San Diego Union, April 21, 1915, II, 11:5. Fair will present pageant to honor Shakespeare on the broad lawns overhanging Cabrillo Canyon in back of the Fine Arts and Indian Arts buildings.

San Diego Sun, April 22, 1915, 2:5. John Nolen to speak at Exposition convention hall Friday at 3:15 p.m. on "Lessons of the Exposition;" will make suggestions regarding future of Exposition buildings; he is presently developing Sacramento park system.

San Diego Union, April 22, 1915, II, 9:1. Iowans to gather at Exposition today; basket picnic in Pepper Grove scheduled first.

San Diego Union, April 22, 1915, II, 9:2. John Nolen, landscape architect, to lecture at Fair tomorrow in the auditorium of the Public Service Building.

San Diego Union, April 22, 1915, II, 9:5. "AD" men of world will visit San Diego Fair; Los Angeles convention ends May 29, then San Diego; Dr. Hewett gave speech at Ad Club luncheon yesterday.

San Diego Sun, April 23, 1915, 1:3. Automobile caravan leaves Los Angeles for San Diego; 200 cars in line.

San Diego Sun, April 23, 1915, 9:1. New state tax of \$12.50 a seat on jitney buses; Senate passed bill yesterday afternoon.

San Diego Sun, April 24, 1915, 17:1-3. Panama-California Exposition is unique among all the world's fairs of the past and is a credit to all of the great Southland; name should be "The Profitable Exposition Beautiful;" Exposition for everyone; buildings do not constitute the whole stage; grounds are also of importance; an artist comments: "The man who built the exposition was a poet and a dreamer. He knew what Cabrillo saw four centuries ago. He knew the dream of a glorious city in New Spain which Serra had. And that city he has built."

San Diego Sun, April 24, 1915, 26:1-2. Alhambra Cafeteria described.

San Diego Union, April 24, 1915, 3:3-5. Roses enhance beauty of Balboa Park; fragrant display covers two-acre area near Exposition.

San Diego Union, April 24, 1915, 7:5. John Nolen, landscape architect, praises San Diego's park system; congratulates City on preserving Torrey Pines: San Diego is realizing her ambition for a great park system, and Balboa Park, in its present improved condition, is a long step in the right direction. This was the statement made by John Nolen of Cambridge, Massachusetts, one of the foremost landscape architects in the United States, in his lecture given yesterday afternoon in the lecture room of the Public Service building at the Exposition.

Some years ago Nolen drew a scheme for the beautification of San Diego, and many of the improvements made since his last visit were along the lines he designed. He congratulated the city on taking into the park system the Torrey Pines near Del Mar, and suggested that in time to come the proposed waterfront park will be demanded by citizens.

Nolen highly praised Balboa Park. He said the improvement was a logical one, and really the first move in a comprehensive system of public parks which was sure to follow.

Nolen spoke before an audience at the home of George W. Marston last night, pointing out improvements which can be made as the city grows.

San Diego Union, April 24, 1915. Cavalry reader for drill today; troop D to give daring exhibition of mounted gymnastics.

San Diego Union, April 24, 1915, 7:4. Autoists to rule Exposition today; Creator's Band will hold first concert at Fair; Cavalry review scheduled: In honor of the Automobile Club of Southern California, today is Motor Day at the Panama-California Exposition. It is also the second day of the entertainment of the passenger traffic officers, and it is the first day for the engagement of Creator's band.

The first review to be held for the public by the U.S. Cavalry will be given at the tractor field at 11 a.m. for the motorists, the railroad men and visitors at the Exposition.

Several hundred motorists arrived in San Diego last night from Los Angeles. They were met at Del Mar by a delegation of San Diego motor enthusiasts and escorted to the city. Today they will be entertained at the Fair. Open house will be kept for them at the Seven Southern California Counties building all day.

Today is the last day of the Iowa-Illinois celebration. All former residents of these states are invited to meet at the Exposition grounds for the renewal of acquaintances. The Iowa picnic was held Thursday, and the Illinois picnic was held yesterday. Today the members of the two societies expect to blend their celebrations into one. Many former residents of both states came to San Diego from Los Angeles and surrounding points to attend the celebrations, but the threatening weather of both days has interfered. It is thought today will be the biggest day for the former Middle Westerners.

As today's programs teems with good things in the amusement line, it is thought that with fair weather thousands will visit the Exposition. Saturday is, as usual, Children's Day, in addition, and this fact always brings up the attendance figures.

San Diego Sun, April 25 1915, Special Exposition Edition, 1:1. San Diego has a new word for the world. Exposition City is going ahead with a speed that cannot be beaten. "No other city on the whole glorious Pacific coast offers more chances for sensible, rational, happy living than San Diego can afford."

San Diego Union, April 25, 1915, 1:4, 2:7. Motorists make merry at Exposition; Dance on Isthmus attracts large throng.

San Diego Union, April 25, 1915, 1:7, 2:4. Cavalry work revelation to crowd.

San Diego Union, April 25, 1915, 3:2-4. San Diegans to honor Bard; Festival program arranged; five typical scenes depicting evolution of drama will be presented by John Lane Connor's pupils at Fair Friday.

San Diego Union, April 25, 1915, 4:4-5. Exposition Excursions No. 5: Science of Man Exhibits, by Ales Hrdlicka.

San Diego Union, April 25, 1915, 4:4-5

EXPOSITION EXCURSIONS

NUMBER TWELVE

Science of Man Exhibits

by ALEX HRDLICKA

Physical anthropology may be most briefly defined as comparative human anatomy; or, a little more comprehensively, as that branch of science which deals in a comparative way with the physical man and his functions.

It embraces (1.) the study of man's natural history, or his exertions as an integral part of the animal kingdom; (2.) the study of man's development and growth and normal decline or senescence, with the variations of the same to different parts of the world and under different conditions; (3.) the study of man's varieties, races and all other physical groupings, and of individual variations within such groups; (4.) the comparative study of man's pathology and his death, both in time and geography; (5.) man's evolution in the future, with its possible regulation or control.

This field, though large, is definite. It also is of a peculiarly intimate and general human interest; and while the science of anthropology is at a relatively recent existence, it has rendered much service to humanity. That it has placed on a firm and well-documented basis the facts of man's gradual ascent from lower organic forms; it has defined the main differences between the different races of men; it has traced the laws which control the growth of the human body and its main parts; and it has thrown much light on the processes of heredity in man, on the effects of environment on his system, and on the causes of his differentiation in general.

Task Taken Up

As may readily be seen from the preceding, physical anthropology constitutes not merely a highly absorbing field of study, but also a sphere which should lend itself to most interesting and instructive exhibits. It was in appreciation of this fact that in 1912, Dr. Edgar L. Hewett, director of exhibits, with Col. D. C. Collier, president of the Panama-California Exposition, called on this writer for plans of what could be accomplished in this line before January 1, 1915, the date set for the opening of the Exposition.

When the proposition was taken up, it was seen at once that there would be little precedent to follow in the planning and formation of the exhibit. No comprehensive exhibits in physical anthropology have ever been attempted, that at a number of expositions, from that in Paris (!878?) to that in Dresden (1911), the subject of man received considerable attention and there were sections devoted in part to anthropology. The scheme of the contemplated exhibit would, therefore, have to be original. It was further realized that available data and material were not sufficient for larger, systematic, high-class exhibits, and that a number of collecting and scientific expeditions to different parts of the world would be necessary in order to supply these deficiencies. Thus the plans had to be extended to include a large amount of field work.

San Diego Union, April 25, 1915, 7:1. Createore's band unleashes flood of melody; cheers sweep over listening throng as spirited numbers close; Leader's "antics" shown.

San Diego Union, April 25, 1915, 8:1-3. Gleaned on Prado and Isthmus.

William James Fogarty, representing Thomas Cook and Son, the well-known touring agency, who was at the Exposition yesterday, predicted an overwhelming volume of travel in June and July.

Mayor Mitchell of New York City probably will visit the Panama-California Exposition within two weeks.

George W. Penniman of Mattapan, Massachusetts, who is chief lecturer for the Knights of Pythias, was at the publicity department of the Exposition yesterday to secure pictures.

Employees of the Benson Lumber Company visited the Exposition to familiarize themselves with the Fair so that they can be of service to visitors.

Old and New Hawaii continues to attract thousands of visitors. Under the able directorship of Ernest Kaai, one of the foremost Hawaiian musicians and composers, music is being made a feature.

Los Angeles visitors passed much time at the Pala Gem Mine yesterday. They watched the operation of mining tourmalines, watched them being cut and polished, and set in pins and rings.

The Cristobal Café was the scene of a merry party last night when Los Angeles motorists and railroad men mingled for a good time. Manager Singer has prepared an attractive program.

The '49 Camp is one of the liveliest places on the Isthmus.

Manager Fesser has inaugurated the serving of tea and a light luncheon on the balcony of the Alhambra cafeteria.

The Panama Canal, one of the largest and most costly of all the attractions on the Isthmus, is being shown before large audiences daily. Manager Harris has installed a number of new features, which makes the show well-worth a second visit.

Clyde H. Osborn, manufacturer of the Osborn electric chair, which is in extensive use at the San Diego Exposition and latterly at the San Francisco Exposition, is going East next month to introduce the motor chair at Atlantic resorts.

The San Diego Natural History Society met at the laboratory of the department of anthropology at the Exposition grounds. After an address by the president, Gen. A. W. Vogdes, Surgeon J. C. Thompson gave a lecture on the natural history of men. . . . At the end of the lecture, attention was called to the necessity for a metropolitan museum association to permanently preserve the treasures that have been assembled in the Science and Man and Indian Arts buildings and in the California Quadrangle.

Odd Fellows' Day, July 3, promises to be one of the largest fraternal days held at the Fair.

Last of the state buildings to officially join the group at the San Diego Exposition will be that of New Mexico, which will be dedicated May 3. Gov. W. C. McDonald of New Mexico will make a special trip to preside at the exercises. With the governor will be Col. R. W. Twitchell, president of the New Mexico Exposition commission, and J. J. Schuler and Guy A. Reed, members of the commission.

The New Mexico building has been opened since the Exposition threw open its gates, but the formal dedication has been delayed until Gov. McDonald could be here.

"The Hunter's Paradise" in front of Underground Chinatown on the Isthmus is the Mecca of all sportsmen. The collection of Joe Clark's, famous trapper of Northern California, is one of the best collections of animals native to the mountains of this state ever seen in California.

"The greatest novelty show in Southern California," is the way a visitor to Underground Chinatown expressed himself. As one enters the typical Chinese street, with its homes and shops with Chinese inscriptions on the doors, it is easy to imagine he is on one of the streets of the famous Chinatown of San Francisco. A guide accompanies visitors to the depths below and explains the life and habits of the Chinese.

The '49 Camp continues to draw the larger percentage of visitors to the Exposition. At the present time Arizona Bill is one of the attractions. He has taken up his abode at the camp and will remain indefinitely. This old fighter, miner and trapper can always thrill the visitor with tales of the wild and woolly West. Managers Couden and Miller are ever on the alert for new entertainers.

Situated on the Alameda, is the five-acre tract which for a year and a half the International Harvester Company has been turning into a western Garden of Eden. The exhibit consists of farm equipment, ranging from hay rakes to tractor engines.

Passing through the beautiful building with its modern conveniences, back beyond a citrus orchard already bearing fruit and interspersed with parkways and settees, the visitor comes face to face with a battery of farm power tractors.

Stabled in a shed sixty-feet long ready to be called upon are four oil tractors ranging in size from the little 100-acre type to the huge locomotive of the prairie, capable of hauling as much as thirty ordinary farm horses.

Back of the orchard, a bare tract of land has been left for a demonstration field, and visitors are given the opportunity of seeing plowing, harrowing and other operations performed by these engines.

The management of the exhibit is in the hands of P. M. Price, a rancher and business man of Southern California, who, with his assistant, W. D. Zarley, is ready to demonstrate the machines.

San Diego Union, April 25, 1915, 11:4. May Day Festival program teems with interest; 28 contests scheduled for young athletes of track and field; 500 children to dance; Queen, flower girls, pages and crown bearers will enliven scene; program will be held on the Golden Hill playground.

San Diego Sun, April 27, 1915, 26:1-2. John McLaren, who made Golden Gate Park, praises the grounds of San Diego's Exposition.

California Garden, May, 1915, 5-6. Monthly Excursion Through Exposition Grounds, by R. W. Sumner.

The "Matilija Poppy," *Romneya coulteri*, will be Queen of the May in Southern California Counties garden this month. Its large white crepe petals, draped gracefully about the golden center and the tall stately stems with artistically-cut leaves lend to the Queenly effect. Besides, it is native to San Diego County and responds to the care of the cultivated plant.

Nearby stands a group of *Cryptomeria japonica*, "Japanese cedar." The cones are just forming and look more like leaf buds than seed containers now, but later will develop into little cones. This tree is like our "Giant Redwood," *Sequoia gigantea*, in form and leafy habit, but a sequoia would never have cones at such a young age, also the Sequoia cone is about the size of a hen's egg.

Over near the building and close to a group of *Wigandia macrophylla*, which is plant of many leaves and blue-spike flowers, is a specimen of *Pharmium tenax*, "New Zealand flax." It is now sending up tall flower spikes. The leaves, however, are the interesting part as in them is a fiber of great economic value. The Decoration Day Lily --- which is only an Easter Lily that has not been forced into early bloom --- will soon be blooming by the hundreds.

In front of the Botanical Building are eight bowl-like vases containing small plants of *Coprosma bauriana*, the glossy, petaled shrub that is so much used against porch and house fronts. Get on your tiptoes and take a close look at them. They are in flower, and it will take sharp eyes to discover them because of their green color. The staminate or pollen-bearing flowers grow on one plant and the pistillate or seed-bearing flowers on another. It will be worth your time to hunt them up, for both are in evidence, in compact heads. They are good examples of dioecious flowers. Between these bowls and the door grows a wide border of *Sally heterophylla*, a slow-growing vine. Its simple little blue bells are worth noticing. The water lilies and bog plants . . . are well on their way to a gorgeous display. The *Eichornia*, or "Water Hyacinth," has not had the necessary warm weather to bring the blue in sight, but May ought to accomplish it. On the outer sides of these beds, next to the lawn, is a low hedge of *Crataegus crenulata*, a narrow-leafed Hawthorne. At the moment it is a compact mass of half-cracked, open, little buds as are the other Hawthornes about the grounds. Next fall they should show a splendid array of berries.

Now step into the lath house. On the east side of *Cocos plumosa* that towers into the dome, you will find a modest little plant with variegated leaves, creeping stems and a stalk of peculiarly shaped flowers. The long petals hang like the ends of a ribbon bow. The three upper ones are delicately dotted and blotched. *Saxafraga sarmentosa* is its name. Back in the glass house, along the steel beams, one of the show vines of the conservatory is climbing. It is *Stigmaphyllon ciliatum* because of the ciliate or hair-like teeth on the margin of the leaves. The yellow flowers are numerous and have been blooming for some time, the buds promising flowers for a long time yet. The delicate structure of these flowers have won for them the name "Poor Man's Orchid."

The two kinds of *Myoporum* spoken of last month just behind the Botanical Building are in bloom. They are rather insignificant, but interesting. The blooming period is short.

At the head of Palm Canyon, reached by following the path running between the formal garden and the Santa Clara-Alameda Counties Building, is a small patch of *Messembryanthemum geminatum*, a small-leafed ice plant. It makes a good ground cover and has not the coarse look of the larger-leafed sort. About fifty feet or so below the path, there is a small group of *Melianthus major*, or "Honey Flower." The tall red spikes are still in bloom and are distinctly contrasted by the large, deeply-cut, glaucous-colored leaves.

A little further along the path in the direction of the Kern-Tulare Counties Building are some *Melaleuca hypericifolia* with its red, bottle-brush flowers breaking into bloom. The species *hypericifolia* means *Hypericum*-like leaves, as it resembles one kind of *Hypericum*, with the leaves evenly set in two ranks.

Nearby is a *Duranta plumieri*, the yellow berries still intact and clusters of buds ready to break into dainty little blue flowers.

Further, on the right-hand side of the path, is a *Ligustrum macrophyllum*, or large-leaved "Privet." If signs count for anything, it should show a mass of white before you read this.

Nearby is another large "New Zealand Flax," that you can examine more closely than the one mentioned before.

Between the Foreign Arts Building and the San Joaquin Counties Building is a little corner of shrubbery that will soon show a patch of gaudy yellow. It is *Hypericum moserianum*, or Saint John's Wort.

Nearby is a ground cover of "Rock," *Cistus monspeliensis*, but they are bloomed and gone. A *Melaleuca ericifolia* stands near the iron grating. Its small Erica-like leaves give it the species name. The flowers are small, dull-red bottle brushes, quite a different flower from its cousin *Callistemon rigidus* and the *Melaleuca* hybrids that will soon be coming in at the Laurel Street entrance.

The *Gladioli* are making a fine display in many parts of the grounds. The light scarlet is "Mrs. Francis King." "America" is a large light pink and "Baron J. Hulot" is a deep purple. "Chicago White" is another. Some bulbs are planted across the path on the east side of the Botanical Building which when they come into bloom the last part of May or the first of June will cause visitors to exclaim. They are *Ismene Calathina*, or "Peruvian Daffodil."

The wild flower field north of the California Building invites inspection. Just now a cultivated form of *Gila androsacea* is head-and-shoulders above the rest. Several kinds of satiny *Godetias* might bright spots here and there.

As you walk along the canyon path parallel to the Prado but north of the buildings, you will see many kinds of perennials and annuals. "Sweet William," or *Dianthus barbatus*, is especially plentiful. *Dianthus coriophyllus* is another from which our carnations originally came. Columbines, *Gaillardias*, Foxglove, *Corcopsis*, *Swainsonias*, Hydrangias, blue, white and yellow Marguerites, and last, but not least, a splendid little bed of Pansies. These and many others cheer the way of the wise man who takes this canyon trail. People are learning to use it more than formerly. It is worth it. Try it and you will see why.

American Review of Reviews, May, 1915, Vol. 51, No. 5, 587-590. The Fair at San Diego, by Bensel Smythe.

San Diego, California, six years ago decided to stake her future on a single throw --- her Exposition. Many of her own citizens thought it a foolhardy proposition. Almost everybody outside of the little city regarded it as preposterous.

Nature had planned a great city on the shores of San Diego Bay, "the first Port of Call in God's country," if the world only knew it. San Diego was determined that the world should know it.

The dominant idea seized for the Panama-California Exposition was a complete Spanish city to suit the traditions and architecture of Southern California. The site chosen was a 1400-acre park in the city's heart, overlooking sea and mountains, business and residential districts. And San Diego proceeded in the following years to create an Exposition so entirely unique, and of such surpassing beauty as utterly to confound criticism.

Now is the dream of six years ago come true. The San Diego memorial to the opening of the Panama Canal is no longer a project: it is a "going enterprise." And like any other great new business concern, Uncle Sam is curious to learn how it is succeeding.

The REVIEW OF REVIEWS is the first magazine to publish the story of the San Diego Exposition, "three months after the opening day." Throughout the West, and even in San Diego itself, the common report has been that the attendance is very meager, and that the enterprise is losing money every day.

These are the facts, up to April third; and they have never before been made public:

THE FINANCIAL REPORT

The Exposition, as a business concern, lost \$3,000 in its first month, January. In February it made \$13,000 above its entire operating cost. In the month of March it made a net profit of \$24,467.97. The receipts for March amounted to \$64,439.28; the expenses were \$39,971.31.

The operating expenses at the start were fixed to care for a larger attendance than so far has been experienced. Expenses were materially reduced during the second month. The average daily expense during March and April is fixed at \$1,250.

The San Diego Exposition is an \$8,000,000 business concern. The city bonded itself for \$3,000,000, and through State and additional municipal and individual aid another \$2,000,000 was raised. The value of the exhibits is approximately \$3,000,000. The ground occupied by the Exposition itself, 614 acres, is in the midst of a magnificently developed 1400-acre park owned by the city.

THE ATTENDANCE REPORT

The complete attendance figures for the three months were also give the REVIEW OF REVIEWS, from the auditor's books. They are: January, 180,270; February, 133,168; March, 153,042. The average daily attendance the last two weeks in March was between 5,400 and 5,500. The average for the first week in April was approximately 6,000. These records show that the number of people visiting the Exposition is steadily increasing with the growth of the year.

The Exposition is today on a money-making basis. It is conducted on strict business lines by a very able group of business men. There is reason to believe that it will pay a good dividend on its stock at the end of the year. This statement of facts will be a surprise to California at least.

THE SPANISH STYLE OF ARCHITECTURE

Americans who have read much about California history, but who have not seen California, imagine it to be a land dominated by the old Spanish Mission style of architecture, with Spanish crosses and Mission cloisters and arches peeping out from dense orange and lemon groves on every hand. The State has them all, although they do not dominate the landscape.

But for the people from all parts of the land who go to see San Diego's Exposition, it is their ideal visualized. There the fairy Spanish city is a reality. Old courts and patios abound. Stately towers reach into the restful blue of California skies. A carefully trained wilderness of tropical plants delights the eyes. It is a sweet and restful land, where "castles in Spain" seem realities; a land in which to "loaf and invite your soul."

The Exposition contains ten main exhibit buildings, and everything about them is true Spanish-Colonial in design. For sheer beauty of natural and architectural effects, this Exposition is probably the most delightful and satisfying spot in America today. The landscape gardening surpasses that of any other Exposition, and is as nearly perfect as nature and man can make it. From the grounds, one of the world's most beautiful views is commanded.

THE EXHIBITS

The one weak spot for San Diego is the exhibits. There were not enough exhibits available in the world this year to satisfy the ambitions of two great Expositions holding forth at the same time in the same State. San Diego has many varied and marvelous things to show, but it is in no sense a "world's fair." It is,

however, the most complete presentation of what California and the southwestern part of this country have done and are doing that has ever been made. The history of the politics, science, and soil development of the Southwest is here in vivid form. Nine-tenths of the total exhibit space is now fully occupied. Probably the most interesting single feature is the ten-acre model ranch, started in the grounds four years ago. We see that and e all wish we had just such a little ranch in California somewhere.

ACCOMODATIONS FOR THE VISITOR

It is safe to tell the many thousands of people in the East and Middle West who plan to come to the Pacific Coast during the summer and fall that they will be well pleased with the way San Diego treats them. They can afford to spend four or five days there. Between two and three days at least should be spent at the Exposition. A day should be set aside for rest, as exposition-seeing is hard work. Another day can be used in viewing San Diego itself and her very attractive surrounding country.

When the tourist reaches Los Angeles, which is the gateway to San Diego, he may take the trip the rest of the way either by rail or by water. The train reaches San Diego in three hours and a half, and it is a delightful five hours' ride on the sea.

A careful investigation has determined that San Diego hotels and apartment-houses are not attempting to "hold up" the tourist. They have signed an agreement with the Exposition to charge regular winter rates, which are about one-third higher than summer rates, but are by no means excessive. Restaurants and cafeterias (the latter a great California institution) have not raised prices one cent. The cafeterias furnish good fare at very moderate prices.

The street-car service to the Exposition is first-class in every respect. People are carried to the grounds direct from every section of the city. The service is supplemented by the new "Jitney" auto buses, several hundred of which are operating.

A man and wife in average circumstances can live very well in San Diego for one week, go to the Exposition every day and spend a little money o its "Isthmus" for between \$35 and \$50. And so much more as they desire.

So far this season the travel to the Exposition has been largely composed of the "private car" and "stateroom" class. The two largest and most expensive hotels have been full every day. The railway yards have been well filled with private cars and special trains have been quite a regular feature.

With the close of schools and the beginning of summer vacations, it is expected the rush of the great American middle class to California will begin. It is probable that many people from the States of Utah, Arizona and New Mexico, and from Southern California will spend their vacations in San Diego.

The city is not crowded. There is plenty of room, and plenty or really comfortable room, for all who will come, and there is every indication that the Exposition will have a successful attendance throughout the summer.

For a city of some 70,000 people, San Diego has done one of the biggest and most wonderful things in the history of American cities. Her Exposition would be a distinct achievement for a world-metropolis.

San Diego Sun, May 1, 1915, 8:3. San Diego Exposition will get \$25,000 from the state to make up the deficit in the California Building; house passed bill 49-18.

San Diego Union, May 1, 1915, 16:1-2. Hundreds to try for trademark parade prizes; special awards promised by many firms in San Diego; Committees announced; Carnival costumes will feature merry night at Exposition; Ad Club big-doings all day Saturday, May 22.

San Diego Union, May 1, 1915, 15:16:2. Creatore's band attracts throngs; threatening weather fails to deter crowds from attending concerts.

Los Angeles Times, May 2, 1915, VI, 1:7, 2:3-4. Western land of resources; states of the Rockies show wonderful products; richness of mines and crops astound visitors; San Diego Exposition hold diversified exhibits, by Mary S. Gulliver.

San Diego Union, May 2, 1915, 4:4. \$25,000 appropriation for California Building at Fair.

San Diego Union, May 2, 1915, 4:4-5. Exposition Excursions No. 13: The Evolution of Man, by Ales Hrdlicka, U.S. National Museum.

EXPOSITION EXCURSIONS

NUMBER THIRTEEN

The Evolution of Man

by Ales Hrdlicka
U. S. National Museum

No subject within the whole range of scientific research possesses such human interest as that of man's origin. Every advanced religious system, every school of philosophy and students of all countries and ages have wrestled with the great problem, only to reach some undemonstrative conclusions of dogma, or give up the solution of the mystery as impossible. Science itself, in the beginnings, could not do much better. The foremost naturalists of the last century, and above all Darwin, arrived at the bed-rock deduction that man was an inseparable member of the animal kingdom, and that in common with all other species he must have arisen from other forms by some sort of evolution, but beyond analogies and the evident impossibility of any other mode of his origin, they had little tangible to show in support of their conviction.

For a period of thirty years, however, and within the present century, matters have changed remarkably. Contemporaneously with the more precise and definite determination by geology and paleontology of the age of the various strata of the earth, particularly on the continent of Europe, it was learned that in certain localities some of the more superficial yet ancient strata held traces of man's presence, included in the deposits at the time of their formation. Such traces consist of worked stones, remains of fireplaces, broken or used bones of long extinct animals, and other objects shaped or used by intelligent. Thus it was shown conclusively that man occupied the European continent for many thousands of years before what is known as the historical era.

Fossil Remains Found

But there have come to light from time to time even more convincing evidences of human antiquity, namely, fossil remains of man himself. Skull after skull, as well as other bones of the skeleton, has been discovered, and under conditions which enable men of science to establish their great age beyond a reasonable doubt. As a result of the gradual accumulating evidence, what was before merely a web of plausible theories respecting man's origin has taken the form of a range of well-ascertained facts.

Today these traces of early man, archaeological and anatomical, already are so numerous and well-authenticated that it is possible to demonstrate not merely to the intelligent world, but also to the intelligent public, whole phases of man's antiquity. The problems of man's evolution are no longer confined within the realm of speculation. The record is substantial and unassailable, even though still imperfect in details, it becomes clearer and more amplified every

year, and it already extends, not merely to the very ancient representations of man himself, but even to some of the more immediate of his predecessors.

In brief the facts now in possession of science make it clear that the views of Darwin, Wallace and Lemarck, regarding man's ascension from lower forms, were substantially correct. It is ascertained that the further we go back along the course of man's physical progress, the more simple appears his intelligence, the more primitive, the less human his features.

Uncertainties Uncovered

When we reach the oldest specimens now known, namely the jaw of the Piltdown, the jaw of Mauer, and the Java skeleton, there are serious uncertainties as to whether we still deal with early man, or already with his forerunners. Further back than these last named remains, we as yet lack material, which naturally must be exceedingly rare. But the space not yet covered is already less than the biological distance from the earliest to present man. A step farther backward along the line which is now laid out with practical certainty and we are carried down to beings that could only be characterized as anthropological primates.. It is from beings of this class that man must have differentiated.

It must now be understood, however, that man has ascended from any species of monkey or ape now existing, although his ancestry has doubtless passed through stages equally lowly. There is no reason to believe, in fact there seems no possibility that any of the present monkeys or anthropoid apes are older than man. They manifest neither a marked stability of type, which might be taken as a sign of considerable age of the species, nor any tendency to vary in the direction in which man progressed. They are at most man's more or less proximate relatives, but not the parent stock from which he sprung. The family of primates from which man gradually differentiated is, doubtless, long extinct, as are all of man's most immediate predecessors, and probably some of his earlier races.

Exhibits at Exposition

The exhibits relating to the great subject of man's evolution from the standpoint of physical anthropology occupy room number 1. They are, as already mentioned, not only original but also more complete than any hitherto attempted in this line. They comprise, in brief, the following series:

(1.) Ten highly artistic busts made by M. Mascré, and under the direction of M. Rutot, representing man at different stages of his evolution. While artistic these busts are at the same time as true to nature as it was possible to make them. The heads and faces are built up on the casts of each individual represented, and the various utensils, decorations and other objects introduced are exact reproductions of those found with the bones. Descriptive details concerning these exceedingly interesting human forms will be found in the monographs, "The Most Ancient Skeletal Remains of Man," placed at the entrance to the section.

(2.) The next series of exhibits in this room is a collection of ____ rare casts of the most important skeletal remains of early man thus far discovered. All these are copies of carefully-made casts of the originals and show the exact coloring of the latter. An equally complete and exact set of these casts can be found nowhere on this continent except in the U. S. National Museum, and in two or three European institutions. Many of the casts are supplemented by reconstructions of the respective skulls, prepared under the direction of Professor A. Rutot of Musée National of Brussels, one of the foremost European students of man's antiquity.

Illustration of Remains

(3.) There are wall illustrations showing the localities of discovery of the principal ancient human remains. These are enlargements of photographs or of the original drawings and are collectively exhibited for the first time.

(4.) Charts relating to geology and stratigraphy, as far as these relate to man's evolution and those showing the possible lines of ascent of man after the foremost authorities.

(5.) A series of pictorial representations of early man by noted scientists and artists as well as by the ancient (late Paleolithic) man himself.

To these exhibits belong also properly a series of original crania showing in general a progression of forms from the lemur to man. This exhibit must not be taken as representing the line of man's evolution. That line, as already stated, is in all probability long extinct in all its branches. The exhibit illustrates, in something like ascending biological order, the species that now connect man with rest of the biological kingdom.

San Diego Union, May 2, 1915, 10:1-3. Gleaned on Prado and Isthmus: Napoleon Duval, a famous French clown, will give an exhibition of his skill at the French game of Diabolo at the California Quadrangle next Saturday afternoon at 5 p.m.

Duval promises to throw the Diabolo spool as high as the California tower and catch it on its downward trip on a piece of string. He challenges baseball players to duplicate his stunt with a baseball.

The French entertainer has traveled all over the world and has shown his games of skill before thousands of people. His feat was recognized by Exposition officials as fine entertainment for visitors and he was immediately engaged.

Missouri Day, Thursday, will be celebrated by hundreds of residents and ex-residents of the "show me" state. It is estimated that there are nearly 2,000 ex-residents of Missouri in San Diego.

The big feature of the celebration will come at night when an old-fashioned country barn dance will be given at the Exposition dancing pavilion. Manager Middleton has arranged for straw, pitchforks and wagons and other relics of Missouri barns to be used as decorations. Guests will come dressed in overalls and calico.

New dances will be barred, at least early in the evening, for the older Missouri folk want to give the old-time Missouri country dances. The Paul Jones, Virginia Reel, Rye Waltz, Money Musk and others are to be shown. Manager Middleton has arranged for a fiddler's contest. He has also arranged for a prize for the largest family on the grounds.

Governor Major of Missouri, who is at San Francisco, will be invited to come to San Diego for the celebration of Missouri Day and officers of the Missouri Society have assurances he will accept.

Mrs. L. B. Hague of Ventura will act as hostess at the Seven Southern California Counties building during May. Mrs. F. C. Martin of Riverside, who was hostess during April, has presided over many brilliant society events during the month. The receptions, teas and musicals have been greatly enjoyed by visitors. Mrs. Martin has by her ability as a hostess brought up the average attendance at the building and she was highly complimented on her success yesterday when she turned over the duties to the Ventura woman.

Dr. William Forgo, editor of **Forgo's Guides** and attached to **Town Topics** of New York, arrived yesterday and passed a short time at the Exposition preliminary to a more prolonged visit today. He was here in December and was so much impressed by the beauty of San Diego, Coronado and the Exposition that he devoted extensive space in the **California Guide to the Southland**.

"The first edition is exhausted," said Dr. Forgo, "and I am making some important revisions. Many people are coming to San Diego and there is an admirable opportunity to build up a good fall and winter business among the wealthier people who will continue to pass their summers at Eastern resorts, postponing the Western tours until the arrival of cool weather.

"You will be glad to know that there is a flood of favorable comment on the San Diego Exposition, to which Vice President Marshall has added his aid, telling of the charm and loveliness of the Panama-California Exposition as contrasted with the larger display at San Francisco. Incidentally, I am using his observations in next week's issue of **Town Topics**."

H. O. Merriman, principal of the boy's school in Cleveland, Ohio, sent to the Exposition a few weeks ago for information and lantern slides for his lecture work in the East. Two weeks later, delighted at the pictorial description, he wrote that he was organizing a tour. Yesterday another letter arrived, still more enthusiastic.

"In arranging our party," he wrote, "I found they had allowed too little time in San Diego. I put up a big kick, took some of the northern time off and transferred it to San Diego, so don't give yourself any uneasiness. We will certainly do San Diego and do it right, as I realize there is no finer climate in the world and my party will find more enjoyment there than at any of the other stops. I trust I will be able to shake hands with you on several occasions about July 1."

Dr. Maria Montessori, world famous for her work as an educator, now passing most of her time away from Rome in lecture work and supervising changes in educational activities, will arrive in San Diego at 1:10 today for a short stay, probably only through tomorrow morning.

This visit is preliminary to the educator's protracted stay scheduled for the San Diego Exposition at which she is expected to be one of the principal figures in the summer school, July 5-August 8, general plans for which were announced a few days ago.

On arrival from Los Angeles, Dr. Montessori will be met by Duncan McKinnon, superintendent of schools, and probably several Exposition officials and escorted to the grounds for the afternoon in order that she may look over the facilities for conducting her educational campaign for children in the courses of the summer school. She will, also, obtain her first detailed information of the Exposition Beautiful in its general aspects.

Employees of the Weidon (?) planing mill visited the Exposition yesterday. There were about 100 in the party. In the morning the delegation inspected the four educational buildings and heard an explanation on their architecture and their exhibits by Dr. Edgar L. Hewett. In the afternoon the party visited the rest of the Exposition and enjoyed the Isthmus entertainment last night

Parties from Frye and Smith and the Citrus Soap Company were at the Exposition in the afternoon. There were about forty employees from the two firms. These met at the California Building and were taken on a lecture tour of the building by Dr. Edgar L. Hewett.

These excursions of employees of local firms are being arranged by the secretary of the commercial organizations of the city and are for the purpose of giving store and mercantile help a correct knowledge of the Exposition so that the employees will be in a position to discuss the Exposition intelligently with visitors.

The largest single delegation that will visit the San Diego Exposition this summer will be the Loyal Order of Moose, which will come to San Diego 30,000 strong for a week's convention beginning July 17.

This convention will call here several governors, senators, congressmen and men of high rank in national life. Vice President Marshall, who is a member of the order, is likely to be here.

During the week's convention the visitors will be kept on the go. A large fund for their entertainment has been raised. At the convention practically every Moose lodge in the country will be represented and many of these have already secured their hotel accommodations. Governor Johnson of California, who is a member of the order, is one of the well-known men who is scheduled to make an address.

Children have come into their own at the San Diego Exposition, and children's activities now play an important part in the holiday events. And for tired mothers, there is a boon in the form of the "crèche" or outdoor nursery operated by the Women's Board, where babies are checked for an hour or two or for all day.

Joseph Blackshaw of San Diego, son of a physician who was strong in his appeal for a model baby checking station, was the first registered. He was followed by a battalion of babies under five, all of whom are turned loose on Los Jardines del Eucalyptus and allowed to romp until they get ready to take a nap in one of the portable houses which serve as shelters. The older children can remain in the crèche if they wish, or, if they show an adventurous spirit, they are taken by nurses through the main exhibit buildings while their parents are elsewhere on the grounds.

"I like you better than mamma," observed a youngster from Illinois as his new nurse was helping him chase Doolies (?) across the lawn. He was prejudiced because his nurse had taken him to the Indian Arts Building and showed him the red men from Arizona weaving rugs and shaping pottery and let him listen to the tom-tom which a musically-inclined red man was pounding.

No chances are taken of a mix-up of babies. When they are registered, the attendants make careful notations of age, color of eyes and hair, condition of teeth, and special markings. The crèche is called the most complete on the Pacific coast.

Manager Scott of the "Hunter's Retreat" says that all the animals in his famous collection are right at home in the brand of San Diego weather we have been having the past few days. These animals were all trapped in snow-capped Sierra Nevada mountains where hail and rain are the rule instead of the exception. This collection of Joe Clark's continues to attract the sportsman as well as the ladies who are admirers of beautiful furs.

Arizona Bill of the '49 Camp will be on hand tomorrow to welcome Gov. McDonald of New Mexico, as he carries a letter of introduction from Gov. Hunt of Arizona, who speaks of him in the highest terms.

Several Chinamen in Underground Chinatown were nearly drowned the past week while asleep in their bunks, but were rescued and are back in their accustomed haunts.

Situated a short distance to the north of the Southern Counties building on the Alameda, which at that point branches off from the Prado, is the five-acre demonstration tract and exhibition building dedicated to the American farmer by the International Harvester interests.

There, after a year and one-half of constant effort, have been assembled those modern types of farm machines which have done so much during the past decades toward changing the economic status of the world's farmers. Here, in one place, is presented the greatest opportunity ever given the people of the West to see a complete array of farm machines and engines for power purposes.

Whether interested in agriculture or manufacturing, no visitor to San Diego can afford to miss seeing the power appliances shown there by the Harvester people. Power users are given demonstrations of power outfits from the little one-horse engines which run the washing machines and pump water to the huge 50 horsepower oil outfits capable of running entire electric light plants or entire water systems.

Falling in with the idea early advanced by the officials of the San Diego Exposition, the Harvester Company undertook to explain the purpose and scope of its machines not so much by the customary indoor display as by outdoor demonstration. With this end in view, it developed and brought into bearing a citrus orchard. A battery of four oil-driven tractors do plowing, harrowing and cultivating of the demonstration tract left for that purpose. A smaller orchard tractor can be seen hauling a manure spreader, disking the orchard, and hauling in and out between the rows a spraying outfit driven by a smaller engine. An irrigation engine is raising water by the aid of a centrifugal pump, and a practical demonstration of orchard irrigation takes place before the eyes of every visitor.

Apart from the field work, a 50 horsepower oil engine is in constant operation furnishing the light and power to run a compressed air plant and the electric motors attached to the various machines, just as it would be called upon to do in lighting a town or running a factory.

Each machine on display is not only in motion, but many are further equipped with glass parts and electric lights, so that all working mechanisms may be seen performing their various duties even better than if they were at work in the actual field.

To anyone not familiar with present-day farm equipment, the ingenious contrivances brought together in this five-acre tract will be a revelation. Even those who were born and brought up on the farm will be amazed at their scope and completeness. The exhibit as a whole is a marvelous tribute to the efficiency of the American farmer, who relying entirely upon the superiority of his equipment is able to compete in raising crops with the cent-a-day laborers of Indian, the renter of Argentina, and the peasant of Siberia.

All matters pertaining to general farming and orchard raising will be lengthily explained and demonstrated by P. M. Price, manager of the exhibit, whom all Southern Californians will know as a successful rancher and businessman. He is assisted by W. D. Zarley, an experienced farm machine demonstrator.

Park Commissioners, Minutes, May 3, 1915. Stadium accepted from contractors, subject to completion of stipulated work.

San Diego Union, May 3, 1915, 1:2, 3:3. Montessori class planned; founder of system sees Fair; \$1,000 voted for building.

San Diego Union, May 3, 1915, 2:2-5, 4:4-7. New Mexicans arrive for dedication of state building; Order of Panama to confer honorary memberships upon executive and two other members of party; music program arranged; military escort.

San Diego Union, May 3, 1915, 2:6. Sunshine draws joyous crowd to Exposition; concert lures throngs; Creators promises two band programs today and tonight.

San Diego Union, May 3, 1915, 3:4. "Show Me" State folk to frolic at Exposition; Governor Major will address crowd in Pepper Grove; many prizes promised; fiddler's contest; old time and modern dances on long program.

San Diego Union, May 3, 1915, II, 9:1. Mary Pickford, movie queen, wins hearts of tots everywhere; making of picture "The Girl of Yesterday" brings her to San Diego.

San Diego Union, May 3, 1915, II, 9:2. Miss Claudia Albright, grand opera contralto, to sing at dedication of New Mexico building; Spanish songs on program.

San Diego Union, May 3, 1915, II, 9:4. Old Spanish Days to be revived at Exposition; troupe of Castilian musicians and dancers will open engagement today; patios and plazas to ring with melodies of Spain.

San Diego Union, May 3, 1915, 14:1. Portrait of Christ by Darius Cobb exhibited at Exposition lecture hall; masterpiece required 30 years to produce; Rev. D. Hill Crother, Worcester, Massachusetts, to deliver address prior to unveiling.

Los Angeles Times, May 4, 1915, II, 8:6-7. New Mexico state affair; Governor and notables hold dedication exercises; April returns good profits to Exposition; more tourists are fleeced by Bunco artists.

San Diego Sun, May 4, 1915, 1:2. San Diego will have a new city hall, built in the Mission Style of architecture, with an open patio and courtyard in the center, and situated at 6th and Date Streets in the park if plans advocated today by council members are carried out; room for police station and jail as well.

San Diego Union, May 4, 1915, 3:2-5. New Mexico building dedicated by Governor W. C. McDonald.

San Diego Union, May 4, 1915, 6:6. Senoritas dance to airs of Old Spain; their lithe forms sway in unison with mandolin at Exposition.

San Diego Union, May 5, 1915, 1:3. Spanish entertainers take Fair by storm; troubadours vie with Cristobal band for honors.

San Diego Union, May 6, 1915, 2:5. Tea given at Fair Women's Headquarters for Anne Morgan, daughter of the late J. Pierpont Morgan.

San Diego Union, May 6, 1915, 5:1. Firemen quench blaze in kitchen of restaurant on second floor of Varied Industries Building at 2:30 a.m.

Park Commissioners, Minutes May 7, 1915. Street Department authorized to use Redwood grade between 18th Street and Upas Avenue because of unsafe condition on 30th street bridge. . . . Superintendent instructed to place signs on the west side of Balboa Park directing the public to the rose garden.

San Diego Sun, May 7, 1915, 9:1. Australian Boys' Band will begin a 9-day engagement tomorrow.

San Diego Sun, May 7, 1915, 9:5. Tomorrow enlisted men of the 4th Regiment, U.S. Marine Corps, and First Cavalry, stationed at the Exposition, and four companies of Coast Artillery at Fort Rosecrans will engage in an athletic meet on the parade grounds at the Marine barracks in the Exposition.

San Diego Union, May 7, 1915, 3:2-6. Charles M. Schwad, steel king, visits Exposition.

San Diego Union, May 8, 1915, 6:1-2. Daring army riders to thrill Exposition spectators today; wall-scaling, monkey-drill, centipede race and other contests will feature military service athletics on Fair grounds.

San Diego Union, May 8, 1915, 6:2. United Daughters of the Confederacy delegates visitors at Fair; Southland airs given on Organ pleases organization's members.

San Diego Union, May 8, 1915, 6:4 San Franciscans coming to Fair for the celebration of San Francisco Day on May 15.

Los Angeles Sunday Times, May 9, 1915, VI-1. Music and romance add color to Fair; Spanish singers and dancers give fantastic details to streets of Exposition; Miss Anne Morgan delighted with quaint touch of old Castile; keen interest of tourists in new feature, by Mary S. Gulliver.

Los Angeles Sunday Times, May 9, 1915, VI-5. Summer School at Exposition; special course to include teachers of renown.

Los Angeles Sunday Times, May 9, 1915, VI-5. Federation of Women's Clubs to meet Tuesday at San Diego Fair.

Los Angeles Sunday Times, May 9, 1915, VI-5. Plan for Odd Fellows' day, July 3.

San Diego Union, May 9, 1915, 2:2. May Day festival at Golden Hill playground at 28th Street yesterday.

San Diego Union, May 9, 1915, 3:1-2. Cavalry captures honors in service field meet.

San Diego Union, May 9, 1915, 3:1-6. Exposition receives publicity at home and abroad through Pan-American Union bulletin.

San Diego Union, May 9, 1915, 6:1-3. Gleaned on Prado and Isthmus: In a communication from John B. Creighton, secretary to President Lewis H. Pounds of the borough of Brooklyn, New York, it was announced that June 26 had been set aside as the official day of the Panama-California Exposition for Brooklyn people. . . . President Pounds predicts a large attendance of Brooklyn people at the Fair on that day.

The little troupe of Spanish troubadours engaged at the Exposition finished their first week of service yesterday under the most favorable conditions. . . . Mme. Ann Dare, who manages the Spaniards, was jubilant.

"Why even the peacocks came out to hear the singing," she said. "We went into Los Jardines de Montezuma to rest and while a couple of boys were playing and the Senoritas humming a song of Seville, a pair of the birds strutted around the pergola. The male looked for a moment, and then, with a few shakes of his head, spread his great tail and promenaded up and down the path as long as the music lasted. Incidentally, some of the observers said they had never before seen the peacocks display their tails. Usually they are meek."

The usual Invitation to the Dance was presented in the Plaza de Panama at 1 p.m., and, coupled with the approaching concert by the Australian band, drew a large crowd. At the end of the little drama, a woman approached the singers.

"I've seen you following us every day this week," said Mme. Dare. "Are you Spanish too?"

"Me," laughed the visitor, "but I was just coming up to introduce myself as a great admirer of your troupe. To be perfectly candid, I had been on the grounds only once a week ago. I've now been here seven times. In other words, I haven't missing a chance to take in this beautiful addition to the Spanish city. It completes the picture."

Edmund T. Perking of Chicago, president of the American Reclamation Federation and a leader in irrigation councils, prolonged his three-day stay in San Diego long enough to take in yesterday's drama by the troubadours. Mrs. Perkins divided her attention between the troubadours and the pigeons which she soon had surrounding her.

"The Fair is beautiful," she said. "We will remember the Spanish singers longer than anything else on the grounds."

A vast pilgrimage of students, teachers and educational experts will invade the San Diego Exposition for attendance at the Exposition's summer school to be held from July 5 to August 13. This promises to be without equal in the history of the progress of education, for the faculty will include some of the most remarkable authorities on education. Standing high in this set is Dr. Maria Montessori of Rome, founder of the famed system of teaching of this name. Dr. Montessori will assume charge of the Montessori Institute to be established during this session.

Among the courses will be history and geography of South America, Spanish grammar and literature, modern history and the peace movement, modern literature, culture history, American archaeology, anthropology, vocational education and direction, mental and physical testing with laboratory work, manual training and primitive arts with demonstrations by Indian workers, and agriculture with demonstration.

There will be special lectures on peace and conciliation, modern education, human welfare, and arts and science.

To popularize the summer school the Exposition directors have fixed the unusually low fee of \$7.50 for the term, which will include admission to the Exposition. Among the educators who will be in the faculty are Dr. J. C. Thompson, surgeon of the U.S. Navy; Dr. Edgar L. Hewett, director of the School of American Archaeology; Percy Alvin Martin, Ph. D., assistant professor of history, Stanford University; Dean W. F. Riles of the State Normal School, San Diego; Miriam F. Besley; William T. Skilling and Maria Goodard, in addition to special lecturers.

The remarkable ethnological exhibit of the Smithsonian Institution, the ancient and modern Indian display, the commercial representation, and the unprecedented agricultural and horticultural displays, crowning the work in architecture, equip the San Diego Exposition with extraordinary facilities for study. Practically all, moreover, is permanent, this being almost unique in world's fair achievement.

That the dance pavilion on the Isthmus is fast becoming the most popular terpsichorean palace in Southern California is evidenced by the throngs that graced the dance floor the past week. San Diego's newest and finest dance palace, with its excellent dance music and floor, is nightly the scene of merry parties who trip the light fantastic until a late hour. Many box parties were given at the pavilion during the week. Dancing from the loges is a form of entertaining that is becoming a fad with the patrons.

The "Old Folk's Night," given by Manager Middleton on Thursday, brought out the largest mid-week crowd of the present season. An old-fashioned "barn" or "country dance" in which the popular "square dances" were a feature met with instantaneous approval of patrons and the appearance on the floor of old couples, some past three score years and ten, was the occasion of great applause as the old folks went through the dances and quadrilles to the music of old-time fiddlers. The dancers were costumed in the garb of "farm hands" and "rural maidens." Spectators and dancers enjoyed the evening. Every Tuesday night in the future will be designated "Rube Night" and the old folks will be given an opportunity to participate in the old-time dances with modern dances for the young folks.

Tuesday night, May 11, the Missouri State Society will hold an old-time country dance in the pavilion, being a feature of Missouri Day, which was postponed from last Thursday.

Every Thursday night hereafter will be known as "Society Night," and admission will be by invitation only. Modern dances will be indulged in on this evening. Box parties have been arranged for the first of these dansants to be held next Thursday night.

For a year and one-half the International Harvester interests extended every effort to make their five-acre tract at the Panama-California Exposition typify the world-wide magnitude of the harvester activities. Every visitor at the Exposition should make it a point to grasp the greatest opportunity ever given the people of the West to see such an array of farm machines and oil engines for newer uses.

The Harvester Building and demonstration tract is located a short distance north of the Southern California Counties building, where the Alameda branches from the Prado. In this one exhibition are grouped the many modern farming machines which a man who has the desire to purchase land or to farm would be interested in.

Back of the commodious Mission building, which contains their indoor exhibit, is a citrus orchard, which should appeal to Fair visitors interested in fruit growing. This orchard has reached the bearing stage. As one goes through it, he sees how an up-to-date orchard should be irrigated and how the best orchardists utilize oil engines in running their spraying outfits. He sees a tractor hauling the spraying outfit from tree to tree, hauling the spreader, and doing all the cultivating.

In addition to this, every man --- whether farmer or factory owner --- will find it to his advantage to inspect the power plants in operation there, suitable for small or large factory purposes, running electric light plants or town water works.

Merchants, farmers, carpenters --- all enterprises in fact --- requiring speedy and economical power delivery systems, will find there the 1,000 pound and 15,000 pound motor trucks which have become so familiar in Southern California.

The substitution of kerosene and gasoline power for horses is one of the industrial evolutions which will make the beginning of the 20th century epochal in the advancement of the world. What the warring nations in Europe discovered as a necessity in the business of war, American merchants and farmers are discovering in the interests of commerce. Motor truck users in the towns, tractor users on the farm, and oil engine users in general have proved that mechanical power gives them a decided advantage in competition. Everywhere a practical application of this economic tendency is taking root, and because of this, the comprehensive exhibit along these lines which the Harvester people installed as part of their contribution to the Exposition should not be missed by a single visitor to the Exposition.

