Harbor Chorus, folk dance groups and sports enthusiasts.

August 15, 1974, San Diego Union, B-11:3-5. Finest City Week: Park Parade Tomorrow

Curly the Clown, followed by Mayor Wilson in a 1935 Mercedes-Benz, will lead the grand opening parade at 3 p.m. tomorrow for "America's Finest City Week: and the Balboa Park Summer Festival.

It will be preceded by an antique plane fly-over the park starting at 2:30 p.m. when about 10 aircraft will appear in the skies, courtesy of the San Diego Chapter of the Antique Airplanes Association. The craft will include a 1932 biplane, the Waco, and a Stinson Detroiter.

The parade, starting at Sixth Avenue and Juniper Street and progressing through the park, will have more than 70 units. Included will be bands, antique motor vehicles, beauty queens, unicycles and dignitaries.

Also in the parade will be an orangutan from the Zoo named Karen; "the big purple bird"; San Diego; Winnie the Pooh; a rubber boat; an antique fire truck, Roscoe (Pappy) Hazard's calliope; Indian Magique Theater performers and a group demonstrating the martial arts.

Included in the representation of bands, drum and bugle corps and baton division will be the La Mesa Flashettes, the Golden Statesmen, Ozzie's Boys Band and the Boy Scouts' Band.

Miss Charger, Miss Fairest of the Fair, Miss Teenage San Diego and Miss Cabrillo Festival are among the beauty queens who will take part.

Television personality Ernie Myers will be the grand marshal. He will ride a white horse.

The concluding unit will be a "War Against Litter" float.

The parade route will be north on Sixth Avenue to Upas Street, east to Balboa Park Drive, south to El Prado and east on El Prado to Park Boulevard.

It will conclude at the Plaza de Balboa, where ceremonies at 4:30 p.m. will begin days of special events and exhibitions throughout San Diego observing America's Finest City Week. The observance coincides with the Balboa Park Summer Festival, another series of events being staged in the park.

Besides the parade, tomorrow's activities will feature a fireworks display in the park at 9 p.m. by pyrotechnic expert Jim Peluso, an outdoor showing of "April Fools," with Jack Lemmon at 9:15 p.m. at Sixth Avenue and Balboa Park Drive, and "Dancing Under the Stars" to the Don Reed Band, starting at 9:30 p.m. in the Spreckels Organ Pavilion.

August 16 - 25, American's Finest City Week.

August 16, 1974, San Diego Union, B-1:4-5. Park Parade To Begin "Finest City" Festival

A parade through Balboa Park at 3 p.m. today, featuring 10 bands, drill teams, flower floats, clowns, horseless carriages, live animals, antique fire engines and unicyclists, will begin the celebration of the city's third annual "America's Finest City" week. Mayor Wilson will be the honorary parade marshal of the event, preceded by antique airplane demonstrations over the park at 2:30 p.m. The parade route, starting at Sixth Avenue and Juniper Street, will be north on Sixth to Upas Street, Balboa Drive north to El Prado and east on El Prado to Park Boulevard. The parade also marks the beginning of the three-day Balboa Park Summer Festival, which will include concerts, exhibitions and special events throughout the park. There will be a fireworks display at 9 p.m., an outdoor showing of "Some Like It Hot" on the park lawn at 9:15 and dancing to the big band sounds of the 1940s in the Spreckels Organ Pavilion at 9:30.

August 17, 1974, San Diego Union, B-1:1. Annual Parade: Gala Week Starts On Right Foot, by Carol Olten (illus.).

San Diego opened its third annual "America's Finest City Week" yesterday with a splash of color to rival the blue of its skies, the green of its parks and the multi-hued flowers of its gardens.

Crowds jammed the grand opening parade route that began at Sixth Avenue and Juniper Street and proceeded through Balboa Park to the Plaza de Balboa where opening ceremonies were held under a brilliant sun.

"What makes this America's Finest City is not buildings or what we find here," said Mayor Wilson in beginning the festivities. "It is the San Diegans who live here."

"It's your city," he told the people who gathered in the fountain area outside the Reuben H. Fleet Space Theater. "It's your festival. So enjoy yourselves."

The parade watchers got a super start on the activities, which run through August 25 with special events scheduled throughout the city (particularly in Balboa Park which is observing a Summer Festival). They chomped ice cream bars and popcorn, cheering as Curly the Clown, symbol of "America's Finest City Week," approached the reviewing stand, leading the parade in a red, white and blue costume.

Grand Marshal Ernie Myers came next --- not riding a white horse as planned, but driving a vintage red Porsche. (Parade officials were unable to find Myers a suitable horse.)

There was much applause as the Marine Corps Drum and Bugle Corps, resplendent in uniforms, approached the Plaza area.

Mayor Wilson, riding in a 1935 Mercedes Benz, smiled and waved to the onlookers. The mayor was "holding up well," a spokesman from his office said, after a 7 a.m. breakfast meeting and a slight jet lag after getting back from Washington, D. C. the night before.

A contingent of antique cars, carrying councilmen and other dignitaries followed the mayor. The cars were furnished by the Classic Thunderbird Club of San Diego with the tail-fin series of Cadillacs well represented. Councilman Bob Martinet, promoting the motorized bathtub race at 11 a.m. Sunday in Mission Bay Park, appeared in this unit too, along with the bathtub Toot.

Other parade sights:

The Flippino American Boxing Team of San Diego demonstrating jujitsu, Zoo assistant Karen Dalton atop a convertible cuddling the Zoo's baby orangutan, Karen, who looked a little frightened of the festivities; the Pioneer Hook and Ladder's fire engine belching out a hoarse siren; Ozzie's Band, all strutting spiffy in red; the San Diego County Optimists' Band, belting "California Here We Come"; Christopher R, one of San Diego's Avant Garde theater people, strutting in a clown suit in front of Roscoe (Pappy) Hazard's calliope; a Shamu, the killer whale float, led by a penguin; Miss Chargers riding aboard a huge San Diego Chargers football helmet; and a "War Against Litter" float that concluded the parade, dwarfed by three of the city's big street sweepers mopping up the route.

"It was a nice parade, rather like the gathering for a community barbecue," said Fine Arts Gallery director Henry Gardiner, who was among those there to watch.

"Wasn't it fun?" Curly exclaimed, adjourning to the Casa del Prado courtyards for the open reception which followed.

A fireworks display and dancing under the stars in the Spreckels Organ Pavilion were other activities last night.

August 17, 1974, San Diego Union, B-1:4. "Finest City" Events Listed.

A tea party featuring 100 cream pies to be disposed of a la Mack Sennett, a Virgil Fox organ concert and an outdoor showing of the movie "Lord Jim" are among the events for "America's Finest City Week" celebration today.

The tea party will begin at 3 p.m. at Quince Street and Balboa Park Drive. The organist will present a special program entitled "21st Century Fox" at 7:30 this evening in the Spreckels Organ Pavilion. "Lord Jim" will be shown at 9 p.m. at Sixth Avenue and Laurel Street.

Among other events scheduled today are a Senior Citizens' Frolic at the Plaza de Balboa and a Bright Sides musical revue in the Organ Pavilion (both at 11 a.m.), a puppet show by Marie Hitchcock at 1:30 p.m. in the Organ Pavilion, a rock music concert at 1:30 p.m. in Balboa Park Bowl and a square dance round-up at 7:30 this evening in the Balboa Park Club.

August 17, 1974, San Diego Union, B-5:4-6. Finest City Week rites slated at Organ Pavilion.

A worship service at 8:45 a.m. tomorrow in Balboa Park Spreckels Organ Pavilion will help observe America's Finest City Week. A Salvation Army service will be held at 1:30 p.m.

The program is the final in a series of eight summer services held in the park for visitors.

August 18, 1974, Source?, B-1. Ship "sails," pies fly at city events (illus.).

The Star of India's sails were unfurled to full set as part of America's Finest City Week celebration yesterday.

And at the other end of the scale --- the zany side --- some faces wound up as targets for fresh banana cream pies in a Mack Sennett-type pie-throwing contest in Balboa Park yesterday.

Balboa Park events attracted crowds but one event went virtually unnoticed.

It was the first annual Invitational Wheelchair Track and Field Meet that took place in Balboa Stadium

The America's Finest City Week observance continues through next Sunday.

Some of the other events scheduled today include a fishing derby at Shelter Island Pier today and tomorrow; the ecumenical worship service at the organ pavilion at 8:20 a.m.; the garden and flower show from 10 a.m. to 4 p.m. in the Casa del Prado; and a Starlight Opera preview of "Camelot" at 1 p.m. in the Balboa Park Bowl.

August 21, 1974, Sentinel, B-1. Multi-hued Starlight benefit, by Rosemary Johnston: Bold-colored prints in chiffon and jersey heralded the arrival of "Pucci in the Park" last week as patrons of the Starlight Women's Auxiliary gathered to view the Italian designers' fall premiere.

August 21, 1974, San Diego Union, A-13. The San Diego Park and Recreation Board voted unanimously yesterday to postpone until its regular October session on the Globe Theater's request for approval of its third theater site.

August 21, 1974, San Diego Union. Letter, Richard Amero says San Diego's "finest city" title is chauvinistic and that the Committee of 100 is a special interest lobby committed to the preservation of obsolete buildings with fake plaster palace fronts.

August 26, 1974, (San Diego) Evening Tribune. W. E. Howell, Santee, says pies were wasted at a pie-throwing contest, the grass was littered, and that five flags belonging to the United Nations House were stolen from Cabrillo Bridge during a recent weekend.

August 26, 1974, San Diego Union, B-3. Multitude of activities close "Finest City Week."

Balboa Park was overflowing yesterday with people and pets during the last day of America's Finest City Week.

The House of Italy celebrated its first anniversary in the afternoon. A program on the lawn near the House of Pacific Relations included dancers in native costume, singers, comedy and music.

The 20 international cottages in the park held open house and served refreshments to visitors.

The lawn around the Federal Building was crowded with dog fanciers and their pets waiting for a turn in the ring at the Silver Bay Kennel Club dog show.

Afghan hounds, Irish setters, pubs, bassets and many other breeds lined up under the critical eyes of the judges or lounged in the shade, waiting for a combing or a mid-afternoon snack.

At the Spreckels Organ Pavilion, the San Diego Chapter of the National Organization for Women held an observance of Women's Equality Day.

The NOW program included feminist poetry readings and music, a slide show on "Sexism in Advertising" and booths manned by several women's groups.

August 26, 1974, (San Diego) Evening Tribune, D-1. Hundreds attended feminist event yesterday; "We're equal in mind, body."

The City Council yesterday unanimously approved a five-year lease with Campus Life, a religious youth organization to operate and renovate a lodge on Point Loma's new Sunset Cliffs Park; the lease states Campus Life will not conduct recruitment activities on the property.

September ?, 1974, Source ?. The Natural History Museum has proposed raising admission fees to its Balboa Park facility from 50 cents to 75 cents; increase expected to stave off a deficit of \$22,000.

September 3, 1974, (San Diego) Evening Tribune, A-12. Thirty five arrested outside Balboa Stadium rock concert.

Thirty-five persons, including 17 adults and 10 juveniles, were arrested yesterday as a result of several incidents during a rock concert attended by 4,000 fans at Balboa Stadium.

Police said all of the arrests were made outside the stadium on complaints including failure to disperse, disturbance of the peace and narcotics violations.

They said most of the arrests were made during two attempts by non-ticket holders to crash the north gate at the stadium, where Kool and the Gang and five other rock groups started a concert at 10 a.m.

No injuries were reported in any of the incidents, which police said occurred over a period of several hours.

September 11, 1974, San Diego Union, B-5. Costs a problem: Ford Building use for Museum urged.

Councilman Lee Hubbard yesterday suggested the Aerospace Museum be given another two months to devise a plan to relocate in Balboa Park's Ford Building.

If the organization is unable to come up with a feasible plan for moving into the old facility by then, however, other groups should be solicited to make their home there, Hubbard told members of the City Council.

Negotiations have been going on for a number of years for the museum to expand to the Ford Building. However, no way has been found for the museum to move "without a major expenditure of public funds which the electorate has refused to authorize thus far," Hubbard said.

If the museum sponsors cannot find a feasible moving plan in 60 days, then City Manager Kimball Moore should determine if other groups might make a home there "at minimal cost to the taxpayers," Hubbard said.

Deterioration of the building, constructed in 1935, would then be halted and it again could be utilized for a community purpose, he added.

September 13, 1974, B-1. City earmarks nearly \$3 million to purchase three canyons and a mountain for open space.

September 15, 1974, San Diego Union. Photograph of site of 2.5 acres east of Park Boulevard that are being made ready for a new public rose garden; about 3,000 rose bushes including 200 varieties are now in nursery containers.

September 15, 1974, San Diego Union. Buses to replace park tram system: Balboa Park's tram shuttle service, now losing about \$100 a day, will be shut down in coming months when a new mini-bus service is initiated by the San Diego Transit Corp.

September 15, 1974, San Diego Union, F-1. A Botanical Wonderland in Balboa Park, by Clyde V. Smith.

Plans for (new) gardens (in Balboa Park) prompted the Natural History Museum to organize a tour of the nursery this weekend, originally planned as a single-day event, but the advance response was so large that the tour was expanded to Saturday as well as Friday to accommodate all of those who wished to participate. The guided tour was led by Helen Witham, associate curator of botany at the museum.

September 15, 1974, San Diego Union, F-3. Café del Rey Moro is refurbished (illus of former Gold Room remodeled as a cocktail lounge)

Balboa Park's Café del Rey Moro (House of the Moorish King) completed Phase 1 of a two-part refurbishing plan this week with the final installation of new equipment and furnishings.

More than \$40,000 has been invested in the restaurant by the lessees of the House of Hospitality Association, which in turn leases from the City of San Diego.

The building is a San Diego landmark and was built as part of the Panama Exposition [sic].

Most of the buildings built for the Panama Exposition [sic] were patterned after famous buildings in Spain or Mexico and the House of Hospitality building was no exception. Because it contains heraldic decorations over archways and entrances, including Coats of Arms of various countries then belonging to the Pan American Union, Café del Rey Moro has a Spanish theme throughout including the import of actual Moorish artifacts.

In the dining room, soon to be delegated as the "Sale de Oro" area (the Gold Room), a long dividing wall was removed to open the room toward the outside garden terraces. The Solarium, an area of roughly 1,000 square feet overlooks the terrace near this area and behind it, the main dining room can be seen through replacement carved arches, in a total area of 1,224 square feet.

The arches were refinished in a dark tone, with all walls repainted an off-white to fully contrast with interior trims. In addition, new shelving around the ceiling was added to contain imports with accenting colors of gold, burnt orange and natural woods throughout.

Parks Face Deficit for 1976 Budget: Inflation is expected to cause a deficit of more than \$1.5 million in the city park and recreation board's budget for the next fiscal year, David R. Roberts, park superintendent, told the Park and Recreation Board yesterday.

September 22, 1974, San Diego Union, B-3. Port Commissioners have delayed action on a \$2.4 million park in northeast Coronado until receiving a report from the port staff.

September 29, 1974, San Diego Union, F-1. San Diego area has its own landscape style, by Stephen Tollefson.

Basically, the problem is one of appropriateness. Nostalgia for eastern landscapes or fantasies of tropical splendor make us do things with landscaping that do not really belong here. The fact that so many plants grow here makes us forget that many of these plants --- perhaps most of them --- do not fit here and do not give the most satisfying effects possible.

By imposing some of the limitations upon ourselves that have not been supplied by the climate, we might work towards developing a truly appropriate landscape style for San Diego.

October, 1974, San Diego Magazine. Letter: Globe Festival Theater in Balboa Park? No way!

Congratulations to Lowell Davies and Craig Noel for their dedicated pursuit of a new Globe Festival Theater, as reported by Roberta Ridgely in your June issue. There is, however, one major flaw in their thinking and that is in their view that Balboa Park can accommodate such a theater.

No way! Balboa Park on theater evenings is already loaded to capacity in the vicinity of El Prado. Adding another 800-seats in addition to the recently added 1,000 plus in Casa del Prado would result in a bedlam of congestion.

Citizens Coordinate for Century 3 (C-3) is on record as favoring the Festival Theater concept --- as part of a revitalized Center City. This is exactly the kind of cultural activity that would bring a valuable asset downtown and definitely impractical in the park. The theater in Center City would be complemented nicely by the many facilities there for pre- and post-theater dining and drinks. Such facilities are limited in the park.

C-3 feels that Balboa Park's remaining open spaces should not be reduced for buildings that are not tied to a park concept. Though the park has been designated a cultural park, it is physically unable to sustain the addition of another theater. The original park trust, declared by the legislature of 1870, specified a "free and public park . . . and for no other purpose." With the increasing popularity of the park, it is even more important that we not take any more slices out of the open area. The little undeveloped canyons, one of which is proposed for a new theater, are delightful oases. It is truly exciting to stroll off the beaten path and discover them. Replacement of that lush canyon behind the sculpture garden by a sterile building is a poor trade.

Build the Festival Theater by all means. We do need and look forward to having it, but as a vital accessory to the Center City, and not as a contributor to the further degradation of Balboa Park.

James I. Coatsworth,
President,
Citizens Coordinate for Century 3.

October 4, 1974, San Diego Union, B-4:6. The San Diego Hall of Science, governing body of Reuben H. Fleet Space Theater and Science Center, has elected four new trustees: They are Dr. Charles R. Schroeder, San Diego Zoo director emeritus and an affiliate of Zooplan Associates; Mayo Obregon, founder of Trans-Var de Cortes Airlines; Thomas W. Nourse, president of Interface Concepts, Inc., and David Alpert of San Diego Leidesdorf & Company, certified public accountants.

October 9, 1974, San Diego Union, B-8:6. Tours of the backstage wonders of the Reuben H. Fleet Space Theater will be offered for the first time Saturday through October 19; theater director W. Michael Sullivan said tour participants will see projection rooms, the huge Omnimax 70 millimeter motion picture projector that runs 330 feet of film a minute, the digital computer brain of the theater system, the Space Transit Simulator and other technical innovations.

October 17, 1974, San Diego Union, B-1. Ernest Chew, San Diego zoo horticulturist, counts 1,200 plant species; Zoo trees, plants grow into \$38 million garden, by Gina Lubrano (illus.) . . . To qualify as a botanical garden 60 percent of the trees, shrubs and plants "should have identification labels which tell the botanical name of the plant, the common name, family to which it belongs and its habitat."

October 20, 1974, San Diego Union, G-2. The Growth of (the Museum of Natural History), by Jeannette Branin (illus.).

October 23, 1974, San Diego Union, B-3. The Old Globe Theater's request for approval of its third theater site was referred yesterday to the Balboa Park Committee by the San Diego Park and Recreation Board.

October 25, 1974, San Diego Union, B-1. A project to upgrade portions of Balboa Park, including the initial development of Florida Canyon, yesterday was given a boost by the City Council. The council approved resolutions for inviting bids on contracts for the estimated \$265,000 project.

October 25, 1974, San Diego Union, B-1. The City Council yesterday unanimously accepted Mary G. Marston's residence in a life estate agreement.

October 26, 1974, Source ?. Balboa Park's Committee of 100 has received a \$20,000 gift toward refurbishing the Electric Building, but does not know what to do about its present tenant --- the San Diego Aerospace Museum.

The committee estimates the total cost of the project as between \$3 million and \$4 million.

October 27, 1974, San Diego Union, B-3. Study cites traffic congestion: The report said existing parking is "just adequate to handle ongoing facilities and programs" and that no provisions for additional parking facilities in the affected areas are included in the capital improvements program for the next six years.

October 31, 1974, San Diego Union, B-14:1-2. Four study programs are being offered by the San Diego Hall of Science and the Reuben H. Fleet Space Theater and Science Center starting next week; a course in "Introductory Celestial Navigation," directed by William D. Bridge will be held Wednesday evenings from November 6 through December 11.

November 2, 1974, San Diego Union, B-3. Dance Fiesta opens in park: Workshops and clinics for dancers will be featured today and tomorrow at the 24th annual Fiesta de la Cuadrilla in Balboa Park, sponsored by the Square Dance Association of San Diego.

November 3, 1974, San Diego Union, B-1. A four-plane, missing man formation will fly over this afternoon's 20th annual Massing of the Colors in the Organ Pavilion.

November 5, 1974, San Diego Union, B-1. San Diego Transit will begin mini-bus service December 1 for Balboa Park, replacing the tram operation.

November 6, 1974, San Diego Union, B-2. A plan to turn the Ford Building into an aerospace museum in connection with the nation's bicentennial celebration has been recommended by the Public Facilities and Recreation Committee.

November 8, 1974, San Diego Union, B-3. Council Awards Grant: The City Council granted \$21,000 in hotel-motel room tax funds to the Chicano cultural group, Toltecas en Aztlan, Inc. The money is designated for operation of the group's Chicano Cultural Center building in Balboa Park.

The \$21,000 grant --- a \$1,000 increase from last year's budget --- drew a negative vote from Councilman Lee Hubbard. Toltecas spokesman said the group needed 10 times the amount to pay its staff, now composed of unpaid volunteers.

November 14, 1974, San Diego Union, B-10:6. A re-creation of the first Christmas Eve in the Holy Land will be featured in a new multi-media production opening December 3 in Reuben H. Fleet Space Theater, titled "The Star of Bethlehem" the production includes a representation of the heavens exactly as they appeared to the wise men and shepherds beyond the skyline of the Biblical city; the program also will include

“To Be Alive,” an 18-minute, multiple-image motion picture that won an Academy Award for short subjects in 1966.

November 21, 1974, C-22. Ocean Beach funds: allocation urged for Collier Park: The city Park and Recreation Board has recommended to the City Council that \$40,000 originally intended for improved of Ocean Beach Park be allocated to Collier Park West improvement.

November 22, 1974, San Diego Union, B-15. Theater canyon site is undesirable, by Celine Olson.

Let us locate the wonderful festival theater in Center City where all can cheer the choice and make its success a community project.

November 22, 1974, San Diego Union. Third-theater addition to Old Globe two-theater complex benefits City, by Craig Noel.

November 23, 1974, San Diego Union. Letter, Joyce Beers, president, League of Women Voters, San Diego, opposes giving developers a reduction in fees charged by City if they build private recreation facilities, such as tennis courts, for the exclusive use of the development's residents.

November 27, 1974, San Diego Union, D-3:4. The premiere of the movie “Star of Bethlehem,” sponsored by the board of trustees of the San Diego Hall of Science and the Satellites, will be presented from 5:30 to 8 p.m., Sunday, December 8, at the Reuben H. Fleet Space Theater; the film will be the Space Theater's holiday presentation; the Coronado High School Madrigal Ensemble will sing carols around the Christmas tree at the theater.

November 30, 1974, San Diego Union, B-2. Growth Impact: City Reviews Rancho Bernardo Area Development, by Otto J. Bos.

December, 1974. Applause. Old Globe Theater: The Old Globe Theater complex consisting of the Old Globe Theater auditorium with a seating capacity of 420 and the Cassius Carter Stage with a seating capacity of 245 cannot accommodate the rapidly growing demand for quality theater under present limited facilities.

December 2, 1974, San Diego Union, B-1. Christmas center opened at park yesterday; tree lighted (illus.).

December 2, 1974, San Diego Union. Letter, Mrs. Virginia Burrell, does not want Old Globe to take another lovely canyon from Balboa Park.

December 2, 1974, San Diego Union. Letter, W. M. Ishmael, El Cajon, says if Old Globe Theater is not convenient for the patrons to park their cars, “then by all means we should move it to meet the needs of the people.”

December 4, 1974, (San Diego) Evening Tribune, B-2. Letter, Melvin Shapiro says City should not grant a special permit to allow the construction of a 12-story condominium on 8th Avenue facing Balboa Park; building will leave a large part of the park engulfed by shadows.

December 9, 1974, San Diego Union. The Ford Building has been formally designated by the City Council for use as an aerospace center.

December 11, 1974, (San Diego) Evening Tribune, B-1. The Board of Supervisors has approved purchase with the city of 1,330 acres of Cowles Mountain at a \$1 million discount.

December 11, 1974, (San Diego) Evening Tribune, B-4. City considers Fleet Theater takeover: A six-month city review of the financial difficulties of the Reuben H. Fleet Space Theater and Science Center is nearing completion, with a city takeover of the facility one of the options being considered.

December 11, 1974, San Diego Union, B-8:1. Paced with a request for the largest subsidy ever, the city is studying new ways to operate Balboa Park's Reuben H. Fleet Space Theater, city officials said yesterday; Deputy City Mgr. Ray Blair reported that this staff is reviewing possible modifications to the present agreement between the city and the planetarium operator to improve budget controls or to set up a new lease agreement to improve operations.

December 11, 1974, San Diego Union, B-8. Deputy City Manager John Johnson has proposed to the Council the creation of a San Diego Cultural Arts Committee serving as a community "outreach" arm of the Park and Recreation Board.

December 12, 1974, (San Diego) Evening Tribune. City Manager Kimball Moore proposed a new formula for funding cultural institutions by the city and county to the City Council yesterday --- the city would pay 75 percent of the institutions' subsidies and the county 25 percent.

December 13, 1974, San Diego Union, D-2:6. Mrs. Judy Hodges has been named chairman of the preview showing of the film, "Man Belongs to the Earth," sponsored by the Satellites, auxiliary to the Reuben H. Fleet Space Theater, January 18; the showing will be held for the members of the Hall of Science and Satellites; a cocktail reception will be held before the film; the show will open to the public January 18.

December 15, 1974, San Diego Union, B-19. City Manager Kimball Moore has reported that the county has agreed to increase its share of subsidies for the city's money-short cultural institution

December 20, 1974, San Diego Union, B-1. The City Council has hired the architectural firm of Delawie, Macy and Henderson to provide the preliminary design for converting Balboa Park's El Prado area to a landscaped mall.

The city sealed off El Prado to through traffic last year.

December 20, 1974, San Diego Union, B-12. Zoro Gardens, the sunken area between the Reuben H. Fleet Space Center and the Aerospace Museum where informal outdoor theater performances became a weekend feature last summer, will probably continue being used for the same purpose.

December 22, 1974, San Diego Union. Letter, Emmett H. Eigner, Lemon Grove, castigates young people for not showing respect during the playing of the National Anthem at the Organ Pavilion.

December 22, 1974, San Diego Union, B-13. Torrey Pines to be closed to picnickers after December 31.

December 25, 1974, San Diego Union, B-3. Changes in Balboa Park's Master Plan, including possible relocation of some activities, have been suggested by a committee of the city's Park and Recreation Board.

Ed Mendoza, city parks and recreation director, said proposed revisions to the 1961 plan are being considered by the board's Facility Committee largely because of the traffic and parking problems encountered within the 1,400-acre park.

December 26, 1974, San Diego Union, B-5. The City Council's Public Facilities and Recreation Committee has recommended that Balboa Park museums stay open one night a week next summer as an experiment to see if working people will take advantage of the extra hours.

1975

Summary of Events in 1975

(Note: Dates of events are approximate only.)

Playground for handicapped behind Conference Building dedicated
(July 15, 1975)

City Council rejects route to ease congestion at north end of park
(April 6, 1975)

Conflict on murals on Chicano Water Tank (June 10, 1975)

Facade of Museum of Man undergoes restoration (June 22, 1975)

Second annual Balboa Park Summer Festival (September 14, 1975)

Dome screen in Reuben H. Fleet Space Theater replaced
(November 11, 1975)

January 6, 1975, San Diego Union, B-4:3. Three new shows, including an adventure in cinematic thrills, are coming January 19 to Reuben H. Fleet Space Theater; the three films are "Man Belongs to the Earth," "Earthship," and "Laserium."

January 12, 1975, San Diego Union, D-8:7-8. The Reuben H. Fleet Space Theater's latest film, "Man Belongs to the Earth," will be previewed by the members of the theater's Hall of Science and Satellites at 7 p.m. Saturday, January 18, at the theater here; Mrs. Judy Hodges is chairman of the preview; the production will be opened to the public, January 19, with five showings.

January 14, 1975, San Diego Union, D-2:3. The San Diego Planetarium Authority will recommend to the city that the San Diego Hall of Science undergo a major reorganization to improve the operation of the Reuben H. Fleet Space Theater and Science Center; Michael Sullivan, executive director of the Hall of Science, told yesterday's special meeting of the governing board that when his contract expires in February, he will resign from his job.

January 21, 1975, Park and Recreation Board Minutes.

REFERRAL

B. Old Globe Third Theater Proposal

Chairman Milch requested that Mrs. Widman act as Chairman during the discussion of this proposal. Both he and Mr. Leyton left the table, and did not take part in the discussion as they are on the Old Globe Board. Mrs. Widman reported that the Third Theater request had come to the Board in August 1974, with the issue raising many questions regarding Balboa Park land use, parking and traffic, etc. Since that time staff provided a report in October 1974, and the Board had a combined workshop with the Balboa Park Committee in December. The Director indicated that the Board members had available a staff report dated October 18, 1974, on this subject and that staff felt that further information would not contribute to the Board's decision. He did report that nine communications had been received opposing the Third Theater. He then read an excerpt from a letter dated December 16, 1974 from Mrs. Danah Fayman, of the Old Globe Theater, as follows:

“ . . . Because we realize it is a problem which needs serious study, the Globe Theater is willing to abandon Sunday matinee performances in the new facility and to provide buses for the evening performances to and from the Zoo parking area via the service road.

“We estimate that two buses making two trips and carrying 60 persons each trip will be able to accommodate the 267 additional parking spaces that the third theater would add to the overall parking spaces estimated by the staff report as being 488.

“If it were possible to open the road from El Prado to the Zoo lot in the evenings, the theater would advertise that patrons should drop passengers at the Old Globe complex and pick them up there after performances so that only drivers of the cars would be using the buses.

“As to the environment . . . if the model is observed and a plot plan is carefully studied, the theater can be seen as a small part (less than ½ of an acre) of a large canyon which runs from the Botanical Garden the full length of the Fine Arts Gallery and is continued in the Zoo. Building the theater will displace black acacias, but it is planned to replace twice the trees that must be removed for construction.”

Mrs. Widman --- nothing that considerable public input has been received on this matter --- asked if anyone wished to speak to the Board. Mrs. Fayman, from the Old Globe, stated that she was available to answer any questions.

The Board then discussed the issue. Mr. Miller, Mr. Brandenburg and Mr. Villarino were concerned with the third theater's potential impact on traffic and parking in Balboa Park. Mr. Mendoza indicated that while staff would be studying such issues and the Balboa Park and Facilities Committee would also be seeking solutions to long-range problems of traffic in the Park, that any additional information or alternative solutions were probably a year or two away.

Mr. Mosher, the project's architect, spoke in favor of approving the third theater concept. He stated he felt the theater would be a valuable addition to the Park and the City, and that the existing traffic and parking problems, which were not all caused by the Old Globe, could be resolved. He recommended that the Board approve the concept, and then the Balboa Park and Facilities Committee along with Staff work on updating the master plan for the Park.

A representative of Citizens Coordinate spoke against the proposal, noting that the group had previously expressed their objection to the specific location chosen, not the concept of a third facility for the Old Globe.

MOTION DIED

Mrs. Widman asked for a motion to approve or deny the request of the Old Globe. Mr. Miller moved acceptance of the proposal of the Old Globe and requested that the master plan for the Park be updated. The motion died for lack of a second. Mr. Brandenburg indicated he favored a third theater, but was concerned over parking difficulties that would likely result.

The Board discussed the issue further, indicating a desire to forward a definite recommendation to Council, but being unable to decide on the wording of a specific motion. Mr. Johnson and Mr. Mendoza stated that the Board could forward the proposal to Council without a positive or negative recommendation but that Council should be made aware of the Board's concern. Mr. Mendoza indicated that the Board might wish to send a representative to Council to explain in detail any Board recommendation.

Mr. Larry Sisk spoke from the audience and suggested the matter might be referred back to the Balboa Park Committee for additional discussion.

Mrs. Elsa Martin, one of the Board of Directors of the Old Globe, noted that they had appeared before the Board at least three times, plus the Balboa Park Committee. She stated that the Theater is asking the Board for their approval of the theater's proposal to have access to the use of the specific site within the canyon for the eventual construction of a third theater. She stated that the Old Globe would not be able to expend additional funds to develop plans without the knowledge that the site would be available. She concluded that if the Old Globe found that the traffic problems are unsolvable, that the Old Globe will not spend its money on another theater.

MOTION DIED

Mr. Miller moved that the Board recommend to Council that the Old Globe's proposal be accepted, while expressing the Board's concern over the immediate problem of traffic congestion and a concern about the need for an updated plan for Balboa Park. Motion died for lack of a second.

MOTION

Mrs. Muth moved to recommend to Council that the Board approve the concept proposed by the Old Globe and recommended by the Balboa Park Committee and indicating the Board's concern with traffic and parking problems in the Park. Mr. Miller seconded the motion.

The vote was as follows:

Yes: Muth	No: Glen Brandenburg
Miller	
Villarino	
Dickinson	

Mrs. Widman did not vote as she was Acting Chairman during the discussion.

The motion carried. Mrs. Muth thanked Mrs. Widman for chairing this portion of the meeting.

January 29, 1975, San Diego Union, B-3. Deputy City Manager John Lockwood has recommended five projects to be considered for a citywide bond issue

In a report, Lockwood told the City Council it might ask for voter approval to refurbish or repair the Ford Building and the California Building. He said replacement of the Electric Building might also be considered.

In addition, bonds could be used to replace police headquarters and for the purchase of an additional administrative office building in the downtown area.

January 22, 1975, San Diego Union, B-1. The Park and Recreation Board yesterday voted 4-1 to accept the concept of a third theater within the Old Globe organization in Balboa Park.

February 3, 1975, San Diego Union, B-1. Third theater nears for Old Globe; amid opposition, by Carol Olten.

February 4, 1975, (San Diego) Evening Tribune. EDITORIAL: We can't help bragging --- even though we know boosterism is out of style --- about the \$2 million recreation center approved last week for construction in Standley Park in University City.

February 4, 1975, San Diego Union, B-1. Playground for handicapped idea backed: A proposal to establish a playground for the handicapped behind the Conference Building in Balboa Park was endorsed yesterday by the Balboa Park Committee of the Park and Recreation Board.

February 4, 1975, San Diego Union, B-3. The Public Facilities and Recreation Committee backed a plan whereby the city and county will pay up to 60 percent of the operating costs of eight museums in Balboa Park and other locations.

February 6, 1975, (San Diego) Evening Tribune, B-1. A task force studying the financial difficulties of the Reuben H. Fleet Space Theater and Science Center has rejected a city takeover of the facility, Bill MacFarlane, city property director, said yesterday.

February 6, 1975, San Diego Union, B-1. A Mexican-American cultural organization may lose city financial backing because it violated its city contract by engaging in political activity Chief Deputy Attorney Jack Katz said yesterday.

February 6, 1975, San Diego Union, B-3. The Western Area Committee, an advisory group to the city Park and Recreation Department, has approved plans to acquire land for a 16.5 acre park in the Bird Rock-Muirlands area.

February 6, 1975, San Diego Union. EDITORIAL: Park Beauty At Issue.

Adding another increment to San Diego's renowned Old Globe is an exciting prospect. However, that project raises the larger issue of how the prospective growth of all institutions with Balboa Park can be managed without damaging the park itself.

February 9, 1975, San Diego Union, B-3:4. A special city task force will recommend several steps to improve the financial position of the Reuben H. Fleet Space Theater, Bill MacFarlane, city property director, said; the task force, made up of staff members from several city departments, will recommend that tighter controls and a staff reorganization be undertaken as the first steps toward economic self-sufficiency, MacFarlane said.

February 13, 1975, San Diego Union, B-1:7. An exhibit celebrating the work of Nicolaus Copernicus and Sir Isaac Newton will open Sunday. The exhibit, on loan from IBM, is a motion picture about the two scientists and astronomy and physics from the time to Copernicus' birth (1473) until Newton's death in 1727.

February 13, 1975, San Diego Union, B-3:7. John P. Mulligan, program director at Reuben H. Fleet Space Theater and Science Center, has been appointed to the national exhibitions committee of the Association of Science-Technology Centers; Mulligan said the new committee will develop exhibit ideas and establish standards for traveling displays.

February 14, 1975, (San Diego) Evening Tribune, A-24. California Building contract awarded to Claude P. Williams, Inc. for restoration work.

February 14, 1975, San Diego Union, B-1. A \$555,000 contract to restore the California Building in Balboa Park was approved yesterday by the City Council.

February 14, 1975, San Diego Union, B-3. The City Council yesterday rezoned 160 acres northeast of Balboa Park, but delayed a decision on another 900 acres.

February 25, 1975, San Diego Union, B-3. A proposal to relocate the San Diego Aerospace Museum and Hall of Fame may have hurdled a financial obstacle yesterday with the help of a City Council committee.

The Public Facilities and Recreation Committee agreed to appropriate up to \$10,000 for a structural engineering study of the Ford Building in Balboa Park, the site being considered for an expanded Aerospace Center.

February 28, 1975, San Diego Union, B-3. An appropriation to provide up to \$10,000 for a structural engineering study of the Ford Building in Balboa Park considered a possible site for an expanded Aerospace Museum, was given approval by the City Council yesterday.

March, 1975, San Diego Magazine, Vol. 27, No. 5. The Palaces Need a Czar: Is Balboa Park Sinking or Just Losing Ground?, by James Britton II.

Please forgive the teasing title. Of course the *terra firma* of the marvelous park is not sinking. There are no oil deposits being sucked out to cause a collapse. Most of the surface is underlaid with hardpan --- getting harder every year, as Arnold Moss of the Museum of Natural History notes, because all the watering of the vegetation automatically deposits more Colorado River salts below.

One speaks of a persons as “sinking” or “losing ground” when he is near the end of his life. My real question is whether Balboa Park is losing its vitality *as a park*. The question is hardly new. San Diegans have fretted over the park’s quality for at least six of its 11-decade history, and are fretting particularly today because of the desire on the part of the descendants and beneficiaries of William Shakespeare to expand the Globe Theater complex, which occupies an exceptionally magical patch of the park. The Globesters are charting their plans with the help of Robert Mosher, who is a keen architect and a keen wordworker. In December he told me, “I wear two hats. . . . In addition to seeing this issue from the Globe’s point of view I am a member of the Facilities Committee of the Park and Recreation Department. . . . The committee has just written a report calling for still another master plan. We need to draw back and take a fresh look at the whole park and define the proper balance of usages.”

Mosher’s eloquence in meetings of the Facilities Committee was what led to that report “calling for still another master plan,” which I’d like to examine here after running lightly over the background. The first of several professionally prepared master plans for Balboa Park was made in 1902 by no less an authority than the president of the American Society of Landscape Architects, Samuel Parsons, Jr. He was selected and paid by park board’s man George Marston, Previously the most developing figure in the park had been Kate Sessions, nursery person extraordinaire, who did most of the early planting which, in due season, was to erase the memory of the desert this “City Park” was when dedicated in 1868. (New York’s Central park --- the design of which by Frederick Law Olmsted and Calvert Vaux influenced park design all over the country --- is only three years older [sic].

If your acquaintance with Balboa Park extends no more than 25 years or so, you will have to be surprised at how Parsons saw it in the first decade of the century, before the trees amounted to much. He wrote: “As one rides through the roads of the park the eye swims in rapture at the entrancing colors of Point Loma, the bay, the ocean and the mystic-wonderful Coronado Islands, which seem to belong entirely to the imagination, like the stately pleasure domes of Kubla Khan and seen by Coleridge in his opium dreams.” Parsons, who was not on the drug, also saw from the park --- in the clean-air era before smog was invented --- the peaks of San Jacinto and Palomar to the north, the Cuyamacas, San Miguel, Table Mountain and the Silver Strand to the east and south.

As Mary Marston wrote in her 1956 biography of her father: “Mr. Parsons thought that nowhere in the world was there a park completely surrounded by such magnificent views . . . He felt that roadways should be planned to make the most of the views. Planting of trees and shrubbery should not interfere with them.” But, Miss Marston added, “Today (1956) only a few view points are left, As one drives through the park, towering trees give shade and beauty, but even glimpses of sea and mountains are rare. With the growth of park and city we have lost something unique and priceless.” So much for the first master plan.

In 1908, another landscape architect, John Nolen, was working on *San Diego --- A Comprehensive plan for Its Improvement* (See *San Diego Magazine*, January, 1975). He too was chosen by Marston, who underwrote his costs. His view of Balboa Park is even less imaginable in our day

than the Parsons' view. Wrote Nolen: "The authorities must consider the wisdom of withdrawing permanently from use so large a tract (1,400 acres) in the heart of the city, of separating so completely the business and residential sections, of blocking transportation for 22 squares each way."

But Nolen also gloried in the astounding circle of distant views to be seen from the high plateau of the park. He recommended that the plateau areas be reserved for "golf, tennis, and a large general playfield," and he preferred that most of the trees be confined to the many canyons. Indeed, he advocated calling it Canyada Park. His, then, was a sort of negative master plan, which may have encouraged the nibblers who, over the years, transferred much acreage to San Diego High School, Roosevelt Junior High School, the State Division of Highways and "the world's largest Naval Hospital" --- to name only the most conspicuous bites. The nibblers even opened their jaws for an extra large chew when a site was being sought for the college that now is called San Diego State University. That, of course, would have wiped out the park, as park, if it had gone through.

When San Diego's world-stirring exposition of 1915 was being planned, George Marston sided with still a third professional landscape architectural opinion, that of the Olmsted Brothers --- sons of the Central Park genius --- who were brought in to re-think the park in readiness for the tourist flocks. The Olmsteds wanted to keep the expo buildings on the edge of the park, near San Diego High School, and they resigned in a professional huff when the high-octane architect Bertram Goodhue sold the expo leaders on his elaborate vision of a simulated Spanish city in the heartland of the park. The exposition was a phenomenal success because Goodhue's design concept had the power to stir men's souls --- even though most of the buildings were whipped up of temporary materials. It was an evocative melange of exuberant variations on originals from older cultures --- an early example of the dress-up make-believe that was to proliferate on Hollywood motion-picture lots and eventuate in Disneylandia --- but the real key to its appeal was the splendid arrangement of the buildings in relation to one another.

So, such planning as the Olmsteds did, got shelved immediately in favor of the masterly plan imprinted on the park by the overpowering Goodhue. Yet Goodhue's plan was promptly threatened too, and by none other than Goodhue himself! He became the first of a long line of architects who lobbied to get the "temporary" buildings removed from the park *ex post expo*. His main reason was that for all the bravura poured into them, the temporaries did not represent him and his associates at their constructional best, but he may also have had in mind that the park, after all, was the province of landscape architects. He would have been happy if the California Building and its tower, along with the Cabrillo Bridge and --- at a discreet distance --- the Botanical Building were all that remained --- and he saw these as suitable to be surrounded by extensive gardens.

Meanwhile, George Marston switched too, and showed up leading the consecution of citizens clamoring to retain the expo buildings! In a 1922 letter to the *Union* he wrote: "Why should the park buildings be saved? Were they not built as temporary, without any thought of being retained? Yes, it is quite true, but there may be reasons for doing differently . . . Notwithstanding the advice of the architects themselves, and the sheer impossibility of permanent restoration at present, the community has grown slowly into conviction that what we have there in the park --- which is something more than mere buildings --- must not perish. You may prove what you will in facts and figures about the shaky old buildings. The only answer is: 'They shall not pass.' Somehow, without knowing how to explain it, we are instinctively, unconsciously, incurably in love with them and will not give them up. It's the grant emotion and is founded, I think, on something real and vital. The truth is that the Exposition 'buildd better than it knew' . . . You can cross the great bridge and find yourself in another world."

Another world, George? Did you mean that competitive jostling is left behind and harmony prevails? Well, hardly. Small wars flared repeatedly in the park during the years since you wrote that letter. Museums settled and grew in the old buildings, or in replacements which sometimes respected but mostly violated the Goodhue scheme. John Nolen and the Olmsted firm won new "master plan" contracts to only spotty effect. Another architect of sweet talent, Richard Requa, did a

master plan to encompass a new exposition for 1935-36, using the Goodhue inheritance and adding the rather jumbly mix of structures now found in the Palisades area. The Navy came in with master plans, too, beginning in World War I when it started to acquire what is now 100 acres near the center of the park. World War II was rough on park buildings, which were taken over in toto by the Navy because of the grievous hospital needs.

By 1960 we were ripe for --- yes --- a master plan, and this time it was prepared by the prestigious St. Louis firm of Harland Bartholomew and Associates, which tried bravely to make sense of the accumulated confusion. The Bartholomew Plan, however, caused a new and hotter sequence of brush-fire wars within the park so that by 1975 the Facilities Committee deemed the plan of little further uses. Curiously, it had been projected to cover a 15-year period, the period had expired, and not much of the plan had been followed.

Now --- to pick up the thread from our second paragraph --- the Facilities Committee's prospectus for a 1975 master plan contains these difficult proposals:

- 1) Return El Prado (the central core laid out by Goodhue and associates) to "its original form" eliminating most auto traffic and parking re-development to be "totally pedestrian-oriented" except for in-park transit systems.
- 2) Limit autos to certain areas elsewhere in the park.
- 3) Re-locate athletic functions from the Palisades area to Morley Field *and* re-locate non-museum functions (except the Globe!) from the Prado area to the Palisades area.

Lost sight of in recent years is an idea advanced in the Bartholomew Plan: convert the California Building (now used uncomfortably by the Museum of Man) into a theater. Craig Noel, the wizardly director of the Globe for, lo, the three decades of its existence told me that it was he who had urged the Bartholomew planners to include that proposal --- which conforms with Goodhue's intent that the building be used "as an auditorium of some type." Noel and his Globesters have put that idea aside long since in favor of the new theater for which Mosher made schematics (after the Balboa Park Committee approved the concept.)

There is not doubt that Noel and his professional colleagues have the imagination and ingenuity to do wonders with any space they may inhabit. The California Building and associated structures are adjacent to the Globe. Enough space could be allotted there to develop the full-fledged theater school which would be the natural fulfillment of Noel's stewardship.

A delightful example of Noel's ingenuity surfaced at a December workshop of the park board on the question of traffic. The Globe's vestal matron, Delza Martin, was on hand to present a parking plan that Noel had hatched after sitting on the egg for years. He had an actor friend prepare an amateur rendering of a parking structure he proposed to tuck into the canyons at the eastern end of Cabrillo Bridge, which happens to be just west of the Globe. The structure would be facaded with a series of round arches repeating the arches of the bridge, and atop the layers of parking would be spacious promenades. To sell this presto solution of a severe problem, wizard Noel also prepared an acetate overlay which, when flipped across the rendering, shows how the trees would hide the parking! Note that his quite architectural scheme was offered as a non-professional conception, not at all associated with Globe architect Mosher.

The heavily-wooded canyon site of the proposed 800-seat theater (east of the Globe) is one of the most attractive glens of the park for those who bother to seek it out --- the true park seekers, some of whom are strongly challenging the Globe plans. On the other hand, a sizable piece of the terrain targeted by Noel for parking could be given up reasonably for that purpose if it would mean easing the intrusion of cars in choicer areas. Besides, a parking structure --- topped by promenades setting off the California tower --- could be so designed that it would serve other, more useful functions when we finally bring in transit systems to supersede the auto. Road access to this parking would be a bit of a challenge. So the whole question of what to build, and where, indeed, should wait upon new studies by a sufficiently talented master planner.

What Balboa Park needs now and hereafter is a resident genius of design --- an individual, not a committee --- empowered to make a master plan and continually update it. He or she would take account of the political pressures brought to bear through the Park and Recreation board, but would be the final referee. To attract the right incorruptible person, George Marston's fine house, which is not part of the park, might be thrown into the contract.

At least two of the 13 people on the Facilities Committee have the talent to fulfill this function, but none of them is likely to be available. They are all busy professionals in architecture, landscape architecture, building construction or art, and the time they can give to the committee activity is very limited. A glance at the minutes suggests that most committee time is spent evaluating contracts for outhouses somewhere or other in the city's far-flung park system. They have a hand now in selecting designers for minor projects but not for major projects (like the Globe Theater), for which committee members themselves often win contracts. Ideally, though, these pros, just because of their expertise in design, should have been charged with deciding *in the first place* whether the Globe's third theater is a good fit in the overall layout of the park, but that sort of basic judgment is made instead, repeatedly, by the Balboa Park Committee, hardly any of whose members are qualified on design matters.

The words in the FC's prospectus about returning El Prado to "its original form" have to be taken loosely. They really refer only to turning El Prado into a *prado*, or promenade, once again. Architects educated in this century generally believe they can improve on the imagery left from the Goodhue era, and that have in fact already destroyed the ensemble effect of the Goodhue heritage. Mosher's firm designed the new wings of the Fine Arts Gallery --- creditable design, these wings, but hardly retaining the original form. Frank Hope's firm did the Timken Gallery, a blatant wrong note in this neighborhood, reeking of nouveau richesse. The firms of Richard Wheeler and George Hatch (with Louis Bodmer) did the Casa del Prado and the Science Center respectively --- the one duplicating the original exterior motifs found on the site while failing to produce a significant building behind the facade, the other accommodating an amazing technological feat within while mocking the Spanish-Colonial masters by settling for blown-up residential stucco style on the exterior.

The architectural firm headed by Homer Delawie (who is a city planning commissioner) won the contracts to design the "floor" functions of the Prado. His Plaza de Balboa with its windblown fountain at the eastern end of El Prado has its own clean look --- quite different from the setting of 1915. He is presently re-designing the Plaza de Panama in front of the Fine Arts Gallery, which again will be something new --- inevitably an easy improvement on the nervous sea of cars there now, but further erasing the original form.

Facilities Committee chairman Joe Yamada --- who, like Mosher, wears to park hats --- has a contract to help the Delawie company on this plaza as he did on the earlier one. Yamada told me something of his current thoughts for the Prado (while emphasizing that nothing of this had been decided): "We need a surface that can be traveled over by necessary vehicles but is basically designed for pedestrians. I like the idea of a floor made of six-foot squares of decorative concrete paving, separated by four-inch strips of grass --- picking up the theme used so successfully at the University of Mexico. It will be agreeable to look at, pleasant under foot, and cars can park on it until we decided what else to do with them. Also, the squares can be lifted out at any point to provide beds for planting. I'd like to carry this motif down the entire Prado across the bridge and all the way to Sixth Avenue, getting rid of the asphalt. In front of the Fine Arts Gallery would be a good place for a outdoor dining arrangement.

The Yamada artistry is highly reliable if not infallible. (His striking fence around the Fine Arts Gallery's sculpture garden needs to be painted dark to diminish its distracting op-art effect.) His idea described above sounds like a genuine aesthetic enhancement of the Prado's ambiance. There is no doubt, now, that the Prado's future will not be a restoration of its original form but a mixture of nostalgia phenomena and contemporary expression. (Tiny Bea Evenson's mighty Committee of

100 will continue to do battle for reincarnation in concrete of the fragile Goodhue ghosts, but she faces strong opposition --- for example, in the looming case of the Electric Building, the one whose cornice is held up by plastered naked ladies. This is a period piece if ever there was one, and I think it should be treasured.) The serious challenge is to see that anything added along the strip of the Prado is a plus rather than a nonplus --- concerting but not disconcerting. A new unity has to be discovered.

Though intending to discuss the whole of the park, I have kept the reader pinned on the Prado because that is where the definitive changes are occurring. If we step for a moment to the east of Park Boulevard, opposite the end of the Prado, we can touch on a really thorny issue. A rose garden is being created there, while just north of it is a desert garden where cacti will stand and point. It makes no landscaping sense to have these two gardens as neighbors, considering that the two classes of prickles tend to jam each other's messages to man. An alternate site for the roses, near the Federal Building, was foreclosed because the area had recently been planted to trees and grass.

Grass is being used widely now in San Diego parks because, as park superintendent Dave Roberts explained to me, it is easy to maintain with modern equipment and requires fewer man-hours than more complicated vegetation. Of course, the grass is welcome to the average eye and foot, though it seems alien to lovers of the native heath, and it does drink oceans of water. In Balboa Park the new expanses of grass also mean that this very particular park is returning somewhat toward the condition of openness that so fascinated Samuel Parsons in 1902. However, the distinct views that he raved about are being blocked now by buildings rising high outside the park. Not of these buildings risen to date is as rewarding to gaze upon as is the park's centerpiece, the California Tower, which once was smothered in eucalypti but is now quite exposed because of the removal or topping of many trees --- another result of managerial rather than design intentions.

The park superintendent and his design staff have valuable experience on which to draw, but they do not have the time, the authority or even the inclination to ride herd on all the people who contribute parts of the Balboa Park future. So the fact remains that no one is in a position to assure that the whole will be greater than the sum of the parts --- i.e., a masterpiece of design. Yet, obviously, the finest park must have the finest guidance. Or sink.

March 2, 1975, San Diego Union, B-6:3. The dome of the Reuben H. Fleet Space Theater is not falling, but little bits of tape are; City project officer W. Earl Hayden said the City is unhappy with the job done on the dome screen two years ago by the contractor, Spitz Lab, Inc.

March 4, 1975, (San Diego) Evening Tribune, A-9. The council's Public Facilities and Recreation Committee yesterday delayed until March 17 action on a proposal to increase funding for area cultural projects through an admissions tax on entertainment events.

March 7, 1975, (San Diego) Evening Tribune, B-5. The City Council has renamed the B Street overpass and pedestrian mall near San Diego City College in honor of former Mayor Frank Curran.

March 7, 1975, San Diego Union. The City Council asked for bids on refurbishing the roof over the stage and dressing rooms of Balboa Park Bowl.

March 8, 1975, San Diego Union, B-2. Plaza de Panama parking spaces in Balboa Park should be eliminated, the San Diego Historical Sites Board recommended yesterday.

March 9, 1975, San Diego Union, D-4. "Auxiliary Expo" set for Friday, March 21, in Balboa Park to explore realm of cultural volunteers, by Elaine Smyth (illus.).

March 10, 1975, San Diego Union, A-9. A series of workshops designed to help persons trace family histories will be held next Friday and Saturday at the Puppet Theater in Balboa Park.

March 14, 1975, (San Diego) Evening Tribune, A-23. The Committee of 100 has offered a new approach to the city in a campaign to preserve the decorative facade of the old Electric Building in Balboa Park. The committee wants to donate \$6,000 for the first phase of a feasibility study on preservation of the remaining buildings from the 1915 Exposition in the park.

March 14, 1975, San Diego Union, B-5. Councilman Leon Williams yesterday asked City Attorney John Witt if use of Balboa Park's Organ Pavilion last weekend by the American Nazi Party violated a council policy on racial discrimination.

March 18, 1975, Minutes of the Park and Recreation Board.

ITEMS

A. Sundial - Balboa Park

George Loveland, staff assistant to the Balboa Park Committee, introduced Dr. Gordon Plummer who was presenting the concept of a proposed sundial for the Plaza de Balboa in Balboa Park. Dr. Plummer designed the device and is donating it to the City. Mrs. Widman and Mr. Yamada noted that both the Balboa Park and Facilities Committees had reviewed and approved the concept; the Facilities Committee approved the design with one reservation, that is, that the base should be reduced in size. Dr. Plummer indicated that the size of the base was being reduced from 42 inches to 36 inches. Mr. Yamada suggested that Dr. Plummer work with staff and the consultant who is presently working on the design for the Prado area, including a flagpole which is to be installed in the Plaza de Balboa.

Dr. Plummer displayed a drawing of the proposed sundial, indicated how the structure was designed and noted that it is a "universal" sun dial and is self adjusting.

MOTION

Mr. Leyton moved approval of the concept subject to the specific location being integrated in the design plan being prepared by the consultant mentioned above, and the Facilities Committee's approval of an appropriate base. Mr. Brandenburg seconded the motion which carried unanimously.

REFERRAL

On behalf of the Board, Mr. Milch thanked Dr. Plummer for his proposed gift and requested staff to contact Dr. Plummer.

B. Tennis Center Schematic - Balboa Park

Vince Marchetti of the Development Division staff, made a presentation regarding the design for the expansion of the tennis center at Morley Field. HE reported that the architect for the original building was Mr. Sim Bruce Richards, the same architect being utilized in designing the proposed building addition. Mr. Marchetti displayed drawings and reported that the current plan is to add a second story to the existing building. This design will provide the needed room, with budget, be aesthetically pleasing, and will not require the use of any presently landscaped area. The proposed plan was approved by the Facilities Committee but had not been to the Balboa Park Committee as yet.

NEW BUSINESS

A. Monument to Composer - Balboa Park

Mrs. Widman reported that on August 5, 1974, the Balboa Park Committee recommended approval of a proposal to place a bust of the composer of the Philippine National Anthem in the courtyard of

the Philippine Cottage of the Houses of Pacific Relations in Balboa Park. Jim Gutzmer reported that the individuals interested in locating the bust in Balboa Park had expressed an interest in its location in the downtown Community Concourse. However, now the individuals are again interested in utilizing a location in Balboa Park and have requested that the Board confirm the Committee's recommendation.

MOTION

Mrs. Widman moved that if the bust of the composer is life-size, it be placed in the courtyard of the Philippine Cottage. The motion was seconded and carried unanimously.

March 20, 1975, San Diego Union, 27:1-2. Questions about the Red Planet will be explored in "New View of Mars," a program being added to the regular bill at Reuben H. Fleet Space Theater for Easter week; "The new film reveals that science imagination equals fictional fantasies," said W. Michael Sullivan, executive director of the theater.

March 20, 1975, San Diego Union, C-7. The city Parks and Recreation Board has approved donation of a new type of sundial to be constructed in the flower garden behind the Natural History Museum in Balboa Park.

March 20, 1975, San Diego Union, E-1. Prized art unearthed from the musty past, by Jeannette Branin (illus.).

A sagging floor led to the discovery of the newest treasures to be added to the Panama-California Sculpture Court at Casa del Prado in Balboa Park.

The three sculptures had been created by Italian masters of the art in New York City 50 years ago. Plaster casts were made and shipped to San Diego.

Here they were cast in concrete to ornament the facade of the Fine Arts Gallery, built in 1925 and 1925. They were statues of Murillo, Velazquez and Zurbaran, famous artists of the 17th century.

Then the master molds were dumped ignominiously in the dirt-floored basement of a Balboa Park building.

Col. Own Clarke, executive director of the Aerospace Museum, said that he first saw the statues about eight years ago.

"We were moving airplanes around in the museum and noticed that the floor appeared to be weak in this old building," he said.

"Now we didn't want any airplanes falling through the floor, so we went down into the basement to shore up the floor with some timbers.

"It's a messy old basement, with a dirt floor that slopes down toward the canyon in the back of the building," said Clarke. "The city has used it to store stuff for years; we started storing there, too, to make room for other things.

"While we were bolstering the floor, we saw the three statues, just sort of dumped down off to one side. We mentioned it to a few people around town, but no one had any idea where they had come from."

For another eight years, the statues lay in the dirt undisturbed except for the night when vandals broke it, and, for some incomprehensible reason, smashed the faces with an iron pipe and kicked a hole in the back of one of them.

Last year, Bea Evenson, president of the Committee of 100 and motivating force behind the construction of Casa del Prado, heard about the statues in the basement.

“We recognized them as the original master models from the Fine Arts Gallery,” she said.

“We knew they should be preserved. They are rare. They deserve a place in the sculpture court.”

The sculpture court was dedicated to the memory of Mrs. Evenson’s late husband, Frank E. Evenson, who dies June 14, 1973.

The sculpture court now contains statues and other ornaments removed from the Food and Beverage Building before it was razed to make way for the Casa del Prado, a reproduction of the original, but temporary building.

Chris Mueller of Burbank, an architectural modeler and sculptor who was involved in the ornamentation of Casa del Prado, agrees with Mrs. Evenson that the plaster statues are rare.

“Plaster casting of this sort, for architectural sculpture, just isn’t being done anymore,” said Mueller.

“What we have today are individual pieces being done by artists, or so-called artists, and applied to or around the buildings, not designed as an integral part of the composition.”

Mueller said that the new discoveries should not be considered “just old plaster casts.”

They are the master casts, he said, made from the original clay models which are always, invariably destroyed after the plaster casts are made from them.

“There’s no way to replace them,” he said. “They’re each one of a kind.”

Mrs. Evenson believes that the three statues were sculpted by one of the six sons of Furio Piccirilli of Italy, who established a marble-cutting business in New York in 1888.

“Horatio Piccirilli was the most highly skilled in ornamentation,” said Mrs. Evenson. “He may have been the one who made these.”

Members of the Committee of 100 called in John Clark, artist-craftsman who supervised all the restoration work at Casa del Prado and at the Palace of Fine Arts in San Francisco to repair the mutilated statues.

Clark has completed the restoration of the broken back and faces, except for the “fine finishing,” he said.

“I’ve been working in artificial light on a level with the statues, which are a little large than life size,” he said. “What I have to do now is to take them out into natural light and compare them with the statues on the gallery facade. Then I’ll know what remains to be done.”

They will be moved to the sculpture court as soon as the city gives permission,” said Mrs. Evenson.

“And, oh, I wish we could make a plea for the return of the statue called ‘California,’ the standing woman with two children, one representing an American Indian,” she said.

“It was removed from the Chollas Sanitary Landfill storage area several years ago. If only it would be returned.

“The statue of ‘California’ belongs in our sculpture court, to be enjoyed by all the people,” she said.

March 21, 1975, San Diego Union, B-15. A policy change proposal to give developers a possible 25 percent reduction in city park fees when private recreation facilities are provided was revived yesterday by Councilman Bob Martinet.

March 21, 1975, San Diego Union, B-3. The City Council yesterday tightened building density requirements on about 435 acres of property located east and north east of Balboa Park.

March 23, 1975, San Diego Union, B-14. The San Diego Unified Port District hopes to be able to proceed with a \$500,000 extension of Spanish Landing Maritime Park by midsummer, a port spokesman has said.

March 29, 1975, San Diego Union, 14:1. A freckled, 11-year old, redheaded boy became the millionth visitor to the Reuben H. Fleet Space Theater yesterday; theater officials at the turnstiles presented Richie Faulkner, son of Mr. and Mrs. Arden Faulkner of San Marcos, with a bronze medallion and a membership in the San Diego Hall of Science; Richie also got a chance to "control the universe: by pushing a button that started the theater's 2 p.m. "Earthship" presentation.

April 6, 1975, San Diego Union, B-4. City rejects new route into park.

A City Council committee has turned thumbs down on a proposal to ease traffic congestion on the north end of Balboa Park.

Charles Wolf, 1520 Upas St., has sought Public Facilities and Recreation Committee support for routing most park traffic from freeways via Pershing Drive and Florida Street.

Wolf advocated a signed route leading to the park via Pershing Drive and Florida Street, which would require major alterations to the street crossings at 26th Street.

Wolf earlier requested a change in existing signing which currently leads motorists northbound and southbound on Interstate 5 into 163 northbound to reach San Diego Zoo and El Prado facilities.

The committee filed Wolf's rerouting request after a report from Acting City Manager Mike Graham said that the proposal would involve "the expenditure of additional thousands of dollars."

Graham said that while traffic would be removed from Upas Street as advocated, major reconstruction of the 26th Street, Florida Drive, Pershing Drive intersection would cost in excess of \$150,000.

Proposed sign changes on Interstate 5 would cost \$5,000, Graham said.

Presently, there are no funds scheduled for major reconstruction projects at the intersection, said Graham. Some widening of the street has long been listed as needed, Graham said, but due to limited funds available has not been listed high on priority lists.

There are only a few times a year when congestion is experienced on Upas Street between Richmond and Park Boulevard due to park traffic to and from Route 163, Graham said.

In evaluating Wolf's plan, the requested change from the current pattern would create worse problems unless there was a major reconstruction of the Florida Drive intersection, he concluded.

The Zoological Society of San Diego reported it prefers traffic routing to the zoo, as it is presently.

April 11, 1975, San Diego Union, B-4. Park access closure is opposed..

Deputy City Manager John W. Johnson yesterday recommended against closure of the west end of El Prado in Balboa Park.

The access across Cabrillo Bridge is needed as the east-west link to the park to avoid having to build new parking facilities near Sixth Avenue and permit east entrance to the park's cultural institutions, Johnson said.

A resident of the area, Charles Wolf, had asked the City Council to consider closing the bridge to cut down traffic in the park. The council's Public Facilities and Recreation Committee asked for Johnson's report on the matter.

The council, in fall 1973, considered a variety of plans regarding traffic in the park, and voted to close the eastern portion of El Prado from Plaza de Panama to Plaza de Balboa.

This eased out non-park traffic, while continuing easy access to all facilities in the park, Johnson said.

The city staff does not feel conditions have changed since that time to warrant closing the bridge area, said Johnson.

April 14, 1975, San Diego Union, D-7. Balboa Club keeps aged busy, by Ernesto Flores.

One of the most used city buildings in a one-story structure surrounded by trees and thick shrubbery in the southwestern portion of Balboa Park.

The building opens at 7 a.m. every day including weekends, and sometimes stays open up until 10:30 p.m. During that time there is a continuous stream of people going in and out.

"Before we open the door in the morning, there are already people waiting outside. We are supposed to close at 8:30 p.m. but some activities go past that," said Jess Morris, 70, a retired roofer.

The building is operated by the Balboa Club, an organization of people who love to play chess, cards, pitch horseshoes, play shuffleboard and other group activities.

The city owns the building, which also pays for its maintenance, utilities, and administrative operation.

Although the club's membership is open to all 18-year olds and above, the majority of the members are senior citizens, who spend most of their waking hours there.

"Old folks on rocking chairs dry up and soon lose the will to live. Like other human beings, they need activities to occupy their bodies and minds. The club provides that," said Jack Starr, 70, president of the club.

According to Starr, a retired Dallas journalist and county administrator, many of the older residents "stay alive because of the club."

"Watching senior citizens play shuffleboard is like watching kids at play. They become so involved in it and forget everything else," said Starr.

Morris, the club's vice president, said there are about 460 members, which is fewer than a few years ago.

"Probably the reason for the drop in membership is that the yearly dues have increased from \$5 to \$7.

Eddy Gibson, office administrator, said most of the young people who are members of the club are chess players.

"We probably have the largest gathering of chess players at any given moment in San Diego," said Gibson, adding that the club has about 50 chess tables.

He said chess tournaments are held almost once a week and "they are always lively affairs."

Some of the problems of the club, said Gibson, include vandalism and burglaries. He said at one time the kitchen was broken into and many utensils were taken.

Another problem, he said, is the continually rising cost of supplies and equipment. "We use to buy wax for the shuffleboard court at \$66 per 100 pounds," he said.

He said to make his budget go further, he now canvasses for supplies and equipment, rather than buying it from just one supplier.

In addition to the usual club activities, the club also sponsors parties, trips and outings and special classes on certain subjects.

April 15, 1975, San Diego Union, B-3:2. The temporary shutdown of the Reuben H. Fleet Space Theater this fall to permit the replacement of its dome screen was considered yesterday by the Planetarium Authority; the authority, which administers the theater and space center in Balboa Park, discussed the refurbishing at its annual meeting, following by report by Early Hayden, project officer in the city Engineering and Development Department.

April 15, 1975, Minutes of the Park and Recreation Board.

E. Plaza de Panama and El Prado

Mr. Yamada requested to be excused during the next item as he had a potential conflict of interest with this matter; he left the meeting at this point and did not return.

Mr. Mendoza reported that Mr. Milch (who was absent) and Mr. Leyton had requested an opinion from the City Attorney regarding an potential conflict of interest in their part in participating in any discussion on this item. The City Attorney has rendered an opinion that although both were now members of the Old Globe Board of Directors, they would not have a conflict of interest in this matter. Mr. Leyton noted, for the record, that he has neither any financial interest in the group making the presentation nor in the project itself. He added that if the discussion reached any point where he felt a conflict of interest existed, he would excuse himself.

1. Design by Consultant

The architectural firm of Delawie, Macy and Henderson presented a schematic plan for the redevelopment of the Plaza de Panama and the eastern portion of El Prado. The architects presented slides, maps, and other graphics describing the proposed project. They discussed their scope of work, pedestrian, vehicular and bicycle access, parking and traffic flow, the aesthetics of paving materials and landscaping, arcades, benches and parking lights.

The primary recommendations of the architects proposal were as follows:

- a. Respect and restore the major and minor axes of the original Baroque Park Plan by:
 - (1.) Recapturing and enhancing the vistas of the original.
 - (2.) Focusing views on the terminal elements of axes.
 - (3.) Restoring exterior spaces through the use of living tree arcades where new building lines have deviated from the original will be recaptured [sic].

- (4.) Unifying the composition through the use of uniform planting and paving materials. We would like to see the pears be continued throughout.
- b. Restore the Plaza de Panama to its proper use as a people space by:
- (1.) Eliminating the automobile parking within the area.
 - (2.) Unifying the space with continuous pavement and a perimeter of similar trees and lighting standards, adding lights and trees were needed.
 - (3.) Providing shaded spaces for sitting and promenading. There would be access for the handicapped, a drinking fountain and trash receptacles. It would be hard surfaced and the areas would be flexible, i. e., sidewalk café during nice weather.
- c. Further unify the park area through the use of appropriate well-designed street furniture, trash containers, drinking fountains, bicycle racks and graphics.
- d. Restore existing neglected facilities, such as the ornamental fountains to an operating condition.
- e. Respect and protect existing valuable planting materials and add new materials which enhance and enrich both the existing buildings and plant materials.
- f. Develop an adequate intra-park transit system to interconnect major parking areas and buildings.

The architects indicated that the approximate cost of their proposals would be \$750,000 with the project divided into four basic components, the largest of which would be the redevelopment of the Plaza de Panama.

The Board discussed the concept at length; it was determined that additional comment was needed from the public and from the various City departments that would be involved.. Mrs. Widman reported that the Balboa Park Committee had reviewed the plan and passed a motion recommending to the Board that the Committee be permitted to hold a public hearing on this matter in May. Mr. Roberts indicated that the architect's presentation was going to be committed in writing so that members of the Board, appropriate committees, and the public would have an opportunity to study the matter. Mr. Mendoza reported that staff would attempt to publicize the Balboa Park Committee's public hearing on this proposal if the Board agreed.

Mrs. Bea Evenson spoke, noting that she was not representing the Committee of 100, and expressed hope that the concept would be approved with certain modifications. Mr. Charles Wolfe also spoke in favor of the proposal. Mr. Mendoza read from a letter submitted by Mr. Henry Gardiner from the Fine Arts Gallery protesting the moving of the parking from the Plaza de Panama.

MOTION (withdrawn)

Mrs. Widman moved that the Board accept the recommendation of the Facilities Committee and review the proposal at a public hearing. Mrs. Muth seconded the motion. Mr. Leyton recommended that any motions regarding the proposal should be deferred until a public hearing is held. After discussion, Mrs. Widman stated that she wished to withdraw her motion and Mrs. Muth withdrew her second. The Board then agreed to refer the proposal back to the Balboa Park Committee for a public hearing in May with the matter to be returned to the Board in the same month.

(Sundial)

As part of the architect's review of the Plaza de Panama and the Prado area, a base design was selected and specific site location for a sundial to be located near the Plaza de Balboa. The base will be 24 inches square and the sundial will be located to the northeast of the fountain adjacent to the walkway leading across the bridge over Park Boulevard. The proposal of the architect has been approved by the donor, Dr. Gordon Plummer, and the Facilities Committee.

MOTION

Mrs. Widman moved and Mrs. Dickinson seconded to accept the recommendation of location and proposed base; the motion carried unanimously.

2. and 3. Staff Parking Study/Historic Site Board Recommendation

Staff distributed copies of reports relating to both items for members of the Board to study prior to the re-discussion of this matter at the May meeting.

G. Marston House Acquisition

Ed Mendoza reported that Miss Mary Marston has offered to donate her home to the City and has asked that the San Diego Historical Society operate the facility. The home would be transferred to the City's ownership upon Miss Marston's demise. Staff is preparing an agreement with the Historical Society that would call for ground maintenance to be provided by City; custodial care to be the responsibility of the Historical Society. The proposed agreement will go to the City Council within the next few months. Mr. Kevin Munnely, City Endowment Officer, and Mr. Jim Moss of the Historical Society were both present but the Board raised no questions or objections on this informational report.

April 16, 1975, San Diego Union, B-4. \$750,000 park project submitted for redevelopment of Plaza de Panama and El Prado.

A \$750,000 project for the redevelopment of Balboa Park's Plaza de Panama and El Prado was submitted to the city Park and Recreation Board yesterday.

The project includes restoring the Plaza de Panama as a "people space," providing uniform paving through the Plaza and El Prado, creating and adding to living tree arcades and providing two raised "happening" spots for public events on the Prado.

It was proposed to the board by the architectural firm of Delawie, Macy & Henderson and Wimmer, Yamada & Iwanaga as "preserving and modifying existing elements to provide focus on the original park plan of 1915."

In unanimous action, the board referred the plan back to the Balboa Park Committee for further review at its May 3 meeting.

The architectural firms recommended that if the plan is implemented the Plaza de Panama --- to be developed into a mall area at a cost of \$370,000 --- be given priority in the improvements.

The firms also encouraged the board to develop "a good viable, inter-park tram system" to serve traffic problems.

April 26, 1975, (San Diego) Evening Tribune. Casa del Prado: Sculpture court gets three statues, by Jan Jennings (illus.).

Three pieces of sculpture, recently uncovered in the dirt beneath the Aerospace Museum, will be added to the Panama-California Sculpture Court of the Casa del Prado, according to Mrs. Frank R. Evenson, founder of the Committee of 100. . . .

The three sculptures to be added are made of hemp, wire and plaster, as are the other sculpture castings in the garden. They are being touched up and moved by students from Dr. Fay Frick's art classes at San Diego State University. The project is an offshoot of a course called "Seminar of Modern Art in San Diego, from 1850 to 1950."

May, 1975, Applause. "To Be or Not to Be, That is the question," by Elliott Swift and Ron Shapiro.

Nearly everyone agrees that San Diego needs more theaters. As our population has increased, the ability of existing theaters to accommodate theatergoers has decreased. Last year, for example, the winter season at the Old Globe/Cassius Carter was sold out and an estimated 144,000 people were turned away during the summer Shakespeare Festival.

May 3, 1975, San Diego Union, B-1. Plans are underway to make the Mary Marston home adjacent to Balboa Park the future administrative headquarters of San Diego Historical Society.

May 5, 1975, San Diego Union, B-1. A \$750,000 plan to transform the cultural core of Balboa Park into a spot for pedestrians will be reviewed at 3 p.m. today by the Balboa Park Committee.

May 6, 1975, (San Diego) Evening Tribune, B-1, B-4. A \$750,000 plan for renovation of Balboa Park's cultural center drew complaints yesterday that it would lead to increased problems of park crime and inadequate parking.

May 6, 1975, (San Diego) Evening Tribune. The Centro Cultural de la Raza, Toltecas en Aztlan, will sponsor a benefit concert, "Music del Fuego Nuevo," at 8 p.m. tomorrow in the center in Balboa Park.

May 6, 1975, San Diego Union, B-1. Suggested Limit to Park Parking Draws Opposition.

A plan to eliminate parking from the cultural core of Balboa Park was opposed yesterday by those who use museums and other facilities in the area.

Of the 21 persons who spoke during a public hearing conducted by the Balboa Park Committee, 16 were against the plan, three were for it, and two were for it with reservations.

May 7, 1975, San Diego Union, B-4. Construction of a new 800-seat theater as part of the Old Globe complex in Balboa Park has received the endorsement of the city manager's office.

May 7, 1975, (San Diego) Evening Tribune, A-17. A proposal by the Old Globe organization to build a third theater in Balboa Park has received conditional support from the city manager's office.

May 14, 1975, San Diego Union, B-7. Balboa Park; No Parking's No Good For Park, by Clive N. Pillsbury.

The lesson here is that to close the plaza (de Panama) to parking without compensating nearby spaces would invite disaster for our cultural facilities. It should be noted that about one half of all San Diego's postwar theaters have closed their doors due to a loss of patronage, owing to inadequate safe parking, with the gap filled by theaters in shopping plazas with parking at the door.

May 14, 1975, San Diego Union, B-7. Balboa Park: Pedestrian needs must be met, by John D. Henderson.

The pedestrian is caught in a non-man's land, completely surrounded by parked or moving vehicles. It is indeed strange that the Plaza de Panama, once the central focal point of the entire Exposition grounds of 1915, is now being used for its present inappropriate purpose as a parking lot.

May 18, 1975, San Diego Union, B-6. The Arthur P. and Jeannette G. Pratt Memorial Foundation has donated another \$10,000 for preservation of Spanish Colonial architecture along El Prado, bringing to \$135,000 Pratt grants for that purpose.

A spokesman for the Committee of 100 said Mrs. Pratt gave \$100,000 during her lifetime and that another \$20,000 had been donated by the estate.

May 18, 1975, San Diego Union, F-21. Balboa Park landmark: House of Hospitality has new look (illus. of 780-square foot La Sala Banquet Room in antique white with soft gold wainscoting; carpet is orange and gold).

The House of Hospitality Building, a San Diego and Balboa Park landmark since 1915, completed extensive refurbishing this month, Jerry Lewis, president of the association, announced.

Lewis said the House of Hospitality Association had commissioned Sue Cox, one of the owners of the Café del Rey Moro and a lessee in the building, to handle refurbishing.

The House of Hospitality Association has been lessee with the City of San Diego since 1935. The association, in turn, leases the two-story building to such organizations as the San Diego Opera, San Diego Symphony, Junior League of San Diego, Sierra Club, San Diego City and County War Against Litter, Citizens Coordinate for Century III, World Affairs Council of San Diego, Yokohama Sister City Organization and offices for William Hippen, council general of Japan.

The building, originally T-shaped in 1915, was changed to its present form, with a central fountain and garden area, by the architectural firm of Requa, Jackson and Hamill. San Diego sculptor Donal Hord then was commissioned to create a statue for the central patio area, where he constructed the seated figure of a native Aztec woman of Tehuantepec, utilizing more than half of a 1,600-pound block of rock.

Spanish architecture and the influence of the 1935 and 1935 Panama Expositions [sic] still are evident in the building through the display of heraldic decorations over archways and entrances.

The building interior was last refurbished in 1962. At that time the Junior League of San Diego and the House of Hospitality Association each contributed \$20,000 toward renovation, which included the ballroom and the restrooms. Since the architecture of the building is patterned after famous buildings in Spain or Mexico, Mrs. Cox selected carpeting, draperies and accent colors to balance the Spanish theme, using burnt oranges, golds and antique whites as main colors. All rooms have a Spanish flair and the largest, the Loggia, measuring 1,457 square feet, features an adobe-type tile floor, open wood beams and tones of blue and coral against natural wood. A new entry door was added with a smoked glass panel in one side. Draperies are brown and beige with touches of orange.

The second largest room, the Lounge, accommodates up to 150 people. Walls again are antique white, with hand-painted wooden beams and carpeting in an orange and gold tile pattern. The other rooms, La Sala and the Davidson room, provide small areas for informal parties and banquets. The Davidson room, however, has a garden-like atmosphere and here Mrs. Cox used moss green and light green carpeting against garden-green walls to accentuate the setting.

The ceiling in the Davidson room was painted white, with the addition of four garden-like lanterns added to augment lighting, and white lattice work added to walls.

To complement the redecorated Sala Room, John and Sue Cox have loaned the "Bullfighter" mural, an original work by Arizona artist Jay Datus to the House of Hospitality Building. The mural, approximately, 20 feet long by 4 feet high, symbolizes the many moods of bullfighters and is in keeping with the same color scheme.

May 20, 1975, Park and Recreation Board Minutes.

A. Cut-Flower Concession

Mr. David Rotner presented a drawing of the cart for his proposed cut-flower concession in Balboa Park. The Balboa Park Committee recommended approval of the design, with locations to be at the lower level of Plaza de Balboa, adjacent to the Zoro Garden and on the "green" in front of the Old

Globe Theater. The flowers will be \$1.00 for a bouquet and \$1.50 for a corsage. Although this item has not been before the Facilities Committee, their Chairman indicated that since this was a decorative item, that their input would not be required.

MOTION

Mrs. Widman moved, seconded by Mrs. Muth, that the Board recommend approval of the design and placement of the cart for a six-month trial period. Motion carried.

B. Zoro Garden - Balboa Park

Mr. Tom Van Dyke, landscape architect, presented schematic drawings for proposed improvements to Zoro Garden. The improvements include additional paving (colored concrete aggregate), additional plant material and a small waterfall. These improvements will not significantly change the character of the area. The plant material has been approved by the Balboa Park Committee and will consist of shade plants, such as ferns, etc. It was noted that Mr. Van Dyke had informally consulted with the firm of Wimmer, Yamada and Iwanaga, but it was emphasized that Mr. Yamada had no connection with the project and will receive no compensation. The street theater groups will be able to continue to use Zoro Garden.

MOTION

It was moved by Mrs. Widman, seconded by Mrs. Dickinson, that the Board recommend approval of the project. Motion carried.

May 20, 1975, (San Diego) Evening Tribune, A-11. Plan to cut traffic in park advances.

A \$750,000 plan to renovate Balboa Park's cultural center has been approved by the Park and Recreation Board's committee.

The Balboa Park Committee voted unanimously yesterday to recommend that the board approve the plan which envisions elimination of 159 parking spaces and expansion of the park for pedestrian uses.

The plan was developed by the architectural firm of Delawie, Macy and Henderson in connection with the City Council's decision in 1973 to close El Prado (Laurel Street) to vehicle traffic through the park.

May 20, 1975, San Diego Union, B-4. Balboa Park Parking Ban Plan Gains: A long-range plan that eventually would eliminate parking from the central core of Balboa Park was approved in concept yesterday by the Balboa Park Committee.

May 26, 1975, (San Diego) Evening Tribune, B-5. The Old Globe Theater has another record-breaking attendance during the 1974-75 season, it was announced today.

There were 12,000 more persons who attended performances in the season just concluded over last year.

All ten productions presented by the Globe had a 97.8 percent average capacity. On the main stage, 175 performances were given and in the Carter Center Stage, 176.

The musical "Godspell," which will return to the theater tomorrow night, opened the current season and played to 99.8 percent capacity, or 14,676 patrons.

Others playing to virtual capacity were "An Inspector Calls," "6 Rms Riv Vu," "You Never Can Tell," and "Abelard and Heloise."

In Cassius Carter, "Butley" opened the season to 96.9 capacity, and that trend continued through "School for Wives," "Macbeth," "The Real Inspector Hound," and "After Margritte," a double bill, and "The Tenth Man."

Craig Noel, producing director at the Globe, said that "with only two percent of all seats unoccupied during a total season capacity of 114,988 available seats, it becomes more pressing each year that additional facilities be provided to meet the ever-increasing demand by theater goers seeking the finest in dramatic entertainment."

May 29, 1975, (San Diego) Evening Tribune, C-7. City mulls hike in greens fees.

May 30, 1975, San Diego Union, B-2. The City Council has asked for bids on a project estimated to cost \$19,500 to restore an eroded slope at the Balboa Park Golf Course.

May 30, 1975, San Diego Union, B-2. The city has joined hands with the state to provide new erosion controls at the Torrey Pines State Park.

May 30, 1975, San Diego Union, B-6. Vandals --- believed to be disgruntled skateboard enthusiasts --- yesterday struck the city's parkade garage again.

The day after the City Council outlawed skateboard riding on the inclined ramps of the multi-story garage, two \$100 trash cans were hauled to the structure's 13th floor by unidentified persons and tossed below.

May 30, 1975, San Diego Union, B-9. Department budget cuts will force a reduction in the watering of lawns and other planting in city parks, city officials said yesterday.

May 31, 1975, San Diego Union. A-15. Indian Magique, a street theater company, which performs in Balboa Park and other outdoor locations during warm weather, will begin its 1975 summer season today and tomorrow in Zoro Gardens.

May 31, 1975, San Diego Union, B-1. Balboa Park's California Tower carillon and Spreckels Pavilion organ will be silenced this fall if City Council budget cuts are finalized.

June 1, 1975, San Diego Union, B-9. Fees for special recreation services would be increased sharply effective October 1 under a plan pending before the city's Park and Recreation Board.

The International Aerospace Hall of Fame is getting a face-lifting and a more prominent location in the Electric Building, which it shares with the Aerospace Museum.

June 2, 1975, San Diego Union, B-1. A Good Day for Park(ing) And Watching People --- Balboa Lure Was Strong, by Eston McMahon (illus.).

About half the people interviewed said they came to the park to watch other people because they said people are "interesting."

June 2, 1975, San Diego Union, B-2. Something About Parks . . . "My name," he said, "is Tom Parks, and maybe that's the reason I like parks so much."

June 2, 1975, San Diego Union, B-3. The Century Travel and Photographic Club will meet at 7:30 p.m. today in the Balboa Park Photographic Arts Building.

June 2, 1975, San Diego Union, B-5. House of China helps keep a heritage alive (illus.).

For more than 40 years, the House of China in Balboa Park has been helping to keep the centuries-old Chinese culture alive for the Chinese-American community here.

The social and cultural organization is of particular value for many members of later generations of Chinese-Americans whose heritage might otherwise have been lost, Virginia Fung, House of China president, said in an interview.

During their parent's generation, she explained, the emphasis was on assimilation into American society and many did not teach their children "what it is to be Chinese."

But there is a revived interest among young people about their origins and they are turning to such sources as the House of China to find out about their heritage, she said.

When the House of China was established, on May 26, 1935, members of the Chinese community paraded up Sixth Avenue to the park with a dragon and other traditional characters and shot off 10,000 firecrackers to mark the event.

The center, then known as the Hall of China, was created when the House of Pacific Relations, its parent organization, was set up for the California-Pacific International Exposition here in 1935.

The leaders in its establishment were members of a committee from the Chinese Consolidated Benevolent Association. They included Mrs. Fung's grandfather, the late Sun Mow Hom; the late Ses Jin Tom, Ernest Hom and George Joe.

Ernest Hom, who retired recently as an appellate court judge in Washington, D. C., was a student at San Diego State College then and became the first Hall of China president.

Joe, a La Mesa restaurateur who was then operating a Cantonese restaurant in downtown San Diego, was given the responsibility of seeking support and assistance in the project from the Republic of China.

Over the years he has continued in that role as "our unofficial but really official ambassador" who promotes goodwill for San Diego's Chinese community with the Taiwan government, Mrs. Fung said.

From the beginning the Chinese government has provided financial support, art displays and cultural artifacts for the House of China. The current exhibit features art objects from 2,000 years ago through a loan arranged by Consul General Ping-nan Chang of Los Angeles.

The Taiwan government also agreed recently to refurnish the house and provided props, music and costumes for the organization's dancers.

Mrs. Fung's mother, Gladys (Mrs. Andrew) Hom, was the official hostess at the opening of the House of China 40 years ago.

During the anniversary celebration the group paid tribute to her for working to keep the House of China going as its hostess for many years and later as president. She is a third-generation Chinese-American and represents the second generation born in San Diego.

If the House of China sounds like a family affair, there is a reason. San Diego is "a Hom and Yee town," Mrs. Fung said, noting that Hom is one of the most common Chinese names.

The Chinese community of around 5,000 persons traces its beginnings to members of those two families who settled here together during the last quarter of the 19th century, she said, "so practically everyone is cousins."

“Many, many families are three and four generations here,” she added.

A new emphasis at the House of China is the preservation of this unique Chinese-American culture as well as the Chinese heritage, Mrs. Fung said.

The all-volunteer group holds open house at its Balboa Park cottage every Sunday afternoon from 2 to 5, serving tea and fortune cookies donated by various Chinese restaurants.

In addition to offering exhibits and lectures on various aspects of Chinese culture, the organization sponsors the House of China Dancers, a girls’ folk-dance troupe, and the Luck Lion Dance Troupe of about 20 men.

The dancers sometimes perform during the afternoon programs. Members of the men’s group also give Kung Fu demonstrations.

C. Council Actions

4. Old Globe Third Theater

On June 19, the Council will consider a proposal of the Old Globe for allocation of a half-acre site in Balboa park for a third theater.

A. Old Globe Existing Theater Improvements

Messrs. Milch and Leyton excused themselves due to possible conflict of interest and Mrs. Widman chaired this portion of the meeting. Mr. Victor Wulff, architect, presented schematic drawings of proposed modifications at the Old Globe Theater. These include adding a vestibule to the main entrance and a small doorway overhang structure on the rear entrance to lower the noise level caused by intermission noise from the Cassius Carter Theater. Additional improvements include adding office space in the adjacent administration building and a corridor and outside stairway from the second floor dressing rooms. The Balboa Park Committee and Facilities Committee recommended approval.

MOTION

It was moved by Mr. Yamada, seconded by Mrs. Muth, that the Board recommend approval of the project; the motion carried.

Messrs. Milch and Leyton returned to the meeting.

B. Field Archery Range Improvements

The design was not approved by the Facilities Committee and the matter was continued to a future agenda.

June 18, 1975, San Diego Union, B-3. The Park and Recreation Board yesterday approved a schematic design plan prepared by the architectural firm of Delawie, Macy and Henderson for the development of the Plaza de Panama and El Prado areas of Balboa Park.

June 20, 1975, (San Diego) Evening Tribune. Aerospace reopening set July 4 (illus.).

The International Aerospace Hall of Fame will have grown by 600 square feet and, for the first time, will have direct access to the Prado in Balboa Park when its remodeled facilities are opened July 4.

June 20, 1975, (San Diego) Evening Tribune, E-6. The City Council has postponed action on a request by the Old Globe organization for permission to build a third theater in Balboa Park.

June 20, 1975, San Diego Union, A-11. Council to tour proposed Balboa Park theater site, by Donald H. Harrison.

The City Council voted yesterday to tour the portion of a Balboa Park canyon where the Old Globe proposes to build a third theater for 800 persons.

June 20, 1975, San Diego Union, B-5. The public address speakers, essential to summer operations of Starlight, are missing from the Balboa Park Bowl, Bruce Farley, president of the Civic Light Opera Association, said yesterday.

June 20, 1975, San Diego Union, C-5. The Committee of 100 has earmarked \$22,500 for a feasibility study of future use of the present Electric Building site in Balboa Park under terms of a contract it has signed to hire Alfred Gobar Associates, Inc. of Phoenix.

June 27, 1975, San Diego Union, B-9. Councilmen cite parking after Globe Theater Site Tour, by Otto J. Bos.

A majority of city councilmen --- after personally inspecting the proposed site --- indicated yesterday that traffic and parking problems must be solved before construction of a third theater is permitted in Balboa Park.

"I see a lot of things wrong with it," said Councilman Jess Haro, who with six colleagues toured the tree-studded canyon adjoining the Old Globe Theater.

Haro, along with Councilmen Bob Martinet, Maureen O'Connor, Gil Johnson and Jim Ellis, expressed concern that the proposed \$5 million theater could further compound already worsening traffic and parking problems in the park, a main complaint of environmental groups.

Councilman Lee Hubbard indicated support for plans advanced by the Old Globe. Councilman Floyd Morrow declined to disclose his position. Mayor Wilson and Councilman Leon Williams were not on the tour.

The Old Globe is seeking to build the theater to provide seating for about 800 persons. Plans call for retaining most mature eucalyptus trees on the site, although other vegetation would be removed if plans are approved.

The Globe has also offered to provide shuttle bus service between the Zoo parking lot and the theater to alleviate traffic problems.

The council last week voted to tour the site and hold another public hearing on the issue at 2 p.m. July 31.

In interviews, several councilmen indicated a preference for tackling the parking problem before discussion further theater plans.

"This is so critical, I really think we should wait on all building in the park until we solve the parking problems," Martinet said.

Johnson said he likes the idea of grouping the theaters into one complex, but that parking is a serious consideration and an alternative proposal to locate a new facility downtown should be considered.

“Once you take this canyon, it’s gone,” Johnson said. “I don’t think there’s that much of a hurry.”

Miss O’Connor said she shares concerns about parking and traffic congestion in Balboa Park. “I don’t think we can keep compounding it and I think this would,” she said.

Ellis said that while he could see “something” being built in the steep canyon, the “terrible problem of access” must be solved for the theater to gain approval.

Hubbard called the site a “fantastic” location for a new theater --- with proper handling of traffic problems.

Craig Noel, Old Globe producing director, said the facility is badly needed and would be designed to fit into the natural amphitheater of the canyon.

June 27, 1975, San Diego Union, B-9. The City Council yesterday voted \$50,000 in hotel-motel room tax money to help the San Diego Symphony meet a fiscal problem.

June 29, 1975, San Diego Union, B-5. Aerospace Hall Plans Dedication --- Remodeling Complete.

Dedication ceremonies for the newly remodeled International Aerospace Hall of Fame in Balboa Park will be held at 6 p.m. Thursday on the eve of its public opening.

June 29, 1975, San Diego Union, B-5. Tour Sites More Popular

More than half of San Diego’s major attractions had increases in their attendance for May of 1975 over May of last year, according to the San Diego Convention and Visitors Bureau.

Attendance was down at the Maritime Museum and the Aerospace Museum in Balboa Park.

June 30, 1975, San Diego Union, B-1. Park Plan Adopted in 1961 Now Being Studied by a group formed by the Balboa Park Committee; Future Development in Balboa Park Faces Careful Scrutiny, by Ernesto Flores.

“A basic shortcoming of the plan, of course, is that it was based on data gathered in 1958 and 1959 and a lot of things have happened to San Diego since then,” said Dave Roberts, superintendent of the city Parks and Recreation Department’s development division.

Cancellation of the bypass routes prompted the City Council to decide against closing the west end of El Prado. Instead, the council, as a sort of compromise, permanently closed El Prado in September 1973 to vehicular traffic from Plaza de Balboa on the east to Plaza de Panama on the west.

July 3, 1975, (San Diego) Evening Tribune, B-2. Letter, Mary Givens, says dogs around North Park Recreation Center as a nuisance.

July 3, 1975, (San Diego) Evening Tribune, B-3. Balboa Park: tonic for taut nerves, by Larry Boodry . . . a parent takes his children to the miniature passenger train, the Aerospace Museum, and El Prado, finds everything relaxing, and recommends that the City do “as little as possible.”

July 4, 1975, (San Diego) Evening Tribune, B-1. Flight into past reopens Aerospace Hall of Fame.

The newly remodeled and expanded International Aerospace Hall of Fame opened to the public today, offering a nostalgic trip through aviation history.

July 11, 1975, (San Diego) Evening Tribune, B-5. Councilmen favor contrast despite warning of conflict.

Most City Councilmen have indicated that they likely will vote to award a contract for design of a garden project in Balboa Park despite City Attorney John Witt's warning that the action will involve a conflict of interest.

The controversy involves Joseph Yamada, a member of the city's Park and Recreation Board since March 1972, and a proposal to award a \$20,000 contract for design of a Japanese garden project in the park to Wimmer, Yamada and Associates. Yamada is president of the company.

July 11, 1975, (San Diego) Evening Tribune, B-6. The Kearny Mesa Rotary Club will dedicate a new playground for handicapped children in ceremonies at noon Tuesday behind the Conference Building in Balboa Park.

July 13, 1975, San Diego Union, B-5. The Kearny Mesa Rotary Club will donated the Arthur P. Pratt Memorial Playground for handicapped children at noon Tuesday in the Balboa Park Conference Building.

July 15, 1975, Park and Recreation Board Minutes.

B. East Morley Field (Balboa Park) - General Development Plan

Mr. Larry Black, architect, presented his proposed design for the subject improvements. The project is to develop 25 acres and will include the deletion of two existing streets, the addition of a viewpoint east of Pershing Drive, an additional restroom, and a combined walkway and bikeway. Mr. Black reported that he had consulted with both the Park and Recreation Department and the Transportation Department staff in making his recommendations.

Mr. Mosher reported that the Facilities Committee had approved the proposed design and complimented Mr. Black on his presentation. Mrs. Widman reported that the Balboa Park Committee had approved the proposed plan with the exception of the portion which related to traffic along Pershing Drive from Redwood to Upas. The Committee recommended the traffic be routed, instead, along 28th Street from Redwood to Upas.

MOTION

After discussion, Mrs. Widman moved adoption of the proposed plan with the exception of that portion related to the traffic flow expressed by the Balboa Park Committee. The motion was seconded and carried unanimously.

REFERRAL.

The Board requested that the Traffic Engineer provide a report by August on the possibility of re-routing the traffic flow as proposed by the Balboa Park Committee.

C. Bicentennial Development Project - Balboa Park

Mr. Don Davis of San Diego Jaycees presented a proposal to redevelop 1.7 acres in Balboa Park. The project site is the present location of the formal gardens behind the Natural History Museum. Mr. Davis presented a drawing of the area and indicated that the existing Morton Bay Fig Tree would not be disturbed but that the area around it would be developed to provide for passive recreation and picnicking. Mr. Davis stated that the proposal had been to the Balboa Park Committee which had continued the item for one month for staff and the Natural History Museum to review the project. Mr. Mosher noted that this item had not been to the Facilities Committee.

Admiral Davis and Mrs. Clark spoke on behalf of the Natural History Museum and Natural History Societies and recommended the San Diego Jaycee's proposal to the Board. Admiral Davis noted that the Natural History Museum's only concern was that this project not make any permanent improvements in an area which the Museum might wish to eventually request from the City for the purpose of adding on to their existing building. He noted that the Museum needs an additional 60,000 square feet and may require even more area in the future. He and Mrs. Clark both suggested that Mr. Hamill, their architect, assist the Jaycees in the preparation of the final design for the development project.

MOTION

Mr. Brandenburg moved, Mrs. Widman seconded a motion to approve the concept of a project subject to the Facilities Committee approval of the final design. The design to be returned to the Board in August. Mr. Leyton supported the return of the plans to the Board so that members could be sure that the project design has professional input from the Facilities Committee. The motion carried unanimously.

July 15, 1975, San Diego Union, B-4:4-5. The odds look "very good" for an on-schedule Mars landing in celebration of the nation's 200th birthday, according to a key figure in the Viking program; Robert J. Parks, assistant laboratory director of flight programs at Jet Propulsion Laboratory in Pasadena, said yesterday a U S. Bicentennial touchdown on the Planet next July is probable if the present Viking schedule continues; in San Diego for a premiere of the Fleet Space Theater, Parks was reminded that the Russians have made four unsuccessful attempts to put an operating robot on Mars, two in 1971 and two in 1973.

July 16, 1975, (San Diego) Evening Tribune, B-2. The Spanish Village Art Center will hold a "Best of All Worlds Small Image Art Competition" and exhibition in February of 1976 as part of the city's bicentennial celebration.

July 18, 1975, (San Diego) Evening Tribune, B-12. Reservoir Boating Regulations eased by the city's Park and Recreation Board.

July 19, 1975, San Diego Union, A-12. Witt plans to study possible conflict in Balboa Park pact, by Alan Ziegaus.

City Attorney John Witt says he will investigate the award of a \$10,000 design contract by the City Council to a firm headed by Home Delawie, a member of the Planning Commission.

July 20, 1975, San Diego Union, B-3. Name please: What do you call a three-day event in Balboa Park during which everybody is invited to stroll about sampling the output of the city's performing and visual arts free of charge? That's what the committee sponsoring the event is wondering and they'd like help from the public. It will happen September 19-21 in the park under the supervision of a group of citizens who were backed last year by the Committee of 100 and this year by the San Diego Junior League.

July 20, 1975, San Diego Union, B-8. A \$85,990 contract to provide improvements at nine sites with Balboa Park has been awarded by the City Council to T. B. Penick and Sons, Inc.

July 21, 1975, San Diego Union, B-1. Balboa Park Cannonball Rolls Along; ALL ABOARRRD!, by John Burrus (illus.)

Yesterday in Balboa Park, as they have all summer long, sounds of the railroad broadcast from a loudspeaker produced nostalgia trips for oldsters. And for kids, the sounds conveyed the excitement of the railroad experienced by generations of boys and girls.

July 24, 1975, San Diego Union, B-1. Council Overrides Witt On Conflict Of Interest, by Otto J. Bos.

The City Council voted yesterday to overrule a conflict-of-interest finding and awarded a contract for a landscape design project in Balboa Park. At the same time, the council approved steps to hire two independent attorneys to get an early court resolution of the matter.

July 29, 1975, San Diego Union, A-8. The idea of refurbishing an existing theater, to relieve booking pressure on the Civic Theater, won unanimous endorsement yesterday from the City Council's Public Facilities and Recreation Committee.

July 29, 1975, San Diego Union, A-8. A new sound system and facilities for backdrops and lights at Balboa Bowl were urged yesterday by Councilman Jess Haro and several of the city's cultural leaders.

August 1, 1975, San Diego Union, B-1. The City Council yesterday approved plans to build a third theater in Balboa Park, contingent upon parking and traffic problems being solved.

August 5, 1975, San Diego Union, B-3. Balboa Park Plans Okayed --- New Garden Areas.

Balboa Park master plans to expand use of lush but largely hidden Palm Canyon --- to include a high-level pedestrian bridge across it, and to build a 2.5 acre Desert Garden at Zoo Place and Park Boulevard --- were approved yesterday by the Balboa Park Committee.

August 7, 1975, (San Diego) Evening Tribune, B-1. Snag develops on Coronado bay park plan.

August 6, 1975, San Diego Union, B-6. Letter, Celine A. Olson complains about Council hearing on Old Globe's use of a rare wooden canyon in Balboa Park for an 800-seat professional theater.

At the onset, it was announced by the mayor that the meeting was not open for additional public testimony. Then he proceeded, under the guise of "questions," to allow the proponents of the project to speak at great length in favor.

August 8, 1975. (San Diego) Evening Tribune, C-1. Space-age discoveries renew park buildings; "From Cement Castle to Plastic Palace," by Robin Maydeck (illus.).

For a "temporary" structure [sic], Balboa Park's California Building has withstood 60 years of wear and tear with remarkable grace.

This is because the home of the Museum of Man was one of the few structures built for the 1915 Panama-California Exposition with cement not plaster.

But even man-made cement "stone" blocks can deteriorate with age and the California Building, its 200-foot tower and the accompanying structures comprising the Plaza de California prove no exception.

That's why the city is spending nearly \$600,000 to turn its cement castle into a space-age plastic palace.

August 10, 1975, San Diego Union, B-2. City Panel To Stress Cultural Interests.

According to the city Park and Recreation Department, (a) new panel, which will be known as the San Diego Cultural Arts Committee, will seek ways to aid in development of innovative leisure arts programs and the "establishment of better lines of communication between community and cultural organizations."

August 10, 1975, San Diego Union, G-7. Balboa Park Pays Top Interest On Free Time Deposit, by Craig MacDonald.

Letting people enjoy the magnificent 1,000-plus acre facility was actually the idea of San Diego's forefathers. . . . Thanks to them, park goers can now say, "the best things in life are free."

August 11, 1975, San Diego Union. Letter, Evelyn F. Segal, who doesn't like the word "man" in Museum of Man.

August 11, 1975, San Diego Union, B-6. Letter, Richard Amero protests Old Globe plans for 800-seat professional theater in Balboa Park.

What is given to the well-heeled few cannot be enjoyed by all. Middle and low-income people need public, green, accessible, outdoor recreational space to go to in order to enjoy free democratic fellowship and unhampered contact with nature, and to recuperate from the strains of crowded city living.

August 12, 1975, San Diego Union, B-2. The City Council filed suit in Superior Court yesterday in an effort to compel City Manager Hugh McKinley to sign a contract with the landscape firm of Wimmer, Yamada, Iwanga and Associates approved by the council.

August 12, 1975, San Diego Union, B-5. "La Traviata" Offset By Noises; Worthwhile Effort, by Donald Dierks.

A large audience was on hand last night at the Spreckels Organ Pavilion for a concert performance of Giuseppe Verdi's opera "La Traviata." By the time the final act had arrived, the audience had thinned noticeably, but this probably has more to do with the frustrations of trying to concentrate on a serious musical endeavor in a noisy city than with the quality of the performance. The singers has something worthwhile to offer.

August 16 - 24, 1975. America's Finest City Week.

August 17, 1975, Los Angeles Times, VII-1. San Diego Museum Gets \$550,000 Face-lifting: Precision Handwork, by Barbara Gius (illus.).

Six months of precision handwork by some 30 artisans, molders, masons and chemists will leave the facade and 201-foot-high bell tower of the San Diego Museum of Man gleamingly restored in the Spanish baroque fashion of its origin 60 years ago.

The \$555,000 restoration project requires cleaning, strengthening and re-mortaring of some 85,000 square feet of precast concrete relief adorning the museum facade and belfry. Work is expected to be completed in October by Claude P. Williams, Inc. of Torrance.

Lew Anderson, project supervisor, said restoration involves "taking care of over a hundred blocks of concrete veneer, weighing from 200 to 2,000 pounds apiece.

"We're not touching them up, we're just cleaning them and sealing them for another 60 years," he said. "We don't want to do anything else to something as valuable as this structure is."

Originally built at a cost of \$75,000 under the direction of architect Bertram G. Goodhue, the museum is part of Balboa Park's California Quadrangle, erected to house the 1915 Panama-California International [sic] Exposition.

Its facade is sculpted with the effigies of nine historical figures connected with the early settlement of California: Spanish Kings, Charles V and Philip II, navigators Cabrillo, Viscaino and Vancouver, Padres Serra, Jaume and de la Ascencion, and Portola, first governor of Alta California.

The bell tower is itself a landmark of San Diego. It houses a carillon that chimes on the quarter hour and can be heard as far away as Coronado.

Building exteriors re being cleaned forcibly by steam to remove large amounts of sodium chloride from wind-blown sea spray and acids from pigeon droppings, both of which cause concrete to erode.

The concrete units will then be impregnated with an epoxy to prevent further saturation of salts and re-anchored in mortar. Replication of any delicate protuberances altered by weather or lost in the cleaning process is being done by artisans from Universal Restoration Co. of Washington, D. C.

“We’re using the same sand at Sweetwater Canyon (in north San Diego County) that was used to form the figures 60 years ago,” said Anderson.

Work will also involve re-caulking of hand-laid mosaics of blue, green and yellow tiles that crown the tower’s cornice, he said. Nine of the tiles are being replaced by custom-made replicas.

The same mosaic design is repeated on the museum’s 72-foot dome, which is not included in the current restoration contract. Work is being funded by San Diego city and county governments and the museum foundation.

Retired Marine Major General Lowell E. English, museum director, said an additional \$1 million would be needed to finance restoration of the museum dome and other building exteriors in the California Quadrangle.

No major modifications have ever been made to the 45,000-square-foot museum building, although it served as a Navy hospital during World War II. Since then, it has housed vast cultural exhibits on the archaeology, anthropology and ethnology of the three Americas, which drew a total of 189,000 visitors last year, and are expected to attract more than that this year, according to English.

Permanent exhibits include the Jessop Archery Collection, one of the world’s largest collections of primitive (weapons), a life-size diorama of Hopi Indian Life, and the Wonder of Life exhibit, a comprehensive display of human embryology and growth.

One of the museum’s more controversial specimens is the skull of the Del Mar Man, a human cranium discovered in 1929 along the Del Mar coast north of San Diego, that is believed to be 48,000 years old.

August 17, 1975, San Diego Union, E-3. The Lively Arts: Inaction Perils Park Organ, by Donald Dierks.

On New Year’s Eve, 1914, the Spreckels organ in Balboa Park was played for the first time. This performance was actually a sneak preview for the invited guests of John D. and Adolph B. Spreckels, the donors of the organ, since the first public demonstration of the instrument was announced for the next day. Both recitals were played by Dr. Humphrey J. Stewart, the first of San Diego’s official civic organists.

For the intervening 60 years the Spreckels organ has been in regular use, thus fulfilling the terms of the deed of gift to the city, which reads in part, for “the free use, benefit and enjoyment of the people.”

In the early years the organ was the focal point of the city’s cultural life. The daily performances given at the time were announced importantly on the front page of *The San Diego Union*.

Gradually and inevitably, the cultural life of the city has broadened and the once-fashionable taste for organ music has shifted to other performing arts. The large audience area at the organ pavilion that for a time was filled to capacity every time the instrument’s great steel curtain was raised, is something more than adequate for people who attend concerts there now.

Still, according to Douglas Duncan, the present civic organist, the Park and Recreation Department kept careful attendance records for the 68 organ recitals played in the fiscal year of 1975 and the average attendance figure was 250 for each concert, a total of 17,000 listeners for the year. The number does not equal by any means the interest accorded the organ in its golden era, but it does, nevertheless, demonstrate a more-than-respectable amount of appreciation.

Such demonstrated appreciation makes it all the more surprising that the Park and Recreation Department recommended to the City Council last May that, after June 29 of this year, the maintenance of the organ be discontinued and the contract with Duncan terminated.

For the first time in 60 years the Spreckels organ would be silenced.

Several spokesmen for the Park and Recreation Department have since stated that their recommendation to the Council was not a matter of indifference toward the Spreckels legacy, or indicative of a lack of commitment to the instrument. The recommendation was, rather, they now say a compliance with budget-cutting instructions received from the office of the city manager. Doing away with Duncan's annual stipend and the organ maintenance fees were part of a longer list of money-saving suggestions.

How much money was involved? The total figure for maintenance and performances in fiscal year 1975 was \$5,892. Broken down, this amounts to about 34 cents for every person who heard the Spreckels organ during the year. The city should find such bargains.

The fact that the council chose to disregard the department's recommendation and, instead, provide funds for maintenance and performances on a reduced schedule in the coming year is encouraging, but not entirely reassuring. Not reassuring because the city manager and council have indicated that they will need to be even more budget-conscious in the next several years.

Yet, where the Spreckels organ is concerned, there is more involved than the modest outlay of money in question.

The instrument has a historical value far greater than the approximately \$6,000 spent on it annually. It represents an important part of San Diego's early cultural life and it is significant in a large way as an example of organ design and of musical taste prevalent in America in the early part of the 20th century.

It really does not matter that the instrument's music does not now attract as many people as rock concerts. There was surely a time in San Francisco when someone making a quantitative judgment observed that there were better ways to transport large numbers of people than the cable car.

Should the city ever decide to retire the Spreckels organ, even on a temporary basis during some future budget crunch, it will surely be irretrievably lost. As any automobile owner knows, regular maintenance is crucial and it is a schedule of regular performances, in addition to maintenance, that keeps the more delicate mechanisms of an organ moving freely. Leather is extensively used inside the organ and it is the action of use that prolongs the suppleness of this material, as well as making the tiny metal contact points self-cleaning and self-polishing.

Several fiscal years of inaction will amount to precisely the same thing as condemning the organ immediately to the junk heap.

It is also disturbing that for the first time in 60 years the department will, during the coming year, be interpreting some parts of the original deed of gift quite literally, even though its earlier recommendation disregarded the deed's admonishment to "keep, insure and maintain the said organ."

The literal interpretation has to do with the deed's gift of "free use." For the first time in his 18-year tenure as civic organist, the wording of Duncan's contract with the city has been significantly changed. Those clauses that have made it his professional prerogative to decide who is qualified to play the Spreckels organ have been deleted. These decisions in the future will be made by a committee selected by the department. One can only hope that the appointees will be professional organists.

The plan, in any case, seems unnecessarily unwieldy, inasmuch as Duncan says he has never denied use of the instrument to any qualified organist known to him, or any musician who could produce reasonable credentials.

If a committee must convene to decide who will play the organ, the routine will probably result in more restricted, not freer use of the instrument.

As the rather wise joke goes, it was a committee that designed the camel.

August 19, 1975, Park and Recreation Board Minutes.

ITEMS

A. Archery Center Improvements (Design) - Balboa Park

Mr. Robert Ferris, an architect, presented a schematic drawing of the proposed restroom and storage building. He described the site, which is located at the west end of the parking lot south of the Museum of Man. He indicated there would be no cutting of existing trees and that the building's design is compatible with other park buildings. Mr. Warren Purdy, representing Mr. Yamada for the Facilities Committee, reported that the group had approved the design. Mr. Brandenburg moved approval of the proposed design, with Mrs. Muth's second; the motion carried unanimously.

B. Palm Canyon (Design) - Balboa Park

Mr. Frank Kawasaki, architect, presented the schematic proposal for the development of the Palm Canyon area. The presentation included studies of land use and circulation, site and slope analysis, drainage and plants. The improvements for the canyon also include a pedestrian bridge. The final cost of the project, including the bridge, is estimated to be \$700,000. Initially, \$80,000 is available to begin development of the canyon. Mr. Purdy and Mrs. Widman reported that their respective committees had approved the design. Mr. Purdy noted that the Facilities Committee had congratulated Mr. Kawasaki on the presentation. MOTION: Mrs. Widman moved approval of the plan with Mr. Brandenburg seconding; the motion carried unanimously.

C. Desert Garden (Design) - Balboa Park

Mr. Roger De Weese, an architect, presented the design for the subject area which will be located on the east side of Park Boulevard adjacent to the new formal gardens. The design is based around accenting the main entrance of the garden, hollowing out the center of the site, building the ridges around the top of the site and leveling off the top of the garden into the native hillside. The proposal includes a shelter area to provide a location for various displays. Mr. De Weese noted that the majority of the construction budget would be spent on creating the topography of the garden, with most of the plant materials expected to be donated. The construction budget for the 2.5 acre site is \$40,000. Both the Facilities and Balboa Park Committees approved the concept. MOTION: Mrs. Widman moved acceptance of the plan as presented by Mr. De Weese, with Mrs. Muth seconding; the motion carried unanimously.

August 24, 1975, San Diego Union. Shirley A. Roberts, San Diego, writes in praise of park concert of "La Traviata" thanks San Diego Park and Recreation Department and Evening Colleges for given her this marvelous "free culture."

August 24, 1975, San Diego Union, B-2. Planners Endorse Park Renovation.

City planners have endorsed a \$750,000 plan for renovation of Balboa Park's cultural center.

In a report to the City Planning Commission, the Planning Department said the plan would "restore the Plaza de Panama to its proper use" by curtailing traffic and by beautifying the Prado area.

August 25, 1975, (San Diego) Evening Tribune. Letter, Mrs. A. G. Ollestad . . . The (Balboa Park) organ is one thing we could hang onto, and the upkeep is so small compared to the many other ways our taxes are being spent.

August 27, 1975, San Diego Union, B-3. Reduced Scale Balboa Park Renovation Plan Approved.

The City Planning Commission approved a reduced scale renovation plan yesterday for the cultural center of Balboa Park. In a 4-0 vote, the commission agreed to exclude the Plaza de Panama from consideration because the overall problem of traffic and parking in Balboa Park is being studied.

Plans to eliminate about 200 parking spaces on the Plaza de Panama had drawn considerable opposition from the cultural institutions fronting the mall.

Dave Roberts, city park planner, said changing the Plaza de Panama is probably as much as 10 years away due to financing and transportation problems which need addressing first.

August 28, 1975, San Diego Union. Clara M. Tyndale, Lemon Grove, objects to the arbitrary reduction of Monday evening concerts at organ to one this summer: "Why is a \$100,000 instrument relegated to the status of 'mothball attraction'?"

August 28, 1975, San Diego Union. J. C. Colburn, San Diego, remembers Theodore Roosevelt's saying at Organ Pavilion, July 17, 1915, the "beauty is not only worth while for its own sake, but that it is valuable commercially."

Can bureaucrats convince a citizenry now 10 times larger than in 1915 that it can no longer afford this renowned (organ) instrument and that Roosevelt was wrong?.

September, 1975, Applause, Vol. 5, No. 2. Comment . . . Each year the use and development of Balboa Park becomes a bigger political problem. Space within the park is limited, and community resistance to the sacrifice of land for additional construction or for parking is strong.

September 2, 1975, San Diego Union, B-1. Over Labor Day Weekend: Visitors Deluge Balboa Park, by Carol Olten (illus.).

Bocci ball, Free kittens, Frisbees, E. Z. Mark playing his fiddle under a Morton Bay fig, Granny's potato salad at the Botanical Gardens lily pond, Willy the Shakes in Zoro Gardens.

About 6,000 Balboa Park visitors turned out yesterday to see and carry out such activities.

September 4, 1975, San Diego Union, B-4:4. The Reuben H. Fleet Space Theater will be closed for three weeks beginning November 1 to permit replacement of its dome screen, Early Hayden, project office in the city Engineering and Development Department, said.

September 8, 1975, San Diego Union, B-6. The City Council has authorized city staff involvement in the Committee of 100's attempt to determine the feasibility of rebuilding the Electric Building.

September 10, 1975, San Diego Union, B-3. Park group approves plan to redesign San Diego Zoo entrance.

September 10, 1975, San Diego Union, B-10. Letter, Katherine E. Carlin, Coronado: "How could San Diego officials ever conceived of such a foolish way to economize when it claims to promote the cultural things to make a better city? . . . We need that organ! Where else is there one like it?"

September 10, 1975, San Diego Union, B-10. Letter, Ann Roberts Foersom: "(The Spreckels Organ) is an institution and so many people enjoy it. It is a beautiful place to relax on a Sunday."

September 10, 1975, San Diego Union, B-10. Letter, Ronald C. Peters: The few officers assigned to the rock concert in Balboa Stadium August 31 did nothing to enforce the laws.

September 14, 1975, San Diego Union, D-1. Weekend Spectacular Will Showcase The Arts; Second Annual Balboa Park Summer Festival, by Lucretia Steiger.

A kaleidoscope of summer fun events, from family picnics and fireworks, to concerts and dances, will turn a city park into a spectacular entertainment area for the second annual Balboa Park Summer Festival Friday through Sunday.

Planned and directed by volunteers with Anderson Borthwick as chairman, the festival is the result of cooperation of the City of San Diego, the Parks and Recreation Department, the county, the Inter-Museum Council, the Intercultural Council on the Arts, COMBO, business and industry.

Purpose of the festival, during which all special events and concerts will be presented without charge, is to expand appreciation for the arts and performing groups in the community as well as cultivating a better appreciation of Balboa Park.

Planners have estimated that more than 300,000 people will attend the festival, currently considered by its backers to be the only multi-art, multi-cultural event of its kind on the West Coast.

September 18, 1975, (San Diego) Evening Tribune, B-2. EDITORIAL: A legacy in jeopardy.

It would be an exaggeration, perhaps, to write of public outrage over the threat to the Spreckels Organ and its majestic pavilion, Balboa Park features for more than 60 years.

The City Council, after all, did overrule last spring a budget recommendation of the Park and Recreation Department that would have cut off funds for maintenance of the instrument and the concerts that are a San Diego tradition.

But it is no overstatement to say that the public is uneasy.

September 18, 1975, San Diego Union, B-3. An agreement to design cultural center improvements in Balboa Park was approved by the City Council yesterday.

The council backed a \$38,000 agreement with the firm of Delawie, Macy and Henderson to provide architectural services for design of improvements to the Plaza de Panama and El Prado areas.

September 19, 1975, (San Diego) Evening Tribune, A-25. Festival of Arts, sponsored by the Junior League of San Diego, opens for weekend in park, featuring an estimated 3,000 performers and artisans.

September 21, 1975, San Diego Union, B-6:1. Capt. Jack S. Lansy, USN, ret., former chief of staff of the 11th Naval District, has been appointed director of the Reuben H. Fleet Space Theater; Martin Engler, president of the San Diego Hall of Science board of trustees, said Lansy will succeed W. Michael Sullivan, who will become production consultant of the theater.

October 2, 1975, San Diego Union, B-4:2. Eight new members have been elected to the board of trustees of the San Diego Hall of Science, governing board of the Reuben H. Fleet Space Theater and Science Center;

chosen to serve three-year terms are Mrs. G. A. Beckstrand, David Copley, Eugene W. Courtney, Mrs. Thompson Fetter, Bruce McKay, Ernest L. Strum, Susan Fleet Welsch and Dr. Donald A. Wilson.

October 3, 1975, San Diego Union, B-3. Developers Lose Bid For Cut In Park Fees; Plan Linked To Private Facilities.

October 5, 1975, San Diego Union, B-6. Historic Site Bid Backed: The request for national registration as historic monuments is being made by the Committee of 100.

The board (NOTE: article does not say which board!), however, urged that the Committee of 100 enlarge the scope of its request by including just about all buildings in the park, including those in the Palisades area developed in 1935.

Paul Foxworthy, staff member for the board, said a few buildings have been registered as national historic buildings, including the California Tower, but not all of the structures built for the 1915 exposition.

The city Historical Site Board has endorsed in principle the concept of seeking national registry of all Balboa Park structures built in 1915.

October 7, 1975, San Diego Union, B-3. Council Okays \$10,000 Ford Building Study with the firm of Atkinson, Johnson & Spurrier to see if the structure can withstand earthquakes and other stresses.

October 7, 1975, San Diego Union, B-3. The Balboa Park Committee of the city Parks and Recreation Board yesterday approved in principle the proposed construction of seven flagpoles in front of the Electric Building.

October 21, 1975, Park and Recreation Board Minutes.

ITEMS

B. Proposed Flag Display - International Aerospace Hall of Fame

Colonel E. F. Carey, Jr., President Emeritus of the International Aerospace Hall of Fame, addressed the Board regarding a proposed flag display to be funded by private donations and donation by San Diego Gas and Electric Company. Seven anodized aluminum flagpoles, the center pole 20 feet high, the six flanking poles 15 feet high, will be placed at the street edge in front of the entrance to the Aerospace Museum and Hall of Fame, for the display of the American flag and the flags of other countries. Colonel Carey noted the Hall of Fame felt such a display would be appropriate, not only for the bicentennial and to add color, but also to reflect the international character of the organization. It was pointed out that the pole placement would have to be coordinated into the Master Plan for the El Prado area, which was available for reference. The location of a proposed 30 foot high flagpole adjacent to the Space Theater was also indicated. The Balboa Park Committee had approved, in principle, the proposal, subject to review by the project architect. The Facilities Committee had expressed enthusiasm for the plan and recommended approval unanimously.

MOTION: Mr. Leyton suggested that the matter be continued until a report is received from staff on the opinion of the architect. Mrs. Widman noted approval of the concept, pending a staff report on the discussion with the architect; the motion was seconded by Mr. Jensen and carried with Mr. Leyton dissenting.

October 30, 1975, San Diego Union, B-5. Balboa Park turns 107, Committee of 100 is sponsoring a birthday party Sunday in front of the Space Theater Fountain.

November 3, 1975, San Diego Union, B-1. Balboa Park Marks 107th Birthday, by Carol Kendrick (illus.).

November 3, 1975, San Diego Union, B-4:2-3. A symposium on energy for 130 selected high school science students will be held November 15 at the Fleet Space Theater; the program envisioned as the first in a series will involve youngsters at various grade levels, is being sponsored by the theater organization, city and county schools, Community Education Resources and Industry-Education Council.

November 11, 1975, San Diego Union, B-3:2-3. A \$106,100 engineering blunder at the Reuben Fleet Space Theater is nearing correction; workers were busy yesterday in the scaffold-filled showplace replacing hundreds of triangular aluminum panels that make up the film and star projection dome; Earl Hayden of the city engineering department said the original projection surface had two important defects.

One shortcoming, he said, was that the panels failed to form a smooth dome shape; the surface was bumpy because of an imprecise warp pressed into the individual panels.

Hayden said the tape used to cover the cracks between the panels also was defective. Adhesive material on the back of the tape failed and it began to come loose. Dots on the tape also failed to match the pattern of small holes in the perforated panels.

Hayden said the new panels are expected to form a perfectly smooth dome without cracks. Alternate panels in the mosaic overlap their neighbors with a knife edge.

The purpose of the holes comprising 22-1/2 percent of the dome surface is to make the dome acoustically transparent. Behind the projection surface is a complex array of loud speakers.

Hayden noted that the dome contractor, Spitz Laboratories, Inc., also is paying the theater nearly \$2,000 a day for the period the theater is closed.

The theater closed for the repairs on October 31. Programming is scheduled to resume on November 22. The bill will be "Viva Baja" and "Probes in Space."

In the interim, the Science Center exhibit hall and gift shop adjacent to the theater are open for business.

November 20, 1975, San Diego Union, B-2. The City Council has called for bids for construction of an Olympic-size bicycle racing track at Morley Field

Estimated cost of the project is \$130,000, with the construction contract estimated at \$90,000.

November 20, 1975, San Diego Union, B-3. Superior Court Judge R. Levitt cited a possible conflict of interest yesterday in denying the City Council's request for a ruling to compel City Manager Hugh McKinley to sign a landscaping contract.

November 20, 1975, San Diego Union, B-9:1-4. The 10- by 18-foot picture of the United States taken from satellites is now on exhibit at the Reuben Fleet Space Theater lobby; it appears to be a photograph, but is really a mosaic of 595 cloud-free images resulting from infrared and near- infrared radiation scans which were transmitted to earth by radio signals; prepared for the Bicentennial celebration, it will be on exhibit through the middle of January; getting a geography lesson are Eileen, Kathy and Christopher Andrews.

November 28, 1975, San Diego Union, B-8:4-7. Starting Monday, audiences at the Fleet Space Theater will move through space and time to the first Christmas eve to review the only mystery --- the true nature of the "star" of Bethlehem; the Balboa Park institution's Christmas show will be a multi-media exploration of the variety of sky phenomena that might have been the biblical "star"; a key look in the show is the theater's unique "space transit simulator," a computerized projection system that can recreate the night sky from any point within the solar system at any time in the past.

December 1 1975, National Register of Historic Places --- Nomination Form: El Prado Complex, prepared for the Committee of 100 with the assistance of Mr. Jean Stern.

NATIONAL REGISTER OF HISTORIC PLACES
NOMINATION FORM
DECEMBER 1, 1975

Prepared for the Committee of 100 with the assistance of

Mr. Jean Stern

(Placed in the National Register maintained by the U.S. Department
of the Interior on December 12, 1976)

(In February 1978, the sites of the 1915 and 1935 Expositions were granted
National Historic Landmark status.)

The El Prado Complex consists of the following structures, buildings, gardens and plazas:

The Cabrillo Bridge (with approaches and guardhouses)

The House of Charm

The House of Hospitality

The Electric Building (Casa de Balboa since 1981)

The Botanical Building

The Organ Pavilion

The Alcazar Gardens

The Plaza de Panama

The El Prado Arcade

The Fine Arts Gallery

The Casa del Prado (reconstruction)

The Natural History Museum

CABRILLO BRIDGE

The Cabrillo Bridge spans a deep canyon on the western edge of Balboa Park, extending Laurel Street into the park, where it becomes the central east-west avenue called El Prado. The bridge is constructed of reinforced concrete, using cantilever design principles. With its approaches, it is 1,505 feet long and 110 feet above the canyon at the center. There is no molding or ornamentation on the bridge, it is simply seven tall graceful arches.

The west approach to the bridge is marked by two red tile roofed stucco guardhouses, one on each side of the street. The roofs are capped by carved leaf clusters with finials. In addition, there are two large plain concrete planter urns, one on each side of the street. The bridge is lighted by 61 cast lamp posts of two lamps each, placed along the balustrade.

The east approach is marked by one large plain concrete planter on the south side of the street, whereas the north side adjoins the first (Administration) building in the park

The Cabrillo Bridge was designed by Frank P. Allen, Jr. It was built for the 1915 Panama-California Exposition, where it served as the west entrance. It was designed to be permanent, and since 1915, it has served as the main entrance to Balboa Park.

HOUSE OF CHARM

The House of Charm is a two-story building located on the northwest corner of the Plaza de Panama. The east facade juts out from the side of the building. Two large engaged towers flank the main doorway. An arch trimmed in plain molding marks the entrance. A large framed window with a wrought-iron balcony hovers over the arch in the second story. A niche above the window is set off by a base below and a shell tympanum above. The towers culminate in Mission-style open bell-gables. The gable to the left has two openings while the one on the right has three. The rest of the east side is plain, with recessed windows on the second level. Next to the windows are three octagonal blind "cannon" rain spouts, supported by lions' heads. Two of these spouts are on the left side of the facade and one is on the right side. They are not functional.

The wall on the north side of the building is plain. It has several recessed windows and three "cannon" rain spouts. Unlike the wall, the entrance is in an elaborate Spanish-Baroque style. Two tall columns with spiraling grape vines, heavy with fruit, flank a triumphal arch. Elaborate rectangular urns above each column have an angel's face on each of the four sides. A figure in relief, representing a saint, appears in an oval frame above the arch. The saint, who is bearded, wears ceremonial robes and holds a cross. Two angels are perched at the saint's sides. Nude female figures with hands held aloft emanate from garland clusters to the right and left of the angels. A window above the saint is framed in geometric molding and is surrounded by more garland clusters. A broken pediment tops the entrance, in the middle of which is a blank Spanish shield.

Walls on the west side are also plain. An arch with plain, rectangular molding, set between engaged pilasters, marks the west entrance. The architrave has blank tablets, but is, otherwise, undistinguished. Several rows of simple molding surround the entrance. Two niches with faceted basins flank a recessed window. Simple windows pierce the west side.

Except for a small area of blind crenelation over the door, the south side is plain.

Carleton M. Winslow designed the House of Charm as a temporary building for the 1915 Panama-California Exposition. The building has had many names over the years: Mining Building (on plans during construction), Indian Arts Building (1915), Russia and Brazil Building (1916) and House of Charm (since 1935).

HOUSE OF HOSPITALITY

The House of Hospitality is a two-story building located on the southeast corner of the Plaza de Panama. Its style is Spanish Baroque. Ornaments and moldings are emphatic around doors and windows.

A tall square tower highlights the northwest corner of the building. Elaborate ornamental relief covers the upper part of the tower. A tower of different design but with elaborate relief marks the northeast corner of the building.

The west entrance takes the shape of a triumphal arch. Garlanded pillars support the arch. Twisting pilasters and spun finials frame a window above the arch. A broken pediment with a heraldic eagle in the center caps the window. Shields to each side of the entrance are topped by

eagles' heads and are surrounded by garlands. The shield on the left shows the Seal of Mexico, while the shield on the right represents Peru.

Two windows framed by fluted columns, covered with garlands, are spaced to the right and left of the center entrance on the second story. Peaked pediments that merge into an cornice surrounding the building at the top cap the windows. An arched pediment centered above the arch portal tops the west facade. Within the pediment, an array of flags provide a backdrop for a shield representing the Seal of the Pan-American Union.

The north side of the building corresponds to the west facade, except for shields on each side of the entrance. On this side the shields represent the various industries of the Pan-American countries.

The ground-level arcade that runs along El Prado is continued on the west and north sides of the building.

A series of terraces and an open patio area characterize the south side of the building. Four large arches reaching into the second level mark the first story on the south side. Three tall rectangular pillars support these arches. A door, opening between the pillars, allows access to the first terrace, which is flanked by colonnaded pergolas. An octagonal fountain is set within the terrace. Stairs lead to a second terrace that has a tiled niche fountain set in an embankment. The last, or third, terrace has a tiled wall fountain fed by water flowing out of a small lily pond. The terrace ends in a semicircular space that holds a wishing well.

The second story of the south side has an arcaded balcony framed by the four tall arches that spring from the first level. A portion of the cornice from the west side and a pergola on the second level above the arcade set off the southwest corner of the building.

The east side of the House of Hospitality is plain. A tall Mission-style bell-gable near the southeast corner is the most distinguishing feature.

An open court abutting two-story wings occupies the interior of the House of Hospitality. Columns and pillars support an arcade that provides a corridor for the second story. An octagonal tiled fountain within the court holds a statue of "A Woman of Tehuantepec" by Donal Hord. The woman sits on her haunches and holds a jar from which a stream of water flows down into a pool. The court is planted with flowers and semi-tropical trees.

Carleton M. Winslow designed the House of Hospitality as a temporary building for the 1915 Panama-California Exposition. At that time it was called the Foreign and Domestic Arts Building. When originally built, the building had a longitudinal south wing and did not have an open court in the front section. After San Diegans saved the building from destruction, they repaired the building, made substantial changes to its design, and reused it as the House of Hospitality during the 1935-36 California Pacific International Exposition. The changes required the removal of the south portion to make way for the outside terraces and the removal of the central part of the main building to make way for the open court. Architect Sam Hamill of San Diego supervised the changes.

The south side of the building and terrace areas are occupied by a private restaurant, whose proprietors lease the space from the City of San Diego.

ELECTRIC BUILDING

The Electric Building is a two-story building located on the south side of El Prado, just east of the House of Hospitality. The building is laid out on an east-west axis, with two pavilions extending out of the main (north) face.

The north face is highly decorated, with two main entrances, each within a pavilion, one near the northeast corner, the other near the northwest corner. The first story (street level) is lined by the extension of the Prado arcade. The street side of the arcade is open, each arch supported by a rectangular pillar. The building side of the arcade joins into the building wall, creating a blind arcade. The arcade changes as it passes through both pavilions by becoming elaborately decorated vestibules trimmed with several rows of molding.

The second story is highlighted by a row of windows that echo the arches of the arcade in the first story. Each window is elaborately framed with carved molding, and topped by a floating scrolled pediment, with additional scroll work above. Centered below each window is a stylized vine leaf escutcheon. The pillars in the arcade of the first level are reflected as engaged Ionic pilasters, isolating each window. The second story decoration scheme is dramatically accelerated at the pavilions. Here, the windows become French doors, accompanied by small wrought-iron balconies. The windows are topped by fancy scroll-like floating pediments and large arching scrolls. In addition, all accessory trim on the pavilion is much fancier than that on the rest of the facade. The continuous cornice-like architrave that rests on the engaged pilasters on the second level is made up of molding around a band of blank tablets, each of which is centered on the windows. This cornice becomes quite elaborate, where it passes through the two pavilions. Here, it displays shell-like scrolls, and the tablets are marked with floating dentils.

The top edge of the building is lined with an elaborate balustrade of open scroll work. The balustrade is accented by regularly-spaced urns, alternating with torch finials. This balustrade does not extend into the pavilions. Instead, the upper level of the pavilions is highlighted by full form figures of kneeling naked female atlanteans, placed above each engaged pilaster. These, in turn, are alternated by bust torso figures of naked female caryatids centered above the windows. In between these figures runs a highly elaborate cornice, consisting of suspended overhanging urns, groups of leaf clusters and garlands, and tablets displaying gorgon heads, surrounded by foliar and scroll molding. Finally, each pavilion is roofed in red tile. Both pavilions are identical in decoration scheme.

The northeast corner of the building is marked by a tall square tower. The tower projects above the second story of the building and is heavily decorated, with a window on each of the four sides. The windows are flanked by estipite columns adorned with garlands and leaf clusters. The central element of the columns is a four-sided oval blank medallion. These same columns are repeated as engaged pilasters at the corners of the tower. The architrave above the columns consists of several layers of molding. Each window is capped with a long ornate urn, with shorter, four-handled urns on pedestals over each corner of the tower.

The other three sides of the building are quite plain, in contrast to the north face. The east side of the building is characterized by a simple plain row of windows on the first story. The second story has two shallow pavilions, one at the northeast corner and one at about the middle of the facade. The pavilions are set apart by engaged block pilasters on the second story only. These pilasters do not reach into the first story. There are three windows on the pavilions, one on the northeast pavilion and two on the other. These windows are framed in block-like molding with two layers of twisted molding. Each window in the pavilions is topped by floating arched pediments capped with scrolls. The windows have a wrought-iron balcony. Finally, the pavilions are trimmed with a cornice of several layers of plain heavy molding and the roofs on the pavilions are lined with torches and urns. The rest of the east face, in between the pavilions, has five windows joined by a continuous wrought-iron balcony. The windows are trimmed in the previously-noted block-like molding with two layers of twisted bands. The roof cornice is plain heavy molding.

The south face is characterized by a central area flanked by two side projections. The central part has a double-arched doorway on the first level, along with several plain windows. The second level is marked by eight windows trimmed in block-like frame. Directly above these are eight smaller windows, each centered above the larger ones. These windows alternate in shape,

circular and diamond, and are framed on the ones below. Each set of windows is isolated by engaged block pilasters on the second level only. The pilasters are capped above the roof line by pyramidal four-sided finials. The plain molding cornice peaks slightly at each pilaster.

The east wing of the south face is relatively plain, displaying several windows trimmed in block-like framing. At the roof line of the east wing, the corners are highlighted by four blank shields surrounded by garlands and scrolls. These shields are not within arching broken pediments.

The west wing of the south face is likewise relatively plain and has several block-lined windows, in addition to some plain windows. The center of the wing has a large window that opens to a wrought-iron balcony. The window is block-lined and adorned with two rows of twisted molding. A small arcade skirts the southwest corner of the building.

The west face of the building is plain at the first level. The previously described tower at the northwest corner of the building has, on the west face, an elaborate window and semi-circular wrought-iron balcony set within the fancy decoration of the tower. At the southwest corner, the building angles to join the west wing of the south face. That area is highlighted by a shallow pavilion, set with engaged pilasters on the second level only. The pilasters are block-like and isolate a window trimmed in blocks and twist molding. The window is topped by a floating arching pediment and scrolls. The window has a wrought-iron balcony. The cornice is plain molding along the roof line except at the pavilion, where it is topped by torches and urns. The central part of the west face is marked by five windows at the second level, each with individual wrought-iron balconies and each trimmed in block with twist molding.

The Electric Building was designed by Frank P. Allen, Jr. It was originally built as a temporary building for the 1915 Panama-California Exposition. At that time it was called the Commerce and Industries Building. In 1916, the name was changed to the Canadian Building. The building was saved from destruction and during the 1935 California-Pacific International Exposition it was called the Palace of Better Housing. On February 22, 1978, unknown arsonists set fire to the Electric Building, causing the destruction of the building and of collections owned by the San Diego Aerospace Museum. Because molds of sculpture and detailed drawings had been made prior to the fire, the City of San Diego was able to proceed with the building's reconstruction. The Electric Building reopened as the Casa de Balboa in 1981.

The elaborate Spanish Baroque design of the Electric Building was inspired by the Casa Consistorial at Palma de Majorca, Spain.

BOTANICAL BUILDING

The Botanical Building is a large lath-covered structure housing an interesting collection of plants. The main portion of the building is built of redwood, supported by steel trusses painted to match the redwood. The overall shape of the building is that of a central dome of open-work lath, with two barrel vaults extending east and west, also of open-work lath. The central dome rests on four large steel arches covered in redwood. The dome is capped by an open cupola. On the north side of the dome is a stucco arcade of five arches containing the entrance. The doorways are in the two outer arches and these arches are capped by octagonal domes. The three central arches are barred with turned redwood dowels.

The whole structure is enhanced by two reflecting pools in front of the building. Immediately next to the building is a smaller rectangular pool, called the **Lagunita de Las Flores** (Little Lake of the Flowers). Next to it is the larger oblong pool stretching all the way to El Prado, called the **Laguna de Las Flores** (Lake of the Flowers). These two pools are separated by a bridge-like balustraded walk. On each side of the walk are four ornate concrete planter urns (eight total), in addition to the two large plain concrete planter urns on each side of the entrance (four total).

The Botanical Building was designed by Carleton Monroe Winslow. It was built for the 1915 Panama-California Exposition. At that time, it had a northern wing which extended from the central dome. This wing was different from the east and west wings in that it was glass-covered. The building remained virtually intact into the 1935 California-Pacific International Exposition, where it housed a botanical display. In 1954, extensive work was done to the building, among which was the removal of the glass-covered north wing and the removal of an engaged arcade that adorned the front side along both wings.

The balustraded walk in front was restored in 1965 through the benefaction of Mr. and Mrs. Robert H. Golden.

SPRECKELS ORGAN PAVILION

The Spreckels Organ Pavilion is located south of the Plaza de Panama, along Pan-American Road. It is a building over three stories tall, flanked on the east and west by two colonnades, which curve out in front of the building (north side), forming a large atrium. An audience of over 2,000 people can be seated in the atrium. In front of the building is a concrete stage that is completely open air, as is the atrium.

The central building contains the organ. The facade of the building is characterized by a huge arch in the center. To each side of the arch are two doorways, and next to these are two bronze plaques in pseudo-niches.

The central arch is made up of a large area of open tracery of quatrefoils and strapwork flowers. This open sculptural work houses the resonating chambers of the organ. Above and below the open-work is a fine band of small tracery followed on each side by an arched engaged column decorated with spiraling vines. Engaged Corinthian pilasters decorated with elaborate garlands support two doorways, to each side of the huge arch. Elaborate architraves decorated with garlands, shell motifs, gorgons' heads, and small detailed molding highlight the two doorways. An elaborate central sea shell motif, flanked by scrolls and leaf clusters tops the doorways. These shell motifs are bordered by elaborate urns that take the shape of lamps with flame-shaped glass fixtures. Long arching columns on each side of the open-work arch (described above) terminate as engaged Corinthian columns decorated with spiraling vines. These columns, flank the engaged Corinthian pilasters that support the before described doorways. In this way, the huge central arch forms a unified central unit terminating in the two doorways.

On each side of the central arch unit are bronze plaques, framed in elaborate pseudo-niches. Carved molding, topped by a tympanum formed of the same molding, frames each plaque. A heraldic motif within the tympanum consists of a down-turned wreath, a pair of eagle wings and two upward pointing long trumpets. Engaged Corinthian pilasters decorated with garlands, like those flanking the doorways in the arch, flank the niches. A continuation of the elaborate cornice-like architrave over the doorways, consisting of shells, garlands, gorgons' heads, etc., tops the niches. Above the architrave, centered over the niches, is an elaborate element consisting of successive curvetting cornices. The interior element centers around a quatrefoil exhibiting two angels' heads singing, facing each other. The outer element centers around a central sea shell with leaf clusters at the sides. Two urns that are functional lamps flank this element.

A plain, flat wall on the outer parts of the facade contrasts with the elaborate arch and the side niches.

Monumental engaged columns with spiraling vines frame the Organ Pavilion at all four corners. These are topped by Corinthian capitals, on which a winged angel blows twin long trumpets.

A continuous cornice, formed of several layers of molding, including elaborate carvings with elements such as sea shells, lyres, garlands, acanthus leaves, and dentils, tops the Pavilion. Urns top the four corners of the cornice and a four-handled urn on a scrolled pedestal tops two central peaks on the front and rear of the Pavilion.

The rear or south side of the building has the same continuous cornice at the top edge as on the front.

Except for the treatment of windows, the facade is plain. The lowest level, which on the front of the Pavilion is below ground and is, therefore, not visible, consists of five windows and one doorway. They are not decorated. Four main windows and two small ones puncture the first story. Engaged Corinthian pilasters with garlands call attention to the four main windows. The pilasters support a cornice-like architrave of shells, acanthus leaves, etc., similar to the large cornice at the

top of the building. In addition, a corniced pediment, with a lyre in the center, over the two outer windows, forms an arch above the architrave.

The second story consists of four windows, with the two central ones treated as a unit. Each window has a balustraded pseudo-balcony. The same engaged pilasters as on the first story separate the three windows units. A triptych-like curvetting cornice perches above the window units. An oval cartouche bearing the Seal of the State of California appears in the center of the cornice above the middle window unit. A shell-and-garland device surrounded by layers of plain curving molding provides a frame on the top of the Seal. Side panels, centered over the outer two windows, panels are small, blank versions of those on the center window unit.

Colonnades extend from the east and west sides of the Pavilion. Two doorways on the second story, consisting of a central door flanked by side door--length windows, lead out to the top of the colonnades. Engaged Corinthian pilasters decorated with garlands frame each center door while carved molding frames the side windows. The pilasters support a cornice-like architrave of alternating shells and garlands topped by a cornice of rosettes, each of which has a light bulb in the center. An arched pediment with similar rosette/light bulb cornice rises above the cornice-like architrave. A lyre in the center of the pediment expresses the musical purpose of the Pavilion. The center doors on east and west sides are topped by a curvetting cornice, adorned by four lams in the form of urns, that surrounds a vent in the form of an oval cartouche. A shell and cluster device surmounts the vent while a blank ribbon banner resides below..

The bronze plaque on the west side of the central arch on the front of the building reads as follows:

To the people of San Diego this pavilion and organ are presented and to them and the people of all the world this pavilion and organ are dedicated by John D. Spreckels and Adolph B. Spreckels, January First A.D. Nineteen Hundred and Fifteen. Harrison Albright, Architect.

The bronze plaque on the west side contains the text of the deed giving the organ and pavilion.

The colonnade is in two wings, one on the east side, the other on the west side of the central building. Each wing has thirty-two Corinthian columns with smooth shafts. The colonnades end in three arches, a terminal arch, and two side arches. These arches are made up of two Corinthian columns and two Corinthian pillars with garland decorations. Pillars and columns support an arched architrave decorated with shells and garlands. An elaborate keystone in the center of each arch and a cornice of acanthus leaves with a gorgon's head above the pillars and centered on each pillar above the architrave provide additional decoration.. Pediments on the arches are curved and contain elaborate garlands. Two Phoenix birds flank a cartouche in the center of each pediment. An angel's head. within the cartouche on the terminal arch of each colonnade blows two long trumpets. A head of Pan plays the pan-pipes on the two side arches on each of the colonnades. Blank tablets bordered by rosettes form a continuous architrave along the entire length of the colonnades.. A cornice of dentils and rosettes, each of which has a light bulb in the center of the flower, tops the architrave, while, a gorgon's head, above the cornice, is aligned with the center of each column. Also, on top of the colonnades, a continuous balustrade marked by piers carrying urns is centered over each column.

Architect Harrison Albright designed the Organ Pavilion. Originally built for the 1915 Panama-California Exposition, it has provided the people of San Diego with music ever since.. John D. Spreckels and Adolph B. Spreckels donated organ and pavilion to the people of San Diego at its inaugural concert, January 1, 1915.. Organ and pavilion have had many ups and downs since 1915, but, today (1997), through the efforts of its friends, it is in better condition than it was when it first arrived in San Diego from the Austin Organ Company of Hartford, Connecticut..

ALCAZAR GARDENS

The Alcazar Gardens lie between the California Quadrangle and the House of Charm, on the south side of El Prado. The gardens are bounded on the north by El Prado, on the east by the House of Charm, on the south by the □Alcazar Gardens Parking Lot,□ and on the west by the California Quadrangle.

The gardens are laid out in a rectangular form, with the east-west axis being longer than the north-south. The Prado edge of the garden is marked by the continuation of the Prado arcade. Entry from this side is made from two open arches in the arcade at the northwest and northeast corners of the garden. Entry can also be gained from the southern side, through two large arches capped by broken pediments and flanked by scrolls. The west end of the garden has an open semi-circular apse equipped with benches.

The gardens have three long east-west aisles and four shorter north-south aisles. The central east-west aisle is highlighted by two colorfully-tiled fountains at the crossings of the interior north-south aisles. Around each of these fountains are four low backless tiled benches.

The Alcazar Gardens were constructed for the California-Pacific International Exposition of 1935-36 after a design suggested by architect Richard Requa. They replaced the Montezuma Gardens formerly on the site that had been built for the Panama-California Exposition of 1915-16. At that time the apse on the west end was topped by a pergola.

The San Diego Rotary Club sponsored a restoration of the gardens in 1962.

PLAZA de PANAMA

The **Plaza de Panama** (Plaza del Pacifico in 1935) is formed by the intersection of El Prado with the Mall (known as Esplanade of the States in 1915, a north-south avenue which begins at the Plaza de Panama and leads south to the Organ Pavilion and southwest to the Palisades.

In 1975 the Plaza de Panama was bordered on the north by the west wing of the Fine Arts Gallery (1966) on the northwest side, the Fine Arts Gallery (1925) on the north side, and the Timken Gallery (1965) on the northeast side. The southern part of the Plaza adjoins the House of Charm (1915) on the southwest side and the House of Hospitality (1915) on the southeast.

An extension of the Prado arcades keeps the southern border of the Plaza from overlapping the Mall leading to the Organ Pavilion. Mounted on his horse, El Cid, on a traffic island in the middle of the Plaza, waves his followers to battle. The statue is the work of Anna Hyatt Huntington who gave it to the City of San Diego in 1930.

The Plaza de Panama was originally established for the 1915 Panama-California Exposition. Buildings that surrounded the Plaza at that time were on the north: the Science of Man Building on the northwest side (demolished), the Sacramento Valley Building on the north side (demolished), and the Home Economy Building on the northeast side (demolished).

The southern part of the Plaza still has the 1915 Foreign Arts Building (1935 House of Hospitality) and 1915 Indian Arts Building (1935 House of Charm) on its east and west sides.

During the 1935 California-Pacific International Exposition the Plaza was called the **Plaza del Pacifico**. With one exception the buildings were the same as in 1915 but their names were different. The exception was the Fine Arts Gallery that replaced the Sacramento Valley Building in 1925.

EL PRADO ARCADES

The south side of El Prado is lined by an arcade that begins in the California Quadrangle, continues around the south side of the Plaza de Panama, and ends at the northeast corner of the Electric Building.

Starting with the California Quadrangle, the arcade forms the northern edge of the Alcazar Gardens, skirts the northeast corner of the House of Charm, continues along the east side of that building, turns at a 90 degree angle to the east at the southeast corner of the same building, and juts out to form the southern border of the Plaza de Panama. At this point, the arcade is interrupted by the crossing of the Mall leading to the Spreckels Organ Pavilion. The Mall is divided by a grass planted island into a lane going south and a lane going north. A balustraded walkway joins the ends of the arcade on the south edge of the Plaza de Panama. The arcade picks up on the east side of the Mall where it joins the southwest side of the House of Hospitality. There it turns 90 degrees northward along the west face of that building, turns 90 degrees east at the northwest corner of the same building, and continues along the north side of the Electric Building. It terminates at the northeast corner of the Electric Building rather than continuing on irregular terrain to the east end of the Plaza de Balboa.

Through most of its length, the arcade consists of arches supported by rectangular pillars on the street side and a smaller, blind arcade on the building side. Exceptions are:

At the northeast entrance to the Alcazar Gardens, a Mission-style bell gable with two bell openings and a circular opening above looms springs upwards from the arcade.

Between the House of Hospitality and the Electric Building, the arcade becomes an elaborate corridor. Pairs of Romanesque-style columns and capitals support five arches on both outer and inner sides. The arches are ribbed with multiple layers of molding and have medallions in the spandrels. The picturesque effect is enhanced by a red tile roof over the corridor.

At points in the arcade where it ends or corners, a triumphal arch topped by a curvilinear pediment appears flanked by Salomonic pillars or garlanded columns. A cartouche in the center of the pediment shows a vignette from the history of San Diego. These glimpses into the past change with changes of location.

At the arcade's east end, the cartouche displays a ship passing through the Panama Canal. On the east side of the corridor between the House of Hospitality and the Electric Building, the cartouche shows a figure of Vasco Nunez de Balboa, after whom the park was named. Father Junipero Serra rides a donkey with Mission San Diego de Alcala and Indian workers in the background on the west end of the corridor. An inscription on Father Serra's cartouche reads "San Diego 1769," the date the Franciscan priest founded San Diego.

The terminal arch at the northwest corner of the House of Hospitality repeats the Father Serra cartouche while the arch across the Plaza at the northeast corner of the House of Charm repeats the cartouche of the ship passing through the Panama Canal. A terminal arch facing the east side of the Mall that interrupts the arcades shows a robed man holding a cross below an inscription that identifies him as Father Serra, while on the west side of the Mall Vasco Nunez de Balboa appears in another depiction.

The arcade becomes unusually decorative as it passes by and through the front of the Electric Building. When the arcade is detached from the building, it has urns above alternate pillars on the street side, but when it passes through each projecting pavilion it encounters elaborate repeat moldings on columns and exciting lighting fixtures.

In 1915 and for many years thereafter an arcade similar in places and different in others bordered the north side of El Prado, where it too ran between and through buildings. Except for the arcade in front of the Casa del Prado, these arcades were demolished when the buildings they served

were torn down.

The arcades are built of lath and plaster over a hollow core. Portions of the arcade have been patched up over the years, but the design of those arcades that still exist is essentially the same.

Revised by Richard W. Amero, December 31, 1997. An on-the-spot inspection is recommended to clarify some points of confusion.

To some visitors the arcades were and are the most exciting aspect of architect Bertram Goodhue's plans. As they ran through their course, they were varied in designs, some of which were taken from monasteries in Italy, Spain and Mexico. They provided shelter and shade from the bright sun and in places opened up vistas into gardens and patios. Even their interruptions by the Plaza de Panama, the Botanical Gardens, and the canyon between the House of Hospitality and the Electric Building were dramatic for visitors went from enclosure to openness, from shadow to sunlight, from man-made architecture to nature's greenery.

FINE ARTS GALLERY

The Fine Arts Gallery (San Diego Museum of Art) is located on the north side of the Plaza de Panama. It is a two-story building with a central facade that juts slightly forward from east-west wings.

In contrast to the central false-front facade, side wings are roofed in red tile. They have flat, plain walls while the facade is encrusted with ornament. Five windows puncture the wings on the first story of each side. Stone-like cement decoration frames each of the windows. The decoration consists of engaged Corinthian pilasters, multiple urns one above the other, angels, angels' heads, crossed cornucopias, and mythical creatures, all interlaced with leaves and vines. A mantel below the windows contains two tablets with vines that scroll around a ram's head. An architrave above the windows is topped by a plain cornice which, in turn, is topped by an arched pediment strewn with acanthus leaves and flanked by spiraling urns. A shield inside the pediment rises from a bed of meandering vines.

The shields on the five windows of each wing illustrate different themes pertaining to the arts of painting, sculpture, ceramics, metal working, and weaving. Except for a plain band of molding, an absence of decoration characterizes the second level of each of the wings. Separated by a wide blank space above the molding, a series of scalloped tympanums enclose large sea-shells. Flowers in triangular shapes occupy spandrels between the tympanums. The tympanum course is succeeded by a thin band of dentils, another thin band of geometric forms, and a large band of acanthus leaves, which make up the elements of a cornice. The cornice goes around the building and is interrupted only by the central facade. A doorway near the southeast corner of the building has wrought-iron bars.

An elaborate portal dominates the central facade. The doorway passes through and under an arch overlaid with urns, vines and flowers and with motifs that represent the arts, such as palettes and musical instruments. A shield in the keystone shows an angel's face and a tablet bearing the date 1925. The tympanum takes the shape of a large sea shell. Two round medallions with flowers in the center occupy the spandrels. They are surrounded by circular rows of acanthus leaves and vines. Angels, griffins, lions, and vines fill in spaces near the arch. Monumental engaged pilasters covered with naturalistic and mythological detail stand on each side of the arch. Panels next to the pilasters show urns, vines, angels, and mythological creatures. A second layer of panels above the first show small copies of Donatello's sculpture of St. George on the east side and Michelangelo's sculpture of David on the west side. Engaged pilasters decorated with ornament on the sides of the panels form the outer edges of the facade.

Three niches occupy the center space above the scalloped center arch. They are framed by elaborate engaged pilasters covered with meandering vines. Each has a recessed shell tympanum. Statues of the Spanish painters Murillo Zurburan and Velazquez occupy respectively the central niche, the niche on the east and the niche on the west. Panels to the right and left of the niches contain angels holding brushes and palettes, tablets showing crossed Spanish swords, and Spanish galleons in full sail. Each panel also has a round medallion containing portraits of artists: the medallion on the right showing El Greco and the one on the left showing Ribera. Meandering vines fill in intervening spaces at this level.

Three shields rising above niches on the second level occupy the third level of the facade. The central shield carries the Coat of Arms of the United States and is topped by an eagle. The Seal of the State of California is shown on the shield to the right. A small head and bust of a man occupies a shell above the shield. The shield on the left is in four parts with rampant lions on one side of a diagonal and a stone fort opposing a stone tower on the other side. Meandering vine panels abut the central panels on east and west sides.

A cornice consisting of a band of egg and dart molding a band of dentils, and a band of

flowers and lions' heads tops the third level. Two monumental engaged pilasters that frame the central shield are capped by kneeling angelic or atlantean figures. Two engaged pilasters that separate the shields from the side panels are topped by sitting figures that are either angelic or atlantean or both. The placement of the figures emphasizes the vertical divisions of facade and cornice.

Two monumental engaged pilasters on the outer east and west sides of the facade have elaborate Corinthian capitals mixed up with the customary urns and vines from which appears, unaccountably, a bearded head.

A balustrade formed of panels displaying urns and meandering vines occupies the roof of the facade. Piers in the shapes of urns or torch finials, which are extensions of the pilasters on the facade, divide the panels. In addition to the urns and finials, the larger piers have bands of angels and the smaller piers have clusters of leaves. A large four-part shield in the center of the balustrade stands below a rising sun whose rays create an eloquent corona. The upper left part of the shield has a galleon, the upper right part wheat stacks, the lower left part flowers, and the lower right part a mission bell gable on a tile roof.

The north side of the Fine Arts Gallery has a large picture window on the second level at the landing of an inside staircase. Smaller windows flank the picture window on each side.

In 1966, a new wing was added to the west side of the Fine Arts Gallery. It goes back around the northwest corner and also comes out on a court and annex bordering El Prado and the west side of the Plaza de Panama. An auditorium, a sculpture garden, a library, and a restaurant are parts of the west wing. The east wing of the Gallery was extended in 1975. It corners around the Gallery to the north.

William Templeton Johnson and Robert Snyder designed the Fine Arts Gallery that was built in 1925. The building occupies the site formerly occupied by the Sacramento Valley Building during the 1915 Panama-California Exposition. The facade of the Fine Arts Gallery was inspired by the facade of the University of Salamanca in Spain.

CASA del PRADO

The Casa del Prado is located on the north side of El Prado, across from the Electric Building. It is made up of a main building on El Prado, and a second building, looking like a Mexican church, that faces Village Place, an avenue beginning at the eastern end of El Prado and leading north to Spanish Village. The two distinct buildings are joined by an open, arcaded court.

The main building has a highly ornate south face divided by two pavilions with a two-story arcaded balcony in between.

Each of the pavilions has an identical facade. The facades are articulated by a large central arch that is flanked by two smaller arches. Large blank escutcheons form the base for two ornate side balconies. The balconies are attached to windows. The central arch on the ground level looms over the side arches. Escutcheons at the key of the side arches are surrounded by garlands. Busts of angel peer out from the side of the escutcheons.

The side windows above the arches are flanked by estipite columns and topped by scrolling rinceaux. Additional scrolling elements rise above the cornice.

A pair of double engaged columns covered with spiraling grape vines, heavy with fruit, supports the central archway. Above the door, an oval medallion fringed by drapes is surmounted by a crown. Rising above the paired columns, large pedestals decorated with opposed spirals are topped by a four-sided rectangular urns. Angel faces look out from the faces of the urns, each of

which holds a torch.

A round window in the second story, above the blank oval medallion is set in a quatrefoil recess. Engaged pilasters on each side of the window support a broken pediment. A dramatic sunburst with a cross in the center blazes forth from the middle of the pediment. A niche supported by draped columns and topped by a peaked pediment rises above the sunburst. Large urns flank the niche on each side. A curvetting cornice with a large urn in the center crowns the facade.

The second-story balcony between the pavilions is roofed in red tile. Fluted columns with garlands, angel faces, and Ionic capitals stabilize the balcony. Scrolling rinceaux in the spandrels take the shape of gorgon heads. A row of scrolling rinceaux, separated by embossed square tablets, forms a cornice above the arches. Spiral shell-like elements are centered within each rinceaux. An open balustrade stretches between each column.

An enigmatic and hieratical sculptural group highlights the east side of the building. The sculptural figures are set within three niches that are separated by engaged estipite columns that are covered with garlands and faces. The central niche is larger than the side niches.

Several layers of moldings topped by small arching pediments bordered by scrolls trim the side niches.. Each of these small niches has a floral base and a shell tympanum. The niche on the left holds a forceful female figure wearing a cuirass and holding a shield, who is sometimes identified with Anglo-Saxon womanhood.. The niche on the right holds a regal female figure holding an orb, who is sometimes identified with Queen Isabella of Spain.

The large central niche is trimmed by embossed molding with garlands on each side. A round medallion showing a bearded man wearing a plumed hat appears on the base of the niche. A blank tablet above the niche is surrounded by scrolls and garlands. The tympanum is in the shape of a large shell covered by a sunburst. A buxom female in the niche, sometimes called the Goddess of California, is accompanied by a small Indian boy and a Caucasian girl. The three hold fruits and, with the figures in the other niches, suggests an allegory of □Abundance□ and also, maybe, of civilization overcoming barbarism.

A cornice of several layers of molding interspersed with blank tablets rises above the niches. A curvetting, three-part crown sits on top of the cornice. A large rectangular blank tablet in the center of the cornice is covered with drapery. It has a crown in the center. Two engaged pilasters decorated with garlands, lions□ heads, and urns separate the blank tablet from the rest of the cornice. Circular garlands on panels next to the pilasters are flanked by another pair of engaged pilasters. A full figure, looking like Virgin Mary, who has been called □Universal Religion□, rises above the blank tablet in the top middle of the entablature. Urns line the rest of the entablature.

Unlike the south and east sides, the west side of the building is plain with sparsely decorated windows providing accents for the blank walls.

A two-story arcade supported by plain rectangular pillars surrounds an open-air patio in the middle of the building. A Panama-California Exposition Sculptural Court dedicated to the memory of Frank F. Evenson occupies a portion of the patio. The sculpture consists of plaster figures that adorned the Food and Beverage Building before it was reconstructed as the Casa del Prado.

The southern side of the main building is lined by an arcade similar to the arcades that line the opposite side of El Prado. The cartouche on the east end of this arcade shows a ship passing through the Panama Canal while the cartouche on the west end of the arcade shows a robed figure who is identified as □Junipero Serra□.

The church-like facade faces east on Village Place. Its elaborate entrance facade is flanked by two massive square bell towers. The two bell towers are three-stories tall and are capped by four adjoining arches that support a blue-yellow tiled dome. The domes are ribbed and are topped by

urns. Urns also appear at the base of the ribs. Arches below the dome are trimmed in plain molding. Four rosebud finials top corner pillars set close to the arches.

The northeast facade of the Casa del Prado has one large arch. The arch is flanked by engaged columns with spiraling grape vines, exactly like those on the facade of the south building. Other details on the facade duplicate details on the south building. A figure of a saint, wearing a miter and a cape, and the flying angels at his side are exceptions. A blank medallion on the south building covered with drapery occupies this spot. Also, the south building has three arches on each facade, whereas the north building has only the central arch.

The courtyard connecting the south building with the north has a sturdy arcade with only two bands of incisions around the arches. The pillars are plain and rectangular.

The Casa del Prado is a reconstruction of the Varied Industries and Food Products Building that was built for the 1915 Panama-California Exposition. During the 1935-36 California-Pacific International Exposition, the building was called the Food and Beverage Building. Voters in 1968 approved a bond issue to reconstruct the building. The Committee of 100 raised additional money to rebuild a loggia facing El Prado which is called the Jeanette Pratt Loggia in honor of a major donor.

The new building has rebuilt about 90 percent of the old. The apse and a bell gable on the west end of the north building were deleted. Unlike the plaster and hemp construction of the old building, the new building is made of concrete. Casts of the old plaster and hemp sculpture were also redone in concrete. Some of the original casts can be seen in the Panama Sculpture Court in the patio of the main building.

NATURAL HISTORY MUSEUM

The Museum of Natural History is a three-story concrete edifice located on the northeast corner of El Prado and Village Place. It consists of a central pavilion with east and west wings and a west wing annex extending northward.

A large stairway leads to the front entrance on what would normally be a second-floor level. Entrance doors are surmounted by a large arch and are flanked by stylized Corinthian columns. Two round medallions, each containing a facing head of a Bighorn Sheep, are in the spandrels of the arch. The columns are set on high pedestals. Lower parts of the shafts show reliefs of mythological creatures. Upper parts of the shafts are fluted. A facing head of an American Bison appears above the capitals. The columns support a small band of acanthus leaves, followed by a band of dentils, and finally by layers of classical moldings. A band of stylized mythological creatures is located below the cornice while a peaked pediment made up of classical moldings and topped by a band of facing griffins is located above the cornice. A double-headed spread eagle appears at the peak of the pediment. Pedestals to each side of the pediment support elongated statues of an Egyptian cat.

In contrast to the monumental arch entrance, the rest of the central pavilion is relatively plain. A band of alternating diamonds and curls support a continuous surface of molding on the cornice at the top of the third level. While the cornice extends to the east and west wings, a small band of roof trim above the cornice stays within the confines of the central pavilion.

East and west wings are plain in appearance. The first or basement level has a series of undecorated windows. The second or main floor level has four simple, rectangular windows on each wing. Ten arching windows on each wing highlight the third level. Modest engaged pillars frame the third-level windows which are further highlighted by a curl in the keystone of each arch. A blue-gold tile panel is located below each window. As noted, the cornice continues the cornice in the central pavilion. An open-work carved balustrade of repeating pairs of stylized sea horses runs around the roof. Sides of east and west wings follow the same decorative scheme as the fronts;

however, the three arching windows on the third-level do not have tile panels below.

The west wing annex follows the general decorative treatment of the rest of the building, but again a row of thirteen arching windows does not have the distinctive tile panels below.

The north face or rear of the building contains a blank surface that is broken by large rectangular windows.

Architect William Templeton Johnson designed the Natural History Museum in 1931. Sculptor Arthur Putnam did some of the detail work on the facade. The Museum opened to the public in January 1933. During the 1935-36 California-Pacific International Exposition the building was called the Palace of Natural History. The U.S. Navy used the building as a hospital during World War II.

The Southern California Counties Building, built for the 1915 Panama-California Exposition, formerly occupied the site now used by the Natural History Museum. After the Exposition, the old building was renamed the San Diego Civic Auditorium. The Auditorium burned down in December 1925; thus making it possible for the Natural History Museum to move to the site from its former quarters in the 1915 Commerce and Industries Building (1916 Canadian Building).

The Natural History Museum houses many superb specimens, including the Lawrence Klauber collection of rattlesnakes and the Klauber Herpetology Library, one of the largest --- if not the largest --- collection of books on reptiles in the world.

Revised by Richard W. Amero, January 1, 1998.

NOTES

The Cabrillo Bridge serves as the entrance to the museum/building complex in the center of Balboa Park.

The House of Charm is occupied by the Mingei International Museum of World Folk Arts, the San Diego Art Institute, and the Old Globe Theater.

The House of Hospitality is occupied by civic groups and by a restaurant currently known as Terrace on El Prado.

The Casa de Balboa (former Electric Building) is occupied by the San Diego Historical Society, the Museum of Photographic Arts, the San Diego Hall of Champions, the San Diego Model Railroad Museum, the Balboa Park Art Conservation Center, and the Committee of 100..

The Botanical Building houses a collection of semi-tropical plants.

Organ concerts are presented on Sunday afternoons at the Spreckels Organ Pavilion.

The San Diego Museum of Art (former Fine Arts Gallery) houses a collection of paintings and sculpture and conducts educational programs.

The Casa del Prado (former Food and Beverage Building) houses the San Diego Youth Symphony and Ballet, the San Diego Floral Society, and other civic groups.

The San Diego Natural History Museum houses a collection of animal and mineral specimens, a library and research laboratories.

OTHER BUILDINGS

There are three buildings within the El Prado area that have not been nominated to the National Register of Historic Places because of their non-conformity to Panama-California architectural styles and because of their recent construction.

The Timken Art Museum (former Timken Art Gallery) and the west wing of the Fine Arts Gallery are on the Plaza de Panama.

OTHER BUILDINGS

The Reuben H. Fleet Space Theater and Science Center, built in 1973 and expanded in 1997, is located on the south side of the Plaza de Balboa across from the Natural History Museum

PARK PLANNING: EXPOSITION SITE ARCHITECTURE

The El Prado complex was built for the 1915 Panama-California Exposition. As early as 1909, prominent San Diegans planned holding a gala celebration to mark the opening of the Panama Canal. The site selected for the celebration was a barren tract of 1,400 acres contiguous to the City's downtown. The State of California has set this land aside in 1871 for use as a city park; but up to 1909 few permanent improvements had been made. San Diego Park Commissioners named the park Balboa in honor of Vasco Nunez de Balboa, the first European to cross the Isthmus of Panama and to see the Pacific Ocean.

Directors of the Panama-California Exposition looked to the future. While the Exposition would have many temporary buildings, it would, more importantly, have a few permanent buildings that would remain in the park after the Exposition closed.

Bertram Goodhue of New York City was the consulting architect for the Panama-California Exposition. Carleton M. Winslow was his assistant. Goodhue designed the California Building (now the San Diego Museum of Man). Winslow designed most of the temporary buildings, some of which are still in use. Frank P. Allen, Jr. the Director of Works for the Exposition, designed the Cabrillo Bridge, some of the arcades and pergolas, and other park fixtures and features. Harrison Albright, an architect hired by John D. Spreckels, designed the Spreckels Organ Pavilion. About a decade after the Panama-California Exposition, San Diego architects William Templeton Johnson and Robert Snyder designed the Fine Arts Gallery (1925) and Johnson alone designed the San Diego Natural History Museum (1933).

El Prado and Palisades sections of Balboa Park were the site for the 1935-36 California-Pacific International Exposition. The 1915 Exposition buildings that survived were again used for an Exposition. Other surviving buildings from the 1935-36 Exposition can be found in the Palisades.

The El Prado complex, or the Panama-California Exposition collection of buildings, is part of the history of San Diego and a heritage that San Diegans want to transmit to future generations.

CLARENCE STEIN

Clarence Stein played a decisive role in the laying out of grounds for the Panama-California Exposition of 1915. Many years after the Exposition, Stein became known as the Dean of City Planners in the U.S. In his apprentice years, he was hired by Bertram Goodhue who gave him the responsibility for laying out the axes, or main avenues, of the Exposition. Stein's plans reflected the influence of the Ecole des Beaux Arts in Paris, where he had studied. They also reflected the influence of Latin and Latin-American cities with their narrow streets and great plazas.

In its approaches to important areas, the plans made use of topographical advantages. The fountains, pools, and off street gardens Stein plotted glorify and romanticize the setting.

Pierre Charles L'Enfant's 1791 plan for Washington, D.C. parallels Stein's plan for El Prado. Avenues in L'Enfant's plan are wide; gardens, parks and squares are located generously and strategically.

Unlike L'Enfant's plans that preceded their long-delayed and faulty execution, Stein's plans were prepared as an accompaniment to the construction of buildings. As a result, the buildings fit the spaces to which they were assigned. Accordingly, the unity of buildings and building styles in Washington, D.C. today is not as successful as were those in Balboa Park in 1915.

The main axis for the Panama-California Exposition was designed to look like the main avenue of an idealized Spanish or Spanish-American city. It invited visitors to stroll leisurely from building to building. The seven-arched Cabrillo Bridge at the entrance recalled the approach by bridge to Toledo, Spain. Facing eastward from the Bridge, the panorama of the Exposition was laid out before visitors. Major buildings were located on the main axis. The gradual approach over the Bridge enabled visitors to adjust to a legendary experience.

The West Gate entrance to the California Quadrangle picked up the theme of the union of the Atlantic and Pacific Oceans via the Panama Canal through sculptures in relief on its face. Thereafter, El Prado narrowed to an intimate street of the type found in towns in Spain and Latin America. Midway on its course, El Prado opened into the spacious Plaza de Panama, the hub and most important part of Stein's plan.

The Plaza de Panama is crossed by a minor North-South axis that led from the Sacramento Valley Building (now the San Diego Museum of Art) to the Spreckels Organ Pavilion.

Continuing east from the Plaza de Panama, El Prado opened into a minor North axis disclosing a plaza dominated by a large reflecting pool south of the Botanical Building. Beyond the nearby Varied Industries and Food Products Building (now the Casa del Prado), El Prado encountered another North axis that ran (and still does) from the east frontage of the Casa del Prado north to 1915 Tractor Field (1935 Spanish Village).

El Prado ends in the Plaza de Balboa, a large open area that was reshaped after El Prado was closed to through east-west automobile traffic. The Plaza de Balboa has a large, open fountain named after Bea Evenson, an advocate of preserving the Panama-California Exposition buildings. The San Diego Natural History Museum and the Reuben H. Fleet Space Center face the Plaza de Balboa. In 1915, El Prado stopped at an arcade, called the East Gate, across from a trolley stop on Park Boulevard. The gate disappeared years ago. Where the trolley station once stood, roses grow.

Though many buildings from the Exposition have been demolished, Stein's plan is basically intact. It survives as a superb example of planning for the enjoyment of people and as an important City of San Diego historical landmark.

Revised by Richard W. Amero, January 1, 1998.

December 2, 1975, San Diego Union. First of five tours of Balboa Park gardens and historic buildings, sponsored by the Committee of 100, will be held at 1 p.m. today.

December 2, 1975, San Diego Union, B-3. The Balboa Park Committee voted 8 to 4 yesterday to reject a proposal to limit future construction of buildings in most of the park to 1,500 square feet, about the size of an average tract home.

The committee head, Marie Widman, said the city Park and Recreation Board will review the action and make a final recommendation to the City Council on whether the proposal should be placed on the ballot, as its proponents are asking.

The proposal grew out of opposition to adding a third theater to the Old Globe Theater. Arguing for the proposal, committee member Charles Wolf said, "the park is now being suffocated under a burden of non-park activities," and that "all the people of San Diego should be given a choice in determining the park's future."

December 4, 1975, San Diego Union, B-7. The "Spirit of Christmas" with life-size biblical scenes and holiday displays with return to the Organ Pavilion Sunday.

December 7, 1975, San Diego Union, E-3. (Reginald Poland's) Death Stirs Memories Of Old Globe, Spanish Village, by Ralph Hastings.

December 8, 1975, San Diego Union, B-3. City Manager Urges Balboa Park Rent Hike to cover the increases to the city of operating the facilities.

December 14, 1975, San Diego Union, B-4. Officials of the Centro Cultural de la Raza have invited the public to the annual Posada from 5:30 to 9:30 p.m., December 19-22, at the group's headquarters in Balboa Park.

December 14, 1975, San Diego Union, B-6. A public rally in opposition to the United Nation's anti-Zionism resolution will be held at 11:30 a.m. today at the Organ Pavilion.

DIRECTOR'S REPORT

B. Contract Award: Balboa Park Golf Course Slope Restoration, Phase II.

On November 19, 1975, Council awarded a contract for the above project, involving irrigation and landscaping for the sum of \$5,070, authorizing the expenditure of \$7,700 for said purpose and related costs. The accepted bid is 21 percent below the estimate of \$6,400.

C. Donation Accepted: Silver Bay Kennel Club

On November 26, 1975, Council accepted the generous donation of \$585 from the above organization for the purpose of purchasing tables and benches for a designated area of Morley Field. The City will match said donation.

ITEM

a. Ballot Proposal - Balboa Park Construction

Mrs. Widman reported that the Balboa Park Committee voted 8 to 4 to recommend to the Board that the proposal not be approved and that the matter be referred to the Master Plan Review Subcommittee of the Balboa Park Committee.

Mr. Roberts reiterated staff's position that the proposal is too simplistic and restrictive.

Mrs. Arlene Van de Wetering, author of the proposal, presented her thoughts to the Board. She stated that although she is a member of Uptown Planners and Citizens Coordinate for Century III, she did not speak for those groups. Basically, her proposal would prohibit any new building in excess of 1,500 square feet in the boundaries of Balboa Park, except for the Morley Field area and the Zoo, within its present boundaries. She stated that 1,500 square feet is adequate for comfort stations, storage facilities, etc.

Mrs. Van de Wetering emphasized that the Bartholomew Plan emphasized open space, not buildings. She further feels that there are inappropriate uses of the Park. Any policy on uses of Balboa Park should be decided by the voters, as Council policies and ordinances are too easily vulnerable to attack.

Mr. Larry Sisk spoke in opposition, although sympathizing with the goals of the proposal, he felt the measure would tie the hands of City staff, advisory bodies and the Council. Each proposal should be considered on its own merit. The Charter already requires a two-thirds vote of the citizens for non-park uses of Balboa Park. The Bartholomew Plan covers uses for open space versus buildings. The General Plan, approved November 7, 1967, outlines what is permitted in Balboa Park.

The Board came to the consensus that the spirit of what Mrs. Van de Wetering wants to do is good, but that her proposed ballot measure is too constricting.

MOTION: Mrs. Widman moved that the Balboa Park's recommendation be accepted by the Board; it was seconded by Mr. Villarino and carried unanimously. Staff was directed to report the Board's recommendation to the Public Facilities and Recreation Committee.

REFERRAL: Mr. Milch inquired of Mrs. Van de Wetering as to whether she would be interested in serving on the Balboa Park Committee. As she indicated this would be a possibility, Mr. Milch noted that he would entertain the matter. Further, he requested that staff place her name on the mailing list of the Balboa Park Committee.

COMMITTEE REPORTS

A. Balboa Park Committee

1. Capital Improvements Program Revisions - Morley Field Area

Mrs. Widman and Mr. Roberts reported on a staff proposal to designate the temporary archery range as the permanent location and construct a combination archery storage facility/comfort station near the range. These improvements would be made with funds from CIP projects 21-710.1, "Archery Center Target Range," and 21-008.3, "General Comfort Station," resulting in a net savings of \$68,000. The savings would be used to augment the budget for project 21-409.1, "Morley Field - Eastern," for design and

construction of a group picnic center and enlargement of the first phase of landscape development.

Mrs. Widman moved that the Board accept the Committee's recommendation to approve the proposed revisions; it was seconded by Mr. Villarino and carried unanimously.

December 17, 1975, San Diego Union, B-3. Aerospace Museum Site Plan Opposed, by Ken Hudson . . . The port commissioners yesterday raised objections to the proposed location of the Aerospace Museum on the B Street Pier in connection with the \$84 million Embarcadero redevelopment project.

December 17, 1975, San Diego Union, B-3. The Park and Recreation Board yesterday voted against a ballot measure to limit building in Balboa Park.

December 17, 1975, San Diego Union, B-3. The San Diego Zoo held groundbreaking ceremonies to bring a bit of the 1,800-acre Wild Animal Park in San Pasqual to San Diego.

The "bit" will be a pavilion to be constructed with a thatched roof and pole walls in the style of the Park's African architecture. It is planned with a display to encourage Zoo visitors to see the Park.

December 19, 1975, San Diego Union, B-3. A group of Ocean Beach residents failed yesterday to persuade the City Council to reverse a Planning Commission decision to lease some city park land for a YMCA project.

The council upheld the granting of a special permit to the YMCA for construction of a community center and swimming pool on a 3-acre portion of Collier Park land.

December 25, 1975, San Diego Union, B-14. Letter, Jr. Robert Mosher, La Jolla: "The recent ruling of Judge Jack R. Levitt in which he found Joseph Yamada, landscape architect, to be in possible conflict of interest with regard to his firm's contract with the city for the design of a Japanese garden in Balboa Park, is a regrettable development and one which should be carefully scrutinized.

December 28, 1975, San Diego Union, B-9:1. The program at Reuben Fleet Space Theater will change to "Probes in Space" and "Viva Baja" on Wednesday; the first film simulates a voyage across the solar system; the other film explores the scenic wonders of the Mexican peninsula; both films include dome-filling movies taken with a super-wide-angle camera.

December 28, 1975, San Diego Union, B-1, B-10. Mystery Spell Cast --- Balboa Park Plaques Are Puzzlers, by Carol Olten (illus.).

The plaques of Balboa Park cast a mysterious spell.

At Upas Street and Sixth Avenue upon an expansive grassy knoll sits a rock with a bronze plaque dedicating a *Podocarpus Elongata* tree. There is no tree.

Behind the Balboa Park Club resides a huge granite barbecue pit, erected in 1944 and bearing a plaque recognizing the donations of the Dan Rossi Southern California Granite Co. and contributions of a retired military man. The monumental barbecue sits among the cacti gardens.

Near the Spreckels Organ Pavilion stand a pair of elaborately carved Japanese doors, a plaque on a nearby rock stating they were erected in memory of former San Diego Mayor Charles C. Dail's efforts with the Sister City Commission. The doors open to nowhere.

The reason Balboa Park plaques and memorials may appear a little strange at times is that installation procedures are a bit loose, a spokesman for the San Diego Park and Recreation Department says.

1976

Summary of Events in 1976

(Note: Dates of events are approximate only.)

City gets cherry trees from Japan (January 5, 1976)

Permanent flag display dedicated in front of Aerospace Museum
(March 8, 1976)

Regulation of park entertainers (March 24, 1976)

Park Board says Chicano murals can stay (April 21, 1976)

Marston house to be turned into a historical museum
(April 29, 1976)

Park Board endorses Florida Canyon plan (May 19, 1976)

Public Facilities and Recreation Committee voted 3-2 to allow Chicano mural to remain
(June 7, 1976)

Committee reviews Balboa Park Master Plan Review Committee
concludes its work (August 8, 1976)

Desert garden started (August 13, 1976)

Agoston Haraszthy Memorial in Balboa Park (October 19, 1976)

Bicycle track at Morley Field (October 24, 1976)

City agreed to make matching contribution for Organ Pavilion repair
(November 10, 1976)

El Prado area entered in National Register of Historic Places
(December 12, 1976)

January 1, 1976, San Diego Union, B-10. Letter, Arlene Van DeWetering: She objects to turning several acres of Collier Park over to Peninsula YMCA.

January 1, 1976, San Diego Union, B-10. Letter, Elaine Benjamin: Developers do not want use of word "rural" used to describe Alpine.

January 4, 1976, San Diego Union. Timken Gallery lighting gets low rating from Alfred Moir, Professor of Art History, University of Santa Barbara.

You can imagine my dismay . . . when I went to the galleries a little before 4 p.m. on a recent Saturday to find the light so dim as to make it impossible to see the paintings. In response to inquiry, a guard told me that the lights were being turned down, or left off completely, in order to save money.

January 4, 1976, San Diego Union, B-13. March completion date for Spanish Landing Park.

January 9, 1976, (San Diego) Evening Tribune, B-1. La Jolla Community Plan comes under fire, by Steve Wiegand.

January 9, 1976, San Diego Union, B-2. Letter, Bob Giantvalley: He thinks private use of Collier Park is better than "open space which attracts litter and encourages nuisance-type activity."

January 11, 1976, San Diego Union, B-10. Natural History Museum wants a 25-cent admission increase; Deputy City Manager John W. Johnson said his office agrees with the proposed \$1 dollar admission fee which would be effective February 1 if the City Council's Public Facilities and Recreation Committee concurs.

January 13, 1976, San Diego Union, B-3. Public Facilities & Recreation Committee terms measure to control construction in Balboa Park "simplistic;" claims it would tie hands of future planners.

January 15, 1976, (San Diego) Evening Tribune, A-2. City to get 100 cherry trees from Yokohama; trees to be planted in a 6.5 acres Japanese Garden in Balboa Park.

January 16, 1976, San Diego Union, B-3. Proposals for Mount Acadia Park in Clairemont.

January 16, 1976, San Diego Union, B-3. Landscape architect Joseph Yamada resigns post on Park & Recreation Board after court fight.

January 18, 1976, San Diego Union, C-2. Letter, Lowell C. Ballard: "Spanish Landing" a plausible if not exact place where the San Antonio anchored April 11, 1769.

January 19, 1976, San Diego Union, B-3. Cost of Mission Hills park soars, by Otto Bos.

January 19, 1976, San Diego Union, B-3. Citizens Coordinate for Century 3 director to be paid.

January 19, 1976, San Diego Union, B-3. Dora Ann Eklund and her son Dana donated sundial, designed by Dr. L. Gordon Plummer, to Balboa Park valued at \$5,000.

January 20, 1976, Park & Recreation Board. Directors Report: A.) Sundial Dedication, Plaza de Balboa, January 25, 1976. Mr. Mendoza announced that on Sunday, January 25th at 3 p.m., the Sundial in the Plaza de Balboa adjacent to the Fleet Space Theater, will be dedicated. The Board had formerly approved receipt and placement of the donation. . . . B.) Ballot proposal - Balboa Park. On January 12, 1976, the Public Facilities & Recreation Committee recommended to the Council that Mrs. Van de Wetering's proposal be referred to the Master Plan Review Sub-Committee of the Balboa Park Committee of the Park & Recreation Board. . . . Mrs. Widman requested that Mrs. Van de Wetering be informed that her research and knowledge will be taken into consideration by the Sub-Committee. . . . D.) Reservation Procedures for Facilities in Balboa Park. Regarding a communication from one of Marie Hitchcock's supporters concerning the use of the Puppet Theater in Balboa Park, the Public Facilities & Recreation Committee, on January 12, 1976, recommended that Council resolve that Mrs. Hitchcock's Christmas program be co-sponsored by the City, and that all rents collected from her contributed to "America's Finest City Week" celebrations be refunded. It was further recommended that Council pass a resolution of thanks to Mrs. Hitchcock for her contributions to the city.

I. Contract Awards: 3.) Miniature Railroad Site, Balboa Park. On December 31, 1975, Council awarded a contract for improvements to the subject facility for the sum of \$41,640. The accepted bid is 9.6 percent above the estimate of \$38,000.

January 27, 1976, (San Diego) Evening Tribune, B-4. Park building rents that cover operating and maintenance costs may go up 700 percent.

January 31, 1976, San Diego Union, B-3. City Manager Hugh McKinley and City Planning Director James Goff have recommended inclusion of entire El Prado are in National Register of Historic Places.

February 2, 1976, (San Diego) Evening Tribune, D-1. Patricia Dibsie claims lath house (Botanical Building) in Balboa Park was designed as a railway station.

Balboa Park visitors who might have noted the Botanical Garden's resemblance to an early American railway station are perceptive indeed.

That's exactly what it is --- a converted railway structure rebuilt just north of the lily pond and east of the Fine Arts Gallery.

The Santa Fe Railway has the skeleton structure fabricated out of steel somewhere in the Midwest, according to George Kempland, the supervisor for the park's nurseries and landscaping. "This building originally was supposed to be a station where train engines were turned around," he said. "That equipment was to do beneath the huge dome located in the center of this structure."

Although no trains were ever turned around in this now plush Eden-like garden, many a head has been turned. "This is one of the most photographed displays in all of the park," Kempland said.

Directors of the Panama-California Exposition purchased the unassembled framework and constructed it in 1915. Some 30,000 San Diegans promoted and financed the Expo in the park. This building was considered "temporary."

The Botanical Garden has seen its fortunes rise and fall many times during its 61 years.

It has fallen into periods of disuse and neglect, served as a haven for convalescing sailors and experienced a middle-age face-lifting.

But even in its darkest hours there was a band of citizens rallying --- sometimes unsuccessfully --- to its aid.

Following the Navy's post-war departure, the building stood neglected until 1957, when the City Council appropriated \$63,500 for its renovation. More than 70,000 feet of redwood lath was installed. Private nurseries contributed plant exhibits to start the building's new career in the park system.

Today it lives a rich and bountiful life.

The lush blossoms and sometimes exotic birds that call this huge redwood lattice structure home inspire its visitors to visions limited only by imagination. Could it be they're walking through a South American orchid jungle, or perhaps a tropical island somewhere in the Pacific?

The garden has been undergoing an internal facelifting since 1957 and the last of the old displays was removed last week.

Ken Everett, a gardener, spent the morning with a pick and shovel, unearthing a giant bird of paradise. It stood more than 40 feet high. "We're getting rid of it because it's too common in the park," he said. "We like to reserve the space inside for plants and flowers that can't make it out there."

Many of the plants and flowers can't make it "out there" because park visitors won't let them. "If something is planted that's out of the ordinary and quite beautiful, people seem to want to take it and plant it in their gardens," Kempland said.

Recently there was a theft in the park's greenhouse where plants are nurtured until they are mature enough to be planted outside. Park officials wouldn't say exactly how much of a loss they took except that it was "substantial."

The lath house, as it is sometimes referred to, is not an established botanical garden. "It would be impossible for us to label all of the plants and besides we don't have a large enough variety," said Kempland. But he admitted that the largest problem standing in their way is that the garden is "too open to the public." Plantnappers have a way of visiting the garden more often than park officials would like.

One of the most beautiful displays designed especially for the semi-indoor garden are huge cascading plant chandeliers. Several hang near the entrances holding more than 18 plants each.

But the plant that remains most popular with the thousands of schoolchildren that visit the garden as class excursions is the "sensitive plant," known to botanists as *mimosa pudica*. One touch and the plant closes up entirely. "There's no doubt about that being the most popular plant we have growing here --- at least with the little kids," Everett said.

The most unpopular item that thrives in the garden --- at least with the gardeners and maintenance men --- is the pigeon. "The mess they make is unbelievable," Everett said. "But I guess they have a right to live here too."

When Everett is not working in his huge Balboa Park greenhouse, he's at home working in the one there. "Gardening is my whole life," he said. "I wouldn't give up this job for any other job in the whole world."

Everett encourages visitors to see as much as possible during their visit --- "but please don't touch."

February 5, 1976, (San Diego) Evening Tribune, A-16. Rent hikes okayed by Council.

The sharpest increase is for the Balboa Park Club's conference building auditorium. The rent for that building will jump from \$50 a day to \$400.

February 7, 1976, San Diego Union, B-10. Letter, Robert Mosher, expressing hope City Manager will correct the problem so Yamada can serve on Park & Recreation Board.

February 8, 1976, San Diego Union, A-24. Fifty-year old fig tree north of Natural History Museum holds rose garden at bay.

February 8, 1976, San Diego Union, A-24. Hotel occupancy up; tourism indications show gain in December.

February 8, 1976, San Diego Union, B-7. \$6.5 million urged for county parks.

February 8, 1976, San Diego Union, E-8. Lowell Davies says "professionalism" of Old Globe Theater in Balboa Park should be limited; resigns as president of the board of directors, by Welton Jones.

"The Globe has a million-dollar plant with two theaters, a very fine small staff and no debts," Davies said. "But there are hallucinations that disturb me."

"One-half of the board is in favor of building a third theater and one-half is against this. My own philosophy would be to take \$500,000 and rebuild the inside of the theater we have, but I don't think that's what they will do."

The new president of the board, Richard Adams, inherits an operation in the pink of health, playing more than 600 performances of 14 productions each year in two theaters with a budget just under \$1 million and an attendance for all performances of just over 98 percent.

But Adams also must deal with the problems of success --- that fact that no additional playing dates or seating capacities is available while inflation continues to push costs upward, the increasing demands of the Globe's unpaid winter-season actors that they be cut in on the take, the need to grow or risk slipping backward.

February 10, 1976, (San Diego) Evening Tribune, B-4. City moves to put El Prado on U.S. Register of Historic Places.

February 12, 1976, San Diego Union, D-8. Public Facilities & Recreation Committee has recommended inclusion of El Prado on National Register of Historic Places.

February 16, 1976, San Diego Union, B-3. Commemorative flagpole dedicated at north entrance of Reuben H. Fleet Space Theater; project of California Federation of Women's Clubs.

February 18, 1976, (San Diego) Evening Tribune, E-1. City okays historic site plan.

February 20, 1976, (San Diego) Evening Tribune, B-1. Florida Canyon, five years after approval botanical garden progresses, by Helen Witham.

In mid-September the city engaged the firm of Steve Halsey Associates, landscape architects, to develop preliminary master plan for the entire canyon area. While plans are not yet firmed nor formally adopted, I can say that the general outline is to preserve the remaining natural vegetation on the east slopes of Florida Canyon and to continue using it as an educational resource, adding a series of special gardens and collections on the east slope.

An example of such a special collection would be a manzanita garden, with 25 or more kinds on display. Such a garden would not only show off manzanitas in variety, but would show which kinds will thrive here under cultivation.

Another special planting may be a "city lot" demonstrating the use of native plant materials in intimate surroundings. This could well be a "lazy man's garden: with no lawns to mow nor hedges to trim --- must a sprinkler to turn on now and then.

Yet another demonstration might be a steep canyon lot where problems of access, erosion, water penetration and the possibility of fire have been considered.

In the last few years there as been a surge of interest in the use of native plants in landscaping, but most people need to be introduced to the plants themselves.

February 20, 1976, (San Diego) Evening Tribune, B-7. Commentary: Nothing sacred about old buildings, by Richard W. Amero.

Balboa Park does not need a listing of poorly-designed temporary buildings in the National Register.

The park does need a reaffirmation of the resolution passed by the California State Legislature of 1870-71 which declared "These lands are to be held in trust forever . . . for the purpose of a free and public park . . . and for no other or different purpose."

February 20, 1976, (San Diego) Evening Tribune, B-7. Commentary: Unique structures must be protected, by Bea Evenson.

Big cities just grow, but great cities develop from well-tended roots. San Diego is fortunate in possessing these historic roots, for which we should be most grateful. The 1915 buildings in Balboa Park symbolize these roots.

For these reasons the Committee of 100, with the help of the people of San Diego and its representatives, intends to move ahead with the preservation of the remaining Spanish-Colonial buildings in Balboa Park. The National Register of Historic Places is a necessary step toward this objective.

The City Council has been told that inclusion into the register will not result in federal control over city action relative to El Prado structures although special restrictions could be tied to particular grants by the federal government.

February 20, 1976, (San Diego) Evening Tribune, B-6. EDITORIAL: El Prado Worth Preservation.

True, the 1915 exposition buildings in Balboa Park were intended to be temporary. Their charm, however, has become virtually a trademark of San Diego. Inclusion in the historic registry can both assure the preservation of their unusual character and facilitate obtaining the resources needed to restore them and make them more useful.

February 20, 1976, San Diego Union, E-1. Thursday Club donates 36 flowering trees to park; planted around archery field and casting pond in Morley Field area.

February 22, 1976, San Diego Union, B-9. City Council has abandoned plans for a restroom at Mission Hill's Pioneer Park.

February 26, 1976, San Diego Union, E-1, E-2. History of Maya castings in Museum of Man, by Beth Mohr.

The Maya exhibit at the Museum of Man is of imposing size, inviting visitors to walk through and sense something of the grandeur of the ancient civilization it represents.

"This is the third time the exhibit has been placed," Ms. Donna De Kindig said. "During World War II, the museum became part of the Naval Hospital and all exhibits were removed.

"The large Maya castings had to be cut in half to be stored. After the war, they were brought out, put together and displayed again until about 12 years ago, when a false wall was put up blocking them from view."

"The false wall made it possible to change exhibits. Taking it down has changed the whole exhibit area."

Work on the current exhibit began in September, with research by Mary Dawe providing information of illustrated plaques, a mural and dioramas designed and executed by Ms. Jeri Corbin and Ms. Donna De Kindig to show discoveries and surmises reached by archaeologists.

March 1, 1976, San Diego Union, B-6. Letter from Inga Ball: Restrooms needed at Pioneer Park.

March 4, 1976, San Diego Union, B-10. Letter from L. Harris: Imitations are imitations, they do not belong on National Register.

If Richard W. Amero is correct (Feb. 20) I would expect the Committee of 100 someday to begin clamoring for the preservation of the Matterhorn at Disneyland --- temporary and false as it is --- as "it will be a beautiful expression of our heritage and architecturally and culturally significant."

March 6, 1976, San Diego Union, B-2. Historic Site Board wants to inspect premises before tenants of Ford Building make alterations; Owen Clarke, director of the Aero-Space Museum, proposes elimination of skylights and mural depicting neighborhood scenes in the rotunda near the entrance..

March 7, 1976, San Diego Union, A-19. Dedication of permanent international flag display in front of Aero-Space Museum set for Sunday; flags provided by Soroptimist International; foreign flags to be added later (photo).

March 7, 1976, San Diego Union, A-19. Lake Murray and Lake Miramar should be developed into miniature parks, by Otto Bos.

March 7, 1976, San Diego Union, B-3. \$16 million earmarked for 6-year land acquisition of North County parks.

March 8, 1976, San Diego Union, B-3. Flag display dedicated.

March 9, 1976, San Diego Union, B-3. Sixty persons appeared before Public Facilities & Recreation Committee in support of retaining mural on water tank in Pepper Grove area, Balboa Park.

March 12, 1976, (San Diego) Evening Tribune, B-15. Those who oppose murals are entitled to a hearing before a City Council committee as scheduled next Monday..

March 13, 1976, (San Diego) Evening Tribune, C-2. Letter from L. Reese: Divide Water Tank into two areas and allow other artists to paint other portions.

March 15, 1976, (San Diego) Evening Tribune, B-1. Train lights at Wild Animal Park don't seem to disturb animals, by Neil Morgan.

March 16, 1976, (San Diego) Evening Tribune, B-1. Council sends mural dispute to Park Board.

March 16, 1976, San Diego Union, B-1. Chicano paintings can stay for now; City Council Public Facilities and Recreation Committee refused to take a stand, by Harry Fuentes.

March 16, 1976, San Diego Union, B-3. Exclusion of some graded hillsides from tougher development controls could lead to severe cutting or scarring of canyon sites.

March 16, 1976, San Diego Union, B-3. Nominations for Park & Recreation Board and Planning Commission.

March 18, 1976, (San Diego) Evening Tribune, B-2. Letter from V. M. Carpentier in favor of murals; says "there is little enough beauty in the world now."

March 18, 1976, (San Diego) Evening Tribune, B-7. Group picnic area with facilities for up to 150 persons planned for Morley Field; part of \$280,000 budget, three parking lots with a total of 119 spaces, an archery building and playground equipment also included in project.

March 18, 1976, San Diego Union, E-4. White deer monument picked for Presidio Park.

March 19, 1976, (San Diego) Evening Tribune, F-4. Marriotts America Park hangs smile on our yesterdays.

March 22, 1976, San Diego Union. Letter from Alberta Vigil: Bill Barry, Chicano critic called rude.

March 22, 1976, San Diego Union, B-5. City law forbids solicitation in Balboa Park, by Carl Ritter.

The jugglers, magicians, musicians and other entertainers who perform outdoors on weekends at Balboa Park said yesterday they are worried about whether they can continue accepting donations.

March 23, 1976, (San Diego) Evening Tribune. Letter from Seamus O'Hara: Let us eliminate this blemish from the park.

March 23, 1976, (San Diego) Evening Tribune. Letter from Wendy Pennington: "Why do so many grownups try to ruin everything that is pretty?"

March 23, 1976, (San Diego) Evening Tribune, B-3. Policy permits park players so long as they have a permit and cool it a bit on how aggressively they look for donations, by William Osborne (photo).

March 24, 1976, (San Diego) Evening Tribune, B-2. EDITORIAL: Park Entertainers --- minimum regulation is necessary,.

March 25, 1976, B-6. Letters on Chicano art from Lynn E. Hicks (critical), Steven B. Chessser (critical), David Burgess (critical)..

March 30, 1976 and March 31, 1976, (San Diego) Evening Tribune. Letters on Chicano art from Andrea Ylarra Moreno (favorable), Richard W. Amero (critical), and Marjorie E. Dysinger (in between)..

March 31, 1976, (San Diego) Evening Tribune, B-3. Letter from Ruth Jones: Dogs in Pioneer Park created a bad condition for joggers, barefoot people and children.

March 31, 1976, (San Diego) Evening Tribune. Letter from Marc Wenzel claiming street theater is entertaining, no cover, no minimum

April, 1976, Citizens Coordinate for Century-3: How do you feel about preserving and reconstructing the buildings in Balboa Park?

April 1, 1976, San Diego Union, B-1. Work bids sought to spruce up Balboa Park, casting pool areas and Art Pratt Memorial Foundation play area for the handicapped; estimated cost \$99,500.

April 6, 1976, (San Diego) Evening Tribune, B-2. Letter on Chicano art from Joleen K. McPherson (favorable)..

April 6, 1976, San Diego Union, B-1. Public Facilities & Recreation Committee approved a plan to acquire open space by declaring City of San Diego a municipal park district.

April 9, 1976, (San Diego) Evening Tribune, B-3. Letter on Chicano art from Lee Oliverio (favorable)..

April 9, 1975, San Diego Union, B-8. Cattlemen oppose a hiking and riding trail through public and private land in the back country.

April 11, 1976, San Diego Union, E-1. Recent weekend "misunderstanding" calls for clearer law; city fathers harbor no malice for park minstrels, by Welton Jones.

April 13, 1976, San Diego Union, B-3. McManis Associates of San Francisco said thirty two advisory community planning groups should be abolished; Council Committee on Rules, Legislation and Inter-Governmental Affairs opposed.

April 13, 1976, San Diego Union, B-6. EDITORIAL: Thwarting vote rule; park plans take old path; designating entire city a park district would make it possible to win endorsement of bond issues with a simple majority . . . The city park program ought to be carried out, to be sure, but this does not mean the city ought to pursue it by yet another surrender to the questionable principle that the end justifies the means..

April 16, 1976, (San Diego) Evening Tribune, B-3. Letter on Chicano art from Humanities Class, Hilltop High School (favorable).

April 17, 1976. Letter from Virginia M. Grizzle scoring park district plan.

April 19, 1976, Vos Fronteriza. Central Cultural de la Raza murals challenged, by Jorge Huerta.

Whatever the outcome of this issue is, the important point is that the Chicano community rose up in unison against any attack upon its culture, its artists and its people.

April 21, 1976, (San Diego) Evening Tribune, B-1. Park & Recreation Board voted unanimously to allow Chicano murals to remain on water tank.

April 21, 1976, San Diego Union, B-3. Park & Recreation Board Okays disputed murals.

April 28, 1976, San Diego Union, B-1. Port Commissioners rejected plan to move the Aero-Space Museum from Electric Building in Balboa Park to the B-Street pier.

April 29, 1976, San Diego Union, B-1. The City Council approved an agreement with the San Diego Historical Society to turn the Marston house into a historical museum.

May 2, 1976, San Diego Union, B-3. Forty two arrested at Balboa Park Bowl in rock fete brawl.

May 6, 1976, San Diego Union, B-3. City Council approved creation of a citywide park district; Council can move to put a bond measure on the November 1976 ballot once the district's creation is completed.

May 7, 1976, San Diego Union, B-3. City Council urged yesterday to allow Chicano mural to remain.

May 11, 1976, San Diego Union, B-3. Public Facilities & Recreation Committee backs restroom at Pioneer Park.

May 13, 1976, San Diego Union, B-3. The San Diego region can expect \$4 million for urban parks over a three-year period under a measure signed into law by Governor Brown.

May 17, 1976, San Diego Union, B-1. Park Board to study Florida Canyon plan by consultant Steve Halsey Tuesday.

May 18, 1976, Park & Recreation Board. D. Facilities Committee Report. 2.) House of Hospitality: Arcade-Tree Conflict. The problem of the trees crowding the arcade at the northwest corner of the House of Hospitality was re-evaluated by the Committee in April. Mr. Roberts noted a conflict between the Balboa Park Committee's position (remove the trees) and the Facilities Committee's recommendation (remove the structure). . . . Mr. Milch read into the record a letter from the Committee of 100 urging removal of the tree and retention of the structure. . . . The Development Division Superintendent will take the matter back to the Balboa Park and Facilities Committees in June, 1976.

May 18, 1976. Park & Recreation Board. Facilities Committee Report on arcade-tree conflict at House of Hospitality.

May 19, 1976, San Diego Union, B-3. The concept of a plan to develop 150-acre Florida Canyon in Balboa Park as a natural botanic preserve was unanimously endorsed by the city Park and Recreation Board yesterday.

The plan, which also has received endorsements from the Balboa Park Committee and from the Facilities Committee, includes the development of compatible recreational uses in the canyon and a demonstration area for representative California plants.

The landscape and architectural plan for the canyon, drawn up by Steven Halsey Associates, includes hiking and bicycle paths, parking and rest room facilities with retention of the feeling of a natural canyon, Halsey said.

Phase 1 of the development plan calls for remedial grading, re-vegetation and the treatment of offsite drainage problems. Phase II includes the closing of Florida Canyon Drive and the

establishment of pedestrian circulation routes. Phases III includes development of the demonstration garden, an elevated crossing to Zoo Place and the building of rest rooms, view areas, picnic areas and parking facilities.

Dave Roberts of the Park and Recreation Department said \$65,000 to \$90,000 is available from the 1966 bond issue for some restoration of the area.

May 23, 1976, San Diego Union, A-8. It will take \$6,785,000 and 600 trees to create Constitution Gardens between Lincoln Memorial and Washington Monument in Washington, D.C., by Mike Feinsilber.

May 27, 1976, San Diego Union, C-6. Park & Recreation Board and Police Department agreed to halt rock concerts in Balboa Park Bowl until next January; complaints about vulgar language, marijuana smoking, and the drinking of alcoholic beverages.

June 4, 1976, San Diego Union, B-4. Board of Supervisors recommended that city and county consider abandoning establishment of Los Penasquitos Regional Park.

June 6, 1976, San Diego Union, B-11. Skateboarders want to convert an old reservoir on Torrey Pines golf course for their use.

June 8, 1976, San Diego Union, B-4. Public Facilities & Recreation Committee voted to allow Chicano mural to remain.

June 13, 1976, San Diego Union, C-1. Letter from Ann B. Foerson expressing sympathy with picketing policemen for fairer wages in Balboa Park.

June 15, 1976, Park & Recreation Board, Park Director's Report. 8a.) Balboa Park Improvements: On March 12, 1976, Council awarded a contract for subject improvements in the Organ Pavilion, Gold Gulch, Casting Pool areas and Art Pratt Memorial Foundation Handicapped Play Area for the sum of \$76,555. The accepted bid if five percent below the estimate of \$80,600.

June 22, 1976, San Diego Union, B-9. Program sponsored by San Diego Inter-Church Council at Organ Pavilion July 4.

June 30, 1976, San Diego Union, B-3. Spanish Landing Bay Park completed.

July 1, 1976, San Diego Union, B-2. Smithsonian opens Air, Space Museum, by Al Rossiter, Jr.

July 8, 1976, San Diego Union, B-6. United States losing enthusiasm for future, by Nicholas Von Hoffman.

July 19, 1976, San Diego Union, B-1. Ninety arrested in concert at Balboa Park Stadium; three policemen injured at rock music event attended by 35,000.

July 20, 1976, Park & Recreation Board. A.) Balboa Park Committee Report: 1. Space Theater Banners. Mrs. Dickinson reported that staff explained the criteria for granting permission to utilize the banners. The three primary considerations were: (1) Board Policy No. 1102 authorizes temporary signs to advertise current attractions. (2) The banners are professionally done and pleasing to the eye. (3) The entertainment/educational function of the Space Theater and Hall of Science requires some type of identification by its very nature. The banners do this in a manner more compatible with Balboa Park than traditional marquees. Discussion among committee members was generally favorable with some concern expressed that this precedent would allow additional banners in Balboa and other parks. No action was taken by the committee. . . . MOTION: After much discussion, Mr. Leyton moved that staff advise the Space Theater that their banners are not within the Board's recognition of a temporary sign and should be removed. Mr. Sadler seconded the motion which carried with Mrs. Dickinson voting negatively and Mr. Jensen abstaining.

2. Master Plan Review Sub-committee: Mrs. Dickinson reported that subject sub-committee will meet on July 28, 1976, at 12:30 p.m. in the senior citizen lounge of the Casa del Prado to complete the master plan. Mrs. Dickinson requested that a workshop of the Board be scheduled in the near future. Mr. Milch noted that, perhaps, September or October would be appropriate.

3. Chicano Tank: Mrs. Dickinson reported that the Bicentennial colors have been removed from the Tank and replaced by what appears to be a replica of South and Central America on the pot or bag being held by the skeletal figure.

July 25, 1976, San Diego Union. Mammoth new park plan centered on Cowles Mountain, by Otto Bos.

July 25, 1976, San Diego Union, E-10. Homer Delawie at Citizens Coordinate for Century 3 conference on Balboa Park discusses design plan to reorganize parking facilities and landscaping in center of Balboa Park, by Jennifer Williamson.

July 29, 1976, San Diego Union, B-10. EDITORIAL: Lake Murray-Cowles-Fortuna Park fills city's need.

Announcement from Mobil Oil, Los Angeles Times: The Bard is back: Shakespeare plays in Los Angeles Parks.

August 8, 1976, San Diego Union, B-1. Balboa Park master plan review committee urges revised routes in park.

The Balboa Park Master Plan Review Committee says traffic patterns in the 1,600 park domain [sic] must be altered to ease congestion and traffic problems.

Among the recommendations were:

- Linking Quince and Richmond streets across the Cabrillo Freeway to provide a through route for cars between Hillcrest and upper downtown areas. There only would be a northbound ramp from the freeway.
- Pershing Drive would be improved with an interchange at 28th Street and be realigned to funnel traffic into Redwood and 28th streets. The area now linking Pershing Drive to Upas Street in the extreme northeast portion of the park would be utilized for Morley Field park facilities.
- Florida Drive would be closed from Zoo Drive to Morley Field Drive, cutting it off as a road running a complete north-south route through the park. The plan is in conjunction of a botanical garden in Florida Canyon.
- El Prado would be closed to automobile traffic permanently with traffic at the east end of Cabrillo Bridge (Laurel Street extension) diverted on to a southern peripheral road leading to the Organ Pavilion and Palisades area of the park.

The southern road was at one time in the park's master plan, but was deleted by the City Council in a last-minute decision.

If the road were built, the Plaza de Panama, now utilized for parking and to divert cars over to the Organ Pavilion area, could be used as a promenade.

August 8, 1976, San Diego Union, B-1, B-8. Citizens' panel asks cut in auto traffic; opposes construction, by Otto Bos.

Balboa Park, 1868: "Men and women of great vision set aside enough land to withstand a century of encroachment by those of lesser vision."

Balboa Park, 1976: "Green living plants, open space and a relief from the urban pressures of noise, pollution, concrete and steel."

Balboa Park, The Future: A “master plan intended to preserve and maintain (a park) of even greater beauty and service.”

Thus has a nine-member citizens’ committee concluded that the future of Balboa Park should remain people-oriented and not fall victim to the automobile.

“The issues in 1976 seem clear,” the report points out, “ . . . Increased construction and paving theoretically could kill that which nourishes it (the park) and cause the boundary between park and city to disappear.”

“The same principle holds with roads and paving,” the report continues. “Up to a point, ease of access for the motoring public adds to park enjoyment but at some point the destruction of the park experience begins.”

To that end the committee recommended the city try anew to develop a special transportation system within the park.

It also urged that traffic be rerouted around El Prado, the cultural center of the park, to attempt to restore it to the pedestrian ways of the 1915 Panama-California Exposition.

And, the panel hinted the City Council ought to reverse its course on allowing construction of a new theater in a small canyon near the Old Globe theater as incompatible with park goals.

“Present plans for a third theater seem incompatible with goals to ease crowding in the area and preserve existing open space,” said the committee report, which will be aired before the city Park and Recreation Board on August 17.

The panel recommended the council set a time limit within the so-called Third Theater be built or be abandoned.

The committee, chaired by long-time attorney Jefferson K. Stickney, Jr. and retired newspaper editor Larry Sisk, deliberated on updating the master plan since May of last year.

Stickney said the committee was particularly interested in rerouting traffic away from El Prado promenade (currently pedestrian on a temporary basis) and Plaza de Panama, utilized as a parking lot.

“We must reduce the volume of automobile traffic in the park, particularly the center,” Stickney said. “It is absolutely essential.”

To achieve the pedestrian cultural core and bypass the Plaza de Panama, the committee recommended that the City Council revive construction of a peripheral road to connect Cabrillo Bridge (Laurel Street extension) directly with the Organ Pavilion area.

Also, among the major traffic circulation recommendations, the committee said Quince and Richmond streets ought to be linked across the Cabrillo Freeway (State Highway 163) to create a through route in the northwest sector of the park.

As called for in the 1960 Bartholomew Plan, named for the consultant that drafted it at \$50,000, the current road through Florida Canyon would be sealed north of Zoo Drive to go with creation of a botanical garden there.

Pershing Drive, with a suggested overhaul of the difficult 26th Street intersection near the park’s golf course, should be routed into Redwood and 28th streets, said the committee.

This would eliminate the present link to Upas Street and clear the way for expansion of Morley Field's recreation facilities in the northeast corner of the park.

No more parking spaces should be permitted in the park, the committee said, with the current total having exceeded the Bartholomew plan by 2,000 spaces.

Sisk said the committee found that overall the Bartholomew Plan has served San Diego well, considering 35 percent growth in population in the past 16 years.

The master plan required a review within 15 years and was undertaken after the City Council gave in concept approval to construction of a new theater near the Old Globe Theater if traffic and congestion problems were solved.

Sisk said the committee established by the Balboa Park subcommittee of the Park and Recreation Board met continuously since May 1975, to reach its conclusions.

"Basically, we found the plan itself remains viable," Sisk said. "What we've attempted to do is bring it up to date."

But the committee also gave warning that while Balboa Park has absorbed population growth well to date, that someday it may run out of room.

"The situation for Balboa Park is no different from the national parks," the committee concluded. "When parks hold their maximum capacity, there is no room for more."

The committee looked at every aspect of Balboa Park but focused on resolving traffic problems by seeking to reduce it near and around major activity centers.

"The park is for people and not automobiles," said Sisk.

Stickney said despite the failure of a previous try for a park shuttle system, city resources should be utilized for a new try.

"We feel there ought to be an intra-park system with some kind of attractive vehicles to move people about," he said.

The committee generally backed the Bartholomew plans for removing the 1935-built temporary structures still standing in the Palisades area at the south end of the park.

But it urged a go-slow method until replacement facilities can be found for such buildings as the Municipal Gymnasium.

But September 1, when a two-year drive to convert it into an airplane museum is supposed to end, should mark the near end for the Ford Building, the committee said. Voters rejected funds to restore it. Plans are to make the site a grassy area overlooking the park and city.

The committee also took notice of reports that the Navy may relocate its hospital, located at the southeast corner of the park. Only the permanent building should be retained for recreation usage, if that comes true, the panel said.

It also was noted that the 1960 master plan suggested that the California State Building --- housing the Museum of Man --- be developed as a theater complex but that the Old Globe management, which is advocating the Third Theater, had not expressed interest in utilizing the building.

The Museum of Man would be relocated in the Electric Building on the southside of the Prado mall, which also is in need of reconstruction.

Within the Prado area, besides the Electric Building, it was recommended that the Administration Building, adjacent to the Museum of Man, be razed, primarily for safety reasons.

The recommendation was made that a glass house for tropical plants be constructed at the northside patio of the Casa del Prado. A formal garden, north of the Natural History Museum, should be converted into lawn to protect the huge roots of a giant Moreton Bay fig tree there, the panel concluded.

The committee recommended that the San Diego Art Institute be moved from the Prado area to the Spanish Village, near the Zoo, and suggested an additional "case" be built for relief from the vast expanse of paving.

The House of Charm will require reconstruction, the committee said. One alternative raised was to save the building's facade and arches to enhance an enlarged Alcazar Garden.

The recommendation was made that the old Photo Arts Building be added to the House of Pacific Relations, near the Ford Building. It was suggested that the United Nations Association be moved out of the park because its "political nature" was not found to be compatible with that of the different national clubs making their homes there.

The old Conference Building and Balboa Park Club have aged well, but city administration is improper use for them, the committee said.

The 14-acre site near the Naval Hospital, used by the city for a vehicle storage yard, should be restored to park use, the committee said.

In the future, it was suggested that no more private leases be given for park areas. As the public need arises, the committee added, consideration should be given to canceling the present leases for park lands enjoyed by various private non-profit community groups.

Stickney said now that the committee has finished its task, he hopes the public discussion will be stimulated. "We want to know what the people think," he said.

August 8, 1976, San Diego Union, B-8. Nine-member committee which reviewed Balboa Park's master plan favors Ford Building removal.

Say goodbye to the Ford Building but hello to Balboa Park rangers if a citizens' committee has its way. The nine-member committee which reviewed Balboa Park's master plan after 16 years of wear has concluded that what the park needs is fewer cars and more feet.

The resulting traffic reshuffling recommended by the committee is sure to draw fire, committee leaders Larry Sisk and Jefferson Stickney, Jr. agreed.

But more controversy may be in store due to the long list of recommendations the committee is expected to detail before the city's Park and Recreation Board later this month.

The panel concluded, for instance, that preservation of the 41-year-old Ford Building at the south side of the park has been studied to its culmination.

If there is no commitment to refurbish the oval building within the next few months, it ought to be removed, the committee decided.

The idea of park rangers – on the model of lifeguards --- was generated due to an increase in annoying small crime in the park.

An accounting of the theft, vandalism and other mischief would show a greater cost than a minimal crew of park rangers on patrol according to the committee.

The committee also suggested the City Council back off from its endorsement of a third theater near the Old Globe Theater complex by saying construction would be “incompatible” with the park goals of easing congestion and preserving open space.

Panelists also wondered why the Old Globe had not responded to the suggestion that the nearby California State Building be converted into a theater complex as called for in the master plan.

It also recommended that the United Nations Association be removed from the House of Pacific Relations, a near neighbor of the Ford Building.

The reasoning was that the U. N. group’s “political nature” is incompatible with the various cultural organizations house in the building.

What does belong in Balboa Park and currently lacking is a museum about itself, the 100-year history and stories about the 1915 and 1935 world expositions.

The suggestion was made that such a museum be launched in a lounge of the Casa del Prado, with an appropriate civic sponsor.

Some of the gardens in the park need improvement, the committee observed, and a huge Moreton Bay fig tree located north of the Natural History Museum would be better protected by removal of a garden over its roots.

Excellent progress has been made in the park with regards to pedestrian and bike paths, but something must be done to confine skateboard enthusiasts to athletic areas, the committee found.

City administrators should be removed from the Balboa Park Club and Conference Building because they don’t belong there, the committee said.

The Municipal Gymnasium adjoining in the park’s Palisade’s area, built for the 1935 exposition, ought to remain where it is until a new facility can be built at Morley Field, home of most sporting activity under the master plan.

The House of Charm must be rebuilt or removed due to deterioration. The committee said the site could be cleared and the building’s facade and arches left behind to enhance an enlarged Alcazar Garden.

The Administration Building in the Prado area must be torn down, while the nearby Electric Building is in bad need of repair, the committee reported.

On the north side of the Casa del Prado might be the ideal site for a glasshouse to exhibit tropical plants.

The Balboa Park Master Plan Review Committee was established in May 1975 by the Balboa Park Committee of the city’s Park and Recreation Board.

Besides Stickney and Sisk, members were:

Alice Stephenson, Dr. Bob O’Brien, Al Vallin, Henry Gardiner, Harry Haelsig, Richard Bowen and Frances Morton.

August 11, 1976, (San Diego) Evening Tribune, E-1. Austin Nichols & Company, distributors of Wild Turkey bourbon, used planetarium at Space Theater to launch 1976-77 sales; rental for the theater was \$500 per day, by Donald Coleman.

August 13, 1976, (San Diego) Evening Tribune, E-1, E-10. Desert garden started after 50-year wait.

Cactus, aloe, agave and other succulents --- those seemingly indestructible plants that thrive in the most arid and least hospitable of areas --- have been seeking a home in Balboa Park for 50 years.

Now, after years of disappointment and false starts, work is under way to develop a 2.5-acre wedged parcel west of Florida Canyon into an official Desert Garden.

The unusual garden, a longtime goal of the San Diego Cactus and Succulent Society, is expected to be far into its first-development phase by the end of the year.

Succulent gardens aren't new to San Diego's massive urban park --- but neither have they been successful in terms of longevity.

"As close as we can figure, there have been succulent gardens in at least four different places in Balboa Park since 1916," said Roger De Weese, a Sorrento Valley-based landscape architect who has worked with the local society on the creation of a new garden.

"Why didn't the garden last? That's an interesting question --- probably because succulent gardens didn't carry too much social weight," he said.

There is some feeling that a small succulent garden existed somewhere within the Balboa Park area during the years of initial development.

There is no more mention of such a botanical reserve until 1935 when succulent enthusiasts, led by Kate O. Sessions, established separate cactus and aloe-agave gardens with an eye to the upcoming California-Pacific International Exposition.

California Garden, the monthly San Diego Floral Association magazine, was filled with status reports and appeals for succulent and cactus donations early in 1935.

Chauncey Irgens Jerabek, one of the community's most ardent succulent enthusiasts, detailed even the most modest contribution to the park's two new gardens and challenged individuals and groups to better previous donations.

The aloe and agave garden, a collection of tropical and exotic succulents, was apparently located in the vicinity of Park Boulevard to the left of the Canadian Legion Building and near the terminus of the streetcar tracks.

The cactus garden was apparently established behind what is now the Balboa Park Club --- a good location for succulents but one with virtually no foot traffic and hence little community use.

The Huntington Botanic Gardens, at the famed Huntington Library in San Marino, donated a number of hybrid aloes to the aloe and agave garden.

The Cactus Exchange of Southern California did its part for the fledgling cactus garden, as did Cactus Acres of El Paso, Texas, the Oklahoma Cactus and Succulent Society, Border Cactus Nursery of Nogales, Arizona, and the Desert Nursery of Palm Springs.

But after the exposition the two succulent gardens apparently fell into disrepair.

"They may well have been casualties of World War II," De Weese said.

In 1965, three decades after the two succulent gardens were established, the San Diego Cactus and Succulent Society again pressed for an official preserve.

It was not until 1972, however, that the present site was selected and another three years were to pass before the city formally designated the site, adjacent to the Rose Garden, as the future home for succulents.

In early 1975, when the City Council approved an agreement with De Weese's firm, the estimated cost of development was \$60,000.

It now seems reasonable to expect first-development phase costs to run around \$103,000 --- and whether there is additional development will depend upon city resources and community interest.

The Desert Garden, as described by De Weese and society members, will be a more ambitious and complex project than the casual observer might believe.

For starters, the wedge of land between Park Boulevard and Zoo Place, needs substantial grading for esthetic and drainage reasons.

The natural configuration of the parcel --- an undeveloped lot which nobody seemed anxious to develop because of its inherent difficulties --- is flat plateau that ends in a steep cliff.

Bulldozers will be used to move 12,000 cubic yards of earth --- turning the plateau into a gentle slope ending in a berm and a simulated dry stream bed.

Some 8,000 cubic yards of earth will be used for expansion of the adjacent Rose Garden.

The immediate frontage of Park Boulevard will be planted in lawns and shade trees, De Weese said.

The Desert Garden has been designed in a linear fashion with bands working east from Park Boulevard.

After the first band of lawn and shade, there will be a transition band of larger, more rugged trees, followed by a low natural fence of adobe brick and huge desert boulders.

A path system will allow traffic flow from Park Boulevard and from the Rose Garden. It is hoped that the path system will ultimately tie in with pathways planned for the Florida Canyon Botanic Preserve to the east --- but that must wait.

Interspersed throughout the garden area will be massive imported boulders. Some will be placed to form stone benches in keeping with the desert-like environment.

Once past the natural fence, the visitor will view the best examples of exotic and not-so-rare succulents that the city nursery has to offer.

Park visitors who define cacti in terms of the tiny, thorny plants they see in nurseries and gift shops, and aloes in terms of the harder-to-find small plants will be surprised at the Desert Garden's variety.

From the city nursery alone, there will be more than 40 succulent specimens, some massive trees with spreads of more than 25 feet.

"What a lot of people don't realize is that succulents aren't just cactus, although cactus is a succulent," De Weese said.

Some of the more dramatic and more mature specimens include a *Dracaena draco* nearly 20 feet. High, *Yucca gloriosa* and a huge *Samulea carnososa* that has grown into a surrealistic upside-down U.

There will be “pencil” trees, gigantic bottle and air palms and *Yucca australis*.

Perry’s Plants of La Puente is donating 20 varieties of succulent ground cover for the Desert Garden.

It is hoped that at some time in the future, eucalyptus trellis will be created to properly display epiphyllum and shade-loving succulents.

As the visitor works his way through the path system to the berm, the landscaping will become more tropical.

A dry pond and stream bed, surrounded by mature palm trees, will be created where the cliff was.

The pond and stream bed will be rocky and with moist sand. De Weese said an effort is being made to find sand that will match the natural color of the soil.

As the visitor continues toward the bottom, chaparral --- a tie-in with the Florida Canyon project --- will predominate.

In a sense, De Weese said, the specimens for the Desert Garden, the vast majority now part of the city nursery, will be free.

They will not be without cost, however, in the sense they will have to be moved and replanted.

The major chunk of the first-development phase expenditures will go for grading and other earth-moving expenses, he said.

Provisions have already been made so that grading for pathways will be gentle enough to accommodate wheelchairs.

The first-development phase will also include drainage and irrigation systems --- but identification signs, educational and scientific displays, a hoped-for small education center and completion of the paths will have to wait for additional funds.

Succulent “purists” may be in for a few surprises, De Weese said.

Among the major specimen groupings, the visitor will find succulents planted in unnatural growth patterns.

“The intention of the display is to show the specimen as they would be found geologically rather than as they would be found geographically,” the landscape architect said.

As envisioned by De Weese and society members, the Desert Garden will be a true passive park --- a nice environment to rest in and enjoy unusual botanical life.

There are no plans for night-lighting.

While plans have been made with the physically handicapped in mind --- for instance there will be no overhangs to hamper the visually handicapped --- it seems unlikely that a “touching” garden can be created.

Security is not considered a major concern --- yet.

The succulents to be planted in the first phase are, for the most part, just too massive to worry about, De Weese said.

As the garden expands and smaller succulents are added, a security system may become necessary, he added.

De Weese and the society members hope the garden will not, like succulent gardens in others parts of the state, be cordoned off by massive chain or concrete fences.

Should extra security become necessary, they would like to see another kind of natural fencing --- dense thorny bushes --- to discourage vandalism.

As the Desert Garden grows in popularity and community use, De Weese and society members expect that contributions of succulents will also increase.

They're looking toward that time and with somewhat mixed emotions.

They are also concerned that the quality of the succulents on display be preserved so that this latest effort to establish a succulent garden prove the best and most lasting.

August 14, 1976, San Diego Union, B-3. Speed, approval urged for 6,700-acre regional park straddling Mission Gorge.

August 15, 1976, San Diego Union, C-2. EDITORIAL: Vote for walk in the park . . . easy access and availability in the park must be maintained.

Few in San Diego would question the premise that Balboa Park is the city's finest asset. Concern and dedication by generations of San Diegans have made the park a showpiece for residents and thousands of tourists each year.

Change, however, is inevitable and recommendations made by the Balboa Park Master Plan Review Committee after its review of the 16-year old Bartholomew plan deserve serious consideration. Of prime importance is a Review Committee conclusion that easy access and availability in the park must be maintained. The Committee points out that the park with its pristine qualities is not an even match with demands of the automobile.

Enhancement of the park's attractions could be assured in the future by eliminating vehicle traffic across the Laurel Street bridge and by prohibiting parking in the Prado area. This is the heart of the park and an area which should have the maximum amount of openness and availability to the visitor.

The loss of parking would be a massive problem, but not an insuperable one. Long-term benefits of this change should be the consideration. The Prado area especially was designed for the 1915 Exposition as the center of park events. It still is the magnet for park visitors and can be given a new degree of beauty by removal of the automobile.

This recommendation obviously will not go over well with many in our automobile-oriented society who believe that no parking space is perfect unless it is at the front door of a destination. Development of the pedestrian plan, however, should prove to this group that getting there --- by walking --- is half the fun.

September 5, 1976, C-2. Letter from Odia Staats protesting unleashed dogs in the Morley Field area.

September 5, 1976, San Diego Union, C-2. Letter from Richard W. Amero tracing history of Ford Building.

The public should be alerted that once again powerful San Diegans are going to force restoration of the Ford Building. If the Ford Motor Company, the federal government, and the voters will not do it, then some other round-about method will be used. Whatever stratagem is employed, it will be the public who will pay.

September 5, 1976, E-1. A blueprint of sorts: musical museums, a game in the park, by Welton Jones.

A recent report by a nine-member citizens' committee on the future of Balboa Park suggested a series of site swaps whereby the Aero-Space Museum would move to the vacant Ford Building, the Museum of Man would follow the Aero-Space Museum in a renovated Electric Building, and the Globe Theater would absorb the present quarters of the Museum of Man instead of having to build a third theater.

Gracious, the mind boggles at such Olympian manipulations. But why stop there? The game of musical museums would only have just begun.

As an economy move, the 15 national cottages of the House of Pacific Relations and the United Nations Association (called in the report inappropriate for the park because of its "political nature") could be transformed into elite parking garages at astronomical monthly rates for the downtown workers whose cars currently clog the park's curbs each weekday. The revenue could be used to buy more chimes.

The displaced foreigners could then sit on the curbs.

El Centro Cultural de la Raza could move from its old water tank across from the Navy Hospital into the Fine Arts Galley, which is the most Spanish-looking building in the park. The Fine Arts Gallery could move to the Federal Building and as many other of the old buildings on the south end of the park as it would care to use, thus putting it near 728 parking spaces instead of its present 78.

The former water tank could be used as indoor housing for the merry-go-round, thus assuring year-round, night and day revenue-producing operations.

As to the Ping-Pong players in the Federal Building, move them into the Recital [sic] Hall and move all those square dancers outdoors onto the concrete of the Spreckels Organ Pavilion, where they could become an instant tourist attraction with their colorful garb and activities.

Everybody being refreshed and exhilarated by all that logic, the next step could be more ambitious.

The space shows could be moved out of the current cramped quarters in the Fleet Space Center Planetarium and into the healthy night air of the Ford Bowl, where REAL stars and planets would replace the phony projects and REAL airplanes could be explored up close as they swoop towards Lindbergh Field.

Into the vacated planetarium quarters, move the youthful Skateboarders who congregate outside. Let them try to bank up THOSE walls. A roller derby franchise might even be available.

Move the Natural History Museum's stuff out into nature, where it belongs, perhaps in the Botanical Building (and scrapping all those difficult-to-maintain growths therein).

The building vacated by the Natural History Museum could be quickly converted into a classic marble train station for an expansion of the current miniature railroad throughout the entire park, thus solving the transportation problems.

Screens could be installed around the fountain at the end of the park's main drag and soap supplied for indigents' cleaning purposes.

The current wide preserves for Boy Scouts and Girl Scouts could be put to better use as courses for off-road vehicles, our most burgeoning sport, while the combined scout forces could be turned loose to pioneer the lands west of Park Boulevard.

When the Navy moves out of Balboa Hospital, Roosevelt Junior High and San Diego High School could move in, thus freeing two relatively operational educational plants for the long-awaited second state college in the area.

Of course, these are just rough plans with many details to work out, but it's this sort of dramatic, unfettered thinking which has characterized city leadership in developing Balboa Park from 1,400 acres in 1868 (when the city's population was only 2,301) to its present 1,158 acres for a population of a million plus.

Back to reality. The citizens' committee really did wonder why the Globe hadn't expanded into the California Building as foreseen by the 1960 Bartholomew Plan, which suggested such an eventual move.

"That recommendation was made in 1960 at our suggestion," a Globe representative said, "but the Museum of Man has never found a place to go, so we haven't pursued the subject.

"They're our neighbors and we get along well."

As for the Museum of Man, General Lowell English, its director, admits that there was talk several years ago about the California Building being less than ideal for anthropological exhibits, but those feelings are now extinct.

"I wouldn't trade this for any building in the city," he says. "We're happy here and we'll be here until we're kicked out."

Which leaves the Aero-Space Museum in the crumbling Electric Building and the almost-as crumbling Ford Building, still unutilized. The Aero-Space's priceless exhibits are threatened by unsuitable environment and the historically (and esthetically) important Electric Building deserves restoration. But no such restoration can commence until the Aero-Space has another home, and the Ford Building, certainly a logical choice, remains unrestored because nobody can devise a plan to finance it.

What all this points to is the need for some organization in the park to continue planning, such as that undertaken (and, actually furthered) by the nine-member committee.

But perhaps the best bodies for such planning points out Globe president Richard Croxton Adams, an interested spectator, would be the museums and cultural groups themselves in cooperation.

"If we were to do that Tinkers-to-Evers-to-Chance thing with the Museum of Man and the Aero-Space Museum, for example," he notes, "we would all still eventually get back to the problem of finding a home for the Aero-Space."

"No organization is an island in Balboa Park. What any do affects all."

September 12, 1976, San Diego Union, B-3. Sue Zalkind, vendor, wins legal skirmish; County Health Department decided to drop a "cease-and-desist" order.

September 12, 1976, San Diego Union, C-2. Letters from J. C. Colburn and A. L. Kulczyk expressing annoyance at collision between band concert in Café del Rey Moro and organ concert.

September 16 1976, San Diego Union, B-10. Letter from J. Spencer Lake urging retention of Ford Building.

Unlike San Diego's Santa Fe Station, the Ford Building in Balboa Park may remain the opportunity that got away, sitting on the brow of the south park slopes, an accident by neglect.

Though childlike in the simplicity of its appearance, the Ford Building is one of the breathtaking enclosed volumes to be seen in San Diego. A vast gallery space literally orbits an open central court and sky-lit roof apertures relieve what could have been a dark uninviting interior. These attributes, sadly, are imprisoned in a badly deteriorated building shell. Few San Diegans have experienced the remarkable gallery within.

San Diego has benefited from an tradition of individual contributions to the community, which, partly by accident, partly by design, have resulted in the popular in-door, out-door life style which characterizes our city.

Hopefully, San Diego's heritage of individual and community concern for its past will find the means to return this fine old space in the park which commemorates the old and the new so very well.

September 23, 1976, READER. An engineering report finds Ford Building is a "fire hazard," but basically a "sound building"; nevertheless, "it might be cheaper to get a new building," by Matthew Alice.

September 23, 1976, San Diego Union, B-1. Parking plans urged to handle bigger Zoo crowds.

The San Diego Zoo is rapidly approaching the point where major changes will have to be made if it is to handle a continuing increase in visitors, the president of the Zoological Society of San Diego said yesterday.

Addressing the 59th annual meeting of the society, President Ivor de Kirby said changes are particularly needed in Zoo parking "Where the real crunch occurs."

"At present the space limitations of our parking lot place an artificial ceiling on Zoo attendance on our peak days," de Kirby said. "In past years, it was usually the case that the Zoo's parking lot filled up by mid-afternoon. In the last year it has been filled by noon or before on our busiest days."

De Kirby said that because of parking problems the Zoo has reached an attendance limit on Sundays and holidays of 20,000 persons. He suggested developing programs to build attendance on weekdays "when visitors are fewer and parking is more readily available."

"We have made efforts to make more efficient use of the limited parking available by expanding our group and tour business, which now counts for over 20 percent of our total Zoo patronage," de Kirby said.

He commented that the present lot was complete in 1967 at a cost of \$405,000 and that \$13,000 is budgeted annually to maintain it.

"Expenditures to date show our willingness to share our portion of the burden that faces Balboa Park in planning for future growth," de Kirby said. "The question of whether all available parking west of Park Boulevard is being used to maximum potential for all activities in Balboa Park is one which needs closer examination.

De Kirby also outlined remodeling projects and additions at both the Zoo and the Wild Animal Park over the past year. He said work is expected to begin this fall on a major renovation of the zoo entrance to further accommodate visitors.

He noted numerous rare births at the Zoo and the Park.

In other activities at the annual meeting, the society presented its conservation medal to Dr. Charles R. Schroeder, director emeritus.

Sheldon Campbell, Dr. E. Minton Fetter, Robert J. Sullivan and Milton G. Wegeforth were re-elected to the board of trustees.

October 8, 1976, San Diego Union, B-1, B-5. Sixty-two-year-old Organ Pavilion faces close, by Diane Clark.

From six concerts a week in the beginning, the concerts dwindled to 62 a year and then a couple of years ago to 52 a year.

Park organist Douglas Ian Duncan said he had been told by city Parks and Recreation Department officials in the past 18 months that budget difficulties would require reducing the performances to 24 annually, and eventually phasing them out altogether.

For the first time . . . the concerts will be discontinued in January and February because of a Monday night concert series this summer which used nine of the 52 concert programs.

October 9, 1976, (San Diego) Evening Tribune, C-1. Letter from George R. Burger saying Florida Street should be kept open.

October 10, 1976, San Diego Union, B-2. Hare Krishna soliciting conforms to court order, by Diane Clark.

October 16, 1976, San Diego Union, B-1. Sixty two year old organ concerts face close, by Diane Clark.

October 19, 1976, Park & Recreation Board. F. Appeal: Agoston Haraszthy Memorial; Mr. Leyton reported that at the October 4, 1976 Balboa Park Committee meeting, Mr. Joseph Fedak presented a proposal to establish a memorial to Agoston Haraszthy, a California pioneer, father of the wine industry in California and first Sheriff of San Diego. The memorial would be a plaque installed on a granite block near the Hungarian Cottage at the House of Pacific Relations. The Committee members expressed an opinion that the memorial more properly belongs in Old Town as a tribute to an early San Diegan. The Committee recommended that the installation not be approved for Balboa Park. The Committee further recommended that the Park & Recreation Board establish a Board policy on statuary and plaques in City parks. . . .

MOTION/REFERRAL: Mr. Fedak presented his proposal to the Board. After considerable discussion, Mr. Skill moved to approve the plaque within the courtyard of the Hungarian Cottage, subject to the Facilities Committee's approval of the composition and color of the memorial. Mrs. Henkel seconded the motion, which carried unanimously. Staff will notify Mr. Fedak of the next Facilities Committee meeting. . . .

REFERRAL: Staff will prepare a draft report on statuary and plaques in City parks for the December Balboa Park and Facilities Committee meetings.

October 20, 1976, San Diego Union, B-10. Letters from Ann Roberts Foersom and Robert L. Reyburn urging City to save park organ concerts.

October 20, 1976, San Diego Union, B-11. Letter from Lynn Crakes stating we need more parks.

October 24, 1976, San Diego Union, B-5. New bicycle track at Morley Field attracts racers and riders, by Ernesto Flores.

There were about 30 riders when the race started.

Ten minutes later, there were 15 and in a few more minutes there were only four.

"They are amateurs. They still need lots of practice to attain greater stamina," an unidentified onlooker said.

The riders, in shorts, colorful T-shirts and helmets, were members of the San Diego Bicycle Club who did practice sprints on the new velodrome --- bike racetrack --- on Morley Field.

NOT COMPLETED

The oval-shaped 333-1/3 meter (about 1,100 feet) track is not yet completed, but it has been open to the public for training practice sprints and unofficial contests since June.

“There will be some more improvements, but it will be mostly in the middle of the track, more landscaping and lighting,” said John Butterfield, a biking coach.

The city Parks and Recreation Department built the velodrome on the suggestion of biking enthusiasts who need a place to race, practice, and sharpen their skills.

Construction of the asphalt track began in January this year and when finished it will cost about \$93,000.

DESIGN CONFORMS

Rosane Menconi, an amateur bike sprinter, said the track was designed to conform with specifications set by the Union-Cyclist International, which oversees professional biking worldwide.

“But the track is not only open to racing enthusiasts. It is open to everybody who rides bikes. The only condition is that the riders wear helmets when going around the track,” she said.

The track is the third built in San Diego, and is one of the largest in the country. Sixty years ago, the city built a temporary wooden track at the foot of Broadway, near Lane Field.

WAS ABANDONED

Twenty years later, a permanent track was built behind the swimming pool at Morley Field. This was abandoned after World War II and for the next 25 years biking enthusiasts lobbied for another track.

“This new track is the result of our constant lobbying, and we are happy about it,” said Menconi.

Butterfield said that since the bike-racing season is about to move, most of the organized activities on the track will take place next year.

However, he said, there will be a major racing event on next Sunday, in which most of the top bike riders on the West Coast will participate. He said the race will be sponsored by the Southern California Cyclist Association.

CAN COMPETE

Menconi said she had been an enthusiastic supporter of the track because she would like to see more women participate in bike racing.

“Biking is one athletic activity where a woman can compete with a man in an even keel,” she said.

Menconi, who works as a carpenter with National Steel & Shipbuilding Co., said she also would like to see more men participate in bike racing.

“In this country, bike racing is a relatively new sport. I’d like the word to get around that bike racing is a pretty darn exciting sport,” she said.

CITES PRACTICE

Richard Byrne, 23, who works for a bike shop in El Cajon, said that before the track was built, he used to practice on any type of track.

“No matter what you do, you can never attain great skill on those flat grounds. Now on this track, one can drive for perfection. Right in San Diego, we can train for the Olympics,” he said.

October 30, 1976, San Diego Union, B-4. Comprehensive Planning Organization trims sights on United States funds for local projects, by Carl Ritter.

October 31, 1976, San Diego Union, B-2. Letter from R. Harold Clark who is dismayed that organ might be silenced by lack of interest and funds.

Why not open the organ to members of the American Guild of Organists and local theater organ enthusiasts under Mr. Duncan's supervision?

Would it be possible to charge admission (or perhaps ask for a small donation) for seating in the organ proper?

December 12 1976, San Diego Union, C-8. Balboa Park organ rates a new chance, by James Britton II.

San Diego's super sugar daddy, John D. Spreckels, had a habit of building extraordinary settings for music in San Diego.

His mansion boasted a superior pipe organ, suggesting that he had a taste for more than sugary outpourings of lesser organs. In 1915 he built the Spreckels Theater, which is today by far the best public room for music in town, a miracle of acoustics.

As though to clasp the city in a perpetual embrace, Spreckels built the Organ Pavilion in Balboa Park. If you hate good music, you might see the thing as an octopus, or rather a duo-puss, sprawled out there with a giant head and two long curving arms to strangle you. A music lover should recognize its gesture as kindly intended.

The instrument in the "head" is one of the largest pipe jobs ever exposed to the outdoors, and perhaps the largest still functioning. Baring any organ to the weather is a chancy business, even in San Diego, but this one has a massive iron curtain which is in place except when a concert is under way.

When the iron curtain is visible it is a bland dumb "face: that tends to make the embrace of the arms register cold and repellent, like that of a mechanical monster in a mad movie. Clearly this staring blank could use some imaginative paint --- a mighty work of blazing outdoor art to match the mighty music locked within.

A competition should be held to select a local artist for the iron mural, as an important move to reclaim this singular structure for a more lively future. Otherwise, the structure needs no revision --- for a reason that will appear.

As a terrible warning that autos are becoming more important than humans, the embrace of the big pavilion catches few people these days but acres of asphalt. However, Bea Evenson has been talking to Joe Yamada, the ubiquitous landscape wizard, about replacing the asphalt with grass and ornamental paving within the circle defined by the embracing arms.

And Bea has a record of getting beautification accomplished --- such as the landscaping of Spanish Landing and the concretification of the Casa del Prado (Yes, concrete can be beautiful if paddled with love.)

In one breath today this valiant senior citizen will tell you: (1) she doesn't know how she can last long enough to revive the Organ Pavilion and (2) it must be done.

Bea thinks that areas for picnicking should be included within the magic music circle, but way not add a dozen tables with colorful umbrellas, such as are _____ Café del Rey Moro garden?

Come to think of it, why not invite the café management to provide a chicken-a-go service to these tables in the embrace of the organ? Said management could concoct a suitable mobile unit --- quiet, quaintly designed and filled with munchables, to pass among the tables periodically. A little stretch of the imagination is called for, a little stretch of service. But no hot dogs.

Of course, the presumption is that the noblest music would continue to percolate at suitable hours from the noblest organ, and that the crowds gathered there would be appreciative. In fact, bouncers should be on hand to see that troublemakers are kept out. We are cultivating here a remembrance of things past, things worth an echo in the future.

This project is one more point of entry for leadership from city hall. Full maintenance should be accorded the organ itself as a civic treasure. There should be budget enough to provide nimble fingers and busy feet as required to activate the organ whenever enough people wish to lend their ears.

The grass, the tables, the umbrellas, the catering and perhaps a fence to keep locked at the vandal hours --- all those are obligations upon the city council. But an even higher priority must go to restoring the structure itself, which was not built of sufficiently lasting materials.

Bea Evenson is ready with crafty persons who can recast the ornamentation of this affectionate confection into permanent concrete. Give her your hand, your check-writing hand, or at least urge your councilman to write the necessary checks in your behalf.

There is no point in claiming, in lying, that the Organ Pavilion is great architecture. At the time it was built in 1915, a University of California professor of design, Eugen Neuhaus, wrote: "it is hard to understand the pygmy scale of the colonnades as contrasted with the great bulk of the central part . . . of all the architecture of the Exposition, it is, to my mind, the most uninteresting, most untemperamental creation . . ."

Nevertheless, it stands today as a rare monument to the mix of grandeur and gaucherie that simply had to be present in the adolescence of America. As such, it is San Diego's nearest equivalent to the Statue of Liberty.

To nurse back this warm-hearted, songful, living and breathing monster from our past, to feed it and keep it and return its embrace would be no waste of tax money or transient-occupancy funds (the room tax paid by visitors). The expenditure would enrich San Diego as a place to visit --- and as a place to like.

December 21, 1976, Park & Recreation Board. F. Reports of the Balboa Park Master Plan Review Committee; Due to a possible conflict of interest based upon a prospective contractual agreement regarding the expansion of the Natural History Museum, Mr. Sadler announced that he would abstain from deliberation and voting on the Master Plan Review.

1. Presentation of Plan: Mr. Milch thanked the Ad Hoc Review Committee for the long and hard hours devoted to their report. Mr. Stickney and Mr. Sisk (Co-Chairman of the Committee) noted they were especially proud of the work done by Mrs. Alice Stephenson and Mrs. Frances Morton. Mr. Sisk proceeded to review the Plan and amendments approved by the Balboa Park Committee (George Loveland's memorandum of December 21, 1976).

Regarding the transportation aspects of the Plan, Mr. Sisk noted that the Transportation Department either concurs or has no objections.

Mr. Mendoza clarified two points: (1) Regarding the Old Globe Third Theater, Council Resolution No. 213924 of July 31, 1975 approved the concept of the construction of such a theater without any contingency as to solving parking problems. The matter of parking came up as a matter of Council discussion and led to the formation of an Ad Hoc Committee. (2) Regarding the re-establishment of Pershing Drive Route 5 to Redwood Street, Transportation is not in complete agreement in that they feel that Pershing Drive should not be terminated at Redwood Street but instead continue (not necessarily on its present alignment) to Upas and 28th Streets, so as to allow for an uninterrupted north-south route through North Park via 28th Street and Utah.

Mr. Charles Strong of the Transportation Department thanked the Board and Ad Hoc Review Committee for the opportunity to review the Plan; he then proceeded to summarize the Transportation Director's memorandum of December 15 1976, mailed with the agenda. Regarding the Quince-Richmond connection, Mr. Strong noted that increased traffic volume would be expected on Upas and Richmond; but the connection is need to facilitate traffic flow across the park.

2. Public Testimony. The following people spoke:

- a. Bob Martinet spoke in support of a parking structure at the east end of the Cabrillo Bridge with a capacity of approximately 1,000 cars. The upper level of the garage would be at level with the bridge. Underground, ventilated parking would cascade down the canyon. The bridge would be converted to one-way, east; cars would exit the garage to the north on Quince. Mr. Martinet urged that, in acting upon the Ad Hoc Committee's report, the Board would also recommend the inclusion of the parking structure in the fiscal years 1978-1979 CIP. He noted that he would be available for presentations before Council. (The Ad Hoc Committee deliberated upon the structure and excluded it from its report due to aesthetic concerns, vandalism and noise problems.)
- b. Charles Wolf passed out a list of revisions most of which were covered by the Balboa Park Committee.
- c. Mr. Richard A. Mills, on behalf of the residents of Richmond-Upas-Myrtle, voiced objection to the Quince-Richmond connection.
- d. Mr. George M. White, Vice President, Great North Park Community Planning Council, spoke in opposition to the closing of Florida and Pershing.
- e. Kathryn C. Willets, Chairman, Greater Golden Hills Precise Planning Association, noted (1) concern with the traffic impact on 30th and (2) lack of provision for changes in demography (the need for family-oriented recreation facilities on the eastern and southern boundaries of Balboa Park, known as the Golden Hill triangle).
- f. Mary Alice Peitz, reporting for neighbors in the area east of Balboa Park, noted that (1) the area west of Balboa Park should share the service portions of the park, so that the people on the east are not burdened with all of them, and (2) access through the park should be maintained.
- g. Heinz Wolf noted that the Uptown Planning Committee is against the Quince-Richmond connection.

3. Deliberation - REFERRAL: Staff is to review the community input, summarize it, and distribute it to the Board well in advance of the January 18, 1977 meeting in order that the Board may deliberate and act at that time; staff should include an inventory of playground equipment in the Greater Golden Hill triangle and the cost of additional equipment. . . . Board Action: Continued to January 18, 1977.

A. Balboa Park Committee Report: (1) Balboa Park Signs and Information System. Mrs. Dickinson noted that the Committee recommended to the Board that the proposal for the Information Centers be disapproved as inappropriate for Balboa Park. The Committee further recommended that a "You-Are-Here" type map be incorporated into a design which also gives information on where to obtain small maps and information of activities. . . . REFERRAL: Mr. Roberts asked that staff be directed to:

- a. Expand upon existing signage, improving composition, etc.
- b. Work with the concept of "You-Are-Here" map/bulletin board to be serviced by Community Services.
- c. Explored the possibility of directing people to maps available for purchase at the various gift shops in the park.

Mr. Sadler reported that the Facilities Committee found the method of dispensing information which was proposed by the Consultant to be

inappropriate. Mr. Sadler concurred with Mr. Roberts' recommendation that a study regarding signage locations for the Space Theater should also be accomplished. By consensus, the Board agreed to Mr. Roberts' recommendation, as amended by Mr. Sadler.

2. Balboa Park Bowl Name Change: Mrs. Dickinson moved that the Board recommend approval of the Balboa Park Committee's recommendation that the name of the Balboa Park Bowl be changed to "Starlight Bowl." Mr. Skill seconded the motion which carried unanimously.

D. Facilities Report: (1) Haraszthy Memorial. Mr. Sadler reported that the Facilities Committee recommended as follows.

- a. As the memorial is to a California pioneer, the Committee recommends Old Town as the most appropriate site.
- b. If Balboa Park is selected as the location, the Committee recommends placing the memorial adjacent to the Hungarian Cottage on the west side, centered in the area now planted with Juniper bushes.

Mr. Joseph Fedak appealed, reiterating the points made at last month's Board meeting regarding the inadequacy of the side yard. . . . MOTION: Mr. Leyton moved to reconsider the matter. Mrs. Dickinson seconded the motion which carried unanimously. Mr. Leyton moved to approve the memorial at the Hungarian Cottage at the area recommended by the Facilities Committee. Mrs. Dickinson seconded the motion which was carried.

2. Balboa Park Signs and Information System --- Covered as part of Balboa Park Committee Report.

December 25, 1976, San Diego Union, B-4. Jack Krasovitch, Recreation Division superintendent, calls violence in park low; 673 crimes in Morley Field and Prado-Palisades area reported to police in thirteen month period.

Frequency of violence in San Diego's municipal parks and recreation areas was termed "insignificant in comparison to other major cities" in a report submitted to the Park & Recreation Board.

Jack Krasovich, the city's Recreation Division superintendent, credited close cooperation between police and park personnel with "minimizing" problems.

"During the summer the San Diego Police Department assigned its school task force to work with the Recreation Division to improve conduct at several of our park and recreation centers," Krasovich said.

"The results were positive in terms of fewer incidents of physical violence and a significant reduction in vandalism to the areas.

"In addition the Park & Recreation Department worked with employee services in formulating a new administrative regulation on vandalism. Theft, loss and intentional destruction of city property."

Krasovich said this regulation led to recovering costs or damages by civil, rather than criminal suits.

The city experiences vandalism on all park sites, Krasovich said, but added that the problem is not as severe as elsewhere. Board member Reggie Jensen challenged this statement. He said he based his questioning on what he read in the news media.

The possibility of 24-hour park ranger service as brought up, with a notation that in the 13-month period ended October 31, 1975, there were 673 crimes in the Morley Field and Prado-Palisades areas reported to police.

December 26 1976, San Diego Union, B-5. Committee reviewing Balboa Park master plan suggested a new museum devoted to Balboa Park, by Carl Ritter.

A museum devoted to Balboa Park, its origins and development, and to the two expositions held there should be established in the park, an ad hoc committee reviewing the Balboa Park Master Plan adopted in 1960 said.

Nine members of the full Balboa Park Committee served on the ad hoc committee formed in May, 1975, and included this recommendation among many in a 27-page report.

City Park & Recreation Directors recently accepted the report for further study.

TEMPORARY SITE

The suggested museum could be started in Casa del Prado and transferred to a better location later, the report stated. "An appropriate civic organization could operate such a museum under Park & Recreation Department sponsorship" and it could house mementos, books art work and documents, the report said.

The committee also recommended restoring to park use a 14.2 acre area at Russ Boulevard, 23rd Street and Pershing Drive, used as a heavy vehicle storage yard.

The isolated portion of Balboa Park between Upas Street and Cypress Avenue, west of Richmond Street and east of State 163, should be opened, developed and landscaped for park use, according to the report.

It also favored opening and developing an area west of State 163 and north of the Camp Fire Girls' area. This action should be simultaneous with opening of Marston Estate house and grounds to the public under supervision of the San Diego Historical Society, the report suggested.

LEASE CANCELLATION

Consideration should be given to canceling present leases involving the Boy Scouts, the Camp Fire Girls, Girl Scouts and similar organizations, it was recommended, "if and when the public need is greater than provisions for exclusive use."

"No future leases for exclusive use and /or fencing off of park areas to keep out the general public should be permitted," stated the report.

The committee recommended that "pathways, hiking and/or jogging trails should be developed in every available and appropriate part of the park." These were envisioned as "footpaths through the central portions plus a major trail circling the entire perimeter of the park."

The ad hoc group termed the protection and preservation of the Moreton Bay fig tree, north of the Natural History Museum, "one of the most urgent landscape necessities" in the park. A flower garden there was declared a threat to the tree.

Among other recommendations were the following:

--- When the Museum of Natural History is expanded, the building should remain within the present site.

--- The Electric Building should be removed as soon as possible.

--- The San Diego Art Institute should be moved closer to the Spanish Village and closer enforcement of standards should be invoked for all village lessees.

--- The deteriorating House of Charm could be rebuilt or, if financing is not available, the Alcazar Garden expanded to fill the area.

--- The old Photo Arts Building, occupied by the United Nations Association, should be added to the House of Pacific Relations by removing the association and finding a location for that organization outside the park.

--- The Ford Building should be removed if the time limit set for Aerospace Center occupancy expires and the structure is not renovated.

--- City administrative offices should not be permitted to occupy portions of the Conference Building and the Balboa Park club.

NEW GYM

--- Use of the Federal Building by appropriate activities should continue until a new gym is built in the Morley Field area, when a "new and useful service" should be found for the Federal Building.

--- Work should begin immediately on removal of streets in the northeast corner, turning Pershing Drive east on Redwood Street.

--- Pepper Grove parking should be restricted to picnickers.

--- Intrapark transportation should be part of long-range plans for solution of parking and traffic problems.

--- There should be lighting for all major trails, and additional bicycle trails should be provided.

There were a number of additional recommendations at the meeting, a considerable part of which was taken up by citizen concern over the possible widening of Upas Street to a four-lane thoroughfare extending east of University Avenue.

December 27, 1976, San Diego Union, B-3. What a fine way for Douglas Ian Duncan to pass a birthday, by Ray Kipp.

Douglas Ian Duncan celebrated his 51st birthday yesterday by entertaining a couple hundred guests in Balboa Park.

It really wasn't a big deal, Duncan entertains thousands there every year. In fact, he has done it just about every week for the past 19 years.

Duncan does not know most of the people he has entertained, but they have probably come from every part of the globe and from nearly every walk of life.

He plays the Spreckels organ in the pavilion.

The organ has provided entertainment for millions of visitors since it was donated to the city by John D. Spreckels in 1914.

Yesterday, like almost every Sunday since then, about 200 persons --- a good crowd for a Christmas weekend --- took advantage of the sunny weather to relax at the pavilion and listen to the music before continuing their tours of the museums and gardens.

Duncan spiced his regular selections with a few traditional Christmas carols and even a couple of non-traditional pieces like "Forest Green," an English carol.

But he resisted the temptation to slip in a “Happy Birthday,” as a present to himself.

Those who stopped by for the hour with Duncan yesterday afternoon probably didn’t know it, but they will be the last to enjoy the music for awhile.

The concerts will be halted during January and February when the city begins refurbishing work on the pavilion, Duncan said.

Last month the City Council approved a \$50,000 contribution toward the estimated \$350,000 needed for the entire refurbishing effort.

The city’s contribution matches a \$50,000 private donation and the Balboa Park Committee is attempting to raise another \$125,000 which would also be matched by the council.

Duncan said it is the pavilion itself and not the organ with its 3,492 pipes that needs first attention.

“The organ is not in bad condition. In fact, it works remarkably well for an old instrument,” he said.

1977

Summary of Events in 1977

(Note: Dates of events are approximate only.)

Balboa Park Bowl renamed Starlight Bowl (January 17, 1977)

El Prado accepted into National Register of Historic Places
(January 18, 1977)

Organ restoration okayed (May 5, 1977)

Amendments to Balboa Park Master Plan (July 9, 1977)

United States funds restoration in Balboa Park (October 5, 1977)

Balboa Park Conference funded by California Council
for the Humanities (October 7-8, 1977)

January 7, 1977, (San Diego) Evening Tribune, E-1. Violence key in city decision on rock groups; Balboa Stadium ruled out as concert site.

January 11, 1977, San Diego Union, B-3. Organ Pavilion work under study.

January 11, 1977, San Diego Union, B-3. Facilities & Recreation Committee recommended a plan, which would reduce required vote to finance preservation of canyons to a simple majority.

January 13, 1977, San Diego Union, B-6. Governor Brown urges aid for area parks.

January 15, 1977, San Diego Union, B-3:7-8. Park Complex gains national recognition.

Balboa Park's El Prado complex --- built for the 1915 San Diego World Exposition [sic] and now the home of museums, galleries and gardens --- has been approved for listing in the National Register of Historic Places.

Bea Evenson, president of the Committee of 100, a private citizens group interested in improving Balboa Park, said she was notified this week of the El Prado action by the state Historical Landmarks Advisory Committee.

The state said the El Prado complex was placed on the national register maintained by the U. S. Department of the Interior on **December 12, 1976**, after a more than one-year effort toward that goal by the Committee of 100.

The National Register of Historic Places is the official listing of the districts, sites and buildings judged to be significant in American history, architecture, archaeology and culture. Placement on the register is a prerequisite for obtaining some federal grants.

"It's a very great thing because it gives a tremendous amount of prestige to the park and it offers the possibility of getting some federal funds to help repair the buildings," said Evenson.

The City Council last February, at the urging of Evenson's group, voted unanimously to seek the inclusion of El Prado in the registry.

Structures and areas affected include the Cabrillo Bridge, House of Charm, House of Hospitality, Electric Building, Alcazar Garden, Plaza de Panama, El Prado arcade, Fine Arts Gallery (center structure), Casa del Prado (reconstructed) and the National History Museum.

The Ford Building and the California Building (now housing the Museum of Man) already were on the National Register.

Most of the structures were built for the 1915 Exposition.

The Committee of 100 currently is undertaking to repair the Organ Pavilion, which was donated to the city by John D. And Adolph B. Spreckels.

The City Council last November agreed to match a \$50,000 contribution from the Committee of 100 to start the restoration work.

January 17, 1977, (San Diego) Evening Tribune, B-6. Balboa Park Bowl renamed Starlight Bowl in ceremonies today in the park..

January 18, 1977, (San Diego) Evening Tribune, D-1. "Temporary" El Prado complex has been accepted for inclusion in National Register of Historic Places, by Jan Jennings.

January 22, 1977, Letter, George Loveland to Richard Amero, justifying changing the name of Balboa Bowl to Starlight Bowl.

January 23, 1977, San Diego Union, B-1. Bea Evenson is dedicated to Balboa Park, by Carol Olten.

February 10, 1977, San Diego Union, B-1. City to bypass requirement on open-space bond issues.

March 11, 1977, San Diego Union, B-3. Grants totaling \$10,000 will be used to develop a program for George W. Marston home; the National Endowment for the Humanities awarded at \$5,000 grant to the San Diego Historical Society which will provide matching funds for the project..

March 14, 1977, San Diego Union, B-1. B-5. Police say Balboa Park crime rate poses no problem, by George Ramos.

The discovery last month of the body of 6-year-old Jose Luis Ramirez in the Golden Hill region of Balboa Park sent an often-raised question rippling through the city once again:

How safe is Balboa Park?

The boy was found in brush-covered terrain near a hiking trail in what has become commonly called Golden Hill Park, which encompasses the southeastern tip of Balboa Park.

Many of the park's facilities --- the Starlight Bowl, Casa del Prado and the Recital Hall --- among others --- also get a steady stream of visitors. Casa del Prado attracts about 20,000 persons a month for a variety of activities.

In the summer time, attendance in the park increases. The weekly organ program at the Organ Pavilion, for example, is attended by as many as 10,000 a month.

With this heavy influx of people, the opportunity for crime in Balboa Park is there, police said.

In fact, crime in the park is on the rise, keeping pace with the citywide level of crime, officers said.

But in Golden Hill Park, the crime rate has dropped.

Police statistics show that all types of crime have been reported in Balboa Park and Golden Hill Park, although recent attention has been focused on instances of so-called sex crimes.

The police said the Ramirez boy, who dies from suffocation, had been sexually molested prior to his death.

Sex-oriented crimes in Balboa Park dropped from 31 cases reported in 1975 to 25 last year. In Golden Hill Park, however, reported cases jumped from two in 1975 to six last year.

During 1976, there were 323 reported cases of petty theft in Balboa Park. There were also 37 cases of malicious mischief (such as rock throwing and property vandalism), cases of assault with intent to do bodily harm, 16 case of battery, 73 cases of grand theft and 27 cases of robbery.

Crime, police contend, is not a major problem in Balboa Park, although isolated incidents at recent rock concerts have prompted reinforcements of uniformed officers to bring order to a reported disturbance.

Balboa Park is part of an assignment beat for patrol cars working out of the Police Department's Central Division at 801 W. Market Street. Additional officers are brought into the area when needed, said Bob Burgreen, assistant chief of police in charge of the patrol division.

The consensus among police officers is that Golden Hill Park --- because it has less organized activity --- probably is safer than Balboa Park. The police figures support this contention.

Crime reported in Golden Hill --- malicious mischief, assault with intent to do bodily harm, robbery, grand theft and battery --- numbered no more than four reported cases each last year.

The smaller park's highest incidence of crime falls in the category of petty thefts, which go beyond a dozen reported cases during a 12-month period. At night, city officials and police say prudent precaution dictated by common sense should be used when people are in public places like Balboa Park. Large crowds at stage productions in Balboa Park tend to discourage crime although some complaints have been received, City Council member Jess Haro said. There also are night activities at the Golden Hill Recreation Center, including softball games.

"We would be doing a disservice if we say the park is unsafe," said Haro. Balboa Park is located in his 8th Council District.

"There's no doubt that there are people sleeping in the park and there's always a chance for a robbery. That's why we have the police. But we would be rushing the judgment with a conclusion that it (Balboa Park) is unsafe."

Balboa Park, Haro and other city officials conclude, is as safe as it can be for a public area its size.

But police officers report that there is one recurring problem in Balboa and Golden Hill parks --- homosexual activity.

Kolender and others said complaints from citizens have prompted authorities to assign officers to clear out the restrooms in the parks on occasion.

Capt. Wes Allen of the sex crimes detail said many instances of homosexual-type activity seen by outraged citizens --- such as men holding hands or kissing each other --- go unreported. These instances are not against the law, police officers emphasize.

People in the gay community in San Diego acknowledge that homosexual-type activity goes on in public places in Balboa Park, but they contend the inference that gays are child molesters or generally are involved in cases like the Ramirez killing is inaccurate and unfair.

Statistics from the Police Department show that over 90 percent of all child molestation cases nationally involve heterosexuals.

The Reverend David Farrell, pastor of the predominantly gay Metropolitan Community Church of San Diego, said gays almost never get involved in sex-oriented crimes in public places. And, he added, the gay community does not condone them.

"Many of them (criminals engaged in sex-oriented cases) are not really people who live in the homosexual lifestyle," the Reverend Mr. Farrell said. "I personally don't condone public sex of any kind. Public restrooms are for people's use as a public convenience and they (heterosexuals) have a right to visit them without embarrassment."

Gays draw the following example to support their viewpoint --- is it fair to say that reported activity of prostitutes in downtown San Diego is representative of heterosexual society?

If it is not, they reason, then it is equally unfair to say that reported cases of homosexual-type activity in public restrooms are representative of the gay community here.

Though the safety of Balboa Park rests, in much of the answer, in the precaution dictated by common sense of those who visit.

The park, concludes the Reverend Mr. Farrell, is a park for all citizens and is fairly safe. However, he admits that he would not go into a public park at night because of the possibility of assault or a mugging.

March 25, 1977, (San Diego) Evening Tribune, X-4. An idea booms, and park roses appear, by Ozzie Roberts.

The garden contains about 2,500 roses in about 250 varieties, which are maintained by the city parks department in cooperation with the rose society.

March 25, 1977, (San Diego) Evening Tribune, X-8. Desert garden requires closest attention, by Paul Van Nostrand.

When completed, the garden will run down a steep canyon to Florida Street and will include about four acres. Most of the design work was done by Roger A. De Weese, a Sorrento Valley landscape architect.

September 9, 1977, (San Diego) Evening Tribune, B-4. Addition, known as the Jennings Center for Zoological Medicine, opened yesterday at Zoo Hospital, by Paul Van Nostrand.

Built at a cost of \$1 million, the new wing is adjacent to the 51-year-old original zoo hospital, which is destined to become a veterinary medicine research center.

Construction of the new wing started last October. It was designed by Mosher, Drew, Watson and Associates of La Jolla and Nielsen Construction Company was general contractor.

Contributions from more than 600 persons and organizations financed the 10,000-square-foot wing. It will be formally dedicated at 3:30 p.m. tomorrow.

September 18, 1977, San Diego Union, B-11. Balboa Park's future --- including the proposed new Navy Hospital in Florida Canyon --- will be discussed in detail at a two-day conference October 7-8. Seymour Greben, Los Angeles County director of parks and recreation, will open the conference.

September 22, 1977, (San Diego) Evening Tribune, A-1. United States to help San Diego restore park buildings, by Steve Wiegand.

Grants totaling \$4.4 million from the Public Works Employment Act received to restore the California Building and Fine Arts Gallery (\$1.78 million) and Ford Building (\$2.64 million).

September 22, 1977, San Diego Union, A-1. California Building, Fine Arts Gallery, Ford Building to be restored; grant to raze and rebuild Electric Building expected, by John Donner and Richard Heimlick.

September 26, 1977, (San Diego) Evening Tribune, B-2. EDITORIAL: Multiple Benefits . . . federal money allows coordinated program to replace piecemeal maintenance.

The Public Works Employment Act is a federal program to provide temporary jobs during a period of high unemployment.

The Balboa Park project is not a "make-work" program. It has long been a goal of city officials and of citizen supporters who backed their concern with private donations.

September 26, 1977, San Diego Union, B-1. Balboa Park restorers can't wait, by Carol Olten.

It had been evident for some time that the buildings in Balboa Park were slowly crumbling. It also seemed evident that there wasn't the money available to do anything about it.

Last week's announcement came just in time: \$4.4 million from the federal government for restoration work on three buildings --- and the promise of some \$5 million more to come this week for another.

Deputy City Manager John Lockwood explained the funds matter-of-factly, "The City made seven applications for Economic Development Administration grants --- three of those for projects in Balboa Park. As a result, four structures will be renovated." But park committee leaders and building tenants viewed the grants as the culmination of a long, hard struggle.

Under the terms of the grants, the buildings to be affected are the Fine Arts, the California Building (housing the Museum of Man), the Electric Building (home of the Aerospace Museum and Hall of Fame) and the Ford Building (now a storage area for City maintenance equipment, the Old Globe Theater and the San Diego Civic Light Opera Association.)

A total of \$2.65 million is being allocated to restore the Ford Building as a new home for the Aerospace Museum and Hall of Fame. A grant of about \$5 million is expected --- it will be used to demolish and rebuild the Electric Building. It will then be occupied by the Hall of Champions and other tenants.

About \$1.78 million of federal monies will be spent on refurbishing the facades and ornamentation of the Museum of Man and the Fine Arts.

"The regulations are that labor must start on the sites within 90 days after the grant comes in. That means we'll be going to work right away on the Ford, The Fine Arts and the Museum," said Lockwood. "The grant for the Electric Building should be announced any day. It will be the longest project and take about two years."

September 29, 1977, (San Diego) Evening Tribune, B-4. "State of Zoo" message given.

In his report to the society at its 60th annual meeting yesterday, Ivor de Kirby predicted San Diego Zoo attendance would about equal the record 3.2 million set in 1976.

“But at the zoo, we are still plagued by the parking problem on our busiest days,” De Kirby said. “We continue to look for solutions.”

De Kirby said the zoo has recorded a number of births among rare species in 1977, including birds and reptiles.

In addition, he said, the zoo has maintained its program of acquiring new species from other zoos and of exchanging animals for breeding.

New zoo exhibits, said De Kirby, include a bald eagle aviary, a koala “bedroom,” a new home for clouded leopards and several bird exhibits.

“The major construction project in the past year has been completion of a new clinical wing at the 51-year-old zoo hospital,” De Kirby said.

He said the education department has recently completed a sensory unit in the Otto Center. This room is designed for handicapped children.

De Kirby said the zoo is currently working on establishment of its own bird quarantine station.

“This will be the first zoo-operated quarantine station in North America,” he said.

In the planning stages are a new primate and bird mesa.

“This redevelopment,” he said, “will enable visitors to see primates and birds from several levels --- from the ground to the treetops. Within the area, animal species will be grouped by habitat – for instance, rain forest, savanna, scrubland and marsh.”

September 29, 1977, (San Diego) Evening Tribune, B-8. Japanese garden fund-raiser held by San Diego-Yokohama Sister City Society at the Casa del Prado last night.

One year ago, the city retained Fong and LaRocca Associates, a Newport Beach landscape firm and design consultant Takeo Useugi to draft preliminary plans for the garden.

The plans calls for such traditional Japanese features as a large plaza known as a Hiroba, a stream-fed lake, a tea pavilion, a stone garden and a pagoda.

Consultants have recommended special areas for cultural festivities, folk art exhibits, drama, tea ceremonies and other Japanese entertainment.

October 5, 1977, (San Diego) Evening Tribune, B-8. Unites States funds restoration project in Balboa Park.

The Economic Development Administration has approved the city’s grant application to work on the park’s Electric Building.

The grant is for \$4,993,100 “for reconstruction of the Electric Building as a museum facility.”

The grant was awarded under a federal act that allocates money to provide temporary jobs for unemployed persons while helping public agencies tackle expensive projects such as restoring public buildings and widening streets.

October 5, 1977, San Diego Union, B-1. Electric Building to be rebuilt.

The Economic Development Administration (EDA) has approved a federal grant of \$4,993,100 for rebuilding the Electric Building in Balboa Park, a spokesman in Washington, D. C., said yesterday.

October 7, 1977. Balboa Park, Our Community Center . . . conference sponsored by Citizens Coordinate for Century 3.

October 8, 1977, San Diego Union, B-1, B-4. Seymour Greben hails public role in Balboa Park planning, by Carl Ritter.

San Diego is on the right path in bringing the public as much as possible into its Balboa Park planning instead of relying excessively on Park and Recreation Department administrators as some cities do, an international consultant on park resources said here yesterday.

In an interview after Seymour Greben addressed the opening session of a two-day conference on the park's future, sponsored by Citizens Coordinate for Century 3, he said a great park like Balboa "tends to hold a city together."

Greben cautioned, however, that public participation "must be a really legitimate effort," embracing the handicapped, ethnic groups, the old and others, "not just the middle class, generally white, as important as they are."

A large park in the hart of a city "gives a city character," Greben said. He cited Chapultepec Park in Mexico City, Griffith Park in Los Angeles and Balboa Park in San Diego.

He said the decay of Central Park in New York City from its once-proud status has caused great numbers of Americans in cities to begin looking down on large, centrally located parks. In this sense, he said the "creative strategy" employed in regard to Balboa Park's future can help recapture "people's sense of pride and sensitivity."

"Look at (the city's) population, special problems, its open space and from that, begin to formulate so that everybody is served, so that it relates to all other parks but does not duplicate," Greben advised. Above all, he said, a big park today must be safe.

Permitting selfish interests to take hold of park planning will lead "a whole community to come out less well in 20 years," Greben said.

Yesterday's opening of the two-day conference, which has as its theme "Balboa Park, the Continuing Dialogue," included a guided tour and an afternoon panel presentation.

Moderator Dr. Roy Harvey Pearce, professor of literature at UCSD, noted that the Navy was invited to participate in the panel discussion but decided on the grounds that its plans for its hospital in the park are widely known and an appearance so close to the November election to discuss a political issue could be considered "not proper."

Dave Roberts, city Park and Recreation Department development division superintendent, told the audience of approximately 200 persons that the tradeoff for parkland between the city and the Navy probably would lead to demolition of most Navy structures on the present hospital grounds because the buildings are not up to earthquake shock-resistant standards.

The new naval hospital, Roberts said, would be a \$250 million project requiring four to five years to complete.

The League of Women Voters provided two places on the panel to present "pro and con" arguments relating to the present Navy hospital plan.

Paula Lewis said City Council negotiations with the Navy to exclude a referendum vote made it appear "the citizens were somewhat circumvented: in any decision to turn over part of the park.

She suggested the Murphy Canyon site the Navy previously considered might be more appropriate in view of an estimated \$37.4 million saving to taxpayers, compared with relocating the hospital in Balboa Park.

June Lloyd, also of the league, took the opposing view. She said the people of San Diego have long accepted the Navy's place in the park and elsewhere in "a Navy town." This acceptance applied to new residents as well, she said.

She said it is appropriate, in view of the Navy's defense role here and the convenience of the hospital's beneficiaries, that the hospital and other Navy facilities be kept with "easy reach" of the waterfront.

October 8, 1977, San Diego Union, B-4. Historical Sites Board honors Bea Evenson.

October 9, 1977, San Diego Union, B-2, B-5. Balboa Park ideas urged.

How can citizens enter the decision-making process involving the future of Balboa Park?

A panel fielded this question at a plenary session that wound up a two-day conference yesterday at the House of Hospitality --- and in essence the advice was:

Organize yourself. Go through channels. Don't wait to appear before the City Council when it makes the ultimate decision. Bring pressure on the agencies, commissions and non-profit organizations that recommend policy on improvements and spending priorities to the council.

"Sometimes, we on the council receive recommendations that are based on cost, not on what the public wants," said Councilman Jess Haro, a panel member, who also noted that the park "is a more significant issue than Black's Beach."

Appearing with him were Anthony Corso, assistant professor of urban planning at San Diego State University, who prepared an analysis of the park's problems for the 400 persons in attendance; James Milch, city Park and Recreation Board chairman; Clarence Pendleton, Jr., the Urban League's executive director, and Mary Olive Shoupe, a citizen advocate.

The moderator was Barbara Swyhart, associate professor of religious studies at SDSU.

Swyhart's presence, and that of other academicians at section meetings earlier yesterday, was unusual in that most are not experts in park usage, but there was a reason for it, according to Muriel Goldhammer, the conference coordinator.

The conference, sponsored by Citizens Coordinate for Century 3, was partially financed by the California Council for the Humanities in Public Policy. The council, said Goldhammer, seeks to enlist the views of academic humanists on public issues.

That was why a philosophy professor, Arthur K. Bierman of San Francisco State, was asked to summarize the conference.

He said he would give it an A "for information and intensity of interest by the participants," but an unsatisfactory mark for its failure to engage in a Socratic dialogue whereby arguments and counter-arguments are developed to arrive at a definition --- in this case of what a park should be, a cultural center or a place for recreation or a mix. "There was too much jumping around," he said in an interview.

In a section meeting on park usage some panelists said recreation should be left to neighborhood parks with Balboa Park utilized as a cultural resource but no consensus was reached.

Nor was a conclusion reached by another meeting on undeveloped land, such as Florida Canyon. But a show of hands at the plenary session opposed the proposed land swap by the city and Navy to permit the Navy to build a new hospital in the canyon.

Goldhammer said that under the ground rules laid down by the California council, the conference was to take no action but to garner ideas and "to move them." She said a report on the conference will go to the park and recreation board.

The final word --- by conference chairman, John Hobbs, political science professor at SDSU --- was that "what we say today will be part of the process" determining the park's future.

October 21, 1977, (San Diego) Evening Tribune, C-2. Letter, M. Phillips objecting to use of Balboa Park Club to photograph senior citizens and issue identification cards . . . walk to the building is too long..

October 26, 1977, (San Diego) Evening Tribune, B-5. Five-year plan to bring a bit of Japan to an undeveloped canyon in Balboa Park has come off the drawing board for public scrutiny and comment, by Steve Wiegand.

As envisioned by the consulting firm of Fong and LaRocca of Newport Beach, the garden would take up five to six acres in Gold Gulch Canyon.

The garden would be composed of native and Japanese plants, winding paths, a stream and waterfall, and a small lake stocked with koi or Japanese carp.

Outside the garden's main gate, a hirboa, or public plaza, would be constructed which could include a public tearoom and exhibits and information about Japanese culture and customs.

Wayne Tyson, of the development division of the Park and Recreation Department, said that while some of the cost --- estimated at as much as \$1 million or more --- could be borne by the city, contributions from foundations, organizations and individuals would also be sought.

He said that charging a small admission fee to the garden was also being considered, as a way to offset maintenance costs and to help control crowds in the garden.

"There would vantage points outside the garden so people who didn't want to pay a small admission charge could view it."

October 30, 1977, San Diego Union, G-2. Building of Panama Canal stirred hopes of San Diegans, by Craig Mac Donald.

And, although the canal's official opening was ceremoniously lauded by President Wilson, July 12, 1920, it never became the goose that laid the golden egg as far as San Diego was concerned.

November 2, 1977, San Diego Union, D-1. A big hand for Bea Evenson, by Carl Ritter . . . representatives of city, county and state and members of the Committee of 100 paid tribute to Bea Evenson yesterday in the House of Hospitality.

November 4, 1977, (San Diego) Evening Tribune, A-22. Café del Rey Moro burglarized . . . intruder made off with about \$1,600 . . . it followed break-ins at the Hall of Champions, the Aerospace Museum, the House of France and two food concessions.

November 22, 1977, (San Diego) Evening Tribune, B-1. Rangers sought for Balboa Park, by Steve Wiegand.

A review of the master plan for Balboa Park that recommends no expansion of parking space and creation of a park ranger force has been endorsed by a City Council committee.

On a 4-0 vote yesterday, the Public Facilities and Recreation Committee recommended to the full council that the 27-page review of the park's master plan be used with the plan itself when planning projects for the park.

Councilman Tom Gade was absent for the vote.

The review was the result of a study of the park's 17-year-old-master plan by an ad hoc committee appointed by the city Park and Recreation Board in 1975.

The committee was appointed to update the plan and suggest changes that would help preserve the park.

In the report, the committee said only a few "minor" changes were necessary to make the plan the "guideline for an enlarged and intact Balboa Park to be passed on to future generations."

Among the recommendations were:

- Freeze the park's parking capacity at the current level of 9,200 spaces and encourage more use of those parking lots away from the central part of the park.
- Consider the creation of a park ranger force, similar to the city's lifeguard service, to protect people and the park and "to promote a better feeling of security among park users."
- Ban trade shows and conventions not related to the park and strive to prevent use of the park for commercial purposes.
- Consider creation of a museum devoted to the park itself, with books and park-inspired artwork, and mementos from the expositions that have been held there.

The review committee also recommended that an intra-park transportation system to like parking lots on the park's periphery be studied, and that pedestrian and bicycle paths be developed.

But it noted that the automobile is likely to remain the primary means of getting people to the park, and said that vehicular access should be of prime concern in park planning.

Several persons who live near the park objected to a proposal in the review to link Quince and Richmond streets near State Highway 163 to give better access to the area near the San Diego Zoo.

"There are too many cars in the park now," said Charles Wolf. "Balboa Park needs fewer roadways and far less traffic."

But council committee members said the guidelines in the review should be available for city staff to use when proposing plans for the park.

Councilman Floyd Morrow said the ad hoc committee should also be asked to review the impact on the park master plan if the Navy goes ahead with its plans to rebuilt its hospital on a new site in the park.

The committee sent Morrow's suggestion, along with the review, to the full council for discussion.

November 23, 1977, READER. Scaled-down project for Japanese Garden will cost at least \$2.2 million with some estimates as high as \$5 million; Newport Beach consulting firm paid \$41,000, almost half of the \$100,000 the Park and Recreation Department had gathered for the project.

November 25, 1977, San Diego Union, B-2. Balboa Park restoration plan gains.

The Public Facilities and Recreation Committee voted 4 to 0 to recommend that the full council instruct the city manger to proceed with development of the park using a review of the park's master plan and the plan itself as background.

December 22, 1977, Balboa Park designated a National Historic Landmark (see letter below)

United States Department of the Interior
NATIONAL PARK SERVICE
Pacific Great Basin System Support Office
600 Harrison Street, Suite 600
San Francisco, Calif. 94107-1372

H34 (PGSO-RR)
January 31, 1996

Dear Mr. Amero:

Thank you for your inquiry about the Balboa Park National Historic Landmark. Balboa Park was designated a National Historic Landmark (NHL) in December 1977. The landmark boundary included both the Prado and the Palisades areas. We are enclosing a copy of the (NHL) nomination form for your information.

Our search of the National Register shows the following listings within Balboa Park.

California Quadrangle, Balboa Park-El Prado area (5/74)
El Prado complex (12/76)
Ford Building (4/73)

These listings are not nullified by the National Historic Landmark designation, and the buildings/districts are still listed in the National Register. The National Historic Landmark is also included in the National Register.

The Balboa Park National Historic Landmark documentation was prepared by Carolyn Pitts, an architectural historian in the National Historic Landmark Survey of our Washington, D.C., office. Landmark studies are reviewed by the National Park System Advisory Board at their semi-annual meetings and recommended for designation by the Secretary of the Interior. The original NHL documentation and related documentation are maintained in our Washington, D. C., office.

The Fair Parks Texas Centennial Buildings were designated a National Historic Landmark in 1986. We are unable to provide you with further information about NHLs in other city parks.

We are forwarding your letter with a copy of our response to the National Historic Landmarks Survey in Washington, D. C., which should be able to respond to the questions that we have not been able to address. The contact person is:

Ms. Patty Henry
National Historic Landmarks Survey
National Park Service
PO Box 37127
Washington, D. C., 20013-7127
(202) 343-8163

Enclosed is some general information regarding the National Historic Landmark program. Thank you for your interest in the Balboa Park NHL.

Sincerely,

(Signed) Ann Huston, Historian
Cultural Resources Team.

ATTACHMENT: National Register of Historic Places Inventory - Nomination Form: Balboa Park; prepared by Ms. Carolyn Pitts, Architectural Historian, NPS, July 19, 1977.

NOTE: This application is for buildings that comprise the "El Prado Complex." The only mention of buildings in the Palisades section of Balboa Park is in a brief history of the park prepared by John Henderson and on page 1, item 10 of a continuation sheet which concludes with the following statement:

"Said area shall encompass those structures which were erected for the Panama-California International Exposition of 1915-1916, the California Pacific International Exposition of 1935-36, and the Timken Fine Art Gallery and West Wing of the Fine Arts Gallery which were constructed in 1964."

NOTE: There appears to be uncertainty over whether and how the Palisades area was accepted as part of the National Historic Landmark as no documentation exists to back up the designation. The National Park Service in Washington, D. C. was not precise as to when and how the Palisades was included in the application. I was informed by phone that the area was accepted as an addition to the application based on a physical inspection of the premises by the National Park Service historian and an oral commitment. If researchers consider this matter worth pursuing, they are welcome to do so. See my letter to the National Park Service and the reply from Cynthia Howse below.

February 2, 1996

Ms. Patty Henry
National Park Service
Washington, D. C.

Dear Ms. Henry:

I am addressing this inquiry to you per instructions of Ms. Ann Huston, National Park Service Historian, San Francisco, Calif. (Ref. Letter H34-PGSO-RR, date January 31, 1996). Neither the San Diego Historical Society Research Library nor the City Clerk's Office of the City of San Diego have records indicating when the El Prado and Palisades areas in Balboa Park were formally established as a National Historic Landmark. Ms. Huston thinks the date was December 1977; however the application background material prepared by Ms. Carolyn Pitts, Historian, NPS, refers only to buildings with the Prado area of the park and does not describe buildings in the Palisades section that remain from the 1935-36 Exposition. Also, my reading of Ms. Pitts' study leads me to believe that the Timken Fine Arts Gallery and the West Wing of the San Diego Fine Arts Gallery, constructed in 1964, are included as part of the National Historic Landmark (item No. 10, page 1). This is surprising to me as both buildings are in a non-conforming style that does not match that of the original Exposition buildings. As historic protection organizations in San Diego are not aware that these buildings are part of the landmark designation, I would like to have confirmation from you that this is indeed so.

Several studies of Balboa Park have indicated that El Prado and the Palisades were designated as a combined National Historic Landmark in February 1978. Also, a Committee of 100 study, written by Mr. Jean Stern, as part of a National Historic Landmark nomination is dated 1978. These references appear to indicate that the true date for the joint enrollment of the Palisades/El Prado as a National Historic Landmark is February 1978, notwithstanding whatever may have occurred in December 1977.

Sincerely yours,

Richard W. Amero.

.
OFFICE OF HISTORIC PRESERVATION
DEPARTMENT OF PARKS AND RECREATION
SACRAMENTO 94926-0001

March 29, 1996

Dear Mr. Amero:

This letter is in response to your inquiries regarding Balboa Park. For a list of what has been designated or appears eligible for designation within the park, I refer you to the San Diego Information Center: Dr. Lynne Christenson, Coordinator, San Diego State University (619) 594-1358. Dr. Christenson should be able to answer many of your questions regarding the park.

To answer your question regarding removing properties from the National Register, anyone may petition the Office of Historic Preservation to remove a property due to loss of integrity. We have removed many buildings which have been destroyed, usually by fire. We have not, in anyone's memory, removed a still standing building due to loss of integrity.

We hope this information is helpful. If we can be of additional assistance, please do not hesitate to contact us.

Sincerely,

(Signed) Cynthia Howse
Historian II.

December 1, 1977, (San Diego) Evening Tribune, B-8. Council approves contracts for renovation of three the California, Fine Arts and Ford Buildings.

The contracts awarded yesterday were for:

- \$1,062,000 to the M. H. Golden Company for restoration work on the California Building
- \$329,562 to the Ninteman Construction Company for renovating the exterior of the Fine Arts Building
- \$119,777 to the Ripley Construction Company for partial demolition of the Ford Building

December 1, 1977, San Diego Union, B-2. Balboa Park work pacts given.

The money for the restoration projects is part of a \$4.4 million federal Economic Development Administration grant given the city in September.

December 20, 1977, Park & Recreation Board: Admiral John Davis makes proposal on behalf of Natural History Museum; Miles Harvey on behalf of Museum of Man.

C. Proposal, Natural History Museum, Admiral John Davis

(Mr. Sadler disqualified himself due to conflict of interest.)

John Davis, Director of the Natural History Museum, made a presentation regarding the proposed expansion plans. He noted that the present building was constructed in 1931, and that there has been no expansion since. Research activities were placed on the third floor when the museum was returned from the Navy in 1947-48. Floor loading of 50 pounds per square foot on the third floor is not adequate. The World of the Pacific will be constructed and installed in the redesigned Electric Building when that building is available, in approximately two and one-half years. The Natural

History Museum will move in with 20,000 square feet of exhibits, and increase by approximately 10,000 sq. ft. per year, until it reaches its designated total of 90,000 square feet.

In addition to the use of the Electric Building, the Museum is proposing an expansion of the existing facility. The northernmost limit of the proposed addition would be at the line of the sidewalk separating the old formal garden and the Museum area. A rough estimate of the cost of the expansion was stated to be \$5 million. Admiral Davis explained that his reason for appearing before the Board was to get approval of the concept and/or a recommendation that the needs of the Natural History Museum be considered for funding under the next public works bill.

It was noted that the Balboa Park Committee recommended to the Board that this project, and other similar projects, should be included in a list, based on priority, similar to the C.I.P. Projects, and that they should be implemented on a priority basis when special funding becomes available.

Mrs. Schweizer moved approval of the Balboa Park Committee's recommendation; Mrs. Moss seconded the motion, which carried unanimously (not counting Mr. Sadler who disqualified himself, and Mr. Leyton who abstained.) It will be suggested that the Museum appear before the Public Facilities & Recreation Committee.

D. Proposal, Museum of Man, Miles Harvey, Chairman of the Museum of Man Board of Directors.

Mr. Harvey made a presentation regarding proposed expansion. He stated that the current building was inadequate; it was built in 1915 as a replica of a church, not as a museum. In 1965, the Museum Board determined they were out of space, and that an additional wing would be needed to contain storage, an auditorium, classrooms, kitchen, an elevator that would accommodate the handicapped, and additional exhibit space. The proposal was for approximately 12,400 square feet (costing \$1.2 to \$2 million) on the northwest side of the building, in an area that is now used for parking.

It was noted that the Balboa Park Committee recommended to the Board that this project and similar projects should be included in a list, based on priorities, similar to the C.I.P. Projects, and that they should be implemented on a priority basis when special funding becomes available. A motion was made by Mr. Sadler and seconded by Mrs. Henkel to approve the Balboa Park Committee's recommendation; the motion carried with five in favor, Mr. Leyton abstaining. It will be suggested that the Museum appear before the Public Facilities & Recreation Committee.

December 21, 1977, (San Diego) Evening Tribune, B-2. Letter, Margaret K. Parment complaining about getting a parking ticket for parking at a red curb across from Casa del Prado.

December 23, 1977, (San Diego) Evening Tribune, A-3. Florence Christman, Balboa Park fan, will donate house to city.

December 25, 1977, San Diego Union, B-3. Florence Christman, historian, becomes latest Balboa Park benefactor.

1978

Summary of Events in 1978

(Note: Dates of events are approximate only.)

El Prado became National Landmark (January 13, 1978)

Electric Building/Aerospace Museum burns (February 23, 1978)

Old Globe Theater burns (March 8, 1978)

Natural History Museum political upheavals (April 27, 1978)

Construction begun on outdoor amphitheater (April 28, 1978)

City Council okays \$2.7 to restore Ford Building (May 24, 1978)

Fine Arts Gallery renamed Museum of Art (September 16, 1978)

January 5, 1978, San Diego Union, B-1. Old Forms/New Life/Saving Damsels in the Park, by Carl Ritter.

It would come as no surprise to Vince Ninteman if he is called upon to protect a fair lady one of these days in Balboa Park simply because he is head of the company removing sculptured ornamentation from the Electric Building in Balboa Park.

January 13, 1978, (San Diego) Evening Tribune, B-4. El Prado becomes Landmark . . . El Prado section of Balboa Park has been designated a national historical landmark by Interior Secretary Cecil Andrus.

January 13, 1978, San Diego Union, B-7. Balboa Park Landmark Bid Backed . . . Balboa Park has been recommended for designation as a national historic landmark by Interior Secretary Cecil Andrus. The action was requested two years ago by the San Diego City Council.

January 16, 1978, San Diego Union, B-1. Staff unrest surfaces/Natural History Museum; Tempest out of teapot; Museum loses national meeting, by Cliff Smith.

Many informants, some of whom agreed to talk only if they could remain anonymous, saw as the central issue in the dispute an administration policy instituted in 1975 to place a high priority on the ability of museum curators to obtain research grants to feed museum coffers.

January 18, 1978, San Diego Union, B-1. Controversy Blames; Museum of Natural History loses national meeting of the Association of Systematics Collections, by Cliff Smith.

January 18, 1978, San Diego Union, B-6. Our Readers Write: Natural History Museum --- Should it abandon research?, by R. R. Darling; also letter by William A. Burns.

January 26, 1978, San Diego Union, B-6. Letters from Gerald R. Johnson and George Mitrovich on museum difficulties.

January 31, 1978, San Diego Union, B-3. Deputy City Manager John Johnson puts park renovation at \$46 million, including a dozen now used by the Navy, by John Donner.

February 23, 1978, (San Diego) Evening Tribune, B-1. Paintings, books feared lost; moon rock survives holocaust, by Rita Calvano and Bill Callahan.

February 23, 1978, San Diego Union, A-1. Aerospace collection destroyed; ravaging fire burns for hours; by Ken Mimms and Richard Heimlich.

February 23, 1978, San Diego Union, A-4. Museum had Lindbergh plane model, by Eston McMahon.

February 24, 1978, (San Diego) Evening Tribune, A-1. Officials pledge reborn air museum, by Jeanette Corey.

February 24, 1978, (San Diego) Evening Tribune, B-2. EDITORIAL: From the Ashes.

The Electric Building was constructed, according to one fire official, "so as to spread fire."

And the flames that whipped through the wood and stucco structure Wednesday night left little but rubble. The San Diego Aero-Space Museum and the International Aerospace Hall of Fame, unable to acquire adequate fire insurance in the rickety, 63-year old building, have been left without exhibits and with few resources.

February 24, 1978, San Diego Union, A-1. Photos of ruins of Electric Building.

February 24, 1978, San Diego Union, A-1. Police surround canyon in hunt for fire suspect; two evade dragnet, by Mitch Himaka and Carl Cannon

February 24, 1978, San Diego Union, A-1. New aerospace exhibit pledged, by John Donner.

February 24, 1978, San Diego Union, A-1. Jenny's "death" in museum fire mourned by aviation pioneers, by Leigh Fenley.

February 24, 1978, San Diego Union, A-4. Leader says park plan to continue.

February 24, 1978, San Diego Union, B-14. EDITORIAL: Out of the Ashes.

February 25, 1978, San Diego Union, B-1. Little escapes fire; volunteers comb ashes of Aerospace Museum, by Mitch Himaka and Ernesto Flores.

March 1, 1978 (1983?), (San Diego) Evening Tribune, B-4. Councilman Bill Mitchell favors mounted police patrols to curb Balboa Park crime, by Jeanette Corey.

March 1, 1978, San Diego Union, B-6. EDITORIAL: A National Treasure (Aerospace Museum and Hall of Fame).

The plan to rebuild the collection by December 17 is as realistic as it is compelling. That is the date the museum is scheduled to reopen in the Ford Building in Balboa Park on the 75th anniversary date of the Wright Brothers' historic flight at Kitty Hawk, N. C.

March 1, 1978, San Diego Union, B-6. Letters from Patie Hansen, Bill Mitchell, Austin B. Olson and Richard Amero about Balboa Park fires.

The City Council, city administration, Park and Recreation Department, Committee of 100, Aero-Space Museum and *The San Diego Union* must share the blame for the fire in the Electric Building.

This is not the only senseless tragedy that will occur. Conditions are ripe for other fires in Balboa Park.

The Union hails the Committee of 100 as a defender of Balboa Park when this group's interest is in holding on to buildings that have outlived their lifetimes and in collaborating with other park usurpers --- such as the U.S. Navy.

Richard W. Amero.

March 2, 1978, (San Diego) Evening Tribune, B-2. "Rebuilding a Dream."

San Diego has mobilized quickly to begin the task of restoring the Aero-Space Museum and Hall of Fame in Balboa Park, both destroyed last week in a fire which leveled the Electric Building.

March 2, 1978, (San Diego) Evening Tribune. Letter, Mrs. Jan Davis is angry about Balboa Park blaze.

March 4, 1978, (San Diego) Evening Tribune, C-2. Letter, Bea Evenson thanks Copley press for its support toward the rebirth of the Aerospace Museum.

March 6, 1978, San Diego Union, B-3. Report due on Organ Pavilion, by Carl Ritter.

A report, prepared by George T. Szabo, a local architect under contract to the city, on work and materials necessary to restore the deteriorated Spreckels Organ Pavilion will be submitted Thursday to the council's five-member Public Facilities and Recreation Committee.

March 7, 1978, B-3. Balboa Park Committee makes recommendations to prevent future fires, by Ken Mimms . . . demolish the Administration Building, refurbish the House of Charm and its adjacent arcades, and reconstruct the House of Hospitality..

March 8, 1978, (San Diego) Evening Tribune, A-1. Old Globe fire connected to two arsonists, by Martin Gerchen and Ozzie Roberts.

The Old Globe Theater, for more than 40 years, the center of San Diego's cultural life, died in flames this morning.

March 8, 1978, (San Diego) Evening Tribune, A-1. Tribune offers \$2,500 reward for information leading to the arrest and conviction of the arsonists responsible for the fires that destroyed San Diego's Old Globe Theater and the Aero-Space Museum.

March 8, 1978, (San Diego) Evening Tribune, A-1. In a flash, dreams gone, by Barbara Herrera.

For many of the people who stood viewing the burned-out shell of the Old Globe Theater today, it was as if a part of their lives had gone up in smoke.

March 8, 1978, (San Diego) Evening Tribune, A-1. "Hate that smell of smoke," by John Sinor.

The Cassius Carter's curtain will go up at 8 tonight as usual, and we expect to have "The Sunshine Boys" (the play at the Old Globe) at an alternate site by tomorrow night.

March 8, 1978, (San Diego) Evening Tribune, A-1. "New Globe" considered, by Jeannette Corey.

Two weeks ago when Balboa Park's Electric Building burned to the ground, city and Aero-Space Museum officials predicted that "like a phoenix" the Aero-Space Museum and Hall of Fame would rise out of the ashes.

Today, two such miracles are needed.

March 8, 1978, (San Diego) Evening Tribune, A-8. Experts ponder reasoning of arsonists, by Gus Stevens . . . Is it love? Hate? Jealousy? Getting even with society?

March 8, 1978, (San Diego) Evening Tribune, E-1. Early Globe days recalled; new theater seen rising from ashes, by Kay Jarvis.

Lowell Davies, an attorney and long-standing member of the Board of Directors of the Old Globe, said that some of the greatest technicians and actors in today's theater have begun their apprenticeships at the Globe.

"That won't end. Theater doesn't die, you know. It goes on," Davies said, his voice breaking.

March 8, 1978, (San Diego) Evening Tribune, E-1. "Sad, sad day" leaves actor C. Wayland Capwell in mourning, by Frank Stone.

March 8, 1978, (San Diego) Evening Tribune, E-1. Loves' Labor Lost: Playhouse caringly built, won starring role, by Bill Callahan . . . From its inception, the Old Globe Theater held a special meaning for both San Diegans and visitors.

March 8, 1978, San Diego Union, B-6. EDITORIAL: (Motor) Scooters are better.

Councilman Bill Mitchell wants mounted police to keep watch over Balboa Park. He envisions the primary function of the mounties would be to curb the park's rising crime, and secondarily to make the park more picturesque.

March 9, 1978, (San Diego) Evening Tribune, A-1. Rewards totaling \$5,000 spur firebug search.

March 9, 1978, (San Diego) Evening Tribune, A-1. Old Globe plays in new sites; Shakespeare fete defies blaze . . . Superior Court Judge Charles Froehlich, Jr., president of the Old Globe Board, said, " . . . our plans are to hold the Shakespeare festival, Just how and where is up in the air right now."

March 9, 1978, (San Diego) Evening Tribune, A-1. Park buildings found lacking in fire safety, by Martin Gerchen and Ozzie Roberts.

The number of park buildings protected by sprinkler systems can be counted on one hand --- there are five. They are the auditorium in Casa del Prado, the Balboa Park Club, the Timken Art Gallery, the Fine Arts Gallery and the Reuben Fleet Space Theater and Science Center.

March 9, 1978, (San Diego) Evening Tribune, A-2. Storm cut swath through trees, by Paul Cour.

Trees in Balboa Park have been hit heavily as the ground is softened by the rain and the winds blow. Damage has been particularly heavy on the west side of the park.

March 9, 1978, (San Diego) Evening Tribune, A-4. Fire site combed for clues, by William Polk.

While the mystery of why the two San Diego landmarks were torched remains unsolved, arson investigators quickly determined where the fires were set at both locations.

March 9, 1978, (San Diego) Evening Tribune, A-4. "It's for the people." . . . Theater staff vows the play will go on, by Barbara Herrera.

Within hours of the fire yesterday board members were searching for a new location for tonight's performance of "The Sunshine Boys" --- Neil Simon's play which had been on stage at the Globe.

March 9, 1978, (San Diego) Evening Tribune, A-4. Lost plane may land in exhibit . . . An oceanographic firm located in Sorrento Valley announced yesterday that by sheer chance one of its submersibles discovered the intact remains of what may be a World War II fighter plane that may duplicate one lost in flames..

March 9, 1978, (San Diego) Evening Tribune, A-4. Undercover police officers --- some riding bicycles --- aid firebug watch, by Patricia Dibsie.

March 9, 1978, (San Diego) Evening Tribune, D-1. M. H. Golden Construction Company in 1935 raised theater in 25 days; was paid \$17,493 by the English Concessions Corporation, by Alison Da Rosa.

James F. Mulvaney said an insurance settlement on the Old Globe would provide \$600,000 toward the rebuilding, leaving \$1.65 million to go.

April 23, 1978, San Diego Union, F-1. The quacks keep nibbling at museum row, by James Britton, II.

Is our row of museums (El Prado in Balboa Park) being nibbled to death by ducks? Or is it going to become one of the world's most satisfying combinations of cultural establishments?

It has the potential for the latter, but greatness can't happen by blind chance. Trouble is, no one's in charge. The Park and Recreation Department, the Park Board, the Balboa Park Committee, the Intermuseum Council, the Department of Engineering and Development --- all have something to say. Architects and consultants enter the picture from time to time, yet there's no one to tie together all the design considerations.

Dozens of groups that have nothing to do with the museum idea claim squatter's rights along El Prado, so its fate is usually a compromise among their conflicting demands. The museums themselves are concerned about their own advantages, not about the total ensemble along El Prado. Indeed, some of them wish others would just go away.

April 24, 1978, Los Angeles Times, II, 1. Plans revealed Sunday for Old Globe second theater.

James Mulvaney, cochairman of the fund-raising campaign, said that the Old Globe restoration will cost about \$2.25 million and a new 750-seat theater costing about \$4.5 million will be built in a canyon northeast of the Old Globe site.

July 4, 1978, San Diego Union, B-2. Jared Jacobsen, musician, pledges to involve audience; organ "junkie" now at Balboa Park, by Richard Ruane.

The new master of the grand old organ in Balboa Park, who describes himself as a "keyboard junkie", intends to make his audience a part of his concert programs.

Jared Jacobsen, 29, a native of Pennsylvania, who began his musical career at 5, said the huge organ, built in 1914, "is like a Pierce Arrow as compared to a 1976 compact car."

He was named to the post of Civic Organist, the fifth person in that capacity since the organ and the park's Organ Pavilion was donated to the city's residents by John D. and Adolph B. Spreckels, with the first public performance presented on New Year's Eve 1914.

The organ, equipped with 3,492 pipes, is the largest outdoor instrument of its kind in the world.

Jacobsen, who recently gave his first performance at the pavilion, said his concerts will include "a mixture of the three B's (Bach, Beethoven and Brahms), light classical music, and popular selections."

"During the concerts I will talk to the audience, explain the music, and make them part of the program," he said.

"Everybody likes music, even the long-haired pieces, if they have an understanding of the meaning, and most accept the popular operettas," said the organist.

Jacobsen is impressed with the versatility of the Balboa Park organ and the quality of tone and the enormous sound that drowns out the noise of traffic and, to a degree, the sound of jet aircraft from Lindbergh Field.

He said, "The 64-year old organ is virtually unchanged since it was built with the exception of a new four-key board console that was installed in 1935."

Jacobsen succeeds Douglas Ian Duncan, who retired after 20 years of weekly concerts that delighted hundreds of thousands of city residents and visitors.

The concert program includes a one-hour performance at 2 p.m. every Sunday with the exception of January and February and a one-hour concert at 8 p.m. on Mondays during the summer months in the Park and Recreation Department's "Evenings in the Park" program.

Jacobsen began his musical career at summer sessions at Chatagua Institute in New York, where he now teaches in July.

During his absence in July, a guest organist will conduct the weekly programs.

Jacobsen, director of music at St. James-by-the-Sea Episcopal Church in La Jolla, will also serve as a music instructor at UCSD beginning in the fall semester.

He said the one-hour presentation at the pavilion requires three to four hours of practice "and requires discipline of mind and body."

Jacobsen, who is 5 foot 8 tall and weighs 145 pounds, said, "A pianist or organist must train like a professional athlete. A three-week period without practice sessions is reflected in my playing ability.

"Even during vacation, at home or abroad, I feel compelled to find a piano or organ to maintain my proficiency. I'm really a keyboard junkie and need to play for piece of mind," he said.

July 31, 1978, Los Angeles Times, II, 1:1. Old Globe Theater drive will "sell" seats for \$5,000 each; \$6.3 million goal; fund drive finds going is tough, by Laurie Becklund.

August 5, 1978, San Diego Union, B-3. Temporary site still needed; Old Globe Theater says it cannot move; wants City to let the group use the site for another year..

August 6, 1978, San Diego Union, F-1. Planner John Nolen in 1908 said Balboa Park was nice, but nuisance, by James Britton, II.

A good question is whether John Nolen in 1978 would say Balboa Park should be converted to close-in residential usage. I think he would.

It is only fair to note here that, while Nolen had that massive doubt about Balboa Park, he was sporting enough to congratulate the people of San Diego on having it. Still, that was in 1908. What would he say today? And would he be run out of town?

August 13, 1978, San Diego Union, E-5. Veteran carousel is park delight, by Craig MacDonald.

The carousel was built by the Herschell-Spillman Company of Tonawanda, New York, in 1910.

Shortly after its construction, the ride was shipped to Luna Park in Los Angeles. In 1913, it was shipped to Tent City (between Coronado and Imperial Beach).

The carousel first visited Balboa Park for the 1915-16 Panama-California Exposition. For 46 years it resided at Park Boulevard and Laurel Street, but in 1968 it was moved to its present location south of the San Diego Zoo parking lot.

August 13, 1978, San Diego Union, F-6. Richard W. Amero defends Balboa Park's status.

I do not think citizens of San Diego would run John Nolen out of town, as Britton suggests, but they might be interested in setting up a fund to send James Britton back to school.

August 15, 1978, Park and Recreation Board Minutes.

ITEMS

- A. Old Globe Proposal for an Additional Theater at the Rebuilt House of Charm, Mrs. Danah Fayman (Considered by the Balboa Park Committee, 5/1/78: No Action Taken.

It was noted that the City Council has approved the concept of a Third Theater in Balboa Park, and that the Balboa Park Committee has been on record as opposing such a theater until parking problems in the park are resolved.

On May 1, 1978, Mrs. Fayman, a member of the Board of Directors of the Old Globe Theater, appeared before the Balboa Park Committee and requested that consideration be given to the proposal to locate the Third Theater in the rebuilt House of Charm. The Committee took no action, the assumption being that the matter would be passed on to the Board for a decision.

Mrs. Fayman appeared at the Board meeting to request that the Old Globe be considered for use of the rebuilt House of Charm, in lieu of the canyon site, for the following reasons:

1. The House of Charm facility would be close to other Old Globe structures.
2. The Old Globe feels a compelling need to grow with San Diego and accommodate increased population.
3. A building already exists at the site, thus overcoming the objection of developing the canyon.
4. There would be no need for additional parking, as parking would have to be provided for whomever occupies the House of Charm.

Mr. Leyton inquired as to whether the Old Globe would relinquish the canyon site if approval were given to relocate in the rebuilt House of Charm. Mrs. Fayman indicated that the Board of Directors has not been clear on the subject, but she agreed with him that it was important to get a definitive answer.

Mr. Milch announced that he and Mr. Leyton are members of the Board of Directors of the Old Globe. They have no financial interest. In the past, they have absented themselves from deliberations on Old Globe matters; however, in light of Conflict of Interest Code interpretations, and in light of the fact that there would be no quorum if they so abstained from deliberation, they would participate in the discussions and any voting. He would leave it to the Board members to weight any "prejudices" they might have.

Mr. Atkinson suggested that, if the Old Globe proposal is dependent upon including rebuilding of the House of Charm in the CIP, the proposal should be held in abeyance until such time as Council approves the project.

At that time, Mr. Sadler suggested that the Old Globe get in line with other organizations that may wish to use the building.

(Next page missing.)

C. Centro Cultural Mural, Frank Salz

Mr. Salz, director of the Centro Cultural in Balboa Park, addressed the Board. The center occupies the old water tank structure off Park Boulevard near the Naval Hospital. Redesign of the mural on the exterior of the tank was proposed. Sketches were solicited from various artists, and Mr. Gilberto Ramirez was commissioned for the mural design. Mr. Salz introduced the artist, who exhibited sketches and explained the symbolism of the proposed painting. The new mural will cover about one-third of the tank on the side facing the hospital.

The Balboa Park Committee and the Facilities Committee recommended approval of the proposed mural.

MOTION: Mr. Leyton moved Board approval. Mrs. Moss seconded the motion, which carried unanimously.

REFERRAL: Mr. Milch asked that staff secure a copy of the proposed design, and maintain it in the Community Services Division Office so as to enable staff to monitor compliance with Council Policy 700-35, Decoration of Public Structures by Private Citizens.

DIRECTOR'S REPORT

City Council Actions

K. Ford Building, Designation as Aerospace Historical Center, 8/28 #151

ITEMS

A. Revised and Proposed Fees and Charges, PUBLIC HEARING (Recommendations tentatively were scheduled to be heard by the Park Facilities and Recreation Committee, 9/28/78; as that meeting has been canceled, PF&R has tentative rescheduled the matter to 10/12/78.

1. Golf

a. Staff Introduction: Mr. Makie distributed a September 7, 1978 Statement of Revenue and expenditures for the Balboa Park and Torrey Pines golf courses for Fiscal Years 1976, 1977 and 1978. He noted the total revenues for Fiscal Year 1978 fall short of total direct and indirect expenses. In addition, the City Council, in reviewing a proposal to turn over municipal golf courses to a lessee, has indicated that the City would gain approximately \$65,000 in possessory use taxes if the courses were leased out. The total loss to the City would thus come to approximately \$111,000. Staff is proposing a revised fee schedule as follows, in order to increase revenue to approximately \$120,000.

BALBOA PARK	CURRENT		PROPOSED	
	Non-Resident	Resident	Non-Resident	Resident
9 holes weekdays	1.50	2.00	1.75	2.75
9 holes weekends	1.75	2.75	1.75	2.75
18 holes weekdays	2.50	3.50	3.00	5.00
18 holes weekends	3.00	5.00	3.00	5.00
18 holes weekdays after 3 p.m.	1.25	1.75	1.50	2.50
18 holes weekends after 3 p.m.	1.50	2.50	1.50	2.50
Monthly ticket 9 holes	7.50	10.00	10.00	12.50
Monthly ticket 18 holes	15.00	20.00	20.00*	25.00*
Student Monthly ticket	3.50	-----	5.00	-----

- Not good between 8 a.m. and 10 a.m.

- b. Report of Golf Task Force Committee, John Sasso: John Sasso, of the Golf Task Force Committee, gave the following report of the Committee's actions of July 12, 1978:

Subject: Proposed rate changes at Torrey Pines and Balboa courses

After thorough discussion of the proposed rates presented by staff, the committee:

- Agreed that under present fiscal and tax conditions, there was need for additional income for City operations of these courses;
- Recognized that present fee structures are too low in comparison with other courses in the area (Balboa rates have remained substantially the same since 1965);
- In approving the new rates, a number of committee members expressed disapproval of the disproportionate rates between Balboa and Torrey Pines. Artificially low rates have been held for years at Balboa and this accounts, in their opinion, for the fact that the Balboa course losses must be offset by Torrey Pines profits.
- Reaffirmed its position that recreational facilities must pay their own way, but must not be used as a profit course. The committee does not support the concept that golf recreational facilities should be subsidized in any way.

The committee voted unanimously to support the proposed raises in rates with one exception.

That exception is the proposal that monthly rates not be honored between the hours of 8 and 10 a.m. The committee unanimously rejected this proposal on the basis that it represents a change in policy rather than a rate change.

The committee's expression is that, if some change is required in the use of monthly tickets, that change be the subject of a future meeting of the committee where adequate public input and discussion can be held.

The committee believes that this proposed change would result in a minimal increase in income, but would also seriously disrupt the tournament activities of both the men's and women's clubs at these courses inasmuch as some members purchase monthly tickets while others pay resident rates. The devaluation of playing time on monthly tickets would also be unfair to ticket holders, many of whom are seniors.

The committee unanimously requests that the Park and Recreation Board ask staff to remove that suggested change from their proposal when it goes before the Public Facilities and Recreation Committee for preliminary approval.

The committee reports that the reservation system is working well, and that residents now have an opportunity to get on the courses without undue waiting.

As a final request, the committee wants to go on record as asking that, in the future, suggested changes in golf procedures be routed through the Park and Recreation Board, as in the past, by staff.

A. 1 c. Public Testimony

- 1) Jack Pyle suggested that the price of the monthly tickets be raised even more than

- suggested by staff.
- 2) Mr. Joe Stern, Steering Committee member of the Congress of California Seniors, and the Chairman of the Policy Committee of the Unity Action Partnership for the County, stated that attempts to recoup all costs for recreation programs would exclude the poor and those on fixed incomes. The taxpayers are entitled to the use recreation facilities at reasonable fees.
 - 3) Gerald Newport stated that when the government subsidizes recreation programs, it is rewarding those who take care of their health. This is preferable to subsidizing health care. If the City has to recoup costs for recreation programs, it would be better to do so by placing taxes on liquor, cigarettes, junk food, etc.
 - 4) Ernie Post stated that he does not feel that the municipal golf courses should be subsidized. However, users of the Balboa Park and Torrey Pines courses should not have to pay for losses at leased courses. Mr. Milch noted that the losses on the Auditor's Report are just for Balboa Park and Torrey Pines.
 - 5) Diana Keown, President of the Torrey Pines Women's Golf Group, talked about the extensive volunteer work done by her organization. She stated that the proposal to eliminate use of monthly tickets between 8 and 10 a.m. would greatly impair their tournaments.
 - 6) Mrs. Ethel Dille, President of the Balboa Park Women's Golf Group, concurred with the need to increase fees and charges, but disagreed with the staff proposal to disallow use of monthly tickets between 8 and 10 a.m.
 - 7) A. A. Bame protested the proposal that monthly tickets not be good between 8 and 10 a.m.
 - 8) An unidentified resident of La Mesa, who lives approximately ½ block from the City Limits, objected to being considered a "foreigner" for City of San Diego purposes.

MOTION/REFERRAL: Public input was closed. After considerable discussion, Mr. Leyton moved that the Board recommend approval of the proposed fees and charges, except that the proposed 8 a.m. to 10 a.m. exclusion of monthly tickets not be applied, and that the exclusion be reconsidered in nine months to allow the development of figures on what the impact would be if the proposal were to be implemented. Mr. Miller seconded the motion, which carried unanimously. In addition, Chairman Milch requested that the minutes reflect the consensus of the Board that City expenses for golf which would be recouped with increased fees and charges should exclude indirect costs, as with other fees and charges within the Department.

A. 2. Recreation

- 1) Recreation Center Room Rental (increase existing fee)

Staff Report: Mr. Jack Krasovich, Recreation Division Superintendent, stated that the current room rental rates produce approximately \$6,000 per year in revenue, whereas the proposed rates would increase revenues by \$5,250, for a total annual income of \$11,250.

Public Input: None

Board Action: Mr. Leyton moved approval of the staff recommendation; Mr. Sadler seconded the motion, which carried unanimously.

- 2) Youth Symphony Instruction Fee (increase existing fee)

Staff Report: The current fee schedule is \$5 per quarter for residents, and \$10 per quarter for non-residents. It was recommended that fees be increased to \$30 per quarter residents, and \$40 for non-residents.

Public Input: Robert Bolam, President of the Board of Trustees of the San Diego Youth Symphony stated that the San Diego Youth Symphony orchestra is one of the best non-professional youth orchestras in the country, and that an increase in fees of this magnitude would probably kill the program. He suggested that other revenue sources be found to recoup City costs.

Board Action: It was moved, seconded and carried unanimously that the revised fees be \$15 for residents and \$25 for non-residents, as it was felt that the break-even point produces an exorbitant increase; of all costs of the program must be recovered, other sources of revenue should be sought.

3) Ballet Instruction Fee (increase existing fee)

Staff Report: The fee for City residents would be raised from \$5 to \$15 per quarter, and the fee for non-residents would be raised from \$15 to \$25 per quarter.

Public Input: Mrs. Morris stated that there was insufficient notice of the Hearing, and that when notice was given, people were not told what the proposed fees would be. Mr. Milch noted copies of the agenda are mailed to the media, but only the *Sentinel* papers have seen fit to cover the Board in recent months.

Mr. Larry Sisk stated that he was interested in all youth activities, and that he was opposed to raising all fees, particularly those in the Casa del Prado. Increases such as those proposed would price clientele out of the Casa del Prado. He noted that the purpose of the Bond proposal to construct the building was to provide such an atmosphere for youth activities.

Board Action: Mr. Murphy stated that he shared Mr. Sisk's concern about pricing young people out of opportunities for recreational programs. He suggested, as an alternative, that additional funding go to such organizations to assure that those in need receive scholarships, etc. Mr. Leyton moved approval of the staff recommendation. Mrs. Schweizer seconded the motion, and it carried 8-2 (Henkel and Skill). The Chairman asked that, in the recommendation to the City Council, staff pass on Mr. Murphy's suggestion.

4) Playground Dance Instruction Fee (increase existing fee)

Staff Report: The current \$5 fee per quarter for City residents would be raised to \$6. The current \$10 fee per quarter for non-city residents would be raised to \$15.

Public Input: Mary Downe stated she was opposed to the general increase in recreation fees.

Board Action: Mr. Sadler moved approval of the staff recommendation. Mrs. Schweizer seconded the motion, which carried unanimously.

5) Athletic Field Use Fee (increase existing fee)

Staff Report: The current fee for lighted fields would be increased from \$7.50 per hour for City residents to \$10 per hour. The fee for non-City residents would be increased from \$15 to \$20 per hour. In addition, a fee for reserving non-lighted fields would be set at \$5 per hour for residents, and \$10 per hour for non-residents.

Public Input: None.

Board Action: Mr. Leyton moved approval of the staff recommendations regarding lighted and non-lighted fields, with the understanding that the matter of the fees for non-

lighted fields will be brought back to the Board in six months for review. The motion was seconded, and carried unanimously.

6) Specialized Instruction Fees at Recreation Centers (initiate new fee)

Staff Report: A surcharge of \$5 per City resident, and \$10 per non-City resident was proposed for each specialized instruction activity in order to recover costs involved in coordinating with recreation councils and operating the centers.

Public Input: Mr. Gene McElroy, Chairman of the University City Park and Recreation Council, stated that the Standley Park and Recreation Center has one of the largest fee programs in the City, and that the Recreation Council feels that the proposed surcharge is good in that it will help maintain a full program.

Board Action: Mr. Sadler moved approval of the staff recommendation; Mr. Murphy seconded the motion, which carried 7-2 (Leyton and Schweizer). Mr. Leyton noted that he was not opposed to raising fees and charges when it can be determined that costs are directly related to the program; in this particular case, the “real” costs should be determined during the budgetary review process.

7) Community and Municipal Adult League Fees (initiate new fee)

Staff Report: Current fees related to community and municipal adult sports leagues have been assessed to recover the cost of officials, equipment, awards and the like, without charging a fee to recover administrative and operating expenses. It is proposed City resident teams pay \$35 per team per season for indoor team sports, and \$70 per team per season for outdoor team sports.

Public Input: Mr. Lanny H. Prewitt spoke in opposition.

Board Action: Mr. Sadler moved approval of the staff recommendation, with the notation that it be applied only to teams exclusively using City fields; staff would develop an equitable fee per diem for traveling teams. The motion was seconded and carried 7-2 (Leyton and Schweizer).

Mr. Sadler noted that, if the City is going to charge fees for this reservation process, the fields should be well-maintained. It was noted that the \$35/\$70 charge was only to cover the cost of the Recreation Division, not the Park Division.

8) Organized Youth League Fee (initiate new fee)

Staff Report: Staff proposed that the current non-charge policy be replaced with a \$10 per team per 16-week season for City resident teams.

Public Input: Mr. McElroy indicated that his organization would probably have to withdraw its current \$1200 per year contribution to upgrade the fields in order to pay this new fee.

Board Action: Mr. Milch suggested that, in this case, perhaps the amount of revenue would not justify losses such as those suggested by Mr. McElroy. Mrs. Schweizer moved that the staff proposal be rejected. The motion failed for lack of a second. Mrs. Henkel moved approval of the staff recommendation; Mr. Skill seconded the motion, which carried with 4 yeas (Green, Henkel, Sadler and Skill), 3 nays (Milch, Miller and Schweizer), and one abstention (Leyton).

9) Junior Theater Registration Fee (initiate surcharge)

Staff Report: Currently, the Junior Theater Board of Directors assesses a fee of \$25 to meet their operating expenses. It is proposed that a \$6.50 City surcharge be assessed each registrant of Junior Theater per semester to cover City costs.

Public Input: Mr. Sisk stated that a lady had left, who would have spoken in opposition to the proposal.

Board Action: Mr. Leyton moved approval of the staff recommendation. Mr. Sadler seconded the motion, which carried unanimously.

10) Tennis Tournament Fee (initiate new fee)

Staff Report: Currently, there are no charges for the use of the City tennis courts. It is proposed that each entrant in adult tournaments be charged \$2 per entry, and \$1 per entry would be charged for youth entrants. Mr. Krasovich emphasized that the implementation of these tournament fees is the initial step in returning to the City costs for the operation and maintenance of tennis courts. Hourly usage fees and/or reservation fees or other fees are being discussed with the tennis community, i. e., San Diego Tennis Council. Further recommendations will be forthcoming to the Park and Recreation Board after various alternatives have been thoroughly explored.

Public Input: None.

Board Action: Mr. Skill moved approval of the staff recommendation; Mrs. Schweizer seconded the motion, which carried with 6 yeas (Green, Henkel, Milch, Miller, Schweizer and Skill) and 1 abstention (Leyton). (Mr. Sadler has left the room briefly.) Mr. Leyton noted that the reason for his abstention was that he wanted to wait for all the tennis fee proposals to come forth at the same time.

11) Badminton Tournament Fees (initiate new fee)

Staff Report: Currently, the San Diego Badminton Club collects fees ranging from \$2 to \$5 per entry; the City receives none of these revenues. It is proposed that the City assess a \$2 surcharge.

Public Input: None

Board Action: Mrs. Schweizer moved approval of the staff recommendation; the motion was seconded and carried 7-1 abstention (Leyton).

12) Velodrome Usage Fee

Staff Report: Currently, there is no charge for use of the velodrome. The track is open to the community seven days per week, dawn to dusk. Direct leadership is not provided for this activity. The track is reserved for competitive racing approximately 17 times per year. There are approximately 50 entries in each of these meets. It is proposed that a \$2 fee be charged per entry in each of these approved racing programs. This \$2 fee will help defray the cost of track maintenance, which is primarily resurfacing.

Public Input: John Butterfield, Chairman of the San Diego Velodrome Committee, stated that his organization had no problem with the proposed fee, but requested that there be some relaxation of current policies that prohibit advertising and admission charges.

Ed Kirkbread, representative of the U. S. Cycling Federation, National Championship Committee, stated that the facilities need finishing; that is, the infield and lighting. Advertising should be allowed, to accomplish fund-raising for this purpose.

Board Action: Mr. Sadler moved that, if the Manager wishes to forward this matter to the Council, it be done without a recommendation on the part of the Board, as it felt that it did not have enough background to make a decision. Mr. Skill seconded the motion, which carried unanimously. Staff indicated that it would probably be withdrawing this recommendation.

13) Art Mart Exhibitor Fee

Staff Report: Staff proposes that the current "no fee" policy be replaced with a charge of \$25 per exhibitor per year.

Public Input: Mr. John Hooper spoke on behalf of the 15 groups (800 artists) participating in Park and Recreation sponsored art marts at Mission Bay Park and Balboa Park. He noted that the groups have no objection to the proposed fee, but are concerned about proposals to install parking meters in the parks. He noted that such meters would not only be an additional expense to the exhibitors, but would, perhaps, curtail the public. The clubs were also concerned that senior citizens who were using the art marts for therapeutic purposes, not to make money, would, in many cases, be unable to afford the fee. He asked that some consideration be given for people over age 62.

Board Action: Mrs. Henkel moved that the proposed \$25 fee be assessed on all exhibitors; senior citizen rates will be reviewed in one year. Mrs. Schweizer seconded the motion, which carried 7-1 (Miller).

14) Physical Fitness Class Registration Fee (initiate new fee)

Staff Report: Staff has proposed that the current "no fee" policy be replaced with a \$5 fee per individual per quarter; \$2 per senior citizen, 50 years and over, per quarter.

Public Input: None.

Board Action: Mr. Sadler moved approval of the staff recommendation. Mrs. Schweizer seconded the motion, which carried unanimously.

REFERRAL: Mr. Milch asked that he be allowed to review a draft of the report to the PF&R Committee.

Mrs. Schweizer noted that the Central Area Committee asked that the proposed Recreation Division fees be reviewed by the area committees prior to any action being taken. Mr. Milch so noted this request; but, in light of what he had said under the Chairman's Report, regarding moving things forward to Council, this would not be possible.

September 21, 1978, San Diego Union, E-1. The Disney touch --- Is it fitting for Balboa Park?, by James Britton, II.

The local (Natural History) museum has been waging a monumental Struggle for Life --- that is, a battle over policy, with members testing their strength by voting on board vacancies, six being contested. The outcome will be known Monday, but may not be announced unless leaked until the annual dinner, September 29. Bon appetit!

What's the Struggle all about? In a word, it's about Disneylandishness. Opponents of the present administration say the board of trustees, lead by president Burt Raynes, is trying to escalate the Museum's display activity along Disneyland lines and, in the process, weaken the traditional attention to natural history. For his part, Raynes says he'd be glad to hire Son of Disney to help him bring the marvels of nature to a waiting world of wide-eyed wonders.

October 1, 1978, San Diego Union, B-1. Fireman say park fires set, by Roger Showley.

A string of small fires --- including three apparently deliberately set in brush --- struck the west side of Balboa Park last night.

October 1, 1978, San Diego Union, F-8. California Building restoration job nears completion.

The \$1.62 million federally-funded restoration by the M. H. Golden Company is scheduled for completion in October and at a fraction of the cost that replacement would have demanded, according to Dave Welshans, Golden's project manager.

October 2, 1978, Unity of City Lauded; 2,000 Attend Memorial Rites for 144 Victims of Air Crash, by Roger Showley (illus.).

An estimated 2,000 persons gathered at the Organ Pavilion in Balboa Park yesterday afternoon to hear Mayor Wilson, county Supervisors Chairwoman Lucille Moore and nine religious leaders eulogize the victims of last Monday's tragic airplane crash over North Park.

Large and small bouquets graced the pavilion, along with 1,000 red roses given anonymously. The bouquets were later placed at the scene of the crash.

In a poignant gesture, organizers of the memorial service invited families of the victims and the audience to file past the podium and take one of the roses as a memory of the occasion.

There still were mourners sitting in the outdoor theater afterwards, clutching their roses, some sobbing over the loss of a loved one.

The half-hour service under a bright blue sky was interspersed with organ music played by Jared Jacobsen. The audience was dressed in everything from swimsuits to business suits.

The Rev. Leonard Richardson, vice president of the San Diego Eucumenical Conference, serving as master of ceremonies, said, "San Diegans all share feels of emptiness, not knowing what we ought to do."

Moore, representing the county government, noted that she witnessed the collision of the PSA jet and Cessna 172 private aircraft.

"I had three emotions," she said. "The first was fear, though my safety was not threatened. The second was complete helplessness. The third was one of sorrow."

She added: "You people of San Diego are here today to say to those families that we do care and also to say that the tragedy will never happen again."

In an opening prayer, Rev. Ivan Sisk, executive director of the San Diego Evangelical Association, asked that relatives and friends of the victims try to avoid "accusation and resentment."

"Somehow," he said, "some good will come out of it and benefit all mankind. May this agonizing experience cause us to take a new look at ourselves --- who we are and where we are going."

Monsignor John Portman, chairman of the Eucumenical Commission of the Roman Catholic Diocese of San Diego, led the litany, which included the lines: "We pray for the rebuilding of our confidence, courage and caring. We pray for reason in the decisions that face all sectors of our community."

The Rev. Herbert Lazenby, president of the San Diego Eucumenical Conference, said in his homily, "The heart of the community has cried out in anguish and pain."

"There is one commonality that links us together, and that is our humanity," he said, adding, "We never can (go back). We can only go on. A community is in shock and is suffering, but this also is a community that is recovering."

The mayor called on the mourners to honor the dead by continuing to live.

October 6, 1978, San Diego Union, B-1. Settlement with Maryland Casualty Company gains for park fires, by Daniel C. Carson

October 6, 1978, San Diego Union, B-6. Aerospace Center work progresses, by Carl Ritter . . . Restoration work on the 43-year old Ford Building is 11 months along and essentially on schedule..

October 8, 1978, Los Angeles Times, X-17:2-3. Restoration begins on Balboa Park's California Building; part of a \$1.62-million federally funded restoration project.

October 15, 1978, Los Angeles Times, IX, 7. Miami Beach, Art Deco capital, shines brightly, by Jay Clarke.

October 15, 1978, San Diego Union, F-1. Aerospace conversion --- growing pains seen at Ford Building, by James Britton, II.

Having accepted the Aero-Space Museum as tenant . . . , the city should insist on converting the central patio into the climatic exhibition space that it clearly wants to be.

A geodesic dome . . . could be mounted atop the giant circle of the Ford patio.

The most surprising climax for the building would be a giant Atlas rocket posed to lift off from the entrance pedestal.

Historic preservation is one of the best things America does --- when it works, but this particular preservation program is for the birds.

October 29, 1978, San Diego Union, F-1. One Star Pupil, Richard Requa: Did San Diego have a school of architecture?, by James Britton, II.

He (Requa) proceeded to develop the Palisades area as he fancied the ancients would have done if the enjoyed modern technology. The result was an architectural disaster, neither convincingly tradition (like Goodhue's) nor significantly modern for the most part.

In the Palisades, Requa didn't even achieve the "sense of Place" that Goodhue et al got in El Prado. His plaza was so broad that unity had a poor chance to start with. Today the plaza is filled with parked cars rather than the gardens Requa planned, so the disunity is more apparent than ever.

Three of Requa's weak designs in the Palisades --- now called the Conference Building, the Gymnasium and the Federal Building --- should be studied in comparison with designs Frank Lloyd Wright did a decade earlier when Wright was under the spell of the mighty Mayas.

November 3, 1978, San Diego Union, B-1. Park buildings to close under fire code, by Ken Mimms and Mitch Himaka.

Those buildings to be closed include:

- The Municipal Gym
- The Palisades Building
- The Conference Building
- The Centro Cultural de la Raza

The ballroom and public assembly areas of the House of Hospitality and the San Diego Art Institute in the House of Charm also will be closed.

December 20, 1978, San Diego Union, B-1. The House of Charm --- park building may fall, by Daniel C. Carson.

The House of Charm could fold like a house of cards, a city engineer indicated yesterday, and other Balboa Park buildings may have such extensive structural problems that it could be cheaper to demolish rather than repair them

John Costa, senior structural engineer, said an engineering study of six park buildings by a private firm is not yet complete. However, he said the city's own inspection last November showed that several of those six buildings were plagued by rotting columns, weak foundations or sagging beams.

He said it was even possible that the House of Charm could collapse.

"I've seen places where termites have eaten through the columns, and they don't even touch the pilings," said Costa. "Actually, all those wooden buildings over three are very bad . . . The House of Charm is one that we suspect is probably the worst."

That building was only one of six structures closed, at least in part, by fire marshals on November 3. The Hall of Champions in the House of Charm was left open.

The city also closed the Municipal Gym, the House of Hospitality ballroom, the Palisades Building, the Centro Cultural de la Raza and publicly used sections of the Conference Building.

A variety of clubs and organizations using those areas were forced to find other temporary quarters or cease their activities. The Art Institute has moved from the House of Charm to the Community Arts Building at Third Avenue and E Street, but the Model Railroad Club could not move its displays and simply closed up temporarily.

City Fair Marshall C. W. Van Rickley said that six wood-frame buildings were fire hazards and that automatic sprinkler systems would have to be installed before they could be completely reopened.

The City Council, obviously anxious to reopen the buildings as soon as possible, yesterday voted to invite bids of installation of that system. The council will decide later whether it will actually approve contracts for the work.

A study by the engineering firm of Atkinson, Johnson & Spurrier was approved earlier by the council so the city can later determine if it is feasible to install sprinklers.

But the study, it turns out, is really more significant than that.

City Manager Ray T. Blair, Jr. said yesterday it should indicate whether some buildings are so unsafe that it would be cheaper to demolish them than to make them safe.

He told the council, "It is possible that one or two may not be able to be reconstructed, but may have to be demolished."

Of the six, Centro Cultural de la Raza appears to be in the best shape and least in danger of demolition.

City Engineer James Casey said during an interview that many park buildings, some of which date back to 1915, were intended to be temporary.

The House of Charm has already experienced structural failures, which have been temporarily repaired, he said. About 15 months ago, he said, the Art Institute, a House of Charm tenant, had to be closed for a five-or six-week period because trusses had buckled and other supports had failed.

He said he did not know what it would cost to permanently solve the problem.

He said the situation may have been worsened by a lack of structural maintenance in years past. "Maintenance is a problem," Casey said. "When you're pressed for funds, maintenance is one of the first things to go."

December 20, 1978, B-3. Spreckels Organ inner works requires major restoration work, by Roger Showley.

(The Spreckels Organ) received a four-keyboard console in 1935. It was fitted with new leather and rubber cloths for its bellows in the late 1940s and early 1950s.

However, Lyle W. Blackinton, now advises major surgery.

Among problems, he said, are deteriorating leather bellows, clogged pipes and cracking valves.

December 26, 1978, San Diego Union, D-18. Going strong since 1897; future of Chicago's famous "El" train still up in air.

December 31, 1978, San Diego Union, B-3. Park fund drives for the Aerospace Museum and Old Globe Theater appear to be a mixed bag at year's end.

December 31, 1978, San Diego Union, F-1. "Charm so infectious," props hold up park buildings, by James Britton, II.

A late report is that the House of Charm (on the Prado in Balboa Park) may fall down "like a house of cards" because of decayed timbers. House of Charm? Any relation to civilization?

Civilization is based on the wisdom of the species, and we all know how sound that is. The House of Charm was a false-face sham from the beginning. That was all right for the exposition of 1915 when this was one of the big display barns. Since then the "temporary" structure, and others like it, have been kept propped up and in use because charm is so infectious.

The Old Globe Theater knows about charm. The production of Shakespeare's "A Midsummer Night's Dream" in 1978 was charming in the park, whereas his "King Henry V" was a trial, like civilization. Both plays were mounted in the "temporary" outdoor theater which the Globesters are trying now to keep in place for future seasons though it was announced at first for just one year.

The outdoor theater occupies a canyon that had its own charm before there was any building. After the soldiers of Henry retired, there remained a war, a tug-of-war, at least, between two schools of charm --- the one wanting the theater, the other wanting a "natural" canyon.

Globemaster Craig Noel dreams of expanding his famous enterprise into a performing arts center with at least three theaters. Having found a new dimension of success with the outdoor stage, his board of directors abandoned the idea of replacing it with an indoor theater on the same site. Furthermore, Noel and company have been forced to question whether it makes sense to rebuild the burned-out "original" imitation Old Globe --- which certainly would have to be much changed to meet present requirements.

Nevertheless, funds are being sought for the latter project and an architect, Eugene Weston, is wrestling plan. Meanwhile, Craig the juggler has sent another architect, Robert Mosher, to drawing plans for a theater (of the proscenium type) to be slipped into the nearby House of Charm.

Of course, the House of Charm would have to be completely rebuilt. That fits right in with the intentions of the Committee of 100, a citizenry lobby, which wants the charm part --- the facades --- rendered into long-lasting concrete wherever they still exist along the Prado. The committee also wants some facades

rebuilt that have disappeared, and is forever pursuing the big dollars needed. The group appears ready to back the Old Globe expansion in Charm.

With the Committee of 100 and the Old Globe both raising funds, Craig Noel's latest ploy may play. Thereafter, the logical step will be for the Globemaster to revive his old plan of chasing the Museum of Man out of the California Building and converting that haunted house to still another theater. It could be a far better use of the handsome permanent structure, and would be in keeping with the expressed hope of its architect, Bertram Goodhue, who in 1915 envisioned this as an auditorium.

Taken together with the neighboring Cassius Carter Centre Stage and the outdoor Shakespeare staging these developments could give San Diego a performing arts center at least as attractive as the original imitation Old Globe ever was. One shouldn't underestimate the power of architecture in this context.

The atmosphere, the ambiance --- the charm --- of the Old Globe probably had more to do with its reputation as a place of distinctive entertainment than the prevailing standards of the productions, though these be held in fond memory. The stagecraft of the Old Globe, indoors and out, is of a superior order, and is a valuable form of architecture itself.

On this point it is useful to quote the view of Professor David Gebhard (UC Santa Barbara) that all architecture aims to fulfill the function of stage sets. Die-hard modernists will bridle at that, especially when he cites as recent examples the J. Paul Getty Museum ("a first century Roman villa") in Malibu and, as he names it, "Split-Pea Anderson's Restaurant" on I-5 north of Santa Barbara.

The latter is a simulated Danish windmill. Gebhard finds it significant that the windmill actually works, producing electricity. The lesson for the Globesters is not to build a dozen windmills or any other variety of Danish pastry in the park, nor, even to rebuild the original imitation Old Globe. Rather it is to stretch their artistic sensibilities and come up with a new architectural milieu there on the Prado, incorporating the leftover charm and encouraging their architects to add true delights of design instead of tired professional cliches. The Globe veterans, and particularly Craig Noel, should be an excellent client for architecture because of their easy familiarity with design challenges.

Architects these days are trying every variety of design caper to overcome the curse of sameness rising out of modern technology. The thing to watch for in Balboa Park is that every new construction there should have quality not easily found elsewhere.

The old 1915 baroquetry of the Prado can't be found anywhere else in quite the same mix, so it remains one of San Diego's few architectural distinctions. As this stuff of dreams is transformed into tough concrete, one would expect a client like the Old Globe to maintain a worthy standard in the new interiors.