The exhibit is in charge of P. M. Price, assisted by W. D. Zarley. Mr. Price has had a wide experience in agricultural and orchard work under Southern California conditions and will be pleased to demonstrate the varied farm activities exemplified there. Mr. Zarley, who has had a world-wide experience in connection with farm machines, also places his time at the disposal of visitors.

Among the interesting specimens to be seen in "The Hunter's Paradise" is a fine specimen of the wolverine. These animals never live in captivity, as they commit suicide rather than live behind bars. Trapper Joe Clark had a desperate fight capturing this animal. One of the most beautiful sights in the collection is a blanket made from the breasts of 52 bobcats.

The '49 Camp has added to its attractiveness by a number of potted palms and ferns in front of the camp and around the refreshment garden inside. On Thursday, a Special Night, the camp did a tremendous business and the games of chance were freely patronized.

San Diego Union, May 9, 1915, 9:1. Australian band pleases Fair audience; boy musicians worthy successor to Creator's organization; stirring numbers today; "The Armada," honoring visit of U.S. Fleet will open concert.

San Diego Union, May 10, 1915, 2:1. Mme. Anna Pavlowa, Russian dancer, given tea in parlors of Women's Headquarters; she praises the Exposition.

San Diego Union, May 10, 1915, 2:2. Coast Artillery Band, V. F. Safranek, director, to play at Exposition today.

San Diego Union, May 10, 1915, 2:3. Ellen Beach Yaw is San Diego visitor; California nightingale arrives for stay in City of Sun.

San Diego Union, May 10, 1915, 2:3. Australian Boys' Band popular; two concerts will be given today at Plaza de Panama.

San Diego Union, May 10, 1915, 2:2. Music program attracts throng; more than thousand persons hear People's Chorus at Fair

San Diego Union, May 11, 1915, 3:3. Governor Elliott W. Major of Missouri recalls "Old Missouri Days."

San Diego Union, May 12, 1915, San Diego Union, 3:2. & May 13, 1915, 2:2-3. Commercial Commissioners of China visit Exposition.

San Diego Union, May 13, 1915, 1:3. Maryland Governor Goldsborough and party visit Exposition.

San Diego Sun, May 14, 1915, 1:5-6. City Attorney Cosgrove will not interfere with operation of Camp of '49 at Exposition; complaints received about dancing, beer drinking and gambling for script.

San Diego Sun, May 14, 1915, 9:1. Junior auto races at Exposition grounds, Saturday and Sunday, May 29 and 30; course one, two miles in length; commences on Isthmus, runs north around Indian Village, back by fire station and Cristobal Café, and on to the Isthmus again.

San Diego Union, May 14, 1915, 16:4. Article in **Review of Reviews** declares the Exposition is paying.

San Diego Sun, May 15, 1915, 1:4. Flower fete is given; dance of flowers; parade; spring rose show; model of dreadnought *North Dakota* unveiled at U.S. Navy exhibit in Commerce and Industries Building.

Los Angeles Times, May 16, 1915, II, 8:6-7. Los Angeles as the guest of San Diego; Saturday will be "our" day; Chamber of Commerce will run special train.

Los Angeles Times, May 16, 1915, VI, 1:4. Celebrities flock to San Diego Fair; week of festivity and exchange of good wishes on San Francisco Day; citizens extend personal hospitality; school children help entertain; women give breakfasts and informal receptions, by Mary S. Gulliver.

San Diego, May 15: The past week was a gala one at the Panama-California Exposition. Celebrities were entertained, not singly but in bunches, special entertainment for them followed in dizzy succession and boosters from different sections of the State celebrated as only Californians can.

And with all the entertaining and festivity, it was the personal note in the hospitality extended by the San Diego Exposition which appealed to the visitors more than any other one thing and which will linger long in their memories.

This particular brand of hospitality, the whole-hearted, sunny hospitality of the South and West appeals mightily to the visitor, especially to the tourist from a large eastern city to whom the cordiality of the westerner is a constant marvel.

G. Aubrey Davidson, the big, quiet-mannered president and his charming wife, personally greet thousands of visitors at the teas of the exposition and often may be seen personally conducting visitors over the fair.

At the afternoon teas in the beautiful rooms of the women's headquarters, which have become an institution of the fair, visitors meet informally as the guests of the Women's Official Board of the Exposition. You are made to feel that instead of being a mere sightseer at the fair, you are an honored guest.

Women of the exposition board, headed by Mrs. Ivor N. Lawson and Mrs. George McKenzie, graciously serve you with a cup of tea and introduce you as if in their own homes.

It is not the exposition officials alone, however, who extend this charming hospitality, but the private citizen of San Diego as well. They are all eager to make the stay of the visitors pleasant. One of the most interesting of these self-appointed hosts is San Diego's ninety-seven-year-old young man, O. J. Stough. Probably no one in San Diego is enjoying the exposition year as much as he, or is so proud of the exposition.

Mr. Stough never fails to go to the Grant Hotel each day, where he makes himself acquainted with some visitor or visitors, and either takes them about the city and the exposition, or puts his car at their disposal. When the New Mexico Building was dedicated, this youthful nonagenarian was a loyal New Mexican. Monday, Missouri Day, he was just as loyal to Missouri, and was busy piloting Missourians about, while Wednesday he was a Marylander, and as one of the escorts of Gov. Goldsborough, he enthusiastically walked about the grounds and would not deign to ride an electricque.

Next to the personal touch of the hospitality of the entertainment of this gala week, the most distinctive feature was the nature of special events, all of which were out-of-door affairs, because especially appropriate in this sunny climate and the beautiful gardens of the exposition.

Among the noted guests of the week were Gov. Major of Missouri, Gov. Goldsborough of Maryland, Mlle. Anne Pavlowa, the great dancer; Mrs. Percy V. Pennypacker, the national president of the Federation of Women's Clubs of America; Mayor Rolf of San Francisco, and the commercial commissioners of the Republic of China, including some of the most distinguished men of that country. Riverside, San Bernardino and San Francisco each celebrated special days and sent large crowds of boosters and a number of fraternal organizations attended in bodies.

The crowds seemed to absorb the hospitable spirit of the exposition and mingled in their sightseeing more as if attending a great reunion than "doing" and exposition. One couldn't be ceremonious or exclusive in a crowd like that.

An instance of this was a snapshot taken of Gov. Goldsborough. The Governor was riding along with his little son in an electricque, escorted by his staff and President Davidson. "Oh, please wait a minute," said a woman, and ran breathlessly after the wheeled chair. The Governor obligingly stopped the tiny machine and curious bystanders wondered if she were asking for a pardon for someone or if she were a long-lost friend. But she merely pointed a Kodak at the party and at her request the Governor wheeled the chair into a better position for light for the snap.

"Now, wasn't that just too lovely," said the lady as she returned to her waiting husband, "to get the Governor and his staff that way."

In honor of Mrs. Pennybacker, national head of the women's clubs, the San Diego county clubwomen gave a wonderful English breakfast in the Pepper Grove of the exposition grounds. Yellow poppies and marigolds on the tables, set under the trees, carried out the idea of spring and, as the guests ate, a troop of little girls, dressed in white, appeared from under the trees, singing folk songs and dancing to their own music.

In the evening an epoch dance program was given on the stage of the big outdoor Organ by young women. Dances of the Egyptian epoch, the Roman muses, a Pompeiian dance, and a French ballet were given by girls appropriately costumed, and with the Organ Pavilion as a background, the program was exquisite.

The Rose Festival today, which was also the occasion of the visit of Mayor Rolph and was San Francisco Day, was the crowning out-of-door event of the week. A gorgeous display of roses was opened in the Plaza de California at noon. A little later the floral parade wended its way down the Prado. The electricquees, used at the exposition for conveying people about the streets of the fair, were utilized as the foundation of the tiny floats. Many of these miniature floats were entered by State and county buildings and were decorated in the flowers of that particular section. Washington's float was beautiful in a mass of rhododendrons and other States used other flowers, peculiar to those States.

Next came the doll-baby section. Little girls wheeled their doll carriages, in which reposed the elaborately-dressed dolls, and the carriages were decorated in flowers. Each little girl decorated her own doll perambulator. Then followed a go-cart division and gaily-decked go-carts, wheeled by proud mothers, bore the babies. Each baby brought a round of applause as his or her go-cart appeared.

A comic section, one of the entry conditions of which was that the entry must be human propelled, followed this, and then an entry by the Navy Department. This was a big Navy Bliss torpedo, decorated with roses and propelled on trucks by twelve bluejackets from the U.S.S. Colorado. A large field gun, decorated, was also in the Navy entry.

The parade proceeded to the Plaza de Los Estados, where the entries formed a hollow square and a floral dance festival was given by children. Spanish, Dutch, toe dances and other characteristic solo dances were given by little girls and young women. Classic dances were given by the young women and a pretty woodland dance, "The Forest Spirits," by 160 girls in Greek costume, closed the program.

After this the children and spectators engaged in a battle of flowers and the spectacle was one long to be remembered. In the evening there was a Flower Girl Carnival on the Isthmus. Hundreds of young women, representing different flowers in their costumes and decorated with flowers, formed this parade which was extremely beautiful. There were California poppies, Tiger lilies, roses, modest forget-me-nots, and almost every flower known was cleverly reproduced by the girls of the pageant.

Instead of confetti, people pelted each other with flowers and soon the Isthmus was carpeted with the blossoms, an appropriate conclusion to a delightful and distinctively Southern California fete.

San Diego Union, May 16, 1915, 1:4-5, 2:3-4. Spring Flower Day festival and pageant triumph yesterday afternoon; children's flower dance captivates; spring rose show opens festival at Exposition with public as judges; motion picture cameramen kept busy.

San Diego Union, May 16, 1915, 2:1-2. Exposition Excursions No. 14: Man's Evolution, by James W. Wilkinson, professor of Biology, State Normal School, San Diego: To fully appreciate the importance of the exhibit in the Science of Man building one must bring with him a lively imagination and attempt to visualize the conditions under which primitive man must have struggled. As you go in at the east end from the plaza, you encounter two rows of busts made under scientific direction by skilled artists to represent the fossil findings plus the imagination of trained specialists in the fields of paleontology and anthropology. The first two busts represent forms scarcely yet human. They have passed the arboreal period, have assumed the upright position and are developing mind through the use of hands. They can make rude tools for protection and the killing of game, and the most cunning are the most likely to survive and hand on to succeeding generations their metal superiority.

The Heidelberg man is possibly the first true human. He has made the wonderfully educative discovery of the power of speech, the ability to transmit the beginnings of ideas to others of his kind. This discovery, doubtless, made possible primitive forms of cooperation that insured greater safety and hence greater likelihood of survival and transmission of increasing metal superiority. The care of the child (see bust of La Quina woman) and the feeling of interdependence must have developed some glimmering sense of moral responsibility and vague conceptions of right and wrong. The discovery of fire must have given a wonderful mental stimulus, and the first conception of life after death must have been a soul-stirring experience! Who had the first dream and succeeded in making his friend understand the experience? The idea of a spirit world must have sprung from that. And the dreamer became the priest, clothed with authority, giving confident explanation of the deepest mysteries.

In the glass cases along the north and south walls, we see casts of skulls and other parts of the skeleton, representing the findings from which the busts were constructed. On the walls are pictures of the places where the more important findings were made, also charts to aid one in tracing man's relationship to the other primates. In the second room one comes upon a series of plaster casts arranged in rows to show comparisons of the Indian and Negro with the white man at different stages in their development. We should expect to find the infants showing more points of resemblance than the adults. Along the north wall is a case with many plaster casts of brains of primates, and interesting comparative study for one who will take the trouble to look up the structure of vertebrate brains. Even to the novice, the common plan of structure is perfectly evident. In another case, along the west wall, one will find a series of skulls showing development from infancy to maturity. The Mammalian brain developed from the lower ____ type and it is interesting to see the relatively long and low skull of the infant contrasted with the high and shorter skull of the adult, a good illustration of the recapitulation theory.

This exhibit presents evidence supporting the theory of evolution from only one field and from a very limited portion of that field, the study of the past history of man as recorded in the rocks. The record written in stone affords enough evidence of the evolution of all plant and animal life from the beginning as a single cell, to convince the most skeptical.

But the evidence is not found in one field alone. It is the consistency of the evidence as found in three separate fields of investigation that really settles the question. Comparative anatomy is a fruitful field

of study. Here one sees similarities of structure in animals that give more than a hint of relationship. We can compare the skeletons of vertebrates and give a more reasonable explanation of the common plan of structure than that the more complex skeletons have evolved from the simpler ones? The two pairs of fins of the fish are homologous with the arms and legs of man. The bones of the skull of the ape are homologous with the corresponding bones of the skull of man.

A third field is the study of development. Life started on earth as a single cell. Every animal and every plant starts life as a single cell. Every individual repeats the history of its creation. In the study of the embryo, startling discoveries are made. All mammals show gill slits and a fish circulation at early stages of their development, man included. The frog lives through a wonderful metamorphosis telling a plain story of its development through fish and salamander forms up to its more highly specialized structure. It goes through a stage showing external gills like the mud puppy, with four legs and a tail. It is a fascinating field of study.

There is no logical escape from the conviction of the unity of all life and the theory of descent by the processes of evolution. The inevitable result of the spread of the doctrine of evolution will be that man will strive more and more to control the forces of nature and make them work for his lasting welfare. There will be an enlightened program favoring courageously the survival of the fittest human beings and the gradual development of a sturdy public opinion that will refuse to tolerate industrial and social conditions that tend toward the debasement and deterioration of the race. Protoplasm will be held sacred only in so far as it gives promise of a worthy spiritual expression.

San Diego Examiner, May 21, 1915, 1:6-7. Fate of California State Building is problematical; failure to appropriate money for maintenance cause of puzzle: The structure is in the position of a building owned by the state, representing a liberal investment on the part of San Diego citizens, occupying municipal territory, under the control of the park board.

Los Angeles Times, May 23, 1915, I, 11:3-4. Angelenos Boosters Capture San Diego; special train brought a Chamber of Commerce party; luncheon in the patio of the Southern California Counties Building, reception in the blue room of the building, and a ball in the California Building in the evening.

Los Angeles Times, May 23, 1915, VI, 1:6-7. Fairyland interiors at San Diego's Fair; Japanese art and handiwork exhibited in pleasing features from the Cherry Blossom Kingdom; wonderful vases and carvings shown in a bewildering array; skillful adaptations from all nations, by Mary S. Gulliver.

San Diego, May 22. In our enthusiasm over the wonderful landscape gardening and the picturesque architecture of the San Diego exposition, we sometimes forget the interior of the great buildings and the excellent exhibits there. But though the exposition is small and the directors did not strive to compete with former expositions in scope, as this is largely a California fair, the various buildings contain much of unusual interest and of educational value.

There are no exhibits made by the foreign governments, but there is a splendid exhibit of Japanese art and handiwork in the Foreign and Domestic Arts Building. The Japan Exhibit Association, a branch of

the Kyosan-Kai Company, a powerful commercial organization which represents the leading manufacturers and art collectors of Japan has placed the exhibit.

There are rare collections of Satsuma, Cloisonnes, tapestries and wonderfully-carved teakwood cabinets, screens and other antiques. It is a delight to see the rare works of art in the collections, but it is even more interesting to study the progress and cleverness of the Japanese in appropriating for themselves and perfecting the arts of other nations.

The exhibitors have not laid as much stress upon the ancient art as upon the modern Japanese work and the exhibit constantly tells this story of Japanese ingenuity in adopting and perfecting the arts and sciences of other nations. The commercial organization itself, which was formed purely to place exhibits of Japanese and Chinese works of art in expositions, is an example of their progressiveness.

CULTURED PEARLS

There is a collection of cultured pearls and as interesting as the exquisite jewels seem, there is the story of the cultured pearl which Mr. Shintaro Wada will tell you if you are interested. Not satisfied with the uncertain crop of pearl fishing in their natural state, in which two or three pearls are found in about 1,000 oysters, the Japanese have a pearl culture process whereby they know the exact proportion of production for their market.

The pearl culture consists of the introduction of a small foreign substance into the oyster, which forms a nucleus for the pearl. The oyster is then returned to the water and the natural secretions form the pearl. Out of 100 oysters so treated there are a possible six or seven pearls to be found. The only defect is that the cultured pearls have a flat side where they are severed from the shell and hence they sell for one-sixth to one-seventh of the price of the round pearls.

The oysters are first cultivated for three years before the substance, which is a tiny particle of mother-of-pearl, is introduced into the mollusk. After that they are left in the water for four or five years. Although the courteous Mr. Shintaro Wada did not say so, he probably knows that the Chinese knew something of this pearl culture in the 13th century but never perfected it. The Japanese pearl culture has only been in existence for the past twenty-five years and not until the last fifteen years have any pearls been exported to this country.

Another exhibit of modern Japanese work is the collection of Morimura chinaware. This is the first white ware the Japanese have ever produced and can easily be mistaken for fine Haviland china. Morimura, the manufacturer, is said to have spent \$250,000 looking for a clay in Japan from which to manufacture the white ware, as until recently none had been found. His diligence was repaid in locating the proper clay, and now the china is exported to France and Austria and sold to unsuspecting dealers as Austrian and French ware.

Likewise, Morimura's artists are sent to France, Germany, Italy and other art centers to study their art. They choose the best of these countries and then, with the peculiar art of the Japanese, make it "Japanezy" and sell it to these same countries.

There is a magnificent collection of cloisonnes, including pieces of the old wire process and specimens of the more modern wireless process, which is considered by the Japanese to be the last word in the manufacture of cloisonne. There are beautiful vases of the silver, copper and gold-base cloisonne, but the iron-base cloisonne has been left out of the collection, although it is considered the most beautiful and artistic of all cloisonnes. This is for the simple reason that Americans have never appreciated this style of work so admired by the Japanese, and so the obliging exhibitors refrain from displaying something we are unable to appreciate.

The processes through which the cloisonnes are made are shown in all of the ten stages. One of the gems of the collection is a large oblong plate. The base is copper and both the wireless and the wire process have been used in the design. The price is valued at \$2,500. A large Makuzu vase in the old blue that

resembles the antique cloisonne is another striking piece of the exhibit. Even the manufacture of cloisonne did not originate with the Japanese. The same story of the adoption of the art of another people for themselves is told in the cloisonne exhibit, as the Chinese made cloisonne 2,000 years ago, but then lost the secret, later rediscovered by the Japanese.

In one large case are a number of Japanese idols. Among these are two terrible-looking images of the Wind God, taken from the Temple of Nara, hundreds of years old, and priceless in value. And with these are some of the very modern tapestries and fine embroidered work. Many of the beautifully-embroidered hangings look exactly like rare paintings. There are teakwood chairs, wonderfully carved by hand, cabinets inlaid with mother-of-pearl and ivory, and a wonderful teakwood hand-carved Chinese bed. The Satsuma collection is also a joy to the lover of Japanese art.

When you are tired of looking at Satsumas and cloisonnes, you can walk across the Prado to the charming little Japanese tea pavilion back of the Botanical Gardens, under the management of the same commercial association. Here, as you sit in the pavilion and look out upon the tiny Japanese garden with its well, its flowing stream and rustic bridges, dainty little Japanese maids will serve you with tea and rice cakes in the dainty manner that is characteristic of their people.

If you have any sporting proclivities, go to the Japan Streets of Joy on the Isthmus where every gambling game conceived by the Japanese is to be found. If lucky, you may win anything from a bowl of goldfish to a kimono.

Apropos of the Japanese ways and their delightful characteristics is a story going the rounds of a little incident that occurred upon the visit of one of the great naval heroes of Japan to the exposition. It was understood that he could not speak English, and army and navy officers, city officials and exposition officials vied with each other in paying the honored guest attention, but were more or less at a disadvantage as all conversation was carried on through an interpreter.

Shortly before his departure someone suddenly came upon the dignitary conversing fluently in English with some of his party. Of course, no one would be so discourteous as to divulge the discovery to the Japanese party, but every one of those army and navy officers, city officials and exposition officials began to cudgel his brains to remember what he had said in English in the presence of the visitor.

But should you leave the Foreign and Domestic Arts Building to sip tea at the pavilion or gamble in the Joy Streets, don't fail to return to see the collection of Persian rugs in that building. There are rare mosque prayer rugs, hundreds of years old, beautiful Boukaras, Laver kirmans, that graced the palace of some ancient Persian king, and royal Sarenk rugs. The exquisite colorings and the oriental designs, with their significance, are well worth the trip back from the tea garden to the exhibit.

San Diego Sun, May 25, 1915, 3:7. San Diego Fair directors at San Francisco; arrived on two special cars.

San Diego Sun, May 26, 1915, 7:7. Estudillo Day observed at Exposition.

San Diego Herald, May 27, 1915, 1:5. At the Exposition: Los Angeles and its contiguous territory captured the San Diego Exposition Saturday when a delegation of 2,000 arrived and took part in the celebration of Los Angeles County Day, the most successful of the county days held at the Exposition. The visitors came by train, boat and automobile and brought with them a large band and Chester Thompson's Kilties.

Saturday was one of the biggest days in the history of the Exposition, the attendance reaching close to the 25,000 mark. The great crowd was brought out largely on account of the San Diego Ad Club doings, which comprised a dizzy whirl of entertainment from the big parade in the morning until the close of the Isthmus carnival after midnight. The military and civic parade in the morning served as a good advance guard for the day's festivities and, with Colonel J. H. Pendleton as grand marshal, it was a great success. It passed over the downtown streets and, in the military section, 2,000 sailors, marines, cavalymen and coast artillery were in line. The civic section turned out as many paraders while 200 decorated floats and automobiles added to its attractiveness. It passed through the Exposition grounds and was reviewed by President G. A. Davidson and Exposition directors.

On the Isthmus at night the Human Ad parade and carnival proved a fitting climax to the day's activities. The Los Angeles delegation, arriving at noon, was escorted to the grounds and tendered a luncheon at the Southern California Counties building. In the afternoon, the Shakespeare festival, presented on the lawn in the rear of the Indian Arts building, drew a great crowd. It was estimated that Saturday night 10,000 merrymakers were in costume at the carnival. The Ad Club and the Los Angeles delegation buried dull care and the day was voted one of the best since the Exposition opening.

The official women's board of the San Diego Exposition is taking up plans for a Ellen Beach Yaw Day at the Exposition. As yet no date has been set but it will be within the next month. On Ellen Beach Yaw Day one of the largest musical programs of Exposition year will be given and the famed California singer will be heard in concert at the great outdoor organ.

Meeting with such popular endorsement, the plan of the San Diego Exposition to have Spanish troubadours entertain on the grounds has been broadened and the troupe has been doubled, so that now about twenty singers, dancers and musicians are on the daily programs. These make merry in the flower gardens and balconies of the buildings and add much to the charm of the Exposition.

As a prelude to the summer school, which will be maintained at the San Diego Exposition, Dr. A. L. Kroeber, of the University of California faculty, one of the leading anthropologists in the West, will give a series of lectures at the Exposition near the last of May. With plans well in hand those in charge of the summer school expect a large enrollment. Applications are now being received by Dr. Edgar L. Hewett at the Exposition. The school will be opened July 5 and be in session for six weeks. One of its big features will be the Montessori school for children, which will be established in the wild flower field at the rear of the California Building. This school will be taught by Dr. Maria Montessori and her assistants.

San Diego Union, May 27, 1915, 1:3, 2:5-6. San Diego pioneer who helped to save Balboa Park; Estudillo overcome by emotion; would end days with early memories.

That he was not forgotten, that he still lives in the minds of older residents and that they greeted him at the Plaza de Panama of the Panama-California Exposition with the whole-souled cordiality typical of California hospitality of many years ago was almost too much for Jose Guadalupe Estudillo, surviving founder of Balboa Park and a member of one of the oldest and most respected Spanish families, when he returned to San Diego yesterday as a guest of the city and the Exposition.

"If home means to you what it means to me, if it means fond recollections of happy times, memories of friends and events, if you have ever experienced the feeling of a heart that is so full of joy and gladness that you want to cry out and mere words sound empty, if you have in your heart the love of your country and you love every mountain peak as you love every hillside and valley, if you love God's sunshine and his manifold blessings and your fellow man --- then you know how I feel at being home.

"I have been away many years yet my heart was always here. It was here that California began and I am happy that it was my family which helped found a community which has become so great. As a boy I learned to love the land of our adoption. The cloudless sky and the sparkling sunlight on the deep blue sea, the hill under their green in winter and their tan in summer, the quiet tranquillity of conditions which seemed as though they had conspired for the happiness of mankind. They breathed joy into our souls, and no where are the same ideal conditions. Ever since I have been away I have always imagined myself visiting. One day I intended to return. My visit was long, but my gladness at being here today is worth it. My heart was ever here and I lived in tender memories of a joyous past."

With the enthusiasm of a debutante and with the vigor of a man many years his junior, Estudillo reveled in the transformation of the 1400 acres which were set aside by the board of trustees of the town of San Diego in 1868 and of which he as president.

"It is all too wonderful for words and I cannot express the feeling in my heart. Who would think that this barren desert, surmounted by these eternal hills, could have been transformed into a second paradise of trees and flowers. It is as though some fairy had waved her magic wand over the territory. I am speechless with amazement. I am overwhelmed with thankfulness to the residents of the city who have made it all possible. It is beautiful and more than the most imaginative mind could have conceived. I had tried to picture what the park would be like from what had been told me, but this is far beyond everything I had imagined."

RECALLS EARLY DAYS

His mind reverted back 47 years, for yesterday was the 47th anniversary of the setting aside of the pueblo lands as a public park, and he told of how the idea came to him.

"The faction in town politics to which I belonged was not always successful. Father Horton was a good politician and he elected a board of trustees which agreed to sell him land at what I considered a small price. After the 960 acres had been sold to Father Horton at 26 cents per acres, I set about trying to figure ways to prevent the future sale of land. I wanted to keep it for the city. I was elected to the next board of trustees and I suggested that 1400 acres be set aside as a public park. I really didn't have in mind that the land should be used for a public park, but merely as a means of saving it for the city. I don't mean to say that I could foretell coming events or see in the distant future a city like the San Diego of today or a park such as Balboa Park. It was simply my scheme to save the land from being sold. And that is the story of the origin of the park. The idea, which seems prevalent in San Diego, that Father Horton gave the land to the city for park purposes is erroneous and without foundation."

A trifle under medium height erect and with the mannerisms of a much younger man, time has been kind to this San Diego pioneer. Years are in the background as you talk to him, and you wouldn't know, unless someone told you, that he has looked on 80 summers. His sincerity, his reserve, his quiet dignity, his

pleasing personality, are first impressions. With a few minute's acquaintance, you will find him cordial, generous, accommodating, more than likable, and you will find yourself trying to lengthen your interview. His memory is remarkable and he can recite dates, names, places and events as though they were yesterday. He also has kept pace with the years, taking a great interest in the world and its work.

Some day soon Estudillo hopes to come to San Diego to live. "It is the birthplace of my mother, and it is here that I feel at home," he said. "San Diego is very dear to me, and I want to live in the present, where visions of the past are most vivid."

When **The Union** was mentioned to Estudillo, he recalled the beginning of the paper. "I guess I should remember for the first number was published in the rear of my old house at Old Town on October 10, 1868 and William Jeff Gatewood was the publisher."

On his arrival at the Laurel Street entrance to the Exposition yesterday morning in an automobile with Don M. Stewart, Philip Morse and ex-mayor D. C. Reed, he was met by a company of marines from Marine Barracks and escorted to the steps of the Sacramento Valley building, where he was met by President G. A. Davidson, of the Exposition, and several hundred old settlers.

Estudillo was given memorials in the form of scrolls by both President Davidson for the Exposition and ex-mayor Reed, representing E. M. Capps and the citizens of the city. President Davidson introduced Estudillo who thanked those present for his reception and congratulated San Diego on its Exposition and park.

He was taken to luncheon at the Cristobal Café and later he was taken on a tour of the grounds in an electric trolley. Later he attended the review of the marines at Plaza de Panama and listened to the organ recital by Dr. Humphrey J. Stewart.

Before leaving the grounds he was the guest of honor at a tea given at the women's board headquarters in the California Building, where he was the center of an interested group. More than 250 San Diego pioneers attended and thoroughly enjoyed the function.

Estudillo surprised members of the Pioneer Society of San Diego County and Mrs. Margaret V. Allen, who is in charge of the exhibit at the Fair, by giving them a bound volume of the first copies of **The Union**.

He will remain in the city until Friday when he will leave for his home in San Jacinto. He is at the U. S. Grant Hotel while in the city.

On the recommendation of members of the Pioneer Society of San Diego County, Superintendent Duncan McKinnon asked the teachers to take five minutes during the school hours yesterday and explain to the pupils the origin of Balboa Park. Members of the Society wanted this done to correct the impression throughout the city that the park was the gift of Father Horton. As yesterday was the 47th anniversary of the setting aside the 1400 acres of pueblo lands as a city park, it was thought an opportune time to send the correct story into hundreds of homes.

Park Commissioners Minutes, May 28, 1915. Carleton M. Winslow submitted plans and specifications for comfort station to be erected in the northwest section of Balboa Park; estimate \$928.00.

Los Angeles Times, May 30, 1915, VI, 1:6, 2:3. Peruvians made repairs on skulls with flint; ancient surgery of trepanning illustrated at Exposition by skulls thousands of years old; Members of the Southern California Dental Association listen to lectures over remains; primitive peoples observed nature's method of healing wounds.

San Diego Union, May 30, 1915, 4:3-4. Exposition Excursions No. 17: The Wild Flower Field, by R.W. Sumner.

San Diego Sun, May 31, 1915, 1:3-4, 7:6. Stadium is dedicated as thousands look on; military parade at 11 a.m.; monster track and field program.

San Diego Sun, May 31, 1915, 1:5-6. Veterans are honored at impressive service; Memorial Day observed with parade and program at Exposition organ; the line of Blue and Gray cheered as it wends way to Magic City from Fifth and F Streets to Laurel Street entrance.

San Diego Sun, May 31, 1915, 11:4-5. Mrs. Carrie Jacobs Bond, composer, to be honored tomorrow; Mrs. L. L. Selby, contralto soprano, will sing a number of her compositions at Organ

Park Commissioners, Minutes, May 3, 1915. Stadium accepted from contractors, subject to completion of stipulated work.

June, 1915, California Garden: Lost on the Isthmus, by G. T. Keene: Being a schoolteacher in San Diego in the year 1915, one of her duties was to accompany thirty-two youngsters on a trip to the Panama-California Exposition in search of education. Knowing something of the frolicsomeness of her little charges, she persuade two mothers to accompany her.

Those thirty-two boys and girls kept the tree ladies so busy during the day that when the shadows began to lengthen a tired crowd wended its way across the big bridge to the west gate and let itself out one at a time through the turnstile.

Of course they were all there, but just as a matter of precaution to make assurance doubly sure, the schoolmistress counted noses which she had numbered and listed in the early morning. Maybe she was tired, or perhaps one little fellow ran around so fast she couldn't count him; anyway they didn't tally. She would count them again. Counting as carefully as possible she was one short and with fear gripping at her heart she lined them up to learn if possible who it was.

Everyone answered to the roll call but Tommy F.

What was to be done? She remembered the story of the shepherd who left the ninety-and-nine to go and search for the one that was lost, but they were all now outside the gate, and besides, kids of the olden times didn't each have a mother at home waiting supper for her own particular little lamb.

She would hurry them all home and return to find Tommy --- if he was to be found.

Being a mother, as well as a schoolteacher, she knew how the mother would feel, so she called up Tommy's Mamma and broke the news to her as gently as possible. The voice at each end of the line feigned unconcern, but there was a suspicion of fears and tears, and a hurried appointment at the west gate where each arrived in an incredibly short time.

They paid their admissions and hurried on their way across the bridge spanning Cabrillo Canyon. It is a massive bridge, artistic in its simplicity. On either side is a jungle of trees, plants and flowers, growing an apparent wild confusion, but blending into an harmonious whole, while in the distance loomed the tall office buildings of the city, with the bay, ocean, Point Loma and Coronado Islands completing a picture of surpassing beauty. In front, silhouetted against the evening sky, were the exposition buildings, pleasing and restful

The foregoing paragraph immediately preceding this one is entirely my own. The two ladies saw none of those things. Two souls had but a single thought --- a little tow-headed boy with a round face, a buster suit and barefoot sandals.

Arriving at the center of the bridge, the mother halted. It was at the highest part. "I must look over," she said, "to see if ____." It wasn't necessary to finish the sentence. They looked at each other. "No, I can't: you look," she added. So the schoolmaam looked over.

Far down below, perhaps two hundred feet, was the lily pond, the winding road, the old boat rocking at its moorings, as old boats are wont to do, the little paths leading by circuitous route to the top through shrubbery carefully placed to look careless. That was all.

Once more the ladies looked at each other: the one shook her head, the other breathed again, and they hastened on.

If they hadn't been in such a hurry, they would have halted before reaching the Administration Building and turned to drink in the wonderful scene, and sniff and sniff and sniff the perfume-scented air from the numberless blossoms clinging and climbing everywhere. As it was, they were just in time to spy a sturdy little form round the arch and come trudging through the Plaza, his cap in one hand and the other firmly grasping a smudgy sack of "crumbles."

You would have known at once that it was Tommy, by the demeanor of the two ladies which was impulsive to say the least. After he had been kissed in every available spot by the one, and patted and smiled at by the other, they dropped onto a convenient bench and listened to Tommy's tale of adventure, at the same time regaining their composure, and allowing their tense nerve centers to relax.

"Mamma, youghta been 'ith me," babbled Tommy. "Billy's Gran'pa'z got a 'lectiket on the Is'mus 'n he let us ride in it all th' afternoon 'n gave us ice cream cones 'n candy 'n took us into the Toadstool 'n a lot of places. We just had packs of fun."

"Isn't that a beautiful spot?," said Tommy's Mamma.

"Isn't it a beautiful world?," said the Schoolmaam.

And they each took a sticky little hand and walked slowly back across the bridge.

June, 1915, California Garden, 5-6, Monthly Excursion Through Exposition Grounds, by R. W. Sumner: As we study the plant life at the Exposition this month, let us look a little closer among the shrubbery and trees for this is the time of bird song as well as flower fragrance. Before making note of the plants that are blooming, we will hunt out a few of the birds that are filling the early morning air with music. The Linnet, or house finch, is everywhere and its rollicking cheerful song is a splendid cure for the blues, unless you have fruit trees or a vegetable garden. As you walk from the Prado over to the Botanical Building, you are sure to hear a Song Sparrow. Often it starts with three high notes and then breaks into a flood of varied ones. Walk around to the right or east path and in a high fan-leaved palm, about half way between the fountain and east door of the Botanical Building, you will see the nest of an Arizona hooded Oriole. It is hanging on the under side of a palm leaf, evidently made of the palm threads and securely sewed to the leaf. As you follow on around the Building, near the rear end you are pretty sure to hear the busy twitter of the tiny Bush Tit as he runs over the ends of branches in search of insects.

Back of the Sacramento Building you will probably hear a wild canary, green-backed Gold Finch, singing, and maybe catch a glimpse of the female Oriole whose nest we just inspected, for this seems to be her favorite feeding ground.

Still further on, I have heard the Western Gnat Catcher's warble and seen him swoop down on some unsuspecting insects. As you cross the great Cabrillo Bridge, you are sure to see many little black-headed, white-breasted fly catchers darting here and there under the bridge, skimming the pond below, always busy on the wing. It is the black-headed Phoebe. And not far from the Laurel Street gate a Bullock Oriole, with orange plumage and black, has its nest. He is the western representative of the Baltimore Oriole.

Now with both eyes open, one for the birds and one for the flowers, let us start with the riot of seed-sown annuals between the Foreign Arts and Commerce and Industries. *Coreopsis tinctoria* or *Caliopsis elegans*, as it is often called, is an annual with rich brown and yellow markings and is one of the first to catch your eyes as you arrive at the head of the short flight of steps. Scattered about are some cultivated forms of *Godetia*, looking very similar to the *Godetia bottae* and *Godetia grandiflora* of the wild flower field on the

point north of the California Building. Also, there is a spike of peculiar *Acanthus*-like flowers of reddish brown. It is *Digitalis canariensis*, still in appearance, but interesting. Still on the left-hand side is a large shrub, *Leonotis Cornurus*, or "Lion's Tail," with lance-shaped, wrinkled leaves and square stems; the flower buds are just starting. You can see some in bloom in the Montezuma Garden, but I want to call your attention particularly to a pink candy-turf that grows close to it on the upper side. A little further and you find the double form of *Clarkia elegans*. An interesting thing about *clarkias*, *godetias*, *oenotheras* is the seed case. In these plants it acts for two purposes, for seed and flower stalk, for they are all long and rather slender, often taking the place of a *peduncle*. The seed receptacle of *Oenothera ovata*, the "Sun Cup" which grows in Central California, has the seed case underground, the stem of the flower being a slender tube leading out to the stigma.

A rather sprawling plant of *Rudbeckia*, "Golden Glow," with its tall stems and double yellow flowers grows a step further. Also, *statice latifolia*, with its large tuft of wide leaves and tall branching stalk of blue and white paper-like flowers. This is the flower that our Eastern friends like to send to their home folks because of its everlasting quality. Another flower that grows here and in many places on the grounds is the "Blue Marguerite, *Agathoea codlestis*. Its numerous blue Daisy-like blossoms bloom practically the whole year, and it attracts everyone. On the west side of the path is our largest specimen of *Echium fastuosum*. It seems to have grown too fast this year to bloom, but its lance-shaped, gray-colored leaves and spreading branches demand attention. The above just gives you a start. There are *Gaillardias*, Foxglove, *Eupatorium*, Marguerites, Cannas and many others.

In many places about the grounds will be found *Abelia rupestris*, one of our best flower shrubs. Its numerous small pink flowers are dainty on close inspection and the dark glossy leaves are always showy. When the plant is not in bloom, the wine-colored sepals almost fill the vacancy. A hedge of it has been planted between the Bulkhead and the entrance to the Pepper Grove. Other places you will see it alone or grouped, and always it is good to look at.

Eugenia myrtifolia is another many-officed shrub. In the Pergolas, on the point back of the Montezuma Gardens, it is used as a vine, growing in front of the pillars. At the cross paths in front of the Japanese Tea Garden it is used as hedge, also out the west end of the Sacramento Building arcade. It will soon be in bloom and later rose-colored berries appear.

As if growing to order, the two large *Agave Americana* in the bowls at the west end of Cabrillo Bridge are sending up their stalks, making one supreme effort in the great cluster of flowers which they bear. The leaves gradually wilt and the whole plant dies at the end of the season. "Century Plant" merely means they bloom only after several years growth instead of a hundred. Also, the two in bowls at the Bulkhead near the Commerce and Industries Building are getting ready their tall stalks. It is an interesting fact that these all seem to be blooming at once. The reason for it probably is that in digging, the root pruning has thrown the sap and strength upward. Last year one was dug and boxed in the Nursery and immediately sent up its flower stalk.

Walking along the path at the head of Palm Canyon, back of the Indian Arts Building, you will notice on the left a variegated shrub with numerous clusters of small white flowers. It is a variegated Privet, *Ligustrum ovalifolium aureo-marginatum*, and a peculiar thing is the reverting back to the green type. A green branch will grow directly out of a variegated one. This is the difficulty that men come up against in hybrid propagation and one reason why it takes years, sometimes a lifetime, to get just the right combination. Across the path is a *Gunnera Chilensis*, an enormous leafed plant belonging to the Rhubarb family. At the point where you can look directly down the canyon, there are some large-leafed false Artichokes. Right at your feet are some small plants with prism-shaped leaves, which earlier in the season has peculiar, leather-textured, star-shaped flowers. Now the seed pods are five or six inches long, pointed and filled tight with silky-tailed seeds. Probably they will crack open about July. As you walk up the path to the Botanical Building, on the east side of the pool, there are one or two *Melaleuca linearifolia*; they may be located by the dense mass of feathery white bloom. As is usual with the *Melaleucas*, it is the stamens that make the show.

Before passing the Botanical Building, take a look inside. At the side of the main door, just before you enter from the arcade to the large domed area, there is a vine with small Jasmine-like flowers, the petals

twisted like a wind wheel. It is not a *Jasminum*, as so many insist, but *Rhyncospermum jasminoides*. The show flower this month is the tuberous-rooted Begonia, growing both in the lath and glass houses.

The "Bird of Paradise," *Strelitzia Nicolae*, is soon going to have something to show our visitors. This flower is peculiar and will interest you for a long time. As the bud breaks, the parts of the flower rise at right angles, just like so many feathers on the head of a Bird of Paradise. They continue to rise as the flower matures till all have broken from the sheath. This plant, which a good many take for a Banana tree, is just to the right of the door as you pass through to the Glass house. Another is situated in the far end of the east wing. It too has a bud which will bloom later. At each side of the steps leading into the Tea Pavilion is a *Tecoma jasminoides rosea*. Its pink flower, with the deeper red center, bloom several months, and it is a very useful vine. Passing along the canyon path behind the big lath house are some small gray-leaved trees with numerous plump buds ready to crack open, one near a lamp post is easy to examine. It is *Lagunaria Patersonia* and its pink-white flowers resemble the Hibiscus in form. Just beyond is a *Pittosporum rhombifolium* with rhomboidal toothed leaves. The large cluster of small flowers are just at the point of bloom. A hundred feet further is growing one of the best *Buddleias* we have, *Buddleia variabilis*. Its light gray stems and leaves make an excellent background for the somewhat pendulous dense spike of purple.

The small flowered slender branched Fuchsia that grows in many places on the grounds is *Fuchsia gracites*. As you near the *Canna* bed, back of the California Building on the right-hand side and just below a hardpan Bulkhead, there are several shrubs of *Lavater assurgentiflora*, the Tree Mallow. Its pink, Malva-like flowers are blooming now.

The green upright shrub that may be seen near the bridge approach is *Escallonia virgata*, the small white flowers with green centers being in rather large clusters and the finely-toothed leaves are glutinous to the touch. And so we might go on. The wonder and beauty of the plants grow as you search them out. This one for its gorgeous colors, that for its foliage, others, perhaps, for a peculiar botanical feature. "Earth's crammed with heaven and every common bush afire with God, but only he who sees takes off his shoes, the rest sit around and pluck blackberries."

San Diego Sun, June 1, 1915, 7:6. Officials report just 789,440 admitted to the Fair since opening; 17,663 on May 31, in addition to those in Memorial Day parade; 179,818 in May; 180,270 in January.

San Diego Sun, June 1, 1915, 9:1. Art Museum planned here; Corporation to apply to Park Commission for permission to use one of the more permanent Exposition buildings.

San Diego Sun, June 1, 1915, 12:1-2. 20,000 visited the Stadium during dedication exercises yesterday.

San Diego Union, June 1, 1915, 1:1. Stadium opened with athletic carnival, by W. W. B. Seymour.

San Diego Union, June 1, 1915, 2:1. Stadium athletic meet furnishes rich reward for unselfish citizens, by Charles P. Cook.

San Diego Union, June 1, 1915, 8:1. Churchill J. Bartlett, representative of Texas governor, visits Fair.

San Diego Union, June 1, 1915, Classified, 1:4. Six more dancers join Troubadours; La Felicia, new troupe star, skilled artist, native of Seville, Spain.

San Diego Union, June 1, 1915, Classified, 1:5. Olive Hinsdell, actor, delivered Lincoln's "Gettysburg Address" at Organ Pavilion during organ recital yesterday.

San Diego Union, June 2, 1915, 6:1. Carrie Jacobs Bond Day observed; 200 members of American Library Association participated at reception; Mrs. Robert F. Garner new hostess as Seven California Counties Building.

San Diego Union, June 2, 1915, 6:2. Lieutenant Governor John M. Eshleman, guest of Colonel Ed Fletcher, lauds Fair.

San Diego Union, June 2, 1915, 6:3. Dr. Kroeber gave lecture on Indians of California in New Mexico Building last night.

San Diego Union, June 2, 1915, 6:4. Month of May has largest attendance at Exposition since opening; total attendance was 179,440.

San Diego Herald, June 3, 1915, 1:5. At the Exposition: The total attendance in May of 179,440 gives a daily average of 5,800, the greatest daily average in a month's time since the Exposition threw open its gates. The biggest day in May was the 31st, when 17,663 passed through the turnstiles. This figure does not include the 2,500 who entered the grounds in the Memorial Day parade. The total attendance at the Exposition since its opening now reaches the high figure of 798,440.

San Diego Sun, June 3, 1915, 2:5-6. Gilson Gardner, **Sun** Washington correspondent, praises San Diego Exposition: "One may go from court to court, drawing joy --- emotional or analytical --- from the color scheme alone. . . . It isn't necessary to see exhibits. Why do inside a building when the next turn beyond leads into a garden of magical beauty where flowers have apparently always been growing and birds always singing."

San Diego Union, June 3, 1915, 8:1. Thousands coming to Exposition this month, special train arranged.

San Diego Sun, June 4, 1915, 2:3. Emma Goldman coming to Exposition; woman, twice rushed out of town, says she is going to speak.

San Diego Sun, June 4, 1915, 9:5. Alameda and Santa Clara Counties Day, Saturday, June 5; free cherries to be distributed at host building.

San Diego Union, June 4, 1915, 3:2. Congressional girls given Japanese tea; Miss Annie Ibrie, daughter of Congressman E. W. Pow of Smithfield, North Carolina, was honor guest at Exposition function; Miss Mayme Ober Peak, secretary to Congressman Kettner, was hostess.

San Diego Union, June 4, 1915, 7:2. New Spanish dancers please; La Jota Aragonesa cheered.

San Diego Union, June 4, 1915, Classified, 1:1. Exposition to honor Admiral Howard Tuesday; directors will show appreciation for aid given by fleet commander; great parade arranged; 1,500 military organizations expected in line of march.

San Diego Union, June 4, 1915, Classified, 1:5. Big sham battle, July 4 arranged; "Defense of San Diego," military spectacle to be given at Exposition.

San Diego Union, June 4, 1915, Classified, 1:5. Members Christian Commercial Traveling Men's Association expected to visit San Francisco and San Diego expositions late next month.

San Diego Sun, June 5, 1915, 3:1. Chief of Police Wilson may or may not allow Emma Goldman to speak at Exposition.

San Diego Sun, June 5, 1915, 4:2-4. EDITORIAL: An Easter Who Saw: San Diego's Exposition is different. . . . It is a splendid lesson on what man can do with nature's fundaments, and that lesson is good for every man who has a square foot of back or front yard. . . . A great exhibition of machinery, great buildings, architectural excellence makes you wonder and that's the only sentiment you can take home with you. Some inventor, some builder, some architect had done big things that you can't. But look on that beautiful floral picture and you will take home with you a new love and knowledge that you can create the big things that will mean more beauty and happiness in your life and the lives of others.

San Diego Union, June 5, 1915, 2:2. John Cosgrave, editor of the New York World Sunday Magazine, to see Fair.

San Diego Union, June 5, 1915, 2:2. Summer school attracts tutors; entrants register in classes from all parts of the United States.

San Diego Union, June 5, 1915, 3:5-6. Celebrities coming to Exposition, June 14 and 15, with 75 beauties who won Universal Film Company's contest.

San Diego Union, June 5, 1915, 5:2-3. W. W. Bowers sheds light on park founding: I came to San Diego in 1869 and have been a resident ever since. I know personally and intimately all the men and officials who were at all prominent in the making of the park. I know the written and unwritten history of its making. I know it as certified to, in the main, by the records of the government of this city.

The records show that on February 15, 1868, E. W. Morse --- one of the three trustees of this city at that time --- at a regular meeting of the board of trustees offered a resolution to set apart lands for a public park, which resolution was adopted, and E. W. Morse and Thomas Bush --- another member of the board --- were appointed a committee to select the location and lay out the same on the city map. At that time, the board of trustees consisted of J. S. Mannassee, E. W. Morse and Thomas Bush. I know from Morse that Trustee Bush took but slight interest in the selection of the lands and site, and these were selected by Morse and A. E. Horton, and that their report and recommendation were readily accepted by Trustee Smith [sic], who reported with Morse favorably to the board.

I know also from Morse that he was earnestly urged by Horton and Charles P. Taggart, who were the prime movers in the enterprise, to submit his resolution promptly to the board.

Soon after the report of the committee on location, a new board of trustees was elected, consisting of Marcus Schiller, Jose Estudillo and Joshua Sloane. The records show that under date of May 26, 1868, the said trustees, acting on the report of Committee men Morse and Bush, adopted the ordinance setting aside for a public park forever the 1400 acres of land selected and recommended by the said committee.

On February 4, 1870, the state legislature passed the bill confirming the act of the trustees in setting aside the 1400 acres of Pueblo lands for a city park.

In December, 1871, a bill was introduced in the legislature to repeal the act confirming the establishment of the park. A strong protest against this repeal was sent to Sacramento and the bill was killed.

During the last forty years occasional projects for cutting up and diminishing the size of the park have been suggested, but it remains intact, and the promise is that it will so remain for centuries, if not forever.

I know that A. E. Horton, E. W. Morse and C. P. Taggart were the foremost among the founders of the park and that they were assisted to some extent by James McCoy.

I know that neither Horton nor any friend of his ever claimed that he gave the land for the park. He gave only his earnest and intelligent work for it. I was not aware that there is any "impression throughout the city that the park was the gift of Father Horton." The impression may have been honestly enough created by the fact that Horton having given the land for so many public buildings and so much public service, was responsible for the park also.

San Diego Union, June 5, 1915, 5:2. Cavalry drill to be repeated; As an additional feature of Admiral Thomas Benton Howard Day at the Panama-California Exposition next Tuesday, Capt. George Van Horn Moseley of the cavalry will give another cavalry drill at the tractor field in honor of Admiral Howard.

The last event of this kind held for the benefit of Los Angeles motorists, Motor Day, attracted to the grounds an immense crowd which thoroughly enjoyed the performance.

The drill to be held Tuesday will be as thrilling as the one held Motor Day, and, as there are thousands of San Diegans who have not seen this branch of the service in action, a large crowd is expected. It will be held shortly after Admiral Howard reviews the parade from the steps of the Sacramento Building. The parade will leave the foot of Broadway at 1:30 p.m.

In the evening a great outdoor dancing party in honor of the enlisted men will be held at the Plaza de Panama. Society women of the city and Coronado are planning for this event, which, it is predicted, will be the biggest affair of the kind ever held in Southern California.

San Diego Union, June 5, 1915, Classified, 1:2-4. Papoose born at Exposition; Painted Desert folk joyous; congratulations showered on proud mother, age 17, who took part in dance night before man-child came; baby named "San Diego."

Los Angeles Times, June 6, 1915, VI, 2:6-7. Week's big success at San Diego Fair.

San Diego, June 5. In point of attendance, gate receipts and interest, the week just closed was the biggest since the opening week of the San Diego exposition. More than 70,000 persons passed through the gates, which is about the number of the big opening week, and the gate receipts for the week were nearly \$20,000. On the Isthmus the concessionaires experienced the greatest week of the year and about \$35,000 was spent there.

Aside from the great crowds, some of the most important events since the opening took place and many important parties were guests of the big fair. It was a week of big events and of celebrities.

On Tuesday evening the Café Cristobal was the scene of one of the most brilliant banquets in its history. The party of tourists, composed of fifty Congressmen and their families on their way home from Honolulu, were guests of honor and the café was converted into the halls of Congress for a few hours when some of the most famous statesmen and orators of the country delivered addresses.

Uncle Joe Cannon, who had received ovations throughout the day wherever he went, was the central figure of the banquet. In a speech uncharacteristic of the famous statesman and which was contrary to his customary style, he shunned politics completely and painted a beautiful word-picture of the early days of the country. The aged statesman told in vivid language how he had seen the country grow from 17,000,000 to 100,000,000 and watched the progress westward.

Tuesday also was the day set aside to honor Carrie Jacobs Bond, the famous composer who lives at San Diego, and thousands of her admirers attended the recital where her songs were sung. A luncheon was given for her and later the treat of the day was given when she herself sang her song, "The End of a Perfect Day."

On Monday of this week the attendance was the greatest number since the opening. The number of persons registered at the turnstiles was 17,663. Thousands attended the Memorial Day services under the auspices of the Grand Army of the Republic at the big out-door organ.

Although not within the exposition gates, but adjoining the grounds and practically a part of it, one the same day was celebrated the dedication of the big municipal stadium. More than 20,000 persons were seated about the great oval field of the immense stadium, the building of which was the greatest feat, next to the exposition, that San Diego has ever undertaken. Ten thousand school children attended and more than 300 athletes were entered in the athletic events of the day.

On Sunday Gov. R. L. Beekman of Rhode Island and his party were guests of honor at the exposition, and on Monday the 150 delegates to the National Electric Light Association convention, comprising the big men of the electric light and power companies of the country, visited the exposition in a body.

The Congressional party remained in the city until Friday evening and many banquets and receptions were given for them at the exposition.

Next week will also be one of the big events. Tuesday will be one of the most important of these as it has been set aside to honor Admiral Howard, commander of the Pacific fleet. All enlisted men of the Coast Artillery Corps, the Fourth Regiment of Marines, and the First Cavalry stationed here, as well as the sailors of the U.S.S. Colorado and the U.S.S. San Diego, will be in attendance.

A great military ball will be given for these enlisted men, who would number about 2,000, in the Plaza de Panama, Tuesday night. The military bands of the Coast Artillery Corps, the Marine Band and the bands of the Colorado and the San Diego will play and it is planned to make the most gala out-of-door occasion of the year.

Many other important special events are planned for the next two weeks so that June will be a banner month at the exposition in point of attendance.

Los Angeles Times, June 6, 1915, VI-1, 2. Keeping lit clamped on high prices, by Mary S. Gulliver.

San Diego, June 5. Exorbitant prices are taboo at the San Diego Exposition. Contrary to the history of expositions, hotel rates in San Diego are no higher now than at any time and meals served within the grounds may be had for the same price as outside.

This is a part of a great plan made by the directors of the fair to secure for the big show a larger advertising medium, that is to make every visitor to the exposition a personal advertising agent through his satisfaction with the hospitality offered. Courtesy on the part of the guards and of all employees of the exposition to visitors is a third great factor in this advertising plan.

Long before the exposition opened an agreement was made by the exposition management with hotel men and apartment house owners to adhere to a certain schedule of prices agreed upon. The contracts of all exhibitors and concessionaires state that concessions must be conducted satisfactorily to the exposition. And "satisfactorily to the exposition" has been found by the concessionaires to mean without charging the public exorbitant prices.

There was a clearing house for grievances established at the Administration Building to guard against dissatisfaction on the part of visitors through any cause, but the clearing house has been almost abandoned by default. There seem to be no particular grievances. You pay \$1.50 or \$2 for a room in a good hotel with remembrances of similar accommodations at past expositions for which you paid \$5; you may eat a table d'hote luncheon for 50 cents at the best café on the exposition grounds and in answer to an inquiry for information of the blue-suited guards you receive a courteous reply that gives you the idea you are a welcome guest and not a nuisance to be gotten rid of as quickly as possible. All of which has been accomplished through Director-General H. O. Davis and his subordinates in a business-like way that has eliminated all dissatisfaction.

The guards at the San Diego Exposition are all detective agency men, experienced and reliable. However, not so long ago three of the very capable one were discharged on account of their failure to treat visitors with courtesy. Frequently a perplexed sightseer is surprised to receive some courteous direction concerning buildings or grounds from a passing man or woman; because every employee of the fair, whether accountant or stenographer in the Administration Building or gardener on the grounds is instructed to lend every assistance possible to visitors.

And so almost unwittingly the tourist or visitor becomes a part of San Diego's big advertising scheme.

The subject of cafes and restaurants at an exposition is sure to be an important one for the most interesting of the exhibits pale in interest if that empty feeling has come over the sightseer. There is a great variety of eating places on the grounds from the big café on the Alhambra, where you enjoy the most

elaborate meal and dance between courses to gay music, to the sandwich stands on the Isthmus. There are quiet tearooms opening on beautiful balconies, there is a cafeteria where the Californian may feel quite at home, a chop suey restaurant, and a German beer garden. In many of the exhibit buildings there are small restaurants or tearooms where refreshments may be had at reasonable prices.

So take it all in all the visitor to the San Diego Exposition carries away with him not only a memory of the wonderful architecture and landscape beauty of the fair, but a sense of kindly hospitality extended to him by the city which invites him to return.

TAKE YOUR TIME

To properly enjoy San Diego's exposition one cannot rush hurriedly through with a birds eye view of the whole and glance at the exhibits in the interior of the buildings in a systematic manner, as if on a conducted tour. If I had but one day to spend at the exposition, it would be spent entirely in the grounds outside the buildings. In that way one would at least get an idea of the beauty of the architecture, with its twining vines and masses of bloom and background of flowers and shrubbery.

But I suppose that is not the correct idea of seeing an exposition, so if one must visit the buildings with the educational idea in view, one should at least linger on the Puente Cabrillo long enough to see the magnificent view of the bay and the islands beyond. Then, to become imbued with the idea of Spain which is presented by the buildings, one should wander to the Plaza de Panama and feed the pigeons that flock there by the hundreds or watch the Spanish dancers in groups of twos and threes as they come dancing down the Prado or sing from the balconies.

The troupe of Spanish singers, which does so much to express the soul of the exposition, has been increased to fourteen pretty *Senoritas* and *Senors* recently, and the number will be increased to more later. This is planned that the Spanish singers and dancers may be found all over the grounds.

One cannot see the pretty *Senoritas* dance their native dances, with all the fire and grace peculiar to the Spanish, or see the entire troupe join in some pretty folk dance to the music of the mandolin, guitars and castanets, without feeling the spirit of the exposition. After that it would be useless to choose for another what-to-see in the buildings. The calm, restful spirit of the place will lead the visitor to the exhibit which will most suit his fancy, and that is all that is necessary for the enjoyment of the San Diego fair, whether it be the Painted Desert with its Indians, or the '49 Camp with its western flavor, the wonderful exhibits of archaeology and anthropology in the California Quadrangle, the State buildings, or the beautiful botanical gardens and buildings.

For if one sees every exhibit here and has not caught the spirit of the exposition, one has not truly seen the exposition.

WOMAN'S SPHERE

The Woman's Headquarters, the wonderful room in the California Building, with its striking color scheme of persimmon, red and gray, which is so attractive, is a great factor in the hospitable atmosphere of the fair. Here celebrities gather, either by invitation or by chance, at the most delightful teas.

One day this past week a delightful instance of this occurred. While everyone was trying to speak with Uncle Joe Cannon, or shake the hand of the famous ex-Speaker of the House, a demure little woman was introduced to Mrs. Carrie Jacobs Bond, the composer, in whose honor the exposition has set aside that day. Mrs. Bond greeted the little woman, but, aside from the usual courteous salutation she gave to all she met, there was no hint of recognition. Finally the friend who had introduced the two women whispered into Mrs. Bond's ear that the little woman was the Lady of Decoration: for the demure little woman was Mrs. Fannie Macaulay (Frances Little), the writer of the charming story, "The Lady of the Decoration," and other pretty tales. Soon the two women were engrossed in a conversation about their work, for they had long been corresponding over certain books and certain songs, but had never before met. Mrs. Macaulay, by the way, compares the architecture of the exposition to the famous Taj Mahal.

Soon another famous woman was drawn into their circle, Mrs. Isa Maud Ilsen, the only woman who has the distinction of being a representative of Thomas A. Edison. Mrs. Ilsen is doing an educative work throughout the country, taking up the psychology of music as illustrated by Edison's inventions and similar subjects to be taught in the schools.

PAINTED DESERT BABY

There is much merrymaking in the Painted Desert among the Indians for the first birth since the Painted Desert was opened occurred yesterday. The little papoose is the son of Dolores and Jose of the Acoma tribe, the pottery makers. The pretty young mother is but 17 years old and mighty proud of the distinction of being the mother of the first child of the Painted Desert. A christening with proper ceremonial will be held next week by the Indians.

San Diego Union, June 6, 1915, 1:6. Tons of cherries given away; thousands enjoy feast at Fair; Alameda and Santa Clara Counties hosts.

San Diego Sun, June 7, 1915, 1:1-2. Councilman W. Moore asked City for \$3,000 to entertain Emma; a special committee to be appointed by chief of police; resolution referred to mayor's conference.

San Diego Sun, June 7, 1915, 1:4-5. Admiral Thomas Benton Howard Day tomorrow; commander of Pacific fleet; military parade from Broadway to Plaza de Panama; Cavalry stunts on tractor field; dinner at Cristobal Café in evening; outdoor ball in the Plaza de Panama at 8:00 p.m.; women to be admitted free after 6:00 p.m.

San Diego Union, June 7, 1915, 12:4. Miss Esther Plumb, contralto of Chicago, scored triumph yesterday at Organ Pavilion; Dr. Stewart surrounds vocal gems with varied program.

San Diego Sun, June 8, 1915, 3:1. Exposition made profit of \$28,361 in May; June 19 will be San Bernardino County Day; June 24 will be Orange County Day.

San Diego Union, June 8, 1915, Classified, 1:1. Exposition to pay Admiral Howard honor today; military parade will start for Fair grounds at 1:30; review arranged; outdoor dance feature; exhibitions by cavalymen and other interesting events on program.

San Diego Union, June 9, 1915, 1:3, 4:4-6. Fair pays tribute to Admiral Howard; great military pageant opens day's brilliant events; cavalry exhibition, air flights, drills and dances feature festivities..

San Diego Union, June 9, 1915, 1:7-8. William Jennings Bryan resigned yesterday as Secretary of State; claims government's policy toward Germany is too drastic.

San Diego Union, June 9, 1915, 1:4-6. Bryan's letter of resignation.

San Diego Union, June 9, 1915, 2. President Wilson expresses deep regret at Bryan's action.

San Diego Union, June 9, 1915, 4:1-2. EDITORIAL: Bryan's betrayal of the President: Secretary Bryan has been guilty of one of the most un-American and most unpatriotic acts ever committed by a man holding a prominent position in the government of the United State.

San Diego Union, June 9, 1915, 4:6. Spectacular exhibition of cavalymen at Fair thrills many watchers.

San Diego Union, June 9, 1915, 8:1. Three hundred Texas bankers arrive to view Exposition.

San Diego Sun, June 10, 1915, 3:1. Women's Christian Temperance Union Day at Exposition Friday, June 11; 250 members to arrive from Pasadena; address at Organ Pavilion; reception in blue room of Seven California Counties Building.

San Diego Sun, June 10, 1915, 4:1. EDITORIAL: A Splendid Plan . . . supporting use of one of the permanent buildings for a museum; also using ranch exhibit as a laboratory for students of a Southern California agricultural college and hold an agricultural fair for a month or two every year.

San Diego Union, June 10, 1915, 1:4-6. Maharajah of Kapurthala to see Fair; arrived yesterday afternoon on private car.

San Diego Union, June 10, 1915, 3:2-3. Napoleon the Wonderful Man Ape and trainer to visit Exposition.

San Diego Union, June 10, 1915, 8:2. Spanish troubadours win hearts at Fair; sweet melodies float down from balconies; Senoritas to stage romantic festival in Exposition gardens.

San Diego Union, June 11, 1915, 3:4. Governor Seymour Whitman of New York to be at Fair tomorrow; New York Day and also Maxwell Day.

San Diego Union, June 11, 1915, 5:2. Mrs. Isa Maude Ilsen to entertain enlisted men of Marine Corps with a musicale in New Mexico Building tonight.

San Diego Sun, June 12, 1915, 1:4. Director-General Davis to be beauty judge today in Los Angeles; 60 American beauties to invade San Diego Monday.

San Diego Union, June 12, 1915, 1:4, 4:5. Sixty one beauties due tomorrow.

San Diego Union, June 13, 1915, 3:2. New York Governor Charles Seymour Whitman and staff visit Exposition.

San Diego Union, June 13, 1915, 10:3. Maxwell car won by Thomas Parker, San Diegan, at Exposition; Santa Ana visitors egg race victors; entrants efforts amuse crowds; obstacle contest honors go to Los Angeles visitor; Tetztaff won speed contest of 50 yards. . . . A large crowd was attracted to the tractor field where the events were held. There were at least 100 Maxwell cars on the grounds.

San Diego Union, June 13, 1915, 10:3. Isthmus Notes.

San Diego Union, June 13, 1915, 10. W. E. Macarron, San Diegan, wins South American contracts; electric trolleys will be introduced in cities below equator; 3,000 cars required; has secured privilege of operating these cars on the boulevards and in the parks of Buenos Aires, Rio de Janeiro, Montevideo and Santiago.

San Diego Union, June 13, 1915, 10. M. Logsdon, Exposition gateman at the Laurel Street entrance, marries on vacation.

San Diego Herald, June 14, 1915, 4. At the Exposition: Military parades, drills and demonstrations, fraught with spectacular features and standing out in luminous contrast to the more sober programs arranged by peace advocates, are some of the attractions included in the mammoth Fourth of July celebration at the San Diego Exposition, July 3, 4 and 5. The program has just been arranged in detail. It is far more comprehensive than was first intended and doubtless will be the greatest given during Exposition year.

The program has been arranged to appeal to all classes, while its features have been set down so that there will be a continued celebration during the three days. Over the whole has been spread the theme of entertainment of visitors, this including a series of Spanish operettas by the Spanish Troubadours, fireworks night and day, illumination of the lofty California tower by a brilliant pyrotechnic display, outdoor balls and special band concerts by the military bands stationed at San Diego. One important feature is that all of the exhibit buildings will be open on the three holidays, thus giving opportunity of inspecting the comprehensive and interesting exhibits to those who are unable to visit the Exposition on weekdays.

Starting with the huge parade of the Odd Fellows the morning of July 3 and ending with a magnificent display of fireworks the night of July 5, the program shows enough diversity to please the most exacting.

While San Diego hotels have ample accommodation for a great crowd, the Exposition urges that reservations be made without delay by those desirous of getting the best service.

San Diego Union, June 14, 1915, 1:7. Park Board plans great zoo; plan to purchase entire menagerie from Wonderland Park at Ocean Beach.

San Diego Union, June 14, 1915, 5:4. Governor L. E. Pinkham of Hawaii guest at Fair today.

Los Angeles Times, June 15, 1915, II, 5:5-7. Exposition many dollars to good: That the San Diego Exposition was \$74,000 to the good on the first inst.; that the overhead cost of operation had been reduced to the equivalent of its actual cash receipts; that its auxiliary income is sufficient to provide for a series of special events and show an increasing profit --- these things are the substance of a verbal report made to **The Times** by President G. A. Davidson of the exposition company.

"Not a single month since the exposition opened have we shown a red figure," commented Davidson. "Considering that we have passed through the most unpromising part of an exposition year, we believe we have good reason to be proud.

"Our daily attendance is averaging 3,000 admissions and gradually, as the tourist season opens wider, we are observing a healthy increase daily. When the Los Angeles schools close this month and the good people of the Angel City begin crowding in upon us, coupled with the tremendous influx of people promised by the railroad and steamship companies, we anticipate the complete success of our efforts."

While the San Diego exposition officials have provided a startling variety of amusement attractions on the Isthmus, the visitor is impressed with the unique plan to serve typical and semi-tropical diversions in all parts of the grounds.

Regular Romeo and Juliet balconies on nearly all the exhibit buildings break forth in Spanish melody; brilliantly attired groups of young men and women pour forth Carmen and Spain's old operas from behind shrubbery and pepper trees; a gaily decorated maiden suddenly darts from an arcade to render some old Mexican dance on the shaded streets. Thus, moment after moment, the tired sightseers are revived in most pleasant manner.

The spirited military music of the Marine Band calls thousands to witness the regular afternoon review of the deep-sea fighting men of Uncle Sam. The gigantic outdoor organ peals forth its deep and delicate tones for an hour. So, minute by minute and hour after hour, you are lured to charm after charm, dreaming the while that you have been wafted on some magic carpet to distant lands.

San Diego Union, June 15, 1915, Classified, 1:2. Want to meet pretty girls? Here's chance: fifty film actresses coming with beauties; mock wedding scheduled at Exposition; 61 bachelors will meet visions of loveliness; rousing welcome arranged. . . . There will be a moving picture wedding in the Plaza de Panama at 3:00 p.m. It will be a mock affair, part of a Universal scenario in which the Exposition will be displayed prominently. In the making of this picture a large crowd will contribute to its success, and all who have not enjoyed the making of film plays will have an opportunity to see the details this afternoon.

During the enactment of the scenario the Marine Corps band will play the wedding march. Twelve of the prettiest maids in the lot will act as bridesmaids to Miss. Ruth M. Purcell, while as many of the bachelors chosen as escorts will act as best men.

San Diego Union, June 15, 1915, Classified, 1. More beauties coming to San Diego; 20 teachers due Thursday; Northwestern Girls will arrive on McCormack liner tomorrow.

San Diego Union, June 15, 1915, Classified, 1. New Mexico's building will surrender to Miss Ruth Safford of Santa Fe, one of the 61 varieties of American beauties scheduled to arrive in the city this morning.

San Diego Union, June 15, 1915, 14:1. Nurses' Day at Fair set for tomorrow; American Medical Association will visit Exposition on Friday.

San Diego Union, June 15, 1915, 14:4. Park owners offer animals to San Diego; price of \$2,500 made on Wonderland Zoo beasts; decision pending; Forward and Ferris of Park Commission discussed matter with Mayor Capps yesterday morning. . . . The Wonderland Zoo contains lions, leopards, monkeys and many other beasts as well as a number of birds.

San Diego Union, June 16, 1915, 1:7, 3:6. Southland cavaliers make good with beauties; country's fairest daughters captivated by San Diego and Exposition; 61 heartbreakers pass day filled with fun and excitement.

When at 10:30 last night the chaperons round up their charges --- the American beauty winners in the beauty contest held by the Universal Film Company --- and told them the day at the Panama-California Exposition was at an end, the chaperons became instantly unpopular with San Diego bachelors who were having the time of their lives at the American Beauty Ball at the Cristobal Café. The bachelors, under the astute leadership of Tom Hammond had counted on a midnight hour, with a few minutes to spare to say goodnight, but the chaperons upset all plans and whisked the girls back to the Hotel del Coronado in automobiles --- the entire 61 of them!

G. A. Davidson, at Sacramento Building: "It is appropriate that America's fairest daughters should visit the fairest Exposition ever held."

Wedding held on platform of Sacramento Building in afternoon for movie "The World to Come," produced by Bison Company under the direction of Henry MacRae, in which nearly all the beauties will appear; Miss Ruth Purcell of Washington, DC, named prettiest of all.

San Diego Union, June 17, 1915, 14:1. 400 nurses, members of American Nurses' Association, visit Exposition; Mrs. E. H. Thompson, president San Diego Nurses, in charge of entertainment.

San Diego Union, June 17, 1915, 14:2. Professor T. B. Bird, Denver educator, to see Exposition.

San Diego Union, June 17, 1915, 14:3. Tonight is "Society Night" at Exposition; Thursday evening dinner dance at Cristobal Café.

Park Commissioners Minutes, June 18, 1915. Contracts awarded for comfort station in the northwest section of the park: \$618.65 for construction of building and \$260.00 for installation and furnishing of plumbing; Mrs. Helen Tilden of Venice, Calif. gave Commissioner Ferris and Superintendent valuable collection of oriental curios for exhibition in Fine Arts Building; Superintendent to investigate offer of animals in the Zoo at Wonderland Park, Ocean Beach, for a financial consideration.

San Diego Sun, June 18, 1915, 2:1. Mayor Capps wants to avoid trouble if Emma speaks at Fraternal Brotherhood Hall on Sunday; expresses confidence in Police Department.

San Diego Sun, June 18, 1915, 8:2-3. Police system unique; Exposition is well protected; Captain C. P. Wright, chief of Panama-California Exposition police force; no cases before police court to date; known crooks taken to "show-up room" for each officer on grounds to take a look at them; officers can see in but the suspects cannot see out.

San Diego Union, June 18, 1915, 1:1. 3,000 Yaquis on warpath, plunder Sonora; Marines to land at Guaymas to aid Americans.

San Diego Union, June 18, 1915, 1:5. Armored cruiser *Colorado* hurries to awe Yaqui braves; big force assembling.

San Diego Union, June 18, 1915, 1:6. Manager says '49 Camp games are lawful; S. A. Burnside, head of popular Isthmus attraction, placed under arrest.

San Diego Union, June 19, 1915, 4:1. EDITORIAL on value of Exposition as seen after the first six months: The chief value of the Panama-California Exposition, now in its sixth successful month, it constantly becoming more apparent. When the enterprise was first planned, many persons doubtless expected that the main advantage that San Diego would derive would be only that which comes to any city from the presence of many thousands of visitors. It will probably be conceded that most other expositions have been arranged largely for the purpose of drawing a crowd, and success has been measured mainly by the attendance. San Diego has had the crowd --- has it still, and presumably will have it during the remainder of the year. But the city has received even a greater benefit than that resulting from the presence of so many visitors from the outside world, welcome though they are.

The inestimable advantage of the Exposition to San Diego is the advertising that the city has received and is receiving from that uniquely beautiful display at Balboa Park. During the period preceding the opening of the great Fair, earnest efforts were made to let the rest of the country know all about the ambitious project that had been undertaken here. The results were very gratifying, but the real advertising of the Exposition and San Diego has come since the opening on New Year's day. During the months that have elapsed, there has been no occasion to attempt much "publicity work." Voluntarily and without solicitude the press of the country has paid warm tribute to the beauty of the Exposition, the attractions of San Diego and the courageous enterprise that made so superb a fair possible. To reproduce all the kind things that have been published on this topic would be beyond the capacity of most newspapers, and **The Union** has not attempted that task, contenting itself with printing from time to time the more notable articles appearing in other journals. And the field from which the selections have been made may be said with truth to be country-wide.

Of course, one of the immediate results of this unsought publicity is to swell the throngs of Exposition visitors, already more numerous than even the most sanguine San Diego resident had ventured to expect. But there will be other results and probably they will be the more important ones with respect to the ultimate value of the Exposition. For the advertising that this city is now receiving is not of the ephemeral kind. It places San Diego permanently on the map, and long after the Exposition shall have become a thing of the past the people of the entire country will remember this city. Thus viewed, it will be seen that the Exposition will prove of far more value to San Diego than that which is measured by gate receipts, large though they have been.

In what is here said there is no purpose to minimize the temporary advantages resulting from the Exposition. They are very great. San Diego is crowded with visitors and is trying to treat them so nicely that they will be pleased with the city and its people. And it must not be forgotten that this throng of sightseers is here at a time when, owing to depressed conditions everywhere, San Diego could not expect many visitors from the outside world were it not for the attractions of the Exposition.

So when one notes the present and prospective value of that enterprise, there appears good reason for congratulations over the courage shown by the people of this city in carrying to success a project that is doing much and promises to do much more for the benefit of San Diego.

San Diego Union, June 19, 1915, 12:3. Jury to decide '49 Camp case; plea of not guilty entered by S. A. Burnside, manager.

San Diego Union, June 19, 1915, 12:4. Exposition is Mecca for stream of excursionists; Orange County motorists to arrive June 24; seven hundred and fifty realty men due June 27; one hundred and forty six New York scribes coming; Cleveland Athletic Club will be among visitors.

San Diego Union, June 20, 1915, 2:6. Governor Spry of Utah to visit Exposition July 17; four hundred High School cadets and band will accompany executive.

San Diego Union, June 20, 1915, 3:2. Spanish troubadours to stage love fiesta; Salamanca students will participate in carnival next Thursday night; nine new musicians, all men and experts at mandolin and guitar to arrive tomorrow.

San Diego Union, June 20, 1915, 3:6. Realty men ready to greet 3,500 delegates; President O. W. Cotton of San Diego Realty Board appoints entertainment committees; visitors coming Sunday.

San Diego Union, June 20, 1915, 5:2. Former Senator Clark of Montana, president of Salt Lake Route and donor of Montana Building visits Exposition and tells of benefit to Montana.

San Diego Union, June 20, 1915, 10:5. Governor George W. Clarke of Iowa to visit Fair today.

San Diego Union, June 20, 1915, 10:5. July 1 will be Christian Endeavor Day at the Exposition.

San Diego Union, June 20, 1915, 10:5. Dr. George Andrews of Oberlin College, middle-west organist, to play at Exposition Wednesday and Thursday afternoons.

San Diego Union, June 20, 1915, 10:5. Exhibit and County buildings open today; visitors unable to see Fair during week will be favored.

San Diego Union, June 20, 1915, 12:1. Three lively days to mark July 4 celebration; peace program arranged.

San Diego Union, June 20, 1915, Classified, 1:2. Schumann-Heink to keep word; diva to sing for children; program at Fair Wednesday.

San Diego Union, June 20, 1915, Classified, 2:4. Fair officials suggested to control San Diego's Natural History Museum, by Surgeon G. C. Thompson: The urgent need at present is that the community begin to formulate ways and means that will have in view the proper upkeep and maintenance of these collections as the nucleus of a museum of natural history.

San Diego Union, June 20, 1915, Classified, 8:1. Orange County boosters visit Exposition; San Bernardino County delegation guests at luncheon; dancing party given; 100 northern visitors praise Fair.

San Diego Sun, June 21, 1915, 6:1. Emma Goldman heard by many; refuses to predict end of war; scores some so-called Christians; no disturbance.

San Diego Union, June 21, 1915, 3:2. Former Secretary of State Bryan and President Wilson can work for peace unhampered, says Senator James D. Phelan of San Francisco.

San Diego Union, June 21, 1915, 3:6. Mrs. Helen J. Tilden, former resident, presents art works and curios of Orient to San Diego; Smyrna rug 500 years old; a home for gifts will be made at Exposition.

San Diego Union, June 21, 1915, 5:4. Emma Goldman leaves after three speeches; anarchist lecturer and editor speaks at Brotherhood Hall; her subject was "Ibsen's *Enemy of the People*" in the morning, "Frederick Nietzsche, "The Storm Center of the European War" in the afternoon, and "The Limitation of Offspring" in the evening.

"Nothing Nietzsche ever wrote could be held responsible for such a war," said the speaker. "He would have seen in the present war only a blood-stained reaction to nationalism and barbarism. Superman of Nietzsche was not of the type of Bismarck or the German emperor, but a superman of the spirit, of character and of mind."

San Diego Union, June 21, 1915, 7:1. Governor George W. Clarke of Iowa in San Diego to see Fair; Cavalry and Marines will form escort for prominent visitor; luncheon and program at Exposition today will feature stay.

San Diego Union, June 21, 1915, 12:2-3. Mission Cliff Garden's rare beauty captivates June King, New York writer of tales for American tots.

San Diego Union, June 21, 1915, 12:5. Treasures in art become part of Fair exhibits; far eastern studies by Christoph D. Paulus, German sculptor, secured for Exposition; striking terra cotta figures shown: statuettes and groups have been installed in the choir gallery of the Fine Arts Building in the Quadrangle; some portrait busts by noted genius shown at Kansas Building.

San Diego Union, June 22, 1915, 7:2-4. *Clansman* shown in San Diego to wild cheers.

San Diego Union, June 22, 1915, II, 1:2-4. Governor George W. Clark, Iowa executive Fair's guest says the Hawkeye State seems to be solid for Senator Albert Baird for the presidency in 1916.

San Diego Union, June 22, 1915, II, 1:3. Exposition seeks William Jennings Bryan for speech on peace; invitation expected.

San Diego Evening Tribune, June 23, 1915, 2:2-3. Thousands to hear Mme. Schumann-Heink

San Diego Sun, June 23, 1915, 1:2-3. Songbirds to hang heads as Mme. Schumann-Heink sings for the little folk.

San Diego Union, June 23, 1915, 3. Mayo Indians on warpath; Americans menaced; 200 foreigners in danger as Redskins plunder Sinaloa town; appeal for protection sent to Washington; Yaqui Valley situation improved says Admiral Howard at Guaymas.

San Diego Union, June 23, 1915, 3:2-3. Schumann-Heink happy; tots to hear diva tonight.

San Diego Union, June 23, 1915, 7:3. Governor of Virginia Henry Carter Stuart to arrive July 13; Old Dominion's executive is nephew of General "Jeb" Stuart, famous Confederate Cavalry chieftain.

San Diego Union, June 23, 1915, 7:4. Dr. Karl Much, conductor of the Boston Symphony Orchestra, visits San Diego.

San Diego Union, June 23, 1915, 7:4. Before the end of the week it is expected the Varied Industries building will have been equipped with a novel display of recently invented photographic appliances by the Simplex Photo Products Company of Morris Park, Long Island; 800 pictures taken with single loading; midget camera probably will be featured.

San Diego Union, June 23, 1915, 7:5. A Mardi-Gras has been planned for Exposition Saturday evening; prizes aggregating \$100 will be given for the best costumes in the different classes.

San Diego Evening Tribune, June 24, 1915, 1:8 Article by Evan Bird Bosworth --- 25,767 at Fair last night; the writer was most impressed by Schumann-Heink's singing of "Dawn in the Desert" by Gertrude Ross; "Into this Mme. Schumann-Heink put her very soul and it gripped the heart strings and held them taut."

San Diego Evening Tribune, June 24, 1915, 3:1-3. Big demand for dusters and girls Saturday; Exposition Carnival free to "lady friends" Saturday night for jolly Charley Chaplin party; an occasion for all the amateur Charley Chaplins in the city.

San Diego Evening Tribune, June 24, 1915, 3:3. Big mid-week crowd to dance; tonight is ladies' night at the dance pavilion.

San Diego Evening Tribune, June 24, 1915. Elks to boost the Exposition; train will leave from Los Angeles the evening of July 14 and on July 15 the Elks will hold a parade of their own.

San Diego Evening Tribune, June 24, 1915. Naval militia leaves Monday morning to be gone until after July 4.

San Diego Herald, June 24, 1915, 1:1-4. Emma Goldman's arrival and stay did not create excitement, by C. R. Miller.

San Diego Sun, June 24, 1915, 3:2. 20,000 hear Mme. Schumann-Heink sing at Spreckels Organ; It was THE EVENT of the exposition year.

San Diego Sun, June 24, 1915, 7:1. Many visitors coming to Exposition; Saturday will be North Dakota Day and Brooklyn Day in honor of visitors; Sunday designated Billie Burke Day, in honor of actress appearing at Spreckels Theater; Monday will be Mrs. H. A. Beech Day for the well-known musical composer.

San Diego Union, June 24, 1915, 1:3. Mexican troops in Yaqui Valley; landing of American Marines to protect foreigners considered unnecessary.

San Diego Union, June 24, 1915, 1:2, 2:2-3. Thousands lift voices with Schumann-Heink in *Star Spangled Banner*; magnificent tribute paid: The greatest contralto in the world faced the greatest crowd in her history at the greatest musical event in the history of San Diego and the Pacific coast when Mme. Schumann-Heink, beloved of and claimed by every man, woman and child in San Diego County, stepped out on the broad platform of the Spreckel's organ pavilion at the Exposition last night, before a multitude of twenty thousand persons.

As the great singer faced her audience, a road of applause thundered from twenty thousand throats; twenty thousand pair of hands clapped their hardest and twenty thousand pair of eyes were fastened on the jolly, smiling figure, who was there only waiting for the tumultuous greeting to subside, in order to sing to the children in the city she loves.

What Mme. Schumann-Heink saw was a veritable sea of upturned faces, stretching back as far as the eye could reach, and on every face the features of which she could distinguish, a smile in which welcome and anticipation were commingled.

The Plaza de los Estados, the Via de Panama as far back as the Sacramento Valley Building, the Via de los Estados, both peristyles of the music pavilion --- in short, every available inch of ground, pavement, lawn, coping, was occupied by human beings. There wasn't an unoccupied spot big enough to accommodate the smallest human being alive. Directly in front of the platform, which was draped with American flags, were hundreds of children, packed in so closely that they could scarcely move, but every one of them eagerly awaiting the fulfillment of the promise Mme. Schumann-Heink had made to sing to them. Behind them and to each side of them were still more children, scattered among the adults. There were children everywhere and none said them nay, for they were there at the prima donna's invitation, and that was enough authority for anyone.

As Mme. Schumann-Heink saw the multitude before her, she stepped forward quickly and held out her arms to them in greeting and the tears came to her eyes as the wondrous ovation, for those shouts and cried carried more plainly than any words the measure of love which San Diegans feel for their greatest citizen --- their own Schumann-Heink.

With the first note of the organ accompaniment to the diva's first number, the beautiful recitative and aria from Mendelssohn's "Saint Paul," the tumult died and when the first note came from that golden throat a great quiet fell upon the vast audience. "But the Lord is Mindful of His Own," was what Schumann-Heink sang to her friends and children. Her wonderful voice rang out pure and sweet, carrying above the great tones of the organ so clearly that even loiterers on the Cabrillo Bridge, more than a quarter of a mile away, could hear her voice.

The next number was the beloved Nevin's "Rosary," sung with all the depth of feeling at the singer's command. This song was given with piano accompaniment, played by Toni Hoff, and, in the next number, the beautiful aria, "My Heart at Thy Sweet Voice," from Saint-Saen's "Samson and Delilah," both piano and organ joined.

After each song flowers were showered upon the singer and the crowd gave vent to its approval in thunders of applause. At one time six little children, each struggling under a floral burden almost bigger than himself or herself, came out on the platform and laid their offerings at her feet. And as this wonderful woman hugged and kissed all of them, and turning threw kisses of welcome to the crowd in front of her, another roar of applause from the throats of her legion of admirers.

But it was in her second group of songs that Mme. Schumann-Heink pleased her audience the most, for her selections were the really human songs that appeal to everyone. There was Schubert's "Die Forelle" (The Trout); Brahms's beautiful "Wiegenleid" (Cradle Song); "Heimweh" (Long for Home) by Hugo Wolf, one of the singer's favorite songs; and the comic seventeenth century German folksong "Spinnerliedecken." Had there been any doubt as to Mme. Schumann-Heink's earnestness, her singing of "Heimweh" would have dispelled it. Her glorious voice thrilled with feeling, and, as she sang the closing phrase, she stepped forward to the edge of the platform and held out her arms, pouring out in melody her love and longing for her own San Diegans. And in the "Spinnerliedecken," so well did the artist convey to her hearers the meaning of her song, which was given in German, that the children near her burst into laughter as she sang to them of the little Dutch girl who would spin for no less a reward but the promise of a lover. An encore, the beautiful German folksong, "Lovely Night," was sung.

In her last group of songs, Mme. Schumann-Heink paid some attention to the grownups, picking her numbers for their dramatic quality. The first number was "Dawn in the Desert" by Mrs. Gertrude Ross, a Los Angeles composer, who is familiar to San Diegans. This was followed by Mary Turner Salter's "Cry of Rachel," one of the most stirring songs ever penned. Both of these Mme. Schumann-Heink sung as they seldom have been sung, with tremendous feeling and impressiveness. The closing number was Bizet's "Agnus Dei," with violin obligato by Mrs. Frieda Fonte Chapman of this city.

Dr. Humphrey J. Stewart, the official organist, opened the program by playing Schumann's "Birthday March" on the great organ in honor of the natal day of President G. A. Davidson of the Exposition. Later he played Handel's "Largo," "Cradle Song," and "Evening Bells" by MacFarlane; Ravina's "Adoremus," and the "Triumphal March" by Benedict.

At the conclusion of the scheduled program, the children crowded about the platform, giving three rousing cheers for Mme. Schumann-Heink, who promptly came out and asked them to join her in singing "The Star Spangled Banner." Not only the children, but the vast audience lifted their voices in the national anthem. And after more cheers and applause, which kept the great singer busy for some moments bowing acknowledgments, the crowd slowly departed.

"It was positively the greatest tribute I have ever received in my life," declared Mme. Schumann-Heink after the concert. "I am certain no singer ever had a greater inspiration, for I was singing to my children, all of them, my grownup boys and girls, as well as my little children. And I am as happy as it is possible for me to be. It was all for my San Diego."

San Diego Union, June 24, 1915, 2:1-2. Home city ovation touches heart of contralto; glorious to sing for townspeople, diva says; "I love them all," by W. C. Getty.

San Diego Union, June 24, 1915, 5:5. Hundreds coming to Fair Saturday; Brooklyn Eagle party, North Dakota governor, others will be guests.

San Diego Union, June 24, 1915, II, 1:1. Exposition gates will open free for women; fair ones to be admitted without charge after 6 p.m. Saturday; many prizes offered; numerous catchy impersonations, costumes among carnival plans.

San Diego Union, June 24, 1915, II, 1:1. George Whitefield Andrews of the Oberlin Conservatory of Music to be heard at organ this afternoon.

San Diego Union, June 24, 1915, II, 1:1. Exposition traffic aids Canadian Pacific Line.

San Diego Union, June 24, 1915, II, 1:1. Farmer Burns arranges big boxing carnival at the Isthmus Saturday night.

San Diego Union, June 24, 1915, II, 1:5. With the arrival of W. R. Mills, general advertising agent of the Great Northern Railway, with J. W. Phelan, agent for the road at Los Angeles, the likelihood of a spectacular northern Indian festival at the Exposition in August became almost a fact.

San Diego Union, June 24, 1915, II, 14:1. Elks will boost Fair in north next month; big delegation slated for annual convention at Los Angeles; Exposition to send pretty dancers with local antlered herd.

San Diego Union, June 24, 1915, II, 14:3. South American surgeons coming; many delegates to convention in San Francisco will visit San Diego Exposition.

San Diego Union, June 24, 1915, II, 14:4. Georgia autoists end long trip to Exposition; tourists' car has refrigerating system, electric lighting outfit; journey lasts 56 days.

Park Commissioners Minutes, June 25, 1915. Carleton M. Winslow appointed architect and inspector of comfort station to be erected in the northwest section of Balboa Park; to be paid \$60.00 for his services.

San Diego Sun, June 25, 1915, 1:7-8. '49 Camp is in hands of jury; attorney for camp says it is an "atmospheric demonstration"; prosecutors hold it is gambling pure and simple.

San Diego Sun, June 25, 1915, 9:3-4. Isthmus Carnival at Exposition tomorrow night; Washington Negro sextet to perform; prizes for impersonations and costumes; endurance dancing at dance pavilion.

San Diego Sun, June 25, 1915, 9:1. Christian Endeavor Convention in San Diego tomorrow; program at Stadium and in churches.

San Diego Union, June 25, 1915, 3:5. Real Estate Day at Fair planned for Monday.

San Diego Union, June 25, 1915, 8:3. Old Fashioned Rag Party will be feature of Fair carnival Saturday night; cash prizes; scores pledged for fiesta.

San Diego Union, June 25, 1915, 8:5. Orange County guests to be honored at Fair today: President Davidson and Spanish troubadours will form escort for visitors.

San Diego Union, June 25, 1915, 8:6. Mrs. Jessie C. Knox in charge of the potpourri rose garden at the Exposition announced yesterday the completion of a small building at the rose garden where potpourri will be sold.

San Diego Union, June 25, 1915, Classified, 1:1. Governor Arthur Capper of Kansas to visit Fair next month.

San Diego Union, June 25, 1915, Classified, 1:4. '49 Camp trial on; witnesses fail to convince; ignorance of roulette admitted under defense's cross examination; player consults Hoyle; La Jolla testifies that gamekeepers refuse money for chips.

July, 1915, California Garden, 6. The Lath House: Owners of lath houses should visit the one at the Exposition (be careful to call it the Horticultural Building) and go through it inquiringly, that is with an idea of finding possibilities in planting. Naturally they will not grow huge *Araucarias* and bamboos in their lath houses, nor shall we after the Exposition is over in this big one, but it is very worth while to see what a size *Ciborium Schiedei* can make, also how the *Cyrtomium Falcatum* and *Rochfordianum* or holly ferns like to be out in the ground and with root space. Hunt up these ferns and also *Cymnogramma Sulphurea* and *Blechnum Occidentale* and see if you would not like a specimen. There are one or two very good *Aralia Elegantisima* and *Aralia Chabrierii*.

It is by no means uncommon to see plants in the ground in lath houses doing much less development than ought to be the case and this is frequently due to a lack of moisture that is not apparent on the surface. The owner will say, "I water every day," and probably does so, sprinkling by hand and getting a beautiful wet all around. This hand sprinkling is a delusion and a snare unless freely interspersed with a good soaking and this soaking is only possible in sandy, loose soil, unless the ground is periodically loosened down. Where the natural soil is of a heavy or easily compacted quality it would pay to haul in a more kindly medium, such as leaf mold, sandy loam and sharp sand in equal parts; this superimposed on a heavier soil will give good results with ferns and begonias and kindred growths. Drainage must be good and a sprinkling of charcoal added to above mixture might be a wise precaution.

Where growths are crowded, as is almost always the case in lath houses, frequent fertilizer should be given. If incorporated in the soil, it must be of non-heating kind, such as old cow manure, though liquid fertilizer seems to suit ferns. It cannot be too strongly emphasized that a lath house merely provides certain conditions of modified climate and not plant food and that the kind of things we plant therein require more water than ordinary outside residents of a garden.

Lath house evolution is proceeding rapidly, architecturally. It has gone from a chicken coop to a palace. In usage it has passed from a housing of nursery stock to a semi-tropical garden and now comes the lath house landscaping.

Though the Garden did not succeed in getting a lath house covering acres which could have been built for the cost of the elaborate Horticultural Building, such a one is bound some day to be in Balboa Park. It will have groupings of shrubs and plants, ferny nooks and fragrant arbors and the visitor to our city shall find it a place to walk and a place to talk, a garden with sunshine tempered to order, wind changed to a whispering zephyr, a garden of Eden without a serpent.

Let us be thankful for our Horticultural Building. With that title it could hardly be a true lath house, but let us think of ten acres under a lathed-in pergola, partly on the flat, partly going in steps down into a canyon, lighted cunningly as with fireflies, and let us think hard enough to bring the reality before some other place seizes the idea and reaps the reward of originality.

July, 1915, California Garden, 12. Picking and Peckings by the Early Bird: Ask the visitor wherein lies the charm of our Exposition, and the unfailing answer pays tribute to the harmonious building and planting scheme. To wander around among the things that are pre-eminently fit has a charm that all feel and acknowledge, and our Exposition should do for San Diego what years of tears and prayers could never have done, demonstrate the commercial value of just beauty and harmony. Beautiful as the Exposition is, it is only one and a small one of San Diego's diadem of jewels.

July 1, 1915, San Diego Union, 4:6, San Diegans plan to keep exhibits; museum association organized for preservation of displays in Exposition.

July 1, 1915, San Diego Union, 5:1. People's Chorus (200 voices) under direction of Willibald Lehmann will give a concert as the concluding feature of Christian Endeavor Day with the Spreckels Organ tonight.

July 1, 1915, San Diego Union, 9:1. Aerial fireworks purchased by Fair; elaborate pyrotechnic displays to be shown July 3-5: Contracts signed yesterday between the Panama-California Exposition and the Wilison-Los Angeles Fireworks Company, provide what will probably prove the greatest program of aerial fireworks entertainment ever attempted in Southern California.

Both daylight and evening displays have been arranged for the afternoon and night of July 3, and the afternoon and evening program of July 5. The afternoon programs are replete with spectacular pieces and will prove quite as entertaining as those to be used in the evening, according to officers of the fireworks concern.

At 8 o'clock Saturday night the tower of the California Building, the tallest in the city, will blaze forth in light and color for a period of twenty-five minutes. Another feature will be the lighting of the entire grounds by a set piece with a series of the brightest lights known to the ingenuity of man. The entire center of the Exposition will be lighted as though the sun were at the noon-day position.

"War," represented by an immense modern siege gun firing shells at a fort which finally falls under the tremendous fire, is another of the big events prominent for Saturday night. Festoons of jewels will be suspended from the sky, American eagles will spread their wings in the air, Niagara Falls with a torrent of silvery fire will fall from somewhere above and the evening will end with a representation of the opening of the Panama Canal.

Monday afternoon, another program of daylight fireworks will be given and Monday night another great pyrotechnic display will be given. Waterfalls, Jacob's ladder, mystic wheel, butterflies and roses, an aerial thunderstorm, a fan fire which will cover an acre of territory in the sky, silver _____ and many other equally spectacular sights will be shown.

July 1, 1915, San Diego Herald, 1:5. Exposition Notes: The largest crowd which the San Diego Exposition has entertained since the opening night New Year's Eve surged through the tree gates to the Fair on a balmy evening of last week and crammed every available inch in the Plaza de Panama and the Plaza de los Estados, to hear the first of the summer evening recitals by Mme. Ernestine Schumann-Heink, the great contralto whose country place lies just east of the city of San Diego.

Mme. Schumann-Heink is extremely popular in Southern California, where she has lived for a good part of the time during recent years, and was accorded a great reception by the schoolchildren of the city early in the spring on her first visit to the Exposition. At that time she assured them that she would be back in June and would give a full evening's concert for them. When her arrangements were completed she informed the Exposition that she was asking only one favor, namely, that every child under sixteen be

admitted to the grounds free. The request was granted and the youngsters made up fully twenty percent of the enormous crowd which attended the recital.

In addition to the people seated in the Plaza de los Estados on benches and along the curbs of the Esplanade and standing on lawns and pavements, the roofs of the nearby buildings, even of the peristyles of the organ itself, were loaded down with people.

July 1, 1915, San Diego Sun, 14:4. La Jolla playground to open Saturday.

July 1, 1915, San Diego Union, 19:1. Odd Fellows due tomorrow for three days fun.

July 2, 1915. Board of Park Commissioners, Minutes: Secretary to advise Order of Panama that mounted cavalry would not be permitted on Stadium field, as such exhibitions will tear up the field.

Commissioner Ferris said Board did not have sufficient funds to purchase the animals at Wonderland Zoo, but said Board would accept the animals, or any part of them, if the cost of moving them to the park and one year's maintenance should be included; Recommendation accepted.

July 2, 1915, San Diego Sun, 1:3-6. 5:7-8. Three-day celebration of Independence Day, Saturday, Sunday and Monday; 3 p.m. Saturday - display of fireworks at north end of Alameda, spectators to be in tractor field; 8 p.m. - polytechnic illumination of tower of California Building; 9 p.m. - night fireworks; Sunday, July 4, 3 p.m. - Tiny Broadwick leaps from an aeroplane at an altitude of 3,000 feet and alights in tractor field; Monday, July 5, 2 p.m. - Children's "Spirit of '76" parade from Pepper Grove to Plaza de Panama; 3 p.m. - Tiny Broadwick makes leap; 8 p.m. - grand illumination of El Prado, Calle Cristobal, Alameda, Calle Colon and Isthmus; 8:30 p.m. - fireworks, north end of Isthmus.

July 2, 1915, San Diego Union, 1:6. One million persons visited Exposition in the first six months; during June, 166,135, a daily average of 5,537 persons.

July 2, 1915, San Diego Union,, 6:2. Tiny Broadwick to leap from sky: Interest which the public displays in aeronautical events, particularly when one is fraught with an unusually spectacular feature, was established yesterday when the Exposition was besieged with inquiries regarding the time at which Miss Tiny Broadwick, the daring young aviator, will give her demonstration of the aerial life preserver invented by Charles Broadwick, her father.

Conferring with the Exposition yesterday, Miss Broadwick announced her willingness to make these demonstrations at any time of the day or night, again expressing implicit faith in her father's invention to carry her safely to the ground after she leaps from the aeroplane at a high altitude. Considering that this feat can be seen better by visitors during the day, the two demonstrations were set for 2 o'clock Sunday afternoon and 2 o'clock Monday afternoon. Each will be held on the big tractor field around which there is a great amount of space where spectators can stand and get a good view of the performance.

Oscar A. Brindley, government Aero instructor at North Island, will pilot the aeroplane from which Miss Broadwick will leap.

Miss Broadwick does not appear worried or concerned about the hazardous feats confronting her at the Exposition Sunday and Monday afternoons. As she discussed the workings of this aerial life preserver yesterday, not a word which might indicate fear was in her conversation.

"To tell the truth," said the daring young woman, "I feel just as much at home jumping out of an aeroplane with my father's life preserver as I would if sitting on the front steps. Of course, one must understand aeronautics to a certain extent to perform such a feat successfully, but I have had experience, and I know it is impossible for the device to fail. The exhibitions which I gave at North Island for army officers convinced me thoroughly of the dependability of the preserver.

“In the demonstrations of Sunday and Monday, I intend to jump from a much greater distance than I have ever done before, as I want to demonstrate thoroughly to the public that the dangers of aviation will be greatly reduced through use of this device.”

July 2, 1915, San Diego Union,, 8:1. 2,000 Odd Fellows ready to parade tomorrow.

July 2, 1915, San Diego Union, 8:3. Diamond Jim Brady here to see Exposition; New York bachelor rose from messenger boy to millionaire.

July 2, 1915, San Diego Union,, 9:2. Christian Endeavor delegates hold sport events at Fair and listen to People’s Chorus.

July 2, 1915, San Diego Union, 11:7. Governor Samuel Ralston of Indiana to visit Fair today.

San Diego Sun, July 3, 1915, 9:1 and July 7, 1915, 12:1-4. \$180,000 gift of Miss Ellen Scripps includes community house, tennis courts, swimming pool.

July 3, 1915, The Survey: SAN DIEGO: The Panama-California Exposition and the Changing Peoples of the Great Southwest, by William Templeton Johnson (photos)

Caption: Temple of Chichen-Itza (Yucatan) from a Painting by Carlos Vierra: Here once flourished a civilization and community life comparable to that of ancient Babylon, but which died centuries ago.

Caption: New Mexico Building After the old Spanish Mission of Acoma

Caption: Indian Arts Building

Caption: A Section of the Fine Arts Building

Caption: The Prado – The early history of California, Arizona and New Mexico is linked indissolubly with that of Spain. In the architectural scheme at San Diego here is a building that seems to suggest the Casa de Monterey at Salamanca, there, the belltowers and simple contours of a California mission.

Now that San Diego has become “the first port of call” in the United States for vessels passing through the Panama Canal, it is interesting to go back a step and remember that in 1769, Fra Junipero Serra founded on the shores of San Diego bay the first white man’s settlement in California. From that time the town has gone through many vicissitudes, but is now a fast-growing community of about 80,000 people, built on a hillside overlooking an almost landlocked harbor. The people of San Diego have shown great courage and enthusiasm in building a five million dollar exposition with the resources at their command, as about three-fifths of the amount has been raised in the city and county of San Diego.

The San Diego Exposition, or as it is officially called, the Panama-California Exposition, is not in the strictest sense international in scope. It is rather a record in history, civilization and attainment, of the great southwestern portion of the United States. It is small, compact, *intime*, and has an atmosphere of restful harmony in architecture and planting which no other exposition has ever possessed.