More than that one would expect the New Old Globe to combine the spaces of the House of Charm and the California Building to provide classrooms, studios, workshops --- all the appurtenances of a globeworthy performing arts center where music, dance and motion pictures, as well as stage plays are offered under quality control.

Unless this is the ultimate objective, unless the California Building is included in the complex, the placing of a theater in the House of Charm will amount to no more than opportunistic grabbiness by the Globesters.

Making the most of the New Globe will only happen if big private money attaches to the idea. Government can't supply the major funds. Our city government probably cannot even endorse such a big idea --- because of the conflicting claims of Downtown. Yet there is no reason on earth why San Diego should not consciously aim to take the main action away from New York in all the arts. What place is better qualified to do so?

Chasing the Museum of Man out of its old haunts will take some doing. The Museum is run by Victor Frankenstein's famous monster, the one made familiar for all time by the late Boris Karloff's movie rendition. When last seen in Mary Shelley's account, the monster had vanished in the polar ice fields. But,

like so many other senior citizens, he finally settled in San Diego and proudly assumed the name of his flattering filmic impersonator, Boris Karloff II.

As spiritual leader of the Museum of Man, Karloff II attracts talented people to work there in the dank, dark, dungeony passages. What's Karloff up to? Why, he's cloning about. He's trying to make a whole tribe of monsters like himself, using the Museum's vast collection of bones. Knowing the public's fascination with lugubrious make-believe, he lets people into his museum on a paying basis. Monsters need cash too.

As the misanthropic Karloff II operates it, the place comes on as a Museum of Anti-Man, and is tolerated by a time that also welcomes anti-Art. He has begun to see the light, however, and has proposed that a huge glass blister be built attached to one side of the California Building as a space for expanded exhibits.

Architecturally, the blister is a monstrous idea because the one aspect of the California Building that ought not to be changed is its carefully composed exterior. The interior does need artful alteration, for its chief feature now is a horror-movie echo due to the configuration of the dome.

Where's the Museum of Man to go then?

Karloff and company should pick up their bones and march one mile south to the Palisades area of the park, where they could become good neighbors of the new Aero-Space Museum. The area has a number of large, disposable structures which could be replaced when funds allow. Meanwhile, one or more of the barns could be halfway houses where the minions of Karloff II could set about evolving from ingrown to outgoing in their policy.

They should be inspired especially to develop outdoor exhibits. Light and air will do wonders for the monsters.

The grand aim should be to make the Palisades a permanent exposition on a non-commercial but still paying basis --- a demonstration of the best efforts of civilization, with our reformed Museum of Man reaching out to connect the millions to their heritage.

Date unknown, Los Angeles Times, II, CC-1,6.. Ethnic cottages threatened; City seeks 260 percent rent hike for park facilities, by Laurie Becklund.

The city of San Diego is proposing a 260 percent increase in rent for the 15 cottages of the House of Pacific Relations in Balboa Park --- a hike some of the cottages claim may force them to close.

Rent for the international cottages and their Hall of Nations is jumping from \$2,184 a year to \$7,500 according to Jane Humes, associate city property agent.

"The increase is based strictly on what it costs to run and maintain the buildings," Ms. Humes said. "Proposition 13 doesn't have any effect on the rent increase at all."

According to a 1967 City Council policy, all nonprofit groups that lease city buildings in the park are supposed to pay the cost of maintaining the buildings.

When the lease for the houses was last set five years ago, the cost of maintaining the 40-year buildings was underestimated, Ms. Humes said.

Most of the cost increases was due to repairing plumbing, windows and locks on the aging buildings, as well as other general maintenance, she said. Utility rates also went up.

The rates were determined by tallying costs during a two-year period since the lease was negotiated and projecting future costs.

The rent increases are scheduled to take place February 1. The rent is divided among the houses.

The individual cottages, which were formed into a nonprofit corporation under the name House of Pacific Relations, have been operating since 1935, when the California Pacific International Exposition opened in the park.

Open to the public every Sunday afternoon and to schoolchildren once a month, they run on dues paid by mostly elderly people with ties to foreign countries and on donations from visitors.

"One rainy Sunday a month is just about enough to knock some houses out of being able to pay their dues now," said Harry Cowan, president of the House of Israel.

"The donations we get are mostly coins. If we get paper money, it is from people who usually ask for change."

Members of several of the cottages were reluctant to speak with a reporter because, they said, they hope to convince the City Council's Public Facilities & Recreation Committee, to cut back the proposed rent without antagonism.

"Some groups have ties with ethnic clubs around town and they may be able to survive, but others don't and I frankly don't see how they'll make it," and officer for one cottage said.

"I'd say most cottages could last another year and then would have to fold," another said.

"We probably will have to add additional money ourselves," said Virginia Fung of the House of China. "Our dues are \$2 a year now and we have about 50 members. Unlike a lot of the other Houses, most of our families are young and it could be a hardship," she said.

"But then, the senior citizens are on fixed incomes."

Six groups --- those from Colombia, Cuba, Iceland, Portugal, Lithuania and Mexico --- do not have cottages of their own and are now paying dues to participate in House of Pacific Relations events and to use the 13,000 square-foot Hall of Nations.

The House of Pacific Relations uses the hall for meetings and for some displays. Members also sue other park buildings for dances.

"We will simply have to withdraw from the House of Pacific Relations," said Clem Freres, president of the cottageless House of Lithuania. "That's all."

Freres said some members feel the city is trying to oust the House of Pacific Relations from the park because many members are aging and, in some cases, membership is dwindling.

"But what else would they do with the cottages: Put up hamburger joints: There are enough shops in the zoo and the museums now," he said.

Ms. Humes denied that the city is in any way trying to get rid of the small stucco community.

Mary Ann Oberle, Balboa Park community service superintendent, agreed.

"The idea is for all buildings to pay for themselves," she said. "My own feeling is that this is a little high, though. This group just doesn't have any way of making money unless they could sell something."

"But that opens the door for commercialism, and I, for one, would not like to see that there."

California Building restoration completed (September 16, 1979)

January 2, 1979, (San Diego) Evening Tribune, A-3. Outdoor stage wins stay at Old Globe site, by Lynne Carrier.

January 3, 1979, Los Angeles Times, II, 1. City gives Old Globe three-year permit for Outdoor Theater, by Richard C. Paddock.

The Old Globe's temporary theater in Balboa Park won a three-year lease on life from the San Diego City Council Tuesday, even though managers of the theater had sought an extension of only one year.

Mayor Pete Wilson surprised critics of the temporary structure when he proposed making the theater permanent.

"I not only favor this (the one-year proposal), but I favor retention indefinitely," Wilson said to open the council discussion of extending the theater's temporary use permit,

The open-air auditorium, built hurriedly after the historic Old Globe Theater was destroyed by fire in March, "is a decided asset," the mayor said. "It would be foolish not to retain it indefinitely."

However, after a brief discussion, the council unanimously agreed on a three-year permit because that time limit would conform to an environmental impact report evaluating the effect of the theater on the surrounding park.

The decision was a clear reversal of the position the council took when it allowed the temporary structure to be built on the condition that it be torn down after the summer season.

Art Casey, executive director of Citizens Coordinate for Century 3, an organization that has opposed keeping the temporary theater, said he was "flabbergasted" by the council's decision.

"We have opposed it and we were ignored," Casey said, adding that traffic congestion and parking problems should preclude the temporary theater from becoming permanent.

Casey charged that the environmental impact report had not addressed the traffic problem properly, "Nobody is talking about the problems here in the park," he said.

"Our position is that the congestion in the Prado area of Balboa Park is already intolerable. I wouldn't care to see any theaters in Balboa Park," he said.

Originally the temporary theater was constructed only for the summer season of 1978. In the rush to complete the 676-seat auditorium, the City Council waived environmental reviews with the condition that the structure be dismantled after last October.

The City Council also stipulated that the site of the theater, a small canyon next to the Old Globe, be restored to its natural state.

But now that the theater is in place, and the city has caught up on its environmental reviews, the temporary structure has an excellent chance of becoming a permanent theater.

"I'm not sure that after the Old Globe is rebuilt that the new facility should come down," Councilman Bill Lowery said at the meeting Tuesday.

After the council decision, Old Globe President Charles Froelich, Jr., a Superior Court judge, said, "I think the council recognized the situation we're in. When we initially wanted to use the canyon site, we didn't know what the future would hold.

"We only asked for a year to get us through the (last) summer. It became obvious we would need it for this summer also," he said.

But even when the theater organization asked for an extension until October, Froelich said, "It was pretty clear that we weren't asking for enough."

Froelich estimates that the earliest the Old Globe Theater could be reconstructed would be in time for the 1980 winter theater season.

The theater organization has raised between \$1 million and \$2 million of the \$4 million needed to rebuild the historic theater, modeled after the Elizabethan-era Globe theater in London.

Architects are drawing up plans for the theater, and Froelich said the organization is applying for federal funds to aid in the reconstruction.

Construction would begin as early as this summer, he said.

Retaining the temporary theater and reconstructing the Old Globe are not the only projects the Old Globe group plans for Balboa Park. Froelich said the theater organization also has applied to rebuild the House of Charm as a theater.

The Old Globe hopes to obtain more federal money to renovate the city building, which was closed last year to meet city safety standards.

Froelich admitted that traffic in Balboa Park is a problem, but he said, "With proper parking planning, the increase of the Globe to its three-theater final objective would be feasible.

"For the last 15 years we've been talking about construction of a third theater. We are not abandoning that goal, but I would like to stress that all we're really trying to do right now is reconstruct the burned-out Globe."

The building (of the outdoor theater) took only 100 days.

"I don't think we lost anything. We weren't organized for the campaign. We absolutely had to build the theater first."

Mrs. Mazzanti and Mulvaney were appointed to head the campaign because of their stature in the community, their personal acquaintance with people of means and their experience.

"These people are planning on giving \$500 but they'll give \$1,000," Mrs. Mazzanti said assuringly in one recent conversation with executive director Shaw. "You can count on it."

Surprisingly, the Mazzanti-Mulvaney team comprises about the only people on the Globe's large, respected board who have had much experience with fund raising.

The board has not tried to raise a major sum for building construction since the Globe was built in 1935.

The simple truth is that the fire caught the board unprepared.

"Usually one board member says, 'Here's \$100,000,' and another says, 'Here's \$100,000,' and you're up to \$1 million before you even go to the public," remarked veteran local theater observer Chip Goodwin, president of the San Diego Theater and Arts Foundation of San Diego County.

"I know it sounds mercenary, but in this day and age you have to go out with a cold analysis and look for the guy with the political clout, look for the guy with the money, to join the board.

"It's nice to have T-shirts and barbecues and other cutesy things that generate broad based support but the most efficient money comes in big chunks."

The directors of the Old Globe were chosen mostly for their love of theater --- not for their money, nor their money-raising abilities.

Some directors have been on the board since the Globe was built 43 years ago when a big donation was \$100. President of the board, Charles W. Froelich, Jr. is a Superior Court judge who cannot easily seek to raise money without also raising ethical questions.

The result: to date board members have donated \$350,000, a goodly sum but hardly \$1 million.

According to Shaw, 1978 was to be the year the board went about revamping itself so it would be more prepared in 1979 to begin collecting money to build the long-desired Festival Theater.

"If it weren't for the fire, I'd say to hell with a capital-fund raising campaign this year," Shaw said.

Although his words may sound harsh, he spoke with a sense of humor and the conviction of a veteran runner warming up for a marathon.

A professional money-raiser, Shaw was induced out of retirement to take on the monumental task. He is a former executive director of United Way, as well as of COMBO and other organizations.

"There's just too much competition for the dollar this year. We don't have that kind of wealth base here to get big chunks of money.

"It's hard to raise money for capital funds unless a city is used to have a capital campaign or two each year. We get a major one once every four or five years. But this year it seems everybody needs new buildings. I can't remember another year like this in the last 25."

January 3, 1979, (San Diego) Evening Tribune, A-7. City Council scorecard: Ford Building . . . authorized a \$69,000 agreement with Emery Studio to restore 1936 murals in Ford Building; Old Globe . . . authorized a three-year permit extension for the temporary Old Globe Theater in Balboa Park.

The unveiling of the design and sketches of architect Eugene Weston of Liebhardt, Weston and Associates meets the criteria of a mandate issued by the Globe's Board of Directors two days after the fire.

January 9, 1979, San Diego Union, C-6. Old Globe rebuilding plans told.

January 19, 1979, San Diego Union, B-1. Balboa Park Gymnasium may open in May, by Ernesto Flores.

January 21, 1979, San Diego Union, F-1. Likes Old Globe in park; ruins, if cultural, can't hurt, by James Britton, II.

A great metropolis needs great cultural architecture, and this had best be in the center. Because San Diego citizens as a whole own the park (the Navy notwithstanding) they have territorial freedom to produce, through their leaders, the finest cultural attraction anywhere. In fact they got an impressive start at doing so in 1915, when the aesthetically best of all world exposition was created, as though of sugar and space, in Balboa Park.

Amero favors a limited amount of cultural architecture in the park, while I believe the park can stand much more, provided it has quality. As to the Battered Old Globe (theater), Amero thinks it shouldn't use more space, indeed it shouldn't be in the park at all. I disagree, as recited here December 31.

January 21, 1979, San Diego Union, F-4. Museum of Art? . . . What to do with the California Quadrangle, by Richard W. Amero.

My plans do not envision the Old Globe Theater getting bigger. Ideally, the Old Globe should move downtown or to Fiesta Island, where a Renaissance Fair could be held every summer. Land behind the California Building and in nearby areas, now restricted to archery use, should once more be turned into a public park. If the Old Globe's management believes they must grow or die, they should grow where they do not destroy natural beauty and do not deprive the public of their rightful commons.

January 23, 1979, Los Angeles Times, II, 4. Balboa Park oasis: hidden art of Spanish Village, by Elise Miller.

The Spanish Village Art Center Association board selects jurors who screen applicants twice a year or by special assignment.

January 23, 1979, San Diego Union, B-3. Delza Martin elected president of Old Globe.

January 24, 1979, San Diego Union, B-8. The City Council yesterday authorized spending up to \$155,000 to install fire sprinkler systems and to make minor repairs to the Municipal Gymnasium, the Conference Building and the water tank housing the Centro Cultural de la Raza.

The money for the improvements, approved by a 7-to-0 vote, will come from the city's Balboa Park Facilities Fund. The \$843,000 in the fund was received as part of the insurance settlement for the fire that destroyed the Electric Building in Balboa Park last February.

January 28, 1979, Los Angeles Times, II, 2. EDITORIAL: Commitment in the Park.

The council should not forget, in haste to take advantage of an existing situation, its commitment --- and the commitment of the theater's board of directors --- to restore the canyon site of the temporary structure to its previous natural state once the Old Globe is back in business.

January 28, 1979, San Diego Union, F-1. A relief from downtown chaos; parking structures built into the sloping sides of Cabrillo Freeway, a parkway and a car(e)-free park, by James Britton, II.

No longer would the two-lane road atop Cabrillo Bridge have to entertain autos snaking their way in and out of the park heartland. Those autos would be absorbed into the freeway-fed structures, and the people would be popped by elevator onto the higher planes of the perfect park.

Cabrillo Parkway (could) be so mightily engineered that it easily could reduce the parking dilemmas of both Downtown and Balboa Park.

February 3, 1979, (San Diego) Evening Tribune, A-1. Kids on skateboards and roller-skates who like to whirl around Balboa Park's plazas and arcades face end of roller derby.

February 4, 1979, San Diego Union, F-1. A new character at relatively low cost; giant sculptures concrete Maya screens installed throughout the Palisades could spur Museum of Man expansion, by James Britton, II.

The Federal Building seems to be beckoning the Museum of Man because it wears on its front a set of sculptured decorations modeled after the Mayan. If the gymnasium activity were provided with another place (Morley Field's the place) this sound structure still could be awarded to the museum. And there are other buildings nearby of varying quality, which could be either removed altogether or converted for museum use.

Because the mysterious Maya dealt with both Earth and universe in astonishing ways, and because their architecture is among the most impressive ever, their genius should be asked to preside over the entire Palisades and give the area a character at least as interesting as the Spanish Colonial area of the park.

February 11, 1979, San Diego Union, E-1. Delza Martin's time arrives, by Welton Jones.

"The policy now," said Martin, "is to rebuild the Globe. When its' financially practical again, we'll review the whole third theater matter. But that will be a separate project."

The theater loses money on every performance at the Spreckels. It lost money last summer on the Festival Stage. For the first time in a long while the Globe is in the red.

February 11, 1979, San Diego Union, E-8. Dr. T. C. Grove backs Art Institute; claims it should be allowed to continue at its old location.

. . . it appears the Old Globe Theater, not content with the new facilities that it will obtain with construction of the new theater, is engaging in high-pressure, behind-the-scenes lobbying to obtain the House of Charm and convert it into a third theater.

July 20, 1979, San Diego Union, B-3. Balboa Stadium razing project gains; to make way for construction of a new 3,500-seat facility..

July 24, 1979, (San Diego) Evening Tribune, B-3. City grants Zoo operator long lease, by Vicki Torres.

The San Diego Zoological Society, which has run the San Diego Zoo on a month-to-month basis for 63 years, was finally granted a long-term lease.

By a unanimous vote, with Councilman Tom Gade absent, the City Council yesterday approved a 55-year lease for the society.

Under the terms of the lease, the society will no longer have to ask the council to approve admission fee increases.

But if the society wants to charge for parking in an adjacent lot, the council must review the effect on parking in the rest of Balboa Park.

The society leases from the city the Balboa Park land on which the zoo stands, the city being legal owners of all the buildings, plants and animals.

Charles Bieler, executive director of the zoological society, has said the long-term lease will enable to zoo to obtain loans more easily.

It will also enable the zoo to raise admission fees more easily to keep up with inflation.

Bieler said the zoo plans a 25- to 50-cent admission fee increase within six months. Zoo admission is presently \$3 for adults and 50 cents for children under 16 who are not accompanied by an adult. Children who arrive with adults are admitted without charge.

July 27, 1979, (San Diego) Evening Tribune, B-3. Panel named to advise city on golf links.

A City Council committee yesterday named 10 persons to the golf advisory committee --- which will evaluate proposals for outside operation of the city golf courses at Torrey Pines and Balboa Park.

The group will help the committee to decide if the Torrey Pines and Balboa Park golf courses should be leased to a private operator, run by a city non-profit corporation, or continued as presently operated by raising green fees to make the golf programs self-supporting.

July 29, 1979, San Diego Union, E-1, E-9, E-10. Old Globe's rebirth: A Tale of Faith, by Mary Hellman.

That one-half of the Globe's reconstruction will be paid for with tax dollars doesn't surprise fundraiser James F. Mulvaney. "The Globe is on government property in a public park, he said, pointing out that board members has met with elected officials the day after the fire. "That's enough to dictate interest by local government. We knew the state would have an interest."

August 24, 1979, (San Diego) Evening Tribune, C-1, C-13. The glory and agony of the Globe's "miracle," by Bill Hagen.

Craig Noel, Old Globe producing director: " . . . in some ways I think we might have aroused more sympathy and convinced people better if we had just gone dark for a year and a half. 'We're not going to the Spreckels. We're going to cancel the season and just sit. We're not going to be able to do anything.'

"Possibly the loss of that entertainment might have been a better way to do it."

Mrs. Simon Edison made a contribution of such magnitude --- estimated at lease \$1 million --- in memory of her husband that the theater complex has been named in her husband's honor.

August 27, 1979, San Diego Union, B-6. EDITORIAL: Skating the Issue.

Roller skating has become popular this summer in Balboa Park, but not among pedestrians who up to now have had the park's walkways pretty much to themselves.

We can sympathize with the latter. Human bodies do not have fenders and bumpers, and besides one shouldn't need collision insurance to take a stroll in the park. Fast-moving skaters and slow-moving pedestrians do not mix well on the same sidewalk.

But we hope the city can find a solution less drastic than the one recommended by the Park and Recreation Board --- a ban on skating everywhere east of the Laurel Street bridge. That rules out most of the plazas and thoroughfares closed to auto traffic which lend themselves to skating.

The city's policy toward activities tolerated in Balboa Park is liberal to the point of anything goes, within the law, and does not always contribute to the wholesome atmosphere one expects in a public

park. It's too bad that a pastime as healthy and harmless as roller skating should have to come under restriction.

Surely pedestrian traffic can yield to the skaters in limited areas on both sides of the Laurel Street bridge, if necessary only on specified days or at appropriate times. Such a share-the-park approach can work if those who have wheels on their shoes and those who don't care to keep themselves sorted out.

September 3, 1979, San Diego Union, B-1. Skaters ask more room in Balboa Park to roll, by Carl Ritter.
77

September 16, 1979, Los Angeles Times, X-29. Renovation of Balboa Park's California Building has been completed at an estimated cost of \$1.62 million by the M. H. Golden Company, which was retained by the city of San Diego for the federally funded project (photo)..

October 17, 1979, San Diego Union, B-4. Aerospace Center rites held in Balboa Park, by Dave Polis.

The newly refurbished Aerospace Historical Center was presented to the International Aerospace Hall of Fame last night in front of a gathering of more than 300 people.

Opening to the public in February, it becomes the new home of the San Diego Aero-Space Museum and International Aerospace Hall of Fame.

The city received a \$2.6 million federal grant for the work, which was supplemented by more than \$2 million in donations both locally and across the nation.

October 17, 1979, San Diego Union, D-1. Electric Building's tenants tentative.

Unless there's an unexpected change of heart, Balboa Park's new Electric Building will open without the first-class list of tenants city officials had hoped for. The San Diego Historical Society and the Hall of Champions have reserved about 45,000 of the building's 100,000-plus square feet. But the major and most impressive tenant, the Natural History Museum has all but formalized its decision to remain in its present building.

The museum's new director, Arthur Allyn, Jr., has indicated the move would be too expensive, and his board of directors so far concurs. The high costs are due in part to the cost of installing interior walls and room dividers in the new building. The city can't afford to install them, it says, because of the skyrocketing construction costs.

The Pacific Southwest Model Railroad Association and the Balboa Art Conservation Center have expressed a formal interest in taking space in the building. City officials admit these groups are less than Smithsonian caliber and that their combined exhibits wouldn't come near filling the available 60,000 square feet. The Briggs-Cunningham Automotive Museum in Costa Mesa has expressed an interest in the space as has the San Diego Opera. But the opera would like to use the Electric Building for rehearsal and storage, while the park's general plan clearly reserves the space for public use only.

October 22, 1979, (San Diego) Evening Tribune, B-10. A. Llewellyn Wood, M. D., Chairman, Board of Directors, San Diego Space Museum, wants everyone to know the true name of the former Ford Building is the Aero-Space Historical Center.

Editor: I have received a large number of calls today (10-17-79) from members of the San Diego Aero-Space Museum, complaining about a photo caption in *The Tribune* that stated "the refurbished Ford Building in Balboa Park, now the Aero-Space Historical Center, was presented in its remodeled form last night to the International Aero-Space Hall of Fame."

The statement is incorrect and should be corrected to read as follows: The Aero-Space Historical Center was presented in its remodeled form last night to the San Diego Aero-Space Museum and the International Aero-Space Hall of Fame.

Last night Mayor Wilson presented to men, as chairman of the board of directors of the San Diego Aero-Space Museum, a plaque with a key to the city, after which a similar plaque was presented to Mr. Dick Knoth, representing the International Aero-Space Hall of Fame.

The museum displays one of the world's finest collections of historical aircraft memorabilia, etc.

The Hall of Fame honors individuals who have been significant contributions to Aero-Space progress.

The San Diego Aero-Space Museum and its companion organization are co-located in the Aero-Space Historical Center.

The Aero-Space Historical Center will open to the public on February 22, 1980, the second anniversary of the tragic fire that destroyed the Aero-Space Museum and Hall of Fame on February 22, 1978.

October 30, 1979, San Diego Union, D-1. Globe drive hits goal with two major grants, by Welton Jones.

The Globe Theater reached its \$6 million goal to rebuilt its burned-out theater in Balboa Park with the announcement yesterday to two major grants totaling more than \$1 million.

The grants are:

National Endowment of the Arts. The federal agency has awarded an \$800,000 "challenge grant" to the Globe with the proviso that each federal dollar be matched by three from other sources.

The Kresge Foundation. The Troy, Michigan, private foundation has awarded a \$250,000 "topping off" grant, provided the Globe can collect all funds needed for the new playhouse by May 15.

Groundbreaking for the new theater is planned for December 1, according to Globe president Delza Martin and site preparation is already under way.

November 1, 1979, (San Diego) Evening Tribune, B-10. Richard W. Amero says the Ford Building should be called the Ford Building.

Editor: The Ford Building in Balboa Park was given to the city of San Diego by Henry and Edsel Ford at the conclusion of San Diego's 1935 exposition. On May 13, 1938 and on July 1, 1948, the San Diego City Council adopted resolutions naming the building the "Ford Building." On July 11, 1940, the council accepted a bronze plaque from a grateful citizen for placement in the interior of the Ford Building which read: "The Citizens of San Diego appreciate the gift of this building by Henry and Edsel Ford 1935."

Walter Dorwin Teague designed Ford Buildings for expositions in San Diego, Dallas, Miami and New York City. The San Diego building is the only one in existence and is one of the few surviving fair buildings of the '30s. The building was designed to call attention to the Ford car. Its plan and patio fountain were in the shape of a Ford V-8. The tower was fluted to look like an automobile gear. The building's curving shape and circulation patterns paralleled the direction curves on freeway ramps and the succession of exhibits imitated assembly-line processes.

Edsel Ford visited San Diego in August 1935. In October of the same year, San Diegans saluted Henry Ford on his 72nd birthday in a concert at the Ford Bowl.

For many years after 1935 the (plan of) the San Diego Ford Building was used by the Ford Company as a prototype for its automobile showrooms.

The Ford Building was accepted into the National Register of Historic Places, April 16, 1973, as a reflection of its time and as an example of the functional, low-cost “moderne” style then popular. The building was not designed by a professional architect, but by an industrial designer who created bodies for Ford cars, Brownie cameras and electric irons. Architecture historians have lauded its simple lines.

The city of San Diego used the National Register listing to justify its requests for funds from the National Endowment of the Arts, the U.S. Department of the Interior and the Economic Development Administration to refurbish the building. In September 1977, the Economic Development Administration award the city \$2.64 million to restore the building. (One wonders how much economic development is going to take place as a result of this bequest.)

In the midst of dire economic depression, the plush, sanitized and mechanical world of tomorrow offered by the industrial exhibits at the fairs of the ‘30s diverted attention away from desperate realities. Henry Ford believed efficient and economic methods of production and management in transportation, industry and agriculture would usher in an era of peace and prosperity. For his part, Walter Dorwin Teague believed efficient and economic design would produce a society of clear-thinking, hard-working and happy people. Both Ford and Teague regarded San Diego’s Ford Building as a realization of their ideals.

With typical obtuseness, the San Diego City Council has recently changed the name of the Ford Building to Aero-Space Historical Center, as it has previously changed the name of San Diego’s Community Concourse to the Charles C. Dail Concourse. In doing so, the council has bowed to the wishes of a few short-sighted promoters and has played false with the inherent identity of the Ford Building and with the memory of a crucial period in American history.

To historians, to lovers of architectural excellence, and to people who remember the world’s fairs of the ‘30s, the Ford Building will always be the Ford Building.

November 3, 1979, (San Diego) Evening Tribune, A-14. EDITORIAL: Globe Grant.

We have been as guilty as the next editorialist of blanket indictments of federal spending on cultural boondoggles. But sometimes it has been a case of not seeing the trees for the forest.

Let’s look, for change, at a specific case.

There hasn’t been any criticism in San Diego this week of the federal government’s grant to the Old Globe Theater for reconstruction of the burned-out stage house in Balboa Park. And we don’t think there will be any. Certainly not here.

The \$800 from Washington, which must be matched with \$3 dollars for every dollar donated by the national foundation, comes from the National Endowment for the Arts. IT is the third largest amount granted by the national agency this year.

If the other grants are as worthy as the one for the Old Globe, the National Endowment is a good steward of our tax money.

The inaugural visit of the Vienna Philharmonic and the Vienna State Opera Chorus to this country, as sported this week from Washington by Andrea Herman, *The Tribune’s* music-dance critic, is a triumphal demonstration of the inspirational and life-enhancing power of great art.

Such art has long been subsidized by governments in Western Europe. Our country has been less generous, and we have been the losers for it.

December 26, 1979, Reader. Fear, loathing in Golden Hill Park, by Joel West.

Parks are usually considered to be a positive contribution to the quality of life in a neighborhood. But to those residents who live in its vicinity, Golden Hill Park has brought bitterness and frustration.

The residents are bitter about “noise between dusk and four a.m. on any given night . . . blasting radios, yelling, smashing trash cans, honking horns” that rarely allow them restful sleep. They are bitter about crime and violence they perceive some park users as being responsible for --- “roving gangs fighting, discharging firearms, knife wielding, burglary, larceny, assault and battery.” And they are bitter about the lack of response they have received thus far from the city agencies.

Things were not always so tough for the 30-odd acres that comprise Golden Hill Park. Back in the 1890s, the affluent residents of the area’s stately Victorian mansions decided that if the city was unwilling or unable to put in a park, they would at least take up a subscription to plant trees in the area. In the early part of this century, the city took over the operation of the park, which it considers to be but the southeast corner of Balboa Park. To this day, park visitors are rewarded with a beautiful panoramic view of the San Diego skyline and the back of Balboa Park.

However, local residents claim that the park is anything but bucolic after dark. One resident who says he’s had enough is Brian Cook, who lives on the alley-like Russ Boulevard, which borders on the park’s southern edge and has become a popular early-morning gathering point. “Some nights, you hear gunshots going off, yelling and screaming,” say Cook. Though the problem has existed since he moved in two years ago, “it’s been getting progressively worse.”

The response of Cook and roommate Ann Hartman was to organize a petition drive, an effort that thus far has netted 300 signatures. In addition to voice complaints about noise, violence and litter, the signers asked for specific corrective actions: closing the park from dusk to dawn, prohibiting parking on residential streets adjoining the park, and installation of bright crime-detering lights.

Along the line, they joined forces with the Golden Hill Action group, a four-month old organization that crystallized around the issue of neighborhood noise. Together, the residents have prodded every conceivable agency from the police to the parks and recreation department to the sanitation department and to their district’s City Councilor, Lucy Killea. All, says Cook, without much of a response.

What Cook conveys about the situation in impassioned outbursts, neighbor Mark Orwoll brings off with biting sarcasm. Orwoll, who when not fighting for his neighborhood writes for *The Reader*, managed to combine both of the approaches in a quasi-fictionalized 3,000-word story entitled “This is Enough,” that appeared last month in *The Reader*. Among other things about the park, Orwoll cited the experience of two friends, who were chased down the street by “three young dolls wearing rococo beehive hairdos and decal eyes and carrying flick-sharp switchblades.”

Whether they react with outbursts of emotion or sarcasm, the residents are clearly fed-up. But with a police force spread so thin, and a (thus far) unresponsive city bureaucracy, what options do they have left? “We intend to get it on the council docket after the holidays,” says Cook. If that does not work, he suggests, they’ll take their struggle to the courts.

And just what would the residents hope to achieve by closing the park at night and restricting the parking? After citing burglaries last week of his immediate neighbors, Cook says, “They’re going to have to walk further to rip us off.”

1980

Summary of Events in 1980

(Note: Dates of events are approximate only.)

Aerospace Museum and Hall of Fame re-opened
(June 28, 1980)

City ordinance banning skating in parts of Balboa Park takes effect
(August 25, 1980)

Restoration of Spreckels Organ Pavilion completed
(October 17, 1980)

January 20, 1980, San Diego Union, E-1, E-4. Organ Pavilion's sound of music, by Donald Dierks

When John D. Spreckels gave the Organ Pavilion to the city in 1915, it was the gem of Balboa Park. The pipe organ was a unique outdoor instrument (it still is) and the center of musical life here then. And the organ's massive central housing structure, with its ornate and gracefully curving arcade arms was (and still could be) the visual focal point of the park.

Many things have changed in the 75 years since the gift was made, however, and the Organ Pavilion gradually fell on hard times --- physically and aesthetically. The popularity of organ music declined, although it is by no means extinct, and the pleasure to be taken in the instrument's music is greatly diminished by its poor condition and the annoyance of heavy traffic noise nearby.

The housing structure, if it was actually never abandoned, has for years been poorly maintained. On a number of occasions down through the years, this unique and historic civic asset was nearly lost because of irresponsible indifference.

Several years ago, for instance, a city manager suggested, in the interest of a tiny economy for the annual city budget, that the pavilion should be closed and the modestly paid city organist fired. Fortunately, this was not allowed to happen, although the future of this unusual facility looked bleak.

Then, just before the instrument and its pavilion were at the point of being beyond reclamation, a number of people, including members of city government, became interested in its preservation.

Money was raised by the Pipe Organ Committee, a subsidiary of the Committee of 100, to match a grant from a private foundation. This money is being used to recondition the chests that act as wind reservoirs for the pipes, and to replace original brittle leatherwork. This is not the complete overhaul the instrument needs, but, with some other maintenance details planned, it will keep the organ in a playable condition.

The work on the organ is the first of a four-phase plan to upgrade the organ, its building and arcades, and the surrounding environment. The work on the second phase also is under way. This is the restoration of the badly deteriorated central structure that houses and decorates the organ. Money for this came from a \$25,000 city grant and from private contributors.

City and county government grants have been important in terms of interest displayed, although not yet significant compared with the estimated total cost of the undertaking. The City Council also allocated \$5,000 to have a preliminary master plan drawn up for the area around the pavilion, and

the Board of Supervisors set aside \$50,000 to buy permanent seating for this area to replace the jumble of benches that now creates great chaos but little comfort for audiences.

Subsequent to the county allocation, however, it was decided, presumably with the supervisor's approval, to use the \$50,000 for the restoration of the decaying arcades, rather than for the intended permanent seating. The restoration of the arcades is the third part of the four-phase project.

The most costly part of the entire plan will be the work on the audience area and the surrounding setting of the pavilion. This figure is presently estimated by Ron Pekarek, who has made the preliminary drawings, to be \$375,000, but, for anyone who has ever tried to enjoy a concert, stage event or recital at the Organ Pavilion, the amount, if it creates a decent ambiance, will be well worth it.

As it stands now, the area of the pavilion is a wasteland of dreary tar paving and a tangle of movable benches that are always out of arrangement. And since there are no walkways around the tar plaza, pedestrians take shortcuts through the audience area --- never mind if some entertainment is in progress.

But, actually pedestrians are small distractions compared with the Frisbee throwers, skateboarders and bicyclists who regular avail themselves of the open spaces around audiences at the pavilion. This may be what some park administrators invariably refer to, as if it were desirable, as "diverse use."

"Multipurpose" is also a favorite catch phrase of those who do not understand that specific performing arts productions need special kinds of facilities, and, indeed, an ambiance that makes an agreeable presentation possible, an environment that helps create a sense of theater.

The theater in the Casa del Prado is a good example of a multipurpose facility that, as is usually the case, served no one well. It presently is undergoing interior reconstruction that will make it a usable theater space. Its flat floor, which created such poor sight lines for audiences, now is being raked.

The lesson to be learned from the Casa del Prado is that when it comes time to implement the fourth phase of the redevelopment project, its principal use should be clearly in mind. Should it be designed to accommodate the annual Christmas display? Should the plaza in front of the pavilion be designed to serve occasional dances and fiestas? Should its present configuration be maintained for roller skating and bicycling?

When Spreckels gave the Organ Pavilion, and when the city accepted it, its use was well defined. It was theater space, as its ample stage makes clear, and it was a place to listen to music.

Most people will agree that there is too little concert and theater space in the city now, which makes a good case for returning the pavilion to its original use. This can be done with permanent seating, control of entrance, theatrical lighting, and the creation of a comfortable ambiance.

What is not needed is a restoration intended to serve all uses, which will ultimately serve no one.

February 7, 1980, *READER*. The Marstons of San Diego Have Always Looked After Our City, by Gordon Smith.

February 7, 1980, *San Diego Union*. Automobile Museum recommended for Balboa Park.

February 12, 1980, *San Diego Tribune*. Aerospace Museum and International Hall of Fame set opening, by John Farina.

An opening of sorts will occur February 22, when the museum plans to admit the public for the first look at about 20 historic aircraft on the ground floor. Viewing will be allowed Fridays, Saturdays and Sundays.

But it will be a skeleton exhibit. Only about half of the aircraft eventually to be installed will be seen. Admission will be free..

February 18, 1980, San Diego Tribune. Many elderly avoid teens in fear of attack.

March 7, 1980, San Diego Union, B-2. Auto Museum recommended for Balboa Park.

The museum would be a showcase for 81 or more cars --- classic, racing and antique --- collected over a 30-year period by millionaire Briggs Cunningham and now located in a Costa Mesa building operated by a foundation bearing his name.

March 11, 1980, San Diego Union, B-1. Chicano Park murals vandalized, by Ricardo Chavira.

Three unidentified man, in a pre-dawn attack, hurled paint-filled bottles, damaging seven of the nearly 20 large outdoor murals. It was the second such incident within five months.

March 21, 1980, San Diego Union, B-1. U.S. Judge William Enright awarded possession of about 36 acres of Florida Canyon to the U.S. Navy.

April 9, 1980, San Diego Union. Police to heighten profile in Balboa Park.

Lt. Wilfred L. Wisswell said yesterday that plans call for more uniformed and undercover officers in the park this weekend to enforce laws against loud music and illegal roller-skating, as well as against narcotics and alcohol use, assaults and auto burglaries.

April 20, 1980, San Diego Union, C-2. EDITORIAL: Assault on Balboa Park.

On two recent weekends, the park has been the scene of disorderly gatherings that flouted laws against public intoxication and drug use and the unlicensed playing of amplified music. Bottles have been thrown, police officers injured, several persons arrested, and property damaged.

May, 1980, San Diego Magazine, Vol. 32, No.7, 108-111, 210, 212-213, 216-217. Does the Navy Hospital Really Belong in Florida Canyon? . . . A Second Chance To Get It Out of Park, by Richard Louv.

May 15, 1980, San Diego Tribune. Face-lift proposed for Cabrillo Bridge, by Dennis Foley.

The Cabrillo Bridge may get a \$400,000 face lift that would ensure the usefulness of the Balboa Park landmark for another two decades.

The City Council Monday will hear a proposal to strip off years of resurfacing layers and water-saturated dirt, under the roadway to lighten stress on the 65-year old structure..

June 17, 1980, San Diego Union, B-1. The City Council June 16, by a vote of six to one, offered 57-acres of city-owned land on Helix Heights to the U.S. Navy as an alternative site for the Naval Hospital.

June 25, 1980, San Diego Union, B-4. Aerospace Historical Center and Flight Museum to open Saturday, by Carl Ritter.

Final touches are being made to the San Diego Aerospace Historical Center in the refurbished Ford Building in preparation of the center's official opening to the public Saturday.

Since early April, the section of the Balboa Park structure housing the Aerospace Museum has been open only on a limited basis on weekends.

Saturday's dedication ceremony scheduled for 10 a.m. means that the International Aerospace Hall of Fame as well as the museum will be function from 10 a.m. to 4:30 p.m. on a daily basis while adding to the exhibits periodically.

The opening day program calls for remarks by Mayor Wilson; retired Navy Capt. Mark Starr, the Aerospace Museum's board chairman; and Richard Knoth, the Hall of Fame board chairman.

The center is located at the south end of the Pan American Plaza. The 45-year-old, 100,000-square-foot structure is circular and contains 52,000-square feet of exhibit floor, a gift shop, a 290-seat theater, a library, offices, meeting rooms and a 21,000-square-foot basement.

Aircraft restoration is continuing in the basement where a photo laboratory, fabrication shops and storage areas also are located.

This facility replaces the park building containing the museum and Hall of Fame when an arson fire destroyed it on February 22, 1978.

The Ford Building was built for the 1935 California-Pacific International Exposition by the Ford Motor Co. at a cost of \$623,037. The entire building was devoted to Ford exhibits in the Exposition period from May to November, 1935.

The structure later became the Palace of Transportation for a 1936 fair, lasting for several months, and was subsequently used by the National Guard, the American Red Cross and aircraft industry workers taking vocational courses in World War II.

It was a storage facility for the city Park and Recreation Department in recent years.

In 1973, the building was placed on the National Register of Historic Places as an exceptional example of the "Moderne" architectural style. Early in 1977 the City Council designated the building for use as the Aerospace Historical Center.

Approximately two-thirds of the exhibit floor is occupied by a collection of nearly 30 vintage airplanes and replicas of historic craft, in addition to aviation memorabilia.

The remainder of the space contains Hall of Fame displays honoring more than 60 men and women who made significant contributions to flight.

Among planes are a 1903 Wright Brothers "Flyer" replica of the first aircraft to achieve powered and controlled flight; the replica of a DeHavilland World War I bomber; a 1929 original Consolidated Aircraft Corporation two-seat sport plane; an original 1943 Grumman "Hellcat" and an original home-made 1949 "Wee Bee" which called for the pilot to fly while prone.

Among names in the Hall of Fame are Admiral Richard Byrd, arctic explorer; Jacqueline Cochran, renowned flyer; Amelia Earhart, holder of various records; Wernher von Braun, famed rocket scientist; Yuri Gagarin, Russian astronaut and first man to orbit Earth; Dr. William Pickering, director of the Jet Propulsion Laboratory; Manfred von Richtofen, Germany's "Red Baron" of World War I; and Lt. General James M. Doolittle, World War II aviation leader.

June 26, 1980, San Diego Tribune, B-10. "Show goes on" for Craig Noel.

Like many San Diegans, Noel has declined more money and more potential of fame elsewhere to remain in the city he loves and whose cultural life he has so vastly enhanced. Now he is about to turn 65 years of age. Sometime next year when the rebuilt Globe opens, Noel hopes a new

producing director will be on the scene and Noel may devote his unflagging energies to new projects.

June 27, 1980, San Diego Union. Roller Skates Association of Southern California and Emmett B. Anderson, Realtor, sued to overturn city limitations on roller skating in city parks on grounds they are pre-empted by the State Vehicle Code.

June 27, 1980, San Diego Union. Letter from Christine J. Edwards deploring conquest of Museum of Art by Brezzo, Muzzy and Board of Trustees.

In less than one year, Brezzo, Muzzy and the Board of Trustees have certainly made gains towards their selfish conquest of the San Diego Museum of Art. Their engineering feats included the shameful dismissal of the honorable director, Henry Gardiner, whose dedication helped build the collection into one worthy of the change to museum stature; firing of faithful employees whose only crime was being over fifty; the appointment of Brezzo as director without conducting a single interview of any of the qualified applicants from across the country; the avaricious salary increases of the greenhorn director; plagiarizing the credit for procuring the Gold in Eldorado traveling exhibit when the credit properly belonged to Mr. Gardiner; and turning the Museum into a form of amusement arcade with the disappointingly drab (albeit popular) Muppet Show.

June 28, 1980, San Diego Union, B-10. EDITORIAL: The Phoenix Soars.

The legend of the phoenix, the bird that rises reborn from its own ashes, goes back to ancient Egypt. San Diego can borrow it as a symbol for today's dedication and official reopening of the Aerospace Museum and International Aerospace Hall of Fame in Balboa Park.

The museum's priceless collection of vintage aircraft and memorabilia of aviation and space flight were a heap of ashes on the morning of February 22, 1978 --- the devastating work of an arsonist. Those who remember the old museum will find that, like the phoenix, it is not only reborn, but rejuvenated in its reappearance.

The now-refurbished building at the south end of the park's Pan American Plaza provides space more suitable for the museum's displays than what was available in the old quarters. While some lost treasures could be replaced, the museum is reopening with an impressive array of replicas and original aircraft. It has room to grow as an institution which can house both the past and what is yet to come in the history of flight and San Diego's continuing role in that history.

The new "San Diego Aerospace Historical Center" is above all a tribute to the men and women and machines of the age of flight, but its reincarnation is a tribute to countless others. They are the people whose belief in the museum endured a trial-by-fire, who rallied with time, money and patient craftsmanship to re-create what was lost and lay the foundation for something better. It was their spirit that took off and flew to years ago and brought San Diego the new museum opening today.

July, 1980, San Diego Magazine, Vol 32, No. 4, 8-10, t3. Letters regarding Navy Hospital . . . Hamilton Marston, Richard W. Tullar, Clare Crane, W. Alan Williams, Lyndelle D. Fairlie.

July 15, 1980, San Diego Union, B-1. Judge lifts curb on roller skating in park, by Mitch Himaka.

Superior Court Judge Judith McConnell yesterday lifted city restrictions against roller-skating in Balboa Park, including the Laurel Street Bridge, pending a trial.

McConnell issued a preliminary injunction against the city barring it from enforcing its ordinances that became effective June 1 restricting roller-skating on public streets and their adjacent sidewalks in the park.

The Roller Shakers Association of Southern California and Emmett B. Anderson, a real estate agent, had sought the injunction on the grounds the city was trying to regulate an area pre-empted by the state and the state vehicle code.

Attorney Robert Coates, representing the skaters, said McConnell's injunction would apply to parking lots as well.

July 19, 1980, San Diego Tribune, A-14. EDITORIAL: Self-curb for skaters.

Skaters won a victory of sorts this week when Superior Judge Judith McConnell temporarily lifted a city ban against roller-skating in Balboa Park and on the Laurel Street Bridge.

And we can be sympathetic with the ruling against the ordinance that became effective June 1 as it applies to the majority of skaters.

The law, however, was directed against the arrogant minority which conducts itself in such a way as to be a threat to other pedestrian traffic and to property. It is unfortunate that too often the innocent must suffer for the carelessness of others.

July 19, 1980. San Diego Tribune, A-14. Letter from C. E. Robbins stating skate rental entrepreneurs have won right to exploit and promote Balboa Park as an ideal, outdoor roller rink.

Those of use would appreciate going to the park without having to maintain constant vigilance to avoid hurtling bodies can perhaps have a small area of the park roped off for use where we can stroll quietly and try not to interfere with the rights of the skate rental shops and their customers.

July 21, 1980, San Diego Tribune, B-1. Skates off and rolling with reopening of Balboa Park to wheels, by Dennis Foley.

It was skaters, skaters everywhere in Balboa Park yesterday as enthusiasts on wheels celebrated a judge's ruling reopening the park to roller-skating.

They pirouetted in the Prado, slaloming between pillars where posted signs announce the skating and skateboarding prohibition. They roared down All-American Road, some seeming to whiz by faster than cars turning through the Plaza de Panama.

The boogies in the bandstand --- jumping trash containers and wooden benches in the Organ Pavilion --- which also had been off-limits to skaters. They clambered across the Cabrillo Bridge, which links the outskirts of the park to the central cultural core.

July 24, 1980 San Diego Tribune. Users of San Diego County parks and their facilities have accepted new or increased fees with few complaints.

July 24, 1980, San Diego Tribune, B-10. Letter from C. E. Robbins wanting to know since when have sidewalks for city pedestrians been regulated by the State.

Apparently Judge McConnell sits in her "ivory tower," never enjoying the attractions that San Diego is noted for, and doesn't know it is impossible to walk from the Natural History Museum across to the Space Theater because skaters have taken over completely.

August 1980, San Diego Home/Garden. Balboa Park, where you can jog, stroll, skate, strut, cry, laugh, jiggle, jump, bike, etc.

August 1980, San Diego Home/Garden. Plants at San Diego Zoo, by Patricia Welsh.

August 13, 1980, San Diego Union, D-1. Michael Matson, commissioned to restore facades of San Diego buildings, faces each task with an artist's pride, by Beth Mohr.

Success in making a construction material of concrete, gypsum and fiberglass was instrumental in landing him commissions for park restoration work.

"The material was lightweight, fire retardant and could be finished to look like the other buildings," he said.

"When I went up to the park to talk to the contractors, I described how I would finish that pillar. He gave me a chance at it."

The result is the finished organ pavilion. Looking at the columns and their capitals, the intricate tracery and moldings of the proscenium and cornices, it is impossible to tell the new from the original.

The Electric Building ornamentation is going through the same fabricating procedure: missing sections hand-carved in clay and plaster, soft molds made of the whole and recasting in the lightweight material..

August 20, 1980, San Diego Tribune, B-1. City's big wheels roll with punch on skater plan, by Bernard Hunt.

City officials, thwarted by the courts on their last outing, have voted to have another try at taming the roller-skaters of Balboa Park.

A four-point plan that includes advice to state to rewrite the Vehicle Code was adopted by the city Park and Recreation Board yesterday to help defuse what Chairman Dick Murphy called "a dangerous mix" of skaters and pedestrians in the park.

August 24, 1980, San Diego Union, C-2. EDITORIAL: Skaters and the Park.

Roller skating is a pleasant and healthful pastime of the young and agile. But it does not mix well with the slow-moving pedestrians who throng Balboa Park on any fine weekend. Something must be done to separate the young skaters from the not-so-young strollers before serious accidents occur.

There is plenty of room in Balboa Park for everyone, but the smooth concrete walkways and open plazas of El Prado and the Cabrillo Bridge are favorites of skaters and walkers alike. Jostlings are commonplace on the crowded sidewalks and pathways and there have been numerous complaints of collisions and injuries.

Previous efforts by the city to keep the skating crowd on the west side of the park have been defeated in court, but a new attempt, urged by the Park and Recreation Board, may be more successful. Surely the City Council can enact an ordinance that will stand up in court, if it is framed in harmony with the state laws already governing streets and sidewalks and applies only to the offstreet paths and plazas in Balboa Park.

And if that effort fails, the city should press the Legislature to amend state law and permit local communities to regulate roller skating.

Skaters have their rights and their proper places in Balboa Park. But pedestrians also have a right to enjoy a weekend outing without fear of being run over by strapping young persons flying low on wheels.

September 9, 1980, San Diego Tribune. Police will tell skaters to pull over.

San Diego police have been told to begin ticketing violators of a new city ordinance that bans roller skating in some sections of Balboa Park.

Since the measure took effect August 25, police have been given warnings to skaters who venture into the forbidden areas.

September 9, 1980, San Diego Tribune, B-5. Council vetoes Balboa Stadium rebuilding plan, by Bernard Hunt.

When and if everyone agrees to rebuild Balboa Stadium, it will be called Glenn R. Broderick Field.

Glenn R. Broderick, who died last year, was for almost a quarter of a century a track and field and football coach at San Diego High.

October, 1980, San Diego Magazine, Vol. 32, No. 12. 8, 10. Letter, More on the Navy Hospital . . . Henry E. Phelps, Captain, U.S.N., Retired.

October 5, 1980, San Diego Union, F-1. Architecture at Seaport Village, by James Britton< II.

In Balboa Park, San Diego has a great example of that same magic fakery long before Disney. In 1915 a group of quite honest American architects, led by Bertram Grosvenor Goodhue, laid out a whole "Spanish" city here for exposition purposes, and it was a universal success largely because of the artful way in which fakery was piled on fakery, making use of all the dynamic eyewash tricks of design developed through centuries by Spaniards leaning on Roman and Moorish precedents.

Goodhue and friends were real architects of the highest professional standing, not set designers, but what they produced was essentially a gorgeous collection of stage sets backed up with usable exposition spaces.

Remnants of Goodhue's masterful environmental triumph remain in the park, chiefly along El Prado (extension of Laurel Street), but the scene is intermixed now with the work of more recent architects who may have made more safe and sane buildings but certainly did not maintain the magic of ensemble that prevailed there in 1915.

All the theme parks take liberties with architecture, including naval architecture, and may be offensive to honest architects. But just ask yourself, Would California be more of less of an architectural experience and excitement for millions if all those California "classics" were done away with? Honestly, now.

October 16, 1980, San Diego Tribune, D-1 Birthday bash highlights park's 112th anniversary, by Gregg Joseph.

October 17, 1980, San Diego Union, B-12. EDITORIAL: Balboa Park Rescue . . . October 26th birthday party will show off restoration work at Organ Pavilion --- and call attention to much that remains to be done there and elsewhere in the park.

October 31, 1980, San Diego Tribune. EDITORIAL: Mini-scale Balboa Stadium.

. . . now, at the urging of Councilwoman Lucy Killea, the City Council has agreed by a 5-4 vote to allow construction of a 3,500-seat stadium in the park.

December 6, 1980, San Diego Union, A-1. Secretary of the Navy Edward Hidalgo announced his decision to locate the Naval Hospital in Florida Canyon was final.

December 17, 1980, San Diego Tribune, A-8. The City Council, by a vote of six to three, adopted a resolution calling on the President of the United States and the U.S. Congress to reverse Secretary of the Navy Hidalgo's decision to located a Naval Hospital in Florida Canyon.

1981

Summary of Events in 1981

(Note: Dates of events are approximate only.)

Fountain in Plaza de Balboa named after Bea Evenson
(May 5, 1981)

Five bronze chimes stolen from Spreckels Organ (June 15, 1981)

Groundbreaking for new Naval Hospital in
Florida Canyon (October 3, 1981)

Replacement for Electric Building to be called Casa de Balboa
(October 16, 1981)

January, 1981, San Diego Magazine, Vol. 33, No. 3, 158-163, 247+.. Treasures of the Timken, by Elise Miller.

January, 1981, San Diego Magazine, Vol. 33, No. 3.. Citizens Coordinate for Century 3: Esther Scott and Dorothea Edmiston, environmental guerrillas, by Gordon Smith.

But while Citizens' Coordinate undoubtedly lost popularity by opposing the Festival Stage, the group has gained both renewed popularity and respect by its tenacious opposition to the construction of a new Naval Hospital in Balboa Park's Florida Canyon. Summing up the group's position on the hospital issue, Clare Crane, who has a doctorate in history from UCSD, says, "Balboa Park is one of the nation's oldest and largest urban parks. Studies have shown that it's the most important tourist attraction in San Diego, and that its value as a recreational center is greater than its value for any other use."

It was partly through the efforts of Citizens' Coordinate that a proposition offering the Navy an alternative site at Helix Heights in Southeast San Diego made the ballot last June. When that proposition was approved by the city's voters, and the alternative site gained the support of Mayor Wilson and the County Board of Supervisors chairman Roger Hedgecock, it appeared the fight over the hospital might be over. But in early December the Navy announced that in spite of lower cost projections at the Helix Heights site, it would proceed with its plans to condemn park land and build the hospital in Florida Canyon.

Although surprised and disheartened by the Navy's announcement, Citizens' Coordinate and other groups still hope to forestall construction of the hospital on park land by virtue of a previously filed suit (which charges the Navy failed to produce an adequate environment impact statement for the project, and by an intensified grass-roots lobbying effort.

January 9, 1981, San Diego Union, B-3:5-6. Navy Secretary Edward Hidalgo has responded to a series of questions from the Committee for Charter Protection for Parks about his relationship with Bob Wilson and about his decision on where to build a controversial new Naval Hospital in San Diego; the committee is plaintiff in a U.S. District Court case in San Diego in which it is seeking to ban construction in the park, adjacent to the present aging Naval Hospital.

January 10, 1981, San Diego Union, B-1:5-6. President Carter's White House aide can't understand why the Navy, on the basis of available data, decided to build its proposed \$293 million regional medical center in Balboa Park instead of Helix Heights, sources said January 9.

January 13, 1981, San Diego Union, B-3:4-6. Congressional auditors, January 12, began a review of the Navy's plan to build the new medical center in Balboa Park's Florida Canyon with an eye to anticipated cost overruns.

January 14, 1981, San Diego Union, B-6:3-4. The group opposing construction of the new Naval Hospital in Florida Canyon took another step to personally interview Navy Secretary Edward Hidalgo in the matter.

January 17, 1981, San Diego Union, 1:3-4. President Carter has suspended the Navy's decision to build a regional medical center in Florida Canyon instead of Helix Heights, giving the incoming Reagan administration and the General Accounting Office time to review the controversy.

January 19, 1981, San Diego Union, B-1:5-8. A Canadian bagpiper entertained the crowd that turned out January 18 at the Organ Pavilion for the start of Maple Leaf Days, a month-long celebration saluting visitors from Canada, sponsored by the Convention and Visitors Bureau.

January 25, 1981, San Diego Union, B-3:1-4. Radio Station KOGO sponsored a celebration at Balboa Park honoring Richard Morefield, former Iranian hostage, due to arrive here January 28.

January 25, 1981, San Diego Union, B-3:1-4. The Bosco Boys bill themselves as "marvelous manipulators of multiple objects" and as experts in "buffoonery and bamboozlement"; Dan Hamilton turns his juggling pins into a maze of motion to delight onlookers in Balboa Park.

January 28, 1981, San Diego Union, B-3:6. U.S. Magistrate Harry R. McCue ruled January 27 that former Navy Secretary Edward Hidalgo must answer further questions about how and why he chose Balboa Park's Florida Canyon as the site for a new Naval Hospital.

February 1, 1981, San Diego Union, 1:6. President Reagan's top adviser Edwin Meese III, of La Mesa, said January 31, the new Naval Hospital should be built in Balboa Park "unless there are some changed circumstances."

February 3, 1981, San Diego Union, B-2:5-6. Meese called wrong on hospital site issue.

February 6, 1981, San Diego Union, B-7:1-5. Rep. Clair W. Burgener, R-La Jolla, was named to the House Military Construction Appropriations Subcommittee, overseeing funding for the new Naval Hospital in Balboa Park.

February 14, 1981, San Diego Union, B-1:1-6. Councilwoman Lucy Killea next week will ask the City Council to formally withdraw its prior support for a land swap deal intended to pave the way for construction of a \$308 million Naval Hospital in Balboa Park.

February 22, 1981, San Diego Union, F-1:1-8. James Britton II: Electric Building is all wrong for Historical Society; building could best be used by Natural History Museum and Museum of Man.

Of course, California's Department of Transportation building in Old Town should become the Museum of San Diego History.

As discussed here, February 8, the giant CalTrans office block at Taylor and Juan streets is out of place, blocking the main entrance to Old Town, the site where Europeans first settled in California. The structure could justify its existence if transformed into a museum that gives dramatic focus to local history.

The San Diego Historical Society has been wandering as restless as a ghost looking for a proper place to spread out its huge horde of memorabilia.

When the city didn't know what to do with the immense space newly created in Balboa Park (the Electric Building on the Prado), the Historical Society eagerly put in a bid and won a lease on about 50,000 square feet.

The space and the place are all wrong for their purpose, but the society is hard at work designing exhibits in a quite awkward pattern dictated by the unfortunate nature of the Electric Building.

Inside the building are two huge floors, uninterrupted except for columns every 32 feet. The Historical Society has plans to partition and partition until the sense of the space is lost in favor of a series of close-focus encounters with historical exhibits.

Director Richard Esparza and his devoted helpers may produce quite an engaging smorgasbord of history, but it hardly needs this particular space.

Should the Historical Society trade places with the CalTrans people? The Electric Building could be subdivided to house any number of highway men and the CalTrans building could easily accommodate the Historical Society displays, especially since these could logically spill out into the landscape surrounding the building and leading visitors to Exhibit A, Old Town itself.

Even an Indian Village, such as existed before the whites came, could be simulated at the front door as the introduction of introductions.

San Diego's leading benefactor of all time, George W. Marston, was on the right track when in 1929 he built the Serra Museum in Presidio Park overlooking Old Town. The Historical Society was happy there for awhile until it found expansion in that spot impractical. Hence the hunt for a new home.

If you listen carefully you can hear the Hamletic ghost of Father Marston approving the idea of keeping the Historical Society close to Old Town, where it can set the pace for trustworthy interpretation of our past. He, by the way, was not fond of Balboa Park with buildings.

If CalTrans moved to the Electric Building, the freeway buildings would find themselves under the same roof with one of the world's biggest spreads of miniature railroads, to be laid out in the same building by another tenant.

CalTrans could justify its presence in the park, and rise one up on its neighbors, if it set its engineers to designing a small car railroad to run throughout Balboa Park carrying passengers, so all the automobiles could be kept out of the park.

Dropping the facetious mask, one may note that CalTrans isn't the right tenant for the Electric Building. The building could best be used by the Natural History Museum, the Museum of Man --- or both. Yet both have already rejected it because they are not strong enough to make big moves.

Of all the misplaced museums in San Diego, the Museum of Man's anthropology is the most crippled. By ingenious contortions it has managed to live in the California Building under the tower in Balboa Park. Moving would be literally a monumental proposition, and that's one reason the management passed up a chance to take over the Electric Building.

Man's new director, Douglas Sharon, has sounded off bravely about the need for a workable museum space. He'll have a chance to expand along the Prado when, right next door to the museum's present address, the House of Charm is rebuilt. Only tenant already lined up there is the Art Institute whose crafty artists might well be enlisted in developing museum exhibits.

In all the rebuilding that has gone on and will be going on along the Prado there was a chance to create a museum complex equal to anywhere. Unfortunately, no unified concept exists.

The new Electric Building is essentially an ugly place inside behind its charming facade.

Possibly blame can be placed on the limited budget. There also was limited thinking. There is no excuse to leaving the south wall practically windowless. There is little excuse for ignoring the possibility of skylighting.

When fully in use, the building will require enormous amounts of electric lighting. Perhaps this is the more easily swallowed because the building is named Electric, but it is a poor response to the energy conservation awareness of the times. On the credit side, there is to be a minimum of air-conditioning --- though this may have to be added expensively when all the lights giving off heat are turned on and the employees wilt.

Worst fault, which indeed could be excused by the limited budget, is the failure to develop an indoor-outdoor relationship of the Electric Building to the canyon at its rear. A neighboring structure, the House of Hospitality, has such a relationship, which was generated at little expense and is popular as the Café del Rey Moro.

Again on the credit side, there is twice as much floor space as the original because a certain amount of digging was done to allow the two floors instead of the original one. With a suitable infusion of visionary money, the digging could have been continued to produce four floors instead of two. Because of height limits along the Prado, the additional floors would have to go down, not up. The southerly opening of the canyon would have made all floors light and airy.

The piecemeal work and lack of imagination in reconstructing the Prado chain of buildings compares most unfavorably with the unity of concept and the high imagination that went into the original construction of that site in 1915 --- world-class enterprise when San Diego was a small town. Now that we're a world-class city in size, we too often are crippled by small-town official policy.

Meanwhile, many cities that are faced with meaner problems overall than San Diego are bringing museum buildings along in fine shape. The latest issue of *Perspecta*, the Yale Architectural Journal (don't ask why it's published in Cambridge, Mass. by MIT Press) tells about museums of quality planned or built in Dusseldorf, Cologne, Stuttgart, Florence, New York and --- yes --- New Haven. What's more it reproduces floor plans of 30 museums for comparison --- none of them, alas, in California.

The *Perspecta* editors (or rather its advisers from the Yale faculty) assert that there is a "renewed interest in public architecture," and also anew awareness of "the validity of the architecture of the past." They find that the resurgence of the museum as a significant architectural image is "an important manifestation of these concerns."

The clear star of the *Perspecta* discussion is the ancient complex of museum spaces in Florence that includes such famous names as the Uffizi, the Pitti Palace, the Ponte Vecchio, the Boboli Garden --- none originally designed for museum purposes yet all gradually adapted by generations of architects. Comparison with our Balboa Park complex (and our CalTrans block) is most instructive.

A careful reading of issue No. 16 of *Perspecta* (the word means well-seen) will tell you that San Diego is far behind in the appropriateness of its museum facilities, though there is a great deal of rich material ready to be displayed here. Divisiveness and petty competition among the sundry museum leaders has to be replaced by a surge of higher vision. There could be no complaint if we reconstructed and adapted the conceptual power exercised here in 1915.

February 25, 1981, San Diego Union, B-1:5-6. The City Council, February 24, warned the federal government that building a Naval Hospital in Balboa Park could be far more expensive than predicted.

March 1, 1981, San Diego Union, F-4:1-4. Richard R. Esparza, executive director San Diego Historical Society, replies to James Britton's comments, February 22.

James Britton answers.

March 3, 1981, San Diego Union, 1:5-6. Plans for construction of a Central Division police station on a 17-acre site that once was part of Balboa Park were outlined March 2 at a park advisory group meeting; the Bartholomew Master Plan for Balboa Park called for park land diverted to other uses to be "returned to the park when available and appropriate"; the proposed police facility was termed "absolutely essential" to security because of recent muggings in the park.

March 5, 1981, San Diego Tribune, B-14. Police station in Balboa Park.

Police authorities are seeking a site adjacent to Balboa Park for a substation.

They need 3-1/2 acres for a one-story structure that will be headquarters for 250 officers. The land the police have in mind now is a parking lot --- once used to park the cars of football fans when the Chargers played in Balboa Stadium.

It is part of 17 acres of former park land, San Diegans voted in 1936 to turn it over to the Navy for recreational purposes. It reverted to city ownership in 1962.

The site on the southeast corner of Park Boulevard and President's Way is a good selection. It slopes away from Park Boulevard and is partially hidden from view. It is adjacent to Interstate 5 and State 163.

March 5, 1981, San Diego Tribune,, B-3. State handout of \$2.2 million may be boon to Balboa Park, Mission Bay.

Of the \$6.5 million available to local agencies throughout the county, the city is expected to receive \$2.2 million.

A large portion of that money, the City Council Public Facilities and Recreation Committee, agreed should go toward renovation of the Spreckels Organ Pavilion. The money needed to pay the \$1 million cost of the project has already been reduced by private contributions of \$131,000 each from supporters of Bea Evenson and the Committee of 100.

March 5, 1981, San Diego Union, B-1:1. The Reagan administration will decide on the site of a new San Diego naval hospital after studying a General Accounting Office report, a new environmental impact statement and the rationale for the Navy's decision last November to build in Balboa Park's Florida Canyon.

March 17, 1981, Park and Recreation Board, Minutes.

2. Casa del Prado Rental Fees - Rescheduled to April 21, 1981 Board meeting.
3. House of Charm, Reconstruction

Mr. Roberts presented the staff report of March 9, 1981 recommending that the San Diego Opera Association be granted a three-year option on the House of Charm to permit the raising of funds to reconstruct the structure for its exclusive use and occupancy, etc.

Mr. Hal Williams, President of the San Diego Opera Association, spoke on behalf of his organization and stressed that the Opera would be constructing a Performing Arts Museum, library and rehearsal hall.

Mrs. Pat DeMarce, President of the Committee of 100, spoke in support of the Association's proposal and indicated that the Committee would assist in the restoration of the building ornament.

Mr. Arnhym reported that the Balboa Park Committee recommended approval of the proposal.

Mr. Golden expressed concern that \$185,000 would be spend by the City of a "one-purpose" design. Earl Hayden, the Project Officer, responded that the design would be good for several potential users, should the Opera be unsuccessful in its fund raising efforts.

Mr. Sadler expressed concern that a Request for Proposals was not issued to solicit input from other interested organizations. Mr. Campillo responded that when an organization or institution has offered to completely fund the reconstruction of a Balboa park building, it has not been past practice to put out a Request for Proposals. He cited the Briggs Cunningham Automotive Museum proposal for the Conference Building, as an example.

MOTION: Mr. Arnhym moved approval of the staff recommendations, but asked that the report to the Public Facilities and Recreation Committee include the Board's concerns about, perhaps, going through a Request for Proposals process. Mr. Golden seconded the motion, which carried unanimously.

March 20, 1981, San Diego Tribune, B-1. Parks hurt by funding cutback; users' fees are increasing; seniors may have to pay rent, by Reggie Smith.

Mary Duncan, chairwoman of San Diego State University's Recreation Department, said, "The lower class can no longer afford basic recreation services. Areas of the city are paying higher fees and the services are deteriorating."

March 20, 1981, San Diego Tribune, B-9. Park enthusiasts can't understand why city keeps pouring money into police protection at the expense of recreation, by Reggie Smith.

Those who have watched say that the park cutbacks over the years have caused the program to deteriorate, that parks are not being maintained, that new ones aren't being developed and that vital programs are serving those who can afford to pay the fees.

March 24, 1981, San Diego Union, B-1:6. A new environmental impact study released by the Navy March 23 rates Balboa Park's Florida Canyon and Helix Heights in Southeast San Diego as "reasonable alternatives" for a new Navy hospital --- without recommending either location.

March 27, 1981, San Diego Union, B-3:6. Reps. Duncan Hunter, R-Coronado, and Robert E. Badham, R-Newport Beach, March 26 made a pitch to Defense Secretary Caspar W. Weinberger for construction of a new naval regional medical center in Balboa Park's Florida Canyon.

April 1, 1981, San Diego Union, B-1:6. The city of San Diego, March 31, took the first step toward vacating land in Balboa Park that has been chosen for a new U.S. Naval Hospital --- prompting criticism from one councilman that city leaders are "caving in" on efforts to move the \$308 million project to Helix Heights in Southeast San Diego.

April 4, 1981, San Diego Union, B-1:1-2. Wearied by a controversy that has dogged him for nine years in office, Mayor Wilson said the fight to move the new Navy hospital project out of Balboa Park "may well be" over and that there is little more he can or will do to relocate the project to Helix Heights.

April 5, 1981, San Diego Union, B-1, B-20. Higher funds, private fees eyed; can city keep its parks "green"?, by Carl Ritter.

The extensive park and recreation areas adorning San Diego like a necklace --- with Balboa Park as the 100-carat centerpiece --- face the prospect of losing luster in the years just ahead.

Finding money to entertain the polish is the key problem, and that has spurred a debate which could result in altering the future Balboa Park.

Should the city, strapped for additional funding, levy or increase fees and turn to private sources for help and expand the park's modest commercial base?

Parks and Recreation Department retrenchment is evident and administrators make no secret of the fact they are exploring ideas from groups on new way to cope with fiscal restraints.

"What ways are there to become a little bit more commercial while still retaining the park's integrity?" was the way Balboa Park manager Dave Seyfarth phrased the issue.

Seyfarth emphasized that "we don't want to turn the park into a fairground" while acknowledging that the question of permitting more vendors keeps surfacing.

Deputy City Manager Sue Williams reported to city officials that the preliminary price tag for Balboa Park rehabilitation is more than \$40 million. That much also is needed for planned improvements in Mission Bay parkland and the park system's overall needs exceed \$100 million, her tentative report said.

Armand Campillo, parks department director, informed the City Council that a form of park and recreational department deregulation in general is on the way. Special interest groups will be encouraged to take over recreational programming previously handled by the government.

Recreation professionals will not remain the sole source of such programs, but will serve as catalysts for programs in the communities, he said. This is already being done in some other operations of the park department.

Campillo's proposal for the 1982 parks department budget year, which begins July 1, is \$20.7 million, up slightly from the current \$20.2 million. With utility and other expenses soaring, 15 positions will have to be eliminated.

In addition to the staffing cutbacks, money is being saved by deferring tree-trimming for one year, and the lakes recreation program is being transferred to the Water Utilities Department.

Moves to encroach on parkland or open park policies to commercial interests in the past have been strongly countered in fights led by watchdog volunteer groups, such as the Committee of 100 and the Balboa Park Committee.

The parkland was deeded to the city nearly 113 years ago with the provision that it be "for the use and purpose of a free and public park."

Despite zealous protection of the park since then 322 acres --- about one-fourth of the total acreage -- have been surrendered to freeways, streets, camps, schools, maintenance facilities, and the Naval Hospital. Leases have been granted to a wide range of tenants.

Seyfarth expects new guidelines to come from a current study of Balboa Park by a consulting firm with the ultimate purpose of updating the park's Harland Bartholomew master plan of the early 1960s.

Several city departments and committees have been solicited for ideas on generating additional park revenues.

This last year the department dispatched letters to 11 service organizations asking if any were interested in operating city facilities. Henry Pepper, the parks department's supervising administrative analyst, terms the response from the groups as "no rejection and no acceptance."

So another set of letters is being sent, urging comments from such organizations as the Salvation Army, the YMCA, the YWCA, American Youth Hostels, Boys' Clubs, Girl's Clubs, the Jewish Community Center and the Camp Fire Girls.

Pat Perrin, a consultant to the park facilities and recreation committee, said it is proposed that the city lease or rent recreation centers and other public facilities to private service organizations which would provide programs for the public.

Private groups already have a hand in operating many of the city's 37 community centers. And senior citizens virtually run their centers.

The parks department has withdrawn from supervision of 96 school playgrounds, and the initial impact of Proposition 13 brought the dismissal of 92 employees.

Strong protests surfaced after an announcement this month that three full-time and 30 part-time Balboa Park positions would be cut from next year's budget.

This is because they jeopardize the jobs of instructors in dance and other cultural areas. Civic Youth Ballet, Junior Theater, Youth Symphony and crafts support is scheduled to end. With other measures limiting governmental spending, the parks department is moving toward changing participants in an effort to make the programs self-supporting.

Staunchly opposed to any commercial expansion in the park is the Committee of 100, which has a membership of about 2,000. Over the years, the group has proved to be the biggest helping hand for the park, showing proficiency in attracting funds from foundations and other sources.

The committee's president, Patricia DeMarce, said the group has raised \$591,000 toward restoring the organ in Balboa Park and refurbishing the Spreckels Organ Pavilion. Members also have pledged to raise \$131,000 to match an individual donation by the organization's founder, Bea Evenson.

De Marce said the organization remains steadfastly opposed to commercialization in Balboa Park --- especially in the Prado area. She said there are other ways of going, "whether by grants, bond issues, individuals and organizations pulling together . . ."

She pointed out that the Casa del Prado was rebuilt with bond money, the new Electric Building is nearing completion, the San Diego Opera Association is planning to erect a new House of Charm, the Aerospace Historical Center has been relocated in the refurbished Ford Building, the Museum of Man is ready to restore and expand into the old Administration Building, and the Committee of 100 and others who care about the park are looking toward eventual reconstruction of the House of Hospitality.

In other developments, the Briggs Cunningham Automotive Museum should in the next fiscal year complete its move from Costa Mesa in Orange County to a building it will construct on the site of the present Conference Building.

The San Diego Opera Association made a surprise proposal this month, asking for a three-year option to raise an estimated \$4 million needed to replace the decaying House of Charm, condemned for occupancy and stripped of tenants.

Still the push for needed funding has led to several suggestions for additional revenue, although many of them are seen as having little chance of passage. The proposals, which would mean a percentage of revenue for the park, include:

- Charging motorists for entry in the park, and installing parking meters.
- Allowing trade shows, small conventions or seminars and other corporate activity.
- Offering more items for sale, with the city taking a percentage of profits.
- Revival of an effort several years ago for a new theater in the park.
- Allowing artisans --- glass blowers for example --- to give demonstrations and create new works while selling their wares.
- Adding more festivals, such as the foreign cottages' first food fair.
- Having non-profit organizations take over operation of Balboa Park and Torrey Pines golf courses.
- Adding a surcharge on museum and Zoo admission fees, somewhat along the lines of the hotel-motel room tax, which already provides considerable help to the museums.

The parks department, with community service organization help, is continuing recreational and parkland expansion in the next fiscal year. Eleven new city park areas --- for future development --- will be added, with seven maintained under contract and the remainder maintained by the city.

Parks director Campillo said "it was music to our ears" when the Jewish Community Center" volunteered to take over development and operation of a University City area known as the Eastgate Mall, which will feature several playing fields, a theater and fine arts and crafts activities.

The La Jolla Theater Arts organization took over development of a recreation area in that community and he said the Rancho Bernardo Recreation Council proposes to transform extensive acreage the city holds there into park and recreation grounds.

"These are unsung hero types," Campillo said of people lending the city a hand to alleviate the financial squeeze.

But Seyfarth make it clear that Balboa Park is the cornerstone of the city's past and future recreational areas.

"The history of San Diego revolves around Balboa Park. It is a very special place," said Seyfarth. "As Balboa Park developed, the city developed. It is unusual in that it has such a variety of interests compared with most major parks.

"It offers not only culture, concerts and museums, but dances and sports activity. It is active and passive, all rolled into one. That's why people say, 'Preserve it, let's not lose something so unique.'"

April 7, 1981, San Diego Union, B-3.3-5. Balboa Park Committee recommended a 3.5 acre site at Park Boulevard and President's Way near park be used for a police substation.

April 7, 1981, San Diego Union, B-3. Council voted to spend \$60,000 to appraise 35 acres in park sought by Naval Hospital; land may be more expensive than originally estimated.

A majority of council members, who oppose construction of the hospital in Balboa Park, express hope that appraisals will show that the Navy estimate is far too low and thus push the project's cost beyond what has been allocated by Congress.

April 8, 1981, San Diego Tribune, A-9. Park skate ban ordinance gains in Assembly, by Ron Roach.

Sacramento --- A bill sought by San Diego to protect an ordinance regulating roller skating in Balboa Park from possible state preemption is on the Assembly floor.

The bill, by Assemblyman Larry Stirling, R-San Diego, would remove state preemption as grounds for a lawsuit challenging the city's authority to ban roller skating on sidewalks adjacent to roadways.

Commercial roller-skating interests have won a preliminary injunction in San Diego County Superior Court to block a regulation issued by the city manager.

However, the City Council has since adopted an ordinance to prevent skaters from mixing with pedestrians in the Prado area of Balboa Park. This ordinance is in effect, although the manager's regulation was blocked, said Deputy City Attorney Ken So.

April 8, 1981, San Diego Union, B-1:1-4. A bill that would allow San Diego and other cities to regulate roller skating on sidewalks was approved April 7 by the Assembly Transportation Committee; the bill by Assemblyman Larry Stirling, R-San Diego, was a response to problems San Diego has in trying to control the large number of skaters in Balboa Park.

April 8, 1981, San Diego Union, B-1:1-4. By unanimous City Council vote, the fountain at the Plaza de Balboa in Balboa Park is being renamed after Bea Evenson, founder of the Committee of 100; Evenson recently donated \$131,000 for restoration of the park's Organ Pavilion.

April 8, 1981, San Diego Tribune, B-1. City is failing in its goal of preserving open space and is using money put aside to pay off open-space bonds for other purposes, according to a recent city manager's report, by Vicki Torres.

April 9, 1981, San Diego Union, B-1. A private group's proposal to build a youth hostel on city-owned land in Ocean Beach is stalled because of a disagreement among City Council members about non-profit groups using city lands, by Anthony Perry.

Sixty-seven non-profit groups are currently leasing city property, including the Boy Scouts, Girl Scouts, Chicano Federation, House of Pacific Relations, YMCA, Civic Air Patrol and senior citizens organizations. The San Diego Zoo and the San Diego Wild Animal Park at San Pasqual are run by non-profit groups leasing city land.

April 9, 1981, San Diego Union, B-2:1-3. Opponents and supporters of putting a new San Diego naval regional medical center in Balboa Park repeated their arguments April 8 before House Military Appropriations.

April 13, 1981, San Diego Union, B-3:1-4. Car vandals in Balboa Park anger performers, by Cheryl Clark.

Two moonlighting agents for a security company now regularly patrol the area parking lots for suspicious-looking characters who might be watching and waiting behind the trees as the performers leave their cars and enter the theater at the Casa del Prado.

The services cost each performer 50 cents a day for a total of \$24 a night.

Although many of the troupe members insist they shouldn't have to play extra for a job that ought to be gone by their Police Department, "we have no choice," said one recent victim.

April 16, 1981, San Diego Union, B-2. Crumbling ornament on archway entrance of House of Hospitality has been repaired with volunteer efforts; money for the project came from House of Hospitality board representatives and the Committee of 100.

A safety trellis extending out within two feet of the curb is providing some building support as well as offering pedestrian protection.

Architects Don Goldman and Fred Blecksmith designed the trellis..

April 21, 1981, San Diego Tribune, A-8. A bill designed to help the City of San Diego's ordinance regulating roller skating in Balboa Park withstood legal challenges halfway through the Legislature.

A 68-8 vote of the Assembly yesterday sent the bill to the Senate.

April 21, 1981, San Diego Union, B-2:1-3. A bill that would permit the city of San Diego to continue its restrictions on roller skating in Balboa Park passed the Assembly, April 20.

April 25, 1981, San Diego Union, 1:6. The Government Accounting Office, April 24, declared its support again for the Navy's decision to build a \$308 million regional medical center in Balboa Park's Florida Canyon; opponents of the park site, including Mayor Pete Wilson, have been urging the Navy to build at Helix Heights.

April 28, 1981, San Diego Union, B-3:6. Sen. Alan Cranston, April 27, criticized a recently released General Accounting Office report supporting the Navy's selection of Balboa Park's Florida Canyon as the site of its new \$308 million regional medical center.

May 5, 1981, San Diego Union, B-2:1-3. City named big central fountain in the Plaza de Balboa after Bea Evenson yesterday, by Carl Ritter.

May 5, 1981, San Diego Union, B-3:2-3. Two environmental groups that have been fighting to keep a new Naval Hospital out of Florida Canyon were themselves recently threatened with eviction from Balboa Park, apparently because of involvement in political issues.

May 9, 1981, San Diego Union, 1:1-2. The dispute over where to locate a new Naval Hospital still finds San Diegans seriously split, according to a San Diego poll.

May 9, 1981, San Diego Union, B-1:2-4 and May 11, 1981, B-3:5-6. Foes of the proposed Naval Hospital site are referring to it as the "Park Boulevard plan" instead of the Florida Canyon plan, but to the shifting of the design of the hospital to accommodate discovery of an earthquake fault in the area.

May 12, 1981, San Diego Union, B-2:1-3. Opponents of building a \$308 million Naval Hospital in Balboa Park, May 11, publicly chastised Mayor Wilson for not lobbying hard enough in Washington, D.C. to block the project.

May 12, 1981, San Diego Union, B-2:2-3. Correction of map showing proximity of proposed Naval Hospital structures to existing Balboa Park buildings; maps appeared May 9 and May 11 in the *San Diego Union* were incorrect.

May 14, 1981, San Diego Union, B-3:5-6. In what may have been its final opportunity to testify on the matter, San Diego's city government May 13 tried to persuade a Senate subcommittee to overturn the Navy's decision to build a new \$308 million regional medical center in Balboa Park's Florida Canyon.

May 20, 1981, San Diego Union, 1:1. The City Council has decided that further legal maneuvers to block construction of a new Naval Hospital in Balboa Park would be futile and has instructed the city attorney to negotiate the highest compensation for the loss of 37 acres of parkland, several council members indicated May 19.

May 21, 1981, San Diego Union, B-2:1-3. Foes the plan to build a new Naval Hospital in Balboa Park are angered over city ending legal opposition.

May 22, 1981, San Diego Union, B-6. Balboa Park, a haven of plenty, by Carl Ritter . . . From the cultural to the mundane, Balboa Park is a place to blend into a crowd or find solitude; nature in its purest form exists here alongside cultural sheen; the park with its zoo, museums, plants, athletic events, organ recitals, and much more only a few minutes drive from the center of downtown is 1,074 acres of variety.

May 23, 1981, San Diego Tribune, A-1, A-6. Automotive Museum at starting line, campaign will begin Tuesday, by Gary Shaw.

A campaign to bring the prestigious Cunningham Automotive Museum to Balboa park will begin Tuesday with the donation of a 1936 Triumph Square.

May 25, 1981, San Diego Union, 1:5-6. Defense Secretary Caspar Weinberger said May 24 he has not ruled out Helix Heights in Southeast San Diego rather than Balboa Park as a site for a new Naval Hospital.

May 27, 1981, San Diego Union, B-1. 1936 Triumph Squire held in trust for Balboa Park museum; first step taken toward Automotive Museum to be constructed on the site of the present Conference Building, by Carl Ritter.

May 28, 1981, San Diego Union, B-2:1-3. The San Diego City Council May 27 voted unanimously to ask a federal judge to delay indefinitely the eviction of the city from Balboa Park land proposed for a Naval Hospital.

June 1, 1981, San Diego Tribune, B-10. Letter, "Farewell" to Conference Building, by Margaret Berube, Mission Gorge.

The thousands of petitions against losing this building from the various people who use it were turned over to the City Council and ignored!

My remark, "How money talks," brings agreement from all I know.

June 4, 1981, San Diego Tribune, A-6. State's big wheels persuaded to amend curb on roller skaters.

Sacramento (AP) --- A group that skated from Oakland to Sacramento to protest against legislation that could restrict roller skating has scored a partial victory.

The skaters were concerned with a bill by Assemblyman Larry Stirling, R-San Diego, to let cities and counties restrict or ban skating on sidewalks and streets.

Their protests prompted some changes in the bill, which was sent to the Senate floor of a 4-1 vote of the Local Government Committee.

Stirling agreed to allow local governments to act only by ordinance, which requires a hearing at which members of the public can testify.

Stirling also agreed to give local governments the power to "regulate" skating rather than to "prohibit or restrict" it.

June 5, 1981, San Diego Union, B-1:1. With a decision still hovering on where the new Naval Hospital will be built, the city of San Diego June 4 won another reprieve on removal of its plant nursery from Florida Canyon, priority site for the new navy medical center.

June 5, 1981, San Diego Union, B-14. Letter, Robert D. Wallace, San Diego.

If anyone looks closely at the House of Hospitality in Balboa Park he will be shocked to see how badly the stucco decor is crumbling away, despite its many coats of paint.

I hope that the city will see to it that specimens of this rich ornament are taken down, before it is too late, so that molds can be made and the ornament replaced when the building is eventually rebuilt, as was the case in the Casa del Prado, and currently in the new historical museum that is rising where the Aerospace Museum once was.

The holographs of this ornament made by the Committee of 100 will serve as excellent means of checking the accuracy of the molds, but it will be far easier to make molds from the actual ornament than to try to recreate them from holographs.

The House of Hospitality has become a symbol of San Diego's magnificent heritage and leaves a deep impression on our visitors. I only hope that when the building is finally replaced, the interior will be worthy of the exterior, and of San Diego. so that when San Diego citizens receive official and unofficial visitors in its salons they can be proud of their beauty and charm.

A truly elegant House of Hospitality could well be a project of the Convention and Visitor's Bureau. What better way to impress our city's guests than in elegant rooms in a magnificent building set in the lush gardens of Balboa Park?

June 10, 1981, San Diego Union, B-1:1-2. The Navy June 9 issued its final environmental impact statement on the proposed 760-bed hospital for San Diego, reaffirming its stand that the hospital should be built in Balboa Park's Florida Canyon.

June 4, 1981, San Diego Tribune, A-6. Changes in bill to let cities restrict or ban skating on sidewalks and streets made at the urging of skaters.

June 23, 1981, San Diego Union, B-5:2-5. The San Diego City Council would be able to enforce its restrictions on roller skaters in Balboa park under a bill sent to Gov. Brown June 22; the bill, by Assemblyman Larry Stirling, R-San Diego, gives cities and counties the power to regulate roller skating on local streets and sidewalks.

June 29, 1981, San Diego Union, B-4:5-8. Along 1,000 feet of Park Blvd. sidewalk June 28, colored ribbons strung from a wire flapped in the wind, attracting motorists' attention to about 75 people standing vigil to protest the Navy's plans to build a new hospital in Balboa Park.

July 5, 1981, San Diego Union, B-2:1-3. The controversy will go on as to whether the Naval Hospital should be built in Balboa Park's Florida Canyon or Helix Heights; a private group is suing to keep the new hospital out of the park, although Defense Secretary Caspar Weinberger's decision is due this week.

July 5, 1981, San Diego Union, B-12:1-4. Pedicabs now plying Balboa Park, by Kathryn Phillips.

For \$1 passengers can ride for five minutes in one of the shiny blue or red cabs. Along the way, the operator, who pedals the five-speed cycle attached to the cab, will tell interesting bits of information about the park, including museum hours and the like, said Steve Clark.

June 5, 1981, San Diego Union, B-14. Letter, Stucco is crumbling at House of Hospitality, by Robert D. Wallace.

If anyone looks closely at the House of Hospitality in Balboa Park, he will be shocked to see how badly the stucco decor is crumbling away, despite its many coats of paint.

I hope that the city will see to it that specimens of this rich ornament are taken down before it is too late, so that molds can be made and the ornament replaced when the building is eventually rebuilt, as was the case in the Casa del Prado and currently in the new historical museum that is rising where the Aerospace Museum once was.

The holograms of this ornament made by the Committee of 100 will serve as excellent means of checking the accuracy of the molds, but it will be far easier to make molds from the actual ornament than to try to recreate them from holographs.

The House of Hospitality has become a symbol of San Diego's magnificent heritage and leaves a deep impression on our visitors. I only hope that when the building is finally replaced, the interior will be worthy of the exterior, and of San Diego, so that when San Diego citizens receive official and unofficial visitors in its salons they can be proud of their beauty and charm.

July 7, 1981, San Diego Union, B-3:1-2. Roller skating on city streets and sidewalks, including the popular skating areas in Balboa Park, will be subject to local government control under a bill signed into law by Gov. Brown.

July 9, 1981, San Diego Union, B-1:6. The Navy may offer to transfer to San Diego more Balboa Park land than the 35.9 acres of Florida Canyon it condemned last year for a site for a new naval regional medical center, it was learned July 8 in Washington.

July 9, 1981, San Diego Union, B-4:5. The Thursday club recently contributed \$9,185 to activities relating to Balboa Park; of that sum, \$5,000 went to the San Diego Historical Society for use by the San Diego History Museum in the new Electric Building.

July 15, 1981, San Diego Union, B-1. Spreckels Organ theft of five bronze, chrome-plated chimes mars the sound of music.

The disappearance of the chimes has been traced back to June 18, when the organ pavilion was unlocked for San Diego High School commencement exercises.

July 15, 1981, San Diego Union, 1:6. Defense Secretary Caspar Weinberger will announce July 15 the selection of Balboa Park's Florida Canyon as the site for a new Naval Hospital, sources said here July 14; Weinberger will also announce that the hospital plan has been redesigned to eliminate some features found objectionable by city officials.

July 16, 1981, San Diego Union, 1:4. Casper Weinberger, Secretary of the Defense Department announced July 15 that a new Naval Hospital will be built in Balboa Park's Florida Canyon.

July 17, 1981, San Diego Union, B-10:1-3. EDITORIAL: Secretary Weinberger has added some "sweeteners" to make the Balboa Park site for the Naval Hospital more palatable for San Diegans; the Navy will trade 39.8 acres presently occupied by the Balboa Naval Hospital for the 35.9 acres it has condemned in Florida Canyon; the Navy will raze unwanted buildings and restore the site on Inspiration Point to a "parklike" condition and will bear the \$300,000 cost of relocating the Balboa Park nursery.

July 23, 1981, San Diego Union, B-3:1-2. Pekarek Group, a firm hired by the city to give recommendations for upgrading the master plan for Balboa Park, wants additional suggestions and ideas from the public; planners tend to view crowded parking lots and the resulting aimless traffic circulation in summer as the park's highest priority problem.

July 26, 1981, San Diego Union, B-1. San Diego fighting losing battle against Golden Hill graffiti, by Ed Jahn.

The gang graffiti war goes on but the City of San Diego's battle for the Golden Hill section of Balboa Park is over.

For three months last year the city fought to keep the restroom in that southeast corner of Balboa Park free of youth-gang insignia.

It was a test case that failed. Every morning a crew gathered at the restroom and began painting out the spray-painted titles, names and initials.

But when they returned the next day, the exterior walls again would be covered with the stylized writing.

Those results mirror efforts elsewhere in the city, but what are eyesores to the general public are definitive footnotes to others on the changing strengths and boundaries of street gangs.

Youths who lounged near the painted-and-repainted park restroom, which is circled by Golden Hill Drive didn't readily admit to being the graffiti culprits. They did, however, tell city workers their efforts were futile.

"After three months we had to give up," said Jim Slade, building maintenance supervisor. "They were getting back to the restroom before the paint was dry."

A citizens' group in the area then took up the challenge. For a while those residents painted out the markings twice a week. Now they obliterate the markings only occasionally.

The city continues its endless efforts to rid overpasses, street signs, public buildings, sidewalks, and retaining walls of the markings, some of which are crossed out and written over numerous times by gang members themselves.

A two-person team equipped with a high-pressure washing device on the back of a truck travels around the city four-days a week trying to eliminate the marks with a chemical solution, Slade said.

The city also is looking for a type of paint that would leave a surface unsuitable for aerosol sprays. Unfortunately, Slade said the anti-graffiti paint now on the market has a high-gloss surface which makes it extremely difficult to paint over for normal upkeep. No satisfactory product has been found.

The yearly cost to the city for the project now is more than \$25,000, he estimated. Graffiti appears to be holding its own, if not spreading.

Gang members say both the city and the citizens' groups misread the markings. They aren't simply idle scribbles, they say. Instead, the graffiti is an important part of territorial imperative.

And the Barrio Lomas gang is the reason the graffiti stayed up on the Golden Hill restroom, gang members say.

Frank Tafoya, 21, is still a member of the Barrio Sherman gang. He also is directing his energies toward uniting several gangs in and around his barrio to work for community needs.

Gangs organize partly for self-protection, they contend. Mostly though they form out of boredom, unemployment, frustration and a youthful sense of machismo. And much gang activity includes some kind of criminal behavior, Taylor and the police agree.

Since the area and the recreation center in the neighborhood of Golden Hill are located on hills, the gang members who organized there combined "barrio," meaning district, with "lomas," the Spanish word for hills. So they call themselves the Barrio Lomas gang.

"They haven't got many guys, but they are trying to build a reputation," said Tafoya. "If they don't keep their name up in the park, they lose reputation. If they let someone else come in and put up their names over theirs, they ain't 'bad' anymore."

Since both the Shermans and the Logan Heights Luckies are located near the park, these gangs feel it necessary to paint their gang graffiti on the restroom to prevent the Lomas gang from getting too bold, Tafoya said.

Gang wall markings delineate the boundaries within each barrio. Sometimes the boundaries are strict, as along parts of Logan Avenue, where one gang claims the north side of the street and another the south.

Gang graffiti is common around gang hangouts, heavily traveled intersections and barrio boundaries, Tafoya pointed out.

He gave the seemingly meaningless phrase, “b SM R 1 X3” as an example.

Tafoya explained that it is the Sherman logo, with SH standing for Sherman. If the writer has time and space that work would be spelled out.

The lower case “b” preceding the name means barrio. The “R” at the right of the marking can stand for the Spanish word “regla,” meaning rule or ruler. Others interpret it as “rifa,” a slang term meaning that any writer who added further insults would find those insults directed back to himself.

The number 1 might be included to signify the gang is first among all gangs. Often times the wall painter will add the “X3” at the bottom to stand for “crazy” or “loco.” A gang member so tough he will attack any intruder is considered crazy, a term of pride.

Thus, Tafoya said the gang could be deciphered as “The Shermans rule the barrio because they are the craziest (meanest).”

Tafoya carries a constant reminder of the Shermans on his right arm. It’s a hand-made tattoo of the gang insignia with a forefinger extended to indicate they are number one. It’s an embarrassment to him now, he admits.

The wall insignias can become even more specific. Since the Shermans hang out at 20th and K, they sometimes put Roman numbers XX (20) – or “veinte,” the Spanish word for 20 --- to show which street they are on. The Logan Heights Luckies are on 26th Street and their markings now have XXVI, the Romans numerals for 26, he said.

The graffiti provides the police with information about activity among the estimated 35 gangs and their 2,800 members, according to Sgt. Bill Campbell, supervisor of the department’s 10-man gang detail.

“Sixty percent of our responsibility is keeping information on gang members,” he said. Most of the gang members put their names, nicknames or initials on the graffiti, giving the police a roster of who is involved in which gang, he pointed out.

“If we see a lot of them X-ed out, we know there’s an impending feud,” Campbell said. “Gang members usually don’t snitch so it’s one way we have to get information.”

Occasionally another gang will blot out a rival gang’s insignia. That isn’t grounds for a rumble unless the second gang identifies itself with the graffiti, Tafoya said.

“Usually the other gang won’t put their names above something they crossed out unless they want something to happen,” he said. “There’s always something behind that like a fight or a girl or a problem.

“A gang member thinks it’s going to give him a bad reputation if people see his name crossed out, so he’ll get even.”

Tafoya said he resents it when all street people are accused of killings, robberies or vandalism actually committed by a small number of gang members.

“They think that just because you wear baggy pants, loose shirt, have a white T-shirt and have short hair and tattoos, you are bad,” he said. “Most of us aren’t bad, but people think we’re from outer space.”

Campbell was reluctant to talk about the gangs by name since he feels it only serves to enhance their notoriety.

“It’s difficult,” the officer said. “We need to tell the public about what’s going on but we don’t want to give gang members any publicity.

“What they should be reading about is gang members who go sent up for long terms.”

Fortunately, gang members seem to respect art, creativity and their native heritage, Tafoya said. Popular hangouts in the barrios, such as markets that once were covered with scribblings now are being whitewashed by some gang members.

“We’re trying to paint murals now,” Tafoya said. “We’re trying to give the younger kids some pride and a feeling that things can be different.”

July 29/ August 5, 1981, San Diego Newsline. Old Globe Eyes Balboa Park Canyon, by Virginia Bisek.

“I think Old Globe’s temporary theater is a major insult . . . Sticking up out the canyon with a bunch of fake, brown timbers, Elizabethan-style. It looks dumb.”

This was a statement made by Art Casey, executive director for Citizens Coordinate for Century 3 (CCCIII), an organization made up of urban conservationists who could be deemed the conscience of San Diego’s plans for Balboa Park.

The Old Globe theater is currently in the process of applying to expand its site in Balboa Park. They were given a temporary lease in a canyon site about three years ago, in the aftermath of the tragic arson fire that burned the Globe to the ground. Now they want the land for keeps.

When asked how much Balboa Park land the Old Globe has already, James Milch, lawyer and negotiator for the Globe, said “I don’t know.”

Casey said that its not just a question of how much land the city leases. It’s how much land the proposed plan will require during use. “They are going to need at least 4 or 5 acres for the theater-goers to park in.”

Casey questions the validity of the “temporary” lease Old Globe was given in the first place. “Just look at the structure and you can see that the thing will last for a hundred years. I believe that Mayor Wilson supported the new stage from the beginning, so it zipped through the City Council with a passing vote.”

Casey says CCCIII has opposed the new theater from the start. “We tried to get them to build it elsewhere, like in La Jolla or UCSD, places where it would get more use, rather than tearing up land in a public park.”

Proponents of the new theater believe it to be a viable thing for the citizens of San Diego. Milch says that, “We’ve explored the economics and evaluated public response. Other agencies, such as ballets and schools will be able to use the facilities, too. Also, it has not blighted the landscape.”

An Environmental Impact Report assessing the impact of the new stage is currently in process and will be completed before the present lease expires in October.

As to what purpose it serves the citizens of San Diego, Casey states that there has been some research done that shows a large portion of the theatergoers come from out of the city, a good portion from Los Angeles. "But try and get people to listen to this, and you can't. No one will ever listen."

Casey also contends that there have been many "lies over this issue. First of all, it was supposed to be temporary and they build something like an earthquake couldn't knock over. They were supposed to replant trees and replace some vegetation they destroyed while building the new site, and they haven't done it. I believe that there were plans for that new theater even before the old one burnt down. The way the lease kept getting continuations and the way it zipped through city council . . . it smells kind of fishy."

The Old Globe's temporary standing must come to head before October. CCCIII is reluctant to oppose the issue any longer without public backing or high placed officials' support. They received a bad reputation for opposing the new stage shortly after the old one burned down. "The public was salivating left and right over the issue," says Casey. "Everyone's heart was open to the new theater because of the burning."

Did you know that the local architects office gave its Orchid Award for the best "jewel" of a building to the new theater?" says Casey. "Just go look at it --- they should have given it the Onion Award."

July 29, 1981, San Diego Union, B-1:1. The Committee for Charter Protection for Parks July 28 filed a request in federal court for an injunction blocking construction of a Naval Hospital in Florida Canyon.

August 4, 1981, San Diego Tribune, B-3. Encanto Boys' Club will finally get their gymnasium from funds earmarked for city under Community Development Block program, by Reggie Smith.

Councilman Leon Williams won the council's consent to fund a \$150,000 study of present and potential uses of more than 65 acres of Helix Heights that may serve as the best site for a new Navy Hospital. The Navy says it will build in Balboa Park.

August 11, 1981, San Diego Tribune, B-14. Letter, J. C. Hanselman, San Diego.

In Neil Morgan's column of August 3, 1981, he seemed to believe that a bank and its parking lot would be obscene if located in Balboa Park.

I believe that most banks I have seen and their parking lots, are far more attractive than the city nursery, offices and truck parking recently put in the park just south of Morley Field.

August 16, 1981, San Diego Union, F-1:1-8. Feature by James Britton, II . . . the time has come for the city to trade off Balboa Park; parts of the park have been traded by the politicians ever since its original 1,400 acres were dedicated in 1868; sometimes the public got great benefit out of the deals, like when Kate Sessions set up a nursery business there in trade for planting trees in the park; currently the city is studying the future of Balboa Park --- the firm with the contract is the Pekarek Group.

The time has come for the city to trade off Balboa Park --- all of it.

Parts of the park have been traded by politicians ever since its original 1,400 acres were dedicated in 1868. Sometimes the public got great benefit out of the deals like when Kate Sessions set up a nursery business there in trade for planting trees in the park. Local businessmen got the middle of the park for an exposition in 1915, leaving behind a complex of buildings which to this day has served assorted educational and commercial special interests. Similarly with another exposition in 1935.

In the 1970s the Navy began considering moving Balboa Hospital out of the park and chose Murphy Canyon north of Mission Valley. But at the urging of San Diego's congressmen, the Navy decided to rebuild in a section of the park. And even though another preferable site came along (Helix Heights), the Navy was so deep into the park plan that it decided, "Full steam ahead."

There are those who still think they could get the courts to keep the Navy out. The Committee for Charter Protection for Parks has filed a request in federal court for an injunction blocking construction of the hospital. A hearing is set for August 24 on the request. Even if the Navy is permitted to build in the park, many opponents believe it ought to pay full market value if it takes park land. That would be an immense income for the city's gaping treasury.

As a direct consequence of the shrinkage of tax sources, plus the rise in costs of everything, governmental bodies everywhere are looking for new gushers of income. There will be a universal increase of private operations on public land. Interior Secretary James G. Watt's threat to the National Parks is merely watt's in the air.

Thus, for example, the "Spanish Village," where artists of sorts have been indulged for decades with cheap studios, is being eyed for conversion to another Bazaar del Mundo. The original Bazaar is a phenomenal multimillion dollar profit mill, created out of an old motel in Old Town. Call it Bonanza del Mundo. Call it what you will, it was this enterprise on public land that caused Old Town to come alive as a popular attraction which the state of California is now trying rather ineptly to glorify as a historical park.

Though there are two violently opposed schools of opinion about Bonanza del Mundo --- purists believe it should be done away with --- there is little doubt that sinking governments will be grasping at similar lifesavers.

Take your friendly county Board of Supervisors. Their elegant offices are in the historic (1936) and architecturally significant structure on the waterfront at the foot of Cedar Street, now called County Administration Center (CAC). CAC has two generous parking lots worth as much in land value as any site in San Diego. The supervisors are itching to get the maximum income from these by indulging the delirious dreams of enterprisers whose mouths water at the waterfront. For example, Holiday Inn would love to build another high-rise hotel in the south parking lot.

With the CAC scheme in the air, the stage is set for another of many confrontations between the county and the city of San Diego. These government bodies are supposed to cooperate in carrying out the adopted Center City Community Plan, which calls for parklike development of these CAC parking lots, with the parking either under the park or kept out of the area altogether. Banning would be possible if downtown transit matures as it should. The city's planners do not favor high-rise engulfing the historic CAC which ought to be shown off proudly as a park setting.

Comes now a bystander motivated to offer a solution. He is William Tyson, who describes himself as an architecture buff. He has plans for a four-story office building at Pacific Highway and Beech, across from the south CAC parking lot.

What's more, though an old man himself, he is concerned about the Navy's sinking image after the expropriation of Balboa Park, so he feels that the Navy itself should be involved in enhancing the beauty and public convenience of the waterfront., adding to our park system as well (or better) than subtracting from it.

Tyson and landscape architect Mike Theilacker dreamed up a park treatment for the south CAC parking lot. It is a two-level parking structure, heavily landscaped on top, something like San Francisco's Union Square. Structures shown rising from the trees, to be contributed by the Navy, would include a sort of conning tower for viewing of the bay and an information center orienting visitors to the city, and, incidentally, telling them much of the Navy's dynamic story.

Another possibility envisioned by Tyson is relocation here of the Scripps Institution's popular aquarium, which is hopelessly impacted by parking problems in its present location in La Jolla.

How serious is the county about making money on its underutilized properties. This year the Board of Supervisors approved the idea these properties, the CAC parking here, the Pacific Building, Pacific Highway at Ash Street, Vauclain Point (choice view site overlooking Mission Valley). Also the supervisors approved selling large acreage the county owns in the back country. Revenues are expected to exceed \$50 million.

Because of its waterfront site, the CAC building ideally should be headquarters of the Unified Port District, which could afford to pay handsomely for it. The rich port has led all the government bodies in raising income from leases.

The city of San Diego has been amazingly prodigal in giving away the lands it owned, but lately has been buying (dear) and selling (cheap) downtown acreage with an eye to income eventually far exceeding costs. The process has allowed the city to engage in urban environmental design to a limited extent --- limited more by shortage of vision than shortage of opportunity.

The city's biggest urban design success is Mission Bay Park, which also is a financial success, paying for itself and then some through leases, the most profitable of which is Sea World. By contrast, the city doesn't get a dime from the zoo, which occupies so much of Balboa Park. Instead the prospering Zoo this year is getting a guaranteed \$1.1 million of the city's property tax revenues, a windfall left over from when the Zoo needed help to get started toward its worldwide fame.

Currently the city is studying the future of Balboa Park. The firm with the contract is the Pekarek Group. Though the group consists basically of landscape architects, its mandate is to produce a "development and management plan." Project manager Steve Estrada, who grew up here and studied landscape and architecture at California Polytechnic State University, San Luis Obispo.

Seeking ways to make the park self-supporting, the Pekarek Group has hit on the idea of generating the park's electricity from the huge landfill south of Morley Field where restless miasmas of burnable methane are trapped under the surface.

Restaurants --- including good ones (and let's put in a word for cheap-goods) --- will multiply in the park if Pekarek and pals have their way. Transportation finally will be handled to eliminate much auto visibility. Parking will be in pool areas, possibly even in discreet structures. Transit vehicles will wheel people around. Already Pedicabs are in operation, proving popular.

A piece of poetic justice in the design of the new park would be to require the backers of the new automotive museum to provide huge parking structures as an extended and reasonably concealed foundation for their show-off museum building. The museum will be near the Aero-Space Museum. The brutally ugly field of parking in front of the Aero-Space Museum, where vandals and muggers now operate, will be transformed into a landscaped public plaza.

"San Diego now has no such plaza," says Estrada with fire in his eye as braces for the assaults on his play by the selfish.

The dauntless Estrada is even trying on fright masks to chase the Boy Scouts and Campfire Girls out of their cushy quarters in the park, possibly giving their choice acres to the Zoo for expansion. The kids could better set up camp in the more remote Mission Trails Park, he says reasonably.

Estrada hasn't even dreamed of chasing the Zoo animals out of the park, though a good urban design case could be made for sending the beasties to the suburbs, specifically the Wild Animal Park, as the city fills up with humans who had have their fill of the suburbs. Possibly, however, the Zoo will be needed in Balboa Park to generate crowds who then will spend all the dollars expected to enter the city via the new Balboa Park.

Come to think of it, why shouldn't the whole of Balboa Park, or what's left of it be leased to the Zoo people, who know so well how to turn a buck and a panda to the public? Payments to the city could go on forever or until civilization has exterminated the last animal and the last blade of grass.

August 18, 1981, San Diego Union, B-4:1-2. The Committee for Charter Protection for Parks won permission August 17 to fire at least another round in its battle against construction of a new Naval Hospital in Balboa Park's Florida Canyon.

August 25, 1981, San Diego Union, B-1:5-6. The Committee for Charter Protection for Parks August 24 lost a last-ditch effort to delay preliminary construction work on a new 760-bed naval hospital in Balboa Park; Federal Judge Wm. B. Enright said he was convinced a "good faith decision" had been made in selecting Florida Canyon in the park and rejected the committee's request..

September 4, 1981, San Diego Tribune, D-1. Conservation Art Center has new home, by Jan Jennings.

Once squeezed into 1,700 square feet of working space on the second floor of the San Diego Museum of Art, the Balboa Park Conservation Center (BACC) has taken a deep breath, exhaled and expanded into spacious quarters in Balboa Park's new Electric Building.

After a brief slowdown during its recent move, BACC is back to full operation with 4,500 square feet of laboratory and exhibition space. It is the first of five tenants slated to occupy the building.

September 5, 1981, San Diego Tribune, C-1. Letter, Suggestions for park use, by Richard Amero. (Revision made while typing, rwa.)

As institutions occupying El Prado, the Palisades and the Zoo have turned sections of Balboa Park into self-contained units serving restricted uses, the Inter-Museum Council which presently acts as a consortium for these institutions, should be given ownership of El Prado and the Palisades.

Political manipulations will cease when the museums have to work together for their mutual success. The new owners can keep out roller skaters, charity solicitors, evangelists and political canvassers to the relief of those they currently molest.

As with the museums, so the Zoo should assume ownership of Zoo grounds, plus contiguous land now occupied by Girl and Boy Scouts.

Camp Fire Girls should be ousted, the fire alarm building torn down, trees thinned, new paths laid out, litter picked up, and peaceful users protected from criminals.

John Nolen's 1926 plan for the east side of the park was only partially implemented. The landfill, begun in the 1950s, has changed the original up-and-down surface. While environmentalists were distracted by the Naval Hospital brouhaha, the Park Department laid asphalt and put up cyclone fencing for a transplanted nursery on the east side of the landfill. Park staff put up a sign proclaiming the site "Stalag 13." Dog lovers secured another vast area for dog runs and shows. When the shows are held, the dog section is bordered by an equally large parking section for vans and automobiles. Combustible land in Florida Canyon and the desiccated landfill on the east edge of the canyon cry for remedial treatment.

Such activities as roller-skating, skateboarding and bicycle racing, which disturb nature lovers, should be transferred to the landfill. Viewers from the rose garden terrace on the west can watch the athletes execute their jumps and turns.

Switzer Canyon and 28th Street should be converted into through streets. This would relieve traffic on Pershing Drive and give the east side of the park a distinguishable border.

September 7, 1981, San Diego Union, B-1. Geronimo called example for Chicanos, by Ed Jahn

Why is an 18-foot tall picture of Apache chieftain Geronimo given prominence in the Centro Cultural de la Raza mural in Balboa Park?

“Because he refused to give up his land or his people,” says muralist Victor Ochoa, who designed the 1,260 square-foot wall painting and has been encouraging other artists working on the building for the last ten years.

“Chicanos must have the same attitude if we are to plan and design a future according to our values,” he told a crowd of well-wishers who gathered at the park’s Pepper Grove to celebrate the finish of the mural, which was dedicated yesterday.

Moments before, friends had lifted several parachutes covering Ochoa’s finished work and the crowd clapped and cheered as the steadfast and menacing figure of Geronimo, kneeling with gun in hand, appeared in vivid hues before them.

“Remember, he never gave up,” Ochoa repeated as the applause died down. “Our children should know they have a future.”

The air was filled with incense and the sound of drums as four members of the Danza Mexicayotl performed pre-Columbian Aztec Indian ceremonial dances for the audience.

Many were seeing the traditional dances performed for the first time by performers who constructed their outfits of embroidered cloth and feathered headdresses by hand.

“All the artists in dance, pottery, theater, music and the visual arts at the Centro are preserving their heritage,” Ochoa pointed out. “That’s why I picked Geronimo.”

The Chiricahua Apache holds an almost spiritual meaning for Ochoa, who said he had been studying the life of the much-publicized chief who eluded both the Mexican and U.S. governments until 1886 when he signed a truce.

Three years ago, when the Geronimo figure was partially finished, a Ku Klux Klan rally was held near the park and the mural was defaced, he said.

Now, with the finishing, vibrant colors on the warrior, Geronimo stares vividly from the Indian, Mexican and Chicano arts building.

Hermania Enrique, a Chicano folklore teacher at San Diego State University, pointed out other figures in the mural while selling *empanadas* (Mexican pastry) and Chicano literature from a nearby booth, while the Estrella mariachi band began playing.

“It’s history in a low-key way,” she said. “The musicians there in the corner are still singing. They played at Balboa Park when the first fair was here and they are living today.

“Some of them fled Mexico during the revolutions to be here, and they still sing the patriotic songs. They choke up and start crying, but that’s only because they can remember. It’s too bad the majority of the people don’t know what the murals mean.”

San Diego Tribune, B-14. Letter, A bank and its parking lot would be more attractive in Balboa Park than the city nursery, by J. C. Hanselman.

September 10, 1981, Park and Recreation Board , Minutes.

5. Proposed Occupant for the House of Charm

Mr. Roberts explained that in May of 1981, solicitations for rebuilding and occupying the House of Charm were mailed to 46 groups. In addition, there were two articles in national journals, plus a notice in the *San Diego Daily Transcript*. There were three responses from the direct mailing and two from the notice in the *Transcript*. Two of the proposals (San Diego Opera Association and Textile Arts and Conservation Center) were responsive. The other responses were from the San Diego Art Institute, the San Diego Association of Archaeologists and a group proposing a museum of the 1930's.

At the September 14, 1981, Balboa Park Committee meeting, the San Diego Opera Association indicated that it was still interested, but could not make a long-term commitment at this time. The Textile Arts and Conservation Center, on the other hand, made a presentation that was well received and approved by the Committee.

Ms. Ilya Sandra Perlingieri, Director of the proposed Textile Arts and Conservation Center, made a presentation to the Board and was assisted by a consultant from a management firm known as Meridian. The center would rebuild the 16,500 sq. ft. first floor, would add a 13,000 sq. ft. second story, and would possibly construct a basement, with parking for the handicapped and staff. The center would have to galleries, one for a costume collection on a rotating basis, from Hollywood and other fashion centers; and the other for needle arts, both contemporary and historical. The cost would be in excess of \$8 million and would require an interim facility. The center was seeking a one-year option to secure funding (one-half from one-time corporate donations and one-half for corporate pledges over five years), and 18 months for construction, for a total of two and one-half years.

The Balboa Park Committee approved the concept.

September 11, 1981, San Diego Union, B-3:6. The Committee for Charter Protection for Parks September 10 made its third request for an injunction blocking construction of a new Naval Hospital in Balboa Park's Florida Canyon.

September 14, 1981, San Diego Union, B-8. Tide of roller skaters ebbing at beach, park, by Carl Ritter.

Weekend skating to music is permitted at Marston Point in the park's southwest section and skating is possible daily in some areas on the park's western and eastern sides.

The ordinance banning skating applies to most of the heart of Balboa Park, where the museums, the Zoo, the theaters and most other major park attractions are situated.

Violators are subject to fines up to \$500, although authorities said few tickets have been issued.

September 17, 1981, San Diego Tribune, B-3. City Council opposes plan for police substation near Balboa Park, by Reggie Smith.

The city has thrown a wrench in the Police Department's 3-year old decentralization project by delaying indefinitely plans to build the newest substation adjacent to Navy Hospital near Balboa Park.

September 18, 1981, San Diego Union, B-3. Cabrillo Bridge to be closed to automobiles for repairs from September 28 to the end of January, by Anthony Perry.

September 20, 1981, Los Angeles Times, VII-1. Battle to restore Elysian Park, by Lynn Simross: The main problem is to get money to repair the damage that occurred during a brush fire that blackened 300 acres of the park's 575 acres June 16.

September 22, 1981, San Diego Union, B-3:6. The Committee for Charter Protection for Parks was dealt yet another setback September 21 in its struggle to block construction of the new Naval Hospital in Balboa

Park's Florida Canyon; Federal Judge Wm. B. Enright denied the committee's request for an injunction that would have delayed construction for several months.

October 2, 1981, San Diego Union, 29:1-2. The Committee for Charter Protection for Parks filed a petition October 1 to intervene in the lawsuit concerning compensation for the 36 acres in Balboa Park condemned by the Navy for a new hospital.

October 4, 1981, San Diego Union, B-1:1-8. Six persons protesting construction of a new Naval Hospital in Balboa Park were arrested as about 75 shouting demonstrators tried to disrupt October 3 1981, groundbreaking ceremony.

October 6, 1981, San Diego Union, B-3. Balboa Park building name sparks dispute, by Carl Ritter.

The new Electric Building in Balboa Park should be called "Casa de Balboa, not "The Museum of San Diego History," a citizen advisory group recommended yesterday.

October 8, 1981, San Diego Union, B-5:1. Two Plans Submitted on House of Charm.

Two cultural groups yesterday submitted completing proposals for restoring the crumbling House of Charm in Balboa Park and turning it into a museum.

The San Diego Opera Association and the Textile Arts and Conservation Center both presented proposals to the San Diego City Council's Public Facilities and Recreation Committee. Flummoxed by the opera's association proposal, which had not been expected, the committee asked the city manager's office to study both proposals.

The city is looking for a cultural or educational group willing to undertake the multimillion-dollar job of rebuilding the House of Charm in exchange for a long-term lease.

Located nearly across the street from the Museum and Man and Old Globe Theater, the House of Charm dates from the 1915-16 Panama-California Exposition. City engineers say the building suffers from rotting columns, a weak foundation and sagging beams.

The textile arts group want to use a reconstructed House of Charm for a museum featuring 18th and 19th century costumes, needlework, a textile library comprised of books and swatches of fabric, and rooms for classes in needlework, fashion and design.

Ilya Sandra Perlingieri, president of the Textile Arts and Conservation Center, said the museum would be only the second in the country dedicated to textiles. She said museums in Mexico, Europe and Japan have agreed to share their costume collections.

The opera association had forwarded a proposal last spring but later withdrew. Joseph Hibben, association president, indicated the group has now reconsidered.

October 10, 1981, San Diego Union, B-1-4. Closure of Cabrillo Bridge has caused a 50% drop in attendance at the Balboa Park's Museum of Art and Museum of Man and business at Café del Rey Moro restaurant has fallen off about 20%; visitors driving to the park can still reach the parking lots near the museum by approaching from Park Blvd. and President's Way.

October 14, 1981, San Diego Union, B-2:2-3. Two city council members who had opposed building the new Naval Hospital in Balboa Park were criticized by a group still trying to stop the construction in the park's Florida Canyon.

October 14, 1981, San Diego Union, AA-5:1-8. Many San Diegans spend their spare time engaged in activities in Balboa Park: bicycling, skating, frisbee tossing, Roque, skateboarding and the martial arts go on at the park.

October 16, 1981, San Diego Union, B-3. New Electric Building in Balboa Park should be called "Casa de Balboa," not "Museum of San Diego History," by Carl Ritter.

October 18, 1981, San Diego Union, B-3:1-8. Firefighters extinguished a 15-acre brush fire in Balboa Park's Florida Canyon October 17; the blaze was apparently set by an arsonist and an investigation is under way.

October 20, 1981, San Diego Union, B-3:6. A request by the Committee for Charter Protection for Parks to become an active party in court proceedings on the federal government's condemnation of land in Balboa Park for the new Naval Hospital was denied October 19.

October 24, 1981, San Diego Union, A-3. Department of Motor Vehicles can't ban Krishna soliciting; appeals court upholds group's right to function on state property: The rights of religious groups to make speeches and solicit church funds on state property was upheld yesterday by the 9th U.S. Circuit Court of Appeals.

In a lawsuit brought by two members of the Hare Krishna sect against the California Department of Motor Vehicles, the appeals court upheld a decision by the late U. S. District Judge Albert C. Wollenberg of San Francisco that enjoined the DMV from enforcing a ban on solicitation and religious advocacy at its state offices.

The appeals court said the First Amendment ban against government establishment or advocacy of a religion does not prevent access to the department's property by religious speakers.

Theodore Jaffe and Warren Havens brought the action against Doris Alexis, the DMV director. They challenged a department regulation which permits solicitation of signatures and distribution of handbills at state facilities, but prohibits solicitation of money.

After the lawsuit was filed, the policy was revised to prohibit religious advocacy and solicitation.

The appeal court said the two men were exercising their constitutionally protected rights of free speech by performing a religious ritual known as "Sankirtan" involving dissemination of material to the public and solicitation of funds to support the religion.

"We believe the department's fears that the public will attribute the Krishna's views to the State of California are not only unsubstantiated in the record, but have no basis in reality."

The court said that Sankirtan is protected First Amendment speech and that the U. S. Constitution restricts a state's power to discriminate between speakers with respect to ideas, subject matter or contest of messages in forums open to the public.

"An absolute bar to religious speech cannot be justified by this nebulous, undocumented and wholly speculative prospect that someone might infer state approval of the Krishnas," the court said.

The court said that if the department wants to allay its anxieties it could post signs in the area where Krishnas congregate disavowing the state's association and explaining the sect's right to express its views.

October 26, 1981, San Diego Union, B-3. Textile Arts and Conservation Center makes offer to build a new House of Charm, by Carl Ritter.

When an organization called the Textile Arts and Conservation Center presented itself to the city recently and offered to build a new House of Charm in Balboa Park to replace the present dilapidated structure, official eyebrows rose.

Who or what, the officials wondered is the Textile Arts and Conservation Center?

But the city and other entities --- like the Balboa Park Committee and the Committee of 100, not to mention consultants busy updating the park's master plan --- could not afford to listen to this proposal by what turned out to be a new non-profit California corporation. Otherwise, no immediate hope for a new House of Charm was in sight. The City Council is expected to act on this proposal within the next month.

Earlier, the San Diego Opera Association made a proposal under which it would undertake a drive for House of Charm rebuilding funds, but it backed off due to increasing financial concerns of its own. The city reiterated it was in no position to accept the financial obligation. And a city staff effort nationwide to elicit interested-party response came up dry.

Hence, the attention given the Textile Arts Center.

The textile group has projected a budget of \$8.47 million with the building shell accounting for \$4.2 million and the interior and other expenses estimated at \$4.27 million. Half of total capital outlays would be raised from one-time contributions, with the other 50 percent coming from conventional mortgage money tied to a corporate gifts repayment guarantee and repayable over five years.

The building would be a museum and education research center.

Plans announced by Ilya Sandra Perlingieri, a college teacher and guest lecturer on costume history and related subjects who said she has devoted five years to working out details of a textile museum, call for"

--- Two kinds of galleries, one displaying costumes and the other showing lace, embroidery, weaving, quilts and other examples of the needle arts.

--- A library housing a collection of publications on design textiles, costumes and the needle arts, including history and techniques covering these areas. Students interested in theater, art, fashion and related areas could utilize the library's facilities. Colleges might offer credit courses at the museum.

--- The building would provide a home for a dozen or more need arts organizations in the county, with memberships reported in the thousands.

--- Extensive programs for the handicapped are being drawn up. Staffers would use sign language in some classes.

--- Special programs for older adults would be patterned along the lines of a Brooklyn Museum experiment through which experts in the needle arts share their expertise in skills in danger of oblivion.

--- Temperature-humidity controlled environment storage facilities would be capable of preserving centuries-old material.

"This is an ambitious project for a financially weak group, yet financing prospects from major corporate donors appear to be good," commented Jim Harris in a consultant's report to the City Council Public Facilities and Recreation Committee. A lease option agreement would be involved, he noted.

"The progress in meeting identified financing goals would be closely monitored within the framework of the option agreement. A successful project would eliminate the city's exposure for costs required to rehabilitate the structure," Harris said.

Perlingieri is president and a director of the Textile Arts and Conservation Center. She holds a bachelor's degree in journalism from the University of Missouri and studied haute couture design at the French Fashion Academy; took specialized courses in textile conservation including microscopy at New York University and attended conservation-museum workshops in England, Germany and Czechoslovakia.

She established sewing schools in Miami, Fla., and here is a part-time Mesa College instructor and has been a guest lecturer at San Diego State University and Southwestern College here. She is assistant curator for the Natural History Museum.

"We would stress community involved in the new museum," she said.

Also on the five-person board of directors and serving as officers in the Textile Arts and Conservation corporate setup are:

M. J. Spurgin, needlework teacher and past president of the San Diego Creative Stitchery Guild; Linda Tucker, fashion program coordinator, Southwestern College; Deborah Durham, trust officer, California First Bank and Marvin Freedland, attorney.

Meridian Capital Management is acting as an adviser.

The planners said major department stores --- such as Bullock's, the May Co., the Broadway, Robinson's, Neiman-Marcus, Buffums' and Nordstrom's --- are expected to identify with what the Textile Arts Center is hoping to preserve. This would be the first museum of its kind outside Washington, D. C.

An executive advisory committee includes Dr. Richard P. Wunder, president of Christies' Appraisals and former director of the Cooper-Hewitt Museum; Jack Horwitz, co-founder of New York Fashion Institute of Technology, and Dr. Csilla Fabo Perczel, professor of art history, San Diego State University.

November 3, 1981, San Diego Union, B-6:1-3. Bea Evenson, founder of Committee of 100, died October 31.

November 17, 1981, Park and Recreation Board, Minutes.

8. Balboa Park Railroad, Proposed Concession

Dick Randolph presented the staff report of November 10, 1981 recommending that the existing lease agreement of the Balboa Park Railroad be amended to include the sale of railroad related items.

Mr. David W. Weir, the present lessee, displayed the items and answered questions of the Board.

The Balboa Park Committee endorsed the amendment, reserving the right to approve additional items for sale.

OPTION Mr. Arnhyrn moved approval of the staff recommendation. The motion was seconded and carried unanimously.

9. House of Charm, Use and Occupancy

Messrs. Campillo and Roberts discussed the staff memo of November 12, 1981 and attachments thereto, which detailed the history of the Request for Proposals process.

Mr. Joseph Hibben and Mr. Hal Williams, representing the Performing Arts Center Foundation, apologized for what may have appeared to have been the San Diego Opera Association's "on again, off again" attitude toward the project. They stated that the Opera was always interested, but funding for the arts had become more and more limited. The change to the Performing Arts Center Foundation, they felt, would be in the best interest of the City and would involve use of the facility by all of the performing arts, not just the Opera. The Board of the Foundation has been expanded to include members of the other arts programs.

Mr. Arnhym noted a major difference in the proposal of the Textile Arts and Conservation Center and the Performing Arts Center Foundation; the former is requesting authority to proceed, while the latter is seeking a three-year option. In reviewing the proposal of the Textile and Arts Conservation Center, it was not clear that the organization has the wherewithal to proceed in a timely fashion. Finally, he noted that the Balboa Park Committee felt that the Performing Arts Center Foundation proposal was totally appropriate for Balboa Park and had exciting potential. The Committee approved the Textile Arts and Conservation Center proposal because it had no viable alternative at that time.

MOTION Mr. Golden moved that the Board note that the proposal of the Performing Arts Center Foundation would be of great benefit to Balboa Park and that the Board recommend the proposal to the Public Facilities and Recreation Committee, as being acceptable. Mr. Arnhym seconded the motion, which carried unanimously.

Mr. Arnhym commented that the organization should develop something tangible with respect to financing, operation and maintenance.

December 12, 1981, San Diego Union, B-3:7-8. House of Charm urged for Navy Museum, by Anthony Perry.

The House of Charm in Balboa Park should be converted into a Navy museum, San Diego City Councilman Dick Murphy proposed yesterday.

The San Diego Opera Association and the Textile Arts and Conservation Center have presented competing proposals to restore the crumbling House of Charm for their own purposes. But Murphy said a Navy museum would have more significance to San Diego and be a bigger attraction for tourists and residents alike.

"I feel like we have not explored all the alternatives," said Murphy, former chairman of the Park and Recreation Commission. "Before we make a decision between the opera and textile groups, I want to look at all possibilities. This will be a decision that will last for 50 years."

The city has been looking for a private group willing to undertake the multimillion-dollar job of rebuilding the House of Charm in exchange for a long-term lease. Located across the street from the Old Globe Theater, the House of Charm dates from the 1915-16 Panama-California Exposition and suffers from dry rot, a weak foundation and sagging beams.

"I would envision the (Navy) museum as a place where people could come and view the history of the Navy and its involvement in San Diego, where parents could take their children," Murphy said.

Murphy asked City Manager Ray Blair to contact the Navy and Navy-oriented organizations, such as the Navy League, Fleet Reserve Association, and the Retired Officers' Association, to see if they would be interested in developing and financing a proposal. Murphy also brought his proposal to a Navy League breakfast yesterday.

"On the surface, it sounds like an ideal project," said retired Navy Capt. C. V. Wilhoit, first vice president of the San Diego Navy League. "If money has to be raised, we could probably raise it as well as anybody. It sounds like a great idea, but we need to study it further."

Wilhoit has been assigned by Navy League officers to prepare a report on the feasibility of the Navy museum idea. The Navy League is a private group, not affiliated with the Navy or Department of Defense, dedicated to promoting the Navy. The league has an estimated 1,600 members in the San Diego area.

The Textile Arts and Conservation Center wants to use a restored House of Charm for a museum featuring 18th- and 19th-century costumes, needlework, a textile library comprised of books and swatches of fabric, and room for classes in needlework, fashion and design.

The San Diego Opera Association has proposed a performing arts museum with displays of miniature sets, famous costumes and stage props. Included in the proposal are a 250- to 300-seat theater, training rooms and an opera library.

The City Council is set to discuss the future of the House of Charm in early January.

December 15, 1981, San Diego Tribune, B-1. Bus shuttle catching on, by Ozzie Roberts.

They call veteran bus driver Carl Wood "Hoppie" around the San Diego Transit Corp. garage.

That's because he operates one of four buses on Short Hop, the company's new experimental shuttle service through downtown.

The service, now in its fourth week, begins at President's Way, near Starlight Bowl in Balboa Park, and travels through to Seaport Village before returning to the park.

Buses run at 10-minute intervals from 10 a.m. to 2:20 p.m., Monday through Fridays, with each daily round trip taking about half an hour. The fare is 25 cents each way.

December 16, 1981, San Diego Union, B-5. City Council voted to invite bids to complete restoration of stage area of Organ Pavilion and the ornamented colonnades; work on the exterior of the pavilion was completed in April 1980; Committee of 100 presented the city \$262,000 to complete restoration - \$131,000 from Bea Evenson and \$131,000 from the Committee; \$20,000 grant received from State Historic Preservation Art program.

December 30, 1981, San Diego Union, B-6:1-3. EDITORIAL: A Navy Museum?

A number of proposals have been made for use of a rebuilt House of Charm, some of them interesting and attractive. A Navy museum appears to be the only one thus far of sufficiently wide interest to muster the community support needed to raise the four or five million dollars required. This fact alone makes Councilman Murphy's suggestion particularly appealing.

(January 21, 1982)

January 3, 1982, San Diego Union, F-1, F-3. "New" Old Globe jury out until curtain rises, by James Britton, II.

Would Shakespeare be satisfied with the new Globe Theater in Balboa Park?

Surely, as a playwright and player hungry for audiences, he would be grateful for the thousands of performances his works have had under auspices of the Old Globe. These occurred in the "old" Globe Theater built in 1935 and burned in 1978. The new \$6.5 million theater is a replacement for the old, occupying pretty much the same place --- and there's the rub.

The new theater had to be squeezed between existing buildings. Its size was dictated by the available space and by the decision to duplicate the shape of the 1935 "original." The intent in 1935 was to simulate one of the Elizabethan theaters in which Shakespeare's works first surfaced. That meant, in Shakespeare's phrase, a "wooden O."

Because the new theater has not put on its first performance, no one can tell how it will sit, how it will feel, how it will listen, above all how it will deliver living actors into your lap. A visitor who picked his way among the workmen in the final throes of construction could sense that the ghost of the Old Globe was very much present in the new.

The interior is all black, so, in effect, there are no walls, only infinite space, waiting to be filled with significant sight and sound. The audience, cradled in seats more comfortable than before, is to be focused on the stage with minimum distraction.

The stage itself is as variable as a Rubik's Cube, as susceptible of combinations --- and one hopes, easier to manipulate. Whole sections of floor go up and down on elevators. Trap doors are everywhere, as befits a house that is bound to abound with Shakespeare's numerous ghosts. A sizable segment of the seats can be wiped out instantly to allow actors to come and go beneath the feet of the others by way of the most inelegantly named facility, the vomitorium.

The stage can thrust forward or shrink back. Scenery can "fly" --- that is, rise out of sight --- but only to a limited degree, the limitation being caused by the fact that a "flyloft" of full height would contradict the illusion of an Elizabethan theater.

Illusion is the main game in theater, whether on the stage or in the house itself. True, great drama has been produced in plain brown wrapped, in storefronts. But the San Diego Old Globe probably never would have achieved the momentum it did (getting a national reputation) if it did not give the illusion of an Elizabethan figment of space suddenly to be discovered tucked away behind the might armada of Spanish-style showplaces that predominate in Balboa Park.

One could argue that the Globe supporters should have been braver and moved their operations --- lock, stock and wooden "O" --- into the downtown, an area that needs every cultural help as it seeks to become a major metropolitan center. The Globesters actually did try using old theaters downtown after the burning of their park property, but the results were limited partly because some patrons were afraid to go there after dark.

Grand plans were considered by Globe supporters to provide parking structures just west of the theater. If this had been part of the actual design procedure, the theater could have benefited in several ways, the most obvious being an easy access for patrons. More important from the production point of view, the backstage could have expanded into part of the parking structure, thus eliminating a certain tightness which directors are already finding troublesome.

Even more beneficial for the Globe's future would be a series of spaces usable as classrooms, allowing the dream of a theater academy to become a reality. All this should have been built, along with the parking structure, as part of the Globe's construction project. It could happen yet, if money gushed in.

Money to support the new Globe has to come from many sources other than box office. Increased seating of 800 or even 1,200 seats was considered before 580 was settled on. This is only slightly larger than the old Globe, which is why the rebuilt structure is likely to seem familiar rather than new, and retain the ghost of the old.

Also familiar will be the fake half-timbering on the exterior, the fake leaded glass of the few windows and the fake timbers on the lobby ceiling. The lobby space, upstairs and down, is somewhat larger than before. And the intermission crowds may be expected to filter into the night air on the green, as they always did. Intermission at the Globe was always one of the guaranteed pleasures.

One consequence of the limited acreage in which this theater was built is that the auxiliary usages -- offices, dressing rooms, restrooms and the rest --- are fitted into spaces that have a leftover look, not as generous as a new theater deserves. Fortunately, the workshop in which sets are prepared is a high loft that should please any craftsman and may be the envy of any sculptor.

Too bad the jealousy that prevails over every square foot of parkland prevented adequate enlargement of the site. Many San Diegans think parkland should be open space, free of buildings. Every project in the park is debated --- you win some and lose some. The rebuilding of the Navy Hospital in the park is considered the greatest loss by those who care most about the park as a park. The Globe, however, was in no position to put up a similar fight.

However, the overall limitation of the site was a byproduct of the squabbling over usages of the park that have increased over the decades and is now civic disease for San Diego.

Ticket-buying visitors to the new Globe will be treated to the best efforts of seasoned theater professionals, aided and abetted by starry-eyed amateurs. As time goes on, the intent is to add music events and films of a high order. This building, which is a reverberation of Shakespeare's own theater, echoing through centuries, is sure to be a centerpiece of San Diego culture for decades.

The Globe is to be an all-purpose theater offering the top output of all periods including the future, but Shakespeare will remain the chief supplier of staging material. His plays will occur both in the theater and in the outdoor festival stage, a nearby facility tucked into a canyon.

Both the festival stage and the Globe Theater's internal arrangements were designed by Richard Hay, a stage designer whose main base is the Ashland, Ore., Shakespeare Theater. Eugene Weston of La Jolla was the architect.

In this case that means Hay's main contribution was not the concept of the building, but the details of construction that made it a safe and sane place to play. He gave the exterior a discreetly somber look,

which will be relieved by tiny lights under the eaves. These eaves, by the way, should shed sheets of water on a rainy night because the sloping roofs have no gutters.

Hay was reluctant to take undue credit as designer of the Globe, but producing director Tom Hall made it clear that Hay had developed the Globe to resemble the successful arrangement he has established at Ashland.

Rave reviews on the building can be expected but as with performances of plays themselves, the building cannot be finally judged until it has performed.

The festival stage is an innocent-appearing entity but it represents the power of art to loom larger than the routine life around it. Everybody was sure this would be a temporary facility, to be torn down when the new Globe came into being. In fact, the Globe people promised that it would be demolished. However, it is so successful, so decided a triumph as an aesthetic environment, chances are it will remain until termites consume its woodiness.

The Globe Theater itself is a much more complex environment than the festival stage. It does not vibrate with free spirit as readily because it is loaded with more of the trappings of a serious purpose. Better siting, and a more expansive "footprint" or basic plan, would have added much value. But how it performs is eagerly awaited by all who see the place as a touchstone, or touchwood, for new dimensions of artistic vitality in San Diego.

If Shakespeare himself were to stand on the new Balboa Park stage and look out over the audience, his all-seeing eyes would have to rise to the especially wondrous sight that can only be seen from the stage looking out. I refer to the tier on tier of catwalks built into the roof structure, where technicians can move back and forth manipulating equipment to strengthen illusions and perhaps even holding cue cards to give reassurance to actors whose hearts are where their tongues should be.

One can imagine that Shakespeare, standing there and taking in the dramatic technological tomorrowland of the catwalks, would glance down his nose at the comfortable audience and say, "Hereafter, in a better world than this, I shall desire much love and knowledge of you."

Shakespeare would be quoting a line from "As You Like It," his play which will inaugurate the new-old Globe Theater January 14.

January 3, 1982, San Diego Union, E-1, E-3. Helen Edison's gift of love, by Donald Dierks.

As the principal single contributor to the new Old Globe, it was logical that an appreciative theater administration would suggest that Mrs. Edison choose a commemorative name for the complex that the Old Globe shares with the Cassius Carter Centre Stage. She chose the name of her late husband and it is as the Simon Edison Center for the Performing Arts that the new theater will be opened and dedicated with performances and celebrations taking place during the next two weeks.

January 3, 1982, San Diego Union, D-1, D-10. It was another opening, another show, December 2, 1937, by Beth Mohr.

January 5, 1982, San Diego Union, B-2:1-3. Balboa Park Committee opposes permitting any kind of night parking in Balboa Park.

January 21, 1982, San Diego Tribune, B-15. International Hall of Fame and Soroptimists International of San Diego will dedicate a flag display this weekend in front of the Aerospace Historical Center.

January 21, 1982, San Diego Union, B-3:5. Arts Museum Wins Support of City Council.

The San Diego Opera Association won backing from a San Diego City Council committee yesterday for a more than \$6 million project to renovate the crumbling House of Charm in Balboa park and turn it into a museum for the performing arts.

The opera has launched a separate Performing Arts Center Foundation with \$150,000 to start to carry out the massive task of raising funds, renovating the Spanish-style building and developing museum exhibits and educational programs.

"We have over 4,000 supporting members, a strong balance sheet and a budget that's been balances for the last five years," noted Joseph Hibben, an opera association official who is now co-chairman of trustees for the new foundation. "Sure it's an ambitious project. But some of us feel musical education in the schools has been somewhat curtailed with the passage of Proposition 13."

Included in the building would be the only performing arts museum west of the Mississippi River, including exhibits demonstrating the history and mechanical workings of the stage, a public library for music and art criticism, complete with music listening rooms, a 250-seat theater for recitals, rehearsal rooms with view windows for the public, and a museum gift shop.

The group won out in its bid for the House of Charm over competition from the Textile Arts and Conservation Center and a proposal for a Navy museum.

Yesterday's 5-0 vote of the Public Facilities and Recreation Committee authorized the city manager to begin negotiations on a lease-operating agreement that will make fund-raising possible.

February 4, 1982, San Diego Union, B-3:2-5. Unwilling to admit defeat, the Committee for Charter Protection for Parks filed yet another lawsuit to block construction of a new Naval Hospital in Balboa Park; the Committee for Charter Protection for Parks --- an umbrella group that includes the League of Women Voters, Sierra Club, Citizens Coordinate for Century 3, and other environmentalists --- hopes the project can be scuttled even at this late date by forcing the navy to pay cash for the land.

February 14, 1982, San Diego Union, B-1:6. In an attempt to cut down on alleged vandalism, muggings and fights in Balboa Park, a group of men and women have formed a "task force" to patrol the park at night and on weekends.

February 14, 1982, San Diego Union, F-1:1-8. Grading nearly completed on 39-acre site in Balboa Park for the world's most expensive military hospital complex.

February 15, 1982, San Diego Tribune, B-6. Representatives Clair Burgener and Bill Lowrey (Republican) and Lionel Van Deerlin (Democrat) will ask City Council to change name of Case de Balboa to the (Bea) Evenson Building.

February 7, 1982, San Diego Union, F-27. Transit planner Glenn Erikson says Balboa Park is "highly overrated," by Roger Showley: "Balboa Park, I think, is highly overrated. The maps say it consists of 1,400 acres. Well, after you take away the Zoo and the Navy Hospital and the scout camps and everything else without free access by the public, there isn't a whole lot left. It doesn't hold a candle to Golden Gate Park."

February 24, 1982, San Diego Union, At Ease - 7:1-8. About 30 Natural History Museum volunteers take turns guiding weekly nature walks through Florida Canyon; volunteers, called canyoneers, are graduates of a 10-week museum course on canyon ecology; nature determines the collection of plants and animals throughout the year.

April 7, 1982, San Diego Union, At Ease - 7:1-8. Balboa Park's Marston Point offers a ballroom for skaters of every degree; in other places there, roller skating has been prohibited, but it can still be practiced west of the Laurel Street bridge and Marston Point is its ballroom; weekends there is music supplied by the recordings of a Fifth Avenue shop, Sunshine Skates.

April 9, 1982, San Diego Tribune, B-4. EDITORIAL: Balboa Park tree loss hurts us all . . . San Diego Zoo has cut down 250 trees to extend a parking lot: The parking lot plan was not brought before the public to discuss its merits. Neither the City Park and Recreation Department Board nor the Balboa Park Committee were formally consulted by the zoo before the trees were felled. It is within the strict legal confines of the lease that the city gave to the zoo for the zoo to do what it wishes with the land.

April 13, 1982, San Diego Tribune, B-10. Letter, Making the case for the Festival Stage, by Denise M. Lavell, Linda Vista.

While having a third major stage in the park does add to the already congested traffic and parking problem, the Balboa Park Master Plan, to be completed in 1983, has set out to alleviate the traffic problems for the entire park area.

I would urge the City Council to extend the lease for the Festival Stage at least until the Master Plan is completed.

April 13, 1982, San Diego Union, B-3:2-5. A group fighting the construction of the Navy Regional Medical Center in Balboa Park has asked a Superior Court Judge to reconsider his decision that a proposed land swap between the federal government and the city of San Diego is proper.

April 16, 1982, San Diego Union, D-5. Globe Seeks Support For Festival Theater.

According to a theater spokesman, more than 700 theatergoers to date have indicated their support for the Globe's plans to continue to present its own shows and to host other performing arts events on the stage.

April 19, 1982, San Diego Union, B-8. EDITORIAL: Save the Festival Stage: Continued use of the Festival Stage is such an attractive prospect that it should not become a victim of Balboa Park's long-standing traffic problems.

April 20, 1982, Los Angeles Times,, II. Asset or eyesore? . . . Battle staged over Old Globe's amphitheater, by Barry M. Horstman: The Festival Stage sits at the upper end of a small wooded canyon, adjacent to both the Old Globe and the San Diego Zoo. It consists of a simple wood stage, supported by wood poles driven into the ground, facing rows of plastic, stadium-type seats.

The \$225,000 facility was built in only 52 days after the City Council issued an emergency construction permit and waived time-consuming environmental reviews, with the understanding that the structure would be removed after the 1978 summer festival, since Old Globe officials hoped to rebuild their indoor theater in time for their 1979 season.

April 21, 1982, Los Angeles Times, II-1. Park & Recreation Board recommended that Old Globe Theater be permitted to operate its outdoor Festival Stage in Balboa Park this summer, by Barry M. Horstman.

However, Lee Hubbard, a Museum of Art trustee, said the museum plans to hold many evening events this summer, and suggested that it is time for the Old Globe to begin to show some good neighborliness by offering fewer plays each month.

April 21, 1982, San Diego Tribune. B-3. City Manager Blair told City Council he has found more money for nine park proposals he had left out of next year's fiscal budget, by Reginald Smith.

April 21, 1982, San Diego Union, B-1. Park & Recreation Board okays continued use of outdoor Festival Stage by Old Globe, by Mary Hellman.

April 22, 1982, Los Angeles Times,, II-3. Zoo officials defend removing 250 trees, by Barry Horstman.

Stung by criticism over their removal of 250 trees from the San Diego Zoo's parking lot, zoo representatives tried to convince city officials Wednesday that they are not San Diego's version of U. S. Interior Secretary Jams Watt.

The zoo's official message to a City Council committee was simple: While their action hardly qualifies them for the Joyce Kilmer appreciation awards, they are not the kind of people who would try to sneak into Sequoia National Forest at night with chain saws.

"It's unfortunate tat the public has been left with a negative impression about this," said Charles Bieler, the zoo's executive director. "This is not as bad . . . as the (press) coverage made it seem."

April 25, 1982, San Diego Union, F-3:1-2. Weeklong events in "Balboa Park, Its History and Future Development," sponsored by the San Diego Chapter of Landscape Architects, culminate April 25 at Casa del Prado, Balboa park; Balboa Park landscape architects directly involved in the planning of the park will be on hand to explain their services and give information; on display will be a historical look at the development of the park and San Diego, and the architects' master plan for future development.

April 27, 1982, San Diego Tribune, B-6. EDITORIAL: Save the Old Globe's Festival Stage: We join the chorus. The outdoor theater, like the temporary Spanish-Colonial style buildings that came before it, is an asset that deserves to live.

April 28, 1982, San Diego Tribune, B-8. Letter, Rev. Neil Voigt, Point Loma.

I am a member of Friends of the Earth; however, the people who are shouting "pure environment" are not seeing far enough. That little piece of the part was formerly full of underbrush.

April 28, 1982, San Diego Union, A-24. Griffith Park fee of 50 cents weekdays and \$1 weekends extended for three months.

April 28, 1982, San Diego Union, At East – 2:1-6. Elementary students through high schoolers from Mission Bay to Borrego Springs will partake in the Festival of the Arts celebration May 1 at Balboa Park; the festival is the culmination of "The Shakespeare Year," an educational endeavor of the San Diego County's schools during the past 12 months.

May 9, 1982, San Diego Union, F-28. Bars and cages will be replaced by moats and rocks at San Diego Zoo in a 10-year, \$22 million renovation program which has been started, by Will Parry.

The reconstruction program will focus on one of the oldest areas of the Zoo, four acres on the Bird and Primate Mesa.

Public donations will finance improvements at the 100-acre animal park which annually attracts more than 3 million visitors each year.

Since 1978, Zoo officials and the architectural firm of Buss Silvers Hughes and Associates have been working on renovation plans with the objective of displaying "the animals in the most authentic setting and to preserve the lush vegetation" while preserving the safety and comfort of both the animals and visitors.

Last week Dave Rice, director of planning and architecture for the Zoo, and Dale Jenkins of Buss Silvers Hughes, said the first of the fine phases of the project should be completed by June. They said moats and rocks have been used to act as natural barriers for the animals instead of the usual bars and cages. "Visitors can now feel they are immersed in the exhibit instead of removed from the animals," said Jenkins.

A revolutionary new flight cage will be one of the highlights of the renovation project. A German engineer, who has designed a similar flight cage in the Munich, Germany, zoo, was brought here to

help design the new exhibit for large birds, such as palm cockatoos, hornbills and maleos. Jenkins said it would cover 10,000 square feet of ground area, adjoining the existing rain forest flight cage for smaller birds. The new flight cage will be covered with 22,000 square feet of one-inch-square wire. Its shape was determined by a computer to best suit the flight requirements of the large birds.

"The total design gives the animals more space to exercise, which will keep them healthy throughout their lives," Rice said.

May 11, 1982, San Diego Tribune, B-7. Letter, Parking for San Diego Zoo patrons is more important than trees, by E. P. Nepstad, Normal Heights . . . "I would say "well done" to the zoo management."

May 16, 1982, San Diego Union, E-1, E-2. Will it become permanent? Drama heats up for Festival Stage, by Mary Hellman.

Globe president Stacey Sullivan: "We'd have to start from scratch again. Without the Festival Stage, we'd be limited artistically and financially. So would the city, given that the Shakespeare Festival is a major tourist attraction."

Steve Brezzo, Museum of Art executive director: "This isn't something that can be solved by coordinating events or improved housekeeping. The park was designed to house certain institutions in certain environmental conditions. It's clear the Festival Stage isn't conducive to that environment."

Steve Estrada, landscape architect and consultant drawing the Balboa Park master plan: "A park is a passive, peaceful place, but it isn't just lawn. Balboa Park is a little of everything --- culture, recreation, open space. Our job is to mesh the activities to reduce conflict. That's why you can't look at the Festival Stage without considering other areas of the park."

Artistic merits aside, the 617-seat Festival stage is a major financial asset, producing more than 20 percent of the Globe's annual income.

May 18, 1982, San Diego Union, B-1. Like a phoenix, Casa de Balboa rises from ashes according to Dave Seyfarth, park's director, by Carl Ritter.

Mayor Wilson late in the afternoon yesterday snipped a ribbon to open officially the park's new \$8 million Casa de Balboa.

In fact, the Casa de Balboa is not really open to the public except for a tenant in the basement, the Model Railroad Museum which has one exhibit set for display Sundays from 11 a.m. to 4 p.m.

May 18, 1982, San Diego Union, B-1:6-8. Proposals for the city's master plan for Balboa Park were discussed May 17; the plan eventually must be reviewed by the Balboa Park Committee and the full Parks and Recreation Committee before going to the City Council for approval.

May 20, 1982, San Diego Tribune, B-3. Balboa Park home seems likely for Festival Stage; Public Facilities and Recreation Committee voted 4-1 to recommend extension through October 31, 1983, by Alison Da Rosa.

"I'm not voting against the stage," said Councilman Bill Mitchell, explaining his negative vote. "I want to recommend a 25-year lease, not this temporary permit. All we're going is playing games with them, because we know that stage is permanent."

May 20, 1982, San Diego Union, B-1, B-9. Globe Outdoor Theater May Be Saved, by Mary Hellman.

The Old Globe Theater moved a step closer toward obtaining permanent status for its outdoor Festival Stage in Balboa Park as the City Council's Public Facilities and Recreation Committee recommended use of the amphitheater for this summer and next.

J. Stacey Sullivan and Museum of Art leaders acknowledged that 11th hour talks late Monday had come close, but failed to resolve differences between them. Scheduling conflicts have been worked out and Globe officials agreed to pay for a consultant to end noise from a museum air conditioner. But museum leaders are still opposed to the Globe's landscaping plans and wanted only a one-year extension on use of the stage.

May 20, 1982, San Diego Union, B-7:5-8. Juggler Kit Summers, 32, was a versatile juggler, attaining popularity at an Atlantic City casino nightclub until he was stuck by a truck and left in a coma April 3; although he is slowly improving, red tape over insurance coverage has left him stranded in a New Jersey hospital; performers Sunday afternoon along Balboa Park's street theater, where Summers gained prominence, raised about \$450 to help pay for transporting him back home.

May 22, 1982, San Diego Union, D-1. Hubert Guy has sculptured ladies from old Electric Building in his garden at Grossmont home.

May 25, 1982, San Diego Tribune, B-3. Festival Stage can call Balboa Park home, by Allison Da Rosa.

The City Council has voted unanimously to extend the 617-seat outdoor theater's temporary use-and-occupancy permit through October 31, 1983.

June 3, 1982, San Diego Union, B-1:2-4. Mike Woods, a retired police officer, remembers the days he patrolled Balboa Park on horseback for the San Diego Police Dept. in 1938 and 1939; seven officers were assigned to patrol on horseback at the time; Police Chief William Kollender will offer the City Council a few proposals for a horse patrol within the next week or so; Balboa Park will be the "primary target" for horse patrols because of the park's topography and size.

June 7, 1982, San Diego Union, B-1:1-8. Several hundred people gathered in Balboa Park next Sixth Avenue and Laurel Street to pray for an end to the nuclear arms race; the occasion was the Interfaith Service of Affirmation for Peace service sponsored by about 12 area religious leaders and organizations.

June 8, 1982, San Diego Union, B-2:4-6. A 12-member citizens group called Citizen Task Force has been patrolling in pairs on weekend nights since January; the organization says it is fed up with "the epidemic rise of violent crime: after dark in Balboa Park.

June 13, 1982, San Diego Union, B-1:2-5. A Bread Not Bombs picnic organized in front of the United Association Building in Balboa Park June 12 following a walk from the General Dynamics plant on Pacific Highway; slogans were prevalent, including "Blow Up Balloons Not People: and "You can't hug your child with nuclear arms."

June 16, 1982, San Diego Union, At Ease – 6:1-8. Balboa Park often looks like a three-ring circus on a sunny afternoon; among the street entertainers one might see clowns, musicians and jugglers.

June 17, 1982, San Diego Union, E-1:6-8. Those strolling the 28th Street side of Balboa Park last Saturday afternoon may have blinked at bit at the rather Victorian scene --- several men and women, all dressed in white, were playing croquet on the lawn; the occasion was the sixth annual Golden Hill Invitational, dreamed up by croquet devotee, Ron Stein; the format is always the same --- each guest brings a bottle of champagne and a dessert and wears white.

July 18, 1982, San Diego Union, B-1:4-6. Beginning July 30, neighborhood residents and others throughout the county will assemble in the Conference Building in Balboa Park for a three-day Italian Cultural Festival; some Italians recently gathered at Mama's home (Madeline de Philippis) in the India Street neighborhood to plan the second annual festival.

July 29, 1982, San Diego Newsline. Old Globe Theater eyes Balboa Park canyon, by Virginia Bisek.

August 14 - 22, 1982. America's Finest City Week.

August 15, 1982, San Diego Union. A great day for Great States Picnic in Balboa Park yesterday, by Carl Ritter.

September 15, 1982, San Diego Tribune, A-2. More than \$1 million in federal grants from Institute of Museum Services are going to 43 California museums, zoos and botanical gardens, including \$140,000 to San Diego organizations. . . . Grants of \$35,000 each are going to the Junipero Serra Museum and to the San Diego Museum of Art, San Diego Museum of Man and the San Diego Zoo.

September 16, 1982, San Diego Tribune, B-1. Attendance at Old Globe's summer season was 190,000, by Neil Morgan..

September 18, 1982, San Diego Union, B-3. Birds, primates moving into new homes at San Diego Zoo in the first phase of the Zoo's major renovation of the mesa west of the main entrance.

The aviaries and six primate enclosures of the new Whittier Southeast Asian Exhibits, which will open to the public September 25, have been built in such a way to present a more biologically and geographically correct mix, according to Zoo officials conducting a preview tour yesterday.

The centerpiece of the Southeast Asian rain forest section is the orangutan exhibit set on a hillside above Fern Canyon.

Birds of the Southeast Asian rain forest will occupy a unique tent-like flight cage made of stainless steel.

The new flight cage connects with a renovated 14,000-square foot Tropical Rain Forest aviary..

September 22, 1982, San Diego Tribune, B-3. Golfers tee off, win round on monthly fees.

The Public Facilities and Recreation Committee today responded to complaints from about 150 most senior citizens by shelving a proposal to eliminate a discount monthly charge for use of the course.

October 9, 1982, San Diego Tribune, A-11. EDITORIAL: City needs income from golf, tennis.

The Public Facilities and Recreation Committee has urged the City Council to boost fees at Torrey Pines and Balboa Park municipal golf courses and possibly use non-profit organizations to operate 80 municipal tennis courts.

If approved by the council, the recommendations might well bring the city some much-needed income from its public golf courses and put the tennis courts on a paying basis.

October 10, 1982, San Diego Union, D-6. SPIN DRIFT: Party at Old Globe . . . time for benefactors to select seats that would bear their name plaques, by Janet Sutter.

October 21, 1982, READER, 3. Ernest Chew, chief botanist at San Diego Zoo, has resigned after eleven years on job; could no longer dig it, by Neal Matthews..

Though he doesn't want to foment trouble, and is therefore reluctant to speak freely, Chew acknowledges that he quit because of a series of disagreements with the zoo's new general manager, Terry Winnick. Winnick's background isn't in zoos; he's a former Universal Studios executive who took over at the zoo last spring. "I'd say I'm only the first casualty," Chew predicts, hinting at seedlings of discontent growing among zoo staffers.

Chew's problems with the new management stemmed from what is perceived, and referred to by insiders, as the zoo's embrace of a new "Tinsel-town" sensibility.

November 12, 1982, San Diego Union A-31. The Old Globe Theater ended its "Year of Celebration" last month with reason to cheer.

The theater expects to post a "slight surplus" for the past 12 months, its first fiscal year as a fully professional company.

November 22, 1982, Downtown, 16. Public Facilities & Recreation Committee voted in favor of designating Balboa Park a historic site.

December 3-4, 1982. Christmas on El Prado schedule.

December 9, 1982, San Diego Tribune, C-1. Crime in Balboa Park, by John Sinor.

Christmas music poured out through Balboa Park as some pitiful petty thieves merrily smashed the passenger door window of my car and rapidly ripped out my tape machine, assorted cassettes and one of my speakers.

December 25, 1982, San Diego Tribune, B-1, B-5.. San Diego Zoo employees are told no more cuts in store, by Elizabeth Wong.

San Diego Zoo employees angered by layoffs and rumors their workday would be shortened to help cover an estimated \$1 million operating deficit were misinformed, says Zoological Society president-elect Sheldon Campbell.

Campbell this week denied that the workday for the zoo's full-time employees would be shortened to seven hours from eight. Zoo directors gave "fleeting consideration" to reducing workers' hours as an economy measure, he said.

However, recent layoffs of part-time employees and other dollar-saving measures should cover the deficit caused by poor attendance, he said. Zoo attendance has declines less than one-half percent this year, he said.

A petition to Campbell, signed by 130 of the zoo's 1,200 employees, attacked the layoffs, administrative spending and the rumored workday reduction. The petition, dated December 8, also criticized zoo managers for accepting leased zoo cars for business and private uses.

"We all have a great stake in our zoo and hate to see it go down hill. Therefore, we ask you to take a long hard look at the payroll budget from the top if we really need to economize," the letter stated.

"Hourly-rated full-time and many part-time employees have been laid off, but we still have the same number of supervisors," the letter said. "We are not in any way trying to tell the management how to run the zoo. We are just very concerned."

Responding with his own letter Wednesday, Campbell said that the employees "good intentions and desire to improve the zoo" were appreciated and that a breakdown in communications was the cause for the misunderstandings.

"The concern was really an expression of the fact that people perhaps had not gotten the word and became worried about it (layoffs and hour reductions)," he said.

Zoo executive director Charles Bieler also received a copy of the employees' letter.

Bieler explained that anxiety among employees was caused by rumors of the reduced workday and layoffs of some part-time employees who worked in areas catering to the public, such as merchandising and food services.

The layoffs took place because of the slowdown in tourism this month and because of the need to stay within the zoo's \$41 million budget for 1983, Bieler said.

"The zoo has gone through the worst four weekends of the year," he said. "We have weathered the tough season. The first three weeks in December were the slowest weeks of the year. But what has occurred (in layoffs and cutbacks) is all that is going to occur."

Bieler said the zoo was coming up short of its projected year's attendance of 3 million. About 70 percent of the zoo's income comes from tourism, he said.

Most staff reductions were small, Bieler added. Attrition and reduction of hours for some employees helped to "save a dollar here and a dollar there."

"In tight economic times, we don't want to get ourselves in trouble," he said.

"I think the letter was a sincere letter of concern for their job security and for the long-term future of the zoo. We've got to do a better job of communicating and a better job of listening."

December 30, 1982, San Diego Union, B-2. San Diego Zoo, Wild Animal Park to increase some admission fees, pass prices.

Several admission fees and special pass prices at the San Diego Zoo and the San Diego Wild Animal Park will increase soon, Zoological Society officials announced yesterday.

The sharpest rise affects the zoo's Citizen's Pass, an admission card that was little-publicized until news accounts this year made its existence more widely known. Zoo officials said then the cost probably would increase, and it has, from \$6 to \$10 beginning January 17.

The Citizen's Pass, valid only for entrance to the Zoo, is available to San Diego city residents by applying at the Guest Relations Window. A driver's license or Department of Motor Vehicle's identification card indicating a San Diego zip code must be presented for verification.

December 30, 1982, San Diego Union, B-9. George Divine, architect who designed Timken Gallery, is dead at 68..

Queen Elisabeth II visits Balboa Park (February 26, 1983)

City Council restricts free admission to museums in Balboa Park
from once a week to once a month
(June 1, 1983)

Private clubs allowed to operate tennis courts (July 2, 1983)

Antique gold and jewelry stolen from Natural History Museum
(October 24, 1983)

Pekarek Group proposes plan for Balboa Park
(December 23, 1983)

Facade on House of Hospitality restored (December 25, 1983)

January 3, 1983, San Diego Tribune, B-1, B-4. Sheldon Campbell, San Diego Zoo leader, would allay staff fears, by Elizabeth Wong.

Now that Sheldon Campbell has taken office, one of the first things he wants to do is meet with San Diego Zoo employees and allay their fears of more staff cutbacks and layoffs.

As the new president of the Zoological Society of San Diego, Campbell said he wants "to repair the breakdown in communication" that prompted 130 zoo employees to send him a letter attacking layoffs of some part-time workers.

In a petition dated December 8, employees complained about administrative spending and a rumored workday reduction.

Last week, Campbell responded with his own letter, saying layoffs and other dollar-saving measures were needed to help offset a \$1 million loss in expected revenue caused by decreases in zoo attendance.

The 64-year-old native San Diegan and retired stock-brokerage executive talked last week about his goals for 1983 Saturday. Campbell took the helm of the zoo and the San Diego Wild Animal Park from two-term President George Gildred.

"What the employees are feeling is a typical problem of growth," Campbell said. "We have grown into two big campuses, from 300 or 400 employees to 1,200. The kind of in-touchness of a single manager that we had in the past is no longer possible."

He said plans for 1983 include computerization, renovation of Dog and Cat Canyon, one of the oldest sections of the zoo; a search for farms to take surplus animals; and strengthening of ties with China.

Campbell said that “one of our premier objectives, one that has been a long time in the making, is to computerize, “to keep better track of animals.”

“One of my personal objectives is to maintain our connection with China,” Campbell said.

He said that “we are the only zoo in the world outside of Japan to maintain a connection” with China.

“Our ultimate hope is to get some giant pandas,” he said.

The best chance, he said, may come in 1985 when Chinese officials review a policy that allows pandas to be sent only to a country’s national zoo.

“We are already formulating plans for improving and renovating Dog and Cat Canyon,” he said, adding that many of the cages there were built in the 1930s and early ‘40s.

Another goal is to find “an angel” to donate money to build one of his pet projects, several exhibits for small nocturnal animals.

“We lack the facilities to exhibit nocturnal animals in a way that people can see them,” he said.

A prosaic but immediate goal, Campbell said, is to install more public toilets at the animal park.

“We also want to begin fund raising for several long-term park projects,” he said.

In November, the society approved preliminary plans for projects at the park to triple the size of the gorilla exhibit, build a barn for the Indian rhinoceroses, make room for the iron-tailed macaque monkeys from India and expand the children’s area.

“It’ll be a busy but fun year,” Campbell said.

He has been a zoo trustee since 1968, spending 50 to 80 hours per month working with the society, in particular the animal collection committee.

Author of several business- and animal-related articles of *ZooNooz*, *San Diego Magazine*, *Wildlife* and *American Scientist*, Campbell has also co-authored several books, including, “Snakes of the American West,” “Lifeboat to Ararat” and a history of the 64th Fighter Wing from 1942 to 1945.

His zoo interests began at the age of 16 when he worked as an assistant to the reptile keeper. Mainly, his duties including scrubbing the backs of turtles to keep them free of algae.

Instead of a salary, Campbell said he preferred and received a rattlesnake skin.

January 4, 1983, San Diego Tribune, Leisure - 1, 7. Florida Canyon detectives find beauty in protected canyon path, by Nancy Cleeland.

The brown-green walls of Florida Canyon cut through the northeastern edge of Balboa Park, covered by hundreds of different native shrubs and flowers.

Centuries ago, trading Diegueno Indians traveled a well-worn path across the floor of this canyon, about 100 feet deep. A city has grown up around it, but the canyon hasn’t changed much since then. And because a 1,400-acre portion was set aside as a botanical preserve 10 years ago [sic], it is destined to remain one of the few pieces of unspoiled land inside the city limits.

“This is as undisturbed as it can possibly be, considering it’s in the middle of a residential area,” said Annette Winner, at the start of a two-hour walking tour last week.”

“A lot of mammals make this canyon home --- cottontails, jack rabbits, ground squirrels, pocket gophers --- you can see one of their holes here. Even some gray fox and coyotes. Most of them are nocturnal, so chances are we won’t see any today.”

Winner, an administrative assistant at USSD, speaks with authority on the plants and animals of Florida Canyon. Like 50 other volunteers, she was trained on the subjects in a 12-week course at the nearby Natural History Museum.

Now she and other “canyoneers” lead weekly one-mile tours, free to the public, along the nature trail that passes through two distinct types of vegetation: thick chaparral on the cool, wet, north-facing slopes, sparse low-lying sage scrub on the drier west and south facing slopes.

“A lot of people just think of these plants as weeds,” said Winner. “Everybody looks at the brown, dry hills and thinks they’re just a bunch of dead weeds. Especially people from the East, who may be used to lush greens in spring and dramatic seasonal changes.

“Here the changes are much more subtle, and you have to look a little closer to see them.”

Winner, a self-described “detective,” stoops and stretches and probes to find what’s beyond the obvious. In two hours she described non-stop the daily life and natural history of the canyon, which was named after the road that passes through it --- Florida Drive.

She rubbed the leaves of a black sage and invited a visitor to smell the pleasant, sweet aroma. “The Indians used sage to mask odors when they went hunting.”

She picked the seeds of a fennel plant, and offered a few for a taste. But she advised caution when looking for the licorice-flavored seeds, because a plant similar in appearance can be poisonous.

She examined a prickly pear cactus, and as she expected, found a green “leaf-footed bug” underneath one of its leaves. Spines from the cactus were used by Indians to tattoo youths during puberty rites, she said.

In a clump of soil, no more than six inches square, Winner found “an entire community: of lush green club mosses and tiny ferns.

In passing she pointed out gnarly scrub oaks; a thick toyon tree estimated to be 100 years old; a Christmas berry or hollywood tree, which gave the celebrated Los Angeles community its name; miniature machine-gun-like holes were drilled into the tree’s bark by a yellow-bellied sapsucker, cousin of the woodpecker; and a clump of dried stalks called “Everlasting” for its long-lasting flowers that bloom in spring.

Near trail’s end, she stopped at a clearing that has become known as the “bird cafeteria.” Trees surround the clearing --- sumac, toyon, lemonade-berry and manzanita --- providing seeds and berries for a crowd of noisy birds. Scrubs, jays, hummingbirds, mockingbirds, doves, quails and hawks, all can be seen in or above the canyon.

Winner entered the canyoneers program to put her bachelor’s degree in botany to use. Other canyoneers are working on master’s degrees in the field, but many of the volunteers had no background in science before going through the training.

Alan Marshall, a special education teacher for city schools, has headed the program for the past year. He ensures that a guide will be posted every Sunday afternoon at 2, at the trail head, just west of the Morley Field tennis courts. There, interested people meet for the walk, which normally last about one hour.

Usually about half a dozen walkers take the tour. Only once has there been a no-show, Winner said, "and then we just gathered up people in the parking lot and took them along."

Group tours can be arranged any Monday, Friday or Saturday by calling the museum. Also, the canyoneers lead frequent "outreach" walks through other canyons in the county, including Penasquitos and San Clemente.

The program was started by Helen Vallejo Chamlee, an assistant curator at the museum until her death last summer. Chamlee took up Florida Canyon as a cause in the early 1970s and lobbied the City Council to declare it a preserve.

She succeeded in 1974 and within a year had trained a few volunteers to lead tours along the nature trail. Chamlee also wrote a guide, with descriptions corresponding to 31 numbered posts on the trail, which is available for 50 cents at the Natural History Museum.

She wrote in her guide, "When you enter the nature trail, you become, for a short while, part of a natural environment." Largely because of Chamlee's efforts, the canyon will remain undisturbed for many years.

January 5, 1983, San Diego Tribune, B-4. Architecture critic James Britton, died at 67 in his sleep at his downtown home Monday night, January 3, 1983.

January 6, 1983, San Diego Union, B-10. EDITORIAL: Why not a Navy-Marine Corps Museum?

Among the thoughts shared with San Diegans by departing Mayor Pete Wilson was that our city should be the site of a Navy-Marine Corps Museum. This is not the first time San Diego has been prodded in that direction. Indeed, for a city whose history is so entwined with the Navy and the Marines, such a museum is conspicuous by its absence.

There are naval museums in cities with half as much reason to have one. Some are ashore, like the Navy's museum on Treasure Island in San Francisco Bay, and some are aboard retired warships, like the recently-opened "Sea-Air-Space" museum aboard the old carrier *Intrepid* at a pier in New York City.

San Diego once had a minor-league naval museum at the Naval Training Center, but even that has vanished, a victim of budget cuts during the Carter administration. There are a few Macy artifacts amid the non-Navy exhibits aboard the ferry boat *Berkeley*, at the foot of Broadway, but if that's the best our city can do, we should be ashamed.

The time to get serious about a Navy-Marine Corps Museum is right now, when planners are making far-reaching decisions about development along the San Diego waterfront, especially development oriented toward visitors. This would be a joint military-civilian project, bring together the Navy and Marine Corps, the city, county and Port District, and organizations like the Navy League, the Maritime Association and others concerned with preserving San Diego's heritage.

Federal participation might benefit by a nudge from Congress --- particularly from the Armed Services Committee and its newest member, Senator Pete Wilson of San Diego.

January 6, 1983, San Diego Union, B-3. New police unit zips over for arrest, by Homer Clance.

Riding over curbs, across patios and parking lots, avoid streets and traffic lights, the San Diego police tactical squad yesterday arrested a burglary suspect in Balboa Park within minutes of a radio call of the crime.

January 6, 1983, San Diego Union, C-1. "Sunshine Skates" on Fifth Avenue, near Balboa Park, opened in 1978, rolls into history, "really good times" recalled, by Barbara Moran.

Jim Hills, owner of Sunshine Skates, blames restrictive city ordinances, the “faddish nature of skating,” the recessing and downtown redevelopment.

January 7, 1983, San Diego Tribune, B-3. San Diegans favor Balboa Park as site for 1997 World’s Fair, by Vicki Torres.

Meyers Jacobsen, a San Diego businessman who failed to make Aero World a proposed aviation theme park, a reality in Mira Mesa, says he may have better luck with a world’s fair in San Diego.

Jacobsen and about 30 other San Diegans, members of an exploratory committee, have been busy since February investigating 15 sites for a possible fair here in 1997.

Not surprisingly, their No. 1 choice was Balboa Park.

January 8, 1983, Los Angeles Times, II-1. Public given glimpse of 21st century in Balboa Park, by Scott Harris.

Two drawings show bridges where now there are none. Another depicts a picnic-and-play area reclaimed from a nine-hole golf course. Still another suggests a roadway leading to a parking garage.

Twenty-six schematic drawings in all were unveiled by city officials at a press conference Friday, providing the public with a glimpse into what could be the future of Balboa Park.

The drawings, part of city-commissioned long-range planning efforts that have stirred controversy among cultural leaders and nearby residents, have been put on display at the park’s San Diego Art Institute Gallery, next to a parking lot that is envisioned as a plaza in the scheme.

A suggestion box has been set up nearby. Planner Ron Pekarek and Balboa Park Committee Chairman Robert Arnhyman said they want to gauge the public’s reaction and perhaps find better ideas.

“What we have here are composites representing our best ideas at this time,” Pekarek said. The plans are intended to guide park development into the 21st century.

The aim of the planning efforts is ambitious. “We would like to be all things to all people,” Arnhyman said.

The plans propose several major changes: construction of a new amphitheater north of the new naval hospital now being built; parking garages that would allow asphalt lots to be reclaimed as plazas, new roads and bridges to improve traffic circulation.

These plans have prompted criticism from directors of museums and theaters along the Prado who say parking and scheduling problems are not properly addressed. Residents of neighborhoods rimming the 1,100-acre park have aired objections to road proposals.

Newly appointed Councilman Uvaldo Martinez, whose district encompasses the park, said he felt much of the criticism stemmed from misinformation.

“The threat of the unknown can be very emotional,” Martinez said.

Arnhyman, while hailing Balboa Park as “one of the most beautiful in the world,” said it could be improved in many ways. He said construction of a 4,200-seat amphitheater in what is left of Florida Canyon would help “maximize uses.”

Arnhym, executive vice president of the private arts-support agency COMBO, said the amphitheater would lure first-rate Broadway productions to San Diego. As conceived, it would use the zoo parking lot --- now vacant at night --- and the existing Starlight Bowl site for parking. It also would move Starlight Opera productions out from under the main Lindbergh Field approach pattern.

Arnhym said he anticipates intense debate over whether that section of Florida Canyon, envisioned for the amphitheater should remain open space.

"I never would have made the proposal if not for the naval hospital encroachment. Never." Arnhym said the canyon no longer "feels like the wide, open spaces."

Pekarek said it will be many months before a master plan is presented to the City Council. Each project would then be subject to public hearings and council approval, he said, and financial obstacles could leave much work undone.

The drawings will remain on display through January 30, but may stay up longer depending on public reaction, Pekarek said.

January 8, 1983, San Diego Tribune, C-1. Public encouraged to get involved in Balboa Park's expansion plans, by Allison Da Rosa.

The public will have the opportunity this month to review maps, schematic drawings and descriptions of proposed revisions of the Balboa Park master plan. They will be displayed through January 30 in the lobby of the San Diego Art Institute in the park.

Bob Arnhym, who heads the Balboa Park Committee, said that the city wants to adopt a revised plan this summer. He predicted the development --- which could include replacing today's parking lots with lawn, replacing Starlight Bowl with a parking structure and moving the shows to Florida Canyon --- will begin within two years.

January 9, 1983, Los Angeles Times, II, 1, 2. "Show biz" tactics rankle staff as strains emerge in San Diego Zoo's "family," by Scott Harris.

Perhaps Diablo was engaging in political protest, or maybe he was just dieting. So his hosts, in their displeasure, decided to shove the foot down his throat.

And quite a throat it was. Diablo, a resident of the fledgling San Diego Zoo in the 1920s, was a 23-foot python, so powerful that it took a dozen strong men to subdue him for the seasonal meal. This strange wrestling match always attracted huge crowds. Zoo founder Harry Wegeforth saw Diablo as a source of revenue and began charging a 10-cent admission to watch the feeding.

Charles Bieler, the zoo's current executive director, was recalling this bit of lore. "When they couldn't meet the payroll," he said, "they'd put out a press release: 'Come out and watch us feed the python.'"

Today, as if taking a cue from Wegeforth, Bieler and the board of directors of the 66-year-old Zoological Society of San Diego are turning to show biz once again to stimulate attendance in an age of economic uncertainties and intense competition among Southland tourist attractions.

The new emphasis on entertainment, such as musical concerts and acrobatic acts, is only one of several changes that have taken place at the zoo and its 10-year-old auxiliary facility near Escondido, the San Diego Wild Animal Park. There is new construction and plans for more. And there is new, expanded management with orders to tighten the fiscal belt and get more work from the same number of employees.

And these changes, taken collectively, have prompted something else that, if not unprecedented, is at least unusual in this highly respected nonprofit institution: Controversy. Dissension between employees and management is widespread. And criticism that “circus” acts tend to denigrate the zoo’s noble aims are commonplace.

“It’s getting to be more tinsel-town all the time,” one former employee complained. A petition signed by 130 staff members suggested that the zoo --- considered among the world’s elite --- is now “going downhill.”

Bieler says he is more concerned with morale among the Zoological Society’s 1,200 employees than at any time before in his 11-year tenure. Employees who go back more than 20 years say they have never seen such discontent in their ranks. Unless it is corrected, the turmoil is bound to adversely affect the care of animals and popularity of the zoo, employees and supervisors agree.

The controversy, brewing for several months, surfaced publicly in December in the petition sent to Sheldon Campbell, president of the institution’s board of directors, and some new media.

The petition listed a shrinking species collection, static attendance, the use of emergency funds, layoffs, the “circus” acts and top-heavy administration problems.

“We all have a great stake in our zoo and hate to see it go downhill. Therefore we ask you to take a long hard look at the payroll budget from the top of we really need to economize,” the petition said in part.

“Hourly rated full-time and many part-time employees have been laid off, but we still have the same number of supervisors.”

Discontent also has surfaced in anonymous notes submitted for a question-and-answer column in the employee newsletter.

“Over the past few months, morale has deteriorated to a rock-bottom low. I’m sure that our visitors can sense this,” one zoo-based employee wrote. “It is hard to hide this uncomfortable situation. We used to be more or less one big happy family. That doesn’t exist anymore.”

One long-time employee, who is said to be the author of the petition, declined to be interviewed, nothing that he and other disgruntled staff members were scheduled to meet with Bieler and Campbell later this month. “If nothing comes of it, maybe I’ll give you a call then,” he said.

Bieler and Campbell said they believe morale problems stem chiefly from poor internal communications. Bieler said he has scheduled meetings with departments to air concerns and has announced that he will not fill the position being vacated by deputy director Andy Grant, who has resigned to manage a tourist attraction in England. The director said his decision not to fill the post will enable him both to have closer contact with his staff and to show employees that the administration is willing to make sacrifices.

“We probably should have done the job of communicating to them what we’re doing and why we’re doing it. And maybe we’re not listening enough,” Bieler said.

But he and Campbell strongly disputed the suggestion that the zoo is “going downhill.”

Emergency reserves were used to pay for part of a \$3-million initial phase of the “Heart of the Zoo” renewal program, an exhibit of Southeast Asian primates and birds. That money will be replenished through donations, he said.

Bieler confirmed that more employees than usual were laid off at the end of the peak summer season, but stressed that only part-time workers were affected. In many cases hours were cut back.

"We just tightened it up a little tighter than we had in previous years," he said. "The concern is, hey, what is down the road? I think we really are very sound financially. We have the emergency reserve. We're in the black at both institutions."

Campbell stressed that the decrease in the size of the zoo's species collection --- numbering about 850 today compared to the 950 of 10 years ago --- reflects an international shift in zoo philosophy and, properly viewed, is a sign of progress, not digression.

Although it is true the zoo used to have more species, Campbell explained, many were exhibited as singles. Today, he said, zoos trade species to exhibit them in pairs to encourage captive breeding, thus reducing the tendency to capture species in the wild.

Campbell is confident the zoo is still making advances. "Nobody can touch us when it comes to research," he said. And, although the administration has been instructed to cut costs, the San Diego Zoo's financial stability is envied by officials from other zoos, he said.

Most zoos across the nation rely on taxes to survive. Only about 2 percent of the San Diego Zoological Society's \$43 million budget for 1983 comes from taxes. Most of it comes from gate receipts, commissions, membership fees and private donations.

Most of the complaints have emerged at the zoo, rather than the Wild Animal Park. General manager Terry Winnick, who joined the zoo administration in June from MCA Corp., owners of Universal Studios, often is blamed for low morale.

Horticulturist Ernie Chew, credited with enhancing the zoo's extensive botanical collection over the past decade, resigned within a few weeks of Winnick's arrival because of repeated clashes with his new boss. Winnick's directives and what has been described as a condescending attitude have rankled many employees.

Despite the complaints, Campbell and Bieler express confidence in Winnick, dismissing Chew's resignation as an unfortunate incident but something that can be expected in any large organization. "We have our personalities, we have our points of friction," Bieler said. Winnick said criticism "comes with the territory . . . I can accept that."

There appears to be a feeling among directors that the zoo really needed an aggressive supervisor.

"He (Winnick) tends to be a 'do-it' kind of guy . . . a go-getter, a hustler," Campbell said. "That attitude really hadn't prevailed around here."

Campbell said he felt a laconic work atmosphere had developed at the zoo over the past decade while the board of directors and Bieler had concentrated their efforts on developing and organizing the Wild Animal Park, where visitors ride a monorail to view animals in a more realistic habitat.

Attendance at the Wild Animal Park has climbed 20 percent in each of the last two years, a phenomenon officials attribute to summer concert series featuring mostly middle-of-the-road acts like the Kingston Trio and Rick Nelson. This success --- at a time tourist business is down roughly 10 percent --- has enabled the directors to turn their attention back to the zoo, Campbell said.

Zoo attendance has held steady at 3 million for the past 10 years. The gate slipped slightly in 1982, which zoo officials attribute both to the recession and to the Wild Animal Park's success. "We're competing against ourselves," Bieler said.

The zoo tried a clown, Emmett Kelly, Jr., a few years ago and a troupe of Chinese acrobats last summer to boost attendance. The efforts have met with criticism.

“ ‘We’re a zoo, not a circus’ --- you hear that a lot,” zoo spokesman Jeff Jouett said.

“It’s very difficult,” Campbell said. “We are constantly balancing science and show. . . . A lot of people call for lighter forms of amusement.”

Ironically, the Wild Animal Park had its best day in 1982 when it featured an act that violated the policy calling for “good family entertainment.” Faced with a late cancellation, officials booked the rock group Dr. Hook.

Officials found that the group attracted a much younger crowd, non-members generally, who had to pay full admission. Zoological Society members get in free to the zoo and park for their \$35 annual fee.

But, as for more rock music, Bieler said, “We want to stay away from that. We might sample it now and then, but we want to stay pretty much with the family-type entertainment. It’s established a good pattern for us.”

“It’s very important that we maintain the image we are a zoo first, and we have the finest collection of animals in the world, and that people are coming to see these animals.”

Statistics indicate the disenchantment felt by many employees is not shared by the public, at least not yet. Memberships have soared from 75,000 to 127,000 during the last five years. The combined attendance of the zoo and park was a record 4.5 million in 1983, placing in third behind Disneyland and Knott’s Berry Farm among Southland attractions. Officials attribute the growth to the concert series, the growth of the park and aggressive marketing.

January 9, 1983, San Diego Union, F-1, F-13, F-15. James Britton on San Diego . . . The Last Hurrah.

January 11, 1983, San Diego Tribune, C-3. Reuben H. Fleet Space Theater’s “tomorrow” draws you right into space, by Gregory N. Joseph.

The theater’s special 70mm Omnimax projection throws the film’s images onto a 76-foot tiled dome screen that surrounds those in the audience, making them not so much moviegoers as *moviedoers* --- near participants.

To be sure, it seems fitting that a motion picture like “Tomorrow in Space” --- with its many pioneering elements --- should launch the 10th anniversary celebration of the Reuben H. Fleet Space Theater & Science Center.

The 350-seat Fleet theater had an annual paid attendance of 401,000 people in fiscal 1982. For the same period, revenues generated by ticket sales totaled almost \$1.2 million.

February 4, 1983, San Diego Tribune, A-2. The County’s senior citizens, who golf at the city’s Balboa Park, haven’t given up their fight to regain pass-buying privileges.

February 25, 1983, San Diego Union, A-1, A-10. San Diego Polishes Its Pomp For A Big Weekend of Royal Circumstance, by R. H. Growald.

San Diego polished its pomp and circumstance today for the weekend visit by Britain’s Queen Elizabeth II.

The royal schedule calls for invitation audiences only when the queen visits Balboa Park, the Scripps Institution of Oceanography, and St. Paul’s. The invitations to her receptions and Saturday night dinner aboard her yacht *Britannia* number a total of only 450. In all, according to her hosts, about 4,500 San Diegans have been invited to be within sight of the queen.

The queen is coming to California after touring Mexico's west coast at the suggestion of Mr. Reagan. He invited her while visiting Windsor Castle last year and British officials said the monarch expressed interest in seeing California.

February 26, 1983, San Diego Union, A-1, A-8. Her Majesty Arrives Today Amid Curtsies, Cheers, Protests, by R. H. Growald.

In the San Diego Zoo, they washed the elephant's feet for the coming of Prince Philip, Elizabeth's husband. At the Old Globe Theater in Balboa Park they readied a fanfare for the queen with trumpets, trombones, organ, timpani and, hoping she wouldn't notice, French and not English horns.

The queen and her husband depart Scripps in separate cars. The Secret Service is providing presidential bulletproof limousines. Both will head for Balboa Park.

Elizabeth will go to the Old Globe Theater, that New World bastion of William Shakespeare. The queen will receive a history of the theater in leather binding, drawings and the sounds of that special music. She will unveil Roy Paul Madson's six-foot statue of the Bard.

Donald Ogden Stiers, late the Boston Brahmin doctor of the TV show "M*A*S*H" and fellow performer Eva Roberts will recite Shakespearean sonnets and some poetry of the American Hart Crane. Having the monarch at the Old Globe moved theater official Bruce Maza to say it as Falstaff might have:

"This visit is an affirmation of all that we strive to do at the Old Globe. It is an affirmation of the traditions that Shakespeare and the Globe represent in the English-speaking world. And the power of the theater."

"The visit is very finely choreographed theater," he said. Performing their roles, Senator Pete Wilson, lately mayor of San Diego, will escort the queen from the theater into the Sculpture Garden of the San Diego Museum of Art.

Here, amid the works of British sculptors Henry Moore and Barbara Hepworth, her majesty will be introduced to leaders of British societies in San Diego, to museum officials, and to city leaders led by Cleator.

Meanwhile, in the Zoo, Philip, president of the World Wildlife Fund International, will be shown animals the San Diego pride has helped save from extinction. Zoo spokeswoman Carole Towne said Devi, the 5-year old elephant that thinks she is a jumbo, is having her feet washed of mud and other playthings lest Philip get the wrong impression.

Because time is short, driver-guide Pete Munroe, 32, is keeping his chatter brief. He eliminated the jokes he usually tells guests aboard a double-deck Zoo bus.

February 27, 1983, San Diego Union, A-1, A-11, A-13. Queen unveils Bard and touches the people, by Welton Jones and Mark Sauer.

The rain stopped and the sun broke through just before Queen Elizabeth II alighted from her limousine in Balboa Park yesterday and stepped gingerly on her heels along the soaked, crimson carpet.

If Queen Elizabeth I visited Shakespeare's Globe Theater during her reign four centuries ago, no account survives. But her namesake's arrival at San Diego's Old Globe Theater, amid the skirl of bagpipes and the snapping of her own royal standard is now a matter of glowing public record.

Despite a balky pen, Queen Elisabeth II signed a broad “Elizabeth II” in a special guest book and proceeded into the theater itself to the strains of Conrad Susa’s “The Royal Estrada,” composed for the occasion and played by the San Diego Symphony’s brass and percussion.

As the queen mounted the stage to unveil a new bust of Shakespeare, the 500 invited Globe guests applauded, then wavered uncertainly over whether to sit or stand until Senator Pete Wilson, the queen’s official host in the park, firmly motioned them into their seats.

The senator lauded the Globe’s 45-year history and hailed the “rich symbolism” of her visit, then invited her to “give a hearty yank” to the golden cord dangling next to the bust, which she did, cueing an unseen stagehand who did the actual work of whisking the cloth into the loft over the stage.

As flutist Dannan Bursill-Hall and harpist Sheila Sterling of the symphony played more Susa accompaniment, David Ogden-Stiers and Eve Roberts, two actors who have performed at the Globe recently, read, in turn, three Shakespearean sonnets (VIII, CXVI and XXX) and “To Shakespeare,” a sonnet by the American poet Hart Crane.

After the readings, with another flourish of Susa music, the queen followed Senator Wilson up the wrong aisle and out through the lobby.

“Oh no,” groaned a Secret Service man in the back of the house. “Pete never could take direction,” muttered a senior Globe staffer.

Later, at the San Diego Museum of Art, the queen requested that Stiers, a featured performer on television’s “M*A*S*H” and Roberts be brought to her for questions.

“Very simple and very gracious,” Stiers called the five-minute conversation. “She congratulated us on the reading, and asked many questions about how many shows the Globe does, how many stages it has, where the actors come from.

“She seemed to have an extraordinary knowledge about theater in general and, though I may be inventing this, she seemed quite taken with the Globe.”

Outside the playhouse, the queen passed between the House of Scotland Pipe Band and Dancers on the green and the main body of the Globe staff and artists, ranged in front of the Cassius Carter Center Stage, and decked out in extraordinary finery.

(“You’ll see more ties here today than ever before,” predicted Globe technical director Jim Burke, with accuracy. And hats were much in evidence among the Globe ladies, on 23 of 44 by actual count.)

Then it was a stroll next door for a civic ceremony at the San Diego Museum of Art. There, the queen, a mother of four, danced the minuet of royal ritual among Americans with such finesse that she bridged the chasm between her pomp and their everyday life.

Many of those assembled belonged to fraternal organizations representing not only England but also Wales, Scotland, Canada and other Commonwealth nations. And they shouted “God Save the Queen!” and applauded as the queen entered. The event planned for outdoors was transferred inside because of the rain, requiring some paintings to be hastily rearranged.

The queen was given a bouquet, the key to the city, an album of photographs taken by citizens and a catalog of American paintings hanging in the San Diego Museum of Art.

Bill Cleator, the acting mayor, apologized for nervousness and stumbled through a brief speech, forgetting to use the microphone and therefore leaving the 500 or so dignitaries and guests inside the museum's 20th Century Gallery as bewildered as they were awed.

And that was it for the ceremony. The entire event took less than five minutes.

But Elizabeth II couldn't bring herself to leave these stout-hearted faithful --- many of whom had waited hours in rain showers --- with just a glimpse of her royal self.

As she was being led away, stage left, the queen tapped Senator Wilson's shoulder with her white-gloved hand. She asked in a whisper if another moment or two couldn't be spared. Of course it could.

So the queen nodded toward stage right, a gesture that said, "C'mon let's mingle awhile." And that's precisely what she did.

Among the first the queen spoke with was Susan Kockritz. "What a lovely museum you have," her majesty told Kockritz, whose husband, Frank, is a past president of the museum.

Mrs. Kockritz, herself a board member at the La Jolla Museum of Contemporary Art, replied, "I'm sorry it's a rainy day." And the queen said, "Yes, I know you are, but it reminds me of England. Are you English?" Mrs. Kockritz allowed that she wasn't, but had visited Great Britain.

The row of medals on the chest of Eric Draper, 89, caught the monarch's attention and drew her to his wheelchair.

"Where did you serve?" the queen asked Draper, a longtime San Diego travel agent and British native. She had realized immediately that the medals were British and of World War I vintage.

"In the Holy Land with General Cheator's forces," Draper replied in a firm voice.

"I've heard a lot about that," Elizabeth replied, fixing him with her blue eyes and a smile.

She looked at the old warrior of her grandfather's army.

The Queen of England awarded Draper a new decoration --- a smile.

"That was very emotional for me," the elderly man said as the queen moved on. "She caught me completely by surprise. King George V and Queen Mary (Elizabeth's grandparents) once visited my men during World War I when I was serving with a British West Indies regiment. And when Edward was Duke of Windsor (the late king Edward VIII who abdicated in 1936), he once slipped his security people during the war (Draper also served in World War II) and dropped into my trench and asked us boys for a drink. But oh, this today was a thrill."

Betsy Lawson told Queen Elizabeth that she was a proud member of the Daughters of the British Empire. "Is that a large organization here?" the queen asked. "I told her there were six chapters," said Lawson, who belongs to the Sir Walter Raleigh chapter. "Actually there are five, but I was so nervous."

Noticing Pat Bryan's button reading "The British are Coming" Queen Elizabeth stopped. Then her royal highness turned to Bryan's husband Jack, who is past president of the Trafalgar Club here, and said, "What are you doing here?" Jack Bryan replied: "I came to see you, Your Majesty." The queen then said, "Oh, you have so many organizations here."

Moments later, Pat Bryan was still trying to quell a racing heart. "I can't believe we got so close to here," said Pat, who like her husband is a native of England. "We've seen her several times before

and three years ago we saw the entire royal family during the trooping of the colors at Buckingham Palace.”

Earlier, in the foyer of the Globe, Senator Wilson introduced the queen to J. Stacey Sullivan, the Globe’s chairman of the board, who made the formal presentation of Globe officials and their wives.

First of all, there was Lowell Davies, the Globe’s president for decades, now elevated to honorary life chairman, but too ailing to stand when presented. Then there was James S. Milch, president of the Globe, and the three main staff members, executive producer Craig Noel, artistic director Jack O’Brien, and managing director Thomas Hall.

As Sullivan introduced the queen to each person in turn, the subject came up of the Globe’s arson fire in 1978, which destroyed the predecessor of the present building.

“She seemed surprised to hear about it,” Noel said later. “We got into a dialogue on it.”

O’Brien, introduced by Sullivan as the man to whom Craig Noel has passed the torch, said he got a laugh from the queen.

“I told her she did us a double honor,” O’Brien said, “by visiting the theater and by stopping the rain.”

When Hall was presented, he got a second laugh.

“What does a managing director do?” asked the queen, perhaps perplexed by the two titles.

“I pay for everything,” Hall answered, and she laughed, saying, “I know what that’s like.” She seemed very easy.

Next in line after Helen Edison, the major benefactor for whose late husband Simon the Globe complex is named, was Conrad Susa, the composer, who had once before written a commissioned piece for the Queen during her Bicentennial visit to Boston in 1976.

“When Stacey told her this was the second piece I’d written for her,” she seemed startled,” Susa said. “But she did recognize the word ‘Boston.’”

All who met her yesterday emphasized the queen’s steady piercing gaze and her ability to concentrate fully upon the subject of the moment.

Mrs. Irving Solomon, a Globe patron who commissioned the Shakespeare bust as a tribute to her late husband, Colonel Irving Solomon, was the only person in the receiving line to curtsy to the queen.

The visit was pronounced a success by all, despite a few stated regrets that she had made no remarks.

“What a theater this is,” said longtime Globe actor Jonathan McMurtry. Rehearse all day and meet the queen in the afternoon, Exhilarating.”

Beyond the museum, in the Zoo, directors were presenting Philip with its special medal given in honor of the prince’s work in preserving wildlife around the world.

Last night the royal couple gave the dinner aboard the *Britannia* for nearly 50 people.

Royal spokesman Shea at sunset told reporters the city’s welcome had overcome the rain. He called it a “very successful day, far from washed out.”

"The welcome had shown through," he said.

February 27, 1983, San Diego Union, A-11. Delighted Prince Thinks Zoo Should Get A Medal, Too, by Gina Lubrano and Arthur Golden.

Prince Philip, Duke of Edinburgh, knows a lot about wild animals. He can talk authoritatively about the mating habits of a lemur and the intestinal tract of a koala.

The prince did just that yesterday during a 40-minute visit to the San Diego Zoo in which he received a citation for his service in the cause of wildlife conservation.

He returned the compliment, praising the Balboa Park facility for its "wonderful reputation" for breeding endangered species in captivity. "I should present you with a medal," he told delighted Zoo officials.

Then the prince flew by Marine Corps helicopter to Fairbanks Ranch, site of the equestrian endurance event in the 1984 Olympic Games. The field targeted for the Olympic site was too muddy to inspect, so the prince received a briefing at a nearby country club.

Prince Philip had been driven to the Zoo while his wife Queen Elizabeth II was visiting the Old Globe Theater. His motorcade, pelted by rain, sloshed along waterlogged streets. Inside the Zoo, "singing" Sumatran apes, known as Siamangs, squawked through their throat sacs.

But when Prince Philip arrived at 4 p.m. the rain stopped falling, as if by royal edict and the black Siamangs suddenly fell silent. Curators said they could not account for the silences of the usually garrulous primates.

Zoo maintenance workers had cast their own seemingly magical spell, drying out inundated plants and mopping up pools of water along the route of the prince's tour in what surely must have been record time.

The smiling, 62-year-old prince, wearing a gray business suit, was applauded as he strolled to the gate of the Japanese Garden, north of the visitor's entrance. An estimated 3,000 visitors were in the Zoo during the royal visit but tight security along his route allowed only a handful to catch a glimpse of him.

Carmen Neese, 7, of San Marcos, Texas, was among the lucky ones. She applauded at the sight of the prince --- even though she was disappointed at being prevented from presenting him with a bouquet of carnations and daisies. Her gift had not been cleared in advance by the Secret Service.

Roger Trusk, a native of Louton, England, who had been a Zoo employee for 13 years, was among those waiting for the prince. He had been working all day in the rain to spruce up the Zoo for the visit, and decided to stay for a look at the royal entourage.

Woodrow Deppa, 70, and his bride, Eva Belle, 69, spent a day of their honeymoon at the Zoo. They arrived at 9:30 a.m., spent several hours touring the Zoo, retired to their motor home in the Zoo parking lot when it began to pour --- and emerged minutes before 4 p.m. just in time to see the prince.

"Aren't we lucky?" beamed Deppa of Lansing, Michigan.

Lorraine Mayor and her grandson, Mickey Mayo, 5, of San Diego, roamed the Zoo most of the day, and, although tired, hung on until they were able to wave to the prince. The effort was worthwhile, Grandma Mayo said.

“There’s so much trouble in the world, it’s just kind of fairy-tale-like, seeing a real-life prince, she said.

Prince Philip, accompanied by Selwa Roosevelt, U.S. chief of protocol, was greeted by Charles Bieler, executive director of the Zoological Society of San Diego, and Sheldon Campbell, Zoological Society president.

The society operates the Zoo and the San Diego Wild Animal Park. Bieler and Campbell were both carrying umbrellas that went unused during the prince’s visit.

In the first part of his visit, the prince and Zoo directors went on a walking tour of the Heart of the Zoo, a new exhibit of exotic wildlife. There, said Diane Brockman, curator of mammals-primates, the prince showed extraordinary knowledge of the mating habits of lemurs, primates from Madagascar.

“He talked about how they mate once a year,” she said.

Prince Philip then boarded a double-decker bus and sat topside with Zoo officials. He had little privacy. A bus packed with reporters and photographers rolled ahead of his vehicle and another bus trailed behind.

He waved to clusters of onlookers at the beginning of the bus route, but from then on his attention was focused on the animals, such as Anna, a golden retriever, who was in the enclosure with her roommate, Arusha, a cheetah.

The bus went past European bison, gazelles and musk oxen, stopping at the enclosure holding Przewalski’s wild horses, believed to be extinct in their wild habitat across Mongolia and North China. There are about 400 in captivity, 18 in San Diego.

When the bus reached the Arabian oryx exhibit, the prince stood for a better look and chatted with Dr. Kurt Benirschke, director of Zoo research.

The Arabian oryx, probable source of the unicorn legend because of its appearance, was hunted to the brink of extinction less than two decades ago. A total of 101 were born here since 1973 and the Zoo and the Wild Animal Park have 38 of them. Arabian oryx from San Diego’s captive herd have been sent to Jordan, Oman, Saudi Arabia and Israel.

Prince Philip lavished special praise on Zoo officials for their work in saving the Arabian oryx. “What you have done for the oryx will go down in history because it was virtually extinct,” he said.

The royal bus, traveling in fits and starts, stopped at the elephant enclosure, and then made a final stop at the koala exhibit. Keeper Jane Jacobsen went on board with Pooya, one of the 16 koalas in the Zoo collection. Hugely enjoying himself, Prince Philip pelted Pooya’s nose and rubbed the furry creature’s ear.

After the bus tour, the prince became the 32nd person to receive the Zoological Society’s Conservation Medal. Society President Campbell called the prince a “person of compassion” whose interest in wildlife has moved him to take long journeys to plead the cause of threatened species. The prince is president of the World Wildlife Fund-International.

With a twinkle in his eye, Campbell later said that the prince was not a member of the Zoological Society. “But we can send him a form” for membership, he said.

Prince Philip is also president of the International Equestrian Foundation which is organizing the equestrian events at the 1984 Olympics. Yesterday’s visit to the Fairbanks Ranch Olympic site was his second. The first was in September.

March 8, 1973, San Diego Union, B-1. City Council approves land swap with U.S. Navy of Florida Canyon land for old Naval Hospital land; Navy gets 35.935 acres of Florida Canyon and retains 39.995 acres on old site; City gets 34.34 acres and \$6.86 million from the government to cover building demolition costs and planting of the site.

March 14, 1983, San Diego Tribune, B-10. Letter, George F. Burger, North Park, does not care for plan to close Florida Canyon.

The "street closers" want to put in a lake, estimated to cost about a million dollars, some walkways and begonia beds. With miles of beaches and other flower gardens, we need these like we need a hole in our heads.

March 23, 1983, San Diego Union, At Ease-4:1-8. King Arthur Field-Archery event will take place in Balboa Park on March 27.

April 5, 1983, San Diego Union, D-5. Festival Stage fund pledged.

Although the Old Globe Theater has not been given permission by the city to use its 650-seat Festival Stage in Balboa Park past this summer, three San Diego men have pledged a total of \$200,000 to renovate the facility and name it for Lowell Davies, the Globe's longtime president and now emeritus chairman of the board.

April 13, 1983, San Diego Union, B-3:2-5. Group fighting the construction of the Naval Regional Medical Center has asked a Superior Court judge to reconsider the decision that a proposed land swap between the federal government and the city of San Diego is proper.

April 20, 1983, San Diego Tribune, C-4. Balboa Park school a real gem: mineral and gem craft shows in Spanish Village, by Grace Aleshire.

The school is one part of the many-faceted San Diego Mineral and Gem Society's program which helps enrich in unique ways, thousands of lives of area residents and untold numbers of visitors to the city. Other aspects of the Society include a museum and library.

April 29, 1983, San Diego Tribune. America's Finest City Week canceled for lack of interest, by Alison Da Rosa . . . The City has decided to cease holding the week-long mid-August celebration in favor of a proposed "San Diego Cultural Fair" from September 23 to October 8.

May 19, 1983, San Diego Tribune, B-1. Tourist crowd out hometowners; park museums may reduce free admission days; would restrict "free Tuesdays" to one free day per month; new policy approved by Public Facilities and Recreation Committee yesterday, by Jeff Ristine.

The institutions say nearly three out of every four visitors on the free days come from outside San Diego County --- people who presumably would pay to get into the museums if they had to. The free visit days were originally intended to benefit low-income San Diegans.

May 19, 1983, San Diego Tribune, B-3. Public Facilities & Recreation Committee lobs tennis court concerns to full Council; plan to allow non-profit groups to operate 80 city tennis courts. By Jeff Ristine.

Councilman William Jones had raised questions about the plan when the proposal reached the committee two weeks ago, saying courts in poor neighborhoods were not being serviced and maintained as well as courts in other parts of the city.

May 27, 1983, San Diego Tribune, B-14. Letter backing free day in park, by Peter Carter.

Your article of May 19 on the proposed elimination of free admission days at the various museums and other cultural institutions in Balboa and Presidio parks reflects some emerging attitudes of our current civic leadership.

I have been a volunteer at the International Aero-Space Hall of Fame for the last 20 months, and I have been the volunteer in charge on Tuesdays for over a year.

Most people who come to the museum on Tuesday have no idea the day is free; many express pleasant surprise. So they haven't come to take advantage of the free day; they have come to the park and enter the Aero-Space Museum proper because it's free. Admissions soar on Tuesday because Tuesdays are free, not because of increased park visitation. The museum isn't losing revenue from the free day because elimination of the free day will correspondingly lower admission totals.

But there is a larger question than any institutions admissions policy. There is no private, self-supporting institution in Balboa Park. Each and every facility has been built and is maintained by public funds, be they direct cash subsidies, nominal rents, tax status contributions or volunteer man-hours. There are no "Sea World"-type operations in the park, for the simple reason that private enterprise sees little chance of a favorable cash flow in running the art museum, or even our beloved zoo.

Parks with museums, zoos and cultural institutions are not bottom-line operations that can be evaluated on the current balance sheet. They are rather our pasts and our futures. They are reflections of the best we have done and hold glimmers of our best to come. We take our children to museums to widen their awareness of the history and the future of our city and our country. Museums are keys that open to all of us the possibilities that life offers. In our Aero-Space Museum, people of all ages experience a unique perspective of aviation that many have told me personally excels the National and Smithsonian exhibits in Washington, D.C. But if you cannot get in, you will not experience anything.

In the years since Proposition 13, the cultural life of this city has plummeted. Faced with declining revenues, our civic leaders rose to the challenge by cutting library hours and staff and slicing support of "non-essential" institutions. These institutions are seeking to maintain their standards of excellence, indeed to improve, while watching financial support erode.

A year ago all the museums in Balboa Park were free on Tuesdays, as they had been for over 20 years. At the request of the museums, free days were staggered. Now the free day itself is questioned. The free days were not designed to benefit low-income people. The free days are a long-standing tradition, designed to allow public access on a regular basis to publicly supported institutions. Until a few years ago, the zoo was free everyday to children under 16 so that your children could freely visit your zoo.

This policy change is based on faulty data and overly optimistic revenue gains. My own estimation of the maximum income gain for the Aero-Space Museum would be around \$21,000 --- or 50 cents for every free admission of last year. Perhaps next we should consider charging hourly rents for picnic areas" How about a "user fee" for all the wear and tear on the asphalt caused by those joggers?

I ask the Aero-Space Museum the other park entities and the City Council to drop this proposed action. One free day a week is little to ask from any publicly-supported institution, as indeed former city leaders have deemed this proper. One free day a month equals no free day a month for the general public. Only those who happen to visit any museum on its one free day will gain anything; the rest will lose yet another of the things that once made San Diego "America's Finest City."

And the museums will lose a large percentage of what they need to thrive --- people.

June 2, 1983, San Diego Tribune, B-2. Balboa and Presidio Parks free-day shift okayed.

City Council has authorized museums and other cultural institutions in Balboa and Presidio parks to offer free admission one day per month instead of once a week.

A representative of the park had complained to a council committee that too many tourists were taking advantage of free admission days, originally intended to benefit low-income San Diegans.

Operators of the institutions will be required to offer their free admissions on the same day in any given month.

June 5, 1983, San Diego Union, H-1, H-11. New Hall of Champions upbeat, by Barry Lorge.

The new Hall of Champions [which opened its doors yesterday] is much more spacious than the old, the better to accommodate the assembled bats, balls, gloves, pucks, jerseys, trophies, pictures and stuff that wouldn't fit in the attic --- an antique rowing shell, a 1950s land speed racer, and the late Bill Muncey's thunderboat, for example.

At present the exhibits are not too stirring. Don't expect the Smithsonian or Cooperstown. But the Hall is decidedly pleasant and decidedly upbeat: a testimonial to the variety of San Diego sports and the men and women who have played them.

June 7, 1983, San Diego Tribune, B-3. Promoters of Balboa Park events should be required to post a bond for cleanup, liability, by Preston Turegano and Elizabeth Wong.

Promoters of future public events conducted in Balboa Park should be required to post a bond to assure that the city is paid for the use of its facilities and services, the Balboa Park Committee has decided.

The recommendation follows difficulty collecting money owed for events held in the park, including San Diego Sun Days, a four-day event staged Easter Week as a benefit for three civic youth organizations and four international hunger-relief groups.

The fourth annual San Diego Renaissance Festival, tentatively scheduled at the Organ Pavilion next month, will go on as scheduled because its promoter, Bill Reinis of International Pageant, Inc., already posted a bond.

In other committee business, members of the Sierra Club and Citizens Coordinate for Century 3 asked the committee to consider allowing the two environmental groups to set up an environmental resource and research center in the former fire-alarm office at Marston Point.

The Sierra Club, a tenant in the House of Hospitality for more than 15 years, and Citizens Coordinate for 14 years were both given 30-day eviction notices because of proposed expansion of a park information office.

June 8, 1983, Los Angeles Times, II-1, 2. Sherman, little Park in southeast San Diego, perks up with youth group at helm.

June 10, 1983, San Diego Tribune. Fest rescued to honor America's Finest City, by Jeff Ristine.

America's Finest City Week has been rescued.

The San Diego Junior Chamber of Commerce, KFMB radio and Mayor Hedgecock have joined forces to make sure the week of special events and plain old civic pride is carried forth this August.

June 16, 1983, Park and Recreation Board Minutes.

Action Items

6. Placement of Monument to be Presented by the Yokohama Sister City Society

Mr. Roberts presented the June 7, 1983 Informational Report to the Board which stated that subject monument is scheduled to be placed in a shrub bed approximately 50 feet north of the Dail Memorial Gate in Balboa Park in a ceremony to be held on June 28, 1983.

The Balboa Park Committee, on June 6, 1983, and the Facilities Committee, on June 8, 1983, unanimously recommended approval.

MOTION: It was moved, seconded and carried unanimously to approve the placement of the monument as reported by staff.

June 17, 1983, Los Angeles Times, II-1, 2. Balboa Park losing gleam as city juggles its priorities, by Tom Greeley.

Arman Campillo, the City of San Diego's parks and recreation director, refers to Balboa Park as "our jewel," but he is the first to admit the aging gem has lost some of its luster.

Even with park visitors digging ever more frequently into their pockets to pay for activities there, the city is losing the battle to maintain its top tourist attraction and its smorgasbord of services.

"Balboa Park is always our top priority when it comes to maintenance, and we've tried to cut back our services in ways so that the problem areas are hidden from the general public," Campillo said.

"But a lot of the facilities are old, and frankly I don't know where we'll get the money to rebuild them when the time comes. Depending on how ambitious you are, restoring the park could cost anywhere from 40 to 100 million dollars."

The effect of Proposition 13 on Balboa Park was quick and in the minds of patrons and directors of many of the cultural institutions based there, devastating. It changed forever the operation of virtually every organization in the park.

Cuts in the city's park and recreation budget immediately gored Balboa Park children's programs, museums and athletic leagues, which suddenly had to run more like businesses than philanthropic or educational organizations. Other activities either had to be sponsored by volunteers or dropped altogether.

The amount of money that cultural organizations receive from the city and county transient occupancy taxes has remained constant since 1978, most directors reported, leaving the organizations to cope with inflation-boosted costs by themselves.

"It's gotten very tough for use to set priorities," said David Seyfarth, manager of Balboa Park. "We will continue to provide the basic levels of service, but beyond that, it's up to the community."

Those who look carefully probably have noticed that the park's canyons are rarely maintained and that trimming and pruning in landscaped areas have become more occasional than regular.

The planting schedule has been cut back (the mall is now planted with flowers once a year rather than changing with the seasons). The once popular flower-shows in the Botanical Building have been scrapped, with the exception of an Easter lily exhibit financed by a private donor.

Volleyball, basketball and softball players citywide, who once played without cost, now contribute about \$150,000 to the treasury each year. And the salaries of directors of Junior Theater, Youth

Symphony and the civic dance program for children are no longer paid by the city, further straining the treasuries of those organizations.

Museums in the park now pay their own utilities, a hefty expense that was largely responsible for the \$2.50 admission fee they now charge (Admission was free before Proposition 13, and the city paid the utilities). They also pay for garbage collection, and some have started their own maintenance programs because they consider the city's to be inadequate.

Along with the Old Globe Theater, the museums --- with the notable exception of the Museum of Art --- have cut back on the number of outreach programs for youth, senior citizens and minorities.

Designed to bring cultural activities to segments of the community that might not otherwise be able to experience them, outreach programs bring thousands of persons into museums and performance halls for little or no charge, with the organizations or sponsoring groups (typically schools) paying the tab.

"It's something we all took for granted, because it's a traditional part of the arts in most major cities," said Robert Arnheim, director of COMBO, the umbrella fund-raising body for San Diego area cultural organizations. "But understandably they are among the first things to suffer when things get tight."

Schools, field trips to museums and performances are far less frequent since Proposition 13-limited finances have caused many schools to cancel their annual Balboa Park trips and the organizations in the park can do nothing to help out.

"We're doing all we can," said Diane Sinor, educational director for the Old Globe, which began its annual education tour in 1974 but has seen the program wane in recent years because many organizations cannot afford the group's \$200 performance fee. "We can't lower the price anymore because we already take a loss on the program --- the fee barely pays for transportation --- but we hate to see it affected by the shortage of money in the schools."

Two years ago, the Globe visited 157 schools in its program to expose young people to classical theater, but that number was down to 114 last year and will drop again in 1983, Sinor said.

The group hopes to find a corporate donor to pay for the program, but Arnheim said it might get caught in a classic Catch-22 when it begins its drive to raise funds. Other local groups hoping for corporate donations may experience similar problems, he said.

"The loss of those outreach programs makes it tough to recruit corporate donations, because it makes the group less attractive from a public relations standpoint," Arnheim said.

Cultural organizations have become far more business-conscious since 1978, and nowhere is the change more evident than at the Museum of Art.

Deputy Director Jane Rice said the utility bill has risen from slightly more than \$100,000 a year when the museum first began paying it to \$235,000, accounting for 46% of the museum's current annual expenditures. The city and county, which once provided 50% to 60% of the museum's budget, now contribute 20%, although that largely reflects the expansion of programs rather than a loss of public funding.

"We have no choice but to run the museum as a business now," Rice said. A marketing and public relations program was established with impressive results.

A museum store that once was a small venture staffed by volunteers has been expanded into a significant commercial outlet. It lost \$7,000 in its first year, but now, combined with a publication

program that markets posters commemorating museum shows, generates \$110,000 in income annually.

Corporate donations have increased from \$9,000 to more than \$145,000, but are nearly canceled out by the increased costs of the outreach programs. "The education programs are a terrible burden on our budget, but we felt they were important with our new strategy," Rice said.

Bruce Maza, a spokesman for the Old Globe, said the theater received tremendous community support for its rebuilding effort after "the Balboa Park arsonist" struck it in 1978. In addition, he said, government support for the renowned theater has not suffered.

"The Globe has been very fortunate --- I can't say that we've lost money," Maza said. "But we find we have to fight harder to justify the allocations we receive."

Youth groups, whose directors were cut from the city budget were hit with the immediate expense of hiring those staff people, costing Junior Theater \$22,000 annually, the civic dance program \$16,000 and the Youth Symphony \$15,000.

The burden on volunteers has increased, as have fund-raising activities and pleas for corporate and private donations. "It's become increasingly difficult for us to find enough people to give their time and money because we've had to go to them so often," said Marcia Brechlin, treasurer of the Youth Symphony, which was affected more than the other organizations because many of its activities involve travel.

Youth Symphony concerts are still given free, but park buildings that once were used by the group are not as likely to be available without a rental fee, Brechlin said. She added that concert tours are "now virtually impossible," although the group went to China in 1981 and received a special donation from the county for the trip.

June 17, 1983, San Diego Union, B-3. Robertson E. Collins, of National Trust for Historic Preservation, says Balboa Park commercial activity should be limited, by Roger Showley.

Noting that the new \$381 million San Diego Naval Hospital, under construction in the park's Florida Canyon, takes up a large area of parkland, Collins said it is all the more important that remaining parkland remain as open space.

June 21, 1983, San Diego Tribune, B-6. Letter objecting to rotten and broken benches at Organ Pavilion, by Edward S. Barr.

June 23, 1983, READER. Seven days in August, by Paul Krueger..

The resurrection of Finest City Week was orchestrated by Dan McAllister, former aide to ex-councilwoman Susan Golding; it will be sponsored by the Junior Chamber of Commerce (of which McAllister is a member) and will have as its "official voice" KFMB radio (where McAllister now works as an advertising salesman).

June 27, 1983, San Diego Tribune, B-6. Letter expressing hope that San Diego Evening Tribune will expand its coverage of Balboa Park Master Plan, by Carol Landsman.

July 2, 1983, San Diego Union, B-4. Higher city tennis fees find no fault among initial users; new policy allows private clubs to operate tennis courts, by Anthony Perry.

At Morley Field, the rates will be \$15 a month, \$80 for a year, \$120 a year for a couple, half price for seniors, and children 18 and under a mere \$5 a year. The city's rates had been \$6 a month, \$54 a year, \$27 for seniors, and no charge for children 18 and under.

The increased fees, it is hoped by city officials, will allow the private clubs to improve maintenance and handling of the courts.

July 7, 1983, San Diego Union, B-2. Move to evict Sierra Club and Citizens Coordinate for Century 3 from House of Hospitality delayed a second time, by Michael Smolens.

During the meeting of the Public Facilities and Recreation Committee yesterday, Councilman Bill Mitchell told Terry O'Hara, president of the board of directors of the House of Hospitality Association, "that it was implied that, politically, you ere directed to kick the Sierra Club and C III out because of their environmental leanings."

O'Hara replied: "We don't really have any reason to be political. It's a business and we must constantly look at best use."

July 14, 1983, San Diego Tribune, A-1. Cuts in county-allocated funds for museums produce anger, turmoil, by Preston Turegano.

Major museum directors, angered over a reduction in county-allocated funds, predict they will be forced to but back educational and community programs, reduce staffs, freeze salaries and perhaps even increase admission fees just to stay in business over the next year.

July 15, 1983, San Diego Union, D-1. Starlight Opera to stay put, jets and all, by Welton Jones.

"In the beginning, Florida Canyon sounded good," Reba Brophy, the Starlight president said, "but in two years, the plan hasn't advanced at all. It may never pass the City Council."

Also, Brophy and her board sensed that a new facility would require a higher rent and probably a shared tenancy.

So they took another look at their own growth figures, steady since they moved back to the bowl since 1974, and decided to live or die in their own home, presenting family entertainment at relatively low prices.

July 18, 1983, San Diego Union, B-1:4-6. Three-day Italian Cultural Festival in Conference Building beginning July 30.

July 29, 1983, San Diego Union, Food-17:1-5. Renaissance Fair in Organ Pavilion.

August 3, 1983, San Diego Tribune, B-2. County supervisors decided to allocate any hotel tax revenues in excess of \$750,000 among all county museums instead of just the major ones.

August 4, 1983, San Diego Tribune, B-6. William Jones and Gloria McColl, on City Council, urge more attention be given to park-poor areas in open-space spending.

August 14, 1983, San Diego Union, B-1, B-3. Balboa: Park's next century is slowly taking shape; Master Plan revision fans up old embers.

"Balboa Park is primarily a park to be cherished as a place of natural beauty. Although it is one of the largest parks in the country, the time is coming when the building of hospitals and schoolhouses or even libraries and museums must cease or else we shall have a city there instead of a park." - George W. Marston, Park benefactor, 1925.

"There are those who think Balboa Park should be nothing but trees and grass. A park is much more than trees and grass, and you're going to have to do things here you would not want to do in a regular park. Balboa Park is an urban park." - Steve Estrada, Balboa Park Committee, 1983.

By Lori Weisberg, Staff Writer.

Determining the look of Balboa Park in the 21st century has, in the past year, become an emotional battle pitting park purists, various parochial interests and professional planners against one another.

What transpires over the next several months, as a 20-year master plan is developed for Balboa Park, will mark a turning point in the park's 115-year history. Regardless of whether every recommendation made in the eventual plan is carried out, it will serve as an important blueprint for guiding the park's future.

What began in 1868 as a barren, 1,400-acre tract supporting little more than chaparral and sagebrush and serving a city of 3,000 has evolved today into a sprawling urban park in the center of a city that has grown to more than 900,000.

The park not only has emerged as the city's cultural center but serves as an important recreational area and a country-like getaway, its tree-filled canyons and grassy knolls a welcome refuge from pavement life.

"Balboa Park is almost like a city in itself," observed Dave Seyfarth, manager of the park. "The unique thing about the park is there really is something here that could interest everybody at one time or another.

"If you could tell me you couldn't find something here that didn't interest you, I would think you had a problem --- or you just like to sit home and read."

Because the park has become such an important fixture in the community, its future has become a subject of increasing concern to city officials as well as residents. Over the years, the community has seen parcel after parcel of the original acreage gobbled up by an encroachment after another, including three schools, two freeways, camp facilities and the Naval Hospital. The result has been a whittling down of the park to its present 1,100 acres.

Concern that parkland was being usurped by non-park uses, plus growing and traffic problems within the park, prompted a 1960 master plan study, known as the Bartholomew Plan. Now, 23 years later, the same concerns have inspired a major updating of that plan to guide the park's development over the next two decades.

"The park isn't done," said consultant Ron Pekarek, a landscape architect hired in early 1981 to help the city revise the 1960 plan.

Differing perceptions of what the park ought to be are what have caused some sparks to fly when Pekarek's proposals have been aired at the meetings of the Balboa Park Committee, which has been soliciting citizens' view on the developing park.

On September 15, the city's Park & Recreation Board will get its first look at a written draft of the proposed master plan revisions. They ultimately will go before the City Council for consideration.

Pekarek's vision for Balboa Park's future is a broad one that includes increasing open-space area by rearranging the two golf courses on the eastern edge of the park, transforming asphalt lots into landscaped plazas, and providing the park with a more defined edge by extending Upas and 28th streets on its northern and eastern perimeter.

The estimated price tag for the improvements is \$104 million, part of which would be raised through revenue bonds that would have to be approved by the voters and repaid from revenues generated by the park. Other possible revenue sources include gas-tax funds, private contributions and grants.

Although there has been considerable disagreement and controversy over specific proposals, it is generally agreed that something has to be done about the twin problems of parking and traffic, which have long frustrated both the park's tenants and its visitors.

The park, which handles about 12 million visitors a year, is served by a circuitous, confusing road system supported by too few parking spaces to accommodate a growing population.

"Circulation and parking are the No. 1 problem in Balboa Park," said Steve Estrada, who formerly worked for Pekarek and did the initial master planning work. "You stop anyone in Balboa Park and ask them about the park, and the first thing they'll say is, 'I can't find a parking place.'"

Key among Pekarek's proposals is a plan to create a better environment for pedestrians in the interior of the park by closing the Laurel Street bridge to cars and replacing two of the parking lots in the Prado-Palisades area with landscaped gardens, colonnades and reflecting pools.

Specifically, the 130-car parking lot in front of the Museum of Art and the 265-car lot behind the Aerospace Theater would be removed and converted to landscaped plazas.

Motorists would gain access to the Prado area by entering from the north at Richmond Drive and Upas and then proceed southward alongside and over State 163. The new access system would require closing the Quince Street and Richmond off ramps for 163, but the two ramp bridges would be retained.

While the proposal has drawn some criticism from museums and other cultural institutions that fear removal of their parking will reduce patronage, Pekarek points out that the idea is not new, simply an endorsement of what was proposed in the Bartholomew Plan but never implemented.

Besides he said the parking that is lost will be replaced with even more, but less visible parking areas, including a proposed 500-car garages in a canyon just southwest of the Museum of Man.

Pekarek also has proposed relocating Starlight Bowl in the northern end of Florida Canyon near the Zoo parking lot, and building another parking structure at the bowl's current location. That idea was dropped after the theater's board of directors decided that the amphitheater should remain where it is.

Pekarek, though, still is proposing construction of a 4,500-seat amphitheater in Florida Canyon, but additional parking would be needed.

Another possible source of parking --- at least on weekends --- is the parking lot that the Navy is building for the new Naval Hospital in Florida Canyon, Pekarek added.

As part of his scheme to create a "pedestrian experience," Pekarek also envisions expansion of the Spanish Village area to provide a better connection with the Zoo and the Prado area. Shops would be added as well as a restaurant that would generate increased revenue for the park.

The end result, Pekarek said, would be that a visitor to the park, would be able to walk from the Zoo to the Aerospace Museum without ever crossing a street traveled by cars. As far as Pekarek is concerned, that's important because cars and people in a park mix as poorly as oil and water."

"Cars smell funny," he said. "They don't match the quality of the architecture and the huge investment of the city to reconstruct all the Spanish-Colonial buildings. It's like parking your car in your living room."

Bob Arnheim, executive vice president of the Combined Arts and Education Council of San Diego (COMBO) and chairman of the Balboa Park Committee said he became convinced of the need to separate pedestrians from vehicles when he was walking to the Old Globe Theater one evening and noticed a van edging up behind an elderly couple who also were walking.

“Neither one saw the van,” Arnhyrn said. “The driver leaned on the horn, the man fell to the ground, and it took him 10 minutes to collect himself.”

The idea of turning paved lots in plazas last year prompted a critical letter from a group of the park’s cultural institutions.

The group --- known as the Central Balboa Park Association --- also was miffed because its 11 institutions had not been consulted in the planning process. In the months since the group began meeting, their criticism has softened, although parking continues to be a critical concern.

“Our group was not formed to be a thorn in anyone’s side or to stop what the city is doing,” said John Thelan, president of the board of directors of the Natural History Museum and chairman of the association. “From the discussions we’ve had to date, the members of the association probably would be opposed to any substantial reduction in parking unless there was an alternative that provided for equal or better access to the central area of the park.”

Doug Sharon, director of the Museum of Man, is more emphatic in his reaction to Pekarek’s proposals for redesigning parking and closing the Laurel Street Bridge. The cultural institutions face some tough economic times already and to take actions that would make it more difficult for visitors to reach the museums could prove financially damaging, Sharon said.

“People are already used to coming into the center of the park,” he said. “We’re in the era of the car and that’s not going to change. Balboa Park is a natural resource and it’s a cultural preserve.

“We feel that the master plan is putting more emphasis on natural enhancement and is ignoring the fact that we have 11 institutions that people need access to.”

Enhancement of the so-called “natural” areas of the park, though, is what Pekarek is aiming for in his master plan. Toward that end, he is proposing to return the southeast corner of the park, where a nine-hole golf course now is located, to open space.

The golf course would, in turn, be relocated northward to the Pershing Drive landfill and extend up to the southern edge of the velodrome. In addition, the existing 18-hole golf course would undergo a major redesign to improve profitability and playability, Pekarek said.

The plan, he added, ties in with a proposal being considered by the city Water Utilities Department to develop a water-treatment plant in the park that would use treated sewer water from the northern park area to irrigate the entire park. Proposed golf course, lakes, as well as a planned lake in the center of Florida Canyon, would be incorporated into the million-gallon-a-day water-treatment system, he said.

“We’re spending a quarter-million dollars a year to keep Balboa Park green,” Pekarek said. “This system would probably pay for itself in six years and then cut current costs one-third.”

Another open-space area would be created in the northwest corner of the park where Boy Scout and Girl Scout camps are now headquartered. Under Pekarek’s plan, those facilities would be relocated to another park, possibly the Mission Trails Regional Park.

While those proposals have generated some dispute, clearly one of the most controversial of Pekarek’s plans is his scheme for extending Upas and 28th streets to make them through streets. The plan calls for extending Upas Street from Sixth Avenue to its current connection at Alabama by way of two bridges, one crossing State 163 and the second going into Florida Canyon.

The plan for 28th Street would extend it from Palm to Grape streets by crossing into Switzer Canyon on the eastern edge of what would be the newly designed 18-hole golf course.

As Pekarek sees it, the newly aligned streets would not only give the park a perimeter but would improve access for both visitors and the police. IT would make the more secluded areas of the park less intimidating for people who are fearful of venturing into them at night.

However, some neighbors of the park say Pekarek's plan would increase traffic, destroy the park's character and create a barrier between them and what has become their backyards.

"There is an interaction that happens on this side of the park that doesn't happen on the west side because of the park encroaching into our lives," said Andrew Makarushka, gazing out across the fourth fairway of the gold course from the deck of his Juniper Avenue home. "If they start constructing bridges and bulldozers, they're going to destroy what has been in a natural state for 100 years or more."

City Councilman Uvaldo Martinez, whose district includes Balboa Park, sides with residents who have protested the street extension, saying that he has not seen evidence supporting the need for a perimeter road.

"Is it important for the east and west parts of the park to be connected?" he asked. "Is it really going to make that much difference in 25 years if they're not connected?"

According to Arnheim, the question really comes down to how one views the park, and shouldn't be seen as the exclusive province of any one group of people.

"The visitor sees Balboa Park as a national park," Arnheim said. "For someone from Bonita or San Ysidro, it's a regional park. Those who live around the park, see it as a neighborhood park."

"If I live across from the park, I will fight to the last drop of blood against increased parking and access --- because I don't need them. But if I live in Del Cerro, I'll fight for better freeway access and connector roads."

Beyond the question of access, Pekarek's final plan also will address how the city should use the land and buildings that the Navy is turning over to the city in exchange for property in Florida Canyon it is getting to build a new hospital.

Pekarek has suggested that the buildings facing Park Boulevard be recycled as offices or used to house various cultural and community activities. His idea would be to transfer the functions served by some of the buildings in the Palisades area, like the Balboa Park Club and conference building, to the old Navy Hospital structures, allowing the museums to expand into the Palisades section. Pekarek also is proposing a large "super gym" in the Morley Field sports complex to replace the municipal gymnasium currently next to the Starlight Bowl.

Whether Pekarek's proposals ultimately are approved by the City Council in their current form, much less ever implemented, is the big question mark. There are some who believe the revised master plan will suffer the same fate that befell the Bartholomew Plan, most of which never became reality.

Arnheim, however, said he is confident that this most recent planning effort will be more successful.

"I think there is enough affection for Balboa Park to authorize the dollars we propose to spend," he said. "I truly believe that. It's not like we're turning into a Knott's Berry Farm. That will never happen."

August 17, 1983, San Diego Union, D-6. Big plans for Starlight Bowl, by Welton Jones.

A \$2 million remodeling of the 48-year-old Starlight Bowl in Balboa Park will be financed with funds raised by the San Diego Civic Light Opera Association, Reba Brophy, president of the association, announced yesterday.

One-fourth of that amount already has been pledged, she said, including a \$200,000 donation from the James S. Copley Foundation to pay for new rehearsal and dressing room areas in the 4,325-seat amphitheater.

If architect Gerald Garapich's art deco plans are approved by the city, owners of the facility, reconstruction of the bowl's stage area would be accomplished following next summer's Starlight season.

September 12, 1983, San Diego Tribune, D-1. Best bargain in town might be "free Tuesday" museum admission first Tuesday of each month in park, by Jack Williams.

Before July, free days were not such a rarity. They were offered at the museums every week --- Wednesday for the Museum of Man, Thursday for the Museum of Natural History, Tuesday for the rest.

But the City Council decided to limit the free day at the one to once a month, following a campaign headed by Edwin McKellar, executive director of the Aerospace Museum.

September 14, 1983, San Diego Union, B-3:2-6. Angry opposition to Ron Pekarek's proposals for Balboa Park master plan from neighbors bordering directly on park who object to proposals to turn 28th and Upas streets into major peripheral thoroughfares.

October 2, 1983, San Diego Union, B-15. Zoo objects to theater in canyon

A proposal to build an amphitheater in Florida Canyon is being opposed by the Zoological Society of San Diego because its development "could be fatal to the financial health of the Zoo."

Sheldon Campbell, Zoological Society president, said he objects to portions of a proposed master plan for Balboa Park.

Campbell has written to Ron Pekarek, a landscape architect, working on revision of the 1960 plan, telling him that a development of the amphitheater "could be fatal to the financial health of the Zoo."

Campbell said the society also objects to the proposed redevelopment of the Spanish Village because of the impact on Zoo parking and possible traffic problems.

Zoo officials also opposed relocation of the merry-go-round because of traffic problems and construction of a perimeter road that would take a slice of Zoo land now being used for research and breeding programs.

The proposal that would result in all roads leading to the Zoo parking lot is also under fire by Zoo officials.

Campbell said society officials are concerning themselves only with aspects of the plan that might impact the Zoo.

"We don't want our parking lot impacted under any circumstances," Campbell said. You don't build a 5,000-seat amphitheater and use it only at night. You use it during the day. You've got to fund it somehow."

Campbell explained that the Zoo runs in the red for seven months of the year, but makes it up with the remaining five months. During holidays, as many as 3,000 to 4,000 visitors have to be turned

away because of lack of parking. "Lord knows how many are just discouraged from coming," he said.

The \$104 million proposed development plan for the 1,100-acre park is currently under public review. Pekarek was hired by the city more than two years ago to update a 1960 master plan for the park.

October 22, 1983, San Diego Tribune, C-1. Councilman Uvaldo Martinez seeks review of Balboa Park plan: "Perhaps the council will endorse Mr. Pekarek's philosophy, but I doubt it."

October 23, 1983, Los Angeles Times, II-2, 3. Letter, La Jolla Town Council opposes sale of food products on public beaches and in parks contiguous to beaches, by David M. Ish: La Jolla does not want to be another Coney Island or Venice Beach.

October 24, 1983, San Diego Tribune, B-3. Antique gold and jewelry stolen from Natural History Museum: The thief, working by cover of night, slipped into Balboa Park's Natural History Museum after shattering a rear window, picked a pocketful of antique gold coins and jewelry – some more than a century old – left through the broken window and vanished into the wee hours.

That was January 12, 1980. Neither loot nor looter was ever found.

October 26, 1983, San Diego Tribune, B-10. Letter stating that there is no price break at San Diego Zoo, by Mary Deans Wallbank, Temecula: Anyone having a medium-sized family contemplating a visit to the San Diego Zoo had better get ready to dig deep into his pockets. The zoo has now become a pastime for those of either independent means or the tourist trade.

November 11, 1983, San Diego Union, B-1:1-4. Central Balboa Park Association, consisting of 11 cultural and educational institutions, newly formed to defend interests.

November 17, 1983, Joint Meeting of Park & Recreation Board and Balboa Park Committee for a public hearing on the Balboa Park Development and Management Plan - Transportation and Access.

November 17, 1983, Paper read by Richard Amero to Joint Meeting of Park & Recreation Board and Balboa Park Committee.

November 22, 1983, San Diego Tribune, D-1. The Timken Gallery, arts, aesthetic sanctuary, by Zenia Cleigh: Out of all the cultural refuges in San Diego, the tiny Timken Art Gallery in Balboa Park offers a contemplative climate that is among the most rare.

This is the place for the spirit which needs to be restored, the mind which must immerse itself in beauty in order to be refreshed.

There are no crowds of school children shuffling through popular exhibits, no docent tours wandering by to break the spell, no drone from an educational film in the room next door. And no admission price to block the way.

There is only the glory of Rembrandt's intensely human Saint Bartholomew staring down from the walls, only the romance of a Mediterranean seaport by Vernet, only the playful seductiveness of the great "Lovers in a Park" by Boucher.

The contrasts are distinct between the populist San Diego Museum of Art next door, with its emphasis on traveling exhibitions to ensure financial survival, and the free, aristocratic Timken, endowed with three fat trust funds (details of which are kept secret) and a sense of its own worth.

So it is telling that the Timken's most recent acquisition is none other than the affable and scholarly Grant Holcomb II, 39, hired two years ago as curator of exhibitions at the San Diego Museum of Art. He takes up new duties as associate director of the Timken December 1.

November 22, 1983, San Diego Tribune, D-3. The Putnam sisters (Anne and Amy), proper spinster ladies, were crazy about art, by Zenia Cleigh: The two ladies, who died here in 1962 and 1958 respectively, were the daughters of Elbert H. Putnam, a wealthy New Englander who accumulated a fortune in manufacturing and banking..

December 15, 1983, Paper read by Richard Amero to Park & Recreation Board hearing on the Preliminary Plan for Balboa Park concerning the democratic objectives of Balboa Park.

As a center-city park, Balboa Park has a special purpose. This purpose was defined by the 1957 Balboa Park Citizens' Study Committee as follows;

Balboa Park as a municipal endeavor should provide services for the community which the individual, the family or the neighborhood cannot afford to provide for themselves. Cultural, educational and recreational activities in the park should be open to the public. Exclusive use of buildings and areas by limited interest groups at the expense of the public as a whole should not be permitted.

While the Pekarek Group proposes new uses of Balboa Park for special interests, it overlooks its democratic objective as stressed by the Balboa Park Citizen's Study Committee.

If we translate the objectives of the 1957 Balboa Park Citizens' Study Committee into practice, we must conclude that the increased subdivision and urbanization of the park should halt. Further talk about institutional, cultural, commercial and theatrical use of the park should cease. Surplus and unsafe buildings in the Palisades and on the former Naval Hospital plant should be removed.

The historic landmark status accorded the central part of Balboa Park and the soon-to-be historic register classification of former Naval Hospital buildings represents a misuse of power by an anonymous group of preservationists-at-all-costs. These monomaniac people have taken it on themselves to preserve buildings that are inharmonious and to dictate restricted uses of Balboa Park.

Bureaucrats in state and national governments encourage preservationists to advance weak claims of architectural and historical merit because they want to enhance their positions. They care not a jot about the impact of these buildings on their environment or about the countervailing claims of architects and historians.

Arguments used by preservationists are false. To wit: buildings along El Prado and in the Palisades lack whatever cohesiveness and planned variety they once had; a rebuilt structure is not the structure it replaces; the stripped buildings in the Palisades lack the fretwork, frescoes and hanging gardens that once gave them distinction; John Irving Gill was not the architect of the Administration Building next to the California Quadrangle, and former Naval Hospital buildings have nothing to do with Spanish-Moorish or Mexican architecture and are insipid in appearance.

In 1961, Robert E. Des Lauriers, president of the San Diego Chapter of the American Institute of Architects, wrote:

The chapter strongly believes in the necessity of maintaining the abundant landscaping as the integrating central theme, with buildings integrated and supplemented thereto. Building design thus becomes a subordinate consideration in planning the park.

In 1974, John B. Mock, a San Diego architect, wrote:

The beauties of the land within Balboa Park are often more responsible for cries of "save the lovely Spanish Revival architecture" than the architecture itself.

The public goes to the central mesa of Balboa Park --- as it does to other areas in the park --- to enjoy its free outdoor attractions, a situation that is no different today that it was during San Diego's great expositions in 1915-16 and 1935-36. The number of people participating in out-of-doors entertainments at the Organ Pavilion, lily pond, Pepper Grove and patio of the House of Pacific Relations surpasses the number of people who pay to go inside museums.

By stopping the concentration of buildings and institutions on the central mesa of Balboa Park you will satisfy those institutions who want "out" from the inane competition for the tourist dollar; you will not take money away from recreation centers, swimming pools, nature trails, picnic grounds, ball fields desired by ordinary park visitors; and you will go far toward solving Balboa Park's parking and traffic problems. You may not please people who go to the park for its theaters and museums, but you will please the majority of citizens who pay a portion of the bills for museums and theaters they do not visit rather than for the park improvements they prefer. People of moderate means do not want to finance upper-class amusements that lead to the diminution of their common pleasure ground.

To repeat the objectives of the 1957 Balboa Park Citizens Study Committee: A great center-city park, like Balboa Park, exists to enhance the moral and physical well being of the whole community and to provide a playground for the people. It does not exist for one privileged class to so arrange that the less privileged are kept out.

December 21, 1983, San Diego Tribune, B-1. Letter, Woodchoppers are stealing Christmas trees, by Jerry Ray.

Woodchopper, you and yours will enjoy a fresh Christmas tree for two or three weeks. San Diego City, Balboa Park, Golden Hill community and the users of Golden Hill Park have lost that tree forever.

Merry Christmas.

December 21, 1983, San Diego Tribune, E-6. EDITORIAL: Benign neglect of Balboa Park: Balboa Park is a beautiful woman on whose emerald skirts generations of children have played. In her Spanish mantilla are woven the cultural institutions of San Diego

The park is a proud beauty, 115 years old. And a selfless one, trying to stay young through constant care and refinement, by saying yes to the dreamers who created museums and theaters and the zoo, and by serving as a park for the people who use her fields and facilities for their individual pursuits.

Today the heart of Balboa Park is going through a renaissance. Through the leadership of the Committee of 100, two Spanish Colonial buildings --- the Food and Beverage Building and the Electric Building --- have been rebuilt, and the Spreckels Organ Pavilion has been restored. After two disastrous fires, the Aerospace Museum has been moved into the restored Ford Building and the Old Globe Theater has been rebuilt. The zoo is expanding.

But Balboa Park in its entirety --- the land and all that grows on it --- is suffering neglect. Parkland is being eaten away. The new Navy Hospital has been built on land once devoted to open park. The zoo arbitrarily cut down beautiful eucalyptus trees to pave over the city-owned parking lot and has only planted a few wispy trees to make up for the damage.

But these are not the only problems in Balboa Park. Roads are clogged by traffic. Bums sleep in ravines. Muggers lurk in low brush. The watering system, which keeps this wonderland alive, is old and deteriorated. Proposition J of 1978 severely limited city spending, and the City Council chose to spend more money on police than parks. Proposition 13 of 1978, which helped people with fixed incomes keep their

houses, put Balboa Park and many of its tenant museums on a tight budget. Financially, Balboa Park is like a proud old mother living on an outdated pension without resources to maintain basic necessities while her children, seeking their own goals, forget their mother's needs.

Case in point. Active community groups raise money for every institution in the park --- from preserving Spanish architecture to helping the zoo protect endangered species. But there is no organization we know of which raises money for the park's general welfare. The major institutions which use park buildings and fields do not pay rent on their park buildings and fields do not pay rent on their facilities. The park is free to anyone who cares to use it, whether the person lives in San Diego and pays taxes, or comes from Iowa or Tijuana.

A free and open park is what we have been given, it is what we must preserve. Without free public access, the park would fall into disuse, the institutions would wither and die.

But how can we keep the park free and open when its traditional source of funds has dried up? When its institutions are themselves fighting for financial survival and must raise admission prices? When the number of users has grown astronomically, coming from all over the United States and Mexico, but the park's tax base remains local and is severely limited?

The threat to Balboa Park comes not from spite but from neglect. People think the park is for their specific use, but few are taking responsibility to ensure its survival for all uses. People organize to fight an institution that threatens to take away an inch of park, but they won't get together to develop open park land in unreclaimed areas.

We need civic activism by groups such as the Committee of 100, to preserve the buildings and institutions which use Balboa Park. And we also need an additional, concerted commitment to make sure that the park that houses these institutions can maintain itself and successfully preserve its beauty in the face of unprecedented demands being up on its roads, its grassy areas, its parking space, its water supply.

There can be no such commitment without adopting and carrying through a comprehensive plan for preservation and renovation of Balboa Park from now until the year 2000. The plan must address all the factors that make a park work --- from gardens to financing, cars to pedestrians, security to harmony among institutions. It must dare to anger interest groups for the sake of serving the park as a whole. It must preserve old traditions and dream new dreams; for Balboa Park would be nothing without its visionaries who saw Spanish campaniles in scrubland, and its preservationists, who seek to preserve flimsy plaster fantasies and convert them to permanent form.

Such a plan has been commissioned by the City Council and drafted by the Pekarek Group, a highly respected local landscape architecture firm. While we do not agree with all its proposals, the Balboa Park Development and Management Plan concentrates all the issues involving the park into one forum, so that they may be examined, debated and acted upon. This is an accomplishment, but it will mean nothing if the plan is allowed to gather dust. We will examine the plan, its critics and present our own ideas in the next two days

In 1983, Balboa Park remains a proud beauty. But if the neglect continues, what will she be like next year --- or in the year 2000? Before we look backward with regret, let's move forward with commitment to preserve and renew the mother of San Diego's parks.

December 22, 1983, San Diego Tribune, B-10. EDITORIAL: Balboa Park plan and its critics: Balboa Park was created in a day when environmental impact statements were unheard of, when Kate Sessions planted trees with her own seedlings and merchant George Marston paid Eastern park planners to model Balboa Park after the parks of the great American cities.

Those days seem over, but the splendid park they helped create endures. The tendency now is to day, "Don't change a thing!" But San Diego is changing: 12 million people visit Balboa Park each year;

millions of cars grind through its roads; a new Naval Hospital is being built. If the park doesn't adapt to change, it will be crushed.

To preserve the park into the next century, planning is needed today. The Pekarek Group, a local landscape architecture firm, has been commissioned by the City Council to do the first comprehensive plan for Balboa Park since the Bartholomew Plan was developed in 1960. The Bartholomew plan had high aims but failed to achieve many of them, largely because of opposition from special-interest groups and the lack of a workable means to fund projects.

Ron Pekarek, a thoughtful and tough-skinned planner, with experience in coastal parks and highway landscaping, has coordinated consultants in the creation of a 3-inch preliminary report. Pekarek shares some of the Bartholomew Plan's goals, but he has built funding proposals into his plan, including an enterprise fund to raise money for the park. The price tag for the Pekarek Plan is \$104 million --- not an impossible sum at all for America's seventh city.

Pekarek proposes three primary sources of revenue to be generated by user fees --- parking fees, golf course fees and commercial leases, mainly for food services. He favors new commercial activities in the park to generate revenue which could be used to finance revenue bonds for the park. He suggests use of parking fees to finance the construction of new parking garages.

Pekarek would pursue the principal goal of the Bartholomew plan that was never achieved --- to take autos out of the center of the park. He would close Cabrillo Bridge, El Prado and the Palisades areas to cars and create a dramatic pedestrian esplanade from Spanish Village to the Aerospace Museum. There would be a new multi-level parking garage in nearby Archery Canyon, with access via a new road alongside Route 163. This and other garages would increase parking capacity by half, after El Prado and Palisades area parking was eliminated.

Pekarek sees an urban park, not an untouched canyon and scrub environment. His definition of an urban park includes much open park land. By moving the parked cars out of the plazas, by moving the Boy and Girl Scout and Campfire headquarters out of the park, by landscaping the landfill areas and moving the nine-hole golf course onto the landfill, he would add 115 acres of usable open space.

He would close off Florida Drive north of the new Naval Hospital and build new access roads in peripheral areas. He would build a waste-water reclamation plant in a remote canyon and create a 14-acre reservoir, a 28-acre picnic area, and a new amphitheater bowl in Florida Canyon.

Development would be concentrated in areas such as Spanish Village, where a restaurant plaza would be created. A new direct access to State Route 94 freeway would be built for Naval Hospital and the south half of Florida Canyon via 25th Street instead of the present route via 26th Street.

Pekarek's plan has met resistance from virtually every institution and user group that would be affected by the changes. People living on the perimeter of the park are up in arms that roads would be built to open up the park. This is self-interest and, though understandable, should not stand in the way of making the park accessible to the entire region.

More serious are the objections of 11 institutions in the park core. They fear banning autos from existing roads and parking areas could cut them off from access to their customers and volunteers. They want to keep Cabrillo Bridge and the museum parking lots open, until equivalent access roads and parking facilities have been built. They also fear more intensive uses for the park would create more traffic jams. These concerns must be dealt with and a solution found before a plan is adopted.

The only major group without a vested interest in the park which has presented a comprehensive critique of the Pekarek Plan is Citizens Coordinate Century III, a volunteer organization. Citizens Coordinate supports the principle of a long-term plan but disagrees strongly with the Pekarek principle that user fees should pay for the park. The group would like the park to be free, like the Public Library and not like Sea World, where general admission now is \$10.95. Instead, Citizens Coordinate has proposed a small surcharge

on tickets and goods sold by institutions in the park. This would mean that no one would have to pay parking fees --- a de facto admission charge --- but if you bought a ticket or a hot dog, a small charge would be added onto the price and the money would be given to maintain the park. For the core area, Citizens Coordinate proposes a compromise plan that would eliminate one lane of road from Cabrillo Bridge, putting pedestrians on the other lane. A one-way road would run from Cabrillo Bridge through parking areas and exit on President's Way.

If your head is spinning after all these proposals and counter-proposals, go take a walk through Balboa Park and see what you think yourself. Tomorrow, we will give our view.

December 23, 1983, San Diego Tribune, B-6. EDITORIAL: Balboa Park from now to 2000: We seem absorbed in the coming year with the acceleration of growth in outlying areas, while the heart of the city molders. Does Balboa Park have any friends today, or have special interests so fragmented support that the park as a whole is friendless?

We don't think it is. But it's time people stopped saying "I love Balboa Park," while blithely neglecting it. San Diegans must take a fresh look at Balboa Park and see more than their own self-interest. It's time the park had friend of its own.

We have studied proposals for Balboa Park and here are **The Tribune's** recommendations:

1. We support the concept of a far-seeing 20-year plan for Balboa Park. To keep the park as it is, is to condemn it to decline.
2. We encourage San Diegans to help preserve the whole park and all that flourishes therein and not just defend their own pet institutions or activity.
3. The Pekarek Plan is an excellent foundation. But community and institutional input is crucial to draft a final plan.
4. We support the principle of a free and open park. Admission fees to the park proper are out of the question. Parking fees are a "de facto" admission fee and should be avoided if possible except perhaps in a few high-use areas.
5. The objective of eliminating cars from the core of the park is a good one. To achieve it will take years and millions of dollars, but we must move in that direction. If the money isn't going to come from parking fees, it has to come from other sources, possibly a general obligation bond issue.
6. In the interim period, the compromise solution proposed by Citizens Coordinate for Century III to restrict cars to one lane from Cabrillo Bridge to President's Drive, deserves consideration.
7. We generally support measures to create more open areas in the park. Each square foot of new construction must be offset by an equal or greater amount of reclaimed parkland.
8. We specifically support Ron Pekarek's plans to move the nine-hole golf course and open up park land near Golden Hill, cut roads on the northern and eastern perimeters of the park and improve access on 25th street, build a 14-acre reservoir, create picnic areas in Florida Canyon and open up more park land and trails all over the park.
9. We share the concern of 11 core institutions about parking and access but encourage them to look forward toward solutions for the next 20 years --- not just today's needs.
10. The eastern side of the park should get more attention. Trees should be planted now. Developing the park on the neglected east side could be a crucial means to help revitalize North Park and East San Diego and reduce crime in the park.

11. The mayor should appoint a task force, such as for the convention center, to search for new funding measures to implement the proposed Balboa Park plan. It should consider the alternatives proposed by Pekarek, City Manager Ray Blair and Citizens Coordinate for Century III and others and come up with a workable set of financing tools that the mayor can sell to the community.
12. We support creation of a foundation or enterprise fund to raise millions of dollars to "Save Balboa Park." People should have a way to give gifts and endowments specifically to the park. We encourage institutions in the park, which charge admission but do not pay rent to agree to levy a 5 percent surcharge on their fees to go to maintenance of the whole park.
13. We support the proposal of the city manager's office to earmark a greater share of the hotel-motel room tax to Balboa Park.
14. The City Council should adopt a comprehensive plan that includes a workable funding plan and set a timetable for its execution. Balboa Park must become a priority or it will become a casualty.

There is a fig tree near Spanish Village where children play. It is not native. Its limbs, tough as elephant skin, are held together by wire. Its roots are above the ground, upon them toddlers learn to walk, reaching toward the heels of their elder brothers and sisters who have learned to climb, to swing, to look out at the Spanish towers above the trees. Picnickers spread their blankets in its shade and theatergoers walking out of playhouses at night, see the stars in its crown. The tree, like the park where it grows, is a transplanted natural wonder, a thing of beauty and usefulness. There isn't much you can do to improve it. But it can surely be destroyed.

We must not take Balboa Park for granted. We must rescue it from our selfish love, which has become neglect. We must plan for the future, not only on the outskirts of the city, but in our heartland park. We must compromise our differences and create a plan that benefits the park as a whole. We must remember that no one owns Balboa Park; we all own it. We must show political leaders that we will not stand by and let Balboa Park go down. We must find people like Kate Sessions and George Marston and Bea Evenson to plant seedlings, contribute money and, most of all, provide leadership.

We must not allow the park, which has given of itself from its gnarled roots to its blossoming branches, to wither and die in our midst.

December 23, 1983, San Diego Tribune, B-6. Central Balboa Park Association views new plan, by John Thelan, president of the Central Balboa Park Association: The Central Balboa Park Association consists of non-profit organizations and institutions which operate the San Diego Zoo, museums, performing arts theaters and other facilities within central Balboa Park.

These facilities and their collections represent contributions of time and money annually by many thousands and several generations of San Diegans. The proper care and handling of these facilities and collections, as well as provisions for convenient and safe access for all visitors is vital.

The current master-planning effort is timely due to the recent surge of nearby downtown-redevelopment activities and overall continued development of San Diego as a major city. However, the association believes that during the master-planning effort insufficient attention has been given to the following:

1. In initiating the master-planning effort, the City Council directed that Balboa Park be made economically self-sufficient. Balboa Park, in addition to serving residents of both the city and county, serves as a major destination point to out-of-state and foreign visitors. Therefore, in determining whether Balboa Park is self-sufficient, a comprehensive economic analysis of the park's impact on the generation of tax revenues should be prepared.

2. Many of the proposals for improved vehicular and pedestrian activities contained within the draft plan will be very difficult, if not impossible to implement, due to environmental, physical and financial constraints. Therefore, substantial time and effort could be expended pursuing proposals which have a limited potential for successful implementation. Accordingly, all proposals should be carefully phased to avoid premature disruption of on-going operations of the museums and other facilities. Also, the plan should include a short-term program to immediately provide: (i) additional parking in the central area; (ii) improved signage within and outside of Balboa Park; (iii) improved crime prevention.

The association welcomes the opportunities that the master-planning effort is providing and looks forward to making specific suggestions as the process continues.

December 23, 1983, San Diego Tribune, B-7. History of Bartholomew Plan. Harland Bartholomew, a St. Louis architect, drafted a master plan for Balboa Park in 1960. It was adopted by the City Council in 1961 as a 25-year plan.

Twenty-two years later, only about half of its recommendations have been realized. Some of them generated intense opposition. Others depended on conventional financing sources that dried up as voters rejected park bond issues and approved ballot measures to limit city taxing and spending. The building of a new Naval Hospital in the park and the plan to return 37 prime acres of the old hospital site to park use were developments not anticipated by the Bartholomew Plan. Its most daring proposal --- to eliminate automobiles from the park --- remains a glint in the park planner's eye.

What happened to the Bartholomew Plan?

Bartholomew's proposals to improve the zoo's accessibility, add tennis courts to Morley Field, enlarge picnic areas, develop more senior citizen facilities and provide park facilities near Golden Hill were fully implemented.

Bartholomew's plan to improve the museum complex by tearing down some buildings, renovating others and removing autos from the entire Prado area met with mixed success. Traffic was eliminated on El Prado (Laurel Street) from the Plaza de Panama to Park Boulevard, but cars and parking lots continue to jam the rest of the area. The Fine Arts Gallery gained a new wing, but the Museum of Man remains in the same building.

One part of the Bartholomew Plan which was not accomplished at all was its recommendation to tear down most of the buildings in the Palisades area. These are now protected by designation as a National Historic Landmark and probably will never be removed.

Bartholomew's plan to make Upas a through street, linking the eastern and western parts of the park, was never accomplished. The plan to close Pershing Drive was also not accomplished. Instead, it was expanded into a major through street.

Bartholomew's goal of making the Prado a sanctuary of greenery and fountains insulated from cars was torpedoed by the museums and theaters in the area, which depend on easy access and parking. This conflict between cultural versus outdoor uses of the park core remains today, so far the museums and theaters have kept the upper hand.

The voters passed a \$23.8 million bond issue in 1966 to implement road circulation, landscaping, lighting and other parts of the Bartholomew Plan. In 1968 a \$3.5 million park bond issue was passed. But that was the last bond issue for the park.

In quick succession, the voters of the city turned down bond issue proposals of \$2.8 million for the Aerospace Museum and for the Fine Arts Gallery in 1971, of \$5 million to reconstruct the Electric Building and \$1.7 million to remodel the Ford Building in 1972, and of \$25 million for park and recreation and \$22.5 million for park reserves in 1973.

Since then, no new general obligation park bond issues have been proposed. But extensive reconstruction of park buildings has been accomplished in the last decade, mainly through private donations and federal grants.

December 23, 1983, San Diego Tribune, B-7. Citizen's view of new park plan, by Clare B. Crane: Balboa Park clearly needs a new master plan. The existing (Bartholomew) plan was adopted in 1961 and changes in San Diego's population, land use and transportation require changes in the park. The Pekarek Plan for Balboa Park, now being reviewed by the Park and Recreation Board, contains over 50 specific projects for development throughout the park. Citizens Coordinate for Century III (C-3) supports the concept of comprehensive (instead of piecemeal) planning for Balboa Park, and we support most of the major recommendations contained in the Pekarek Plan.

In regard to transportation, we support the concept of developing an intra-park shuttle bus service and extending the trolley along Park Boulevard. Other suggestions contained in the Pekarek Plan to expand public transportation and reduce the need for roads and parking lots within the park should be actively pursued.

In regard to funding the necessary improvements and continuing maintenance of Balboa Park, Citizens Coordinate suggests that a small surcharge be added to every sale and fee now being charged by institutions throughout the park and the money be earmarked for expenditures only within the park. This suggestion ties in with the Pekarek proposals for an "Enterprise Fund."

In regard to land use and buildings, in general, we believe that Balboa Park already has enough buildings (some would say too many) to serve the area's cultural and recreational needs and that the lack of sufficient open-space areas (where people can picnic, jog, saunter or just relax in the sunshine and fresh air) is the major need to be met.

Therefore, we support the redevelopment of the east side of Balboa Park by relocating the golf courses (to the landfill near Morley Field) and recycling the land for picnic areas, walking and jogging trails, and recreational areas that will provide the neighborhoods south and east of the park with opportunities and vistas similar to those the western side now provides for its neighborhoods. We support the realignment of 25th Street, which will improve access to the park and, at the same time, provide a soccer field in the Golden Hill section of the park.

Closing the north end of Florida Street and redeveloping the open space thus made available into picnic areas, nature trails and passive recreational space is an excellent proposal and should be implemented as soon as possible, because it makes the largest amount of open space immediately available for the smallest expenditure of funds.

Because we believe that open space is a more critical need for Balboa Park than new buildings, we oppose most of the Pekarek recommendations to construct new buildings (such as an amphitheater in Florida Canyon, a gymnasium at Morley Field, two large meeting halls on the old Navy Hospital site, a multipurpose building next to the Organ Pavilion and parking garages on the zoo parking lot) and we opposed recommendations to expand existing buildings (Spanish Village, the House of Pacific Relations and the War Memorial Building). However, we support the proposal to build a restaurant at Marston Point (and to demolish the former fire-alarm building in that area) and we support construction of a parking structure in Archery Canyon in order to "pedestrianize" a portion of the Prado and Palisades plazas.

The Pekarek proposal to ban all automobile traffic from Cabrillo Bridge and the plazas is too drastic a measure, purchased at the cost of destroying valuable parkland at the northwest corner of the park (by extending Upas Street) and making access to the plazas difficult and expensive for elderly and handicapped visitors. Citizens Coordinate has therefore made an alternate proposal, which calls for closing half of each plaza to automobile traffic and routing cars one way through the plazas so that the other auto lane can be developed for use by pedestrians and cyclists.

Balboa Park is San Diego's community center. It is also, as a prime tourist attraction, an important economic asset. Balboa Park deserves the best: a comprehensive plan that cherishes the pedestrian instead of the automobile and meets our need for space instead of structures.

December 23, 1983, San Diego Tribune, B-7. City Manager Ray Blair's perspective on park plan: City Manager Ray Blair says, "With or without a park plan, there is no way to avoid large capital and operations expenses for Balboa Park . . . But I don't think the public will let us let Balboa Park go down."

Blair said: "The budget for maintenance of Balboa Park has rise in real dollars, but maintenance is at a lower level than pre-Proposition 13, as are most maintenance programs at other city parks. The budget is totally insufficient to fund the capital improvements needed for the park."

Proposition 13 and Proposition J of 1978 restrict the ability of the city to pay for park improvements, he said. Projects have had to be deferred. New financing is needed. Blair said possible alternatives are:

1. Earmark more revenues from the hotel-motel room tax.
2. Ask the voters to approve a district wide assessment. This would not be a value-based property tax. It would be a flat fee of small amount for each home or business.
3. Promote public-private partnerships with development concessions and long-term leases, as has been done in Old Town San Diego State Historic Park.
4. Issue revenue bonds to build parking structures, to be paid off with revenues from parking fees.
5. Ask the voters to approve a general obligation bond issue, such as the 1966 bond issue.
6. Establish a foundation to raise money for Balboa Park --- not for individual resident institutions.

Blair calls the Pekarek Plan "a far-reaching proposal." He will make his own detailed recommendations in January. But, in general, he is supportive of a long-term plan for improvements in Balboa Park.

December 25, 1983, San Diego Union, F-1. House of Hospitality can now put its best face forward, by Roger Showley: A restored facade on Balboa Park's House of Hospitality is the Committee of 100's Christmas gift to the city, with promises of further improvements to the rest of the building as funds are raised.

Using the newest technology as well as traditional procedures, contractors repaired crumbling piers, replaced termite-ridden beams and stripped off 12 coats of paint on the west entrance of the building.

"For years, people have talked about restoration," said Patricia DeMarce, president of the Committee of 100, which for 16 years has championed the preservation of the park's exposition buildings. "But out of all those studies, we still didn't get any pieces (of ornamentation) up there to replace those that were in such bad shape. What gives me pleasure is to see that we got some results."

Designed 70 years ago, the two and three-story "Foreign Liberal Arts Building" began life as a temporary structure for the 1915-16 Panama-California Exposition but has cheated death ever since. The edifice has served as a military hospital in the two world wars and as a club house for the city's arts and cultural institutions. The 54,600-square foot structure also is home for Balboa Park's only public restaurant, the Café del Rey Moro, as well as meeting rooms and a banquet-assembly hall.

Some of the original exposition buildings have been demolished and others have been restored or reconstructed. Now, perhaps, years of neglect are ending for the House of Hospitality.

The Committee of 100, which raised money to reconstruct the Casa del Prado, Casa de Balboa and Spreckels Organ Pavilion, approached the House of Hospitality differently. The committee hired contractors and architects to complete the project rather than simply giving the city money to tackle the \$31,000 first phase.

David R. Roberts, deputy director of the Park and Recreation Department, welcomed this approach, saying it saved up to 30 percent in overhead expenses normally incurred in capital improvement projects. Similar procedures were used on the expansion of the San Diego Museum of Art and replacement of the Old Globe Theater. Special insurance had to be obtained by the committee and its contractors before the work began.

Roberts said the building always has been considered the most expensive to rebuild because it has the most ornamentation of any still standing in the park. According to a 1979 study, it could cost upward of \$2 million alone to arrest the decay in the facade that decades of patchwork repairs have failed to halt. Even then, an earthquake or fire could level the building instantly.

DeMarce said her committee --- now composed of about 2,000 dues-paying members --- decided that a phased approach to the building was better than nothing at all. The first phase came on the western entrance to the building into the patio containing a fountain and sculpture by Donal Hord. The ornamentation was so fragile that it appeared it could topple onto unsuspecting visitors at any moment.

The committee hired Gaslamp Quarter architect-contractor Wayne Donaldson to oversee the project and he hired Architectural Ornamentation Associates to do the reconstruction work.

"Its very expensive, but it has to be done," said Maggie Sexton, who along with Don Johnson and Jack Houston carried out the 60-day project.

Donaldson began the work with a \$1,000 investigation into the facade's condition. He said that 60 to 80 pieces of the facade were in various stages of disrepair or missing altogether. The pieces ranged from 4 square inches to 12 square feet and weighed up to 175 pounds. There are scrolls, shields, torches, lances, flags, rosettes and an eagle, all related to the South American countries with exhibits in the building in 1915.

The entire facade could have been reproduced with new materials. But Donaldson preferred to incorporate as much original facade as possible. "I think it's important that the buildings have an appearance of age," Donaldson said, and he criticized the recently rebuilt Electric Building (now the Casa de Balboa) for its modern steel-and-concrete interior, when the original, albeit temporary building (destroyed by arson in 1978) was made of wood and plaster.

Using photographs of the original building from the 1915-16 exposition, Donaldson designed replacements for parts of the 35-foot-high facade that were missing. All the "flames" from the torches had to be built from scratch. Cornices and spearheads were missing and must of the rest appeared to be held together by coat-hanger wire. Elements from other parts of the building were removed and used as models to build new models for the replacement ornamentation.

Donaldson used "hydrocal," a cement-based plaster, for the new ornaments and, as in the original building, mixed in hemp rope to strengthen the plaster. But he replaced wood supports with steel. In some cases, the existing ornamentation was being held together by 12 coats of paint that had been applied over the last seven decades; the original plaster was gone completely.

Besides the ornamental work, Donaldson's contract also required him to repair holes in the facade.

The building, designed by Bertram G. Goodhue in June 1913, originally included extensive skylights and a south wing. For the California-Pacific International Exposition in 1935-36, now-retired architect Sam Hamill redesigned the building with provision for a terrace restaurant on the site of the south wing and the open courtyard and fountain in place of the skylit meeting room.

During World War II, about 600 nurses occupied the building and in 1947, \$80,000 was spent in restoration and \$40,000 in furnishings, according to Florence Christman's 1977 history of Balboa Park, published by the Committee of 100. Another restoration took place in 1967, prompted by the Junior League.

"We have a lot to think about before we go on to the next step," said the Committee of 100's Patricia DeMarce. "But I feel this has been a major step, opening the door to what we can do."

1984

Summary of Events in 1984

(Note: Dates of events are only approximate.)

Council rejects Zoo parking fee (May 8, 1984)

Police make restroom sex raids (June 6, 1984)

Shooting of police officers (September 15, 1984)

Zoo plans "third generation" animal enclosures
(October 1, 1984)

Lights go on in California Tower (October 8, 1984)

Festival Stage burns down (October 29, 1984)

Elevator to be built in Museum of Man
(December 10, 1984)

January 2, 1984, San Diego Union. B-1. San Diego gets the Philly flavor

January 2, 1984, San Diego Tribune, B-3. Mummies the word in Balboa Park

January 3, 1984, San Diego Tribune, **B-6**. Letter, Richard Amero: Editorials on park do not show insight

January 5, 1984, San Diego Tribune, B-12. Letter, Jeff Stickney: Transport crucial in new park plans

January 7, 1984, San Diego Tribune, C-2. Letter, Michael Suozzi, Hillcrest. Fan of San Diego deplores its growth.

Balboa Park is the jewel of this city. You have allowed it to be crisscrossed with freeways, pockmarked with golf courses, chopped up for Navy hospitals, dried up by parking lots and eaten up by private developers. When are you going to wake up?

The park is under attack by the developers and other enemies of the public interest. No more parking areas, no more access roads, no more golf course, no more building in the park and not one more square inch of park ;and must be touched by anyone. Vagrants are not the enemies of the park. The fat, overfed and predatory characters in three-piece suits with an eye to grabbing up public land are the criminal enemies of this park and of this city.

January 10, 1984, San Diego Tribune. Leisure-1. A day in the park --- what's going on?
Just about everything, by Nancy Cleeland.

It is an 1,100-acre playground, a green belt through the heart of San Diego. On sunny weekends, thousands of visitors stroll along the walkways of Balboa Park, past the elegant Spanish colonial buildings of the Prado, past gardens, fountains, courtyards and reflecting pools.

Museums describe the physical and cultural history of human beings, and explore their future. Theaters provide entertainment, from puppetry to Shakespeare. A world-famous zoo covers more than 100 acres. Mimes, jugglers and clowns perform for spare

change, while artists and photographers record the images around them.

But there is much more going on in the 115-year old park, so much that no one person can keep track of it all. “That would be a full-time job,” said Park Manager Dave Seyfarth. “Someone would have to bird-dog all these groups to make sure they sent in their activities.”

For instance, competitive sorts can find tournaments in golf, tennis, Frisbee golf, horseshoes, shuffleboard, lawn bowling, petanque (a French game similar to lawn bowling), boccie ball (an Italian variation of the lawn game), roque (similar to croquet), archery, badminton, table tennis, chess, bridge, volleyball and basketball.

Nature lovers can see what the original shrub-covered park was like, while searching out native plants and animals on a guided hike through Florida Canyon. These free hikes are led by volunteers from the Natural History Museum every Sunday at 2 p.m. Trails, which begin near the Morley Field tennis courts, are clearly marked and are open at all times.

Another look at the park’s plant life – one not limited to the native varieties – is led periodically by horticulturist Dale Ward. During the two-hour walks, which start at Alcazar Gardens, Ward identifies plants, traces their biological history, and covers some of the park’s history. For instance, he might point out a tree planted by Kate Sessions, one of the park’s original boosters.

Ward normally charges \$4 per person, but during January his walks are free. The next will be held January 21, starting at 10 a.m. and 1 p.m.

Walkabout International, a non-profit walking group with a full schedule of walks around the city, periodically leads special interest walks through the park, usually at no charge. February 4, the group will feature a four-hour behind-the-scenes walking tour of the zoo, starting at 8:40 a.m.

Looking for something more strenuous? Balboa Park is the setting for many competitive and recreational runs, often listed in the Leisure Calendar. The next, a 6-1/2 mile run, is set for next Tuesday at 5:45 p.m., starting at the Federal Building. Fee is \$1.

Three measured cross-country running courses start from the Morley Field Sports Complex, where runners will also find a two-mile jogging trail with a Fitness Parcourse (18 exercise stations).

Bicycle races and races often begin or end in the park. For those just starting out, Dick Quivey of the American Youth Hostels bicycle club leads a “vascular bike ride” every Saturday morning at 9:30 a.m., starting at the Organ Pavilion.

More advanced cyclists might want to try the banked track at the Velodrome, also at the Morley Field complex. Free and open to the public daily, the Velodrome hosts amateur races Friday nights from April to October.

A popular 18-station disc golf course, played with Frisbees rather than golf balls, is set up along Pershing Drive in the Morley Field Complex. Games are open and free. And an archery range in the same area has nine targets available for public use, with tournaments held each Sunday.

There is more, much more in the Pan American Plaza area. The Federal Building contains a weight room, open Mondays, Wednesdays and Fridays, at \$6 per month, or \$1 per workout; open badminton nearly every day when tournaments are not held; and open volleyball Monday and Wednesday evenings. For inspiration, players can watch the U.S. Olympic Volleyball team practice in the same building nearly every morning from 8 to noon.

The gymnasium hosts open basketball from 10 a.m. to 6 p.m. daily. Open table tennis games are played every Wednesday evening at 7:30 in the Conference Building.

Also in the plaza area, an adventurous soul can find exotic new hobbies, from folk dancing to bagpipe playing, with only a small amount of effort.

An information center in the House of Hospitality, on the Prado, issues a monthly calendar of museum exhibits and entertainment. Also available there are maps of the Cultural Recreation Area in the park center, and of the Morley Field Sports Complex, showing where 16 athletic events are held.

The center is busy every day of the week, with 100 to 200 visitors in an average afternoon, and many of the curious are locals. "You'd be surprised," said volunteer staffer Bob Huff. "Most of them have a general idea of the park, but they don't know any of the specific things going on. They're usually amazed when they find out how much there is here."

January 10, 1984, San Diego Tribune, Leisure-1. Balboa's rock pile has turned into a gem --- municipal golf course, by Frank Macomber. The Balboa municipal golf courses, which could be moved under a long-range park development plan, have a long and colorful history linked to the growth of San Diego (illus.).

Today the 18-hole Balboa layout is a huge patch of green rolling hills and valleys in the center of San Diego and one of the most conveniently located layouts in the area. Adjacent to it is the shorter nine-hole course.

From the air, they appear to be an emerald with surrounding San Diego the setting of a beautiful ring.

It was not always that way. In the early 1920s when the city fathers decided the town should have a public golf course, people called the Balboa Municipal course "the rock pile."

And indeed it was to some extent. Excavating machines and workmen carved the layout from the rocky canyons bordering Pershing Drive on the west and north and the residential districts on the east and south. Golden Hills was one of these.

The original municipal layout was fashioned from what is now part of the short nine and land to the north, recalls Harry McCarthy, head pro at Balboa for the past 27 years. While he wasn't here when the course construction started, McCarthy has pieced together most of its history, aided by people such as Ethel Johnson, George Waldram and Les Larsen.

"Back in the '20s, Balboa had no grass, and that resulted in the 'rock pile' label," said Johnson. "And what is now the 16th hole in the big course used to be called the 'hog's back,' because of the ridge that ran between canyons on both sides.

The course was turfed in the early 1930s, McCarthy said. The par 5, No. 18 is called "Cardiac Hill" because its fairway climbs from the valley to just below the hilltop clubhouse.

Johnson remembers also that in the late 1930s holes on the back nine bordering Pershing Drive had to be revamped because too many errant golf balls were sailing into the street. Some of them found the windshields of passing cars.

So a par 3 and par 5 were changed to two par 4's, allowing golfers to aim their shots farther left and away from Pershing Drive.

A veteran golfer herself, Johnson vividly remembers the early days of World War

II, when Slammin' Sammy Snead, then already a golfing legend, walked the fairways of Balboa as a Navy enlisted man assigned to instruct senior officers in how to strike the ball properly.

Johnson was playing with Snead on October 2, 1943, when he shot 28-32-60 at Balboa to set a record that likely never will be broken. The scorecard hangs in the Balboa pro shop as a challenge to anyone who dares to try to match Snead's skills on that day.

When Snead shot a 60, the course measured 6,187 yards for a par 72. Today it still is par 72 but only about 5,900 yards.

Balboa Municipal is the site of both the annual Junior World Golf tournament, which brings young contestants here from more than 50 nations, and the annual San Diego County Junior Golf Tournament, sponsored by The Tribune. The local PGA chapter also schedules many of its events at Balboa.

Together, the courses accommodate more than 400 golfers daily, the majority of them senior citizens, especially on the nine-hole layout.

"It would be a great loss to San Diego golfers if Balboa were to be eliminated," said Johnson, a former president of the Balboa Women's Golf Club. "It is conveniently located for those who can't drive long distances and the fees are within reach of the retired."

Critics of the Balboa course claim it is a money-loser. McCarthy says there are no revenue figures available because money from greens fees is poured into a general recreation fund, to be used for golf and other city-sponsored recreational activities.

Whatever happens to Balboa Municipal, its rich and colorful history will be remembered until somebody breaks San Snead's record 60, and that's not likely ever to happen.

January 12, 1984, San Diego Tribune, B-10. Letter, Hamilton Marston: Editorials ignore Balboa Park action

The Tribune's three-day editorial on Balboa Park (December 21-23) neither asks nor answers why to major Navy-city plans to relocate the new Naval Hospital outside the park to appropriate sites adequate to the demands of the future, Murphy Canyon Heights and Helix Heights are to restore 77 acres of former park land to park use were allowed to be frustrated by the opposition of business and labor interests who wanted such superior sites to go to private development.

On December 5, 1980, *The Tribune* headlined the decision of the secretary of the Navy to place the new hospital in Florida Canyon in Balboa Park, adding: "The decision came as a surprise in light of an earlier Navy study, released November 6, which indicated that using city-owned land in Southeast San Diego would be cheaper and faster."

The Tribune quoted former Mayor Pete Wilson, who said the decision "makes absolutely no sense based on the recommendations made to me by Admiral Jones (the author of the November study).

"I am completely at a lost to understand this decision in terms of the hospital's safety and ability to expand."

Citizens present at the meeting of the City Council on December 16, 1980, saw the council vote: "Be it resolved that the City Council of the City of San Diego hereby urges the president of the United States and the United States Congress to reverse the decision of the Secretary of the Navy."

Nothing much happened after that.

*All the birds of the air
Fell sighing and sobbing.
When they heard the bell toll
For poor Cock Robin.*

January 16, 1984, San Diego Tribune, B-9. Flight staged for replica of Curtiss A-1 seaplane

January 19, 1984, Memo from Citizens Coordinate for Century 3; to Members of the Park and Recreation Board; Subject: Comments on Pekarek proposals for Balboa Park Master Plan.

January 19, 1984, Statement by Richard W. Amero; to Park and Recreation Department Hearing on the Pekarek Plan for Balboa Park.

January 20, 1984, San Diego Union, B-3. Funding plan for park criticized, by Lori Weisberg.

Consultant Ron Pekarek, a landscape architect hired by the city to do a major updating of the park's existing master plan acknowledged at the outset of the hearing that many of the proposed sources of revenue, including parking fees, increased golf fees and income from new restaurants would prove to be unpopular.

"Conventional funding methods of the past are simply not available to complete the capital improvement," Pekarek said.

Another large source of revenue could come from the steady growth in the occupancy tax.

January 27, 1984, San Diego Union, B-3. Police horse patrol arrests 22 sleeping vagrants in park

February 2, 1984, San Diego Union, B-4. Bea Evenson left \$55,625 for Museum of Man.

February 9, 1984, READER, 3:1-5. Up With Acorns, by Neil Mathews

It may look like nothing but an empty, weedy lot now, but in a few more weeks the southeast corner of the intersection of Pershing, Upas and 28th streets will look like an empty, weedy piece of art. In late December a local group of artists and landscape architects calling themselves the Landmark Art Collaborative planted most of the two-acre site with a combination of wildflowers and indigenous saltbush. As the poppies and the blue lupin and the saltbush bloom, the lot will become an "urban meadow," in the collaborative's parlance, the first of many planned for San Diego's fallow plots of land.

February 19, 1984, San Diego Union, C-1. OPINION: Balboa Park attempts to put people purposes first, by Ron Pekarek.

February 19, 1984, San Diego Union, C-2. EDITORIAL: Balboa Park.

In general, we think the Pekarek Plan is a logical extension of the Bartholomew Plan. We do not agree with every specific proposal it contains, and we are particularly concerned about how it can be financed. We do agree generally with this updated blueprint on how to deal with the park's most pressing problems: Parking and traffic congestion.

February 19, 1984, San Diego Union, C-6. OPINION: Park's cultural contributions must not be sacrificed, by John D. Thelan, president of the Central Balboa Park Association.

March 2, 1984, San Diego Union, B-9. Human remains found in park

March 2, 1984, San Diego Tribune, B-2. Balboa Park hiker finds man's bones

March 5, 1984, San Diego Tribune A-3. Cities' Nativity Scenes OK at Yuletide, the Supreme Court ruled today.

WASHINGTON (AP) - Communities may include Nativity scenes in their official Christmas displays without violating the constitutionally required separation of church and state, the Supreme Court ruled yesterday.

By a 5-4 vote, the justices said Pawtucket, R.I., may include the Nativity scene, sometimes called a creche, in its Christmas display.

Chief Justice Warren E. Burger, writing for the majority, said the presence of an officially sponsored Nativity scene has as much to do with celebrating "a national holiday" as with noting the birth of a religious figure.

"Whatever benefit to one faith or religion or to all religions is indirect, remote and incidental," Burger said. "Display of the creche is no more an advancement or endorsement of religion than the congressional and executive recognition of the holiday itself as 'Christ's Mass,' or the exhibition of literally hundreds of religious paintings in governmentally sponsored museums.

March 14, 1984, San Diego Tribune, B-3. Balboa Park plan to be aired tomorrow at Park and Recreation Board.

March 15, 1984, Minutes of the Park and Recreation Board. (incomplete)

STAFF RESPONSIBILITY: Park Development and Open Space Division

Mr. Smith presented the March 7, 1984 staff report, which recommended that the Board approve the proposed amendments to the adopted 1960 Balboa Park Master Plan, in the category titled "Buildings and Land Use (Controversial)." Mr. Pekarek also made a presentation.

Proposal #1 - Consolidation of Park and Recreation Department offices in Building #29 of the Navy Hospital site.

There was no public input on this proposal

MOTION: Mr. Golden moved approval of the Manager's recommendation, with the caveat that staff incorporate improvement costs, when the Plan goes forward to Council. Mr. McElroy seconded the motion which carried unanimously.

STAFF RESPONSIBILITY: Park Development and Open Space Division.

Proposal #2 - Relocation of Boy Scout, Girl Scout and Campfire Headquarters and reclamation of these areas for open park land.

The following individuals/organizations spoke in opposition to the proposal:

1. Richard Davis - Boy Scouts of America
2. Chris Fontana - Campfire
3. Jan Madigan - Girl Scouts
4. Delza Martin
5. Monty Griffin, San Diegans for Park Reform
6. Bernadette Donnelly
7. Mike Madigan - Boy Scouts of America

MOTION: Mr. Arnhyrn moved that the Board disapprove the consultant's recommendation. Mr. Skill seconded the motion which carried by a vote of 10 - 1 (Allen).

STAFF RESPONSIBILITY: Park Development and Open Space Division

MOTION: Dr. Fairlie moved that the Board recommend that the regulations and signing in the area be revised to improve public access. Mr. Skill seconded the motion which carried by a vote of 9-2 (Quinn and Yturralde).

STAFF RESPONSIBILITY: Park Development and Open Space Division

Proposal #3 - Relocate Blind Center on their site or another site in the park.

The item was continued until a future Board meeting at which time transportation issues would be heard.

Proposal 4 - Expansion of Spanish Village

The following individuals/organizations spoke in opposition to the consultant's recommendation:

1. Charles A. McLaughlin, Central Balboa Park Association
2. Kirk Butler
3. Harry Haelsig
4. Veronica Enrique, Centro Cultural de la Raza
5. Dunham Reilly, Citizens Coordinate for Century 3
6. Eleanore Meadows, Uptown Planners
7. Carol Landsman, North Park and Golden Hill Community Planning Groups
8. Marilyn Irwin

Ms. Bernadette Donnelly spoke in support of the consultant's recommendation.

MOTION: Mr. Arnhyrn moved that the proposal be returned to the consultant to develop a compromise, with economic considerations. Mr. Golden seconded the motion which carried by a vote of 10 to 1 (Quinn).

STAFF RESPONSIBILITY: Park Development and Open Space Division

6:10 p.m. Mr. Sadler left the meeting and did not return. A quorum was still present. Mr. Golden assumed the chair.

Proposal #5 - Construct a bowl/amphitheater in Florida Canyon

The following individuals/organizations spoke in support of the consultant's recommendation:

1. Delza Martin
2. Bernadette Donnelly

The following individuals/organizations spoke in opposition:

1. Charles A. McLaughlin, Central Balboa Park Association
2. George Chapman

MOTION: Mr. Arnhyrn moved approval of the Manager's recommendation, with the understanding that consideration would be given to the impact on the Zoo. Mr. Quinn seconded the motion which carried unanimously.

STAFF RESPONSIBILITY: Park Development and Open Space Division

Proposal #6 - Expand food services in the Park to include one additional restaurant at the Prado, two at the Palisades area, a maximum of seven snack bars park-wide, and a maximum of six mobile vending units.

There was no public input on this proposal.

MOTION: It was moved, seconded and carried unanimously to approve the Manager's recommendation.

STAFF RESPONSIBILITY: Park Development and Open Space Division

Proposal #7. Develop a restaurant at Marston Point.

Ms. Bernadette Donnelly spoke in support of the consultant's recommendation. Mr. Richard Amero spoke in opposition.

6:30 p.m. Dr. Fairlie left the meeting and did not return. A quorum was still present.

MOTION: Mr. Arnhyrn moved approval of the consultant's recommendation. Mr. Skill seconded the motion which carried by a vote of 7 to 2 (Allen and Quinn).

STAFF RESPONSIBILITY: Park Development and Open Space Division

Proposal #8 - Old Navy Hospital redevelopment into a community activities center.

The following individuals/organizations made comments:

1. Dr. Daniel Marnell, Pacific Southwest Railway Museum Association, spoke in support of the consultant's recommendation.

2. Mr. James Ard, immediate past President of the San Diego Botanical Garden Foundation, spoke in opposition.
3. Ms. Kirl Butler spoke in opposition.

MOTION: Mr. Allen moved approval of alternative #2 in the staff report. Ms. Hix seconded the motion which failed by a vote of 7-2 (Allen and Hix).

MOTION: Mr. Arnhym moved approval of the Manager's recommendation. Mr. McElroy seconded the motion which carried by a vote of 7-2 (Allen and Hix).

STAFF RESPONSIBILITY: Park Development and Open Space Division

Proposal #9 - Establish southeast corner of the Park and Switzer Canyon as open park land; and Proposal #1 - Relocation and reconstruction of golf courses.

The following individuals spoke in opposition to the consultant's recommendations:

1. Carol Landsman, representing Uptown Planners, Golden Hill Planning Group, and North Park Planning Group.
2. Monty Griffin, San Diegans for Park Reform.

MOTION: Mr. Arnhym moved that these two proposals be returned to the consultant to develop a compromise which would achieve addition open space and, yet, allay community fears regarding thoroughfares. Mr. Skill seconded the motion which carried by a vote of 8-1 (Allen).

ADJOURNMENT.

March 15, 1984, Los Angeles Times, Part V, 1:1-3, 7:1-6. Telling the story of ancient man in San Diego; Doug Sharon, veteran of Peruvian digs, leads museum to greater heights, by Thomas K. Arnold.

March 16, 1984, San Diego Tribune, B-1. Zoo, animal park plan parking, concert fees, by Bob Corbett.

For the first time, two of San Diego's top tourist attractions --- the San Diego Zoo and the Wild Animal Park --- are going to start charging patrons for parking and special concerts.

A \$1 parking fee will go into effect April 2 at the park and on May 1 at the zoo, zoo spokesman Jeff Jouett said today.

In addition, he said the free concerts that started last year at the zoo's Wegeforth Bowl and those which have been given at the park for the past four years will cost \$2 per person.

The Wild Animal Park will start charging for the concerts on Memorial Day and the zoo on June 1.

Jouett acknowledged the fees might stir some protest. "We expect some negative reaction," he said, "but we'll just have to weather that."

However, he said, zoo officials and its board of trustees think the fees are justified. The board approved the fees early this year.

The budgets for the two areas, he said, have become restricted in recent years because of inflation and labor costs.

The fees, he explained, are an attempt to make certain aspects of the park's operations pay for themselves and not cut into the regular operating budgets.

“There are many behind-the-scenes activities,” he said, “that people don’t play for when they come through the gates.” He cited the zoo’s intensive research and breeding programs as examples.

In addition, Jouett said the zoo is planning a multi-level and multi-million garage to be built sometime in the next 5 to 10 years and needs to start saving money for that.

The zoo’s present parking lot off Park Boulevard can handle 3,200 cars, he said, but is often filled to overflowing. He also noted that it has recently been repaved, restriped and relandscaped. All that money --- \$400,000 --- comes out of the regular operating budget.

The parking facilities at the Wild Animal Park also need repaving. In some places, they need to be paved for the first time.

March 16, 1984, San Diego Tribune, B-3. Board backs scouting at Balboa Park, by Rita Calvano.

Members of Scouting groups that have used a portion of Balboa Park for their activities for many years are breathing easier today. The city Park and Recreation Board voted yesterday to keep the camping and other scouting facilities at the park, possibly sparing the groups a move from their longtime site.

March 16, 1984, San Diego Union, B-1. ITEMIZED: For the first time since its opening in 1922, the San Diego Zoo will charge for parking. Beginning May 1, it’ll cost \$1 a day in the Park Boulevard lots. (The Wild Animal Park starts charging on April 1). The Zoo’s Jeff Jouett says revenues will fund upkeep and future construction of a multi-level parking garage. And starting this summer, the Zoo and Wild Animal Park will charge \$2 a ticket for heretofore free concerts.

March 16, 1984, San Diego Union, B-1. Balboa Park plan returned to architect, by Lori Weisberg.

Opponents of two controversial proposals that would result in an expansion of Balboa Park’s Spanish Village and relocation of its two golf courses won a reprieve yesterday when the city Parks and Recreation Board sent the plans back to the drawing board.

March 25, 1984, San Diego Union, B-12. Theater lease update urged.

A City Council committee has recommended approval of an updated lease for the Old Globe Theater in Balboa Park that would allow the nearly outdoor Festival Stage to remain permanently in the park.

March 26, 1984, San Diego Union, B-3. Zoo, animal park draw protests over new fee plans, by Al Manning (condensed)..

Still, Zoo and Wild Animal park officials plan to stick with the decision.

Most of the people complaining are upset with the new \$2 fee for concerts which we be charged in addition to the regular admission prices, Zoo officials said.

Others, including the Zoo's neighbors in Balboa Park, are concerned about the \$1 parking fee.

"We've gotten about 100 telephone calls from people who are unhappy," Zoo spokesman Jeff Jouett said last night..

'A number of persons signed up (for memberships) with the anticipation of going to a number of free concerts. With the \$2 charge, it's not quite the same bargain.'

Earlier in the year, the Zoo raised its single-day adult price \$1 to \$5.95 and the Wild Animal Park price \$1.10 to \$6.95. The annual membership in the Zoological Society, which allows unlimited access to the Zoo and Wild Animal Park is \$33.

Meanwhile, mild opposition also is developing on the park issue, but as yet the complaining has not resulted in a formal protest.

Charles McLaughlin, the director of the Natural History Museum, said the \$1 parking fee in the Zoo lot may result in park goers deciding to park instead in the free lot near the museum.

Institutions located further away from the Zoo lot apparently are less concerned about the possibility of a negative impact.

Jouett said they do not know how the new fee will affect the use of the lot. The spokesman said they are anticipating approximately \$600,000 in gross revenue in 1984 once the charge begins May 1, and approximately \$800,000 annually thereafter.

However, he said budget analysts are projecting a net loss for the first year of operation because of the cost of installing and purchasing new parking equipment, plus the hiring of additional personnel.

The equipment cost is estimated to be \$325,000 and the additional labor, \$218,000.

The Zoo eventually may construct a multi-level parking garage, Jouett said.

April 1, 1984, San Diego Union, F-16. The Museum of Man is completing a \$60,000 new plaza outside its headquarters in the California Tower Building (illus.).

April 5, 1984, San Diego Union, B-4. Delay urged for zoo parking fee

The Public Facilities and Recreation Committee, a City Council committee, yesterday voted to request the San Diego Zoo to delay for 60 days its plan to begin charging a \$1-per-car parking fee in Balboa Park

Committee members and a representative for other Balboa Park tenants voiced concern that the fee may deter persons who use the parking lot but visit areas other than the Zoo from coming to the park.

April 5, 1984, San Diego Union, B-11. Old Globe spins joyfully, by Welton Jones.

Included in a list of renewed leases for city property (voted by the City Council Tuesday) was a 25-year agreement (with an option of another 25 years) covering the Simon Edison Center for the Performing Arts, which includes the Old Globe itself, the Cassius Carter Center Stage and the outdoor Festival Stage.

April 6, 1984, San Diego Tribune, B-10. Letter, Delia Laitin, president Citizens Coordinate for Century 3: Unilateral actions by zoo are cavalier

Two actions, in particular, demonstrate a cavalier attitude toward the opinion of the San Diego community.

First, the zoo acted unilaterally to destroy mature eucalyptus trees in the parking lot used by zoo patrons.

The second action of the zoo is its recent announcement that it will soon commence charging for the use of that same parking lot.

April 8, 1984, San Diego Union, B-7. Casino night for disabled at Recital Hall, Balboa Park

April 9, 1984, San Diego Tribune, B-6. Letter, Peter H. J. Ussell, East San Diego: Zoo puts proverbial boot to paying public.

As a local resident on and off for the past 18 years, I feel that the recent announcement from the officials of the San Diego Zoo is part of an ongoing scam and deterioration of the zoo in the eyes of the zoo-going public, its supporters and all animal-lovers in general. San Diego Zoo used to be an interesting and fun place to visit, but unfortunately over the past several years the same is not true. It has been gradually going down hill by offering fewer animals to see, more and more commercialism for profit, and less and less concern on the part of zoo officials for the public.

I feel that the zoo is relying on its past fame, both locally, nationally and even internationally, to put the proverbial boot to the paying public, and the latest move to raise admission fees and charge for parking is really the last straw.

I have also noticed that since the zoo employees have become unionized, they are showing a noticeable lack of interest and care toward zoo patrons. They have realized, to the detriment of the fee-paying public, that they get well paid, even if they don't show interest or concern. Some of them are as rude as they almost dare to be. Probably their higher wages and benefits are one of the direct causes for the higher entrance fees and parking lot charges. Nowadays, the zoo is literally infested with popcorn, soft drink and candy machines at every turn in the road. Gift shops selling overpriced gifts are everywhere. And the eating places charge enough to soak the public.

Those double-decked monster buses parade around in an endless stream, belching out noxious fumes over the visitors and animals alike, causing conditions, especially on hot calm days, that are definitely unhealthy and most aggravating. It is noted that the bears especially are expected to perform and salute as every bus goes past, in exchange for a handout from the driver for the amusement of zoo visitors; cute maybe, but is this what a zoo is supposed to be? Certainly not in my opinion.

Many animals are caged in quarters that are too small for their size. For instance, take a look at that beautiful black leopard near the seal pool; one can see it restlessly pacing a figure eight all day long in an inadequate-sized cage, on cold cement. Also, the lion and tiger areas get little sun, and those wonderful proud animals are obliged to sit and stand on cold cement in quarters not sufficient for their natural needs.

Also, while visiting take a look at the pitiful monkeys "doing time" in cages that look like cells; this is not how animals are supposed to be expected to live. Maybe the San Diego Zoo ought to be renamed the San Diego Animal Prison.

Seems also that a lot of the animal zoo inmates have been moved to the Wild Animal Park near Escondido and, in my opinion, that is where they all should be to enjoy the freedom they are justifiably entitled to.

Maybe the zoo should just be abandoned and covered with blacktop to provide a huge, free parking lot for the users of Balboa Park and not be used as the commercial, ugly and expensive disgrace it is turning into.

April 9, 1984, San Diego Union, B-11. Letter, Robert Leffler, San Diego: "My family has held a zoo membership for over 22 years. Regretfully, we will be considering our next renewal very skeptically.

April 10, 1984, San Diego Tribune, B-1. Council refuses Zoo parking fee, by John Gillmore.

For the time being, parking will remain free at the San Diego Zoo.

The City Council refused yesterday to approve a \$1-a car fee that the Zoological Society had planned to start May 1.

The council said it wanted a legal review of the zoo's lease with the city and a report on the effects a parking fee would have on other Balboa Park attractions.

April 13, 1984, San Diego Tribune, C-1. "Hawaii" at Fleet

April 18, 1984, San Diego Tribune, B-8. EDITORIAL: Zoo needs money --- and our support.

When prices go up, it's natural for people to protest the injustice of it all.

That's exactly what happened when the Zoological Society's Board of Trustees boosted membership fees for the San Diego Zoo and the Wild Animal Park and (Of all the gall!) announced a \$1 charge for vehicles for zoo parking.

The media reported the price boosts, and people reacted immediately. Several letters of protest were carried in the "Letters to The Tribune" column. No letters of approval were published because none was received.

Perhaps it's time San Diegans step up and speak out in favor of the board's decision --- and the best way to gain support is to offer facts.

The Town Hall column, appearing today on the next page, explains the society's position. The column is by Charles L. Bieler, executive director of the Zoological Society. His explanations are convincing.

And there are a lot of San Diegans who are concerned. The Zoological Society of San Diego has more than 250,000 members. The majority of the membership is made up of married couples who pay a dual membership fee each year.

Ten years ago the dual fee was \$16. This gave a couple free admission to both San Diego Zoo and Wild Animal Park for as many times as they cared to attend. It also included two guest passes and a year's subscription to the society's magazine ZOONOOZ.

Today, dual membership offers the same privileges. The price has been increased several times since 1974 and now it is \$38. This 10-year increase amounts to 138.5 percent --- slightly higher than the inflation rate of 127.3 for the same period.

This sort of increase is well within the ballpark. In fact, the society's dual membership is one of the best bargains in town.

On the matter of parking, the board of trustee's decision to charge a fee is in limbo. The City Council, receiving numerous complaints about the increase, voted to withhold approval for two months while the city manager's office studies the matter.

One dollar for all-day parking is fair. It is much cheaper than parking fees at other attractions. It will help the zoo by providing \$600,000 each year.

We know the trustees have given the membership fee increase and the parking fee intensive study. We believe their decisions were correct, and we hope the City Council agrees when it makes a judgment on the matter in May.

April 18, 1984, San Diego Tribune, B-9. Town Hall: The price of excellence, by Charles L. Bieler, executive director, San Diego Zoological Society.

While no one at the San Diego Zoo or the San Diego Wild Animal Park expected to hear enthusiastic "thank-yous" for the new \$1 parking charge, \$2 summer concert ticket or increased membership dues, the response from some press and public was startling. Misconceptions of how the zoo is run and paid for surfaced with surprising frequency. Many accounts ignored the "why" behind our new fees.

For starters, the Zoological Society of San Diego is a non-profit organization. Non-profit does not mean free and it does not imply cheap. Non-profit groups must pay their bills too. Our non-profit status means the money we take at the zoo and the Wild Animal Park all goes to operate, maintain and improve these two facilities. No one will get rich on new concert and parking fees, but the Zoological Society may afford to keep up its expected excellence and conservation leadership. A non-profit service is often a value relative to a commercial venture. Admission to the San Diego Zoo or the Wild Animal Park is less expensive than admission to Sea World, for example.

Ruled by cooperative agreements with the City of San Diego, the Zoological Society operates the Zoo and the Wild Animal Park. Taken separately, each location is a world-class zoological garden. The zoo and the Wild Animal Park are each top-drawing cards for the substantial tourism and convention segments of this city's economy. Taken together, the zoo and the Wild Animal Park represent an unparalleled recreation, education and conservation resource to this community. Running the two campuses for the optimum long-term benefit for all challenges the Zoological Society to succeed with two major business operations on a non-profit basis.

Deciding how the zoo and the Wild Animal Park get and spend money is the duty of the Zoological Society's board of trustees, 12 community leaders who volunteer many hours to the task. In addition, 120 San Diegans contribute their energies to 12 citizen committees which advise the trustees on specialized aspects of zoo and Wild Animal Park operations. Since its inception in 196, the Zoological Society has been served by generations of San Diegans with the intent and ambition to make the San Diego Zoo and later the San Diego Wild Animal Park, the world's best zoological gardens.

By wide consensus, their efforts have equaled their goals. Whether in terms of size, number and rarity of animal and plant collection, number of yearly visitors or pure aesthetic value, both the zoo and the Wild Animal Park rate among the biggest and best in American and in the world. Not too surprisingly, the Zoological Society's expenses are also among the zoo world's biggest. Our 1984 budget details about \$48 million in costs to operate the zoo and the Wild Animal Park. Our sources of income, though, are unlike any other American zoo and our expenses include many essential goods and services not readily apparent to the casual zoo visitor.

Every other major zoo in this country relies on tax support from city, county, state or federal governments for most and sometimes all of their income. In San Diego, we are fortunate our city fathers saw fit to make this Zoological Society self-supporting. The Wild Animal Park was built entirely with revenue generated at the zoo and from private citizens. While the zoo receives some tax support from city of San Diego residents --- about \$1.3 million in 1984 --- the total amounts to only 2 percent of our operating costs. With 137,000 households holding memberships (about 250,000 members), the Zoological Society of San Diego is by far the world's largest such organization. Our members are a valuable asset, yet membership dues at the new, increased rates account for only 7 percent of the money necessary to run the zoo and the Wild Animal Park. Donations make up another 8 percent of Zoological Society revenues.

More than 75 percent of the Zoological Society's operating income is paid directly by the people who visit the two zoological gardens. Included in that 75 percent, some 30 percent, more than \$15 million, is earned from non-members, directly from admission charges to the zoo and the Wild Animal Park. The guided tours --- double-deck buses at the zoo and the monorail at the Wild Animal Park --- earn 11 percent of our necessary revenue. A total of 36 percent (nearly \$18 million) of income is generated by sales of food, drinks, souvenirs and gifts at the two locations.

The new \$1 parking fee collected at the zoo and the Wild Animal Park will account for less than 2 percent of Zoological Society income in 1984. The new \$2 charge for summer concert tickets should also generate nearly 2 percent of the Zoological Society's 1984 revenue. How will these new fees be spent? It is no coincidence that the 1984 cost of operating, maintaining and improving the zoo and Wild Animal Park parking lots takes roughly 2 percent of Zoological Society expenditures. And the money needed to pay performers for the Wild Animal Park's country and pop music series and the zoo's big band concert series is about 2 percent of our 1984 expenses. The while idea behind the new parking and concert charges is to allow those persons who use the parking lots and those who attend the concerts to pay for these services.

Costs of operating the zoo and Wild Animal Park in 1984 are not out of line with what would be expected from two major businesses which serve more than 4.5 million customers. Our biggest expense is labor, which accounts for nearly 55 percent of Zoological Society expenditures. About 1,000 people are employed at our two locations, more than at any other two American zoos.

General operating supplies and services --- everything from the cost of food sold in snack stands to food for animals and costs of gift shop items to employee uniforms and tools --- takes another 35 percent of yearly Zoological Society budget allocations. Administration costs (4 percent), facility maintenance (3 percent) and membership services and fulfillment (3 percent) round out the Zoological Society's annual operating expenditures.

Prices increase at the zoo and the Wild Animal Park for the very simple reason that costs increase. The cost of health insurance, of utilities and of labor rise for this business operation as they rise for all others. To minimize the effect of these increases, we have tightened our belts, found ways to maximize our productivity and sought to add revenue in ways most fair to those who visit the zoo and the Wild Animal Park and benefit from its services. Because the total number of zoo and Wild Animal Park visitors has not risen as rapidly as inflation rates in the last five years, we have had to meet increasing costs with increasing prices.

The average zoo visitor may not realize all the programs and services their payments provide. The hidden costs of maintaining these modern zoological gardens include education programs for all ages, informative graphics and signing, renowned botanical collections, top-notch veterinary care, and security and health care sufficient to serve our millions of guests. We pay for an endangered species research program unequalled at any other zoo and necessary for the future of all zoos and hundreds of threatened wildlife species. Our cooperative breeding programs with other zoos in America and around the world are an expensive item not in San Diego Zoo budgets of yesteryear.

Comparing the price of running the San Diego Zoo and the San Diego Wild Animal Park to the budgets of other American zoos is a classic apples-to-oranges fallacy. Many other zoos receive labor, maintenance and supplies from the city governments who support them and these costs do not show up on budgets published in World Almanacs. Many contract with outside vendors for gift and food sales or tour transportation systems again avoiding these costs in zoo budget tallies. Some have education programs separately subsidized by state or local governments. Some have animal collections filled with fish and insects, which are easier and less expensive to care for, but which run up their species counts to bring these zoos close to San Diego totals. Many are outstanding zoological gardens, but almost all are far smaller in size and are visited by far fewer people than the San Diego Zoo and the San Diego Wild Animal Park.

The price you pay for a day at the San Diego Zoo or the San Diego Wild Animal Park is the price of excellence. Even with a new parking fee and higher membership rates, we sincerely feel a visit here is an educational and recreational value. Our admission prices compare favorably to other entertainment facilities, to sporting events, to theaters and even to movies. San Diego has been justifiably proud of its zoo for 68 years. The zoo and the Wild Animal Park make living here a richer experience for all and we have appreciated the goodwill and support of this community. We hope the critics of our recent pricing changes can understand the demands of our self-supporting financial philosophy and, in time, rejoin the ranks of zoo and Wild Animal Park advocates.

April 18, 1984, San Diego Tribune, C-1. Timken gallery announces acquisition of portrait of Mrs. Thomas Gage by John Singleton Copley for \$1.4 million

April 19, 1984, San Diego Tribune, B-10. Letter, B. Sherwood, Encinitas: Support greatest zoo: "Come on San Diego. All this fuss over \$1. Let's keep the San Diego Zoo No. 1, help support it and the changes."

April 25, 1984, San Diego Tribune, A-1. Balboa Park isle of escape in city's heat, by Rita Calvano.

April 28, 1984, San Diego Union, B-3. Landmark status seen for Zoo, by Roger Showley.

The San Diego Zoo has a good chance of being declared a national landmark this fall, a National Park Service official said here yesterday.

But James Charleton, A NPS historian, said granting landmark status to the site of the now-demolished Balboa Stadium at San Diego High School is unlikely.

Charleton said he will make his report in July and the U. S. Department of the Interior could act on declaring more national landmarks this fall.

April 29, 1984, San Diego Union, F-2. Look of Spain via Balboa Park . . . bits of Electric Building can be seen on Tablao Flamenco restaurant in Pacific Beach

April 30, 1984, San Diego Tribune, B-6. Letter, Steve Kowit, coordinator Animal Rights Coalition, San Diego: Enclosures at zoo termed inadequate.

The real trouble with the San Diego Zoo is not that it has too large a budget, but that too many of its animals live miserable lives in dreadfully inadequate environments.

While money is spent on enhancing the grounds and building new junk-food stands, many animals are forced to spend their lives pacing hopelessly in small cement cages, often with nothing to occupy them but a rubber tire or chain or fake tree --- while just out of reach, the grounds are tree-laden, lush green and spacious.

In this ecologically conscious era, zoos like to promise the idea that they're in the business of saving endangered species. Nothing could be further from the truth. Zoos are directly responsible for the depredation of rare and exotic wildlife, numerous species have been hunted to the point of extinction for the excellent prices paid by American and European zoos.

The Animal Rights Coalition suggests that San Diegans write to the zoo, urging it to spend appreciably more money on creating livable environments for its innocent victims. The day we stop being "amused" by helpless animals pacing in cages will be the day we can start calling ourselves civilized.

A massive redesign will give the San Diego Zoo a totally new look over the next three decades --- the park will be organized around climate zones with plants an integral part of each exhibit, transforming the Zoo into an even more lush park that it is today.

"It's the first time that climate will be considered as a primary basis for organizing a zoo," said Sheldon Campbell, president of the board of the Zoological Society of San Diego. "It is the climate that dictates what life forms can live in certain areas. There will be a tropical forest, tundra, savanna, and a montane --- life zones that run to certain kinds of vegetation and certain species of animals."

A key element in the project is construction of what Campbell calls "third-generation" zoo enclosures.

The new enclosures will attempt to replicate nature, said Charles Bieler, executive director of the society. They have been used at the San Diego Wild Animal Park in conjunction with geographic zones. At the Zoo however, the enclosures will be used in combination with an arrangement based on bioclimatology --- the science that deals with the effects of climate on living matter.

The new enclosures, unlike the cages of the early Zoo and the moated enclosures that make up most of the current Zoo, will be designed to meet the animal's physical and psychological needs.

"Third-generation (enclosures) and the climatic theme go hand-in-hand," Bieler said.

The changes will be gradual but if before-and-after pictures were to be taken the change at the end of 30 years would be dramatic, Campbell said.

In keeping with plans for a new layout, a study has been conducted of the microclimates throughout the 100-acre Zoo.

"The climate at the Zoo varies," Campbell said. "It is much colder on the west side, near State 163, which will house the arctic and tundra exhibits. It is much warmer in other areas, where the tropical exhibits will go."

At present, the Zoo is laid out on a taxonomic basis --- the animals are grouped according to type. The new Zoo will "group animals according to the kinds of places they come from," whether it be desert or tropics or savannas or montanes, Campbell said.

The Zoo already has one major exhibit that is both third-generation and bioclimatic --- modeled after a tropical rain forest. The \$3 million Heart of the Zoo exhibit was completed in September 1982 and contains an orangutan enclosure, two Siamang enclosures, two types of langurs, or leaf-eating monkeys, and two aviaries.

Two more exhibits, to cost about \$1 million are planned for next year. When they are completed, about 20 percent of the Zoo will be organized on a bioclimatic basis, Bieler said.

The first is the \$400,000 kopje exhibit, scheduled for completion by the end of the summer. Kopje is Afrikaans (language of the Boers) for upheaval of rocks, Campbell said. The exhibit will depict a transition from montane to savanna. Montane is a region of moist, cool upland slopes below the timberline; savanna is a treeless plain, or a grassland with scattered trees.

The exhibit will include the Pygmy mongoose, the Verreaux eagle, the Klipspringer, a delicate antelope the size of a small dog, the rock hyrax and agama lizards.

From the beginning of planning, consideration has been given to the kinds of plants to be included, Campbell said.

The second exhibit, based on bioclimatic layout and on a third-generation enclosure, will be the Sumatran tiger exhibit. Campbell said the project is expected to cost \$600,000 to \$650,000. Construction should begin by the end of next summer and be completed by the summer of 1986. It will represent animals found in a tropical forest.

Bieler said Campbell coined the term "third-generation" for the enclosures used at the Wild Animal Park and even at Sea World for the penguin exhibit.

Experience at the Wild Animal Park has shown that animals will reproduce if their environment in captivity is similar to that in the wild, he said. Animals that failed to reproduce at the Zoo, bred successfully at the park in its third-generation enclosures.

The 100-acre Zoo houses approximately 3,200 animals, representing 750 species. The Wild Animal Park has developed only 700 of its 1,800 acres and has 2,200 animals representing 200 species.

Campbell said the Zoo and park are not designed to be competitive and will not be when the new design is completed.

"The park is designed to give a large picture of animals working in groups. The Zoo has a more intimate approach."

Bieler said third-generation enclosures evolved over the last 10 to 15 years when "the profession realized that our resources for animals were disappearing and if we were going to have animals to exhibit in the future, we would have to be self-sustaining," with animals reproducing in captivity.

"We assume if we can produce a natural setting, it would be a better setting," Bieler said.

Dr. James Dolan, curator of mammals, said that in the new exhibits, "Animals will be in a more naturalistic setting and there will be an opportunity for more natural behavior."

He said, "In captivity, animals live longer because they are provided with medical care and they are always assured of food. It's not like in the wild."

Medical care and food account for longevity in captivity, "but it doesn't necessarily mean that they are housed in better conditions," Dolan said.

The combination of bioclimatic zones and third-generation enclosures is for the “encouragement of natural behavior,” Campbell said.

In the first generation of exhibits, the animals were placed in boxes or pits, he said. “There was no regard for the animals’ psyche.

“With the second generation, the exhibits were more open. It (second generation) characterizes our Zoo --- more space, and the public perceives the animals to be more free. The third general will take into consideration the psychic needs and the behavioral needs.”

Campbell said the exhibits will encourage the animals to display their natural behavior, even modified hunting. He said this would be done by using models or decoys, not real animals to encourage a hunting behavior.

He said that in the case of fishing cats, a stream would be stocked with live fish so that the cats could capture them as they do in the wild. That would be the only instance, Campbell said, in which the use of live animals would be tolerated.

Bieler said the new plan will provide for a “more integrated landscape plan. We will see more landscaping, more greenery in the Zoo that we have today. We will be able to separate the vehicular traffic from pedestrian traffic. We will have better traffic, better crowd control, better distribution of utilities and facilities.”

The bioclimatic layout should give the Zoo a flexibility not possible with a geographic layout, he said.

“Here you design an exhibit for an African monkey, but then you can’t get the monkey anymore. Eventually you lose the theme. You don’t have the flexibility of working with it.”

With a layout according to climate zones, the Zoo will have the ability to place animals and plants that live in a certain climate zone together, no matter their continent of origin.

The Zoo is ready to move with the redesign, but there are two impediments that will spread the project over at least three decades. The primary one is money, according to Campbell, and the need to keep the Zoo open to the public.

“We owe it to the city of San Diego to keep a zoo going, so we have to do it slowly,” he said.

Although organizing the Zoo bioclimatically and using third-generation enclosures should be completed in 30 or so years, Bieler said work to improve the Zoo will never end.

He said the idea contradicts a statement by Dr. Harry Wegeforth, who founded the Zoo in 1916. Before his death in 1941, Wegeforth reportedly said, “Now the Zoo is finished.”

He was wrong, said Bieler.

“Keeping the Zoo fresh and modern is never finished. It’s an ongoing process. I’m certain there will be a fourth and a fifth generation.

He said the future for zoos, although difficult to visualize, probably will evolve around science, perhaps expansion of artificial insemination, embryo transplants, perhaps embryo management.

October 8, 1984, San Diego Tribune, B-3. Lights go on in California tower . . . and a shining jewel.

The California Tower, long considered the jewel of Balboa Park, will sparkle again next week when its lights go on permanently.

Except for brief periods of experimentation to determine which illuminators cost the least to operate, the tower has been darkened for the past five years --- to the dismay of many residents who looked to the tower as a beacon of light in the San Diego night sky.

The tower lights were a victim of the energy crisis and tax-cutting Proposition 12 in the 1970s. But this week, a city crew is expected to begin installing energy-saving light fixtures purchased on the East Coast.

If all goes well, the lights will go back on next week, shining from dusk to midnight, just like the old days.

November 30, 1984, San Diego Union, B-1:2-4. Myers to replace Bieler at Zoo, by Gina Lubrano.

Charles L. Bieler, executive director of the San Diego Zoo and Wild Animal Park for nearly 12 years, will take a newly created planning and fund-raising position in February, Sheldon Campbell, president of the Zoological Society, said yesterday.

Bieler will be replaced by Douglas G. Myers, 35, who is currently deputy director for operations.

Bieler, 49, will become executive-director emeritus and will remain on the Zoological Society payroll. His duties will include development, planning and inter-zoo relations.

The other director-emeritus, Charles Schroeder, 83, retired in 1972 and is not on the payroll, although he remains involved with Zoo and park activities.

Campbell said the change involving Bieler has been under discussion since September and is a key part of the society's long-range plan to give the Zoo a totally new look over the next three decades.

"We are nearing completion of our long-range strategic plan," Campbell said, "and it has become increasingly apparent that our capital needs to refurbish old exhibits and build new ones will take front and center in our thinking."

The plan calls for organizing the Zoo around climate zones, with plans an integral part of each exhibit.

The City Council Public Services and Safety Committee yesterday was told by Deputy Chief Norm Stamper that the park has experienced "a remarkably low crime rate," considering the fact that it receives 13.5 million visitors annually.

Technically, Balboa Park's crime rate, the number of crimes reported for each 1,000 residents, is the worst in the city, Stamper acknowledged, but that statistic is skewed because only 956 people reside in the Police Department's Balboa Park precinct.

Of the 1,212 crimes logged so far this year, Stamper said, more than 80 percent were "vehicle-related: --- theft of automobiles or items in them. The citywide figure for vehicle-related crimes is about 41 percent.

December 13, 1984, San Diego Union, B-1. Balboa Park crime figures disputed, by Michael Smolens.

A Police Department official yesterday countered news stories about crime in Balboa Park by saying the park has "a remarkably low crime rate."

Nevertheless, Deputy Chief Norman Stamper told the City Council's Public Services and Safety Committee that police have stepped up enforcement efforts in the park.

December 16, 1984, Los Angeles Times, II-2. Letter, Polly S. Browder, La Jolla.

San Diego is no longer a small town of dairy farms, naval facilities and vacation cottages. It is America's eight largest city and its city park should reflect the intellectual and technological growth of its citizens.

Los Angeles Times, January 3, 1985, D-1,D-6.. Birthday Concert Set For Sunday: Spreckels Organ Is Still Spry at 70, by Kenneth Herman (illus.)

San Diego - Unlike other septuagenarians who settle back into genteel retirement, Balboa Park's Spreckels Organ is making a vigorous return to public life. The park's grand old lady turned 70 Tuesday (January 1), and interim civic organist Robert Plimpton is beginning a birthday concert at 2 p.m. Sunday to launch her into her eighth decade.

"I want to put the organ front and center in the public awareness," Plimpton said. "At one time in this city, the post of civic organist was musically very important. There is no comparison with the situation today."

When San Diego's first civic organist, Humphrey Stewart, played the inaugural recital on New Years Day in 1915, it was quite an event. Stewart, a proper English gentleman with an Oxford education, was brought to San Diego by the organ's donor, John D. Spreckels. Spreckel's biographer, H. Austin Adams, claimed that 60,000 people heard the opening recital.

To conjure up some of the organ's colorful history, Plimpton will include in his Sunday program several pieces composed by Stewart and succeeding civic organists. "I've found Stewart's 'Montezuma March' to play," Plimpton said, "and I've been given a copy of a pedal solo --- a Handel fugue arranged to be played by the feet only --- by Stewart's immediate successor, Royal Brown."

Plimpton is still trying to track down the sheet music to Brown's "Balboa Park Suite," a programmatic gem Brown frequently performed when he was park organist. The suite depicts places in the park, such as the lily pond and the organ itself, according to Donald Shanks, retired organist of St. Joseph's Cathedral, who owns a vintage 78 rpm recording of the piece. Brown's compositions are reputed to be stored by uncatalogued in the basement of the downtown San Diego Public Library.

Both Stewart and Brown were predecessors of Shanks at the cathedral, a post each held concurrently with that of civic organist. "I can recall being held on my father's shoulders at the Organ Pavilion and watching Stewart accompany Madame Schumann-Heink (a celebrated German-American dramatic soprano)," Shanks said. "The crowd was a bit more ambulatory then."

Marguerite Nobles, organist emeritus of the old First Congregational Church of San Diego, remembered attending the first recital played on the Spreckels organ. "I was here visiting from Redlands, Calif., and just happened to hear the inaugural recital. Later, I became a pupil of Dr. Stewart. He was a gentleman of the old English school. His playing was rather pedantic and unemotional. For his park programs he played the organ classics --- he rarely played transcriptions of orchestral music."

According to Shanks, Stewart's honorary doctorate was bestowed by the College of the Pacific, a California school, for his compositional setting of the Francis Thompson poem, "The Hound of Heaven."

In spite of encroaching vehicle traffic and sprawling parking lots, the rococo Spreckels Organ stands as an icon of San Diego history. John D. Spreckels and his San Francisco brother, Adolph, donated the organ to the city at the opening of the 1915 Panama-California Exposition. As a bronze plaque in the park states, they gave the organ "For the free use, benefit and enjoyment of the people of San Diego."

John D. Spreckels was the oldest son of sugar magnate Claus Spreckels, known as the "Sugar King." With his younger brothers Adolph and Rudolph, John took advantage of the family's virtual monopoly over the sale and production of sugar on the West Coast and formed a steamship company that ran between the Spreckels' sugar plantations in Hawaii and the mainland.

John Spreckels settled here in 1887 and quickly became one of the movers and shakers of turn-of-the-century San Diego. He was an organist by avocation, practicing daily on an organ in the music room of his Coronado mansion.

By the late 1970s, the Spreckels Organ was showing its age, both inside and out. Renovation of the pavilion, the building that houses the organ, began in 1979, followed by a complete restoration of the instrument itself. Under the supervision of Lyle Blackinton, an El Cajon organ builder, who maintains the organ, each of the 3,400 pipes was cleaned and rebuilt.

"Over the years, the weight of some of the pipes has caused the metal to sag, preventing them from sounding as they should," Blackinton said. "We re-leathered the bellows and pipe valves, and we replaced all the regulators. Our goal was to make the organ sound just as it did in 1915."

Some of the more complicated pipe work --- the brilliant-sounding reeds --- was sent back to the organ's builder, the Austin organ factory in Connecticut, for sensitive revoicing.

The Spreckels facelift will be complete when new seating is installed in front of the pavilion, a project that was slated for this past fall but which, according to Blackinton, was put off by the city until fiscal 1985.

January 10, 1985, READER Crime visits Balboa Park, by Gordon Smith.

Intriguingly, a comparison of the number of car thefts and break-ins in Balboa Park with those in New York's Central Park suggests the best way to eliminate most of the crime in Balboa Park is to eliminate the cars themselves. There are few parking lots in Central Park, and most of its visitors arrive via mass transit of some kind --- bus, subway or taxi. In the first nine months of 1984, just six cars were stolen there --- compared to one hundred stolen in Balboa Park. There were also 594 car break-ins in Balboa Park during the same period. (No equivalent figures for Central Park were available, but grand theft, a category of crime which includes many car break-ins is more prevalent in Balboa Park than in Central Park.

Various consultants hired by the city have long advocated getting rid of cars in the middle of Balboa Park, and the above statistics suggest the possibility that the park could end its chronic congestion and parking problems as well as much of its crime simply by banning automobiles.

It's generally felt by the city and local Balboa Park supporters that replacing the House of Hospitality and the House of Charm is a much wiser course than trying to prop up the troubled buildings continually.

February 27, 1985, San Diego Union, B-1. San Diego Zoo fearful of cutbacks if tax is killed, by Daniel C. Carson.

Sacramento - A deputy director of the San Diego Zoo says the institution risks personnel and program cutbacks and admission fee increases if a special voter-approved zoo property tax is wiped off the books by the courts or the Legislature.

Word of that "contingency plan" came in a telephone interview with Richard Binford, the zoo's deputy director for finances and administration. While zoo officials are trying to interest lawmakers in efforts to preserve the zoo tax, they are already bracing for the loss of roughly \$1.5 million a year.

While the fall zoo budget is \$45 million, Binford said, "we'll have to scramble," if the special tax is wiped out as being out of compliance with the 1978-tax-cut Proposition 13.

An appeal to the city to replace the funds had been virtually ruled out.

Educational programs might be affected by the financial loss, he said, and some breeding programs to foster endangered species "might be put on the back burner. We would have to recover part in price increases. We would make some cutbacks in personnel."

Members of the San Diego County legislative delegation, who gathered yesterday for breakfast, were urged to fight to keep the zoo tax. "We're appealing to members of both house," said San Diego city lobbyist John Witzel. "It's a lot (of money) to the zoo."

The object of Witzel's concern is SB 149 by Sen. Milton Marks, R-San Francisco. The bill's main impact would be to prevent cities from exploiting a so-called loophole in Proposition 13 by a court case to raise their property taxes above the limits set by the 1978 Jarvis-Gann initiative.

The object of the bill is to prevent those localities from imposing tax increases amounting to hundreds of millions of dollars, ostensibly to pay for employee pension plans.

The Marks bill would spell out a narrow definition of debt that excludes pensions. It also excludes any extra property taxes to pay for ongoing local government activities --- such as the zoo.

March 1, 1985, San Diego Tribune, A-1, A-20. Park Crime: slaying of Old Globe actor David Huffman stirs concern, by Joe Hughes.

Capt. Winston Yetta, head of the Police Department's Central Division, said: "Because of its geographical location, the park is very difficult to patrol. We have looked at statistical information that shows us where the problems are located. Those are the areas we are going into."

March 5, 1985, San Diego Tribune, B-1. Balboa Park patrols capture interest of citizens, police, by Ann Levin.

March 5, 1985, San Diego Union, B-3. Move to kill Zoo support tax fading, by Daniel C. Carson.

The threat of state legislation that would invalidate a special property tax supporting the San Diego Zoo has faded, although the courts still may upset the 50-year-old levy.

March 6, 1985, San Diego Union, B-6. EDITORIAL: Making the park safe.

But merely providing additional police or park rangers won't rid the park of crime. Another imperative is for the City Council to enact several security measures recommended in the Balboa Park Master Plan. That plan is still ensnared in City Hall red tape and cannot be adopted before fall. But the council should immediately implement its recommendations to increase area lighting, to eliminate unnecessary side roads that lead to "cruising," and trim or remove dense vegetation that provides cover for lurking criminals.

March 7, 1985, San Diego Tribune, B-12. EDITORIAL: What to do about park crime.

Justice must be swift and certain. That would make a real difference. It wouldn't just be window dressing.

March 7, 1985, San Diego Union, B-3. San Diegans, Inc. sees park, plaza link by mall as downtown attraction, by Terry L. Colvin.

Creation of the so-called "arts district" would be financed by increasing the city's hotel-motel room tax by a penny.

March 7, 1985, San Diego Union, B-3. California senate panel moves to save tax for Zoo; does tax violate Proposition 13?

Sen. William Craven, R-Oceanside, won unanimous approval for an amendment to a property-tax-related bill by Sen. Milton Marks, R-San Francisco, that would have eliminated the zoo tax which generates about \$1.5 million a year.

March 11, 1985, San Diego Union, B-2. Thursday Club ousted from Conference Building; hosts party to get auto museum rolling, by Pam Drake.

Amidst several vintage autos, about 50 curious passers-by and a marching bagpiper, the philanthropic club welcomed the museum to its new home. The building will be renovated with private funds and the museum should open by the end of the year, according to Reid Carroll, president of the museum's coordination committee and a reporter for KFMB Radio.

March 12, 1985, San Diego Tribune, B-1, B-10. "Diamond Edge" plan mapped for Zoo, Animal Park, by Rita Calvano.

The San Diego Zoo and the Wild Animal Park have received their official blueprints for the future, all aimed at making them so attractive people will visit them repeatedly, which will ensure the Zoological Society of San Diego the money it needs to operate the popular attractions.

The new plan, approved unanimously yesterday by the society board, means visitors "will come to a zoo, whether it's the zoo or Wild Animal Park, that is unique and fresh and brings them the very most-up-to-date approach in the exhibiting of animals and plant species," said society president Sheldon Campbell.

Called the "Diamond Edge" plan because it provides an agenda through the zoo's 75th anniversary in 1991, its key goals are to provide a rich educational experience for visitors and improved environments for animals to encourage breeding, especially of endangered species.

All of that takes lots of money, Campbell said, noting the operating budgets for the zoo and park now total nearly \$50 million.

He said visitor money from newcomers or repeat visitors is critical to staying in business.

He added that the need for a master plan, the first in the zoo's 69-year history, arose from success.

"It's the largest and most successful zoo operation in the world," he said, basing his remarks on extensive travels. Smaller organizations "can fly by the seat of their pants . . . on a month-to-month basis," he said. "But an organization the size of this one requires you to project your plan out further."

Particular emphasis will be placed on the Wild Animal Park in San Pasqual Valley to make it self-supporting by 1987. So far, with the exception of one year, the park has spent more than it has received in revenues and since its opening in 1972 has had to be partially supported by the zoo to the tune of nearly \$21 million.

Here's what's in store because of the new plan, some of which has been phased in already or will be in the next couple of weeks. Other parts will be built as money is raised to finance extensive new construction projects.

- "Close Encounters" at the Wild Animal Park will begin March 30 and allow visitors a chance to meet the gorillas or elephants individually in their bedrooms or barns. Included in the price of admission for adults and children, "Close Encounters" is an attempt to make the Wild Animal Park more personal for visitors.
- More graphics at the zoo and the park, more films and opportunities to talk with the keepers to find out about their work and the animals.
- More bluegrass music and ballad concerts at the park instead of rock groups that have performed in the past, to draw families to the attractions.
- An end to the \$2 concert fee, begun last year, but stopped amid protests from any society members. The \$1 parking fee at the park will continue. A proposed parking fee at the zoo is still under study by the city.
- A major change of exhibits at the zoo in which animals will be placed in settings similar to their native environments. Animals of the same region will be mixed together, not separated by species. As a result, the animals will have more room and may behave more as they would in the wild.

Through the exhibits, graphics and other means, visitors to the zoo will be able to better understand the ecology of plant, animal and human life.

Some animals are still in cages at the zoo and exhibited according to species --- as in Dog and Cat Canyon.

Despite its financial difficulties and too few visitors, the Wild Animal Park is still considered a success in two important ways --- propagation of endangered species, the purpose for which it was opened in 1972; and providing spacious grounds for animals to roam.

However, the public has had little opportunity to see how the Wild Animal Park works to protect and propagate these animals.

One of the park's greater accomplishments has been the raising of baby California condors, as the zoological society participates in a program it hopes will save the birds from extinction.

But the condor project perhaps best illustrates the important work done at the park and also the disadvantage to visitors, who by necessity are kept away from the birds. Scientists hope to release the condors to the wild when they grow strong enough and therefore keep them out of sight of humans, if possible, so that they can survive in the wild.

March 12, 1985, San Diego Union, B-1, B-7. Zoo trustees okay "Diamond Edge: five-year plan, by Gina Lubrano.

Trustees of the Zoological Society of San Diego yesterday approved a five-year strategy plan that will guide operations of the Zoo in Balboa Park and the Wild Animal Park in San Pasqual for the next five years.

The plan is called "Diamond Edge" because it will take the 69-year-old society to its diamond, or 75th anniversary in 1991. Implementation will begin immediately.

The plan for the first time places an emphasis on plants. In the past, the focus has been on animals and plants have been an afterthought, a Zoo spokesman said.

The plan addresses five key areas: a comprehensive plan to integrate animals, plants and facilities, making the Wild Animal Park self-sustaining; make the zoological organization more responsive to its operating environment; increasing revenues; and improving the visitor experience.

"It is important here to note that the strategic plan did not begin as a reaction to any internal difficulties," said Sheldon Campbell, president of the society. "From the start, it was wholly an initiative on the part of the staff and trustees who during a period of 69 years, have, with the good will of the media and the community, built the largest and most successful zoo operation in history.

"That's a staggering statement, but it's true. The very success of the organization created the need for a long-range plan that would perpetuate it."

Campbell said the "Diamond Edge" name was selected because the plans calls for the society to maintain the "edge that our institution has had as far as the zoological world is concerned."

Diamond Edge is the first long-range plan developed for the society and for the first time defines a mission for the two parks. At present, the society's bylaws define the goals of the parks as conservation, education, recreation and research.

The society, according to the new plan, "is dedicated to increasing understanding and appreciation of all life-forms by exhibiting animals and plants in natural settings and applying its efforts and influence to the conservation of the earth's wildlife."

The plan recognizes that the Wild Animal Park will continue to be dependent on the Zoo for another two years but should be able to pay its own bills by 1987. Since it opened in 1972, the park has received \$20.8 million in subsidies from the Zoo.

Work on the 118-page plan began on March 22, 1984. Before it was completed, it was worked on by 110 employees, trustees and other volunteers. Trustees saw the completed document for the first time on February 23 and approved it, with minor changes in wording at a meeting yesterday.

The nucleus group that prepared the plan, in addition to Campbell, included Charles Bieler, executive director emeritus; Dr. Kurt Benirschke, director of research; Richard Binford, deputy director of finance; and Zoological Society trustee Dallas Clark.

Other members are horticulturist Chuck Coburn; Dr. James Dolan, curator of mammals; Pegi Harvey, director of education; Wild Animal Park general manager Robert McClure; Doug Myers, executive director of the Zoological Society; Jim Oosterhuis, head veterinarian at the park; David Rice, director of architecture; Carole Towne, director of public relations and marketing; society trustee Betty Joe Williams; and Zoo general manager Terry Winnick.

March 13, 1985, San Diego Tribune, B-10. EDITORIAL: Balboa Park needs auto museum.

An auto museum in Balboa Park is bound to be a big attraction. The park should have something for all of us, and old cars, as well as airplanes, are important to a large part of the population.

March 13, 1985, San Diego Union, C-5. Old Globe Theater broke ground for Davies Outdoor Theater yesterday, by Anne Marie Welsh.

March 17, 1985, San Diego Union, C-3. Fellowship is their reward for volunteering to serve in the House of Nations (House of Pacific Relations), by Willard Edwards.

March 17, 1985, San Diego Union, C-3. Zoo becomes hot bed for Komodo dragons, by Deborah Yaeger.

If all else fails to improve a lizard's love life, try a waterbed.

March 17, 1985, San Diego Union, F-53. A reading of palm trees in California, by Robert W. Chapman.

March 19, 1985, San Diego Union, B-11. It's time to take back park from criminals, by Richard J. Hanscom, Municipal Court Judge.

The plight of the park is something San Diego can and must deal with. Events in other cities show what can happen when lawlessness is allowed to encroach on part of a city. People will avoid the area and soon this abandonment leads to more crime. These who care nothing about the rights of others become more brazen and crime increases. When transients and criminals are tolerated, shameful urban decay has begun.

March 20, 1985, San Diego Tribune, B-11. Non-profit oligarchies --- Zoological Society, Museum of Art, La Jolla Museum of Contemporary Art, Natural History Museum; same board members show up term after term, by Herbert Fredman.

At a time when our national government is highly critical of many countries where elections are charades, it's too bad that here in San Diego, in the land of the free and the home of the brave, we are busy concocting tricky legal schemes to deny the vote to those who should be entitled to it.

March 21, 1985, San Diego Tribune, B-3. Central Balboa Park Association seeks more safety for Balboa Park.

(City Manager Blair's office) is expected to develop an anti-crime strategy for Balboa Park and Mission Bay Park, including patrols by unsworn personnel.

March 22, 1985, San Diego Tribune, B-10. EDITORIAL: Let members run museums, Zoo.

In this era of higher costs, the museums and the zoo face a bigger fiscal challenge than ever. To meet that challenge and to thrive, they must be responsive to their members. Democracy will inject new vigor into our cultural institutions.

March 24, 1984, San Diego Union, F-14. Hal Sadler, architect, tells five-year plan for downtown.

Sadler's plan suggests creation of "Center City, including Balboa Park, as a cultural center and arts district; appropriate transition to a 21st century integrated transportation, circulation and parking system; all types of housing to serve Center City, and improvement of the physical environment on downtown streets."

April 1, 1985, San Diego Tribune, B-6. Letter, Auto museum site hits sports groups, by David Freifelder.

I would like to correct a serious error in your March 13 editorial about the newly planned auto museum in Balboa Park. I do not want to raise the question about whether San Diegans really need an antique auto museum as your article stated (I do have an opinion) but rather to comment on the proposed site of the museum.

In your article you stated " . . . the Conference Building, now used for events only about 38 days a year, seems the perfect place." This number is quite wrong.

The Conference Building is in use nearly 300 days per year by a variety of groups. It has been the home of the San Diego Table Tennis Club for, I believe, 24 years. This club, which has more than 500 members, has been producing nationally ranked players much of this time and sponsors play five nights a week, year-round. One night a week a local tournament is held in the Conference Building.

Tournaments sponsored by the U.S. Table Tennis Association and open to players throughout the United States and the world are also held several times a year.

The building is also the home for an important group consisting of several hundred handicapped San Diegans. Two nights a week for the past two years the handicapped play indoor field hockey.

These people have a great time and certainly know the Conference Building as their home.

The 38 days referred to in your editorial undoubtedly applies to weekend events, such as dart tournaments, dancing, rummage sales, etc. Since the table-tennis group and the handicapped use the building regularly for 260 days per year, *The Tribune* should have stated more correctly that "since the Conference Building is in use for 298 days per year, and on a regular basis by about 700 people, the Conference Building does not seem to be the appropriate place for the museum."

As a relative newcomer to San Diego, I have been continually impressed with the extraordinary athletic facilities provided by the city for its variety of citizens. To me, this contributes significantly to the "Finest City" image and should not be changed.

I have heard that the Parks and Recreation Board is trying to find usable facilities for the various groups that will be displaced by the potential conversion of the Conference Building to an auto museum. They should be commended. I hope, though, that a new place will be found before the eviction notice comes and that the City Council recognizes that facilities now in use by nearly 1,000 San Diegans have immediate value, neither tourists nor San Diegans will be left out by a delay in setting up the museum.

April 2, 1985, San Diego Tribune, B-6. EDITORIAL: Milestone for Children's Museum.

We hope the Children's Museum finds a permanent home in Balboa Park or downtown.

April 11, 1985, San Diego Tribune, A-1, A-6, A-7. Twelve trustees mold future of Zoo, by Ann Levin (photos of trustees).

The people who have served as trustees of the San Diego Zoological Society loom large in the city's history.

They erected skyscrapers, courted commerce and industry, shaped public policy, raised millions for charity, nurtured the arts.

Then they were rewarded with what many consider the city's ultimate plum --- a seat on the zoo board. While older Northeastern cities flaunt prestigious opera and museum societies, San Diego --- young, exuberant and outdoorsy --- loves its zoo.

The volunteer work is demanding. Dinner jackets and evening gowns collect no dust in their closets. Lengthy board meetings supplant quiet evenings at home.

Not that the job lacks perks. In their official capacities, some have met the Duke of Edinburgh, petted a giant panda at a Chinese game reserve, drank free champagne on international flights.

Who are these people that set policy for a 100,000 plus member society and allocate pieces of a \$50 million pie?

Their average age is 63. Most are millionaires.

The Tribune, in an effort to shed light on the inner workings of a very private society, requested and received interviews with 11 of the board's 12 voting members, as well as several trustees emeriti.

The Zoological Society of San Diego was incorporated as a non-profit organization in 1916 by founder Harry M. Wegeforth, known simply as "Dr. Harry." A man who spent his boyhood in Baltimore as ringmaster of a backyard circus --- built from candy animals, cigar-box wagons and a bigtop tent made from four sacks --- Dr. Harry harbored secret dreams as a youth of being a circus high-wire walker.

If the frustrated showman were alive today, ironically enough he would hear zoo critics say his 69-year old stationary ark is fast becoming a stationary circus.

Complaints are voiced privately that management has neglected the society's slated goals of conservation and education in favor of theme park entertainment.

Eventually, the buck stops in the zoo's board room where an elite group meets once a month beneath an artist's interpretation of an African village to carry forward Dr. Harry's dream.

In addition, trustees lead 10 individual committees composed of about 150 community volunteers, who advise the board on every aspect of the society's operations.

To arrive at the board, one starts off on a committee. The waiting lists are long.

Betty Jo Williams, the board's only woman and one of three female trustees in the society's history, joined the board in 1979 after a stint on the membership committee.

A past president of the Junior League, former director of the Natural History Museum and major fund-raiser for her alma mater Stanford University, Williams knows volunteer work.

"It's great fun. If by volunteering you can't have fun, move on," said the Point Loma housewife who assists her stockbroker husband, Harold, with his Old Globe Theater fund-raisers.

Though some zoo committee chairmanships are rotated every year, Williams has headed the education committee for six years. She is most proud of the zoo's long-standing policy to admit all city school second-graders to the zoo for free.

Joining her regularly at her committee meetings is colleague Robert Sullivan, the oldest voting trustee at age 72. He has seen the fruits of the zoo's education efforts. "My little grandson is proud to tell me that a koala is not a bear, it's a marsupial."

Sullivan chairs the membership committee where he often runs afoul of colleagues and zoo officials unhappy with gate and concession receipts.

Sullivan rankles at their suggestion that paid-up members, admitted free on a variety of annual or life-membership plans, drain the zoo's resources when they make frequent visits, picnic hampers in tow.

"More power to bigger memberships," Sullivan counters.

The board has always needed money, he points out, especially in the midst of the Depression when bankers were wary of loaning the zoo essential money for survival.

“We did not have any collateral except animals. Bankers take a dim view of loaning money on a rhinoceros.”

During the 1930s the society boosted the number of directors from nine to 12 --- picking a banker, lawyer and newspaper publisher --- to widen its influence in the community.

Says Sullivan, “The board was always selected from people who were successful in their field of business and endeavor, because the zoo needed help in finance, business. . . . If you ever had to pay those fellas what they have been worth on the zoo board each year, it would be millions of dollars.”

Next year, Sullivan will have served on the board 50 years --- but has mixed emotions about retirement. While acknowledging that the board is in need of new blood, he hates to say goodbye to an old friend.

“It gets to be so much a part of your life that what do you do without it?”

Formerly in the lumber business, Sullivan has served on the San Diego Civic Light Opera, Great American First Savings Bank and the Old Globe Theater boards. The prestige now associated with membership on the zoo board is a fairly new phenomenon, he said. In the beginning “Nobody seemed to care. They just knew there was a roar in Balboa Park.”

Sheldon Campbell, current zoological society president, was attracted to the roar at an early age.