The site of the exposition is Balboa Park, a high, nearly level plateau diversified by deep canyons, and lying less than a mile from the center of the town. It commands a superb view of the surrounding country, with range after range of mountains to the east and south stretching far down into Mexico where the flat top of Table Mountain is easily recognized. The city and the bay are below in the immediate foreground; then Coronado Beach and the Pacific Ocean with the sharp outlines of the Mexican Coronado Islands on the horizon. Something of the historic and architectural setting of the exposition should be set down before taking up those phases of special interest to the students of social life and customs of the changing peoples of the Southwest.

The early history of California, Arizona and New Mexico is linked indissolubly with that of Spain. Nearly a hundred years before the Pilgrims landed at Plymouth, Coronado and his little band of adventurers pushed up the Rio Grande valley, probably as far as Colorado. Cabrillo explored the coast of Lower California and sailed into San Diego bay. The Dominican and Franciscan Fathers underwent frightful hardships in founding their missions in the barren wastes of Lower California; but from 1769, when the devout Serra and his fellow-priests planted the great cross on the shore of San Diego bay, their troubles, except for raids by the Indians, were nearly over. In a few years twenty-three missions had been founded stretching from San Diego to the shores of San Francisco bay. The land fulfilled its promise and under the care of the Fathers brought forth crops in measure beyond their dreams, --- a land which is aptly described in the inscription on the base of the dome of the California State Building.

TERRAM FRUMENTI HORDEI AC VINEARUM IN QVA FICUS ET
MALOGRANATA ET OLIVETA NASCUNTUR TERRAM OLEI AC MELLIS.

With such a background, the choice of Spanish Renaissance architecture for the fair buildings was peculiarly appropriate, not only because of historical associations and because of the climate of southern California is in many respects similar to that in parts of Spain, but particularly because Spanish Renaissance architecture, with its gaiety and freedom, is wonderfully adapted to exposition buildings.

The general plan and scheme of architecture for the buildings was entrusted to Bertram G. Goodhue of New York.

July 3, 1915, San Diego Union, 1:5-6. Exposition to shatter attendance mark today; thousands of Odd Fellows, Imperial Valley delegates and others will invade Fair grounds as July 4th celebration begins.

With the arrival of about 3,000 Southern California Odd Fellows, several hundred members of the National Editorial Association, a large delegation from Imperial Valley for the celebration of Imperial Valley County Day and the beginning of the festivities in honor of the Fourth of July, it is predicted the Exposition will set a new attendance record.

One of the biggest events of today's celebration will be the parade of Odd Fellows which will form at Lower Broadway and march to the Laurel Street entrance of the Fair via Sixth Street. The parade will be led by the Pacific Electric band, which has been engaged for the three-day's celebration, the Pomona band, and the Santa Ana band. At the Plaza de Panama, Mayor E. M. Capps will welcome the visitors to the city and President G. A. Davidson will welcome them to the Exposition.

The next event of importance will be at noon at the Southern California Counties Building, where 20,000 cantaloupes will be given away as an advertisement for Imperial Valley. At noon the Cristobal Café will be crowded, for the members of the National Editorial Association will be guests of the Exposition at luncheon, and scores of Odd Fellows and their friends have reserved tables.

Between 1:20 and 5:00 in the afternoon the Pacific Electric and Pomona bands will entertain with concerts at the Plaza de Panama. The usual organ recital by Dr. Humphrey J. Stewart will also be given.

All Southern California cantons of Odd Fellows have entered the competitive drill contests, which will be held during the afternoon at the Plaza de Panama, and which will be judged by U.S. Army officers. At 3:00 p.m. a display of daylight fireworks will be given at the north end of the Alameda. Provision has been made for spectators on the tractor field.

The feature of the evening's entertainment will be a great open-air ball to be held at the Plaza de Panama. Some time during the event President Davidson will present the winning drill team of Odd Fellows with its prize. Band concerts will be held on the Isthmus between 7:30 and midnight.

At 8:00 p.m. the pyrotechnic illumination of the tower of the California Building will be given, after which a display of fireworks will be given at the north end of the Alameda. A feature of the fireworks program will be a cruise of the warship *San Diego* to the first port of call. This spectacular piece is 500 ft. in

length and the makers claim it will prove one of the most stupendous undertakings of the kind ever attempted.

Today's program includes amusements of every kind, and members of the special events committee believe they have formulated one of the best programs of the year.

As is well known, the Independence Day festivities extend over a period of three days --- today, Sunday and Monday. The biggest feature of the Sunday afternoon program will be the leap from an aeroplane at an altitude of 3,000 feet by Miss Tiny Broadwick in her aerial alighting device. At 4:00 p.m., Ellen Beach Yaw will be the soloist at the daily organ recital. She will give another concert at 8:00 p.m.

Monday, Miss Tiny Broadwick will repeat her trick from an aeroplane, a children's parade of the "Sprit of '76" will be held on the grounds of the Exposition; there will be the usual band concerts and organ recitals, the day to be concluded with another but entirely different program of fireworks.

Visitors are flocking to the city from all parts of the West and it is predicted that by tonight every hotel in the downtown district will be crowded.

July 3, 1915, San Diego Union, 2:1. 2,000 schoolchildren will participate in Spirit of '76 parade tomorrow; \$150 in currency offered in prizes; free admission to Exposition promised for children in costume; hundreds of youngsters selected as bearers of huge American flag; parade leaves Pepper Grove at 2 p.m. and marches to the Plaza de Panama where it will be reviewed by society women of city standing on steps on Sacramento Valley Building.

July 3, 1915, San Diego Union, 3:4. Governor Samuel E. Ralston of Indiana was guest of Exposition.

July 3, 1915, San Diego Union, 16:1. 400 editors here to see Fair and Southland.

July 4, 1915, Los Angeles Times, III, 4:1-4. Susie and Alma at San Diego: They see the adorable army of Adonises, the Spanish dancers and the Fair, by Alma Whitaker.

July 4, 1915, San Diego Union, 1:3, 6:2-4. Multitude celebrates at Exposition; 20,000 valley melons melt before clamorous throng; distributed in patio of Southern California Counties Building; celebration started with parade by more than 3,000 Odd Fellows from Lower Broadway to Exposition site; more than 15,000 persons passed through gates last night to see the first display of fireworks at the tractor field.

July 4, 1915, San Diego Union,, 7:1. Exposition to honor Charles Wakefield Cadman on Tuesday.

July 4, 1915, San Diego Union, II, 15:1-2. 20,000 Imperial Valley cantaloupes were given away at Exposition in honor of Independence Day celebration.

July 5, 1915, San Diego Sun, 3:1-2. What is "propaganda" Park Board asked; open forum members address letter to public; want to know how those in charge will make ruling if such men as Bryan or Roosevelt should want to speak at amphitheater; controversy is on; at meeting last Friday the Park Board ruled that there should be "no propaganda" in the Stadium.

July 5, 1915, San Diego Sun, 3:3. Crowds leaving after holiday; yesterday's attendance estimated at 25,000.

July 5, 1915, San Diego Sun, 9:5. Cadman Day tomorrow in honor of Charles Wakefield Cadman, American composer; Princess Tsianina, American Indian princess, will sing his songs.

July 5, 1915, San Diego Union, 1:5-6, 2:4. Million mark passed in Fair attendance; great crowd surges through Exposition gates without cessation; attendance estimated about 17,000; day started with Spanish troupe program; band concert at Plaza de Panama by Fourth Regiment U.S. Marine Corps at 10 a.m. and 1:30 p.m.; Tiny Broadwick leaped from aeroplane at an altitude of 2,500 feet at 2:30 p.m. at tractor field; Ellen Beach Yaw gave recital at organ pavilion at 4 p.m. and another recital in the evening.

July 5, 1915, San Diego Union, 3:5. Summer school will open at Exposition; development of South American republics to be shown; Spanish courses planned; Professor P. A. Martin of Stanford University to lecture on South American history.

July 5, 1915, San Diego Union, 14:1. Cincinnati Chamber of Commerce Board due in San Diego July 15 to visit Fair.

July 6, 1915, San Diego Sun, 1:4. Attendance at Exposition is 61,434 in three days; Saturday, 14,975; Sunday, 19,037, the biggest days since opening when 27,422 passed through turnstiles.

July 6, 1915, San Diego Union, 1:8, 7:2-3. 25,000 people celebrate holiday at Exposition; children's parade draws crowd; girl leaps from aeroplane to safety, 3,000 ft., while throng watches performance; daylight fireworks prove big novelty.

July 6, 1915, San Diego Union, 6:2-3. 1,000 people from Escondido join throngs at Exposition; Judge Daney speaks in glowing terms of Sun-Kist-Vale opportunities and accomplishments; boosters wear Grape Day Button replicas.

July 6, 1915, San Diego Union, 7:1. Stream of trains bear thousands from city; Santa Fe incoming passengers for three days estimated at 19,000; ships bring 1500 visitors to celebration.

July 6, 1915, San Diego Union, 8:2. Fair will honor Charles Wakefield Cadman today.

July 7, 1915, San Diego Union, 3:4. Brazilian exhibit opened; description of products; vast resources shown; tireless efforts of Dr. Eugenio Dahne obtain coffee, rubber and other products; animals and birds procured; drinks given away

A Brazilian exhibit in the Commerce and Industries Building, at the Panama-California Exposition, has been opened under the direction of Dr. Eugenio Dahne, who has been a tireless worker in his country for an exhibit at San Diego's Fair.

Dr. Dahne came to San Diego several years ago with Brazilian commissioners and for a time prospects seemed good for a Brazilian building at the Fair. This was later given up, and since that time Dr. Dahne has been trying to get an exhibit here. He has finally succeeded, and a large space in the Commerce and Industries Building has been devoted to Brazilian products, pictures, birds, live animals peculiar to that country, manufactured goods and matter pertaining to a country in which at the present time there is a great interest by Americans. The exhibit was open for the first time Monday and will continue, with Dr. Dahne in charge, until the close of the Fair.

Brazil is not represented at the San Francisco Exposition, and that it is represented at all at the San Diego Exposition is due entirely to the energy and perseverance of Dr. Eugenio Dahne, the former commissioner-general, representing the ministerium of agriculture, industry and commerce of Brazil in the United States and Canada.

War Hampers Plans

When the Brazilian congress last year decided that on account of the severe financial crisis and the failure to raise the loan the government was negotiating in Europe, on account of the outbreak of the war, Brazil could not afford at the time to be represented at either of the California Expositions, Dr. Eugenio Dahne, who had been working hard for several years to arrange for that representation, resigned from office and set to work to arrange a private Brazilian exhibit.

For this purpose he left for Brazil, via New York, on January 3 and returned a month ago. He succeeded in getting the government of the state of Sao Paulo to contribute a certain quantity of its best

coffee free. The government of Parana contributed about two tons of mate, the great Brazilian health tea. The rubber states of Para, Ohyaronas, Matto Gorrro contributed a quantity of rubber, and Rio Grande de Sul its products. Other products, curios, skins and live birds and animals Dr. Dahne brought on his own account to make his show more interesting..

Thus the Brazilian exhibit is not by any means an official government exhibit, nor does it represent but a small percentage of Brazil's enormous natural resources. It is entirely a private undertaking and an exhibit of a collection of interesting things from Brazil which Dr. Dahne was able to gather together in the shortness of time. Every praise is accorded to Dr. Dahne by the Exposition for his temerity and perseverance.

Great thought and taste was given to the arrangement of the exhibits, the fundamental idea being to impress the visitor with the manifold resources of Brazil, the great importance of some of them, and the interesting features and beauty of the country.

Thus, commencing in the north, there is the Amazon district, with its important rubber industry. One sees a wild jungle scene on the Amazon river, with a rubber-gatherer's two-story hut, the "Roosevelt cabin," covered with hunters' trophies and animals. There is a collection of the different kinds of rubber produced in Brazil, and photographs showing the processes of extracting and preparing the same.

Next is a collection of samples of fine cabinet woods, from the hardest to the softest, some of them beautifully grained.

This is complemented by a collection of nuts and fruit from the different palms and trees, bark and leaves. A miniature coconut plantation shows how the cocoa palms propagate and grow. A native basket, with great ground nuts, shows how the Brazil nuts grow in clusters inside the same. The most interesting, however, is the spaucai nut, a huge fruit containing about a dozen nuts. When green, a lid closes the bottom tight and holds the nuts in place. When the fruit is ripe, the lid dries up, contracts and falls out, allowing the nuts to fall to the ground.

Coffee Section Represented

The central part of Brazil, the "coffee" section, is represented by the state of Sao Paulo, which produces four-fifths of the coffee grown in Brazil and supplies two-thirds of the coffee consumed in the world. Large panels on the wall show how the coffee is grown, how it is picked, and how it is shipped, while all along the front of the counter and along the background stand long lines of the original bags with coffee as they were shipped at Santos.

On a neat little "deer" roaster, the original Santos coffee, pure, without blending, will be roasted fresh every day and served free every day, prepared Brazilian fashion over the counter from 2 to 5 o'clock p.m. every day. The same coffee, roast and ground, will be sold in packages to those who wish to take some home or send some to their friends. Over the coffee counter sits a pair of beautifully plumaged birds, the trogan or "coffee bird," which feeds on coffee berries and says that Sao Paulo coffee tastes best.

Next is the "mate" counter. Mate is the tea prepared from the leaves of a tree, the *ilex paraguavenases*. The only place in the world where this tree grows is in the states of Parania and Rio Grande de Sul and Paraguay. It is an exceedingly refreshing drink, not a stimulant like coffee or tea, but a clamant and an excellent tonic for indigestion and weak stomachs.

Drink Served Free

The Indians and the Gauchos, or cowboys of Southern Brazil, Uruguay, Argentina and Chile, use no other drink. And to judge by the fine, healthy-looking figure of the Gaucho in full Rio Grandiose cowboy costume, with rich silver trappings, that stands inside the counter, it certainly must be

invigorating and health giving. Mate will also be served free in cups to visitors every afternoon from 2 to 5 o'clock and sold in small packages.

Above the Gaucho hang several of the beautiful ponchos or shawls made in Rio Grande de Sul, and at his side stands a table made of the beautiful cabinet woods of Brazil.

Next to the mate are samples of cocoa and of the cocoa bean, grown extensively in the states of Bahia and Para, Brazil, the latter producing some of the finest quality.

Another most interesting product of the Ohuaron forest, as yet unknown in this country, is the guarana. The guarana is a bean or nut which grows, like the vanilla, on a creeper. The Indians collect and roast these beans and pound them into a pulp, mixed with water. Of the thick pulp they mold sticks which they let dry hard in the sun. To use it they grate with the rough bony tongue of the pirarcucu fish, about a spoonful of the stick into a gourd of water, which they drink.

It is a wonderful tonic to the system and no Indian goes without his stick of guarana, which enables him to endure the greatest fatigue. A firm in Para has lately undertaken to make an excellent effervescent drink from the guarana, very much in taste like tonic water, bottles of which are also on exhibit.

Above the guarana hangs a cigar of plug tobacco, about four feet long, wound around with fibers and bearing this card: "Cigar of plug tobacco made by the Indians of the Ohuaron and presented to Colonel D. C. Collier by his Brazilian friends in remembrance of the time when he smoked his way through Brazil." Suspended from the cigar are the little black clay pipes in which Indians smoke this tobacco.

Next are the foodstuffs, the most interesting of which is the maniok flour, one of the most important foodstuffs in Brazil. The maniok is a cultivated root, somewhat like a sweet potato, however with a very poisonous juice, containing much prussic acid. To remove this the roots are grated into a pulp, which is filled into long basket tubes. By pulling these, they contract and force out the juice. The pulp is then dried in hot pans and put into conical baskets. The maniok flour contains much starch and is very nourishing.

There are samples of arrowroot and of tapioca. Also of macaroni, vermicelli and noodles and cakes of fine chocolate made in Para.

An extensive collection of curios of all kinds, photographs, maps and books on Brazil, and live tropical birds and monkeys completes the exhibit, which is one of the most interesting and instructive in the grounds and does credit to its organizer, Dr. Eugenio Dahne.

July 7, 1915, San Diego Sun, 7:1. Councilman Schmidt wants city hall built in park facing Date Street: "We get the site for nothing and the location is the best in the City."; Assistant City Manager Bacon has drawn up plans for Mission-style building with court in center; Schmidt says erecting buildings would give employment to a number of men who are now idle.

July 7, 1915, San Diego Union, 7:2-6. Indian princess sings Charles Wakefield Cadman's compositions of tribal songs at recital, both were guests of Exposition, by W. B. Seymour.

July 7, 1915, San Diego Union, 7:6. Hotels overflow; homes opened to visitors; merrymakers spend \$250,000 during big celebration, estimate.

July 7, 1915, San Diego Union, 8:1. Motion pictures of Exposition were taken and sealed in a copper box to be held by the San Diego Historical Society for 50 years unopened when they will be shown as a reminder of the 1915 Exposition; motion pictures taken today under the direction of Lyman H. Howe, the largest producer of travelogue motion pictures in the country..

July 7, 1915, San Diego Union, 8:2. 61,414 pass through Exposition turnstiles during three-day celebration; July 5th has highest attendance with 27,422.

July 7, 1915, San Diego Union, 8:2. Hamlin Hunt of Plymouth Church, Minneapolis, Minn., will give organ recital today at Spreckels Organ.

July 7, 1915, San Diego Union, 8:2. Bishop Thomas J. Conaty of Los Angeles, who was a visitor at the Exposition yesterday, gave to the San Diego County Historical Society a square foot floor tile and burned bricks from the Mission San Diego de Alcalá.

July 7, 1915, San Diego Union, 8:3. Governor Henry C. Stuart of Virginia was guest of Exposition.

July 7, 1915, San Diego Union, 8:3. Wendell Phillips Dodge, editor of **The Strand Magazine**, a British publication, will be in San Diego within a few days to visit Exposition; will carry an illustrated article on Exposition in August or September number.

July 7, 1915, San Diego Union, 8:3. Tourists from South pour into San Diego; scores of New Englanders arrive to visit Fair.

July 7, 1915, San Diego Union, 8:3. Twenty-three tourists, traveling under the auspices of the Geographic Society of Chicago, arrived in the city yesterday.

July 7, 1915, San Diego Union, 8:3. The U.S. cruiser Chattanooga arrived in the port last night from San Francisco to take on 450 tons of coal before she steams to Mexican waters, Friday.

July 8, 1915, San Diego Herald, 2:2. At the Exposition.

July 8, 1915, San Diego Herald, 2. EDITORIAL: The Exposition: The Exposition, from the standpoint of beauty, attractiveness and uniqueness, is all that could be desired. During the first six months it did not draw the crowds that it was reasonable to expect and which its excellence justified. However, the last few days showed a marked improvement in the attendance, and while the original expectations will not be fulfilled, the Fair will be a greater success than the first months indicated.

Due credit should be given to the management for the successful manner in which the original plans for the Exposition were carried to a perfection never before attained at an Exposition. But it should not be forgotten that the stockholders, the men and women who furnished the money, are also entitled to consideration for the most important part they performed in furnishing the millions necessary to pay for work, material and supervision of the work during the time of construction.

The Exposition has already done wonders for San Diego by making it known in every hamlet of the nation, and from the publicity received the city has grown much faster than it would otherwise have done. This benefit has been general --- which the shareholders paid for and from which they derive no benefit such as shareholders in other enterprises are supposed to enjoy. As Expositions are for the community benefit, it places a burden on the shareholders which is out of proportion to their benefit.

Many of these shareholders are men and women who, to meet their payments, have deprived themselves of many comforts and some have even sacrificed the necessities. Would it not be a matter of justice that these shareholders should get some slight benefit from their investments? Some of them have

been so heavily taxed during these hard times they cannot afford the expense to enjoy a visit to the beautiful Exposition which their money made possible.

In this connection, we wish to suggest that passes ought to be issued to all shareholders for the balance of the Exposition year. No doubt, many of the shareholders, in addition to paying for their stock, have bought season tickets, but more of them have not because they could not afford it. None of the shareholders expect any dividends from their investment, and all would appreciate such courtesies as was extended to them in recognition of what they had done for the Exposition.

Of course, this courtesy would be most appreciated by those who cannot afford the cost of attending the Exposition as often as they desire. But even those who can afford the expense and have already bought their season tickets, would feel that it was a recognition of what they had done for the Exposition. It has been the policy of the management to discourage the given of passes, and, perhaps, wisely so. But furnishing season tickets to the shareholders is only furnishing them what they have dearly paid for.

Besides doing justice to the shareholders, it will really benefit the Exposition, as these shareholders will naturally induce some of their friends to go with them. And, as a crowd always attracts, the presence of so many people would induce others to attend the Fair, and all these people would spend more or less money with the concessionaires.

The Order of Panama has also done good work for the Exposition and members of the Order have borne all the expense of their part of the work. It seems to use that the Exposition management should also show its appreciation of this work by furnishing season tickets to all members of the Order of Panama. Not that they have done as much as the shareholders, but they have certainly done enough to be given recognition.

The management was no doubt right in preventing a flood of passes to be issued. But it is right to discriminate between those who have earned recognition and those who have not. The shareholders have no reason to hope for a return of any great part of the money they contributed to the building of the beautiful Exposition, so they are entitled to his much and even more.

July 8, 1915, San Diego Union, 2:2-3. Fair pictures to be shown in 50 years; San Diego children caught by camera; thousands throughout United States will see vies of Panama Canal and San Diego's marvelous city on hill; movies made under direction of Lyman H. Howe, producer of travelogue motion pictures.

July 8, 1915, San Diego Union, 2:5. Yuma Indian band of Fort Yuma, Arizona to give concert in Plaza de Panama tomorrow afternoon; boys in band will camp on grounds near marine barracks.

July 8, 1915, San Diego Union, 8:2. Richmond Light Infantry Blues will visit city and Fair July 15: The Richmond Light Infantry Blues Battalion, which will visit this city and the Fair, and will parade here 200 strong, is 124 years old and has a distinguished history. The famous organization will arrive July 15.

It took part in the War of 1812, in various insurrection excitements in quelling the John Brown raid, in the war between the states, and in the Spanish American War. It's distinctive full-dress uniform is admired everywhere. Major E. W. Bowles is in command. . . .

The uniform worn today consists of blue coat with white front shield buttoned on and wide cuffs and wide white stripes on the trousers.

The enlisted men wear white sheep tails and the officers have epaulets..

July 8, 1915, San Diego Union, 14:1. Marcella Craft, soprano, appeared in concert at Exposition; a Riverside girl; the day was designated "Marcella Craft Day."

July 9, 1915, San Diego Sun, 11:1. Mayor Capps studying question of whether the Stadium should be used for public meetings as well as athletic events.

July 9, 1915, San Diego Union, 4:2. Madame Montessori to speak at Exposition July 12: Dr. Maria Montessori, P. P. Claxton, U.S. Commissioner of Education and others well known in the world of education will speak at the Spreckels Organ Pavilion, July 12, which has been designated Education Day at the Exposition.

The famous originator of the system of education which bears her name will speak in Italian and will be translated to the audience as she speaks. Claxton is one of the biggest figures in educational matters in this country..

July 9, 1915, San Diego Union, 6:1. Dixie Rotary Club will visit Exposition July 16.

July 9, 1915, San Diego Union, 14:1. Magazines laud San Diego's Exposition; Elk's publication uses articles and pictures boosting Fair; St. Louis **Juvenile Paper** gives Magic City space in two issues; **Sunset** has article in July issue by Walter V. Woelke; **National Magazine**, published in Boston, has a six-page article in June number, headed "San Diego's Dream City, The Exposition Located in the Harbor of the Sun" by Joe N. Chappie; **National Elk's Horn** of St. Louis, June Souvenir Edition, contains article about Exposition by Norman Maynard Vaughn, publisher; article in California Edition of the **Pacific Coast Elks**, Los Angeles; article in June issue of **Photo Era** by Harold A. Taylor; article in June issue of **Agent's Bulletin**, issued by traffic department of Missouri Pacific-Iron Mountains; articles in four consecutive issues of **The Round Table**, a paper for boys, published at Saint Louis.

July 10, 1915, San Diego Sun, 2:3. Theodore Roosevelt to speak at Exposition; wires President Davidson he will be here July 26.

July 10, 1915, San Diego Union, 6:1. Noted Utah choir coming to Fair next week; Mormons raise \$20,000 for 200 singers' expenses on trip; 300 cadet expected; official says State will send 1,000 boosters on Exposition Day.

July 10, 1915, San Diego Union, 6:1. Warren D. Allen, Dean of Conservatory of Music, College of the Pacific, San Jose, California, will give first of his series of concerts at Organ Pavilion this afternoon at 4 o'clock.

July 11, 1915, Los Angeles Times, II, 2:4. San Diego to welcome herd; Friday to be Elks' Day at the Exposition; Program includes music, drills and parade; Mormon choir and Salt Lake City cadets to be attractions; San Diego delegation will don Spanish garb.

July 11, 1915, San Diego Union, 10:1. Samuel Travers Clover writes in praise of San Diego Fair in **Los Angeles Graphic**, a weekly publication: "With the exception of about twelve miles, the state highway is practically completed to the San Diego line, making the motor ride a joy, and one long to be remembered."

July 12, 1915, San Diego Sun, 6:1. Great week is begun; Madame Montessori and P. P. Clayton, U.S. Commissioner of Education, to speak today; July 13 is Virginia Day and Universalist's Day; July 14 is City of Buffalo Day; July 15 marks arrival of 400 Salt Lake City High school cadets; July 16 is Elk's Day and the Mormon Tabernacle Choir of Ogden, Utah arrives to give the first in a series of concerts; July 17 is Utah Day and Rexall Day in honor of 500 druggists from Boston.

Five hundred Universalists will arrive in the morning from the Pasadena convention and be entertained by members of the local Unitarian church and Pastor H. B. Bard.

July 12, 1915, San Diego Sun, 7:2. Mayor Capps signs new jitney bus ordinance requiring owners of jitney buses to carry insurance.

July 12, 1915, San Diego Union, 2:1. Hospitality wins visiting Elks to San Diego.

July 12, 1915, San Diego Union, 3:6. Gilbert H. Grosvenor, editor of **National Geographic Magazine**, charmed by Exposition: "I hope the people of San Diego and California will carry out their intention of maintaining permanently the wondrous gardens and artistic buildings of the Exposition. . . . It has been my good fortune to see all the artistic and famous places in Europe, the gardens of Italy, and all the more noted triumphs of architecture on that continent and I have no hesitation in saying that the beauties of art and landscape shown in San Diego are unequalled."

July 17, 1915, San Diego Union, 9:3. Tabernacle Choir to be heard tonight; Ogden Choir arranges second concert at Fair pavilion.

July 17, 1915, San Diego Union, 9:3. Newspaper writers obtain photographs of Exposition for illustrated articles.

July 17, 1915, San Diego Union, 9:4. Old Japanese prints will be exhibited today and from 1 to 5 p.m. tomorrow in the southeast corner of the California Quadrangle; library is maintained by the San Diego Women's Press Club.

July 17, 1915, San Diego Union, 9:4. Move to continue Fair into 1916 gains support; proposal made at Chicago by Southern Pacific and Santa Fe Railroads; plan rapidly winning support of businessmen.

July 18, 1915, San Diego Union, 1:2-5, 4:3-5. William Jennings Bryan, guest at Exposition, spoke to audience estimated at 6,000 on "The Causeless War."

Before an audience estimated at 6,000 persons, William Jennings Bryan yesterday delivered his now widely-known lecture on "The Causeless War" from the platform of the Spreckels Organ. The address was an effort to show that the present European conflict is without cause and without justification. It was also a plea for peace and a warning to the United States to keep out of the struggle at almost any cost in order that this country, the greatest of the neutral powers, should be in a position to act as a mediator when the belligerents are ready to listen to overtures for peace.

On the platform were many of San Diego's prominent citizens and when President Davidson, in introducing Colonel Fred Jewell as chairman of the meeting, referred to Bryan as the great apostle of peace

whose presence was an honor to the Exposition, there were rounds of wild applause. Jewell added to the enthusiasm when he declared that Bryan had more friends and acquaintances than any man in the United States.

The great Commoner wore a black alpaca coat, similar to the one he made famous in the 1896 campaign, and during his talk of nearly two hours yesterday he kept on his head a gray silk cap, complaining that the sun of California has demonstrated its powers on his head on one occasion and he did not care to give it another chance.

Just before beginning his address a pitcher of grape juice was placed before the speaker, and the great crowd was pleased when he drank a glass of the beverage. Praising San Diego for its progressiveness and its hospitality, Bryan lamented the fact that the beautiful Exposition should be destroyed at the end of the year and expressed his wish that it might be perpetuated for many years to come to the delight of thousands of visitors who will come to San Diego after the end of the year.

Upon his arrival at President Davidson's office in the morning, an impromptu reception was tendered the former secretary of stage and a performance by the Spanish dancers and singers was given in the president's office for his benefit. After a tour of the Exposition in company with Mrs. Bryan and a luncheon at the Cristobal Café as the guests of President Davidson, Bryan expressed himself as astonished at the beauty of the buildings and the arrangement of the grounds. The Bryan party left last night on the midnight train after a banquet at the Cristobal.

(From his introductory remarks)

"I have enjoyed the Exposition today. I don't know how you feel about it, but it seems to me that it will be a great sacrifice not only to your interests, but to the pleasure of those who are coming to San Diego in the future, to let your Exposition terminate this year." (Applause.)

"These buildings are too beautiful to be torn down when twelve months have passed, and I hope that you will find it possible to allow them to adorn this magnificent park and be a permanent attraction to your already attractive city." (Applause.)

July 18, 1915, San Diego Union, 1:3. Two tons of fruit given away at Sacramento Valley Building and Alameda-Santa Clara County Building.

July 18, 1915, San Diego Union, 1:6, 4:2. Lid clamped on Isthmus '49 Camp by Marsh; citizens condemn closing unique concession display depicting Old California.

July 18, 1915, San Diego Union,, 3:2-6. Utah Day at Exposition; Governor William Spry visited Exposition.

July 18, 1915, San Diego Union, 6:3. 2,000 typographers coming to Fair August 14-16; San Diego Union members prepare program.

July 18, 1915, San Diego Union, 7:1. King Joy crowned by Elks host on Isthmus; great crowd throngs carnival street: One of the biggest and merriest crowds which every attended an Exposition jollification, swarmed the Isthmus last night when thousands of Elks from every part of the country held their joy carnival. Fun began early and lasted until late and the jolly members of the antlered tribe turned the joy way into a whirl of gaiety.

The great crowd, which has earlier in the day attended the Utah celebration at the Organ Pavilion and later heard William Jennings Bryan, was augmented last night by thousands of amusement seekers intent on having a good time. The half mile of light never blazed more brilliantly and never was the carnival spirit more pronounced. The good-natured crowd rambled from one amusement place to another, taking them all in and then going back for a second trip through those which had proven most attractive.

As early as 6 p.m. Isthmus eating places were filled to capacity. The rush was maintained throughout the evening, scores awaiting in line, in many instances to gain admission.

The Cristobal Café, always a popular resort, was the scene of two dinners last night, several hundred in attendance at each one --- the Utah dinner and the William Jennings Bryan dinner. The Utah people occupied one section of the café and the Bryan admirers the other.

July 18, 1915, San Diego Union, 7:2-3. Annual convention of Loyal Order of Moose to begin tomorrow morning; great military and fraternal parade Thursday.

July 18, 1915, San Diego Union, 8:4. Exposition offers varied musical program today; Mormon Tabernacle singers will give final concert at Fair; Yuma Indians to play; Ernest Douglas, Los Angeles organist, scheduled for recital this afternoon.

July 18, 1915, San Diego Union, 9:2-3. Week's Exposition calendar filled with stirring events; Moose Day, International Peace Parliament, Tom Thumb wedding among attractions; Illinois delegation; Bay State governor coming.

July 18, 1915, San Diego Union, 9:3. Colonel and Mrs. J. H. Pendleton gave a reception for Major General George Barnett, commandant of U.S. marines, and Mrs. Barnett at the Exposition's Japanese tea garden yesterday afternoon.

July 18, 1915, San Diego Union, 9:4. 60,021 see Exposition during week; estimate for Saturday 15,000.

July 19, 1915, San Diego Sun, 7:1. William Jennings Bryan gave address, "The Causeless War," at the Exposition Saturday: "Should American citizens go to places where they are endangered and where they risk involving this country in an awful war? No! And if they are patriotic citizens they will not. . . . It seems a shame that these beautiful buildings may be torn down after a twelve month. I hope they will be permanent. This is a wonderful place."

July 19, 1915, San Diego Sun, 12:1. Saturday, July 24, designated as Shriners' Day; tomorrow is International Parliament of Peace Day.

July 19, 1915, San Diego Union, 1:6. '49 Camp runs without games; pretty cowgirls and exhibits of picturesque pioneer days remain.

July 19, 1915, San Diego Union, 1:7. Saturday attendance at Exposition was 18,263, record for July.

July 19, 1915, San Diego Union, 2:1. Choir and cadets win plaudits at Fair.

July 20, 1915, San Diego Sun, 2:3. Downtown and Exposition '49 Camp remains under edict issued by Sheriff Conklin; gaming devices at Exposition can be used as demonstrating devices but not for public play.

July 20, 1915, San Diego Sun, 6:3. Tomorrow will be Chicago Day; drill of First Regiment on Plaza de Panama at 3:30 p.m.; ancient legend of Vedstena will be enacted at Organ Pavilion at 8:00 p.m. by International Parliament of Peace; Ford Day will be August 9; Ford Motor Band will arrive in San Diego, August 8, and give concerts that day and the next.

July 20, 1915, San Diego Union, 1:4-5, 2:2. Exposition visitors deplored stunning blow to '49 Camp; demonstrations of games at Isthmus lack interest.

July 20, 1915, San Diego Union, 5:1. Peace Parliament celebration at Fair tonight at Spreckels Organ; exercises will open with pageant depicting ancient legend of Vedstena, a prophecy of permanent peace arising in a meeting of seven kings from seven kingdoms; chorus of girls to sing; program arranged by Madame Katherine Tingley and Dr. Edgar L. Hewett.

The seven mimic kings will head the pageant on horseback, students of the Raja Yoga College academy and school will participate, as will members of the men's and women's International Theosophical Leagues, members of the college faculty and students and workers of the International Theosophical Homestead.

July 20, 1915, San Diego Union, 9:2. 450 Shriners from Philadelphia visited Exposition; \$150,000 spent on tour.

July 20, 1915, San Diego Union, 14:2. 3,000 passengers arrive daily at Santa Fe station.

July 21, 1915, San Diego Sun, 2:1. Mayor William Hale Thompson of Chicago Exposition guest.

July 21, 1915, San Diego Sun, 3:1-2. Moose to have day at Exposition tomorrow.

July 21, 1915, San Diego Union, 2:2. Tot to take bride at San Diego Fair this afternoon at 2 o'clock at the Organ Pavilion.

July 21, 1915, San Diego Union, 3:5-6. Peace Day at Fair arouses resentment against war.

July 21, 1915, San Diego Union, 4:1. EDITORIAL: What the Expositions are Doing.

July 21, 1915, San Diego Union, 4:2-3. President Wilson will receive beautiful invitation to San Diego's Fair.

July 21, 1915, San Diego Union, 6:1. 1,000 Chicago visitors to celebrate at Fair today; 720 members Illinois National Guard coming. San Diego Herald, July 22, 1915, 1:5. La Jolla playground is great attraction.

July 22, 1915, San Diego Herald, 1:5. La Jolla playground is great attraction.

July 22, 1915, San Diego Herald, 2:2. Preserve the Exposition Buildings: There is talk of having the Exposition through another year. The idea is an excellent one. Whether it is done or not, the buildings which adorn the grounds should be taken over by the city and kept as long as they can be preserved in good condition. The Santa Fe exhibit should be kept as it is, an attractive feature of any park.

Many of the buildings can be devoted to educational purposes and nothing invites to a city a better class of people than great educational institutions. A Pan-American university, as suggested by Judge Glidden, would be of incalculable benefit, by its effect on the South American republics, and by drawing us into closer relations to them. Other educational institutions would also be of value.

These buildings, if sold for scrap, will bring little value. The city by becoming the purchaser, could have, at a nominal cost, what would be worth almost as much as the original cost of the buildings. Besides, their value for educational purposes, they would be an attraction which would bring many visitors to the city. Will the Mayor and Council give consideration to this suggestion?

July 22, 1915, San Diego Sun, 1:4. Moose parade to mark gala night of entire week.

July 22, 1915, San Diego Sun, 14:3. Governors of Massachusetts and Kansas to be guests at Exposition tomorrow (Note: Governor of Massachusetts did not show up.)

July 22, 1915, San Diego Union, 1:2-3, 3:2. Mayor Thompson says Chicago paying debt to West; Exposition visited by 850 Illinois National Guardsmen.

July 22, 1915, San Diego Union, 3:2. Mayor William Hale Thompson of Chicago was guest at Exposition.

July 22, 1915, San Diego Union, 8:1. Moose will own Exposition today; "Alce Americanus" offered big prizes for competitive drills; Cristobal Café will be crowded with diners and dancers.

July 22, 1915, San Diego Union, 14:1. Wedding bells for tiny folk ring at Fair; just like grown ups, children go through familiar ceremony; mock marriage pleases: In the presence of several thousand people who gathered in front of the Spreckels organ at the Exposition yesterday afternoon little Marjorie Barter became the make-believe bride of Billy Mason at a children's or Tom Thumb wedding ceremony in which all the actors were children. . . . Billy Gilmore made an excellent minister. . . . Pathe Company made films of the ceremony.

July 23, 1915, San Diego Sun, 1:2-3. First suit is started to collect Exposition funds.

July 23, 1915, San Diego Sun, 7:1. Shriners' Day tomorrow; Ellen Beach Yaw to sing at Organ Pavilion at 8:00 p.m.

July 23, 1915, San Diego Union, 3:2. Eight armored auto cars excite interest; fighting machines end 5,000-mile run to Exposition; trip from Lake Geneva, Wisconsin made by 29 cadets of Northwestern Military and Naval Academy.

July 23, 1915, San Diego Union, 9:2. Moose given keys to Fair; great parade begins night's gaiety; 2,000 in line of march through business district to west entrance of Fair; State delegations, bands, military bodies, San Diegans in pageant.

July 24, 1915, San Diego Sun, 7:1. Today is Equal Suffrage Day, Shriners' Day and Minnesota Day.

July 24, 1915, San Diego Union, 1:3. Shriners will spiel tonight; nobles eager to bark for "September Morn" concession.

July 24, 1915, San Diego Union, 4:1. EDITORIAL: Give the Exposition Its Due . . . approves move of Exposition management to resort to courts to collect what is due from delinquent subscribers.

July 24, 1915, 7:1. Bertram Grosvenor Goodhue, supervising architect during construction of the Panama-California Exposition, was guest of honor at a luncheon given at the Cristobal Café for prominent San Diegans and members of the Board of Directors of the Exposition.

Goodhue has not been seen in San Diego for more than a year and he expressed himself as pleased with the architecture and landscape of the Fair.

During the first years of construction Goodhue furnished plans from which the finished product is the result. More definite plans were furnished by Carleton M. Winslow, who was sent West by Goodhue, to superintend the construction work. Goodhue expressed himself as pleased with the work accomplished by Winslow.

The New York man passed two days at the Exposition and will leave tonight for the East, promising to bring his family West for a longer visit before many weeks.

Those in attendance at the luncheon were Bertram G. Goodhue, Dr. Edgar L. Hewett, E. C. White, R. C. Allen, George W. Marston, Thomas O'Hallaran, Carl Forward, John Forward, Jr., George Burnham, W. A. Sloane, D. C. Collier, Julius Wangenheim, Reverent Willard B. Thorp, W. J. Bailey, Carleton M. Winslow.

July 24, 1915, San Diego Union, 7:1. Arthur Capper, Kansas governor, entertained at Exposition.

July 24, 1915, San Diego Union, 7:1. Today will be Equal Suffrage Day at Exposition; Reverend Olympia Brown of Wisconsin, president of Federal Suffrage Association, to speak at Organ Pavilion at 3:30 this afternoon.

July 24, 1915, 7:2. The newsboys of San Diego and inmates of the Children's Home will be special guests of the Exposition tonight at the Ellen Beach Yaw concert to be given at the Organ Pavilion at 8 o'clock.

July 24, 1915, 9:2-3. Fraternal Ad Union's Day at Fair set for July 30; 800 members expected.

July 24, 1915, San Diego Union, 14:4. Unpaid Exposition subscription stock to be collected through the courts; \$2,000 due from John Johnson, Jr., a wealthy property owner of this city and Escondido; unpaid subscriptions nearly \$350,000 pledged in 1909; there is still a debt of approximately \$150,000 contracted before the opening of the Exposition; payment of big sum will make dividend possible; this would be the first Fair in history to return a dividend.

July 25, 1915, San Diego Union, 4:2-3. Shriners storm Exposition Joy Way; nobles as spielers enrich show places.

July 25, 1915, San Diego Union, 7:1-3. Indian sacred festival pictures were stolen from New Mexico Building.

A forced bolt on a rear window, a rifled strong-box, and a rudely sprawled note of explanation, in primitive halting English, were the revelations of loss which confronted Waldo C. Twitchell, assistant manager of the New Mexico building, when he returned to his office last night about 8:30 to complete some work "on hand" after dining at the Cristobal.

Evidence of a hurried search and quick work were observed by Twitchell as he unlocked the door and glanced hastily around to see if anything among the exhibits had been purloined, but when his search led him to the tower room, where the films of the motion pictures given daily at the building are stored, it became evident what had been desired by the intruders.

The note lying on the floor told it all --- a reel of films had been taken because they depicted a phase of life among the Taos Indians in New Mexico which they considered too sacred to be thrown upon a screen for the entertainment of unbelievers and had been taken secretly and contrary to the laws of the tribe.

The film in question was one taken at the Fiesta of San Geronimo of Taos, New Mexico --- a harvest festival, held usually on September 30 and October 1, of which some of the features are considered too sacred for reproduction by unauthorized persons. A quaint blending of the religious with something to amuse occurs in the ceremonial, among others, a relay race, the winner of which has the privilege of naming the governor of the tribe for the ensuing year.

The note, which bore evidence of the education received from the white man, combined with Indian cunning, read as follows:

"Bad mediceen - indians have bad luck - all sick. Pichers of race must burn - indians all get weel."

This explained the whole thing. The Indians learned that a picture of the festival had been taken including the forbidden features, and their superstitious nature led them to attribute sickness and ill fortune which visited the pueblo this year to the "jinx" cast on them by the picture.

Governor Unpopular

Among other things, the governor chosen by the winner of the race had proved unpopular, and this misfortune could have come only because the taking of the picture was "bad mediceen."

A number of the Taos Indians are among those at the "Painted Desert" concession of the Santa Fe Railway on the Isthmus, and all of them have been made welcome at the New Mexico building. When the building was dedicated, May 3, many of the Indians gave characteristic dances in the patio, and were allowed to use the tower room, where the films were stored, as a dressing room.

This was the opportunity which the ultra-religionists among them had waited for patiently, with the cunning of their race, and they evidently improved it well, to get a knowledge of the room and where the profaning pictures were kept.

Belief Is Building Was Watched

Since that night it is believed they have watched the building and studied the habits of those in charge until last night the opportunity presented itself, in the early hours of darkness, during Twitchell's absence, to obtain possession of the "wicked" device of the white man which they believed had cast an evil spell upon the pueblo.

Satisfied that in all probability the over-zealous and superstitious Indians had taken the film, and that in their anxiety to turn bad medicine into good medicine, they would immediately destroy the picture --- doubtless had done so --- Twitchell did some quick thinking. He recalled that the negative and one spare print of the film were safely stored in the vault of the state museum at Santa Fe and he immediately sent a letter to Paul A. F. Walter, in charge of the museum, explaining the details and asking that the spare film be sent at once, and at the same time suggesting redoubled vigilance over the negative.

Walter is expected to ship the reel today, so that no interruption, or only a slight one, will result in place of what promised to be delay, and would have been if no duplicate had been obtainable.

Indians Gave Warning

Some of the Indians of the Painted Desert, whom Twitchell had known for years in Santa Fe, warned him sometime ago that the Taos Indians were wrought over the fact that pictures of one of their sacred religious rites had been made and that these pictures were being exhibited daily for the entertainment of scoffers, thereby offending the denizens of the spirit world, especially those of evil intent.

Twitchell thought his friends were unduly nervous and apprehensive and paid little attention to the warning, beyond making sure that everything was secure about the building when it was closed in the evening.

Much sickness and bad luck had visited the Taos Pueblo, four miles distant from the town of Taos, New Mexico. The governor of the tribe had been unpopular, and things generally seem to have been at "sixes and sevens," all of which the Indians laid at the door of the paleface's pictures, taken in spite of watchfulness and against their time-honored laws.

Film Believed Destroyed

Indian friends had told Twitchell that the film would be destroyed if the Indians succeeded in getting possession of it, and this prophecy no doubt came true last night, within a short time after the building had been entered and the reel taken. The destruction of the "jinx" inhabiting the film probably was accompanied with ceremonial incantations and religious rites to exorcise the evil spirits and restore health, peace and happiness to the troubled pueblo of Taos.

Members of the Painted Desert were absolutely true to all traditions of Indian stoicism when seen last night and did not betray by so much as a twitch of an eyelash that they knew anything of the theft of the film from the New Mexico building. Even those who had given friendly warning were silent. But by a process of elimination, reinforced by a note found by Twitchell on the floor of the film room, it seems indisputable that no other elements than religious superstition and zeal entered into the quiet, but effective work accomplished amid the shadows of the first hours of darkness last night.

Duplicate Due Soon

The work was ineffective, however, in that the duplicate film will be on its way to San Diego within a few hours and the daily program at the New Mexico building will be interrupted by scarcely a ripple of delay. Twitchell felt assured on this point last night.

The pictures shown on the purloined film are considered wonderful and are the first and only ones of their kind ever made. Likewise, they probably will be the last, so long as Indian superstition remains, for eternal vigilance has been the watchword of the Taos ever since the fiesta of last autumn, when the pictures were secured in a remarkable way.

What thousands of dollars had proven an insufficient lure to obtain came easily at the touch of friendship and a few trifling baubles and sweetmeats. A large motion picture corporation has offered \$5,000 the year previous for the privilege of filming the fiesta of San Geronimo, but the offer was refused promptly and firmly on account of religious scruples.

Friendship Wins Way

While securing material for the New Mexico exhibit at the Panama-California Exposition, the Board of Education Managers for the Sunshine state cast covetous glances on the characteristic dances of the Taos Indians, realizing what an important asset such an attraction would make in presenting a passing phase of the life of the redmen.

Here friendship came into play and a generous supply of grease paint, seen now as part of the personal adornment of the dancers in the film, was given out judiciously where it would do the most good. Anything which pleases the eye of the spectacle-loving aborigine, appeals to his vanity and that which tickles his palate also has an appeal to the primitive mind. Realizing this, the ambassadors from the New Mexico Board of Exposition Managers were lavish in gifts of watermelon, soda water and flattery. Lucullus proved strong where Crossus had been impotent.

Caution Necessary

When the time came during the festival for filming the display, great caution and vigilance were necessary as the ultra-superstitious might at any time smash the camera, destroy the film and inflict injury upon the "profaners of the temple."

An experienced Connecticut Yankee, who knew the Indians and their customs as well as the camera gam, was secured as an operator and succeeded in filming the events of the fiesta without interference until the sacred relay race was started, when a watchful Indian discovered the camera and put a tin cap over the lens.

The resourceful camera man obtained another can, out of which the bottom was cut, and secretly substituted it for the other, then moved away from the camera to divert suspicion, first asking a white woman visitor to turn the crank of the machine without attracting attention.

Screen "Scoop" Obtained

In this manner the picture was obtained, in the face of great obstacles, but at a small outlay of cash, scoring a decided scoop on the motion picture people who had offered a small fortune --- a big one to an Indian --- for the privilege. This latter fact may have worked upon the cupidity of some of the tribe, when they realized the wealth they had within their grasp, and instead has sold the privilege of a mess of grease paint.

Among the revelers at this feast of the Taos are the Koshare, or Chiffonetti, representing the spirits of the departed, who indulge in rough pranks and horseplay, such as tossing a man in a blanket, and other ministrations. On this day when the pictures were made the Chiffonetti were gaily daubed with the paint generously donated by the Board of Exposition Managers. Nevertheless, if they had fully realized that the

evil spirits were to be angered by the white man's intrusion, their horseplay would have been diverted toward the camera and its operator in deadly earnest.

Truth Like Fiction

"The story of securing that reel of films reads like a romance," said Twitchell last night. "But it was a pretty serious business at the critical moments. The films never have been shown anywhere but in our chapel up to the present time. We did not dare to run them in New Mexico, much as it would have helped us in our work of arousing interest in the state's exhibit at the Panama-California Exposition, for fear of stirring up the simple-minded and superstitious Indians to a frenzy of religious reprisal. We have four other reels of Indian life and customs, but not including anything placed under the ban, as is the stolen film. These were undamaged, showing how thoroughly the Indians had made themselves familiar with their 'plant' before beginning their work, and how they limited themselves strictly to the removal of the forbidden thing. I have no doubt that Paul Walton will have the spare film here in time for our next Wednesday program."

July 25, 1915, San Diego Union, 8:1. Governor W. S. Hammond of Minnesota was guest at Exposition.

July 25, 1915, San Diego Union, 9:2. Ellen Beach Yaw to sing at the Exposition today.

July 25, 1915, San Diego Union, II, 1:2-3. Anthony Comstock to speak at Fair tonight; noted purist will discuss conditions in San Diego, belief.

July 26, 1915, San Diego Sun, 1:5. Theodore Roosevelt is San Diego's guest today; luncheon at 12:30 p.m. tomorrow at Cristobal Café; dinner at Cristobal Café at 6:30 p.m.; Colonel Collier will introduce Roosevelt at Organ Pavilion at 8:00 p.m.

July 26, 1915, San Diego Sun, 6:5. Anthony Comstock, enemy of vice, visited San Diego; spoke last night at an Open Forum at Organ Pavilion: "The three main sources of corruption are intemperance, gambling and evil reading."

July 26, 1915, San Diego Sun, 7:2. Anthony Comstock said the Exposition was the most magnificent thing he had ever seen. "There is nothing, absolutely nothing about the Exposition to offend the fastidious."

July 26, 1915, San Diego Sun, 7:3. Boys' Day takes many to Exposition; 50 boys of Columbia Park Club of San Francisco gave a band concert and vaudeville show at 2:00 p.m. on the Plaza de Panama; marched down coast 610 miles to see the Exposition.

July 26, 1915, San Diego Union, 1:5-6. Theodore Roosevelt to arrive today.

July 26. 1915, San Diego Union, 2:5. Shriners departing singing praises of San Diego.

July 26, 1915, San Diego Union, 4:8. Comstock fails to put brand on San Diego; "fire and brimstone" absent from the reformer's address; spoke last night at Organ Pavilion; said "world growing better"; drink, gambling and evil reading chief sources of corruption.

July 26, 1915, San Diego Union, 4:1. Fair attractions pack Tijuana with tourists; more than seven thousand cross boundary line in day; festive spirit reigns; rapidly growing Mexican town taking on aspects of city.

July 26, 1915, San Diego Union, 5:5. Ellen Beach Yaw charms multitude at Exposition Saturday night and yesterday afternoon: After "The Skylark," her own composition, Madame Yaw, as an encore, sang unaccompanied "Nearer My God to Thee."