Campbell spent his 16th summer as an assistant to the reptile keeper, scrubbing the backs of turtles to keep them algae-free. For his labors he received a rattleskin from which he fashioned a belt --- but the real payoff came later.

That summer he worked closely with his friend, the late Chuck Shaw. Shaw later became the zoo’s reptile curator, and in 1962 angles to get his old friend appointed to the zoo’s public relations committee.

Campbell, then a stockbroker and writer, organized the zoo’s golden anniversary celebration with such zest he was asked to join the board when a vacancy arose in 1968.

“Being on a zoo committee was seen by most San Diegans as one of the most desirable volunteer tasks you can undertake. The zoo was to San Diego what a symphony or an opera might be to another city.”

In 1978, flying home from Paris in the economy-class section, Campbell encountered a steward who noted the zoological society insignia on Campbell’s jacket. Delighted to meet a representative of the world-class zoo, the steward kept Campbell’s glass full of complimentary champagne from the first-class pantry for the rest of the flight.

Campbell deftly deflects criticism of the zoo, proudly stating the zoo pumps \$250 million into the local economy. Problems will be solved, he says, with the unfolding of the zoo’s “Diamond Edge Plan,” a five-year plan names in anticipation of the zoo’s 75th anniversary.

About a number of recent *Tribune* articles based on U.S. Department of Agriculture inspection reports reporting deficiencies in the zoo’s sea lion tanks and large cat and bear housing, Campbell says the stories “left out factual material.”

Trustees were aware of the problems, he says, and improvements were already in the works before the articles were published. “We’ll get it changed. It’s just a continual struggle,” he vows.

Nevertheless Campbell says some trustees responded with “indignation to the newspaper reports.” The zoo is not used to that. We’re used to a good press. We’ve created the largest and most successful zoo operation in the world due to the climate, the people of San Diego and the media. The media have contributed greatly.”

Wegeforth’s society was incorporated one drizzly September day in 1916 in the offices of a San Diego newspaper in what was to be the first of many fruitful collaborations with the press.

Dr. Harry had convinced Clarence McGrew, and editor of *The San Diego Union*, to publish a plea to start a zoological society. The day before, while traversing Balboa Park with his brother, Dr. Harry had overheard the roar of a lion on display at an exposition and remarked, “Wouldn’t it be splendid if San Diego had a zoo? . . . I think I’ll start one.”

The first animals Wegeforth adopted were the leftover lions, monkeys and bears from the 1916 Panama-California International Exposition. The next year, the zoo received animals from a beached Hollywood production about Noah’s Ark.

In its early years, inventory swelled by trading rattlesnakes and sea lions, readily available in Southern California. San Diegans would bring wild rabbits, bobcats, skunks and mountain lions from the countryside.

In 1924, a youthful Ivor de Kirby, destined to become a trustee, bought an \$8 donkey with his brother, but after the braying disturbed neighbors, the brothers donated the beast to the zoo for rides.

Sailors supplied the society’s first Kodiak bears. After the bear grotto was full, Dr. Harry orders the surplus bears butchered and the meat sold to hotels.

Though today’s zoo fans might condemn such a facile solution, his son, Milton, a board member for 40 years and now a trustee emeritus, explains, “I don’t think there was any concern in the preservation of wildlife up to 1941,” the year the elder Wegeforth died.

During the zoo’s early days, when a payroll couldn’t be met, the newspaper would announce the feeding of a boa constrictor. Dr. Harry would charge a 10 cents admission to watch sailors stretch out a long snake, insert a hose down its throat, hook up a sausage grinder and grind it full of food.

The shows were popular. The payrolls were met. The zoo always had a friend in the media.

Howard Chernoff, a former newspaper reporter, editor, television executive and now zoo trustee emeritus, joined the board in 1952, having served earlier on the public relations committee.

He lost no time pressing for one of then-director Dr. Charles Schroeder’s pet projects --- a children’s zoo.

His colleagues received the idea coolly, but the patient and persistent Chernoff resolved to persuade them. With his wife, Melva, he traveled 20,000 miles through the United States to find out what a children’s zoo should look like. Back home, it took 18 months to raise the money.

Chernoff took baby animals from the zoo on the lunch and dinner fund-raising circuit as part of his sales pitch.

“When a 6-year old looks at an elephant, he might as well look at the Empire State Building,” Chernoff recalls explaining to skeptics.

Chernoff took emeritus status in 1969 after he was asked to be U.S. ambassador to Japan’s Expo 70. That experience kicked off 11 years of intricate negotiations to obtain a pair of rare Manchurian cranes.

Through business contacts in the South Pacific, Chernoff became personal friends with the King of Tonga, from whom he acquired a pair of Tongan iguanas --- three-foot long lizards.

Explains Chernoff, with a twinkle in his blue eyes, "I asked the king. He said, 'Sure.' He got us the iguanas then he came here to see them."

Chernoff, in his 80s, says the board would benefit from younger members --- and more women. He suggests conferring emeritus status at age 65 instead of 75.

When Chernoff was KFMB Channel 8 general manager in the 1950s, he asked station manager Bill Fox to produce "Zoorama," a weekly program filmed at the zoo and syndicated on some 200 independent stations around the country during the 1950s and 1960s. Aired in Europe, Japan and Africa, it has been credited by zoo officials with putting the San Diego Zoo on the map.

After six years of show production, Fox was invited to join the zoo's public relations committee. In 1978, Fox replaced trustee Lucy Killea, the society's second female board member. Killea, now in the California Assembly, left the board for the San Diego City Council.

Fox, now general manager of KCST Channel 39, tapped newspaper, radio, advertising and retail talent to serve on the public relations committee, which he chairs. Channel 39 recently started airing "Animal Express," a show featuring zoo goodwill ambassador Joan Embury and zoo animals.

Aware of intense competition from other entertainment, Fox, 58, produced the packaging of exciting experiences to keep visitors returning to the zoo and Wild Animal Park.

"There was a time when there was a zoo in San Diego and there was not a lot of competition. The zoo lived on its reputation and people went there because it was there. Not anymore. For the last 15 years competition for leisure time has been growing."

Lt. Gen. Victor "Brute" Krulak, former newspaper executive, agrees. Says the retired U.S. Marine Corps officer, "There's no doubt that Southern California is becoming a more recreation-intensive locality with every passing year."

A board member since 1968, Krulak, 70, was reluctant to express his individual opinions about zoo business.

"The zoo should speak with a sold voice. That's how we stick together. That's how we get on so well. That's way we're a success story."

Krulak logs about nine hours a week as chair of the zoo's buildings and grounds committee and vice-chair of the finance committee. He dismisses the notion that the board membership is "glamorous" preferring to call it hard work. He adds, "The zoo has always been like motherhood in San Diego."

Formerly a vice president of Copley Press, Inc., Krulak still writes an opinion column in *The Tribune*. Active in civic affairs, he has served on about 45 local and national boards.

His favorite zoo creature is the koala. "Koalas are very dear to this zoo and they've always been very dear to me. And they belong here. They eat only one thing --- eucalyptus. That means they're in Fat City in San Diego.

Though local board members have diverse backgrounds, they have been criticized for a lack of botanical and zoological expertise. Some zoo employees say trustees reject the advice of expert professional staff, interfere with day-to-day decisions, commit money to impractical projects and play favorites among the staff.

The board also has come under fire for a “good old boy” system of director selection, resulting in few women and no minorities in its history.

One employee said some committee members are appointed, not because they have a specialty valuable to the committee, but because they are a friend of the chairman or other official.

Recently, the board was criticized by Herbert Fredman, *Tribune* op-ed columnist, who accused it of operating a “non-profit oligarchy.” Fredman argued that because the zoo receives \$1.5 million in annual city taxes, and, like all tax-exempt organizations is subsidized by other taxpayers, it should be accountable to the public.

Indeed, some of the board’s unilateral actions, such as the decision to destroy eucalyptus trees in the Balboa Park parking lots, have enraged local citizens. Another storm of protest erupted when the zoo announced --- and later delayed --- plans to charge parking fees in the same city-owned lots. A parking fee was instituted at the Wild Animal Park.

And some trustees say privately that San Diego’s changing demographics should be examined in selecting future board members. But publicly, they say their dazzling successes have been achieved because they have operated in private, free from the compromises required when negotiating for public money.

Trustee Ivor de Kirby, 69, made his fortune in cars. A former city councilman and longtime Ford dealer, de Kirby was admitted to the zoo board in 1966. He was named Mr. San Diego four years later.

A childhood friend of the Wegeforths, who donated his pet donkey to the zoo for rides, de Kirby ingested zoo talk with dinner as a guest in Dr. Harry’s home.

Chair of the animal park’s buildings and grounds committee, de Kirby admits the park’s “obscure” location next to Escondido worries him.

But with bullish optimism, he says improved signs, more advertising and a good road between Interstate 5 and the park will draw enough tourists from San Diego, Orange and San Bernardino counties to keep the breeding park alive.

De Kirby opposes further government aid to the society because of the strings it would attach.

He was among a group of 15 who took former zoo director Schroeder on a five-week trip to the African wild as a retirement present.

And he traveled with a delegation to Australia in 1976 to pick up six koalas, a gift from that country. En route, the cuddly marsupials dined on eucalyptus leaves and rode in the airplane’s passenger section from which seats had been removed to accommodate the bulky cages. During layovers, the koalas napped with the delegation at fancy hotels.

Another driving businessman is trustee A. Eugene Trepte, 59, president of one of San Diego’s larger and older construction firms.

Trepte built the Old Globe Theater, a pioneer solar system at University High School, a surgical wing for Children’s Hospital, and, at the request of the Tom and Suzanne Warner family, the zoo’s \$1.9 million Warner Administration Building two years ago.

Chair of the finance committee, Trepte says of the board. “Those 12 seats are very precious. We have always rowed the boat well together. . . . We have come to the realization that we are not going to think alike, and when the majority rules, we shut up.”

Trepte also sits on the Old Globe Theater, San Diego Trust and Savings Bank and University of San Diego boards.

A strong backer of the Wild Animal Park, Trepte considers it “the zoo of the future” as San Diego County continues its expansion north.

Limited parking in Balboa Park will hold zoo attendance at about 3 million annually for years to come, he guesses.

Although a parking structure has been discussed, the builder says he doesn’t think it likely.

Noting the public has fought to leave as much greenery as possible in the park, Trepte says, “I kind of go along with them.”

Trustee John Thornton, 53, ranks among the city’s top businessmen. The only member of the board who refused to be interviewed by *The Tribune*, Thornton recently resigned from Wavetek Corp., which had named him president and chief executive officer at age 32.

He earned a reputation as “boy wonder” for turning a small \$1-million-a-year instrumentation firm into an \$84 million company in 20 years.

Thornton joined the board in 1972, after serving on the public relations committee more than 10 years. In a deposition taken last year when the zoological society was sued, Thornton admitted the directors and top executives lack zoological backgrounds.

“What I would loosely call the technicians, the people with the animal skills, didn’t necessarily have some of the other skills, and that’s why there frankly are very few if any with curatorial or animal skills in the administrative segment of the business.”

Though trustees lack professional credentials in botany and zoology, as a group they dote on animals and tend lush gardens.

Dr. Harry kept turkeys, chickens and blue-ribbon stock on his 10-acre Paradise Valley ranch. One day he took some ranch bantam hens to the zoo because “the little children could care less about a tiger or an elephant, but they liked to chase the animals,” explains Milton Wegeforth.

Dr. Harry experimented with official fund-raising tricks. One he went to a businessman for help in efforts to buy an elephant. The man replied, “If you find me a white elephant, I’ll give you the money.” Wegeforth whitewashed an elephant and got the money.

Wegeforth’s successor, Belle Benchley, matched him in spirit. Though called an executive secretary, in fact, she ran the zoo from 1927 until 1953, blazing a trail as the first zoo director to keep leaf-eating monkeys alive in captivity. Her secret --- feed them alfalfa.

Benchley adored Mbongo and Ngagi, two male mountain gorillas, now cast in bronze inside the zoo’s gates. The pair was captured in the Belgian Congo in the 1930s by the husband-and-wife exploring team of Martin and Osa Johnson, who donated them to the zoo.

Benchley once barred cub reporter Sheldon Campbell from entering the zoo after his newspaper, the now-defunct *San Diego Sun*, ran a photograph of Ringling Bros. Circus gorilla Gargantua next to a Campbell story on the popular pair.

Benchley said the zoo was a public trust. When Schroeder, a veterinarian employed as a production manager of New York’s Lederle Laboratories, replaced her in 1953, she gave him one piece of advice. “Just keep in mind this is not a business.”

“This is a business,” Schroeder later recalled in an interview. “I immediately instituted all the things you would do in a business right away. We used to say at the zoo that you have a product and your concern is selling. It’s a continuous thing, money, money, money. You have to be very cold, very practical.”

The first thing the new director did was to buy a mechanical sweeper and a Dictaphone.

The debate between public trust versus the bottom line has raged ever since, as the society has grown from 41 members in 1917 to its present strength of 102,795.

Trustee Dr. Albert Anderson, 61, admits that when he joined the board four years ago, succeeding Milton Wegeforth, he thought a little more commercialism was the way to go. He has since changed his mind.

“I’m probably not quite as conservative as possibly some of the other board members and I was very interested in corporate programs and interested in some things which I felt would bring more people in. When I first went on the board, I felt that maybe we should be more like a Disneyland, doing some exciting things. Now I have learned that this is not what people really want. They want animals.”

A dentist, board member of Children’s Hospital, Mr. San Diego of 1981, past president of the Convention and Visitors Bureau, member of the Stadium Authority, vice president of President Reagan’s Committee on Mental Retardation, and former campaign manager of Sen. Pete Wilson’s mayoral and U.S. Senate campaigns, Anderson says, “I’m a social prostitute. I just enjoy doing it.”

He was asked to serve on the board by two-term president George Gildred. Before joining he had served on the public relations committee about five years.

On a zoo’s trustee’s perks, Anderson mused, “We got to meet the queen’s husband . . . I travel a lot in Europe and whenever I do I always take my zoo cards with me, like a business card, if I visit any of the zoos around the world. It just gives us an entree that is sensational. It’s like a big fraternity. They minute you say you’re from the San Diego Zoo, they want you to come and see their best exhibits, the back of the zoo.”

If Anderson is a civic star, trustee Gildred shines as brightly.

Gildred, 51, remembers as a land hearing zoo howls from the family’s Cypress Avenue house. His father, the late Philip Gildred, built the downtown Fox Theater and backed other projects --- the Community Concourse --- Anza-Borrego State Park and the county administration building. The elder Gildreds donated a half-million dollars to build the Fine Arts Gallery east wing.

George, now in a real-estate partnership with his brother, joined the board in 1973 after serving for years on the animal collection committee.

His three-page resume lists associations with more than 35 cultural and civic boards, including consul to the Republic of Chile, a post he inherited from his father.

In 1982 Gildred, then society president, joined a 13-member delegation on a visit to five Chinese cities, clearing the way for the subsequent arrival in San Diego of China’s golden-haired douc langur monkeys.

In a zoo near a giant panda game reserve in the Szechwan Province, Gildred and others were paid a great complement --- keepers led a 13-month-old panda into a public area and let the U.S. visitors pet the rare animal.

One of the board's youngest members, Gildred bubbles with enthusiasm when he talks of the golden monkey exchange --- "more important than letting the pandas out" --- or his dusk excursions on the Wild Animal Park monorail or the antics of his "dear friend" Kakowitz, a pygmy chimpanzee who died five years ago.

"He was such a wonderful father. I loved watching his tribe grow up around him. He was an ideal family man."

From Gildred's 20th-floor office in the sleek, modern Imperial Bank building downtown, it is two blocks to the old-fashioned San Diego Trust and Savings building, where trustee J. Dallas Clark works on the 10th floor. Clark's grandfather founded San Diego Trust and Savings Bank in 1889.

Clark, an industrial developer, became a trustee in 1969 after having served on the buildings and grounds committee for 11 years.

His small office is decorated with a portrait of an African Masai woman, animal sculptures from the zoo gift shop and a painting done by one of his two daughters, an artist who paints botanical subjects.

On his desk is a large photograph of one daughter clutching his new grandchild. Clark is tall, soft-spoken, methodical. Freckles dot his balding sunburned scalp, fringed with white hair.

In the early 1970s, Clark started the development --- or fund-raising --- department --- an activity that "you're just always doing."

He chairs the animal collection committee. It is typical, he says, for trustees to attend meetings of committees other than their own. When Trepte's finance committee meets, for instance, in addition to its three board members, five others are likely to attend.

"I've never known a board with such unanimity as this one."

Clark laughs at the suggestion a trusteeship is glamorous or prestigious. "Maybe I'm kind of low-key, but I don't go for that. It's hard work."

What does he find exciting in 1975. Clark visited the Canton Zoo with a delegation that included mammals curator Dr. Jim Dolan. They passed by an enclosure for two rhinoceros given to the Chinese by zoo officials. When the beats heard Dolan speaking English, they trotted over to see him. Dolan reached out and stroked their scaly hides.

"And that's a sight I don't think any of us will forget --- this one rhinoceros running over and Dr. Dolan patted his head!"

Heading up the research, conservation and health committee is Dr. Lee S. Monroe, a retired Scripps Clinic internist and author of several books on parasitic diseases.

He was drafted for the committee about 10 years ago because of his medical knowledge and appointed to the board about five years later. His committee meets once a month with about 12 zoo staff members. "It's fun, but it's some work. They have more meetings at the zoo than Carter has pills."

Monroe, 65, notes the zoo's contributions to animal-disease research --- including a project to study a virus killing African cattle and another to design a hormone pump to increase the reproductive abilities of an endangered Komodo lizard.

But Monroe warns than panic at the current financial squeeze could backfire. He cautions against luring visitors with flashy new programs of marketing. Instead management should "have a steady hand on the wheel and not get too excited." He says the zoo's natural attractions will suffice.

Monroe vehemently opposes any more government aid to the zoo. He dismisses the current 2-cent tax levy, saying it "really doesn't even pay the water bill.

"The thrust should be toward making this a San Diego Zoo that is run for and by the people, with their money."

These trustees have seen changes in animal husbandry unimaginable to the zoo's founders --- the disappearance from the wild of hundreds of species, forcing zoos to rely on expensive breeding programs, restrictions on animal trade since passage of the 1972 Endangered Species Act, sky-high prices for animals once donated to the zoo, unstable political situations in the rest of the world hampering certain animal exchanges.

Furthermore, the environmental movement of the last two decades has caused people to view animals with greater reverence --- as links in a complicated and vast network that ultimately supports man. Meanwhile, advances in science have revealed animals' complex physical and psychological needs.

Back in the days when Wegforth patrolled the zoo's chaparral-covered 100 acres o his Arabian stallion, ""people weren't as considerate toward animals," Campbell admits.

Now, some zoo keepers with advanced degrees in animal behavior and the sciences assail the board and the administration for lack of scientific training.

They dismiss the board as a rich man's social club, while envying its power.

Trustees admit the board's power is awesome, even compared to other boards on which they have served.

Says Fox, "The society board is so involved in the operation that we are not an advisory board, we're like the board of directors of a major corporation that makes the decisions."

Says Anderson, comparing the zoo board to the Stadium Authority, "I don't think the Stadium Authority is as important as . . . the zoo board. The stadium authority is advisory. On a number of occasions where the stadium board has voted in favor of things, the city council has overridden them."

The city council does not override the zoo.

Those who wonder in what direction the zoo is headed might recall the answer to the question about where a 10,000-lb. elephant sleeps --- anywhere it wants.

Says president Campbell, noting the zoo's multimillion-dollar needs, "There's an old Chinese adage that says, 'He who rides the tiger can't get off.' And we're riding a tiger."

(*Tribune* staff writers Susan Duerksen and Rita Calvano also contributed to his report.)

April 11, 1985, San Diego Union, B-2. Board of Supervisors has agreed to allocate \$20,000 to Balboa Park museums, whose county funding was cut last year.

April 12, 1985, San Diego Tribune, A-1. Talented trio shapes Zoo, Wild Animal Park, by Ann Levin and Susan Duerksen.

The trio that runs the San Diego Zoo and Wild Animal Park knows the business of attracting and amusing tourists --- each had made a career of organizing tours, designing show stages, and feeding hungry throngs.

All three came to the San Diego Zoological Society in the past three years, two from Universal Studios and one from an Anheuser-Busch theme park. Their ages range from 31 to 36. Two have no college degrees and the other finished college four years ago.

They are known for working long hours in an effort to bring innovative business sense to what has become a mammoth corporation facing strong competition for the entertainment dollar.

- Douglas Myers, 35, took over as the society's executive director, the top administrator for both and zoo and park in February.

After holding several managerial positions at the Busch Gardens parks in Los Angeles County and Williamsburg, Va., Myers was hired as general manager of the Wild Animal Park in January 1982.

- In June of that year he brought in Robert McClure as operations manager of the park. McClure, 31, had been an assistant food-service manager at Busch Gardens before moving on to food management with Marineland and then Universal Studios tours in Los Angeles.

When Myers became the society's deputy director in 1983, McClure took over as general manager of the park.

- In June 1982, Terry Winnick was hired as general manager of the zoo. Now 36, Winnick has spent 14 years with MCA Inc., a conglomerate that owns Universal Studios. Starting as a tour guide, Winnick worked his way up to managing shows, special effects and other visitor services for the studio tours. His former colleagues say he was a "whiz kid."

Myers worked as a bird-keeper at a sanctuary attached to a Busch brewery in Van Nuys for a year and a half. He then moved into what he calls "front level management" in charge of the animal collection.

Myers then spend three years as a general services manager and director of park operations at the Williamsburg Busch Gardens. While there he finished a bachelor's degree in interdisciplinary studies at Christopher Newport College in Newport News in 1981.

Winnick studied architecture at the University of Southern California and McClure took business administration and biology courses at California State University at Northridge, but neither finished his degree.

Zoological Society President Sheldon Campbell said a business management degree is preferable but not necessary, for a general manager. "You can make an awful mistake hiring people on the basis of a piece of paper," he said.

The lack of degrees and experience in animal care is offset by McClure's food management expertise, which is important to the wild animal park and Winnick's skill as an entertainment entrepreneur and construction manager, Campbell said. Both men supervise a staff of experienced curators with doctorates in animal sciences.

Campbell said the board gives the executive director total authority to hire the two general managers. Winnick was hired by a former director, Andy Grant, who had worked with him at Universal and now manages tours of Leeds Castle in England.

April 12, 1985, San Diego Tribune A-1, A-12. New era dawns at Zoo; administrators juggle "show biz" research, by Susan Duerksen.

Lush greenery, shocking pink flamingos, screeching macaws, fragrant blossoms and towering palm trees overwhelm the visitor stepping inside the gate of the San Diego Zoo.

For many out-of-towners, already seduced by the sunshine and sea breezes, the jungle paradise confirms everything they've heard about the San Diego Zoo --- it's the best in the world.

Over the years the zoo has become a worldwide legend. Its reputation spread by visiting military personnel, the internationally broadcast "Zoorama" and, more recently, by Joan Embery's 45 appearances on Johnny Carson's Tonight show.

Other established cities had their operas and museums --- San Diego was known first for its zoo. And its residents, who take the zoo's pre-eminence as a tenet of San Diego life, have supported the non-profit zoological society with memberships, donations and generous bequests.

But take away the foliage and San Diego's climate and you're left with a 69-year old institution that some say is feeling its age and scrambling to keep up with younger competition.

And for the past decade financial losses at the zoo's Wild Animal Park near Escondido have further strained the budget at the main zoo, contributing to policy decisions that are being criticized by some animal specialists both within the zoo and elsewhere.

As the management experiments with new revenue-boosting attractions, discontent has swelled among animal "purists" who fear the venerable institution is going show-biz. The conflict erupts in sometimes rancorous accusations by animal caretakers who question the Hollywood occupation of a new breed of managers.

While the zoo still is considered among the best in the world, zoological experts across the nation say some smaller zoos are overtaking San Diego with creative exhibits, biological research and conservation programs --- on much thinner budgets.

"The San Diego Zoo is, of course, very well known among other zoos --- it's one of the most highly advertised," said Elvie Turner, director of the Fort Worth, Texas, zoo and president of the 156-member American Association of Zoological Parks and Aquariums. "But it's not quite like it was. Other zoos are catching up. I've heard some complaints that it's beginning to be an amusement-type operation rather than what is generally regarded as a scientific type of operation."

But Sheldon Campbell, president of the San Diego Zoological Society board, which runs the zoo and the Wild Animal Park, said only three other zoos in the world --- East and West Berlin and the Bronx Zoo in New York City --- even come close to the number and rarity of animals in the San Diego collection.

"The zoo operation we run is the largest and most successful in history. There's no question about it."

Together, the San Diego and Wild Animal Park's expenditure of about \$45 million, is more than double its main U.S. rival, the Bronx Zoo. The San Diego Zoo and Wild Animal Park have 5,400 animals, surpassed only by the West Berlin zoo, which has 8,000 animals.

William Conway, director of the Bronx Zoological Society, said it's hard to rate zoos, but San Diego has some stiff competition.

"The best waterfowl collection in the world is in England (near Stroud). The best exhibit of nocturnal animals is in the Bronx. The greatest number of species is in West Berlin. The best

gorilla exhibit is in Seattle. The best seals and sea lions are in Tacoma. San Diego has a long history with koalas but Los Angeles put together a much more exciting exhibit.”

David Hancocks, a zoo-design architect and former director of Woodland Park Zoological Gardens in Seattle, made a harsher assessment. “My feeling is that if you took away those nice flowers and ferns the San Diego Zoo would be a pretty bleak place. All the animals ever see is the perimeter of the wall around them . . . but they don’t have places to get out of view.”

In response, San Diego Zoo officials point to their long-range plan to rebuild the entire zoo in roomy, natural exhibits. That plan will take at least 35 years to complete, but in the meantime the older enclosures are renovated as money becomes available, Campbell said.

“The exhibits range from bleak to outstanding, and in the future they will all be outstanding,” Campbell said. “We’ll get it changed. It’s just a continuous struggle.”

Zoo directors in colder climates and with smaller budgets admit their criticisms sound like sour grapes. While viewing the San Diego Zoo with a tinge of jealousy, some also are annoyed by its unwavering claim to be No. 1.

They laud the zoo for its research, particularly genetic breeding and its program to raise California condors and return the endangered bird to the wild. About a third of the research department’s \$800,000 budget is obtained through private donations and the rest comes from general zoo revenues.

And they agree San Diego maintains the largest collection of animals, and is the most self-supporting of major zoos, using taxes for a tiny fraction of its \$50 million budget.

However, inside the zoo, dozens of employees, ranging from animal keepers to department heads, in confidential interviews with *The Tribune* have questioned the spending priorities of what has become a large corporation. In recent years, they say, the emphasis has been on recreation and entertainment at the expense of conservation, education and the quality of animal exhibits.

Some animal handlers say privately that animal care is neglected, resulting in boredom, illness or even death. They say visitors who look closely would see monkeys crowded in substandard 5-year old pens, cats pacing old-fashioned concrete and wire cages and bears and rhinos without mates.

Board President Campbell counters that many employees are not aware of the money spent on “off-view” facilities benefiting the animals, including construction of a \$1.4 million animal hospital in 1977 and two primate-breeding centers built in 1979 and 1983 for about \$1.1 million.

“All these most of our employees haven’t seen,” he said.

The highly visible food stands and gift shops, which have cost about \$2 million to build in the past 10 years, have long ago paid for themselves and continue to support the rest of the zoo, Campbell said.

Concessions such as food sales now account for 36 percent of the revenue, while another 28 percent comes from admissions and 9 percent from annual memberships.

In a five-year plan unveiled two months ago, zoo officials announced their intention to get half their revenue from as yet untapped sources by the end of 1989, reducing the reliance on gate receipts. Executive Director Douglas Myers said it “would not be good business” to reveal potential new revenue sources.

In addition to the ongoing courtship of monied animal lovers, the zoo is turning to sponsorship of specific exhibits or programs by corporations. For instance, local companies financed many of the

zoo's current tour buses and Eastman Kodak has become a major corporate sponsor, pledging \$100,000 a year for five years.

The new \$800,000 Hunte Amphitheater also is expected to increase revenue by drawing visitors away from the congested front areas of the zoo and improving crowd turnover, Campbell said. It was built with money from a donor who picked the amphitheater from a list of five zoo projects that needed financing, he said.

The \$1.9 million Warner Administration Center, built in 1983, is another object of criticism from some employees. But donors Tom and Suzanne Warner specified their money was to be used to consolidate the zoo's administrative offices, which had been scattered in several buildings.

Donors are more inclined to give money to build "brand new things" than to repair the old, Campbell said.

Day-to-day decisions on spending money are made by the zoo's administrators, not donors. Many of the lifelong "animal people" who work for the zoo are chafing under the leadership of young executives whom they blame for tilting the zoo away from conservation and education and toward competition with a myriad of Southern California attractions, such as Disneyland, Knott's Berry Farm and Sea World.

Executive Director Myers and the general managers of both the zoo and the Wild Animal Park were hired within the past three years. All three have management backgrounds with Universal Studios or Anheuser-Busch theme parks and none has zoo experience.

This hiring pattern bucks a national trend, said Bob Wagner of Jackson, Miss., executive director of the American Association of Zoological Parks and Aquariums, which was headed last year by Charles Bieler, former executive director of the San Diego Zoological Society. About 15 years ago, zoos across the country tended to seek administrators with business or management backgrounds, but now have reversed that practice, he said.

"In most cases in recent years, when there has been a change in zoo directors, the search committee has selected zoo-trained professionals," believing it better to hire assistants with business expertise, Wagner said.

"You need an animal person at the top, and put the business people under him," said Edward Maruska, director of the Cincinnati Zoo. "The man at the top is the controlling factor on how well an exhibit is built, how well the collection is managed."

Campbell said that although Myers does not have a zoo background he is an "animal man" who worked closely with the 136-species bird collection at the now defunct Busch Gardens in Van Nuys. Beginning as a bird keeper, Myers also was a tour manager, animal collection manager and general service manager during his 11 years with Anheuser-Busch Co. Shortly before the bird sanctuary was closed five years ago to make way for expansion of a brewery, he moved to the Busch Gardens location in Williamsburg, Va.

"I have a significant amount of animal experience," he said, noting that the theme park also had a collection of otters, penguins, sea lions and small primates.

However, Campbell said Myers was hired "primarily as a manager" when he was selected to manage the Wild Animal Park in 1982. He was promoted to executive director of the society in February of this year.

Myers, in turn, said both general managers who report to him, Terry Winnick of the zoo and Bob McClure of the Wild Animal Park, were hired for their management experience.

McClure had worked in food and merchandising for Busch Gardens in Van Nuys, Marineland in Palos Verdes and for Universal Studio tours. Winnick spent 14 years at Universal Studios, starting as a tour guide and working his way up to director of special effects and shows, including trained animal acts.

Myers said their management strengths are supported by an unsurpassed group of curators who are in charge of the animals.

"We need somebody to watch the business side, because we have tremendous professionals on the animal side," Myers said. "It's a balance."

McClure said he depends on the animal and plant expertise of his staff and sees himself as the coordinator of a team that runs the park.

But to some of the animal caretakers they supervise, these newcomers have a distorted focus on the balance sheet instead of the animals.

"Upper management doesn't understand animal-health themes because that's not a high priority for them," one employee said. "So you go home with a twisted gut (when something happens to an animal) but they don't because they're worried about whether Canyon Café came up short that day."

Said another, with 10 years experience at the zoo, "The emphasis of the management has certainly changed. It's gotten more and more removed from going a good job for the animals. When I first started at the zoo, money was not an overriding, all-encompassing concern."

Among the controversial allocations in the zoo's budget is \$5 million a year for advertising and promotions --- more than the entire budget of such other prominent zoos as Cincinnati, Denver and Los Angeles. Myers said the expenditure is necessary to draw the 4.5 million visitors to the zoo and park each year.

In addition to TV ads and a magazine, those promotions include trained-animal acts, one of the sharpest points of contention in the entertainment debate.

The Wild Animal Park features three such shows and the zoo just spent \$800,000 to build its second amphitheater for a new show. But national association president Turner said the use of trained animals is becoming less common at other zoos.

"Most of the zoos feel they are not in that kind of business," Turner said. However, he added that San Diego has "a giant operation, and the revenues are very important. I know everybody has to try to make money."

Wagner, the national executive director, said the animal acts he has seen in San Diego are "in good taste and educational," but he would not use them at the Jackson, Miss., zoo where he is director.

"I'm a bit of a purist," he said. "I think trained-animal acts are fine for circuses and captive displays and conservation are for zoos."

San Diego also excels in the scientific areas, Myers said, with a breeding program responsible for upgrading the status of white rhinos from endangered to threatened and unprecedented successes with many other species.

Myers said San Diego's shows are carefully planned to illustrate natural behaviors of the animals. Amid public criticism, Myers recently canceled plans to use non-zoo animals trained for movies in a show at the new zoo amphitheater. Zoo animals will be used instead.

In addition to questioning priorities, some zoo employees cite what they consider to be wasteful use of funds, including several exhibits they say were poorly designed, requiring repair and remodeling.

- A solar-heated room designed to hold up to 70 monkeys at the \$809,000 breeding center, built in 1983, has been overly successful at stimulating tropical conditions. Temperatures have soared up to 150 degrees. The room has been empty since a marmoset died there last spring.

Campbell said the design of the heating system is faulty, and estimates for fixing it range from \$1,500 to \$60,000.

- The Heart of the Zoo, a facsimile of a Southeast Asian rain forest, has had several design and building changes during and after its construction two years ago. The original \$2 million budget for the ape and bird complex has ballooned to \$3.5 million, which even Campbell has said was “probably too much.”

Contractors had to uncover and reseal leaking basement walls, reshape moats around the monkey islands and darken a building to allow visitors to see through the glare in a glass enclosure. A Seattle architectural firm recently was hired to make the Siamang monkey islands escape proof.

- A \$70,000 filtration system on fiberglass pools housing the sea lions that perform at Wegeforth Bowl has been inadequate to clear the water and has malfunctioned and drained the pools.

Although a consultant advised replaced the filters at a cost of \$150,000, zoo officials say they are withholding final payment for the system, hoping the contractor will fix it. In the meantime, sea lions are suffering from eye infections and other ailments and the U.S. Department of Agriculture has cited the zoo for potential violations of the Animal Welfare Act.

- In-house workers spent several months last year renovating the Bongo exhibit, now widely scorned by zoo employees as an unnatural concrete fortress little changed by the massive remodeling effort. Although Myers said he “would have liked to see a little more softness built into it,” the exhibit has produced a burgeoning population of the exotic antelopes. “The bongos seem to like it,” he said.
- Plans to build a hydraulic lift for the tour bus loading docks were scrapped in 1982 after \$32,000 was spent on a design and prototype that didn’t work, said zoo architect David Rice.

“We see this and say, ‘Why couldn’t the money have been used for the animals? I think the animals are secondary now,” one employee said.

Exhibit renovation has lagged because the zoo has spent \$20 million to subsidize the Wild Animal Park in the 13 years since it was opened.

“I think that all their time and talent and their funds have gone to the Wild Animal Park, and they have just not kept up to date with the downtown facilities,” said Sue Pressman, former director of captive-animal exhibits for the Humane Society of America in Washington, D. C. Pressman now is a private consultant to zoos.

Campbell said that spending pattern now is reversed and the park will be pushed to stand on its own.

The Wild Animal Park symbolizes the difficulty of balancing conservation with economics. The brainchild of Dr. Charles Schroeder, who retired in 1972 after 20 years as director, the Wild Animal Park was conceived as a breeding ground for endangered species. It covers 600 acres of an 1,800-acre site in the San Pasqual Valley.

Part of Schroeder's idea was to put people "in cages" by use of a monorail to view free roaming animals instead of old-fashioned exhibits in which visitors roamed free to view animals in cages.

But Schroeder's vision of an animal preserve divided into areas resembling five geographical regions of the world did not attract the volume of visitors to put the park in the black.

Thus, concerts were added three years ago to draw crowds, and a "Close Encounter" program began this March 30 to make animals more accessible and the park more interesting to children. The new attractions include tours of the elephants' bedrooms, photo opportunities with koalas, trivia questions on plaques near the exhibits and devices to test your strength against an elephant.

Trustee Ivor de Kirby said reaction of visitors during the first week was enthusiastic but some animal keepers are wary of dangers and inconveniences of bring the public closer to the beasts. Myers said "all precautionary measures" have been taken to assure safety.

With the next two years, Myers hopes to build lodging --- envisioned as a giant hut on stilts --- where paying guests could spend the night watching the animals at the park.

Myers said covered outposts will be built along the monorail this summer for daytime observation of the herds. He plans to conduct marketing surveys on the idea of the overnight accommodations, patterned after the Treetops safari hotels in Kenya.

Local developer Rick Taubman, whose family owns Seaport Village, said he originally suggested the "overnight resting place" as a way to boost the park's income. No developer has been chosen.

Campbell emphasized that the idea is "pure talk," has not been approved by the board, and would not be built for at least four years if it were approved.

Talk of future construction plans is too far off to satisfy some whose daily jobs involve animal care. While managers map out the elaborate rebuilding of the zoo and expansion of the park, animal custodians worry about the less glamorous but immediate needs of their charges.

While some employees agree with a colleague's assessment that the zoo has become "a madhouse of low morale," many say they are happy and proud of their jobs caring for one of the world's premiere collections of animals. Even those who complain bitterly insist that are not just grouching, but are hoping for constructive change.

One employee described zoo workers as "concerned professionals, people who feel let down in some of the priorities management has established."

"There are probably a lot of people on the board who think everything is fine, and then they hear a disparaging word and they think it's coming from some troublemaker," he said. "But it's not. It's from a loyal employee who wants to see things made better."

(*Tribune* staff writers Ann Levin and Rita Calvano also contributed to this report.)

April 18, 1985, *READER*. COMBO Funding Requests.

COMBO, San Diego's official arts funding group, was formed in 1964 to discourage music, dance and theater troupes from hounding the city council and local businesses for donations. This novel system (is) now being tested again by the Old Globe Theater and the San Diego Civic Light Opera Association.

April 18, 1985, *San Diego Union*, B-5. Public Services & Safety Committee favors linking Balboa Park rangers with police, by Michael Smolens.

A proposal to combat crime in recreation areas by deploying a new squad of park rangers was praised yesterday by a City Council committee, which favors making the rangers part of the Police Department rather than the Park and Recreation Department.

April 25, 1985, San Diego Tribune, A-1, A-12. Joan Kroc's \$3.3 million gift to Zoo, by Ann Levin, Susan Duerksen, and Rita Calvano.

Joan Kroc, owner of the Padres and a millionaire philanthropist, today gave the San Diego Zoo the largest donation in its history, \$3.3 million to rebuild a major portion of the zoo, including all of Cascade Canyon.

Kroc, the widow of McDonald's restaurants founder Ray Kroc, pledged the money after *The Tribune* disclosed last month that the large-cat exhibits have failed to meet federal safety standards and that a variety of other problems plague the zoo.

The donation by Kroc will free up other money to correct problems in the area housing lions, tigers and other big cats, officials said.

Problems cited by a federal inspector indicated crumbling walls and roofs, improper drainage, rusting gates and a lack of heat and light in the holding pens behind the exhibits. Some of the exhibits were built 50 years ago.

Zoo officials said Kroc decided to make the multi-million-dollar gift after reading newspaper reports of the structural problems.

Executive Director Douglas Myers today said the donation will be used to reconstruct the Cascade Canyon area into a major multi-species exhibit housing birds, reptiles and mammals found in Asian tropical rain forests.

The two-acre canyon will be renamed in honor of the Kroc family.

The reconstruction of the canyon is expected to cost \$4 million. Zoo fund-raisers already have collected \$800,000 from an anonymous donor for a Sumatran tiger exhibit that will be built at the base of the canyon.

Charles Bieler, executive director emeritus of the Zoological Society of San Diego, said he received a phone call from Kroc's office on Monday and met with her Monday afternoon to arrange the donation.

As he was presented with the check for \$3.3 million today, Bieler said, "I've never seen so many zeroes at one time on a check. We think it's a gift that has come at a most appropriate time, at a time of need."

The largest prior gift to the zoo was \$1.5 million in the 1960s from Elmer C. Otto. Thomas and Suzanne Warner gave \$1 million to help construct the zoo's Warner Administration Building, and \$950,000 was given by Helen Woodward to help build the Heart of the Zoo exhibit.

Mike Sund, director of public relations of the Joan B. Kroc Foundation, read a statement from Kroc at the press conference today:

"I am making this personal gift on behalf of my late husband Ray and our family because we have always felt that, in addition to being the finest zoo in the world, the San Diego Zoo literally provides something for everyone in this diverse community of our.

“Much like the National League Championship our Padres brought home last year, the zoo is a source of pride and entertainment that young and old, rich and poor, can share and enjoy. Best of all, the zoo has never had a bad year!

“We are especially pleased that our gift will help to create a simulated natural habitat where these animals can live in a way that reflects appreciation for the dignity of all living things.”

Sund said today’s \$3.3 million contribution is a personal gift by Kroc.

Kroc also gave a personal \$100,000 gift to establish a family survivors fund for the victims of the San Ysidro massacre. Which was followed by a \$1million donation from McDonald’s restaurants.

With the new donation in hand, zoo officials expect to break ground for a new tiger exhibit this fall and complete it before next summer. Construction of new lion housing will begin next year, Zoo Executive Director Doug Myers said.

“The dollars seem to be in hand to accomplish that schedule,” Myers said.

When the new Sumatran tiger exhibit at the base of Cascade Canyon is completed next spring, the lions will take over the old tiger housing, which is in slightly better shape than the lion exhibit, Myers said. The lion building then will be torn down and rebuilt.

Eventually, the entire cat and dog canyon is to be rebuilt as part of a 35-year plan to reorganize the zoo into “bioclimatic” zones reproducing the vegetation and animal groupings of certain areas of the world. Plans call for a mountainous region exhibit in the canyon.

In the meantime, though, the antiquated exhibits must be rebuilt for the health and safety of animals and visitors.

The Asian rain forest complex will be located just inside the zoo’s entrance, between the reptile house and primate exhibits. It is expected to be completed within a year.

The architectural design of the complex will be done by Jones and Jones, a zoological architectural firm from Seattle. Bieler said he expects to take bids for construction by August or September.

The new exhibit will include enclosures for crocodiles, a python, Malayan tapirs and a species of wild swine as well as a variety of birds.

The concrete structures housing and displaying the lions, tigers, jaguars, leopards and some species of dogs failed a U. S. Department of Agriculture building inspection a year ago and a re-inspection yesterday.

Reports filed by federal veterinarian Frank Enders last year detailed cracks on the walls, crumbling roofs, rusting gates, improper drainage, and a lack of heat and light as deficiencies that must be corrected to meet federal standards.

Enders had set a one-year deadline for the exhibits to be upgraded to meet federal standards. On a re-inspection yesterday, he found that the problems have not been fixed, but said the zoo is making substantial progress.

Enders said he will recommend that the zoo be given another year to rebuild the structures before it is cited for violating the Animal Welfare Act.

He said some of the buildings must be torn down and rebuilt, and others housing jaguars and leopards require further remodeling.

The decision on granting the zoo a one-year extension of the deadline for correcting the problems will be made by the Department of Agriculture's regional office in Sacramento, after Enders files his re-inspection report.

Accompanied by zoo officials, Enders took a cluster of reporters on a tour of the cat and dog housing yesterday. He said he was impressed by the care animals are given, despite substandard conditions.

Similar problems were found in the enclosures for Chinese dholes, a red dog. Several zoo employees linked the inadequate heat and housing to the hypothermia deaths of a litter of dhole pups in 1982.

In a recent series of articles examining the 69-year old zoo, *The Tribune* also disclosed water quality problems in the sea lion tanks and structural defects in a new \$3.5 million primate exhibit.

Part of the problem in the cat and dog canyon is a lack of electricity, which is needed for lighting, space heaters and water-heated sleeping pads. Some areas had temporary electricity from a power source at the top of the canyon, but City of San Diego building inspectors yesterday required the removal of indoor wiring that had been strung illegally through the trees.

Two days after *The Tribune* story noting lack of heat and light in Cat Canyon appeared, the zoo accepted bids from San Diego electrical contractors to bury a cable along the canyon.

One jaguar exhibit has been renovated and four other large cat areas are scheduled for the same treatment within the next two months. The renovation, at a cost of about \$10,000 per exhibit, includes replacing concrete floors with dirt and grass, adding skylights to provide better lighting in the holding pens behind the exhibits and installing specially heated sleeping pads.

April 25, 1985, San Diego Tribune, A-12. Zoo removes unsafe wiring; some animals lack heat.

Unprotected indoor wiring was found strung through trees at the San Diego Zoo yesterday by city building inspectors.

The illegal wiring was immediately removed by zoo workers from the cat and dog canyon, where it had been used to power water-heated sleeping pads in some of the animals' holding pens.

City officials decided this month to begin enforcing building codes at the zoo, after *The Tribune* reported that most construction there has been done without building permits or inspections. In the past, city officials said, they have not routinely inspected the zoo.

The Romex wiring used at the zoo is intended only for the inside of walls in residential buildings and must be enclosed in a metal sheath even inside walls in commercial structures, said Dan Cole, city supervisor of permit issuance. He said the wiring is not safe for outdoor use.

Carmi Penny, mammals curator at the zoo, said the removal of the wiring has caused greater danger to the animals' health because they no longer have the heated beds.

"We're not electrical engineers. It works; we've all used it," Penny said.

A temporary generator is expected to be installed today to provide power for lighting at some of the exhibits. Within a year, zoo officials said, permanent power sources should be installed throughout the zoo.

May 26, 1985, San Diego Union, E-1. The Old Globe celebrates 50 years:

Wednesday, May 29 - Dedication of the Lowell Davies Festival Theater.

Friday, May 31 - 50th anniversary party in Balboa Park (for Old Globe members only).

Wednesday, June 5 - Festival '85 opens with "Greater Tuna."

Friday, June 7 - "A Midsummer Nights' Dream" opens.

Wednesday, June 12 - "Fallen Angels" opens.

Saturday, July 13 - Reunion and brunch for Old Globe volunteers.

Friday, July 19 - Festival '85 continues with opening of "Painting Churches."

Sunday, July 21 - "London Assurance" opens.

Friday, July 26 - "Richard III," the Globe's 500th production opens.

Saturday, September 14 - Jubilation Gala dinner dance

May 26, 1985, San Diego Union, E-1, E-4, E-10. The Globe spins mightily; the artistic bastion is built on solid 50-year foundation, by Welton Jones.

Humanity should have a history as evenly productive as the first half-century of the Old Globe Theater.

Since Thomas Wood Stevens and Marc T. Nielsen signed an agreement 50 years ago Wednesday to provide the California Pacific International Exposition with bits of Shakespeare in a replica of his Elizabethan theater, that certain corner of Balboa Park has led a charmed existence as a bubble of culture in an environment often indifferent and occasionally hostile.

Every time there's been a crisis, the necessary solution has been discovered close at hand and the Old Globe has emerged stronger than before.

At the end of its first half century, the Globe's history falls into six eras, the Exposition years, the San Diego Community Theater years, the dormant war years, the long slow growth from 1947 to 1971, the maturing years around the 1978 fire and the professional era which began with the opening of the new Old Globe in 1982.

Halfway through the fourth season of the latest era, it's still too early to see the future. Programming since 1982 has been conservative, the risks have been carefully calculated. The theater's artistic integrity is unquestioned but there are few surprises.

Today the Old Globe Theater is the IBM of the San Diego cultural establishment, a trim, efficient and self-confident enterprise which also is the only performing arts management able to claim 50 years in the same or, for that matter, any location.

Rare indeed are the unsold seats to Globe shows, although the theater's board of directors refuses to let the staff sell more than 90 percent subscriptions to the dozen productions each year, just so there will be something to sell at the box office.

Few frontiers have been pushed back by the Globe during all those seasons, true. But theatrical frontiersmen usually find early graves, whereas the Globe just keeps on serving its audience, all its risk in context.

Just as the politicians main job is to get elected, a theater company's first task may be survival. As is shown by its production history, the Globe knows how to survive and even flourish.

The history of the Old Globe forms a long, smooth curve with a blank over the World War II years and an abrupt upsweep at the end.

Soaring above the war, fire, fads, economic fluctuations, intrigue, personnel turnovers and all the other churning signs of life, the Old Globe's productions have continued to flow in a serene, uninterrupted progression which says more about the theater's management than any other tribute could.

Since the traumatic arson fire which destroyed the original Globe that dismal morning in March 1978, the theater not only has recovered, it has prospered.

The annual budget that fire year was about \$300,000. Today, it's more than \$6 million. The difference is that between a nice, cost-effective, amateur community theater and one of the country's major professional companies.

In retrospect, as always with Globe history, the 1978 fire can be seen to have been a blessing in disguise, the biggest in an ongoing series of jolts which may explain why the theater never has sunk into atrophy.

The Globe was born fighting for its life. Thomas Wood Stevens was a scholar turned entrepreneur by the Depression. A 15-year veteran of the Carnegie Tech Drama Department in Pittsburgh, the country's first college-level theater school, he had founded the Goodman Theater in Chicago only to be fired after five years for setting artistic standards too high.

In 1934, the "Century of Progress" exposition in Chicago was entering its second season and was in need of some good solid midway attractions like the successful "Belgian Village" and "Streets of Paris" exhibits. Stevens was hired to provide the centerpiece of a "Merrie England" exhibit, with an Elizabethan theme, specifically five short Shakespeare plays a day.

As is well-known now, Stevens and his assistant, B. Iden Payne, filled the bill so well that the operators of the 1935 California Pacific International Exposition in San Diego lured them to Balboa Park hoping to duplicate their success.

What is frequently forgotten, though, is the fact that Stevens and his people were not opportunists or charlatans, butchering Shakespeare for a couple of bucks. "The really hard thing," Stevens wrote to a friend in 1934, "is the cutting of the plays --- we should have that done by somebody who hates Shakespeare, instead of people like Iden and me." Still, 14 plays were eventually hacked to a length ranging from 36 minutes for "A Comedy of Errors" to 45 minutes for "Julius Caesar" and a company of actors which eventually numbered such luminaries as Martha Scott, Sam Wannamaker, MacDonald Carey, Bertram Tanswell and Irene Tedrow was hired to perform five of these a day.

In the second year of the San Diego exposition, Stevens and Payne were long gone, but the replacement troupe --- called the Fortune Company --- carried on with notable success until the fair closed that fall.

The structure built for the shows and called "the Old Globe" was intended to be a temporary building and the fair management already had sold it to wreckers for \$400 before local theater patrons awoke to the fact that the only professional house in town was about to be trashed.

The first galvanizing crisis produced a fund-raising committee that found the money, purchased the building and prepared it for the first season of the newly-formed San Diego Community Theater. The Globe officially reopened December 2, 1937, with John Van Druten's "The Distaff Side," directed by Luther M. Kennett, Jr. and featuring, in a supporting role, a young San Diegan named Craig Noel.

The playhouse taken over by the San Diego Community Theater was no more a “replica” of the original Elizabethan Globe than Thomas Wood Stevens was the reincarnation of Shakespeare. What had started out as a vaguely authentic structure open to the sky had already been modified to an enclosed hall with a proscenium arch stage.

At the end of that first 1937-38 season, there was \$17.70 in the treasury (according to John Eugene Donnelly’s invaluable 1957 San Diego State University’s thesis, which provided most of the historical material included here) and a second season was inevitable.

By the time World War II shut down the theater’s operations, Noel had replaced Kennett as the resident director and the company had presented 39 shows, including one world premiere (Lynn Rigg’s “A World Elsewhere”) and one tour to Los Angeles (Mark Reed’s “Yes, My Darling Daughter”).

Indirectly, the war was yet another break for the Globe. Craig Noel had resigned from the theater to go to Hollywood that October, 1941. Both his career and the Globe’s might have been different if there hadn’t been a war to fight, but within a couple of months, along with most of his generation, Craig Noel joined the Army. He came home just in time to direct the first postwar show at the Globe, and he’s been there ever since, the premiere symbol of the theater’s leadership continuity.

After the war, it took many months to jiggle the Globe loose from the Navy and from a city administration that seemed to have forgotten who had turned it into an asset. An exchange of correspondence in the Donnelly thesis indicates that the city wasn’t sure any group should be awarded exclusive use of the reopened Globe.

That crisis was the first big one for the new man of the hour at the Globe, Lowell Davies, who became president in January 1945 and served until 1976, when he became chairman of the board.

In Davies and Noel, the Globe had a leadership tandem of energy and sophistication unmatched in San Diego arts history before or since. Each respected the other and neither infringed on the other’s turf. Davies kept the theater open and Noel provided the reason why.

From 1947 until 1962, when William Roesch was signed as second staff director, Craig Noel directed seven or eight shows a year. All but four were presented on the main stage of the Globe during that period and some for the summer Shakespeare festivals as well.

The first festival in the summer of 1949, brought B. Iden Payne back to town for a production of “Twelfth Night,” co-sponsored by San Diego State. Payne returned for two shows each summer through 1952, when San Diego State withdrew from the partnership, taking its financial support with it.

Yet another crisis loomed, with yet another smooth, natural solution. One of the biggest Broadway hits of the period, Joshua Logan and Thomas Heggen’s “Mister Roberts” came available that summer and gave the Globe its first really big, long-running (69 performances) hit.

And the following season when the members began to grumble about the lack of Shakespeare, the Globe was able to reinstate the festival with the first of its three-show summer season of rotating repertory.

To this day, audiences still complain when there’s not enough Shakespeare in the Globe’s schedule.

During the 1950s the Globe settled into a peaceful era of five or six amateur winter productions and three professional summer shows. Usually the former paid for the latter, but there were notable summer hits, too.

In the season of 1961-62, the Globe expanded its program to Sherwood Hall in La Jolla, with a three-play schedule of fare somewhat experimental --- Jean Anouilh, Arch Oboler and Edward Albee that year. The audience was there, and, in 1963-64, the shows were moved from La Jolla to the Falstaff Tavern, an auxiliary building next to the Globe, originally built as a restaurant during the 1935 exposition.

By the 1968-69 season, the tavern had become the present Cassius Carter Center Stage and the Globe's annual pattern had become five shows each on the main stage and the Carter during the winter with a three-show Shakespeare repertory and a fourth production at the Carter for summer. This arrangement continued until the 1978 fire, when the company moved its Globe winter productions downtown and its Shakespeare Festival to the temporary outdoor Festival Stage, designed and built in just four months.

The Globe was ill-prepared to mount a major fund-raising effort. Decades of careful management had brought the theater a stability rare in the business, with an enormous proportion of its operating budget earned at the box office. The theater board and staff had virtually no experience in soliciting grants or major donations, and the early efforts were painfully ineffective.

But new heroes emerged, a new generation of leadership, including Stacey Sullivan, Deborah Szekezy, James Mulvaney and James Milch, and the Globe gave itself on-the-job training so effective that the company emerged from the fire crisis with an entirely new, completely modernized approach to operations as a year-round professional company.

When the new \$6 million Old Globe was finished and opened in 1982 several changes took place. Noel replaced himself with three people --- Artistic Director Jack O'Brien, Managing Director Thomas Hall and himself as executive producer --- and the company replaced its winter company of faithful, unpaid, amateur actors with professionals performing a winter season of six shows on the two inside stages and a summer rotation of six other shows on all three stages.

Last year, the Globe ended years of quiet struggle with environmentalists by securing City Council approval to make the outdoor Festival Stage a permanent facility, but plans to remodel it in memory of Lowell Davies, who died in 1983, seemed to languish.

Enter the latest disguised blessing in the form of yet another arson fire which destroyed the Festival Stage. Once more the Globe was forced into fund-raising and rebuilding. The Lowell Davies Festival Theater will open this week.

But all the changes weren't buildings or personnel. The Globe's repertoire was evolving too.

The first two seasons of the San Diego Community Theater provided Broadway hits with certain whimsical variations --- from "Once in a Lifetime" to "Hedda Gabler" in 1937-38, "Heartbreak House" to "Three Men on a Horse" the next season --- but thereafter the programming settled into a steady diet of Broadway mainstream which persisted well into the 1970s.

There was an occasional musical comedy --- "Lady in the Dark," "On the Town," "The Boy Friend" (twice) --- and the most popular works by controversial new playwrights --- Arthur Miller's "Death of a Salesman" and "A View from the Bridge," Tennessee William's "A Streetcar Named Desire" and "The Rose Tattoo" --- but the majority of the programming during the amateur winter seasons came from the middle of the road, the staple of stock theaters around the country.

Between 1947 and 1971, the playwright with the most plays produced on the Old Globe stage, second only to Shakespeare was Norman Krasna, with "John Loves Mary," "Dear Ruth," "Who Was That Lady I Saw You With" and "Sunday in New York."

But the changes begun in the Sherwood Hall season of 1961-62 had continued to eat away at the theater's reputation for winter fluff, with playwrights such as Jean Genet, Harold Pinter, Shaw, O'Neill, Pirandello, Brecht and Brendan Behan attracting enthusiastic audiences.

In 1971-72, the main stage fare began a slow shift away from the lightweight with productions of John Guare's "House of Blue Leaves" and Tom Stoppard's "Rosencrantz and Guildenstern Are Dead." The Krasna days were gone for good.

After that season, mainstage programming grew nearer to that on the Cassius Carter Stage. Arthur Kopit and Joe Orton were represented the next year. Tennessee Williams and Brecht the year after that. By the time of the 1978 fire, plays were being assigned based on which stage they fit best.

Part of the change can be attributed to the beginning of subscription sales, in the 1973-74 season. Prior to that year, patrons could purchase coupons good for any show during the season, so box-office returns were carefully watched before plays were chosen. By buying subscriptions, theatergoers received preferred seating in exchange for their faith that the theater would provide good shows.

But another reason for the change in programming was the Globe's participation in a national trend toward a more institutionalized theater, a theater not tied directly to box-office sales but free to pursue quality with the advance income of subscriptions and grants, a theater where artists could work in a situation which inspired quality while providing a decent wage.

In an era with no dominant playwrights, production became more important. Audiences all over the country began to realize that Shaw and Ibsen could be exciting, given the proper staging, as this season's Broadway hits. With their future guaranteed at least for the season at hand, the institutional theaters could leave the commercial plays to tours and dinner theaters, concentrating more on mining the past and developing the future.

The Globe, having sharpened its audiences' perceptions with a steady diet of Shakespeare over the decades, was in a better position than most to become what its new artistic director called "an American classical theater."

Increasingly, the Globe has taken its place nationally as an exemplary producer of a safe repertoire. But the sudden crosstown preference of the revived La Jolla Playhouse, currently the darling of the country's art theater establishment, brings the Globe's audience an alternative to conservative programming. Eventually, a marketplace comparison of each theater's artistic judgment may be possible.

Whatever the outcome of such comparisons, history suggests that the Globe will adjust accordingly.

Some problems are yet to be resolved at the Old Globe. There is still some debt to retire from the rebuilding of the past years. The staff is chronically overworked. No clear use of the months between September and December has been established.

Most importantly, if all seats are sold for all performances, something must give. New sources of revenue must be found. In the case of earned income, this means some combination of more performances, more seats or higher ticket prices.

The best solution may be to borrow a page from the commercial theater and make the hits pay better by moving them somewhere after their subscription runs are done, either on tour to other cities or into a theater somewhere else in San Diego.

Typically, the Globe leadership is close-mouthed about its long-range plans. But there's a committee studying the question.

Perhaps solutions will be found which don't require a crisis to congeal. But if there is a crisis, history teaches that the Old Globe Theater will be a good bet to survive and flourish.

May 26, 1985, San Diego Union, E-10. Where the Globe Festival's money will go in 1985

Total expenses	\$2,884,268
Direct production expenses (Artist's and crew members salaries, sets, costumes, royalties, advertising, box office and usher expenses)	\$2,136,961
Fixed operating expenses (Administration, theater upkeep, fund-raising)	\$ 747,307

Source: Old Globe Theater

May 26, 1985, San Diego Union, E-1, E-7. Three guys cultivate culture and the public reaps results, by Anne Marie Welsh.

"Over that art which you say adds to nature is an art that nature makes. . . . This is an art which does mend nature, change it rather, but the art itself is nature."

Polixenes instructing Perdita in "The Winter's Tale."

For Craig Noel, Tom Hall and Jack O'Brien, culture is like horticulture. When they talk of their mutual passion for the Old Globe Theater, Shakespeare hovers about the conservation and 50 years of growth and change seem a continuity. "All that the Old Globe is was there from the beginning," says O'Brien, the artistic director. "We've not grafted onto this plant anything unnatural. We have taken a situation remarkable for its rightness, its timing. And the three of us have had a healthier effect than maybe one of use could."

O'Brien is 45 years old, a nationally accomplished director, who joined the Globe's full-time staff in 1982. Hall came aboard then, too, and in three years has given the Globe the largest subscription base of any regional theater in the country. At 33, he is the youngest member of the ruling triumvirate.

Craig Noel, the executive producer, associated with the theater almost since its inception, will be 70 this fall.

Together, they shape each season and the future of San Diego's most distinguished arts institution.

"When things get real rough," says Hall, "we go to Craig's hose and sit in the sun and say nobody can leave until we've decided on the plays. Because of the subscription series, we are under a printing deadline that is unbelievable. At least six months in advance of a season."

"Eight months actually," said O'Brien.

Noel explained the intricacies of the negotiations. "It's other things than just choosing a season of plays. Actor availability, for instance. It isn't just a matter of 'I love this' or 'I love that.' Sometimes my absolute favorites were bombs at the box office or bombs artistically."

"It isn't just three people sitting in their room with their egos, like 'Star Wars,'" O'Brien said. "We are like Harry Truman saying he as just the one renting the hall. There's the Globe and there's the audience. Craig might say a work will never sell in this city. Or he might say we did it before and

shouldn't do it again. Or we already did it and should do it again. Talking to someone who has been over this part of the sea tells us whether there is a shark over there."

However unusual, the troika system has worked well enough to earn the Globe a Tony award last year for achievement in regional theater. "It isn't as if we've all just got acquainted," Noel says of the ease in the relationship. "Jack's first production here was in 1969. Over the years we've learned to regret things together and to celebrate things together."

Hall acknowledges that the first meetings in January 1982 were anxious. "We were worried at first," he said, "that we would have different points of view."

"It was very awkward," O'Brien said. "But the tone was already here, because it began as a community theater wanted by the community. It was like a musical instrument with a certain character and quality of sound. For me, the Globe always represented happy times, lots of laughter, really classy people. The tempo or quality of life here has not changed. The quality of spirit is the same."

The changes, besides the obvious move from a semi-professional winter season to a fully professional one, have been structural, they say.

"Our being comfortable with each other has led to structural changes, a new process," said Hall. "We have weekly meetings of artistic and management staff to hear what people want and need. When either group has a problem, we talk about it. It would be interesting for you to hear what a businessman hears --- the 'What if' of the artist.

"Just last week we spent four hours together finding a solution to a very specific problem. We had a financial problem with a part of 'Dream' ('A Midsummer Night's Dream,' set to open the new Lowell Davies Festival Stage on June 7). The problem scene was going to take 20 seconds. We talked and were able to work out a solution that was acceptable to Jack."

"With very little compromise," O'Brien said, adding, "The councils have been very interesting. Maybe it's now even a wise thing to do. A lot of people don't do it. The heads of most organizations are perceived as creatures of mystery and fear."

"I try to tell them (actors and crew) everything, *everything*. I'm thinking and I name names and mention problems. If it gets out of the room that tells me what I need to know about the persons and the process."

Noel, who directed his first production at the Globe in 1939 and will direct his 201st during the Jubilee season, said the transition to an Equity company of actors went about as smoothly as the transition to a three-man leadership. "A professional actor and director can love his discipline just as much as an amateur. The love affair leads on to professionalism. For a long time we lived in that strange area so that there was a summer season that was Equity and the rest of the year we were a community theater."

"Many times in regional theater, a smart young man such as Jack would go to Syracuse, for instance, and say, 'There's no theater here.' He would go to the city council and say that and they would say, 'yes, he's right we should have a theater and he should run it.'

"The very fact that the theater was here for the (1935) Exposition and the people wanted to keep it is an important part of our history. We've had more people wanting it than not. They had seen Shakespeare. They wanted to see more Shakespeare.

"The reverse thing happened on the East Coast in Stratford, Connecticut. A group of actors said you need a Shakespeare Festival. But the people said," and Noel rose gesturing, " 'We don't need this. We don't want Shakespeare. You are jamming that down our throats.' Nobody cared about it.

“Here in San Diego, though, the people did want it and when the number of Shakespearean plays last summer was cut back from the traditional three to two, there were some complaints.”

Hall leapt into the conversation. “We realized we’d get flak for cutting Shakespeare down from three to two. But look at the roster of actors in Jack’s ‘Dream.’ Now they can give it great depth. If we still tried to do three, we realized one might be lousy. The quality might go down.”

Shakespeare will remain a mainstay of the Globe future, along with projects as contemporary as cable television. O’Brien again grew animated on that subject.

“There are creative outlets for us that are obsessing me. I have a lot of ambition to take the generic seeds of what we are doing here into television --- not network television obviously, but into that outlet,” he said. “But we live very and to mouth here. If there were just a little shred of space, a little time to think about these projects . . . ”

Success has had its costs and posed new problems for the Globe. With the winter subscription audience filling 76 percent of available seats, with overall attendance of 94 percent, and the cost of producing quality work still escalating, there is little room for growth in earned income.

“There are two ways to keep pace,” said Hall. “Maximize income or cut back on the expenses, which might mean cutting back on the quality. Our subscribers, however, will not sit back and watch bad work. They are sophisticated, they have seen a great deal. They expect a certain level of quality.”

And so the Globe is investigating the possibility of sharing productions with other theaters. “We’re working on other methodologies of production. We’re actively seeking sharing productions,” said Hall, adding that the concept differs a bit from the new custom in which ballet and opera companies share a production’s sets and costumes.

“We’re talking up front about sharing all costs and all ideas from the inception of the idea. If it is sometimes difficult for the three of us to arrive at a consensus, imagine us working with the management and artistic director of other companies.”

When asked what theaters might be involved in the new project, the triumvirate waffled.

“They are all West of the Mississippi,” said Hall.

“And bigger than a bread box,” said O’Brien.

“And not as far West as Japan,” chirped Noel.

On other possibilities for the future, they were more forthright. Demand for Globe productions has not peaked, and so Noel says he would love having another theater. A fourth house would not solve the problem of escalating costs, however, since neither Noel nor Hall nor O’Brien wants to build one big enough to help them recoup expenses.

On this point, Noel has been adamant for decades. “I feel very strongly about this,” he said again last week. “I loathe and despise the Schubert Theater in Los Angeles. I hate the necessity for amplification. Perhaps we could add more seats by adding more balconies to something like the Festival Stage so that the audience could remain exactly so many feet away from the stage. That would be the only way.”

O’Brien is just as passionate about keeping live theater real. “I did the last acoustically honest musical in New York --- ‘Most Happy Fella.’ With an enormous number of people having

Walkman in their ears and enormous number of children watching television, people have become passive in terms of visual experience and dependent verbally.

“We are still selling that leap of faith between our stage and your mind. A theater has to have less than 1,800 seats or it becomes us versus them. The generation that had a love affair with technology with the amplification of the guitar is now 20 years older and still equating pummeling with affection. People are marked by isolationism. They are watching talk shows rather than talking.

“We ban on those that still want an honest experience, who want to be real observers. We are filling a very interesting need in this society. Because theater is both very primitive and very sophisticated at the same time.

It a big theater is out as a solution to the Globe’s success, an endowment fund is definitely in.

“Our earned income is 70 percent. Yet people say, ‘The Globe is wealthy, the Globe is wealthy.’ We are not wealthy,” said Noel.

“An endowment would allow us not to impose that artificial 70-30 split (between earned and un-earned income). You know everyone thinks new plays are being done because we crave creativity and novelty. It’s really because they are cheaper to produce, just three characters and one set. Most theaters don’t do the classics anymore because they can’t afford to.

“I can’t write your story for you,” said Noel. “But of vital, utmost importance for us is the creation of an endowment. That is the real answer.” As it has been for universities and museums, he might have added, the institutions that transmit our shared values to the next generation.

Culture as horticulture.

May 26, 1985, San Diego Union, E-2. Festival curtain will rise, on time, by Anne Marie Welsh.

On a sunny morning two weeks back, a giant of a man dressed in a business suit cheered his construction crew on, discussed the fate of a singed eucalyptus tree, then turned to the Old Globe’s Tom Hall and promised the job would be done --- on time for the opening of “A Midsummer Night’s Dream.”

Seven months is not a long time to design and build a new theater. But Gene Trepte’s men are working night and day to meet the deadline.

The new Lowell Davies Festival Theater will be dedicated Wednesday as part of the Old Globe Theater’s 50th anniversary festivities. It will replace the outdoor theater destroyed in a pre-dawn fire of suspicious origins last October 29.

Ironically, the Festival Stage was built as a temporary theater to house Old Globe productions while the main theater was being rebuilt after an arson fire in 1978.

The \$1.5 million Lowell Davies Festival Theater, named for the Globe’s longtime patron and board president, has just eight fewer seats (612) than the old (620). The playing area proper is about the same size as the previous one. But the Lowell Davies Festival Theater is a permanent outdoor facility with more sophisticated technical support than that of its predecessor. Eventually, it will have traps and stage elevators.

Patrons, however, are likely to notice its solid, attractive facade first. Architect Scott McNair of Leibhard Weston and Associates designed a semi-Elizabethan entrance of stained -pine. Its cedar, shingled roofing complements the roofs of the Old Globe and Cassius Carter, the indoor theaters nearby. By the end of the year, says Hall, the shingles will have the desired, weather-beaten look.

Acoustics will be enhanced by the roof overhanging the walkway to the seating area. At intermission, the two side accesses that had previously been used as entrances and exits will solve any foot-traffic problems.

East summer, the Old Globe presents at least two productions in its outdoor theater, generating 22 percent of its revenue from this largest of its three houses.

The new Festival Theater will open June 7 with a production of "A Midsummer Night's Dream," directed by Globe artistic director Jack O'Brien.

May 26, 1985, San Diego Union, E-3, E-10. The Old Globe story is a picture of transformation, by David Gregson.

The story of the Old Globe is the story of a double life --- of two distinct personalities in the same body, but finally reconciling themselves into one powerful new identity.

For many of the Globe's 50 years, one of its faces was the San Diego Community Theater face, a profile drawn in countless hours of volunteer labor and in thousands of performances given by talented amateur actors. The other face was that of the National Shakespeare Festival, a professional summertime enterprise that gradually earned an artistic and financial success quite distinct from the Globe's fall and winter offerings.

"There was a time when the winter season of Broadway hits used to pay for the artistic success of the summer Shakespeare plays," recalls William Roesch, veteran director of more than 50 winter productions. "But then there was a complete reversal. Because of the enormous influx of tourists and people who were interested in Shakespeare, it became a question of Shakespeare paying for the fall and winter seasons."

And as the professional Shakespeare seasons grew in importance, the community theater aspect of the Globe moved into an eclipse. In this inexorable process, many aspiring local actors had to find other outlets for their talents.

Of course, it was Shakespeare that brought about the birth of the Old Globe in the first place. On April 28, 1935, ground was broken for the original theater building, an attraction of the California Pacific International Exposition in Balboa Park. The Old Globe opened May 29, 1935, with a repertory of 13, 50-minute Shakespeare adaptations.

Jackson Wooley, now a retired artist living in San Diego, appeared with that very first season's repertory company. "A number of us were from Carnegie Tech where we had played in Shakespeare plays directed by B. Iden Payne and where we acted on a Shakespearean set. The big point Payne made as a director was doing Shakespeare continuously every scene right after the other. The actions in one scene would go off one way, and the actors in the next scene would come on another way, and the next line would be spoken. Payne was very strict about this.

"Once I was playing Claudio in "Measure for Measure." I forgot my hat and was a little late coming on stage. Payne was backstage in a minute, raging because of the little time between scenes. But actually, this method of switching quickly from one scene to another was move like movies or TV than the regular stage, where elaborate sets are changed."

During the first year of the Old Globe's existence, the O-shaped theater was roofless. Plays were staged to match the overhead environment. "In the day when it was bright and sunny, we would do the comedies," says Wooley. "We would do tragedy at night."

After the Exposition closed in 1936, a group of interested citizens raised \$10,000 to remodel the Old Globe into a permanent structure and improve two adjacent buildings that had been part of the exposition's Elizabethan complex --- Falstaff Tavern and Ye Olde Gift Shoppe. Then, in 1937, the

San Diego Community Theater, a non-profit organization, was chartered by the State of California to raise funds and produce amateur plays.

The newly remodeled theater began operations December 2, 1937, with "The Distaff Side," directed by Luther M. Kennet, Jr. In the cast was Craig Noel, a hopeful young actor who would later become full-time director (1939), artistic director (1947) and executive producer (1981).

Noel had been working at a Fifth and Laurel drug store when Wooley first arrived in San Diego. "Some of us used to go over there for lunch," says Wooley. "That's the first I knew of Craig. He was very young and still in school, I think." By 1939, Noel was directing all the San Diego Community Theater productions.

Noel's steady rise to power was interrupted, however, by the longest intermission in the Old Globe's history --- World War II. Except for military-oriented lectures and entertainments, the Globe was dark from December 8, 1941 to October 29, 1947, when William Saroyan's "The Time of Your Life" began the first post-war season.

"Meanwhile I lost track of the Globe people because, frankly, I still thought of myself as a professional," says Wooley. "But in the summer of 1949, Payne came to San Diego to direct "Twelfth Night" in association with San Diego State University. I was chosen to play Malvolio, but, as far as I know, all the other actors were students.

The next summer I was Petruchio in "Taming of the Shrew; and Payne's assistant in "Romeo and Juliet." This time the plays were not connected with State College. And somewhere between that time and 1959, they started bringing in more advanced actors on scholarships." In 1959, the first professional (Actor's Equity) acting company was employed to perform what had become known as the San Diego National Shakespeare Festival.

Bill Roesch came to the Globe as a member of the Community Theater staff in the 1961-62 season. "I was the first associate artistic director," he says. "Up to that time, Craig had simply directed every play that came along, including four of the summer festival offerings. (Payne, Allen Fletcher, William Ball and Ellis Rabb were among the Carnegie Tech-associated directors working the festival.) In that season the board had decided to expand, another theater --- Falstaff Tavern, now the site of the Cassius Carter Center Stage (opened October 1968).

"The main stage by that time had become very much established as a successful sort of San Diego showcase for accepted Broadway plays --- the forerunners of the Neil Simon comedies and so forth. But we wanted an outlet for a much more adventurous, avant-garde sort of theater."

And they got it. "One season we had Craig's production of Genet's "The Balcony," and mine of "The Killing of Sister George" (both in the Carter), plus "The Owl and the Pussycat" (main stage) and this was evidently too much for some San Diegans. There was an editorial in *The San Diego Union* asking questions to the effect, 'What's happening to the Globe?' and saying, 'We had better re-examine the values of our community.' In fact, these plays were rather mild by today's standards."

Roesch has much to say about the "double life" of the Globe. "There really was a division," he says. "The paid staff would swell in the summertime, naturally, since the technical aspects of the festival required many more people than we had during the winter. But the reverse of that situation was in the fall and winter when we went back to being a community theater. Then, with the help of volunteers, we worked our buns off to get the job done.

"We had to do everything ourselves. There was a period when I, Craig and Peggy Kellner, our art director and designer, used to empty out our houses to put sets on the stage. We joked that if we used a certain piece of furniture or rug or bric-a-brac more than once in a season, the audience might

notice. I don't think they ever did --- but really, it was a bit like those Hollywood films where Mickey and Judy throw a show together in the barn."

"The Globe was, of course, a community theater, but the progress into what it is now was so very gradual I really think the fire (arson destroyed the 43-year old theater on March 8, 1978) was the catalyst. It was so devastating in every way --- physically, mentally, emotionally --- that it twisted everybody's way of thinking. Even before the fire, the board was divided for a number of years. "Should we remain a community theater or should we become totally professional?"

Roesch says that Noel was especially concerned over the possible loss of the amateur company and that he tried, although unsuccessfully, to acquire the Mission Playhouse (not the Old Town Opera House) as a non-professional venue which would operate concurrently with professional mainstage productions.

But after the fire and the resurrection of the theater (dedicated on January 5, 1982), the Globe went professional. By January 14, 1982, the first Actor's Equity Company took over the performance of winter season plays.

Carnell Kirkeeng, a local actor who has been popular with Globe audiences since appearing in the "Caught in the Act" review of 1949, says the hopes of many San Diego amateurs have been disappointed. "Everybody was going to be discovered at the Globe and then go to Hollywood or New York," he says. "Fortunately, I never felt that way . . . But there is no question that many of the Globe actors had a career on their minds."

According to Kirkeeng, the dedication of some Globers through the years has been remarkable. "I can remember Peggy Kellner doing all the sets and costumes for shows and having only a few volunteers for help," he says. "Now Peggy jokes that the same job is done by 40 professionals at full salary."

Although Kellner was a paid staff member, her 23 years of contributions above and beyond the call of duty have become part of Globe legend. Now a professor at the University of Arizona in Tucson, Kellner first came here for the Shakespeare Festival in 1955. "Before I got to the Globe, all the costume designers would go crazy from so much work and simply leave. One day I got a call from Craig saying, 'Be here yesterday!' Someone he'd hired from North Carolina had quit. After I got to the theater, Craig didn't even come to see me for two weeks. He was afraid I wouldn't work out.

"In those days the shows opened one right after another. I had one assistant who actually slept in the shop. . . . Now everything is run differently.

"I do think the new theater is gorgeous though. The other one was really difficult to design for. It had a 19-foot, 11-inch proscenium, and a 30-foot apron which came 12 feet out. There was an isolated rotunda which was hard to light, and two fire doors, which couldn't be covered up due to regulations."

If Kellner was a hard worker, so were her volunteer helpers --- and the Globe has an inspiring history of volunteerism at every level, from those who served refreshments to the fund-raisers, the Globe Guilders. Irma MacPherson started the Guilders in 1935. "From the very beginning, they were the backbone of the Globe," says Kirkeeng. "They put in hours and hours, selling tickets, arranging parties, getting their husbands there and getting people interested. They were the ones who pushed us to the status that the theater enjoys today."

Today, after all these years of love and dedication, the Old Globe has the largest subscriber base of any non-profit theater in America. The outdoor festival stage, a victim of arson in 1984, has been rebuilt as the Lowell Davies Festival Stage. The 500th production looms on the horizon. A Tony award for outstanding achievement for regional theater is only one year in the past. There has been

a satellite telecast ("The Skin of Our Teeth") from the main stage and Queen Elizabeth II has paid the theater complex a visit.

Perhaps after all, it was inevitable, that thanks to the blood, sweat and tears of dedicated people, that the profession face of the Old Globe now turns into the sun of a promising future.

(Gregson is a free-lance writer.)

May 26, 1985, San Diego Union, E-4. Critic Welton Jones finds his favorite hits at Old Globe Theater.

Since my arrival in San Diego half-way through the 1965-66 season I've seen 255 productions at the Old Globe Theater, 53 of them by William Shakespeare.

My first look was a production of Sidney Shelton's mindless comedy "Roman Candle" and nearly everything since has been on the upswing.

There is no doubt at all that production standards have soared at the Old Globe Theater during the past 20 seasons. Today, the budgets are higher, the staff is larger and more professional, the artists include some of the best working in this country and the large, contented Globe audience testifies to the fact that none of this is wasted.

But there were some dandy shows in the past, too, and some of them hold up in memory as real landmarks in a theatergoer's career.

On the occasion of the Globe's 50th anniversary of producing shows, and on the eve of my 20th anniversary in watching them, I have selected truly outstanding productions from the past.

Top 10 lists are a journalistic tradition, but in fairness to the uncertainty of memory, these 10 are in chronological order.

"Two Gentlemen of Verona," directed by Allen Fletcher, 1966. - Too much happiness for a guy new in town! My first Shakespeare Festival included this thoroughly delightful musical comedy version of a play scholars dismiss but audiences adore. Peggy Kellner, then the resident genius and costume and set designer, provided delightful pastel cartoon decor. Conrad Susa found music for Shakespeare's verse, and Fletcher invented a wacky mime vocabulary for the supporting cast. Jon Voight and Anthony Zerbe were spirited and love-mad as Valentine and Proteus and Laurie Peters as Sylvia broke everybody's heart with her fresh charm. The same three were seen in a moving "Romeo and Juliet" (Zerbe was Mercutio) that summer directed by Mel Shapiro, who later gained fame and fortune for his Broadway version of "The Two Gentlemen of Verona." Hmmmm.

"Twelfth Night," directed by Edward Payson Call, 1967. - From the moment that Donald West as an unusually pensive Feste entered the house from the rear and strolled onto Peggy Kellner's dark, rich set, casually picking up a lute and blowing away the dust covering it, this production was magic, a sweetly melancholy version of this familiar tale with each role superbly cast and Call's somber vision never slipping for a moment.

"Macbeth," directed by Ellis Rabb, 1969. - Something went wrong that summer - some delay or shortfall of money - and this production had fewer performances than usual. But of those who saw it, few have forgotten it. Richard Easton's mad Scot was afloat in a universe of evil, peopled mainly by three witches, who assumed all the minor roles in his tragedy until, at last, only they surrounded him. Of all the 255 Globe shows, this is the one I most would want to see again, to check if it really was that intriguing.

"Tartuffe," directed by Charles Vernon, Cassius Carter Center Stage, winter season, 1973-74. - The very best non-professional show the Globe did in those 20 years. Vernon's staging of Moliere's timeless satire had everything - wit, cynicism, energy, sex appeal and a fabulous casts, headed by

Ron Ray, Julia Shelley and Lyman Saville. With perhaps one exception all the players were once or future members of Actors' Equity, the stage union and at least one was an Equity member working under a phony name, just to be associated with the Globe. Ironically, that was the winter of the great gasoline shortages and some of the actors had trouble finding and affording the fuel to get to the theater, where they played to continuous full houses - for no pay.

"The Tempest," directed by Ellis Rabb, 1975. - Probably the best. No, *certainly* the best of the 255 Globe productions I've seen so far. Rabb not only conceived a "Tempest" of surpassing depth and beauty, he also played the leading role of Prospero in an unforgettable performance which regularly hushed audiences in awe. The Peggy Kellner decor was as clever as it was sumptuous and the masque scenes, usually omitted, were given spirited and glorious life. Shakespeare's most magical play and the Globe's best actor-director combined for the old playhouse's finest hour.

"Our Town," directed by Jack O'Brien, 1975-76. - Craig Noel returned to the stage for the first time in decades, then quit while he was ahead, leaving memories of his wise and pungent performance as the Stage Manager in Thornton Wilder's masterpiece. In agreeing to do the part, Noel may have been hinting at the identity of his successor, for O'Brien was named artistic-director just five years later. In any event, O'Brien provided a reading of this seminal American play which can stand as definitive, and the final tableau, with Noel walking upstage through the opened loading dock into the foggy reaches of Balboa Park was unforgettable.

"The Country Wife," directed by Jack O'Brien, 1980-81. - Though he didn't need to, O'Brien solidified his new status as artistic director with a sparkling version of William Wycherley's Restoration comedy which was so delightful that it was optioned for Broadway. O'Brien turned down the deal when the entire cast couldn't rearrange their schedules, thus sending signals of a perfectionism which subsequent seasons have confirmed. Tovah Feldshuh was a pixie dream in the title role.

"The Tempest," directed by Jack O'Brien, 1982. - On Douglas W. Schmidt's haunting, ethereal set, O'Brien challenged the memory of the great 1975 "Tempest," even inviting Ellis Rabb to repeat his performance as Prospero. Aided by the technical resources of the rebuilt Old Globe, O'Brien didn't overwhelm the memory of the earlier version, he enhanced it with his own vivid poetical vision as a gentle tribute to Rabb, his former mentor and now collaborator.

"The Miser," directed by Joseph Hardy, 1982. - It was quite a summer, with Ellis Rabb playing Prospero, Harry Groener (later, David Odgen Stiers) in Craig Noel's wondrous staging of "Billy Bishop Goes to War" on the Carter Stage and outdoors on the Festival Stage, Paxton Whitehead as Moliere's immortal miser. This was the production that introduced Tom Lacy to the Globe audiences, as a memorable French servant, but the stage belonged to Whitehead, one of the glories of the American theater today.

"Strange Snow," directed by Warner Shook, 1984. - The impact of this modest three-character drama by Steve Metcalfe was all the stronger for being so unexpected. Audiences were challenged, charmed and, in many cases, changed by the insights, Metcalfe brought to the aftermath of the Vietnam War. By focusing down to the story of just three little people, the playwright managed to indicate a healing way back for a whole nation. Shook drew superlative performances from his three actors and the whole production proved again the power of theater to enlighten as well as entertain.

The next 11 would include the 1974 - Asaad Kelada staging of Simon Gray's "Butley," with William Roesch in the title role. Kelada's "The Little Foxes" in 1976, with two of the Globe's finest actors from the pre-professional period, Jenifer Henn and Nina Midlam; Jack O'Brien's 1978 staging of "A Midsummer Night's Dream" being revived this summer; Ken Ruta's hilarious outdoor "Comedy of Errors" in 1979 utilizing the sounds of the park; Craig Noel's clever "Two Gentlemen of Verona" and Jerome Kilty's droll "Love's Labor Lost," a delightful pair of comedies transplanted into unlikely settings, the aforementioned "Billy Goes to War" in 1982; O'Brien's spectacular "The

Skin of Our Teeth,” televised live to a national audience and Noel’s superb version of A. R. Gurney, Jr.’s. “The Dining Room” in 1983; and two other shows from last season, David Ogden Stier’s antic “Scapino!” and O’Brien’s bubbly rewrite of “Kiss Me Kate.”

Happy anniversary, Old Globe, from a satisfied customer.

May 26, 1985, San Diego Union. The theater’s half century - a chronology.

May 29, 1985, San Diego Tribune, B-10. EDITORIAL: Old Globe is a lively theater at 50.

At 50, the Old Globe is nearly as venerable as the Bard himself, who died at age 52 in 1616. But its performances are as encompassing as the seven stages of life memorialized in “As You Like It.”

May 30, 1985, San Diego Union, B-1. At 50 the Old Globe has the stage and the players, by Welton Jones.

Showered by confetti and illuminated by flashbulbs, artists from 50 years of Old Globe Theater history bowed to a standing ovation yesterday as an audience of supporters sang happy birthday to Balboa Park’s landmark theater.

After the morning ceremony in the Globe, most of the crowd lingered to witness the formal opening of the Lowell Davies Festival Theater, the new 612-seat outdoor facility which replaces the temporary Festival Stage, destroyed by fire last fall.

June 2, 1985, San Diego Union, F-2. A secular cathedral in the park: the Botanical Building and Lily Pond reflect well on city, by Carol Olten.

The arcadian dream --- so alive in San Diego at the time of the 1915 exposition when a stroll into Bertrand [sic] Goodhue’s exposition was an invitation to paradise, seeks rediscovery. The Beaux Arts revival of the ‘80s may be underway.

June 2, 1985, San Diego Union, F-50. Kate Sessions - radiant beauty will forever flower in San Diego, by Patricia Post.

Kate O. Sessions’ achievements are important to remember. She was one of San Diego’s first environmentalists and conservationists. She loved the joy that a well-designed, colorful outdoor environment would bring, and fortunately for San Diego, she was willing to fight to have it done right.

June 8, 1985, San Diego Union, D-1. Globe’s “Midsummer Night’s Dream” falters, by Welton Jones.

The “Dream” that opened last night is a dry, diffused meandering production, indifferently cast and overly preoccupied with decor. There seems to be no conceptual linkage, just random highs and lows.

June 8, 1985, San Diego Union, D-1. “Engineer Dave” and his romance with miniature Balboa Park railroad.

“I really struggled with the decision for the last two years,” David Weir, owner of the miniature Balboa Park railroad, said of the 50 percent fare increase announced June 1, from 50 to 75 cents. “I hated to do it. I really did. I’d love to charge 10 cents like they did in 1948.”

June 9, 1985, San Diego Union, F-45. Dinosaurs go for free ride at Natural History Museum, by Kay Kaiser . . . Jim McMurren of C&M Crane Rental of Spring Valley lifted almost full-grown dinosaurs to a special door cut 20 feet above the ground, vaguely equal to the second floor of the Natural History Museum as a volunteer service.

June 9, 1985, San Diego Union, F-59. There is a botanically grand palm canyon in Balboa Park, by Dale Ward.

In 1983, 7.7 million people visited Balboa Park. Yet, most of those visitors were not aware of the regal collection of plants from around the world that grow there. Balboa Park can boast about 1,000 plant species spread over its 1,000 acres.

Concentrated in a tropical rain forest-like setting, in an area appropriately named Palm Canyon, is an impressive garden that is home to over 70 exotic species of palms. This lush lies area west of the Organ Pavilion and southeast of Alcazar Gardens. Many of the plants that grow here are rare and some are threatened with extinction. Sorry, no coconuts here. San Diego winters are too cold and summers too low in humidity.

The history of this canyon dates back to the early 1800s, when it was called Pound Canyon. This is where early San Diegans would find their stray horse, cow or other missing animals for it was the city pound --- sort of an early zoo. In 1873, a water company drilled a well in the canyon. A subterranean stream was tapped 300 feet down and two reservoirs were constructed on the mesas above.

The tallest palms rising from the canyon floor were probably planted prior to 1900. These Mexican palms or *Washingtonia robusta* now have slender 80- to 100-foot swaying trunks, and have characteristic “skirts” of old dead leaves at the top. *Washingtonia* palms are named after our first president and represent the only genus of native palms native to the entire state of California. They create quite an exotic look from the wood bridge and stairs built in late 1976 at the top of the canyon. This bridge was inspired by a log that once spanned the canyon’s midsection during the 1935 exposition. During those days one could take a leisurely evening stroll over the log bridge while admiring handsome palm trunks with lights at their bases; one of the earliest uses of this kind of night lighting. Overflow from the lily ponds in front of the Botanical Building was sometimes used to irrigate these palms.

Many horticulturists over the years have planted palms here. Fred Bodey worked hard planting this canyon for both the 1915 and 1935 Expositions. Today, with the help of interested park employees (and) the California Palm Society, (Palm Canyon) remains one of the greatest palm gardens on the West Coast.

The triangular trunked *Neodypsis decaryi* from Madagascar is on the endangered species list. Examples of the rare palms are thriving in a mixed planting of feather-leafed palms along the sidewalk directly west of the Organ Pavilion, next to the restrooms and hot dog stand.

(Ward is a local horticulturist who conducts botanical tours.)

September, 1985, San Diego Magazine. Balboa Park, paradise still at risk, by Sharon M. W. Bass.

When it comes to planning, Balboa Park has not suffered any lack. Nor has it suffered from lack of love. The key question is: How much good has it all done? This fall, environmental experts and planners will be analyzing yet another park master plan in fine detail. They will prepare reports on the more controversial portions for citizen review, perhaps by the first of the new year. The plan is known officially as the Balboa Park Development and Management Plan. In local shorthand, it is called the Pekarek Plan, after Ron Pekarek, whose Mission Bay design firm prepared it over the last several years. Because San Diegans have an absolute love affair with Balboa Park, the review process will be thorough --- and it will be painful.

September 6, 1985, San Diego Union, B-6. EDITORIAL: Safer Park.

Balboa Park's reputation as one of the nation's safest urban parks is being restored through the efforts of the San Diego Police Department and a private security force.

A dramatic increase in crime in the 1,300-acre park made many San Diegans reluctant to attend evening events there. Although the most prevalent crimes were car thefts and parking lot burglaries, the public's perception of the park as a dangerous, high-crime area was threatening the well-being of the park's museums, theaters, and other attractions.

It took the daylight stabbing death of Old Globe actor David Huffman in February to bring the added police patrols that have again made Balboa Park much safer for visitors, day and night. Shortly after Mr. Huffman's tragic death, police made the park a separate beat, instead of including it in a larger patrol area that stretched to the waterfront.

In addition, undercover officers, unarmed community-service officers, and even uniformed officers on bicycles have been assigned to patrol the park. Next month, a police-trained park security force will replace the private security company that was hired in June to assist police in patrolling the park.

The increased enforcement effort has paid off. Police report a 31 percent decrease in crime during the first six months of this year and predict an even lower rate for the remainder of the year.

Balboa Park, its museums, its zoo, and its other attractions are civic treasures. We're glad they are finally getting the police protection they deserve.

September 22, 1985, San Diego Union, F-59. It's a jungle out there with all those leafy creatures, by Dale Ward.

Many plants have comical names, especially those named after animals. In Balboa Park there is a jungle of plants with animal names.

Attention: Park & Recreation Board, Agenda of October 15, 1985
Subject: Japanese Garden, Site Plan Revision

Background

A Japanese tea garden was constructed for the 195 Panama-California Exposition. This garden was gradually removed in the 1940's and its site is now included within boundaries of the Children's Zoo. The 1960 Balboa Park Master Plan allocated a small site for a new Japanese Garden immediately south of the House of Pacific Relations. The 1966 Park and Recreation bond issue allocated modest financing to initiate the garden. Subsequently, interest in locating the garden in the western branch of Gold Gulch Canyon, behind the House of Hospitality, began to develop. At this time the San Diego-Yokohama Sister City Society began to actively promote the proposed garden and to solicit contributions toward its construction. Placing the Charles C. Dail Memorial Japanese Gate along the mall northeast of the Organ Pavilion in 1968 reinforced this site as the future home of a Japanese Garden. In 1972 the Park and Recreation Board confirmed this site as the Garden's future home by adoption of a master plan for the Gold Gulch area.

In 1976 the City authorized the funding of consultant services for the preparation of a master plan for a new Japanese Garden in order to define a scope of work and the required budget. To provide a means whereby interested citizens or groups could participate in the garden planning process, an Ad Hoc Advisory Committee was formed in March 1977. After more than a year of planning effort, a master plan for the garden was approved by the Park and Recreation Board and its committee.

This master plan, adopted by the City Council on January 8, 1979, contains basic goals: recommendations on garden design, philosophy; development program elements; descriptions of these elements; and suggested policies regarding the design, construction and operation of the

facility. The plan document also contains a number of graphics of suggested design details and a site plan to illustrate the goals and objectives of the Master Plan.

Early in the design process it became apparent to staff that implementation of the plan's goals and objectives, particularly those of authenticity and artistry, would require freedom from the City's many legal restraints and regulations. We envisioned an organization associated with but relatively independent of the City, similar to the San Diego Zoological Society, as the administrator of the garden. On October 7, 1979, the City Council Committee on Public Facilities and Recreation endorsed this concept by adopting the Japanese Garden Financing Plan.

With staff encouragement, the San Diego-Yokohama Sister City Society and members of the Ad Hoc Citizens' Advisory Committee incorporated as the Japanese Friendship Garden Society of San Diego. On August 31, 1981 the City entered into an exclusive negotiation agreement with the Society and on April 2, 1984 a final lease agreement for the Master Plan's Study Area was approved by the City Council. Provisions of this lease require development of a Japanese Garden "substantially in conformity with the Japanese Garden Master Plan" previously approved by the City Council and cites specific design elements to be included within the development. The Society is granted control, but no exclusive use of the small parking lot south of the "Master Plan Study Site" and the City Manager is authorized to make a final determination as to lease boundaries after the development and staff approval of a final site plan.

Upon execution of the lease, the Society contacted with Ken Nakajima, a noted Japanese landscape architect; advised by Professor M. Yokoyama, formerly of the Department of Landscape Architecture, Nihon University; to review the approved Master Plan and to make specific recommendations relative to development of the study area. Kurano Associates, Inc., architects, assisted by Kawasaki, Theilacker & Associates, landscape architects, are under contract to the Society to provide local project coordination and to prepare final schematic plans for the project.

Discussion

Under our normal operating policy, the Park and Recreation Board does not review developments within the interior of leaseholds in Balboa Park. However, due to the significance of this project, and as a courtesy to the Board, the Society desires to share with you its proposed revised site development plan. Staff has evaluated the proposal and finds it to be in substantial conformity with the approved Master Plan, and, therefore, consistent with the Society's lease. At our request, the City's Environmental Quality Division has reviewed the revised site plan and finds it consistent with the Negative Declaration adopted at the time of the Master Plan approval, even though the revised plan requires the importation of a substantial amount of additional fill soil. The determination is based on the finding that the revised proposal does not significantly alter the land form, particularly as viewed from abutting park areas.

The major changes in site development are as follows:

- 1.) The floor of the canyon is raised to provide a large area for water features and to make more of the garden easily accessible to the general public;
- 2.) The size of individual structures has been changed and in some cases have been relocated;
- 3.) To provide access for handicapped individuals it was necessary to extend the garden development along the east side of the small parking lot within the leasehold;
- 4.) The general park circulation element in the east branch of Gold Gulch will be relocated to the canyon's east rim; and
- 5.) The east slope of the canyon will be included with the garden to provide an appropriate setting for the major garden features.

The first phase of the project is expected to function as an introductory and promotional area for the garden. It will be located east of the Organ Pavilion and will be open to the public during the day without charge. The area, however, is planned to be enclosed and secured at night. The details of

this phase are still under consideration by the Society. It is our intention to bring this particular increment of improvement, when a final decision has been made on the scope of the work, to the Board and its Committees for review and recommendation, based on the project's critical location and the Society's intent to open this area to the general public without fee.

Respectfully submitted,

(Signed) George L. Loveland,
Park & Recreation Director.

October 10, 1985, San Diego Tribune, B-10, Balboa Park Administration Building, by Richard Amero.

Because Irving Gill's name carries more weight than Carleton Winslow's or Frank P. Allen's, the State of California and the U.S. Government might be induced to put up money to restore the Administration Building if they could be persuaded that Gill designed it.

October 15, 1985, San Diego Union, B-7. Letter, Use old Naval Hospital Buildings as city offices, library, etc., by E. V. Redondo, San Ysidro.

Shouldn't this be cheaper in the long run than buying land and building new buildings for this purpose?

October 17, 1985, San Diego Tribune, B-12, Letter, Balboa Park museums valued by all, by Pamela D. Crooks.

His (Amero's) statements that museums along El Prado are valuable only to the "educated and upper-class people" and are not enjoyed by the general public, are unfounded.

Aside from their providing one of the few places for the adult populace to exercise their minds, not just their bodies, in this sports-oriented city, thousands of school children visit these museums every year on field trips at no charge.

October 23, 1985, San Diego Union, B-1. Column by Tom Blair: OVER THEIR HEADS: The Musical Foundation Board has been given a three-year option on Balboa Park's House of Charm --- enough time, the board hopes, to raise money and formulate plans to turn the old home of the Hall of Champions into a music center. Alas, the old building has been declared structurally unsound, and any plan undoubtedly would necessitate tearing it down and starting from scratch --- a \$6 million to \$8 million project. The city just spent \$60,000 on a new roof --- with a 20-year guarantee.

October 23, 1985, San Diego Union, B-3. Fourth and six-grade pupils find learning is fun at Border State Park by Lorie Hearn.

Post Children's Cereals and Pacific Bell put up the money for the trip (to the Border Field State Park) and for teaching materials sent out to more than 3,000 classes in the major metropolitan areas of the state to prepare for the first Junior Ranger Field Trip, border park ranger Randy Hawley said. No taxpayers' funds were used, he said.

October 24, 1985, San Diego Tribune, B-1. Reclaimed water for use in Balboa Park is proposed, by Sharon Spivak.

A San Diego City Council committee has been told that a new wastewater treatment plant should be built atop a knoll southwest of Morley Field in Balboa Park, with a goal of reclaiming 1 million gallons a day that would be used to irrigate the park.

Construction of the Balboa Park building could begin late next year, and the Mission Valley facility would close when it was completed. The plant would tap into a main sewer in Florida canyon and use that wastewater for reclamation.

November 6, 1985, San Diego Tribune, B-2. Balboa Park officials study dying fish in Lily Pond.

Gary Stromberg, park grounds maintenance manager, said most of the fish --- mainly goldfish and koi --- have been dumped into the pond by visitors. The lily pond was never meant to be a fish pool but simply a reflecting surface for the botanical garden buildings that lie behind it, he said.

November 10, 1985, San Diego Union, F-47, F-50. Balboa Park stands as a verdant monument, by Betty Newton.

The Navy wants to fit into the Balboa Park look, but the art-deco or postmodern touches on the long chunky buildings set their own style. Not a satisfactory one at this point. The burden of making the hospital a good neighbor now is apparently up to the trees.

November 10, 1985, San Diego Union, F-53. Redwood grove thrives in Balboa Park, by Dale Ward.

Heading north from downtown on State 163 take the Quince Street exit into the park and you will pass right by this giant redwood grove.

November 17, 1985, San Diego Union, F-48, F-49. Balboa Park has its roots in Expositions, by Betty Newton.

As we talked of Balboa Park and the (1935-36) exposition, Eileen Melander (an exposition visitor) repeated, "It'll be fine if they don't change too much; make it too modern. They should keep it as it is."

November 23, 1985, San Diego Union, B-3. Dr. Frank Enders, veterinarian from U.S. Department of Agriculture says progress at Zoo is satisfactory, deficiencies cited early this year are being corrected.

Enders said many problems are due to the Zoo's age. "They've got some old facilities (that) will not be up to standard until they are gone -- either renovated or razed," he said.

He said other problems can be blamed on poor design and others can be corrected with more attention from the staff.

Enders cited problems with the water quality in an inspection last March, but found none Tuesday.

November 24, 1985, San Diego Union, F-36, F-37. Balboa Park is great now, but you should have seen it in 1935, by Betty Newton.

The Prado is different today (from 1915). Lighter. It is no longer dominated by eugenia bushes and the acacias. In its place are palms: tall queen palms, shorter kentias, clumping Senegal date palms, an occasional old, heavy-fronded Canary Island date palm; and tall old dracaenas and good-sized camellia bushes. The new light look lets the beloved buildings, whether old or reconstructed, show off.

Years ago an 18-foot oak was planted near the Balboa Park Club honoring John Morley, park director through all the formative years, 1911 to 1938. The oak did not make the transition to its new location. It died. A second commemorative Morley oak lives today about 150 feet west of the organ pavilion.

After Proposition 13 passed in 1978, gardening crews citywide were reduced. Instead of 40 gardeners at Balboa Park, there now are 25. And some are employed seasonally.

Dave Roberts, deputy director of the Parks and Recreation Department, says, "The whole park is a lot shabbier than in used to be. Things that normally got caught up on in a slow season, such as tree-trimming, re-landscaping, cleaning canyons and taking care of picnic tables, just don't get done any more."

December 4, 1985. San Diego Tribune, D-1. It's Christmas on the Prado, by Gregory Nelson Joseph.

Shirley Phillips remembers the first Christmas on the Prado in 1978, when the weather became so chilly that organizers conceded privately it also might be the last such holiday celebration along the popular avenue of museums in Balboa Park.

January 5, 1986, San Diego Union, B-3, B-6. Zoo's people pleased to have James Bacon, Jr. in charge, by Gina Lubrano.

This month, James L. Bacon, Jr. of North Park changed his routine.

Instead of running through Balboa Park between 6:30 and 7 each morning, he takes a stroll through the San Diego Zoo.

As the new general manager at the Zoo, he was instructed by his book to be a "hands-on-manager," to be "someone whose shoes are muddy."

During his strolls, Bacon talks to employees, checks progress on construction projects, notes what needs to be done and keeps in touch with employees who tend the animals and plants as well as those who take care of the visitors.

"The Zoo starts early," he explained. "If I'm going to manage quality time as general manager and curator of herpetology, I'm going to have to start earlier."

Zoo employees are pleased to have a man directing operations who has a lifelong interest in animals.

"It's progressive in that line," said Art Goodrich, a senior hoofstock keeper and president of the local chapter of the American Association of Zoo Keepers. "For the most part, people came here to see the animals in their natural behavior."

"We have a person who understands those things, finally. Personally, I think it's a movement upward."

Bacon, 46, was named last month as general manager --- the top job at the Zoo --- to replace Terry A. Winnick, whose resignation was announced simultaneously with Bacon's appointment.

Winnick had come to the Zoo in 1982 from MCA, parent company of Universal Studio Tours, with a background in outdoor recreation. He was criticized by some employees when, under his management, the Zoo booked concerts that have since been discontinued, and brought in a short-lived animal show that they felt was not up to Zoo standards for emphasizing natural behavior.

“We realize we need to have some type of activities that bring in money, but most of us are more comfortable with an animal person,” said tour guide Charles Gifford, chief steward for Teamsters Local 481, which represents more than 700 of the Zoo’s 1,000 employees.

Winnick, who will stay until at least the end of the month and then become a consultant, defends his tenure at the Zoo. He said some newspaper reports have made it appear “we were concentrating on the wrong things.”

The welfare of animals has always been foremost, he said, adding, “We have taken some things the Zoo was doing and hopefully we have made them a little better.”

Winnick said his ideas resulted in the Diamond Edge plan, a five-year outline that ultimately will change the face of the Zoo. Bacon worked as strategic planning coordinator for the project.

Douglas Myers, executive director of the Zoological Society of San Diego, said it was Bacon’s work on the long-range plan that made him a prime candidate for the general manager’s job.

“Jim was the No. 1 candidate,” Myers said. “Once I looked on the inside (for a general manager), I didn’t have to go outside.”

Bacon, he said, is a “very organized person. He has great follow-through. His longevity at the Zoo gives him a historical advantage. Because we are going to rebuild the entire Zoo, his biology background will be of great assistance.”

Betty Jo Williams, president of the society board of trustees, also praised Bacon for his work on the plan, saying, “He did an excellent job there. He is an excellent facilitator and communicator and carried out his task with great aplomb.”

Bacon, who holds a doctorate degree in biology from the University of Chicago, joined the Zoo staff in 1975, after seven years teaching biology at the California Polytechnic State University at San Luis Obispo.

“What’s fun about all this is the general manager’s job has not been described fully yet,” he said. “I’m participating in rewriting” the job description.

He said so far, the job carried with it “heavy emphasis on day-to-day management, working with people who are responsible for the people, plants and animals. It looks like some of the show and merchandise-related activities that were part of the job that Terry was doing will be removed from the general manager’s responsibility.”

Bacon is happy that the show and merchandise responsibilities are going to be assigned to other managers, saying that it was clear “that there were too many things happening . . . to many responsibilities in the office. Terry was spread pretty thin, in my opinion.”

A year after joining the Zoo, Bacon enrolled in management-skills courses and seminars. He studied two years with the American Association of Zoological Parks and Aquariums Management School.

Although his background is with animals, he had not handled animals on a day-to-day basis since his days at Cal Poly, where he was an associate professor of biology. His job as curator of herpetology involved management of the reptile collection as well as working with people.

“Every day at this institution has been different,” Bacon said. “I never regretted switching from academia to the zoo world.

“I didn’t know how quickly and deeply I would become involved in the totality of the zoo business. At this point, I feel really happy with what I see happening to the organization.”

Bacon said while the Zoo was growing, problems developed and departments began competing with one another. Now there has been a turnaround and employees of various departments are working together toward common goals, he said.

“You won’t find anybody more supportive of Bacon,” said David Glines, quality circle coordinator for the Zoo.

Glines, a former janitor and shop steward until he became part of management, said Bacon has been “real supportive of the change toward participation management at the Zoo.”

“I think his promotion is symbolic of the change in the autocratic style of management toward a participative style,” he said. “Bacon has shown himself to be an open-minded individual. It’s really encouraging to see him walking the grounds, talking to the troops.”

January 12, 1986, San Diego Union, F-35. Civic groups push 78-year old dream to link park to bay, by Roger Showley.

Three teams of architects, planners, bankers and engineers will spend next Saturday morning working on ways to link the park and bay. Three architects are leading the team: Richard Bundy, James McGraw and Walt Collins.

February 9, 1986, San Diego Union, F-47. Evidence abounds of Kate Sessions’ nursery, by Dale Ward.

The City Nursery until recently occupied the land off Park Boulevard where the new Navy Hospital now stands in Florida Canyon. The new nursery is presently situated on the Morley Field side of the enormous park and comprises about three acres. The location was an old dump and is considered temporary. Plans are under way for a new nursery in Morley Field.

February 24, 1986, San Diego Tribune, B-1, B-2. “El Cid” encircled in parking fuss, by Maga Puente.

“Unfortunately,” (San Diego architect Michael) Wilkes says, “the best view now is the southbound end of a northbound horse.”

March 2, 1986, San Diego Union, B-1, B-2. Increased patrols relieve many, not all apprehensions, by Jim Okerblom.

Despite the heavy security and the statistics, some park goers are not convinced --- and the time when San Diegans could feel as safe in Balboa Park as they did in their back yards may be gone forever.

March 18, 1986, San Diego Tribune, B-7. Balboa Park doesn’t need car museum, by Ron Palmer.

Without shame or embarrassment these wealthy paragons of free enterprise are asking the very public they want to evict for a free building, free parking and huge tax give-aways. They want to pursue their valuable classic-car investments as a “non-profit” business.

April 14, 1986, San Diego Tribune, B-1. Jousting over use of Balboa Park buildings . . . cloggers, square dancers, table tennis players, handicapped field hockey use Conference Building, by Rita Calvano.

If approved, the auto museum would sign a lease with the city requiring the non-profit corporation to restore the building at an estimate cost of \$250,000.

Restoration would have to begin within six months of signing the lease and would have to be completed within five years, along with construction of an additional display area behind the Conference Building, where grass and a children's playground now exist.

The museum expects to have made \$221,900 at the end of the fourth operation year. Terry Knoepp, board member, said. The amount includes \$82,000 in hotel/motel taxes, which the city would still have to agree to.

April 17, 1986, San Diego Union, B-15. Last, loving look at Zoo, by Sheldon Campbell.

(Editor's Note: Just before his death on December 16, 1985, Sheldon Campbell, president of the Zoological Society of San Diego, completed this report to the board of trustees.)

Because this is my last report as President of the Zoological Society, a recital of accomplishments could be construed as bragging. Such is far from the case. Being President of the Society is actually a humbling experience.

To being with, no matter how well you perform, you are likely to be upstaged (and for that matter) out-performed) by an ingenious orangutan who spends most of his waking hours figuring out ways to outsmart you and the professional staff by devising strategies for escaping from his enclosure. One is humbled to realize that ten years from now the name Ken Allen will be better remembered than one's own.

Second, you soon learn that if that same orangutan were somehow made president of the society, it would be he rather than you making the presentation of our conservation medal to Prince Philip and dining with the Queen aboard the royal yacht (after, no doubt, a few lessons in etiquette and refinement of table manners.)

The moral is clear. It's not the individual, but the reputations of the San Diego Zoo and Wild Animal Park which lift the incumbent president to such exalted status that he or she can dine with princes and queens.

Most importantly, the president of our society soon learns that he or she alone can accomplish nothing. There have been, I think, some praiseworthy accomplishments during my three-year tenure, but for every single accomplishment, praise should go to somebody else, and for most of them, to several somebody else's because most of what we do requires a team effort.

In fact, if I were to accept any personal praise, I would want it to come because I was smart enough to step aside and let the good people on our staff, committees, and board of trustees secure the present and establish beachheads in the future for our two great institutions.

Although the best is yet to come with the completion of the African Rock Kopje and the significant and innovative rain-forest exhibits in Cascade Canyon (made possible by donations from any people, including the largest we have ever received, \$3.3 million from Mrs. Ray Kroc), we have seen a creditable amount of building over the past three years.

New or completely renovated structures fall into two general categories. Those that are designed to increase our revenues so we can go on paying the bills and those which relate to the care and exhibiting of our animals and plants or otherwise help make our two zoos better for visitors.

These categories fit in nicely with the "Key Result Area" which have been elaborated in the Society's long-range, strategic plan. The Diamond Edge (So named because we have targeted the completion of our objectives for 1991 --- our diamond anniversary year) has focused on five

significant goals. These include work to: Develop a comprehensive plan integrating animals, plants and facilities; make the organization more responsive to its operating environment; enhance our revenue; and improve the visitor experience.

We have set out standards high, as we always do, and we believe that the Third Generation Zoo can be a reality with the support of you, our friends and members.

Another achievement of which we are proud is the Society's first attempt at self-publication. Simply put, this means we were successful in creating and printing a book entitled *Wild in the City: The Best of ZOONOOZ*. It really is a beautiful edition and we have received numerous compliments from those who have copies.

With an eye toward education, last year marked the initiation of our Distinguished Speakers Lecture Series, with Roger Fouts and Joanne Tanner. Underwritten by a generous grant from Ralph's Grocery Company, we hope to present five programs of Zoological Society interest during 1986.

Perhaps the most far-reaching activities that we experiences involved international travels during which representatives of our society made progress in our relations with other conservation-oriented people.

From New Guinea to Ecuador and Paraguay to the USSR, and most importantly to China, we journeyed and were warmly received. Common interests were explored, and friendships and sincere professional collaborations were developed. It is on this solid foundation which we intend to further cultivate alliances with other nations in our global effort to promote wildlife preservation.

The years ahead are filled with both promises and challenges. We will do everything in our power, with your encouragement, to continue our progress in the areas of research conservation, education and recreation.

April 22, 1986, San Diego Tribune, B-6. Letter, Will an Automotive Museum extend free admission?, by Mrs. Helen Thrasher.

As retired seniors on limited income, my husband and I enjoy and appreciate the free entertainment in Balboa park on Sunday afternoons.

It costs us nothing to watch the dance groups in the park buildings, but if an automotive museum takes over, will they extend free admission?

Another museum might be nice for the once-a-year visitor to the park, but to the once-a-week "regulars" it is a great disappointment.

Will they next take away the organ concerts and lawn programs?

April 25, 1986. San Diego Tribune, B-14. Letter, Conference Building one-tenth the size of two football fields, not the size of two football fields, by C. J. Paderewski.

In *The Tribune* of April 14, the article, "Balboa Park buildings: jousting over their use," has a slight error.

To quote " . . . the building (Conference) whose 10,000 square feet of usable space is roughly the size of two football fields . . . " This isn't even close to being correct.

A football field measures 160 feet by 300 feet, r 48,000 square feet, and two football fields would be 96,000 square feet, which makes the usable space in the Conference Building, approximately one-tenth the size of two football fields, not the size of two football fields.

Unfortunately, readers who have never been in this building will have an entirely incorrect impression of its size and most certainly will develop wrong ideas as to its use.

Incidentally, converting the Conference Building into an “automotive museum” seems logical in that such use would be compatible with that of the Aerospace Museum, which is immediately adjacent to it. Both museums would attract persons of like interests.

April 28, 1986, San Diego Union, B-1. Zoo takes first step in climatic redesign, by Gina Lubrano.

The bobcat is busy at San Diego Zoo. But it's not an animal --- it's a miniature bulldozer moving earth in a way that will make current Zoo maps obsolete.

Workers are using the machinery to create a \$1 million kopje (pronounced copy) exhibit that is scheduled to open in June. Kopje means an island of rocks in an African plain.

The kopje exhibit is the first of a series of projects to redesign the Zoo around climate zones as part of an ambitious development plan known as the Diamond Edge, which will carry the 70-year old Zoo into its Diamond anniversary in 1991. However, climate-zone conversion will take at least 20 years to complete and cost an estimated \$100 million.

The animals are now grouped according to types --- hoofstock in one area, primates in another. The new layout will be bioclimatic --- plants and animals found in particular climates, such as deserts or tropics, will be grouped together.

Demolition work already is under way for the \$4 million Cascade Canyon project to transform a second area of the Zoo to a bioclimatic zone, this time a rain forest. Work on that project could be completed as early as next summer, said David Rice, director of planning and architecture for the society.

Once Cascade Canyon is done, “we have some choices to make on priorities,” said Richard Binford, deputy director of the zoological society.

He said it will be up to trustees how to proceed --- to go ahead with Bear Canyon, another area of the Zoo, or concentrate on another aspect of the Diamond Edge, making the Wild Animal Park financially self-sustaining.

How quickly plans are implemented depends on availability of money and manpower, he said.

For now, anyway, most of the energies are on the kopje exhibit that is going in an unused area of the Zoo. When first conceived, the project was estimated at \$587,000, but key changes, such as doing the project in one phases instead of three, drove the cost to \$1 million.

“The kopje is a major test of our bioclimatic concept,” Binford said.

“I'm really hot on the entire redevelopment plan,” said Dr. James Dolan, the society's curator of mammals.

Although San Diego is not the first Zoo to go to climates, Dolan is confident that the environment here will make for more diversity.

“By the time we're through, I don't think anybody has the potential to catch up to us. We can do things here climatically that has other people hamstrung. It's a really exciting time for all of us to see the Zoo developing in a new direction, a very modern direction.”

Dolan is convinced animals will prosper in the new exhibits and that visitors will be provided with a better educational experience.

“It’s going to be more like their natural environment,” he said of the animals, making it possible for them to behave more naturally.

Zoo visitors who walk by the kopje construction or see it from tour buses will spot the upheaval of rocks for which the name is derived. Workmen are spraying concrete on wire forms to create 64 huge boulders that are being mixed with 15 tons of natural rocks. While still wet, the boulders are covered with tin foil for texturing, making them look like huge chocolate kisses.

The project also will include plants that are found in the grasslands of an African savanna. Finally, animals that will be placed in the exhibit will include the klipspringer, a type of antelope; rock hyrax, which resembles a rodent; dwarf mongoose; Verreaux’s eagle, and reptiles.

Charles Coburn, Zoo horticulturist, believes that visitors will know immediately that the exhibit is different from anything else at the Zoo. Visitors will recognize them as “much more advanced,” “much more sophisticated.”

It is the job of his department to landscape the exhibit with more than 100 plant species, among them 10 different grasses and 10 different species of pelargonium, a type of geranium.

Coburn sees the new concept as providing a “gallery for very interesting plants.”

Once the entire project is complete the new Zoo layout will represent nine bioclimates. While not trying to reproduce the climates, “we will take advantage of the microclimates of the canyons,” Rice said.

The bioclimatic layout “makes it a representation of what the world is really like, so we’re not displaying just the animals, but the animals and vegetation . . . that’s appropriate,” he said.

Design guidelines for the bioclimatic exhibits contain five goals.

- Recreate the drama of encountering animals in the wild by creating an illusion of wilderness.
- Recreate the natural habitat as accurately as possible and populate it with animals that are found in the environment.
- Immerse the visitor in the landscape by allowing him to wander around “sensing the feel, sight, smell and mood of that landscape before actually seeing the animals.
- Place the visitor in an unfamiliar world and make the animal dominant overall. “Arrange the exhibit so that the viewer unconsciously accepts the attitude of being at that moment subordinate to animals being viewed.”
- Eliminate distracting and incongruous objects and views, such as man-made structures.

Rice said the new approach has brought more people into planning and working on the exhibit. Under the old way, about 30 people were involved in new exhibits. The kopje project has involved about 100 people, making it admittedly more cumbersome, but bringing with it a wealth of talent.

May 16, 1986, San Diego Tribune, B-14. Policy requiring fees for reserving picnic shelters at Rohr Park pours rain on picnic plans, by Laura Preble.

May 24, 1986, San Diego Union. Robert D. Gardner, car lover, helps plan Automotive Museum, by Gina Cioffi.

Because the city no longer will pay for maintenance at the Conference Building, Gardner said it makes sense to allow the museum to use the building and pay for remodeling and upkeep.

There will be an auto-restoration area where volunteers, with or without mechanical aptitude or experience, can help turn rusty wheels into dreams on wheels.

May 28, 1986, San Diego Union, B-7. Letter, San Diego Union has not fairly presented two sides to issue of Automotive Museum, by R. Wells, San Diego.

In its naiveté, or by a non-stated opinion on a matter, *The San Diego Union* by its article concerning a proposed auto museum in Balboa Park (May 24) has grossly omitted many salient points --- mainly the considerable opposition to such development in one of the prime locations in Balboa Park.

In brief, at public meetings to date, it has been shown that the politically well-identified "auto-museum" corporation has doubtful financial resources to accomplish its stated goals. It was questioned as to whether or not it was a parking lot for collectors' personal automobiles.

The organizations presently occupying the Conference Building in Balboa Park made meaningful arguments totally upholding the present community-oriented use of the building and substantially debased the corporation's argument for its rent-free use in Balboa Park.

Good grief, editor, most of your supporters and we other captives recognize that there are at least two sides to most issues. Your staff, well knowing this, should better address the future of one of the key issues concerning Balboa Park.

May 29, 1986, San Diego Union, B-2. Museums to offer ticket package, by Lew Scarr.

The package, called "A Passport to Balboa Park," will represent \$10.50 worth of museum tickets for \$8 and will be available at each of the participating museums and the information center in the House of Hospitality.

June 15, 1986, San Diego Union, F-35. Balboa's series of rose gardens reflects attitude change in United States, by Dick Streeper.

It might surprise some persons to note that the current Inez Grant Parker Memorial Rose Garden is actually the eighth rose garden to be planned or built in the park.

June 18, 1986, San Diego Tribune, A-1, A-9. Betty Jo Williams, Zoo's ambassador, by Rita Calvano.

Betty Joe Williams listened with growing concern as discussion at a lunch with community leaders focused on serious matters such as drugs and children who use them.

Then it was her turn to introduce herself and speak.

"I'm representing the San Diego Zoo and Wild Animal Park," Williams recalls telling the group. "How wonderful it is that we have something going on in our community which is wholesome, considered like home, mom and apple pie."

She went on to relate that a Navy Hospital official had told her how delighted he was that San Diego has a place like the zoo where young military men and women can spend their time.

It was a typically upbeat presentation by Williams, president since January of the city's pre-eminent board, that of the 70-year-old Zoological Society of San Diego.

On the surface, she seems Pollyanna-like, brimming with optimism and idealistic views about the zoo's place in the community.

"It's a privilege and an honor to have the position and have the responsibility because the zoo is a treasure for San Diego . . . and to the people of San Diego," she says.

"You realize the obligation you owe not only to the past but to people here now to see to it that the zoo is what they want and stays on the cutting edge of what a zoo should be."

Behind the constant smile, when pushed about her ability to lead this 12-member board, the rest of whom are prominent, influential men, Williams exudes confidence.

"It's no time for jitters," she says. "I think you have confidence in your fellow board members, confidence in the staff. You realize that they would like you to do your best. You realize that they must have confidence in you to have elected you . . .

Fellow board member, Dr. Albert Anderson is quick to offer his vote of confidence.

"An outstanding president," he says. "She understands people very well, knows how to handle a meeting. Her attitude about the future of the zoo and the things that are going on are always upbeat."

George Gildred, another longtime director, says Williams is a solid leader.

"I don't think for a moment she puts up with anything that she considers frivolous," he says. "I think the zoo is all business to her, and properly so."

Indeed, she expresses determination that the zoo maintain its national and international reputation.

"The pressure," she says, "is knowing that you're responsible for this wonderful treasure in our midst, that it is the premiere visitor attraction, drawing millions to San Diego, the responsibility to the city, to our members to keep it in pristine condition."

And she knows that requires a continuous commitment to staying ahead of the pack in such key areas as the animal and plant collections and reproduction of rare species.

She also must shepherd the 130,000-member society, fund-raising, international diplomacy to ensure animal exchanges, a continuous program to build new exhibits and the zoo's \$52 million annual operating budget.

To accomplish all that, Williams spends at least three or four days a week on the job. She also walks the zoo grounds at least once a week, recently to check on all the babies born at the park, always a cause for celebration.

Her trademark page-boy haircut bobbing, she leads a visitor on a quick-paced, exhausting tour of the grounds.

At the camel exhibit, she points to a fuzzy-haired fellow nuzzling up to his mother, as the father, on the other side of a fence, stands tall.

Williams beams at this young snuggler, the first Bactrian (two-humped) camel to be born at the zoo since 1948.

The next stop is the \$900,000 kopje exhibit, scheduled to open in early July. Two society employees accompany her on this part of the tour, pleasing her with their detailed knowledge of everything from marketing studies to the process involved in the enclosure's design and construction.

The results that we see at the kopje exhibit . . . are the ones that to me are the most thrilling," Williams says, "because the visitors' experience here to me is what is the most important part of the zoo."

The kopje --- in Africa an outcropping of rocks --- is the first of several exhibits to be built over the next 30 years --- at an estimated cost of more than \$100 million --- that will display plants and animals native to certain climatic regions of the world.

Now beasts are exhibited more according to species, some in worn, barred cages or enclosures with moats dating back to the late 1920s. Many of the zoo's equally rare shrubs, trees and flowers grow throughout the 100-acres, regardless of where they would naturally fit into the environment.

The kopje exhibit was built to begin correcting that situation.

"It . . . shows the least amount of barrier to you and the most natural living quarters for the animals," Williams says.

During the four-hour tour, Williams listens and observes, waving to a frequent visitor she recognizes and asked questions at the Avian Propagation Center, where rare birds are bred and raised. There, she holds a 3-month-old blue and gold macaw. It bites her on the finger. With typical aplomb, she remains calm, as bird keepers rush to her aid.

Later, Dr. Werner Heuschele, new director of the Center for Reproduction of Endangered Species, keeps her laughing with animal yarns. She also lends a sympathetic ear as Heuschele tells her that his house was burglarized the night before.

Modest and soft-spoken, she takes no personal credit for society accomplishments, past or present, preferring to emphasize teamwork and to shower glory upon colleagues and employees.

"We're all in this together," she says.

She acknowledges changes, however, in her own schedule and in her responsibilities.

"It used to be that I was on more than half of the (12 board) committees before I became president. As president, I try to go to as many committee meetings as possible so I understand what our members are saying. I'm more knowledgeable about the direction, problems and successes in any particular area."

Her leadership style contrasts somewhat with that of her predecessor, Sheldon Campbell, who enjoyed spinning a yarn for anyone who would listen, was glib and anxious that the board adopt his ideas.

"That's not my style," Williams says. "I feel that rather than push my ideas forward, I prefer to have the ideas come to me and try and work out the ideas of everyone and see to it that those ideas that are to the best interest of the society (and) worked out to everyone's satisfaction."

Anderson offers this comparison:

"I think that Sheldon was the scientist type who spent almost . . . his entire working day at the zoo and did a really good job, where B. J., although she understands the scientific portion of it, is also more business activated. I think she gets more things done a little bit faster."

During her one-year term, Williams intends to concentrate much of her own work as president on improving the visitor experience --- a term officials use to describe how a visitor's time is spent at the zoo or Wild Animal Park.

"It has been my experience that when people see the zoo and when they become delighted with it, they want to become involved," she says.

She will also focus attention on new ways to lure large donors to contribute to the zoological society.

"We have some very close zoo family members that are large donors, and who are very important to us and who have made possible the wonderful third generation of exhibits which we will all enjoy," Williams says.

"We love our major donors. We consider them a very important part of our family, and there is all this room for everyone who wants to join our family at whatever level they wish to participate."

More than 90 percent of the operating budget comes from the “terribly important” memberships, gate receipts and food and gift sales. The expenditures for major construction, however, are entirely financed by contributions.

Williams respects all donors, writing handwritten notes to some, adding notes to form letters and individual letters of thanks, adding a personal touch to foster good will.

In discussing the society’s work, Williams frequently refers to the Diamond Edge plan, the society’s comprehensive development plan that will take the zoo to its 75th birthday and states a philosophy that includes education and research as key goals.

“We’re providing the best zoo and wild animal park in the world, according to world-class standards,” she says, “and we can only provide them (visitors) the most unusual, the best exhibit anywhere by providing them with education and the research to keep all those lovely animals.”

The plan represents a philosophical shift. It concentrates much more heavily on education, research and conservation than many perceived it to be last year when *The Tribune* published a series of articles that in part dealt with employee complaints about entertainment at the zoo, both in an animal show that was to open soon and about summer concerts at the zoo.

The employees said the entertainment detracted from the zoo’s real purpose as a protector of wild animals and plants among other things.

“That (displeasure with the concerts) was quite a common complaint among people at the zoo, employees,” she says.

Trustees had already decided to shift gears by the time the articles appeared, she says.

Williams defends former zoo general manager Terry Winnick, who resigned last year, and was considered by critics to be among those who planned entertainment at the expense of conservation.

“Terry was very good in his time, and he did exactly what he was asked to do,” Williams says. “The trustees had asked him to put on concerts, then . . . we changed directions . . .”

She adds that Winnick also had started to carry out the Diamond Edge plan.

He was succeeded in January by James Bacon, a biologist and long-time zoo employee who had been curator of reptiles at the time of his appointment.

Bacon died April 4. Art Rissser, a veterinarian and curator of birds, who is widely recognized for his part in the California Condor Recover Project --- aimed at saving the birds from dying off --- became general manager April 5.

In her role as board president, Williams is obviously well versed in a wide range of areas important to the zoological society. But, above all else, her love of animals is apparent, as she talks to the animals by imitating their squawks and chirps.

That love stems from her childhood.

Williams, a Los Angeles native who moved to San Diego 33 years ago, recalls an aviary in her backyard when she was growing up.

“My father thought all children should be raised in the country,” she says.

Because his manufacturing businesses were scattered, he had to be centrally located, thus living in the city and doing the next best thing to provide his kids with a country atmosphere.

“He tried to bring the chickens and ducks and geese to use,” she says.

A professional volunteer most of her life, Williams follows the footsteps of her mother, who was a member of the Beverly Hills board of education for 12 years, and a couple of grandparents who were heavily involved in Los Angeles civic affairs.

Trained by the Junior League, an international organization that had groomed many women for public service, Williams boasts a long list of volunteerism, including serving as past president of the Junior League, a director of the Natural History Museum and a fund-raiser for Stanford University, her alma mater.

In addition to the zoological society, she is on the board of the Committee of 100, which tries to preserve the Spanish colonial architecture in Balboa Park, and she is a member of the Wednesday Club, which, she said, is “a ladies’ educational and literary group.”

She lives in Point Loma with her husband, Hal, a stockbroker who has his own list of service to the community, including a seat on the board of the Old Globe Theater. The couple has three grown children.

She hopes to make a lasting imprint on the zoo, a legacy of improvements that keep the zoo a place “where you can spend a delightful day, learn about our life on this earth with these animals.”

“In this world of so many problems,” she says earnestly, “the zoo . . . is something that adds to our life personally. It’s wholesome.”

From mid-spring through summer one of the main attractive features of this special Spanish garden is the blood-red trumpet vines, *Distinctis buccinatoria*, which produces a glorious canopy covering half the outdoor dining level with color.

June 30, 1986, San Diego Tribune, B-1. Casa del Prado in Balboa Park is illuminated with artificial moonlight from a \$25,000 lighting system donated to the city by the Committee of 100. The system was designed by John Watson, who specializes in creating artificial moonlight. (photo)

July 11, 1986, San Diego Tribune. Work is nearing completion on a \$1 million restoration of Spreckels Organ Pavilion; 142,000 interlocking paving blocks; retaining wall, terraces, 32 shade trees; Dick Keckler, superintendent.

July 27, 1986, Los Angeles Times, II, 1, 3, 12. Cars or cloggers? Space war splits Conference Building; Dancers battle for slice of Balboa Park space, by Jenny Scott.

On the surface, it hardly seems a building to go to battle over. A long, low-slung, white elephant covered with peeling tan paint, housing a huge hall like a high school auditorium left over from an era of higher birth rates.

But the Conference Building in Balboa Park is at the center of a growing war over the future of one of the world's most remarkable downtown parks. At issue is who will have access to the park in the future --- who will find a home there and who will be eased out.

On one side of the Conference Building controversy is a phalanx of square dancers, round dancers, folk dancers and cloggers, backed by Ping-Pong, badminton and volley ball players, and jugglers who have used the building and others near it for years.

On the other side is an assortment of car buffs and collectors, backed by some park planners and administrators of park museums. They have grand plans to turn the Conference Building into an auto museum, replete with Adolf Hitler's Mercedes-Benz.

"A rich man's garage," the dancer faction growls scornfully.

"Mom and apple pie!" the car people grumble back.

The dispute exemplifies a broader debate over the evolution of Balboa Park, a debate likely to intensify as population growth increases the demand and pressure for space. For some, it is also a debate over the future of the city: What will the park, and the city, be for San Diegans?

Some, like Ron Pekarek, who is revising the park's master plan, say Balboa Park is no longer a community park, but a park "of regional and national significance." So the city can no longer afford to subsidize space for dancers, Boy Scouts and amateur archers, he says.

Pekarek and City Council members suggest that the park must become more self-supporting in these times of restrained public spending. Museums generate people, income and tax revenue, they say, which can be used to make the park thrive.

But others counter that parks should no more be self-supporting than schools; they are a public service that the public should be willing to support. They quote Balboa Park's 120-year old mandate as "free and open part space." They put the emphasis on free.

A park's essence is its diversity, they say, and that diversity will be lost if what they call the "museumification" of Balboa Park continues. They say culture should not be defined narrowly --- it includes square dancing, clogging and table tennis.

"There are, of course, many different uses for the park and many people see the park differently," said Robert Arnheim, chairman of the Balboa Park Committee, which must begin deciding the Conference Building's fate at a hearing August 4. "The people that come here from New York see this as a national park. Those that live across the street see it as a neighborhood park."

"You have to decide what the ultimate land use of the park should be," said Ann Hix, a member of the city's Park and Recreation Board, which will take up the debate after Arnheim's committee. "And that's an impossible task."

The Conference Building is part of a cluster of buildings in the so-called Palisades area of the park. Built for the 1935 Pan-American Exposition [sic], they include the municipal gymnasium, Federal Building and Palisades Building near the Aerospace Museum and Starlight Bowl.

After World War II, the buildings were empty, aching for tenants and falling into disrepair. The city had to go out and hunt for tenants, officials remember. Gradually, square dancers and badminton players began filtering in.

The special attraction of the Conference Building is its 16,000 square feet of unobstructed floor space --- room for a passel of dancers and a fleet of Ping-Pong tables. It also contains the park's only large cement and tile floor, the only kind of floor that can survive clogging, a form of folk dance in which the dancers wear wooden clogs to tap out the rhythm.

Dancers say that as many as 30,000 people regularly use the buildings, including Olympic volleyball players, pickup basketball players and the San Diego Table Tennis Association. Sunday nights, the giant Conference Building clatters with cloggers.

"It's hard to find anything bad about any tenant in any of these buildings," said Bob Wells, who has played badminton in the Federal Building since 1938. "The dancers were saying, 'We keep people off the streets. It's wholesome.' With badminton, it's the same."

The 1960 park master plan designated the buildings for demolition --- a proposal many people still support as a means of retrieving lost open space. But before the buildings could be removed, they were declared historic monuments. Now they are there to stay.

So Pekarek, in his controversial 1983 master-plan amendment proposals, suggested that the Palisades area buildings be turned into museums. They would be consistent with the activities in the adjoining Prado, forming "a truly unique cultural complex."

Pekarek suggested that athletic activities go to Morley Field where the city might consider building a gymnasium. As for the dancing and community events, they might move to the newly vacated Navy Hospital buildings, or out to community parks.

"In the practice of planning parks, it's not common to put that kind of community function in a park of regional significance," said Pekarek, president of The Pekarek Group, a landscape architecture and planning firm. " . . . it makes no sense to put a function into buildings such as that when that function can take place any place in the city."

Pekarek would also oust the archery field in Palm Canyon, replacing it with a parking garage for people visiting the museums. Other uses he feels are too specialized to remain in the park include the camps run by the Boy Scouts, Girl Scouts and Campfire Girls.

"It's like locating some special use on the edge of the bay, like a dancing club," says Pekarek, whose proposals will be the subject of hearings this fall. "Why would you do that? It has a much higher use and could serve a greater cross-section, rather than a special use."

The San Diego Automotive Museum proposal surfaced in 1962, the latest in a series of auto museum schemes that beginning in the late 1970s never got into gear. Dan Biggs, the current president, traces the original impulse to a group of wealthy car collectors and movers and shakers.

Councilman Bill Cleator's office contacted Biggs. Others involved included former U.S. Atty. Terry Knoepp, Gene Trepte of Trepte Construction, and Reid Carroll of KFMB radio, Biggs said. What brought them together, he said, was "a love of cars and desire to have a place in Balboa Park where the interest in cars could be perpetuated."

Since then, the museum group's board of directors has changed repeatedly, and efforts to get a current list were unavailing. A recent list of the advisory board included Cleator; publishing executive David Copley; attorney John Davies; and Mike Madigan, chairman of the Chamber of Commerce.

According to Biggs, the museum would lease the building and land behind it for a token fee, and would invest \$300,000 in renovations. The museum would have a permanent collection of rare cards as well as specialty shows changing every three months.

There would also be a research library on the history and workings of automobiles and a restoration shop including mechanical displays and a repair shop. Museum officials say they are working with schools to arrange courses on such matters as pan-stripping and hydraulic lifts.

“The car is --- I’m sure history will say it was --- one of the most significant factors in our culture and life,” Biggs said. “ . . . Now in Southern California, there is about as extensive an offering of historically collectable cars as anyone could hope to have.”

In February, the museum proposal sailed past the Balboa Park Committee, an advisory group that makes recommendations to the Park and Recreation Board. But by the time it reached the Park and Recreation Committee the following month, the dancers had mobilized.

At that meeting, Gary Kaine, clogger and spokesman, dissected the museum proposal, suggesting that its attendance and membership projections were inflated. He pointed out that its cash balance was a mere \$15,000 and that no cars had been donated.

Kaine argued that there were hidden costs to the city in the proposal, including the cost of accommodating more traffic in the already crowded park. If revenues turned out to be less than the projections, the museum would never break even, he said.

“They want a free building to display their cars,” Kaine said of the car aficionados in an interview recently. “This really is a slick deal for them. They would pay maintenance and in return they get a building rent-free, forever.”

Others complain that the museum plan places museums before people and puts the interests of tourists above those of San Diego residents. Some argue that a museum would be more beneficial elsewhere, attracting visitors to other parts of the city.

There has been widespread suspicion of an ulterior motive.

“I can’t help being suspicious that this is sort of a business venture,” said Robert Leffler, a former president of Citizens Coordinate for Century 3, an environmental group that keeps an eye on the park and opposes the museum. “Those vehicles aren’t being given to the city. People will see them and they will have a price tag and I can’t help thinking they’ll be up for sale.”

So Kaine and the dancers in March made a counterproposal, promising to raise dance attendance fees to pay all Conference Building utility and maintenance costs. They said they would create a fund to support building improvements and renovation.

Though park staff members have proposed alternative sites for the dancers and others, the dancers say the rooms are too small. Furthermore, there is no other floor in the park appropriate for the cloggers, so they would be ousted from the park.

The opposition to the museum took its proponents by surprise.

“We never thought there would be this organized outcry from the dancers,” said Jo-San Arnold, a member of the auto museum board. “They all came in their dancing uniforms and it was mom and apple pie appealing to the emotionalism of the board.”

“Well, the board got scared as far as I can see,” she concluded.

The board sent the question back to the Balboa Park Committee, telling the museum advocates to return with more detailed financial information. Specifically, they asked for evidence that the museum could raise sufficient money and acquire cars.

Since then, Arnold and Biggs have taken steps to rebut their critics' complaints. Biggs said last week that the museum has pledged for \$100,000 in cash contributions. He said it has received 27 cars for its core collection --- 4 as gifts, 23 on a three-year loan.

Earlier this month, the museum convened representatives of what Arnold says was 45 car clubs from all over San Diego County. Arnold and Biggs say many of the 4,000 members are expected to participate in the museum's revolving exhibitions.

"You're going to think I'm corny, but I have goose pimples going down my spine when I think of how successful that meeting was," Biggs said. "We had representatives from Chicano car clubs sitting down next to the president and representatives of Mercedes-Benz and Bentley clubs. We had a representative from a club that does nothing but restore 18-wheeler trucks. We had a room full of people from diverse backgrounds, socially and economically."

Biggs and Arnold say their museum is just as "community-oriented" as a crowd of cloggers, and will serve many more people than those who currently use the building. Cars are not a "special interest," they say; perhaps dancing is.

"There's a perception out there that this is a 'rich-man's garage.' I've got to tell you, I'm from National City and I work a long day," said Biggs, a civil engineer and president of Biggs Engineering Corp. " . . . I think whoever can demonstrate to the City Council that their cause is the most public-intensive should have the right to use the building."

A few hundred yards east, a similar issue has surfaced before the committee considering future use for the Navy Hospital property. That committee recommended to the city this month that it tear down most of the buildings to restore open space.

But in hearings over the past year, dozens of groups appeared to bid for room in the buildings. The groups represented veterans, university women, doll lovers, fly fishermen, credit counselors, architects, bookworms, railway buffs, and the U.S. Olympic Committee, among others.

"What became apparent is there is an unlimited desire to be in Balboa Park," said Ann Hix, committee chairman and a Park and Recreation Board member. "The park's an ideal location, the city subsidizes the space, generally speaking. Who could ask for a better setting?"

"But they have a narrow focus," she said. "Some are interested in cars and want cars in Balboa Park. Other groups want their trains or dolls in Balboa Park. What the Park and Recreation Board has to do is step back and say what's best for Balboa Park overall.

"It's irrelevant whether we like trains. The question is what is the best use for the park?"

Hamilton Marston, whose grandfather came to San Diego in 1870 and helped plan the park, said the answer lies in Balboa Park's original aim.

The land was set aside when the city had only 3,000 residents as an insurance policy against future growth. The open space of appropriately located parks makes urban density tolerable, Marston said. To institutionalize a new use there, like a museum, is an error.

"This city, located at the intersection of the Pacific Rim and the border of North America and Central America, with its magnificent climate is going to have immense growth in the future and much of it will be centered in the city," Marston said.

The most precious commodity, he said, will be free and open park space.

August 7, 1986, San Diego Tribune, D-1, D-2. "Free days" are costly, by Mark-Elliott Lugo.

Although (Arthur) Ollman's museum (of Photographic Arts) also received \$84,000 annually in TOT funds, or 17.5 percent of its budget, he pointed out that San Diegans don't make any direct contribution to cultural institutions except when the city proves them rent-free spaces in city-owned structures, such as the Casa de Balboa location for the Museum of Photographic Arts.

August 5, 1986, Los Angeles Times, II-1, Cloggers win round from promoters of Automotive Museum, by Jenny Scott (illus.).

A plan to convert a historic Balboa Park building into a car museum suffered a setback Monday when (the Balboa Park Committee) withdrew its backing and sided with a confederation of cloggers and square dancers who have used the building for decades.

August 5, 1986, San Diego Tribune, B-1. Balboa Committee votes against Automotive Museum plan, by Rita Calvano.

August 5, 1986, San Diego Tribune, B-6. Letter, Margaret Berube, Allied Gardens . . . ask public how Conference Building should be used.

Square and round dancers and cloggers are not the only groups using the Conference Building in Balboa Park. The table tennis players and the handicapped make use of this building also, to name but two.

To settle questions of the present use of the Conference Building vs. the proposed car museum, John Q. Public should be heard from in this regard. Keep the free admissions to the events now going on – or pay to visit restored cars in city-owned Balboa Park.

An unbiased tally should result.

August 5, 1986, San Diego Union, B-1. Automotive Museum loses a round in site battle, by Lisa Petrillo.

August 7, 1986, San Diego Tribune, B-10. EDITORIAL: A search for balance in Balboa Park.

Balboa Park is a nationally significant urban park, but we question the notion that is somehow has become too important to embrace such homespun activities as clog dancing and ping-pong along with its high-culture theater and art museums. We are delighted that the Balboa Park Committee agrees.

The specific issue before the Balboa Park Committee this week pitted backers of a proposed classic-car museum against community folk dancing clubs for control of the aging Conference Building, which has been used by the dancers for decades. The committee sided with the dancers after they promised to raise about \$50,000 a year to help restore and maintain the building, located next door to the Aerospace Museum. But the dancers also will have to convince the city Park and Recreation Board, the council's Public Facilities Committee and the full council.

Who would be hurt the most if they lose the Conference Building? The San Diego Automotive Museum surely could find another building outside the park to house its collection. More likely, the folk dancers could not. There is, for instance, no other building in the park with a concrete floor suitable for the weekly stomping of clog dancers.

The Automotive Museum has been attacked as "elitist" and financially shaky. We think those claims are beside the point. A museum, by definition, is a populist institution, regardless of the nature of its collection. The fact that Balboa Park already has 10 museums does not worry us, museums are for people. But backers of the car museum could have plenty of money and we would

still favor continuation of the current activities in the Conference Building. Those activities also include badminton, basketball, volleyball, juggling, ping-pong tournaments, floor hockey for the handicapped --- in short, all the things one would expect to find in a community park.

The year-long battle over the Conference Building --- which is a part of the broader debate over the park's future --- has been characterized as a struggle between tourist -oriented activities and those that appeal to local users of the park. We think there is no need for such a struggle. The interests of both sides can be accommodated and, indeed, both sides benefit when a wide variety of recreational activities is available in the park. We hope the city council will also recognize that the key to the future of Balboa Park is striking a fair balance of the competing interests arising from an increasingly diverse community.

August 7, 1986, San Diego Tribune, D-2. Visual Arts versus performing arts in battle for House of Charm, by Mark-Elliot Lugo.

The City Council this week temporarily put on hold a smoldering conflict that threatens to pit San Diego's visual arts and performing arts communities against each other.

The council was to vote Monday on a Musical Arts Foundation application for a one-year extension of an option to lease from the city and rebuild the decaying House of Charm in Balboa Park. But a last-minute plea before the council by the San Diego Art Institute, which has occupied the House of Charm for the past 33 years, delayed the action for seven weeks.

The foundation's three-year lease option expires tomorrow and was originally intended to allow it time to raise \$6 million to rebuild the House of Charm. As of this week, the foundation had raised \$1 million of the building cost, now estimated at \$7 million.

The institute is a 550-member artists organization and gallery. Gallery director Shirley Viennese and other members of the institute are convinced that the institute's existence is threatened by the foundation's plans. Those plans call for rebuilding the historic, city-owned building, expanding it from 40,000 to 60,000 square feet and using the space for a Musical Arts Museum, rehearsal rooms, a small theater, a library, administrative space for the San Diego Opera and facilities for related activities.

A handsome brochure, geared for prospective patrons and prepared by the foundation, emphasizes the proposed museum's educational value to San Diego schoolchildren, "in developing the audience and performers of the future and (preserving) our cultural heritage."

Monday's council delay, said institute spokesman Carl Mikeman may give his group enough time to form a coalition with other arts organizations that will "come up with an alternative plan that might better benefit the city." Mikeman said he hopes that a cooperative, shared use agreement might be worked out between the institute and the foundation.

Joseph W. Hibben, Musical Arts Foundation chairman, said he empathizes with the institute's plight and admits he occasionally purchases works of art there. But a primary concern, he said, is "seeing that the building is restored and that it has a viable program" in keeping with the other cultural activities in the park.

Hibben said he perceives the situation largely in financial terms. "I'm sure a lot of people would like to have the space," he said, "but somebody has to pay for the construction." Hibben said he believes that the foundation has the best chance of successfully completing the rebuilding project because its financial resources --- in particular, its fund-raising capabilities --- are greater than the institute's.

The foundation's \$1 million commitment comes from an anonymous donor in the form of a challenge grant with no time limitations. The Committee of 100 (an organization dedicated to the

preservation of Balboa Park's Spanish Colonial architecture) has made an additional commitment of the same amount to recreate the building's exterior.

The foundation, Hibben said, is looking for a single donor, or a small family group or a private corporation, plus a foundation, plus the individuals in a family group that would . . . build this building as a monument to somebody in the family or to the family."

Identifying the appropriate wealthy person takes time, Hibben explained, outline the complex steps, he said, the foundation has taken to find a patron. "You don't just go to a rich person and ask them [sic] for the money."

"We haven't had anyone that's turned us down. They've said, 'not now ' or 'not this time' or 'let me think about it,' I can't promise that we'd get it (the money) within the next year."

A one-year extension of the option agreement probably won't be enough, Hibben said, "but we'll take it if they (the City Council) give it to us. And if they don't want us to do it, to hell with it! It's that simple."

Art institute supporters see the foundation plan in life-or-death terms. They say they believe that the House of Charm, with its heavy foot traffic and proximity to the art audiences generated by the Museum of Art and the Timken Gallery, attracts people from a wide range of age groups, economic levels and cultural backgrounds. An "opera museum," they argue, would serve only a small, elite clientele.

Whatever the case, observers of San Diego's art scene generally agree that over the past few years -- especially under the guidance of Viennese and an increasingly progressive board --- the institute is emerging as one of the most vital and flexible art groups in the city. Its influence could become paramount when plans for a proposed Municipal Art Gallery are finalized. The institute has been suggested as the nucleus for such a museum.

The institute offers several additional arguments in its favor.

Its exhibitions are free to the public, whereas the proposed music arts museum plans to charge admission, and the museum would impact the park with an additional audience and aggravate parking problems in the park. The music arts museum, institute spokesmen say, belongs downtown with the Civic Theater, the new Symphony Hall and other theaters.

The institute operates on an annual budget of approximately \$57,000 and relies partially on fund-raisers such as food sales at Christmas on the Prado. Mikeman hints that major backers have expressed interest in financially supporting an institute bid to rebuild the House of Charm, but says specifics can't be divulged at this time.

Hibben said he isn't convinced by the institute's argument that it must stay in its present location. "There's lots of room in Balboa Park," he said. "I think there's even more room over in the Electric Building. . . . But we're willing to do whatever the council wants us to do. If they want us to go ahead and try to raise some money, we'll do that. . . . If they want to give it to the Art Institute, that's fine with me, but I don't know who's going to build the building."

August 10, 1986, Los Angeles Times, II-2. Letter, Park priorities . . . a rich man's garage rather than a recreational asset, by Martha M. Witz.

August 15, 1986, San Diego Tribune, B-10. Letter, Automotive Museum would be park asset, by E. R. Karalis, San Diego.

In *The Tribune* editorial, "A search for balance in Balboa Park" (8-7-86), you claim that dancers and other activities are needful and that another museum is not. You suggest that the San Diego

Automotive Museum could find another building outside the park. Two costly and extensive studies disagree with that conclusion.

In 1985, more than 6.5 million people visited the park; they made 16 million stops. That means after they visited the zoo, they went to the Aerospace Museum or the Museum of Arts to see one of the greatest collections of art in the Western world.

The most important element for a successful venture is location.

The San Diego Automotive Museum is a non-profit corporation whose only goal is to create and perpetuate one of the 10 best automobile museums in the world.

The building will be restored and enhanced at no cost to the city. It will revert to the city at the end of the lease period.

In the interim, a much broader segment of the population than a few hundred square dancers and cloggers will have been served. Why do so few people need 16,000 square feet of floor space? They have been offered a hundred alternate sites and rejected them all.

The Automotive Museum will be a community asset and in the process it will turn a neglected liability into a building that everyone can be proud of.

August 16 - 24, 1986. America's Finest City Week.

August 17, 1986, Los Angeles Times, II-2. EDITORIAL: Put brakes on car museum.

In the coming months, a debate will begin over the future of Balboa Park, leading eventually to decisions that will mark for decades the way San Diegans relate to one of their most precious assets. At the core of the discussion will be this question: To what extent should the park be treated as a tourist attraction with an emphasis on generating a high volume of people, and to what extent should it be considered a resource for those of us who live here?

A preview of what lies ahead when the 1983 Balboa Park Development and Management Plan moves center stage for consideration can be seen in the current controversy over a proposal to displace cloggers and square dancers from the park's Conference Building in favor of an automotive museum.

The draft of the Balboa Park Plan prepared for the city by the Pekarek Group is a provocative study, chockablock with controversial recommendations that will no doubt be hotly debated as the planning process moves through the city bureaucracy and the City Council. We'll have more to say on the broader picture as the process unfolds.

As for the Conference Building, it's a rather forlorn structure across a parking lot from the Municipal Gymnasium. Turning it into a museum is consistent with Pekarek's proposals. The backers of the San Diego Automotive Museum say they would be adding a popular attraction to those that already exist in the park; the dancers simply want to continue what they say is wholesome recreation.

To our way of thinking, the issue here is not which is the more worthy activity --- both are perfectly commendable endeavors --- but whether the effort should be made to draw more people with more cars to yet another museum in the park. We think not.

We don't deny that Balboa Park has developed into the cultural heart of the county. And we wouldn't want to change that. But it would be a mistake to lose sight of the fact that it does remain a park, a place where people should be able to retreat from the hustle and bustle of their lives. If it is viewed primarily as a tourist center like say, Sea World, the park will eventually reach a critical

level of development beyond which the typical experience of San Diegans who use it will begin to deteriorate.

We strongly support San Diego's tourist industry. We're happy it has cultural institutions, such as the Old Globe Theater, the San Diego Museum of Art, the Aerospace Museum and others in the park to bring tourists to town. An auto museum --- elsewhere in the county --- would be a welcome addition.

But when it comes to nibbling further into a scarce resource such as Balboa Park, there comes a time when local residents are entitled to say, "Stop! Enough is enough. This, after all, does belong to us."

When the Park and Recreation Board takes up the auto museum proposal Thursday, it should join the Balboa Park Committee in rejecting it. At a minimum, the plan should be deferred and considered in the overall context of the future development of the park. It makes no sense to approve it now.

August 22, 1986, San Diego Tribune, B-4. Dancers may be bounced out of Balboa Park, by Rita Calvano.

August 22, 1986, San Diego Union, B-1. Park & Recreation Board voted to let Automotive Museum take over Conference Building, by Lisa Petrillo.

August 22, 1986, San Diego Union, B-9. Zoo needs better primate housing, not more glitz, by Ann Lawton.

During March and April 1985, your newspaper printed an series of excellent articles about the San Diego Zoo and its aged animal facilities, which were built and have not been replaced since the '20s and '30s.

At that time Dr. Frank Enders, the veterinarian inspector with the U. S. Dept. of Agriculture, gave the zoo yet another year to make improvements, and bring certain exhibits up to federal standards or lose its license.

Apparently the zoo has corrected water quality and tanks for performing sea lions, provided electrical power for cat, dog and bear enclosures, and fixed --- we hope --- the design and construction problems of the new siamang and orangutan enclosures to stop escapes and water seepage in bedrooms.

As a result of the articles in your newspaper, Joan Kroc gave the zoo a \$3.5 million-dollar gift, a truly wonderful gift. Now the zoo administration is changing and renovating once-beautiful Cascade Canyon (built only about 10 years ago) into a rain forest "bio-climate" for two Sumatran tigers, a pair of fishing cats and other mammals for around \$2.5 million, the zoo reports.

The most recently completed exhibit is the African Kopje, a small corner area containing two klipspringer antelope in a minute display, and a larger exhibit of Verreaux's eagles which cost a million dollars, not the \$500,000 first budgeted. (What the zoo pays for construction these days is simply amazing, what with "expert" designers from Seattle who get very lucrative fees and all construction done by an outside contractor instead of zoo employees.

However, there is another serious problem at the zoo that your staff writers did not mention in their article of 1985. This is the *inadequate* primate housing and display units known as the Monkey Quadrangle and the Great Ape House.

When asked about this, the stock answer by the zoo administration is, "Well, these facilities were built in 1935 and 1965." As Dr. James Raswurm stated, "the fact that the facilities are old does not relieve them of the responsibility of getting them in shape." (*The Union*, April 21, 1985).

Witness the plight of the primates in the old Monkey Quadrangle who are living in a sterile group of wire and concrete cages, the majority of which are approximately 8 feet by 8 feet, with a tiny bedroom in back measuring about 2 feet by 6 feet.

These cages were built around 1935, using Works Progress Administration labor and donated materials, mainly concrete, bricks and wire. Thus, over 50 years ago, Dr. Wegeforth, the Zoo founder, had them built for free, and he would be appalled if he knew this facility was still in use!

Due to lack of space and overcrowding, some of the monkeys have been “kept on hold” in a series of very small wire cages about 3 feet by 4 feet in size, which are off public view in the middle of the quadrangle.

These were designed originally for sick animals, but these cages had to be used to keep some animals as long as a year at a time, such as surplus males. And another item, one corner cage on public view has a sewer sump in its off-view bedroom.

The Great Ape House, built in 1965, is still being used for gorillas, chimpanzees and orangutans. Twenty years old, it was considered a modern design then, a step away from the old wire cages. These enclosures are constructed as one unit into the side of a large hill.

Built of concrete (now cracked badly) the structure is sitting on slender concrete pillars (which should be inspected for safety conditions). Also the core of the concrete is steel shafts, which are rusted badly. (This was noticed when Coco, an adult male orangutan, knocked a good-sized hole in the platform. He has been sent to the East Berlin Zoo).

The 12 bedroom cages below the platform are poorly lighted, poorly ventilated, hot in summer and cold in winter, and they are small, about 10 feet by 10 feet, had to keep clean, with aged concrete walls and floors.

Festoons of lace-like rust come down from the ceiling, due to water seepage from a top display platform which has to be hosed down every day for sanitary reasons. A few years ago, the zoo was showing these unsavory accommodations to visitors who took the tour to see an “orangutan bedroom.” Ditto the Monkey Quadrangle.

This structure was built during Dr. Schroeder’s regime, and at that time the zoo built what it wanted to and how it wanted to without getting proper city inspections and permits. (We hope they are being careful now!)

Because this is in such poor condition, the Great Ape House does seem dangerous now, especially in his era of 8.0 earthquakes. If this building collapsed, not only would give gorillas and three orangutans be endangered, but also a very rare group of African pygmy chimpanzees, or Bonobo, the only such group on public display in the United States. And then there are the not-so-rare members of the *homo erectus* species, who work there as keepers.

Phase II of the “Heart of the Zoo” project was planned to provide a new great-ape facility and to replace the Monkey Quadrangle with the latest in zoo design and construction. But these plans have been shelved by zoo administrators for ambitious projects like the new Kopje exhibit and the Asian rain forest, which are expensive but headline-grabbing.

It is sad that the primates at our zoo, who have our same equipment such as heart, lungs, kidneys, etc. and are closet to man on the evolutionary scale are not living under proper conditions.

The zoo administrators keep putting off, year after year, bringing these facilities up to standard while millions are spent constructing “glitzy” exhibits for a few animals. Thus, over 50 animals, the primates, still go on living under stressful and substandard conditions.

August 25, 1986, San Diego Tribune, B-1. Panel votes against auto museum plan; Committee reverses itself, recommends dancers remain in park, by Rita Calvano.

The Balboa Park Committee has boosted the hopes of hundreds of square dancers and others who wish to continue their activities in the park's Conference Building.

The committee, reversing itself, decided to recommend that the current users of the building remain, setting aside a prior vote favoring an auto museum in the building.

The advisory vote will go to the Park and Recreation Board on August 21, and the final decision will be made by the San Diego City Council.

At least for now, the dancers are in and the museum out.

Balboa Park Committee Chairman Robert Arnhym attributed the vote change to the information provided by the Square Dance Association of San Diego County.

"What we received here in March was an emotional appeal from the dancers," Arnhym said.

But by the time the matter reached the Park and Recreation Board a few weeks later, the dancers had a plan, Arnhym said.

They told the board how much money they would raise each year and how they would raise it for restoration and maintenance.

Basically, the dancers said they would increase the admission prices at all 28 clubs that are members of the umbrella organization, the Square Dancers Association of San Diego County.

The San Diego Automotive Museum has produced some evidence in March, however, of a financial plan that would allow the organization to restore the Conference Building, Arnhym said.

The city estimates that it would take \$300,000 to restore the building, built in the 1930s. Yearly maintenance costs are estimated at \$34,000.

Arnhym, a member of the Park and Recreation Board, had recommended that the board take no action but refer the matter back to the Balboa Park Committee because of the dancers' proposal and because the board had doubts about the museum's ability to raise the money or get cars donated.

That re-evaluation took place yesterday when the Balboa Park Committee hear presentations by the museum and the dance group detailing their respective financial plans.

Arnhym said that the dancers must have been "sufficiently persuasive" to change the minds of the committee's majority.

Yesterday's vote was 8-5. The march vote favoring museum use was 8-6.

Gary Kaine, spokesman for the Square Dance Association, said he was not surprised about the vote reversal.

"We had a lot of valuable information, logic and common sense on our side," he said.

Kaine said the Square Dance Association could raise about \$54,500 a year. One committee member questioned, however, whether that amount could actually be raised and whether all the dancers would abide by an association vote requiring the attendance fee increases.

Kaine said that the clubs obey association directives and so would pay the prices.

As he did at the Park and Recreation Board meeting, Kaine again disputed the automotive museum's projected attendance. And as before, he insisted that the Conference Building should be kept for the many community groups that now use it, or would wish to use it in the future.

"Basically, Balboa Park is a park for public use," he said after the meeting. "And to put in a more restricted use like a museum takes things away from the people, who basically own the park."

But the San Diego Automotive Museum proponents, armed with their own arsenal of information, said that having an auto museum would enhance the park and draw many visitors, be they San Diego residents or tourists, because most people are interested in cars.

Dan Biggs, the museum's recently elected president, also said that a museum in the Conference Building adheres to the Pekarek Plan, a long-range plan for Balboa Park's development, yet to be adopted.

But the Pekarek Plan recommends putting museums in the park's Palisades area, which includes the Conference Building.

Biggs also presented a much stronger financial plan than he had done for the Park and Recreation Board. In it, he outlined donations, pledges of materials, cars, services and cash, as well as donations of cars that totaled \$401,000.

"We are for real," Biggs said. "We have the assets. We will be credible. We will be something the park will be proud of."

August 26, 1986, San Diego Union, B-9. There's some good news for monkeys at the Zoo, by Douglas G. Meyers, executive director.

Primate housing at the San Diego Zoo may not be new or even optimal, but it is by no means inadequate, sterile or inhumane.

The Zoological Society trustees and staff have long realized and freely concede that much of our Zoo needs to be modernized. Improvements in living conditions for our primates have been continuous and plans for the ultimate replacement of monkey and great ape facilities are a priority which is well under way.

Still, as they stand now, these primate quarters are not substandard and are, in fact, much better than those of many other zoos.

You published a commentary today ("Zoo needs better primate housing " . . .) by a well-intentioned reader who presents a great deal of misinformation and misunderstanding to contend other wise.

The most irritating of this writer's inaccuracies involve her portrayal of our Monkey Quadrangle as sterile, overcrowded and (with) cramped cages.

It is true this exhibit complex was built in the 1930s but the quarters have been upgraded many times since then, with further improvements forthcoming. The individual enclosures now include natural wood climbing structures, netting, swings and playthings.

Several are planted with trees and bushes and several others have hay-covered floors where keepers hide raisins and sunflower seeds for the monkeys to discover throughout the day.

The smallest of these enclosures is more than twice as large as you commentator claimed. Nearly half of the Monkey Quadrangle are four and five times larger than the dimensions suggested in the *Union* commentary.

There are fewer animals in the Monkey Quadrangle than ever before and great care is taken to maintain each species in a comfortable, not crowded or stressful, social situation. Since reproduction is often taken as a measure of satisfactory surroundings, we can point to the six babies under 8 months old now on the Monkey Quadrangle with a degree of pride.

The factual failings of the *Union* commentary continue --- our holding cages are twice as big as claimed, no monkey has been kept in one for a year at a time, there is no sewer sump in an animal's bedroom, the monkeys very rarely sleep in the so-called bedrooms, and so on. But what is more disturbing is the allegation that the Zoo staff and trustees are remiss in not doing anything on behalf of our primates.

When Zoological Society leaders took stock of our needs and embarked on a long-range plan for rebuilding the Zoo late in 1983, we determined first of all that the Zoo should be organized into nine climate zones, and, secondly, that our big cat facilities were oldest and most in need of replacement.

Thus, with the gracious and generous gift of Mrs. Joan Kroc, we are constructing a new tropical rain forest with new exhibit areas for tigers and fishing cats.

Next on our construction list is part of Bear Canyon, to be rebuilt as a temperate forest area and to include new housing for our lions and some leopards.

Both of these areas will include some enclosures for primates, by the way. Under the bioclimatic reorganization, the Zoo's primates will be spread over the appropriate climate zones and the Monkey Quadrangle will eventually be eliminated.

After our big cat enclosures are completed, our next priority is our great apes. If the support of San Diegans and the funding contributions are forthcoming, we could begin construction of new ape facilities in five years.

It is understandably difficult for the layman to grasp the intricacies of building simulated habitats for diverse animals species which serve both the animals and the Zoo visitors well. Each exhibit we build is a pioneering design, accomplished with much planning, an occasional modification, and necessarily a greater expense than a typical human habitation. Our new exhibits are the cutting edge of zoo design, as we feel San Diegans would not be satisfied with an everyday zoo.

The Zoological Society trustees, my staff and I always stand ready to listen to concerns and suggestions from the public or the media. We are eager to explain to all our long-range plan for keeping the San Diego Zoo the world's best and we want all to understand that we cannot do this without your help.

August 28, 1986, San Diego Tribune, B-4. Four snakes stolen in Zoo burglary, by Paul Telles (photo of curator Tom Schultz showing boa similar to those stolen).

A 16-year-old Hillcrest boy found a box of four boa constrictors in Balboa Park and took them home as pets until he realized they were stolen from the San Diego Zoo and returned three of them yesterday, police said.

Burglary Detective Dave Halsey said the boy, who was not identified, found the four boa constrictors near Morley Field after midnight Tuesday and took them home.

His father said he could keep only two of the snakes and had to release the others, Halsey said. Two were freed before the boy's mother heard a new report of the theft and realized her son might have found the stolen snakes.

The boy and his father went to the place where they had set the two snakes loose and could find only one of them, Halsey said. They then took the snakes back to the zoo.

The four snakes were stolen from the Zoo Tuesday. Two other snakes and two chameleons taken during the last week may now be for sale as pets, officials say.

"If somebody tries to sell you a snake, you should call the police hotline," said zoo spokeswoman Georgeanne Irvine. The police number is 235-TIPS.

Irvine said that after the zoo closed yesterday employees saw a man and a boy outside the gate holding a big paper bag.

The man said, "I think we've found your snakes," Irvine said.

The man said his son and a friend were riding bikes in Florida Canyon on Morley Field Drive late Tuesday when they saw the snake-filled box sticking out of the bushes.

Irvine said the thieves apparently planned to retrieve the box later. She also said the youths are not suspects in the theft, adding that zoo employees are looking for the fourth snake.

Employees discovered early yesterday that the four boas had been stolen from the patio of the zoo's Reptile House, Irvine said. The theft led officials to conclude that two constrictors and two Jackson's chameleons which vanished from the Children's Zoo last week also had been stolen, she said.

The 30-inch snakes are native to Southern California and western Arizona, are frequently kept as pets and are worth \$75 to \$125 each, Irvine said. The snakes are chocolate-brown with a rosy tint, she said.

Two of the four stolen Tuesday night were females that were used in a breeding experiment and were probably gravid, the reptilian equivalent of pregnant, Irvine said. The snakes are "very, very docile," she added.

The chameleons are about 10 inches long and are native to Africa. They are bright green but can turn a blackish green when upset. They are worth about \$100 each, Irvine said.

The thieves who stole the snakes Tuesday night apparently cut a hole in the northeast part of the zoo's fence, near the koala exhibit, Irvine said. They climbed the roof of the Reptile House and dropped onto the patio.

"They did know specifically what they were looking for and where they were kept," Irvine said.

The thieves broke into the Turtleorium, which is attached to another building where rosy boas are kept, but they were not able to steal more snakes, Irvine said.

August 28, 1986, San Diego Tribune, D-1, D-6. Architect Don Goldman creates new recreation center on Adams Avenue.

August 29, 1986, San Diego Tribune, B-12. Letter, Balboa Park needs a new master plan, by Richard Amero.

Until such time as the city of San Diego adopts a new master plan for Balboa Park, the city should refrain from endorsing vast new projects and capital expenditures for the park.

The plan to shift recreational facilities in Balboa Park to Morley Field suggested in the 1957 Citizens' Study should be re-examined. It made sense in 1936 to turn the vacant Palisades buildings into a recreational complex, and the idea still may make sense in 1986.

We should look to experts in public recreation, not landscape architects nor appointees to park and recreation boards for an assessment of San Diego's recreational needs.

A final plan for the park should be reviewed by a consultant in sociology and recreation before it is passed on to the city council for adoption. The city of Los Angeles did this when it hired sociologist Galen Granz to comment on the many plans for Pershing Square.

Proposals for an automobile museum in an enlarged Conference Building, for an Olympic training village on the old Naval Hospital site, for an open-air theater in Florida Canyon, and for a new road on the east side of Cabrillo Canyon have an impact on other proposals for Balboa Park.

Whatever is done to the Conference Building is going to affect the landscape, traffic and parking in the park and the security and success of other comparable or competing projects. Inevitably, public money is going to be used for the upkeep and operation of new museums and facilities as it is used for old, no matter how many promises that future museum proponents make to the contrary.

It is tragic to keep giving Balboa Park away to restrictive, non-park interests when the citizens of San Diego have fought so long and hard to maintain its integrity.

August 29, 1986, San Diego Union, B-13. Letter, Who does the Park & Recreation Board serve?, by E. W. Merris, San Diego.

I wish to express my extreme concern about the action by the Park and Recreation Board. Who are they really serving?

The original concept of Balboa Park was a park for all the people. It is becoming a haven for special interest groups, who gobble up park buildings for their particular fantasy.

Proponents of the auto museum serve a singular group. This area could no longer be used by the general public for other varied activities. These proponents are a powerful and influential group and it would be well within their means to buy and construct their own building and leave the park to the people.

As we look forward to the future, will we see the board decide to slam shut a new set of gates to the entire park, requiring citizens to purchase tickets to enter the general area of the park, plus a fee at the entrance of every activity?

Now is the time to call a halt to this direction and keep the remaining part of the park for the general public.

People in the know meet at the Balboa Park Club Building on Friday and Sunday evenings to swing to the sounds of taped big-band music.

August 30, 1986, San Diego Union, B-1, B-8. Zoo plans to ease paths for disabled, by Gina Lubrano.

The intent of the redesign is to integrate disabled visitors to the Zoo with the general population. Many of the improvements --- shaded rest areas, low barriers and the people moving system for the canyons --- would benefit non-disabled as well.

August ?, 1986, San Diego Tribune, D-1, D-2. "Free days" are costly according to Arthur Oilman, director of Museum of Photographic Arts: "Given the fact that the local government does not take in money for purposes of cultural implementation, there's no reason why we should be expected to give away our services," by Mark Elliott Lugo.

September 6, 1986, San Diego Tribune, C-1. Automotive Museum in Balboa Park gaining favor, by Jeff Ristine.

A yearly fiesta by the square-dance group, which uses several Balboa Park facilities, could be staged at Plaza Hall or another facility in the downtown Convention and Performing Arts Center, Assistant City Manager John Lockwood said.

September 6, 1986, San Diego Union, B-1. Public Facilities & Recreation Committee postponed decision on Automotive Museum, by Lisa Petrillo.

September 6, 1986, San Diego Union, B-1. City Manager's office recommended Conference building be turned into a car museum, by Michael Abrams.

September 7, 1986, Los Angeles Times, II-2. Letter, Free Balboa Park, by E. R. Kapalis, San Diego.

In a recent editorial, you suggested that important decisions would be made very soon regarding the future of Balboa Park. You referred to the controversy between dancers and backers of a proposed automotive museum.

In your opinion, the crux of the matter is tourism versus providing facilities for residents. Apparently, your staff failed to research the issues or overlooked the fact that half of all users of the park are local residents --- that in 1985, 6.5 million people paid admissions to the zoo and the museums, and almost two-thirds of them were San Diego residents. In 1985, there was a 12.5% increase in attendance at those attractions in Balboa Park.

As to the dancers, the square dancers use the Conference Building in Balboa Park one night out of the month. The cloggers use it Sundays. They are not being asked to leave the park, only to use alternate facilities within the park that are more suitable to their limited activities.

The Conference Building is one of a number of deteriorating buildings that the city can't afford to restore. The automotive museum proposes to absorb more than \$300,000 in rehabilitation costs and the annual maintenance required for a vastly under-utilized building.

In 1984, the Conference Building was used 39 times by 13 different organizations, many of whom no longer use that building for their one-day events. Balboa Park is a precious resource . . . to precious to be held captive by a small band of freeloaders who are clogging the issues.

September 7, 1986, San Diego Union, F-45. Honey-locust tree picked for Organ Pavilion for coloring and aesthetic value, by Dale Ward.

Before the new trees could be planted at the restored Spreckels Organ Pavilion, all the existing vegetation has to be removed and major construction was needed. The city salvaged the old olive trees, the towering queen palms were transplanted and the saved many of the junipers. The new trees did not come until eight months later.

Effort was put into the selection of just the right type of tree. The tree of choice was honey locust, *Gleditia triacanthos inermis*. This decision came about as a collaborative one. Dave Roberts,

former deputy director in charge of Balboa Park management, along with Ron Pekarek, a local landscape architect of the Pekarek Group who developed the projects' conceptual plans, chose the honey locust.

To commemorate the grant reopening of the 71-year old Spreckels Organ Pavilion, a ceremony will be held October 5. The public is welcome. The Committee of 100 is the host. Olson Construction Company expects the project to be finished on time so the Balboa Park officials can show it on a tour in late September to the members of the National Managers Association Conference.

Helen Monroe, the foundation's executive director, said only minor purchases such as picnic tables and benches can be made now, because only the interest --- now about \$25,000 a year --- can be spent.

September 16, 1986, San Diego Tribune, B-6. EDITORIAL: Planning ahead for Balboa Park use.

Wisely, a San Diego City Council committee has delayed until November 12 the possibility, however remote, that angry cloggers will be dancing across the roofs of vintage cars in a Balboa Park building that both dancers and antique-car enthusiasts covet.

The Public Facilities and Recreation Committee voted 5-0 last week in favor of postponing a vote on the fate of the Conference Building, thus giving the Park and Recreation Department time to prepare lists of possible alternative sites for both groups.

We have expressed our support of the cloggers' continued use of the building, believing that community use of park facilities should take precedence over a special interest. But as Councilwoman Judy McCarty and Abbe Wolfsheimer pointed out, now is not the time to vote on any significant change in park use, because the city has a new park master plan under consideration.

The council is expected to be looking at the proposed plan within the next four months. Major decisions then will have to be made about how best to use and preserve the precious natural resource in our midst. Through public discussion --- and debate --- we look forward to a consensus emerging on basic Balboa Park issues, a consensus that will help us resolve potential conflicts between users.

September 16, 1986, San Diego Union, B-7. Letter, Parks are for People!, by Enid Cyphert.

(The Conference) Building costs us taxpayers \$34,000 annually, yet it is far from being utilized to its full potential.

The San Diego Automotive Museum not only has the means but the expertise and commitment to immediately begin restoring this building to its 1935 beauty.

September 23, 1986, San Diego Tribune, D-4. Music Foundation drops plan to rebuilt House of Charm, by Mark Elliott Lugo.

Taking the local arts community by surprise, the Musical Arts Foundation has decided not to seek a one-year extension of a three-year lease option of the House of Charm in Balboa Park.

The move reflects the abandoning of foundation fund-raising efforts, which, if successful, would have financed the \$7 million cost of rebuilding the decaying, city-owned structure and establishing a 60,000-square foot Musical Arts Museum there.

Representatives of the San Diego Art Institute were elated at the unexpected turn of events. The institute, a 550-member, nonprofit artists organization and gallery, has occupied the House of Charm for the past 33 years, and its members regard the location --- a busy corner across the street from the San Diego Museum of Art --- as crucial to its survival.

The foundation's decision was made official yesterday afternoon at a City Council meeting, during which the council unanimously agreed to accept the foundation's withdrawal from the project. At the time, the council was to have voted on the foundation's request for the lease option extension; a vote originally scheduled for August 4 but delayed seven weeks by a last-minute plea from the institute.

Using the added time, the institute had hoped to come up with a plan of its own to transform the House of Charm into a modern visual arts complex occupied by non-profit visual art organizations.

Ultimately, though neither the Musical Arts Foundation nor the San Diego Art Institute could put together a financial package to pay for the cost of rebuilding the House of Charm.

During the past three years, the foundation received a \$1 million challenge grant from a private donor and an additional \$1 million commitment from the Committee of 100, an organization dedicated to the preservation of Balboa Park's Spanish Colonial-style architecture. Ideally, said foundation chairman Joseph W. Hibben, last month, the balance would be contributed by a single donor, a small family group, a foundation or a private corporation that would erect the building as a monument to someone in the family or to the family.

In a phone interview last night, Hibben said the foundation's decision was dictated by the "uncertainty and confusion" surrounding the current situation. "We've worked hard on it," Hibben continued, "but there are new ideas developing. New people want to try." He added, "Their ideas might work."

The foundation's vice chairman, Harold B. Williams, viewed the council's granting the institute's request for a continuance seven weeks ago as an indication that the council favored the institute's plan. "It would be foolish of us to stand in their way," Williams said.

With three year's notice, why did the institute wait so long before trying to formulate a plan of its own? Carl Mikeman, institute spokesman, explained, "We assumed that there was nothing we could do about the Musical Arts Foundation proposal. As far as we knew, it was cut and dried."

But he emphasized, the institute is a lot more serious about a rebuilding plan now than it was a couple of years ago.

Shortly after the council delayed its vote on the foundation's lease-option request, the institute began soliciting proposals from nonprofit visual arts organizations. If enough of them committed \$80 per square foot to reconstruct the House of Charm, institute board members said they believed the building would remain visual arts oriented. Few solid proposals materialized by the September 14 deadline.

The possibility of sharing the facility with both the foundation and the institute was also explored, but members of the foundation were not enthusiastic about the idea.

Now that the institute has a reprieve on the loss of its House of Charm quarters, Mikeman vows to prepare a funding and marketing package within the next 90 days. Local bank, corporation and federal historical funds will be sought to restore the building and create a visual arts complex.

October 5, 1986, San Diego Union, C-2. EDITORIAL: Seven-year restoration of Spreckels Organ Pavilion, return to elegance.

With its new look, booming organ, and 2,200-person capacity, the Spreckels Organ Pavilion is a San Diego treasure that enhances the diversity of Balboa Park.

October 5, 1986, San Diego Union, F-17, F-18. Restored Organ Pavilion to be rededicated today, by Roger Showley.

In 1980, the first phase --- restoration of the central building housing the world's largest outdoor organ --- was completed at a cost of \$270,000. The Committee of 100 raised much of the money itself from public and private sources and paid for all of the separate \$100,000 cost to restore the organ.

Three years later, Phase 2, restoration of the two-wing colonnade, cost \$621,000.

Now, the final and most costly phase --- just another \$900,000 --- has not only resulted in much-needed repairs but also improved on the original seating area.

The latest phase involved construction work by Olson Construction Co., landscape design by the Pekarek Group and engineering by Nolte and Associates.

Now, 142,000 paving stones, each 3 inches thick, have replaced the asphalt.

Instead of wooden benches, 614 sleek, steel mesh tan benches, weighing 79 pounds each, have been installed.

Overgrown juniper trees and other dense landscaping have given away to flowers and honey locust trees, each planted with decorative grills at their trunk bases.

The retaining wall has been rebuilt with stones and surfacing.

A pump (in the fountain installed at the time of the 1935-36 California-Pacific Exposition, now keeps the water flowing and the concrete base has been rebuilt.

Perhaps the most notable change to the pavilion has been the addition of a terraced area at the north end.

October 7, 1986, San Diego Union, B-3. Doors opened for free 70th birthday party at San Diego Zoo.

With a crowd drawn by free admission to celebrate its 70th birthday, the San Diego Zoo enjoyed the largest attendance in its history.

More than 38,500 people went, topping the record set May 1, 1965 --- the day the owners of the Jack In the Box fast-food restaurant chain paid everyone's way in and gave out free certificates for hamburgers.

Last year, even though admission was free, as it is every Founder's Day, 21,300 people showed up.

It was so crowded yesterday that the parking lot was closed almost as soon as the Zoo opened at 9 a.m. Both the California Highway Patrol and Police Department had to send officials to deal with all the cars.

The entrance to state Route 163 was blocked for a while to keep the heavy traffic from choking the highway.

Emergency vehicles had difficulty cutting through the stream of cars on Park Boulevard. There were two medical emergencies at the Zoo; one person had an heart problem and another suffered a seizure. In addition, one man who was being thrown out for being drunk and disorderly, fell and cut his head, said Jean Gertmenian of the Zoo.

For the record crowd, there was a 25-foot inflatable birthday cake and a giant birthday card for everyone to sign. So many wanted to sign, in fact, that the Zoo had to hang up another huge sheet of paper to accommodate them.

Although the Zoo's birthday party was yesterday, yesterday was not its birthday. The anniversary of the founding --- the day the Zoological Society met --- was October 2, but the Zoo prefers to celebrate Founder's Day on the first Monday in October.

While city planner John Nolen envisioned an east-west link of the park and bay between Date and Elm streets, the city now would study a north-south tied along Sixth and Seventh Avenues.

October 31, 1986, San Diego Tribune, B-2. Committee of 100's efforts to keep Balboa Park beautiful, by Nancy Scott Anderson.

The group works as advocates within the national, state, county and city framework for restoring and maintaining historically significant buildings. This means pushing bond issues, sniffing out matching funding and, in some cases, writing checks.

October 31 1986, San Diego Tribune, B-2. Three-day Square Dance Fiesta beginning November 7 in Conference Building; 36th year the event has been held in Balboa Park..

October 31, 1986, San Diego Union, B-1. Pathway tying park, bay urged, by Lori Weisberg.

Clearly the most expensive element of the plan --- and probably the most important --- is a proposal to span I-5 between Balboa Park's Marston Point and Cortez Hill to the south with a pedestrian bridge, roughly two city blocks-wide.

The bridge would have the bonus of providing much-needed parking by including two or three levels of up to 1,000 parking spaces constructed underneath it.

November 1, 1986, San Diego Tribune, C-3. EDITORIAL: Rallying 'round the Museum of Art.

Art is a reflection of the soul. Its display reveals the city's collective spirit.

Given those truths, it is evident that, ultimately, art not only enriches a community, it defines it.

So does support for the arts.

The San Diego Museum of Art in Balboa Park is now engaged in its first endowment campaign. It hopes to double the size of the present endowment from \$8 million to \$16 million during the next two years. It's a campaign this community can ill afford to ignore.

Members of the museum's board of trustees have set an impressive example by pledging \$4 million. Two benefactors, John and Sally Thornton, have demonstrated their generous commitment by donating \$1 million through their foundation.

The Thornton's individual generosity and the collective commitment of the trustees should serve as a rallying cry to the rest of the community.

The San Diego Museum of Art contains an important collection of art, spanning 5,000 years of culture. Recently, it treated us to the whimsy of Dr. Seuss and the stark vision of Oskar Schlemmer.

Those shows traveled on, but the standing collection the museum has built in its 60-year history is also strong and includes Renaissance, Baroque, 19th and 20th-century paintings and sculpture and a sample of Asian and Meso-American works.

Right now, admission fees are reasonable. They range from \$4 for adults to no charge for children under 6. Discounts for seniors, military students and older children are provided.

But despite 405,000 visitors last year, admission revenues covered only 15 percent of the museum's budget. The "donations box" near the main desk was virtually ignored, garnering exactly \$932 for the entire year. Clearly, more support is needed.

The current campaign gives San Diego a chance to show it truly has the quality of spirit display in its name at the museum each day.

November 9, 1986, San Diego Union, C-2. EDITORIAL: Funding a dream - "paseo" between Balboa Park and the waterfront.

By allocating hotel room-tax revenue, redevelopment funds, and revenue from other sources, including the parking facility, the city could make Mr. Nolen's 80-year-old dream come true.

November 10, 1986, San Diego Tribune, B-1. Scheduling curbs loom with Automotive Museum plan; what would be effects of relocating Conference Building activities on groups in that building and other buildings where space might be shared with current Conference Building users?, by Rita Calvano.

No organized groups will be forced out of Balboa Park, but some will have fewer meeting dates, or less space.

November 12, 1986, San Diego Tribune, B-4. Public Facilities & Recreation Committee balks at backing Balboa Park Automotive Museum, kicks issue to full Council without a recommendation, by Rita Calvano.

November 13, 1986, San Diego Tribune, B-10. EDITORIAL: Maintain our municipal legacy; put all four bond issues on ballot --- Balboa Ark, Mission Bay, a new library, and a police communication center.

Balboa Park and Mission Bay *are* San Diego. Indeed, it is difficult to imagine “America’s Finest City” without these distinguishing features, these precious natural resources. San Diegans have a special responsibility to maintain their municipal legacy --- to ensure, for example, that the historic buildings along the Balboa Park Prado remain in good condition, that Mission Bay be kept free of toxic runoff and silt.

Fulfilling our responsibility to these municipal treasures is not always easy, in part because of the budget limits of Proposition 13. In this ear of frugality, there’s enough in the budget to keep up Balboa Park landscaping, but not enough for a major building renovation. There’s enough to deal with an occasional sewage or silt crisis in Mission Bay, but not enough for the more permanent solutions to its contamination problem.

The council has grand plans for a new central library and no solid plan for financing its construction. The Police Department says it needs a new radio communication center so it can respond to crimes more quickly. Yet it would take millions to build one.

These are all worthy projects. And City Manager John Lockwood wants to give the city’s taxpayers a chance to decide whether they want to pay for them. In a sweeping and farsighted proposal, Lockwood is asking the City Council to put \$152 million worth of bond issues on the November 1987 citywide ballot.

Proposition 13 forbade this type of bond issue until last June, when a state ballot measure allowed local voters to approve them with a two-thirds majority. While an alert Lockwood has pounced on this new financing opportunity, he still has his work cut out for him. Getting a two-thirds majority vote for anything short of motherhood, as the expert observers like to note, is pretty darn hard.

The newly appointed city manager, fortunately has some excellent programs to sell the voters. Rather than appearing in a single, all-or-nothing package, Lockwood says the Balboa Park Mission Bay, library and police communications center bond issues would have to appear as four separate ballot measures. Although campaigning for one measure might have been simpler, uncoupling the programs at least would offer voters a chance to pick and choose.

The Balboa Park measure, for instance, is especially worthwhile. The \$36-million bond issue would be used to rebuild the aging House of Hospitality and the House of Charm and improve museums along the Prado. Lockwood also hopes that a new municipal gym could be built in the Morley Field Sports Complex. The old “muni” gym would be renovated for square dancers and others who now use the Conference Building nearby. The Conference Building then would be freed for a proposed Auto Museum. Lockwood describes this park plan as a “win, win, win situation,” and so do we.

Lockwood also showed commendable foresight in suggesting a \$65-million bond issue for a new central library. The council has committed itself to building one, but it has hung itself up on where to put it. Lockwood is one step ahead of them. He realizes that wherever the new library goes, the money is going to have to come from somewhere --- and he believes a bond issue is the best solution. We hope the voters will agree.

Lockwood’s 30 year’s experience in city government is reflected in his ambitious plan, his first major proposal since becoming city manager. He shows a keen understanding of this city’s needs. But we need to start on a library now, not in 1988.

The council should back him and promptly agree to put all four bond issues on the ballot. Balboa Park, Mission Bay, a new library, and a police communications center are eminently worthy projects. They deserve farsighted leadership.

November 13, 1986, San Diego Union, B-1. Poll - large majority supports bond issue to upgrade Balboa, Mission Bay Parks.

November 13, 1986, San Diego Union, B-1. Park, bay bond issue advances; Public Facilities & Recreation Committee backs vote on \$70 million bond election next November to pay for major renovations to Balboa Park and Mission Bay, by George Flynn.

November 13, 1986, San Diego Union, B-1. Public Facilities and Recreation Committee puts off Automotive Museum decision, by George Flynn.

A report by Deputy City Manager Jack McGrory recommended that the city turn the building over to the San Diego Automotive Museum next July 1.

The \$36 million issue for Balboa Park would finance major reconstruction of historic buildings, construction of a new gymnasium at Morley Field and a public transportation system to ease traffic and parking problems.

November 16, 1986, San Diego Union, F-40. You can help to record Balboa Park's botanical wonders, by Dale Ward.

Three years ago landscape architect Paul Mahalic started this task force along with Bob Ward, assistant horticulturist at the San Diego Zoo, and Neal Matthews, a writer for *The Reader*. Their mission . . . to catalogue Balboa Park's unique plantings and significant landscape features and to encourage development of a long-range horticultural preservation plan for the park.

November 20, 1986, READER, 8. Inside Story - San Diego voters haven't approved a general obligation bond issue since 1966; Councilman Struiksma advocates paying for park improvements by increasing Transient Occupancy Tax, by Paul Krueger.

November 20, 1986, San Diego Union, B-10. EDITORIAL: Room for everyone - the park has adequate facilities to accommodate those who now use the Conference Building.

There is one important fact the City Council should remember next month when it decides whether to lease the Balboa Park Conference Building to the San Diego Automotive Museum. The park has adequate facilities to accommodate both the museum and the square dancers, cloggers, handicapped athletes and others who now use the Conference Building.

The proposed automotive museum would be an ideal complement to its nearest neighbor, the San Diego Aerospace Museum. Moreover, museum officials **are committed to restoring the 51-year-old building to its 1935 glory**, at a cost of more than \$300,000.

Planning for a Balboa Park automotive museum began in 1980 when the City Council approved the concept of a Conference Center museum. Four years later, the council reaffirmed its earlier decision. To say "no" now would be terribly unfair to the museum and its supporters.

What's more the auto museum has pledged \$35,000 to finance improvements to other Balboa Park buildings where the dancers, disabled and other displaced groups will relocate. Granted some of

these groups will have to move to smaller, less-desirable facilities, at least for a time. But none will be without a home in Balboa Park unless it chooses to be. And if voters approve a planned 1987 bond issue for Balboa Park improvements, these groups could find themselves in better, more expansive quarters within a few years.

The San Diego Automotive Museum would be a worthwhile addition to the Balboa Park museum complex. We urge the City Council to lease the Conference Building to the museum, with the proviso that its present users all be provided other facilities within the park.

December 3, 1986, San Diego Tribune, B-4. Body of woman found in park is identified as Cindy Louise Jones, a transient, age 25.

December 7, 1986, Los Angeles Times, II-2. Letter, Car Museum Issue - people's needs should outweigh another museum, by Gary Kaine.

The City Council will finally vote on this issue next Monday. We firmly believe that all the financial and philosophical arguments support the current users. Therefore, the council should reject the car museum and maintain the unique and wonderful balance that has benefited the public for so many years.

December 9, 1986, Los Angeles Times, II, 1, 4, 5. Supporters of Automotive Museum suffer a puncture, by Armando Acuna.

The nearly seven-year effort to create an automotive museum in Balboa Park received another setback Monday when a short-handed San Diego City Council deadlocked 4-4 on the matter.

The museum, which is seeking a "free" 25-year lease from the city would be required to spend about \$257,000 to improve the Conference Building by painting it and putting on a new roof. Also, the museum association would later be required to build a \$2-million to \$3-million building next to the Conference Building.

And though the museum would pay the city \$34,000 a year to cover maintenance costs, it would also receive more than \$80,000 annually from the city's transit occupancy tax after it is in operation for four years.

December 9, 1986, San Diego Union, B-1. Split Council vote stalls Automotive Museum, by Lori Weisberg.

Deputy City Manager Jack McGrory acknowledged that to approve the museum lease would eventually cost the city at least \$75,000 more a year because of an anticipated subsidy from hotel-motel room tax revenue to help finance operation of the facility.

December 12, 1986, San Diego Tribune, 1, 9. San Diego Planning Commission voted to recommend keeping only three of forty two old Naval Hospital buildings the city will acquire in 1988, by Rita Calvano.

After hearing more testimony yesterday on what to do with the buildings in Balboa Park, the commission voted 5-1 to recommend that the city council get rid of most of them.

December 12, 1986, San Diego Tribune, B-8. John C. Leppert named as "Czar" of Mission Bay and Balboa Park.

He was selected yesterday by San Diego City Manager John Lockwood to fill the newly created \$61,000-a-year position of management assistant beginning Monday.

In his new job, he'll oversee traffic maintenance and other day-to-day operations in the aquatic park and the city's largest park [sic].

December 17, 1986, Los Angeles Times. San Diego City Council okays Automotive Museum after Councilmen Jones flops vote, favors lease, by Nancy Ray.

A seven-year battle to put an auto museum in Balboa Park ended in victory Tuesday when the San Diego City Council --- by a one-vote margin --- agreed to sign a lease with the museum backers to give them the Conference Building in January, 1988.

The year's delay, to help current users of the building to relocate, was the price negotiated by Councilman William Jones for changing his vote from "nay" to "yes."

Jones said the additional time will allow a more thorough search for alternate meeting sites for dance groups, handicapped athletes, Ping-Pong players and a dozen other organizations that have called the barn of a building their recreational home for decades.

Don Biggs, president of the San Diego Automotive Museum, balked at the delay, which has already threatened to cost the museum a number of proffered displays from other museums and some loan commitments.

However, after Jones made it clear that he could not vote for the 25-year lease unless the year's delay was included, Biggs and attorney James Milch conceded that the project could move ahead with the delay.

After the vote, Biggs said the museum association will immediately move to sign a lease with the city "within the next few days," so that major donors can write their checks during the 1986 tax year and avoid the stricter law on donations that goes into effect in January.

Mayor Maureen O'Connor, who voted against the lease, argued that the action should be postponed until after November's special bond election to finance Balboa Park improvements, including new quarters for the recreational groups displayed by the auto museum.

"This is a matter of timing," O'Connor argued. "A lot of people are not going to support us on the bond vote," she warned. "This (approval of the lease) will pit one group against the other."

Newly appointed Councilwoman Celia Ballesteros was sworn in last week after the council had split 4-5 on the lease --- a tie vote that gave a temporary victory to the groups now using the museum but required, under council rules, that the issue be brought up for consideration again this week.

But the apparent victory of the recreational groups over the auto museum backers was short-lived. Jones began questioning Biggs about amending the lease to gain concessions and additional time, indicating that he might change his vote if the lease terms were modified. In the final vote, Jones, Councilman Bill Cleator, Mike Gotch and Ed Struiksma backed the museum. O'Connor, Ballesteros, Councilwomen Judy McCarty and Abbe Wolfsheimer backed the dancers and others who wanted to retain the building for their recreational pursuits.

City Manager John Lockwood recommended approval of the auto museum and proposed a relocation plan that would move the various groups now using the Conference Building to sites in other parts of the park. Lockwood admitted that the moves would curtail some of the groups' activities and "inconvenience" organizations forced to share their park quarters with the displaced Conference Building groups.

However, he said, if a proposed bond issue passes next November, additional facilities could be built and operating by 1990 or '91.

Disappointed dancers and athletes filed out of the council chambers after the vote, vowing that they would fight eviction, whenever it came.

Most of the groups will find new quarters except for a group of folk dancers who wear wooded clogs. The cloggers require a large cement and tile floor for their performances and the only one in Balboa Park is in the Conference Building.

Museum officials have agreed to spend more than \$250,000 to refurbish the 1930s-era building, erected for the Pan-American Exposition of 1915 [sic]. A new stucco exterior, roof repairs and other exterior improvements can be made without displacing the present activities in the old building, Biggs said.

Also required of the museum forces under the lease is construction of a \$2-million to \$3-million addition of 36,000 square feet.

Besides display of 100 or more antique and unusual autos, the museum will include a gift shop, an automotive reference library, and a restoration and repair shop.

December 17, 1986, San Diego Tribune, B-1, B-7. Automotive Museum gets green light, by Rita Calvano.

The lease agreement between the city and the museum means the museum must renovate the Conference Building for an estimated \$257,000 and pay \$34,000 in annual maintenance fees.

It will also be expected to pay for some changes that could include a new floor in the Balboa Park Club where the handicapped hockey teams and some of the dancers will be relocated unless other accommodations are found.

And 90 days from now the museum must submit proof to the city that potential contributors have made good on their pledge to donate what car museum president Dan Biggs said is about \$134,000 in cash.

Gary Kaine, spokesman for the San Dance Association of San Diego, said, "It's a real shame that we had a change in one vote' otherwise, we would have won. I think it's a sign that at least the majority of the council at this point in time really is not for the people of San Diego staying in the park."

December 17, 1986, San Diego Tribune, B-1. Park & Recreation Board to review Balboa Park Master Plan at its meeting tomorrow, ending 19-month wait, by Rita Calvano.

Pekarek has proposed garages to alleviate many of the current parking problems. But the environmental impact report by PRC engineering in San Diego says parking garages do not belong in the park. The report was completed last June and has since been under study by city staff.

The report said garages would obstruct the views and perhaps discourage San Diegans from visiting the park because they would cost money, adding to the number of park activities, such as museums, that generally require an admission fee.

December 17, 1986, San Diego Tribune, E-5. Timken Gallery acquires "Castine Harbor and Town" by Fitz Hugh Lane, by Mark Elliott Lugo.

Lane, who had little formal training in art other than as an apprentice with a Boston lithography firm, is known to have produced approximately 150 paintings, including shore scenes, ship portraits and harbor views, landscapes, a few portraits, parade decorations and two naval engagements of the War of 1812.

December 17, 1986, San Diego Union, December 17, 1986, A-1. City Council okays Automotive Museum, by Lori Weisberg.

The effect of yesterday's 5-4 vote . . . was to simply delay for six months the inevitable relocation of the groups now using the Conference Building for their activities.

Deputy City Manager Jack McGrory told Councilman William Jones (the swing vote) it was unlikely that he could provide the council with a solution any better than the one already recommended.

December 18, 1986, San Diego Union, C-7. Timken pays \$1.25 million for 19th century painting by Fitz Hugh Lane, by Robert L. Pincus.

"Castine Harbor and Town," a painting by 19th century American artist Fitz Hugh Lane, has been acquired by the Timken Art Gallery.

The painting is now on view in the room housing the Balboa Park gallery's American collection. It was purchased with funds from the Putnam Foundation, which owns and operates the gallery.

The painting adds to what is clearly the finest local collection of historical American art. It joins John Singleton Copley's grand manner portrait of "Mrs. Thomas Gage" (1771) and distinguished works by Albert Bierstadt, Martin Johnson Heade, Eastman Johnson and others.

Nancy Petersen, the gallery's director, said she had hoped the Timken would purchase the painting in 1982 when it became available for the first time from New York's Berry-Hill Gallery. But the board of directors of the Putnam Foundation rejected its \$900,000 price tag as exorbitant.

When it became available again from the same gallery, the current board approved its purchase for approximately \$1.25 million. This makes it the second most expensive purchase in the Timken collection, surpassed only by its Copley portrait.

The rising value for Lane's paintings reflects the growing reputation of his work in the last quarter century. He is one of a small number of mid-19th century American landscape painters categorized as luminists for their unusual attention to and use of light.

His work, along with that of John Frederick Kensett, Martin Johnson Heade and Albert Bierstadt, has been the subject of many exhibitions and pioneering scholarship by eminent art historians John Wilmerding and Barbara Novak. Planning is currently under way for a Fitz Hugh Lane retrospective to appear at both the National Gallery of Art and the Boston Museum of Fine Arts in 1988. The Timken's acquisition is among the works already selected for that exhibition.

"Castine Harbor and Town" hung in the Witherle Memorial Library in Castine, Maine, until the mid-1970s before passing through the hands of three commercial galleries.

In the painting, viewer and artist are looking across the harbor, with numerous boats in the water and the distant shore dotted with small white buildings.

But Lane pays closest attention to the creation of harbor and sky. The variations of gray on the gently rippling water are masterfully subtle. The sky could be a painting in and of itself, with so much variety in its clouds and fluctuations of atmospheric effects.

Lane's use of light, however, is not completely natural. As in so many luminist paintings, the source of illumination here seems slightly mysterious, implicitly spiritual. Looking at this picture, we can understand why Wilmerding, Novak and other important scholars have pointed to parallels between luminist paintings and Transcendentalist writings by Ralph Waldo Emerson, Henry David Thoreau and others. Like Emerson's notion of the transparent eyeball which is nothing and sees all, Lane is omnipresent yet utterly invisible in "Castine Harbor and Town."

The Timken has also been the recipient of a gift, "A Portrait of a Lady" (1677), painted by Nicolas Maes, a student of Rembrandt's better known for his genre paintings. It was donated by Alan Mark Levinson, a Los Angeles-based collector of old master works.

It is a charmingly theatrical portrait, though clearly not a major work of the 17th century. It pictures a young woman with quizzical expression and ivory skin, posing with her tiny dog. The backdrop of red drapery opens onto a landscape

The portrait is now on view.

(The Timken is open Tues.-Sat. 10 a.m. to 4:30 p.m.; Sun. 1:30-4:30 p.m. Admission is free.)

December 21 1986, San Diego Union, C-2. The night Schumann-Heink sang "Auld Lang Syne," by Arthur Ribbel.

December 21, 1986, San Diego Union, F-4. One of architect Irving Gill's treasures will shine again (Administration Building in Balboa Park), by Carol Olten.

The city of San Diego and the Museum of Man recently agreed to renovate the building designed by Gill for the 1915 Panama-California Exposition [sic].

December 28, 1986, Los Angeles Times, II, 2: Letter from Allison Crews, San Diego, on the museum issue.

Your readers were misinformed by Nancy Ray's article on the acquisition of the Conference Building in Balboa Park by the auto museum ("Car Museum OK'd After Jones Flops Votes, Favors Lease," Dec. 17). Dan Biggs, president of the auto museum was never addressed by Councilman Jones. Mr. Jones directed all of his questions pertaining to this issue to either Terry Sheldon, museum representative, or James Milch, museum counsel.

Also, cloggers do not wear wooden shoes to dance in. Tap shoes are worn by the dancers, therefore the requirement of a floor able to withstand the wear and tear of hundreds of pairs of taps week after week becomes an issue.

It is a shame that the people of San Diego have had taken away from them another facility that allowed for the active participation of all ages in recreational pursuits.

And it is even more shameful that no one on the City Council addressed the question of what will happen to the displaced users should the 1987 bond issue not pass.

December 29, 1986, San Diego Tribune, B-7. Commentary: Exploiters are disfiguring Balboa Park, by piecemeal, by Richard Amero.

A conflict has always existed between park planners and practical citizens who wanted to use public parks to make money.

Park lovers supported landscape Samuel Parsons' efforts in 1903 to turn Balboa Park into a relaxing natural environment, but park exploiters insisted on putting railroad lines, freeways, exposition buildings, a zoo, golf courses, hospitals, schools, theaters, convention centers and county fairs in the park.

Balboa Park is disfigured by piecemeal, expedient and pragmatic projects foisted on it by park exploiters.

To shift the emphasis in Balboa Park from private to public development, proposed plans should be dropped to expand the golf courses, to increase the number of institutions in the park, to put up new

buildings, luxury restaurants, shopping malls and theaters; to create cul-de-sacs; and to relocate Centro Cultural de la Raza.

Proposed plans should be retained that would transform the plazas of Panama and Pan-America into open plazas; direct pedestrian traffic through the center of Spanish Village; separate park borders from abutting private property; route traffic into the park from 25th Street; and convert park land used by Boy Scouts, Girl Scouts and Campfire Girls into park land for everybody.

An environmentally preferred alternative or EPA, prepared by PRC Engineering, Inc., as an answer to a preliminary Balboa Park development and management plan, is the only master plan for Balboa Park in the running; As this plan approves the retention of major buildings in the Palisades and on the old Naval Hospital site, Parsons' objections to buildings in parks must be reiterated: Buildings do not add to a park, they subtract from it.

Except for the Ford Building, the old Naval Hospital buildings and the former exposition buildings in the Palisades are architecturally mediocre. Hospital buildings are cold and sterile, while the inappropriately placed chapel in front of them is conventional and dull. Palisades buildings are blank and tawdry.

1987

Summary of Events in 1987

(Notes: Dates of events are only approximate.)

Renovation of Administration Building okayed (June 25, 1987)

Fleet Theater to double its space (June 21, 1987)

April 14, 1987. San Diego Tribune. A-1. Sharon Spivak: To whom go spoils of room tax?

To those with colorful visions they can't finance, San Diego's hotel-room tax proceeds shimmer like the proverbial pot of gold at the end of the rainbow.

The division of the spoils --- \$20 million this year and projected to increase substantially when the San Diego Convention Center opens in 1989 --- brings out in droves those backing any activity that can be tied to promotion of the city and tourism.

Through rounds of city council committee hearings that have been derisively dubbed by one disgusted participant as "beg-a-thons," organizations annually compete for a share of the loot. They represent causes as diverse as the "war against litter; and Latin fiestas to beach safety and art museums.

Yet as large as the pot is --- accumulated from 7 percent tax on room rates in 800 establishments containing more than 26,000 rooms --- there's nowhere near enough money to go around.

Questions have been raised about the use of the hotel tax since it was approved by the city council at 4 percent in June 1964. A referendum to repeal the tax was defeated by the voters the following year.

April 17, 1987, San Diego Tribune, B-3. Rita Calvano: Park and Recreation Board yesterday urged major deletions for Balboa Park master plan

The amphitheater and major restaurants in a proposed master plan for Balboa Park have been nixed by the Park and Recreation Board.

April 18, 1987, San Diego Tribune, C-4. Michael Richmond: Task force seeks 3 bond issues for upgrade of parks

The amphitheater and major restaurants recommended in a proposed master plan for Balboa Park have been nixed by the Park and Recreation Board.

With little discussion, the board voted to recommend that the city council eliminate these structures from the Pekarek Plan, which proposes them as major new sources of revenue for the park.

The board agrees such sources are needed but says the structures are inappropriate uses for the park. In the same vein, relocation of either of the park's golf courses was also rejected. Landscape architect Ron Pekarek, hired by the city to develop a long-range plan, said these changes would provide another moneymaking activity and increase open park land at the same time.

The 4-year-old proposal still must be reviewed by other governmental bodies, such as the Planning Commission, before it reaches the council sometime this summer.

In a separate but related matter, the board voted yesterday to support a November bond measure that would provide money for renovation and restoration at Balboa Park and Mission Bay Park.

Other possible proposals for the ballot measure could include expenditures for a Japanese Garden and expansion of the Reuben H. Fleet Space Theater and Science Center.

The recommendation was prompted by member Ann Hix, who wrote to Mayor O'Connor, voicing disapproval of several projects being considered for the ballot measure.

The bond review task force will hold a public hearing at 7 p.m. Thursday at the Community Concourse downtown.

In the master plan, a major restaurant is proposed for the scenic Marston Point, Spanish Village and at a planned "golf complex." In addition to a restaurant, the complex also would have a new clubhouse. The nine-hole course would be rebuilt on a nearby landfill in the park.

The board also approved several of Pekarek's recommendations, either in full or modified versions. These include.

- Approving the concept of an underground parking structure of more than 1,500 spaces at the San Diego Zoo, subject to "parking policy considerations." The board wants the new structure to be open to all park visitors, as the existing lot is now. Doug Myers, executive director of the Zoological Society of San Diego, said no decision has been made on the use of a new facility or when construction might begin.

The lot would cost between \$9 million and \$12 million in today's dollars, Myers said.

- Developing pedestrian malls in the Prado and prohibiting parking there, and turning the Palisades parking lot into a garden as it used to be.
- Expanding the House of Pacific Relations and restoring the Palisades buildings which include the Balboa Park Club, the Municipal Gym and the Federal Building
- Adding 12,000 square feet to Spanish Village for a total of 35,000.
- Moving scout campgrounds out of Balboa Park to Mission Trails Regional Park.
- Building a new municipal gym (the existing one would be refurbished and open to other community uses) south of Jacaranda Drive around Morley Field.

April 18, 1987, San Diego Union, B-3. Michael Abrams: Lockwood seeks ballot measure on parks bond issue.

In a report sent to the City Council, Lockwood said that the alternative financing proposals should be kept on hold for possible use if the proposed bond issue does not get the two-thirds vote its needs to pass in November.

April 20, 1987, San Diego Tribune, B-3. John Farina: An early start on construction of a \$11.5 million Japanese Friendship Garden for Balboa Park hinges on ballot (illus.).

April 20, 1987, San Diego Union, B-3, B-8. Jon Funabiki: Japanese garden plan is ready; Mayor to unveil model of proposed park attraction

San Diegans soon will be able to catch a peek at the Japanese Friendship Garden proposed for Balboa Park. But like the Japanese art of *bonsai* trees it will be in miniature.

A scale model of the 11.5 acre park, shrunk down to the size of a card table, will be unveiled by Mayor O'Connor at a ceremony on Thursday night.

The plan is patterned after the *kai-yushiki* style, which incorporates a circuitous path meant for strolling and viewing the mountain, pastoral and water scenes that the garden will offer.

Set in a portion of Gold Gulch canyon, adjacent to the Organ Pavilion, the proposed garden features two streams, a pond meant to represent an ocean inlet, and several traditional Japanese-style structures, including a tea house, garden house, cultural center, exhibit house and arbor.

The design was by Tokyo landscape architect Takeshi "Ken" Nakajima, who also was responsible for the gardens of the Japanese pavilions at the Montreal and Seattle World Fairs and the private garden of Japan's late prime minister, Shigeru Yoshida.

The idea for constructing a garden was first raised by the San Diego-Yokohama Sister City Society in the 1960s. The City Council approved a master plan in 1979 and granted a 50-year lease for the site in 1984. The Japanese Friendship Garden Board, a nonprofit corporation, was created in 1980 to administer the project.

The city is considering placing a \$70 million bond issue on next November's ballot to finance major renovations for Balboa Park. Tentatively, the bond issue includes a \$3 million allocation for the Japanese garden.

The allocation would be contingent on the garden board raising a matching amount from donations. The board has \$750,000 in pledges.

The money would go toward the first phase of the project, which would cover about 5 acres and cost about \$4.8 million. Groundbreaking is projected for October 1988.

The group hopes to generate public interest in the project by displaying the garden model at various locations around the city, probably starting next month, said David Roberts, executive director of the Friendship Garden Board. A schedule has not been finalized.

The project is intended to showcase traditional Japanese garden techniques and would include black pines, Japanese magnolias and flowering peach, apricot and plum trees.

In addition, the board hopes it will become a site for classes and demonstrations in *ikebana*, *bonsai*, martial arts and dramatic arts.

O'Connor, who has called the project "a bridge of cultural understanding," will unveil the model at a ceremony for civic and business leaders at 7 p.m. Thursday in the Kitayama House restaurant at the Naiman Tech Center, a business park with a Japanese motif.

"We are the only major city on the West Coast that has a port, but doesn't have a Japanese garden," said Grace Brophy, secretary of the Japanese Garden Board, "yet we have enormous cultural and economic ties with Japan and the Pacific Rim."

Roberts added, "I think it's really important that the Japanese and American community understand each other. This can help."

The City of Yokohama, San Diego's sister city, has promised to contribute to the garden's construction.

In fact, the project will be named *San-kei-en* --- "three scenery garden" --- the same name used for Yokohama's Japanese garden. The name was proposed by Mitsuo Yokoyama, former chairman of the Japanese Institute of Landscape Architects, who has been a close adviser.

A Japanese tea garden was built in Balboa Park for the 1915 Panama-California Exposition and dismantled in the middle 1950s.

April 21, 1987, San Diego Tribune, B-3. Hundreds of would-be Einsteins, Naders and Dr. Ruths will gather this week at Balboa Park's Federal Building for the 33rd Annual Greater San Diego Science and Engineering Fair, which starts Thursday and ends Sunday.

April 21, 1987, San Diego Tribune, B-6. EDITORIAL: Caring for our premier parks.

The City Council should approve Lockwood's proposals and trust the voters to reaffirm their support for the city's showcase parks.

April 22, 1987, San Diego Tribune, B-8. Letter, Bill McLane, North Park.

Isn't it time for a law that prohibits --- for all time --- any more construction in Balboa Park?

April 23, 1987, Blue Ribbon Bon Review Task Force meeting, Copper Room, Community Concourse.

April 24, 1987, San Diego Tribune, B-1. Top bond priority, upgrade parks, by Rita Calvano.

Renovation, restoration and improvement of Balboa Park and Mission Bay Park should be the city's first priority if a bond election is put on the November ballot, and that means a ballot measure of at least \$70 million, a citizens task force will tell the city council.

Proposals for parking and for construction of a gymnasium in Morley Field were the most controversial items discussed last night.

May 22, 1987, San Diego Tribune,, B-1. Bill Callahan: Park and Recreation Board approves Balboa Park plan.

It advances without an amphitheater, major restaurants or plans for relocating golf courses, key recommendations of a consultant hired by the city to analyze the 1,400 acres of parkland.

. . . board members decided that the acreage reserved for the (Boy Scout, Girl Scout and Campfire Girls) camps would be better used as open space available to the public.

May 22, 1987, San Diego Union, D-16. Leslie James: Ethnic food fair in House of Pacific Relations this weekend

May 28, 1987, San Diego Tribune, B-5, B-12. Jeff Ristine: 3 Council members of the Public Facilities and Recreation Committee back plan to take offers on old Naval Hospital buildings. They disagreed, however, over a plan to convert the four main floors of the hospital's administration building into offices for part of the Park and Recreation Department staff.

June 3, 1987, San Diego Tribune, B-6. OPINION, Letter, Sally Furay: Public is beneficiary of Old Globe's success.

Since 1981, the Old Globe has spend \$9.1 million in reconstruction costs for city-owned buildings. Of that total, the city and county of San Diego contributed \$1.35 million. Clearly, the Old Globe has picked up a sizable portion of the tab for improvements to city-owned property.

June 4, 1987, Public hearing by the Planning Commission of the City of San Diego on the Balboa Park Development and Management Plan.

June 4, 1987, Statement to the Planning Commission at a Public Hearing by Richard Amero.

All organizations in the park that cater to restricted groups and that do not require a park setting to function should leave the park.

June 4, 1987, Paper by Richard Amero "In Defense of the Amero Master Plan for Balboa Park"

Balboa Park faces the same problems of all city, county, state and national parks in the country. These are problems of overuse, exploitation and favoritism.

June 5, 1987, Los Angeles Times, II, 3:1. Balboa Park Plan Favors Present Look, by Nancy Ray.

The 6-0 action (of the Planning Commission) is the nest to last step in a six-year old debate about the future of the park, and reflects the "environmentally preferred alternative" to a consultant's master plan proposal. That plan would have removed many of the unprofitable activities in the park and replaced them with commercial ventures to make money.

However, commissioners did go along with the Pekarek Group consultants' recommendations to build a 600-space parking structure in Archery Canyon and another of undetermined size south of the Organ Pavilion on an existing parking lot.

The commission also recommended retention of youth group facilities for the Boy Scouts, Girl Scouts and Camp Fire organizations on land proposed for zoo expansion.

June 5, 1987, Los Angeles Times, II, 6:1-3. Museums brace for fund change in allocation rules from Transient Occupancy Tax (TOT), by Hilliard Harper.

The new funding criteria for museums stress the ability to attract tourists. While some museums may receive more money this year, the city staff has recommended that others receive no funds or drastically reduced funds.

June 5, 1987, San Diego Tribune, B-3. Rita Calvano: Planning Commission opposes permanent closing of Cabrillo Bridge.

Under the commission recommendation, the Prado would be landscaped and redesigned so that special events could be staged there. Parking would be eliminated.

The commission accepted a recommendation that the Palisades parking lot become a garden again.

June 5, 1987, San Diego Tribune, B-10. Jane Clifford: Indian fair this weekend at Museum of Man

June 5, 1987, San Diego Union, B-1, B-3, B-12. Michael Abrams: Balboa Park plan doesn't satisfy all.

In an interview after the commission meeting, (Mayor O'Connor) said she would oppose construction of a parking structure in Archery Canyon and a new municipal gym in Morley Field.

In Washington, meanwhile, restoration of Balboa Park's administration building was given a boost when the House Appropriations Interior subcommittee approved \$200,000 for the \$1.2 million renovation project.

The project already has received \$100,000 from the state office of Historic Preservation. Private contributors have raised another \$180,000 and the city has earmarked an equal amount. The balance will be raised from private contributions and matching funds from the city.

June 6, 1987. Richard Amero Statement of the Facilities and Recreation Committee.

The Marston Addition should be made part of Balboa Park or the land sold.

Florida Canyon should be made into an attractive and integral part of Balboa Park.

The Arizona landfill should be used for free outdoor recreation.

Land occupied by the Campfire Girls, Boy Scouts and Girl Scouts should be incorporated into the park.

Private leases should not be automatically extended when they expire.

As Balboa Park has reached the saturation point museums and other non-park institutions should be encouraged to relocate elsewhere.

June 6, 1987, San Diego Tribune, D-2. A House Appropriations subcommittee has approved \$200,000 to help pay for a \$1.2 million renovation of the Balboa Park Administration Building. The Appropriations Interior subcommittee approved an amendment offered by Rep. Bill Lowery, R-San Diego, to include the money in the Department of the Interior funding bill for fiscal 1988.

June 6, 1987, San Diego Union, B-1. George Flynn: City plans cut in aid to Natural History Museum

June 9, 1987, San Diego Tribune, B-3. Rita Calvano: Council postpones decision on parks bond issue.

After discussion yesterday, the council delayed a decision on the bond issue until June 22 when City Manager John Lockwood is to return with more information on another proposed method of financing the park projects.

June 9, 1987, San Diego Union, B-2, B-3, B-5. Michael Abrams: Mayor, Gotch clash on park bond; mayor wants a general obligation bond issue; Gotch prefers special park assessment district set up citywide.

June 10, 1987, San Diego Union. EDITORIAL: A touch of class.

When the council's Public Services and Safety Committee today considers how to distribute about \$20 million in transient occupancy taxes (TOT), we trust it will give extraordinary attention to the allocation recommended by city staff for the Natural History Museum.

June 11, 1987, San Diego Tribune, B-1. Rita Calvano: Public Facilities and Recreation Committee supports closing bridge to Balboa Park.

A recommendation to close to vehicle traffic, Cabrillo Bridge, a main entrance to Balboa Park, and to keep traffic out of the park's central area has gained the support of a San Diego City Council committee.

By a 3-1 vote, the council Public Facilities and Recreation Committee agreed to the closure and approved instead building another west entrance. Two parking garages were also agreed upon, and the committee wants a third structure behind the Spreckels Organ Pavilion to be given consideration.

. . . the committee approved a parking garage in Archery Canyon as well as a parking structure on the existing Zoo parking lot, although zoo officials had encouraged building a lot in Florida Canyon.

Other recommendations of the committee include limiting expansion of Spanish Village; keeping the scout campgrounds in the park; building no major restaurants; putting any new gymnasium outside the park; and moving the Centro Cultural de la Raza to another part of the park.

June 11, 1987, San Diego Tribune, A-1. Jeff Ristine: Council suspends buildup of police, cuts horse patrol

June 11, 1987, San Diego Union, B-1. Steve Schmidt: Balboa Park parking revamp backed.

The Public Facilities and Recreation Committee yesterday endorses plans for a major parking overhaul in Balboa Park, including a proposal to ban vehicles in the central El Prado and Palisades plazas.

June 11, 1987, San Diego Union, B-4. Unexpected city fund boost averts Museum of Natural History admission increase, by Carol Sottilli.

. . . yesterday the Public Services and Safety Committee agreed to give the museum an additional \$105,000 over the original proposed funding of \$231,572.

June 16, 1987, San Diego Tribune, E-1. Gregory Nelson Joseph: A Fleet discovery: 60 frames per second.

June 17, 1987, Letter, Richard S. Bundy, president Natural History Museum, to members urging them to write County Board of Supervisors to insure museum request for \$62,000, an increase of \$7,000 over last year's request.

June 19, 1987, San Diego Tribune, B-2. Steven De Salvo: Proposed Balboa Park space exploration facility.

June 20, 1987, San Diego Tribune, A-2. A federal budget amendment proposed by Rep. Bill Lowery, R-San Diego, to provide \$200,000 toward restoration of the Balboa Park Administration Building was approved by the House Appropriations Committee., by Rita Calvano.

June 20, 1987, San Diego Tribune, C-3. OPINION: Centro Cultural deserves support.

In the proposed Balboa Park-Mission Bay Park bond issue, Centro Cultural is not included in the list of facilities to be upgraded --- even though the roof leaks and the only restroom facilities are park facilities outside the building.

In addition, the Balboa Park Master Plan proposes demolition of the Centro Cultural building.

June 21, 1987, San Diego Union, B-2, B-5. Woman's body found just west of Pershing Drive

June 24, 1987, San Diego Tribune, B-1. Rita Calvano: Pay parking near park gets Public Facilities and Recreation Committee's backing; increase in city's hotel-motel tax to raise money for park improvements suggested by councilman Ed Struiksmma.

Councilwoman Judy McCarty said that the council probably will consider the unspecified increase in the 7 percent room tax next year. Deputy City Manager Jack McGrory said the city manager's office probably will have a report on the matter in about six months.

The recommendation for pay parking at spots close to the park is meant to encourage people to park further away.

June 24, 1987, San Diego Tribune, A-1. Rita Calvano: The City Council yesterday decided voters in November to get choice of 2 park bond issues so that at least the smaller one had a chance of passing.

June 24, 1987, San Diego Union, B-1. Steve Schmidt: Park funding measures put on November ballot.

Voters will choose in November whether to spend nothing, \$73 million or \$94 million for improvements at Balboa Park and Mission Bay, the City Council decided yesterday.

June 25, 1987, Los Angeles Times, II-3:1-2. Voters to face multiple choice on Mission Bay and Balboa Park bonds, by Nancy Ray.

Voters will face a multiple choice question at the November 3 election on whether they want to pay the tab for improvements to Balboa and Mission Bay parks.

Long-debated bond issues for \$74 million and \$94 million will appear on the November ballot separately --- offering voters the choice of financing the repairs on Balboa Park buildings and the sewer line repairs to clean up Mission Bay or go for the frills of improving Fiesta Island and building a new municipal gymnasium to replace the old one which is being converted into an automobile museum.

Both general obligation bond issues would require two-thirds majority approval from voters. If both proposals passed, only the larger bond issue would be used.

Mayor O'Connor championed the bond issue, despite past election history showing that voters has approved only one city general obligation bond issue in the past 20 years.

During more than six hours of debate over the bond issues in committee and council meetings, council members have split over whether to seek to raise the park funds directly --- through general obligations bonds requiring a two-thirds approval --- or whether to form a citywide assessment district for park improvements which could be approved by a simple 50 percent majority vote.

Councilman Mike Gotch has argued that the assessment district would be more equitable because every homeowner in the city would be assessed an equal amount. Under the general obligation bond issue, he said, owners who purchased property before Proposition 13 went into effect in 1978 would play a smaller share because their property values were frozen at a much lower level than present market values.

Goth's proposal failed to gain a majority from the council members after it was learned that a complicated assessment schedule for the city's 400,000 property owners would have to be compiled at a cost of several million dollars.

The City Council voted Tuesday to place both bond issues on the ballot, reserving the assessment district approach as a future alternative if the bond issues fail.

Balboa Park improvements slated to be financed by the bond issue include:

- \$31.5 million in renovation and safety improvements to existing buildings and arcades, including \$11.5 million for the House of Hospitality, \$5 million for the House of Charm and arcades, \$3.1 million for the Balboa Park Club, \$2.3 million for the Museum of Man, \$1.6

million each for a municipal gym and the Museum of Man, \$1.4 million for Casa de Balboa, \$1.1 million each for the Old Globe Theater complex and the Federal Building and \$550,000 for the Palisade Building.

- \$2.5 million for vehicle circulation and pedestrian access improvements.

The larger \$94-million bond issue would encompass all the previous projects and add:

In Balboa Park:

- \$6 million for a new municipal gymnasium.
- \$2.5 million for additional pedestrian and vehicle circulation and access improvements.
- \$1.8 million each for Space Theater and Starlight Bowl improvements.

One controversial issue yet to be decided is the construction of a parking garage within Balboa Park. The council's Public Facilities and Recreation Committee voted Wednesday in favor of paid parking lots outside the park and an increase in the city hotel-motel tax to finance such improvements.

June 25, 1987, San Diego Tribune, B-8. Eric Healy: Marston residence named historical site; Administration Building renovation OK'd.

The San Diego Historical Site Board has approved a plan to renovate the Balboa Park Administration Building and unanimously designated the original Marston's Department Store, on the southwest corner of Fifth Avenue and C Street, as an historical site.

Members of the board also cited the rich history of the Balboa Park Administration Building in approving, 9-0, a renovation plan from Pacific Associates, Planners & Architects, Inc. of San Diego.

June 25, 1987, San Diego Tribune, B-1. Rita Calvano: Balboa Park pay parking urged

June 25, 1987, San Diego Union, B-2, B-3, B-4. Steve Schmidt: Parking fees are proposed for Balboa Park

June 26, 1987, San Diego Tribune, B-15. Eric Healy: Marstons voted a historic site; park plan OK'd.

June 26, 1987, San Diego Tribune, B-10. OPINION: Charity starts at Balboa Park . . . we hope voters pass the \$93-million measure

June 29, 1987, San Diego Tribune, B-6. OPINION: No parking fees, please.

Fees keep many of our poorest residents from visiting the zoo, the municipal golf course and some of the Balboa Park museums. But they have always been able to picnic in the park, walk along the Prado, play basketball at the municipal gym, attend at concert at the Organ Pavilion. Let's not start a system that allows the affluent to pay for choice parking spaces while the poor --- the indigent elderly, mothers with small children or the handicapped --- park on the outskirts and wait for a tram.

July 2, 1987, San Diego Union. B-3. Sacramento - New state budget that passed the Legislature yesterday will have \$200,000 to renovate Balboa Park buildings.

July 5, 1987, San Diego Union, B-1. Steve Schmidt: Will changes play at the park?

The proposed ban on vehicles from the Palisades and El Prado areas, and elegant Cabrillo Bridge are amount about 30 park changes --- some minor, some controversial --- scheduled for debate July 27 before the City Council.

Balboa Park is the second largest urban park in the nation with 1,290 acres. Los Angeles 4,000-acre Griffith Park is the largest. (Note: I include this gross misstatement as an example of the accuracy of typical newspaper reports! rwa)

Because a new park master plan has yet to be adopted, officials are uncertain how they will raise much of the money needed to carry out the \$75 million to \$100 million in projects.

Up to \$42 million could come from a pair of park bond measures facing voters in November.

July 6, 1987, San Diego Tribune, C-1. Jan Jennings: San Diego Zoo is a pet place.

July 8, 1987, San Diego Union, B-3. Governor Deukmejian vetoes several San Diego County park projects yesterday, by Daniel C. Carson.

July 10, 1987, San Diego Tribune, B-5. Museum of Photographic Arts free to Santee residents week of July 19-25

July 15, 1987, San Diego Tribune, A-1. Rita Calvano: Fleet theater plans expansion doubling its size.

The Reuben H. Fleet Space Theater & Science Center in Balboa Park plans a \$17.5 million expansion that would double its size --- adding two more theaters, a teaching planetarium and an outdoor science park.

Construction on the project could begin in 1989, pending San Diego City approval and the availability of financing, center executive director Jeffrey W. Kirsch said.

"We need more space," Kirsch said. "The idea . . . is to provide us with an opportunity to give San Diego a world-quality, world-class science-theater complex."

Kirsch declined to make extensive comments about the proposed 55,000-square-foot expansion, saying he preferred to wait until a new conference scheduled for Monday.

Cris Fontana, head of the space complex's board of trustees, also declined comment, saying the board wanted to notify its members before making the proposal public.

July 16, 1987, San Diego Tribune, B-12. OPINION: Keep open door to Balboa Park . . . we think the Prado and its splendid entrance across the bridge --- should be accessible to the majority. And, most people arrive in cars.

July 16, 1987, San Diego Union, B-2, B-3. Pat Flynn: Some facts ruled out in Cinco murder trial.

July 17, 1987, San Diego Tribune, B-1. Park Jam: It will be an explosive hearing on July 27 when city council considers the Balboa Park master plan. It may be the first time that all 21 museums and cultural facilities in the park have joined to fight.

July 18, 1987, San Diego Tribune, C-1. Linda C. Puig: Zoo society chief, cultural leaders hit Balboa Park traffic proposals.

Leaders of 20 Balboa Park cultural institutions and the San Diego Zoo are banding to oppose a proposed parking plan, saying it could threaten their future by discouraging visitors.

In a July 10 letter to the San Diego City Council, presidents of 21 Balboa Park activities --- under the umbrella of the Central Balboa Park Association --- criticize parking and traffic elements of the proposed Balboa Park Master Plan.

Many of the letter-signers said they plan to air their concerns publicly when the master plan, also known as the Pekarek Plan, comes up for council ratification on July 27.

Another letter, from the Zoological Society of San Diego, urges its nearly 100,000 members to contact City Hall before July 27, terming the matter "critical to the future of your San Diego Zoo." The Pekarek Plan would be a sweeping overhaul of Balboa Park recommending nearly 30 changes, including building a gymnasium in Morley Field and closing Cabrillo Bridge to autos. The changes would cost an estimated \$75 million to \$100 million.

The plan also proposes eliminating parking in El Prado, Palisades, Plaza de Panama and Alcazar Garden areas. It would fill the lots with landscaped walkways, linking the cultural complex and restoring parklike ambiance to areas that have grown clogged with autos circling in search of parking spaces.

In return, the plan proposes increasing the amount of parking by as much as 35 percent through the construction of new lots on the park's periphery, including a large underground structure at the zoo, and improvements of existing ones.

In the letter to council members, the Central Balboa Park Association requests that the council:

- Enlarge the Spreckels Organ Pavilion parking lot by multiple decking.
- Build terraced parking in Florida Canyon and an overpass over Park Boulevard.
- Make the Cabrillo Bridge and Archery Canyon parking sites as large as possible.
- Retain parking in Alcazar Gardens and the Plaza de Panama.
- Not focus park traffic on the zoo parking lot.

Cultural leaders at Balboa Park are mostly concerned that visitors faced with long walking distances won't make the trip into the interior.

The institutions --- from the Museum of Man to the Reuben H. Fleet Space Theater --- must have visitors to stay healthy, Philip M. Klauber, a signer of the letter, said Thursday. He is immediate past president of the San Diego Historical Society, which has its office in Balboa park.

"They are in the business of serving the visiting public," Klauber said. "The public has to be able to get to them . . .

"Now, I love and enjoy (walking through the park) as much as anybody, but the average American doesn't want to do that. He wants to park reasonably near the destination, and he wants to get in with a reasonable amount of traffic."

Pedestrians also are fearful of walking long distances in the dark, said Connie Monzingo-Fish, director of the San Diego Junior Theater, which puts on Friday night performances.

No one has forgotten, she said the murder of Old Globe actor David Huffman, who was stabbed to death in February 1985 by a thief he caught breaking into a parked motor home.

"That doesn't get forgotten too quickly," she said.

Making the zoo the focal point of parking would intensify already congested traffic in the zoo area and discourage visitors, Betty Jo F. Williams, president of the Zoological Society, wrote to members. "The economic health of the zoo is greatly dependent on attendance and our attendance is linked to parking," Williams wrote. Amy Krulak, president of the park association, said having to park so far from any of the cultural institutions within the park "wouldn't at all help the other end of the park."

"All those places need more parking --- that's all there is to it --- not less."

July 18, 1987, San Diego Union, B-11, B-13. Cathedral St. Paul meeting tomorrow to focus on Balboa Park's homeless

July 19, 1987, San Diego Union, F-26. Balboa Park's future is subject of walking tour to be presented July 25 by the local chapter of the American Society of Landscape Architects.

July 20, 1987, The City of San Diego Manager's Report; Subject; Balboa Park Master Plan.

July 20, 1987, San Diego Tribune, B-4. Arson fire controlled in Balboa Park canyon

July 20, 1987, San Diego Tribune, B-1. Joe Hughes: Balboa Park protest forces site change of meals for homeless

July 20, 1987, San Diego Union, B-3. Cheryl Clark: Balboa Park transients discussed

July 21, 1987, San Diego Tribune, B-5. Rita Calvano: Fleet space, science museum plans to expand

The city will be asked to do more than approve plans to more than double the size of the Reuben H. Fleet Space Theater in Balboa Park. It will also be asked to back \$5 million in tax-exempt bonds to help finance the proposed \$17.5 million expansion.

The money would be paid back over several years through center revenues.

July 21, 1987, San Diego Union, B-1. Kristine Moe: Fleet Theater to double its space

Officials from the Reuben H. Fleet Space Theater and Science Center yesterday described plans for a \$17.5 million expansion that would double the size of the popular Balboa Park attraction.

The expansion would include a theater with moving platforms or seas to simulate travel thrills similar to Disneyland's "Star Tours" attraction, a new planetarium, a new theater for large-format film, almost three times the indoor science-exhibit space and an outdoor "science park."

July 22, 1987, San Diego Union, B-6. EDITORIAL: Accessibility.

Although shuttles are planned to convey people from their remote parking places to their park destinations --- a pleasant vision --- the realities are that the automobile has a necessary, unavoidable place in Balboa Park planning.

July 24, 1987, Letter, Wm. S. Burton, president American Society of Landscape Architects, San Diego Chapter, to Mayor Maureen O' Connor.

The success of pedestrian malls, and the separation of vehicles and pedestrians is in evidence in the major urban parks of this country. Balboa Park should also benefit from the success of this time proven concept as originally conceived.

July 24, 1987, San Diego Tribune, B-1. Rita Calvano: Pandas arrive

July 24, 1987, San Diego Tribune, B-10. Letter Doug Scott, Uptown.

Only the member institutions of the "Central Balboa Park Association" should be allowed to exist in Balboa Park. The rest of the park should be leveled paved and striped.

It's so selfish of San Diegans to want to walk amid flowers and greenery in their park.

July 24, 1987, San Diego Tribune, B-10, Letter, Karen Kaska Davidson, North Park.

The interior parking lots have never provided a great deal of parking. All they have done is entice thousands of cars into the middle of the park, creating San Diego's largest weekend traffic jam.

By parking on the edge of the park, visitors can enter a serene park where they need not worry about having their children run down, a place where they can breathe the air without a freeway-level dose of exhaust.

July 24, 1987, San Diego Union, E-6. Robin Kleven: "Night in Vienna" by San Diego Youth Symphony at Balboa Park Club

July 25, 1987, San Diego Tribune, C-1. Dona Steckbauer: Golden Hill celebrates 100th year

July 25, 1987, San Diego Union, B-15. OPINION, Letter, Verna Quinn: Park plan critics err.

It is important to understand that the proposed plan has many integrated features, relating to parking and circulation. These cannot be altered without affecting other elements of the plan. The net effect of the proposed plan is to increase parking, improve access, and beautify major building entrances.

July 25, 1987, San Diego Tribune, C-3. OPINION, Letters, Verna Quinn, Leland van den Daele, George Eidemiller: Park master plan looks at parking

July 25, 1987, San Diego Union, B-1, B-2, B-5. Rita Gillmon: Pioneer Mary Marston dies at 107

July 25, 1987, San Diego Tribune, C-3. EDITORIAL: Planning Balboa Park's future.

Although public hearings on the master plan begin Monday, it will be several weeks before the council adopts the final version. During that time, why not visit the park and decide for yourself how you believe the city should prepare Balboa Park for the 21st century?

July 26, 1987, Los Angeles Times, II, 1, 3, 4. Plan's Vision of a Car-Free Heart Splits Friends of Balboa Park, by Jenifer Warren.

"It's hard enough for museums to drum up visitors as it is. With the bridge closed, you could have blockbusters every week and people would still not leave their cars and walk in. This is Southern California." . . . Doug Sharon, Director Museum of Man.

Betty Jo Williams president of the San Diego Zoological Society, has sent a letter urging the society's 135,000 member households to fight the proposed construction of a 1,500-space parking structure on the existing lot at the San Diego Zoo. Williams called the proposal "completely unrealistic" and said it would saddle the zoo with the responsibility of housing the cars of all park patrons.

As an alternative, zoo officials propose keeping their existing lot and creating a set of terraced parking platforms on the western face of Florida Canyon.

Although reluctant to boot (the Boy Scouts, Girl Scouts and Camp Fire Girls), the city proposes that a lease with the groups not be renewed when it expires in 2005. Camping activities can be better accommodated in Mission Trails Regional Park, officials say.

Today, only 14% of parkland is available for (strolling, picnicking and other passive uses), with the balance occupied by one use or another. Under the new plan --- and with the pending demolition of all but three of the 42 Naval Hospital buildings --- that figure will jump to 23%, Dave Twomey, assistant Park and Recreation director said.

KEY CHANGES PROPOSED FOR PARK

Closure of Cabrillo Bridge to cars.

Removal of parking lots in El Prado and Palisades areas.

Construction of a 600-space parking garage in Archery Canyon.

Realignment of Quince Street and construction of new bridge across California 163.

Development of a drop-off point behind the House of Charm.

Closure of Balboa Drive at the Cabrillo Bridge, making it a cul-de-sac.

Addition of a 1,500-space parking garage on existing San Diego Zoo parking lot on Park Boulevard.

Extension of 28th Street from Date Street to Grape Street.

July 26, 1987, San Diego Union, B-1. Gina Lubrano: Panda-Mania.

Two roly-poly black-and-white giant pandas from China that go on exhibit at 9 a.m. tomorrow pose the biggest challenge for the San Diego Zoo in its 71-year history.

Basi, a 7-year old female, and Yuan Yuan, a 6-year old male, are expected to be such a draw that the Zoo anticipates 1.5 million visitors --- 50 percent more than usual --- will go through the gates during their 200-day visit.

There's a possibility that on some days, the park will be so crowded that the gates may have to close early to accommodate the flood of visitors.

"Last year, we had 39,000 people on Founders Day (Oct. 6). The facility was tremendously overtaxed at that point," said Mike Ahlering, Zoo operations manager.

He couldn't predict how many visitors it will take to close the gates. The deciding factor will be how many are in line to see the pandas and how long the wait becomes," he said.

"We have a lot . . . to learn about what to do if we have those big crowds day after day," Ahlering said.

Peak times are expected on weekends during the summer, holidays, Christmas week, and all of October when children under 15 will be admitted free during the Kroc Family Children's Days.

"And guess what January is," said Douglas G. Myers, executive director of the Zoological Society. "The pandas will be packing about Super Bowl time. It will be your last chance to see them until they come back permanently --- if that ever happens."

The latest about the pandas may be obtained by calling 55-PANDA, a 24-hour recorded message that includes information about Zoo hours and prices, the most recent attendance figures, parking information and, according to Zoo workers, "any panda scoops of the day."

Visitor demands are anticipated to be so great that the Zoo has set up a satellite parking lot on city-owned land at Pershing Drive, across from the Balboa Park Golf Course. A free shuttle will run from 7:30 a.m. to 8:30 p.m.

Ahlering estimates the lot will have 2,500 to 3,000 spaces and will supplement the Zoo's own 3,150-space lot and two auxiliary lots that are normally used in the summer on Roosevelt Junior High School property. Those lots can hold about 650 vehicles.

The dirt lot opens tomorrow to handle some of the overflow, but will not be completed until later in the week, Ahlering said.

To help relieve the parking squeeze, Zoo employees are being asked to park at the old Sears store site on Cleveland Avenue and take a shuttle to work. The Zoo is leasing the lot from the city for \$1,000 a month and is providing security not only for the lot but for the vacated building, Ahlering said.

The employee park plan was tested last year over the three-day Labor Day weekend, he added.

And if all this isn't enough, signs have been put on the freeways to guide the way to the Panda exhibit.

"We have had tremendous cooperation from city traffic engineers and Caltrans in rerouting traffic so we can get in and out of that lot more efficiently.

"Our problem in the past has been the majority of the traffic from (Interstate) 5 north and south is routed on 163 and comes up Richmond (Street). What we've done is change the routing of 5 north and south to bring traffic to the Zoo on Pershing (Drive).

Some of the signs also will include a 30-inch-square plastic panda logo, he said.

The Zoo always hires seasonal workers in the summer to take care of the added crowds. This year, it will add 150 to 200 people more than usual. They will work in gift shops, help with the entrance lines, clean the grounds, work in food service and as parking lot attendants, Ahlering said.

Beginning Tuesday, the Zoo will operate on extended hours. Gates will open at 8 a.m. and close at 5:30 p.m. Visitors may remain on the grounds until 7:30 p.m.

Zoo officials advise visitors either to arrive early or late to beat the mid-day crush. Fewer people are expected on weekdays, about half as many people as visit the Zoo on weekends.

There are two ways for the public to see the pandas. The first is to pay the regular \$8.50 admission for adults, \$2.50 for children between 3 and 15, and walk to the panda pad.

Once inside the Zoo, visitors turn right at Flamingo Lagoon and follow the red flags to Panda Plaza. They must go past the bus boarding and unloading areas, past the koalas and the monkeys, the animal rides and the kopje exhibit, and then down Dog and Cat Canyon.

The quarter-acre Panda Plaza is located just past the Hunte Amphitheater, where visitors will line up along shaded queue lines that will snake back and forth past panda educational graphics, closed-circuit television and stands of bamboo.

A tiered viewing area will allow 150 people to observe Basi and Yuan at the same time.

People who don't want to walk down the canyon and back also may see the pandas by taking one of the Zoo tour buses --- which costs admission plus \$2.50 for adults and \$2 for children between 3 and 15. While on the bus, riders will get a clear view of the exhibit because the road near the enclosure has been raised six feet.

Risser said the Zoo spent "a little over a half million dollars" on the panda project, which includes grading the satellite parking lot.

Home to Basi and Yuan Yuan is the old clouded leopard exhibit that has been renovated to accommodate their needs. It has been fitted with central air conditioning, large picture windows on

three sides of laminated, shatter-proof glass, two separate sleeping areas and a landscaped exhibit of more than 1,200 square feet.

To make way for the pandas, the clouded leopards that occupied the area were moved to an off-exhibit area. The animals that occupy the holding area behind the Hunte Amphitheater also were moved.

In their new home, Basi and Yuan Yuan will be separated by bars but will be able to see each other and even touch noses. Separate quarters are nothing new for them. They are kept apart in the Fuzhou Zoo in China because pandas are naturally loners and can become aggressive if they live together.

The arrival of the pandas is the culmination of nearly 10 years of negotiations with Chinese officials. And to accommodate such a feat, Zoo officials are changing many of the rules they normally live by.

For instance, it is not in keeping with the San Diego Zoo's philosophy to allow performances by animals because the Zoo encourages only the natural behavior of animals.

But the pandas brought along their teeter boards and bicycle --- for exercising.

Visitors who time it just right will be treated to the sight of Basi riding a bicycle or Yuan Yuan balancing on a board that teeters on a cylinder that rolls along a bench.

Both of them stand and walk on command, can wave either front paw and can twirl a baton. They can bounce and slam-dunk a basketball, push a baby stroller, sit at a table and play cards, sit in a chair and play a cello-like instrument with a bow and carry a broom and bucket around their enclosure.

There's a reason for the way the Fuzhou Zoo animals are trained, said Art Risser, Zoo general manager.

It's the philosophy of Chen Yu Cun, Fuzhou Zoo director, that close human contact and exercise sessions help pandas develop their dexterity and balance. Not only are the pandas physically fit, but they are responsive to commands. That allows Chen to do routine physical checkups, take their blood pressure, monitor their heartbeats, take rectal temperatures, collect urine and blood samples -- without sedating them.

"What we're doing is simply following what the Chinese have already set in motion and have opted not to try to alter any of their schedules," Risser said.

"They are the Chinese animals; *they* are in control of the animals and we feel very privileged to have them visit. Further, we understand the value in the approach they have elected to take by instituting the exercise routine."

The exercises are so important to the animals that on Friday, the Chinese asked that the pool that has been installed in the exhibit for the pandas be removed to make more room for their routines.

Basi and Yuan Yuan arrived at Los Angeles International Airport shortly after noon Thursday amid media fanfare and a VIP reception from excited Zoo administrators. For the pair of pandas, it was a first time out of China and the animals appeared oblivious to the trip and the fuss.

However, they were so exhausted on Friday that they slept through the jarring sounds of jackhammers that tore out the pool, said Georgeanne Irvine, Zoo spokeswoman.

Instead of swims in the pool, the pandas will take showers. And they do so by holding the hose with attached showerheads themselves, Irvine said.

In another concession for the special visitors, the Zoo installed two trailers near the exhibit where the panda keepers will live so that they can be near their charges. In contrast, no Zoo keepers live on the grounds.

Trying to classify the giant panda into either the bear or raccoon family is dangerous --- scientists themselves don't agree. Although they resemble bears with big round bodies, they are akin to raccoons because they eat like them.

Basi and Yuan Yuan weigh less than 200 pounds each and are about 5 feet tall when standing. To keep them in tip-top condition, they will be fed fruits, whole grains and vitamins. But they will have a bamboo supplement --- about 22 pounds each a day.

Zoo officials estimate that they will munch about 4-1/2 tons of bamboo during their stay.

Types of bamboo that the pandas find tantalizing grow abundantly on Zoo grounds. But if the Zoo runs out, it will raid supplies at the Wild Animal Park and may call on the Quail Botanical Garden in Encinitas, which has volunteered to serve as a back-up bamboo source.

Chuck Coburn, Zoo horticulturist, said to keep up with demands, one person is being assigned to do nothing but locate, harvest, wash, store and deliver fresh bamboo to the pandas.

Zoo officials acknowledge they are making a gift to the Chinese in exchange for the panda visit, but would not say what that gift will be. "We deal in friendship, and friendship means trust," Myers said.

"Nine, 10 years ago, the thought of pandas or golden monkeys or tapins (animals closely related to the musk ox) may have been considered unrealistic," Myers said. Golden monkeys already are on exhibit at the Zoo and the tapins are expected soon, Myers added.

"Our friendship with the Chinese has allowed us many unbelievable animals."

July 26, 1987, San Diego Union, H-2. Ric Bucher: History of Balboa Park stadium.

The San Diego Unified School District signs a 50-year lease for the stadium in 1974. The stadium holds its last state track meet in June of 1975, shortly before the peristyle is destroyed to comply with state earthquake standards for buildings used by elementary and secondary schools. All but 3,500 seats are removed by 1979. A year later, the stadium is renamed Glenn R. Broderick Field.

July 27, 1987, San Diego Tribune, A-1. Rita Calvano: Panda fans crowd zoo for a view

July 27, 1987, San Diego Tribune, B-1. Rita Calvano: House of Hospitality Association: 50 and forgotten.

The House of Hospitality Association, Inc., which celebrates its 50th birthday tomorrow, keeps activities there running smoothly, and in fact exists solely to take care of the building, Ralph Johnson, manager, said.

July 27, 1987, San Diego Tribune, B-6. EDITORIAL: Park's dirty linen is showing.

There are two Balboa Parks --- a lovely "Hollywood front: and its barren, ugly backside.

The better-known Balboa Park is a lush, green strip along its peripheries, with palm-filled canyons, golf fairways, grassy picnic areas, flowers and eucalyptus groves. The other, at its center, is so scarred, neglected and haphazardly developed that San Diegans generally don't think of it as a park.

And why should they? Most of the trees, the stream, the wild vegetation of south Florida Canyon are gone, replaced by the cut-and-fill and massive concrete structures of the new and old Navy hospitals. Viewed from Pershing Drive, the huge urban-style hospital buildings dwarf the canyon and the Prado museums nearby. Farther along Pershing lines the unsightly reminder that the center of Balboa Park was once a garbage dump. Although the old Arizona landfill was closed in 1974, it still sinks and oozes methane gas. Nothing grows there. The city recently poured dirt, oil and sand over it so that it can be used for extra parking while the giant Pandas are on exhibit at the zoo.

Just beyond the dump, near Morley Field, earthmovers and bulldozers tear up a strip of land that is 130 feet wide and 800 feet long. It is the site of the park's new \$2.5 million nursery, which had to be relocated from Park Boulevard to make way for the new Navy Hospital. The park needs a convenient place, of course, to nurture 58 varieties of plants and trees. But the nursery nibbled away at land that should have been saved for park and recreation uses.

Also on the east side of Florida Canyon is the eyesore of a Park and Recreation maintenance yard, surrounded by chain-link fences. It doesn't belong there, but no one can figure out where else to put it.

The unsightly core of Balboa Park cries out for a master plan that the city will respect and observe. The park's core should have been reserved for the open-space and recreational needs of a growing city --- not for dumps, temporary parking lots and maintenance yards. There are the unfortunate products of expedient, piecemeal actions, given little or no public scrutiny.

The Pekarek Plan, which the City Council is due to start considering today, contains fine proposals for extending our park into this central area between park Boulevard and Pershing (Drive). We particularly support those that would create more landscaped greenbelts and open space for park users and evict the inappropriate users from its abused core.

The procession of dump trucks on Pershing, the sounds of grading, the acrid smell of oil sprayed on a temporary zoo parking lot tell us that time is running out. The city must adopt a plan that will clean up the park's blighted back yard.

July 28, 1987, Los Angeles Times, II, 5:1:3. Balboa Park Parking Plan Draws Fire, by Nancy Ray.

A sharp rift emerged Monday between Balboa Park organizations and park planners over parking and traffic proposals that would ban cars from the central part of the park and close Cabrillo Bridge to auto traffic.

July 28, 1987, San Diego Tribune. Extra fall holiday designed to cultivate "Kidsartz," by Pamela Little.

The first "Kidzart Festival," scheduled throughout Balboa Park October 17, . . . will include dramatic performances, music, art, dance, literature and mime for and by children.

July 28, 1987, San Diego Tribune, B-1. Rita Calvano: Council postpones action after hearing on Balboa Park plan

The San Diego City Council had delayed for two months action on a controversial proposed master plan that would dramatically change Balboa Park.

After a lengthy public hearing yesterday, Mayor O'Connor pushed for a postponement, saying she wanted more time to study the recommendations and consider new suggestions.

August 2, 1987, San Diego Union, B-3. Man's body found on Morley Field Drive in Balboa Park

August 5, 1987, San Diego Tribune, E-1. Susan Freudenheim: Centro Cultural de la Raza: practicing the art of a culture..

In its 17-year history, the Centro staff and supporters have worked with minimal budgets to organize as many programs as possible. Currently, the annual budget is about \$150,000, a sum many would consider small for such a diverse program of activities (by comparison the budget of the La Jolla Museum of Art is \$1.6 million). In recent years, approximately \$40,000 of the Centro's budget came from the city of San Diego, between \$12,000 and \$15,000 from the state Arts Council, and \$33,000 came from the National Endowment for the Arts. The remainder was raised from individual donors, members and foundation and corporate grants.

August 7, 1987, San Diego Tribune, D-1. Sirah Pattee: Marston house fate still under construction; City Council will donate the land as parkland September 15; in 1976 City officials signed an agreement allowing the San Diego Historical Society to operate the house

August 24, 1987, San Diego Union, B-3. Gina Lubrano: Chinese visitors lure 25% more.

San Diego Zoo attendance is up by about 25 percent during the first weeks of the pandas’ visit, about half of the projections for the 200-day exhibit, but Zoo officials are not complaining. “I would lay awake at night before the start and think everyone was going to show up on the same day,” said Douglas Myers, executive director of the Zoological Society of San Diego.

He expects final attendance figures will reflect the projected 50 percent increase --- a half million more visitors than last year for the same period --- or even more.

Instead of a beginning deluge, the visitor load during the first three weeks --- which is a normally high attendance period --- increased an average of 25.3 percent --- or by 83,447 visitors. The pandas --- Basi and Yuan Yuan --- are expected to boost attendance during normal low periods, after Labor Day and between winter holidays.

During the first three weeks, the lowest attendance was on opening day --- July 27 --- when 15,320 persons went to the Zoo. Even so, that was a 25.4 percent increase over last year.

Attendance was nearly 9,000 greater on its biggest day --- Saturday, August 15. The gate of 24,194 was well below the record 39,000 people last October t --- Founders Day --- when admission was free and park facilities were severely overtaxed.

Percentage wise, the biggest day in the first three weeks was July 30 --- a Thursday --- when attendance was up 44.2 percent.

Those who theorize that visitors stayed away the first few weeks because they were afraid of huge lines may be correct. Attendance started taking big jumps last week --- it was up 57 percent on Monday, 65.1 percent on Tuesday and 47.4 percent on Wednesday. So far, the lines have been manageable --- with the maximum wait to see the pandas about 20 minutes, Myers said. That's been in the middle of the day and on a weekend, Myers said.

Waits have been longer to get into the Zoo and to go on the bus tour. "Our fear was that we'd gridlock the city," he said of preparations for crowd control. But that hasn't happened "because of the cooperation of Balboa Park, CalTrans, the city, the parks and recreation department, the transit company, Ace Parking and the special events task force of the police department."

Traffic has been rerouted from Interstate 5; an auxiliary visitor parking lot has been set up, and Zoo employees are being shuttled to work from the old Sears parking lot.

"All those people working together has made the first month of pandas run so smoothly," Myers said.

Myers has reasons for his optimism about final attendance figures. Most of the people who have visited the pandas during their first three weeks on exhibit have been out-of-towners. The most loyal of Zoo-goers --- members of the Zoological Society --- have stayed away. "The membership rate is half of what it normally is," he said. That's been at the urging of the society, and there's a reason for it, Myers sad. Special members' days will be held during September and October.

After Labor Day and through October, the Zoo will open at 8 a.m., as it does at present --- but early admission for each of seven weeks will be limited to groups of about 20,000 society members. Jeff Jouett, Zoo spokesman, said he expects on some days, numbers will be small enough to give visitors longer than normal periods to view Basi an Yuan Yuan.

Myers also suspects that many San Diego residents who are not society members are waiting for visitors to go home before going to the Zoo. Neither Myers nor other Zoo officials will say what the society paid to Chine to get the pandas here. Renovations to the exhibit, which includes sleeping quarters for the panda trainers, were estimated at about \$500,000.

One bench mark of the financial success of the historic panda visit is the sale of panda merchandise, which Jouett said is breaking previous records.

"They're far ahead of what they thought," said Jouett, who would not release totals for competition reasons.

Initially, merchandisers anticipated each visitor would spend a minimum of 40 cents. That expectation was more than surpassed on opening day with the per capital spending at the panda shop averaging \$2.21 for each visitor.

Since July 27, the Zoo has sold nearly 100,000 of the 144,000 panda T-shirts on hand. Merchandisers are scrambling to reorder and are finding that they have competition with others in San Diego who want to sell panda shirts.

Jouett said panda T-shirts are on sale at Lindbergh Field, at a nearby deli and even at competing Sea World, which has its own stock of panda merchandise.

Another bench mark of the pandas' success is a brisk business in the sale of society memberships. During the month that included the first two weeks of the pandas' visit, sale of memberships at the Zoo entrance nearly doubled over last year --- from 876 to 1,508. While attendance is up at the Zoo, it has slumped at the Wild Animal Park, the other facility operated by the society.

Tom Hanscom, park spokesman, said there has been a drop of 19.1 percent compared to last year during the first three weeks of the pandas' visit. He blames the decline on the park's cancellation of headliner concerts that drew performers such as the Kingston Trio. "It's not the panda effect, but the concert effect," Hanscom said.

August 25, 1987, San Diego Union,, B-3. Annette Kondo: Girl Scouts tackle computer programming in Balboa Park.

Summer camp traditionalists will be relieved to know that the girls also spend time swimming, doing arts and crafts and taking field trips.

August 25, 1987, San Diego Tribune, B-7. OPINION, Richard Amero: City should ignore some park advice

On July 27, the San Diego City Council returned proposals for a master plan for Balboa Park to the Parks and Recreation Board for consideration of alternatives suggested by members of the local branch of the American Institute of Architects (AIA) and by Councilwoman Celia Ballesteros.

The AIA wants to keep Cabrillo Bridge open to traffic and to build a parking structure behind the Organ Pavilion. Ballesteros wants a parking garage on the site of the present Naval Hospital [sic]. The Park and Recreation Board is to hold hearings on these alternatives on September 21 and then present its findings to the City Council. As the Park and Recreation Board already has studied traffic and parking proposals for Balboa Park, it is unlikely that random and fanciful solutions by members of the AIA and by politicians are going to change their views.

The current plans, as endorsed by the Park and Recreation Board, attempts to remedy traffic and parking problems for all sections of the park. The new alternatives are not inhibited by a knowledge of how non-park and park traffic interfere with one another or how any kind of vehicular park traffic endangers life and property. They dazzle by their novelty, but they do not ensure a pleasant park experience.

The AIA plan intensifies traffic from Cabrillo Bridge to President's Way, ruins the view from the Organ Pavilion colonnade and compounds the bottleneck on President's Way.

Ballesteros' plan forces people to park far away from the zoo and museums and obliges them to cross Park Boulevard. If Ballesteros wants a garage on the old Naval Hospital site to accommodate parking for patrons of downtown, the community college, high school and Balboa Stadium, she may have found a logical use for it. But the use of park land for such non-park purposes should not be a recommendation for a Balboa Park master plan, and funding for same should not come from a strapped park and recreation budget. Last-minute Rube Goldberg proposals for Balboa Park from

instantaneous experts play into the hands of the Central Balboa Park Association and the San Diego Zoological Society. These organizations would kill the master plans for Balboa Park, as these plans would curb their autonomy.

Key proposals of the Balboa Park master plan, which the City Council was reluctant to approve on July 27, should be supported by people who go to the park to enjoy its outdoor attractions.

These proposals have been analyzed and modified by PRC Engineering, the Park and Recreation Department and the city manager's office. The council, through its inaction July 27, showed it was incompetent to deal with public park and recreation issues. The council's unwillingness to champion the public park aspects of Balboa Park was in keeping with its previous decisions to eject dancers and athletes from the Palisades and to replace open space in Belmont Park with a shopping mall.

Items proposed by the new master plan and which the Central Balboa Park Association and the San Diego Zoological Society oppose are the closing of Cabrillo Bridge to automobile traffic, the diversion of traffic to a parking lot north of Cabrillo Bridge and to a parking structure in Archery Canyon, the opening of the Plazas de Panama and Pan American to pedestrians, and the use of the parking lot east of the zoo entrance for all-purpose parking.

While exact statistics regarding visitor participation in Balboa Park's multiple activities are not available, this writer estimates, on the basis of an average daily attendance of 33,000 in 1987, that 20 percent of visitors go to the central area to enjoy its outdoor attractions, 10 percent go to museums and theaters, 35 percent go to the zoo and 35 percent go to Balboa Park areas other than the zoo and central section.

This would amount to 6,600 people daily for outdoor attractions on the central mesa, 3,300 for museums and theaters, 11,550 for the zoo and 11,550 for picnicking, sports, golf and other outdoor activities elsewhere in the park.

Outdoor activities are the park's biggest draw with or without the inclusion of the zoo.

According to the 1960 Bartholomew planners, 67 percent of the participants in all park activities are from San Diego, city and county, whereas 72 percent of the zoo's visitors are from outside the city and county.

The people of the city and county, not the outsiders, pay for the operation of Balboa Park through their property taxes and through their elected representatives.

What is good for museums and theater-goers in Balboa Park is bad for ordinary park visitors, as paid indoor activities and free outdoor activities conflict with one another.

Unlike most city parks, Balboa Park has a collection of buildings in its central core of varying architectural merit that some people like to look at from the outside. Many San Diegans take out-of-town visitors on Sunday afternoon automobile tours of the grounds.

This is why pedestrians must contend with bumper-to-bumper traffic from Cabrillo Bridge to President's Way.

El Prado and its Plaza de Panama and the Palisades and its Plaza de Pan America were planned for the expositions of 1915-1916 and 1935-1936 as great pedestrian spaces.

Except for prominent guests arriving in automobiles, people arrived by street car at the east gate or walked through the Ocean or west gate. They could leave their automobiles on paid lots outside, but not on the exposition grounds.

The attractively landscaped plazas were the scene of parades, drills, athletic events, pageants, dances and band concerts, and could be so again.

Perhaps the center of Balboa Park can never achieve the colorful patina and historical significance of the great plazas of Italy and France from which automobiles have been banned, but they can generate the conviviality and charm of plazas at Disney land and Tivoli Gardens.

The proposed master plan contains provisions for adequate close-in parking for the central core.

There currently are 540 parking spaces in the Plazas de Panama and Pan American and the parking lot south of the Alcazar Gardens. By doing away with these spaces and building a parking lot in Archery Canyon and a parking lot near the Old Globe Theater, this number can be raised to 690.

Additional parking can be gained by developing or expanding parking behind the Conference and Federal Buildings.

Whether the zoo likes it or not, automobile traffic and demands for parking are going to increase on Park Boulevard during the projected 20-year life of a new master plan.

Environmental groups will fight to prevent the building of a parking lot in Florida Canyon to take care of this increased traffic. When the need arises, the City Council should follow the master plan's recommendation by taking custody of the parking lot east of the zoo entrance and readapting it to accommodate more automobiles. The zoo should recognize that it has achieved its maximum growth in Balboa Park.

Without an easy and enticing access to El Prado from the parking lot east of the zoo entrance, there can be no rejuvenated Spanish Village, a facility that exists today in a state of suspended animation. A fast-food restaurant might be the catalyst that would bring Spanish Village to life.

The city cannot supply elderly or disabled persons with curb access to their favorite indoor attractions in Balboa Park, but it can provide them with reserved parking spaces as close as possible. Museums and theaters should provide their patrons with night security, shuttles and escalators.

Some minor extrinsic details of the proposed master plan, such as the location of the municipal gymnasium, golf course, Centro Cultural de la Raza, and the Boy Scout and Girl Scout camps, can be amended without jeopardizing the entire plan, but the traffic and parking proposals for the central area cannot be set aside, because they are the foundation of a successful Balboa Park master plan. The city cannot improve Balboa Park by doing nothing.

It already has spent \$370,000 on a new master plan.

John Nolen in 1927, a citizens' study committee in 1957, the Harland Bartholomew planners in 1960, a special Balboa Park committee in 1976, the Pekarek Group in 1983, and PRC Engineering, the Park and Recreation Board and the city manager's office in 1987 have recommended a loop road to keep automobiles from destroying the pedestrian experience and outdoor beauty of El Prado and the Palisades.

When the City Council reconsiders the Balboa Park master plan on September 21, it should be guided by expert professional advice and not by the demands of those who can't see beyond their own noses.

August 27, 1987, READER, 5. All Work & No Play, by Brae Canlen.

Listed below are some of the regulations (issued in August of 1986) that have governed musicians, unicyclists, jugglers, portrait artists and anyone else who wants to perform outdoors in Balboa Park. Permits must be obtained on a daily basis.

(See copy of article in this binder for complete article.)

August 27, 1987, San Diego Tribune, B-10. A slam dunk in the park.

Try telling Audie Villanueva that the Municipal Gym doesn't belong in Balboa Park.

First as a player and now as a city recreation employee, Villanueva came to know the gym as "the place where everyone comes." From his office overlooking the gym, he can see all three of its large courts, hear the tap of the basketballs, the shouts of the players, the shoes squeaking on the wooden floor. He's seen the greats and the near-greats who come to play here --- and the ordinary folks, the inner-city kids, the high school summer leagues, the middle-aged amateur athletes, the people, young and old, who come just to watch.

August 27, 1987, San Diego Union, B-11. OPINION, Letter, Bob Thomas: wants to be able to drive over Cabrillo Bridge . . . If they eliminate the bridge entrance to the park, I won't vote for the new plan in September.

September 3, 1987, READER, 5. The Big Frieze, by Paul Krueger.

Antique auto buffs will soon displace fold dancers as tenants of Balboa Park's Conference Building, but the car fanciers are grinding their gears over a plan to renovate the historic fifty-two year old building. That structure, like the neighboring municipal gymnasium and the Federal Building was designed by noted architect Richard Requa for the 1935 international exposition and is listed on the National Register of Historic Landmarks. Though the million-dollar rehabilitation proposed by auto museum supporters would retain much of the Conference Building's original character, it calls for the installation of two large panes of glass above the front doors and tiles to cover a portion of the outside walls.

But the secretary of the city's Historic Site Board balks at those changes. He wants the remodeling to adhere even more strictly to architect Requa's design, which means no new glass, no new tiles, and the addition of a thin strip of intricate plaster handiwork that once decorated the building's exterior. "We should restore it as closely as possible [or] at least not preclude doing things at a later date," says site board secretary Ron Buckley.

Members of the site board met last week to review the museum's remodeling plans and to debate secretary Buckley's counterproposal, which he bases on original architectural drawings and old photos of the Conference Building. The result was a mixed decision. Though Buckley had urged site board members to reject museum architect Donald Goldman's plan to cover an eight-foot-tall by sixty-foot-long section of the exterior walls with glazed tile, the board agreed with Goldman's opinion that the tile swath is necessary to protect the walls from graffiti and scruff marks inflicted by inconsiderate park visitors. But the board members agreed with Buckley's suggestion that the museum tenants attempt to re-create the long, thin plaster frieze decorated with Mayan motifs that once covered a portion of those walls. And they don't want any glass installed above the museum doors.

Museum architect Goldman says he'll begin the search for experts who can cast plaster reproductions of the frieze, though he's worried that the job might be a very expensive one --- if it can be done at all.

"The only way to do it is one-hundred percent right," warns Goldman. And he says his clients don't mind hanging decorative banners where they'd proposed the glass. Buckley, however, may not drop his opposition to the new tiles. He will make his concerns known to the city manager's office, and he says his site board members want to hear from museum backers again after they've researched the plaster frieze project. That could delay the remodeling project, which is scheduled to begin early next year and be finished by next summer.

Architect Goldman seems satisfied with the site board's initial comments, but he's a bit distressed that he didn't learn of the board's review power until "this late in the game." He says city officials have given him conflicting comments on the Historic Site Board's power --- Buckley says it's "advisory" to the city manager and council --- but Goldman has learned it's expedient to cooperate. "If you cross them and raise a big stink, it'll cause you more of a problem than if you just do what they say," he comments.

September 3, 1987, READER. Color Them Gone, Balboa Park's Future May Be In The Wrong Hands, 1, 10, 11, 12, 13 14, 15.

In the next few weeks, the San Diego City Council will be grappling with a proposed master plan for Balboa Park. In all, there are now six alternatives to that original plan, drawn up by San Diego consultant Ron Pekarek, and they reflect an utter lack of consensus on how to plot the future of San Diego's urban oasis. One way to understand how such discord has crippled attempts to write a new plan is to go back and inspect an old plan --- the one drawn up by Samuel Parsons in 1903.

Many people mark (the) world's fair [sic], which celebrated the completion of the Panama Canal, as the seminal event in the creation of one of the country's great urban parks. Yet in fact, it was also the main reason for all the dissent today over how to play the park's future. For if the expo buildings hadn't been constructed, later restored, and finally handed over to some of the city's cultural institutions, the park might still be primarily a *park*, rather than what it has become: a hybridized collection of competing interests, where sacred cultural cows have become dependent on the automobile and where the most important tenants --- the trees and plants --- have been ignored and forgotten.

Is it possible for the cultural interests and the horticultural interests to coexist harmoniously in Balboa Park? This is the central question that the proposed master plan fails to resolve. Plenty of trees and plants have lived and died and disappeared, and many more will be removed for further building expansion in the future. When are buildings ever removed from the park?

One reason that the Pekarek Plan and its alternatives lack anything approaching a cohesive vision is precisely because there isn't a landscape plan with which to provide a starting point, a context for planning the rest of the park.

In San Diego, making the plant collection a top priority would necessitate a reversal of the institutional inertia that began to tip in favor of the special interests as far back as the Panama-California Exposition and which was reinforced after the second world's fair in the park, held in 1935.

September 3, 1987, San Diego Tribune, A-1. Dona Steckbauer: City may impose fees on fund-raising events.

September 4, 1987, San Diego Tribune, B-15. Involved electorate means good government, by Frances Zimmerman, member of San Diego Chapter of the Sierra Club.

Depending on who's doing the talking these days, Mission Beach Belmont Park is being restored, destroyed or developed. What some people consider a responsible renovation, others call a regrettable "mall-ing."

Government action of Mission Beach Belmont Park has concluded. But the issue heightened Sierra Club concern about our electoral system, the extent to which commercial-recreational uses will be allowed in San Diego parks, and the importance of timely action by residents on park land-use issues..

September 5, 1987, San Diego Union, B-3. Kristine Moe: Dinosaur from Carlsbad bets a new home in Natural History Museum

September 7, 1987, San Diego Tribune, B-3. Rita Calvano: Campaign to fund parks will focus on "civic pride."

The campaign is being run by Bob Wickers, an associate of Dresner-Sykes of New York, a political consulting firm whose San Diego clients have included Mayor O'Connor and Sen. Pete Wilson, R-Calif.

September 7, 1987, San Diego Tribune, B-6. Letter, Craig J. Moya: Park's cultural fair was non-political; answers objections to Friends of Nicaraguan Culture booth.

We told Mr. Kreger (Letters, 8-26-87) that the cultural fair was intended by its promoters to be non-political, and we would be glad to discuss the Central American situation at some other time.

September 10, 1987, READER. Letter, Richard Amero in answer to Neal Matthews's article, September 7. *The Petrified Park*.

Neal Matthews has shown he can change his mind about Balboa Park ("Color Them Gone," September 7). Perhaps, if he can escape the lure of the botanists and can read *The Politics of Park Design* by Dr. Galen Cranz, he may further transform his views.

At the moment, Matthews equates parks with trees and plants and leaves out people.

Frederick Law Olmsted, Sr., Samuel Parsons, Jr., and John C. and Frederick Law Olmsted, Jr. planned their parks for people to enjoy. As social egalitarians, they regarded their parks as expressions of democracy in action.

In their designs, they alternated open green spaces and trees to create an illusion of vast spaces bordered by forests.

Parsons was fascinated by the views outward from San Diego's great city park, views within of miniature canyons, and the desert-like terrain. He advised against giving the park a greensward (i.e., Eastern) treatment.

Kate Sessions and George W. Marston backed Parsons, but amateur botanists in the city insisted on lawns, flower beds and expensive irrigation systems.

As a consequence of the work of the local Floral Society, the first exposition was given the title of "San Diego Garden Fair." Helter-skelter planting for the exposition produced flash-pan results, but the aftermath was anarchy. Eucalyptus towered over the California Tower, acacias became messy, and lush growth hid buildings.

After the first exposition, Balboa Park became "a city within a city," but lost the rural Eden within a city that the Olmstedes and Parsons had envisioned.

The Olmstedes and Parsons did not want to turn their tree-bordered meadows into zoos and botanic gardens. They said such displays should be placed outside public parks.

It may be possible to locate small gardens in inconspicuous places within Balboa Park, as at Golden Gate Park, where sequestered and sheltered nooks do not detract from the interlocking landscape. The zoo has planted trees and shrubs alongside trails with labels indicating their scientific and vernacular names. Passers-by are within eye but not hand distance. Most of the plants are exotic and expensive and require careful nurturing. Balboa Park should not duplicate the botanic extravagance of the zoo because of the costs and because people would steal the plants.

Much of the horticulture in Balboa Park exhibits the same insensitivity and disorder as do the buildings. Flowers and trees are planted in awkward places. If enough trees grow in rows close to one another, as they do on the former lawn east of Eighth Avenue Drive and south of El Prado, people will not sit there. If enough trees form an impassable barrier, as they do on the slopes near the Quince Street overpass, children and adults will not play under their branches. If enough spindly palms rise high in the air, as they do in front of the Palisades Building, the architectural scale of the buildings will become ridiculous.

Unrelated gardens along the west rim of Florida Canyon are all foreground. At close view, they offer specimens of value, but, as a landscape composition, they are incoherent. Rare agave and cacti and prize roses disappear quickly.

A new master plan should have a horticultural element, as did the 1959 Balboa Park Citizens Study and the 1960 Bartholomew Plan. This element should embrace the entire park and blend the landscape details so that they please the eye and invite visitors to linger and to play. Baseball diamonds between Middle and South Drives in Golden Gate Park are surrounded by a natural amphitheater and not by wooden or concrete bleachers.

In keeping with the wishes of the Olmstedes and Samuel Parsons, landscaping in Balboa Park should be simplified, pruned and periodically thinned so people can interact with it and with one another.

A secret that Olmsted, Sr. understood is how to balance public focuses, such as the Bethesda Fountain in Central park, with personal spaces, such as the Ramble. Each enhances the other visually and socially as each offers a different and contrasting kind of personal experience.

We can petrify Balboa Park with too many artificial botanic gardens just as easily as we can petrify a park with too many roads, parking lots and buildings.

(Note: In re-typing this article, I could not avoid the temptation to change the syntax, rwa)

September 10, 1987, Letter, Michael Praetorius expressing his approval of the Matthew's article in his own inimitable way of which the following is an example:

San Diego does not have a government; it has a predatory, scheming, inept bunch of parasites who leech off this city every chance they get. Citizens deserve this shit because they take it. It is time to fight back in any way we can.

September 14, 1987, Letter, Mayor Maureen O'Connor to Richard Amero . . . It has been recommended . . . that the matter of the Balboa Park Plan be noticed and heard on November 9, 1987, instead of September 21, 1987, as originally requested.

September 16, 1987, San Diego Union,, D-1. Naval Hospital gear . . . medical electronic equipment.

September 17, 1987, READER. Letter, Carol N. Landsman, on the Matthews' article.

I've been following the Balboa Park master planning process for more than four years now and have to take issue with Neal Matthew's statement that the seven master plan alternatives "reflect an utter lack of consensus on how to plot the future" of Balboa Park ("Color Them Gone," September 3).

On many points, six sets of recommendations are generally in agreement, although it is true that they often differ from the recommendations of master plan consultant Ron Pekarek. Major parking and access issues (Should the Laurel Street bridge be closed or left open? Should parking structures be built, and, if so, where?) still need to be resolved, but this should not overshadow the extent to which substantial concurrence has been achieved regarding the future of the park.

Mr. Matthew's article does clearly point out the need to address landscaping problems and performs a valuable public service by letting people know what a poor job we have all done as custodians of this incredible resource and treasure. In November, when San Diegans go to the polls, I hope they will also understand that the bond issue represents only a small part of Balboa Park's overall needs, which we have collectively disregarded for too long.

September 17, 1987, READER. Letter Tanja Winter, La Jolla, who congratulates Neal Matthew's for his courage.

Congratulations to Neal Matthews for his fine article on Balboa Park. It takes courage to tell it like it is.

Especially shocking is the new naval hospital, illegally constructed, in violation of both the spirit and the letter of the law. It is a monstrosity, taking up large amounts of valuable and scarce park space, which was essentially stolen from the people of San Diego.

The proposed expansion of the space theater is equally unjustified. Greedy and thoughtless encroachment on public park space must be stopped. No new or expanded building of *any* kind should be allowed, in order to protect the park's legitimate purpose: preservation of the "restful beauty of nature."

Ironically, in the midst of the current building mania, which encourages commercial expansion, the present plan simultaneously calls for the destruction of Centro Cultural de la Raza, a unique, non-profit cultural center that has for years provided space for artists, dance classes, photo and art exhibits, and performance space. Could it be that the Centro was singled out for demolition precisely because it serves the Chicano community and is non-profit?

We should demand that members of the San Diego City Council fully commit themselves to the preservation of open and park spaces and show greater sensitivity to the cultural diversity of our community.

September 17, 1987, San Diego Union, B-1, B-3. Steve Schmidt: Sierra Club proposes 2nd Balboa Park bridge.

The bridge would be built along the southern edge of the park, spanning state Route 163 from Marston Point to the Aerospace Museum.

Officials with the organization hope their proposal will help kill controversial plans for a new road and mammoth parking garage in the heart of the park.

Specifically, the new two-way bridge could be approached from Balboa Drive on the west or from President's Way on the east via a connecting road that has already been proposed for behind the San Diego Aerospace Museum.

September 22, 1987, San Diego Union, B-1. Harold D. Mahan, new executive director of San Diego Natural History Museum, by Kristine Moe . . . replaces Frederick S. Schram, who has been acting director since Charles A. McLaughlin resigned in January.

September 24, 1987, READER. Letter, Barbara Mc Dermott, Spanish Village Art Center, who objects to Neal Matthew's reference to Spanish Village as a "parkland gobbler."

The enlargement of the Spanish Village was and is the idea of Mr. Pekarek, and not the artists and craftsmen of the Spanish Village Art Center, Inc.

September 24, 1987, READER, Letter, Bernard Conrad, Golden Hill, claiming Neal Matthew's "hit the nail directly on the head in his article about the planning (or lack of planning) in Balboa Park."

What has truly happened is that a small city has been built within the original 1400 acres designated Balboa Park and that city wants to grow. Trained animal exhibits, Big Olaf concessions, laser rock shows, gift shops, restaurants, theaters, and future plans for grandiose parking structures and supportive roadways. Typical also is the "hunger-panic" for the tourist dollar that we never seem to get enough of. "Feed me," the monster cries. "FEED ME!"

Approximately three-fourths of Balboa Park has been paved, built upon or fenced off for special interests, while the original concept of the park has been lost in the paper shuffle. But does the public realize that there are plans on the table today to increase the amount of traffic into the center of the park, eradicate natural canyons in favor of parking structures and buildings and roads --- and nowhere in those plans is "nature" (what's that?) considered, other than to augment or disguise the growth of the inner-park city: the City of Balboa Park.

October 26, 1987, San Diego Tribune, A-8. City officials urge 'yes' votes on funds for bay, park repair.

October 27, 1987, San Diego Tribune, A-1, A-6. Rita Calvano: City voters will decide on bay, park bond issue.

A week from today, San Diego residents will answer the question of whether to tax themselves for the next 30 years to clean up the water in Mission Bay and give several of the buildings in Balboa Park a new lease on life.

If they answer yes to Proposition B for \$93.5 million, or to Proposition C for \$73.8 million, that means there could be fewer sewage spills and resultant noise pollution in Mission Bay and fewer health hazards.

And in Balboa Park, the House of Hospitality and the partially condemned House of Charm would be rebuilt and several other structures that house museums or other cultural institutions there would be improved, repaired and upgraded.

“We’re asking (voters) to save, restore and preserve . . . Balboa Park and Mission Bay Park,” Mayor O’Connor said.

As premier attractions in San Diego, these parks receive millions of visitors a year who go to Balboa Park for art and cultural history, the Old Globe Theater or Starlight Opera outdoor theater and several forms of recreation.

Mission Bay Park is the scene for water sports, jogging and sunbathing.

Both parks are favorite picnic spots.

Proponents of the bond measures include such organizations as the San Diego Chamber of Commerce, the San Diego Taxpayers Association and the Sierra Club.

The Libertarian Party and the United Taxpayers of San Diego oppose the measures, saying that the bonds are too expensive a way to pay for the improvements.

Both groups, whose representatives wrote ballot arguments in opposition, say that the repairs should come out of the regular city budget and that much of the money for them could be raised by charging visitors to park at the attractions.

“I don’t think that there’s a lot of quarrel about the need for the repairs,” said Dick Rider, vice chairman of the Libertarian Party of San Diego. “The question is who should pay for them and why hasn’t the city budgeted for this in the past.”

Added Jack R. Sanders, president of the recently formed United Taxpayers of San Diego: “We are really mad that they (the city) came out for new taxes before they made any attempt at all to make the parks more self-supporting.”

Each measure requires a two-thirds vote for approval. The \$93.5 million in bonds would be sold if both were authorized.

Proposition B could raise taxes by as much as \$24 per \$100,000 of assessed property value; Proposition C as much as \$18 per \$100,000 of assessed property value. But the actual tax rate could fluctuate for a couple of reasons while the bonds were being paid off.

“As the total assessed valuation increases citywide, the percentage that each land owner (pays) will decrease (because) the tax burden is spread over a larger base,” city economist Jack Farris said.

The actual cost of the bonds will depend on interest rates. For example, at a 9 percent interest rate, which Farris said is plausible, the \$73.8 million bond would cost \$213 million, and the \$93.5 million bond would cost \$272 million, Farris said.

Mission Bay Park would receive \$46.9 million under Proposition B; \$37.9 million under Proposition C. Both measures would provide \$25.1 million for an improved sewer system and new storm drains to greatly reduce sewage contamination in Mission Bay where odors and pollutants sometimes drive people away, if they're not already cautioned by the city to stay out of the bay because of potential health hazards.

A project to shore up the bay --- actually to put more sand there --- and the purchasing of equipment to prevent further erosion are also included in the \$25.1 million.

These measures also would include \$8.6 million to develop the South Shores area of Mission Bay; \$1.7 million to add new and improved restrooms; \$2.5 million to build pedestrian and bicycle paths from Sail Bay to East Crown Shores; \$1 million to improve parking and traffic circulation.

The additional \$9 million under Proposition B would include \$7 million for improvements to Fiesta Island.

Under Proposition B, Balboa Park would receive \$46.6 million instead of the \$36 million that would become available under Proposition C.

Both propositions would provide money to tear down and rebuild the House of Hospitality and the House of Charm, necessities because the structures are falling apart, said John Leppert, assistant to the city manager. They are two of several buildings constructed for either of the two international expositions, one of which was held in 1915, the other in 1935.

The House of Hospitality, which would cost \$11.5 million to rebuild, is used for banquets and weddings but also leases out much of its space to community organizations. The Café del Rey Moro, the main restaurant in the park, also is there.

The House of Charm has little activity in it now because it's partially condemned. It would cost about \$5 million to rebuild the house and its arcades.

Other buildings that would receive attention are the Museum of Man (\$2.35 million); Old Globe Theater (\$1.1 million); Museum of Art (\$1.57 million); Casa de Balboa (\$1.39 million); Natural History Museum (\$2.15 million); Centro Cultural de la Raza (\$250,000); Balboa Park Club (\$3 million); Palisades Building (\$550,000); Federal Building (\$1 million); Municipal Gym (\$1.5 million); and development of a Japanese Garden (\$2 million); traffic circulation and other changes to make it easier for drivers, pedestrians and others to use the park, including the handicapped for whom wheelchair ramps would be built and other improvements made to make the park more accessible (\$2.5 million).

Improvements on the buildings would differ from one to another, but generally would include new heating systems to replace the old-fashioned boilers, steel-framed doors to replace wooden ones, and new floors and roofs.

"These are things that have been put on back burners for years and years because the city hasn't had money to replace them," Leppert said. "So now, we're going to the voters with a real program and saying, 'There are the things that need to be done. This is how much it's going to cost,' and hopefully, they will provide the money."

The additional \$10 million in improvements to Balboa Park under Proposition B would include \$6 million for a municipal gymnasium to be built outside Balboa Park and another \$2.5 million for more improvements to make traffic circulation and pedestrian accesses more efficient.

The city council decided on two ballot measures to give people a choice, hoping that would encourage voters to approve at least the lesser amount.

“Definitely, please vote on (at least) the minimum . . .,” O’Connor said. “Obviously, it would be nice to have (Proposition) B, which costs a little bit more but gets us a lot more.”

The San Diego Chamber of Commerce prefers the measure for the larger amount.

“We think that Balboa Park is a precious resource for the city and that the need for improvement in Balboa Park has been established,” said Dot Migdal, a chamber vice president. “And we need to protect against sewage failures in Mission Bay.”

Mark Nelson, executive director of the San Diego Taxpayers Association, said his organization traditionally has supported such bond proposals “as the most equitable method of financing large capital improvement projects when other money is unavailable.”

He said the improvements that would come from a successful bond election are needed, “without question.”

Rider says many of the improvements could be financed simply by charging parking fees to visitors to the parks.

“It’s crazy to have free parking,” Rider said.

O’Connor thinks otherwise.

“I am not going to do that,” she said. “The sentiment in this community is not to charge for parking at the beaches and at our parks.”

She said the repairs could not be budgeted for because Proposition 13, a property tax-cutting measure passed in 1978, cut too much from city revenues.

October 30, 1987, San Diego Union, B-7. Letters, R. G. Oliver.

The way things exist in the parks at this time, more improvements mean more things to be vandalized. Let’s see an increase in police patrols, the removal of drug users and derelicts, and the stricter enforcement of laws, so families can feel safe about using the parks again.

October 30, 1987, San Diego Union, B-7, Joan and Monty Griffin.

The most critical park problems are vehicular access, circulation and parking, yet only a small fraction of these (bond issue) funds are earmarked to solve these severe problems.

October 30, 1987, San Diego Union, E-6. Robin Kleven: Tropical fish show in Casa del Prado Saturday and Sunday.

October 31, 1987, San Diego Tribune, B-3. EDITORIAL: Bluebirds, not jailbirds, in park.

In the past, the city considered all kinds of unparklike schemes, from turning Florida Canyon into a reservoir --- an idea mercifully dropped --- to installing a landfill in Balboa Park which unfortunately came to fruition.

We thought we has seen the last of these strange proposals, but the county grand jury surprised us this week. It suggested that the park is a fine place for a temporary jail (in the pick stucco psychiatric ward at the old Naval Hospital).

Circa November 1, 1987, Unpublished essay by Richard Amero: Why voters reject bond issues.

It doesn't take a wizard to see that the money allocated to Mission Bay under both bond proposals would go toward general park improvements of benefit to all Mission Bay visitors and that the largest part of the money for Balboa Park would go toward the promotion of institutional uses and the expansion of buildings.

November 4, 1987, San Diego Tribune, A-1. Rita Calvano: Mayor O'Connor may ask again for park, bay bonds vote.

The defeats of Propositions B and C, the multimillion-dollar bond measures for improvements to Balboa Park and Mission Bay Park were by such small margins that Mayor O'Connor thinks another ballot measure may be worth trying.

But if there's a next time, she hopes to circumvent any measure that requires a 66-2/3 percent vote for authorization, as both of yesterday's propositions did.

Instead, O'Connor said she'll ask City Manager John Lockwood to determine the possibility of putting a measure on the ballot that could be passed with a simple majority vote.

November 4, 1987, San Diego Union. Defeat of Propositions B and C.

City Manager John Lockwood said, "the issue was clear. Apparently 40 percent of the people just aren't that interested in Balboa Park or Mission Bay."

November 5, 1987, San Diego Union, B-7. Lori Weisberg: Election '87; transit tax OK is encouraging to other areas

November 5, 1987, San Diego Union, B-7. Proposition B: \$93 million bonds for Balboa Park, Mission Bay.

YES	106,563	59%	NO	74,209	41%

Proposition C: \$73 million bonds for Balboa Park, Mission Bay

YES	109,797	61%	NO	69,452	39%

Proposition D: Restrict Mission Bay commercialization

YES	135,633	80%	NO	34,315	20%

November 6, 1987, San Diego Tribune, B-6. Use of lease revenue urged for Mission Bay, by Kathryn Balint.

November 6, 1987, San Diego Tribune, B-6. Rita Calvano: Don't ban cars from park span, keep Cabrillo Bridge open, Park and Recreation Board now says.

The board said that is approval was in concept only and that it still wants all cars kept out of the center of the park someday. This could happen only if the bridge were closed.

The board agreed yesterday to discard the idea of an entrance at Quince Street on the park's west side.

The board approved the possibility of a parking garage at the site of the parking lot behind the Organ Pavilion.

The board voted against extending 28th Street to Grape Street.

It endorsed the idea of building a gymnasium on San Diego City College property.

The board approved moving the Park and Recreation Department's maintenance yard from the Arizona landfill to a part of the parkland that the city will receive from the Navy next year.

November 7, 1987, San Diego Tribune, D-3. Letter, T. S. Schumaker, AIA: Develop Balboa Park's eastern reserve.

I suggest improving the core park with a simple parking structure --- that works --- as to access and egress, as presented by the architects. This would free the flow of people and liberate the core. Then, as a first priority, we must develop and finish the remaining east park reserve in a responsible manner, to a "park-like" park, as intended by our park's founding fathers.

November 7, 1987, San Diego Tribune, D-3. Letter, Robert C. Lindsey, Santee.

. . . if a temporary (jail) facility is a must, then the grand jury's recommendation should be considered along with any other options that may be presented.

November 7, 1987, San Diego Union, B-1. Steve Schmidt: Cabrillo Bridge auto ban idea dies.

San Diego park officials have scrapped a proposal to ban vehicles from Balboa Park's majestic Cabrillo Bridge following fierce opposition to the idea.

The city Park and Recreation Department is recommending instead that traffic along the two-lane bridge be reduced to a single one-way lane that would feed into the heart of the park.

November 8, 1987, San Diego Union, C-2. Noel and the Old Globe.

November 9, 1987. Unpublished statement of Richard Amero at the City Council meeting November 9, on the Balboa Park Master Plan.

November 9, 1987, San Diego Tribune, B-7. EDITORIAL: Shaping Balboa Park's Future.

. . . from the sometimes heated debate over how to separate pedestrian and vehicular traffic in the core of the park came a compromise that we believe should benefit all park users.

It permits one-way traffic on Cabrillo Bridge, closes the parking lot in front of the Museum of Art and routes all traffic south at the House of Charm.

But if parking is to be eliminated on the Prado, it is imperative that replacement spaces be provided nearby.

The most logical is construction of a 300-space parking garage on the existing parking lot behind Alcazar Gardens.

November 9, 1987, San Diego Tribune, B-7. Council decisions on park master plan are crucial, by Celia Ballesteros.

Balboa Park was donated to San Diegans 119 years ago and set apart as an island of beauty, tranquillity and entertainment --- an urban sanctuary.

Today, by the millions, we visit, run, walk, rest and play throughout its 1,400 acres [sic], enjoying its multiple attractions. We love the park. In fact, we are loving it to death.

Today, the San Diego City Council will make decisions on the park master plan that is designed to serve as the park's planning document for the next 20 years. The preservation of this resource as a free, open park for the enjoyment of all San Diegans depends on the council's approval of a plan which accommodates increased travel to and through the park, without turning "paradise into a parking lot."

If the park is not to become one more pedestrian/vehicular traffic snarl, strangling movement, scenic open spaces and the many natural canyons in a cloud of noxious carbon monoxide, the issues of foot access, auto circulation and parking must be addressed.

With the November 3 failure of Propositions B and C to fund park transit improvements through general obligation bonds, it is critical that the city identify short- and long-term transportation alternatives from the standpoint of land use.

It is possible to strike a reasonable balance between maintaining a strong traffic circulation element while retaining the pedestrian ambiance, without robbing the park of its natural and exhaustible resources, such as Archery Canyon.

There are several amenable traffic and parking elements proposed in the plan which will limit the encroachment on public land yet encourage solutions to the problem of excessive traffic around the park.

The acute need for parking in the downtown and uptown areas is spilling over into the issue of Balboa Park. People traveling to these areas to work and shop are tying up parking space needed for park visitors.

For the last few months, a task force including representatives from San Diego City College has been working with the 8th District office to seek solutions to these problems in the Balboa Park area and the consideration of a joint city/college sports complex. The task force has suggested two logical alternatives.

Either proposal supplies auto space in excess of the projected park requirements and presents an answer to downtown's peripheral parking needs. A peripheral parking concept as a solution to downtown's shortage of available parking space is supported by the Central City Association, San Diegans, Inc. and Ernest Hahn's Center City Planning Committee.

The task force recommends a major three to four-story complex, capable of housing up to 2,800 vehicles, constructed at Inspiration Point on the former Naval Hospital complex. Primary access to the parking structure would be from Pershing Drive. The upper story would be at the Park Boulevard and President's Way elevation, which could be reclaimed as an active grassy open space.

With proper construction and landscaping, this lot would be the least intrusive and would satisfy parking needs for the next 20 years.

The San Diego Chapter of the American Institute of Architects has proposed an additional parking facility behind Spreckels Organ Pavilion as an answer to the intra-parking need, utilizing existing parking space. The proposed two-level subterranean parking, featuring 100-percent landscaping at street level, would hold up to 700 spaces.

Tuesday's vote effectively killed funding for this facility, falling short of the required two-thirds vote. However, almost 60 percent of the voters recognized the need for park improvements. The City Council will have to find a positive response to that majority.

Also, the retention of the Alcazar Garden surface lot will assure a practical, convenient area of approximately 130 more spaces.

City College property along Highway 5, being used as surface parking, also has potential as a second alternative for a multi-story parking facility because of its slope.

The Cabrillo Bridge is the most attractive entrance into the park, and should remain open to a single lane of in-bound traffic. This one-lane would continue around the House of Charm (where a passenger drop-off point would be provided) and continue down the existing Pan-American road east and connect with President's Way, which would remain a two-way street.

Through traffic could leave the park via Pershing Drive and Park Boulevard. The existing second traffic lane would be for use of bicyclists and the public shuttle or tram system for moving people within the park. Existing walkways would be maintained for pedestrians.

The most important component in the traffic-circulation proposal is the shift in focus from Laurel Street to Pershing Drive as the main access into the park --- maintaining Laurel Street as a viable entry, but concentrating on Pershing Drive with its superior freeway access.

Until a park shuttle system is in place, and people have become accustomed to it, no parking lots should be eliminated and no major road changes should be instituted.

One final element in the Balboa Park Master Plan is an appropriate location for a new municipal gymnasium. City College officials want to discuss the potential location of a new gym on city- and college-owned property south of Balboa Park across from Inspiration Point. This sports complex would include a new municipal gym, an Olympic quality swimming pool and the new refurbished Balboa Stadium. This would have the effect of adding land to a shrinking Balboa Park.

The park master plan represents a golden opportunity for the council to adopt a document that will provide comprehensive goals and objectives sensitive to San Diego's love affair with Balboa Park. It will assure the preservation of the park's amenities and natural beauty for generations to come and maintain its continued accessibility as an urban sanctuary.

November 10, 1987, Los Angeles Times, II, 1. Council Delays Decision to Keep Cabrillo Bridge Open, by Leonard Bernstein.

The City Council on Monday took its first small steps toward planning the future of Balboa Park but put off a decision on a recommendation to convert the Cabrillo Bridge entrance to a one-way eastbound street.

At the suggestion of Councilman Bill Cleator, the council deferred a decision on the controversial Cabrillo Bridge entrance to allow a consultant 120 days to study parking, access and circulation throughout the 1,100-acre park. The council also postponed decisions on proposed new parking structures until after the study is completed.

The council did agree to look for a new location for the municipal gym outside the park, to leave the Centro Cultural de la Raza at its current location in Pepper Grove and not to oust Boy Scouts, Girl Scouts and Camp Fire Girls from their facilities in the park's northwest corner when their lease expires in 2005.

November 10, 1987, San Diego Tribune, B-1. Rita Calvano: Balboa Park traffic ties up City Council.

After 4-1/2 hours of discussion in a special meeting at the park last night, the council postponed action on the traffic matters until March.

November 10, 1987, San Diego Union, B-1, B-3. Steve Schmidt: City delays, will do Balboa Park study plan to revamp park's road and parking system.

Noting plans for the Alcazar Gardens parking lot and other proposals, Bernard Conrad and other members of a group called Plant the Park reminded officials that the city has long strayed from the original intent of the park.

He said the city has allowed museums and other institutions and roads to disturb what was originally meant to be greenery.

And he noted that the park's undeveloped east side is currently the site of a landfill, maintenance yard and a nursery.

November 11, 1987, San Diego Tribune, B-1. Preston Turegano: Birth-control chemical trimming pigeon ranks.

November 13, 1987, San Diego Tribune, F-1. January Riddle: Frank Lloyd Wright's visions for San Diego remain un-built; drew plans for 3 San Diego County buildings

November 13, 1987, San Diego Tribune, A-1. Kathryn Balint: A jail in Balboa Park is 'last thing' city wants.

The city manger is sending a letter to Grand Jury foreman Ed Malone saying the fate of the Naval Hospital buildings has already been decided by the city council after two years of studying its options. In February, the council chose more open park space over preservation.

November 15, 1987, San Diego Union, C-2. OPINION: Parking in the park

November 15, 1987, San Diego Union, F-17. Donations needed to get poinsettias in park

November 16, 1987, San Diego Union, B-1. Carmen Valencia: Natural History Museum's fate rides on 'Big Al,' an allosaurus; park landmark has high hopes of its dinosaur.

Richard Cerutti can see the future in a bunch of old bones. As the paleontologist yesterday put the finishing touches on a replica of a birdlike dinosaur at the San Diego Natural History Museum, he explained that the 32-foot skeleton is a symbol of the museum's future.

"If we don't have exhibits to bring in, people are not going to pay," said Cerutti, a preparator at the museum in Balboa Park.

November 17, 1987, San Diego Tribune, A-8. The major types of art funding, public and private, by Jane Clifford.

November 17, 1987, San Diego Tribune, B-1. Anne Krueger: Witness describes how officer was shot dead in Balboa Park.

November 17, 1987, San Diego Tribune, B-6. Letter, Jack R. Sanders, San Diego: Reject tax issues.

No sooner has the voters rejected new park taxes than Mayor O'Connor was on the stump for a new proposition.

This time, she wants a special taxing agency, so that the scheme will take only a bare majority vote.

Because only 37 percent of the voters went to the polls last time, a majority would have been 19 percent of the registered voters. This number in favor would pass the tax. In fact, two weeks ago, only 16.8 percent of eligible voters actually voted for Proposition A, but it passed.

A key protection of Proposition 13 was that most new taxes would require a two-third vote. Do we really want 19 percent of the electorate passing a new tax? These elections are too much influenced by special-interest groups, that vote heavily on issues that benefit them personally.

Let's hope that this insight sinks in with the leaders at City Hall. Let's keep the few taxpayer protections we have.

November 17, 1987, San Diego Union, B-3. Councilwoman Judy McCarty backs Balboa Park jail

November 17, 1987, San Diego Union, B-1, B-3. George Flynn: Consideration of Balboa Park jail urged

November 18, 1987, San Diego Tribune, B-1. Dona Steckbauer: Private sector seeks plan for King memorial

November 19, 1987, San Diego Tribune, B-1. Anne Krueger: Teen recalls officer's shooting

November 20, 1987, San Diego Tribune,, B-4. Maria Puente: Park and Recreation Board voted unanimously to support use of about \$2.7 million in special state funds for rehabilitation of Balboa Park Club.

November 22, 1987, San Diego Union, B-3. Pat Flynn: They're flipping out at disc-golf tourney in park; only 18-hole layout in county.

Disc-golfer Snapper Pierson is not only the premier player locally, but also the man who operates, mows and cleans up the course at the eastern edge of Balboa Park. He has a five-year lease with the city to operate the concession in exchange for a percentage of what he makes renting discs and selling soft drinks, T-shirts and caps from a makeshift pro shop attached to the back of a public restroom.

November 24, 1987, San Diego Union, B-1, B-4. George Flynn: None of the districts gave the necessary two-thirds margin for passage of Propositions B and C to provide funds for Mission Bay and Balboa Park improvements.

November 25, 1987, San Diego Tribune, B-4. Rita Calvano: Zoo adopts 1988 budget; no fee hikes; the spending plan approved by the zoo board yesterday anticipates an 8 percent increase in expenses and includes an anticipated 10 percent increase in revenues.

November 26, 1987, San Diego Tribune, A-1. Kathryn Balint: Golfers see red over plan to boost city green fees.

November 26, 1987, San Diego Union, B-10. Jim O'Connell: Golfers oppose plant to raise green fees.

December, 1987, The Neighborhood REPORTER, 2.

A thoughtful and lively presentation by leaders of "PLANT THE PARK," complete with followers carrying balloons which all read "PLANT THE PARK," provoked the San Diego City Council at their special Monday night hearing in the Park.

December 1, 1987, San Diego Union, B-1, B-3. Michael Abrams: Council approves \$25 million for Mission Bay Park.

December 3, 1987, San Diego Union, B-10. Balboa Park trips light fantastic

December 3, 1987, San Diego Union, C-7. Christopher Reynolds: Plans to create city's first arts commission stalled yesterday at City Hall.

December 4-5, 1987. Christmas on the Prado Program.

December 7, 1987, San Diego Tribune, B-1. Golden Hill residents reclaim park from crime, by John Gilmore.

The neighbors are determined to drive the undesirables from the park at 25th and A streets, making it a place where families once again can go without feeling threatened.

December 7, 1987, San Diego Union, B-1:1-4. Jeannie Wong: Neighbors act to make park safe.

According to Sgt. Melvin D. Maxwell, a spokesman for the Police Department, Golden Hill Park has had problems with gang fights, curfew violations and alcohol abuse and "is normally frequented by Hispanic young adults during the day and late hours.

December 7, 1987, San Diego Union, B-1, B-3. Jim Okerblom: Auto museum will be more than cars; architect plans to challenge viewers, build a place of history, culture, art..

With the auto museum, architect Don Goldman plans to restore the exterior of the building to much the way it looked when it was built in 1935 for the California Pacific International Exposition. Numerous windows added over the years will be removed from the building, which is located across from the aerospace museum. Skylight windows in the roof that were painted over will be opened to bring in more light. Originally Goldman planned to enlarge the entrance, but he said he has since been convinced by members of the Historical Society to leave the doors as they are and to restore decorative plasterwork that was torn off in the 1970s.

December 10, 1987, San Diego Tribune, B-1. Rita Calvano: Nativity scene dispute; City eyes change.

A controversy over whether a Nativity scene display for years in Balboa Park violates the constitutional separation of church and state may result in the expansion of the Christmas scene next year to include more secular holiday displays.

December 10, 1987, San Diego Tribune, B-3. Jeff Ristine: Fee hikes favored at 2 courses; to hit non-residents most.

Park and Recreation Director George Loveland said it will take time to calculate whether the three-tier proposal would generate enough revenue to make the kinds of improvements his office has been planning, such as the replacement of the 30-year old Torrey Pines irrigation system and the rebuilding of putting greens at Balboa Park.

December 10, 1987, San Diego Tribune, B-6. Kathryn Balint: \$2.7 million sought to renovate Balboa Park Club.

Square dancers, handicapped floor hockey players and ping-pong players being displaced from one Balboa Park building may find a new home in another park building the city will try to renovate.

The city is applying for a state grant to put \$2.7 million in improvements into the Balboa Park Club.

The state grant funds are coming from the Community Parklands Act of 1986, Proposition 43 on the state ballot of June of that year. \$100 million in grants will be spread among cities and counties throughout California to acquire, develop and rehabilitate local parks, recreational facilities and historic sites.

December 10, 1987, San Diego Tribune, Marathon-4. Tim Coat: A guided tour of the course.

December 10, 1987, San Diego Union, B-1, B-10. Rita Gillmon and Steve Schmidt: City to end display of nativity; City Attorney John Witt says link to scene may be illegal.

City officials are bailing out of the nativity scene business following concerns about a holiday exhibit on display in Balboa Park.

City Attorney John Witt said the city's annual placement of the exhibit --- a classic Christian nativity scene --- appears to be illegal in light of recent court rulings.

The nativity scene as displayed would be viewed by the courts as a violation of the separation of church and state, Witt said yesterday.

He said his office recently decided to shelve the scene after the San Diego chapter of the United Jewish Federation questioned the exhibit's legality.

The scene is making its final appearance this holiday season in the park's Organ Pavilion.

Next year, officials plan to have a private organization erect a display with a range of holiday symbols such as a Jewish menorah, a Christmas tree and other general symbols.

"The Santa Claus stuff," Witt called it.

He said a 1984 Supreme Court ruling based on similar circumstances said such an exhibit violated the time-honored division of church and state.

A subsequent ruling by a lower court broadened but essentially reaffirmed the 1984 Supreme Court decision, he said.

Witt said the nativity exhibit has been maintained, stored and displayed by park employees at Balboa Park's Organ Pavilion "longer than anyone can remember."

Paul Downey, a spokesman for Mayor Maureen O'Connor, said the mayor wants a holiday exhibit maintained in the Organ Pavilion because of tradition and favors reworking the display to include a range of symbols.

"As long as the city is not involved, we are legally OK," he said.

December 10, 1987, San Diego Union, B-12. EDITORIAL: Reclaiming the (Golden Hill) park.

On weekends, Golden Hill Park is a gathering place of drug dealers, junkies, gang members and other thugs who menace San Diego's parks. But last Sunday was different in the park located at 25th and A streets, because some of the good people of Golden Hill decided to reclaim the park.

At sunset, approximately 50 neighbors has a picnic in one corner of the park overlooking the city. Although a good time was enjoyed, the real purpose of the outing was to declare the park off-limits to criminals. Indeed the gathering had the desired effect as there was a noticeable decline in drug trafficking and the meanness that prevents many persons from venturing into the park even during daylight hours.

December 22, 1987, San Diego Union, B-1, B-1. Steve Schmidt: Atheists threaten to sue over crèche.

The San Diego chapter of American Atheists yesterday threatened to sue the city if it does not remove the controversial Nativity scene at Balboa Park by noon on Christmas eve.

Chapter director Stephen Thorne charged that the annual placement of the scene on city property violates the U.S. Constitution's separation of church and state.

"You have compromised the Constitution of our nation," Thorne wrote in a letter he plans to submit to the city today.

City Attorney John Witt said last night he does not believe the city will respond to Thorne's threat -- or the looming deadline attached to it. "As far as I'm concerned, we're not going to react," he said.

He reiterated his most recent finding that the scene is legal as long as the city plays no direct role in storing and maintaining it as it has in the past.

Following questions about the legality of the crèche scene, city officials recently agreed to turn over responsibility for it to the Community Christmas Center Committee. The private groups plan to expand it next year to include a variety of holiday symbols --- both secular and religious.

December 26, 1987, San Diego Tribune, B-3. Letter, Carol Landsman: Landscape old Naval Hospital grounds

December 27, 1987, San Diego Union, B-1. Annette Kondo and Walt Baranger: Homeless fight for beds at city shelters

December 28, 1987, San Diego Tribune, B-8. Letter, A. A. Sloan: Atheists keep flap about Nativity alive

December 29, 1987, San Diego Tribune, B-3. Anne Kruger: Cinco jury visits site of shootings in 1984 of San Diego police officers at Grape Street park

December 30, 1987, San Diego Tribune, B-1. Robert Dietrich: Hospital to launch reborn Navy care; opening of \$293 million Naval Hospital

December 30, 1987, San Diego Tribune, B-1. Dona Steckbauer: Martin Luther King statue in Balboa Park is proposed

December 30, 1987, San Diego Union, B-3. Steve Brand: City will continue to open its municipal gym in Balboa Park for shelter when the overnight mercury is predicted to drop at or below 35 degrees

December 30, 1987. San Diego Union, B-1. Steve Schmidt: Balboa Park eyed for Martin Luther King memorial.

A panel of business and community leaders yesterday discussed a proposal to establish a memorial to Martin Luther King, Jr. near the Aerospace Museum in Balboa Park.

The Rev. George Walker Smith, a member of the Chamber of Commerce King Memorial Committee, and others at yesterday's meeting said the memorial could consist of two or three statues in a grassy area near the museum.

1988

Summary of events in 1988.

(Note: Dates or events are approximate only.)

Frank Lloyd Wright "Usonian" house in Plaza de Panama
(March 7, 1988)

Rain Forest opens at Zoo (March 28, 1988)

Parking garages in park opposed (May 4, 1988)

Park and Recreation Board approved "Night Vision" for Park Boulevard
(September 26, 1988)

City Council voted to allocated money from the transient occupancy tax for
the Soviet Arts Festival and Balboa Park improvements
(September 26, 1988)

City Council okayed Balboa Park master plan (September 27, 1988)

Automotive Museum opens (December 11, 1988)

January 1, 1988, San Diego Union, C-6. Local table-tennis club (San Diego Table Tennis Association) bounces into new home (Federal Building).

"It's a good, healthy change because we're going from white tile floors to a dark, solid wood floor," association president Gary Hranek said. "It was hard to see the white balls against that white tile."

January 5, 1988, San Diego Union, B-1. Green fees at Torrey Pines, Balboa to soar for non-locals, by Michael Abrams.

January 6, 1988, Los Angeles Times, (L) I, 3:3. Article on efforts of San Diego Zoo to reorganize by climate and habitat rather than species (photos).

January 14, 1988, READER, 5. Unpleasantness at the Balboa Club, by Brae Canlin Chess players gained a majority on the Board; senior citizens and City want club to be for the elderly; "The Balboa Club is not supposed to be a private club (for chess players)," said Al Weiss, seventy-three years old

January 14, 1988, B-1. San Diego Tribune, B-1. San Diego Automotive Museum shifts into park; antique cars go on display this weekend, by Rita Calvano.

January 14, 1988, B-7, San Diego Tribune, B-7. Armand V. Campillo, Water Department chief retires; in 1978 he was appointed director of Parks & Recreation; served for five years, by Kathryn Balint.

January 17, 1988, B-3. San Diego Union, B-3. Hundreds preview S. D. Automotive Museum: The museum's Board of Directors has been granted a 25-year, zero-cost lease on the Conference Building. . . . In return the Board has agreed to renovate the building and construct a second building behind the museum within three to five years. Total cost of the project, financed by private donations, is estimated at \$6 million.

January 18, 1988, San Diego Tribune, B-7. The Old Globe: The best is yet to come, by Darlene Davis: Mayor O'Connor outlined bold measures to catapult San Diego to international status in the arts . . . on the stage of the Old Globe Theater.

January 18, 1988, San Diego Tribune, B-6. Letter, Dub Hicks: Mayor O'Connor's fetish for sailboats and culture may in the end saddle beer drinkers with a champagne budget, which the majority opposes.

January 28, 1988, San Diego Tribune, B-4. San Diego is counting on a \$2.7 million state grant to provide a new gymnasium for square dancers, handicapped floor hockey teams and ping-pong players.

January 31, 1988, Los Angeles Times (M), VIII, 1:4. Article looks at new San Diego Naval Hospital, world's largest medical facility, scheduled to open this weekend (photo).

February, 1988, The Neighborhood Reporter. Balboa Park's traffic study: an open letter to George Loveland, the Planning Commission, Mayor Maureen O'Connor, the City Council and concerned citizens.

We have no use, per se, for a car count on all the streets and parking lots in an within three miles of Balboa Park.

We must establish the priority that the "Great Park Comes First" to direct all our studies and planning..

February 4, 1988, San Diego Tribune, A-1. Balboa Park site picked for Dr. Martin Luther King, Jr. memorial: A group of civic leaders has selected a site near the Casa del Prado in Balboa Park as their top choice for a memorial to honor slain civil rights leader Dr. Martin Luther King, Jr.

Park Director George Loveland doesn't "anticipate problems." . . . "we've got portions of the park named after a lot of people."

February 5, 1988, Los Angeles Times, II, 1. Balboa Park site eyes for King memorial; Panel expects no opposition, by Leonard Bernstein: The chamber committee was formed November 3 to allay anger in San Diego's black community after city residents voted November 3 to strip King's name from Market Street; monument to cost about \$250,000.

February 5, 1988, San Diego Union, B-2. Park site urged for King memorial, by Steve Schmidt.

February 6, 1988, San Diego Union, B-2. Photograph of model of proposed monument to Martin Luther King by artist John Paul Jones.

February 6, 1988, San Diego Union, B-6. Zoo reports daytime theft of two rare Australian cockatoos.

February 8, 1988, San Diego Union, B-1. Director Hal Mahan hopes to magically transform Natural History Museum, by Kristine Moe: His plans include a \$12 million expansion project to build a new wing and revamp most of the exhibits.

February 8, 1988, San Diego Union, B-1. A suggestion by a San Diego task force to use Mission Trails Regional Park as an Olympic training site has created a stir among two other groups planning the park's future, by Barbara Moran.

February 8, 1988, San Diego Union, B-6. Zoo doesn't profit from condor program; article by William Toone, curator of birds, San Diego Wild Animal Park.

February 11, 1988, San Diego Tribune, B-8. Letter: Park inappropriate for life-size statues, by Richard Amero: Parks should not be a dumping grounds for institutions, buildings and statues that the city cannot put anywhere else.

February 11, 1988, San Diego Union, B-3. Park Department youth center plan at old San Ysidro Boys Club backed 3-0 by Public Facilities & Recreation Committee, by Michael Abrams.

February 11, 1988, San Diego Union, B-9. Clubhouse plan to place a clubhouse on the city's Robb Field in Ocean Beach backed 4-1 to Public Facilities & Recreation Committee.

In dissenting, Bob Filner said allowing a private clubhouse on city park space sets an unfortunate precedent.

February 18, 1988, San Diego Tribune, A-1. Rising costs crimp city parks plans, by Rita Calvano: Move beyond the city's recreational meccas --- Balboa Park, Mission Bay and the beaches --- and San Diego faces a chronic shortage of parks and recreational space.

February 19, 1988, San Diego Tribune, B-6. Park & Recreation Board, city advisory panel on parks feels neglected; irked at being bypassed; members compile list of grievances to submit to Council, by Rita Calvano.

The Reuben H. Fleet Space Theater & Science Center planned a \$17.5 million expansion in Balboa Park that would double its size.

Neither the Park Board not the Balboa Park Committee was consulted during the planning or before the unveiling in July. At the same time the Board was studying a proposed master plan for Balboa Park and eventually recommended the City Council keep the park as free as possible of new buildings.

February 21, 1988, San Diego Union, B-1. Rising from the ashes; Park's Aerospace Museum bigger and better than ever, by Kristine Moe.

February 21, 1988, San Diego Union, F-1. The Romance of Hispanic Design: Every street corner echoes a legacy, by Kay Kaiser.

February 21, 1988, San Diego Union, F-8. First-phase of a \$1.5 million two-year renovation of 40,000 square feet in Balboa Park's California Tower Building; Lee Roundstream designed and prepared construction drawings for the renovation of the California Tower.

February 22, 1988, San Diego Tribune, C-1. Aerospace organizations mark anniversary of fire, by Gregory Nelson Joseph.

February 23, 1988, San Diego Union, B-3. Assemblywoman Lucy Killea seeks \$6 million funding for improvements at Mission Bay and Balboa Park, by Daniel C. Carson.

February 28, 1988, San Diego Union, F-10. Letter: Don't sacrifice city's parkland to expand museums, theaters, by Don Wood, president of Citizens Coordinate for Century 3.

March, 1988, San Diego Magazine, Vol. 40, No. 5, 146-153, 265-266, 268, 270. Out of the Ashes: The 25th Anniversary of a Brilliant Aero-Space Museum, by Muriel Tierney.

March 2, 1988, San Diego Union, B-6. EDITORIAL: Spirit of San Diego: We are enjoying one of our happy civic moments just now in celebrating how San Diegans responded to twin disasters 10 years ago after arsonists burned down the Old Globe Theater, the San Diego Aerospace Museum, and the International Aerospace Hall of Fame.

March 3, 1988, READER, 5. Wired, by Neal Matthews: disheartening fence that lines of new city nursery beside Pershing Drive.

Balboa Park is unzoned land, according to chief zoning administrator Joe Flynn, and therefore it is not subject to zoning laws. So the city can place a dump there, pour oil on a landfill for the zoo, or rip out canyons and erect razor-wire fences with impunity.

March 3, 1988, San Diego Tribune, B-3. Council's Public Service Committee spurns temporary jail in Balboa Park, by Kathryn Balint.

March 7, 1988, San Diego Tribune, C-1. Reuben H. Fleet Space Theater and Science Center 15, growing; future plans are out of this world, by Gregory Nelson Joseph: Fleet's executive director Jeffrey W. Kirsch looks ahead to a \$17.5 million expansion of the theater/science center.

March 7, 1988, San Diego Tribune, D-1. Fire ignited new age for Old Globe Theater, by Gregory Nelson Joseph.

March 7, 1988, San Diego Union, C-4. Parking at issue for Frank Lloyd Wright exhibit, by Christopher Reynolds: Museum officials want to erect a full-scale, 1,800 sq. ft., Usonian Automatic House, designed by Wright in 1955 in the parking lot in front of the museum, which they acknowledge would usurp 64 parking spaces from the already crowded center of Balboa Park. For 2-1/2 months. In the height of the summer tourist season.

March 10, 1988, San Diego Tribune, B-1. Mayor O'Connor urges boost in tax on hotel rooms to fund arts, by Kathryn Balint.

Mayor O'Connor is proposing to raise the city's tax on hotel and motel rooms by 1 percent to 2 percent to help fund the arts and establish a city office of protocol.

Each 1 percent increase in the so-called Transient Occupancy Tax, now 7 cents on every dollar, would generate \$3.7 million in additional revenue a year.

March 11, 1988, San Diego Tribune, B-1. Park site backed for King memorial, by Linda Keene: Chamber of Commerce committee chooses site between the Children's Theater, Spanish Village and the Natural History Museum.

March 11, 1988, San Diego Tribune, D-3. Automobile buffs rev up nostalgia at museum fund-raiser, by Nancy Scott Anderson "Southern California has the largest number of car enthusiasts in the country, Director Barry Humphrey said, "but San Diego has been slow to get on the bandwagon."

March 11, 1988, San Diego Union, B-1. Chamber of Commerce panel urges Balboa Park site for King memorial, by Steve Schmidt

March 12, 1988, San Diego Tribune, B-1. Balboa Park activists voice doubts about site chosen for King tribute, by Linda Keene: "It's a beautiful, accessible part of the park," said Chamber of Commerce committee member Jack Morse. "There's a lot of young traffic there."

March 12, 1988, San Diego Tribune, B-3. Letter: While the public is forced to pay admission to our public art galleries, the city continues to spend scarce public money – however derived – on low-priority "public art" every year, by Mary B. De La Croix.

March 14, 1988, San Diego Tribune, B-6. Letter: Space Theater funding questioned, by Don Wood . . . If the Fleet Space Theater wants to continue to serve the public in the park at its present size, I have no problem. On the other hand, if it wants to expand what has become a purely commercial venture, let it do so outside Balboa Park without further taxpayer subsidies.

March 15, 1988, San Diego Union, A-1. Super Bowl fans passed the bucks; task force says county impact at least \$136 million, by Barry Lorge.

March 18, 1988, San Diego Tribune, B-8. Balboa study backs parking garage need, by Rita Calvano: Balboa Park would need four parking garages and more than 3,300 new parking spaces over the next 22 years according to a new \$10,000 study by P&D Technologies commissioned by the City Council.

March 19, 1988, San Diego Union, B-3. The Park & Recreation Dept. is recommending continued traffic for Cabrillo Bridge, by R. B. Brenner; report done for the city by P&D Technologies presents six alternatives, including closing the bridge and created new access to Balboa Park from Quince Street.

March 20, 1988, San Diego Union, F-10. Letter: Don't forget institutions, by Richard Bundy: The Natural History Museum's official position on the Balboa Park master plan states that it should not be approved until it incorporates and adopts policies, criteria, goals, etc. for the physical expansion of any and all institutions in the park.

March 22, 1988, San Diego Union, B-2. Park-to-bay pedestrian link proposal is revived; the City Council agreed to fund a \$15,000 study that will examine possible routes for a bay-park link.

March 23, 1988, San Diego Tribune, B-7. Let's quit whittling at Balboa Park, by Herb Fredman: Balboa Park is a commons. Each new or expanded use by itself does little harm. Together, they spell disaster.

March 24, 1988, San Diego Tribune, B-3. Zoo's \$6 million Rain Forest opens Saturday, by Rita Calvano; the new exhibit recreates the world's most threatened environment.

March 27, 1988, San Diego Union, F-2. Balboa Park offers an artistic capstone close to downtown, by Roger Showley: Kathy Kailan, spokeswoman for the Centre City Development Corp., said that Balboa Park's location next to downtown means that park museums and theaters do not need to be relocated to take advantage of growth in Centre City.

March 28, 1988, Los Angeles Times. Times Poll: Most would pay to fix up City's aging Balboa Park, by Barry M. Horstman: those who use the park least prefer a minimal parking fee or entrance fee over an annual tax.

March 28, 1988, San Diego Union, B-6. EDITORIAL: Breathtaking zoo exhibit . . . zoo's newly completed tropical rain forest in the \$6 million Tiger River exhibit.

March 29, 1988, Los Angeles Times (L), IV, 9:1. Some have doubts about ability of organizers to pull off Air/Space American Exposition in San Diego (photo).

March 29, 1988, San Diego Tribune, B-6. Letters: Limit encroachment of non-park uses, by Maureen O'Donnell, R. J. McClure, C. H. Bowman.

March 31, 1988, San Diego Tribune, B-12. Letter; Park institutions' plans are overlooked, by Richard Bundy. The current (master plan) proposal lacks a clear vision or overall plan for the park. The emphasis of the master-plan effort seems to have been focused on Cabrillo bridge traffic through the park and parking in the park, rather than working to make the park a park.

April, 1988, San Diego Magazine, Vol. 40, No. 6, 124-129, 224, 226, 279. Museum of Photographic Arts at Five, by Mark Elliott-Lugo.

April 7, 1988. Agenda of City of San Diego Historical Site Board

Report, April 4, 1988, Amendment of local historic designation and the National Historic Landmark boundaries and the Historical Site Board's advisory role in Balboa Park issues and projects.

Recommendation

1. Amend the local historic site and National Historic Landmark designations to make them coterminous and to include all of Spanish Village, the carousel and miniature train ride.
2. Direct staff to formalize the manner and procedure of Historical Site Board, Park and Recreation Board and Balboa Park Committee review of development and policy issues concerning historical properties in Balboa Park.

(Signed) Ron Buckley, Secretary to the Historical Site Board.

April 8, 1988, San Diego Tribune, B-6. The Park & Recreation Board is recommending that the City Council impose a building moratorium in Balboa Park until an entire master plan for the park is adopted, by Rita Calvano.

April 8, 1988, San Diego Union, B-1. During a lengthy joint meeting, the members of three city boards – the Historical Site Board, the Park & Recreation Board, and the Balboa Park Committee - said it is vital that a park traffic plan be approved before any changes are allowed.

April 15, 1988, San Diego Tribune, B-8. EDITORIAL: Don't tax Balboa Park culture: Balboa Park should remain an amenity for all San Diegans paid for and maintained by all San Diegans. Cultural institutions should use their funds for cultural purposes. Let's not saddle them with the task of paying for trams and garages.

April 16, 1988, San Diego Union, A-1. San Diego tax surcharge on property tax bills proposed; fee plan to raise about \$120 million park funds would bypass Proposition 13, by Michael Abrams.

April 19, 1988, San Diego Union, B-3. Balboa Park garage plan opposed by Filner, by Steve Schmidt.

April 20, 1988, San Diego Tribune, B-10. EDITORIAL: Park and ride to new park plan: Councilman Bob Filner is on the right track. He's questioning recommendations to build multistory parking garages in Balboa Park as part of the new master plan. Filner suggests a superior, cheaper alternative: creation of a shuttle transit system between the park and downtown parking garages.

April 21, 1988, San Diego Tribune, B-1. Funding help sought for improvements at city's major parks, by Kathryn Balint: City Manager John Lockwood is proposing that the city raise \$135 for improvements to Mission Bay Park, Balboa Park and other major parks by levying a special tax on San Diego property owners.

April 22, 1988, San Diego Tribune, B-3. City must look within for facilities, money, Council told, by Jeff Ristine: San Diego residents should not expect the state or federal government to help eliminate a \$1.6 billion shortfall in funds needed for streets, open space, libraries and other public facilities, consultants warned the City Council yesterday.

April 22, 1988, B-9, San Diego Tribune, B-9. Letter, Mary B. De La Croix: . . . we have spent thousands of dollars worth of increasingly scare public money on the mayor's proposed "cultural exchange" with Russia . . . while our performing arts go begging, our museums are underfunded and our children run wild in the streets.

April 25, 1988, B-6, San Diego Tribune, B-6. Letter: Science Center has become a sideshow to the Space Theater, by Marshall Wiseman

April 29, 1988, San Diego Tribune, B-7. Master plan discussion for Balboa Park delayed.

May, 1988, San Diego Magazine, Vol. 40, No. 7, 8, 10. Letters regarding Aero-Space Museum . . . Edwin D. McKellar, executive director San Diego Aero-Space Museum; William Wagner; C. J. Paderewski.

May, 1988, San Diego Magazine, Vol. 40, No. 7, 134-139, 216, 220, 222-224. Mystical Magical Visions of Mexico; Nelson Rockefeller's collection of Mexican folk art at Museum of Man, by Maribeth Mellin.

May, 1988, San Diego Magazine, Vol. 40, No. 7, 168+. Eyes and the Apes: The Belle Benchley Story, by Emily Hahn (NOTE: Cut out of copy of *San Diego Magazine* on file at the San Diego Historical Society Research Archives!).

May 4, 1988, San Diego Union, B-1. Autos should take back seat to people in Balboa Park plan, by Bob Filner.

May 5, 1988, San Diego Tribune, B-8. Letter: Shuttle to the park a better idea than drenching Balboa Park with parking garages, by Barbara Bamberger, Sierra Club, San Diego Chapter.

May 9, 1988, San Diego Union, B-1. Golden Hill neighbors ask city to lock out park problems, by Kathryn Balint: The 25th Street Neighborhood Park is more a place of fear than fun these days.

May 9, 1988, San Diego Union, E-4. Local groups await their share of funds, by Christopher Reynolds." COMBO backed away from the fund-distributing responsibility in November.

May 19, 1988, San Diego Tribune, A-1. Museum of Man has received a federal grant of more than \$74,400 from Institute of Museum Services in Washington, DC.

September 1, 1988, San Diego Tribune, B-1. The San Diego City Manager and a special advisory committee suggested tourists should provide the \$45 million needed to restore deteriorating old buildings in Balboa Park.

September 1, 1988, San Diego Union, B-1. City Manager John Lockwood yesterday proposed a \$45 million financing plan to renovate Balboa Park's crumbling buildings by increasing the city's hotel-motel room tax by a penny.

Under the plan, the tax, also known as the transient occupancy tax, would be raised to 9 cents for every \$1 of hotel receipts, up from the current 8 cents. One cent of the revenue now represents about \$4.1 million.

If the plan --- to be discussed next Wednesday at the council's Rules Committee --- is eventually approved by the full council, it would resolve one of the toughest problems Lockwood has faced in his three years at the helm of city government: How to make up for a decade of deferred maintenance at Balboa Park buildings, in part because of revenue shortages since Proposition 13 cut property taxes in 1978.

September 12, 1988, San Diego Tribune, C-2. Stuffed shirts don't wash with kids, so museums soften up, by Jane Clifford: Cultural centers here and elsewhere are hosting some not-so-stuffy events --- slumber parties, birthday parties, movie showings --- and otherwise entertaining young people for a price. The money helps keep the institutions alive.

September 13, 1988, San Diego Tribune, B-3. Fears dot Balboa Park visitor survey, by Joseph Thesken.

September 14, 1988, San Diego Union, B-6. EDITORIAL: A deserving cause: The Soviet arts festival deserves the City Council's support for all the same reasons that Balboa Park does.

September 15, 1988. The Abuses of Power, unpublished essay by Richard Amero.

Another "blue-ribbon" advisory committee has decided the City should dip into the hotel motel tax to the tune of \$45 million to refurbish buildings in Balboa Park and to promote activities within these buildings. Proponents of this gift claim there will be no opposition to using the hotel motel tax because the money is not coming from residents and because the money is going to be used to promote tourism. The Hotel Motel Association has agreed to accept the additional tax. Why would anyone question it?

For starters, the City is doing what it has done since it created Balboa Park in 1868 in order to raise the value of adjacent properties. The diversion of money is one more attempt to force institutional development on the park for the benefit of well-to-do people who would not ordinarily utilize the park's resources.

In its early days, San Diego's elite looked on the park as their playground. George W. Marston was the most prominent spokesman for using the park as a pleasure ground for the horse-and-buggy set. In 1910 and 1913, citizens approved spending \$1,850,000 for park improvements. Because of pressures emanating from San Diego's "establishment" this money was funneled into exposition promotion and building. This misuse of public funds led in 1911 to the resignation of the Park Board and to the 1917 election of Louis J. Wilde, a working man's candidate, to the office of mayor and the defeat of George W. Marston, park lover and promoter of cultural institutions.

San Diego's "establishment" in the 1900's consisted of bankers, hotel men and merchants. These people usually had their way, though the election of aggressive, iconoclastic mayors, such as D. C. Reed, Edwin M Capps, John L. Sehon, James F. Wadham, and Louis J. Wilde gave them difficult times.

While the "establishment" has talked about promoting culture and making San Diego beautiful, it has put their private profits first. Boosters advocated selling huge sections of Balboa Park, using the park as a county fair grounds or for raising tobacco, putting hospitals, charitable institutions, state colleges, high schools, civic buildings, convention centers, commercial theaters, professional baseball parks, radio stations, sales marts and trade centers in the park. This profit-oriented group has supported restoring tawdry Exposition buildings in the park for other than general people use. Because of their bulldog tenacity, members of these groups were responsible for the fires of 1925 and 1978 that destroyed unsafe and combustible buildings, whose demolition had been long postponed.

After defeats, the "establishment" has always found a way to remount to pursue its aims on other fronts. In 1971, 1972 and 1973, San Diego voters turned down attempts to restore the Ford and Electric Buildings and to build a new wing on the Museum of Fine Arts. These projects were accomplished anyway because the "establishment" obtained money from other government sources that did not require a vote of

approval from rank and file citizens. “Superior” people reasoned that the hoi polloi did not know what was good for them.

The statement that because 60 percent of the people approved the 1987 defeated park bond issue, a majority favors the upkeep of buildings in Balboa Park is erroneous. These voters approved a bond issue for Balboa Park and Mission Bay that included a multitude of projects and programs. It is impossible to know which of these projects the voters favored and which the didn’t.

Framers of the City Charter required a two-thirds approval for park bond issues because they wanted to be sure public money was going to be put to its best use and because they wanted to protect public resources from high-pressure sales campaigns.

The City Council could not get a two-thirds approval of the Naval Hospital swap exchange in 1979 and could not get two-thirds approval for funding special-interest projects for profit-seeking, commercially oriented agencies in the park in 1987.

Kate Sessions, San Diego’s great horticulturist, was for years the only person in the City who protested what the San Diego “establishment” was doing to public parks. She was eloquent in her fury. We know what Kate Sessions wanted --- the result is everywhere in San Diego County wherever plants and trees grace the earth.

George W. Marston ran away from public fights. He relinquished his nature-loving objections, went along with the wishes of his political supporters, and became a leader and spokesperson for Balboa Park cultural institutions, despite his occasional misgivings.

Cultural institutions in Balboa Park were free to the public until the mid 1960’s. It was the promise to be free that got them in the park in the first place. These institutions now charge steep admission fees that de facto exclude low-income working people from seeing what is inside. “Free” lectures, that formerly were a Sunday-afternoon offering at these institutions, are now reserved for members.

The City Council will approve the diversion of hotel-motel tax money to Balboa Park cultural institutions that call themselves “non profit,” only because the term itself is ambiguous. Trustees of these institutions and not the voters generally get Council people elected through campaign contributions. They expect to be reimbursed for their support in the form of favors once their chosen and groomed candidates are in office.

The \$45 million gift to Balboa Park institutions is a slush fund for undemocratic and aggrandizing institutions that have a stranglehold on Balboa Park and on city officials. The cynicism and connivance exercised by the trustees of these institutions cries for public correction.

September 26, 1988, San Diego Union, B-6. The new city arts commission flexed its muscles last Thursday in the first test of its clout, and the world stood back and took notice. Or at least five out of six members of the Park & Recreation Board took notice.

The issue was "Night Vision," the colorful 12-sign Zoo front artwork that artist Roberto Salas produced for temporary display during the Super Bowl in February. The now-defunct Public Arts Advisory Board worked hard to have the city buy the signs and make them permanent, and the arts commission unanimously backed that idea August 31 at its first meeting. But on September 14, the Park & Recreation Board's facilities committee voted 4-3 against "Night Visions" because members thought Park Boulevard was pretty enough without it.

Last Thursday, the issue went before the Parks & Recreation Board itself, and the arts commission took a stand. Four arts commissioners --- Karen Sugg Cohn, Mario Torero, Ann McCullough and Catherine Wu --- came and spoke. So did Salas and a representative from the Combined Organization for Visual Artists.

And after what arts administrator Joyce Selber termed "a wonderful, exciting, healthy dialogue," the parks board voted 5-1 to overrule its facilities committee, buy the Salas signs and make them permanent.

Further, because the expense is less than \$25,000 --- the price of "Night Vision" is \$11,000 --- the city can now buy the signs without a City Council vote.

September 27, 1988, San Diego Tribune, A-1. Balboa Park will put on a new \$80 million face, by Pascale Le Draoulec: plan calls for a series of gradual improvements and construction projects that will be completed in four separate five-year phases that will extend into the next century.

1989

Summary of events in 1989

(Note: Dates of events are only approximate.)

National Historic Landmark extended to include carousel and miniature railway (March 22, 1989)

Stabbing death in park (July 5, 1989)

Council approves Balboa Park Master Plan (July 25, 1989)

Fire Alarm Building gets historic designation (July 27, 1989)

Japanese garden groundbreaking (July 28, 1989)

Free days limited at museums (August 23, 1989)

Plaza named for Joseph Sefton opened (October 15, 1989)

Soviet Arts Festival (October 29, 1989)

Nativity scene vandalized (December 16, 1989)

January 4, 1989, San Diego Tribune, B-3. Dorla Welles: Sierra club to move from Balboa Park over dispute

January 4, 1989, San Diego Union, B-1, B-3. Michael Abrams: Sierra club will vacate park office

January 9, 1989, San Diego Union, B-5. Man sitting in the middle of Cabrillo Bridge critically hurt by car.

January 10, 1989, San Diego Tribune, A-1, A-8. For Mayor O'Connor in 1989 children come first; she urges high-tech Space Camp; war on gangs, by Kathryn Balint and Jeff Ristine.

With the mayor's backing, officials at the space theater and hall of fame said yesterday they now had high hopes that their long-held dream of establishing an aerospace educational center would come true.

January 10, 1989, San Diego Tribune, B-3. Palms, signs to spruce up zoo parking lot.

The San Diego Zoo will soon spruce up its parking lot by planting palm trees along the main corridor and installing new signs.

Mike Ahlering, the zoo's manager of operations, told the advisory Balboa Park Committee earlier this week that the project is scheduled to start in late February and to be completed in six to eight weeks.

"This is part of our effort to make the lot more attractive," he said. "We will be putting in 19 queen palms, sometimes called Kate Sessions palms, along the lot's center row, together with planters containing shrubs."

"There will be new directional signs, which we hope will be better than the present ones that have pictures of animals," he said.

He displayed a sample of the green and white signs, on which numbers were clearly visible.

The present signs are old, and they have been confusing to a lot of people, because there is no alphabetical order to them,” Ahlering said. “These will be placed in strict numerical order, so it will be easier to remember where cars are parked.”

Ahlering said the project will eliminate 19 spaces in the 3,200-space lot. He said he could not yet tell how much it will cost.

The palms will be placed in 3-foot wide boxes and the planters will be about 20 feet wide, he said. The palms, of the same variety as seen throughout Balboa Park, usually grow to 25 to 30 feet tall.

January 13, 1989, Los Angeles Times, II, 1:2-4. Port Takes On Center Issue as Many Still Protest Naming the New Bay-front Convention Center for Dr. King, by Leslie Wolf.

January 13, 1989, San Diego Tribune, B-5. Razing of House of Charm nears, by Joseph Thesken.

The first step toward the eventual destruction of the crumbling House of Charm in Balboa Park will be taken January 25.

On that day, Dave Twomey, assistant director of the city’s Park and Recreation Department, will go before the city council’s Public Facilities and Recreation Committee with a request to seek a prospective tenant for a new building to replace the nearly 74-year old building, possibly by July 1991.

Twomey told members of the Balboa Park Committee recently that the House of Charm “is one of the worst buildings in the park in matter of disrepair. The walls are crumbling.”

The building, across from the San Diego Museum of Art in the Prado area, was built in 1915 for the Panama-California Exposition, commemorating the opening of the Panama Canal. It was condemned by the city years ago, Twomey said.

But a portion of the building is still being used by the San Diego Art Institute to exhibit its works.

“City council probably will get the proposal (for a tenant) on February 6, and if council approves, we’ll advertise for tenants in the press,” Twomey said.

The park department then will return to the council in April for its approval of the tenant. Twomey said likely occupants would include galleries, museums and performing arts, which would complement institutions already in the Prado area.

“Once we know who the tenant will be, the next step would be to get together with the architect and determine what the interior design of the building should be,” he said.

He said the new structure will duplicate the original building as closely as possible --- because it is a historic site --- but its interior will vary according to the tenant.

“Everything, of course, would be in compliance with the park’s Master Plan adopted last year,” Twomey said. He estimated the new building’s cost at \$5 million.

According to Penny Scott, the park’s facilities manager, the House of Charm, a sister building to the House of Hospitality, originally was called the Indian Arts Building.

But during the California-Pacific International Exposition in 1935-36 it was renamed the House of Charm,, when various souvenirs and gift articles were sold there. After World War II, it was left empty, but reopened in 1948.

January 16, 1989, San Diego Tribune, D-2. "Live at the Museum" magic show at Children's Museum of San Diego for kids of all ages.

January 16, 1989, San Diego Union, D-5:1-2. The Arts: Seasonal-tree project just may face the ax, by Christopher Reynolds.

The Museum of Seasonal Change would be a grid of 144 deciduous alder trees on a mesa overlooking Florida Canyon in Balboa Park. Each tree would rise from a cone of rich, red earth and the symmetrical pattern would be enlivened by a central exhibit or performance areas.

In 1985, the project won a \$30,000 grant from the National Endowment for the Arts. The eventual cost is estimated at \$450,000.

Eventually, the project was scaled back to 96 trees on three acres, and the site moved to 26-acre Doyle Community Park at Regents Road and Cargill Avenue in University City.

January 19, 1989, San Diego Tribune. People: Delza Martin presented a certificate for perfect attendance at Balboa Park Committee meetings.

January 28, 1989, San Diego Union, B-3. Cheryl Clark: Old Naval Hospital coming down.

January 29, 1989, San Diego Union, C-3. Naming convention center for Dr. King honors all San Diegans, by Wes Pratt.

January 29, 1989, San Diego Union, C-3. But the voters will decide, and as many as 80 percent oppose naming convention center for Dr. King, by Edward L. Fike.

January 29, 1989, San Diego Union, E-1. Welton Jones: Globe expansion should be moved outside Balboa Park.

The Old Globe Theater needs more room for offices and rehearsal space. And its directors plan for opening a profitable restaurant and gift shop has merit.

But what isn't needed is to build more buildings in Balboa Park.

The plan announced last week to construct an additional 23,000 square feet of building on the present Balboa Park site for rehearsal space, café, gift shop, and staff parking is unacceptable for a whole catalogue of reasons.