July 26, 1915, San Diego Union, 12:1. Fifty six of Columbia Park Boys' Club to have day at San Diego Exposition; tramped 610 miles from San Francisco; visitors go into camp at tractor field; prepare for show, concerts.

July 27, 1915, San Diego Sun, 3:4. Pythian Day at Exposition on August 21; Los Angeles knights to come to San Diego in large numbers.

July 27, 1915, San Diego Sun, 6:1. Japanese Day at Exposition Saturday; lanterns will hang along all the Exposition thoroughfares and on tower of California Building; lantern procession at 9:00 p.m. on tractor field.

July 27, 1915, San Diego Sun, 6:2. Annapolis Day, Illinois Day, and International Rotary Club Day tomorrow; grand open-air ball on Plaza de Panama at 8:00 p.m.

July 27, 1915, San Diego Union, 1:3-7, 2:2. Theodore Roosevelt beams delight as cheering thousands greet arrival; old friends and admirers clamor to extend welcoming hand; party met at Del Mar.

July 27, 1915, San Diego Union, 2:1-4. Colonel Roosevelt had his first glimpse of the Panama-California Exposition last night when with President G. A. Davidson, Dr. E. L. Hewett, George W. Marston, chairman of the entertainment committee, Colonel D. C. Collier, R. C. Allen --- an old college friend, Miss Alice Lee and a small party of friends he was taken through the California Building, the old mission in the California Quadrangle, the Indian Arts Building and the Science of Man Building.

The trip of the former president was arranged in the early evening and only those who were to be members of the party were notified. It was a peculiar feature of yesterday that Roosevelt began his day at 6 p.m. in Los Angeles with a trip to the La Brea oil fields where the bones of prehistoric animals were found and ended it last night studying prehistoric man in the Science of Man Building at the Exposition.

Enthusiasm Displayed

Interested in everything shown him and enthusiastic over the beauty of the Fair, Roosevelt stopped short many times when on his way to the different buildings to call the attention of Mrs. Roosevelt to parts of the grounds which he thought might escape her. He was lavish in his praise of the style of architecture, the landscape schemes and the gardens. "What a place for a modern Rome and Juliet," he exclaimed while walking through the formal gardens.

"Beauty is an asset and can be made into money," he reflected. "San Diego is a remarkable city and the Exposition is more beautiful and pleasing to the eye than one could imagine. I hope they will make it a permanent park. It will make San Diego, the Mecca of America when it comes to winter business. I had only a glimpse of your harbor but I want to suggest that the waterline be made as beautiful as this park. Beautiful surroundings are pleasing to everybody and with them and your climatic conditions San Diego will undergo a tremendous growth. I hope you will advance as much in the future as you have in the past. The improvements in this park are little short of marvelous and when you tell me you had to blast pieces to set the trees and when you tell me the short time it has taken to transform this plot of ground to such a riot of blooms, it proves almost beyond understanding.

Save Exhibits Urged

"San Diego is the first port of call on the Pacific coast and I am going to talk on the Panama Canal in my speech at the Exposition tomorrow night. The Exposition is truly wonderful. Your buildings and grounds are so harmonious, everything seems to be in such exquisite taste.

"If you save these wonderful exhibits," referring to those in the Indian Arts building and the Science of Man building, "people of culture will visit you year after year. They will come here to study things which they do not have at home. The Fair in the one year will gain for San Diego many new residents, but all cannot come in one year and it could be kept open a longer time or if the body of it could be saved it would prove a permanent asset."

With characteristic bluntness of speech, Roosevelt kept Dr. Hewett busy explaining objects in the buildings through which he was shown. He was interested in it all and seemed disappointed he could not pass a longer time at the Fair.

July 27, 1915, San Diego Union, 8:1. Fifty two members of Columbia Park Boys' Club of San Francisco give show at Exposition.

July 27, 1915, San Diego Union, 8:1. Governor Lister of Washington due August 16.

July 28, 1915, Los Angeles Times, II, 7:3. Roosevelt sees the Exposition; greets Broncho Bill and other Rough Riders of the old days.

July 28, 1915, Los Angeles Times, II, 7:3. Colonel Roosevelt again scores peace talkers; is heard by thirty thousand; fondles colors of Old Rough Rider Regiment, enjoys Exposition and says, "We should be prepared for war"; is to return to Los Angeles today.

July 28, 1915, San Diego Sun, 9:1-2. Theodore Roosevelt cheered as he addressed crowd, former President spoke on "War and Peace," and urged United States to be prepared; told what our Mexico policy should be and scored "old women of both sexes who continually talk arbitration."

In advising the people of San Diego to keep the Exposition open another year at least, Roosevelt laid great stress upon the actual advantages, commercial and otherwise, of beauty to a city.

"Do not neglect to continue to build your city along lines of beauty. Keep your waterfront open and develop it so that it may add beauty to your city. Do not let a number of private citizens usurp it and make it hideous with buildings your children will have to pay an exorbitant sum to tear down."

July 28, 1915, San Diego Union, 1:2-6, 3:3-4. . Colonel Theodore Roosevelt spoke to thousands at Exposition; Enforce peace in Mexico! America's duty, say T.R; show of force safeguard against war, he tells audience.

In an address delivered before a crowd estimated at 20,000 at the Spreckels music pavilion at the Panama-California Exposition last night, former President Theodore Roosevelt ridiculed the nation's foreign policy, poked fun at those who argue peace at any cost, told of the history of the building of the Panama canal, praised the Exposition, and announced the best plan for permanent peace is the permanent preparedness for war.

It was an address of tremendous seriousness, punctuated liberally with flashes of wit and humor. He swayed the sympathies of his audience at will, painting in word pictures what he believes true Americanism means and sending his hearers into _____ of delight when he changed his voice and in true vaudeville fashion brought forth witty passages in describing the attitude of America towards other nations.

For nearly two hours Roosevelt held the interest of the largest and most enthusiastic audience which has ever assembled at the Plaza de los Estados. It greeted him with volumes of applause and ending with ringing cheers.

Like Political Meeting

At times the great gathering resembled an old-fashioned political meeting, for patriotic utterances were frequently signals for wild enthusiasm. While talking of the policy of the American government and telling of the forty-two ultimatums sent to Mexico and the taking of Vera Cruz and the coming back of American troops without the flag having been saluted, a man in the audience broke in, shouting: "Do you believe in war with Mexico?"

Quick as a flash, Roosevelt singled out the man and answered, "I believe in enforcing peace in Mexico," an utterance which brought forth thunderous applause. "I believe in doing what we did in Cuba. I

believe it is our duty to make peace in Mexico and leave that nation as prosperous as we have made Cuba. Unless we establish peace some other nation will humiliate us by stepping in and doing it for us. An army of 150,000 men, trained soldiers, could be used in organizing a party of peace and order.

“Mexico needs a democracy of right and unless the people are sensible enough to establish it, it will become our duty to do it for them just as we did in Cuba. And we promised Cuba that when that sort of an organization had taken place, she would be free to go her own way, and it was my pleasure to keep that promise for the American people.”

Colonel Roosevelt proved as good a comedian as he is an orator for with slants at the pacifists and dabs at what he called “old women of both sexes,” meaning those who hold conferences for universal peace, “at which nothing takes place but conversation,” he kept his audience in continual good humor.

“These people should make their official song “I Didn’t Raise My Boy to Be a Soldier,” and that companion piece, “I Didn’t Raise My Daughter to Be a Mother,” should be equally popular. Both seem to be equally sensible.

Domesticated He Says

“We would not be here today had peace been bought at any price. If we have lost the spirit of Washington and Sherman and Grant and Lee, we have lost that true spirit of Americanism which has been at the foundation of our government ever since that government was organized.

“There are those who say I want war. That isn’t true. I am a thoroughly domesticated person and I would rather be at home with the members of my family than almost anywhere else. But if war did come, I would expect to have a part in it, and I should expect to send four sons. At this minute two of them are in camp learning what their duty might be in case they might be called upon to defend their flag. But war for the United States, in view of present conditions, would not be healthy. We need to be better prepared for war to maintain our peace.

“I am not neutral between right and wrong when right and wrong is a question between individuals or nations. Not a rifle was discharged by the United States at a foreign foe during the seven and one-half years of my administration.

“As the net result of the Vera Cruz incident --- of our policy of waging peace with Mexico --- we came home without having our flag saluted. Public men should not make statements they do not back up with action. Words should be transmitted to deeds. There are some people who believe fine words will carry any situation, but I am not one of them.

“In 1907 we sent the battleships around the world as a message of peace, but there was a dual purpose in that action, and it was to show our readiness. While we wanted to show friendliness, we also wanted nations to know that it would behoove them to treat us nicely. When we sent the battleships around the world, or rather when the announcement was made, I thought the Eastern coast was going to have epilepsy. No one had thought much about the value of the fleet up to that time, but when they found it was going to leave, everybody seemed to want it kept at home.

“A man who lives in Maine told me I couldn’t send the fleet around the world because congress wouldn’t give me the money. I told him I would send it half-way around the world, and after it arrived in the Pacific it would be up to the gentleman from Maine to get it back again. I believe the fleet should be kept together, and that it should maneuver in the Pacific at times each year, as well as in the Atlantic.

Gives History of Canal

“No nation can hope to keep out of trouble by encouraging the contempt of other nations. China has tried it, and today one-half of that country is in the possession of England, Russia and France. China thought like a good many of the people of the United States think of the Panama canal --- no one would be wicked

enough to seize it. China thought she could afford to pay others to fight her battles, but she found it wouldn't work. People who tell you that the worst place is better than the best war are dangerous to the community in which they live. If our people want to sit timid and helpless, we cannot expect respect abroad."

Roosevelt then told of the history of the Panama canal. "The building of the canal to make a short route between the Atlantic and the Pacific has been talked of for centuries, or ever since Balboa discovered the Pacific. If we had continued the conversation, you in San Diego would not this evening be holding an Exposition." The Colonel then told of the difficulties with Columbia; how what had been called a republic was not a republic, but was in the hands of a dictator who has usurped the government; of how the sending of the fleet to Columbia was necessary to prevent the blackmail of the French company which had undertaken to dig the canal and the holding up of Uncle Sam. "The stand I took against Columbia is, I believe, the policy we should now adopt toward other nations."

Arbitration Criticized

"Old women of both sexes who advocate the settlement of all controversies by arbitration, are, by a stretch of my imagination, worthy and well-meaning people. To those who think that treaties will protect us, I call attention to what happened to the Belgians.

"If when J. P. Morgan was attacked in his home by a hyphenated American, the butler had stood quietly by and remarked he didn't believe in violence and that he was neutral, Mr. Morgan might not have been alive today. But the butler didn't attempt to be neutral; he seized the nearest substance that was hard and angular, which happened to be a chunk of coal. If we in America are at a point where we can discontinue our police organizations, then why not disband the army and navy?

"We must prepare the youth of our land to defend the nation if occasion demands. We have no room for hyphenated Americans; no room for Irish-Americans, German-Americans, nor even a native American if he is not giving his undivided allegiance to one flag.

Allegiance Demanded

"The native may be as bad as any. If they cannot give us their whole allegiance, all their patriotism, there is no room for them here. If the foreigner wants to serve another country, let him go back to that country, for we will not tolerate him here. Foreign countries are not harmed by the faces we make at them, and I do not consider making faces a dignified occupation, anyway. We want to be able to defend ourselves.

"A regular army of 200,000 men is what we need, and that would not be as big relatively as the New York police force. All young Americans should be trained for self defense. We should not permit the triumph of wrong over right. This nation must not be tramped under the foot of some other country, and we can save ourselves humiliation if we will prepare in time of peace for any condition which might arise."

In opening his address, Roosevelt said of the Exposition:

Exposition Praised

In opening his address, Roosevelt said of the Exposition, "You have made a most beautiful Exposition in a place beautiful by nature and made more beautiful by art, one of the most beautiful that I have ever seen. It is literally astounding for a city which we hope in the lifetime of some of you present will reach a half million population, but which doesn't quote come up to that mark now. (Laughter)

"It is so beautiful that I wish to make an earnest plea that you will keep the Exposition going for another year. Last year was a hard one for most of the land, and you naturally have not had quite the crowds that you expected. I hope that not only will you keep the Exposition running for another year, but you will keep the buildings of rare phenomenal taste and beauty permanently where they are.

“I feel that you are doing an immense amount from an educational standpoint for the United States in the way you are developing the old California architecture and the architecture of the Presidio, and I want especially to congratulate New Mexico on having adopted and developed the American form of architecture by taking the Indian buildings and adapting them to the Exposition.

“It is unwise ever slavishly to copy anything from another civilization, but it is still more unwise not to copy anything that is of use from an alien civilization and then adapt and develop it to your own uses. It is an admirable thing to have taken both the old Spanish and the pueblo Indian styles of architecture and adapt and develop them in the typical and characteristic American fashion as you have done here.

“I hope that you of San Diego, whose city is just entering on the great period of development, will recognize what so many old communities have failed to recognize, that beauty is not only worth while for its own sake, but that it is valuable commercially. Keep your waterfront and develop it so that it may add to the beauty of your city, and do not let a number of private individuals usurp it and make it hideous with buildings and then force your children to pay them an exorbitant sum to get rid of the ugliness they have created.

“I am more struck than I can say by what you have accomplished in San Diego and I hope to see you continue to be your masters and teachers and to have your lessons taught to and appreciated by all the people of the United States.”

Introduced by Collier

Colonel Roosevelt was introduced by Colonel D. C. Collier, who said he is the only man under whom Americans have been respected abroad as well as at home. “German and English citizens are protected no matter where they are, and it has come to pass that a dirty sheet receives more consideration over the home or the property of an American abroad than the American flag.”

Colonel Collier was introduced by President G. A. Davidson of the Exposition, who evidenced his pleasure in words of welcome to Colonel Roosevelt, whom Davidson called “America’s foremost citizen.”

People went to the Plaza de los Estados as early as 2 p.m. yesterday and made themselves comfortable, to await for Roosevelt’s speech. Before 6 o’clock last night every available seat was taken and hundreds were coming over Cabrillo Bridge, carrying everything which might be used as a seat, from kitchen chairs to soap boxes. At 8 o’clock when Roosevelt mounted the platform, the plaza was a swarming mass of eager humanity and the crowds extended on both sides of the grass plot to the Plaza de Panama.

Tour, Continuous Ovation

The Colonel’s tour of the Exposition yesterday was a continuous ovation. Hundreds of people crowded the U. S. Grant Hotel and surrounding streets to get a glimpse of him when he left the hotel under the escort of officers of the Exposition and officers and men of the First Cavalry. Hundreds lined the streets of the residential section, cheering him as he passed in President Davidson’s automobile.

At the entrance of the Exposition, there were other hundreds and the Colonel’s face was wreathed in perpetual smiles as he doffed his hat to the crowds. At President Davidson’s office a large crowd had assembled to get a close view of the former president.

The troupe of Spanish troubadours never played before a more appreciative audience than Roosevelt. They were awaiting him in the office of President Davidson, and after they had given their program, the Colonel insisted on three additional Spanish pieces.

Film Delights T.R.

From the President’s office, Roosevelt was taken to the New Mexico building, where Miss Elizabeth Garrett of Las Cruces, daughter of Pat Garrett, famous New Mexico sheriff, appointed by Roosevelt some years ago as collector of customs at El Paso, sang “Fair New Mexico,” a song of which she

is the author. Then slides made from pictures of Roosevelt's Rough Riders were shown and the former president was thrown on the screen.

In the placita of the New Mexico building had been hung the flag under which the New Mexico Rough Riders had been recruited. It was later taken to Cuba and was used over the quarters of Colonel Roosevelt. With Lieutenant J. W. Green, formerly of Gallup, New Mexico, now of San Diego and owner of the famous relic, and several other former Rough Riders, Roosevelt posed for newspaper and movie cameras.

Given Lincoln Picture

L. K. Dewein of the Hearst-Selig pictorial service, who took pictures of Roosevelt under the flag for use on his news service, presented Colonel Roosevelt with a heretofore unpublished picture of Abraham Lincoln, taken at Peoria, Illinois, in 1858. Dewein had made copies of the original picture, one of which he gave to the Colonel who seemed to be greatly pleased.

In the number who crowded about Colonel Roosevelt after the pictures had been taken was a woman who told Colonel Roosevelt she is the mother of five boys. "That's good!," exclaimed the former president. "Are they fighters?"

"My word, how those boys can fight," answered the woman.

"That's good," said the Colonel. "Boys are no good unless they can fight. They wouldn't be fit to live in the glorious United States unless they had some fight in them. Teach them patriotism and what they owe to their country. Teach them to love that flag and impress them that it would be their duty to fight for it."

After the trip to the New Mexico building, Colonel Roosevelt left the Exposition grounds for a few minutes to go to the home of Lieutenant J. W. Green, where he met and talked with his old friends, the Rough Riders, who are now residents of San Diego. He promised to be back at the Cristobal café promptly at 1 p.m. for luncheon and he was punctual.

On the chance that Roosevelt would speak at the café, hundreds crowded the room at the luncheon hour. The Exposition was host to the Roosevelt party, there being about seventy-five at the official table. No speeches were made.

Directly after luncheon, Roosevelt was taken to the Seven Southern California Counties building where he made the only talk of the day, outside the longer one at the Spreckels music pavilion last night. He was introduced to those present by Mrs. Florence Collins Porter, who was a delegate to the Republican national convention at Chicago in 1912 from California.

Mrs. Porter Sought

Mrs. Porter later represented the Progressives and is an old friend of Roosevelt. He had asked about her several times and warned those in charge of his entertainment that he must see Mrs. Porter. She represents Los Angeles County at the Seven Southern California Counties building. She was the first woman to cast a vote in a national convention. Later as a representative of California Progressives, she voted for Roosevelt and Governor Hiram Johnson.

The Colonel lavishly praised the Exposition, the courage and ingenuity of Californians and suggested forcibly that the Exposition be kept permanently open. He said, "It would be opening up new grounds and would be of tremendous impact in the future greatness of the 'First Port of Call.'"

Scores of people had presents as souvenirs of Southern California which they wanted to give to the Colonel. A girl, representing the Doll House on the Isthmus, had dressed a kewpie as a Rough Rider and presented it to him after pushing her way breathlessly through the crowd. He accepted it with pleasure and gave it to an aide who was already loaded down with souvenirs.

Snapped by Camera

While he was leaving the Seven Southern California Counties Building, a woman stepped abruptly in front of the Colonel and holding her kodak at arm's length and within a few inches of his face, snapped the shutter. "Woof," cried Roosevelt, "mercy me, I'm shot." He slapped his hands, and the woman who had not been timid until that minute merged into the crowd.

He insisted on making a rapid tour of the building which is representative of Southern California and left to see the remainder of the California exhibit, the model farm on the Alameda. With this he was immensely pleased and expressed his pleasure with many exclamations of surprise and wonderment.

At 4 p.m. he was taken to the Spreckels music pavilion where he heard William J. Gompf play several numbers on the outdoor organ after which he visited the women's headquarters in the California Building, where he and Mrs. Roosevelt were guests of honor at a reception.

Drinks Nine Cups of Tea

At the reception Roosevelt established a record for tea drinking, taking according to close observers and those considered good at mathematics a total of nine cups. "The tea was deliciously good and I was very thirsty," he said when leaving the building.

A feature of the day's program came unexpectedly at the Painted Desert when the Colonel was asked to christen the weekend baby of Mary Trujilo, an Acoma Indian woman. She requested that he name the lad "Theodore Roosevelt Trujilo," which he did in the presence of several hundred persons.

"I've enjoyed the Painted Desert and I find no race suicide here," he said. He had met several of the Indians in Arizona and New Mexico and these he called by name. In their shy manner they all evidenced their pleasure at meeting him again. With some of them he talked at length, discussing their schools and their work. The Indians had dressed more carefully than on any other occasion for their visit with Roosevelt, some of the women having taken the entire afternoon to don their best clothes and their paint.

The dance of the Acomas, the Buffalo dance by the Hopis, and a Navajo dance were given for the Roosevelt party after which they visited with the Indians at work and in their homes. The former president was intensely interested in the Santa Fe exhibit and regretted that he could pass so little time there. After visiting with the Indians, Roosevelt rested an hour before going to dinner at the Cristobal café. He had been on the jump since early morning and he admitted that San Diegans had given him a mighty strenuous day.

Roosevelt will review the Annapolis cadets this morning at 11:30 at the Plaza de Panama and probably will leave the city on an afternoon train. During his tour of the grounds yesterday afternoon he met many old friends. Some of them he had not seen in years and members of the party marveled at his remarkable memory. He was pleased with his entertainment in San Diego and could not say enough for the beauty and inspiration of the Panama-California Exposition.

July 28, 1915, San Diego Union, 4:4. Balboa Guardsman Given Rough Rider Badge by Roosevelt at Exposition: Captain C. P. Wright of the Balboa Guards at the Exposition was proudly displaying last night a Rough Rider badge which Roosevelt had given him during the day. Wright was an officer in the Second Illinois Infantry in the Spanish-American War, during which time Roosevelt became acquainted with him.

When Roosevelt heard that Wright was at the Exposition, he sent for him to come over to the New Mexico building yesterday afternoon where the Colonel was speaking. After talking over old times with Wright, Roosevelt took a Rough Rider badge, which was pinned on his own coat, wrote his name on it, and pinned it on the Captain's breast.

July 28, 1915, San Diego Union, 3. Rooseveltisms: Speaking of Mexico reminded Roosevelt of an anecdote which he related as follows:

“A man said to his assistant, ‘You have stepped on my feet, you have tweaked my nose, you have spat in my face. Beware, do not go to far, lest you rouse the lion in me.’”

July 28, 1915, San Diego Union, 4:4. Death of martyr looms before organist at Fair when Roosevelt speaks: William J. Gomph, organist at the Exposition, played yesterday afternoon just before Roosevelt spoke for the first time.

“It gave me a peculiar sensation of fear,” said Gomph last night, “for I played the organ at the Exposition in Buffalo when McKinley was shot. I couldn’t help watching in fear and trembling. Every man looked suspicious to me, and, of course, I imagined many who were absolutely harmless to be suspicious. I was glad when it was over safely.”

July 28, 1915, San Diego Union, 2:3. Exposition Spanish troupe to present a Spanish operetta for midshipmen visiting Exposition during open-air ball in Plaza de Panama; synopsis given.

July 28, 1915, San Diego Union, 2:6. Middies to enter San Diego port this morning; open-air ball tonight; Roosevelt will review future U.S. Navy officers at Plaza de Panama this morning at 10:30.

July 28, 1915, San Diego Union, 5:2:3. James Hugh Allen, baritone and former San Diegan, to sing at Exposition Friday evening.

July 28, 1915, San Diego Union, 5:4. Two more suits filed on Fair subscriptions; signers of \$100 subscriptions refused to pay when the demand was presented to them.

July 28, 1915, San Diego Union, 6:3-5. Bee Gee Players ready for Middies; Fast baseball game billed for Stadium today.

July 28, 1915, San Diego Union, 6:3. Tijuana sets aside day for Midshipmen; naval battle in miniature will be staged by Mexican fair.

July 28, 1915, San Diego Union, II, 1:2-5. Tag Day crusaders win \$1,000 for cause; tireless girls showed with praise by Committee; Workers pin numerous badges on Roosevelt’s coat as Colonel makes donation; campaign planned as annual city charity event.

July 29, 1915, Los Angeles Times, II, 9:4. Middies head long parade; three battleships reach port of San Diego; Roosevelt reviews troops and sailors; Governor of Illinois visits the Exposition.

July 29, 1915, San Diego Sun, 1:7-8. The **Sun** thinks it would be a mighty fine thing to have a Collier Day as soon as it is convenient.

July 29, 1915, San Diego Sun, 6:1. Alia Nazimova, Russian actress, will present her company in her timely play, “War Brides,” at Organ Pavilion, August 5-7.

July 29, 1915, San Diego Union, 1:2, 2:1-2. First, second and third classes of Annapolis midshipmen, San Diego and Exposition guests; future defenders of nation reviewed by former President; first battleship squadron consisting of *Missouri*, *Ohio* and *Wisconsin* to anchor in Man-o’-War Row here; first battleship squadron ever to enter the harbor and drop anchor.

July 29, 1915, San Diego Union, 1:3. Former President William Howard Taft will visit fair September 19.

July 29, 1915, San Diego Union, 1:3-4. Twelve-oared cutter race for James Gordon Bennett Cup to feature Shipmen’s visit today.

July 29, 1915, San Diego Union, 2:4-5. Middies entertained at Fair; future admirals praise city; hundreds dance as thousands assemble to greet Annapolis boys: A portion of the Plaza de Panama was roped off early

in the evening, benches were brought from the Plaza de los Estados, and the dancing portion was given a special treatment which made dancing easy.

July 29, 1915, San Diego Union, 6:1-2. Boys' City in Balboa Park plan for former juvenile head, visiting Fair: Judge Willis Brown, formerly head of the Salt Lake City, Utah, juvenile court, who is traveling about the United States investigating sites for the location of a Boys' City, visited the Panama-California Exposition yesterday.

Judge Brown thinks the grounds of the Exposition would be an excellent place for the location of Boys' City. He talked with President Davidson of the scheme yesterday. Later the matter may be taken up with the Board of Directors and Judge Brown may try to get a portion of Balboa Park. With the boys coming from all parts of the country and the great amount of publicity as a result, he thinks San Diego would prove a year-round Mecca for the tourist.

Judge Brown left last night for the East but promised to return to talk over the establishment of his Boys' City with the directors of the Exposition..

July 29, 1915, San Diego Union, 18:1. Spirit of Japan will mark fete at Exposition; Customs old and new among exhibit features planned; Coins to drop from sky; Banquet to honor Fair officials arranged by Nipponese Committee.

In faraway Japan there are century-old customs teeming with the spirit of celebration. Long has the flowery land been known for its observances. A festivity, or special day, in Japan means something more than mere speaking of the name.

So when "Japan Day" is celebrated at the Exposition Saturday, throughout the Exposition grounds there will be a Nipponese atmosphere, probably never before seen in a Pacific coast festival.

The program, to be contributed largely by Japanese, will set forth the customs and everyday life of Japan; it will show the people at work and play.

Combined with the memories of old Japan, when it was known as the "Island Kingdom" or the "Flowery Kingdom," will be features made possible by the new order of things. Japan's new regime is progressive. It is Americanizing more and more every day, and the combination of old and new will be exemplified in a program beginning at 10 o'clock in the morning and continuing late at night with a long lantern parade over the Puente Cabrillo.

The Japanese Association of Southern California has been working on Saturday's program for the last two months. Its members raised a liberal purse for expenses, and money has been expended lavishly in providing entertainment for Exposition visitors Saturday. More than 10,000 Japanese lanterns will swing on all the main thoroughfares at the Exposition and the lofty tower of the California Building will be made doubly gay by a special arrangement of lanterns. A big shipment of these, for decoration of the California Building, was received a few days ago from Nagasaki, Japan. As visitors enter the gates during the day, they will be presented with Japanese souvenirs. There will be pieces of bric-a-brac and art work. Aside from this, the Japanese will distribute to visitors 20,000 Japanese and Exposition badges of quaint Oriental design.

After the grand entrance of all Japanese to the grounds at 10 o'clock Saturday morning, mile-high entertainment will be furnished by J. Asakawa and Professor O. Nakamura, Japanese aviators. These intrepid man-birds will fly over the grounds at an altitude of 5,000 feet, and, in their flight, will distribute old Japanese coins, wrapped in tissue paper. Here will be demonstrated the ingenuity of the Japanese, for there will be attached to each package of coins a tiny parachute, allowing the packages to float gracefully to the ground. Those finding the coins will be permitted to keep them as souvenirs. The aviators will also drop balloons and fancy figures of Japanese design.

At 11:30 all will gather at the Sacramento Valley building where President G. A. Davidson of the Exposition will deliver an address. M. Kondo is acting chairman of the exercises. G. Oyama, Japanese

consul from San Francisco, will read a message to the Japanese people from Baron Chinda, Japanese ambassador at Washington. A short address by G. Yuoosa, president of the Japanese Association of Southern California, will conclude the exercises. Immediately after this, the Exposition Spanish troupe will give a special program in the Plaza de Panama.

The afternoon program will be started at 1:30 with a display of daylight fireworks. These will be discharged on the tractor field, at the north end of the Alameda.

What is expected to prove one of the best features of the day is the athletic program to begin at 2:15. Five contests probably will be held on the Plaza de Panama. One a fencing battle royal, will be engaged in by fifty persons, twenty-five contestants on each side. All of the events will serve to demonstrate the athletic prowess of the Japanese, and, for the first time, the public will be given a keen insight into Japanese athletics.

The Japanese Day committee will preside at a banquet given the directors of the Exposition and other well-known San Diegans at the Cristobal at 7 o'clock. Several short talks will be given during the dinner.

If the First Regiment Band of the University of Wisconsin arrives on time, it will give a concert in the Plaza from 8 to 10. The Yuma Indian Band will play on the Isthmus between these hours.

Bringing the celebration to a grand climax will be the lantern procession from the Laurel Street entrance. This parade, in which several thousand Japanese will engage, will move over the Puente Cabrillo, and pass the Plaza de Panama, where all in line will give a "bonzai" (good cheering) for the success of the Exposition. The parade will then proceed to the Alameda, and thence to the tractor field where there will be a second display of fireworks and night aviation feats.

Adding life to the procession will be the section of participants appearing in Japanese kimonos. All nationalities, creeds, sizes, ages and colors are expected to take part. Liberal cash prizes will be awarded for the best kimono costume.

The program has been prepared with great care and, it is expected, will draw liberally from all of Southern California and thus contribute one of the best days the Exposition has had.

July 30, 1915, San Diego Sun, 1:4-5. Collier Day idea is given hearty praise; date may be set soon.

July 30, 1915, San Diego Union, 1:1. Billy Sunday date at Fair sought by officials; famous evangelist expected to make speech August 9.

July 30, 1915, San Diego Union, 1:2-4. Japanese to celebrate at Fair tomorrow; 10,000 lanterns will glow during night; unusual athletic events on program; flights in air scheduled.

July 30, 1915, San Diego Union, 4:6. Fraternal, Ad, Union and Delta, Delta Sorority Day to be celebrated at Exposition today.

July 30, 1915, San Diego Union, 6:5. Art Smith to fly at Fair, August 11 and 12.

July 30, 1915, San Diego Union, 9:3-4. Japanese to celebrate at Fair tomorrow; 10,000 lanterns will glow during night.

July 30, 1915, San Diego Union, 9:2. Japanese celebrated at Exposition; 10,000 lanterns decorated buildings.

July 31, 1915, San Diego Sun, 6:4. Japanese Day is celebrated; kimono and lantern parade along El Prado to Alameda and Isthmus; fireworks on tractor field; Professors Nakanura and Asakawa, Japanese aviators, will perform night stunts in their aeroplanes in the midst of the fireworks; Exposition has contacted Art Smith, 21-year old aviator, to give his loops-the-loop, August 11 and 12.

July 31, 1915, San Diego Union, 1:3, 3:5. Airmen to fly over Exposition tonight; Japanese fireworks display in afternoon.

July 31, 1915, San Diego Union, 1:3-6, 2:3. Japan Fair Day program varied; airmen to fly over Exposition tonight; souvenirs to be dropped; athletic events arranged; kimonos and lantern parade; many Japanese expected

July 31, 1915, San Diego Union, 3:5-6. Art Smith, master of air, sought by Fair; asked to fly over Exposition: It seems almost incredible that an aviator by mastering an aeroplane can swing it around at a mile high altitude, make it do all sorts of twists, curves and contortions so that in the end the trail of fire in its wake spells: "Art Smith," yet this is the feat which the reckless man bird has been doing at the northern exhibition.

July 31, 1915, San Diego Union, 3:6. Thousand will march in parade, feature of Printers' Convention to be held in Los Angeles, August 9 to 14.

July 31, 1915, San Diego Union, 4:6. James Hugh Allen, baritone, wins ovation at Exposition, by W. B. Seymour: Allen is a brilliant singer with a warm and ingratiating personality which is reflected in his voice..

July 31, 1915, San Diego Union, 4:6. Duplicate of Fiesta of San Geronimo pictures shown at New Mexico Building.

July 31, 1915, San Diego Union, 5:1. The armored cruiser *Colorado*, with the 25th, 26th and 28th companies of marines, arrived from Guaymas, Tobari Bay, and Ensenada at noon yesterday. . . . Yesterday marked the first time in the history of the port of San Diego where a flagship of the Pacific fleet and a flagship of an Atlantic squadron (the *Missouri*) have anchored and exchanged salutes in the harbor.

August, 1915, **The California Garden**, Vol. 7, No. 1.

The sentiment to maintain the Exposition for another year seems to be gathering force. Every visitor, whether prominent or not, adds his much or little to it in spite of the fact that the chief problems to be solved in so doing are not within his ken. We are not objecting to this universal advice distribution, especially as we have a little to scatter ourselves, but instead of keeping things in status quo, why not accentuate the proven attractions and let go of the others.

The garden side of the Exposition, the out of doors, is its big thing. If it is to continue through 1916, why not arrange for the unique floral display that our conditions make possible: The nursery and seeds men have put much into San Francisco in a location lacking every advantage, why cannot they be induced to move to San Diego for 1916? What hinders the carrying out of a big horticultural competition along the lines laid down by this Magazine when the Fair was in embryo? If the fiasco of the \$1,000 rose contest cannot be satisfactorily explained it could be palliated by an ample and suitable apology and this time contestants would be in charge of their own exhibits. A committee of local nursery fold and flower lovers could get up a premium list fitted to local conditions and covering the whole year successively. Flowerpots could replace the Isthmus Concessions. Countries could be invited to make typical gardens, and all without a very great expenditure. The expensive framework is up, the exposition is built, this is a minor change of detail along lines that experience has indicated. A tentative campaign among nursery folks ought to be made for a few hundred dollars and this would show whether further expenditure were justified.

Along such lines a permanent exhibit would easily grow. The Government would surely add an experiment station, possibly a branch of its plant importing bureau, and anyone can figure out a hundred legitimate features not touched upon here. And then we might have that ten-acre lath house that is going to be built somewhere in Southern California --- we do hope in San Diego.

As we are furnishing the idea we may certainly go a bit further and say that this is a job for a gardening expert with local knowledge. Of course a competent landscape artist should be consulted for surface plans, but local garden experience must fill it in. Shall we say to the East, "You liked our Exposition in 1915, you wandered in its gardens and loved its arbors, that was just a beginning, the framework, now we have filled in the picture and the veritable Garden of Allah awaits.

When in 1916 the heat of summer or the pinch of winter makes the Easterners think of traveling, he will more than likely turn again to California. Why not see that the pull of San Diego shall be stronger than ever, when the big Fair at San Francisco is no longer a rival.

It is an idea, think it over.

August, 1915, **The California Garden**, Vol. 7, No. 2. Monthly Excursion Through Exposition Grounds, by G. R. Gorton

The aquatics in front of the Botanical Building have benefited by the warm weather of July and August, and are definitely on show. The water lilies in La Lagunita de Las Flores, as the smaller pool is fancifully termed, present a veritable rainbow of color --- reds, pinks, blues, creams, yellows in many shades. The dainty *Pygmaea helvola*, the Chinese dwarf lily, perfect in miniature, and suitable for an "aquatic garden" is as small a compass as a washtub, is an interesting type, and it is a far cry from this to the immense deep blue *Nymphaea Pennsylvania*, or the showy red *Nymphaea Gloriosa*. The *Nelumbiums*, one in each of the corners of the south side of the pool are at their best. The rich blue of the Water Hyacinth (*Eichornia azurea* and *Eichornia Speciosa*) contrasts pleasingly with the gold of the Water Poppy (*Limncharis Humboldtii*),

Within, the Botanical Building presents a somewhat altered appearance. The *Strelitzias* in the lath house, which a month or so ago were often mistaken by the uninitiated for bananas, have reduced the possibility of error to a minimum, for while their relative might bear a leaf very similar, no banana could ever bear such a flower. The common name of the Bird of Paradise flower is very apt, as the flower surely does resemble some strange tropical bird of gaudy plumage rather than a member of the vegetable kingdom. Adjoining this, and elsewhere in the house are groups of Tiger Lilies, Gold Banded Lilies, and the type known as *L. lancifolium* --- all quite decorative. The tuberous *Bigonias* still continue to attract much favorable comment. There are several small groups of *Primula obconica*, which help to furnish color. The dainty little *Exacum affine*, from the island of Socotra, wherever that is, is also scattered in like fashion throughout the two buildings. The plant is a dwarf herb with light blue flowers of a peculiar but quite pleasing odor, and is sometimes mistaken for *Saintpaulia*, by reason of the similarity of the flower. Inside the glass house, on the east wall, is a specimen of *Hoya carnosia*. Here again a common name is very descriptive, for so much does the appearance of the flowers of the Wax Flower Vine belie a natural origin, that it is almost impossible to believe that they are not the kind that were wont to inhabit glass jars in our grandmothers' parlors, together with the hair wreath, etc. However the flower of the *Hoya* is delicately tinted, and is quite attractive.

Recently the collection has been increased by the addition of some *Amorphophallus Rivieri*, which bears a very suggestive name of "Snake Palm," possibly because of the markings of the leaves and stem, which may resemble the markings upon some species of snake. I cannot say, certainly, just which one it resembles, as I try to keep my acquaintance with such reptiles down to a minimum. The left is quite tropical in appearance and the flower, when it is borne, will resemble that of the Calla, but is rosy in color and has a disagreeable odor.

In the bulbous planting just east of the Botanical Building, the *Ismene calathina*, or Peruvian Daffodil, is demonstrating its usefulness as a summer flower. The leaves are almost identical with those of

the *Amaryllis*, and the flower is just tinted with pink and very fragrant, with a sort of tuberose odor. In this same bulbous planting is a group of *Gnaphalium lanatum*, not bulbous, however, but interesting because of its relationship to the famous "Edelweiss," which is *Gnaphalium Leontopodium*. The former is grown mainly for its silver gray foliage, although the clusters of cream-colored flowers, which it is now bearing, are not unattractive when massed. In the background of the planting is a group of the *Canna Wyoming*, with a rich bronze foliage and deep orange bloom.

The familiar tiny blue flowers of *Duranta plumieri* may be seen in many spots throughout the grounds. One good group is on the edge of the canyon near the southwest corner of the Commerce and Industries Building. Another is east of the same building, also on the edge of the canyon, but a different canyon. Across the walk from this last group and extending along the entire east wall of the building, the mixed planting of ferns, begonias, fuchsias, etc. is a pleasant surprise to the visitor who tires of the paved Prado and the heavier and more formal plantings. This planting is bordered by an edging of *Carissa edulis*, an edible plum from Natal, its clean, fresh appearance being occasionally supplemented by single white flowers of the odor of orange blossoms, and resembling them in habit.

Ichroma tubulosa is now in full flower, its clusters of tubular, bluish purple flowers being decidedly showy.

The promised bloom of the "False Artichokes" (someone please tell us the Botanical names) have come forth and are quite equal to our expectations. The planting in the rear of the Sacramento Building contains several good specimens. It is somewhat tropical in appearance, growing upwards of five or six feet, evidently, its silver gray thistle-like foliage surmounted by rich heliotrope-blue, thistle-like flowers. Along the same walk, but in the rear of the California Building, is the Canna exhibit of Conrad and Jones, and is, of course, resplendent with bloom, excepting our namesake, the new Canna, San Diego, which was shipped too late to come into bloom with the others, but will be along later. Directly west of the Cristobal Café is a bed of cannas containing Vaughan's gorgeous new introduction, combined with King Humbert, which is similar in habit and color of flower, but different in foliage.

Part of the tribute which was offered to Mme. Schumann-Heink, not long ago, was in the form of the *Lobelia-Ageratum* border surrounding the lawn in front of the organ. The immense crowd overflowed the walks and trampled it completely out of existence. A substitute was found in *Vernon Begonias*, edged with *Santolina*.

There are no large *Eucalyptus ficifolia* on the grounds, but the youngsters which are there are making a brave show of bloom, and it is real scarlet bloom, not old rose. One especially attractive specimen may be seen on the west side of Cabrillo canyon, south of the bridge. It seems almost superfluous to direct the attention of the visitor to the *Nelumbiums* (and *Nymphaeas*, although the latter are pretty far away to be appreciated) now in bloom in the lagoon at the bottom of this same canyon, under the bridge, but for one who might enter at the east gate and leave the same way, mention is made. It is rather interesting to note that the *Nymphaeas* and *Nelumbiums* in this lagoon are subjected to somewhat the same conditions as in the East and North, in that because of some frost in the canyon bottom, they go entirely dormant in the winter, and then, also because they are in the canyon bottom, receive the benefit of a quicker, hotter growing season than on the mesa, and the resultant growth is all that could be desired.

August, 1915, **The California Garden**, Vol. 7. No. 2. Children's Playgrounds by the Early Bird.

With the Playground movement so much in the air, what wonder that it should direct my flight to the Children's peculiar department of that wonderful demonstration of what man working with nature can accomplish --- Golden Gate Park in San Francisco. The city of the north can have its bay, its fair, its hills and all its other delights and no stir of envy comes to me, but when I think of its Park, and more particularly its Children's Playground, I feel that they ought to be in a climate where their enjoyment need not be so strenuous, and that indicates San Diego, of course. This is written to connect Balboa Park and a real Playground for our southern tots in the minds of the few with whom will be the burden of implanting it in the minds of the many. The city playground of bare earth bearing up swings and bars, is only acceptable where

nothing else is possible. Our future citizen should play in an atmosphere of grass and trees and flowering things, rather than in one of chicken fencing. Comparisons are odious, therefore, let us to our destination.

With my young hopeful, aged six, I walked between giant trees upon which creepers ran, by beds of flowers where bees worked, over lawns of velvet green. We called on the black swan that has shown his pink beak and ruffled wings to a million children, and, through a leafy tunnel, descended into the place of the realization of all the healthy dreams of young children.

Snugly packed away in a sheltered hollow is a merry-go-round without the nerve-racking machine music. Swings of all caliber, meadows that are almost human in their adaptability, donkeys that are qualified children's nurses, goats that never built lawns upon which to roll, trees to climb, and not on "Don't" on the whole place.

I sat me on a seat for parents and let loose my daughter, after we had lunched appropriately upon sandwiches, cookies, cake and milk topped off with a cornucopia. All these things and many others, coffee, etc. are procurable on the grounds at a reasonable price and of excellent quality. One gets them in a tray and eats then were one pleases, sprawled upon the lawn, under the spreading oaks, or in horrid customary comfort at a table. Never did I so thoroughly appreciate the supreme fitness of the cornucopia as now, while it slowly revolved, so to speak, inside my daughter, as he sat upon the arm of a bench and absorbed it. A tot of fourteen months waddled across to watch is absorption. He had a pink dress, yellow hair, blue eyes and seven teeth. God bless his mother that she let me give him a cookie, for if she had been strictly hygienic it would have been a flaw in the perfect day and I should have lost the consoling demonstration for my second childhood that a hard cookie can be masticated with seven quite small teeth. A larger boy in blue with fat socked legs succeeded. He scorned all provender and only wanted to stare me out of countenance and succeeded passing well.

Though it was the children's land, I felt no more out of element than at the circus. I am morally certain there were other grownups there whose excuse was less than mine, for I felt in my bones they brought borrowed kiddies.

For a nickel we got three tickets that admitted to anything and patronage was first bestowed on the merry-go-round. I don't ride on these contrivances, for there is a portion of me that always gets behind in the movement and --- well, I don't like them --- so Miss unattended mounted a muddy bay steed with anxious eye, which was hotly pursued by a vicious black mare bestridden by a full-blooded Indian in the latest in war paint. As the parade circled I noticed all the horses had a worried expression. Perhaps they were thinking of the Ford automobile or the European war. What a perennial joy is the merry-go-round. The infant rides in a boat, quickly graduating to a quiet horse and thence boldly mounting a bucking Broncho. A small boy go up beside my daughter on the second round and shamelessly eloped with her. From the roundabouts we essayed the donkeys and, after a long wait, while those in the saddle rode out all their tickets, got a venerable ass, who marched with measured tread and slow around a course proscribed by a wire fence. Four times the course was covered with delightful seriousness. At every turn an attendant wheeled the steeds into line and started them in another heat with affectionate adjuration. Billy was invited to "Get along" and Emma implored to "Move up." Though the riders far outnumbered the ridden, absolute good nature prevailed and children, grown-ups and donkeys mixed in a jumble at the end of every heat, that melted into order as if by magic. I had almost forgotten the goats. They go to sulkies and one drives when weary of riding. There is a tub of water for the animals, and when any of them get thirsty they go and take a drink, perfectly oblivious of rider and driver. Should they get weary or hot on the course they stop in the shade of the trees and scratch flies off one leg with the other one, till the pressure behind makes them move on. If I could not be a child in this Playground, I would not mind being a donkey or a goat.

Of course we tried all kinds of swings, but my daughter would not venture down the slide. It was here I noticed that definite fashions belong in the playground. For the slides black stockings and lingerie, also black and clamped to the leg with elastic, are absolutely essential. My girl had the stocking but not the rest, so perhaps that is why she did not slide, for the merry-go-round never slip garters, and short sleeves for the swings. Hats are permissible, but not enregle bows, medium and worn to one side, hair long if curly, but

bobbed if straight. Even these children knew that it was a women's age. Small girls wear pants as to the manner born and small boys wear skirts without a blush.

I took my child to that Playground so that she might have a good time. She did and so did I. When I was permitted, I sat in an atmosphere of childish joy, the Simon pure article unadulterated with grown-up stimulants, while the trees and shrubs made a living wall that held back all those things we would rather our children never knew. Outside was the strife for power and place and across the water men were being fed to cannon. Yes! Playgrounds are a good thing and a hopeful sign. Perhaps after all play, just play, is an important factor in evolution.

San Diego has a most efficient Playground Commission doing great work and this is not to even suggest anything to the contrary, being mere whispers of the trees and flowers that the right setting for a Playground is in a garden and that a playground for children may prove also splendid mental recreation for grown-ups.

August, 1915, Technical World, Vol. 23, 712-18. The Battle for the Gate Receipts, by Walter V. Woehlke.

An exposition is like the Associated Charities. The contributors don't expect their money back. No matter how many millions it costs to build an exposition, the moment the gates are opened the emotionally donated capital investment is written off to profit and loss, to advertising, to the greater glory of the directors, to the benefit of mankind, to any convenient account covering a large, very empty hole in the ground. The only expectation of the stockholders is that there be no assessment. An in this expectation they are often disappointed.

Fifty percent of all expositions have been financial failures, have gone broke, have not made running expenses. Considering the donated, non-returnable capital, few lines of business enterprise can show so dismal a record as the big fairs.

Take a reminiscent look at recent exposition history. Chicago, greatest of them all, did wonderfully well. The White City paid operating expenses and left enough to give the stockholders about \$47,000 of the twenty millions they had donated. The State of New York had the honor of paying the deficit when the gates of Buffalo's exposition closed. St. Louis developed an early and lasting deficit; the federal government had to use the financial pulmotor at Jamestown. Seattle and Portland succeeded in breaking even. And Omaha, large because its capital stock consisting of contributions totaling only \$292,000, accomplished a miracle. When its fair closed, the directors found enough money in the treasury to enable them to pay the stockholders 98 percent of their donations. But the directors did not. Carried away by enthusiasm, they kept the exposition intact and reopened it the following spring. Still, wisdom had not entirely surrendered her throne. They kept the fair open the second season only until the first season's profit was all gone. Then they abruptly banged the gates.

An exposition has two sources of revenue, to wit: gate receipts and percentages on the takings of the concessionaires. This leaves out of consideration the cash bonus paid by many concessionaires for the exclusive privilege of selling a certain article on the grounds. It is in these cash bonuses that the hope which springs eternal in the human breast shows itself at its springiest. In that delirious period before an exposition opens, when everybody in the exposition city devises an infallible scheme to herd the visitors' dollars into his own corral, when the natives move to cheaper quarters to escape the rising rents, and wholesalers cannot fill the demand for cots and extra blankets, in this glorious period the prospective profit to be derived from the exclusive sale of peanuts, portraits, pennants, programs, or poodle pups, gives and increases like the Petrograd reports of the latest Russian victory. Men grow wild with the hope of sudden exposition wealth; they bid against one another, offer every penny their friends can spare for a golden monopoly. The peanut and ice cream concessions at the comparatively small San Diego Exposition, for instance, brought a bonus of \$10,000 cash plus a quarter of the concessionaire's gross receipts. The view book and postcard concession at San Francisco is said to have been sold for \$15,000 and a share of the revenue. The privilege of selling the "hot dogs" of street commerce at San Diego brought \$5,000 plus a percentage.

Still, not every golden opportunity is recognized by the exposition treasure seekers. The San Diego Exposition is enlivened by large swarms of pigeons. Six months prior to the opening a man was hired to tame these pigeons, to induce them to alight on his shoulders and arms, to feed out of his hand. He succeeded, but the exposition found no one willing to sell pigeon feed on commission. The exposition today is itself selling pigeon feed, small quantities of grain at a nickel a bag, and the monthly profit has been averaging \$300.

However, by no means do all of the concessionaires realize their dreams so fully. Most of them find the grass rather short and the pulling hard.

Having paid the cash bonus, having induced members of the numerous tribe whose birthrate is one a minute to supply the bulk of the capital to install the concession, the concessionaire is confronted by the necessity of getting his money back in ten or twelve weeks. The exposition may last from five to twelve months, but in the early and late months of the exposition period all hands tighten the belt and go without breakfast to cut expenses. In three short summer months the average big attraction must take in enough to repay the investment, show a profit and pay the exposition from 20 to 40 percent of the gross income besides.

Out of this situation arises the Great Percentage War.

Suppose a show rakes in \$500 a day. At the usual rate it will have to pay the Exposition \$125. Of course, the showman hates to part with a quarter of his earnings. Therefore, he tries to get a reduction in the percentage. He goes and seeks the director of concessions, taking along a hard-luck story that would lure a quarter out of the pocket of a Russell Sage. If he operates at a loss, he multiplies the deficit by five; if he is making a profit, he trebles his ostensible operating expenses. He begs, pleads, cries, threatens to close up, storms, rants, and prays. If the chief of the concessions department knows his and the showman's business, if his granite heart remains flinty, the concessionaire departs to try another tack.

He practices the gentle heart of stalling. When settlement day arrives and the collector calls for the exposition's share, the concessionaire has no cash, but a most excellent excuse. No matter how often the collector calls, the showman's supply of brand new reasons for not paying never grows less, especially when he really intends to close up and light out. When the Chicago Exposition closed, there stood on its books the sum of \$572,000 in unpaid concessionaires' percentages. It is still standing there. At the Seattle Exposition the management at first collected the percentages once a week. It might have known better, but unfortunately every exposition is operated by men who have never run a fair before. However, the Seattle management learned rapidly. Before long it was collecting twice a week; early in summer it allowed the showmen to retain the money along twenty-four hours, and long before the fair closed, it insisted upon a daily settlement at 9 a.m.

Stalling, though, is but one feature of the Percentage Way. Many concessionaires firmly believe that laws, treaties, contracts are mere scraps of paper on the grounds of an international exposition. They do not hesitate to doctor their books, to bribe cashiers and ticket takers, to tamper with turnstiles and cash registers, if thereby they can seemingly reduce their gross income and the exposition's share.

At San Francisco the concessionaire and showman cannot stall. Unless he pays a flat rate --- in advance --- for doing business on the grounds, he does not take in a single penny. Be it a restaurant, a side show, a novelty counter, or a thrilling ride, employees of the exposition, not of the concessionaire, received all the money. Every night it is carted over to exposition headquarters, the exposition percentage is deducted and the balance turned over to the owner the next morning. The San Francisco Exposition now employs four hundred cashiers trained and instructed in a special school, whose salaries are deducted from the daily receipts along with the exposition's percentage. And these four hundred cashiers are shifted every day.

It is exceedingly difficult to provide an adequate check upon the daily receipts, for instance, of the peanut vendors, the ice cream cone peddlers, and other hawkers. To be absolutely certain of its percentage, the management of the San Diego Exposition built a large warehouse into which all commodities to be sold on a percentage basis have to be delivered. From this warehouse the concessionaires draw their daily supplies, paying the exposition's share of the receipts before the goods are sold. The San Diego Exposition

makes and prints its own peanut bags. Without this precaution bags smaller than the stipulated size might be substituted, thereby depriving the exposition of its full pound of flesh. Even the ice cream cones and the skins of the frankfurters-to-be are carefully counted out to the concessionaires that no part of a single nickel may escape the exposition officials.

The ceaseless struggle for the percentage, though, is tame and colorless compared with the ingenuity displayed by the opposing forces in the daily Battle for the Gate Receipts.

The "gate" is the exposition's most important source of revenue. Usually the admission money constitutes two-thirds of the total income. And the gatemen's idea that an exposition is a profit-sharing institution has caused enormous losses in the past. It is estimated that almost a million dollars went into unauthorized pockets at Chicago; St. Louis claims that more than half a million fell by the gate side, and at smaller fairs the loss has been in proportion.

Of course, no exposition has surrendered the booty without a fight. Elaborate systems of checking and supervision were installed. In the past the double check, or two-man system, was the most popular. One man sold the ticket from the roll and the second man saw that it was dropped into the box on the turnstile, which automatically registered one admission with every quarter turn.

This system was easy to beat. An understanding between ticket seller and ticket taker, a knowledge of crowd psychology --- and the tick was turned. The gateman had no trouble in obtaining all the tickets he wanted from the box. To keep the turnstile record straight, he waited until a crowd swarmed toward the gate and manipulated the turnstile so that two persons instead of one were squeezed into the space between the revolving arms. The public never noticed the trick, nor did a slim man care if the turnstile jammed and he had to squeeze his way between the end of an arm and the wall, thus reducing the number of registered admissions by one.

For the ticket seller and the change maker with a hankering for the unearned increment, it was ridiculously easy to satisfy this hankering even without the ticket taker's cooperation. For the experienced hand it is child's play to shortchange distracted numbers of a pushing crowd. At one gate of the San Francisco Exposition on a dull morning, I saw in half an hour three women put down five-dollar gold pieces at the change maker's booth and rush off without their silver. When there are four or five people in a party and one man, anxious to join the others waiting at the gate, asks for change, he will rarely stop to count the money he receives. And when there are clamorous children along, when the family has to divide and march through separate gates, when the parent's attention is concentrated anxiously upon the devious paths of the little ones, the shortchange artist must feel ashamed to take the easy money.

Some of the St. Louis ticket sellers were ambitious. An extra profit of \$10 or \$20 a day did not satisfy them. They aspired to be financiers. So they established connections with someone having access to the storeroom in which the supply of tickets was kept. When the management after the close of the exposition, investigated the left-over supply, it was discovered that scores of rolls had their hearts cut out; the shell remained, but two-thirds of the tickets had been neatly extracted from the inside. Someone had made thousands of dollars.

Seattle decided to make sure of victory before the Battle of the Gate began. So the management did away with tickets altogether and equipped gates with an electro-magnetic and mechanical triple check. The visitor dropped his half dollar into a slot; descending, the coin at a certain place closed an electric circuit which allowed the guard to throw a lever, thereby making it possible for the turnstile to revolve; and an automatic register in the shaft of the turnstile recorded the number of admissions as indicated by the revolutions.

At first the contraption baffled (Continued on page 804)

August 1, 1915, Los Angeles Times, IV, 11:7. Chapin named to direct Fair; takes place of Davis, who resigned recently; has four years' experience as the assistant; Japanese day draws great crowd of Nipponese

San Diego, July 31. --- Directors of the Panama-California Exposition today appointed E. J. Chapin of San Diego director-general to succeed H. O. Davis, whose resignation given July 1, is effective tomorrow.

Chapin has been acting director-general for the last month. Previous to this he was assistant to Director-General Davis.

Chapin has been employed as director of exhibits and director of transportation for about four years, entering the employ of the exposition when construction was started.

JAPANESE DAY

Japan's flag of a white field and a red sun, 10,000 Japanese lanterns strung from the buildings and festoons of Nipponese designs furnished the decorations today at the Panama-California Exposition, where Japan Day was celebrated with much success.

Diversity was the keynote of the program which began early this morning with the entrance of 5,000 Japanese to the grounds and ended tonight with a kimono parade dinner and aeroplane exhibition.

The Japanese were welcomed at noon by Exposition President G. A. Davidson. Prominent members of the Japanese Association of Southern California, which had charge of the program, responded. This afternoon an athletic program on the Plaza de Panama was engaged in by Japanese and American contestants.

Tonight the association gave a dinner on the grounds to exposition directors and prominent local citizens. Among the Japanese who spoke were U. Oyama, vice-consul at San Francisco, and G. Yuasa, president of the association.

August 1, 1915, San Diego Union, 2:2. Exposition signs Art Smith to make two flights in afternoon and two in evening of August 11 and 12.

Smith's contract provides that he shall not fly anywhere on the coast this season after his engagement in San Francisco, except at San Diego. At the directors' meeting yesterday there was considerable discussion as to the advisability of increasing the price of admission on the evenings of Smith's appearance, the attraction being of such an expensive nature that some of the directors thought it justifiable. This was voted down, however, and the usual price of 25 cents will prevail.

August 1, 1915, San Diego Union, 3:2. Japanese day at Exposition, a red letter day.

Among the events of the day were exhibition flights by two Japanese aviators, games and athletic contests in Plaza de Panama, daylight fireworks in, in the evening, a kimono parade and lantern procession and a banquet at Café Cristobal.

G. Yuasa, president of the Japanese Association of Southern California, said at the banquet: "No matter what criticism may be made, no matter what racial prejudice may exist, no matter what anti-alien land law may be passed by the crooked politicians, no matter what color of hair, skin or eyes, we are just as loyal to this country and just as sincere boosters of Southern California as you gentlemen."

August 1, 1915, San Diego Union, 4:5. Play "War Brides" to be given at Exposition Pavilion next Thursday, Friday and Saturday nights; peace play written by Marion Craig Wentworth.

August 1, 1915, San Diego Union, 5:2. Six hundred Harvard men on way to San Diego on liner *Finland*.

August 1, 1915, San Diego Union, 7:1. Old Chinese and Satsuma ware art given to Park Board by Mrs. Helen Tilden shown at Exposition.

August 1, 1915, San Diego Union, 10:4. E. J. Chapin to assume office of Director-General today.

August 1, 1915, San Diego Union, 11:3. About 1,000 members of Wisconsin and Indiana state societies celebrated jointly their day at Exposition yesterday with a reception in the afternoon at the New Mexico building and a basket picnic last night in the Pepper Grove.

August 1, 1915, San Diego Union, II, 2:2. Millionaire Henry Thaw and party to visit Exposition.

August 1, 1915, San Diego Union, II, 3:2. James Hugh Allen, baritone, sang at Exposition Friday night; will sing again this afternoon at William J. Gompf organ recital.

August 1, 1915, San Diego Union, II, 4:1. "Roosevelt Cabin" in Amazon Forest, part of Brazilian exhibit at Exposition, seed by Teddy Roosevelt on Fair tour.

August 1, 1915, San Diego Union, II, 4:3. Teddy Roosevelt received pictures of self and daughter when he visited the naval exhibit at the Exposition the other day; presented by Miss. Helen Pitkin, daughter of Chief Yeoman George F. Pitkin, who is in charge of exhibit.

August 2, 1915, Los Angeles Times, 5:3. San Diego Fair draws crowds; July broke all attendance records since Exposition was opened.

San Diego, August 1. --- July furnished crowds which broke all monthly attendance records at the Panama-California Exposition, according to official figures made public today by the bureau of admissions. The July attendance was 301,987, a daily average of 3,740. Attendance since the opening to August 1 totals 1,265, 513.

A statement issued by Exposition President G. A. Davidson, which accompanied the report of the bureau of admissions, declared that bookings of large delegations with the natural influx of visitors for August will give this month a total to exceed that of July. With the increase in attendance the statement says that there has been a corresponding increase in patronage of the concessions.

August 2, 1915, San Diego Sun, 1:1-8. City Council to consider plan to let Uncle Sam have tideland property for aviation school and submarine station.

August 2, 1915, San Diego Sun, 3:7. President Davidson announced today that a jury of awards on exhibits at the Fair will sit August 9 and remain in session for a number of weeks.

August 2, 1915, San Diego Union, 1:2. 301,937 persons visited Exposition in July.

August 2, 1915, San Diego Union, II, 1:2. "War Brides" to be staged at Exposition for three days; horror of war in home depicted.

August 2, 1915, San Diego Union, 13:6. C. V. Crandall, San Diegan, writing for "The People's Forum" favors Bryan over Roosevelt.

August 2, 1915, San Diego Union, 14:2. V. F. Safranek led concert by 13th Coast Artillery Corps Band in the Plaza de Panama yesterday afternoon and evening.

August 3, 1915, San Diego Sun, 1:5. Billy Sunday is coming to speak at Exposition; Monday is to be "Sunday day: at Exposition.

August 3, 1915, San Diego Sun, 8:1:2. Dr. Eugenio Dahne, in charge of Brazilian exhibit, urges Fair be kept open in 1916 and that Colonel Collier be honored: "It was my admiration of the energy and perseverance with which he preached 'San Diego Exposition' during the six-month tour he made with me through Brazil and through Uruguay, and during the frequent occasions we were together in New York and Washington, that made me have faith in the success of the San Diego exposition."

August 3, 1915, San Diego Sun, 11:1. Haydn Choral Society of Chicago to sing at Exposition tonight.

August 3, 1915, San Diego Union, 3:5-6. City will offer 500 acres tidelands for naval base; area valued at \$10 million; Councilman Fay originates plan.

August 3, 1915, San Diego Union, 5:6. Exposition employee sued for \$10,000 because of false arrest.

August 3, 1915, San Diego Union, 8:3-4. Chicago Haydn Choral Society, 146 strong, will sing with Spreckels Organ at Exposition tonight; special train due this morning from San Francisco.

August 3, 1915, San Diego Union, 8:5. Exposition award jury to convene August 9.

August 3, 1915, San Diego Union, II, 1:1. Nazimova makes "War Brides" scenes real; actress fitted to enact death scene of slain soldier's wife.

August 4, 1915, San Diego Sun, 1:5-6. Louis J. Wilde urges special day for Colonel D. C. Collier; exposition directors voted in special session that no special days be held for persons connected at any time with the exposition project.

August 4, 1915, San Diego Sun, 6:3. F. Weber Benton writes letter supporting Collier day.

August 4, 1915, San Diego Sun, 7:2-4. Article on Art Smith who will write his name on the sky at Exposition August 11 and 12.

August 4, 1915, San Diego Union, 2:3. Pretty Wyoming, Colorado girls charmed with Exposition; prize winners in newspaper popularity contest.

August 4, 1915, San Diego Union, 5:1. Chicago singers charm big crowd at Exposition, by W. B. Seymour.

The concert last night was given under conditions that were not of the best. Probably because of atmospheric peculiarities the tones failed to carry as far as is usual and whirring electricities, shouting children and crying babies had no small part in spoiling the effect of otherwise effect pianissimo passages.

August 4, 1915, San Diego Union, 5:3. Typographers coming today; San Diegans to entertain officials of International Typographical Union; main body will arrive in San Diego August 14 for a three-day stay.

August 4, 1915, San Diego Union, 5:3. Pythians to have day at Exposition August 21; crowd of Angelenos coming.

August 4, 1915, San Diego Union, 7:4. Ford day to attract throng; factory band will come from Detroit for celebration Monday.

August 4, 1915, San Diego Union, 8:2-3. City right to give tidelands for naval base declared legal.

August 4, 1915, San Diego Union, 14:2. Thirteenth Coast Artillery Band moves from Fort Rosecrans to Exposition where members will camp at tractor field; they will give afternoon and evening concerts everyday except Monday.

August 4, 1915, San Diego Union, II, 1:2-3. "War Brides" stirs interest; drama to open tomorrow.

August 5, 1915, San Diego Herald, 2:1. Naval Headquarters.

August 5, 1915, San Diego Herald, 2. EDITORIAL: Collier Day

The suggestion made by the **Sun** that one day at the Exposition shall be designated "Collier Day" is meeting with hearty approval by the people generally who feel that Charlie Collier did more to make the Exposition a success than any other man. Other men have done noble work for the Exposition, but none sacrificed so much, and none got so little in return.

Men are too often measured by their personal success, but the generous man finds the cozy corner in the hearts of his fellow men. D. C. Collier in his work for the Exposition did it for the public good, like L. J. Wilde did in boosting San Diego. Neither of these men did their work for a selfish purpose, and the result is that they have more warm personal friends than any other two men in the city.

By all means let us have a "Collier Day" at the Exposition.

August 5, 1915, San Diego Herald, 1:2. Exposition Notes

With heavy influx and liberal patronage on the Isthmus the San Diego Exposition has just enjoyed another profitable month for attendance figures for July show that the Exposition was visited by 300,980 persons during the month. This is by far the biggest monthly attendance since the Exposition was opened January 1. With such heavy attendance and liberal spending of money the Exposition was able at the end of July to have a big balance on the profit side of the ledger. Including July 1, 264,561 people have visited the Exposition.

July's average daily attendance was 9,707 --- a much higher daily average than any previous month. The total for July exceeds that recorded in January, the previous high month, by just 120,710. This excess is almost equal to the total attendance of February. The attendance by months since opening is as follows:

January, 180,270; February, 133,168; March, 153,042; April, 151,148; May, 179,818; June, 166,135; July, 300,980.

While the month was featured by several special events which drew crowds the attendance for the days immediately following the celebration days was heavy, thus indicating to Exposition officials that there was an influx of visitors continuing. The Exposition information bureau has just compiled statistics which show that visitors are remaining longer in San Diego than they did during the first months of the Exposition. The average visit of early sightseers was two days, but in June and July the average visit was lengthened to four days.

One of the most spectacular events of the San Diego Exposition year is promised Exposition visitors August 25, 26, 27 and 28 when the Pala Indian tribe from its reservation in San Diego county will hold its annual fiesta on the grounds of the Exposition.

The entire tribe of about 100 aged Indians and 400 younger braves and squaws and children will be transported by automobiles and motor trucks to the fair and there go into camp about their fiesta allotment of space. Here throughout the four days and nights they will celebrate beginning August 26, in memory of the anniversary of their patron saint, Father San Luis Rey.

The elders will deck themselves in full gorgeous costume and engage in their ancient dances and rites and many of the younger braves also will join though scores of them have so felt the influences of civilization that they confine their activities more generally to the athletic game of Pelote and the all-night gambling game of Peon.

Combined with their celebration, a number of their craftswomen will demonstrate their method of making fine lace, a handicraft in which the women of the tribe excel those of any other Indian women. Basket weaving and pottery making also are important handiworks of these women.

The Delta National Collegiate Sorority had its day at the San Diego Exposition July 30, with 160 of the sorority girls arriving by special train to observe the day. They were elaborately entertained, the San Diego chapter having this in charge.

August 5, 1915, San Diego Sun, 1:4-5. Chamber of Commerce directors for Collier day.

August 5, 1915, San Diego Sun, 12:1. Veterans will gather at Exposition August 13, the 17th anniversary of the surrender of Manila; parade from foot of Broadway to Exposition grounds; Ford day, Monday; parade of Ford cars from foot of Broadway; appearance of Ford band; also Billy Sunday day and Manhattan day (in honor of president of borough of Manhattan).

August 5, 1915, San Diego Union, 3:6. Cyrus McCormick, Harvester king, at Hotel del Coronado for three days; will visit Exposition.

August 5, 1915, San Diego Union, 7:1. Nazimova to play "War Brides" tonight.

August 5, 1915, San Diego Union, 8:1. Lieutenant Governor de Baca of New Mexico, visitor at Exposition.

August 5, 1915, San Diego Union, II, 1:1. City Council will offer Navy 500 acres of tidelands.

August 6, 1915, San Diego Sun, 9:3. Saturday, August 7, program: Nazimova day; Marian Craig Wentworth, author of "War Brides," to give address; Commercial Law League of American day; Children's day.

August 6, 1915, San Diego Union, 3:2. Four students of University of Minnesota busy at Exposition yesterday taking motion pictures; pupils paid for trip by lecturing on the way.

August 6, 1915, San Diego Union, 4:2. Famous Indian dances will feature close of "War Brides" Saturday; Red Men from Painted Desert to entertain crowds at Exposition.

Through the courtesy of manager D. E. Smith of the Painted Desert, Indian ceremonial dances will be given at the Isthmus band stand Saturday evening after the performance of "War Brides" by Madame Alla Nazimova. The Indian dances will be free.

The dances will consist of part of the Rain Dance by the Navajos, part of the Eagle Dance by the Acomas, and a part of the famous Buffalo Dance by the Hopis. The Buffalo Dance will be the same as that given in honor of Colonel Theodore Roosevelt on his recent visit to the Exposition. The entire company of Indians of the village will partake in the different dances. The performance will take about thirty minutes.

This will be the first time the entire troupe of Indians at the Santa Fe exhibit will have given a complete free performance of the various dances used in their ceremonials.

August 6, 1915, San Diego Union, 5:5. Dr. Humphrey Stewart will return Wednesday.

August 6, 1915, San Diego Union, 8:2-3. Skirtless girls dance at Indian Fiesta at Pauma Indian Reservation; "Um No Good" maids stopped.

August 6, 1915, San Diego Union, 8:3. Open Forum Fair day scheduled August 15. George W. Coleman, acting mayor of Boston, will speak at the meeting which will be called to order at the organ pavilion at 4 p.m. His topic will be "An Experimental Democracy."

August 6, 1915, San Diego Union, 8:4. Tragedy of war at home shown in drama; heartbreaking part borne by women depicted at Exposition; thousands view play.

Mme. Alla Nazimova and her company opened their engagement at the Panama-California Exposition last night in "War Brides" before an audience of at least 5,000 persons who gathered at the Spreckels pavilion to hear and see the great Russian actress. "War Brides" will be repeated tonight and tomorrow night.

August 6, 1915, San Diego Union, II, 1:1-2. Ford Company promises City factory branch; big day at Exposition planned; Ford cars will be admitted free.

August 6, 1915, San Diego Union, II, 1:3. Charlie Collier to introduce Billy Sunday tomorrow at 2:30 p.m. during charity game at stadium.

August 6, 1915, San Diego Union, II, 1:3. Professor Alvin Martin of Stanford University gave lecture on Brazil yesterday afternoon in auditorium of New Mexico building.

August 7, 1915, San Diego Sun, 1:1. Twenty seven legislators and their wives see Exposition; George Burnham, exposition vice president, tenders reception.

August 7, 1915, San Diego Sun, 1:1. Solons see Exposition; National Rivers and Harbors Committee entertained at San Diego today.

August 7, 1915, San Diego Sun, 6:4. Ford day to draw crowd; 55-piece band, every member a Ford worker; Fords admitted free, owners must pay.

August 7, 1915, San Diego Sun, 7:1. Nine college heads as Exposition judges; will convene Monday.

August 7, 1915, San Diego Sun, 7:3. Harvard day, August 16; about 300 Harvard men, wives, sweethearts and friends due August 15 on arrival of liner *Finland* from New York.

August 7, 1915, San Diego Sun, 7:3. Ceremonial dancers of Indian tribes offered tonight at north Isthmus band stand; arranged by Superintendent D. E. Smith of the Painted Desert; Navajo rain dance, Acoma eagle dance, Hopi buffalo dance.

August 7, 1915, San Diego Union, 1:5, 2:4-5. Billy Sunday has arrived to speak at Exposition; "Butterfly Chasers" Exposition theme

August 7, 1915, San Diego Union, 1:2, 2:1. Congressional party of Rivers and Harbors Committee arrived in San Diego last night; William Kettner came with party.

August 7, 1915, San Diego Union, 3:2. Exposition boost car on northern trip; party will advertise Fair in Idaho, Washington and Oregon.

August 7, 1915, San Diego Union, 4:3. EDITORIAL: San Diego Growing.

The registration for San Diego county as officially announced at Sacramento are especially gratifying. The county has now 50,000 registered voters, as against 42,753 a year ago, a gain of 7247. The very natural explanation of this great increase is not that old residents of San Diego have suddenly become alive to civic duty, although possibly some have, but rather that of the great throng of newcomers during the past few months, many have decided to here permanently, and have registered so as to be able to do their part as citizens. The large gain in registration, too, strongly suggests that the latest estimates of the city's population --- from 90,000 to 100,000 --- have substantial basis. When the voting list thus grows by leaps and bounds, the gain means more people here for good. It looks very much as if the Exposition, which was expected to attract transient visitors only, were proving a town builder.

August 7, 1915, San Diego Union, 7:2. Play Ball! Billy Sunday's order today; Cuyamacas and Banders ready for diamond battle; marine band will head parade of teams on way to stadium.

August 7, 1915, San Diego Union, 7:2. Harvard men plan to greet visitors; liner *Finland* will arrive with University party August 15.

August 7, 1915, San Diego Union, 8:4. Fair will honor Nazimova today; another big crowd witnessed "War Brides" performance at Exposition; Mrs. Marion Craig Wentworth, the Santa Barbara woman who wrote the play, will give a short talk before the performance.

August 7, 1915, San Diego Union, II, 1:1. New Mexico to observe educational days at Exposition August 11, 12 and 13.

August 8, 1915, San Diego Union, 1:3, 4:7-8. Bankers humble Cuyamacas; umpire Billy Sunday quits field of errors; charity aided by ball game.

August 8, 1915, San Diego Union, 1:5-6. Congressman S. M. Sparkman says Harbor of Sun to get funds required to improve harbor.

August 8, 1915, San Diego Union, 3:1. Jury of awards will pass on Fair exhibits.

August 8, 1915, San Diego Union, 3:2. Art Smith refuses appeal to join Allies; birdman will circle tower of California Building every flight.

August 8, 1915, San Diego Union, 5:2-4. "Acoma Rock" twin at Fair, New Mexico building unique.

New Mexico's building at the Panama-California Exposition is unique. Among the buildings of mission architecture it owes nothing to California. It is typically a New Mexico mission, a blending of Spanish colonial and Indian types. The prototype of the building was the old mission on the rock at Acoma, and it is more than 100 years older than San Diego mission, the first founded in California, which Father Serra established in 1769.

The structure is of adobe, covered with concrete. It probably will endure for centuries and it is the intention of the New Mexico commission to leave it to the people of San Diego to use as they wish, if proper use for it can be found.

The building faces the rising sun, just as the old pueblos of New Mexico do. It has two wings, connected by a loggia, which is entered first. The wings have two stories, the loggia one. With a wall in the rear they inclose a patio, where California flowering blooms. The rear of the building is seen from Puente de Cabrillo, the great bridge spanning Cabrillo canyon, which leads from the Laurel street entrance to the Exposition grounds.

With the exception of a second-story exterior portico and doors and windows to relieve the severity of the facade, the building is a faithful and exact reproduction of the mission of Acoma. Two bell towers on the south wing inclose another portico. The added portico is on the north side of the building. It is modeled on the old mission of Cochiti. Between the two wings, above the loggia, there is an open balcony. Both porticos and the balcony are fitted for visitors who wish to enjoy the view of the city, bay, Coronado, Point Loma, the Coronado islands and the ridges of mountains rising in serried terraces far into Mexico.

The New Mexico building is New Mexican thoroughly. Graceful arches and shadowy colonnades of California mission architecture are lacking. Lines are crude and blunt, even where an effort has been made to round them into something approaching grace. This is due, of course, to the faithful following of the Acoma model. The bell towers leave the impression of blindness; they lack the expression of similar towers on California missions.

Projecting from the concrete are the blunt ends of ceiling beams, whose naked brown inside the building gives a peculiar distinction to the interior. In this projection the building follows the Indian pueblo plan. Were the tree trunks cut off sharply with the adobe, rain and wind would find crevices to enter the

walls and eat away the soft brick. When the beams set their shoulders through the walls they give added strength.

One enters the building from La Via de los Estados, which also reaches the other state buildings of the group. The loggia receives the visitor.

It contains four exhibit cases, filled with specimens of New Mexico minerals. Too large for any case, a great block of copper-bearing porphyry stands directly in front of the door. The native metal runs in ruddy veins through the tawny rock. There are numerous other forms of copper, some of volcanic origin in gnarled forms.

There are hundreds of striking color effects among the minerals. Gold, gleaming and dull; white silver; orange and red iron pyrites; black coal; purples and grays; white meerschaum; turquoise gems. There are multitudes of specimens, every commercial mineral found in the state being shown. There is one large block of coal, weighing 3,000 pounds, which is reputed to be the largest ever taken from the ground. It is in the patio of the building.

The loggia flashes with other colors too. There are striking Navajo rugs, which visitors often inquire if they are genuine, chimayo as hangings, Indian plaques, woven of brilliant straws in strange designs, Indian pottery. There are many photographs of New Mexico scenes on the walls and in the offices of the building, which are on the right as one enters, are other rugs, hangings, pottery, Indian bows and arrows and striking paintings of scenes of the state.

A passage leads from the loggia to the right, past the offices to the reception rooms, where all visitors are asked to register. Women guests find here all conveniences, with music if they wish it. These rooms also are decorated with Navajo rugs and hangings.

Occupying the major portion of the north wing of the building downstairs is the hall of governors, so named because the portraits of many rulers of New Mexico, Spanish, Mexican and American, look down from the walls. Among them is General Lew Wallace, who wrote portions of "Ben Hur" in the Palace of the Governors in Santa Fe, when he was governor of the territory.

In the Hall of Governors are six models, strikingly exact and true to detail. The ancient pueblo of Quarai and its mission church; the pueblo of Pecos and mission; the old church of San Miguel at Santa Fe, reputed to be the oldest church in the United States still used for religious purposes. Bent's fort on the Santa Fe trail, built by that adventurer in the early days; the mansion of Lucius B. Maxwell, early land king who was host to many who passed down the trail to Santa Fe seventy-five years ago, and a Spanish torreon or fort built at Santa Fita to confine the convicts of the copper mines and to guard the bullion while it was awaiting shipment.

On the second floor, above the Hall of Governors, is the old exhibit of the United States forestry service at the Exposition. A deputy superintendent is in charge, being stationed there to explain the exhibits and work of the forestry service. The walls are decorated with photographs of New Mexico scenes, principally of forests. There are cross and longitudinal sections of trees.

There are several models. One depicts the effects of deforestation. On one side, water falls through foliage, leaving the soil unharmed when it flows away, and bringing no destruction to the farms and dwellings below; on the other, it strikes the denuded hillside, erodes the soil and brings floods to the valley.

There also is a model forest preserve in miniature, showing irrigated farms, standing timber, telephone lines, trails, fire lookout stations, hill and canyon and stream. A model of a lookout tower of the rangers, supplied and tools furnished the men, a full-size platform of a tower and other things connected with the service are on exhibition. The operation of the heliograph and the method of locating a fire exactly through observations from different stations are interesting phases of the exhibit.

The exhibit is designed to make the public acquainted with and in sympathy with the work of the departments and to get in touch with prospective timber buyers and others having business relations with the government.

An automatic stereopticon machine shows slides throughout the day, each bearing on forestry, and each carrying an accompanying text which drives the lesson home.

Returning downstairs and crossing the loggia to the south wing of the building, the visitor enters the auditorium. This is a severe little chapel. At one end is the alcove; at the other a balcony for the motion picture machine and operator. On the floor are seats for visitors.

In this auditorium are given many lectures and motion picture shows daily. The subjects range from the operations in the Santa Rita copper district to the annual fair of the Navajo Indians at Ship Rock, New Mexico; from coal mining to views of the educational institutions of the state; from pueblos and missions to agricultural activities; from artesian wells and irrigation to views of modern towns in New Mexico; from lectures on the different counties of the state and their resources and opportunities to sacred dances of the Indians. A total of 20,000 feet of film and 3,000 slides are used in connection with the lectures.

The chapel is a faithful reproduction of that of the old Acoma mission. Its ceiling is the usual brown-timbered one of the building. Its walls are the usual white; but they are relieved by many oil paintings, some very old church paintings, and water colors. Some of the oils are large, they are of the ruins of New Mexico, such as the pueblos of Quarai and Grand Quivira. Others are three striking ones of Acoma. The rocky path, a stairway of cyclopean size, leading to the summit; the top of the rock, showing the dim outlines of the mission and pueblo; and the mission itself. The work of many artists is represented.

There also are many water colors of buildings of old Santa Fe, having an architectural as well as a picturesque interest. The New Mexico building is well worth the visit of both tourists and residents.

August 8, 1915, San Diego Union, 8:1. Exposition will observe Admission Day anniversary.

August 8, 1915, San Diego Union, 10:4. Catholics to have day at Exposition, September 19.

August 8, 1915, San Diego Union, 11:1. Ford Motor Band to play at Fair today and tomorrow; 13th Band Coast Artillery will play on Plaza de Panama this evening.

August 8, 1915, San Diego Union, 11:4. Ford day at Exposition; all Ford cars admitted free.

So many Fords are expected at the grounds that to avoid misunderstandings or accidents several regulations have been set down by Exposition executives.

August 8, 1915, San Diego Union, II, 1:2. Five hundred tribesmen from all parts of Southern California to hold powwow at Fair August 25 - 29; Miss Salvadora Venezuela of Pala will act as quartermaster during stay of Indians.

August 9, 1915, San Diego Sun, 6:2. Lincoln Beachly did utmost in aerial stunts at San Diego Exposition and finished safely; Will Art Smith be as fortunate?; will fly Wednesday and Thursday at 4:00 p.m. and 9:00 p.m.; says machine is of his own design and engine specially constructed.

August 9, 1915, San Diego Sun, 9:1. President Emma Wooley of Mount Holyoke College, Massachusetts, guest of honor tomorrow; will lecture on education at Public Service Hall in Science of Man building at 11:00 a.m.; Mayor Capps on Saturday will select San Diego's 25 most beautiful women; acting Mayor George I. Coleman of Boston will be guest of Exposition on Sunday and will speak at Organ Pavilion at 4:00 p.m. in Open Forum day program.

August 9, 1915, San Diego Union, 1:2-3. Famous little automobile, spectacular evangelist and Manhattan day, Fair lures; Billy Sunday to drop bombs of denunciation on sinners who traverse rosy trail; Fords will be admitted free.

August 9, 1915, San Diego Union, 3:2. Marcus M. Marks, president of the Borough of Manhattan, Exposition guest.

August 9, 1915, San Diego Union, 5:1. Ford Motor Band of Detroit gave two concerts at Exposition today in Plaza de Panama..

Henry Ford's band, like his cars, like his spirit of philanthropy, is for the common people. It is devoid of frills, but it's sturdy, and above all its programs are appreciated. Liberal applause at each number testifies to this.

August 10, 1915, San Diego Sun, 6:1. Art Smith will arrive tonight; will give exhibitions of "aerial insanity" Wednesday and Thursday; will lecture on aviation and explain his machine at all performances.

August 10, 1915, San Diego Sun, 7:1-2. Billy Sunday talked to thousands, one and one-half hours, in front of organ yesterday afternoon; his friends say Sunday did not really warm up; he lost his cap several times on account of his exertions; he writhed, danced, twisted, jumped, perspired, spit and howled, but persons who have seen him in the mist of a hard campaign said, "You have not seen the real Billy Sunday."

August 10, 1915, San Diego Union, 3:1. Idle rich hubbies pet dogs' rivals, Sunday says; Painter's colic lurks on average girl's cheek, throng at Fair told; "Learn to praise wife"; "bachelor thinks he knows more about raising kids than did Brigham Young."

Billy Sunday made his first evangelistic address to a San Diego audience yesterday afternoon when he spoke to 5,000 persons from the platform of the Spreckels music pavilion at the Panama-California Exposition.

Sunday took as his subject "Butterfly Chasing," but he frequently digressed from his theme to relate some stories of his baseball days. The evangelist was introduced by George Burnham, vice president of the Exposition, who characterized Sunday as the world's greatest human dynamo.

Before ascending the platform Sunday criticize the height of the speaker's desk and made the carpenter saw two feet off the legs before nodding his approval. In greeting the newspapermen he was asked if he would replay to Doctor Aked upon his arrival at San Francisco Thursday.

"I'll pay as much attention to Doctor Aked as I would to a saloonkeeper or dive owner," said Sunday.

The evangelist flayed the idle rich and their methods of living, especially the women. "Some of these rich women know more about gambling, poker chips and wine than they do about the decent things of life. Others pass their time hugging and kissing a brindle-nosed bulldog and then wonder why their husbands pass all their time at the club. No man cares to play second fiddle to a pug-nosed bulldog.

"The average girl is fast becoming a pagan. Kiss some of these girls and a fellow would dies of painter's colic. All they know about music is sitting down at the piano and batting out 'Does Spearmint Lose Its Flavor on the Bedpost Over Night?' They flirt with the first simp that comes along and turn their homes into third-class booze joints.

"There are some women who pay \$25 for a taxi ride and then go home and borrow 25 cents from the hired girl to start the gas meter. If some of you women took the false hair off your head you would look like a humming bird in a rainstorm.

:I don't think there is anything worse than the brute who does not know how to treat his wife. If some men would talk to a waiter like they do to their wives they would be toothless in less time that it would take to tell about it.

"I want you husbands to praise your wives at home, even if it does frighten her for the first time. If you want your wife to be an angel, treat her like an angel. Love is something that you can't quarantine. It may strike any place at any time. There is not such thing as an old maid. They are merely ladies in waiting. It is far better that they remain ladies in waiting than to become the wife of some whiskey-soaked old jug handle. All some men marry for is to have someone to sew buttons on their 'britches; or cook a beefsteak. Give your wife a fair spending account. It's a safe bet she will have money to lean you when you are on the hog.

"Many a man saved his money to buy a rosewood casket for his wife when it should have been spent in employing a hired girl. It is the women who have baked all the sponge cake, who, in fact, have kept the church steeples in this country from falling down. They have taught us men how to sing, to pray, to live.

"If there is any woman in the mire, some man has pushed her there. A man who destroys the virtue of a woman should be shot on the spot. He is not fit to live.

"I believe women should dress neatly, but sanely. Some wives go around the house looking like a feather mattress with a string tied around it, and then wonder why their husbands don't stay at home.

"Some people know too much, others too little. For instance, a bachelor thinks he knows more about raising kids than did Brigham Young.

"Be firm in your purpose, in your opinions. I know some men who are Methodists at noon, Baptists at 2, Episcopalians at 4 and go to bed a howling infant at 8. The worst bankrupt in the world is the man or woman with a bankrupt character. Better wear corns on the march to heaven than to trod carefree the primrose path to hell. I expect that a lot of you molycoddles, four-flushers and hangers-on are sore at what I say. Come up here and I'll pay your admittance fee."

Concluding his address, Sunday spoke of his conversion 28 years ago and of his meeting and subsequent marriage to Mrs. Sunday.

"How long ago was that, Ma?" asked the evangelist, turning with a smile to his wife and two boys who sat behind him.

"Twenty seven years," said Ma, and the crowd shouted its approval.

"I've been on Ma's trail ever since," said Billy, which again brought forth a shout of amusement.

"I want you fellows to cut out cigarette smoking," said Sunday, as he spotted a man in the crowd smoking a pill. "If you don't cut out the cigarettes you will wake up some day with your brains on the pillow. Smoke a pipe or cigar, if you wish, but cut out the cigarette."

Sunday will leave at noon for Portland, stopping at San Francisco for a two-day stay. From Portland he will do direct to Omaha.

August 10, 1915, San Diego Union, 9:2. Miss Frances de Villa, concert pianist, was heard in recital in Exposition Public Service Hall.

August 10, 1915, San Diego Union, 9:1. President Marks spoke, New Yorkers entertained at Manhattan day celebration at Exposition.

August 10, 1915, San Diego Union, II, 1:1. Manhattan folk hold celebration at Fair.

August 10, 1915, San Diego Union, II, 1:2. Miss Francis de Villa will give piano concert in public service hall of Science of Man building this afternoon.

August 10, 1915, San Diego Union, II, 1:5. Ford car parade Fair day feature.

August 10, 1915, San Diego Union, II, 1:5. Exposition files \$1,000 suit against Rex B. Clark of Julian who failed to pay for stock; Exposition's third action.

August 11, 1915, San Diego Sun, 1:4-5, 2:4-5. Smith says aviators should learn loop-the-loop.

August 11, 1915, San Diego Sun, 2:3. Archaeological Institute of America to hold session at Fair; Professor F. W. Shipley, president of Institute, to give talk on Roman portrait sculpture at 8 p.m., Thursday, in Science and Education building Assembly Hall.

August 11, 1915, San Diego Sun, 9:1. The Park Board today closed to vehicles West Land Avenue in Balboa park from Quince to Juniper to prevent congestion and destruction of lawns and shrubbery by automobiles during Art Smith's flights this afternoon, tonight and tomorrow; obstructions will be removed early Friday; John Forward declared that automobiles running upon the lawns and into the flower gardens when Lincoln Beachly flew and on Schumann-Heink night did damage amounting to \$1,000; "There is not a 'keep off the grass' sign anywhere in the park, and now that we have one of the finest parks in the United States, we want the people to use it. Picnic parties are always welcome and we want all the children of San Diego to play on the lawns in the groves and to visit the gardens. It is a park for the people, but we do not, of course, want automobiles to destroy the work we have done, and to inconvenience people who are not in automobiles on crowded days and nights."

August 11, 1915, San Diego Sun, 9:1. Marine barracks at Exposition will resume its drills on Plaza de Panama and Marine Band will again give concerts; Forth Regiment back from Mexican waters where they were carried aboard the flagship *Colorado* to induce the Yaqui Indians to respect Americans.

August 11, 1915, San Diego Union, 3:2. Art Smith to write "San Diego" in sky; birdman will try record smashing loops.

August 11, 1915, San Diego Union, 8:2. Second Battalion, Fourth Regiment, U.S. Marines, returns to Fair grounds.

The Second battalion, Fourth regiment, marines, Major W. N. McKelvey, commanding, which returned from the west coast of Mexico a few days ago and remained aboard the *Colorado* awaiting disembarkation orders from Washington came ashore yesterday evening and settled down to the old routine at the marine barracks in the Exposition grounds. The parades on the Plaza de Panama, which have been a big attraction for visitors, will be held on Thursdays, Fridays, Mondays and Tuesdays.

The marines will resume their old duties at the barracks, but Admiral Howard is vested with authority by the Navy Department to take them aboard the *Colorado* again in case he is called upon to make a quick dash to Mexico.

The battalion has received two four-ton auto trucks, which hereafter will be part of the regiment's equipment, and they were first used yesterday in hauling implements back to camp from the wharf. In addition to capacity load, each truck towed two three-inch rapid fire guns.

The companies composing the battalion returning to the barracks are the 25th (artillery); 28th (automatic rifle). Captain E. E. Miller, who joined the regiment since the marines departed for the late expeditionary duty, has assumed command of the 28th company.

Lieutenant R. E. Davis of the 25th company has been appointed by headquarters at Washington to act as marine corps aide to President G. A. Davidson of the Panama-California Exposition.

August 11, 1915, San Diego Union, 14:1. Archaeological body to open sessions at Exposition today; Professor F. W. Shipley, president, arrives for two-day meeting of organization; Rome lecture, feature; George Hempi of Stanford will discuss research work in Mediterranean.

The California meeting, divided between the Expositions in San Francisco and San Diego, is the first to be held by the Archaeological Institute of America west of Chicago, and marks the period of rapid extension of the work of the national organization over the Pacific coast. It is through this organization that the Exposition exhibits in the Science of Man, Indian Arts, Ancient America and fine arts were prepared for the San Diego Exposition, the Institute having detailed its director of American archaeology to the Exposition for four years for that purpose.

August 11, 1915, San Diego Union, 14. Charles Brown, wealthy property owner, was made defendant yesterday in a suit brought by the Panama-California Exposition to recover \$500 alleged to be due as a subscription for stock in the Fair.

August 11, 1915, San Diego Union, 14:4. New Mexico educators due at San Diego Fair; special meeting of visitors will continue for several days.

August 12, 1915, San Diego Herald, 1. Sunday Open Forum Day at the Expo; the most democratic meeting which has ever been held at the Exposition: The Open Forum had its rise at Cooper Union, New York. . . . The chief thing about the Open Forum is to make it a people's meeting. There is always a chief speaker, but the audience has a comeback. That is the reason for the questions from the floor.

August 12, 1915, San Diego Sun, 6:1-2. Is Art Smith crazy? That word doesn't express it; tempts death hundreds of ways in air.

August 12, 1915, San Diego Union, 3:2. Doctor C. J. Hexamer of Philadelphia, president of German-American Alliance, visits Exposition.

August 12, 1915, San Diego Union, 6:1. Spanish veterans will celebrate at Exposition; General Wankonski, department commander, to appear in parade today; music, oratory, program; camp luncheon; organ recital; features planned for big day.

August 12, 1915, San Diego Union, 7:3. "Beauty Carnival" to be held on Isthmus Saturday evening; Mayor Capps to test skill as "sweet girl" judge.

August 12, 1915, San Diego Union, 8:2. Educational work in New Mexico described; Miss Albright sings.

August 12, 1915, San Diego Union, 16:1. Caroline M. Lowe from Cleveland will give a recital at Spreckels organ this afternoon.

August 12, 1915, San Diego Union, II, 1:1. Educators meet at New Mexico building; half of county school superintendents attend gathering; music program given; public lecture series will be Exposition feature today.

August 12, 1915, San Diego Union, II, 1:2. H. W. Wilcox was the defendant named yesterday in the daily suits being filed by the Panama-California Exposition Company to collect on subscriptions alleged to be due on stock in the Fair; thousand dollars due Fair Company, claim.

August 12, 1915, San Diego Union, II, 1:2-6. Art Smith, aviator, did stunt and night flying at Exposition; Indiana aviator's night flying declared marvelous; spectators hear talk.

August 13, 1915, San Diego Sun, 13:5. City is "broke"; funds depleted; Councilmen puzzled; may cut own salaries.

August 13, 1915, San Diego Sun, 14:1. Admission Day to be observed September 9; Native Sons and Daughters of California and Pioneer Society of San Diego County planning event.

August 13, 1915, San Diego Union, 8:1. Educational work in New Mexico described; schools of nations to be under one board predicts Dean Frank Caroon of the New Mexico Normal School; Miss Claude Albright, contralto, sings; normal institutions reach high mark, declaration at Exposition.

August 13, 1915, San Diego Union, II, 1:1. Veterans of Spanish-America war to celebrate; military parade to begin exercises; free dinner arranged.

August 13, 1915, San Diego Union, II, 1:3. Birdman repeats "aerial insanity" at Exposition; mother prevents girl from flying with Art Smith; fourteen loops made.

August 13, 1915, San Diego Union, 14:2. Organist at Fair returns today.

August 14, 1915, San Diego Sun, 3:1. George W. Coleman to speak tomorrow at Exposition organ at 4 p.m. on "An Experiment with Democracy."

August 14, 1915, San Diego Sun, 9:2. Monday, August 16, Washington State Day, International Union Typographical Union Day; Mrs. Elizabeth Towne to lecture on "New Thought and World Peace" at organ at 8 p.m.

August 14, 1915, San Diego Union, 1:5-6. Liberty Bell coming; H. V. Darnell of Philadelphia, the man who will bring the Liberty Bell to San Diego; Special agent of Pennsylvania Railroad who brought Independence memento to Pacific coast, renews old friendships in San Diego.

August 14, 1915, San Diego Union, 2:2. Spanish-American War Veterans celebrate 17th anniversary of surrender at Manila.

Veterans of the Spanish-American war celebrated yesterday with a parade, a patriotic meeting at the Spreckels music pavilion and a luncheon was served the veterans at the marine barracks at the Exposition.

The parade of the veterans, augmented by city police, a battalion of the national guard of California, a battalion of the coast artillery corps, sailors from the cruiser *Colorado*, U.S. marines and officers and men of the First Cavalry, was the feature of the day. The military pageant was viewed by thousands on its way to the Exposition and was given an ovation all along the line. Colonel J. H. Pendleton acted as grand marshal and Captain C. H. Lyman was his chief of staff.

Admiral Thomas Benton Howard and his staff officers, Commodore Guy Brown, Admiral H. M. Manner, Captain A. A. Ackerman, acting President George Burnham of the Exposition, O. C. Wilson, department judge advocate, U.S.W.V.; R. H. Harris, commander of the Bennington camp; D. P. Storm, past supreme officer and aide-de-camp on the staff of the commander-in-chief, reviewed the parade from the steps of the Sacramento building at the Plaza de Panama.

Following the disbanding of the parade at the Plaza de los Estados a meeting of which the features were patriotic addresses and music was held. Doctor Humphrey J. Stewart, official organist of the Fair, had promised the veterans he would be home in time to play for them and he was true to his word. The great organ was made to give forth patriotic pieces of all kinds and Doctor Stewart was given hearty applause by the men.

Orators vied with one another in outbursts of patriotism. And each reference to the flag was the signal for cheers. Acting president George Burnham of the Exposition delivered the address of welcome. Hundreds of veterans from different parts of the country were present to help their San Diego brothers celebrate and he made them feel at home.

(Burnham's speech follows.)

Colonel R. V. Dodge acted as chairman of the meeting. He responded to the welcome of Burnham, thanking him for the veterans and then calling on Captain S. W. Bell, who praised the men of the last war for their patriotism and said he knew that many of them would be ready again for the service of their country if occasion arises.

O. C. Wilson, San Francisco judge advocate of the department of California, U.S.W.V., was the next speaker. The keynote of his speech was preparedness. "We must be prepared for any emergency and we have a right to ask our government for the protection of our wives and children," he said.

After the meeting the veterans visited at marine barracks where the marines had prepared an army luncheon for them. Beans proved most popular on the bill of fare and the veterans said they tasted just as they had in camp years ago. It was the first time some of them had tasted beans cooked in the army style and that they enjoyed their luncheon was proved by the many times they asked to have their plates refilled.

August 14, 1915, San Diego Union, 3:2-3. Prettiest girls to be picked tonight; city executive and three women aids will select 25 of San Diego's "sweetest maids: from throng on Exposition Joy Street.

August 14, 1915, San Diego Union, 8:4. George W. Coleman, president of the Boston Council, reaches San Diego; Open Forum director and YMCA worker to address Ad Club Monday.

August 14, 1915, San Diego Union, 8:4. A print maker's exhibit was installed yesterday in the library maintained by the San Diego Women's Press Club in the upper balcony of the California Quadrangle at the Exposition.

August 14, 1915, San Diego Union, II, 1:2-3. Henry L. Vibbard, head of music department of Syracuse University, will give recital at Spreckels organ this afternoon.

August 14, 1915, San Diego Union, II, 1:2. Harry F. McGarvie made director of department of exploitation yesterday; seeks new attractions for Fair.

August 15, 1915, Los Angeles Times, 8:5. Jury awards grand prizes; exhibits at San Diego Fair judged for points of quality.

August 15, 1915, San Diego Union, 9:1. Jury judged exhibits at Exposition, giving New Mexico building big first point with Montana next; award given to Brazilian exhibit.

The jury of awards, which has been in session several days at the Panama-California Exposition, judging exhibits, yesterday awarded a gold medal to the New Mexico building and its exhibits, a grand prize to the Montana building, a silver medal to the Nevada building and a gold medal to the Washington building. The Kansas and Utah buildings have not yet been awarded this prize.

The New Mexico building scored ninety-five points, the Montana building ninety points and the Washington building eighty-five points. The exhibits in each of the buildings are widely different, some consisting of only agricultural products and others of agricultural and mining products. Each building was judged by itself and was not compared with other buildings, this being impossible because of the difference in the kinds of exhibits.

The copper exhibit in the New Mexico building was given ninety-five points and a gold medal, the special coal exhibit was given ninety-five points and a gold medal, the U.S. forestry exhibit received eighty-five points and a gold medal, the mineral exhibit ninety points and a grand prize. Only the agricultural exhibit in the Montana building was judged. It was given ninety points and a grand prize.

Work of Nevada students in manual training was given ninety-four points. The display of oat varieties in the Nevada building was given eighty-five points and a gold medal, the display of wheat varieties was given ninety-five points and a grand prize, the display of barley varieties was given ninety-five points and a grand prize.

In recognition of his efforts in assembling the Brazilian exhibit, the jury of awards recommended yesterday that Doctor Eugenio Dahne be awarded a gold medal. His display of the products and the animal and bird life of the southern republic is much admired by visitors.

In brief, the exhibits recognized as par excellence, may be described as follows: Grand prize to the government of Sao Paulo for its coffee. This state produces sixty percent of the world's coffee supply. Officials of Sao Paulo backed Doctor Dahne in placing the Brazilian exhibit here.

Grand prize to the minister of agriculture of Brazil for the fine collection of crude rubber donated by him. Rubber in all its forms and various articles manufactured therefrom are on exhibition, together with sets of large photographs portraying the making of rubber from the time the latter is drawn from the tree.

Gold medal to the government of Parana for its mate, or Brazilian tea, donated by them. Twenty million people in South America drink mate, it being to them what tea is to the European, the Mongolian and people of North America. Mate is a blood purifier, and its action is stomachic and laxative, it is claimed.

Silver medal to Jorge Correa and Company, Para, for their cocoa, chocolate and other products. In the state of Bahia there are some 8 million cacao (cocoa) trees, some trees producing as high as thirty-two pounds of dried beans in one year. The supply of cacao is less than the demand.

Silver medal to Olivera Sunoea and Company, Para, for guarana nuts and effervescent drink. Guarana grows wild in many sections of Brazil. The plant is a climber with yellow fruit and a black seed. Seeds are crushed, made into a paste, rolled into sticks and dried. A small piece is ground into a fine powder and a spoonful is mixed into one of sugar and taken in a glass of cold water. A prohibition drink with a "kick."

Silver medal to Richard Mardock of Para for collection of Brazilian cabinet woods. In the forest of the Amazon are hundreds of different kinds of hard and soft woods.

Silver medal to Borge Irrao, Rio de Janeiro, for tobacco and cigarettes.

Other awards probably will be made public by the jury of awards Monday.

August 15, 1915, San Diego Union, 3:1. Caroline M. Lowe gave recital at Spreckels Organ.

August 15, 1915, San Diego Union, 3:2. Twenty five beauties picked at Fair; thirteen San Diego maids made winners in contest on Isthmus. . . . After the selections had been made the girls were taken to the north end of the Isthmus, where gaily-decorated electriquettes were waiting to carry them to the Cristobal café for an elaborate dinner.