Using much less than the announced price tag of \$6.6 million, the Globe organization could fill all its announced needs with even more room of better design and not pave over a single inch of parkland.

The answer is beautifully simple.

Move everything except the theater's public and performance related spaces out of the park.

For half a century, San Diego has supported the growth of the Globe in Balboa Park. While the theater developed from a couple of primitive buildings operated by amateurs into today's sleek, famed professional plant, the city has continued to approve and encourage the magical marriage of playhouse and park.

But now, as the Globe directors acknowledged with last week's expansion proposal, they no longer have enough room in Balboa Park for all the activity need to support a world-class theater doing a dozen shows each year.

What should be done is move every non-public activity out of the park and into a space designed for the purpose. Then, in the freed-up portion of the present buildings, any variety of restaurants, snack bars, souvenir stands, book shops, restrooms and public promenades can be constructed.

There might even be room for a fourth small theater.

Meanwhile, on the auxiliary site, the company could build to order spacious rehearsal halls, comfortable offices, modern shops, extensive storage and, best of all, as much parking as anybody wants.

Judging from the preliminary plans, the Globe would need about 35,000 square feet of building to handle the administrative, shop, rehearsal and storage needs.

Here is a very general estimate on the cost of such space from developer Michael Kiss, vice president of the StoneCrest Office Park, designed by Edward Larrabee Barnes for Kearny Mesa:

Building shell with landscape and parking, at \$25 per square foot --- \$875,000.

Interior finishing at square-foot rates varying from \$6 for storage to \$20 for offices --- \$335,000.

Land cost of 1.7 acres in, for example, North Park or Mission Valley, at \$20 per square foot --- \$1.5 million.

Add 25 percent for fees, taxes, insurance, etc. and the total would be about \$3.3 million.

According to the announcement last week, \$6 million already has been raised, with \$1.4 million set aside for an endowment fund.

That still allows Globe officials to spend \$1.3 on installing the new public facilities in the present Balboa Park complex *without raising another cent*.

Everybody wins. The public gets better theater facilities without losing parkland. The Globe gets better facilities at a lower cost with less energy expended. The money already raised will pay for the whole project with plenty left over to start the endowment fund.

The only possible objections to this plan would involve the understandable desire of the theater management to have all operations under one roof.

But public sentiment seems to be growing that there already are too many roofs in Balboa Park.

The master plan for the park, expected to reach the City Council this spring after years of controversy, does not include an additional 23,000 square feet for the Globe. The Globe expansion was not part of the planning process. And once that plan is finally adopted, how easy will it be to pry loose exceptions, even given the Globe's community stature?

On the other hand, the reasons for making the move now are compelling.

More space: Even if the Globe proposal is approved, there may be an early need for even more room. What is the restaurant is a major success? And what happens when, as Globe officials have discussed for years, the company finally opens a downtown playhouse? Even more need for shops and offices and rehearsal space, that's what.

Costs: The arithmetic just can't be beat. For money already in hand, the Globe organization can design and build precisely what it wants. Then, any additional funds can go where they should be going anyway, into producing more and better theater art.

Park preservation: Any building planned for the Globe will be done well. But there really is a limited amount of open space in the park and this plan really will wipe out a significant slice of it. It's been years since the Globe took it's front year --- what once was called the "greensward" seriously. Lately, Globe management has called it "asphalt over mud." But that doesn't mean the place couldn't be green again.

Better security: The Globe organization, after all, has lost two theaters in arson fires. And an actor was killed in one of those incidents of violence deplorably more prevalent in Balboa Park than within carefully secured business neighborhoods. Certainly it must be tempting to have all the non-public workings of the theater comfortably out of harm's way?

Traffic: Obviously, the removal of a large staff such as the Globe's would help relieve daytime traffic in the park. Sets, costumes and other elements of productions could be trucked in and out at unbusy hours. The commercial deliveries which now help clog the park during working hours would disappear.

With the non-essential functions well removed, the Old Globe could concentrate on serving the public in a gracious, spacious setting which enhances the park rather than crowds it.

It is even possible a graceful realignment of space for the Globe would set a good example. And neighboring institutions scratching for more park space might begin to recognize that business belongs elsewhere, while the park is for people.

January 29, 1989, San Diego Union, F-14. Camellia show in Majorca room of Casa del Prado

January 30, 1989, San Diego Union, 18, 21. Linda Lipman: Perspective-89: Automotive Museum on five-year trip to maturity.

So far the auto museum is right on target. In its first 13 days, 6,500 visitors paid admissions ranging from \$1 to \$3.50. On the first free day (the first Tuesday of January when the park museums waive entrance fees), 2,243 visitors were admitted. And 1,000 persons have signed up as museum members. Barry Humphrey, museum executive director, said he expects daily attendance to average 500. He predicts membership and ticket sales will cover 35 to 40 percent of the operating expenses; 10 to 15 percent will come from the gift shop, and the rest will be raised from donations.

About \$750,000 in pledges has been reached so far. More money will be needed when the museum starts planning for an adjacent, second building with 60,000 square feet. That building is expected to be erected in four years and cost \$4 million to \$5 million. It will add to the current 18,000 square feet of exhibit space, and make room for about 120 cars in total, up from 49 on display now. A working car restoration facility also is planned for the anticipated space.

January 30, 1989, San Diego Union, 19, 23. Diane Ingalls: Perspective-89 --- Cultural fund raising holds steady in 1988.

January 31, 1989, San Diego Tribune, B-3. Robert Dietrich: New Naval Hospital celebrates first anniversary.

January 31, 1989, San Diego Tribune, B-3. John McLaren: Zoo employees accept pay-increase contract.

Union employees of the San Diego Zoo and Wild Animal Park voted by a 56 percent majority last night to accept a new contract that will give them their first pay increase in more than three years.

The new agreement, covering about 800 members of Teamsters Local 481, will run until March 1, 1993. Full-time workers soon will receive a \$1,000 lump-sum payment, while part-time workers, each will get \$500. The first of the scheduled pay raises will take effect July 1 and other increases will follow at nine-month intervals.

Bill Martin, Local 481, business representative, estimated the raises will average between 4 percent and 5 percent a year for most employees. Exact figures are difficult to determine, he said, because pay adjustments were determined for nearly 100 job classifications.

The contract covers animal keepers, gardeners, food-service employees, tour guides, ticket sellers and other workers employed by the Zoological Society of San Diego. The employees have not had a general pay raise since January 1, 1986.

Their pay had been frozen at an average rate of about \$9.30 an hour, Martin said, because of a clause in the union's old contract that provided for reopening pay negotiations if society revenues topped expenses by 15 percent.

Zoological Society spokesman Jeff Jouett said both sides eventually agreed that the profitability requirement stood in the way of a "deserved raise" for the zoo workers.

The old contract was due to expire July 1, but it will be superseded on March 1 by the new pact.

The union members voted 224-180 for the new agreement during a sometimes stormy meeting last night at the Scottish Rite Center in Mission Valley. Martin said the vote was relatively close because some workers thought the increases should have been greater.

February 2, 1989, San Diego Tribune, B-1. Joe Hughes: Park plan debated for Route 163; Safety or scenery? That is the question.

The state Department of Transportation wants to install traffic barriers and an auxiliary lane on scenic Route 163 in Balboa Park.

February 4, 1989, San Diego Union, B-1, B-8. Michael Abrams: Bob Filner opposes commercialization; says no to fast-food plan in Balboa Park.

Fast food and a fast ride.

That's what city park officials are considering for Balboa Park, after developing a plan to invite fast-food chains to compete for a restaurant concession in return for a payment to build a park tram.

February 5, 1989, San Diego Union, F-9. Roger Showley: Housing the Navy

February 6, 1989, San Diego Tribune, B-1. Kathryn Balint: Use of reclaimed water; plan to keep bloom on Balboa Park.

But there's a potential sticking point: where to build the sewage-treatment plant that would provide the reclaimed water.

James G. Ashcraft, vice president of HYA Consulting Engineers, has come up with nine possible locations for a treatment plant in Balboa Park. But one of the most promising sites, he said, is on five acres near Pershing Drive and Interstate 5, where Naval Hospital buildings once stood.

February 7, 1989, San Diego Tribune, B-1. Joe Hughes: Balboa Park Committee blasts Route 163 plan to install safety barriers in the median.

February 8, 1989, San Diego Tribune, B-6. Frank J. Williams, George Metrovich, Letters re. widening Route 163.

February 9, 1989, San Diego Tribune, B-5. John R. Lamb: Revamped zoo exhibit ready for escape-prone orangutans.

Escape artist Ken Allen and his bevy of auburn-haired babes are scheduled to return this weekend to a heavily remodeled enclosure that San Diego Zoo officials hope will put an end to the clever primates' embarrassing breakouts.

February 9, 1989, San Diego Tribune, B-5. Kathryn Balint: McDonald's in park put on back burner.

A proposal by the McDonald's Corp. to sell Big Macs amid the eucalyptus trees and art museums of Balboa Park left such a sour taste in the mouths of San Diego City Council members that they put it on the back burner in search of a better deal.

February 9, 1989, San Diego Union, B-3, B-4, B-7. Michael Abrams: McDonald's' offer to swap train for spit in park spurned

February 11, 1989, San Diego Tribune, B-2. OPINION: Don't rush to change Route 163

February 12, 1989, San Diego Union, E-10. Don Wood: Welton Jones is lauded for stand on Old Globe expansion

February 15, 1989, San Diego Tribune, B-8. OPINION: No golden arches in Balboa park.

It's not only the tram or the concession stand that concerns us. Park officials also hope to find a private tenant for the House of Charm that will help defray the multimillion cost of restoring the old building. What if an offer comes from IBM or some other major business that might be inappropriate for the park? The park isn't a suitable setting for corporate offices or for business advertising. It was meant for all the people, and it should remain that way.

February 16, 1989, San Diego Tribune, B-1. Joe Hughes: State reconsiders changes in Route 163 through Park.

In the face of strong opposition, state transportation officials are reconsidering a proposal to erect safety barriers on state Route 163 through Balboa Park.

February 16, 1989, San Diego Union, B-1. John Wilkens: Cal Trans will review barrier plan for Route 163.

February 17, 1989, San Diego Tribune, B-3. Joseph Thesken: Fire Alarm building might get new life.

The 60-year old Fire Alarm Building in Balboa Park will be saved from demolition if the San Diego Park and Recreation Board has its way.

The board voted unanimously yesterday to support a recommendation of George Loveland, director of the city Park and Recreation Department. Loveland recommended that the building, east of Marston Point, be renovated and used for offices for members of the park staff.

On February 8, the Balboa Park Committee unanimously endorsed the plan.

Dave Twomey, assistant park director, told the board that he and a staff of eight must vacate their temporary offices in the new San Diego Automotive Museum in the park by July.

Twomey said earlier the city council wanted to demolish the Fire Alarm Building "but held on to it to see if a tenant could be found to use it."

"The building is in very poor condition and needs quite a bit of work done on it," he said. "We looked at the building, and it is suitable for our offices, after we renovate the second floor. It would cost an estimated \$250,000 to remodel it."

Twomey proposed using the building on a temporary basis, possibly for the next five to seven years, until a proposed new civic center is built downtown. At that time, he and his staff would move to the center, along with all other park board administrators and employees.

He reported two other benefits to occupying the Fire Alarm Building, which was the city's first communication center for the Fire Department and has been vacant since 1970.

Use of the building would forestall demolition, he said, pleasing the city Historical Site Board and the Save Our Heritage Organization.

“Another benefit is that there is quite a bit of undesirable activity in that part of the park, and our presence there may defuse part of that,” Twomey said.

Money for the remodeling would come from a fund set up when the city and the Navy swapped land parcels in the park so that the new Naval Hospital could be built in Florida Canyon, Twomey added.

At its meeting Wednesday, the Historical Site Board will consider the staff’s recommendation that the building be designated as historically significant.

The structure was designed by the late Robert W. Snyder, a partner of William Templeton Johnson, who designed the Natural History Museum. It reflects the Spanish Colonial architecture of many of the buildings in the park’s Prado area.

The recommendations of the park board and the site board will go to the city council, which will decide the building’s fate.

Loveland said he is confident the council will approve his proposal to save it for use by his staff.

February 17, 1989, San Diego Union, B-3. Dick Weber: Thieves in park took dog belonging to Canadian visitors.

February 18, 1989, San Diego Union, E-10. Letter, Don Wood, President, Citizens’ Coordinate for Century 3.

Editor: I was encouraged to read your theater critic Welton Jones’ article on theater expansion in Balboa Park, “Globe expansion should be moved outside Balboa Park” (Jan. 29). Mr. Jones recognizes the fact, which still seems to elude many in the arts community and local government, that the limited remaining parkland in Balboa Park is too precious a community resource to be buried under commercial buildings.

February 22, 1989, San Diego Tribune, C-1. Greg Joseph: Fleet Theater offers inner-body experience.

March 5, 1989, San Diego Union, F-13. Trees hold sway on Arbor Day of 1904.

Today these trees, along with many others, still grow, towering in their beauty on the slopes of the park as San Diego observes Arbor Day Tuesday --- 85 years later.

March 8, 1989, San Diego Union, C-6. Joyce Selber quits post as San Diego’s first public arts administrator.

During Selber’s tenure, the city . . . acquired “Night Visions,” Roberto Salas’ series of sculptures positioned along Park Boulevard in Balboa Park.

March 12, 1989, San Diego Union, E-1. Robert L. Pincus: Public art in museum lacks touch of reality

March 12, 1989, San Diego Union, F-19. Betty Newton: San Diego plans own Japanese garden.

March 17, 1989, San Diego Tribune, B-2. Joseph Thesken: Park plan for North Park gains.

After listening to nearly an hour of conflicting testimony from nearby residents, the San Diego Park and Recreation Board yesterday approved plans for development of a 4-1/2 acre park in North Park.

Several of the nearly 30 people at the hearing urged the board to reject plans for the park, saying it would attract transients and drug dealers to their quiet neighborhood.

March 17, 1989, San Diego Tribune, C-9. The Old Globe Theater Advancement Campaign has received a million-dollar boost from the Stephen and Mary Birch Foundation that should triple in value by the end of this year.

Funds from the Advancement Campaign will be used to build a rehearsal hall, refurbish the administration building, construct a dining pavilion and make landscape improvements to the Globe complex.

March 17, 1989, San Diego Union, B-1, B-4. Christopher Reynolds: Old Globe expansion plan aided by \$1 million challenge grant that puts the theater into the home stretch of a fund-raising campaign.

Globe officials argue that expansion will not increase the number of people in the park, and note that the number of theater seats will remain unchanged. What the expansion will do, they say, is allow them to generate extra income.

March 20, 1989, San Diego Union, C-4. Christopher Reynolds: COMBO, San Diego Foundation for the Performing Arts adjust to the changing times.

March 21, 1989, San Diego Union, B-10. EDITORIAL: Going after graffiti.

March 21, 1989, San Diego Union, B-10. EDITORIAL: Needed --- new direction to put the King controversy to rest.

The private-sector group has achieved considerable consensus for a monument in Balboa Park and for a scholarship fund as a living tribute to Dr. King.

March 23, 1989, San Diego Tribune, B-10. Richard Amero Letter: Some people miss reason for park.

Re: Joe Holley's column (Metro section, 3-18-89) about the proposal to locate a memorial to Dr. Martin Luther King, Jr. behind the Natural History Museum in Balboa Park. Whenever a "blue-ribbon: special-interest group wants to foist a building, a gift with strings attached, or a statue on the people, they invariably say, "Put it in the park."

The Prado section of Balboa Park is predominantly Spanish-Colonial in appearance. The reason for this is that the original architects wanted to create a glorified Spanish city in recognition of San Diego's roots in Mexico and Spain. In the 1960s, the City Council passed a resolution that no more construction along the Prado should conflict with the Spanish-Colonial theme.

A proposed master plan for Balboa Park specifies that land north of the Natural History Museum, not used for expansion of the museum, be part of an enlarged Spanish Village.

I support naming the convention center after Dr. King. Those white people, over 50 years old, who argue otherwise are deceiving themselves and hiding their distaste of black people. For City Council members to knuckle under to these bitter, dried-up, hate-infested people would show they are unwilling to grapple with the consequences of prejudice.

Like Holley, the Rev. George Walker Smith has no understanding of the place that public parks occupy in people's lives. As a member of the school board, he once advocated putting San Diego High School in the middle of the east side of Balboa Park. As a member of the "blue-ribbon"

committee organized to sanitize the King issue, his advice is tantamount to saying, "Don't rock the boat."

Dr. King wanted to open doors of opportunity for those who had been denied entrance. His name should be given to the convention center because it would remind conventioners that activities and businesses they represent should embrace ethical standards and social responsibilities greater than distinctions of rank and race and tables of profit and loss.

April 19, 1989, San Diego Tribune, B-1, B-5. Joseph Thesken: seven auto museum trustees quit; disagreement over policy, operation cited.

Several former board members, who requested that their names not be used, said they objected to the museum's initial show, "Power and Glory," a history of racing cars; to its sale of classic autos; and to its sponsorship of the San Diego Vintage Grand Prix, staged April 8-9 at San Diego Jack Murphy Stadium.

Barry Humphrey, the museum's executive director, said all museums in the park sponsor outside events to raise money.

Regarding sale of cars, he said it is not unusual for auto museums around the county to sell some of their vintage autos.

April 19, 1989, San Diego Union, D-1. Christopher Reynolds: Soviet arts festival continues to grow

April 20, 1989, Unpublished letter from Richard W. Amero, discussing former Fire Alarm Building in Balboa Park.

An argument is being made that the former Fire Alarm Building in the southwest corner of Balboa Park is worth preserving as a monument of Spanish-Colonial architecture and as a testament to historically important events. There is nothing surprising about such arguments. They are made over and over again whenever a public or private building of any size or age is threatened. Eager proponents of preserving such humdrum buildings are long on sentiment, but short on facts. Chief among these fervid proponents of preserving the Fire Alarm Building are the Save Our Heritage Organization and the City of San Diego Historic Sites Board.

Though one is private and the other public, these two organizations work in tandem. The exhilarating feeling of desiring and possessing power is common to both as is their single-minded zeal in promoting their cause to the exclusion of others. Like the hedgehog, advocates of wholesale preservation know one thing extremely well, but they do not know many things, and they do not know how their limited interest fits into a broader social, historical, aesthetic or moral context.

By asserting extravagant claims for trivial architecture and buildings, charged-up proponents of wholesale historic preservation are able to convince indifferent people that their inflated claims have merit. Because the historic preservation cause has achieved a "sacred cow" standing, champions of minor buildings are able to entice faculty members of the University of California at Santa Barbara and lesser-known professions into supporting their tenuous claims. These professionals know they are adulterating their standards, but they rationalize that, by doing so, they can stimulate popular enthusiasm. In writing false and ridiculous statements for mediocre buildings, these professionals are no better than prostitutes.

The Fire Alarm Building in Balboa Park is called Spanish-Colonial on untenable grounds. It does not look Spanish-Colonial. Its architect, Robert Snyder, was an eclectic architect whose sterile works go unlisted in all existing guides to the architecture of Southern California. Until recently, the Fire Alarm Building was looked upon as an insignificant structure that took up valuable space in Balboa Park. The Bartholomew Planners, who wrote the 1960 Master Plan for Balboa Park, dismissed it as an "encroachment."

Then the San Diego Fire Department moved out of their antiquated Fire Alarm Building in 1970, the building fell into disrepair. It was converted into a storage facility by quasi-public organizations. Attempts by groups to reuse the building failed as these groups did not have the funds nor the desire to renovate the building on their own.

Though city use of Balboa Park Buildings by city agencies for purposes other than the operation of Balboa Park is contrary to the City Charter of San Diego, the San Diego Police Department and the San Diego Park and Recreation Department have talked about moving into the building.

Park visitors should look at this commonplace building with a practical eye. It is not an architectural masterpiece and it does not symbolize events of epoch importance. The San Diego Historic Sites Board should not honor this run-of-the-mill building with a plaque, nor should it try to enroll it in the National Register of Historic Places. If some misguided person, acting alone or in concert with others, tries to preserve this building for all time, City officials and City staff should protest the action.

As the building is on public land, it should serve all the people who visit the park. It should not house a government institution, nor should it become the quarters for a specialized group. An open-door function can best be realized by turning the building into a restaurant. The

concessionaire in charge should be responsible for building renovation and for keeping grounds around the building free of litter.

If this effort to enlist private enterprise should prove to be impractical, the building should be torn down as Balboa Park and the people who visit it would gain more by removing the building than by keeping it standing.

Some historical preservationists have charged that the area around the Fire Alarm Building is used for "cruising" and for "drug dealing." These alleged activities occur elsewhere in the park. Whatever "cruising" is, it is not an illegal activity, but drug dealing is. Since addiction to drugs is a major problem in modern American society, preserving the Fire Alarm Building is not going to affect it one way or another.

Citizens should keep an eye on Balboa Park and do everything they can to make it a more attractive and pleasant place for everyone. Lawn furniture, play equipment, grass, trees and flowers are desirable in the park, but keeping a dull drab building is not.

April 20, 1989, READER. Mr. Bevil's Building, by Paul Krueger.

Even in the city ultimately declines to spend a quarter of a million dollars on the abandoned Fire Alarm Building, Alexander Bevil will push ahead with his efforts to have it designated a historic landmark, which could attract state rehabilitation grants and loans.

June 5, 1989, San Diego Union, B-1. Eyesore in park is regaining its charm, by Steve Schmidt.

It's a civic embarrassment in the cultural heart of San Diego. Its paint is peeling, its west side is crumbling, its huge bell tower was ripped down in a storm.

Still, Balboa Park's decaying House of Charm is becoming very popular these days.

Proving how precious a place in the park has become, seven cultural groups are vying for the chance to move into the building following its planned reconstruction.

By most accounts, the current lead candidate is the Children's Museum of San Diego, which hopes to turn the rebuilt Spanish Colonial-style structure into its home.

The Mingei International Museum, Old Globe Theater, San Diego Hall of Champions, Theater Organ Society of San Diego, Worldbeat Productions and the House of Charm's current occupant, the San Diego Art Institute, also have designs on the building.

Many of the organizations have launched lobbying campaigns to persuade the City Council to pick their group when the occupancy issue is debated this summer.

And with so many established groups interested in the same building, intense politicking is expected to play a major role in the final choice.

"Politics always seems to enter into these sorts of decisions," Chris Redo of the Old Globe said. "Hopefully the decision that will be made will be the best for the park and the organizations."

At stake is the chance to lease from the city one of the best spots in Balboa Park, smack in the heart of El Prado, home of several cultural institutions. The building is just south of the San Diego Art Museum.

"The House of Charm is at what I call the art hub of the (city)," said Martha Longenecker, founder of Mingei International, a La Jolla-based international folk museum.

The fate of the 74-year-old building may also put Mayor Maureen O'Connor's declaration of 1989 as the "Year of the Child" to the test.

In her State of the City address in January, O'Connor said she would like to see a children's museum and activity center located in the two-story House of Charm. "(It) would provide someplace for the children to go and something positive for the children to do," the mayor said.

Despite here clear support for a children's facility, O'Connor spokesman Paul Downey said last week that the mayor wants to review the proposals of the seven groups before committing her vote.

Some of the competing groups say they fear selection of the Children's Museum may already be sewed up, but are still pressing ahead with their own proposals.

While many like the idea of a children's museum in the park, some believe the House of Harm would be a poor spot for one because of traffic in the area.

Jack Monger, director of the Hall of Champions, pointed out that having the museum near the park's busy central plaza could put the children at risk.. "It just appears to be a dangerous setup," Monger said.

Skip Pahl, executive director of the Children's Museum, dismissed concerns over traffic by noting that the city eventually plans to ban parking in the plaza and significantly limit traffic in the area.

Directors of the eight-year old Children's Museum, now located in a 10,000-square feet space in La Jolla Village Square, say the park site would allow them to roughly quadruple in size.

The museum, which is expected to have 90,000 visitors this year, is filled with hands-on exhibits designed for both learning and fun, including a mock beach and a television news studio.

The House of Charm would not allow the museum to offer more hands-on exhibits, but its central location would make it more accessible to residents countywide. "It's a wonderfully centralized, high-profile piece of property," Pahl said.

Meanwhile, the Old Globe is plotting its own raid on the House of Charm.

Globe officials want to relocate the 225-seat Cassius Carter Theater in the building, along with creating badly needed rehearsal, office and workshop space for the organization.

Chis Redo, the Globe's associate director for planning, said use of the building would allow the theater group to drop most of its controversial plan to expand its current site.

Earlier this year, the Globe unveiled a \$6.6 million proposal to build 23,000 square feet of new buildings near its three theaters. City officials and others --- worried about the loss of green space at the park --- raised concerns about the plan.

"If the Globe was made a tenant of the House of Charm, it would (eliminate) the need to rebuild the structures," Redo said.

The city plans to tear down the House of Charm by 1991 and replace it at a cost of more than \$5 million with a replica that would open the following year. The group or groups picked by the city to lease the building would pay for its interior improvements.

The San Diego Art Institute, a visual-arts group that displays the work of local artists, wants to sty put. It has operated out of a portion of the building since 1954.

The House of Charm was built for the 1915 Panama-California Exposition. It was originally called the Indian Arts Building and took on its present name in 1935 when it was used as a gift shop during the 1935-36 California-Pacific International Exposition.

During World War II, the military used the building, as it did others in the park, for medical and other purposes. It was reopened to the public in 1948 as an exhibit hall.

Shirley Viennese, director of the San Diego Art Institute, said she believes that the visual arts have been shortchanged by the city over other forms of art in recent years. Selecting the institute as the tenant for the city lease, she said, would be "one way to mend that."

City officials closed off much of the building several years ago due to structural problems. In the 1970s a storm blew down the building's majestic bell tower.

The other groups interested in the building are:

Mingei International Museum. The 12-year old museum, which has a collection of more than 4,000 pieces of art, has outgrown its building at the University Town Center in University City.

Museum director Martha Longenecker said the museum would add a more worldly flavor to the park by increasing public exposure to international folk art.

The San Diego Hall of Champions. Directors of the sports exhibit hall want to move their complex from the Casa de Balboa to give them room to grow. The space would, among other things, allow the hall to expand its exhibit space and add additional meeting rooms to serve its growing athletic programs.

The Theater Organ Society of San Diego. The group wants to turn the building into an "Institute of American Music," which would include music exhibits and a huge pipe organ.

San Diego-based Worldbeat Productions, which wants to establish an African-American center for cultural arts.

Repeated attempts last week to reach members of the Theater Organ Society and Worldbeat Productions were unsuccessful.

June 10, 1989, San Diego Union, B-8 Pam Bruder, volunteer, returns to help bring Natural History Museum's B-10 displays back to life.

June 11, 1989, San Diego Union, A-12, A-16. Memorial held for Beijing victims; Hundreds join in for service in Balboa Park, by John Wilkens (illus.).

Hundreds of people wore black armbands at the organ pavilion in Balboa Park yesterday evening to pay tribute to the pro-democracy students and bystanders slain by Chinese troops in Beijing.

It was a memorial service, so there were tears, but there was also anger.

"This is one way of conveying our deepest sorrow and outrage at a government that could brutally massacre hundreds --- and yes, we believe thousands --- of unarmed citizens," said Daniel Chang, president of the Greater San Diego Chinese Community for the Democratic Movement in China.

"Eventually the will of the people will prevail."

The crowd, largely Chinese, applauded. They sat outdoors under gray skies for a service that included hymns, a traditional Chinese oration, and speeches. The pavilion was decorated with banners, including one bearing a time-honored saying: "Give me liberty or give me death."

Chang, one of the featured speakers, said the students clamoring of human rights and democracy in Tiananmen Square in recent weeks have formed "a collective voice that was heard in all parts of the world."

"We who live in a free society cannot even begin to think how people in a suppressed society yearn for such freedom," he said.

"By using the army last weekend to quell the demonstrations, with bullets and tanks, government leaders have left an unerasable and shameful mark on Chinese history," Chang said.

Other speakers included elected San Diego leaders from city, county, state and federal offices. Some referred to those killed in Beijing as heroes and vowed that their sacrifices would not be forgotten.

June 13, 1989, San Diego Tribune, B-3. Joseph Thesken: Balboa Park plan won approval of Balboa Park Committee yesterday with members expressing only minor concerns.

The report, prepared by Estrada Land Planning, Inc. of San Diego and the Park and Recreation Department, states that the long-term goal is to create a more pedestrian-oriented environment in the park by reducing auto traffic and preserving open parkland.

June 13, 1989, San Diego Tribune, B-6. EDITORIAL: A special tenant for park fixer-upper.

The roof leaks in this 74-year old building. The plaster is crumbling and the wooden supports have rotted. In fact, it's so dilapidated that it will take \$5 million to raze and rebuild. And that's just for the exterior.

Then why are seven organizations competing to occupy it? This building --- the House of Charm --- is on choice real estate in the heart of Balboa Park. That makes it just about the most popular fixer-upper in town, particularly since the city is willing to foot the \$5 million reconstruction tab.

Who should be allowed to move in once it's rebuilt? The Children's Museum, now in a La Jolla shopping center, seemed to have the early edge. This candidate, with its playful and educational exhibits, would certainly appeal to the young. But the Old Globe also is lobbying hard for its entry, which should fill the House of Charm with plays, rehearsals and workshops.

Others with designs on the structure include the Mingei International Museum, which specializes in international folk art, the San Diego Hall of Champions, the Theater Organ Society of San Diego, and Worldbeat Productions, which wants to establish an African-American center in the park. The San Diego Art Institute, which already operates from a portion of the House of Charm, would like to remain in the new one.

The crucial process of reviewing these proposals will begin soon, starting with a committee to be composed of city staff members and community representatives. Later the recommendations will be considered by a city council committee and finally by the full council.

The competition is bound to be intense. We hope council members will do more than yield to the loudest voice. Ideally, they will visit the museums hoping to relocate in the House of Charm and carefully evaluate other contenders.

The winner should be the one that best serves the interests of park-goers, the one that meshes best with the other museums along the Prado.

"West of the Smithsonian, this is the finest complex of museums in the country," says city Park and Recreation Director George Loveland. "Anything we can do to enhance that is part of our goal in realizing the master plan."

With that in mind, San Diego must rebuild the House of Charm and lease it to a tenant worthy of its refurbished beauty.

June 15, 1989, San Diego Tribune, D-1, D-5. Gordon Smith: City Council, arts commission wrangle over Transient Occupancy Taxes (TOTs).

The City Council and the city's Commission for Arts and Culture played a tug of war at a council hearing on funding yesterday, with neither side gaining an clear upper hand.

June 16, 1989, San Diego Tribune, B-8. Joseph Thesken: Concerns delay North Park expansion center; residents said the \$500,000 should go to recreational uses in the park, not to building expansion.

The final version of Balboa Park's master plan won the unanimous endorsement of the Park and Recreation Board.

David Twomey, the Park and Recreation Department's assistant director, said the plan, calling for \$104.7 million in park improvements over the next 19 years would go to the city's Planning Commission on June 29.

June 20, 1989, San Diego Union, B-6. EDITORIAL: Polishing the jewel.

Fortunately, the clashing views of those who would subordinate the park to vehicular convenience and those who would exclude vehicular traffic from the park altogether have been resolved through a happy compromise. Instead of closing Cabrillo Bridge to cars, it would remain open to west-bound traffic during daylight hours, with two-way traffic at night.

June 21, 1989, San Diego Tribune, B-2. Joseph Thesken: Balboa Park traffic experiment planned this weekend.

For the second time in less than two months, the San Diego Park and Recreation Department will close Balboa Park's Cabrillo Bridge to outbound vehicles in an experiment in traffic control.

Only inbound vehicles will be allowed Saturday and Sunday, said Dave Twomey, the department's assistant director. Twomey said motorists using the bridge will have to leave the park via Park Boulevard, just east of the zoo and museums.

Twomey said the traffic test is a part of the city's \$104.7 million master plan for the park. The plan is expected to get final approval from the city council next month.

Under the plan, auto traffic eventually would be limited to make the park more pedestrian-oriented.

This weekend, Twomey said, "The San Diego Museum of Art will sponsor entertainment in the Prado area, in front of the museum. There will be a jazz band, eight to 10 artists performing artwork and an outdoor café."

Buses will provide free shuttle service from the former Naval Hospital parking lot on Park Boulevard into the park both days, Twomey said. As is the case on other weekends, a variety of performers will entertain visitors throughout the park.

Twomey said he and his staff were pleased with the results of the previous test of one-way bridge traffic, conducted May 2. All the museums and institutions in the park offered free admission that day.

"Everything went smoothly, and the motorists entering the park were cooperative," Twomey said.

A survey of park visitors showed that the majority approved of closing the Prado parking areas and using the spaces for entertainment, Twomey said.

Slightly more than half those surveyed approved of, or were neutral about the traffic experiment, he said.

June 22, 1989, READER, 32. Jonathan Saville: Mainly Mozart Festival.

It was not, however, the idiosyncratic programming or the indifferent performance by one of the soloists that undermined the effect of the concert for me. The problem was the decision by David Atherton and the festival's organizers to hold the concerts outdoors in the Old Globe's Festival Theater. Theatrical presentations in this space have to put up with the same impediments: the damp wind out of the Balboa Park canyon adjacent to the zoo, the poor acoustics, the distracting noises from passing airplanes and from other activities in the park.

The council voted unanimously to spend \$158,000 from a reserve of funds for public art to help pay for two new police substations.

June 26, 1989, San Diego Union, E-4. Contenders ponder mayor's comments on House of Charm, by Christopher Reynolds.

For months Balboa Park's House of Charm, a piece of prime cultural real estate, has been coveted by seven local groups and invoked by Mayor O'Connor as a place with possibilities.

The building's lease is coming up in 1991. The coveting will be settled later this summer, when proposals from prospective tenants are sifted, sites inspected, recommendations tendered, and a City Council vote is made. But O'Connor has been leaving the impression that the deal is already done.

In a June 14 interview on Channel 10's "Inside San Diego," O'Connor brought up her agreement with the San Diego Hotel-Motel Association to hike hotel taxes last year. The reason, O'Connor explained, was "so that we could restore Balboa Park, which we are doing, so that we can have the House of Charm become the new Children's Museum, so that we can have festivals . . . to attract people from all over the world."

The House of Charm, just south of the San Diego Museum of Art, was built for the 1915 Panama-California Exposition. It has housed the San Diego Art Institute since 1954. The city plans to knock the crumbling two-story building down by 1991 and, at a cost of more than \$5 million, replace it with a replica that would open a year later. The new tenant will pay for interior improvements.

O'Connor has been open for months about her leanings toward the Children's Museum; her January State of the City speech included a pitch for moving the museum, now housed in La Jolla Village Square, to Balboa Park. O'Connor has continued her urgings since then, sometimes acknowledging she will consider the merits of the six other competitors for the building. Her words on "Inside San Diego," however, left the competition out entirely.

"If it's already decided, why are we involved?" asked Shirley Viennese, director of the San Diego Art Institute last Friday. "We have spent a great deal of money --- and I'm sure the six other competitors have done the same --- to prepare."

The other competitors, aside from the Children's Museum and the art institute, are the Old Globe Theater, which would like to build a new Cassius Carter Theater there with offices and rehearsal space (the existing Cassius Carter Theater would reverse to its original use as a tavern); the Mingei International Museum of World Folk Art, which would like to move south from University Town Center; the Theater Organ Society of San Diego, which foresees exhibit space; the San Diego Hall of Champions, nearby in the park, which wants more room; and Worldbeat Productions, which wants to establish an African-American center for cultural arts. Reaction to the mayor's remarks was varied and largely circumspect.

"It's kind of the nature of the game, isn't it?" said Jack Monger, director of the Hall of Champions. Monger said a Parks and Recreation team visited his hall Friday morning.

"I think all of us have worked hard to put together proposals and we would expect to be treated (accordingly)," said Mingei director Martha Longenecker. "We took the city at its word that it was truly accepting proposals."

The competition is expected to end in late July. First, the city Parks and Recreation Department's selection panel of volunteers will visit and compare the seven applicants. Its recommendation goes to the Parks and Recreation Board, which forwards its own recommendation to the City Council's Public Facilities and Recreation Committee, which puts its recommendation before the full council for vote. The mayor is one vote of nine.

"My sense is very much that it's not wrapped up. These institutions that are vying for it are all doing a terrific job in San Diego --- and they're all highly competitive," said Children's Museum director Skip Pahl, who was scheduled for a site visit last Friday afternoon.

"Obviously the council has to review it and make a consideration," said O'Connor spokesman Paul Downey when asked about O'Connor's televised remarks. "We do still have to go through the process, but she's been supportive (of the Children's Museum) since January."

June 27, 1989, San Diego Union, D-4. David Gregson: Daring production of 'Pirates' in park

July 20, 1989, *READER*, 4, 6. Paul Krueger: Tricks.

At dusk on a recent afternoon, San Diego Police Officer J. R. Nelson was questioning four young undocumented Mexican nationals he'd stopped on a grassy bluff on the Sixth Avenue side of Balboa Park. "Javier says he and his friends just crossed the border illegally, but look at his white shirt," Nelson commented, as he motioned toward one of the detainees. "Its' clean. And those white stocks he's wearing don't have a sticker or a thorn on them. He's full of shit. They haven't hiked through the canyons. They've been here hustling."

Officer Nelson isn't the only one who knows about the numerous and sometimes violent homosexual liaisons that occur every afternoon in the park's southwestern corner. Though that section of Balboa Park has long been a cruising ground for young hustlers in search of older customers who'll pay \$20 for a brief encounter, the prostitutes have changed drastically over the past eighteen months. Gay activists familiar with the Balboa Park scene say the young, white hustlers --- often runaways and drug addicts --- have largely been replaced by groups of sometimes violent Mexican youths who live in ramshackle encampments on the western embankment of Highway 163. To veteran park watchers, Fred Scholl and Nicole Murray, the July 5 stabbing death of 34-year old Franklin James Black near the Laurel Street bridge wasn't just another senseless crime but an indicator of how rough the park's sexual trade has become.

July 20, 1989, *READER*, 28. John D'Agostino: Bowling for Rockers . . . The Starlight has been enjoying a rock renaissance.

"Initially, the artists are a little worried when the jets go overhead during [afternoon] sound checks," admitted concert promoter Bill Silva last week. "But the major drawback to the bowl actually turns into an asset during performance. The speaker columns [carrying the heavily amplified music] drown out the jet noise, and the sight of the jets passing 'silently' overhead, with their colored lights flashing and everything, creates a really cool visual effect. By the time they leave town, the acts love the bowl."

July 26, 1989, Los Angeles Times, Part II. 1, 4. Anthony Millican: Council OKs Balboa Park Master Plan.

The San Diego City Council on Tuesday approved a plan to guide the development of Balboa Park into the next century.

It is the first overall plan for the park since 1960 and calls for renovating historic buildings, reducing traffic, making the park more accessible for pedestrians and preserving open space.

The result of more than eight years of work and often acrimonious debate, the plan represents a framework for future discussion between backers of museum expansion efforts and those who wanted to keep these institutions from encroaching on open park space.

The council unanimously approved the plan, 8-0, with Councilman Ed Struiksma absent.

"I think we've met the needs of both ends of the spectrum," said David Twomey, assistant director with the city's Park and Recreation Department. "We've finally arrived at a consensus. It's not the end of the road, though. We've still go a lot of work to do."

Councilman Bob Filner, whose district includes Balboa Park, said a new master plan has been his top priority since his election to the council.

"The fight is not over yet, but the battlefield has changed considerably," he said. The new plan "puts the brakes on commercial development," Filner said. Museum expansion will have to be consistent with the guidelines established in the master plan, he said.

Council members Judy McCarty and Bruce Henderson, although favoring the plan, expressed reservations about possible restrictions on the expansion of some museums.

"I would just hate to see something happen when it comes down the road and someone wants to do something and then they are told they can't because it conflicts with the master plan," McCarty said.

The master plans sets guidelines for park development, specifics will be debated when "precise" plans are drawn up. Guidelines for the precise plans will be established in about four months, Twomey said.

The cost of the plan, estimated at \$100.2 million over 20 years, will be paid through a portion of funds generated from the Transient Occupancy Tax.

Landscaping and minor improvements will begin "almost immediately," Twomey said.

Major improvements, such as construction of a parking garage behind the Organ Pavilion, a key to other renovations outlined, might not begin for two years, Twomey said.

The parking garage would be no bigger than the existing 387-space open parking lot behind the Pavilion, but would be landscaped on top to function as a pedestrian use area. The garage would replace spaces that would be eliminated by the development of a pedestrian mall in the Prado and Palisades areas of the park.

A pedestrian promenade will be created on the west side of the parking structure to link it with the Prado. The master plan calls for expanding the House of Pacific Relations, which will be increased by 4,000 square feet.

The Palisades and Federal buildings and the Balboa Park Club will be renovated and restored.

Cabrillo Bridge, which some park purists wanted closed to automobile traffic, will remain open, but only to eastbound traffic, freeing the westbound lane for an intra-park tram, and pedestrian and bicycle use.

Three historic courtyards at the site of the former naval hospital will be used for Park and Recreation offices. The large parking lots to the southwest of the site will be retained for public parking.

The possibility of equestrian trails was left open for reconsideration.

“This plan allows us to return much of the park to the pedestrian through the recovery of open parkland and the reduction of automobile traffic,” Filner said. “At the same time, the use of the tram system will enable us to improve access to our cultural facilities and the rest of the park.

The 1,300-acre park was established in 1868 when city trustees set aside 1,400 acres as a permanent park reserve.

By 1881, a high school, children’s home, city pound and gun club were among the groups infringing on the open parkland.

In 1903, the first park plan was drawn up, and by 1909 rumblings were heard of an exposition in the park celebrating completion of the Panama Canal. As part of the preparations, a contest was held to name the park. The name of Spanish explorer Vasco Nunez de Balboa was chosen.

The Panama-California Exposition grounds took more than five years to complete. The fair ran from 1915 to 1916 and attracted more than 3 million people.

The first appropriation of land to the U.S. Navy for the World War I effort took place in 1918. The Navy began building a hospital in 1921, utilizing the area first occupied by the orphanage.

During World War II, the Navy occupied all of the remaining buildings and closed the park to the public. For six years, until the Navy left the park, the central mesa was known as Camp Kidd.

In 1958, the firm of Harland Bartholomew & Associates was contracted to prepare a master plan for Balboa Park, which was completed in 1960.

July 26, 1989, San Diego Tribune, B-1, B-4. Joseph Thesken: Council approves Balboa Park master plan.

After eight years of debate, controversy and compromise, Balboa Park’s master plan won unanimous approval by the San Diego City Council yesterday.

Council members gave their blessing to a \$100 million blueprint for modernizing and developing the park over the next two decades.

Councilman Bob Filner, in whose district the park stands, summed up the council's view of the plan: "It will bring back the sparkle to the jewel of our city."

Although it had supported a broad outline of the plan in September, the council sent the plan back to the city staff for fine-tuning and more specific proposals on how to update the 1,300-acre park.

Major goals in the plan approved yesterday by the council include creating a pedestrian-oriented environment in the park, reducing auto traffic, restoring and improving existing buildings, and preserving open parkland.

Plans also for an eventual circulation plan in which traffic on the Laurel Street bridge would be one-way inbound, leading cars to a proposed organ-pavilion garage, and out by way of President's Way to Park Boulevard.

Improvements and new construction would be made in four principal phases, from this year until 2008, with funding coming from the city's hotel tax, paid principally by tourists, along with other city revenues.

"This document is the product of eight years of effort by the community and various agencies working together," Dave Twomey, assistant director of the city Park and Recreation Department, told the council.

He gave highlights of the 240-page plan, prepared by the department, the Planning Commission and Estrada Land Planning, Inc. of San Diego.

"It is consistent with the plan you approved in September 1988," Twomey said.

He said that during the past few months the plan had won the unanimous endorsement of the Planning Commission, the Balboa Park Committee, the Park and Recreation Board and the Historical Site Board.

Filner, the driving force on the council to mold a plan that would take Balboa Park into the 21st century praised the plan.

"We have a plan that reconciles the various needs of the park," he said. "It has been accomplished after many meetings by many groups."

"It will bring about the reduction of auto traffic, and pedestrians once again will be kings of the park."

In making the motion to approve the plan, Filner supported a staff recommendation that the council allocate \$100,000 to hire a consultant to draw up precise plans for restoring the park's Prado, or central core, area.

Projects planned in the \$44.9 million initial phase, from this year until 1993, include construction of a \$10 million Spreckels Organ Pavilion parking garage with 1,000 to 1,500 spaces; restoring and reconstructing the deteriorating House of Charm and House of Hospitality in the Prado area, at a cost of \$16.5 million; and upgrading other Prado buildings, for \$3.9 million.

Filner also asked that improvements in the eastern end of the park, "what has been called the stepchild" because the western end receives more attention and funds, be included in the first phase. They had been scheduled for the third phase, from 1999 to 2003.

Such projects would include \$500,000 for developing the northeast corner of the park, between 28th Street and Pershing Drive; and \$900,000 for construction of a Golden Hill soccer field.

Other council members generally lauded the report, although they expressed some reservations about it.

“I’m concerned about expansion of the museums in the park,” Councilwoman Judy McCarty said.

She said several institutions have expansion plans under way, and she said she wondered whether the master plan would inhibit such projects.

Twomey replied that the park department would examine the existing leases of the museums and determine whether expansions would be acceptable.

Commented Bruce Henderson, “I don’t feel we have all the answers yet as we approach the year 2000. We must establish long-term goals.

“We must exhibit the same foresight as our early fathers, who set aside the acreage for the park when San Diego had only a few thousand people.”

He said he was happy that increased security and improved lighting in the park were incorporated into the plan.

George Loveland, director of the Park and Recreation Department, expressed elation with the vote.

“This is the beginning of a new phase of Balboa Park,” Loveland said. “First we had the early city fathers having the foresight to set aside land for the park. Then we had the two expositions (Panama-California Exposition in 1915 and California-Pacific International Exposition in 1935), then the master plan.

“Now we’re ready to jump into another phase, that of expansion and improvements in the park.”

Verna Quinn, chairwoman of the Park and Recreation Board, said with a sigh: “At long last, we now have our master plan, and the money to implement the plan. I congratulate our city council.”

July 26, 1989, San Diego Union, B-1, B-4. Steve Schmidt: Council OKs master plan for Balboa Park.

The improvements approved yesterday include:

- Elimination of parking by 1998 within the Prado and Palisades, the park’s central areas and home of many of its cultural institutions. Both areas would be restored as plazas.
- Closure of much of Florida Drive, on the park’s barren east side, by 1993 to allow for the creation of picnic areas and trails.
- Only one lane of one-way traffic across Cabrillo Bridge, the park’s ceremonial entrance by 1998. Cars would be directed east most of the time. Currently, vehicles can drive both ways across the bridge.
- Construction by 1993 of a submerged, more than 1,000-space parking garage on the site of the existing Organ Pavilion parking lot. Project cost: \$10 million.

Other planned changes include the upgrading of many of the park’s aging buildings and the creation of a tram system to ferry people into the Prado and Palisades and other areas of the park.

During a brief hearing on the plan, Brennan Rae Thompson of WorldBeat Productions of San Diego suggested that a water storage tank slated for demolition near Park Boulevard be converted into a black cultural center.

Filner asked city staff to examine the idea.

The council previously decided that about half of the money needed for the improvements --- about \$45 million --- will come from a percentage of the city's hotel-motel tax.

The initial phase carries an estimated price tag of \$40.8 million and will include the start-up of a tram system, restoration of several buildings, improved lighting and the closure of a section of Florida Drive.

Phase two, targeted for the years 1994 to 1998, will include construction of a new gym just outside the park and a pedestrian and bike bridge near Golden Hill.

Phase three, between 1999 and 2003, calls for the revitalization of Spanish Village and conversion of the parking lot at Inspiration Point into green space.

Phase four, from 2004 to 2008, will include rehabilitation of the War Memorial Building and the expansion of the House of Pacific Relations.

July 27, 1989, San Diego Tribune, B-3. Joseph Thesken: 60-year old Fire Alarm Building gains protection with 'historic' designation.

The Fire Alarm Building in Balboa Park was designated historically significant yesterday by the San Diego Historical Site Board.

The building, vacant since 1970, recently gained a new lease on life when the San Diego City Council agreed to renovate it for use as office space for the Park and Recreation Department.

August 24, 1989, San Diego Union, B-10. OPINION: Change of venue for Veterans' Day parade

August 25, 1989, San Diego Union, B-14. EDITORIAL: The better choice

The City Council now faces the unenviable task of choosing a new tenant from among seven worthy institutions, for the soon-to-be-reconstructed House of Charm in Balboa Park. Judging by the weight and slickness of their printed proposals and the level of public support they enjoy, the Old Globe Theater and the Children's Museum are leading contenders for the choice building on the south side of El Prado between the House of Hospitality and Alcazar Garden.

Both of these institutions are major community assets. But the Old Globe has the better proposal. The House of Charm ought to be leased to the Old Globe on condition that part of the building be shared by the San Diego Art Institute and, possibly, by the San Diego Museum of Art.

The Old Globe proposes to use most of the building for its Cassius Carter Center Stage theater. The existing Cassius Carter would be converted to a multi-use pavilion, including such amenities as meeting rooms and refreshment services. This would be similar to the building's original use as the "Falstaff Tavern."

The value and broad appeal of a new Old Globe complex are unmatched by the other applicants. An integral part of park history since the 1935-36 California Pacific International Exposition, the Old Globe is one of the most respected regional theaters in America. Its programs to train young professionals are nationally acclaimed. The Old Globe's proposal is also consistent with the park master plan. It would provide for maximum day and night use of the new building with no significant increase in visitor use of the busy El Prado area. Nor would it exacerbate existing parking or traffic problems or significantly increase the theater capacity. Another appealing feature of the proposal is a plan to dedicate 6,971 square feet of the building for public exhibition space. This would eliminate any need to evict the Art Institute, which has applied to use this space as has the Museum of Art.

The City Council should lease the new House of Charm to the Old Globe --- a decision San Diego would never regret.

August 31, 1989, READER, 4. Brae Canlen: Mountain Biker Bar?

The Los Penasquitos preserve took the first tack two weeks ago when it erected signs spelling out new rules for mountain bicyclists: Stay on the main trail. Top speed allowed: ten miles per hour. Yield to hikers and horses. A mountain bike club also posted some flyers, beseeching riders to behave themselves.

"There's always an idiot somewhere," says Michael Lambert. Lambert, a film producer from Escondido, likes to ride through the preserve with other mountain bikers. Most of the cyclists are courteous, he says, but a few seem more concerned with speed and performance than flora and fauna.

September 3, 1989, San Diego Union, F-6. Roger Showley: Bank's gift to be facelift for Balboa Park entrance.

Construction is due to begin this week on a \$150,000 project to enhance the west entrance to Balboa Park.

The project at Laurel Street and Balboa Drive is a gift of San Diego Trust and Savings Bank in commemoration of its 100th anniversary.

Due to be dedicated October 15, the new entrance was one of several suggestions offered by city park officials when bank president Thomas Sefton offered the donation. Jack Krasovich, director of the Park & Recreation Department, said the area will be known as Sefton Plaza.

Meanwhile, the Museum of Man expects to begin occupying the renovated Administration Building at the east end of Cabrillo Bridge this month. The structure has been renovated through a \$744,000 state grant.

September 4, 1989, Los Angeles Times, Part II, 2. EDITORIAL: Assessing Competitors for Balboa Park Space.

Although both (the Children's Museum and the Mingei International Museum of World Folk Art) are hard-pressed for space in their shopping center locations, the Children's Museum has the more compelling need to be in the park. And San Diego children have a compelling need for a larger, more centrally located Children's Museum.

September 5, 1989, San Diego Union, B-1, B-4, B-5. John Wilkens: Alex Bevil and Fire Alarm Building in Balboa Park; history buff takes on campaign to save the life of one 1920s building.

September 6, 1989, San Diego Tribune, B-1. Joseph Thesken: Museums' 'free day' back to normal.

Yesterday was the first day of restrictions limiting the number of people admitted at any one time under a policy adopted last month by members of the Central Balboa Park Associations.

September 7, 1989, San Diego Daily Transcript, 1A:6, 4A:1-2. Tim McClain: Mingei leads for House of Charm; panel recommends shared space for San Diego Art Institute.

Garnering the recommendation of an eight-member advisory panel and the City Manager's office, the Mingei International Museum of World Folk Art is the early winner in the competition to occupy the House of Charm in Balboa Park.

The city will spend \$5 million refurbishing the building's exterior, leaving the interior to the tenants.

Also doing well in the chase of space in the 48,000-square-foot structure is the San Diego Art Institute, which has occupied the House of Charm for 34 years and is recommended for a sublease.

Solving the space problems of the Mingei and retaining the Art Institute though would leave the Old Globe Theater looking for expansion space. And the Children's Museum, while recommended for another park location, would not be able to move into Balboa Park for five or more years.

The Children's Museum would be located in the Federal Building in the Palisades area at the south end of the park. The building now houses the municipal gym. The adopted Balboa Park Master Plan calls for moving the gym outside the park, but not until sometime in the years 1994 to 1998.

In his report on the House of Charm, Coleman Conrad, deputy city manager, said there are no other uses contemplated for the Federal Building and that placing a children's museum in the building "would be a marvelous addition to the park."

As to whether the removal of the gym to a new location can be hurried along, Conrad said the possibility will be addressed in a financial plan expected to go before the council in the spring.

Councilman Bob Filner, whose district includes the park and who has been closely involved in the master planning, said the city should address the Old Globe and Children's Museum issues at the same time it tackles the House of Charm.

"If we accept this recommendation, and my tendency is to go with such a committee, I would like to see No. 1 the Children's Museum situation with the Federal Building sped up," Filner said. "I think we ought to move the gym as rapidly as possible. The city is talking with City College in discussions over the new Civic Center. There are discussions involving a new sports complex and I would like to see these move much quicker."

"The second (problem) is the Old Globe situation," he said. "It is going to get very controversial. Forget the merits of their proposal for a minute; putting them in the House of Charm would have solved some problems down the line. I think their original expansion plans contradict the master

plan. The question is how big a push they are going to put on for expansion. If we don't put them into the House of Charm then we are going to have to come to grips with their expansion plans."

Filner will get his chance to comment on the proposal on September 27 when the item comes before the council's Public Facilities and Recreation Committee, on which he sits. Before then, the report is scheduled for review by the Balboa Park Committee this Monday and the Park and Recreation Board September 21.

A big booster of putting the Children's Museum in the House of Charm is Mayor Maureen O'Connor. She discussed the idea during her 1989 State of the City Address at which time she also declared 1989 to be the Year of the Child.

O'Connor was not at City Hall yesterday and her spokesman, Paul Downey, said the mayor had not seen the advisory committee's report.

"Her feelings are the House of Charm is an ideal spot for the Children's Museum," Downey said. Until the mayor had reviewed the report, Downey said he could not comment further.

When the March 12 deadline arrived for responses to a Request for Proposals to occupy space in the House of Charm, the city had received seven proposals. Of the seven, the Children's Museum, Mingei and Art Institute came out best in the eyes of the committee.

The remaining four were from the Hall of Champions, Institute of American Music, Old Globe and Worldbeat Productions. Here's what the report says about those:

Old Globe: "Discussions have been held with Old Globe officials relative to other options that may be available to the Globe to satisfy more of its needs by reconstruction within the existing leasehold and within the spirit of the policy framework of the adopted Balboa Park Master Plan. The manager recommends that these options be fully explored in conjunction with development of a precise plan for the Prado area."

Hall of Champions: "An alternative would be for the Hall to expand in the basement area now occupied by the Model Railroad Museum. This option, however, is only viable if the museum is willing to relocate (to the basement of the House of Charm). The museum's current lease is for 21,570 square feet and does not expire until the year 2006."

Institute of American Music: "The primary goal of the Institute is to find a home for the "Mighty Wurlitzer Organ" which is now housed at the California Theater. . . . The organ is an impressive instrument but we are unable to recommend a site for it in Balboa Park. The instrument does not lend itself to shared space."

Worldbeat Productions: "This proposal offers an interesting opportunity to enhance the cultural diversity of Balboa Park. The group had originally expressed an interest in occupying the second water tank in the Pepper Grove area. . . . It is the manager's recommendation that demolition of the water tank be held in abeyance pending development of a precise plan for this area of the park and that full consideration be given to Worldbeat and other potential users."

September 7, 1989, San Diego Tribune, B-11. Jonathan Freedman: San Diego's endangered tree of life.

No one knows when the bay fig was planted near the Laurel Street entrance to Balboa Park. . . . One late afternoon in the heat of August the giant fig tree suddenly gave way. . . . The tree spirit hovers in Balboa Park. When you pause where it stood, you can hear it calling, through invisible branches embracing the city, for San Diego to honor its tree of life.

September 8, 1989, San Diego Tribune, B-1. Laurel Street into park shut to traffic

September 10, 1989, San Diego Union, A-1. John Wilkens: Pigeon birth control saga ends.

Officials say there are now less than 1,000 pigeons in the park, down from more than 5,000 when the program began. And not many people have noticed.

September 12, 1989, San Diego Union, B-7. Letter, George Driver, Chairman KidsPlace, San Diego: Your editorial is another blow to youth. We teach them to say no to drugs, and no to gathering in malls. (We tell them they) cannot go to the beach nor drive around in a car. Then we provide no alternatives and wonder why they rebel and get into trouble. We say kids are our most important asset, yet we give space in the park to autos, airplanes and fossils first.

September 14, 1989, San Diego Tribune, B-1. Joseph Thesken: Fence to help old tree survive.

The city Park and Recreation Department will erect a fence around the Moreton Bay fig tree near the Natural History Museum in the park to prevent it from dying. Work on the fence will begin September 20.

The City Council should reverse the city manager's recommendation and offer the folk museum and art institute a place in the Federal Building. Open the House of Charm to the laughter and awe of children discovering life's infinite possibilities in the Children's Museum.

September 20, 1989, Letter, from Richard W. Amero, to Don Wood, President, Citizens Coordinate for Century 3; Subject: Bridle Paths in Balboa Park

A C-3 committee studying the east side of Balboa Park has recently endorsed considering the restoration of bridle paths to Balboa Park at the urging of a member. I was one of two people to dissent. Reasons advanced were "Balboa Park should have something for everybody," "specialists in park recreation do not know what they are talking about," and "I like to ride horses." Not advanced were arguments heard recently in Los Angeles in conjunction with a privately-run equestrian club in Griffith Park: "We are a free enterprise society"; "There are enough people who can afford it"; "I believe it would be a good investment"; and "The development would allow us to gain revenue to make the park self-sustaining."

In my opinion, an equestrian trail system in Balboa Park is not feasible because of the limited and inaccessible terrain involved. Before the coming of the Crosstown Freeway, the Silver Gate Riding Club, behind the Federal Building, neglected their facilities and animals, broke their promises, and had their hands out for public favors and money. Riding trails are one aspect of a larger situation for the horses will have to be stabled. Skilled riders will insist on an arena for shows, polo fields, training rings, a hay barn, a riding academy, paths for trotting and racing, and the use of streets and plazas for parades and exhibits and land for camper trailers and automobile parking.

If the riding group operates a concession offering horses to the public, they will not supervise their clientele. Do horseback riders have licenses? For corroboration, please consult the Society for the Prevention of Cruelty to Animals. If the riding group is entirely private, then it is a restricted activity that does not fall under the provisions of the San Diego City Charter for the general public use of dedicated city parks.

In the nineteenth century, large city parks were planned with paths for horses, carriages and pedestrians. This separation of traffic was one of the marvels of early city parks. The automobile, the bicycle, the skateboard, the MOPED, the motorcycle, and the jogger have since intervened. As a consequence parks have been forced to discourage some activities while promoting others. There is unanimous agreement among park planners that people who walk and sit should have priority before other park users.

There have been nasty and, in some instances, lethal collisions between self-propelled, animal-propelled and machine-propelled people in parks. Such incidents should be avoided for the park experience is supposed to be peaceful and therapeutic.

Problems of sanitation and destruction of soil cover and plants are too obvious to mention, even though horseback riders with “blinker” vision will pretend they do not exist. Robert M. Makla, founder of Friends of Central Park and Henry Stern, Commissioner of Parks for New York City, can give you advice on the practicality of bridle paths in a park with only 309 “free” and uneviscerated acres left.

My argument against bridle paths in Balboa Park also applies to the holding of dog shows on the Arizona landfill, an activity that the C-3 committee has not discussed. This latter case is one of either/or, for it is either dog show or landscape, not both. The question is should Balboa Park be planned for “the greater good of the greatest number” or should it be given piecemeal to everybody who wants its?

I am not opposed to policemen riding horses in the park as they are trained to handle them, they enhance security, and they provide an amicable and colorful attraction.

The implementation of a bride-trail system in the approximately 6,000-acre Mission Trails Park is another issue which should be examined by residents in the surrounding communities and by a C-3 committee. Their first step in such an examination would be to study the problems encountered in the operation of about 43 miles of bride trails in 4,000-acre Griffith Park in Los Angeles. It should not be forgotten that the largest part of Griffith Park is in a semi-wild state and is not hampered by competing activities and that the financially-troubled equestrian center, operated by the Burbank-based Equestrian Center of American, is located north of Ventura Freeway and is not in the park.

I am enclosing some remarks from Raymond Clary, author of The Making of Golden Gate Park.

I suspect that C-3, the Park & Recreation Department, and the City Council are soon to receive a massive pro-horseback riding promotion with proponents from other cities making absurd claims. It is now time to prepare ourselves for the onslaught.

EXCERPT FROM A LETTER FROM RAYMOND H. CLARY, HISTORIAN, SAN FRANCISCO, CALIFORNIA, TO RICHARD W. AMERO, SEPTEMBER 9, 1989.

Now as to the horse stables and bridle trails. In theory it sounds like a good idea. In practice, it STINKS! And I am not talking about horse manure.

When polo was all the rage, stables were built in the park for the convenience of visiting polo horses from other cities. Then the cost of keeping horses became prohibitive (at least five horses for each player), so the game was abandoned.

As property values went up, livery stables went out of business, and the people who felt they could afford to keep a horse had no place to stable them. So they pressured the Park Commission to let them use the “abandoned” polo stables. Then the Park no longer wanted to bother with it, so the stables were leased to a concessionaire, and you know the rest. It was a constant source of trouble --- prices rose --- insurance became a problem --- ad infinitum.

As to aiding “inner-city children,” most of the horse owners could care less about underprivileged children. What they are talking about is cheap, slave labor. They find a young person who is willing to curry, clean and exercise their horse in return for the “privilege” of riding it. Comes the weekend and they want to ride, their “groom” has the horse all saddled, bridled and ready to go. THAT, my friend, is how they benefit the “inner-city” youngster.

I am probably doing an injustice to a relative few, but, generally speaking, you will find that I have hit the nail squarely on the head.

We had a concessionaire here that I fought for seven years and he finally gave up the lease. He kept as many as three horses in one stall and paid the City for only one. He hired “wetbacks” exclusively, and the Police were afraid to touch him because his business partner was President of the “Wreck-Park” Commission.

Not even would the local Immigration Service act, until I wrote to Washington. FIVE TIMES during one summer the Immigration authorities raided the stables and deported the help, and the “Wreck-Park” Commission refused to cancel his lease. When we got a new Mayor and a new President of the Commission, he was gone within five months.

It your Park Commission is willing to operate the stable at cost, so that an “inner-city” child could afford to take riding lessons and then rent a horse once in a while, that would be one thing. But if it is a business venture, then only the well-to-do will be able to afford the facilities, and urban parks were never intended to benefit the well-to-do. They can afford to go to the mountains, or the seashore, or the river --- and maintain a home in several different places. They have no need for urban parks, except that they would usurp them for their own selfish benefit to the exclusion of the “inner-city” child. Don’t let them sell you that kind of a sob story.

Several years ago, the de Young Museum persuaded the Planning Commission that they needed a FOURTEEN FOOT CIRCULAR RAMP APPROACH to their main building. They said they needed it for --- get this --- wheel chair access for the handicapped. What they wanted was a carriage ramp, so they could be driven right to the door and not soil their evening clothes in our dirty park. When they got the ramp built, they removed the handicapped parking signs in their parking lot so they could have more “private” parking. The Police has to force them to restore the parking for the handicapped. THAT, my friend, is how much they care about the handicapped or the “inner-city” child.

September 21, 1989, READER, 4. Neal Matthews: Gold Buys Bronze.

The Cabrillo Bridge in Balboa Park is closed for construction of a formal entryway into the park from the west side, and workmen are hustling to complete the project before the opening of the Soviet Arts Festival, which will hold many of its exhibitions in the park, on October 21. The \$150,000 makeover is being underwritten by San Diego Trust & Savings Bank, in honor of the bank’s 100th anniversary. When completed, the portal will be another plaza, joining the venerable Plaza de Panama, Plaza de California and Plaza de Balboa in San Diego’s world-famous park. But this plaza has a different ring to it: Sefton Plaza. How the heck did bank president Tom Sefton get his family’s name posted in bronze on the entrance to a public park”

The story of Sefton Plaza (there will also be a separate 8-by-12-inch plaque at the plaza opening noting San Diego Trust's beneficence) is just a continuation of the piecemeal way Balboa Park has been developed. The recently adopted Balboa Park Master Plan was supposed to put an end to this kind of scatter gun design approach in the park, but the project was rushed into the works prior to the master plan's completion. The bank came to the city last year looking for a major project to donate money to and was steered to the park entryway. The bank hired its own design firm and brought the plans to city parks officials. And as happened in 1961, when the city council declared that the Timken Art Gallery should be plopped awkwardly amid the graceful Spanish Colonial architecture on the Prado, the current city council voted unanimously in early August to let Sefton determine the design of the entryway and stick his name on it.

September 21, 1989, San Diego Union, D-6. Robert L. Pincus: Sorolla's strength comes to light at Museum of Art

September 22, 1989, San Diego Tribune, B-3. Dee Anne Traitel: Park & Recreation Board backs House of Charm site for Children's Museum

September 24, 1989, San Diego Union, E-1. Robert L. Pincus: Museum of Photographic Arts focuses its collection.

September 28, 1989, San Diego Daily Transcript, 1-A, 3-A. House of Charm still untenanted; no slam-dunk item is returned to City Council, by Tim McClain.

Though she wasn't there in person, Mayor Maureen O'Connor managed to play a big role in yesterday's three-hour discussion by the Public Facilities and Recreation Committee on the selection of a new tenant for the House of Charm in Balboa Park.

The mayor is a strong proponent of moving the Children's Museum from La Jolla into the desirable spot, and her support was mentioned and alluded to frequently by a number of competitors for the space. Some insinuated that the matter had already been decided in the Children's Museum favor.

In the end yesterday, the PF&R committee was unable to reach a decision and instead sent the item to the full City Council. Before the council takes action, city staff was instructed to determine whether it was financially feasible to have both the House of Charm and Federal Building ready for new tenants at the same time, while also finding a new home for the municipal gym now housed in the Federal Building.

As it stands today, the House of Charm is a crumbling structure beyond salvation. The city has set aside \$5 million to demolish the building in the Prado area of Balboa Park and reconstruct it to include 48,000 square feet of usable space. When the city tested the waters for interest in April, it received seven proposals. Those submitting plans were the Children's Museum, Hall of Champions, Institute of American Music, Mingei International Museum of Folk Art, Old Globe Theater, San Diego Art Institute and Worldbeat Productions.

On the surface, the Art Institute appeared to have the greatest claim to space, as it had occupied a portion of the House of Charm for the last 35 years.

After a review that included advice from an eight-member ad hoc advisory panel, the City Manager's office returned early this month with a recommendation that Mingei be granted the space, subleasing a portion to the Art Institute.

The manager also recommended that the city try to move the San Diego Model Railroad Museum from its space in the Casa de Balboa, where it has a long-term lease, into the new basement of the House of Charm. Moving the railroaders would provide expansion room for the Hall of Champions.

The Children's Museum would be located into the Federal Building once a new gym was opened at a site away from the park, something not planned to take place for six to nine years, but that could be accelerated.

On September 11, the Balboa Park Committee supported almost all of the manager's recommendations, deleting references to the railroad museum. The museum's board indicated it was not interested in tearing up its lease and destroying unmovable intricate displays in order to relocate into new, smaller quarters.

Last week, the matter went before the Park and Recreation Board. After a personal appearance by Mayor O'Connor, the board voted 7-1 to recommend that the Children's Museum be given all of the space.

Yesterday's session was played out before a packed house and had to be moved from a smaller conference room to the main council chambers. Still there was a shortage of seats. Best represented were the Art Institute, Children's Museum, Old Globe, Mingei and Model Railroad Museum. When speakers from the various groups finished saying their pieces, the resulting applause almost made it seem like some kind of talent show where audience support was a crucial factor in selecting a winner.

At one point the Art Institute presented a scroll signed by 2,385 people asking that it remain in the House of Charm. The Children's Museum did the institute one better by unveiling a scroll containing more than 4,000 signatures.

The manager's recommendation was in trouble from the outset.

Tom Hall, managing director of the Old Globe, told the four PF&R members present (Councilwoman Judy McCarty arrived about half way through the discussion) that a new compromise was in the works. Under it, the Hall of Champions would move to the Federal Building and Mingei would take the majority of the House of Charm, providing space for the Art Institute, and in the basement, rehearsal room for the Old Globe.

(The Old Globe has been hot for more rehearsal space for a while now, though it plans to do so by building a new structure behind the theater face steep opposition from foes of any new commercial development in the park. Moving into the House of Charm is considered a solution.)

Though all four players getting new space supported the solution, still left with no place to go, except possibly the old Hall of Champions spot, was the Children's Museum.

Support for putting Mingei and Art Institute in the House of Charm came from a variety of speakers, including Dick Bundy, chairman of the Central Balboa Park Association and letters read into the record from Ernest Hahn and U. S. Rep. Jim Bates.

Don Wood, president of Citizens Coordinate for Century 3, was a member of the ad hoc committee and supported the manager's recommendation.

"The whole report is a solid attempt to meet the needs of all the organizations involved," he said.

In a thinly-veiled attack on the attitude of the Children's Museum, Wood said, "A number of organizations acted as if they had a clam-dunk and they didn't have to compromise. That was noted by the committee."

Wood said if the committee went ahead and backed the Children's Museum, "the only message you're getting out to the public and children is to get your fix in early, and don't worry about the public process."

Representing the Art Institute was Charles Sullivan, who said the organization was surprised when during the review process its members heard Mayor O'Connor claim on a television show that the Children's Museum was moving into the House of Charm.

Paul Downey, the mayor's press secretary, disputed those charges. He said the mayor said she favored the Children's Museum for the site, a position she first advanced during her State of the City speech in January, not that it was a done deal.

"I think they have misconstrued or misquoted what the mayor said," Downey said. "The mayor was supportive of giving the space to the Children's Museum. If anyone took that as being that it was absolutely going to be there, they were mistaken. By no means is it a done deal. These people might not know the process, I suppose."

As to the manager's contention that the Children's Museum best belongs in the Federal Building where bus access is easy and the site opens to a wide lawn, Downey said other factors come into play.

"Part of the argument for the Children's Museum is to have access to the other museums in the Prado area of the park," he said.

Sullivan also said the Children's Museum has no experience running such a large space (it now operates 10,000 square feet) and it was basically for the rich. His comments were disputed later by museum supporters who said the annual cost for a family to belong is \$30, and special provisions are made for those who cannot afford it.

Barbara Bry, director of the Children's Museum, eased the tension somewhat with her opening comments that she would support taking the Federal Building if the city could get it ready at the same time the House of Charm was ready. Bry said the big problem with the Children's Museum, which drew 90,000 visitors in the last fiscal year, is a lack of space and having to turn away groups.

Maria Garcia, school principal, told the committee that if this was indeed the year of the child and not just a clever slogan made up by a public relations firm, it would support the Children's Museum.

George Driver, president of Kids Place, scolded the committee, saying it could not compare the needs of arts organizations with those of the children in these days of drugs and gang activity.

"The youth deserve their rightful place in the park and they are asking for it," he said.

When the public discussion ended, Filner proposed that the item be returned to staff to see if it was possible to have the House of Charm and Federal Building ready at the same time. If it was, then Mingei, the Art Institute and the Old Globe would get the House of Charm. The Railroad Museum would stay put and Worldbeat Productions gets first crack at occupying an old water tank it's asked for. The Children's Museum would move into the Federal Building as the primary tenant with thought given to adding a mezzanine space for the Hall of Champions.

Once the details of the compromise were worked out, Filner wanted the report to come back to PF&R, reasoning that if it failed the committee had a tough recommendation to make.

Filner's suggestion was fine with Henderson but rubbed Councilman Ed Struiksma the wrong way. Struiksma wanted the item to go directly to the City Council without the Filner-requested information so a decision could be made post-haste. He was supported by councilwomen Abbe Wolfsheimer and Judy McCarty.

Henderson then ruffled a few feathers by saying that if the committee took Struiksma's suggestion it would be "sending a message to the community that there is great impropriety" in this particular decision-making process.

An irritated McCarty asked Henderson to be more specific. He responded by defending Filner's suggestion as the appropriate way the committee system works. But McCarty wasn't satisfied and wanted more about the alleged "impropriety."

"The suggestion has been made that the council votes have already been counted," he said, mentioning the comments about the Children's Museum being unwilling to share the space and the mayor's statements on Channel 10's "Inside San Diego" show.

By moving with "undue haste," he said, the committee adds fuel to that argument.

McCarty dismissed that scenario and said that she, for one, had yet to make up her mind. The vote was 3-2 with Henderson and Filner opposing sending it directly to the council.

September 28, 1989, San Diego Tribune, B-6. Compromise is key at House of Charm, by Kathryn Balint.

A dispute over who will occupy the new House of Charm in Balboa Park will be fought next month before the San Diego City Council unless a compromise is reached.

The Children's Museum, now in the La Jolla Village Square shopping center, and the Mingei International Museum of World Folk Art, at the University Town Center shopping mall, want to move in once the city completes construction in 1991 of a replacement for the old House of Charm on the Prado.

Their conflicting wishes have turned into a political struggle with Mayor O'Connor supporting the Children's Museum and City Manager John Lockwood and at least two council members favoring the art museum.

The latest battle was waged yesterday before the council Public Facilities and Recreation Committee, which reached no consensus.

The committee's five members did agree to direct Lockwood to see whether a compromise could be worked out by allowing the Mingei Museum to have the House of Charm while renovation of the park's Federal Building for the Children's Museum.

The members, however, could not agree on whether the issue should be heard again by the committee or heard next by the nine-member council. A 3-2 vote sending the question to the full council was an indication of how politically charged the question of what institution should occupy the House of Charm has become.

Councilman Bruce Henderson said he wanted the topic to be heard again by the committee, which he heads so that the details could be ironed out. Councilman Bob Filner agreed. The two also said they want the Mingei Museum to move in.

When council members Judy McCarty, Ed Struiksma and Abbe Wolfsheimer proposed that the full council, including the mayor, hear the issue, Henderson said this would give the appearance of impropriety. He said the committee should try to resolve problems before sending them to the council.

McCarty said she hopes that in the full council the controversy will be "worked out so everyone gets something."

September 28, 1989, San Diego Union, D-3. Debate delays House of Charm decision, by Noel Osment.

A City Council committee yesterday failed to recommend specific tenants for Balboa Park's House of Charm after its renovation in 1991, but compromise plans devised by some of the contending groups raised the hope of a solution.

After about three hours of testimony and debate, the council's Public Facilities and Recreation Committee voted to send the question to the full council as soon as possible after additional information is supplied by the city manager's office.

In a report issued September 13, this office recommended the Mingei Museum of International Folk Art be the primary tenant of the House of Charm with the San Diego Art Institute remaining in the facility as a subtenant. The report also recommended the Children's Museum be housed in the Federal Building, when it can be made available. The building is currently used as a gymnasium.

The Children's Museum, also a contender for the House of Charm, went into yesterday's meeting with the apparent support of Mayor O'Connor, who has publicly favored it as the main tenant.

The Art Institute, which has been a tenant at the House of Charm for 35 years, and the Children's Museum has both amassed large and spirited groups of supporters for yesterday's committee hearing.

Several dozen children, including a fourth-grade class from Fletcher Elementary School, were there, many bearing colorful homemade posters. Along with parents, museum board members and volunteers and staff they were there to plead the case of the Children's Museum.

An equally large force (albeit all adults) appeared on behalf of the Art Institute.

On hand in smaller numbers were representatives of other contenders for the space: the Old Globe Theater, the Mingei Museum and the San Diego Hall of Champions.

Before testimony began a compromise plan was offered by the Old Globe in conjunction with the Mingei and the Art Institute.

Instead of asking for the entire House of Charm, the Old Globe would settle for office and rehearsal space in the basement with Mingei and Art Institute above.

The Hall of Champions also withdrew its application for the House of Charm. Jack Monger, the hall's director, however, said it is urgent that the hall find larger space, particularly since it has a potential \$4 million donor to pay for expansion.

Children's Museum representatives said they would be happy with the Federal Building --- if it could be acquired within a reasonable amount of time.

That is a big "if," and, in the end, timing is the bottom line.

The crucial question, summarized by Councilman Bob Filner, is whether arrangements can be made to convert the Federal Building for other uses at about the same time as the renovation of the House of Charm.

The catch is that new gymnasium facilities --- slated to be built somewhere outside of the park --- must be made available before the Federal Building can be taken over.

Thus, the council committee directed the city manager's officer to do a study and report --- probably within several weeks --- on the feasibility of speeding up the release of the Federal Building.

Filner said the full council action could be taken with four to six weeks.

September 28, 1989, San Diego Tribune, D-1. Kids Arts Fest grows to full weekend

September 29, 1989, San Diego Union, B-1. Sharon F. Griffin: Zoo seeks cuts with offer of early retirement

Voluntary early retirement will be offered to 129 employees at the Zoo, the Wild Animal Park and the Zoological Society of San Diego in an effort to cut the work force, society officials said yesterday. The 129 positions represent 7.5 percent of the 1,726 union and non-union workers employed by the society, which operates both the Zoo in Balboa Park and the Wild Animal Park near Escondido.

Society spokesman Jeff Jouett said yesterday that the organization was "positioning" itself for some lean years. Specifically, he said Zoo attendance has dropped and the society faces some major capital expenditures.

"We are on the heels of three very good years: 1986, '87 and '88 were top attendance years for the whole Zoo's history," Jouett said. However, he said, "1989 is dropping back to the pre-panda days. In 1990, we will not have a Tiger River or a Sun Bear Forest to open, so we expect attendance to be at normal levels." Additionally, the society has some major building projects in progress.

"Our gorilla exhibits are now under construction for completion in 1991, and that's an \$11.5 million project," Jouett said. "We have to rebuild Wegeforth Bowl, which is where we have our sea lion arena, and that's about a \$5 million project.

"So we see these big expense items on the horizon, and we see that we don't have anything in the rest of 1989 or 1990 to entice people to come to the Zoo."

About 55 percent of the society's expenses are for labor, Jouett said. About 79 percent of its income is from admissions, food and merchandise sales, and rides on the monorail, Skyfari or buses. Employees eligible for the early retirement program must make a decision by October 27, and retirement must occur no later than December 31. The option affects a range of workers from top executives to building and grounds keepers.

The special retirement program is available to workers 50 years of age and older who have at least 10 years of pension service as of January 1, 1990.

Those who accept the offer would get a one-time, lump-sum payment equal to \$1,000 times the number of years of pension service. And pension benefits would be calculated as if the employees were two years older and had completed an additional three years of pension service.

Efforts yesterday to reach Bill Martin, secretary-treasurer of Teamsters Local 481, which represents about 800 of the society's 1,500 employees were unsuccessful.

Jouett said the society has set no goal for how many people it hoped would take advantage of the program.

"How many will take advantage of it, we don't know," Jouett said. "This is just a way for use to make an offer to our longtime employees and perhaps give us the opportunity to economize and eventually do more with less here."

Jouett also offered no projections on how much the society might save.

"The exact amount of savings remains to be seen," he said. "It depends not only on how many people accept but how successfully we can restructure."

September 30, 1989, Part Ii, 1, 6. Former San Diego City Councilman Mike Gotch . . . has been chosen to be executive director of the public agency that is planning a 43-mile long regional park that will stretch from the foothills of Julian to the Pacific at Del Mar.

October, 1989, Adelante, 5. SOHO: On July 25, 1989, the 60-year old Fire Alarm Station Building in Balboa Park became City landmark 235. Prior to that, it was given a reprieve from the wrecking ball by a seven to two City Council vote, allowing the city's Park and Recreation Department to occupy the building and use it for **temporary** office space after a \$250,000 renovation. The money will be available from the Florida Canyon Outlay Fund, which set aside a sum of money when San Diego and the Navy swapped land in Florida Canyon in order that a new Naval Hospital could be built.

October 1, 1989, San Diego Union, A-3. It's time to scream --- loudly --- for quieter recreation, by Richard Louv.

Farmer-poet Wendell Berry writes of the war between the two ethics in America. "The standard of the exploiter is efficiency, the standard of the nurturer is care. The exploiter's goal is money, profit; the nurturer's goal is health --- his land's health, his own, his family's, his community's, his country's . . . The exploiter typically serves an institution or organization; the nurturer serves land, household, community, place. The exploiter thinks in terms of numbers, quantities, "hard facts"; the nurturer in terms of character, condition, quality, kind."

October 8, 1989, San Diego Union, F-41, F-42. Casting for details; craftsman restores, duplicates buildings' decorative touches, by Carol Olten (photo of restoration craftsman Don Johnson).

Don Johnson hunches his shoulders over the plaster mold of a giant goldfish mounted on a workbench outside an El Cajon apartment building.

With sculptor's tools he carefully refines the surface of the piece, sloping the curves of the fin more gently, popping out details of the eyes and mouth. Later, he will fill the mold with plaster or a similar material.

Johnson makes the goldfish for table bases, one of the bread-and-butter items of his trade. But his true loves are the rococo Beaux Arts-inspired moldings and ornaments adorning many local historic buildings, lions that roar from cornices, gargoyles that run along eaves, and half-human, half-beast creatures that loom over column capitals.

For the past several years, Johnson has been restoring and re-creating many of them.

Johnson defines himself as neither mason nor plasterer, although his work combines the skills of both. With his wife Linda, he runs a small master craftsman business out of El Cajon called the Don Johnson Ornamentation.

It's not a 9-to-5 job, and the projects are sometimes sporadic. Johnson is also a truck driver who drives an 18-wheeler when ornamentation work is slow.

So far, however, he has built up an impressive portfolio. It includes work on such downtown landmarks as the Kravassne Building, the Bijou Theater, Old City Hall, the Marston Building, and the Horton Grand Hotel.

Johnson also has been active in restoring some of the decorative details on Balboa Park's aging buildings from the 1915-16 Panama-California Exposition.

"It drives me almost crazy to walk around the park and see how so much of this fantastic ornamental work is not being taken care of properly on the old buildings," Johnson said.

"They've just kept painting it and painting it over the years instead of recasting and replacing some of the pieces as they decay. The layers of paint spoil the effect of the great detail in the work and cause the ornament to disintegrate even more because the materials can't breathe. It's awful. You try to take a piece off a building to get it recast now, and it falls apart in your hands."

October 9, 1989, San Diego Tribune, B-3. Mike Konon: 'Nature's Fury' shakes up public at Science Center

October 9, 1989, San Diego Tribune, B-6. Letter, Eugene K. Chamberlin, North Park: Placing Thoreau, Gandhi, Tolstoy and Martin Luther King together clearly discussing human issues, would represent a major approach to public art. Locating the bronze quartet in Balboa Park . . . would get their message to this community which sorely needs it.

October 10, 1989, San Diego Union, B-7. Letter, Monty Griffin, San Diego: Mayor O'Connor's heavy hand appeared again in the September 21 San Diego Park and Recreation Board decision awarding sole tenancy of the to-be-reconstructed House of Charm building in Balboa Park to the Children's Museum.

October 15, 1989, Letter, From Richard Amero, To John Van De Kamp, Attorney General, Sacramento, Calif. . . . I . . . request that you take steps to cancel the Charter of the City of San Diego until such time as the City of San Diego commits itself to compliance with (existing) statutes and/or laws.

October 16, 1989, San Diego Tribune, B-3. John Gilmore: Banker's gift marks birthday.

Banker Tom Sefton celebrates birthdays in grand fashion.

The president of San Diego Trust & Savings Bank gave the city a \$150,000 present yesterday, must a way for the bank to say thanks for supporting San Diego Trust which is celebrating its 100th anniversary this year.

The gift is a newly renovated west entry to Balboa Park on Laurel Street, that had its grand opening during a three-hour party yesterday.

October 16, 1989, San Diego Union, B-3. Linda Kozub: Plaza named for Sefton

City Councilman Bob Filner, in presenting Tom Sefton the key to the city, described San Diego Trust & Savings Bank as "our own home-grown institution."

Calling Sefton "Mr. Savings," Filner said the Sefton Plaza now opens a key park entrance, and that "the key to the city will open the rest of San Diego."

October 16, 1989, San Diego Union, Festival-10 Christopher Reynolds: Cultural groups vie for bit of House of Charm, by Christopher Reynolds.

Location, location, location.

The City Council is scheduled to decide this afternoon the next tenant of 48,000 square feet of prime Balboa Park real estate, thereby settling a rivalry among seven cultural groups, fueled in part by Mayor O'Connor's early statement of her preferences in the matter. But as recently as last Friday the rivalry raged on.

A Soviet Bargain . . . The San Diego Museum of Art is charging \$5 a head for its 27-egg Faberge show, October 22 to January 7, but you can catch the same show in the State Museum of the Moscow Kremlin (January 30 to March 15) for just one ruble. Air fare not included.

October 17, 1989, San Diego Tribune, B-1. Joseph Thesken: City gives children House of Charm; Museum to share Balboa Park site with art institute.

The Children's Museum of San Diego and Mayor O'Connor came out the winners yesterday in the contest over which institutions will occupy the new House of Charm in Balboa Park when it is built in late 1991 or early 1992.

San Diego City Council members unanimously approved a compromise plan in which the Children's Museum will be the building's primary tenant with San Diego Art Institute the secondary tenant.

The vote came after nearly three hours of public debate, often punctuated by speakers' sharp criticisms of O'Connor and her equally sharp retorts.

To accommodate the Mingei museum and another applicant, the Hall of Champions (now located in the Prado's Casa de Balboa), the Hall of Champions would move into larger quarters in a restored Federal Building, and the Mingei museum into the space to be vacated by the Hall of Champions.

October 17, 1989, San Diego Union, D-4. Christopher Reynolds: Council votes to give coveted space to Children's Museum.

Overruling the city manager in a compromise decision, the City Council yesterday selected the Children's Museum of La Jolla as the next main tenant of Balboa Park's much coveted House of Charm building.

Under an arrangement engineered by Councilman Ron Roberts and Mayor O'Connor, the new building will be shared by the Children's Museum, which will get most of it; the San Diego Art Institute, which will get 7,500 to 9,000 square feet; and, perhaps, the Old Globe Theater.

The Mingei museum counts the mayor's husband, Bob Peterson, among its past major contributors, and the museum is organizing a Soviet folk art exhibit for the mayor as part of the San Diego Arts Festival, Treasures of the Soviet Union, which begins Sunday.

The city manager's report noted that car traffic next to the House of Charm could imperil children and instead suggested the Federal Building, which lies next to a large grassy area. Children's Museum officials discounted the danger.

October 19, 1989, San Diego Union, D-8. Welton Jones: Park's Federal Building has theatrical roots.

(Balboa Park's Federal Building) was built to house a 2,700-seat theater.

October 20, 1989, San Diego Tribune, B-1, B-5. Preston Turegano: Entertainers invited to park fest on no-tips basis.

. . . this Sunday, the city will allow street entertainers to perform in the park only if they agree not to accept tips or gratuities because of Super Powers Sunday, a public celebration of the Soviet arts festival that officially begins tomorrow night with a performance of the opera "Boris Godunov."

Penny Scott emphasized that a city ordinance says public land cannot be used for private gain.

October 20, 1989, San Diego Tribune, B-10. EDITORIAL: Soviet Arts Festival --- "You will be content," San Diego.

As Mayor O'Connor noted, the festival isn't an elitist function, it is intended to achieve the far more admirable goal of making Soviet art and culture accessible.

It's rumored that Faberge was reluctant to reveal to the czar what he had in store as he fashioned the intricate imperial Easter eggs.

Faberge would merely assure him, "Your majesty will be content."

San Diego will be, too.

October 20, 1989, San Diego Tribune, C-1. Susan Freudenheim: Eggs excessive, but hard to resist

October 20, 1989, San Diego Tribune, Soviet Arts-3. Gordon Smith: City's first festival could be beginning of planned arts, tourism alliance.

In a way, though, "The San Diego Arts Festival: Treasures of the Soviet Union" has already had a profound impact on San Diego. Whether it turns out to be the city's last art festival or the first of many, it has already "forced a lot of people to think about art," said Hugh Davis, director of the La Jolla Museum of Contemporary Art. "And it has helped the city get a better picture of what its strengths and weaknesses are culturally."

Los Angeles Times, October 22, 1989, B-1, B-9, B-10. Leonard Bernstein: Soviet Arts Festival Skeptics Watch Fiscal Performance.

Nearly two years after Mayor O'Connor announced creation of a \$6.25-million cultural experiment, San Diegans today get a first glimpse of whether "San Diego Arts Festival: Treasures of the Soviet Union" is worth \$3 million in public funding.

For the next 22 days, the festival's financial success will be closely watched by opponents who were skeptical about the expenditure of \$3 million in hotel tax revenue on a project that also has drawn mixed reviews for artistic merit.

O'Connor has pledged that the festival will return \$1 million in profit to city coffers to fund recreation programs that would have been eliminated. The money has been built into the 1980-90 fiscal budget.

Los Angeles Times, October 22, 1989, B-8. Michael Granberry: Festival offers mixed bag of prices, availability; some events have been sold out for months and some may be out of pocketbook range, but there are choices.

If you want to see the Georgian State Singing and Dancing Ensemble at the Spreckels Theater, you're out of luck. It sold out weeks ago.

The same holds true for the Tbilisi State Marionette Theater at the Marie Hitchcock Puppet Theater. If you're a San Diego school kid, however, you may get in free as part of a field trip.

Tickets to some events of the 3-1/2 week Soviet Arts Festival, which officially begins today, are hard to come by. Others are on the high end of the price scale. Top price for the six-hour Soviet play "Brothers and Sisters" at the Old Globe Theater is \$125. (That does not include a dinner.).

October 22, 1989, San Diego Union, A-1. John Gaines: Arts festival to focus on Soviet masterpieces --- and U.S. dollars.

October 22, 1989, San Diego Union, C-1. Maureen O'Connor, Mayor of San Diego: Commentary --- visiting art treasures afford San Diegans an intriguing glimpse of the Soviet soul.

But as with all miracles, reading about it is not enough. You must experience it for yourself.

Enjoy the art.

Celebrate the history.

And marvel that it has happened at all.

October 23, 1989, Letter, From Peter E. Kingren, Analyst, Public Inquiry Unit, Department of Justice, Sacramento, Calif., To Richard Amero . . . The California Attorney General's office is not funded to provide private legal representation to individuals or groups who are involved in a dispute with local government agencies. Further, we have no constituted authority to overturn or attempt to influence a properly constituted local governing body.

October 23, 1989, Letter, From Kathryn Gualtieri, State Historic Preservation Officer, to Richard Amero When and if the nomination (of the Fire Alarm Building in San Diego) is scheduled for hearing by the State Historical Resources Commission, you may express your views on the eligibility of the building in writing or in person at the meeting.

October 23, 1989, San Diego Tribune, A-1. Gordon Smith: San Diego rolls out red carpet for Soviet performers; police estimate Balboa Park crowd at 60,000.

The 10,000-15,000 people who filled the Organ Pavilion and watched from surrounding lawns and roadways showed no signs of leaving. Moments later, as a group of children's folk dancers from Soviet Georgia performed acrobatic whirls and leaps on stage, the rain tailed off. By mid-afternoon the skies were virtually clear.

With Super Powers Sunday over, the festival's focus will shift to a variety of museums and theaters around the city.

October 24, 1989, San Diego Tribune, B-6. EDITORIAL: A super Super Powers Sunday.

If there was any lingering doubt that San Diegans were in the mood for a vibrant arts festival, the public's response to Super Powers Sunday in Balboa Park had to dispel it once and for all.

About 65,000 people took Mayor O'Connor up on her invitation to experience the arts and culture of the Soviet Union. They overflowed the Organ Pavilion, jostled each other --- for the most part good-naturedly --- along the Prado and lined up at the Starlight Bowl and in front of every refreshment and souvenir stand.

The master chefs from the Soviet Republic of Georgia fixed a feast at \$2 a plate, for 20,000 people. They probably could have prepared 40,000 servings of marinated beef, chicken Kiev, sturgeon, a spicy bean salad --- and still sold out.

Thousands of spectators delighted at the doll-like beauty and grace of the Soviet Georgian children who performed folk dances, whirled on their knees and rattled sabers on the stage of the Organ Pavilion. Others lined up to see the Soviet arts exhibits in the museums along the Prado.

Those who couldn't get in to see the popular Faberge egg exhibit and other museums' Soviet offerings could still view painted wooden Easter eggs from the Soviet Union's Ukrainian region at a free display in the House of Pacific Relations.

The Soviet Union was hardly the only culture represented. The Germans brought Oktoberfest to the festival, serenading the crowds with polka music and doing brisk business in freshly grilled bratwurst. Native Americans and Mexican folk dancers also entertained the spectators.

Enthusiastic festival-goers scooped up everything laid before them. In other words, the kickoff of the three-week festival, "Treasures of the Soviet Union," was a success.

The cancellation of the "Masterworks in Metal" exhibit at the B Street Pier is perhaps the major disappointment of the festival. For political reasons, Soviet Georgian officials refuse to send their icons. The Soviets reportedly will substitute an exhibit of their gold works. We hope so.

If anything, the very popularity of Sunday's event caused its problems. So many people jammed the park that one has to shudder over what might have happened had it not rained briefly at midday.

City officials wisely had arranged shuttles from auxiliary lots around the city. The system was completely overwhelmed, with traffic jams backed up on freeways and Park Boulevard; lines even formed on Pershing Drive to get into the huge temporary lot on the east side of Balboa Park.

The lesson, we think, is that future mega-events in Balboa Park are going to require more peripheral lots and shuttle services and a traffic plan to get cars parked in a quiet and orderly fashion.

The public's enthusiasm also suggests that more than one Super Powers Sunday should have been scheduled during the three-week festival.

The major will now have the pleasant task of planning events for a public that can't seem to get enough of the cultural fare she offered.

October 25, 1989, San Diego Tribune, A-1. Treasures of Soviet Union.

October 25, 1989, San Diego Union, B-7. Letter, Bill D. Slaughter, former Development Associate, San Diego County Special Olympics . . . charity event to benefit mentally retarded citizens. set for September 16 at Price Theater canceled because of lack of public participation, contrasted with an Old Globe Theater's black-tie, fund-raising event at which \$75,000 was netted.

October 29, 1989, San Diego Union, C-2. EDITORIAL: Opening ceremonies of San Diego Arts Festival '89 in Balboa Park is glittering success.

This three-week spectacle has already achieved its objective of focusing attention on San Diego as a growing center for art and culture as well as forging closer cultural links between the United States and the Soviet Union and providing educational resources for 150,000 schoolchildren.

October 31, 1989, San Diego Tribune, B-2. Joseph Thesken: Children's Museum/Art Institute to share House of Charm.

The San Diego City Council voted unanimously yesterday to have the Children's Museum of La Jolla and the San Diego Art Institute share the new \$5 million House of Charm to be built in 1992 in Balboa Park. Voting on a compromise on allocation of space in the building, the council decided that the museum will be the primary tenant. It also endorsed construction of a subbasement in the building for an Old Globe Theater rehearsal hall.

In addition, the council unanimously approved a plan whereby the Hall of Champions, now in the Casa de Balboa, in the park could move into the park's Federal Building when it is renovated in the early 1990s. If that move were made, the Mingei International Museum of World Folk Art in La Jolla would be allowed to move into the Hall of Champions' present quarters in the Casa de Balboa.

However, a snag developed in the compromise when an official of the Museum of Photographic Arts, also a tenant in the Casa de Balboa, said his board wanted the council to consider letting the photo museum expand into the Hall of Champions' present space. "We don't want to upset any compromise plan," Murray Galinson, the photo museum's board chairman, told the council. "We don't want to move into the House of Charm, but we are interested in space to be vacated by the Hall of Champions, because we are overcrowded." Galinson said his board was not aware of the Hall of Champions' offer to move into the Federal Building until two weeks ago and was not asked to participate in City Manager John Lockwood's discussion with park tenants.

Lockwood said the Hall of Champions would be given 180 days to determine whether the Federal Building could be remodeled in a manner acceptable to its board members.

Galinson asked for a similar amount of time for his board to give Lockwood its views on occupying the Hall of Champions' present site. However, Councilman Bruce Henderson said of the compromise: "We've gone through this, and I'd like to confirm our commitment to Mingei." Councilwoman Judy McCarty agreed.

However, Councilman Ed Struiksma said: "Let's open it up, so the photographic museum has a chance."

Councilman Ron Roberts agreed.

Said Mayor O'Connor: "We can work this out."

She called on Henderson, chairman of the council Park Facilities and Recreation Committee, to devise a solution.

Henderson moved that the Mingei museum receive the Hall of Champions' space if the latter relocates to the Federal Building,. He added that the council should "aggressively seek out a solution."

October 31, 1989, San Diego Union, D-4. Council yesterday set up plan for House of Charm, by Christopher Reynolds.

The results left the Children's Museum officials satisfied, Hall of Champion officials pondering a move from their current home into the park's larger Federal Building, and the city staff looking for a place to offer the Museum of Photographic Arts when park space next becomes available.

Museum of Photographic Arts officials unsuccessfully asserted that park buildings other than the House of Charm shouldn't be leased out without a separate public Request for Proposals. On a 5-4 vote (with council members Abbe Wolfsheimer, Ron Roberts, Wes Pratt and Ed Struiksma dissenting), the council discounted that argument and earmarked the Casa de Balboa for the Mingei museum.

November 13, 1989, San Diego Union, B-1, B-8. Reaching across countries and religions; prayers for peace conclude Arts Festival.

As the sun set over San Diego --- and on San Diego's ambitious and sometimes controversial Soviet arts festival --- religious leaders and others gathered yesterday in Balboa Park's Organ Pavilion for the final event of the city's extravaganza: a multi-faith prayer vigil for peace.

The service culminated with an Orthodox vespers service, led by Archpriest Zurab Siradze, a representative of the Russian Orthodox Church.

November 13, 1989. San Diego Union, B-1. Pro-choice rally held in Balboa Park.

November 13, 1989, San Diego Union, B-6. EDITORIAL: Pigeon control.

Within 14 months, the park pigeons numbered only about 1,500, two years into the program, when the feeding was stopped, the population dropped to 850, where it has remained. This is a perfect number of pigeons for a park, city officials believe. Enough birds to feed and tickle a child's fancy without the mess that pigeon proliferation can mean.

November 14, 1989, San Diego Union, C-5. Council gives raves to festival.

The City Council yesterday heard its first report on the finances of the first San Diego Arts Festival and promptly issued rave reviews.

"I felt good about the idea, and I'm delighted to see the way it's turned out," said Councilman Ron Roberts. "It was an important cultural investment and I don't think there's any point in stopping there."

During the council session, other satisfied comments came from Mayor O'Connor --- who has put the festival atop her agenda since unveiling the idea in January 1988 --- and Councilwoman Judy McCarty. The councilwoman, who was a reluctant supporter when the council set aside \$3 million for the festival last September, yesterday said the major "showed leadership" with her handling of the project.

In a brief summary, festival executive director Bruce Herring offered the following figures. Gross ticket revenues have reached \$2.5 million. With several events still running, about 218,000 tickets have been sold, one-fourth of them to customers from outside San Diego County. Attendance at paid and free events combined is expected to reach the organizer's goal of 500,000.

Last September, the council contributed \$2.97 million in hotel tax revenues to the \$6 million festival, which began October 21 and officially closed last weekend. (Many festival exhibits will be displayed for up to another seven weeks.) At the urging of Councilman Bruce Henderson, the council eventually gave another \$25,000 to an alternative "freedom festival" dedicated to cultures under Soviet domination worldwide.

November 15, 1989. San Diego Tribune, B-8. EDITORIAL: The festival ends, new arts era begins.

What few mistakes were made should be viewed as a valuable learning experience for a city carving a niche for itself on the international cultural scene.

November 16, 1989, San Diego Tribune, B-2. The city of San Diego has affirmed its decision not to extend Clairemont Mesa Boulevard through Mission Trails Regional Park. . . . A campaign by the city of San Diego and a host of social service agencies to discourage street dwellers is a creative step in the right direction. Citizens who really want to help street people should join in the "Real Change" drive by declining to give panhandlers spare change.

November 26, 1989. San Diego Union, C-2. EDITORIAL: Parks, yes; bonds, no.

It is no surprise that a recent opinion survey shows that a plan to raise property taxes to finance regional parks and preserves in San Diego County stands scant chance of passage. This is the case even though a solid majority supports the proposal and is willing to pay higher taxes to implement it.

The only solution is passage of a constitutional amendment allowing the will of the majority to prevail --- even on the question of higher taxes.

November 30, 1989, San Diego Tribune, B-9. Mayor O'Connor urges funds for children's projects be set aside from more than \$1 million in revenue generated by the city-sponsored Soviet arts festival.

December, 1989, Citizens Coordinate for Century 3 Newsletter: Balboa Park, by Chairman Monty Griffin.

Culminating an arduous ten-year struggle, the City Council in July adopted a new Balboa Park Master Plan. This ambitious, four-phase, 20-year, \$105 million plan proposes major reconstruction or renovation of aging Central Mesa buildings; substantial changes in auto access, circulation and parking; recovery of four large non-conforming areas --- the old Navy Hospital, the Arizona landfill; the Central Operations Station and the City Parks Maintenance Yard --- as parkland; a reclaimed water irrigation system, implementation of the 1976 Florida Canyon Master Plan; and improved

lighting and public safety measures. Increased transient occupancy taxes (TOT) are to fund the Plan programs.

However, many more old issues and new challenges arose in 1989. Solicitation of tenants for the House of Charm following its reconstruction; retention and refurbishment of the Fire Alarm Building; preparation of a Palisades/Prado Precise Plan; groundbreaking for the Japanese Garden in Gold Gulch; fencing of the Zoo perimeter and landscaping of its parking lot; demolition of Navy Hospital buildings; rejuvenation and rededication of the west entrance to the Prado as Sefton Plaza; recovery of the Arizona landfill; preliminary planning for the Organ Pavilion garage; the Prado arches project; and CALTRANS Highway 163 guardrails were just some of the Park-related activities, projects and issues with which C-3 was concerned.

The largest C-3 sponsored project was an Eastside Balboa Park Precise Plan position paper, prepared by a multi-organization task force committee including C-3 members, which provides major guidelines, recommendations and priorities for vital improvements to the Eastside of Balboa Park.

March, 1990. Citizens Coordinate for Century 3. Private donations and public good, how great a conflict?, by Monty Griffin and Richard W. Amero: Balboa Park is San Diego’s Community District No. 1 and the recently adopted Balboa Park Master Plan is its equivalent of a Community Plan. Yet scarcely had this Plan

been adopted but the first attempts were being made to thwart its provisions by failing to follow the proper amendment or review process. Notable among such attempts are a series of projects --- proposed or completed --- to “improve” some section or another of the Park thought by their proponent to be in need of improvement, rehabilitation, beautification, etc.

The rehabilitation of the Sixth Avenue entrance on Laurel Street, renamed Sefton Plaza last year, established that \$150,000 is the current price for affixing a donor’s name to Balboa Park real estate. The Committee of 100, well-known for its fund-raising to preserve and restore the Spanish-Colonial architecture of Balboa Park, currently seeks to construct new arcades lining the north side of El Prado. Most recently, a private party has sought to erect a statue of Vasco Nunez de Balboa near the entrance to Spanish Village, subject to renaming Village Place and an accompanying plaza with the donor’s family name. Not surprisingly, the value of the proposed gift is \$150,000.

Three important issues arise in these contexts. The first is whether it is either legal or ethical to subvert community plans and the legitimate planning and review processes by ignoring or circumventing them. The second is whether it is desirable or appropriate to effectively sell name-rights within Balboa Park to private donors. The third is whether a specific project, offered as a gift, should be accepted regardless of its quality, functionality, need or appropriateness.

In time of fiscal stress and under threats of major reductions in park improvements, repair and service, the City seems unable to resist the blandishment of gifts, regardless of quality, desirability or motives of donors. Those empowered to consider and approve such gifts should not only meticulously follow the Master Plan (and the Precise Plans to follow) and the proper planning and review process, but also examine carefully the merits of the gift.

With regard to the Village Place project, architect Bertram Goodhue wanted a statue of Balboa in Plaza de Balboa, approximately where the present fountain is located. The statue, like the fountain, would have provided a focus for the east terminus of El Prado. Goodhue knew personally Daniel Chester French, Frederick MacMonnies, Furio Piccirilli, and Lee Lawrie, the outstanding sculptors of his time. If a statue is put up in Balboa Park today, it should meet or surpass the standards of these sculptors and of Anna Hyatt Huntington, whose “El Cid Campeador” graces the Plaza de Panama.

The City’s current fiscal difficulties are no justification for succumbing to mediocrity which will be long regretted. Architectural and artistic excellence must be maintained to preserve and enhance the aesthetic integrity of the cultural core and to protect the Park from exploitation. Offers of gifts, whose rice tags are the perpetuation of the names of donors, should be refused. Despite the promise of TOT moneys to fund Balboa Park improvements, many very worthy projects will lie dormant for years to come. Those who wish to endow Balboa Park should be presented with a prioritized list of urgent park needs, and the City’s Endowment Officer, in cooperation with the Park and Recreation Department, should endeavor to seek solutions fulfilling these needs.

March 16, 1990, Los Angeles Times, San Diego County Edition, Metro Section, B-10. Opening set for park’s Japanese Garden; an idea that took root 20 years ago will blossom this summer when the first phase of a \$11.4 million Japanese Friendship Garden is completed in Balboa Park, by Franki V Ransom (illus.)

The first phase of the long-awaited Japanese Friendship Garden in Balboa Park will open this summer, the garden’s landscape architect said Thursday.

The 11.5 acre project, which has been contemplated for more than 20 years, is being built in five phases and will cost \$11.4 million. The group sponsoring the garden, the Japanese Friendship Garden Society, Inc. of San Diego, has raised \$1 million so far to help complete the initial phase.

Speaking at an outdoor ceremony on a spring-like day in the park, landscape architect Ken Nakajima told the gathering the first phase will be completed by July or August. Work began in January at the site on the rim of Gold Gulch Canyon.

Nakajima, who built a similar garden retreat in Moscow, was in town to consult with the joint construction team of Shimizu American Corp. and Nielsen Construction. Founded in 1804, Shimizu is the oldest and largest construction firm in Japan.

The entire garden should be completed in 10 years, said Larry L. Marshall, president of Japanese Friendship Garden Society, Inc. of San Diego. Work will occur as funding becomes available.

Marshall said that "when we negotiated the 50-year lease with the city in 1984, we knew that it was unlikely (we could) . . . raise all the money to build the garden at one time. That's way we designed the garden in phases.

"The city has pledged to donate \$2 million and plans to turn over \$500,000 in June, Marshall said.

Included in the first phase are an exhibit room, a gift shop, a snack bar and an administration office. There will also be a sand and stone garden and a picnic area.

"We have a master plan, and the garden will continue to get better," he said. "The zoo has been around for more than 50 years, and it is still adding attractions. We will be second only to the zoo in attraction."

The master plan for the garden was approved by the City Council in 1979. The garden has been named *San-Kei-En*, which means a garden with three types of scenery. When finished, it will feature a pond surrounded by paths, pastoral and mountain retreat settings, a tea house, cultural center, arbor and exhibit building.

For all the anticipation, this is not the first time a Japanese garden has been built in Balboa Park. A tea garden, complete with a pavilion and a small tea plantation, was built for the 1915 Panama-California Exposition. This is the 75th anniversary of the exposition. The garden was dismantled in the 1950s to make way for the Children's Zoo.

In the early 1906s the San Diego-Yokohama Sister City Society began to make plans to replace the one torn down.

Gold Gulch Canyon was selected as the new site in 1968, and the Charles C. Dail Memorial Japanese Gate was erected just north of the Organ Pavilion. And until January that was the last construction on the project.

In 1980, the garden committee of the Sister City Society transferred control of the project to the new Japanese Friendship Garden board, which eventually began raising funds for the garden.

At Thursday's ceremony, the San Diego chapter of Ikebana International, a nonprofit floral organization, donated \$10,000 and the Kearny Mesa Rotary Club gave a \$5,000 donation collected from five Rotary clubs in Japan.

November 10, 1990, San Diego Tribune, B-3. EDITORIAL: Park Bonds

Proposition E, the city of San Diego's proposed \$100 million park and open space bond issue, seems to have been defeated, although conceivably the missing absentee ballots yet to be counted could reverse the apparent result.

If the defeat stands, the City Council should resubmit a trimmed-down bond issue that would provide only for two specific land acquisition projects --- along the San Dieguito River valley trail to Julian and in the Tijuana River Valley. These two should be jewels in the city's environmental crown, along with Balboa Park and Mission Bay. The measure that seems to have been narrowly rejected was jam-packed with spending items of lesser importance. That obscured the essentials and undermined public support.

December 14, 1990, San Diego Tribune, B-10. EDITORIAL: A new jewel in Balboa Park

Landscape gardening is one of those arts on which the Japanese have placed the unmistakable stamp of their ancient culture. A thousand years ago, they had already built many well-designed gardens with artificial hills and ornamental ponds. The characteristic art was to make even the most elaborate scenic composition of rocks, water and plants seem utterly simple and natural. How splendid a success they achieved can be seen in the large gardens that have become public parks in modern Japan.

A thousand years ago, the place now called San Diego was a waterless and almost treeless desert of scrub lands around the bay. Its inhabitants were naked hunter-gatherers, still in the Stone Age. But a great city has risen in the last two centuries from the adobe ruins of a Spanish mission. It has become a center of commerce and high technology. And its half-developed Balboa Park, built in this century on mesas of raw chaparral in the city center, already has become world-famous, attracting visitors from all continents.

Today, the most ambitious project in that park, is to build a classical Japanese public garden. It will be a spectacular tourist attraction, in the heart of a constellation of other attractions, like the museums and the zoo. And it will be a people, sadly interrupted by a war, but greatly strengthened by postwar developments.

How much better we understand each other than we did in 1915, when the original Japanese tea house was built in Balboa Park. Americans were naïve and patronizing in their appreciation of it, as the park historian Richard Amero remarks in his article on the opposite page. And it was neglected during the war and torn down afterward, a tragic loss, symbolizing anger and estrangement.

The new Japanese Friendship Garden will be far finer. It will incorporate elements of the Japanese culture we most admire, when we come to understand it better.

Two of these elements are artisanship and worship of nature --- the elements that are combined in a Japanese garden. A candle flickers behind rice paper in an ancient stone lantern. The flame is

reflected in the moving surface of water. Cherry blossoms fall like snow. A full moon rises over the trees. The heart is full of wisdom it did not invent and can never fully grasp.

Prose is inadequate to describe this beauty, this mystery, the final effect of centuries of craftsmanship and refinement.

But building a garden must be prosaic. The Japanese Friendship Garden has been planned for 30 years. Construction is now getting started. The first phase was completed this summer and *Sankei-en* (Three Scenery Garden), named after one in our sister city, Yokohama, is now open for viewing.

It is a handsome beginning, but just a beginning. The project is ambitious. The next phase will cost about \$3 million and will be most prosaic --- building the infrastructure in a canyon floor, cleaning, grubbing and grading for the artistry to come --- the teahouse, the mountain house, the water feature. It may well be the year 2000 before the planned work is complete and Balboa Park has the finest Japanese garden on this side of the Pacific. If momentum is lost, the project could be delayed for decades.

But, with support from the city, from private donors and notably from Japanese companies with nearby plants and offices, the work can move forward in an orderly way as planned. It is essential that the city keep its commitment to provide \$2 million already earmarked from a bond issue based on hotel room tax revenues. This will finance the prosaic infrastructure, unglamorous perhaps, but absolutely required to provide a foundation for future private giving to complete this magnificent work of public art. When it is done, no San Diegans will stroll through this friendship garden and not feel proud.

December 22, 1990, Los Angeles Times, San Diego County Edition, Metro Section. Balboa Park shelter remains closed despite rain and cold, by Monica Rodriguez . . . city on going to open shelter in Municipal Gymnasium because temperature had not dropped low enough.

December 24, 1990, San Diego Tribune, B-6. Letter, Larry L. Marshall: "As president of the Japanese Friendship Garden I want to express our appreciation for the insightful and supportive editorial, "A new jewel in Balboa Park" (12-14-90). It poetically captured the spirit of the garden while Richard Amero in his companion article has placed this ambitious project in historical perspective."

December 27, 1990, Los Angeles Times (M), A, 21:1. In a letter to the San Diego Zoo, investigators at the Humane Society of the U.S. contended, on December 26, 1990, that the zoo's elephant exhibit is inadequate and "extremely dangerous" for both the huge mammals and their keepers in the wake of an accident after which Maya, a 51-year old Asian elephant, which fell into a moat, was destroyed humanely.

December 28, 1990, San Diego Tribune, B-8. Letter, Lee Fleming Reese, Allied Gardens: "Not only were Japanese interned, so were Germans and Italians, and it was not racism."

Date unknown. Citizens Coordinate for Century 3: Balboa Park --- Diamond Jubilee and Beyond.

1991

Summary of Events in 1991

(Note: Dates of events are only approximate.)

Anti-war rallies in Balboa Park (January 28, 1991)

Gorilla Tropics unveiled at San Diego Zoo (March 20, 1991)

Free tram service in Balboa Park (April 12, 1991)

Chapel at former Naval Hospital becomes Veterans Memorial Center
(November 11, 1991)

January 3, 1991 (San Diego Tribune, E-3) . . . Buckle up for Fleet 'trip' to planets; "To Worlds Beyond" debuts Saturday at Reuben H. Fleet

January 3, 1991 (San Diego Union) B-9 . . . Letter, Joe Slobodny, Lt. U.S.N. (Retired) - wants 'parking trap' in front of old Naval Hospital eliminated

January 4, 1991 (San Diego Tribune, B-1) . . . Sharon Shroder: Zoo's birthday bash will be 'wild' affair

January 5, 1991 (San Diego Tribune, B-3) . . . Diamond Jubilee for San Diego Zoo

January 6, 1991 (San Diego Union) E-2 . . . Welton Jones: O'Brien has grown up with Globe

January 6, 1991 (San Diego Union) D-5 . . . Janet Sutter: 1991's early fund-raisers will aid art, history museum & opera

March-April, 1991, California Garden, Vol. 82, No. 2.

“San-Kei-En,” by Ernest Chew, 37-38.

There is a new attraction in Balboa Park. It is called San-Kei-En and is nestled on the east side of the Organ Pavilion. It is the completed first phase of the Japanese Friendship Garden and is open to the public free of charge on Tuesday, Friday, Saturday and Sunday.

It is amazing how easy it is to write those few sentences to cover public availability of something that has taken years of time, labor and travail and a little less than a million dollars to accomplish.

There are many who have walked past that Japanese Gate since its erection in 1968 that ceased seeing it and the proclamation next to it that there was to be a garden developed there, became an idle promise. No more! The dream has begun to form out of the hearts of the believers and although only a part of that vision has materialized, the rest of the dream is already forming in the mist.

It has not been an easy birth. At the time the gate was erected on the site chosen by the city, the garden was a concept and project of the San Diego Sister Society whose counterpart in Japan is Yokohama. It was a project that was much too massive for the Sister City organization to handle. In late 1980, a Japanese Friendship Garden Board was formed and the Sister City Society transferred the concept and responsibility for development of the garden to the Board.

Little had been done in the twelve years since the gate had been raised. It was actually a job from “scratch” that had been taken over by the new board. Since no fund raising had been done, money was not available to do anything. There weren’t any drawings on what the garden was to be. A series of three annual garden festivals in Balboa Park, and some private donations, brought in enough money that in 1984 the search for a landscape architect could be made and serious leasing of the proposed site could be undertaken.

Now the work began. In reality, although the garden had long been a dream, the work that has brought it to this point has all been done in the past six years. With the selection of the landscape architect, Mr. Ken Nakajima of Tokyo, and our local architect, Mr. Hiroo Kurano, who would do the project drawings, the garden started to solidify. With the signing of the lease was the first breakthrough in funding through a pledge from Kyocera International of \$500,000 and a personal pledge of \$100,000 from Dr. Kazuo Inamori. In 1986 the master plan was approved by the city and adopted. On August 29, 1990, with the financial help of many, many friends, Phase One opened to the public.

What kind of a garden did this Japanese Friendship Garden Board decide to build? The decision was not entirely theirs. Under advisement by Professor (retired) Mitsuo Yokoyama, their Japanese landscape advisor, and the advice of Ken Nakajima, the landscape architect, the design of the garden best suited to the area and terrain on the lease in Balboa Park would be called by the Japanese a Kaiyushiki Garden. It is of the circuitous strolling style and is a great favorite with the Japanese today. It symbolizes the world in miniature.

San Diego’s garden will feature a central pond surrounded with strolling paths, a pastoral scene and a mountain retreat. Primary consideration will be given to the promotion and

understanding of Japanese culture through the active use of cultural facilities: a tea house and garden, a cultural center, an arbor and an exhibit building. To broaden the aesthetic and educational impact of the garden, a study center will be developed.

In Japan it is often customary for the landscape architect who designs the garden to give it a name. The decision was turned over to Professor Yokoyama, the garden's advisor. The professor, in agreement with Ken Nakajima, the architect, named the garden "San-Kei-En" (Three Scenery Garden). Though pronounced exactly the same as that of a famous Japanese garden in San Diego's sister city of Yokohama, the Yokohama garden name is translated as "Three-Ravine-Garden." In the San Diego name the characters refer to three features: pond, pastoral and mountainous.

A major decision for the board was to decide how to proceed with the garden. Should all of the money be found and the garden done all at once, or should it be done in phases. The phasing procedure was accepted because it was felt that if the garden was started and people could see some accomplishment they would be more open to donating the funds needed to finish it.

Phase One is now complete and is known as the Exhibit Building. It is a small area of less than an acre and features a Sand and Stone (Sansui) garden and a building of Japanese design which presently displays the model of the complete garden and drawings pertinent to the garden development. It was originally planned that the Charles Dail Gate be used as the entrance to this area, but because of its fragility, it was decided to build a second gate for daily use. When the entire garden is completed, the main gate will be at the bottom of the canyon. The theory is that entering the garden should be an uplifting experience which would be defeated if one walks down into it.

What's next? First and foremost, the present momentum has to be maintained. At 1998 prices the cost estimate for construction alone of the rest of the garden is over eleven million dollars. A funding drive to raise the money is of primary importance.

Construction for the next phase entails placement of all utilities needed: electrical, sewer, water and the raising of the canyon floor about seventeen feet. At present the canyon is too steep and the bottom too narrow to house the garden and lake. By raising the canyon floor a much wider base will be available. All this needs to be done before any garden construction can begin.

The water feature will be the major focal point in the lower canyon. It will be reminiscent of a quiet inlet of the sea. There will be a sand beach and a boat landing with a stone lantern at the water's edge. Also planned is a pine island connected to the beach by wooden bridge.

The canyon branch to the east will house the pastoral scene of the garden and will be a gradually sloping area of rural Japanese appearance. This will be the sunniest area and will house a good bit of color from flowering trees and shrubs to perennials and annuals.

To the west the canyon branches upward at a fairly steep grade and will house the fast-moving mountain stream with its cascading water, a koi pond and plantings of trees with the feeling of a mountain range.

Still wrapped in the mist of the dream, these developments are just as possible as the part that has materialized. It will take the cooperation and help of a lot of people, both private and commercial to make it all happen. Tremendous interest has already been shown by the public. In December there were over 8,000 visitors in the sixteen days that the exhibit house was open. Many of them have become members through the new membership program that has been started for those who wish to show their support of what is being done. A forthcoming

newsletter will be sent to members to keep them informed and help them to better understand the features of the garden.

Tranquillity isn't free anymore at Balboa Park's Japanese Friendship Garden, but it might be easier to come by.

Directors started charging a \$2 adult admission fee last Saturday in hopes of reducing a flood of visitors who damaged the grounds of the 9-month-old garden and threatened its peaceful atmosphere.

About 700 people a day walk through the ¾-acre-plot, said co-director Grace Brophy. "It's destroying the integrity of the garden."

Free admission and proximity to the park's popular Organ Pavilion encouraged casual visitors, some of whom mistreat the area, she said.

Jostling, noisy crowds have disturbed the garden's tranquil atmosphere, Brophy said, and many visitors trample the plants, walk on fragile decorations, and destroy the carefully raked patterns in the stone garden.

The fee should discourage uncaring visitors while providing funds to develop and repair the grounds, she said. The \$925,000 garden is staffed mostly by volunteers and funded almost entirely by donations.

"We didn't want to do this," Brophy said. "We kept putting it off."

She said the volunteer docents have tried to encourage serious visitors by sponsoring frequent lectures, demonstrations and daily tours since the garden, gift shop and Japanese teahouse opened last August.

December 1, 1991, San Diego Union, F-1, F-6. \$5.3 million plan drawn for Hall of Champions, by Caty Van Housen.

The San Diego Hall of Champions Sports Museum in Balboa Park is filled with the stuff of legends --- mystical memorabilia that testify to the speed, strength and endurance of great athletes who either grew up or played professional sports in San Diego.

There's a bat that native San Diegan Ted Williams used more than 50 years ago when he played with the Pacific Coast League's San Diego Padres at Lane Field. Williams went on to bat .406 for Boston and win the American League batting title in 1941. No Major League player has hit over .400 since.

Then there's the wooden tennis racquet swung by San Diegan Maureen Connolly to win the women's championship at Wimbledon in 1953. That year Connolly became the first woman to win the Grand Slam --- Wimbledon and the French, Australian and U.S. opens.

And there's the jersey worn by San Diegan Bill Miller, when he pole-vaulted to a gold medal in the 1932 Olympic Games, setting then world and Olympic records of 14 feet, 1-7/8 inches.

There are so many San Diego athletes to remember --- and so much memorabilia --- that the sports museum is running out of room.

Plans are in the works for a \$5.3 million expansion and a move in 1994 from a building along Balboa Park's El Prado to the 56-year old Federal Building at the south end of the park near the Aerospace Museum.

The park project will be funded by grants of \$3 million from the Stephen and Mary Birch Foundation and \$2.3 million from the city of San Diego's Balboa Park Restoration Fund. It is scheduled to be completed by 1994.

Renovation of the Federal Building, the current headquarters of the U.S. Olympic volleyball team, will begin when the team moves in 1993 to its new gymnasium at the Arco U.S. Olympic Training Center in Otay Mesa.

Local architect, Walt Conwell has finished schematic designs and has begun the approval process with the state's Historical Landmarks Department, the city's Planning Department and the Central Balboa Park Association, the park's master planners.

The 19,000-square-foot museum houses 25 exhibits. In its new location, the museum will have triple the exhibit space and add new attractions the museum board hopes will entice more visitors. The museum draws about 100,000 people a year. The goal is to bring in as many as 400,000 visitors a year after the move.

To accommodate the new museum the Federal Building will be expanded from its current 30,000 square feet to more than 58,000 square feet. The space will be added by excavating a basement and adding a mezzanine, architect Conwell said.

The main floor and the mezzanine will hold:

- A 100-seat theater where visitors can watch highlights of historic sports events.
- A sports research center providing computer access to San Diego sports statistics and records from the past 50 years in addition to video archives.
- A larger gift shop selling sports-related clothing, art collectibles and other items.
- A 160-seat public meeting room.

In the middle of the main floor will be the Breitbard Hall of Fame, an exhibit that recognizes lifetime achievements of local athletes.

The more popular mainstream sports exhibits --- baseball, football and basketball --- will be upstairs on the mezzanine level, Conwell said.

The basement level will contain a series of interactive exhibits dubbed "Say Yes to Sports Challenge," games and demonstrations using audio, video, electronic and computer technology.

Visitors will be able to play electronically simulated games or learn how to throw a fast pitch or a perfect spiral.

"This will bolster interaction with the museum itself," said Barry Humphrey, the museum's executive director. "Right now, the exhibits are static --- once you've seen them there's no real need to come back. The sports challenges will keep people coming back, trying to break their own records."

A glass elevator will connect all three levels, Conwell said.

A general contractor has not yet been chosen for the project, which will involve removing the gymnasium floor, excavating a new underground level and restoring the building's exterior.

"This building is a jewel," Conwell said. "We have to respect that while at the same time get the most space out of it."

The building's Roman-style frieze, a horizontal band running just below the cornice and carved with ornate classical figures, will be replicated and replaced. Casts will be made of a plaster-like material and artificially "weathered."

The huge elm trees surrounding the Federal Building will not be disturbed.

During construction a portion of one side wall will be removed so excavating tractors and trucks removing dirt can move inside the building.

Balboa Park's Japanese Friendship Garden will be undergoing major renovations at the same time, so excavated dirt will be hauled to that site. Keeping the dirt within Balboa Park will save \$30,000 in disposal fees, Conwell said.

Once the hole is 28 feet deep, the concrete walls and floor will be poured. Then long-span steel trusses will be placed over the hole to support the main floor. No columns will be used for support. Steel studs and corrugated decking will create a sturdy-enough floor to support 150 pounds per square foot of loading, three times stronger than a normal office building floor.

"The stiff floor is important to protect the exhibits from possible shaking when you have 50 kids running around," Conwell said.

Humidity and temperature in the museum will be strictly controlled to protect the exhibits. The computer that will handle the electronic sports archives also will monitor lighting and temperature, Conwell said.

Security is a big concern for the museum, Humphrey said. Video monitors, door alarms and body-heat sensors will be placed throughout the museum.

"We want our cases to display as much as possible, but also be secure," Humphrey said. "You can't put a price on a Ted Williams bat."

The Hall of Champions came from humble beginnings: founder Bob Breitbard's garage.

Breitbard, a native San Diegan who graduated from Hoover High School with Williams in 1937, was a baseball and football coach at his alma mater.

"I've been a sports fan all my life," Breitbard said. "I noticed when I was coaching that a lot of awards were given to athletes in Los Angeles, but not many in San Diego."

So Breitbard began giving his own awards to local high-school athletes and collecting mementos of sports heroes with local connections, beginning with the Williams bat.

"When you see people you gave awards to as high-school kids back in 1950 and '60, and now they're attorneys, judges, coaches, all walks of life, and they say they're proud of the award, it makes you feel good," Breitbard said.

When Breitbard's collection outgrew his garage, he sought a more permanent location. The Hall of Champions opened in 1961 in a 4,000-square-foot space in the House of Charm. The museum was moved to more spacious quarters in the Casa de Balboa in 1983. Ted Williams officiated at the ribbon-cutting ceremony.

Since the museum's opening, Humphrey said more than 3.5 million people have visited.

(Van Housen, a San Diego free-lance writer, was an all-city center for her high school basketball team.)

AT A GLANCE

What: San Diego Hall of Champions Sports Museum. Relocation of museum to revamped Federal Building, south Balboa Park.

Where: At Presidents Way and Pan-American Plaza, near the Aerospace Museum.

Architect: Conwell, Marshall & Associates of San Diego.

Cost: \$5.3 million.

Financing: \$3 million grant from the Stephen & Mary Birch Foundation; \$2.3 million from the City of San Diego's Balboa Park Restoration Fund.

Status: Schematic design complete; approvals required from Central Balboa Park Association, California Historical Landmarks Department and City of San Diego Planning Department. If approved, project scheduled for completion in 1994.

December 1, 1991 (San Diego Union, F-1, F-4, F-5) . . . Roger Showley: Sprucing up Balboa Park; Future keeps eye on past.

Visitors to Christmas on the Prado in Balboa Park next weekend should take a long look at the buildings, grounds, museums and traffic patterns.

Change is in the works.

The most visible sign of the future is the gleaming steel frame of a new arcade going up on the north side of El Prado, next to the Timken Museum of Art. On the southeast corner of the park, the restoration of the old Naval Hospital headquarters at Inspiration Point is nearly complete. The newly rehabilitated Fire Alarm Building at the southwest corner opened up as new park offices several weeks ago.

These three projects are the first efforts of a 20-year park master plan, approved by the City Council in 1989 to buff and polish San Diego's aging crown jewel.

The \$144.1 million plan --- which includes more than 80 projects in addition to improvements for Mission Bay --- calls for rebuilding or expanding many existing buildings, increasing parking, decreasing auto traffic and landscaping undeveloped parts of the 123-year-old park.

In addition, isolated areas of the park will be better connected --- from the San Diego Zoo to El Prado, from the Prado to the Palisades and from the west side to the east side. There also will be a link from the park to San Diego Bay.

"It's going to be a great future for the park," said park district manager Penny Scott. "The whole plan is looking to preserve the park and making it more accessible and having improved maintenance so it'll be here for a long time to come."

Most of the park's existing improvements were brought about by the world expositions held here in 1915-16 and 1935-36. But while some of the original parkland has been converted into schools, freeways and the Naval Hospital, vast acreage of the park's eastern boundary overlooking Florida Canyon has remained undeveloped.

City planners and citizens groups have brought forth numerous master plans for the park since 1,400 acres of city-owned land was set aside in 1868 as "City Park."

But all of these plans have gone unfulfilled for lack of money. After years of neglect, virtually every building, garden, utility line and parking lot in the park needs upgrading.

Park officials hold out hope, however, for the latest master plan. For the first time, the council coupled the master plan with a financing scheme to cover most costs. One cent was added to the transient occupancy tax charged to hotel guests. This annual income of \$5 million --- and growing --- will cover annual appropriations as well as debt payments for revenue bonds to cover the major building projects.

While the rebuilding fund finally will bring much-needed cash to the park, David Twomey, assistant director of the Park and Recreation Department, said it still is not enough. He and other park staff will have to battle for operating funds every year to keep the park from drifting into further decay.

“By and large, I think we are doing a very good job,” he said philosophically. “To do a perfect job is probably not in the cards,”

The most prominent --- and costly of the three current park projects is the restoration of Building I of the old Naval Hospital complex at Inspiration Point. Built in 1922, the four-story structure returned to city hands three years ago when the Navy completed its new hospital in nearby Florida Canyon.

The city has spent \$2.4 million to turn the cramped, dark hospital space into bright, visitor-friendly quarters for Park and Recreation Department staff. Nearby buildings were demolished and the building’s historic garden on the east side is to be restored. The rooftop now has a meeting room and, with permission, visitors can wander along the parapet and take in the view to Mexico, Point Loma, and the rest of the park and downtown.

The project did not include upgrading the building’s structure safety in case of a severe earthquake. Consulting engineers had warned that the building would not withstand a major tremor, but city officials said they did not recommend it be upgraded because building codes do not require it.

“It would have been nice if we had a million dollars to do it in one shot,” Twomey said. “But the question remains that if we had the million dollars, is that the right building to put it in?”

Elsewhere at Inspiration Point, local veterans groups have taken over the old Navy chapel building and are planning a fund-raising campaign to turn it into a memorial and museum. The former hospital library building has been promised to the San Diego Opera, which will move in once the Old Globe Theater vacates the space and moves back into its administrative offices, now being renovated.

The parking lot serving all three old hospital buildings and curbside parking along Park Boulevard are still being used by hospital staff and patients. But Twomey said these spaces will be freed up for park visitors exclusively once the new hospital’s 600-space parking garage is completed early next year.

Since April, the park has operated a free daytime tram shuttle service between the Inspiration Point parking lot and the Prado. The service represents the first step in the overall master plan to locate parking on the park’s periphery and encourage pedestrian uses around the museums and the San Diego Zoo.

A few blocks away from Building 1, at the southwest corner of the park, is the newly renovated Fire Alarm Building, which at one time was the hub for all of San Diego’s fire alarms. Built in 1927 and closed since 1970, the building has been turned into another park department office at a cost of \$483,000.

When officials announced plans to demolish the building, preservationists Alex Bevil launched a campaign to designate the structure as historic and the park department decided to keep it.

Twomey, whose office is in the building, said a wrought-iron fence eventually will replace the chain link fence and new landscaping will spruce up the exterior. Historic pictures relating to the building’s importance in early fire fighting days also will be hung on the walls, he said.

The arcade under construction opposite the House of Hospitality is nearly complete, although not without controversy.

The original arcade, part of the Home Economy Building, was demolished along with the building 30 years ago to make way for the Timken Museum of Art, which opened as the Timken Art Gallery in 1965. The new arcade, which will be formally dedicated in spring, sweeps along the Prado next to the museum, essentially masking the modern building from view.

The Committee of 100 raised the \$463,000 necessary to restore the arcade, which was planned under protest from the Timken. Founded in 1967, the private philanthropic group promotes the preservation of the Spanish-Revival architectural theme of the 1915-16 exposition. Over the years it has raised money to restore a number of the park buildings.

The Timken failed to get a court order to block the project on procedural grounds. Citizens Coordinate for Century 2, a local environmental group active in Balboa Park issues, also opposed the arcade as an unneeded infringement on open space. But Monty Griffin, the organization's park committee chairman, said he is willing to see if the arcade "won't turn out altogether bad."

The Committee of 100 hopes to rebuild a second arcade east of the Museum of Man, but Twomey said that project will be delayed several years pending public acceptance of the first. One.

With these projects virtually completed, 80 more park projects are awaited, according to a list from city engineers.

The following projects are slated to be finished next year:

- The long-delayed completion of the Rose Garden, east of Park Boulevard, \$131,250.
- Landscaping of the neglected northeastern corner of the park at 28th and Upas streets, \$535,125.
- An inventory of the park's electrical lines to prepare a comprehensive program to add more park lighting; \$410,000 for planning phase with actual construction costs to be determined later.
- Upgrading of heating, ventilation, air conditioning and fire-suppression systems at the Museum of Man, San Diego Museum, San Diego Museum of Art, Natural History Museum and Casa de Balboa, home of the San Diego Historical Society, Museum of Photographic Arts, Hall of Champions and Model Railway Museum, \$4.5 million.
- Structural improvements for the Botanical Building, \$304,000.
- Remodeling inside the Reuben H. Fleet Space Theater, \$1.1 million.

The most expensive projects on the long-term restoration list are the demolition and reconstruction of the House of Charm and House of Hospitality, the last of the original exposition buildings on El Prado.

The House of Charm, at the southwest corner of the Plaza de Panama, is to be rebuilt in 1995 at a cost of \$10.2 million. The architectural firm of BSHA has been hired to design a duplicate of the original building, including the long-gone, 80-foot Pueblo Tower [sic]. The schedule calls for demolishing the present dilapidated structure after Labor Day in 1993.

(The building was originally known as the Indian Arts Building, where exhibits on American Indians were displayed in the 1915-17 expo. The for the 1935-36 fair, it was renamed the House of Charm because that was where fairgoers at the California-Pacific International Exposition could buy souvenirs.)

The Children's Museum, now at La Jolla Village Square near UCSD, will occupy the building's mezzanine, ground floor and part of the first basement. The San Diego Art Institute, the building's

present tenant, also will occupy part of the first floor and basement. The Old Globe Theater will use the second basement for storage and rehearsal space.

In addition, the adjacent Alcazar Garden is to be restored to its original look complete with a pergola, entry arches, fountains and benches.

Renovation of the House of Hospitality at the southwest corner of Plaza de Panama is scheduled to be completed in 1996, one year after the House of Hospitality restoration [sic]. The \$14 million project will reconstruct the structure that contains the Café del Rey Moro, meeting space and offices for the San Diego Opera, Citizens Coordinate for Century 3 and other groups. The park will retain the 1935 redevelopment by local architect Richard Requa, including the courtyard and fountain.

Discussions are just beginning with the present users of the building on the best interior configuration. The city's Commission for Arts and Culture will be consulted on possible additional uses. And, according to a park spokesman, the city probably will solicit proposals from restaurateurs, including the present operators, who might be interested in reopening the Café del Rey Moro in the rebuilt space in 1996.

Despite the recession, all those projects are moving forward under the Balboa Park financing plan.

The first phase will amount to \$72.3 million ---- \$59 million for Balboa Park and \$13.3 million for shoreline improvements at Mission Bay.

Part of the money is being budgeted directly for various projects, Twomey said. The rest is being used to finance three series of revenue bonds, the first \$10.2 million of which was issued in July.

After 1997 a second round of bonds will be need to complete the rest of the improvements, tentatively estimated at \$71.8 million and thus bringing the 20-year total to \$144.1 million. Twomey said increased revenue from the one-cent hotel tax --- due to projected increases in hotels guests and room rates --- should be enough to cover those additional costs and projected inflation.

The most significant project in that second wave of projects is the \$14.8 million parking garage for up to 1,500 cars proposed for south of the Spreckels Organ Pavilion. Until that structure is completed, the parking lots in the Plaza de Panama and the Palisades area will remain in use and pathways will have to wait, officials said.

Even though the master plan has been completed, four more specific plans are being prepared to detail projects throughout the park. These plans could being the final cost for sprucing up Balboa Park to well over \$200 million.

The Central Mesa plan, covering the most heavily used part of the park, is due to go to the council for approval early next year. Prepared by Estrada Land Planning, it pegs implementation at \$78.7 million.

The second plan will cover the land returned by the Navy around Inspiration Point. It is due for completion in about six months and then will be reviewed by various agencies before the council sees it.

The third will deal with the East Mesa --- the largely undeveloped parkland east of Florida Canyon that serves as a front yard to residents in Golden Hill and South Park.

The final plan will cover the West Mesa, between Sixth Avenue and Highway 163.

Twomey said that plan probably will recommend leaving the lush landscape in place.

"I like it the way it is," Twomey said.

Summary of Events in 1992.

(Note: Dates of events are only approximate.)

House of Latin American ousted from House of Pacific Relations
(January 16, 1992)

Earth Day -92 (April 26, 1992)

Revegetation project in Morley Field (April 30, 1992)

Highway 163 designated a scenic highway (May 16, 1992)

Arcade reconstruction on El Prado (July 19, 1992)

Police uproot homeless from park (August 27, 1992)

Boy Scouts oust gay leader (September 17, 1992)

Council rejects plan for homeless shelter in park
(October 6, 1992)

Trails being rebuilt by youth corps in Florida Canyon
(October 14, 1992)

City Council adopted Precise Plan for the Central Mesa in Balboa Park
(October 20, 1992)

January 2, 1992 B-1 (San Diego Tribune) Robert Dietrich: Rising tide of violence linked to sailors in U.S. Navy.

January 9, 1992, 4 (San Diego Independent) Patrick McArdle: Balboa Park Citizens' Advisory Committee wants tent city for area homeless complete with cellular phones, portable showers and bathrooms . . . The camp would house 300 to 400 people, Alice Stark, committee member, said, adding that an acre of space is needed. She criticized the operation of an emergency shelter in the Federal Building in Balboa Park which is used in inclement weather. Critics charge the homeless aren't made aware of when or it will be open and a permanent place is needed.

January 9, 1992, 5:1-2. (San Diego Independent) Mark Gabrish Conlan: AIDS activists are divided over possible memorial in Balboa Park; the AIDS Memorial Task Force, consisting of 30 long-time activists, plans to raise up to \$50,000 to construct the memorial and has picked a prospective location adjacent to the Rose Garden in Balboa Park.

January 10, 1992, D-1 (San Diego Union) Divina Infusino: San Diego has rich & varied Japanese imprints

January 12, 1992, D-3 (San Diego Union) Roger M. Showley: City explored many names before claiming right one for Balboa Park. Historian Samuel Eliot Morrison wrote: "We must not forget Alonso Martin, who reached the Pacific a day before Balboa, paddled out in a dugout and shouted to his comrades (marching with Balboa) to bear witness he was the first to sail on that ocean."

January 16, 1992, A-1, A-7 (San Diego Tribune) John R. Lamb: Rifts tear House of Pacific Relations; Earning a name as House of Uneasy Relations. Three months after a rancorous squabble led to the ouster of

the House of Latin America, the 56-year old family of international cottages is embroiled in another dispute: this time the controversial sacking of the House of Italy's president and claims that a house member attacked and injured him.

January 17, 1992, B-13 (San Diego Union) Obituary: Florence Christman; was teacher, author.

Florence Christman has so many friends and admirers that they may ignore her desire not to make any fuss over her death and hold a memorial service in her honor.

She died yesterday at the age of 95, following a long illness in Mercy Convalescent Center, capping what friends called a remarkable life.

Miss Christman grew up on a farm in Kansas, became a rural schoolmarm who went on to become a pioneer in public health nursing and in retirement wrote what has become *the* book on Balboa Park.

"She was a product of the times before cars and planes; she read by a kerosene lamp. And then, to go on to get a master's degree from Columbia, and do the things she did, it was amazing," said Kevin Munnelly.

Munnelly is an endowment officer for the city of San Diego. He became an admirer of Miss Christman 18 years ago when she donated her house in Pacific Beach to the city. She specified that the proceeds from the sale of the house, after her death, go to a trust fund for the beautification of her beloved park.

Her book, *The Romance of Balboa Park*, traces the history of the park from its naming to the planting of its trees and how explosives were needed to loosen the plow-breaking hardpan soil. The text was used for college courses on the park, and is now in its fourth printing.

Munnelly said there may be a memorial in the next few weeks, but details are pending.

Miss Christman was born in Smith Center, Kansas, and liked to joke that she saved her parents 33 percent of the \$15 birth cost by arriving before the doctor did.

It was a good corn crop that changed her life, she once wrote, when her father decided he had enough money to send her to high school. From there, she started teaching and saved enough to take herself to nursing school at what was to become Hastings College in Nebraska.

She branched into public health nursing, taking a degree at which is now Case Western in Cleveland and Columbia University in New York where she earned her master's in public health nursing.

During the Great Depression she worked with the poorest of the poor in Ohio, Kentucky and Arizona, driving cross-country alone in the days when most women did not do such things.

She wrote about being rescued in the middle of the Arizona desert in the 1930s by a man from Kentucky, who talked to her of the old state, and shared "warming libations."

In retirement, she moved to the beach in San Diego and during World War II split up her beachfront property in Mission Beach into apartments, which she sold in 1967, and moved to Pacific Beach.

All along she spent her time volunteering, at the Whaley House in Old Town, at Balboa Park, for the Committee of 100, and the San Diego Zoo.

In a brief autobiography, she ended the story of her life with a quote from Robert Browning:

"Grow old along with me, the best is yet to be, the last of life for which the first was made --- our times are in his hands."

Like those of the Smithsonian Institution along the Mall in Washington, the establishments are within walking distance of each other, prompting many park administrators and museum officials to call the setting "The Smithsonian of the West."

March 22, 1992 E-6 (San Diego Union-Tribune) Tuesday is "free day" in Balboa park

March 22, 1992 E-6 (San Diego Union-Tribune) Preston Turegano: Plan will prepare Balboa Park for 20th century; the two-volume 700-page Balboa Park Central Mesa Precise Plan will be scrutinized by the council later this spring after the council's Public Facilities & Recreation Committee.

After years of careful study and protracted discussions, a long-range plan to rebuild or restore aging buildings, better control vehicular and pedestrian traffic and preserve open space in central Balboa Park is nearing formal adoption by the San Diego City Council.

Implementation of the Balboa Park Central Mesa Precise Plan will impact the operation of some of the city's most revered cultural institutions.

The two-volume, 700-page plan will be scrutinized by the council later this spring after the council's Public Facilities and Recreation Committee gives its approval late next month or in early May. Throughout the review process, public comment will be welcome.

Without a precise restoration and park use plan, the institutions face possible deterioration and run, city officials say.

The Balboa Park Master Plan --- a more generalized document --- was adopted by the City Council in 1989 and is to be supported by a series of precise plans and expenditures for various sections, or mesas, of the park over the next several years.

Restoration and rebuilding of Central Mesa structures have been made possible by the city's hotel-motel tax --- formally known as the transient occupancy tax, or TOT --- and the sale of bonds, known as "certificates of participation."

The tax was increased from 7 cents to 9 cents on every dollar in 1990. Today, one penny of each 9 cents is dedicated to funding improvements in both Balboa and Mission Bay parks.

About \$60 million is expected to be raised and spent between now and 1997, the first phase of Central Mesa improvements.

Among initial improvements totaling about \$10 million will be the demolition and rebuilding of the House of Charm and House of Hospitality, two structures built of mostly lath and plaster for the 1915 Panama California Exposition that celebrated the opening of the Panama Canal.

Some money in the first phase of work will go for repairs on the Casa del Prado and Casa de Balboa, which were rebuilt in the 1970s, and the exteriors of other park buildings.

New traffic and pedestrian information signs displaying a uniform park logo will also appear over the next few years. More parking spaces will be added by restriping parking lots.

A plan proposal for a subterranean multi-level parking structure behind the organ pavilion has been put off until a second phase of improvements begins in 1998 because money for the structure had to be deferred for expenditures in Mission Bay Park.

Once the parking garage is built, the parking lot at the Plaza de Panama, which is in front of the San Diego Museum of Art and Houses of Charm and Hospitality, and a larger lot in front of the Aerospace and Automotive museums, will become pedestrian promenades.

The Central Balboa Park Association, an advisory panel whose members are museum directors and presidents of each museum board of trustees, has formally notified the city it would like to see a detailed schedule of planned park improvements and expenditures under the precise plan. The association also urges retention of existing parking lots until the parking structure is a reality.

“Other than a few specific concerns, we believe the precise plan is a good one and will prove beneficial if implemented properly, said Dick Bundy, chairman of the association.

“No (existing) spaces will be taken away until the (new parking) structure is built,” said David Twomey, assistant Park & Recreation Department director and the city official closed to the Balboa Park Central Mesa Precise Plan.

Twomey stressed that increasing attendance in the park and vehicular traffic cannot be ignored and must be dealt with in some fashion now.

For the past several years, the Balboa Park institutions have been attracting about 3 million visitors annually. Annually, about 5,500 people work at the institutions as paid staff, board members, trustees or as volunteers.

About 4 million more people visit the San Diego Zoo annually, and an additional 4 million come to the park for special events or outdoor activity each year.

To reduce vehicular traffic in the park, the city last year began encouraging the use of public transportation, contracting with a private company that provides tram service.

Tram drivers and employees of park cultural institutions are being asked to participate in a park security program based on the community Neighborhood Watch anti-crime program in which citizens watch each others homes and report crimes.

Many of the museums are currently negotiating with a private security company to supplement San Diego police patrolling, even if the cost of the private service means having to increase admission fees to museums and facilities.

The Precise Plan calls for expanding the Park Ranger service and for the development of a volunteer nighttime escort system to accompany people to their cars.

Twomey, who is confident the Precise Plan will be adopted without much change, said the underlying philosophy of the plan is to make “free, open and accessible park land (available) for people.”

April 5, 1992 (San Diego Union-Tribune) Terry Rodgers: Crowd jams hearing on East Balboa Park Plan.

Concern over the traffic implications of a development plan for eastern Balboa Park drew a standing-room-only crowd of about 60 people to a public hearing yesterday.

While many of these testifying at the hearing endorsed the concept of improving the long-neglected parkland east of the zoo and museums, several residents living adjacent to the park complained that the plan would reroute traffic into their neighborhoods.

Aside from outlining an estimated \$50 million in improvements for the next 30 years, the East Mesa Precise Plan attempts to give the 620-acre area a more parklike feeling by either rerouting traffic around the park or slowing it down as it passes through.

To accomplish this goal, the plan calls for major changes in the circulation pattern including:

The closing of Florida Drive between Morley Field and Zoo Place.

The rerouting of Pershing Drive at the northeast corner of the park to connect directly with Upas Street, thus converting the five-way intersection at Pershing, Upas and 28th Streets into a four-way intersection. (Park planners are also considering closing the portion of Pershing between Redwood and Upas Streets).

The closure of the 26th entrance into the park and the creation of a new access at 25th Street.

A majority of those testifying yesterday before the Balboa Park Committee were upset over the proposed realignment of Pershing Drive.

"I beg you not to approve this plan without further traffic studies," said North Park resident Scott Ehrlich.

Ehrlich, a law professor at California Western School of Law, said the proposed realignment of Pershing Street would reroute traffic to his neighborhood, resulting in lower property values and unsafe conditions for residents.

Jim Ray, a representative to the Greater Golden Hill Planning Board, said he was opposed to the planned closures of both 26th Street and Golf Course Drive.

"We don't want to turn 25th or 26th Street into a speedway for somebody to get somewhere else," he said.

Joan Griffin, a representative of the Greater North Park Planning Committee, urged the park planners to give more thought to improving security at the East Mesa, which many people consider unsafe because of crime and because of a fluctuating homeless problem.

Expressing disdain for the plan's so-called eco-vision concept that calls for replanting certain areas of the park with native vegetation, Griffin said: "A 6-inch high patch of prickly grasses isn't something we'd want to play in."

The environmental slant of the plan seemed to have few admirers.

April 26, 1992 B-1, B-3 (San Diego Union-Tribune) Terry Rodgers: Plan for park's 'East Mesa'; to turn garbage into gold; East Mesa Precise Plan would replace Pershing Drive city-maintenance operations station with park land.

Not everyone knows that Balboa Park, the refined cultural heart of San Diego, has an ugly twin called East Mesa.

This long-neglected portion of San Diego's premier inner-city park has been something of a civic embarrassment.

Tourist maps of Balboa Park conspicuously omit directions to the 620-acre East Mesa, a 70-acre swath of which was used as a garbage dump until 1974.

While visitors to the west side of the park, or Central Mesa, are charmed by street jugglers, Spanish architecture and a botanical garden setting, East Mesa remains a magnet for the homeless, who set up makeshift shelters in the over-grown jungle of Florida Canyon.

But a new plan has been drafted to remake East Mesa into a more suitable companion to Balboa Park, which at 1,400 acres is larger than New York's Central Park or San Francisco's Golden Gate Park.

The East Mesa Precise Plan, a document of more than 200 pages, favors open space and passive uses, such as jogging, kite flying and picnicking over more traditional hardscape park designs that give preference to active sports.

The authors of the plan, the consulting firm of Wallace Roberts & Todd, describe their design theme as an eco-vision that emphasizes the restoration of the park's native chaparral and coastal sage scrub.

"Few other areas within the dense central core of San Diego could offer the opportunity to experience natural areas . . . with close proximity to residential neighborhoods and downtown," the plan states.

The plan, which will be presented for public comment at a May 4 hearing before the Balboa Park Committee, outlines \$44.5 million in improvements for East Mesa over the next 30 years.

The 3 p.m. meeting will be held at the War Memorial Building at Balboa Park.

Through a special allocation from hotel room-tax revenues, the Parks & Recreation Department expects to have about \$58 million available for projects at Balboa Park through 1997, said Dave Twomey, the department's assistant director.

Although all of those funds are currently earmarked for projects on the Central Mesa, the council could allocate some of the money to East Mesa once the precise plan is approved, he said.

"If the council sees something in this plan that they like, they could make it a priority project," said Deborah Sharpe, project director of the East Mesa Precise Plan.

Like any city project, community support will be critical, she said.

A new entry plaza and triangular children's park proposed at Upas and 28th Streets may go forward first because it would be developed in conjunction with a reclaimed-water project.

The city's Clean Water Program plans include construction of a 3.5-million gallon storage tank at the site, which is currently a depression that's occasionally used by the homeless as a camp site.

A 24-inch diameter pipeline from Mission Valley would deliver reclaimed water to irrigate East Mesa, including its two golf courses.

Along with restoring the natural landscape, the plan calls for a system of pedestrian and bicycle access trails, including the addition of eight pedestrian bridges that would cross park canyons, linking the East Mesa to surrounding communities and to the Central Mesa.

Another major aspect of the design calls for opening the park edge to the adjacent communities of North Park and Golden Hill. Pocket parks and tot lots would be carved out along the boundaries of the park, inviting nearby residents back into the park.

“Right now, we don’t have anything there (on the park’s periphery) that attracts positive uses,” said Sharpe, the city’s project director. “The way it is now, it doesn’t engage people to use it who are in close proximity.”

Luring more families into the park is critical to remaking East Mesa’s image from a crime-infested area controlled by street people.

The central portion --- a mesa that masks the former landfill --- is planned as a 40-acre expanse of open grassland suitable for model airplane flying, picnics and other non-organized activities.

West of the mesa an art park is planned that could accommodate temporary exhibits. One idea is to exhibit sculptures made of recycled materials to remind people of the garbage just below the surface.

Richard Posner, a Los Angeles artist who assisted the design team, conceived of this area as an alchemy park, in which the city would be “turning garbage into gold,” said Kathleen Garcia, project manager for Wallace, Roberts & Todd.

To the east of the old dump, the parks department nursery would be renamed Kate Sessions Park Nursery and opened to the public to view demonstration gardens and botanical displays.

Pedestrian and vehicular circulation through the park would be dramatically altered. Florida Drive would be closed and repaved --- from Zoo Place to Morley Field Drive --- as a wide jogging and bicycle trail. At the northeast end, Pershing Drive would be realigned and stop signs would be installed to slow traffic.

Date Street from 28th Street to the golf course would be closed.

Despite its emphasis on enhancing the park’s natural environment, the plan retains all existing recreational facilities, including the Balboa Tennis Club and the Kerns community swimming pool, both of which would undergo major remodeling or reconstruction.

Specialized sport facilities such as the fly casting pool and the bicycle velodrome would be shifted to different locations.

“Nobody’s booted,” said Garcia.

Nobody, that is, except city maintenance crews at the Pershing Drive operations station, which under the plan would be reclaimed as park land.

The unsightly operations station, which currently welcomes visitors with a display of garbage trucks and a cyclone fence topped with razor wire, would be converted into a more fitting gateway to Balboa Park.

The site would be remade into a recreation complex featuring a soccer field, a velodrome and stadium as well as a picnic area with a pond.

Planners decided to put the crowd-drawing uses in this canyon because access could be controlled and the lights could be shielded from the adjoining neighborhood.

At the north end, the sports fields at Morley Field would be reconfigured around a central tree-lined promenade with picnic facilities for people to watch the games.

A new 1-acre pond would be built to accommodate fly casters and duck lovers alike. The existing fly-casting pond was built over the landfill and was abandoned after the land settled and rendered the pond unable to hold water.

The plan proposes a total of 500 new parking spaces, nearly half of which would be at the new Pershing Recreation Complex.

While all the details of the Precise Plan are still being studied by community leaders, Joan Griffin, a civic activist who has lived next to the park for 11 years, said she was not impressed by the document.

"I'm disappointed again," she said, complaining that it is not specific enough and fails to adequately address her top concern: public safety.

The plan does advocate the installation of additional lighting along with emergency call boxes in remote areas, a vegetation control program, and it recommends a Neighborhood Watch program.

Project director Sharpe said she sympathizes with neighboring residents who are tired of putting up with crime in the park. She suggests the plan can only set the framework for community activists to reclaim.

"You can't change a societal problem with a precise plan," said Sharpe. "The key to making a place safe is activating it, and that means designing it to attract legitimate uses."

April 30, 1992 (UPDATE) Fred Scholl: Areas of Morley Field "off limits"; censure similar to Black's Beach: A new area now being posted as closed for purposes of a re-vegetation project is the area of natural growth just south of the bicycle racing track at Morley Field in Balboa Park and southwest of the baseball diamonds. It is an area that for years has been a very popular place for residents of North Park to take their dogs for walks. It has also been a popular cruising area for a number of years, with many trails, well-worn, through the shrubbery.

April 30, 1992 A-8. (UPDATE) Balboa Park Committee rejects AIDS memorial; new task force meeting May 4: The Balboa Park Committee, the first city advisory group to hear the proposal for an AIDS memorial in Balboa Park, rejected a plan on Monday April 6, by a 5-1 vote. . . . The committee questioned the amount of money being budgeted for the project, the degree of community support for it, and the entire concept of building an AIDS "memorial" while many people are still living with the disease.

May, 1992 (UPTOWN) Gig Conaughton: Giving Away the Park --- Implementing the Heart of the City Plan is No Day in the Park: One year ago, Third District Councilmember John Hartley headed up a highly publicized drive to "take back" Balboa Park from the rising wave of homelessness and crime driving residents and tourists alike from one of the city's prime attractions. The plan was extremely ambitious. Maybe too ambitious.

Working hand in hand with Hartley is developer Janay Kruger, then on the board of directors of the Centre City Development Corp. Called the "Heart of the City" program, the plan's original goals were to provide a safe environment for people using the park and to discourage people from using the park illegally. It also hoped to help solve the problem caused by the legions of homeless, and to expel those people who use the park to prey on victims.

The sculpture garden at the Museum of Art in Balboa Park is enclosed by a high fence; sculpture gardens at museums throughout the nation are enclosed.

May 5, 1992 C-4 (San Diego Union-Tribune) Balboa's tile repair planned for this fall; until missing tiles at the Plaza de Balboa are replaced, asphalt will be used for repair: Visitors to the Plaza de Balboa, adjoining the San Diego Natural History Museum and the Reuben H. Fleet Space Theater and Science Center will have to walk carefully around broken tiles for six more months before repair work begins in the area.

In recent years, red ceramic tiles throughout the plaza have cracked or shattered because they are too thin or were laid too close to the surface, according to David Twomey, assistant city Park & Recreation Department director. He said moisture has undermined the tiles and dissolved the adhesive used to bond the squares to below-surface concrete.

A plan has been approved by city officials to replace the tiles with thicker ones that will be embedded deeper into the surface, Twomey said. Replacement is scheduled to begin in the fall at a cost of about \$105,000. The money will come from city hotel-motel room tax revenue that will finance other improvements in San Diego's cultural heart over the next 10 years.

"It's been a problem that has needed attention for a long time," said Jeffrey Kirsch, executive director of the Space Theater & Science Center. He said employees of the center have complained to Park & Recreation about the plaza's unsightliness.

City Management Department officials say "amazingly" no one has ever filed a claim against the city as a result of falling or slipping on the broken tiles.

May 21, 1992 4 (San Diego Independent) Jonathan S. Petrikin. New policy will help create more "rational" art: The status of public art in several of the city's improvement projects --- including Balboa

Park's East Mesa Precise Plan --- was recently given a boost when the San Diego City Council unanimously approved legislation that will result in what proponents argue is a more rational public art policy.

The ordinance, passed April 20, represents a departure from the traditional "percent for art" programs still being used in other cities, according to Victoria Hamilton, executive director of the downtown-based San Diego Commission for Arts and Culture. Under the commission-sponsored law, Hamilton said, 1 percent of the city's capital outlay funds will continue to be set aside for artwork in public facilities and the commission's neighborhood-oriented Public Art Master Plan (PAMP). The difference is that the city will no longer be required to spend that 1 percent on each and every capital improvement project (CIP) --- including those that the public would never see, Hamilton said.

In his February report on the proposed legislation, Deputy City Manager Bruce Herring outlined another key benefit, namely that artists would be brought in on approved CIPs, right from the start of those projects. The resulting artwork, he said, would not only be more site-specific and responsive to the community's needs, but also would be included in the project's overall budget.

"There was never any artistic criterion when evaluating proposals in the past and now there is," Herring said. "The incentive is that (designers and contractors) many have a better chance of winning the contract if they go a good job with this criterion."

While admitting that Balboa Park's \$45 million East Mesa Precise Plan was framed prior to the new legislation, Kathleen Garcia, project manager for the consulting firm that developed the plan, explained that in conjunction with the Commission for Arts and Culture, artists were selected who "not only came up with more specific piece suggestions, but, more importantly, they really informed the whole planning process."

Out of this artistic corroboration, Garcia said, came the idea of recycled material sculptures which would celebrate the fact that parts of East Mesa parkland had previously been used as a public landfill. If approved, these and other artworks of the proposed Alchemy Park could cost \$300,00 [sic] per year over the project's 20-year implementation period, or about 15 percent of the total project's cost, Garcia explained.

In a similar fashion, the new ordinance on public art will allow more flexibility as to where increasingly scarce funds can be spent, Hamilton explained, pointing out that the city's capital outlay fund has dwindled from "hundreds of thousands" of dollars a couple of years ago to a mere \$55,296 this fiscal year. What is left in that fund, Hamilton said, will largely go toward the commission's award-winning PAMP, while more expensive CIP artwork, like the East Mesa plan, will be paid for out of the city's CIP fund.

According to Herring's February report, the new public art policy will also provide "leveraging opportunities" to attract public and private grants to help defray the cost of CIP artwork. The report named the California Arts Council and the National Endowment for the Arts as possible benefactors.

Meanwhile, departmental response to the new legislation has been favorable, Hamilton said. In addition to the Department of Parks & Recreation's Balboa Park projects, Hamilton said, that at least four other department directors --- ranging from Waste Management to Engineering and Development --- have demonstrated what she called a "jump on board" attitude toward employing artists in their CIPs.

June 23, 1992 A-2 (San Diego Union-Tribune) Neil Morgan: One holy of holies rouses San Diegans; park named Balboa: It was my pleasure, thank you, meeting Kathy Puplava in Balboa Park so soon after daybreak and making the rounds with her in the glorious gardens she tends. I'd always wanted a backstage room there, and the plan to share it recently with readers made it work. But whenever one writes about Balboa Park, there's spirited mail. This time most of it was gracious, and all was impassioned.

There was no way I could have escaped the cool scrutiny of Richard W. Amero, especially now that he's retired from his 40 years as a materials analyst with SDE&E. His passion has been the history of Balboa Park, and he's quick to tell other San Diegans they can't get facts straight about their premier park.

"Not one scintilla of evidence exists that Irving Gill designed the Administration Building in Balboa Park," he writes (but) *The San Diego Union-Tribune* has stated repeatedly that he designed the building."

He's right about one thing: In a recent photo caption, this newspaper reaffirmed its conviction that Gill designed that building.

Amero continues:

"Neil Morgan is but the last of a long list of perpetrators of the falsehood that the Botanical Building in Balboa Park was first intended to be a railroad station before it was readapted to its use in the park," he wrote. "*The San Diego Union* began this story March 21, 1915, using an anecdote that may have been supplied by park nurseryman Dave Roberts. The identification was never mentioned in stories about the Botanical Building in the *Union* before 1959 and has never been left out in stories about the building since 1959."

There you have it, a resounding verdict of guilty without trial from a good researcher, with a diabolical attribution to a hapless nurseryman.

Intent on dashing this curious legend, Amero had studied architects' drawings and pored over bids and bills for its construction. He found no reference to a railroad station.

Nor did my phone calls to Ogden, Utah, yield more than puzzled murmurs. But at the San Diego Historical Society, other archivists, less eager to enter the fray, support the railroad-station theory.

Kathy Puplava isn't taking sides. As we had strolled through this majestic garden under steel and lath, I grumbled that it might become a more familiar part of San Diego life if it had a catchier name than Botanical Building. She said she didn't know if the railroad-station legend was true. I checked out our newspaper library, and out leaped those overwhelming confirmations. Fortunately for me, Amero has moved on to other challenges. He is researching the life of Mme. Ernestine Schumann-Heink, the diva whom he calls "The most outstanding woman in the history of San Diego."

The same mail brought a letter from Carol Greentree, a San Diego garden writer who holds a degree in ornamental horticulture. She enthuses over Spanish and Moorish gardens.

"The elegant Botanical Building has an equally aristocratic cousin in Barcelona," she writes. "Spain's lath-house may have been the inspiration for our own: It was built just 27 years earlier, for the 1888

Universal Exposition, which predated Paris' famous Eiffel Tower expo by only one year. Barcelona called its lath house the Umbracle, and you can still visit its leafy, shadowed sanctuary in Citadel Park between Montjuic Park (1929 expo) and the new Olympic Village (1992 games)."

Greentree thinks our Botanical Building probably is related to a railroad station. She credits the idea to A. D. Robinson, a well-traveled Englishman who settled in San Diego and offered the vision of an oversized lath house for the 1915 exposition: "The Odgen railroad structure was adapted to match a concept Robinson borrowed from southern Europe."

Lest you scoff at all this concern as purposeless, newspaper librarian Sharon Reeves is placing a cautionary note on clipping and computer references to the origins of the Botanical Building.

Furthermore, we'll ask someone covering the Olympic Games in Barcelona to stroll through the park and photograph the Umbracle.

It would sure be fun if it turns out to look like a railroad station.

July 7, 1992 (Los Angeles Times) B-1, B-3. John H. Lee: Squeeze Play; Balboa Park street artists claim regulations are hurting business; Leo J. Porter, a Balboa Park musician for 2-1/2 years says over-regulation has driven some artists away; Bob Hendricks of Chula Vista paints faces at Balboa Park.

Ask the balloon sculptor, the country-Western gospel music singer, the painted man who temporarily tattoos young faces, and the artist with leather brushes whether Balboa Park is drawing the crowds it did in summers past, and they will say no.

They say that more-stringent regulations on park entertainment in recent years have driven away many street artists. And the crowds are leaving with the talent, they say.

Now the artists fear that new regulations the city is considering will hurt them even more. A meeting with city park officials is planned today to discuss a permit fee and more rules for street performing.

Park officials say guidelines are needed because they have received complaints from citizens offended by off-color, racist and insensitive remarks by performers.

The debate over guidelines for street artists has been going on for years, said Jack Krasovich, deputy director of the Parks & Recreation Department.

About 15 years ago, the city began issuing permits to park entertainers on a first-come, first-served basis. Performance areas were drawn up and rules laid down: donations only --- no soliciting, no unsavory acts, no disrupting the tranquillity of the park's 12 museums, half a dozen botanical gardens, the zoo, theaters, pavilions or cafes.

With the exception of minor turf squabbles, the system held up until about two years ago, Krasovich said.

At that time, a plethora of aspiring park performers forced officials to rethink their way of meting our space. Entertainers hoping to get permits began lining up at the park's administrative offices earlier and earlier, only to be turned away when claims to the 20 available spaces had already been staked.

So first-come, first-served gave way to a lottery system by which the first 20 entertainers randomly pick numbers entitling them to choose which space they want, Krasovich said.

By that point, several artists had already hit the road, said Leo J. Porter, 47, who for the past two and one-half years has set up on the park's El Prado strip and crooned gospel music with a twang.

Park foot traffic fell accordingly, Porter said.

"It's been cut in half," he said of the number of people on the Prado.

But park officials say that, even in the recession, the number of visitors has held steady at about one million each month.

After a \$3-a-day performance permit fee was announced this spring by the parks department, Porter said a group of entertainers protested and the fee was shelved.

Many artists have stayed around to see what officials will decide.

Virgil, the saxophone player, Mike, the Tarot card reader, Leonard, who reads palms, Silly Stars, the clown, singer Rambling Rex; Porter ticks off the names of those who have moved on to better gigs or who are considering leaving if the permit fee goes into effect.

"I understand times are hard, and the city's hurting for money," Porter said. "But we all need to sit down and see if we can work something out. Maybe we can bring the performers back to the park."

Whether street talent is universally appreciated is another matter

In October, 1989, leading up to the Soviet Arts Festival titled "Super Powers Sunday," street performers were at first banned from the park for the day, then in an about-face by event organizers were allowed to perform during the event if they eschewed tips. Entertainment paid for by Sea World and Seaport Village had already been arranged to guarantee the presence of street-type performers.

The feeling shared by the park's regular street artists was that the city feared embarrassment in front of Soviet visitors and sought "higher-quality" performers.

The permit fee debate and the concerns about the quality of performers comes as a surprise to Chong Dae Chong, 56, who has descended from three generations of Korean leather brush artists. Having spent decades refining his technique, Chong plies his trade for tips, sometimes as low as a \$1 for personalized paintings that sell for \$15 at Korean tourist spots.

In five minutes, Chong takes any five letters and turns them into a grove of brilliant foliage, a gaggle of exotic birds or a school of fan-tailed tropical fish.

"When business falls down," said Chong, who set up this week in the fountain plaza facing the Reuben H. Fleet Space Theater and Science Center, "it's not the time to start charging those of us who provide a service. . . . That would drive even more people away."

July 19, 1992 F-2 (San Diego Union-Tribune) Roger Showley: 'Missing' arcade returns to Balboa Park walkway; the building and the arches, reused for the 1935-36 California-Pacific International Exposition, were demolished to make way for the more modern-looking Timken, which opened in 1965.

One of the arcades along Balboa Park's El Prado of nearly 30 years ago is back.

The arched walkway in front of the Timken Museum of Art, similar to those in front of the Spanish-Colonial Revival buildings on the Prado, was part of the Home Economy Building left from the 1915-16 Panama-California Exposition.

The building and the arches, reused for the 1935-36 California-Pacific International Exposition, were demolished to make way for the more modern-looking Timken, which opened in 1965.