August 15, 1915, San Diego Union, 3:5. Printers invade San Diego; Nearly 600 members of the International Typographical Union arrived in San Diego yesterday and were put through a strenuous first day by members of the local union.

August 15, 1915, San Diego Union, 9:1. Jury of awards judges exhibits at Exposition.

August 15, 1915, San Diego Union, 9:2. Daily band concerts at Exposition assured; Coast artillery and marine corps organizations will give programs.

Band music has been assured for every day of the week at the Panama-California Exposition since the return of the Fourth Regiment, United States Marine Corps band, of which William R. Borreson is conductor.

The Thirteenth Band of the Coast Artillery Corps, V. F. Safranek, conductor, will play Sunday, Monday, Wednesday, Friday and Saturday at the Plaza de Panama at 2:30 p.m. and 7 p.m.

The Fourth Regiment Band, U.S.M.C., will play at the Plaza de Panama at 2:30 p.m. Tuesday and Wednesday. Under this arrangement there will be band concerts at the Plaza de Panama, sometimes twice daily.

Both musical organizations are well known to local patrons at the Fair grounds and both have their admirers. They are excellent bands and have proved willing at all times to help out in emergencies. That they will furnish the band music at the Exposition will please the large following of the military bands.

August 15, 1915, San Diego Union, II, 1:3. Elizabeth Towne, head of **Nautilus** magazine, to speak at Spreckels music pavilion tomorrow evening on "New Thoughts and World Peace."

August 15, 1915, San Diego Union, II, 3:1. Miss Caroline Lowe of Cleveland to give organ recital tonight.

August 15, 1915, San Diego Union, II, 5:2. George W. Coleman, president of Boston City Council, to speak today at Spreckels music pavilion as feature of Open Forum day.

August 15, 1915, San Diego Union, II, 8:1. Three events to draw big crowds at Fair tomorrow; Washington State governor and party will be visitors; printers on program; Elizabeth Towne day arranged as greeting for magazine editor.

August 15, 1915, San Diego Union, II, 8:4. One hundred and twenty five banking institute members to see Fair; San Diego members will entertain visiting party tomorrow.

August 16, 1915, San Diego Sun, 7:3. Boston councilman George W. Coleman pleaded for better understanding between warring elements of society and for higher appreciation on the part of citizens of their duties in citizenship at an Open Forum meeting.

August 16, 1915, San Diego Sun, 9:2. Tent City Day to be observed Wednesday, August 18; open-air ball on Plaza de Panama at night.

August 16, 1915, San Diego Union, 2:6. Nearly 100 in party from **Chicago Examiner** arrived yesterday to see Exposition.

August 16, 1915, San Diego Union, 3:5. George W. Coleman, president Boston City Council, addressed Open Forum at Exposition yesterday; plea for fellowship and understanding between society's social strata.

August 16, 1915, San Diego Union, 4:2. H. L. Vibbard, musical department University of Syracuse, gave recital at Spreckels organ yesterday afternoon.

August 16, 1915, San Diego Union, 6:1. One hundred newspaper contest winners from Canada and New England arrived in San Diego yesterday to see Exposition.

August 16, 1915, San Diego Union, 6:3. Plans for Admission Day celebration.

August 17, 1915, San Diego Union, 1:4. Governor Ernest Lister of Washington was guest at Exposition.

The Washington building has been improved during the last two weeks, new exhibits and new decorations have been installed. Governor's party escorted to Laurel street entrance by officers and men of

First cavalry; at gate officers and men of marine barracks escorted party to Plaza de Panama where a review was held for the governor; later party was taken to lunch at the Cristobal Café; informal reception at Washington building in afternoon and later another reception at headquarters of women's board at Southern California Counties building; sightseeing tour arranged; organ recital by Doctor Humphrey J. Stewart; concert by Thirteenth Band of Coast Artillery Corps and entertainment by Spanish troubadours; formal reception at Washington building in evening.

August 17, 1915, San Diego Union, 3:2. Typographers observe Exposition day; short meeting held on platform of Sacramento building; welcomed by William Mountain, secretary to President G. A. Davidson; James M. Lynch, former president of the organization, spoke of purpose of labor unions.

August 17, 1915, San Diego Union, 8:1. About 250 banking institute members guests at luncheon at Cristobal yesterday; visiting cashiers, tellers and bookkeepers on way to convention at San Francisco.

August 17, 1915, San Diego Union, 8:2. Tomorrow designated "Tent City Day" at Exposition; ball in evening at Plaza de Panama planned by Coronado campers; bathing costumes may be worn.

August 17, 1915, San Diego Union, 14:2-3. Christian Science exhibit installed in north balcony of Foreign and Domestic Arts building.

There has been installed in the north balcony of the Foreign and Domestic Arts building at the Exposition and exhibit, the sign over the entrance to which reads: "The Christian Science Publishing Society, USA" Leading up to the balcony are gracefully arranged stairs, bountifully covered in the soft-toned brown carpet so familiar to the Christian Scientist. Upon entering one is greeted by the same color scheme in beautiful Wilton rugs and rattan chairs. In necessary cases the works of Mary Baker Eddy are exhibited; also Bibles and hymnals, and, likewise, "Life of Mrs. Eddy," by Sybil Wilbur. There are wall-folders (or books on hinges) for the **Christian Science Monitor**, where every page can be read with ease and comfort and in a way that gives the visitor a splendid idea of the paper. In a corresponding niche are two other wall-folders with views of many of the Christian Science churches throughout England, Canada and the United States; also on the walls are pictures of Mrs. Eddy and the Mother Church. At the opposite point from the stairway is a table where attendants answer questions and arrange for the sending of literature to persons interested and where visitors are registered. At one end of the balcony is a bookcase containing complete files of the **Christian Science Sentinel** and **Der Herold** and the **Christian Science Journal** from Volume 3. All of the windows are curtained and draped in gold and violet. Gold or orange streamers or curtains are hung in Spanish style on the outside of the windows. Inside the glass is covered with a pretty white net shaded with soft violet material. High up in the wall in the immediate center of the space is a small round window through which the sun bursts, bringing about the resemblance of a halo, a glorious light resting everywhere, causing a sense of rest and peace. Visiting Christian Scientists are grateful for this haven --- this quiet little nook --- and it is proving a veritable "upper chamber" to many. The exhibit is in charge of a local representative and two women assistants.

Co-relative is the Christian Science reading tent, located south of the Fair buildings, attached to the United States marine barracks, Major W. N. McKelvey, commanding. This was designed for the use of the marines, is well furnished with tables, desks, chairs, electric light, telephone and writing materials. All the Christian Science literature is provided and there are notices in the tent which inform the visitor that it was equipped and is maintained by the joint Christian Science literature distribution committee of San Diego. The place is cared for by the soldiers and that it is appreciated is evidenced by the fact that many a letter here penned reaches home and mother.

August 18, 1915, Los Angeles Times, II, 5:3-6. Dream City's call heard; Saturday to be Los Angeles Day at the Fair; Pythians too, will be feted at San Diego; Mayor Sebastian and Police Chief Snively as special guests.

August 18, 1915, San Diego Union, 3:1. City of San Diego expenses cut in July; cost of running departments under operations manager \$49,057.92 for month; office force reductions planned.

August 18, 1915, San Diego Union, 5:4. Angelenos to visit Exposition; Los Angeles police band will give concert on Pythian day; visitors bringing a drill team of 100 members who will give an exhibition drill at Plaza de Panama Saturday afternoon.

August 18, 1915, San Diego Union, 7:2-3. Tent City folk to hold sway at Fair today; night dance will be feature; music by Pallma's band; drill team of 24 Coronado girls to give exhibition of fancy drills at Plaza de Panama at 2:30 and 9:00 p.m.

August 18, 1915, San Diego Union, 14:1. Big Indian fiesta set for next week at Fair; La Jolla, Rincon, Pauma, Pechanga, Pala reservations to take part; Exposition will send automobiles to different reservations for the Indians; Indians will live in a big ramada to be erected on tractor field; program of dancing arranged for each day of fiesta.

August 18, 1915, San Diego Union, 14:1. Labor Day plans at Fair outlined; Fraternal Brotherhood members, thousands strong, coming to San Diego, September 6; big delegation expected from Los Angeles; special railroad rates arranged; competitive drill on Plaza de Panama in afternoon; parade from lower Broadway to Laurel street entrance in morning; banquet in Cristobal Café in evening.

August 18, 1915, San Diego Union, 14:2. Senator Theodore E. Burton, Republican, of Ohio coming to Fair; presidential possibility in 1916.

August 18, 1915, San Diego Union, 14:2. John Barrett, Pan-American Union head, will visit Fair about August 27.

San Diego Herald, August 19, 1915, 1:5-6. Exposition Notes

Early September at the San Diego Exposition will be enlivened by two important celebrations to be held, Labor Day, September 6, and Admission Day, September 9. The Labor Day celebration will extend over three days, beginning the fourth and taking in the fifth and sixth. Labor unions throughout Southern California are rallying to the support of the celebration, and it will see a vast gathering of the sons of toil.

A big feature of the celebration will be the participation of five thousand members of the Fraternal Brotherhood. These will come from the Southwestern states with their uniformed ranks and give a series of competitive drills at the Exposition during the three days. Labor will be represented by a great outpouring of the rank and file, and included in the three-day program are parades, picnics, open-air balls and athletic events.

Just three days later will follow the celebration of Admission Day, the exercise to commemorate the sixty-fifth anniversary of California's admission to the Union. Pageants depicting various periods of California's history have been arranged.

All the activities will center at the Exposition, where the halcyon gold rush days of '49 will be portrayed with reality smacking of historical correctness. Already fifty of the forty-niners have entered the gold-days section of the parade. Some of these will ride in an old stage coach which was operated on the line between San Diego and the Colorado river long before railroads were built in this section. At the head of the pioneer section will ride Chief Iodine who, despite the weight of eighty-nine years, rides a bronco with the skill of youth as he did in 1846, when he acted as a scout for John C. Fremont, when this gallant young Southerner entered California just before the outbreak of the Mexican war.

With the closing of the summer resort season in many parts of the country, September 1, the San Diego Exposition intends to add a number of important attractions to the Isthmus, which is the Exposition's Joy Street. Harry F. McGarvie, a veteran showman, has been engaged for the purpose and is given a free hand to book features never before exhibited at an Exposition.

The plan of increasing the size and attractiveness of the Isthmus indicates that the San Diego Exposition considers that the last half of its year will be greater than the first part. This opinion is based on reports from transcontinental railroads, which declare that with the gathering of the harvests travel westward will be unprecedented. The plan for enlarging the Isthmus enterprises at the Exposition also forecasts the determination that the San Diego Exposition shall be kept open until December 31, the time originally set for its closing.

August 19, 1915, San Diego Sun, 6:3. Los Angeles day; Knights of Pythias day and Children's day; Pythian parade in afternoon; "Tacky" carnival on Isthmus in evening.

August 19, 1915, San Diego Sun, 14:1. Five thousand members of Fraternal Brotherhood to participate in Labor Day celebration September 6.

August 19, 1915, San Diego Union, 6:1. Tent City folk celebrate day at Exposition.

August 19, 1915, San Diego Union, II, 9:1. Los Angeles host to celebrate at Fair Saturday; northern city mayor declares holiday for Exposition visit; "Tacky Party" planned on Isthmus; persons in costume will be admitted by gatemen without charge.

August 19, 1915, San Diego Union, II, 14:1. U.S. Board of Engineers to visit San Diego Fair and harbor.

August 20, 1915, San Diego Sun, 1:1. Congressman William Kettner and members of U.S. Board of Army Engineers here on visit.

August 20, 1915, San Diego Union, 1:7-8, 3:2. Liner *Finland* in Port of San this morning; 165 will land; members of Harvard football team of 1890 on craft.

August 20, 1915, San Diego Union, 7:1. Last year's suits Exposition style tomorrow; night of merriment in store for "Tacky Party: participants; Angeleno host coming; Knights of Pythias parade of be feature.

August 20, 1915, San Diego Union, 8:1. Engineers arrived on western trip of inspection yesterday evening; Commerce Chamber delegates meet Army board members at station; informal dinner at Cristobal; reception today at office of President G. A. Davidson at 2:15 p.m. followed by a similar function at headquarters of women's board; informal dinner at Cristobal at 7:00 p.m.

August 20, 1915, San Diego Union, 8:2-3. Cavalry troops B and M, under command of Captain Van Horn Mosely, to leave Exposition this morning for Calexico where they will do duty on the border; two troops now stationed at Calexico will leave for San Diego where they will remain for further orders; two troops left at camp just outside Exposition grounds.

August 20, 1915, San Diego Union, 8:2. Molly Byerly Wilson, California contralto, to sing at Spreckels organ tomorrow at 4 p.m.

August 20, 1915, San Diego Union, II, 9:2. General Emiliano Chamorro, Nicaragua minister, San Diego visitor.

August 20, 1915, San Diego Union, II, 9:3. Four thousand woodmen expected to meet at Fair on Labor Day; will camp on tractor field.

August 21, 1915, San Diego Sun, 8:1. Indians of back country will hold fiesta on tractor field Wednesday through Saturday; scores to flock here for gala event; will reenact ceremonies dating back before coming of white man; peon game to be played; Father George D. Doyle of Pala completing arrangements; will be first time an Indian fiesta has been held in the city.

August 21, 1915, San Diego Sun, 9:2. Jury of awards gives New Mexico building grand prize among state buildings, a gold medal for coal exhibit, a grand prize for mineral exhibit, grand prize for copper exhibit, gold medal for U.S. forestry exhibit; state of Nevada wins grand prize for display of wheat and barley varieties, silver medal for state resources; state of Montana, grand prize for agricultural exhibit; state of Washington, gold medal for general resources.

August 21, 1915, San Diego Union, 2:2-3. Angelenos to storm Fair today; Mayor Sebastian and big delegation arrive with police band; host coming on stream of special trains and automobiles.

August 21, 1915, San Diego Union, 3:1. Pythian Knights streaming into San Diego; parade to Exposition will start at 2 p.m.; cut drill feature.

August 21, 1915, San Diego Union, 3:2. Liner *Finland* stops at first Port of Call; 218 passengers disembark from big craft; vessel's stay short; San Diegans give Harvard men welcome; Harvard men bound for annual gathering of Association of Harvard Clubs which is being held in San Francisco.

August 21, 1915, San Diego Union, 5:1. U.S. Engineers see need for harbor work funding.

August 22, 1915, Los Angeles Times, 11:3. Thousands go to San Diego; Los Angeles Day at Fair; Mayor heads large party on official visit; policemen's band parades.

August 22, 1915, San Diego Union, 1:2. Los Angeles and Knights of Pythias day at Exposition; 500 Los Angelenos attend.

August 22, 1915, San Diego Union, 1:4, 2:5. Knights of Pythias drill at Exposition; San Diego uniform tank team again Royer Cup winner; 5,000 Los Angelenos attend celebration; officials review big parade.

August 22, 1915, San Diego Union, 3:1. District Attorney Schuermeyer blocks '49 camp opening; prohibition writ given concession manager modified for Marsh's assistant; official threatens raid; order from Judge Rector ample protection, says F. H. Couden, attraction operator.

August 22, 1915, San Diego Union, 3:2. Police seize Pythian man resisting initiation; Springdale, California man put in jail for two hours; "bailed out."

August 22, 1915, San Diego Union, 5:5. About 600 telephone operators and manufacturers to visit San Diego Fair; convention of Independent Telephone Association of America to convene in San Francisco.

August 22, 1915, San Diego Union, 6:1. Indians prepared for big festival at Exposition; automobiles to bring Redskins from reservations Wednesday; peon games on program; celebration will end Saturday night; annual gathering in San Diego, aim.

August 22, 1915, San Diego Union, 7:2-3. Los Angeles Silver Star Band at Exposition yesterday afternoon drowned out recital by Doctor Humphrey J. Stewart and singing by contralto Miss Molly Byerly Wilson; Knights of Pythias parade and drill began while organ recital was in progress; Miss Wilson to give recital tomorrow in blue room of Southern California Counties building.

August 22, 1915, San Diego Union, 8:1. Tacky Party prize winner at Fair aided by baby; father of woman victor in costume contest given trophy for men.

August 22, 1915, San Diego Union, 8:2-3. Map of southern national highway, Washington to San Diego; Colonel Ed Fletcher wants U.S. Government to obtain data on proposed highway.

August 22, 1915, San Diego Union, II, 1:2. Catholic day set for September 19.

August 22, 1915, San Diego Union, II, 1:2-3. Party of 65 people from Kentucky visiting Fair.

August 22, 1915, San Diego Union, Entertainment, 7:3. The Painted Desert has been fortunate in securing for the season nine members of the Pueblo Isleta tribe from the town on Isleta, New Mexico. The Painted Desert now has representative of the Apache, Acoma, Tiwa, Hopi, Supai, Navajo and Isleta tribes living in their regular ways the same as on the reservations.

August 22, 1915, San Diego Union, 8:1. Burton to speak at Exposition Tuesday; "Greater America" will be topic of Ohio senator; presidential possibility.

August 23, 1915, San Diego Sun, 1:7-8. Anti Jitney Law is passed; 300 car men watch Council.

August 23, 1915, San Diego Sun, 3:4. Games feature Indian fiesta; all tribes of county to take part in Exposition program.

August 23, 1915, San Diego Sun, 3:4. Mother's Pension day, September 8; in honor of Judge Henry Neil of Illinois, father of mother's pensions.

August 23, 1915, San Diego Sun, 7:5. Motion Picture day, Saturday, September 11.

August 23, 1915, San Diego Sun, 7:6. Invitation to President in show window of Barbour's confectionery store, 1060 Fifth street; will be printed on parchment and bound in the copy of "Semi Tropic California" which is to accompany it.

August 23, 1915, San Diego Union, 4:1. Florencio Constantino, rival of Caruso, to sing at Fair Wednesday.

August 23, 1915, San Diego Union, 5:3-4. Doctor William Carl of New York will play the organ recital at the Exposition Wednesday.

August 23, 1915, San Diego Union, 7:1. Indian chieftains to take part in fiesta; A-Mi-Qut-A-Quo, aged leader, has never known clothes or a haircut.

August 23, 1915, San Diego Union, 7:2. Book describing California's beauties will be given to President Wilson; signatures; portraits of San Diegans in expensive gift.

August 23, 1915, San Diego Union, 7:5. Molly Byerly Wilson, contralto, to give recital in blue room of Southern California Counties building this afternoon.

August 23, 1915, San Diego Union, 7:6. Celebration of Mass plan of Indians at Exposition; to be held on aviation field by Father Doyle of Pala; Miss Eleanor Patterson of New York, contralto, to sing at Spreckels music pavilion tomorrow afternoon; Thirteenth Artillery Band to give two concerts before Sunday audiences.

August 23, 1915, San Diego Union, 7:8. Senator Burton to speak at Fair tomorrow.

August 23, 1915, San Diego Union, 12:1. Stars of film land to shine at Fair September 11.

August 24, 1915, San Diego Sun, 3:3. Senator Theodore Elijah Burton of Ohio, presidential possibility, to speak at Exposition at 5 p.m. on "Greater America."

August 24, 1915, San Diego Sun, 6:4-5. Florencio Constantino, famous tenor, to sing tomorrow night at organ pavilion at 8 p.m.; will sing Spanish and Basque songs in honor of Franciscan fathers; tickets 25 and 50 cents, in addition to 25 cent admission.

August 24, 1915, San Diego Sun, 7:5. Back County day at Ramona; Collier Park to be dedicated; Carl Heilbron and D. C. Collier to speak.

August 24, 1915, San Diego Sun, 9:1. Indian fiesta is next at Exposition; red men will show their dances and games for four days; Rincon, Pala, Pauma, Pechanga and La Jolla tribes to convene; other tribes invited.

August 24, 1915, San Diego Union, 3:1. Theodore E. Burton, former U.S. senator from Ohio, to speak today.

August 24, 1915, San Diego Union, 7:2-3. Golden-voice tenor here; Constantino to sing at Spreckels organ tomorrow night.

August 24, 1915, San Diego Union, 7:3. Miss Eleanor Patterson of New York to give program at Spreckels organ.

August 24, 1915, San Diego Union, 7:5. One hundred members of American Association of Park Superintendents expected tomorrow evening or Thursday morning; coming from convention at San Francisco.

August 24, 1915, San Diego Union, 8:1. Iowa businessman, Carl F. Kuehnie, in governor race, visits Fair.

August 24, 1915, San Diego Union, 8:1. Labor celebration to last three days; Tiny Broadwick will perform.

August 24, 1915, San Diego Union, 8:2. Indians opened a four-day festival at Exposition; tribesmen assembled from San Diego County, August 24, 1915, San Diego Union, 18:1. Labor celebration to last three days.

White tents dot the tractor field at the Exposition and in them are housed Indians from the Pala and Rincon reservations, who will inaugurate today their fiesta of San Luis Rey, named in honor of the Spanish padre of the old mission days.

The Indians, including members of about 100 families, came in from the reservations last night and took possession of the camp.

All day yesterday Senora Salvadora Valenzuela of the Pala reservation, who is acting as quartermaster for the camp, was preparing for the hauling of rations and supplies to those who came for the fiesta.

Mass will be celebrated this morning at 10 o'clock at the ramada. The music for the mass will be sung by the choir of Saint Joseph's Church, directed by Doctor H. J. Stewart. A platform has been erected on which an organ has been placed and where the choir will sit. The Sanctus will be sung by the Indians in an old chant setting.

The girls of the Pala reservation are expert in the making of lace, in weaving baskets, and as pottery makers and some of their handiwork will be in evidence during the fiesta.

Characteristic games and dances will mark the fiesta, and many of the older Indians, who have come familiar features to visitors to the reservations, will be in attendance.

It is expected that Yellow Sky, said to be the oldest of them all and whose age is only a conjecture, will be one of the number. He is said to be certainly more than 90, and some estimates are as high as 103. He is from Capitan Grande reservation, situated between Lakeside and the diverting dam.

This is said to be the first time a fiesta of this kind has been held amid surroundings of modern civilization. Heretofore they have been held within the reservations or close to them. The fiesta will continue four days, August 25-29 inclusive.

One of the most interesting games of the Indians is the peon game, played by four on a side, and is a great favorite with them as well as with visitors.

A peon game will be played by the Indian women this afternoon at 2:30, the men's game to be started in the morning at 9:30. Half an hour before that time all the Indians will take part in a war dance around the camp fires.

Tomorrow afternoon at 2 there will be a game of pelota played by young bucks. This is another interesting diversion of the Indians and is said to be exciting. A half-mile foot race will be run at 3.

The fiesta will close with an elaborate program Saturday night, details of which will be announced later. The younger Indians will remain until Sunday to play a game of ball on the marine barracks grounds with the Y.M.I. team.

August 24, 1915, San Diego Union, 8:4. Mother's Pension day to be celebrated at Fair September 8; Judge Henry Neil of Oak Park, Illinois to be principal speaker.

August 24, 1915, San Diego Union, II, 9:2. General George W. Goethals to arrive September 11; plan to have Goethals' day at Exposition abandoned in compliance with Colonel's request; wants quiet visit.

August 25, 1915, San Diego Sun, 1:4, 3:4. Indians here to play kneel devoutly before Father Doyle who says "Play, my people. Play happily in this great Magic City that the white man has built." Today's games, today's ceremonies were all mostly remnants of another day. They are all that the Indian has left of his former self --- little customs with which he has been loath to part.

August 25, 1915, San Diego Sun, 2:5-6. Miss Eleanor Patterson of New York sings operatic arias and "Star Spangled Banner" at Exposition; voice has three octaves.

August 25, 1915, San Diego Sun, 12:1. Tiny Broadwick drops to Exposition grounds twice daily, September 5 and 6, using chutes of silk and linen; Oscar Brindley, civilian instructor at North Island, will take girl aloft; Modern Woodmen of America will encamp at Exposition, September 4, 5 and 6 and Fraternal Brotherhood will be represented by hundreds on same days.

August 25, 1915, San Diego Union, 1:3, 3:1. Former senator Theodore E. Burton sounded call for "Greater America" at Fair yesterday afternoon; waved flag as Miss Eleanor Patterson, New York contralto, sang "Star Spangled Banner."

August 25, 1915, San Diego Union, 4:8. Park superintendent delegates due Friday.

August 25, 1915, San Diego Union, 8:2. Indians arrive for fiesta; fete to open today.

August 25, 1915, San Diego Union, 14:1. Constantino will sing revered songs at Exposition; tickets sell rapidly; words which cheered padres will be heard again tonight.

August 26, 1915, San Diego Sun, 1:2. President Taft to arrive in San Diego September 16; he will speak at Exposition.

August 26, 1915, San Diego Sun, 1:8. Mayor signs jitney laws.

August 26, 1915, San Diego Sun, 2:3. Constantino gets ovation, by R. M. Dennen . . . There wasn't any doubt in the minds of any there that this singer was accorded the greatest ovation given any artist that has visited San Diego for years.

August 26, 1915, San Diego Sun, 2:5. "El [sic] Cantina Madrid" to take place of "Dance of the Divided Dime" on Isthmus; Spanish singers, chorus and five-piece orchestra engaged; big electric organ.

August 26, 1915, San Diego Sun, 7:2. Mrs. Armand J. Jessop of San Francisco and San Diego Expositions: They have a whole set of beautiful dishes at San Francisco, but at San Diego we have the most beautiful piece of China ever made.

August 26, 1915, San Diego Sun, 9:3-4. Mme. Alys Larreyne, French prima donna, to sing at Exposition organ September 1.

August 26, 1915, San Diego Union, 1:6. Mysterious French singer to give concert at Exposition next week.

August 26, 1915, San Diego Union, 2:6. Artillery band gains in favor.

August 26, 1915, San Diego Union, 3:2. Indians worship at Fair; priests advocate citizenship for red men; music of mass composed by Doctor Humphrey J. Stewart; sung by choir of Saint Joseph's church; Indians sang "Sanctus."

August 26, 1915, San Diego Union, 3:3. Votes come fast for movie stars; Exposition contest brings out candidates; Blanch Sweet leads for queen and Francis X. Bushman for king of Motion Picture day, September 11.

August 26, 1915, San Diego Union, 7:1. '49 Camp funds attached at bank; constable fails to find gambling paraphernalia on concession grounds; hearing proves futile; proceedings initiated by Judge Torrance to collect \$250 attorney's fees.

August 26, 1915, San Diego Union, 7:2. Indian games feature program today; pelota, original football, to be played at Exposition this afternoon at 2:00; dance by older women at ramada at 3:15; eager feather dance at 8:00; game of peon at 8:20.

August 25, 1915, San Diego Union, 8:2-3. Constantino, Spanish tenor, wins host at Fair, by W. B. Seymour.

Five thousand shouting, applauding, some of them wildly gesticulating persons greeted Florencio Constantino, the great Spanish tenor when he walked out on the platform of the Spreckels organ pavilion last night to give his concert. The singer, who his admirers say is greater than Caruso, beamed on his audience with all the vivacity characteristic of his nationality, throwing out his arms to welcome in true grand opera tenor fashion.

Every seat was taken, while the peristyles of the pavilion and all the available space in the Plaza de los Estados was black with music lovers who had come to hear the great singer. Down near the front were the Spanish singers who entertain daily at the Exposition. They probably enjoyed the concert more than any other persons within the sound of Constantino's voice. Their greeting and applause were vociferous to the extreme and during the singing of each number their rapt attention was almost childlike in its simplicity. There was one exception to this. Once when the great tenor sang a high sustained pianissimo, the joy of one of the troupe was beyond containing, and he let out a shout that almost drowned the sound of Constantino's voice, but the latter took the incident as the sincere tribute to his art which it was and smiled his appreciation.

At the close of the concert Constantino, in broken English, expressed his great pleasure at being allowed to sing at the Exposition and voiced the hope that he would be able to sing here again before the big show closes its gates.

"I would like to see grand opera give here in these grounds," said he. "Just one week of grand opera. Ah, it would be beautiful!"

Constantino declared he experienced no difficulty in singing in the open air. "I missed what you call acoustics, at first," he said. "Everything is far away and no come back like in a building."

At the close of the concert, the Spanish troupe gathered outside the west door of the music pavilion and serenaded Constantino as he walked to his automobile. The singer made a brief speech in Spanish whereat they showed their uproarious delight. He then was drive to the Café Cristobal where he was entertained by prominent San Diegans.

Constantino's first number was the famous "Cielo del Mar" aria from Ponchielli's "La Gioconda," wherein Enzo sings of the quiet sea and his love for the gentle Laura. This was followed by a habanera, "La Nina Pancho," after which came the well-known "La Paloma." All of them aroused much enthusiasm, but the crowd went wild when as an encore the tenor gave them "In questa quella" from Verdi's "Rigoletto."

An aria from Meyerbeer's "L'Africaine" opened the second part of the program, being followed by a group of old Basque mission songs which were sun in San Diego by the old Spanish friars who founded it, after which Constantino say "No te oviedo." His final number and encore was the beautiful "La donna e mobile" from "Rigoletto." Both of the "Rigoletto" arias have been favorites of Constantino during his long operatic career and the role of the duke is one of his best operatic characterizations.

Of Constantino's voice, it is almost needless to speak. The sweetness of his tones, his wonderful breath control, his remarkable phrasing, his dramatic interpretations, and his clean-cut enunciation have been praised by years by authorities in matters musical. Although few of his hearers understood what the singer was singing, they could not fail to be charmed by his voice, his artistry and his personality.

Senor Mario Hediger was the accompanist. He also played two solo numbers, a Spanish dance and an Exposition march. Hediger was greatly handicapped at the beginning by the gentle breezes which insisted upon blowing his music off the rack. He finally secured one of the Spanish singers to turn the music.

August 26, 1915, San Diego Union, II, 9:1. Doctor William C. Carl, eastern organist, scores triumph at Exposition.

August 26, 1915, San Diego Union, II, 9:2. H. E. Van Surdam, lyric tenor, to sing with Spreckels organ at 4 p.m. today.

August 27, 1915, San Diego Union, II, 9:1. State Admission Day will be observed; Governor Johnson invited; twenty-nine societies to line up for patriotic event.

August 27, 1915, San Diego Union, II, 9:2. Gala week planned for Exposition to begin with Labor Day, include Admission Day and end with Motion Picture Day.

August 27, 1915, San Diego Union, 14:1. Latin Americans to meet Yankees at Exposition; John Barrett, organizer, business genius, will speak; big reception planned next Wednesday.

The only foreign exhibit at the San Diego Exposition is that of Brazil. It had been planned to construct here a Brazilian palace, costing \$200,000, but financial difficulties intervned and the project fell through.

August 27, 1915, San Diego Union, 14:1. Judge E. S. Torrance filed suit yesterday in the justice court to recover \$250 attorney fees from F. M. Souden, one of the managers of the Exposition '49 Camp. Of an account in the name of the concession in a local bank, \$300 was attached by the constable Wednesday to meet the bill.

August 27, 1915, San Diego Union, 14:4. Committee arranging for Brotherhood Day September 6; three-day celebration will be held by Fraternity next month.

August 28, 1915, San Diego Sun, 2:1. Catholic day will be observed September 19; high military mass at 10:30 a.m. at Spreckels organ with chorus of 100 voices; bugles are sounded in place of ringing of bells at the elevation of the Host and troops present arms.

August 28, 1915, San Diego Sun, 7:5. "Indian Night" will be celebrated at Exposition this evening and prizes awarded for best costumes; Indians encamped on tractor field will give "eagle feather dance" on Isthmus at 9 p.m.; peon will be next attraction; game will begin at 9 and will be finished before 9 tomorrow morning when red skins say Mass prior to departure for their homes in the mountains; everybody in Indian costume will be admitted free to Exposition grounds this evening.

August 28, 1915, San Diego Union, 1:4. Indian "rags" style for tonight; palefaces and red men to revel on Isthmus.

August 28, 1915, San Diego Union, 4:2. **San Francisco Call** praises San Diego Exposition.

The following appreciation of San Diego's Exposition appeared in a recent issue of the **San Francisco Call**:

Five hundred miles south lies San Diego with its Exposition Beautiful.

Here in San Francisco we see the splendor of the Panama-Pacific International Exposition, but great as is that splendor it does not dim the glory of the Magic City of Old Spain which has been created in the sightliest spot of Southern California. The beauty of either one, being entirely different, emphasizes the beauty of the other.

The San Diego Exposition is unique in a dozen ways. Many of the buildings are permanent, but as lasting as they are, overpoweringly beautiful are the surroundings, the work of nature in nature's fairest garden.

Get in mind the picture of an old Spanish city of mission and cathedral and palace, peopled by conquistadors and dancing girls, such as lived in the misty days when Spain ruled with lavish hand in the new world.

Cover the walls with rose or jasmine and bougainvillea. Line the Prado and plazas with trees and shrubs and flowers, the walks with lawn and trailing vine. Let the peacock strut past the fountains and myriads of pigeons flutter about the Campanile.

And from the city of Castile, beneath the clear blue sky, look across the canyons and hills to the great Pacific and back to the snow-capped Sierras. Be glad that you are alive. Be glad that you can see Southern California and the San Diego Exposition --- see with your eyes for a little time and with your memory for the rest of your lifetime. Today you see San Francisco. And tomorrow, see the Exposition Beautiful.

August 28, 1915, San Diego Union, II, 9:1. Indians in fettle for fast pelota game today; two teams will grapple on tractor field for supremacy; squaws to chant weird [sic] music while bucks wage strenuous battle.

The Indians, who have been holding a four-day fiesta at their grounds on the tractor field at the Exposition, will play a nice, gentle game called pelota this afternoon.

Advance notices of this game seem to have omitted some of the ginger which rightfully belongs to any description of the sport. Later advice would indicate that London prize ring rules look like a prescription for absent treatment in comparison with some of the strenuous treatment permitted in pelota, which, from the nature of it, bars any mollycoddle from any of the teams engaged.

About the only form of death which cannot be meted out to an opponent in a game of pelota is by striking him with a club or a fist. Strangulation, suffocation, and dislocation of the vertebrae are considered the regulation process of elimination.

Six Men on Team

Six men composing a team face six others on the opposing team across a dead line in the center of the field. Somewhere along that line a wooden ball is planted at a spot unknown to any of the players. At a given signal, all the players begin to dig frantically in the earth with stout "shinny" sticks, two and a half feet long, which form part of the equipment. When the ball is found, it is in play and each side strives to drive it across the goal on the opposing side's field.

When two goals are scored by either team, the game is won. As the field is sometimes from a half to three-quarters of a mile long, a game of pelota often lasts several hours. Today's game will not be so long as the tractor field is much less than a half-mile long.

The pelota game will be preceded by an archery contest among the Indians at 3 o'clock.

Peon Game Scheduled

An eagle feather dance on the Isthmus at 9 o'clock by all Indians promises to be interesting, as also the game of peon at 9:45 o'clock, a much less deadly game than pelota, and in which the immobility of a "poker face" seems to be necessary in order to prevent an adversary from knowing what one has in his hand. The game, it is said, must be seen to be appreciated.

During the progress of the game, while men are playing it, the women stand or sit around and gave a weird chant.

Camp will be broken tomorrow morning, low mass to be said at 8 o'clock, after which the elder Indians will depart for their homes in the Pala, Rincon and Pechanga reservations.

The younger Indians will remain until the afternoon to pay a game of baseball with the team of the Y.M.I. of San Diego on the diamond at the marine barracks in the Exposition grounds.

August 28, 1915, San Diego Union, II, 9:2-4. Back county day draws 5,000; oratory rings at Collier Park dedication in Ramona.

August 28, 1915, San Diego Union, 14:1. Ritualistic pomp to characterize Catholic day; Bishop Conaty expected.

August 28, 1915, San Diego Union, 14:2-3. Awards for exhibits made at Southern California Counties building; grand prizes, gold, silver, bronze medals given out by Exposition; prizes for olives and olive oil, wines, beer and malt, pottery, minerals, canned goods, gems, dates, fruits, cotton, nuts, applied arts.

August 29, 1915, San Diego Union, 2:1. Park heads won by San Diego and Exposition; Herman W. Merkel, superintendent of Central Park, New York City, said San Diego's beauty and that of Exposition surpassed anything he had seen elsewhere in California.

August 29, 1915, San Diego Union, 7:1. Earl Meeker, baritone, to sing at Exposition today.

August 29, 1915, San Diego Union, II, 2:2. Madame Alys Larreyne, Parisian prima donna and favorite of late King Edward, to make her America debut at Panama-California Exposition open-air organ on evening of September 1.

August 29, 1915, San Diego Union, II, 3:1. Utah won five medals at Fair; gold medals for agricultural exhibits: beet sugar exhibit, apple exhibit, bas-relief map made by State agricultural college, and experimental agricultural exhibit.

August 29, 1915, San Diego Union, II, 8:1. Ohio beauties to invade Fair September 10.

August 29, 1915, San Diego Union, II, 8:2-3. Prize-winning art works at Exposition show skill of Southern Californians; among winners are Maurice Brawn and Charles A. Fries.

Visitors to the Panama-California Exposition frequently express surprise when they stroll into the Southern California Counties building and find on the second floor a fine arts gallery, sixty-five feet by fifty feet in size, with a wall space of 1,700 square feet, an indirect lighting system of excellent quality, and a collection of paintings and other works of art which a consensus of opinion has declared to be 90 percent good.

August 29, 1915, San Diego Union, II, 8:4. Today's concert at 2:30 p.m. in the Plaza de Panama by the Thirteenth band, Coast Artillery Corps, V. F. Safranek, conductor, contains Safranek's suite on the subject of "Atlantic, the Lost Continent." This number had remarkable success throughout the country last year.

August 30, 1915, San Diego Sun, 9:1. Labor Day plans are completed.

August 30, 1915, San Diego Union, 3:1. Labor Day throngs expected.

August 30, 1915, San Diego Union, 3:4. John Barrett to speak on Pan-American day.

August 30, 1915, San Diego Union, 12:1. Madame Alys Larreyne to charm Fair patrons; seats on sale at the Thearle music store on Broadway.

August 31, 1915, San Diego Sun, 7:1-2. Labor Day program is sure to draw crowds; three-day celebration.

Saturday: music program, camp fire of Modern Woodmen of America and electriquette parade in evening.

Sunday: all exhibit buildings open (the 3rd Sunday on which this has been true); Tiny Broadwick to attempt double parachute drop from an aeroplane beginning at 3,000 feet.

Monday (Labor Day): grand parade to grounds; Tiny Broadwick to do her double drop and Hampton (Negro) Quarter to make their initial appearance.

August 31, 1915, San Diego Sun, 9:1. Director John Barrett to speak at Exposition tomorrow afternoon; And Alys Larreyne, Parisian prima donna, will sing at organ.

August 31, 1931, San Diego Sun, 9:4. Panama Exposition will reunite friends.

Panama City, August 31. With the opening date little more than two months distant, the national exposition of Panama is certain to be ready. The exposition does not celebrate the opening of the Panama canal, notwithstanding the fact that the presence of this new highway is counted on to treble the number of visitors that otherwise could have been expected. The most recent event that it celebrates is the resumption of separate government by Panama and the opening date, November 3, was chosen because it is the twelfth anniversary of that event. The official designation of the big undertaking is "The National Exposition of Panama Commemorative of the Discovery of the South Seas."

The single person most honored will be Balboa, dead these four hundred years.

A plot of ground, 70 acres in extent, in the north part of the city is occupied by the exposition, laying along a slope that overlooks the Pacific. There are to be about eight exhibition buildings, a stadium, a plaza, a grand parkway, and a concourse and patio at the waterside. Most of the buildings are finished. These include the places of agriculture, of fine arts, of government, of commerce and industry, and of administration. The management of the exposition has been occupying the administration building for some time.

Several Prominent Buildings

Early last spring Cuba completed its building. It is a permanent structure.

With an \$80,000 building and exhibit, Spain will have an important part. The building will also be permanent. The erection of this building is one of the most significant features of the fair. For many years after Panama's declaration of independence from Spain, ill feeling existed between the mother country and the new republic, due partly to misunderstanding and partly to the fact that Spain cherished hope of recovering its old possession. The fact now that Spain was the only European country invited to participate in the fair, and that she accepted the invitation, shows how completely this feeling has changed on both sides.

Another permanent building will be that of Venezuela, near those of Cuba and Spain.

The United States government has set aside \$25,000 for representation at the fair, but just how that is to be spent has not been announced.

August 31, 1915, San Diego Union, 2:4. Battalion chief J. E. Young of Portland, Oregon says boom to follow Fair; Portland's experience shows San Diego will benefit from Exposition.

August 31, 1915, San Diego Union, 5:1. Reverend A. C. Hagerman, pastor, First Baptist Church, Winona, Minnesota, praises San Diego Exposition.

August 31, 1915, San Diego Union, 7:4. Film staged at Exposition exhibited by Company; show at New Mexico building yesterday; title "As the Twig Is Bent"; cavalry charge features picture representing Manila scene.

August 31, 1915, San Diego Union, 8:5. Former Governor John W. Slaton of Georgia to arrive next week.

August 31, 1915, San Diego Union, II, 9:3. U.S. Senator Joel Stone from Missouri due at Fair tomorrow.

September, 1915, The California Garden, Vol. 7, No. 3. Monthly Excursion Through Exposition Grounds, by G. R. Gorton.

September might well be called a month of maturity. Comparatively speaking, there are not many plants coming into flower, but, instead, the flowers of many are maturing into fruit, sometimes in the form of bright, showy berries, sometimes in more somber tints.

The *Pittosporums* generally are in various stages of coming into berry. *Pittosporum rhombifolium* (one good group is in front of the Administration Building) is particularly showy with its bright orange-colored berries and its clean, glossy foliage. It might be well to mention two other of the plants in the same group in front of this building, viz. the *Leptospermum lanigerum* (with foliage somewhat suggested the small-leaved type of *Myrtus communis*, mentioned later on) planted on either side of the steps. There is nothing especially conspicuous about this shrub except its location, but it is a good shrub, and should be more generally planted. The other plant is the *Mesembryanthemum geminatum* used as an edging for the planting of Cecil Brunners, and it is at this writing bearing its masses of diminutive white flowers.

In the "Gardens of Montezuma" nearby (between the Fine Arts and Indian Arts Buildings), where Spanish colors abound, the curious *Capsicum lampion* has hung out its lanterns of green, yellow and red. This interesting plant grows and trims its own Christmas tree, albeit somewhat previous in the procedure, and the lanterns are hot, as good lanterns should be. The fruits referred to are true peppers, lantern-shaped, as the name *lampion* signifies, and as the ripening process continues, are to be seen in the three colors mentioned.

The well-known Jerusalem Cherry is trying its best to resemble a working model of a cherry tree two feet in height and has been quite successful, so far.

The tall African marigolds are present in two varieties, Orange Prince and Lemon Queen, their pompon-like flowers borne on long, strong stems, make them thoroughly deserving of the royal titles they bear. The most modest French marigolds dwarf in type, with tiny single flowers are very attractive in a quiet way. This variety is Legion of Honor.

Amarantus Caudatus is both interesting and ornamental, bearing long, drooping spikes or plumes of red, and is the old-fashioned flower known to our grandmothers as "Love-lies-bleeding."

Passing out of the Gardens of Montezuma via the southeast exit, past the Heliotrope borders and keeping to the left, one comes to where four walks join, forming several little "points of land." On two of these *Hypericum moserianum* (St. John's Word or Goldflowers) holds forth on another a group of larger shrubs, including some rather large Golden Privet, which is not firm in the faith, but is continually backsliding to the plain green type. Just before this group is reached, on the left is a group of *Muehlenbeckia platyclados*, or Tape Plant, readily recognizable from the common name, as the leafless branches are flat, about an inch in width. Looking back towards the west for a moment you will observe an edging of *Chaenostoma hispida*, a very useful plant for this purpose, being dwarf in habit and covered with tiny white flowers.

Resuming progress along the walk leading to the Kern-Tulare Building, your attention will perhaps be attracted by a giant Chilian Rhubarb (*Gunnera Chilensis*), which is in the sub-tropical group which skirts the edge of Palm Canyon. The *Gunnera* is a very satisfactory plant for such groupings, bearing, as it does, enormous rough leaves, several feet in length, with spiny petioles. It is not, however, related in any way to the edible Rhubarb, which is to be regretted, as there is no immediate possibility of hybridizing so as to obtain an edible rhubarb with stalks five or six feet in length, as in this so-called Rhubarb. A disappointment indeed.

A short distance to the north, on the arcade east of the Indian Arts Building, is one of the finest effects from *Solanum jasminoides* (the Potato Vine) which have been obtained anywhere upon the grounds, and the rapidity of growth has been almost phenomenal.

Following again along the path, and winding to the west on "La Avenida de los Estados" (towards the state building, on the right there is a continuous planting of *Tecoma ricasolina* (*Mackenii*), with a liberal sprinkling of *Pittosporum crassifolium*, a pleasing shrub with thick leathery leaves clothed with a silvery down.

North of the esplanade, facing the Organ Pavilion, the combination of Heliotrope with *Acacia verticillata* is proving to be quite effective, and will be more so when the Acacia are in flower and a blue and gold combination thereby presented.

In the Conrad & Jones canna exhibit, north of the California Building, the new Canna San Diego has brought forth its prominent bloom. The plants are still recovering from the shock of their journey, and will be better later on, but a fairly accurate idea of the bloom may be obtained. The introducers describe the flower as a "Chinese orange or Persian yellow," the buds as dark bronze, the foliage as golden bronze, and state that it will attain about the same height as the variety Mrs. A. F. Conard. Near this exhibit, across the walk on the east, a specimen of *Bauhinia grandiflora* is coming into flower. This shrub or small tree bears pure white, butterfly-like flowers which have the interesting habit of unfolding at night. This plant is found in its native state in the Andes, and is sometimes known as Mountain Ebony.

In the Botanical Building the curious *Philodendron selloum* is commencing to flower. This specimen is to be found on the east side of the glass house, almost to the rear of the building. The leaves of this species are quite similar to those of its close relative, the *Monstera deliciosa*, excepting that they are deeply cleft, without being perforated, and are somewhat larger than those of the *Monstera*, being two or three feet in length and about half as broad. The flowers are white, and similar in habit to the flowers of the *Monstera*. A group of ornamental leaved *Caladiums* has recently been added to the collection in the lath house. These may be found in almost every imaginable color, variously blotched and striped, but of smaller size than the plain green type.

The *Asparagus Sprengeri* (up high upon the sides of the lath house) is in flower, and the masses of small feathery white flowers are quite decorative, but the berries will be more so when they are borne.

Outside the Botanical Building, flanking the seats which line the lagoon, the *Myrtis communis* and *Myrtis communis* variety *microphylla* are also in flower. There are many and diversified plants called "Myrtle," but this is the genuine Myrtle of song and story. The last-named is a small leaved variety of the type, and the flowers are both are white and about the size of a penny.

Muehlenbeckia complexa, variously known as the "Wire Vine, Maiden Hair Vine," etc., the latter name being best descriptive, is not exactly showy when in bloom, as it is now, the flowers being very small, white and not very numerous, but a closer examination of the individual flower will reveal a beauty unsuspected at a distance. The flowers will be discovered to be of a delicate waxy texture, quite translucent, and with a very black center, which furnishes a striking contrast to the white of the petals. The vine itself is a very useful and graceful subject for many purposes.

Over in the Lipton Tea Garden, many of the tea plants are recovering from their temporary indisposition, although many have gone back to stay gone.

The Singalese gardener, experienced in tea growing, says he is convinced now, after three months of experimentation, that tea culture is practicable in this climate --- but twenty-five or thirty miles back from the coast. Not long ago a pineapple grower informed us that, in his opinion, commercial pineapple growing was entirely within the realms of possibility. Why doesn't some adventuresome spirit take a chance?

Rhus laurina, our native California Sumach, is in bloom all over the canyons and mesas. Right here it might not be out of place to make a plea for our native shrubs. What is the philosophy of cutting out such native shrubs as *Rhus laurina*, *Rhus integrifolia* (the "Lemonade Berry"), the various specimens of *Ceanothus*, etc., and planting in their stead ungrateful exotics which often do not respond to the lavish care,

which if bestowed in like degree upon shrubs which are indigenous would transform them from "brush" to ornamental shrubs worthy to grace anyone's yard.

Apropos of native plants, the exceeding rapid growth of the Monterey cypress on the west slope of Cabrillo Canyon, south of the bridge, has been a matter of much interest to those who know them to be a very scant four years of age from seed. But they have not ceased to perform wonders, inasmuch as they are apparently bearing masses of bright blue flowers. The flowers, however, are the product of some *Convolvulus* which was planted as a ground cover, and which promises to become a tree cover as well, but just now is very attractive by way of contrast to the mass of green foliage.

The two agaves in the urns on Cabrillo bridge, which have been gradually coming into flower, both further distinguished themselves by blowing over and out of their containers, and having to be rescued and replanted. However, having its roots exposed to the hot sun for a half day or so is a trifling matter for an Agave, and so the flowering process is uninterrupted, and the flowering shoots of twenty-five or thirty feet in height continue to attract visitors, both human and winged, as the flowers seem to be very popular with the humming birds and bees.

September, 1915, Santa Fe Magazine, Vol. 9, No. 10, 39-42. San Diego Notes

With heavy attendance and liberal spending of money the San Diego Exposition was able at the end of July to have a big balance on the profit side of the ledger. Including July, 1,264,561 people visited the exposition, and since then the crowds have been coming thicker than ever.

July's average daily attendance was 9,709 --- a much high daily average than any previous month. The total for July exceeds that recorded in January, the previous high month, by just 120,710. This excess is almost equal to the total attendance of February. The attendance by month since the opening is as follows: January, 180,270; February, 133,168; March, 153,042; April, 151,148; May, 179,818; June, 166,135; July, 300,980.

While the month was featured by several special events which drew large crowds, the attendance for the days immediately following the celebration days was heavy, thus indicating to exposition officials that there was an influx of visitors continuing. The exposition information bureau has just compiled statistics which show that visitors are remaining longer in San Diego than they did during the first months of the exposition. The average visit of early sightseers was two days, but in June and July the average visit was lengthened to four days.

.
"Safety First will arrive in San Diego, the first port of call, early in November."

This is the radiogram which Captain Cosgrove flashed from London, Conn., the other day to President G. A. Davidson of the San Diego Exposition. The message announces what will probably be the most unique water trip on record.

At the wheel of *Safety First*, a small power schooner which displaces only eleven tons, Captain Cosgrove left the Atlantic seaboard on August 1. When the anchor of *Safety First* is dropped in San Diego Harbor, Captain Cosgrove will have completed the first important lap of the long trip which will circle the globe before it ends. From San Diego the daring skipper plans to visit the South Seas, Australia, the Orient, and will thence take his good ship through the Suez Canal to the east coast of the United States.

.
Ploughing up the placid Pacific, the flagship *Colorado* of the Pacific fleet, with Admiral Thomas B. Howard, returned a sea-weary battalion of marines to San Diego and the San Diego Exposition for the rehabilitation of the marine barracks on the exposition ground recently, when the battalion's daily drills again became a part of the special events.

This, the second battalion, Fourth Regiment, United States Marine Corps, under command of Colonel Pendleton, had been taken to Mexican waters and there held in readiness for weeks to persuade the Yaqui Indians to cease molestation of Americans if necessary. It was not necessary. The Yaqui chiefs had declared war on Germany, Ireland, the United States and about all the other countries they had heard of, but decided if the cruiser *Colorado* was a sample of what might visit them they would call it off.