The new 206-foot long arcade cost \$525,000 to build, more than twice what it cost the state to build the park's landmark California Tower decades early. The California Quadrangle, which includes the California Tower and Museum of Man, cost \$250,000 to build in 1912-14.

Patricia DeMarce, president of the Committee of 100, attributed the cost difference between the new arcade and the California Tower complex to inflation. The project also went \$65,000 over budget because of unexpected foundation problems, she added.

The committee, a 25-year old civic group with more than 2,000 members devoted to preserving park architecture, raised the money for the arcade project. The drive began with an anonymous \$100,000 donation, DeMarce said.

Construction of the arcade prompted both controversy and a lawsuit from Timken museum directors, who were concerned that the arcade would block the gallery's south wall. Other criticism came from people worried about security after dark and the arcade's encroachment on the Prado's open space.

Now that the arcade is up, however, DeMarce says she has heard from some former critics who now applaud the restoration.

The arcade was designed by the architectural firm of Wheeler, Wimer, Blackman & Associates. Trepte Construction Co. was the general contractor. The arcade will be officially dedicated in early October as part of the committee's annual birthday celebration of Balboa Park.

The Committee of 100 has another arcade in the works, an estimated \$1 million project to replace a missing arcade in front of the San Diego Museum of Art annex and Old Globe Theater. The project is not expected to start for several years.

July 31, 1992 B-2 (San Diego Union-Tribune) City Planning Commission approves plans for East Mesa: A \$50 million plan to develop the 700-acre East Mesa side of Balboa Park won the unanimous approval of the City Planning Commission yesterday with only minor modifications.

The plan now goes to the City Council for review.

The project calls for a complete makeover of a section of the park bordered by Park Boulevard, 28th Street, Upas Street and Russ Boulevard, and will include new bike paths, canyon bridges and play areas.

While not tampering with the overall project, planning commissioners said yesterday that they would like the northeast entrance to the park at Pershing Drive redesigned to make it more inviting. The entrance is a busy five-way intersection where Pershing Drive meets Upas Street.

Park consultants originally suggested closing Pershing Drive near the intersection and funneling traffic onto Pershing Avenue. That proposal was dropped after people who live on Pershing Avenue complained that it would turn their residential street into a major thoroughfare.

August 28, 1992 B-1 (San Diego Union-Tribune) Terry Rodgers: Councilman Hartley seeks park homeless shelter; the unsanctioned urban campground for the homeless, erected at a Balboa Park parking lot Tuesday, was shut down faster than a flawed Broadway musical.

Date unknown. (**GREATER NORTH PARK COMMUNITY PLAN**) Recommendations: Normally, Greater North Park, exclusive of Balboa Park, would be considered to be lacking in adequate park and recreation facilities. Based upon its projected population, the community should have at least two community parks of 30 useable acres each and nine neighborhood parks of ten acres each. These figures are based upon standards estimated by the **Progress Guide and General Plan** of the City of San Diego.

However, the existence and proximity of Balboa Park must be taken into consideration since most of the Greater North Park is within the one and one-half mile radius established by the **Progress Guide and General Plan** as the standard for community parks. Therefore, due to the proximity of Balboa Park, the community should not be considered to be deficient in community parks and only deficient in neighborhood parks from an acreage standpoint, since most of the community is within one-half mile walking radius of an existing or proposed park. Based upon **Progress Guide and General Plan** standards, greater North Park currently has a 21 acre deficiency in park acreage. After the completion of the Cedar Ridge mini-park, the community will still be deficient 17-18 acres. In addition, the community's sole community park (North Park Recreation Center) is 12 acres short of the 20 acre standard for community parks.

October 14, 1992, B-3 (San Diego Union-Tribune) Zoo's sales lead to reprimand, by Jim Okerblom.

A national organization has determined that the San Diego Zoo committed three ethical violations in its handling of a controversy last year when it was revealed that surplus zoo animals had ended up on a Texan hunting ranch.

The findings, by the American Association of Zoological Parks and Aquariums (AAZPA), did not fault the zoo for selling animals to the ranch.

The association determined that the zoo was not aware that they were going to a hunting ranch. It also found that the zoo worked to get the animals back when it learned that they had.

However, the association reprimanded the zoo for erroneous statements officials made after the controversy was made public, zoo officials said.

Karen Allen, a spokesman for the AAZPA, said the group does not disclose specifics of its findings but leaves that up to the member that is reprimanded. The most serious action by the AAZPA, which represents 160 zoos and aquariums in North America, is a revocation of membership, she said, while a letter of reprimand is the least serious.

In September 1991, to animal-rights groups, San Diego Animal Advocates and Friends of Animals, charged that two surplus Dybowski sika deer has been sent to the Priour Ranch in Ingraham, Texas. The 6,000-acre ranch features hunting of wild animals from turkeys to elk, for fees ranging from \$200 to \$4,500. Zoo policies forbid selling any animals for hunting.

Zoo spokesman Jeff Jouett said the ethics violations cited by the AAZP stemmed from incorrect statements made by zoo officials in the wake of disclosures about the Priour Ranch.

In one statement shortly after the allegations were made, Jouett said the Zoological Society said a zoo employee had visited the ranch before the animals were shipped there. A later check determined that no zoo employee had visited the ranch, and the society corrected the mistake in a statement.

In another error, Douglas Myers, executive director of the society, stated in *ZooNoz* magazine that the two deer were "immediately retrieved" from the ranch. In fact, the deer had not yet been returned when the statement appeared.

Myers later apologized, explaining that the owner of the ranch had changed his mind and refused to return the animals. They later were returned.

"With all the respect due the AAZP, we do not believe that these errors support a suggestion of unethical conduct by the Zoological Society or any of its staff," Jouett said in a prepared statement.

San Diego Animal Advocates said the reprimand, although carrying no sanctions, was significant because "the whole function of the AAZP is to promote and protect its dues-paying members."

The group charged that surplus animals are routinely sold to dealers with no follow-up as to their final destination. The zoo disputes the charge.

March 4, 1993, San Diego Union-Tribune, B-1, B-6. Nativity display in Balboa Park legal, court rules, by Lorie Hearn.

The tradition of display a life-sized Nativity scene in Balboa Park may continue, a federal appeals court has ruled.

In a 2-1 decision yesterday, the 9th U.S. Circuit Court of Appeals said the private display of the scene depicting the birth of Jesus does not mean the city of San Diego is endorsing religion.

A reasonable observer “could not fairly interpret the city’s tolerance of the display as an endorsement of religion,” the court majority found.

City officials, as well as the private group that sponsors the Nativity scene, or creche, have awaited this federal decision in the first of two local court challenges involving the separation of church and state.

The Nativity scene, which is sponsored by the San Diego Christmas Center Committee, and the crosses were challenged by atheists Howard Kreisner and Philip Paulsen with the Society of Separationists, Inc. They were joined by the American Civil Liberties Union.

The Nativity display is placed in Spreckels Organ Pavilion as part of a larger display that includes a Christmas tree, reindeer and Santa Claus. It has been displayed at various sites since 1953 and was challenged by Kreisner in 1988.

January 11, 1994, San Diego Union-Tribune, B-1, B-2. Court permits park's Nativity scenes, by Valerie Alford.

The city of San Diego won a five-year battle with an atheist yesterday who tried to keep an annual nativity display out of Balboa Park.

The victory came when the U.S. Supreme Court refused to consider the appeal of Howard T. Kreisner, a self-professed atheist activist who had argued in lower courts that the city had endorsed religion by allowing a series of Christian scenes in the park's Organ Pavilion since 1953.

"I'm happy," said Deputy City Attorney Mary Kay Jackson, who handled the case for the city. "After five years, we've finally won."

Kreisner, who also had sued the city to force removal of the cross on Mount Soledad in La Jolla, agreed yesterday that the nativity scene case is over.

But despite having lost, Kreisner said the suit forced the city to change its policies by make the Organ Pavilion more accessible to other types of displays.

Last Christmas, he said, biblical scenes shared space with a constitutional display set up by the American Civil Liberties Union.

In the creche case, Jackson argued that to bar the Biblical scene would have violated the free speech rights of the San Diego Christmas Center Committee, a private organization that sponsors the display.

Both Jackson and Kreisner said a crucial difference between the cross and the nativity scenes is that the nativity scenes are temporary, while the crosses are permanent fixtures.

Kreisner filed the nativity suit in 1988 (?). It was dismissed by federal judge Marilyn Huff before it could come to trial.

The 9th Circuit sent unresolved questions back to Huff, who again ruled that the city was not violating the constitution. That ruling was upheld last March by the 9th Circuit and Kreisner appealed to the U.S. Supreme Court.

Department of the Interior, National Park Service, Western Region, San Francisco, Calif., to Douglas G. Myers, executive director The Zoological Society of San Diego, San Diego, Calif.

Re: Balboa Park National Historic Landmark District: Proposed Pavilion, San Diego Zoo.

Dear Mr. Myers.

Thank you for submitting information on the San Diego Zoo's proposed tent pavilion, to be constructed adjacent to and partially within the Balboa Park National Historic Landmark district. We have reviewed the proposed project and have developed the following comments and recommendations under the National Park Service's responsibility to provide assistance for the preservation of National Historic Landmarks. The aim of this assistance is to promote the highest preservation standards and practices for our nation's Landmark properties.

Based on the information we have, the principal contributing resources of the Landmark district that are closest to the proposed project site include the carousel and the Spanish Village. It appears that neither the carousel nor the buildings of the Spanish Village will be directly altered as a result of the proposed pavilion project. We recommend that the area of the Landmark district nearest the proposed project site be surveyed again to ensure complete identification of all contributing district resources, even those that are more supportive than principal in nature, such as plantings and pavings that date to the 1930s or before. All such resources should be recognized and treated sensitively in project planning and implementation.

The proposed pavilion will have some impact on the Landmark district because it will be visible from the Spanish Village and perhaps from the carousel, and because a portion of the pavilion will actually extend into the area of the district. It is our opinion, however, that this impact will not be substantial and that the "tent" concept for the design of the pavilion is compatible with the park/exposition character of the Landmark district. Further, the heavy planting proposed to surround and conceal the pavilion from the district will lessen visual impact. Despite this opinion, we would strongly support any changes in the project that would result in lessening the visual impact of the proposed pavilion. Such changes might include reducing the height or footprint of the proposed pavilion, and/or relocating it to a site entirely outside and farther from the Landmark district.

With regard to new landscape elements proposed to create a connection between zoo property and the Spanish Village, we strongly recommend that these new elements be simple and subordinate in design and otherwise exhibit a high level of compatibility with the character, scale, materials, and other design properties of the Landmark district. Further, all existing contributing resources in the project area, including pavings, plantings, and other supporting landscape elements should be retained and treated sensitively.

As always, we appreciate the opportunity to assist in the preservation of the Balboa Park National Historic Landmark district. Paul Alley or Ann Huston of our office is available at (415) 744-3988 for consultation regarding this matter.

Sincerely,

(Original signed by David W. Look.)

November 5, 1995, San Diego Union-Tribune, G-3. Letter, Jackie I. Goldberg: Don't let Route 163 through Balboa Park become unsightly; city is spraying the edges of the median grass to kill the extended growth rather than allowing the grass to grow to its outer limits and using accepted edging techniques.

November 5, 1995, San Diego Union-Tribune, H-19. GARDEN: Milton P. Sessions, his love of plants still blossoms, he died October 22 just shy of his 95th birthday, by Karen C. Wilson and Lucy Warren.

November 7, 1995, San Diego Union-Tribune, E-2. New fountain makes a splash in Balboa Park, by Burl Stiff.

November 8, 1995, Minutes of Design Review Committee,. Adoption 1. Japanese Garden Concept Plan Addition . . . approved with modifications.

(Chair noted the tour of the Japanese Garden held in October.)

Motion #1. Mr. White moved to approve the project as presented subject to the following conditions: 1) Reduce the size of the parking area and limit use to disabled access; 2) Provide landscaping to soften the area between the parking and buildings; and 3) Establish a ten (10) year timetable for future review of the temporary buildings.

Mr. Utt amended the motion adding the following condition: Provide landscaping to screen the parking area from the access entry.

The motion was then seconded by Mr. Heimlich and was approved by a vote of five (5) in favor, one (1) opposed and two (2) abstentions (Mrs. Yamada and Mr. Theilacker).

Motion #2. Mr. Theilacker made a motion to solicit an interim master plan. This master plan would reflect previously approved changes and include the recommendation to save the oak grove as a permanent feature.

The motion was seconded by Mr. Andrews and was approved by a vote of seven (7) in favor and one (1) abstention (Mrs. Yamada).

November 19, 1995, Los Angeles Times, Home Edition, Calendar Section, 70. Record Rack: BRUCE SPRINGSTEEN, "The Ghost of Tom Joad," new acoustic album --- The Return to Desolate Highway, by Robert Hilburn.

"The Line" and "Balboa Park" speak in equally unsettling ways about the dehumanizing effect when a society sees outsiders as invaders rather than neighbors.

1996

Summary of Events in 1996

(Note: Dates of events are only approximate.)

Objections to noise level of model airplanes flying on landfill
(February 5, 1996)

Earth Fair (April 22, 1996)

Decline in museum attendance (April 22, 1996)

Locations set aside in park for dogs and their owners
(May 19, 1996)

Mingei Museum of International Art in House of Charm
(August 4, 1996)

Republican National Convention parties and receptions in park
(August 12, 1996)

New House of Charm dedicated (September 21, 1996)

January 8, 1996, Balboa Park Committee. Chairperson's Report: Ms. Lacy reported that due to lack of agenda items, the Park & Recreation Board did not meet in December. She asked Park & Recreation Director Marcia McLatchy to report on the October/November meeting actions since Ms. Lacy was unable to attend the meetings. Ms. McLatchy reported that the Veterans Plaza in Ocean Beach and the additions to the Japanese Friendship Garden were sent back for further information and review.

Action Items (Adoption) 201. Balboa Park Activity Center Site Relocation. MSC It was moved, seconded and carried unanimously to relocate the site of the Balboa Park Activity Center as specified in the submitted report and Map (7-0).

January 14, 1996, San Diego Union-Tribune, B-2. (Kenneth Lightfoot) His magic didn't work on jury, by James Steinberg.

A Municipal Court jury convicted Lightfoot Friday of two misdemeanor counts of performing in Balboa Park without a permit.

January 31, 1996, San Diego Union-Tribune, B-2. RSVP (Retired Senior Volunteer Patrol) adds Balboa Park to its list of patrols, by Joe Hughes.

February 3, 1996, San Diego Union-Tribune, B-6, B-10. EDITORIAL: Alcohol in the parks/Problems with drinking outweigh the benefits.

Balboa Park has an 8 p.m. to 8 a.m. ban on alcohol.

February 4, 1996, San Diego Union-Tribune, B-2. Vietnam memorial leaving Old Town; the bulk of the memorial will be relocated to the Veterans Memorial Center in Balboa Park.

February 4, 1996, B-5. San Diego Union-Tribune, B-5. Obituary: Ruth Denton.

Switzer Canyon and Switzer Creek near Balboa Park were named in honor of her grandfather, Ephraim D. Switzer, who operated a farm near 17th and B Streets.

February 5, 1996, Balboa Park Committee. Action Items (Adoption) 201. Federal Building Renovation/Improvements - Hall of Champions: MSC It was moved, seconded and carried unanimously to approve the architectural plans for renovation and interior improvements to the Federal Building by the San Diego Hall of Champions (Streeper/Madigan 6-0). 202. Concept plan for proposed underground annex to Federal Building - Hall of Champions: MSC It was moved, seconded and carried unanimously to approve the concept plan for the underground annex expansion to the Federal Building subject to the following: Concern about the visual impact of the exit stairs; amend the current lease agreement to include the project if and when it may be funded; proposed expansion will be at no cost to the city (Estrada/Madigan 5-0). . . . Information Items 401. Lily Pond perimeter paving project - staff. Information item 401 continued to next meeting. . . . Communications: Mr. Andrew Makarushka addressed the Committee expressing his displeasure with model airplanes which are allowed to fly in areas of the Arizona landfill. He has submitted a petition to staff with names of people who are concerned about the noise levels. Ms. Lacy referred the matter to staff to report back to the Committee at its next regular meeting.

Chairperson's Report: Ms. Lacy reported on the actions of the Park & Recreation Board meeting of January 18, 1996, including the following actions: Approval of the new location for the Balboa Park Activity Center; Approval of the Japanese Friendship Garden Interim Master Plan, Proposal for relocation of the Summer Pops for one year to Quivera Court, Mission Bay; discussion of Park Maintenance Survey to evaluate our park system; and discussion of contracting out some of the Department's After-school playground programs to other your service agencies.

February 6, 1996, San Diego Union-Tribune, E-1. Arts boards tread a fine line between managing, meddling, by Welton Jones.

A San Diego Museum of Art trustees' committee has determined that the museum's staff could use some additional supervision in financial affairs.; Nonprofit boards are publicly accountable.

February 14, 1996, Design Review Committee. Action Items (Adoption) 1. Café del Rey Moro Garden - David Reed, Landscape Architectural Consultant; Matt Papuga, Staff: Item continued for 30 days to give city, tenant management and restaurant lessee an opportunity to work out a compromise.. 2. Hall of Champions - Renovation of Federal Building - Tanner, Leddy, Maytum, Stacy, Architectural Consultant; Penny Scott, Staff: Motion by J. Paoluccio, seconded by E. Yamada, to approve building design for renovation as presented with the condition that design details for lighting, signage and railings be brought back to this Committee for review and approval. Unanimously approved. 3. Hall of Champions - Expansion Annex to Federal Building - Tanner, Leddy, Maytum, Stacy, Architectural Consultant; Penny Scott, Staff: Motion by M. Theilacker, seconded by E. Yamada, to approve the concept of the proposed annex with condition that air intake structures be relocated to less obvious place, all stairwells locations be reviewed and relocated further from the street. Unanimously approved..

Communications: Pat Nila, project manager for the Balboa Park Activity Center, requested that the Committee appoint a representative to three upcoming workshops, which will deal with controversial issues regarding the Activity Center in its new location. The Committee prefers that individual members of the Committee be notified of the workshop data and whomever is interested and available will attend. Ms. Nila agreed to this request.

February 17, 1996, San Diego Union-Tribune, B-1. Recreation Center for the Blind showing its years; ailing building will be replaced if funds are found, by Ed Jahn.

March 4, 1996, Balboa Park Committee. Information Items 401. Lily Pond perimeter paving project - Staff. 402. Balboa Park Activity Center Design Committee. 403. Model Airplane permit - Arizona landfill.

March 7, 1996, San Diego Union-Tribune, E-1. Exploring common grounds/Diversity program helps respect bloom in the park, by Nancy Cleeland.

San Diego Unified School District integration program that brings together children from all parts of the city, many of whom are racially or economically isolated.

March 13, 1996, Design Review Committee. Information Item 1. Balboa Park Lily Pond - Kevin Oliver, staff, Park & Recreation Dept. Kevin Oliver from Park & Recreation Dept. presented alternative ground treatments to address the issue of constant turf degradation around the Lily Pond caused by excessive foot traffic. The Committee requested further investigation of paving options that contrast with the existing paving and aid in the preservation of the historical landscape design integrity. Project proposal will return to this Committee for review of paving options.

April 10, 1996, Design Review Committee. Action Item (Adoption) 1. Café del Rey Moro Garden - Matt Papuga, Staff, Engineering & Capital Projects Dept.; David Reed, landscape architect: Motion by M. Theilacker, seconded by E. Yamada, to approve the revised scheme which paves the mid-level terrace and turfs the lower level terrace, with the following conditions: 1) Paving pattern in mid-level terrace to be symmetrical; 2) Interpretive signage regarding the garden's historical significance to be placed at main entry(s) to garden; and 3) Two canopy trees to be placed in mid-level terrace. Unanimously approved.

April 22, 1996, San Diego Union-Tribune, B-1. Earth Fair draws 75,000 to Balboa Park paradise, by Angela Lau.

April 22, 1996, San Diego Union-Tribune, E-4. Museum attendance declines once more, by Preston Turegano.

Crowd count attendance at San Diego Museums

	1995	1994
Reuben H. Fleet	571,820	583,125
Museum of Art	356,240	363,054
Aerospace	192,686	187,217
Natural History	184,494	176,247
Museum of Man	164,630	160,419
Model Railroad	96,049	109,117
Timken	84,751	90,924
Automotive	82,998	90,613
Photographic Arts	51,655	52,345
Centro Cultural	50,222	21,690
Hall of Champions	39,518	43,689

May 4, 1996, San Diego Union-Tribune, B-1. Gaslamp transients targeted, by Ray Huard.

All 16 seats have been removed from Gaslamp Square Park in a drive to reclaim the park from the derelicts, drug dealers and prostitutes who had taken over, says district parks director Tim Medina.

May 8, 1996, Design Review Committee. Information Items 1. El Prado aesthetic lighting - Tim Cartier, Staff, Engineering & Capital Projects: Tom Cartier, staff project manager, and Chris Kraft, lighting consultant, solicited comments and concerns from the Committee members regarding the proposed aesthetic lighting for the Prado area of Balboa Park. The lighting will enhance architectural features, such as uplighting of columns. According to consultant, no light fixtures will be seen by pedestrians. The consultant passed around photographs of typical building facades to be lit. This project will come back to the Committee as an action item when the lighting design is complete..

Communications: Dann Mallec reported on the second workshop conducted for the Balboa Park Activity Center. Issues addressed included planning and entrance to building. A third workshop will deal with architectural issues.

May 12, 1996, San Diego Union-Tribune, H-2. National Historic Preservation Week: Where history registers deeply/Park Service's list of sites is a trip into San Diego County's past.

NATIONAL REGISTER OF HISTORIC PLACES

California Quadrangle, El Prado, Balboa Park, San Diego
El Prado complex, Balboa Park, San Diego
Ford Building, Palisades area, Balboa Park, San Diego

U.S. Naval Hospital Buildings (Buildings 6, 11, 13, 17), Park Boulevard at Presidents Way, Balboa Park, San Diego.

May 19, 1996, San Diego Union-Tribune, 24. Born Free/Where dogs are at liberty, by Patricia Dibsie.

Locations in Balboa Park set aside for pets and their owners.

June 12, 1996, Design Review Committee. Action Items 2. El Prado aesthetic lighting - Tim Cartier, Staff, Engineering & Capital Projects; Chris Kraft, Consultant, Lumenessence: Motion by E. Yamada, seconded by M. Theilacker, to approve the proposed design plan for the aesthetic lighting of Casa del Prado and Casa de Balboa with the condition that adjustment of colors, filters and intensity be possible after implementation. Unanimous approval.

June 17, 1996, San Diego Union, Night & Day. Summer festival lineup pumps new excitement into historic Spreckels Organ, by Valerie Scher.

June 28, 1996, San Diego Union-Tribune. Council earmarks \$500,000 (in future hotel-motel tax revenue) to back creating (San Diego Symphony) orchestra, by Preston Turegano.

July 1, 1996, Balboa Park Committee: (missing).

July 10, 1996, Design Review Committee. Action Items 2. Kate Sessions statue, Balboa Park - Jack Krasovich, Deputy Director, Central Division Parks & Recreation; Ruth Ann Hageman, statue committee chair: Motion by F. Blecksmith, seconded by E. Yamada, to approve the concept of a statue itself, but restudy the appropriateness of pedestal and rock setting, and return to the Committee with at least three (3) alternative setting concepts. Unanimous approval. 5. Balboa Park Activity Center - Pat Nila, Staff, Engineering & Capital Projects Dept.; Consultant team: Richard Blackman, Ron Quigley, Martin Poirier: Motion by M. Theilacker, seconded by E. Yamada, to approve the schematic building design. Unanimous approval. Motion by D. Leonard, seconded by E. Heimlich, that space and grades between the north formal gardens and the new Activity Center be restudied, and return to the Committee for review and approval. Unanimous approval.

July 11, 1996, San Diego's Weekly Reader, 5, 12. Loopholes in the park, by Thomas K. Arnold

August 14, 1996, San Diego Union-Tribune. RNC (Republican National Convention) disrupts conventional traffic, by Mark Arner.

Unpublicized closure of two major parking lots.

August 14, 1996, San Diego Union-Tribune. Old (Morley Field) courts provide welcome haven to tennis fanatics, by Don Norcross.

August 18, 1996, San Diego Union-Tribune, E-5. Datebook: (Lyn Larsen) organ soloist's choice vindicated, by Lyn Larsen.

He likes to talk tibias. Especially since the 81-year old Spreckels Organ has a new one.

September 6, 1996, San Diego Union-Tribune. (Pauline des Granges) She's Miss San Diego after 55 years, by Ed Jahn.

Director of Park & Recreation Dept. from 1964 to 1974.

September 9, 1996, Balboa Park Committee. Chairperson's Report: Ms. Lacy introduced a new member to the Balboa Park Committee, Mrs. Mary Elizabeth North, and welcomed her to the committee. She mentioned that the Park & Recreation Board did not meet in August; however, the Board did approve the Balboa Park Activity Center Concept Design at the July 10, 1996 meeting. She announced that the dedication and grand opening of the House of Charm will be held on Saturday, September 21, 1996, 1:00 p.m. and she hopes all committee members will attend.

Staff Report: Penny Scott reported on several Council docket items including approval of the ADA access ramps to the Organ Pavilion, authorization to execute a new 30-year lease with the San Diego Space and Science Foundation (R. H. Fleet), and execution of a lease agreement with Lumen Ventures, Ltd. for the restaurant and catering operation in the House of Hospitality. Mr. Streeper requested staff referral on 65 mph signage on Highway 163 which is causing some confusion. Staff to report at the next scheduled meeting.

Action Item (Adoption) 201. Statue of Kate Sessions - proposed alternative locations: MSC It was moved, seconded and carried unanimously to reaffirm the committee's position and recommend placement of the statue on the southwest corner of Laurel Street and Balboa Drive (Estrada/O'Hara 6-0).

Workshop Item 301. "State of the Park" annual event: Ms. Scott distributed copies of a letter from Mr. Tim Larrick, member of the Balboa Park Endowment Fund Advisory Board of the San Diego Community Foundation, and a response by Deputy Director Jack Krasovich regarding a possible "State of the Park" annual event. After considerable discussion and individual member comment, the committee declared unanimous consensus to take the lead in planning and organizing such an event. Ms. Lacy asked for volunteers who would like to participate with staff and other Park committees and organizations to develop the possibilities. Ms. Lacy will also contact other committee members, who were absent from today's meeting, to explore their interest as well. Staff will schedule a preliminary meeting before next month's regular committee meeting.

Information Item 401. United Nations Lease: The new 5-year lease agreement was adopted by Council on July 29, 1996 and was restructured to make the lease more consistent with other Balboa Park lease agreements.

September 11, 1996, Design Review Committee. Communications: Roger DeWeese expressed frustration that the Committee's opinions are ignored on significant projects. Action Item 1. Kate Sessions statue alternative siting/setting, Balboa Park - Jack Krasovich, Deputy Director, Central Division Parks & Recreation; Ruth Ann Hageman, Staff Committee Chair: Motion by F. Blecksmith, seconded by M. Theilacker, to approve location near Laurel and Balboa Drive, without pedestal and rock seating, with appropriate landscape and a minimum of hardscape. Project to return to Committee with hardscape and landscape design, and more detail of exact location, orientation, associated signage and lighting, if any. Unanimous approval.

September 13, 1996, San Diego Union-Tribune. E-7. Theater Town: Starlight shows signs of life with director (Brian Wells), bowl play ("Little Shop of Horrors"), by Michael Phillips.

September 15, 1996, San Diego Union-Tribune, D-5. Hindsight: Sesquicentennials approach - Ponder 150 years of change, by Roger Showley.

State librarian Kevin Starr's address to Committee of 100.

September 15, 1996, San Diego Union-Tribune, E-1. Datebook: Art Institute's palette lacking in green, by Preston Turegano.

Although 10,000 square feet in the rebuilt House of Charm is set aside for the Art Institute, the organization currently lacks the financial means to move in.

September 15, 1996, San Diego Union-Tribune, E-5. Amid (Art) institute's battles, director (Shirley Viennese) comes under fire, by Preston Turegano.

September 19, 1996, Park & Recreation Board. Director's Report: As of October 14, 1996 the Central Division will become Metro Parks.

September 22, 1996, San Diego Union-Tribune, E-1. As a new millennium nears, so does new era of prosperity for park, by Welton Jones.

Possibilities to make the park more inviting: parking garage in east wall of Cabrillo Canyon; use every square foot of park space for public use; major theme park below Morley Field between Florida and Pershing Drives all the way to Interstate 5.

September 22, 1996, San Diego Union-Tribune, E-1. Architecture Review: with panache, if not perfection project gets House (of Charm) in order, by Ann Jarmusch.

September 22, 1996, San Diego Union-Tribune, E-2. Letters: Art Institute story painted an incomplete picture (Timothy Field, vice president, San Diego Art Institute); Director's critics don't speak for all (Paul Stangeland, president, San Diego Art Institute).

September 30, 1996, San Diego Union-Tribune, B-4. Art Institute reaches agreement with city, will open by April 1, by Welton Jones.

October 7, 1996, Balboa Park Committee. Action Item (Adoption) 201. Twenty Year Needs List - update. Workshop Items 301. Proposed RFP for Roller Hockey Facility at Morley Field. 302. State of the Park Event planning.

October 9, 1996, Design Review Committee. Chairperson's Report: Chairperson Glassman reported that he discussed with the Park & Recreation Board the committee's frustration with their recommendations being ignored by the Board.

October 17, 1996, Park & Recreation Board. Action Item (Adoption) 101. Kate Sessions statue in Balboa Park - Jack Krasovich. Information Item 4. Public involvement/Community Art Projects - Gail Goldman.

October 18, 1996 (?), Park & Recreation Board. Director's Report: A tree will be planted in Balboa Park to honor the memory of Jack Argent, a former Park & Recreation employee. . . . Ms. McLatchy reminded everyone that Christmas on the Prado will be held the first weekend in December. The poinsettia display will open Friday, December 6 in the Botanical Building. She thanked the San Diego Community Foundation, the Balboa Park Endowment Fund, and City Beautiful for their many contributions all year long.

Action Items (Adoption) 101. Kate Sessions statue in Balboa Park: Mr. Jack Krasovich, Metro Parks Division Deputy Director, reported that the proposed bronze statue has been approved by the Balboa Park Committee, the Historical Site Board, and the Design Review Committee. The statue will be placed south of El Prado at Balboa Drive as it is on the side of the park most closely identified with Kate Sessions's nursery. Ms. Ruth Ann Hageman, a representative of the Kate Sessions Sculpture Committee, presented an overview of the project. Artist and Sculptor Ruth Hayward showed the Board an 18" replica of the statue to better describe how it would be designed and displayed. The cost of the project is approximately \$70,000 and will include a maintenance endowment. All funds will be raised privately.

Motion Moved/Seconded Mr. Glassman/Ms. Lacy: The design and location of the proposed Kate Sessions statue was approved unanimously by the Board.

October 27, 1996, San Diego Union-Tribune, H-1. Commentary: Smell of success getting sweeter/Orchids and onions jurors like what they see in design – mostly, by Ann Jarmusch.

House of Charm, an orchid recipient, is a re-creation, not the faithful restoration preservationists pressed for, of an original 1915 Panama-California Exposition building.

Onion: Balboa Park lawn removal at lily pond, City of San Diego: for landscape architecture, planning.

November 13, 1996, Design Review Committee. Chairperson's Report: Chairperson Glassman reported that he had reiterated to the Park & Recreation Director the Committee's concern that their recommendations were not being accepted by the Park & Recreation Board.

November 21, 1996, Park & Recreation Board. Director's Report: Ms. McLatchy reported that the Park & Recreation Dept. is doing their own customer service survey. A requirement of the Performance Based Budgeting is to survey our "customers" at least twice a year to determine how best to serve them. Park & Recreation will be handing out surveys at Christmas on the Prado as well as twelve other locations throughout the city. Results of the survey will be reported to the Board in early 1997.

Balboa Park Committee Report: Ms. Peggy Lacy encouraged everyone to attend Christmas on the Prado the weekend of December 6 and 7.

November 24, 1996, San Diego Union-Tribune, H-1. Spanish-Colonial Revival/Paying tribute to city's building legacy/Bertram Goodhue, by Roger Showley.

New York architectural historian David Garrard Lowe recommends San Diego name a street or square after Bertram Grosvenor Goodhue

Evaluation, biographical data and significant works of Bertram Goodhue.

November 24, 1996, San Diego Union-Tribune, H-4. Bertram Goodhue/Drawings and books came his architecture, by Roger Showley.

November 26, 1996. City Council adopted 30-year lease with San Diego Space and Science Foundation for Space Theater in Balboa Park, Resolution No. R-288099; Doc. No. 00-18324.

California Statewide Communities Development Authority . . . first sublease
for the purpose of financing the acquisition, construction and equipping of certain additions and
improvements

CSCDA to make lease payments to the foundation for the lease thereof

CSCDA will lease facilities back to the foundation and the foundation will agree to make lease
payments to CSCDA . . . second sublease

December, 1996, San Diego Magazine, 110+, Born-Again Balboa Park; for 80 years, park-lovers have stood
between the handsome old Spanish buildings of Balboa Park and the wrecking ball. With the rescue of the
last two historic landmarks on El Prado, the work is complete . . . almost, by Virginia Butterfield.

December 2, 1996, Balboa Park Committee. Action Items (Adoption) 201. Camp Cahito temporary cabins.
Workshop Item 301. Balboa Park Committee strategic planning. Information Item 401. Arizona Landfill
public art project.

December 9, 1996 (received), Production Center for documentary drama at San Diego State University:
Postcards from the Fair: San Diego's 1935 California-Pacific International Exposition.

Also, The California-Pacific International Exposition Half Dollars.

December 22, 1996, Los Angeles Times, Home Edition, Opinion Piece Section, M-1. City Life by Thomas
Bender.

Lite urbanism obscures the social fact of interdependence thus undermining our social obligation to
nourish a common life. The urban commons is abandoned in the City Lite. But the gritty city
survives under the glitter.

December 22, 1996, San Diego Union-Tribune, G-5. Q & A (Questions and Answers): Kevin
Starr/California State Librarian, historian, by Kevin Starr.

December 23, 1996, E-5. State of the Arts: (Starlight) Bowl 'breaking, by Preston Turegano

San Diego Civic Light Opera officials have officially started a \$1.3 million redo of Balboa Park's
Starlight Bowl. Last year, a new stage access road was built at a cost of \$100,000.

Also, MoPa (Museum of Photographic Arts) singled out for receiving \$60,000 grant from National
Endowment for the Arts.

Also, Organization support award of \$66,862 from California Arts Council to the Old Globe
Theater.

December 23, 1996, San Diego Union-Tribune, B-4. Shuffleboard courts are being shuffled off; usage is
down in La Mesa; need for parking space is up, by Mark Arner.

Paul Anderson, manager of complex, blames shuffleboard's demise on a rise in population of
homeless people and on the often-brazen antics of young roller skaters and shakeboarders.

"Seniors don't feel safe around either group," he said.

.

1997

Summary of Events in 1997

(Note: Dates of events are only approximate.)

City okays statue of Kate Sessions in park (March 6, 1997)

Earth Day (April 20, 1997)

National Trails Day (June 7, 1997)

Cindy Zimmerman temporary art project on landfill
(June 7, 1997)

Opening of new House of Hospitality (September 13, 1997)

Christmas on Prado (December 5 - 6, 1997)

January 6, 1997, Balboa Park Committee. Action Item (Adoption) 201. Quince Street and Richmond Street Bridges - Proposed Seismic Retrofit. Information Items 401. R. H. Fleet Space Theater and Science Center Expansion.

January 8, 1997, Design Review Committee. Action Item 2. Quince Street and Richmond Street Bridges - Proposed Seismic Retrofit: Gary Stromberg, Staff, Metro Parks Division; Roger Carlin, Design Engineer, Caltrans, District 11. Motion by R. Utt, seconded by M. Theilacker, to approve the encasement of the Richmond Street bridge columns as proposed; to investigate an alternate retrofit design for Quince Street bridge with abutments at the bridge ends and concrete infill in the center (If this is not feasible then the proposed infill design is acceptable); Reevaluate the factors used for structural calculations (i. e. distance to Rose Canyon fault line); match exiting concrete on both bridges to maintain historical integrity; and provide mature landscaping (i.e. vines and shrubs). Unanimous approval.

January 16, 1997, Park & Recreation Board. Action Items (Adoption) 105. Cal Trans Retrofitting Balboa Park bridges - Deborah Sharpe. Ms. Deborah Sharpe, Park Planner with the Northern Parks Division, explained that because of the historic significance of the two bridges in question, the Richmond Street and Quince Street structures over Highway 163, Caltrans has proposed a alternative design for seismic retrofitting. The Balboa Park Committee and the Design Review Committee have approved the alternative design with a few modifications that are being done by Caltrans. She introduced Mr. Majid Kharrati, Engineer from Caltrans, who explained the project in detail and how they arrived at this alternative design. He also reported that a mandate requires completion of all retrofitting by the end of 1997.

Motion Moved/Seconded Ms. Lacy/Ms. Weinsheim: The alternative design proposed by Caltrans was unanimously approved by the Board.

Information Item 202. Fleet Space Theater & Science Center - Expansion Plans - Jeffrey W. Kirsch. Dr. Jeffrey Kirsch, executive director of the R. H. Fleet Space Theater and Science Center, presented a detailed overview of the expansion plans for the facility. Over \$5 million has been raised in cash and pledges with a target of \$6.5 million. Currently, they are finalizing the construction contract with Soltek with the official groundbreaking scheduled for February 4, 1997 and completion expected in May of 1998.

Director's Report. Ms. McLatchy introduced Michael Behan and Ted Medina, newly appointed Deputy Directors of the Metro and Northern Parks Divisions. Mike is replacing Jack Krasovoch, who is retiring at the end of January, and Ted will replace Nancy Acevedo, who retired late last year.

Balboa Park Committee Report: Ms. Lacy spoke briefly about the Reuben H. Fleet Space Theater and Science Center expansion and how important this will be to Balboa Park. She also reported that at the last Balboa Park Committee the responsibilities and priorities of the Balboa Park Committee were defined. It was clearly stated that the Balboa Park Committee will represent the city in the chain of command.

January 20, 1997, San Diego Union-Tribune, E-6. Three years later, Fleet Space Theater's expansion is finally a go, by Preston Turegano.

January 27, 1997, San Diego Union-Tribune, B-1. Fleet to showcase San Diego high-tech; Science Center begins \$13 million expansion, by James Steinberg.

February 3, 1997, Balboa Park Committee. Action Items (Adoption) 201. Approval of proposed design for Blind Recreation Center - Kevin Oliver. Workshop Items 301. Parking issues - Balboa Park.

February 12, 1997, Design Review Committee. Action Items 1. Blind Recreation Center - Balboa Park - Kevin Oliver, Staff, Northern Parks Division; Chris Talbot, Consultant, RNP Architects. (Elizabeth Yamada abstained from discussion and voting due to a conflict of interest.) Motion by R. Utt, seconded by M. Theilacker, to approve design with the following conditions: 1) Provide a landscape planter on lower level along wall; 2) Reevaluate parking ingress and egress; 3) Review ADA requirements for visually impaired persons; and 4) Return to committee as information item with lighting and signage details (lettering), and special surface treatments of hardscape areas for visually-impaired persons. Vote 7 in favor, 1 abstention. Motion passes.

February 23, 1997, San Diego Union-Tribune, H-1. It should be Balboa Park not car park, by Roger Showley.

February 25, 1997. Docket for regular Council Meeting. Item 52. First amendment to the reimbursement agreement with the Museum of Natural History to fund space conditioning, fire suppression, and structural improvements

March 3, 1997, Balboa Park Committee. Action Items (Adoption) 201. Marston House public restroom. Workshop Items 301. Parking Issues - Balboa Park update. Information Items 401. Pershing Drive storm drain replacement.

March 12, 1997, Design Review Committee. Action Item 3. Marston House restrooms - Harry Slayen, Staff, Public Buildings & Parks Division. Motion by M. Theilacker, seconded by E. Yamada, to approve the restrooms as presented with accessible walkway details to return to this committee. Vote: Unanimous approval.

Communications: Michael Theilacker advised the Committee that the Japanese Garden Master Plan amendment, or proposed changes, have not been reviewed by this Committee. Penny Scott, staff to the Balboa Park Committee, was present and responded to his concern. She said the Japanese Garden Master Plan amendment will be on the Balboa Park Committee's April 7th agenda, and will then come to the Design Review Committee.

March 20, 1997. Park & Recreation Board. Requests for Continuance. 101. The Blind Recreation Center redevelopment plans. This item has been pulled from today's agenda and will be brought back at a future date.

Information Items 202. Pershing Drive storm drain replacement. Mr. Darren Greenhall, Senior Engineer from Environmental Services, gave a brief presentation on the replacement of the 42" Arizona landfill storm drain system. Currently located between Florida Street, Pershing Drive and the Morley Field recreation area in Balboa Park, the 38 year old storm drain system is rapidly deteriorating and replacement is critical to both the integrity of the landfill and to prevent a public health and safety problem. Seven alternative alignments for the storm drain were analyzed. The selected alignment will be located in Pershing Drive and will be approximately 1200 feet. Although this was not the least expensive alternative, it protects

the integrity of the landfill and will increase the stopping sight distance along the vertical curve in the crest of Pershing Drive, thus bringing into conformance with current design standards. Pershing Drive will be closed for approximately two months while the road is reconstructed.

203. Results of Citywide Park & Recreation Survey: Ms. Patty Jencks, Business Manager for the Park & Recreation Dept., provided the Board members with an update of the results of a Park & Recreation customer satisfaction survey taken in November of 1996. Over 500 surveys were received from City and County residents who used the facilities on a monthly basis. Facilities were rated very highly overall with a 96.7% satisfaction rate. Programs and services were also rated very high with an overall satisfaction of 91.7%. The physical condition of the restrooms was rated low with a 21.7% dissatisfied or very dissatisfied rating. An increase in recreation centers, neighborhood parks, and educational programs was most desired for the future. The level of safety perceived by park users rated our parks as very safe. The survey was very successful with a lot of valuable information received from our customers. The survey process will begin again in the summer.

Balboa Park Committee Report: Ms. Lacy reported that a committee had been formed to consider some changes in the Plaza de Panama area of Balboa Park. Mrs. North, a major contributor to the park, has offered to underwrite some improvements to the fountain area in the Plaza de Panama that will make the area more attractive and improve traffic flow. Ms. Lacy also voiced some concern about funding for the Hall of Champions improvements because of the problems associated with the Birch Foundation. The proposed athletic center on Park Boulevard is still undergoing environmental studies to determine the earthquake safety of the property. Ms. Lacy invited everyone to attend Earth Day in April.

April 9, 1997, Design Review Committee. Action Items. 2. Blind Recreation Center - Kevin Oliver, Staff, Northern Parks Division, Ralph Roesling, Consultant, RNP Architects. Motion by F. Blecksmith, seconded by M. Theilacker, to approve the proposed design as presented. Vote: Unanimous. 4. Marston House restrooms - Harry Slayen, Staff, Public Buildings & Parks Division. Motion to approve the access walk subject to the following conditions: 1) Accommodate any required turn-outs along access walk, especially at corners, to meet Americans with Disabilities Act requirements, and 2) Utilize an accessible material for the walkway which matches the existing dirt path, such as the road oil method of stabilizing soil. Vote: Unanimous.

April 17, 1997, Park & Recreation Board. Action Items 101. Blind Recreation Center redevelopment plans - Kevin Oliver. 105. Marston House public comfort station - Harry Slayen. Items unanimously approved on consent.

Director's Report: The Citywide Track Meet is scheduled for Saturday April 26 at Balboa Stadium.

Balboa Park Committee Report: Ms. Lacy invited everyone to attend Earth Day on Sunday, April 20. She also emphasized that parking would be minimal and advised those who wish to attend to park outside of Balboa Park and ride the tram or walk to the event. She also reported that the park is gearing up for summer with Twilight in the Park and Organ Pavilion concerts. National Trails Day will be celebrated on June 7.

May 5, 1997, San Diego Union-Tribune, B-1. A bright vision for new (Blind) center, by Logan Jenkins.

May 14, 1997, Design Review Committee. Action Items 2. Kate Sessions Statue landscaping - Penny Scott, Metro Parks Division; Ruth Ann Hageman, Statue Committee representative. Motion by R. Utt, seconded by R. DeWeese, to approve the concept of the statue with landscaping, site work and access to be addressed by a subcommittee composed of R. DeWeese, R. Utt, M. Theilacker, S. Glassman and the artist, with the proposed landscaped setting to come back to the Committee at a future date. Vote: Unanimous.

Information Item 1. Balboa Park Activity Center - Patricia Nila, Staff, Public Buildings & Parks Division; Richard Blackman, Consultant, Wheeler, Wimmer Blackman; Rob Quigley, Consultant, Quigley, AIA. The Committee expressed concern regarding the informality of the entry plaza and its non-conformity to the symmetry of the adjacent setting and future formal gardens.

May 15, 1997, Park & Recreation Board. Director's Report: National Trails Day will be celebrated on Saturday, June 7, at Florida Canyon. This marks the trail improvements performed by park rangers working with the National Civilian Community Corps youth volunteers and was funded through a matching grant from the State.

Information Items: 202. FY 98 Proposed Budget: Ms. June Dudas, Assistant to the Director, reported that during FY 97 the Department received several awards and recognition, including Orchid awards for Mission Trails Regional Park Visitors' and Interpretative Center, Tecolote Shores multi-ability play area, the Balboa Park Club and the House of Charm. Balboa Park was rated the number one urban park in the nation for the second straight year. The Inez Grant Memorial Rose Garden was rated the number one rose garden in the country for the second year in a row also. Torrey Pines Golf Course was rated among the top 50 courses in the country.

Balboa Park Committee Report: Ms. Lacy reminded everyone that National Trails Day will be celebrated on Saturday, June 7, beginning at 10:00 a.m. in Florida Canyon. Cindy Zimmerman, the artist, who is creating the temporary art project on the landfill will also begin work on June 7. Ms. Lacy was happy to report that progress has been made on the Plaza de Panama and the flower bed proposed by Mrs. North and Mr. Mike Behan, Metro Parks Division Deputy Director. Ms. Lacy pointed out the importance of outside funding contributing to projects the City cannot afford in their entirety. Parking problems continue in the park but for now more trams and other transportation modes will be considered in lieu of a parking structure.

Design Review Committee Report: Mr. Glassman reported that Ruth Ann Hageman and Lucy Warren made a presentation describing the proposed Kate Sessions statue landscaping. The statue will be placed at the corner of 6th Avenue on the south side of Laurel near the entrance to Balboa Park. The Design Review Committee thought the presentation was outstanding but felt the landscaping should be more reflective of what Kate Sessions meant to the City of San Diego.

May 26, 1997, Los Angeles Times, Home Edition, Part A Section, A-3. San Diego Zoo and Sea World in Wild Race for Visitors, by Tony Perry.

Disney Corp. is building its 500-acre animal kingdom in Orlando, Fla., set to open in 1998. Disney has hired away San Diego Zoo personnel to help with its project, in the name of conservation, the zoo is presenting Disney with rare animals for its collection.

June 5, 1997, San Diego Union-Tribune, Night & Day-27. Just a quarter-mile from town through wilderness/National Trails Day, opening of Florida Canyon trails, by Patricia Kay.

June 11, 1997, Design Review Committee. Request for Continuance Item 3. Plaza de Panama traffic delineator. Action Item 4. Kate Sessions statute landscaping; Motion by S. Andrews, seconded by D. Baldwin, to approve the landscaping as presented. Vote: Unanimous approval. Motion passes.

June 19, 1997, Park & Recreation Board. Balboa Park Committee Report: Ms. Peggy Lacy reported on the following: The Organ Pavilion concerts have begun. They are held on Monday's at 8:00 p.m. "Twilight in the Park" has returned on Tuesdays, Wednesdays and Thursdays in the Organ Pavilion from 6:15 p.m. to 7:15 p.m. and is free to the public. Construction continues on the House of Hospitality with a grand opening scheduled for September 13, 1997. The Reuben H. Fleet expansion is moving forward as are the upgrades to the Starlight Bowl. The Alcazar Garden is going through the review process and a contract will be forthcoming. Ms. North's "flower bed" or traffic delineator section is progressing nicely. The Gymnasium (Activity Center) is on schedule. All questions involving any possible movement of the earth have been resolved. There is no earthquake fault running through or anywhere near the property. Groundbreaking should occur sometime in late September or early October with completion in approximately 18 months.

Design Review Committee Report: The Plaza de Panama traffic delineator is a continued item. The landscaping in front of the Kate Sessions statue was discussed. An ad hoc committee was formed and met

with the Design Review Committee prior to the regular meeting. They presented a new landscaping plan that will greatly enhance the area around the statue and provide a much better atmosphere.

June 22, 1997, San Diego Union-Tribune. E-4. Midway museum is no sure thing, nor is its financial success, by Welton Jones.

July, 1997, San Diego Home/Garden, 14-14-17, Paradise or Parking Lot? Five years later; Balboa Park master plan for traffic and parking is stalled, by Damon Hedgpeth.

July 6, 1997, San Diego Union-Tribune, E-1. The outside chances/Planes! Bugs! In open-air theater, surprises wait in wings, by Michael Phillips.

July 6, 1997, San Diego Union-Tribune, H-10. Help yourself to Hospitality, by Roger Showley.

About 1,550 pieces of the House of Hospitality will be sold or auctioned off Saturday.

July 9, 1997, Design Review Committee. Information Items: 1. Balboa Park Security Lighting Upgrade Phase II - Henry Slayen, Staff, Public Buildings & Parks Division. Harry Slayen from Public Buildings & Parks gave the Committee a status report on the lighting projects in Balboa Park. 2. Plaza de Panama Fountain Phase II traffic diversion plan - Mike Behan, Deputy Director, Metro Parks Division; Steve Estrada, Consultant, Estrada Land Planning. Scott Molentin from Estrada Land Planning presented a proposed landscape plan to divert traffic around the fountain in order to removed the orange traffic bollards. Committee members expressed concern that the proposed design creates high liability exposure for the city and the designer. It was recommended that the design take into consideration the incorporation of future traffic bollards as barriers if warranted. Botts dots with reflectors were also recommended in front of traffic island. 3. Park & Recreation Board Signage Policy Review. Staff was directed to draft quantifiable language that covers advertising and signage for cooperative and join facilities, such as YMCS, Jewish Community Centers, etc., in order to acknowledge the Park & Recreation Department's involvement. Also, commercial signage should have quantifiable standards.

July 17, 1997, Park & Recreation Board. Information Items 201. Plaza de Panama Fountain Phase II, traffic diversion plan - Mike Behan: Mr. Mike Behan, Metro Parks Division Deputy Director, presented an overview of the restoration of the Plaza de Panama, which included construction of a fountain located in the center of the Plaza. The funds for the fountain were generously contributed by Mrs. Elizabeth North. Because of the location of the fountain, it was necessary to redirect traffic flow which resulted in functional, but visually unattractive, orange plastic traffic delineators. Mr. Behan reported that Mrs. North has made another significant contribution towards a more aesthetically-pleasing traffic diversion island. Total cost of this project will be shared by both the City and Mrs. North.

Director's Report: A formal proclamation was issued by the City Council designating July as "Park and Recreation Month."

Roger Hedgecock Show was broadcast live in Balboa Park Friday, June 11.

Balboa Park Committee Report: Ms. Lacy reminded everyone that many activities are happening in the Park now that summer is here. "Twilight in the Park" has begun as well as the Organ Pavilion concerts. The "Jurassic Park" exhibit has opened at the Natural History Museum.

Design Review Committee Report: An update on the security lighting projects in Balboa Park was provided by Mr. Harry Slayen from Public Buildings & Parks.

July 17, 1997, Seattle Plus Getaways. Balboa Park has grown into San Diego's cultural oasis, by Suzanne Hopkins, Los Angeles Daily News.

Interview with Mardi Snow, public relations director for the park.

August 22, 1997, San Diego Union-Tribune, B-1, B-4. At weekly school (at Centro Cultural de la Raza) in park, Chicanos learn of their indigenous heritage, by Lionel Sanchez.

September, 1997, San Diego Home/Garden, 14+, Restoring the Faith, by Damon Hedgpeth.

The House of Hospitality is one of the Prado's greatest buildings, designed to be the living room of San Diego.

September 8, 1997, Balboa Park Committee. Action Items (Adoption) 201. Organ Pavilion restroom replacement. 202. San Diego Museum of Art fire code compliance. Information Items 401. East Mesa Earthworks - Insites '97 - Cindy Zimmerman, artist.

September 10, 1997, Design Review Committee. Chairperson's Report: S. Glassman announced the receipt of the draft EIR for Inspiration Point Precise Plan (F. Blecksmith to review on Committee's behalf.) He also received a copy of a letter addressed to the City Council from Grace Brophy regarding the current direction of the Japanese Friendship Garden slated for Balboa Park. Staff was directed to follow-up and find out why the revised master plan has not come to this committee.

Action Items 2. Balboa Park - Museum of Art fire compliance - Pirouz Etemad, Staff, Public Buildings & Parks Division; Paul Johnson, Consultant, Ferris, Johnson, Perkins Architects: Motion by E. Yamada, seconded by D. Goldman, to approve proposed plan with the following conditions: 1) Additional study to explore options for providing an exit from Gallery 16. 2) Fire exit door to be similar in design as existing door on first floor, east side, and 3) The removed trees to be replaced in kind with similar size, if existing trees cannot be reused. Vote: 4 in favor; 3 opposed; 2 abstained. Motion passes.

Item 3. Balboa Park - Organ Pavilion Restroom Replacement - Pirouz Etemad, Staff, Public Buildings & Parks Division; Pirouz Etemad, designer: Motion by M. Theilacker, seconded by F. Blecksmith, to revise architectural design to be more reflective of Spanish-Colonial style and return to this Committee with the following concerns addressed: 1) Review the floor plan to eliminate direct views into stalls and provide street identification of entry ways. 2) Consider use of windows as in existing restroom building to keep in style with existing nearby buildings. 3) Provide natural ventilation in lieu of exhaust fans, and 4) Show which trees will be impacted or removed on west side of building. Vote: Unanimous approval.

Information Items 1. Balboa Park - Casa del Rey Moro Garden Interpretive Sign: Steve Wallace from Public Buildings & Parks Division presented the proposed interpretive sign to be placed on the House of Hospitality in the garden area, and received input from the Committee.

September 18, 1997, Park & Recreation Board. Director's Report: The House of Hospitality reopened officially on Saturday, September 13. The restaurant, which is behind schedule, is expected to open sometime in December. In the meantime catering is being done from another facility. . . . The General Fund departments (excluding Police, Fire and Lifeguards) have been asked to absorb \$1.5 million. Park & Recreation's share is approximately \$450,000.

Balboa Park Committee Report: Ms. Lacy reported that the House of Hospitality celebrated its grand reopening on Saturday, September 13. The Inspiration Point Precise Plan will be discussed at the next meeting. The Law Enforcement Committee will begin meeting on a bi-monthly basis starting one half hour before the regularly scheduled meeting of the Balboa Park Committee.

Design Review Committee Report: The Organ Pavilion restroom replacement was unanimously approved with recommendations. . . . Balboa Park Casa del Rey Moro Garden interpretive sign was the only information item.

October 6, 1997, Balboa Park Committee. Action Items (Adoption) 210. Inspiration Point Precise Plan. Information Items. 401. Balboa Park parking issues - update.

October 8, 1997, Design Review Committee. Action Items 2. Balboa Park - Organ Pavilion restroom replacement - Pirouz Etemad, Staff, Public Buildings & Parks Division, and designer. Motion by D. Goldman, seconded by R. Blecksmith, to approve the restroom design with the following conditions: 1) Reduce height of vent chimneys to match existing chimneys; 2) Include two lights on east side of building, use ornamental type lights on exterior; and 3) Return to the Committee with lighting and signage details. Don Goldman will meet with the project designer to work out some of the details which concerned Committee members. Vote: Unanimous approval. 5. Inspiration Point Precise Plan - Kevin Oliver, Staff, Northern Parks Division; Ron Pekarek, Consultant, Pekarek Group. Item 5 continued until the November meeting at the request of the project manager.

October 16, 1997, Park & Recreation Board. Balboa Park Committee Report: Ms. Lacy reported on the parking problems at Balboa Park and that there are no plans to build a parking facility anytime in the near future. There are plans to improve the existing tram service by making it more efficient and user-friendly. It is anticipated that this will draw visitors out of the core of the park in terms of parking and will help ease some of the congestion problems. Ms. Lacy was happy to report that approximately 13,000 people participated in the recent AIDS walk. Because of budgetary problems, the Kidzart Festival held recently in the park will be their last.

Design Review Committee Report: Mr. Glassman reported that the Balboa Park Organ Pavilion restroom replacement design was unanimously approved with recommendations.

October 17, 1997, San Diego Union-Tribune, E-6. (Cindy Zimmerman's) Sculptures celebrate "hidden" Balboa Park, by Robert L. Pincus.

Also, "Spirits in Stone" exhibit of Shona tribal artists from Zimbabwe at Natural History Museum.

October 22, 1997, San Diego Insider. Com. County Board to join Preservation Program: program aimed at preserving 172,000 acres and protecting 85 endangered plants and animals.

October 25, 1997. East Mesa Earthworks opens

November 3, 1997, Balboa Park Committee. Action Item (Adoption) 201. Inspiration Point Precise Plan. Information Item 401. Balboa Park parking issues.

November 20, 1997, Park & Recreation Board. Director's Report: Overall results of Summer Park User Customer Survey were positive and showed an overall satisfaction rate of 91.7%. Customers felt strongly about the need for more youth diversion activities and recreation programs. . . . Information Items: Rock 'n Roll Marathon will be held on Sunday, June 21, 1998. The course begins near Balboa Park and will end in Horton Plaza. Twenty six rock n'roll bands will provide live music along each mile of the race. The event is expected to raise \$10 million for leukemia research and approximately \$250,000 in TOT funds.

. . . Balboa Park Committee Report: Ms. Lacy announced that Christmas on the Prado will be held on Friday, December 5, and Saturday, December 6, in Balboa Park. The "traffic controlling flower bed" on the Prado is in the process of being installed. The Inspiration Point Precise Plan will be discussed at the December meeting. . . . Design Review Committee Report: No meeting. Mr. Glassman announced that the Inspiration Point Precise Plan and the Balboa Park Activity Center will be discussed at the December 10 meeting.

December, 1997, Westways, 25-31+, "All holy sites are sacred, but not all sacred sites are holy in the sense of their being connected to the worship of God.

In the West's wide-open spaces, sculptors turn mesas into museums and gullies into galleries with art made of land, light, and lighting.

December 1, 1997, Balboa Park Committee. Action Items (Adoption) 201. Balboa Park tram issue.

December 6, 1997, San Diego Union-Tribune. Christmas on Prado is called “amazing,” by Cheryl Clark.

December 7, 1997, B-1. Centerpiece of Prado is at center of controversy/Restaurant’s delayed opening feeds anger of park supporters, by Roger Showley.

“We know everyone is fit to be tied about it,” said Peggy Lacy, chairwoman of the Balboa Park Committee that oversees park improvements for the Park & Recreation Board. “And it doesn’t take a brain surgeon to figure out why.”

She and others blame the restaurant’s leaseholder . . . John Co. Calabotta.

1998

Summary of Events in 1998

(Note: Dates of events are only approximate.)

Kate Sessions' statue unveiled (April 1, 1998)

Second floor emergency exit for Museum of Art (April 16, 1998)

Earth Day (April 19, 1998)

Natural History Museum expansion approved (May 5, 1998)

National Trails Day (June 6, 1998)

Summer Fest (June 27, 1998)

Brezzo quits as director of Museum of Art (July 1, 1998)

Old Globe party in Plaza de Panama (November 24, 1998)

Christmas on Prado (December 4 - 5, 1998)

January, 1998, San Diego Home/Garden. Big. Bigger. Biggest. Are expansion projects corrupting historic buildings in Balboa Park?, by Wayne Carlson.

January 5, 1998. Balboa Park Committee Meeting. Adoption: 201. Inspiration Point Precise Plan; 202. Leash Free Dog Areas in Public Parks.

January 14, 1998. Design Review Committee of the Park & Recreation Board Meeting. Action Items: 1. Balboa Park - Inspiration Point Precise Plan . . . Kevin Oliver, Northern Parks Division, Ron Pekarek, Consultant, Pekarek Group; Motion by S. Andrews, seconded by D. Leonard, to approve the proposed precise plan as presented subject to the revision of the Activity Center Plaza, between the historic north courtyard and the Activity Center Building to address the aesthetic and physical transition. The Committee feels that the Activity Center seriously compromises the Precise Plan and does not comply with the Balboa Park Master Plan in terms of recreating the historic courtyards and providing disabled access between the two park areas which may be in violation of the Americans with Disabilities Acts Guidelines.

Vote 9 in favor, 1 abstention.

January 15, 1998. Park & Recreation Board Meeting. Adoption 101. Balboa Park Inspiration Point Precise Plan - Kevin Oliver. . . . Balboa Park Committee Reports. Ms. Lucy reported that Christmas on the Prado was a huge success. She also invited everyone to visit the Botanical Gardens as the orchids are in full bloom. It is anticipated that the Alcazar Gardens could be open sometime in April. Free organ concerts every Sunday.

January 29, 1998, San Diego Union-Tribune, B-2. Stamp honoring Panama Canal debut unveiled in ceremonies at Balboa Park, by Caitlin Rother.

February 2, 1998, Balboa Park Committee Meeting. Adoption 201. Leash Free Dog Areas

in Public Parks; 202. Natural History Museum Proposed Expansion. . . . Information Items: 401. Balboa Park Parking Issues - Update.

February 11, 1998. Design Review Committee Meeting. Action Items. 2. Balboa Park - Museum of Art Fire Code Compliance - Pirouz Etemad, Staff Engineering & Capital Projects, Paul Johnson - Consultant, Ferris, Johnson & Perkins, Architects. 3. Balboa Park - Organ Pavilion Restroom Replacement - Pirouz Etemad, Staff Engineering & Capital Projects, Carlos Rodriguez - Consultant, Rodriguez & Simon Design Associates. 5. Balboa Park - Natural History Museum Proposed Expansion - Deborah Sharpe, Staff Park & Recreation, Richard Bundy, Consultant, Architects Bundy & Thompson.

Communications: Roger DeWeese was commended by committee members for his succinct letter to decision-makers regarding the proposed Balboa Park Activity Center and its approval process. Chairperson Glassman said he would bring up the issue at the upcoming Park & Recreation Board.

2. Action Items: Museum of Art Fire Code Compliance: Motion by M. Theilacker, seconded by D. Goldman, to approve the design alternative which as a high, flat
3. roof with
4. cap, including a dropped interior ceiling and increase in door height to 9'0", and extend the addition beyond the face of the 1973 addition.

Vote: Unanimous approval.

3. Action Items: Organ Pavilion Restroom Replacement: Motion by R. Utt, seconded by M. Theilacker, to approve the proposed restroom replacement as presented with primary access either split or widened by 50%, and plumbing venting hidden on backside of roof away from street.

Vote: Unanimous approval.

5. Action Items: Natural History Museum Proposed Expansion. Motion by R. Utt, seconded by R. DeWeese, to approve the director's recommendation with the following conditions: 1) Reevaluate service access and possible alternative mechanical and structural elements that can service that function without creating a circulation and visual barrier; 2) Reconsider the north entrance access by raising the grade and accommodating persons with disabilities and others by entering at the building's second level; 3) Provide a visual terminus (focal point) where sidewalk meets the parking lot on northside; 4) Obtain consultation from certified arborist on preservation of all significant trees and how the proposed expansion will affect them, and; 5) Return to the committee to present service access and north entrance reconsiderations.

Vote: Six in favor, one in opposition - motion passes.

February 15, 1998, San Diego Union-Tribune, E-3. It takes gumption we've lost to build civic pride, by Welton Jones.

February 19, 1998, Park & Recreation Board. Requests for Continuance: At the request of the Natural History Museum staff item #102 has been pulled from today's agenda. It will be brought back to the Board at a later date. . . . Communications: Mr. Anthony Mournian, Attorney, discussed the issue of "leash free" areas for dogs and described some of the problems that are occurring at Grape Street Park.

Director's Report. Ms. McLatchy reported that the City anticipates a \$45 million budget shortfall for FY 98/99. The City Manager has directed each department head not to fill any existing vacancies other than critical safety positions until further notice.

Ms. McLatchy explained that the department is looking very seriously at corporate sponsorships and partnering with private industry as another source of revenue for programs and projects.

Ms. McLatchy announced that she and June Dudas, assistant to the director, are creating a task force to develop a Park & Recreation strategic plan for the 21st century.

Ms. McLatchy discussed the Channel 8 News report of February 16 which focused on “city slackers” in Balboa Park. The employees, a tree-trimming crew and two grounds maintenance workers, were observed over a period of days not adhering to the guidelines set forth by the Park & Recreation Department. Mike Behan, Metro Park Deputy Director, and his staff are conducting fact findings and appropriate disciplinary measures will be taken if warranted. Channel 8 did point out that this was just one small incident out of an otherwise very hardworking and diligent group of employees.

Action Items, Adoption, 101. Balboa Park - Inspiration Point Precise Plan: Mr. Kevin Oliver, Park Designer with the Northern Parks Division, explained that Inspiration Point is one of several areas in Balboa Park that was authorized for further development in the form of a Precise Plan by the Balboa Park Master Plan. The Plan, nearly seven years after its inception, has been approved by the Balboa Park Committee and the Design Review Committee, subject to the revision of the Activity Center Plaza, between the historic north courtyard and the Activity Center building, to address the aesthetic and physical transition. The Committee feels that the Activity Center seriously compromises the Precise Plan and does not comply with the Balboa Park Master Plan in terms of recreating the historic courtyards and providing disabled access between the two park areas, which may be in violation of the Americans with Disabilities Act. The Committee is recommending that the wall between the two facilities be removed.

Mr. Oliver introduces Mr. Ron Pekarek, landscape architect, who presented a historical review of the plan, the criteria that was followed and what the plan accomplished.

Mr. Roger DeWeese, Design Review Committee member and landscape architect, spoke on behalf of the recommendations made by the Design Review Committee.

Mr. Mike Behan, Metro Parks Division Deputy Director, has contacted Darren Greehall, Senior Project Manager for the Parks Capital Improvement Program, to see if the interface area between Inspiration Point and the Activity Center can be made more easily accessible by both pedestrians and the disabled. A meeting was held yesterday with the landscape architect and their findings will be presented to the Design Review Committee.

A question and answer period followed between Board members, Mr. Pekarek, Mr. DeWeese and Mr. Olive to provide additional clarification of the issues. Mr. Oliver reaffirmed that there is ADA access between the two facilities via the sidewalk and turnaround area but not direct access as recommended by the Design Review Committee. Although no negative comments were received from the City’s ADA staff when the document was distributed, Mr. Oliver agreed to consult with them again to make certain they completely understand the report and the transition area. He and Mr. Pekarek explained in detail what would have to occur in order for the Design Review Committee’s recommendation to be followed. Mr. McLatchy also addressed some of the maintenance, safety and security concerns if this recommendation is followed. She agreed that after staff has met with City ADA, she will report back to the Board on how the transition will be handled.

Motion: Moved/seconded Ms, Lacy/Ms. Duffy: Ms. Lacy moved to approve the Director’s recommendation to approve the Inspiration Point Precise Plan. Motion passes.

Vote: Yea - Duffy, Lacy, Weinsheim, Curren; Nay - Crenshaw, Madaffer, Glassman.

Balboa Park Committee Report: Ms. Lacy told everyone about the upcoming St. Patrick's Day events in the park and Earth Day in April. The park looks beautiful.

Design Review Committee Report: Mr. Glassman reported that the committee voted to approved the Balboa Park Museum of Art Fire Code Compliance Alternative and the Organ Pavilion restroom replacement with access and venting recommendations.

February 19, 1998, San Diego Union-Tribune, E-4. The ties that bind/Dog lovers are straining at the leash for parks where pets run free, by Caty Van Housen.

February 26, 1998, Letter Councilmember Christine Kehoe to Richard Amero regarding proposed San Diego Zoo expansion in Balboa Park.

March 1, 1998, San Diego Union-Tribune, Balboa Park garden begins interpretive nature series, by Karen Wilson.

March 2, 1998, Balboa Park Committee. Staff Report 1. Balboa Park special projects; Action Items (Adoption) 201. Federal Building (Hall of Champions) landscape improvements; 202. Support for Grant Application (\$30 million to \$40 million) for public art installation in Balboa Park; 203. Balboa Park tram central design.

Workshop items: Pepper Grove playground improvements.

Information items: Balboa Park parking issues - update.

March 11, 1998, Design Review Committee. Action Items 1. Balboa Park - Natural History Museum Expansion: Deborah Sharpe - Staff, Northern Parks; Richard Bundy - Consultant, Bundy Thompson Architects. . . . 2. Balboa Park tram stop - Ali Scheili, staff, Public Buildings & Parks, Scott Molentin - consultant, Estrada Land Planning. . . . 5. Balboa Park - Federal Building (Future Hall of Champions) landscape remediation plan: Penny Scott, staff, Metro Parks; Monic Mroz - Consultant, WYA.

Chairpersons' Report: Chairperson Glassman announced that R. DeWeese gave an excellent presentation of the Park & Recreation Board last month regarding the Balboa Park Activity Center and the Inspiration Point Precise Plan interface and approval process. Marcia C. McLatchy, the Park & Recreation Director, said she will pursue the issues raised in his presentation and report back to the Board. R. DeWeese was complimented by other committee members for his efforts.

Action Items: 1) Natural History Museum Expansion: Motion by M. Theilacker, seconded by D. Goldman, to approve the reevaluated areas with the condition that the architect put additional thought into the scale of the proposed pedestrian plaza outside of the north entry.

Vote: Unanimous approval.

2) Tram stop: Motion by R. Utt, seconded by M. Theilacker, to approve design as presented subject to the following conditions: 1) Consider adding a 6'0" sidewalk from Park Boulevard to tram stop on parking lot side of landscaped area; 2) Simplify landscaping; 3) Move stop side into landscaped area; and 4) Incorporate park information signage into kiosk design to eliminate need for another sign across the parking lot.

Vote: Unanimous approval.

5) Federal Building - Landscape Remediation Plan: (E. Yamada abstained from discussion due to a conflict on interest.) Motion by M. Theilacker, seconded by R. DeWeese, to continue project. Vote: Unanimous approval.

March 19, 1998., Park & Recreation Board. Action Items (Adoption) 102. Federal Building (Hall of Champions) landscape improvements (Penny Scott, Metro Parks); 103. Tram Stop (Ali Soheil, Public Buildings and Parks).105. Natural History Museum Expansion (Deborah Sharpe, Northern Parks)

Approval of Minutes: Motion - Moved/Seconded Ms. Weinsheim/Mr. Glassman

Motion passed unanimously to approve the Minutes of February 19, 1998 with one correction. Mrs. Duffy requested that the Minutes include her motion to item #101 Balboa Park - Inspiration Point Precise Plan. Ms. Duffy moved that this plan be tabled until such resolution can be made and specifics put in the plan for consideration by the Park & Recreation Board. (This in reference to the transition area between Inspiration Point and the Activity Center.). Mr. Glassman seconded the motion.

Vote: Yea - Madaffer, Glassman; Nay - Duffy, Weinsheim, Grenshaw, Lacy. The motion failed.

Requests for continuance: 101. Federal Building (Hall of Champions) landscape improvements.

Director's Report: Ms. McLatchy reported that the first day of two State of the Department Addresses began this morning in the Balboa Park Club with approximately 490 employees, volunteers and guests in attendance. . . . An historical museum has been created depicting over 100 years of Park & Recreation community services and special events.

Action Items (Adoption) 103. Balboa Park - Tram Stop. Mr. Ali Soheili, Public Buildings & Parks Division of the Engineering & Capital Projects Dept., reported that the General Development Plan for the Tram Stop at Inspiration Point had been approved by the SCRAP Committee and the Balboa Park Committee. The Design Review Committee made several recommendations that were not included in their Board report. Mr. Glassman, Board member and Chairman of the Design Review Committee, requested that the recommendations his committee made by addressed in writing by Mr. Soheili and his Dept. Mr. Current recommended that because the report was incomplete and that some Board members had not received a copy prior to the meeting that this item be continued until such time when all the issues can be addressed.

Mr. Glassman moved to sent this report back for additional clarification.

Mr. Michael Behan, Metro Parks Division Deputy Director, spoke on behalf of the project explaining that he was aware of the recommendations made by the Design Review Committee and assured Mr. Glassman that when the landscaping plan is implemented it will be done by Balboa Park staff following these recommendations. Mr. Behan announced that most of the funding is in place for the project and emphasized how important it is to be operational by Summer to best serve the needs of the public.

Mr. Darren Greenhaigh, Senior Civil Engineer with the Engineering and Capital Projects Dept., addressed the concerns Mr. Glassman expressed and assured the Board members that the recommendations of the Design Review Committee would be followed and apologized for the delay in getting the reports to Sally Pearson, Park & Recreation Board Secretary.

Mr. Glassman and Ms. Weinsheim withdrew their motions.

Motion: Moved/Seconded Ms. Lacy/Ms. Weinsheim - Ms. Lacy moved to approved the General Development Plan for the Trap Stop at Inspiration Point including the recommendations made by the Design Review Committee. Motion passed.

Vote: 6 - Yea; 1 Abstention (Ms. Duffy).

105. Natural History Museum Expansion: Ms. Deborah Sharpe, Park Planner for the Northern Parks Division, presented a detailed overview of the proposed expansion design to the Natural History Museum and the amendments to the Balboa Park Master Plan and the Central Mesa Precise Plan necessary to allow the expansion to proceed. The proposed landscape changes and site plan modifications have been satisfactorily addressed and a report from the arborist was submitted outlining how to protect the significant trees during the construction period. The Historic Site Board will review the project for conformance with the Secretary of the Interior's Standards for Rehabilitation of Historic Buildings.

Dr. Michael Hager, Executive Director of the Natural History Museum, presented historical data on the museum as well as an overview of the significant programs the museum provides. With the dedication of this expansion, the museum will be celebrating their 125th anniversary.

Mr. Dick Bundy, architect for the project, addressed Ms. Duffy's question pertaining to how the north entrance will be designed so as not to confuse it with the present historic south entrance. Mr. Bundy explained that when construction is complete the north entrance will also become a major entrance. He predicted that approximately 60% of park visitors will use the new north entrance. Mr. Bundy reported that a reevaluation of the north entrance design was done to see if the recommendations of the Design Review Committee could be carried out. However, they were unable to accommodate their desire to see people enter on the second level due to design limitations of the existing interior building configuration. The details of the design around the north entrance will be brought back to the Design Review Committee when ready.

Motion: Moved/Seconded Mr. Glassman/Ms. Lacy: Mr. Glassman moved to approve the proposed Natural History Museum expansion and the amendments to the Balboa Park Master Plan and the Central Mesa Precise Plan to allow the expansion of the Museum as modified per the Design Review Committee recommendations. The motion passed unanimously.

Balboa Park Committee Report: Ms. Lacy reported that Balboa Park looks beautiful, as usual.

March 26, 1998, San Diego Union-Tribune, B-11. The value of open space; MSCP (Multiple Species Conservation Program) environmental program is good for people, too, by Pam Slater, member of the San Diego County Board of Supervisors.

April, 1998, Uptown News Magazine, 14. Paving over a natural wonderland, by Richard W. Amero.

April 6, 1998. Balboa Park Committee. Staff Report 1. Balboa Park Special Projects; Action Items (Adoption) 201. GDP - Pepper Grove Playground and Picnic Arias; 202. Concept Plan - Lawn Bowling Clubhouse Expansion; Workshop Items: 301. San Diego Zoo - Long Range Goals; Information Items 401. Balboa Park parking issues - update.

April 8, 1998. Design Review Committee. Action Items 1. Balboa Park - Federal Building (Future Hall of Champions) landscape remediation plan; Penny Scott- Staff, Metro Parks; Monica Mroz - Consultant, Wimmer, Yamada, Caughey & Association; 7. Pepper Grove Playground Improvements - Darren Greenhaigh - Staff, Public Buildings & Parks, Nick DeLorenzo - Consultant, Amphion Environment. Information Item 1. Balboa Park - Preliminary alternatives for north and south courts on Inspiration Point - Darren Greenhaigh, Staff, Public Buildings & Parks, Mike Fotheringham - Consultant, Amphion Environmental.

Request for Continuances: Item #1. Balboa Park - Federal Building landscape remediation plan, was continued until May at the request of the consultant.

Chairperson's report: Chairperson Glassman announced that he had received 26 letters from citizens regarding an issue which is under consideration by the city to allow dogs off leash within parks.

Staff Report: Staff representative Sharpe advised the committee that the dogs off leash issue will go before the Park & Recreation Board in May and ultimately the City Council for a policy decision. A copy of the Park & Recreation report will be forwarded to the committee members in the May packet for their information in case anyone would like to give input on the issue at any of the upcoming public hearings. The policy could have design ramifications, depending on the decision made and any parameters to be followed.

Action Items. 7. Pepper Grove playground improvements: Motion by M. Theilacker, seconded by R. Utt, to approve the proposed Pepper Grove playground improvements as presented. Vote: Unanimous approval (7 members present).

Information Item. 1. Balboa Park preliminary alternatives for north and south courts on Inspiration Point: Design alternatives were presented to the committee for input regarding access and transition between the Activity Center and the historic courtyards, and the fountain design for the north courtyard. Input from the Committee included the following:

North Court Transition - The ramp option was preferred with the ramp flared wider on the north end to match the opening in the wall, and adding steps between the cupolas and the Activity Center's plaza level.

Fountain in North Court - Fountain option B was preferred with the base of the lantern turned so that the corners point to each of the colored tile markers.

South Court Transition - Alternative #1 was preferred with modifications; replace the two stairway wings with one central staircase while retaining a terrace wall in place of the stairway wings on either side of the central staircase.

April 16, 1998. Park & Recreation Board. Communications: Mr. Glassman asked when the dogs off leash item will be coming to the Board. Mr. Curren said it would be at the May 21 meeting.
Director's Report: Volunteer Recognition Night will be held at the Balboa Park Club on July 29.
Action Items (Adoption) 101. Museum of Art - Fire Code Compliances: Mr. Darren Greenhaigh, Senior Civil Engineer with the Engineering and Capital Projects Department, presented an overview of the proposed design plan for fire code improvements to the Museum of Art. The National Parks Service initially was concerned about the scale of the building and that because of the height detracted from the symmetry of the historic building. They recommended that either a metal staircase hanging on the exterior of the 1973 addition be constructed or that a flat roof be used. The San Diego Museum of Art Board of Directors and the Balboa Park Committee unanimously approved the flat roof design. The Design Review Committee unanimously approved the plans with some modifications, which have been included in the design. The Historical Sites Board has not approved the project and requested that they come back with either a hip roof, which the National Park Service did not like, or a roof line that actually steps down as the staircase moves to the east. An additional stairway will be built at the east side of the building to provide an emergency exit from the second floor and meet code requirements. Mr. Greenhaigh also explained the history of the project, the site conditions, and design alternatives that have been discussed.

Mr. Bill Perkins, architect from Ferris, Johnson and Perkins, presented their proposal depicting the flat roof design.

Mr. Mitchell Gaul, Director of Operations for the Museum of Art, and Mr. Pirouz Etemad, Project Managers with the Public Buildings and Parks Division of Engineering and Capital Projects, answered questions regarding the second floor emergency exit and what impact these changes will have to the interior of the second floor galleries.

Motion: Moved/Seconded Ms. Lacy/Mr. Glassman - Ms. Lacy moved to approve the design plan for fire code improvements for the Museum of Art. It was seconded by Mr. Glassman. The motion passed unanimously.

Balboa Park Committee Report. Ms. Lacy reported that Buds 'n Bloom is in full swing through the month of April in Balboa Park. Sunday, April 19, is Earth Day. Groundbreaking for the new Activity Center will take place on Wednesday, April 22 at 9:00 a.m. The Kate Sessions statue was unveiled at the southwest corner of the park entrance at Laurel Street on April 1. Over 300 people attended.

May 5, 1998, San Diego Union-Tribune, B-2, B-3, B-4. Natural History Museum work OK'd; cost of expansion will be \$26 million, by Ronald W. Powell.

May 13, 1998. Design Review Committee:

Action Items 1. Balboa Park - Inspiration Point north and south courtyards; Darren Greenhaigh - Staff, Public Buildings & Parks Division; Mike Fotheringham, Consultant, Amphion Environmental. Motion by R. Utt, seconded by S. Andrews, to approve the proposed courtyard designs with the following modifications: 1) Incorporate unfinished central courtyard work as part of this project (specifically screening of Navy Hospital and wall); 2) Remove access between the central court and south court to create a "Bellevue" extension; 3) Enlarge pedestrian access through cupolas from the central to south court; 4) Encourage grand scale (4'0" minimum) of balustrade, and reconsider the scale of all elements to ensure compatibility with design context; 5) Eliminate central sidewalk access in the north court, providing a level lawn area, and provide Italian cypress trees at 2'0" on center along west edge to visually screen the Activity Center, shift the cupolas to the east by 3'0" to accommodate Italian cypress trees; 6) Provide additional access width from pedestrian walks into lawn areas in both the north and south courtyards; 7) Substitute *Phoenix Canariensis* for *Phoenix Dactylifera*, and formalize planting on west slope of south court; and 8) Incorporate a ring of four Italian Cypress trees around the corners of each cupola.

Vote unanimous (7 members present).

3. Federal Building landscape plan - Penny Scott, Metro Parks Division; Monica Mros, Consultant WYCA; Motion by R. Utt, seconded by M. Theilacker, to approve the proposed landscape remediation plan as presented with the following conditions: 1) Reconsider proposed plant selection on north side of building; 2) Provide an 8'0" wide sidewalk from the south parallel to the face of the building, connecting perpendicularly to the main entry sidewalk, with planting and other amenities designed to accommodate a future extension to President's Way.

Vote: 5 in favor, 1 abstention (6 members present, E. Yamada abstained from voting due to a conflict of interest.)

Workshop Items 1. House of Iran - The project was continued until the June meeting due to the inadequate number of committee members present.

May 21, 1998. Park & Recreation Board. Action Items (Adoption) 101. Pepper Grove Playground - Darren Greenhaigh, Public Buildings & Parks: Motion made by Mr. Curren to approve on consent passed unanimously.

102. Inspiration Point General Development Plan - North and South Courtyards - Darren Greenhaigh, Public Buildings & Parks: Mr. Darren Greenhaigh, Senior Civil Engineer with the Public Buildings & Park Division of the Engineering & Capital Projects Dept., reported that the Balboa Park Committee, the Design Review Committee and the Sub-Committee for the Removal of Architectural Barriers all unanimously approved the proposed plan. Recommendations from the Design Review Committee and SCRAB have been incorporated into the Director's Recommendation, with the exception of the one recommendation made by the Design Review Committee to incorporate the screening of the Navy Hospital and the wall. The Council has authorized funding for the construction of the North Courtyard. The South Courtyard was included in the proposed GDP because it was more cost effective to do both courtyards at one time.

At Mr. Glassman's request, Mr. Greenhaigh described briefly the six recommendations made by the Design Review Committee that were included in the proposed plan.

Motion Moved/Seconded Ms. Lacy/Mr. Glassman: Ms Lacy moved to approve the General Development Plan for the North and South Courtyards at Inspiration Point. It was seconded by Mr. Glassman. The motion passed unanimously.

.

103. Leash Free Areas - Terri Williams, Coastal Parks Division. Ms. Terri Williams, Coastal Parks Division Deputy Director, presented a detailed report covering the issue of whether or not there should be leash-free areas for dogs in public parks and, if so, in which parks. Currently there are five leash-free areas for dogs in the City of San Diego parks. They are located in the beach area, Dog Beach ((Ocean Beach) and Fiesta Island (Mission Bay Park). These were designated by City Council in 1972. There are also three areas in Balboa Park (a portion of Morley Field behind the tennis courts, Nates Point on the west side, and Grape Street Park) that were designated by the Park & Recreation Director in 1994-95. Last year the Clairemont and Doyle Park communities began discussions on whether or not they should have leash-free parks in their neighborhoods. Citizens from the Grape Street Park started talking about whether improvements should be added to the park such as lighting and a doggie drinking fountain. There was also discussion about whether to retain Grape Street Park as a leash-free area. Over the last several months, the Recreation Councils and Area Committees have held numerous meetings in order to receive public input on this subject and recommendations have been received as a result of those meetings. The Mayor has indicated that the designation of leash-free parks would be ultimately decided by the City Council on a city-wide basis.

The Park & Recreation Department's recommendation is to retain the existing leash-free areas at Dog Beach, Fiesta Island, Morley Field and Nates Point, as there appears to be no controversy with these areas at this time, and to consider all of the public input regarding other parks so that a recommendation can be made on whether to create or retain leash-free areas in any other specific parks in the City of San Diego. A more detailed report was made available to those attending this meeting.

Ms. Williams explained that the City Attorney has advised her that the city will not incur any liability if there are dog-related problems in leash-free areas in public parks. Attorneys Leslie Devaney and Jim Chapin were present to answer questions.

County Animal Control has not taken a position on this issue but will enforce whatever the city's policies are. Lt. John Humphrey from County Animal Control was present to answer questions. In addition, Captain Lee Vaughn and Lt. Vickie Binkerd from the Police Department were also present to explain the police department's enforcement policy should there be questions.

Public testimony was heard and limited to 2-minutes each beginning with those in favor of leash-free areas (65 speaker slips were received) and concluding with those opposed (22 speaker slips were received.)

1st Motion Moved/Seconded Mr. Glassman/Ms. Weinsheim: Mr. Glassman moved that the Park & Recreation Board recommend that the City Council vote to expeditiously create one (or one more, as is the case in City Council Districts 2 and 3) leash-free dog areas in each City Council District, only if that is the consensus wish of the interested community groups in the Council district, with said consensus identifying the park or park areas to be designated leash-free for a 6-month trial period with strict identification of the distance of the leash-free area from homes and the hours approved for leash-free use, with the Council Office to return to City Council at the end of the trial period with an evaluation of how the trial leash-free dog area in that district worked, and a recommendation to the City Council about whether to continue it permanently. The motion was seconded by Ms. Weinsheim.

Vote in favor (Glassman, Lacy, Madaffer, Tindaro, Weinsheim), 1 opposed (Enriquez). The motion passed.

Ms. Weinsheim and Ms. Lacy both feel strongly that neighborhood parks are not the place to have leash-free areas. Ms. Weinsheim stated that there may be neighborhood parks in sections of the City of San Diego that might be appropriate because they are set far enough apart from residential areas where they wouldn't be intrusive. However, Ms. Weinsheim feels that most neighborhood parks are located right in the middle of residential neighborhoods and are too small to accommodate leash-free areas for dogs.

2nd Motion Moved/Seconded Mr. Tindaro/Ms. Lacy: Mr. Tindaro recommended that City Council vote to: 1) retain the existing leash-free dog statue at Dog Beach in Ocean Beach, Fiesta Island in Mission Bay Park, pending future public hearings at the time funding is available for design and initial development

of Fiesta Island and the designated area of Morley Field in Balboa Park behind the tennis courts, and Nates Point on the west side of Balboa Park; and 2) direct the Park & Recreation Dept. to solicit community input during the planning phase for new parks on whether or not to include a leash-free area for dogs in the new park. The motion passed unanimously.

3rd Motion Moved/Seconded Mr. Tindaro/Mr. Glassman. Mr. Tindaro recommended that the City Council retain the leash-free status of Grape Street Park.

Vote: 4 in favor (Enriquez, Tindaro, Glassman, Current); 3 opposed (Weinsheim, Madaffer, Lacy). Mr. Current cast the tie-breaking vote. The motion passed.

Mr. Current further stated that responsible dog owners who use Grape Street Park should urge other park users to not only take care of their own pets but to help educate the uneducated. If this does not work, then changes will be made.

Director's Report: National Trails Day will be celebrated on June 6. Mission Trails, the Tecolote Tri Canyon area, Balboa Park and the Natural History Museum are included in this event.

May 22, 1998, San Diego Union-Tribune, B-1. Eight more parks may go no-leash/Panel recommends districts decide, by Ed Jahn.

May 31, 1998, San Diego Union-Tribune, E-3. Natural History Museum's expansion a prepaid mistake waiting to happen, by Welton Jones.

What's wrong with this picture is that filmy, soaring glass, which is grimly at odds with the Spanish-Colonial architecture everywhere else along the Prado.

Wrongly or rightly, it's about to be shoved into the public's face because a batch of well-to-do trustees told the council to do it their way or else they'd take back their \$1.3 million in personal donations for the project.

June 1, 1998, Balboa Park Committee. Staff Report 1. Balboa Park special projects. Action Items (Adoption) 201. Aerospace Museum Courtyard cover. 202. Balboa Park Organ Pavilion system upgrade. 203. R. H. Fleet Outdoor Canopy Structure. Workshop items: 301. Balboa Park to Bay link. Information Items 401. Balboa Park parking issues - update.

June 3, 1998, San Diego Union-Tribune, B-4. Carlsbad residents favor removal of "Split Pavilion" beachfront sculpture, by Agnes Roletti.

June 7, 1998, San Diego Union-Tribune. Criticism justified over park museum's annex, letter from Richard W. Amero.

Critic-at-large Welton Jones' criticism of the design for the north annex of the Natural History Museum ("Museum's expansion a prepaid mistake waiting to happen," May 31) is valid and should have been made long ago by San Diego architects (unwilling to attract attention), by the Committee of 100 (which does not have the knowledge it pretends to have), by historic preservationists (who respond automatically to rote clichés), and by members of the general public (who could care less what is done to Balboa Park).

The Committee of 100 got the City Council to establish a Spanish-Colonial architectural policy for El Prado after a disastrous fight over the non-conforming architecture of the Timken Museum of Art and the west annex of the San Diego Museum of Art. A predecessor organization lost this fight.

The construction of the Reuben H. Fleet Space Theater in 1972 shows how easily the Spanish-Colonial policy could be evaded. El Prado has an eccentric, poorly-organized, dirt-collecting caricature, obscured thankfully by trees. As competent Mexican architects or even artists who concoct Hollywood Spanish if this freak building is Spanish-Colonial and listen to the guffaws.

Compared to the facade of the University of Salamanca, the facade of the 1925 Museum of Art, which it copies, is sterile. Local people are happy to know that Seal of San Diego crowns the facade. No one has been as kind toward Johnson's creation of the 1933 Natural History building, to which architect Richard Bundy's north annex is being added with the consent of historic preservationists, the Committee of 100 and the City Council. As it is, the most imposing entrance will forever be in the wrong place.

Trustees of the Natural History Museum have blackmailed the City Council into changing its Spanish-Colonial policy and into accepting another incongruous building on Balboa Park's central mesa. By an identical process, the Council in 1961 approved the Timken Museum of Art after being informed the city could lose the Putnam collection of paintings if they did not.

Jones knows, I know, and the Committee of 100 knows that it's too late. Birds have flown from the coop. The north annex of the Natural History Museum will be constructed. Citizens and visitors will be faced with the question how this out-of-place, out-of-character, out-of-history intrusion could have occurred.

June 7, 1998, San Diego Union-Tribune, B-3. Sea World to ask City Council to help on expansion project, by Ronald W. Powell

Sea World will ask the council tomorrow to extend its current 150-acre lease by 15 years to 2048 and allow it to expand by 16.5 acres onto city-owned land at the park's eastern boundary.

June 10, 1998, Design Review Committee. Workshop Item 1. House of Iran, Deborah Sharpe, Staff, Northern Parks, Alan Azimi, Volunteer Coordinator: Alan Azimi, representing the House of Iran organization, introduced the proposed site plan for development of the future international cottages of which the House of Iran would be the first to be constructed. He described the design competition held within the Iranian community and requested Committee input on three designs, one of which will be refined and undergo the approval process. The designs ranged from conservative to unique, and generated the following comments from the Committee:

Committee members generally agreed with the proposed reorientation of the future cottages, but emphasized that existing major trees and required disabled access need to be considered in the layout.

The interest and focus should be created by all the new cottages. No single cottage should dominate the others.

Exterior designs should be similar in appearance with cultural identities being manifest internally. However window and door details could reflect different cultural identities.

Cottages should not compete with United Nations or Hall of Nations buildings in size and scale and should appear subservient. However roof lines could vary somewhat to create a transition from the older, smaller cottages.

Committee members did not object to increasing the size of the future cottages to 1,000 square feet inclusive of patios and entryways.

Cottage design by Bahram Maheronnaghsh was considered to be most compatible with existing cottages and had the best kitchen/patio relationship, but should have two doors to provide one-way flow of visitor traffic.

Action Items 1. San Diego Aerospace Museum Courtyard Cover - Revised Design, Penny Scott, Staff, Metro Parks Division; Wayne Donaldson, Consultant, Milford Wayne Donaldson, Architect: Motion by M. Theilacker, seconded by J. Paoluccio, to approve the proposed revised courtyard cover as presented. Vote: Unanimous approval (8 members present).

2. Reuben H. Fleet Outdoor Canopy Structure, Penny Scott, Metro Parks Division; Pamela Crooks - Reuben H. Fleet Representative: Motion by R. Utt, seconded by M. Theilacker to approve the proposed canopy structure with the following modifications: 1) Downsize planter width to match column width, and 2) Tie columns across and back into the building with open metal framework matching detail of adjacent windows. Vote: 4 in favor, 3 opposed (8 members present).

3. Organ Pavilion Electrical Upgrade, Harry Slayen, Staff Public Buildings & Parks; Stan Brody, Consultant LSW Engineers: Motion by F. Blecksmith, seconded by M. Theilacker, to approve the proposed electrical system upgrade as presented. Vote: Unanimous approval (8 members present).

June 14, 1998, San Diego Union-Tribune, Hundreds had input into museum renovation, letter Michael Hager, executive director San Diego Natural History Museum.

Critic-at-large Welton Jones' sources, whatever their motivation, provided a misleading perspective on the plans to renovate, endow and expand the San Diego Natural History Museum in Balboa Park ("Museum's expansion a prepaid mistake," May 31).

One of the remarkable aspects of the museum's building project is that it was conceived with the participation and input of hundreds of San Diegans who told use what they wanted to see in a new natural history museum. Jones' article, with few minor exceptions, represented the only negative comment we've received on this project.

With a little homework, Jones would have learned that the project was reviewed and approved by the Historic Sites Board, the Park and Recreation Design Review Committee, the Balboa Park Committee, the Central Balboa Park Association, the Park and Recreation Board, the city's Natural Resources Committee, the Planning Commission, the Arts and Culture Commission and twice by the City Council. This project was not just approved, it was lauded as a model of inclusiveness and responsiveness to the concerns of members of those committees.

Perhaps the most disturbing aspect of Jones' story was the trivialization of the transformation that has taken place in the museum over the past few years. A core of command people, who had been longtime volunteers and supporters, brought about the creation of a strategic plan for the museum's future in 1992.

Our progress has been remarkable by any standard. Ask the families who visit the museum for exhibits and classes, the researchers who work in our scientific collections and participate in field work, the citizens concerned about our quality of life who are thrilled that the museum is leading efforts to develop environmental scientific education programs throughout the region.

The reason we've come so far so fast is because of our approach of involving so many people in the process, including the design of a new building. We also have a strong belief in our mission, and the support of some of San Diego's most committed families.

We, collectively, all of the thousands who support the museum, and all of those who helped to create the design for our new building, should welcome Jones' opinion as a critic. Criticism should make us better. But for a (former) theater critic, the first rule is — you have to go to the play.

June 18, 1998, Park & Recreation Board. Action Items (Adoption) 103. Aerospace Museum Courtyard Cover - Mike Behan. (Pulled from agenda.) 104. Reuben H. Fleet Theater Outdoor Canopy Structure - Mike Behan.

Balboa Park Committee Report: Ms. Lacy reported that Twilight in the Park has begun and the Organ Festival will start soon. The Reuben H. Fleet Space Theater remodel has been dedicated. Mr. Wayne Donaldson received an architectural award for the House of Hospitality. Ms. Lacy spoke briefly about the swastikas on the lanterns at the House of Hospitality. Ms. McLatchy provided an historical account of the symbol and said that the swastikas won't be removed but will be covered to protect their historical significance.

June 21, 1998, San Diego Union-Tribune, E-1. "Noah" animals, angels celebrate artist's arc, by Robert L. Pincus.

Niki de Saint Phalle's painted figures in polyester, metal and wood outside the Mingei Museum; 23 pieces to be created for a "Noah's Ark" project in Jerusalem; Mingei Museum has departed from its folks arts and crafts mission.

June 30, 1998, San Diego Union-Tribune, B-8. Fate of (Steven L. Brezzo) Museum of Art director on board docket, by Welton Jones.

July 1, 1998, San Diego Union-Tribune, B-1. Brezzo quits as museum director; he will stay until successor is chosen, by Welton Jones.

July 2, 1998, San Diego Union-Tribune, B-2. (City Council) Panel favors plan to keep areas for dogs to roam free, by Ray Huard.

July 3, 1998, San Diego Union-Tribune, E-1, E-12. Of Brezzo, a museum and the future, by Robert L. Pincus.

July 6, 1998, Balboa Park Committee. Staff Report: 1. Balboa Park special projects. Action Items (Adoption) 201. Sixth Avenue Playground GDP. 202. Proposed new cottage - House of Iran. 203. Proposed site plan for future construction of cottages - House of Pacific Relations. Information Items: 401. Balboa Park parking issues - update.

July 8, 1998. Design Review Committee. Action Items 2. Balboa Park - Sixth Avenue Playground: Yousef Ibrahim - staff, Public Buildings & Parks Division; Jeremy Franzini, consultant, Estrada Land Planning. Motion by R. Utt, seconded by D. Mallec, to approve the General Development Plan as presented with comments from committee incorporated or addressed as follows: 1) Provide graffiti protection on concrete elements. 2) Slope soil against seat walls to vary landform. 3) Add accent lighting. 4) Inform Solomon family of changes. 5) Separate pedestrian path from sand area. 6) Enlarge hardscape at bus drop off to accommodate large numbers of children. Vote: Unanimous approval (7 members present).

July 9, 1998, San Diego Union-Tribune, A-3. In 2001, new-age zoo might link to ballpark, by Neil Morgan.

Zoo wants changes to its lease to absorb adjacent land for maintenance, engineering, kitchen, garage facilities and a new entrance with quarters for animals.

July 10, 1998, San Diego Union-Tribune, B-7. Scrutinize zoo's plans, don't gloss over them, letter from Richard W. Amero.

July 16, 1998, Park & Recreation Board. Director's Report: Summer Fest '98 created by city employees to celebrate diversity was held on June 27 in Balboa Park. . . . The FY 98/99 budget will be officially adopted on July 27. The Park & Recreation Dept. will experience approximately \$400,000 in cuts. Balboa Park Committee Report: Ms. Lacy reported that the summer programs in the park are in full swing. Design Review Committee Report. Mr. Glassman reported the 6th Avenue playground improvements were approved with modifications.

July 17, 1998, San Diego Union-Tribune, E-6. Globe patrons call police over noise at Museum of Art, by Anne Marie Welsh.

Raucous wedding reception at the San Diego Museum of Art Sculpture Garden

July 23, 1998, San Diego Daily Transcript. Revamp of Balboa Park less than half of 1989 plan, by Katie Kuehner-Hebert.

Deborah Sharp and Darren Greenhaigh gave an overview of current projects underway and future projects yet to be funded to members of Citizens Coordinate for Century 3; more than \$65 million from private donors and the city in bonds financed from hotel taxes have been invested.

July 26, 1998, San Diego Union-Tribune, E-3. Critique (by Robert L. Pincus) demeaned museum (of Art), says president (Katy Dessent).

July 12, 1998, San Diego Union-Tribune, E-2. Pros and cons of Brezzo's future - letters from Deirdre A. Hesse and David S. Kelly (pro) and Lou Cumming (con).

August 5, 1998, MSNBC, KNSD, Swastikas in park building cause outcry.

August 9, 1998, San Diego Union-Tribune, E-2. First-rate art is what's needed, letter from Beatrice Loynab critical of Katy Dessent's defense of Brezzo.

September 9, 1998, Design Review Committee. Action Items 1. House of Iran - Mark Marney, staff, Northern Parks Division, Bahram Maheronnaghsh, architect, House of Iran organization. 1.

Motion #1 by M. Theilacker, seconded by S. Andrews, to return to the Committee with a modified site plan which is less geometrical with unidentical building footprints placed more parallel to Pan-American road. The House of Iran cottage should be rotated so that the front door opens onto the communal area, and significant trees retained. Also, proposed fountain should come to the committee for review and approval. Vote: Unanimous approval (8 members present).

Motion #2 by M. Theilacker, seconded by S. Andrews, to approve the cottage architecture as presented with tile roof construction, signage and lighting to match original cottages, or return to the Committee with proposed new features. Vote: Unanimous approval (8 members present).

Motion #3 by M. Theilacker, seconded by D. Leonard, to have city staff bring the proposed plan for the House of Iran to the Committee for review and approval.

Chairperson's Report: Chairperson Glassman reported that he had received a copy of a letter sent to the Balboa Park Aerospace Museum from the National Park Service approving the proposed improvements to the museum. The National Park Service oversees historically designated areas and buildings.

September 13, 1998, San Diego Union-Tribune, H-1. Park Row/The zoo is one of many tenants wanting a piece of Balboa's pie, by James Steinberg.

The zoo backed off the Florida Canyon site in June and is now looking at land just north of its present parking lot. The new site is occupied by the War Memorial Building, which would be replaced by a multilevel parking structure.

September 13, 1998, San Diego Union-Tribune, H-1. Park Row/ In the future, the park needs strong and independent control, by Roger Showley.

Ten years ago the City Council put the park on a firm financial footing by adopting a policy that promised the park the equivalent of a 1 percent tax on hotel room charges.

That tiny amount has been enough to finance \$54 million in bonded improvements so far in Balboa Park, plus \$15 million in Mission Bay Park. The annual debt payment stands at \$6.3 million, according to city records.

October 14, 1998, Design Review Committee Action Items 1. House of Iran - Mark Marney, staff, Northern Parks Division, Bahram Maheronnaghsh, architect, House of Iran organization. Motion by M. Theilacker, seconded by R. Utt, to approve the site plan as presented. Vote: Unanimous approval (12 members present).

Information Items: 1. Plaza de Fundadores (Founder's Plaza). Michael Theilacker, acting as consultant, presented the plaza concepts to the Committee to solicit input early in the design process. The plaza would honor the founders of Balboa Park: George Marston, Alonzo Horton, and Ephraim Morse and would be funded by the generous donation of \$200,000 from Mrs. Mary Elizabeth North. Committee members commented on the proposed wall/fountain and the sculptural elements. The project is anticipating construction to begin in March 1999. The proposed project will be revised according to comments received and be presented at the November Design Review Committee meeting as an action item.

October 15, 1998. Park & Recreation Board. Design Review Committee Report: Mr. Glassman reported on 1 agenda item and 1 information item: Balboa Park - House of Iran Cottage (unanimously approved with modifications); Mrs. Elizabeth North has generously donated \$200,000 to building Founders Plaza that will honor the founders of Balboa Park: Alonzo Horton, George Marston and Ephraim Morse. Construction is scheduled to begin in March 1999 at the entrance to the Hall of Champions.

November 2, 1998. Balboa Park Committee. Staff Report: 1. Expo 2000 - A Millennium celebration in Balboa Park. 2. Hands on San Diego - volunteer event. Workshop items 301. Twenty Year Needs List - Update. Information Items: 401. Restaurant status - House of Hospitality - David Kinney, Executive Director; 402. Balboa Park Special Projects - construction updates: 1) House of Pacific Relations International Cottages rehabilitation. 2) Balboa Park Signage Program. 3) Pepper Grove Playground.

November 14, 1998, San Diego Union-Tribune, B-1. 44th annual greater San Diego Science & Engineering Fair/the 1998 award winners, by David E. Graham.

The Federal Building, which traditionally houses the projects, is being renovated to serve as an athletics museum. The science presentations were housed, instead, in the park's Municipal Gymnasium and its Recital Hall. But those spaces could not even have accommodated last year's smaller number of entries, about 720, so organizers also needed to rent a tent to cover the additional projects.

November 14, 1998, San Diego Union-Tribune, B-3. Museum (of Natural History) to break ground on expansion, longtime patrons also to be honored in Balboa Park event, by James Steinberg.

\$26 million renovation; Mary and Dallas Clark have endowed a chair of botany at the museum's new Biodiversity Research Center.

November 18, 1998, Design Review Committee. Action Items 2. Balboa Park - Founders Plaza - Darren Greenhaigh, staff, Public Buildings & Parks; Michael Theilacker, consultant, KTU&A. Motion by F. Blecksmith, seconded by R. Utt, to approve the proposed General Development Plan for the plaza as presented. Vote: Unanimous approval (10 members present).

Information Items San Diego Zoo Redevelopment - Dave Rice, director Zoo planning and architecture; Trish Butler, consultant, Butler Roach Group. Patricia Butler of BRG Consulting presented the Zoological Society's long-range development plan for the "New Century Zoo." The principal goal is to provide more exhibit space for the animals. This endeavor will necessitate the expansion of the zoo's leasehold boundaries, and redevelopment of the existing parking lot to provide exhibit space, and a new parking structure in which a fee will be charged to use. (\$45 million investment by the Zoological Society.) The Committee voiced concern over the Zoological Society's proposal to expand the leasehold to accomplish their goals; agreed with the opportunity to emphasize the bay-to-park link now that the ballpark will be built downtown, and acknowledged the apparent incompatibility between the Archery Range and the zoo's southern boundary.

November 18, 1998. Letter Roger DeWeese, FASLA, to Design Review Committee announcing his retirement and resignation from the Committee.

November 19, 1998, Park & Recreation Board. Action Items (Adoption) 103. 6th Avenue playground General Development Plan - Darren Greenhaigh, Public Buildings & Parks. Mr. Darren Greenhaigh, Senior Civil Engineer with the Engineering & Capital Projects Dept., Public Buildings & Parks Division, reported

that this project has been approved by the Balboa Park Committee, the Design Review Committee with recommendations, and the SCRAB Committee. He further explained that the 3-acre site, located north of Laurel Street between Sixth Avenue and Balboa Drive in Balboa Park, will be redesigned and upgraded once a revenue source is identified. Play equipment and surfaces, as well as disabled access, lighting and restroom facilities will be improved. Most of the existing playground equipment was generously donated by the Solomon family and they will be kept informed of any changes as they occur.

Mr. Steve Estrada, Landscape Architect with Estrada Land Planning, provided a detailed overview of the project. He explained that part of the redesign will include a “spray” water feature, a sprinkler on a timer, that children would be able to operate to allow them to get wet. This area will be constructed of hardscape texture, so that when wet the surface would not be slippery. A group picnic area, benches and seat walls are also planned and will be located near the play areas so that parents can be near their children. Additional parking spaces will be included along Balboa Drive. When funds are available, a new restroom facility will be added closer to the center of the playground.

Motion Moved/Seconded Ms. Lacy/Mr. Perry. The Board unanimously approved the 6th Avenue Playground General Development Plan as presented.

104. Organ Pavilion electrical system upgrade - Darren Greenhaigh, Public Buildings & Parks. Motion made by Ms. Lacy and seconded by Mr. Leppert to approve on consent.

Director’s Report: Disabled Services Annual Holiday Carnival from 11:00 a.m. to 4:00 p.m. at the War Memorial Building Saturday, December 5. . . . Christmas on the Prado begins Friday, December 4 from 5:00 - 9:00 p.m. and continues all day on Saturday, December 5.

Balboa Park Committee Report: Ms. Lacy invited everyone to attend Christmas on the Prado December 4th and 5th, which marks the beginning of the holiday season in Balboa Park. Progress on the Activity Center is continuing with an anticipated opening date in February 1999. The train station located near the administration building as are the improvements to the Federal Building for the Hall of Champions. Work will begin soon to repair the plaster and the exterior paint on the Houses of Pacific Relations.

Design Review Committee Report. The Balboa Park Founders Plaza plan was presented at the last meeting. Mrs. Mary Elizabeth North, who attended the meeting, was so impressed with the design that she offered to increase her already generous donation of \$200,000 to \$225,000, which was graciously accepted by the Committee.

Information Items: Ms. McLatchy said she will be attending tonight’s Orchids and Onions Awards and will be proudly accepting an Orchid award for the rebuilt House of Hospitality in Balboa Park. She praised Matt Papuga and Kris Shackelford, Project Officers for the Engineering & Capital Projects Dept., who did an exceptional job recreating this historic building back to its original design.

Ms. McLatchy introduced Ms. Carol Drummond, the Park & Recreation Department’s new Public Information Officer.

November 24, 1998, San Diego Union-Tribune, B-1, B-4. Balboa Park bash to usher in millennium, by James Steinberg.

The Exposition 2000 Committee plans to raise \$1.2 million in sponsorships and sell an estimated \$750,000 in tickets to finance the event.

Much of Balboa Park’s 1,150 acres will be fenced in for the first two days of the three-day New Year’s 2000 party, and admission will be by ticket only.

November 24, 1998, San Diego Union-Tribune, E-2. Nothing Grinchy about Globe gala, by Burl Stiff.

The gala is expected to net between \$300 and \$400 thousand for the Globe.

The 60 by 160-foot party tent - used again on Sunday at a Grinch party for kids - was lent to the Globe by the Port of San Diego. "We bought three of them," commissioner David Malcolm explained Saturday night, "We'll use them as shelters for the homeless."

November 25, 1998., City of San Diego Memorandum, Letter from Halla Razak, Public Buildings & Parks Deputy Director, Engineering & Capital Projects Department, to Balboa Park Committee, Agenda of December 76, 1998. Subject: Plaza of the Founders.

Staffs Recommendation - Recommend approval of the proposed GDP, and the renaming of President's Way.

Landscape and site plans, grading study and drawings of proposed three free-standing statues included.

December 5, 1998, B-1. Christmas on the Prado is an all-out feast; threat of rain can't dampen spirits, by Jeff McDonald.

December 7, 1998, Balboa Park Committee. Action Items (Adoption) 201. Founder's Plaza Concept Design: Two separate motions, one concerning the concept and two, renaming of Presidents Way. MSC It was moved, seconded and carried to approve the proposed concept design for Founder's Plaza (North/Herr 10-0). MSC It was moved, seconded and carried to approve the recommendation to change the name of President's Way to Founder's Way (North/Powers 8-2).

202. San Diego Lawn Bowling Club House Master Plan and Annex Addition. Tabled until January meeting.

203. Twenty Year Needs List. Information Items: 401. Balboa Park Golf Course Club House Master Plan. Tabled until January meeting.

402. Exposition 2000 Update. Tabled until January meeting.

Chairperson's Report. Ms. Lacy distributed a copy of the City's proposed budget for any members who may wish to review. She mentioned that the recommendations for the off-leash dog areas have been finalized. She attended Christmas on the Prado over the weekend and, as usual, it was a wonderful event. She hoped many of the committee were able to attend. She introduced the two (2) committee members, Michael Powers and Julianne Hyde.

CBPA Report. Betty Peabody spoke briefly concerning the planning of the Millennium Celebration and plans for a Millennium Club as a fund-raising effort the Expo 2000 event. Honorary Chairpersons for the Millennium Club will be named soon.

Staff Report: Balboa Park District Manager Div Brasted reported that the San Diego Foundation, Balboa Park Endowment Funds, has recently approved grants for several projects in the park, including the Easter Lily display in the Botanical Building, restoration of the Golden Hill Park fountain, plaque restorations throughout the park, restoration of the Marston House pergola, restoration of the Clam Shell fountain at the Organ Pavilion and signage in the Rose Garden. Deputy Director Mike Behan also reported that the Tram Central facility is nearing completion.

Information Items 401. Balboa Park Golf Course Clubhouse Master Plan. A presentation was made by Project Manager Mark Marney concerning development of a Master Plan for reconstruction of the Balboa Park Gold Course clubhouse. The preliminary design is in compliance with the East Mesa Precise Plan and will be brought back to the committee for adoption at a later date.

1999

Summary of events in 1999.

(Note: Dates of events are only approximate.)

Balboa Park Activity Center opened (June 1, 1999)

Hall of Champions Museum opened in re-built Federal Building
(July 1, 1999)

Overhaul of lily pond completed (July 13, 1999)

Curator of reptiles and amphibians at Zoo pleaded guilty to wire fraud and theft
in federal court (August 3, 1999)

Panda cub born at Zoo (August 21, 1999)

Renovated Japanese Friendship Garden opened to public
(September 21, 1999)

Renovated Pepper Grove Playground dedication
(October 9, 1999)

Christmas on the Prado (December 3 & 4, 1999)

January 1999, UPTOWN, Crumbling park art: Public art in Morley Field is crumbling, but that's okay.

January 1999, UPTOWN, Dog Heaven at Balboa Park, by Beth Mathewson.

January 4, 1999, Balboa Park Committee. Action Items (Adoption) 201. S. D. Lawn Bowling Club House Master Plan and Annex Addition. 202. Twenty Year Needs List. Information Items 401. S. D. Zoo proposed expansion. 402. Exposition 2000 update.

January 4, 1999, Balboa Park Committee. CBPA Report. Betty Peabody reported on the CBPA meeting held earlier in the day. The main items of discussion a new exhibit coming to San Diego and Balboa Park "WWII Through Russian Eyes", and a presentation by the Museum of Photographic Arts on their expansion project. Action Items (Adoption) 201. San Diego Lawn Bowling Clubhouse Master Plan and Annex Addition. MSC It was moved, seconded and carried to approve the concept plan for the San Diego Lawn Bowling Clubhouse Building and Annex with the caveat that should any trees be removed that they be replaced in adjacent areas (Oliver/Madigan 6-0). 202. Twenty Year Needs List. MSC It was moved, seconded and carried unanimously to approve the 20-year needs list as presented by staff (Oliver/Hyde 6-0). Information Items 401. San Diego Zoo Proposed Expansion: A presentation was made by Trish Butler, BRG Consulting Project Manager, for the proposed concept plan for the San Diego Zoo Expansion. The proposed plan has not yet been formally presented to the City to begin the review process expected to take at least 18 months. Staff assured Committee member that they will have a chance to review and respond in depth to the expansion plan, and adopt recommendations to send forward to the Park & Recreation Board and City Council.

January 11, 1999, Letter, Councilmember Christine Kehoe to Richard W. Amero regarding his concerns over suggestions to change the name of President's Way in Balboa Park.

January 13, 1999, Design Review Committee. Action Items 1. Balboa Park Lawn Bowling Clubhouse Expansion - John Helminski, Staff, Public Buildings & Parks; Rob Gerke, Consultant, RBF Associates;

Motion by M. Theilacker, seconded by D. Leonard, to approve the site plan as presented with the following conditions:

1. Provide design and construction details on signage, and signage design; should be more in keeping with Balboa Park signage program.
2. Provide landscape plan.
3. Reduce scale of trellis section.
4. Provide a detail for column bases.
5. Increase paving and access between patios and main entry walk to structure.
6. Add French door system on existing structure toward patio.
7. Add tile roof over existing storage/electric room, and
8. Consider substituting swing doors in place of rolling doors on storage rooms.

Vote: Unanimous approval (11 members present).

Information Items 1. Balboa Park Golf Course Clubhouse Master Plan - Mark Marney, Staff, Northern Parks Division. Park & Recreation Dept. Project Manager Mark Marney described to the Committee the process by which public input is being sought for this project. Project landscape architect Nick DeLorenzo presented the goals of the project, the constraints and opportunities, and the request for proposals process. Issues which have come up at previous public meetings include the following: need for additional parking; increase in clubhouse uses, possible re-routing of Date/26th Street and modification of the 9-hole golf course to accommodate clubhouse and parking expansion, potential parking structure, and errant balls landing in adjacent street and tot lot. Jack Dahlin, project architect, responded to questions from the Committee.

Generally, Committee members supported the concept of re-routing the road and modifying the gold course to open up the area around the existing clubhouse to accommodate expansion of the facilities. Other concepts supported by the Committee included: terracing the building, slightly raising the finish floor elevation from the existing level by four to five feet, Craftsman-style architecture, parking structure stepped into a canyon, and possibly taking advantage of the native vegetation in modifying the golf course.

January 19, 1999, San Diego Union-Tribune, E-6. Museums (of Art and of Contemporary Art) plan tribute to their benefactors (the late Rae and Lela Axline, whose estate provided the \$60 million in endowment funds), by Welton Jones.

January 20, 1999, San Diego Union-Tribune, B-1. Natural History Museum ready to show off diamond exhibit, by James Steinberg.

January 21, 1999, San Diego Union-Tribune, B-5. City might let dogs run free in five parks, by Ray Huard.

January 30, 1999, Honoring President Franklin Delano Roosevelt's gifts that keep on giving, FDR Grove in Balboa Park, located at 6th and Quince.

February 1, 1999, San Diego Union-Tribune, B-1. CCC groups join in reaffirming the spirit of FDR, Balboa Park grove is rededicated in his honor, by Ronald W. Powell.

February 1, 1999, San Diego Union-Tribune, B-2. Youngsters blast off to learning at Space Center; Challenger-inspired program places participants in lifelike situations, by Clark Brooke.

February 2, 1999, San Diego Union-Tribune, A-1, A-11. Tom Hall to leave Old Globe in July; Managing Director joined theater in 1978, by Anne Marie Welsh.

February 4, 1999, San Diego Union-Tribune, B-1. Werner Heuschele dies: zoo veterinarian, by Jack Williams.

February 11, 1999, San Diego Union-Tribune, A-3. Stay home, see future: Expo 2000 in the park, by Neil Morgan.

February 14, 1999, San Diego Union-Tribune. H-2. Monumental work: restoring parks' plaques brings (Barry Feinman) in touch with the past, by Roger Showley.

February 28, 1999, San Diego Union-Tribune, H-1. Smarting over growth/Are we masters of our destiny or destruction?, by Roger Showley.

March 1, 1999, Balboa Park Committee. Action Items (Adoption) 201. Palisades Area Tram Stop (Report to follow); Workshop Items 301. San Diego Zoo Expansion Public Review Process Strategy; Information Items: 401. Balboa Park Carousel update.

Chairperson's Report: Ms. Lacy reported that the Park & Recreation Board had not met in the last three months due to a lack of agenda items. She announced that the Balboa Park Activity Center will be dedicated on April 24, 1999 and all committee members will be invited to attend.

CBPA Report: Betty Peabody reported on the actions of the Central Balboa Park Committee meeting held earlier in the day. The full agenda included a presentation by Ed McKellar, Director, Aerospace Museum on installation of the Courtyard cover which will begin soon; a discussion of volunteer recognition month, with April 22 selected by the Museums as Volunteer Recognition Day; an address by Assistant Chief Bejarano concerning Expo 2000 security issues; and an address by Judith Harris, Chair of the Commission on Arts & Culture, and Victoria Hamilton, Executive Director.

Staff Report: Penny Scott announced that an Arts Reception has been scheduled for April 22, 1999 as part of the Balboa Park Activity Center opening. She reported on the opening of the special exhibition in the Municipal Gym March 13, 1999, "World War II Through Russian Eyes." She also distributed copies of the updated Twenty Year Needs List.

1. Carolyn Wormser, City Special Events Coordinator, reported on the City's plans for the upcoming Millennium celebrations, including the premier event to be held in Balboa Park. She also included information on the Mayor's Task Force which is being formed to plan celebrations for the City of San Diego during the year 2000. She distributed copies of the Web Page for the Expo 2000 created as a donation by SAIC.

2. Darren Greenhaigh updated the committee on construction projects in Balboa Park including Phase II of the lighting project, Phase II of the signage program, Morley Field Tennis Court (6) reconstruction, construction of the Marston House restroom, reconstruction of the Organ Pavilion restroom, parking lot. All projects should be completed by the fall in time for the Millennium celebration. In April two more projects will begin as well: reconstruction of the North Courtyard at Inspiration Point and repairs to the parapet walls of the Automotive Museum.

Action Items (Adoption) 201. Palisades Area Tram Stop. MSC It was moved, seconded and carried unanimously to approve the installation of a temporary tram stop in the Palisades area as presented (Simon/Rucci 11-0),

Note: Mr. McKellar from the Aerospace Museum asked that it be noted in the minutes that the operation of the tram stop be evaluated through Labor Day with the idea of possibly keeping the arrangement permanent versus temporary if it appears to meet the public's and museums' needs. It was also announced that the Tram Central Dedication will be held on April 12, 1999, 11:00 a.m. Committee members will be invited.

Workshop Items 301. San Diego Zoo Public Review Process Strategy. Ms. Lacy reported that several members were concerned with the San Diego Zoo expansion proposal and the public review process as relates to Balboa Park Committee responsibilities for conducting public review and comment meetings. Many members felt strongly that they have a responsibility to obtain as much pertinent information as possible to assist them in making recommendations in the best interests of all concerned. Ms. Lacy asked for volunteer committee members to sit on a sub-committee to look into issues, data gathering, etc. to assist the

full committee when the review process begins. The sub-committee will consist of Julianne Peters Hyde, Michael Powers, Delza Martin, Joan Griffin and Darlene Davis. Ms. Lacy will attend if available.

Information Items 401. Balboa Park Carousel update. Mr. Bill Steen, owner and operator of the Balboa Park Carousel, gave a brief update on the history and status of the Balboa Park Carousel. He is committed to continuing operation of the carousel to ensure it will always be accessible to the children of San Diego. The carousel was built in 1910 and is one of only 150 still operating worldwide. It has been at its current location since 1968 but was established in the park in 1915.

March 9, 1999, San Diego Union-Tribune, E-1. The forgotten front: Exhibit (at the Municipal Gymnasium) is monument to Russia's wartime experience, by Pat Stein.

March 9, 1999, San Diego Union-Tribune, A-1. Museum's boss backs off quitting; But art institution's board keeps seeking successor to Brezzo, by Welton Jones.

March 10, 1999, San Diego Union-Tribune, B-1. Brezzo concedes art museum board wants him to leave, by Welton Jones.

March 12, 1999, San Diego Union-Tribune, B-13. Return to suffering with art director out; letters, Bob Tepedino and George Driver supporting Brezzo and art for the masses.

March 12, 1999, San Diego Union-Tribune, E-1. Brezzo has passion, but not for art, by Robert Pincus.

March 13, 1999, San Diego Union-Tribune, B-1. Navy OKs land-use plan (for defunct Naval Training Center); next step is talks on costs, by Ronald W. Powell.

March 18, 1999, Park & Recreation Board. Communications: Ms. Shirley Larson, representing Offshoot Tours, distributed a hand-out featuring free tours of Balboa Park. Director's Report: The Balboa Activity Center is nearing completion with dedication scheduled for 10:00 a.m. on April 24th. "WWII Through Russian Eyes: is currently being featured until July at the Municipal Gym in Balboa Park. The "Dogs Off-Leash" issue will be heard at the City Council meeting that convenes at 2:00 p.m. on April 12.

Action Items (Adoption) 101. Council Policy No. 700-06 - Encroachments on City Property and Council Policy 600-43 City of San Diego Telecommunications Antenna Policy. The City encourages the placement of telecommunication facilities on city-owned land as a revenue-generating mechanism and the telecommunication companies pay a fair market rent (\$1200/month) for the use of that land.

Motion/Seconded Mr. Leppert/Mr. Glassman. Mr. Leppert moved to approve the proposed revisions to Council Policy 700-06 pertaining to park and open space property with the condition that the Council consider the possibility of the Park & Recreation Dept. retaining part or all of the rent revenues for Park & Recreation use, and the assurance that the environmental integrity of the area where the telecommunication facility is constructed will not be disturbed. The motion passed unanimously.

202. Expo 2000 Millennium Celebration in Balboa Park: Ms. Carolyn Wormser, Director of Special Events, presented an exciting detailed overview of the proposed Balboa Park Exposition 2000 Millennium Celebration. Ms. Wormser explained that EXPO 2000 is a year-long event that will include educational programs, special events, a marketing campaign to renew public interest, awareness, and participation in the unique artistic, natural, historical and cultural resources in Balboa Park. The actual Millennium countdown and media campaign kicks off on June 1, 1999 and will run through January 2, 2001; a full 18 months of activities focusing on San Diego's attributes, citizens, and events. To celebrate the new millennium, a 3-day long event is in the planning stages for New Year's Eve 1999. Plans now include a ticketed and gated New Years Eve celebration on December 31, 1999; a Family Day on Saturday, January 1, 2000; and a Community Day on Sunday, January 2, 2000. You may access the Expo Web Page at info@balboaparkexpo.com for updated information.

Chairwoman Weinsheim reminded the Board members that committee minutes are received monthly through the mail which gives each member a chance to read prior to attending the Park & Recreation Board meeting.

Balboa Park Committee Report: Ms. Lacy expressed her appreciation for the addition of Ms. Darlene Gould Davies as her co-chair of the Balboa Park Committee and that they are both looking forward to working together over the next two years. . . . Ms. Lacy passed around a listing of the Phase I construction projects in Balboa Park.

March 28, 1999, San Diego Union-Tribune, E-1. On The Way To The Millennium/Remembrance Of Arts Past --- Altering the landscape/A park, an expo and a grand new way of living, by Welton Jones. . . . San Diego Theater.

April 15, 1999, Park & Recreation Board. Action Items 103. San Diego Lawn Bowling Clubhouse Expansion - John Helminski, Engineering & Capital Projects/Public Buildings & Parks).

April 15, 1999, Park & Recreation Board. Director's Report: The Dogs Off-Leash issue was heard before the City Council on Monday April 12. City Council approved keeping Dog Beach, Fiesta Island, Nate's Point in Balboa Park, and Morley Field 24 hour off-leash areas. Grape Street Park will remain an off-leash area but with specific posted hours. Signage will be installed in order to give dog owners time to become familiar with the new hours before they become effective in 60 days. The new hours will remain in effect for one year on a trial basis. . . . Balboa Park Committee Report: Ms. Lacy reported that she and Ms. Davies

attended the new Tram Central dedication on April 12th. She also reminded everyone to attend the Activity Center Dedication on April 24th at 11:00 a.m.

May 9, 1999, San Diego Union-Tribune, E-4. Honoring (Donal Hord) the forgotten sculptor of San Diego, by Robert L. Pincus: through October 10, Museum of San Diego History, Casa de Balboa, Balboa Park.

Yet try as one might to be convinced that only East Coast bias keeps Hord from getting his due that argument doesn't ring true. His work is generally charming and occasionally campy. Yet the artist's treatment of his subjects doesn't transcend its day: the works remind us that Hord is historical.

If craft alone could gain an artist a new reputation, Hord would have long ago gained a place in the 20th century pantheon. He was a virtuoso with wood. His ability to render every physical aspect of a face and every muscle of the male form is dazzlingly good. In this sense, he was a consummate realist.

May 12, 1999, Design Review Committee. Action Item 3. House of Puerto Rico - Mark Marney, Staff, Northern Parks Division; Bahram Maheronnaghsh, architect.

Motion by F. Blecksmith, seconded by M. Marum, to approve the proposed cottage design for the House of Puerto Rico, as presented.

Vote: Unanimously approved (8 members present).

May 12, 1999, San Diego Union-Tribune, B-7. Sense of Identity; nothing epitomizes the extraordinary diversity and unit of this place as much as Balboa Park, perhaps our greatest "goodest" place. It captures the ecological, cultural and sociological diversity of our region in a manner with which we can all identify, by Mary Lindenstein Walshok, associate vice chancellor at UCSD.

It is extraordinary that this social diversity which could be something that divides us, in fact, like the diverse ecology of the region, is something that binds us. In San Diego, much like Ray Oldenburg's discussion of the "new urbanism" in his book "The Great Good Place" multi-ethnic restaurants, street fairs, coffee houses and community centers represent the places where sociability and a sense of community often occur.

What is particularly extraordinary about Balboa Park, compared to other parks in the United States, is the diverse collection of cultural and social institutions along its many walkways and main promenade,

June 1, 1999, San Diego Union-Tribune, E-6. Zoo juggernaut moves for changes at the park, by Welton Jones.

Is there too much free parking in Balboa Park. Is there an extra 25 acres of parkland available for a more commercial use? Are carousel rides too cheap?

Those who think so, rejoice. The San Diego Zoo is aiming to set things right.

June 4, 1999, San Diego-Union Tribune, B-1. Discussion of Zoo expansion delayed by Planning Commission yesterday, by James Steinberg . . . panel was unable to raise a quorum due in part to potential conflicts of interest (map).

June 7, 1999, Balboa Park Committee

Chairperson's Report: Ms. Lacy reported on the dedication ceremonies of the long-awaited Balboa Park Activity Center and expressed her appreciation to all who assisted in the dedication and construction.

CBPA Report: Betty Peabody reported on the actions of the Central Balboa Park Association meeting held earlier in the day. Agenda items included a discussion of the S. D. Zoo expansion proposal, introduction of the new Balboa Park Storefront Officer, Bruce Getz, and introduction of new staff from the Museum of Art.

Staff Report: Penny Scott continued the report of the new Balboa Park Activity which officially opened to the public June 1, 1999. She introduced Balboa Park Grounds Maintenance District Manager Div Brasted who spoke briefly on the preservation of the historic excavations at Presidio Park. Div and Penny Scott also updated the committee on the many current construction projects underway in the park.

Zoo Expansion Sub-Committee Report: Ms. Lacy asked sub-committee chair Julie Anne Hyde to report on their activities since the last meeting. The committee has been gathering information and contacting various groups and organizations who may be affected by the proposed expansion.

Adoption

201. Cal Trans Improvements - Highway 163 Shoulder Paving Replacement/Repair: It was moved, seconded and carried unanimously to approve the proposed shoulder pavement repair and replacement at various locations along Highway 163 through Balboa Park as presented (Estrada/Rucci 10-0)

201. Timken Museum Additions to the 20 Year Needs List: It was moved, seconded and carried unanimously to approve the two proposed additions to the 20 year need list pertaining to repairs needed at the Timken Museum of Art (Fliflet/Herr 10-0).

June 8, 1999, San Diego Union-Tribune, E-4. Zoo plans to corral more of park, by Welton Jones

June 9, 1999, Design Review Committee Minutes

Action Items

3. Balboa Park - S.R. 163 Shoulder and Pavement Rehabilitation: Motion by M. Marum, seconded by K. Fulhorst to approve the Shoulder and Pavement Rehabilitation project with the following condition:

That the proposed oak trees are to be hand selected for character.

Vote: Unanimous approval (10 members present).

June 10, 1999, San Diego Union-Tribune, B-15. Letters:

Larry Clague, Escondido: "This is nothing more than a poorly veiled land grab of public open space in Balboa Park by the zoo."

Sharon Dodson, San Diego: "It would appear that the Wild Animal Park would be better suited for conserving and breeding animals and that the zoo should be more mindful of the need to conserve the beautiful open spaces that make Balboa a world-class park."

Elizabeth Bryson, San Diego: "The zoo wants all the land between state Route 163 and Park Boulevard to accommodate its insatiable hunger and it will get in unless we citizens act quickly."

Theodore V. Cook, San Diego: "It would be much better if the zoo, which already controls a vast expanse of land in the north city, would move its entire operation there and return the land I the park back to the people."

June 17, 1999, Park and Recreation Board.

Communications

Mr. Glassman reported that the proposed Founders Plaza will be moved to the Laurel Street entrance to Balboa Park. According to a letter received by the Historical Society from the National Parks Service, this project is inconsistent with the Balboa Park Master Plan and does not comply with the Secretary of the Interior's standards to be placed in the Historic Landmark Zone, where the Plaza was to be located originally.

Dr. David Watson, an attorney with Gray, Cary, Ware & Freidenrich, representing the Zoological Society, reported that the Planning Commission today initiated a Plan amendment to the Balboa Park Central Mesa Precise Plan for the Zoo expansion. Mr. Watson assured the Board members that the Zoological Society plans to work with Park and Recreation staff and will be coming back to the Board at a later date to make a presentation that will address the issues brought up at the June 17 Planning Commission.

Director's Report

Ms. McLatchy reported:

The proposed Founders' Plaza will be relocated to the west side of Balboa Park as requested by the National Parks Service. Mr. Michael Behan, Metro Parks Division Deputy Director, will be working with Mrs. North and the architect on the relocation.

National Trails Day was held June 5 in Balboa Park. This is a state/county/city event that promotes year-round trail activities and special events in City and County parks. This year the event included a 114-mile hike from San Diego to the Anza Borrego Desert. Councilmember Christine Kehoe

from District 3 attended the event and presented a Certificate of Accomplishment to those who finished the hike.

Volunteer Recognition Night will be held Thursday, July 29, at the Balboa Park Club. This year's theme is Mardi Gras and once again Hunter's Steak House in Mission Valley has generously offered to donate the food.

Information Items

201. House of Iran - Mark Marney (Northern Parks Division) . . . Mr. Mark Marney, Park Designer with the Northern Parks Division, described the proposed 1,000 square foot cottage that will be placed within the Central Mesa portion of Balboa Park and will be designed to be consistent with the historic cottages already in the area. The cottage will be financed by the House of Iran and its contributors. Upon completion, the cottage will be donated to the City as a gesture of good will and appreciation from the Iranian community. Mr. Marney introduced Mr. Alan Azimi, representing the House of Iran, who presented additional information regarding the project.

202. The New Century Zoo - Robin Shifflet (Northern Parks Division) . . . Ms. Deborah Sharpe, Park Planning Supervisor with the Northern Parks Division, presented a briefing on the Zoological Society's proposal to expand their Balboa Park leasehold from approximately 124 acres to 148.5 acres to achieve four primary goals: 1) Expand the preservation and conservation of endangered animal species through a captive breeding program. 2) Provide additional exhibit space. 3) Expand the parking capacity for visitors and employees, and 4) Create a prominent entrance off Park Boulevard. The proposal would affect six separate parcels: The War Memorial Parcel, Old Globe Way and Parking Area, Archery Range, Balboa Park Miniature Railroad, The Carousel, Richmond Street Off-Ramp, and Zoo Parking Lot. A full Environmental Impact Report (EIR) and a General Development Plan will also be required. City staff has determined that the proposed expansion is not consistent with either the Master Plan or the Precise Plan, and therefore requires amendments to both Plans. The Society's lease agreement with the City would also need to be amended to consolidate the expanded area into one leasehold.

Ms. Leisa Lukes, Project Manager from the Planning and Development Review Department, and Ms. Robin Shifflet, Project Manager from the Northern Parks Division, answered questions from Board members.

Committee Reports

Balboa Park Committee: Ms. Lacy reminded everyone that summer activities have begun in Balboa Park. The Japanese Friendship Garden is undergoing a major renovation that will make it an even more tranquil and beautiful place to visit when completed. The Russian perspective on World War II is currently on exhibit at the Municipal Gym.

June 17, 1999, San Diego Union-Tribune, Night & Day - 45. Ear Candy: Summer festival lineup pumps new excitement into historic Spreckels Organ, by Valerie Scher . . . 12th Annual International Summer Organ Festival from June 21 through August 30 (except for August 23).

June 18, 1999, San Diego Union-Tribune, B-1. Zoo expansion foes speak out yesterday at Planning Commission meeting but formal review of proposal is approved, by James Steinberg.

June 19, 1999, San Diego Union-Tribune, B-15. Letters:

Robert Horwitz, North Park: "The plan is amendable only if there is a clear case of public benefit. The zoo has simply not made a credible case."

Chuck Lungerhausen, San Diego: "The War Memorial building is used for public meetings now. The veterans deserve more honor than is being shown by the zoo developers."

June 20, 1999, San Diego Union-Tribune, H-8. On the Way to the Millennium/San Diego Century/Amid despair, a new foundation/The 1930s: Another exposition growing military presence lighten Depression, by Ann Jarmusch.

With new and renovated buildings and gardens completed in a matter of months (by an army of 4,000 laborers) the (California Pacific International) exposition attracted 7.2 million international visitors [sic] by the time it closed in September 1936. The enterprise --- intended as a diversion and economic spur in troubled times --- blossomed into a symbol of San Diego's resilience and reconfirmed its coveted status as a playground in paradise.

June 20, 1999, San Diego Union-Tribune, H-9. House of Sweden will celebrate amid renovation, by Caroline Dipping.

Construction dust and debris won't hinder the House of Sweden's plan to usher in the "season of light" with its annual Heritage Festival from noon to 3 p.m. today in Balboa Park.

A \$50,000 interior renovation of the 64-year-old House of Sweden began two months ago. The city of San Diego, which owns the 28 international cottages in the park, recently completed \$700,000 worth of exterior improvements on all the cottages, including lead abatement, roof refitting and painting.

So far the House of Sweden has raised \$40,000 of the \$50,000 needed for its renovation through food fairs, Christmas on the Prado and donations.

June 21, 1999, Letter, Christine Kehoe, Councilmember, Third District, to Richard Amero: Rest assured that I understand the possible environmental, traffic and noise implications of the expansion of the Zoo."

June 24, 1999, San Diego Union-Tribune, B-1, B-8, B-10. Full of budget optimism, San Diego goes on a spree, by Ray Huard.

Accustomed in the past to looking for ways to cut spending, council members were treated yesterday to an extra \$10.7 million in unanticipated tax revenue on top of the optimistic budget proposal City Manager Michael Uberuaga offered in May.

June 26, 1999, San Diego Union-Tribune, B-1. A part of Bay-Park Link is inked in; 12th Avenue changes approved in concept, by Ronald W. Powell.

Twelfth Avenue --- from C Street south to K Street --- is the focus of beautification and traffic circulation improvements.

Under the design concept, the northbound traffic lane along 12th would be closed from K Street north to C Street, allowing widening of the sidewalk on the east side of 12th Avenue from 27 to 33 feet

June 27, 1999, San Diego Union-Tribune, G-2. EDITORIAL: A vital parking link, how one structure could fill many needs.

At the southern edge of Balboa Park, right next to Interstate 5 and adjacent to Park Boulevard, there's a large, underutilized paved area on a slope in the Inspiration Point area. There's nothing terribly inspiring about it; it's a deteriorating parking lot near the U. S. Naval Hospital.

Why not consider solving the parking problems for Balboa Park, the zoo and the ballpark all at once by building a large parking building on that site? Zoo officials have considered this option, saying it would have to be linked to the zoo by a monorail or other high-speed transport.

June 27, 1999, San Diego Union-Tribune, G-3. Letters:

James S. Caldwell, San Diego: "This 'New Century' Zoo plan appears to be a not-so-subtle power grab."

Sandor Johnson, Encinitas: "Instead of relying on increased parking with a five-story parking structure, the zoo, in conjunction with public transportation officials and Sea World, should develop a joint plan to increase public access to both attractions."

Ralph Butlin, San Diego: "The parking structure could be built in the canyon wall across Park Boulevard and before Florida Drive."

June 28, 1999, San Diego Union-Tribune, D-14. The San Diego Hall of Champions Museum, new bigger house of dreams, better facility in Balboa Park opens this week, by Gabe Elizondo.

July, 1999, North Park News, Vol. 7. No. 6. (Planning) Commission Ignores Public Outcry Over zoo Expansion, by Jane Cartmill.

July 1, 1999, San Diego Union-Tribune, B-15 Letters:

Tony Harris, Hillcrest: "While the zoo would like us to believe the expansion is for preserving our environment, it hopes we don't notice that the floors of its swanky Albert's restaurant are paved with the tropical hardwoods harvested from our vanishing rain forest, nor remember that a few years ago, the two dozen or so beautiful old palm trees in its parking lot were cut away to add enough asphalt to accommodate a few more motor homes."

Fred Willis, Solana Beach: "Your suggestion of a monorail system linking auto parking areas at Balboa Park to downtown and the new ballpark is ingenious."

July 4, 1999, San Diego Union-Tribune, G-3. Letter: Jay Hyde, San Diego --- "Free parking is important to Balboa Park, not because of the Zoo but because of those people who want to bring their families there but cannot afford to pay for parking."

July 4, 1999, San Diego Union-Tribune, E-1. Mastering the art of balance; Ron Bacigalupi --- museum chief draws on love of creative process to guide him, by Robert L. Pincus.

But Houston is about to become history for him. Southern California beckons Bacigalupi, 39, whom the San Diego Museum of Art's board of trustees selected in March to become the sixth director in its 73-year history. (He officially begins his duties on August 2.)

July 5, 1999, Los Angeles Times, Home Edition, Part A Section, A-3. California and the West: Veterans Up in Arms Over Zoo Proposal, by Tony Perry.

"To rip up a war memorial to build a parking garage is like ripping out somebody's heart so it can be sold for a transplant," said DAV chapter Cmdr. Michael Getty, 85.

July 12, 1999, Balboa Park Committee.

Action Items

Adoption (Each adoption item requires individual action).

201. House of Puerto Rico - Proposed Construction Design.

201. Founders Plaza

Information Items.

401. Balboa Park Golf Course Master Plan

July 12, 1999, San Diego Union-Tribune, B-1. Zoo expedition: a quest for parking; bid for 24.5 acres of parkland draws fire from veterans, others, by James Steinberg.

Wherever a structure is built though the one thing the zoo doesn't want to do is pay for it; thus, the parking fee.

July 14, 1999, Design Review Committee

Action Items

1. Balboa Park - Founders Plaza . . . Darren Greenhalgh - Staff, Public Buildings and Park Division; Michael Theilacker - Landscape Architect.

Motion by S. Andrews, seconded by K. Fulhorst to approve the proposed General Development Plan for Founders Plaza.

Vote: Unanimous approval (7 members present)

Information Items

1. Balboa Park - Golf Course Clubhouse - Master Plan . . . Mark Marney, Staff, Northern Parks Division; Jack Gallagher - Architect.

Mark Marney from the Northern Parks Division and Jack Gallagher, architect from the Dahlin Group, presented the proposed concept for the Balboa Park Golf Course Clubhouse Master Plan. The proposed concept generally received positive input from Committee members. The Committee asked the architect to examine the character of the surrounding neighborhood and to incorporate some of the significant elements of the neighborhood into the final architecture for the Clubhouse. The Master Plan is scheduled for completion in the fall of this year. The final Master Plan will return to this Committee as an Action item.

July 14, 1999, San Diego Union-Tribune, B-1, B-2. After major overhaul, lily pond is afloat again; plants, mosquito fish replace turtles, koi, by James Steinberg..

July 15, 1999, Park and Recreation Board

Director's Report

Aquafest is being held at Kearns Pool in Balboa Park from noon until 4:00 p.m. on Saturday, July 24th. A Health and Safety Fair will run concurrently with Aquafest.

An article in *Decorator and Style Magazine* features Balboa Park and the Medallion Awards that Balboa Park, Mission Trails Regional Park and Mission Bay Park received.

The FY 2000 Park and Recreation Budget has been cut by 2 percent. . . . Over \$4 million was approved for deferred maintenance in Balboa Park and Mission Bay Park.

Committee Reports - Balboa Park Committee: Ms. Lacy reported that Founder's Day will be celebrated at Presidio Park, July 17. She also was very pleased about the addition of a Park Ranger program for the open space park being developed at the mouth of the San Diego River. Many great activities are going on in Balboa Park.

Design Review Committee: Mr. Glassman reported that the action item moving Founders' Plaza to the west entrance to Balboa Park was approved.

July 22, 1999, San Diego Union-Tribune, B-15. Letters:

Wallace Danielson, San Carlos: Get rid of the mosquito fish and return koi to lily pond . . .
"Who wants to look at tiny mosquito fish?"

Daniel R. Drew, San Diego: "The mosquito fish are aggressive, and eat fins of exotic looking fish until the victim cannot swim."

H. W. Yeager, San Diego: ". . . be it noted that the lovely lilies bloom from about April to October; our koi delighted literally thousands of people all year round, even from October to April. Replace 'em please."

July 28, 1999, San Diego Union-Tribune. Historical Society's museum hit by a flood yesterday, by Jeff McDonald . . . contractors broke a water pipe on the roof of the Casa de Balboa.

July 29, 1999, San Diego Union-Tribune, A-3. Coming back to Park soon: new museum with big name . . .
. Museum of Photographic Arts.

July 30, 1999, San Diego Union-Tribune, B-4, B-6. Ford Tri-Motor (1928 plane) soars to a happy landing; joins displays at San Diego Aerospace Museum, by James Steinberg . . . three-ton aircraft hoisted by crane and moved from lawn in front of the Aerospace Museum to the museum's inner courtyard, 50 yards away. . .
. . . There it joined a PBY Catalina flying boat, a MiG-17, an F-4 Phantom jet fighter and a Vietnam War-era Bell Huey Cobra helicopter. . . . workers re continuing to enclose the courtyard with a 22,500-square-foot fabric cover..

July 31, 1999, San Diego Union-Tribune, B-15. Letters:

Marilyn H. Lepore, La Mesa: "Overall the efforts of the zoo administrators to expand into Balboa Park seem both arrogant and profit-driven. With the acquisition of the nearby carousel and miniature train and the construction of restaurants and gift shops in the present parking lot, the San Diego Zoo is in danger of becoming just another theme park."

Peggy Mazzella, Mission Hills: "(The zoo) wants to relocate the Veterans building, fine a new site for archers, displace the carousel, take over the model railroad, take away the Old Globe parking and building a parking structure on the only open parkland north of the Zoo. For shame."

Dan Williams, San Carlos: "Let's see, we have the world-famous San Diego Zoo and a park that is among the best in the world, drawing not only locals but people from all parts of the world. Maybe we should institute some kind of tax on tourists to pay for such things. . . . Nah, that would never work."

August, 1999, ZOONOOZ. Direct Line: Some Facts About OUR NEW CENTURY ZOO, by Douglas G. Myers, Executive Director.

August 3, 1999, San Diego Union-Tribune, B-3, B-10. City partly funds a 12th Avenue promenade, also seeks grants, by Roy Huard.

Council members voted unanimously to put \$2.1 million in redevelopment money toward the \$7.1 million street beautification project.

The plan would turn 12th Avenue into a one-way street heading south with sidewalks on the west side expanded so they would be between 26 feet and 33 feet wide. A bicycle lane would be added and northbound traffic would be diverted to 13th Street.

August 4, 1999, San Diego Union-Tribune. Earl Thomas Schultz, curator, admits stealing reptiles from zoo; netted \$70,000 by selling rare Australian pythons, by Valerie Alvord.

August 8, 1999, San Diego Union-Tribune, H-18. Work in progress: Natural History Museum to get a complete makeover; \$20 million renovation and expansion scheduled to be completed in January 2001 (illus.).

August 8, 1999, San Diego Union-Tribune, D-3. Letter, Alfred C. Strohlein, San Diego: "To no one's surprise, Anheuser-Busch, in a frenzied petition drive last summer, inveigled the electorate to overturn a 1972 ordinance limiting the height of structures to be erected in the coastal zone. Even after its narrow victory, representatives of the "aquatic entertainment industry" still insisted that they had no idea what the wanted the extra height for."

August 22, 1999, San Diego Union-Tribune, A-1. Panda cub new arrival at San Diego Zoo; birth is first in Western Hemisphere in nearly 10 years; by Jeff McDonald.

August 25, 1999, San Diego Union-Tribune, B-1. A hawk takes lead in panda's care; over three years keeper Kathy Hawk has developed a close relationship with bears, by James Steinberg.

August 29, 1999, San Diego Union-Tribune, B-1, B-5. School district, Zoo talk land deal; secret discussions rile some in community, by Maureen Magee.

Submitted to the city this summer, the "New Century Zoo" plan makes no mention of acquiring Roosevelt Junior High School of Park Boulevard.

August 31, 1999, San Diego Union-Tribune, E-3. Zoo school: The latest Balboa Park land grab being considered by the San Diego Zoo --- taking the site of Roosevelt Junior High School on the park's northern edge in exchange for building a new junior high elsewhere --- isn't quite as mad as the previous idea of tearing down the Veterans War Memorial Building and rousting the archers.

September 3, 1999, San Diego Union-Tribune, B-5. Obituary: W. Allen Perry, park superintendent, banker, by Jack Williams.

In 1934, Mr. Perry was appointed landscape architect for the 1935-36 California Pacific International Exposition in Balboa Park. Mr. Perry was promoted to assistant park director in November 1935 and became park superintendent in March 1939.

September 5, 1999, San Diego Union-Tribune, H-13. Homescape/Gardening --- Friendship from the ground up; symbolic garden is a place to enjoy our connection to nature's grace, by James Steinberg.

The garden was designed by Takeo Useugi, who teaches Japanese landscaping at Cal Poly Pomona. Useugi even hand-picked and supervised the placing of each of the garden's rocks and boulders --- 100 tons of them --- down to the fraction of an inch, said Tom Yanagihara, president of the Japanese Friendship Garden Society of San Diego.

September 7, 1999, San Diego Union-Tribune, B-3, B-5. A Day With . . . Michael Ruiz, Balboa Park's senior ranger, keeps job in perspective, by James Steinberg.

September 8, 1999, Letter, Leisa A. Lukes, City of San Diego Development Project Manager, to Richard Amero . . . New Century Zoo public workshop September 13, 1999, Recital Hall, Balboa Park, from 6:30 to 8:30 p.m.

September 8, 1999, Design Review Committee

Staff Report: Staff indicated that the House of Iran was requesting a modification of their site plan to improve circulation, visibility and the relationship to the proposed House of Puerto Rico. The Design Review Committee indicated that the proposed change could be significant and that they would like to review the proposed revision. The existing and proposed site plans were sent to the Committee members for review and comments. Staff received one comment that the proposed revision was moving the cottage too close to the Hall of Nations and that it should be moved slightly closer to Pan American Road. This recommendation was forwarded to the architect.

September 12, 1999, San Diego Union-Tribune, B-2. Zoo to take expansion plan to public; will hold first of four workshops tomorrow, by James Steinberg.

September 12, 1999, San Diego Union-Tribune, H-2. Kumeyaays return to Balboa Park to build traditional house, by Ann Jarmusch . . . the occasion is the annual California Indian Days celebration, a free event to be held from 9 a.m. to 6 p.m. at Park Boulevard and President's Way next Saturday and Sunday.

September 13, 1999. Balboa Park and San Diego Zoo Public Meeting --- Agenda.

September 14, 1999, San Diego Union-Tribune, B-3, B-8, B-12. Two hundred meet to discuss additional zoo space; Mediation Institute of Los Angeles and the San Diego-based Consensus Facilitation Services hired to find consensus on plan, by James Steinberg.

September 16, 1999, Park and Recreation Board

Director's Report

Volunteer Recognition Night, held on July 29 at the Balboa Park Club, was a huge success with over 200 volunteers present.

Record crowds enjoyed this year's Twilight in the Park Summer Concert Series held at the Organ Pavilion in Balboa Park.

Volleyball is becoming a very popular sport at the new Balboa Park Activity Center with more than 150 players participating in men's and women's leagues. The four open volleyball courts are always filled with waiting lists of teams wanting to play.

Committee Reports - Balboa Park Committee: Mc. Lacy spoke briefly regarding the Zoo Expansion and that she had not been noticed for the Workshop held on September 13. The newly renovated Japanese Friendship Garden Re-dedication was held on September 9. A press conference will be held at 10 a.m. on September 17 regarding the Millennium Celebration in Balboa Park. Ms. Lacy also spoke in opposition of any possible changes to the scenic sections of SR-163 that runs through the Balboa Park area and Mr. Leyton was also in agreement. Ms. McLatchy explained that a task force is being created and one of the representatives will be from the Park and Recreation Department.

September 16, 1999, San Diego Union-Tribune, Night & Day -44. Stop the Carping . . . Japanese Friendship Garden reopens Tuesday, by Kerry Terry.

Aside from the koi pond, other new features in the Japanese Friendship Garden include the addition of a redesigned entry with an open-air plaza, a bonsai display garden and a tea pavilion. The new multipurpose activity center will serve as a place for cultural, educational and group meetings. Pre-

existing features include the sukiya-style exhibit house, which was built in 1990, and the Zen-style stone garden. Throughout the garden are typical Japanese flowers and trees, including bamboo, conifers and wisteria.

September 18, 1999, San Diego Union-Tribune, B-15. Letters:

Harold Segal, San Diego: "If the zoo does in fact need more space, it is readily available in the Wild Animal Park. But, please, leave Balboa Park alone!"

Michael Williams, San Diego: "Our zoo is already world-class. But so is Balboa Park. It is also a finite space, and continued zoo expansion should not be an option."

Jim Ricker, San Diego: "The idea that just because a lease-holder wants to change the terms of a lease is not reason enough to change the Master Plan of Balboa Park seems to be foreign to the planning and review people at City Hall."

Brian Byrne, Mission Beach: "The continued expansion of the zoo is necessary for the continued success of its endangered species efforts. Pretty soon we will only be able to see these animals in zoos since they won't be in the wild anymore."

Claudia Miller, La Mesa: "The people who are opposed to the zoo expansion are the same people who don't care if the California condor becomes extinct."

Charles F. Bethel, San Diego: "The zoo seems well on the way to becoming the tail wagging the Balboa Park dog."

Elizabeth Bradley, San Diego: "Today's new zoo exhibits require more space to allow animals to live in more natural environments instead of cages."

Andrew Simmons, San Diego: "The zoo is asking to convert a portion of the land it already leases into additional exhibits and a parking structure which is 60 percent underground, and do it at its own expense."

Collie M. Mattfeld, Rancho Bernardo: "Two letters this week (September 12 and 15) describing Legoland's hot pursuit of \$6 parking fees are forerunners of the zoo's effort to build a multilevel pay-for-parking (\$5) terrace on the old War Memorial Building site."

September 23, 1999, Los Angeles Times, Home Edition, Calendar Section, F-4. Best Bets: Saturday 9/25; all day: Museums . . . "Star Wars: The Magic of Myth" opens at the San Diego Museum of Art.

September 24, 1999, San Diego Union-Tribune, B-1, B-3, B-16. Japanese Friendship Garden returns; Balboa Park site reopens to public after yearlong renovation, by Michael Stetz.

September 25, 1999, San Diego Union-Tribune, B-7, B-3. Zoo, city to split cost of mediation of expansion plans in Balboa Park, by Ray Huard.

City planners signed a \$14,000 contract yesterday with professional mediators to help resolve a dispute over the San Diego Zoo's expansion proposals.

The city and the Zoological Society of San Diego will split the tab to hire "facilitators" from the Mediation Institute of Los Angeles and the San Diego-based Consensus Facilitation Services, said Stephen Haase, who is coordinating the project for the city.

The initial nine-week contract will determine who wants to participate, what the underlying disagreements are, whether all sides want to talk, and whether mediation would work, said Mediation Institute president Alma Knaster.

Should the zoo and the city decide to proceed, the process would likely take six months and might cost up to \$26,000 more, Knaster said.

Normally, the city expects the person or organization proposing a project --- the zoo, in this case --- to pay.

Haase said planners and Park and Recreation Department officials agreed to split the cost because the mediation is likely to cover issues broader than the zoo's proposal, such as parking.

"The parking problem is a Balboa Park problem, not just a zoo problem, and it wouldn't be fair for the zoo to pay for," a Balboa Park problem, Haase said.

Mayor Susan Golding agrees, said her press secretary, Ric Grenell.

"The information being sought is crucial to Balboa Park as a whole, not just the zoo," Grenell said.

With luck, the mediators will determine not so much what all sides prefer but what each can live with, said Haase.

Fall, 1999. INSIDERS' REPORT, San Diego Zoological Society.

October 3, 1999, San Diego Union-Tribune, B-2. Organ pavilion gathering supports sufferers of incurable eye disease, by Jeffrey M. Barker . . . More than 2,000 persons gathered at Balboa Park's Spreckels Organ Pavilion yesterday to support sufferers of a disease that causes loss of central vision for one in 20 seniors.

October 4, 1999. Balboa Park Committee

Staff Report: Penny Scott distributed copies of the updated Park and Recreation Board roster. She distributed flyers for the Pepper Grove Playground dedication to be held on Saturday, October 9, 1999, 12 noon. Jeffery Tom provided information concerning the Arizona landfill in response to a question. Efforts are continuing to stabilize and control erosion of certain areas of the landfill with soil, mulch and landscape. He also announced the rehabilitation of the Morley Field parking lot has been completed.

Penny Scott reported on the temporary installation of two sculptures in front of the Hall of Champions for six months. The sports figures by artist Nike de Saint Phalle were placed in front of the building to promote the location of the new museum.

Information Items

401. San Diego Zoo Expansion - Sub-committee Report

Sub-committee Chair Julianne Peters Hyde distributed copies and reviewed highlights of the preliminary report of information the committee gathered related to the proposed San Diego Zoo Expansion. Committee members worked diligently to identify issues, gather data, and contact user groups impacted by the proposal. Tim Rothans from the City Manager's office explained the status and process for the proposed expansion and how the public review will be handled including the role of Balboa Park Committee in that process. Julianne asked if a list of the steps could be prepared and given to the Balboa Park Committee and directed staff to place adoption of the report on the Agenda for the November meeting. By a show of hands, the report was endorsed by committee members, 8 in support, 2 opposed.

Tim Rothans explained that a private meeting will be scheduled with the Balboa Park Committee and the project mediator to record their concerns, issues and comments.

402. Expo 2000 Millennium Celebration

Penny Scott updated committee members on the Expo 2000 three-day event scheduled for the end of the year. Registration forms were mailed to committee members for several of the planned activities.

At this time, Jeffery Tom updated the committee on the Highway 163 Committee which Councilmember Chris Kehoe has formed to work with Cal Trans to come up with a design for improvements to 163 as it travels through Balboa Park which preserves its beauty and addresses safety concerns. Peggy Lacy will be a member of the Committee.

October 4, 1999, San Diego Union-Tribune, B-2. This year's AIDS Walk attracted 20,000 to Balboa Park yesterday; participants say awareness is down, by Ray Huard.

October 8, 1999, San Diego Union-Tribune, B-1, B-3, B-5. Zoo hires Steve Estrada, expansion opponent, as adviser; officials take new look at Balboa Park plan, by James Steinberg.

Estrada has argued in the past that the zoo should make better use of its current 123-acre Balboa Park leasehold, rather than seek to expand into more of the park. The zoo already is the park's largest tenant.

He still continues to oppose zoo expansion "as submitted" to the Planning Commission, Estrada said. But when asked if he now opposed any zoo expansion at all, he replied, "not necessarily."

Estrada's decision comes in the same week that his name appeared on a report submitted to the city's Balboa Park Committee, an advisory group of which he is a member.

The report, prepared by a special seven-member panel of the Balboa Park Committee, including Estrada, concludes that each of the Zoological Society's specific proposals for expansion violates either the master plan or the precise plan. Included are the zoo's proposed acquisition of the Veterans War Memorial Building site, Old Globe Way, a 12.2 acre Archery range, the miniature railroad and carousel, the 1-acre Richmond Street off-ramp parcel, as well as the zoo's plans for the current parking lot.

"We believe the Zoo has failed to provide justification for additional space in Balboa Park, and we do not support the plan submitted to the City," the report concludes. The full Balboa Park Committee, including Estrada, will vote on the report later.

October 9, 1999, San Diego Union-Tribune, B-6. Pepper Grove playground will reopen today; Balboa Park facility offers creative fun, by James Steinberg . . . the new site uses a variety of soft-impact materials, including a rubberlike compound, bark and sand. . . . \$747,000 project designed by landscape architect Nicholas F. DeLorenzo.

October 18, 1999, San Diego Union-Tribune, E-1. Turn back time --- "Inspired by Nature: by Iris Engstrand and Anne Bullard, a newly released history of the Natural History Museum, by Roger M. Showley.

October 21, 1999, Park and Recreation Board

Director's Report

After an extensive renovation, the Pepper Grove Playground re-opening dedication was held on October 9 in Balboa Park.

Action Items

Adoption

102. Founders' Plaza - Darren Greenhalgh (Public Buildings & Park Division, Engineering & Capital Projects) . . . Ms. Lacy explained that through the generosity of the Mary Elizabeth North and Mary Gaylord North Family Trust Fund, the Founder Plaza, consisting of full-sized bronze statues of Alonzo E. Horton, Ephraim W. Morse and George W. Marston will be constructed at the northwest corner of Laurel Street and Balboa Drive in Balboa Park. The Plaza will commemorate the contributions and foresightedness [sic] of these three founders and create a cultural amenity that can be enjoyed by everyone who visits the park.

The motion passed unanimously.

201. Status of Mission Bay Park and Balboa Park COP Projects - Halla Razak (Public Buildings and Parks Division, Engineering & Capital Projects)

Ms. Halla Razak, Deputy Director, Public Buildings and Parks Division of the Engineering and Capital Projects Department, presented a detailed slide presentation and described the COP (Certificates of Participation "Bonds") Phase 1 projects that are all located in Balboa and Mission Bay Parks. A color brochure was distributed to the Board members that provided photos and described the location of each improvement as well as those waiting to be funded.

202. Status of FY 2000 Budget Deferred Maintenance Projects

Mr. Tim Rothans, Assistant to the City Manager, described the projects which are all located in Balboa and Mission Bay Parks that have been identified to receive repairs or replacement in the FY2000 budget. Mr. Rothans distributed a listing of prioritized deferred maintenance projects, based on 1998 building records. Approximately \$500,000 of this money will be used for road repairs.

Committee Reports - Balboa Park Committee: Ms. Lacy reported on the October 9 Pepper Grove Playground dedication in Balboa Park and spoke briefly on the proposed Zoo expansion. Ms. Lacy and Ms. Davies attended an advisory group meeting last night regarding possible changes to the scenic section of SR-163 that runs through Balboa Park. Some alternatives discussed were lowering the speed limit and excluding large commercial vehicles from the freeway. The advisory committee plans to meet monthly. Christmas on the Prado will be celebrated from 5 to 9 p.m. on December 3rd and 4th.

October 8, 1999, San Diego Union-Tribune, E-6. In Perspective: "Art of Conservation" study in before-and-after contrast coming to Timken Friday, by Robert L. Pincus.

October 30, 1999, San Diego Union-Tribune, B-13. Museum of Photographic Arts prepares to move 6,000 photos again, this time into a pair of climate-controlled vaults designed to safeguard their contents for generations to come, by James Steinberg.

DIRECTOR'S REPORT

From November 12- 14 the Municipal Gymnasium in Balboa Park was the site for the annual Best of the West Quad Rugby Tournament where eight of the best wheelchair rugby teams in North America met in competition. Two teams from San Diego, the "Bushwackers" and "Sharp Shadow" participated in the event sponsored by the Disabled Services Program. Ms. McLatchy praised the Disabled Services staff for the outstanding job they do. Although the staff consists of only 6 employees, their achievements are not only nationally recognized but are also internationally recognized --- they are simply the best of the best!

City Access Television are running an overview and history of Balboa Park with Park Ranger Kim Duclo.

INFORMATION ITEMS

202. If Proposition 12, a State Bond measure, is approved on March 7, 2000, the City of San Diego will received \$14.4 million for local parks. Upon council approval, this initial pool of money would go towards rehab and deferred maintenance projects.

COMMITTEE REPORTS

Balboa Park Committee . . . Ms. Davies reported that the report submitted by the subcommittee on the expansion plans for the zoo was the major topic of discussion. The report was formally accepted and filed but not adopted by the committee. A second meeting of the SR 163 advisory committee took place last night but Ms. Davies was unable to attend. Ms. Davies also reminded everyone about Christmas on the Prado which takes place on December 3rd and 4th from 5 to 9 p.m.

6-06-2010 E-Mail

Gentlemen,

Thank you all for taking the time to speak with me at the award ceremony. Also, thank you for allowing me to sit at Dr. Blinman's table. I took the opportunity to converse and learn.

I can only repay your kindness by answering your questions of me.

1. Mr. Amero. First, thank you for pointing out the availability of your Collier archives at the San Diego Historical Society. I spent Saturday at the archives and found quite a bit to help me. Now, you asked about the missing years of the life of D.C. Collier. I found the following in my records. According to the July 19, 1916 Santa Fe New Mexican, Colonel Collier relinquished his interests in his Pojoaque property ("Pojoaquito") to his former partner Frank Owen. The name of the incorporated concern was changed from Collier & Owen to the Alfalfa Farms Company and filed with the State Corporation Commission. Prior to the relinquishment, Frank Owen had threatened suit if the Colonel did not reimburse Mr. Owen for serving as the Colonel's agent in New Mexico. Frank Owen had acted as agent in the Pueblo of Pecos and Pojoaque transactions and had worked the legislature for the San Diego Exposition. In another letter, Frank Owen blames Dr. Hewett for convincing the legislature to reduce the appropriation for the Exposition. The December 2, 1918 El Palacio, page 351, lists Col. D.C. Collier as business manager of the Community Theater Association. The August 20, 1919 Santa Fe New Mexican lists D.C. Collier as owning property in Section 15 of Santa Fe. The April 17, 1920 Santa Fe New Mexican, page 6, third section, lists D.C. Collier as the owner of Santa Fe property valued at \$4,300. The November 8, 1920 Santa Fe New Mexican, page 6, states that son of Jesse James plans to film a movie at the Old Manderfield estate (owned by D.C. Collier). The film is available on DVD, "Jesse James Under The Black Flag." I have a copy, but I cannot identify the old Manderfield home (which became the old Bull Ring, now owned by Gerald Peters and known as the Rio Chama Steakhouse).

<http://www.santafebullring.com/history.htm> <http://www.kinghickory.com/pdfs/manderfieldStory.pdf>
According to the Sunday, March 14, 1921? Santa Fe New Mexican, Miss Eugenia Manderfield began a suit to foreclose on D.C. Collier and the \$5,000 mortgage. In a Santa Fe, New Mexican February 7, 1922, page three article, D.C. Collier is reported to have transferred his property to Santa Fe Bank, under the headline "Colonel's Dream of Improvement of Old Manderfield Place Has Evidently Been Abandoned." D.C. Collier next appears in the Santa Fe New Mexican on December 5, 1922 in an unflattering article noting that he had planned to make the Manderfield estate "the show spot of the west" and that he was now in Brazil. The estate again pops up in the August 7, 1928 Santa Fe New Mexican, page 2, where it is described as the largest area in or near Santa Fe's business district, valued at \$23,000, contained six arces and a house with 12 rooms, a separate four-room house with bath, and a four car garage.

So, Mr. Amero. It appears that D.C.'s missing years were likely spent, unfruitfully, in Santa Fe.

2. Dr. Blinman. You asked when D.C. Collier first met Dr. Hewett. Unfortunately, I could not find the articles I was looking for in my records describing their first meeting. However, I did find a December 30, 1916 "Sun" article in the David Charles Collier clippings kept at the San Diego Historical Society. It states: "In the fall of 1911, after the close of the session of congress, when the house of representatives passed the resolution giving recognition to San Diego -- which was

subsequently defeated by the senate -- Mr. Collier went to Santa Fe, N.M., to take the first, last and only vacation he attempted during the progress of his strenuous campaign in behalf of our exposition. There he was introduced to Dr. Hewett, head of the School of American Archaeology. After a discussion which extended almost through the night, Mr. Collier made preliminary arrangements for an exhibit, under the auspices of the Archaeological Institute of America, which was later consummate after negotiations of several months between Dr. Hewett, Mr. Collier, the board of directors of the exposition and the governing body of the institute. The scene of man exhibit will be one of the permanent features of Balboa park which will be of vast educational benefit to San Diego, and will spread our fame far and wide in educational circles."

If I find the other references concerning Collier and Hewett's first meeting, I will forward them to you. They may be contained in Professor Em Hall's book, *The Four Leagues of Pecos*.

3. Mr. Kelly. Thank you for seating me at Dr. Blinman's table. Thank you for hosting the event. I did find it humorous, as only a student of history would, that the Goodhue award would be given to the man who originally hired him. As a sidenote, I was surprised to find nothing in the Historical Society concerning one of the greatest citizens of San Diego. I found nothing on W.Y. Evans-Wentz. Evans-Wentz was the compiler/editor/commentator of the Tibetan series of books published in the early and mid 1900's. The *Journal of San Diego History*, Winter 1983, did a short review of a book about him, Pilgrim of the Clear Light, in the Book Notes Section. His influence, through his books, on progressive Americans of the early 20th century and the "hippie" generation and his ties with the San Diego Theosophists make him quite a colorful character of whom San Diego should be proud. His lasting contribution to San Diego County may be his donation of thousands of acres of land on Mt. Cuchama to the Boy Scouts and the State of California for a public park.

Gentlemen, it was an honor, and as of this morning, I have finally finished editing and polishing my chapter in the book introducing Colonel D.C. Collier.

Sincere thanks,

Frank Demolli

Dear Richard,

I don't know if anyone has gotten back to you regarding your question on the present dollar value of the money spent on the ethnology exhibits at the 1915 Exposition. One rather reliable source has 1915 money inflated about 18 times that today. Thus the \$115,585.39 spent on the Department of Ethnology exhibits would be worth about \$2,080,537 in today's money.

Hoping this helps,

Wayne