Admiral Howard since his return has transferred his flag to the big battleship *San Diego*.

An enterprising employee of the San Diego Exposition who loves to delve into statistics and who has a head for "figgers" has just announced that the electric trolleys at the exposition have traveled 143,086 miles since the exposition's opening. This fellow estimates that at the close of the exposition the little sightseeing cars will have saved visitors some thing like 300,000 miles. Although the speed of these cars would prohibit their use in an elopement, they are such a novelty that their popularity continues to increase. The speed, which is limited to two and one-half miles an hour, "under favorable conditions," urges many burlesque races between visitors.

A blind man visited the exposition some months ago and declared he derived as much pleasure from "sightseeing" as a person whose vision had not been destroyed. Now comes the armless man. The strangest part about his visit is that he arrived in an automobile which he had driven from Schenectady, New York. He is Albert Stevens and, when he pulled his machine up in front of the California Building, to receive the congratulations of President Davidson, the speedometer read 5,100 miles. On the run across the country, Stevens was accompanied by his wife, and many side trips were made.

As a result of an accident many years ago Steven's left arm was amputated at the shoulder and the right one at the elbow. On his car Stevens had the gear-shifting levers and brakes arranged so that he could operate them with his feet. He steers the car with the stub of his right arm, the steering wheel having upright pegs into which the stub fits. Placing this half arm between the pegs, Stevens moves the upper part of his body so that he can steer the machine with ease.

September 1, 1915, San Diego Union, 1:4. Mme. Alys Larreyne, French prima donna, will make her American debut tonight at Spreckels organ.

September 1, 1915, San Diego Union, 4:5. Doctor Ernesto Nelson, commander of education from Argentina to the San Francisco Exposition, will represent Governor General Anastasi today at the Pan-American Day at the San Diego Exposition.

September 1, 1915, San Diego Union, 8:2. Mary Mason Benizen, dramatic soprano, to sing at Exposition organ Friday afternoon.

September 1, 1915, San Diego Union, 9:2. John Barrett, president of Pan-American Union, was Exposition guest for celebration of Pan-American day.

September 1, 1915, San Diego Union, 9:5. Buildings at Exposition to be kept open next Sunday; three-day celebration will start Saturday; rates for tots reduced.

Realizing that for many reasons many San Diegans have been unable to see the exhibits housed in the main buildings, which are closed on Sundays, the Exposition has directed that all main exhibit buildings shall be kept open from 9 a.m. to 6 p.m. next Sunday. They all will be open on Labor Day. The managers of most of the state and county buildings favor open-house Sunday; so that practically every building in the Exposition will be open on this day. For Monday every building will be open.

The three-day celebration, which will begin Saturday morning and extend to late Monday night, probably will be the most expensive that the Exposition will stage this year.

Sunday and Monday afternoon . . . daily parachute drops by Tiny Broadwick; Modern Woodmen and Fraternal Brotherhood to conduct competitive drill and parade; Hampton Colored Quarter to sing twice Monday.

September 2, 1915, San Diego Herald, 1:6. Gold medal award by the Exposition.

The Salt Lake Route-Union Pacific building at the Panama-California Exposition has been awarded a gold medal for the unique features of their building and the attractive displays therein.

The structure is known as the Salt Lake Route-Union Pacific building and was erected for the purpose of serving as an international transportation center and to provide information to world travelers and comfort to Exposition visitors. The building contains a rest room for ladies and children, with maid in attendance, information bureau and telephone booths, smoking room for gentlemen and other accommodations. At either end of the main reception room large painted maps of the Salt Lake Route and Yellowstone National Park are shown on the walls with the exact topography of the country tributary. The entire front of the building is of glass transparencies, showing the natural resources of the country traversed by the Salt Lake Route and Union Pacific System.

This is said to be the first building of its kind ever erected at any Exposition for a publicity exhibit. The special rest room provided for the entertainment of visiting railroad men is one of the prominent features.

At the close of the Exposition, the building will probably be donated for use of the Exposition park officials.

September 2, 1915, San Diego Union, 1:3. John Barrett delivered address at Fair on closer trade relations between United States and Latin American nations.

September 3, 1915, Minutes of Board of Park Commissioners. C. M. Winslow presented plans for interior decoration of the Aviary at Juniper street.

K. O. Sessions requested Park Board donate surplus nursery stock to beautify the grounds around the various school buildings.

September 3, 1915, San Diego Union, 7:1. Alys Larreyne wins audience at Exposition; songs given in French and English; Doctor Stewart played accompaniment, by W. B. Seymour.

September 3, 1915, San Diego Union, 7:4. Miss Harriett Monroe of Chicago, publisher of **Poetry** magazine, talked on "new movement in poetry" in the library of the Women's Press Club, California Quadrangle, yesterday afternoon.

September 3, 1915, San Diego Union, 7:4. Miss Mary Mason Brenizer, a dramatic soprano trained in the United States, to sing at Fair today.

September 3, 1915, San Diego Union, 9:3-4. Prominent San Diegans plan Latin America visit; outline of proposed trip drawn at meeting in Chamber of Commerce rooms; delegation will see 20 republics in small parties; plan of John Barrett.

September 4, 1915, San Diego Union, 9:1. Admission Day celebration plans nearing completion.

September 4, 1915, San Diego Union, 9:2. Harold Gregson, English organist, played at Spreckels organ.

September 4, 1915, San Diego Union, 9:3. One thousand Modern Woodmen of America due to arrive today.

September 4, 1915, San Diego Union, 9:4. Labor Day celebration to open tonight at Exposition; electricienne costume parade this evening; air stunt Sunday; barbecue, competitive drills, athletic events scheduled for Monday.

September 5, 1915, San Diego Union, 1:3, 3:5-6. Thousands arrive for Labor Day frolic.

September 5, 1915, San Diego Union, 3:2. Hawaiians win parade first prize; Hopi girls' electricienne scores hit; 30 motor cars compete in decoration contest at Exposition.

Two Hopi girls in a chair decorated with Indian blankets, the entrant of the Indian Village of Painted Desert, were awarded second prize.

September 5, 1915, San Diego Union, 3:6. Governor Hiram W. Johnson today named Colonels D. C. Collier and Ed Fletcher as members of a 27 delegation to represent California at an international irrigation congress to meet in cities in California from September 13 through September 20.

September 5, 1915, San Diego Union, 7:1. Historical Society finds picture of Joshua Sloane, one of founders of Balboa Park; picture was exhibited at Exposition.

September 5, 1915, San Diego Union, 9:1. Big celebration set at Fair on Admission Day.

September 5, 1915, San Diego Union, 9:2-3. Exposition arranges pageant to honor Motion Picture day rulers.

September 5, 1915, San Diego Union, II, 1:6. Las Palomas or "The Romance of the Pigeons," the music by Jose Amable and words by Juan Antonio Mateos, and dedicated to Mrs. G. A. Davidson, was given for her yesterday by the Spanish troubadours at the president's office of the Panama-California Exposition.

September 5, 1915, San Diego Union, II, 1:6. Harold Gregson organ recital delighted music lovers yesterday.

September 6, 1915, San Diego Sun, 1:6. Labor Day observed in style.

September 6, 1915, San Diego Union, 3:5-6. Regular Fair attractions draw average of 7,407 per day during August; total of 229,604; July total was 301,937.

September 7, 1915, San Diego Sun, 6:1. Labor Day a grand success.

September 7, 1915, San Diego Union, 1:3-4, 3:1-3. Labor King holds sway over Dream City; 15,000 see daring girl's spectacular leap from sky; parade of fraternities begins stirring program for day; greased pig race; athletic events and drills by organization teams among attractions.

September 7, 1915, San Diego Union, 8:1. Old Dixie songs charm audience at Exposition; Hampton Institute Quartet gives Southern selections on Isthmus; two concerts today; singers will be heard at Organ Pavilion and Plaza de Panama.

September 8, 1915, San Diego Sun, 3:1-2. Final plans are made for Admission Day pageant tomorrow; parade starting at 11 a.m. at 6th and Laurel with Colonel Pendleton commanding; one battalion U.S. Coast Artillery; one squadron U.S. Cavalry; one battalion U.S. Marine Corps; Coast Artillery Reserves; two companies National Guard of California; 3rd Division Naval Militia of California; automobile sections; exercises at Organ Pavilion at 2 p.m.

September 8, 1915, San Diego Sun, 6:1. Admission Day to be observed; pageantry depicting state's history; anniversary exercises; gymkhana on tractor field double parachute jump from aeroplane by Tiny Broadwick, and open-air ball on Plaza de Panama at night.

Gymkhana events include a potato race, sack race, umbrella race, egg race, animal race, shoe race, and other events.

September 8, 1915, San Diego Sun, 6:2. Judge Henry Neil of Oak Park, Illinois, father of the mothers' pension laws, to speak at Exposition this afternoon.

September 8, 1915, San Diego Sun, 6:4. Marston store to close early Admission Day.

September 8, 1915, San Diego Sun, 6:4. Catholic Day . . . A choir of 100 voices will sing Stewart's Mass in D minor to the accompaniment of the great organ under the direction of Doctor Stewart, the official organist.

September 8, 1915, San Diego Union, 8:1. Big fete aim on Admission Day.

September 8, 1915, San Diego Union, 14:3. George W. Goethals, Panama Canal builder, will speak at Exposition Monday.

September 9, 1915, San Diego Sun, 7:4. Goethals' Day, Monday; school children of San Diego will be admitted free; Panama-Canal Extravaganza on Isthmus will be free to school children; Major General Goethals to talk at Organ Pavilion at 5 p.m.

September 9, 1915, San Diego Union, 3:3. San Diego film patrons select Francis X. Bushman as King and Beverly Bayne as Queen of Motion Picture Day.

September 9, 1915, San Diego Union, 9:2. Native Sons and Daughters celebrate California's birthday.

September 9, 1915, San Diego Union, 14:2. Potpourri jar exhibit placed at Exposition; rose-filled souvenirs installed at Varied Industries building; Mrs. Jessie C. Knox prepared jars from roses grown in her rose garden south of Spreckels organ and adjoining Utah building.

September 9, 1915, San Diego Union, 14:2-3. Shrinkage of Exposition gate halts entrance of floats in big Admission Day parade.

September 9, 1915, San Diego Union, 14:3. Tijuana Fair fiesta will include thrills in unique entertainment; wild horses conquering feature.

September 9, 1915, San Diego Union, 14:4. Marine band to play for gymkhana events; program usually given at Plaza switched to tractor field today.

September 9, 1915, San Diego Union, 14:4. The Howlands of San Diego have just returned to the States from Alaska and report that even in the north country there is much inquiry concerning the Exposition.

September 9, 1915, San Diego Union, 14:5. Free admission pledge to children by Fair; young America can enjoy Goethals' Day at Exposition without cost.

September 9, 1915, 14:5. Free admission pledged to children under 15 during Goethals Day, Monday.

September 9, 1915, San Diego Union, II, 1:1-3. Celebration of California's birthday will be observed by native sons and daughters at San Diego Fair today.

September 9, 1915, San Diego Union, II, 1:4. Attractive organ program promised for those who will pass Admission Day at the Exposition.

September 10, 1915, San Diego Sun, 1:5, 3:4. Tomorrow "Movie Day"; royal parade, making of motion pictures, coronation ceremony, dinner at Cristobal, open-air ball in Plaza de Panama, and presentation of loving cups to Queen Beverly Bayne and King Francis X. Bushman.

September 10, 1915, San Diego Sun, 8:1. Between 500 and 700 post office clerks, members of the United Association of Post Office Clerks, will arrive tonight and tomorrow morning to visit the Exposition tomorrow which will be their "day" at the Fair; also Motion Picture day.

September 10, 1915, San Diego Union, 2:1-4. Admission Day celebrated at Fair; stage coach bears forty-niners in spectacular parade.

With a pageant which showed California as she was in 1850 when admitted as the eighteenth state into the Union and which showed her as she is today, the sixty-fifth anniversary of Admission Day was celebrated at the Panama-California Exposition yesterday.

Decorations of floats depicting times of many years ago were typical of that time, pepper boughs and geraniums being used, and those showing the progress of the state were equally typical. There was a quiet dignity about the parade which made it impressive to the hundreds who attended the Exposition events, both to assist in the celebration of Admission Day and to enjoy the varied program.

Three forty-niners were in the parade, men who had crossed the plains and endured the hardships of that time to live in a country which was then the home only of Indians and the gold seeker. The forty-niners are: N. E. Gilson, Silas St. Johns and Amos Weed, all of San Diego and all members of the Pioneer Society. The men rode in the old stage coach entered in the parade by the Wells-Fargo Express Company.

Typical Floats in Parade

Two floats entered by the Pioneer Society attracted much attention. One of them represented the times of 18__ and the other represented the present. In the float representing the old times were San Diego girls dressed as young women dressed long ago. The queen was Miss Martha Wadham, daughter of James E. Wadham, former mayor, and her attendants were Miss Gladys Doddridge and Miss Florence Anderson. The other float was typical of the present time and the mode of dress of the present day. Mrs. T. J. Daley was queen and her attendants were Mrs. Mary S. Skinner and Mrs. Lucy Daniels.

Another float which attracted enthusiastic attention was that which represented California. It was elaborately trimmed with golden poppies. San Diego Parlor Native Daughters had an attractive float with a number of young women riding in it. Dr. Louis Heilbron had planned the decoration and she and Mrs. John N. Flint, past president, and other officers of the organization were the occupants.

The Court of Honor had an attractive float which represented liberty, patriotism and brotherhood. One of the largest United States flags in San Diego floated over the figures and the spectacle brought forth much favorable comment on the work of the Court of Honor.

Thirty-Eight States Represented

Headed by a squadron of city police and with the United States coast artillery corps, first battalion, officers and men of the First Cavalry, officers and men of the marine barracks, coast artillery reserves, two companies of the California National Guard and a company of the state naval militia and with floats representative of organizations and local firms and with thirty-eight states represented by decorated automobiles, the line of parade was several blocks long.

Reception at Pavilion

The Federation of State Societies were represented by a float, as were Daughters of the American Revolution, Fraternal Brotherhood, Frevert Bindsoe Co., Southern Electric Co., Standard Oil Co., Benbough Furniture Co., E. Moulie (?) Perfumery Co., and many others.

In automobiles were Mayor E. M. Capps; George Burnham, vice president of the Exposition; President W. J. Mossholder of the California Society, the society which was host to all the other states in yesterday's pageant and celebration; Congressman William Kettner and Colonel L. S. McLure.

Mrs. J. C. Needham was chairman of the meeting held in the afternoon at the Spreckels music pavilion, where an attractive program was given by members of the different state societies. A reception and musical was also given at the Southern California Counties building.

Gymkhana Program Given

The chief attraction, at least the most largely attended function of the afternoon, was the gymkhana program, which took place on the tractor field. As an additional thrill Tiny Broadwick made her double jump from the aeroplane driven by Oscar Brindley. Miss Broadwick jumped from the aeroplane when it was at an altitude of about 2,500 feet and made a perfect landing. It was considered by many the prettiest drop she had made. The young woman landed at the north end of the tractor field, in plain view of the many who had gathered.

All sorts of funny stunts were enacted by the entrants in the gymkhana and the spectators seemed to thoroughly enjoy the novel program of athletic events. In the potato race, Private Goodnight was first and Privates Epperson and Carlton second and third, all of them representing the First Cavalry.

The First Cavalry captured all places in the sack race. Privates Sasnowsky and Fields being first and second. In the wall-scaling contest the team representing the marine barracks was first in 27.3-6 seconds, L troop's team was second in 32 seconds and D troop was third in 45 seconds.

Horseback Egg Race

The First Cavalry men captured the egg race, it being necessary to carry an egg in a spoon 100 yards while riding on a horse at a gallop. Privates Newland, Carlton and Wilson got first, second and third places in this event. In the three-legged race, Privates Barr and Diamond, representing marine barracks, won. Two teams, Hawkins and Hawkins and Stuhl and Nazareck, both representing marine barracks, tied for second place.

The animal race afforded much amusement. Each entrant was given an animal, which, to win the race, must be drive over a given line first. A sheep, a goose, a duck and a pig were entered, with soldiers behind them to urge them. The sheep came over the line first, the goose was second and the duck third. As the animals persisted in running in a direction opposite to that in which the line had been drawn, the antics of the soldiers and the animals created considerable merriment.

Ball Ends Celebration

The celebration ended last night with an open-air ball, held at the Plaza de Panama, the music for which was furnished by the Thirteenth band of the coast artillery and the marine barracks band.

Several hundred enjoyed the dancing until a late hour. Colored lights were thrown on the dancers, making the scene one of gay beauty. The two bands alternated in furnishing dance music, so that there was almost continual dancing.

The California society members acted as hosts at the party and 28 states were represented by those present, a large number of those who had been on the grounds during the day having stayed for the dance.

September 10, 1915, San Diego Union, 2:4. Miss Lucy Helen Hayes of Chicago, soprano, will give a song recital in the blue room of the Southern California Counties building this afternoon.

September 10, 1915, San Diego Union, 2:4. Big delegation of Catholics due to take part in the observance of Catholic Day, September 19; setting apart of a special day at the Exposition for Catholics has been approved by Bishop Thomas J. Conaty of the Southern California diocese.

September 10, 1915, San Diego Union, 8:1. Film day rulers, screen stars to arrive today; Queen Beverly Bayne and King Francis Bushman will motor from north; pictures at Fair, plan.

September 10, 1915, San Diego Union, 8:4. Chaplain Taylor, USN, arranges entertainment for marines and their friends in New Mexico building tonight; band concert, movies, talk.

September 10, 1915, San Diego Union, II, 1:2. Foreign airs feature organ recital today'

September 10, 1915, San Diego Union, II, 1:3. Admission Day gala affair at San Francisco Exposition.

September 10, 1915, San Diego Union, II, 1:4. Film stars here for naval drama; scenes in serial "Neal of the Navy" to be enacted at Exposition today; Balboa Company is filming patriotic serial for Pathe Freres.

In the staging of a scene of "Neal of the Navy" before the Exposition gates tomorrow, Miss Lillian Lorraine will appear leading an attacking party of United States marines on horseback. Director Harry Harvey has arranged for a lively scene. Another prominent actor here to participate is William Courtleigh, Jr., one of the best-known young juveniles of the stage.

September 11, 1915, San Diego Union, 14:1-2. Motion Picture day to be held; Francis X. Bushman to be king of celebration; Beverly Bayne is queen; parade, coronation, grand night ball, features.

September 11, 1915, San Diego Union, 14:3. Coast Artillery band to play at Fair today.

September 11, 1915, San Diego Union, 14:5. Attractive program prepared for organ; will open with sonata by Rene L. Becker.

September 11, 1915, San Diego Union, 9:2. Former Governor John M. Slaton of Georgia visited Exposition.

September 12, 1915, San Diego Union, 3:1. Goethals arrives; special honors shunned; canal builder plans own entertainment at Fair today, tomorrow; talk to tots pledged at 3 o'clock tomorrow afternoon on construction of Panama Canal at Panama Canal concession on Isthmus; will give principal address at 5 p.m. at Spreckels organ pavilion.

September 12, 1915, San Diego Union, 3:2-5. Motion Picture Day; movie king, queen crowned at Exposition; When President G. A. Davidson, acting the part of the prime minister of the court of revelry, crowned Francis X. Bushman, king, and Beverly Bayne, queen of Movie Day, at the Panama-California Exposition yesterday afternoon as the climax on the celebration of silent drama stars, someone in the crowd called "Long live the king," and the cry was taken up immediately by the crowd. When, after Miss Bayne had addressed the audience before the Spreckels music pavilion, someone called "Long live the queen." The cry was also taken up, and if the well-wishers of the people carry any weight, King Francis X. and Queen Beverly will live long and prosper.

Movie Day and the crowning ceremonies at the Exposition brought out some of the biggest daytime crowds of the season.

September 12, 1915, San Diego Union, 3:6. William Randolph Hearst, who came suddenly to San Diego yesterday afternoon, was found last night on the Isthmus at the Panama-California Exposition carrying two

teddy bears, a young dog made of wool and some sawdust with shoe buttons as eyes, a lot of Chinese and Japanese novelties, and a walking stick.

September 12, 1915, San Diego Union, 7:1. Catholics ready for day at Fair; prizes to be awarded in athletic events put on display.

September 12, 1915, San Diego Union, 9:7. Exposition day set for marines, Saturday; field events and open-air ball will be features of program.

September 13, 1915, San Diego Union, 2:6. Following a temperamental try-out this morning in which President G. A. Davidson and other officials of the Exposition will sit en banc the Spanish troubadours will resume their popular twanging of guitars, clacking of castanets and singing of airs of old Castile (not meaning soap) in various portions of the Exposition grounds but there probably will be some erstwhile familiar faces missing from the group.

The process of elimination is expected to add to rather than to detract from the finished productions of the Spanish performers, the Exposition authorities state because the reorganized body will work in better spirit of camaraderie, or something like that.

September 13, 1915, San Diego Union, 2:2-4. General Goethals pays two bits to pass turnstiles of Fair Panama Canal made possible.

September 13, 1915, San Diego Union, 3:1. Goethals to tell story of canal at Exposition.

September 13, 1915, San Diego Union, 3:2. Judge Elbert Henry Gray, steel corporation head, to visit Exposition.

September 13, 1915, San Diego Union, 12:1. Big day for Taft planned

Roosevelt Day, July 27, attendance was 18,870

Bryan Day (also Utah Day), July 17, attendance was 18,264

September 14, 1915, San Diego Union, 1:4-5, 2:2-3. Goethals told story of Panama Canal at Exposition to 6,000 pupils.

September 14, 1915, San Diego Union, 1:3-6. Winslow in charge of Pacific fleet; tribute paid Howard by officers and men; *San Diego* to be flagship tomorrow.

September 14, 1915, San Diego Union, 1:7-8. Army on war footing at border following attack by Mexicans.

September 15, 1915, San Diego Sun, 12:4. Former President Taft comes for visit tomorrow; to speak at Exposition at 5 p.m.; banquet planned at 7:30 p.m.

September 15, 1915, San Diego Union, 3:1. Taft party due in San Diego tomorrow.

September 15, 1915, San Diego Union, 3:2-3. Congressman Nicholas Longworth and wife (daughter of Theodore Roosevelt) visited Exposition.

September 15, 1915, San Diego Union, 4:8. Harold Gregson, English organist, pleases at Fair; fourth and final concert produces work far above mediocrity, by W. B. Seymour.

September 15, 1915, San Diego Union, 5:1. Greeters planning big day at Fair Saturday; bellboy uniform for manager J. H. Holmes of U. S. Grant Hotel; pageant on program; marine and friends to make merry before Spreckels Organ Pavilion.

September 15, 1915, San Diego Union, 9:2-4. Two gifted dancers join troubadours; butterfly girl, fawn-like youth at Fair; performers come to Exposition direct from Orpheum circuit tours.

September 15, 1915, San Diego Union, 9:4. Harold Bell Wright, author of "The Wining of Barbara Worth," to be honored at Exposition today.

September 15, 1915, San Diego Union, 9:5. Catholics ready for Sunday fete at Exposition.

September 15, 1915, San Diego Union, 14:1. High tribute paid San Diego Fair by writer; **Collier's Weekly** designates Sun City achievement as "Exposition Beautiful"; article by Emily Post; discord notes are lacking; "weather deliciously cool," says visitor; praises school buildings..

September 16, 1915, San Diego Sun, 5:1. Exposition hostesses entertain many; hospitality at Southern California Counties building makes a favorable impression; hostesses represent the seven counties of Southern California.

September 16, 1915, San Diego Sun, 6:2. Roll of Honor plaques show list of visitors at local Exposition; plan to secure signatures of visitors and engrave them upon bronze plaques which will be placed on walls of California and Fine Arts buildings.

September 16, 1915, San Diego Union, 1:4-5, 3:3. San Diego awaiting Taft; reception planned; subject of address is secret; "We are nearer Mexican intervention than ever before because of policy which neither watches nor waits," says former president in Angel City.

A committee consisting of Lyman J. Gage, U. S. Grant, Jr., M. L. Perrin, Dr. D. Goehenauer, L. J. Wilde, E. Milton Barber, appointed by Eugene Daney, chairman of the reception committee for former President W. H. Taft will meet the Taft party at Oceanside today and escort it to San Diego.

The train, which will bear former President Taft and party to San Diego, will arrive today at 12:50 p.m. It will be met by a committee of 102, appointed some days ago by Eugene Daney, troops of the First Cavalry, officers and men from marine barracks, and officers and men from the coast artillery. The former president will be escorted immediately to the Panama-California Exposition.

After the arrival at the Exposition, former president Taft, with officers of the Exposition, will review the remainder of the parade from the steps of the Sacramento building. An informal luncheon will be given at the Cristobal Café at 1:30 p.m.

Shortly after luncheon the former president will go to the New Mexico building, where several exercises have been prepared. As will be remembered, Mr. Taft, while president, signed the bill which made New Mexico a state. It was thought fitting and appropriate that special exercises be planned for him at the New Mexico building.

At 5 p.m. the distinguished visitor will deliver an address at the Spreckels music pavilion at the Plaza de los Estados. The subject has not been made public, the former president having been given his choice.

Tonight at 7:30 a public banquet will be given at the Cristobal Café under the auspices of the San Diego Bar Association. Tickets may be procured from any member of the reception or banquet committee. Women are especially urged to be present. Former President Taft, it is thought, will deliver an address at the luncheon.

In a telegram to Eugene Daney received yesterday, Taft verified the program which had been prepared for him by the local committee. He asked, however, that nothing be planned for Friday as he desired to rest on that day. A trip to Point Loma and a luncheon and golf game at the Point Loma Country

Club had been planned. While here the former president will make his headquarters at the Hotel del Coronado.

Taft will leave San Diego at 3 p.m. Friday for San Francisco and will leave that city Sunday for the East coast, going via the Panama Canal.

"I fear we must act in Mexico," Taft says to Angel City scribes.

Los Angeles, September 15. Declaring that the United States is nearer intervention in Mexico than need be and that the national administration's policy of "watchful waiting" was one that neither "watched nor waited," former President William Howard Taft arrived in Los Angeles today, his fifty-eighth birthday. A large crowd filled the corridors of the railroad station and greeted Judge Taft with cheers and hand-clapping as he stepped from the train and faced a battery of cameras, motion picture machines, newspaper men, the Chamber of Commerce reception committee, and many prominent Republicans.

The first person greeted by the former president was his sister, Mrs. W. A. Edwards, with whom he will celebrate his birthday anniversary.

Shortly after his arrival Judge Taft gave an audience to newspaper men at the Alexandria Hotel.

"We are nearer to intervention in Mexico than we need have ever been before by reason of the policy of 'watchful waiting.' We have neither watched nor waited," he said. "I am not anxious that the United States go to war with Mexico, however," continued Judge Taft, "as I know what it entails. But I am afraid we will have to act."

Asked regarding his views on the German situation, Judge Taft declared the situation has so far failed to shape itself sufficiently to allow him to express an intelligent view, but expressed his approval of the stand President Wilson has taken up to the present.

"We are all behind the President in his desire to keep the United States from becoming involved in the European war," he declared.

Judge Taft declined to give his views on national defense, saying he expected to discuss the subject at length in his speech to the students of the University of Southern California later in the day.

While he did not say so in so many words, Judge Taft made it plain he is not a candidate for the Republican nomination for president next year.

"I am out of politics," he said, "but having been in politics, I naturally take considerable interest in what is going on and reserve the right to express my views from time to time."

Judge Taft laughingly declined to discuss Theodore Roosevelt, but, in reference to him, said:

"If he comes back, it will be as a Republican.

"The Progressives in the East still have a few field marshals, generals and colonels, but so far I have not made a census of the rank and file. I think a Republican will be elected president in 1916."

Asked if he had read comments of Governor Johnson of California regarding the view he had expressed on the non-partisan act in California, Judge Taft laughed heartily and declined to debate the subject, but recalled his formally expressed opinion that non-partisanship is dangerous to the welfare of the state. Regarding woman suffrage, the judge referred to his article in a current magazine, declaring it fully expressed his views on women's appeal to congress for recognition.

In the privacy of his rooms, Judge Taft conferred with National Committeeman Stanton.

September 16, 1915, San Diego Union, 4:1. EDITORIAL: Taft Day at the Exposition.

It has been San Diego's privilege this year to have as guests a goodly number of the most distinguished men of the nation. There is no better proof of the success of the Panama-California Exposition than the fact that among those who have come here to see and praise it are citizens who in their several walks of life are deemed the most illustrious of modern times. And the great crowds that have gathered to greet and hear these notable visitors fully attest the warmth of the welcome extended to them.

This city will be honored today by the presence of another of the nation's greatest men --- former President William Howard Taft --- and it is not to be doubted that the greeting that will be given him will be as enthusiastic as that extended other Exposition visitors who deservedly stand high in popular admiration and esteem. The Exposition knows no politics and should know none, and men and women of all parties will gladly join in welcoming Mr. Taft because he is recognized as a man of transcendent ability, high ideals, and thoroughly lovable disposition. It is not exaggeration to say that no other man after losing a presidential election every grew so rapidly in popular esteem as has the Republican candidate of 1912. The truth is that since that time the American people have been coming to understand Mr. Taft, and the better they learn what manner of man he really is, the greater is their admiration of him.

During his present tour of the Pacific coast, Mr. Taft has everywhere been received with an enthusiasm that has been equaled only by that displayed toward former President Roosevelt and William J. Bryan. Wherever Mr. Taft has spoken great crowds have assembled to listen to him, and they have been rewarded for doing so by hearing strong speeches that had the true American ring. Nor has the distinguished visitor shaped his addresses merely to capture fickle popular favor. Avoiding personalities, as was always his habit, he has spoken his mind with the utmost freedom on topics of the day. The American people admire frankness and moral courage, and Mr. Taft's display of those qualities had made friends for him wherever he has gone.

"Taft Day" at the Exposition should be among the most notable of the year. The arrangements for officially welcoming the distinguished guests have been carefully made and probably leave nothing to be desired. It now remains for the people of this city to assemble in Balboa Park this afternoon and give the former president a genuine San Diego greeting.

September 16, 1915, San Diego Union, 14:1. San Diegans say '49 Camp booming at Exposition in north; spinning wheels ruling passion on "Zone."

September 16, 1915, San Diego Union, 14:2. Exhibitors and concessionaires will have big day at Exposition October 2.

September 16, 1915, San Diego Union, 14:3. "Barbara Worth" author has day; Harold Bell Wright speaks at Exposition.

September 16, 1915, San Diego Union, 14:3. Doctor Stewart to play at Exposition today.

September 16, 1915, San Diego Union, 14:4. Water colors and etchings by Robert Lee Eskridge of Chicago will hang in California Quadrangle today.

September 16, 1915, San Diego Union, 14:5. Eight prizes offered in Greeters' contest; public will be allowed to enter competition.

September 17, 1915, Minutes of Board of Park Commissioners. Superintendent reported that unless some additional funds were raised he would be forced to cut out 60 men from the park force, stating that the additional expense of maintaining the Exposition grounds was responsible for going over the budget this year.

September 17, 1915, San Diego Sun, 1:2. Marines to have day at Exposition; Greeters come tomorrow.

While the marines stationed at the Exposition grounds are accustomed to having Saturday as a holiday, tomorrow will be the first time they will have a celebration of their own, with the title "Marine Day." Baseball game at 2:30 p.m.; band concert from 2:30 to 4:30 at parade grounds; military ball on Plaza before the Spreckels Organ Pavilion at night, 1,200 invitations issued.

September 17, 1915, San Diego Sun, 1:3. Exposition officials today issued the batting averages of the three most prominent persons who have visited the Exposition this year.

W. H. Taft	7,189
T. Roosevelt	18,870
W. J. Bryan	18,264

September 17, 1915, San Diego Sun, 8:1. Taft talks on many subjects; defends railroad; hits labor; army and navy should be big enough to guarantee our protection; San Diego is a fine place to live.

September 17, 1915, San Diego Sun, 9:1. Marines to have day at Exposition; Greeters come tomorrow; special events on program.

September 17, 1915, San Diego Union, 1:3. William Howard Taft and party were guests at Exposition; national and state problems discussed in speeches.

Addressing two great audiences at the Panama-California Exposition, the first a great gathering at the Spreckels music pavilion in the afternoon and the second at the banquet of the San Diego Bar Association at the Cristobal Café last night, former President William Howard Taft discussed national and international questions, touching on preparedness for defense, the value of treaties with foreign nations, recommended a large army and a bigger, more efficient navy, rapped laws which frighten and drive capital into seclusion and finally ended by slyly poking fun at California and Californians for the freak legislation passed in the state.

Bringing with him the same wide expansive smile which has proved a blessing to free-lance cartoonists, and turning loose at periods in both speeches an infectious laugh, which pleased the imagination of his hearers, both addresses brought forth volumes of applause. In the afternoon talk he dwelt on war, the possibility of it and what should be done to prevent it.

Labor Leaders Rapped

In the evening he reviewed the progress of the United States from the Civil War period, gave his audience a picture of the sins of railroads and corporations and how their punishments has been carried too far. He rapped labor leaders, whom, he said, had become intoxicated with their own power and recommended that the American people take stock and get back to conservative legislation.

With Mrs. Taft, Miss Helen Taft, Miss Louse Taft, Mrs. W. A. Edwards, and Miss Maria C. Herron, the former president came to San Diego yesterday at noon. From the arrival of the train which brought him to the city until midnight he traveled under the direction of an entertainment committee which saw to it that every minute was filled. That he enjoyed it all was proved by the glowing words of tribute he had for San Diego and her Exposition.

A tremendous crowd assembled at the Exposition yesterday afternoon to hear the visitor. He was introduced by Lyman G. Gage, former secretary of the treasury. When he came forward on the platform, he was greeted by ringing cheers and hand-clapping, which continued several minutes. In introducing the former president, Gage said:

"Upon me has devolved the high duty and the great privilege of introducing to this audience the distinguished man whom you have just welcomed to our city. I wish I could summarize in a single phrase

my sense and impart it to you, of the great privilege you as American citizens enjoy today in listening to this distinguished man. I am forbidden to indulge in words of eulogy, but that does not prevent me from stating a few bare, unadorned facts. I state them that they may serve to make you duly acquainted with the personality and character of the man to whom you are to listen.

“In the prime of life now, in the full maturity of his power, he has already served his country twenty years in positions of trust and responsibility. For six years he sat on the federal bench. There he learned the lesson of careful love of truth, which it is necessary for a statesman to possess. Afterwards he was called to the civil government of the Philippines, a situation as complex as perhaps could face any man.

“For three or four years he discharged these duties and brought to this unfortunate island the best he had to give, to the great improvement of that people. Afterwards he served with great distinction as secretary of war and his councils in that capacity to his president were found to be of great value. Appreciated for his labors and his services for the people, he was called to the highest office that any man can enjoy on this earth. (Applause) He discharged those duties without sensationalism, studying only how to administer the law to the end that he might best serve the people of the United States.

“And now in the fullness of time he has laid aside this responsibility and appears to us today simply as a fellow citizen of the United States. It is in that capacity that he speaks to us today and it is in that relationship that he wants to enjoy our respect and our confidence.

“And now, without further words, I shall perform my duty by introducing this speaker by the name which he received at the baptismal font --- William Howard Taft.”

Former President Taft said:

“Ladies and Gentlemen of San Diego and those who are fortunate enough to visit San Diego, I thank my friend --- if I were not afraid of being misunderstood I should say my old friend --- Secretary Gage for his kindly introduction.

“It is a very great pleasure to come to San Diego --- a personal one for me. I have known San Diego a good deal better and a good deal more intimately than my two visits, short as they were, would lead you to think. My father and mother and sister lived in San Diego for a number of years. My father was loyal to everything with which or with whom he had to do and he was loyal to San Diego. (Applause) He was a good correspondent and he made me to know somewhat of the sense of injustice that the people of San Diego felt sometimes and of that desire for the expansion which she deserved. In all this loyal feeling I shared deeply because my father wrote fluently and well on what San Diego deserved and what San Diego ought to be. He died here and I came to San Diego at the time of his death.

“I remember climbing over your hills, as we call them in the East --- you call them mesas --- and it seemed to me, with an eye unaccustomed to scenes like these that father’s enthusiasm was a bit high (laughter). I was here during the dry season and if there is anything that looks God-forsaken in a dry season, it is a mesa that has no water on it. Then I was here again in 1900 on my way to the Philippines, but had no opportunity of seeing what progress had been made.

“Now when I come here, my eye rests on the mesas and on the progress that has been made in the city of San Diego and I feel that I have a right to congratulate you on the strides you have made, on the fine city that you have here. I still share with you the feeling that you should not have been tucked away in this corner, having to be reached through some other city. I feel as if there were a country back of you that should be tapped and that you should have an independent place on the Pacific ocean, and I am glad to hear of the prospect of its being brought about through the enterprise of one of your valued citizens.

“To one who has lived all his life in the East, this country, especially in the dry season, seems most forbidding, but after we have seen what can be done with it and what difference water and work will make with it, there comes over one an overpowering sense of the power of man in dealing with the affairs of

nature. Your appreciation of what human effort can do has increased in this western country, far more than it has in the East where irrigation comes from heaven and where the Lord seems to act of himself more than he does here. (Laughter)

“Your Exposition --- it is difficult to find words graceful enough to characterize it. It is a gem. I have had in the career that fortune has brought to me much to do with Spanish civilization, with Spanish architecture, and with the Spanish sense of beauty in the new world, and my eye rests upon these buildings with a satisfaction and the sweet reminiscences of what I have seen brings back many pictures. You may feel great satisfaction that you have had the courage in the face of all the obstacles that have presented themselves in the creation of this beautiful city, that you had nerved yourself to go on and have vindicated yourselves before the world against what we may call ill-judged criticism.

“Now I could stop here, because perhaps that is the subject in hand, and I could only paint the lily by going on to dwell upon the scenes of your great Exposition. But Mr. Bryan and Mr. Roosevelt and I --- retired statesman --- do not like to lose an opportunity to talk to an audience like this. It is throwing away a good thing and as long as we have you here, why should not you hear part of the burden?

“This country is going through a crisis due to the European war. The war has brought many things home to us. It has brought up our own defects. We are pretty close to war. We pick up newspapers everyday that have an intimation that war is possible between us and some one country engaged as belligerents. Of course, we understand our newspapers (Laughter) and we have to give a certain discount for their enthusiastic desire to invite attention to their columns. But making this discount, the situation is serious enough to call to our minds our foreign relations and the situation that might be brought on should we be forced into friction and then war.

“Now I mentioned Mr. Bryan and Mr. Roosevelt, and I am referring to them again for the purpose of stating what my position is in respect to what our desires should be toward this issue and on the subject of our preparation.

“It is always easier for an orator to take one extreme or the other because an orator uses superlatives, and superlatives fit in better to eloquent periods. The man who goes betwixt and between is just an ordinary, prosaic man, and what he has to say is not calculated to arouse feeling. He is only making an effort to arouse our reason (Applause). I think the judicial, or median course, is generally the best, but it is not by any means the most popular.

“I do not agree with Mr. Bryan in his view that we should not have any preparation. It seems to me that we have here a great civilization that is far forward in the ranks of Christianity --- that we are trustees for that civilization that has been handed to us and that it is our duty to take such steps as shall protect it from danger or destruction.

“Now Mr. Bryan says (if I understand him) that the way to go is not to prepare at all to defend ourselves, that if we are entirely defenseless, it is the best means of avoiding attack. Well I do not propose to laugh at that position. It is also supported by the view that it is ‘right’ and the natural thing to do. Now I do not propose to call people who have that view mollicoddles or cowards because it really does not help discussion to call names.

“Therefore, let us admit that Mr. Bryan and those who agree with him are sincere. There has been no greater instance of persons who have stood by their convictions than the Society of Friends. When I hear that they support this doctrine and then look back at the number of things they supported that we flouted a generation or so ago, I want to be sure that my judgment against their conclusions is well supported.

“But I think it is an error that a country of 95,000,000 with a civilization to protect should not adopt. It assumes the proposition that no nation will do us an injustice if we only assume that they will not do us an injustice. This is a pretty violent assumption, because nations are only aggregations of men and women and when you assume that every man will do you justice, I admire your faith but not your judgment.

“Therefore, it seems to me that we are endangering ourselves too much to assume, especially in view of what has happened to Europe recently, that no nation will attack any other nation. Therefore, we should be ready. It is not probable, but it is possible. It is just like fire insurance. We could insure against war by a reasonable defense that will cost no more in proportion to the value of that which it will protect than ordinary fire insurance will cost in proportion to the value of the house it protects.

“Mr. Bryan says we are a great people. We are. We admit it. He says we could raise a million men between sunrise and I do not know whether he says sunset or the next sunrise, and put them into the field. Mr. Bryan and I are good friends, but I think he has the fault of an oratorical imagination. We could not organize an army of a million men in less than twelve months, and we would be luck to do it in that time.

“Well, what should we do?

“While I was secretary of war, I studied some of the terms used by men who understand the art of war. They have two lines of defenses which are calculated to improve our defense in our two great oceans.

“Our navy is our first line of defense, and we need a navy adequate to the task of protecting this country from an invasion of three or four or five hundred thousand men. As long as we have a navy strong enough to do this, we will not be attacked. How large a navy is that? Could we have a navy as large as Great Britain’s? Well, I suppose we could, but it would take a very long time and it isn’t necessary. Why isn’t it necessary? Because we have gotten into the habit of settling our troubles with Great Britain by arbitration, and the probability of war with Great Britain is very much less than with any other nation. This is my view, and I think it is the view of the majority of the American people. Of course, I cannot speak for any of them. I confess that since 1912, I venture to express my views on what the American people think on any subject with great hesitation (Laughter).

“A very much more substantial reason why we do not need a navy as great as Great Britain’s is that Great Britain is situated very much as we are in relation to her standing army. Although her army is larger than ours, it has much more territory to cover. It would take Great Britain a long time to prepare an army of sufficient strength to invade the United States. Other nations have greater standing armies than either the United States or Great Britain and, therefore, it behooves us to have a navy equal to the next largest to that of Great Britain. That is Germany’s.

“In 1902 the United States began the program of paralleling Germany’s navy, but it has not been kept up and we are now a number of ships behind her in naval strength, as it is we are short 18,000 men and 900 officers to man the ships we now have.

“The second part of the first great line of defense are the coast fortifications. Some people think coast fortifications are for the purpose of keeping out an invading army. That is not so. The coast fortifications are for the purpose of protecting the great cities of the United States against naval attack. A navy cannot carry an army. It can convoy an army or it might slip by our navy into a harbor and take a city and hold it for ransom, were it not for the coast fortifications. We want coast fortifications that can guard our cities against an invading navy and that will allow our own navy to go out and take the offensive against the invader.

“We have the best equipped coast fortifications in the world, but we are short 10,000 men to man the guns. Did you ever hear of anything so silly? Is there anything so silly as not to have the men to man these guns, the best guns in the world, when all we need to do is train them?

“Some say we need more 16-inch guns on our vessels. Well, perhaps we do; a few more wouldn’t hurt anything. The greatest fleet the world has ever seen was the fleet that gathered to capture the Dardanelles. The fleet had plenty of big guns and had some of the finest fighting craft that float. Did they take the Dardanelles? No, they did not. They tried for a number of weeks and lost a number of good vessels, and then went back and got a lot of soldiers and landed them because there was nothing to resist the landing. And the Dardanelles forts are not to be compared with ours?”

Taft then explained why coast fortifications are able to resist naval attack because of the greater accuracy in gun fire. He then declared that the United States needs an increase of 30 percent in its naval force, an increase of 10,000 men in the coast artillery forces, an increase in the army to 75,000 men, and a militia of 200,000 men, which, in time of attack, could be raised to half a million men.

Having done with Bryan, Mr. Taft then turned to Roosevelt.

"Mr. Roosevelt, on the other hand," said he, "is strictly in favor of defense. I do not know whether he agrees with me as to the amount needed or not. I differ with Mr. Roosevelt in his attitude toward the advisability of making treaties. Mr. Roosevelt seems to think that every person who defends the treaties of peace in some way or other has a personal fear of war and he indulges in that kind of argument that does not make any progress in convincing the person to whom it is addressed because it ventures to impeach either his motives or his judgment.

"When this war is over, both the victor and the vanquished will be exhausted, and the people of both sides will realize the awful cost of this struggle and will welcome any machinery by which war shall be made less probable and any occurrence of this disaster shall be made less likely. I state this with care. As long as men are men and human nature is in man, we are likely to have the defects of human nature reflected in all governments. These defects include passion, recklessness, vindictiveness and self-aggrandizement.

"What I think is that we can induce the leading nations of the world to enter into a league of peace -- - at least we should make the effort --- a league of peace that shall have four principles as follows:

"First --- An international court to decide all questions arising between any members of the league which are capable of decision on principles of law and equity.

"Second --- If the issues are not capable of decision on principles of law and equity, then they shall be submitted to a commission of reconciliation which shall hear them and shall delay action upon the issues and shall recommend as to terms of settlement.

"Third --- An agreement by all members of the league that if any member shall attack another member without having submitted the question involved to arbitration --- then the members of the league will defend the member unjustly attacked against the member guilty of the breach by attacking that member prematurely and unjustly.

"Fourth --- The establishment of an international congress, which shall enact the laws which shall be administered by the international court.

"Of course, treaties have been broken and probably will be broken just as the promissory notes and contracts of our commercial world are broken. But it is no argument that because some promissory notes and contracts are broken, they should be abolished.

"Treaties are broken, but more treaties are kept. Look at the present war. Why is France in it? She had no interest in the Serbian controversy. She is in the war because she made a treaty with Russia whereby she was pledged to stand by that country in case it was attacked. France was the first country attacked and she has risked her entire integrity in order to perform the obligation of that treaty. England had no interest in the Serbian imbroglio. She went into war because under her treaty obligations she was called upon to do so if the neutrality of Belgium was violated."

Taft declared that treaties are valuable in that they delay hasty action and said that time is the essence of a treaty. He referred to the Lusitania incident and added a few words of praise for President Wilson in his efforts to keep peace with Germany and to bring the European war to an end.

Bar Association Guest

Adam Thompson, president of the Bar Association of San Diego, introduced Toastmaster Eugene Daney at the banquet of the association last night at the Cristobal Café, which was given in honor of Taft. Daney, who is president of the California Bar Association, in turn introduced the former president.

“I feel at home here among you lawyers,” said Taft. “It is as though we were cast from the same mold. I have no regret over political experiences, but it is always good to get back home among those whom we know, those who have the same ideals, those of us who understand one another.”

The former president referred humorously to his experiences as a teacher of law, and cautioned members of the San Diego association against attempting to teach it. “One never realizes how little law one knows until he tries to teach it,” he said.

“I intend to talk tonight on what might be termed the end of an era.” He then traced the history and development of the United States since the time of the Civil War, telling of invention and progress which has brought workingmen of today comforts such as were not enjoyed by kings and queens of other periods. He traced the progress of business in the United States., told how businessmen found they could furnish certain products more cheaply if they controlled their product, and how corporations had been formed and how they had grown into trusts, and finally of how they abused their privileges, and, in turn, how the people, once aroused, saw to it that they received punishment.

“But it is a hard matter,” he said, “to arouse the people of any nation to a point of concentrated action and then stop them at exactly the point they should stop. As a result, they have carried their punishment too far, and I refer particularly to the railroads.

“The railroads have been guilty of many crimes, but railroads are necessities, and we must begin to treat them more fairly. Railroads develop new territory, and there are no new railroads being built. We are now in the aftermath of reform, and we the people are feeling the reaction from excess and unfair legislation. Capitalists must be assured a reasonable return on their money. We must return to a spirit of fairness with them.

“We need the investment of capital, and we are beginning to realize that capital is in a fair position to invest or not, just as it chooses. The railroads should be paid a fair amount for carrying of the parcel post system. Railroads purchase every year about one-fourth of the supplies of the country. If they don’t have sufficient revenue they cannot buy supplies. That weakens business all along the line.

“We must be fair also with labor, but we cannot allow labor to take unfair advantages. It has come to that point, and we must call a halt. We must become conservative in our dealings with these questions. Surely, there is a happy medium on which we can meet and settle all questions in a manner satisfying to all.

“You in California are overburdened with reform. You haven’t stopped to take stock yet, but you will. It is impossible to take away the fundamental principles of government without destroying that liberty and justice which we have a right to expect from a popular government, made by the people and for the protection of the people.”

Taft was met at the Santa Fe station yesterday by an entertainment committee of which Eugene Daney was the chairman. He was at once escorted to the Exposition by members of the committee, the First Cavalry, officers and men from Fort Rosecrans, officers and men of the marine barracks, and sailors from the cruiser *San Diego*. Taft reviewed the troops from the steps of the Sacramento building as they passed before him at the Plaza de Panama.

Taft was next taken to the Cristobal Café where he was guest of honor at a luncheon. He was then taken to the Plaza de Panama where he reviewed the marines. The Seven Southern California Counties building was the next visited and the former president and his party were the honored guests at a pretty reception.

Later they attended the organ recital by Doctor Humphrey J. Stewart, then attended the reception given by the headquarters of the women's board at the California Building. Before going to the Spreckels music pavilion, where he gave the afternoon address, Taft was taken to the New Mexico building, where entertainment had been prepared for him. It was Taft who signed the bill which made New Mexico a state.

The party will be at the Hotel del Coronado today until 2 p.m. when the members will leave for San Francisco, where they will sail next Sunday for Panama.

September 17, 1915, San Diego Union, 9:1. Exposition ready to welcome Greeters; high old time at Fair planned by hotel men; many prizes offered; dancing in Isthmus pavilion next Saturday night.

September 17, 1915, San Diego Union, 9:5. "Roll of Honor" for Fair patrons; bronze plaques on permanent Exposition buildings to bear visitors' names.

September 18, 1915, San Diego Sun, 1:8. Catholic Day at Exposition postponed to October 24 because of death of Bishop Conaty.

September 18, 1915, San Diego Union, 2:3-4. Senorita Luisita Sagarao of Cuba sings "La Paloma" with Spanish troubadours; visitor's appearance was unexpected.

September 18, 1915, San Diego Union, 5:1. Marines to hold celebration at Fair today; outdoor ball on Plaza de los Estados planned for tonight; artillery band engaged; ball game between two corps teams will be afternoon feature.

September 18, 1915, San Diego Sun, 7:1. The hotel men of Southern California are going out to the Exposition grounds for the annual frolic of the Greeters, the social organization of the hotelmen; banquet at Alhambra at 6:30 p.m.; masquerade parade upon the Isthmus; Tuesday, September 21, is American Bankers' Association Day; bankers from all over country arriving.

September 19, 1915, San Diego Union, 7:4. Marines, Greeters make merry at Exposition; brilliant outdoor baseball game by men from barracks; two bands play.

September 20, 1915, San Diego Sun, 5:5. Firemen of San Diego will show visitors what they know about fire fighting on Saturday, October 9, Fireman's Day.

September 21, 1915, San Diego Sun, 3:4. Four hundred and forty visiting bankers frolic at Exposition.

September 21, 1915, San Diego Union, 3:2. Four hundred and forty bankers will be guests of Dream City today; detachment of First Cavalry riders to perform for visitors this afternoon, the first drill the cavalry has given in several months.

September 22, 1915, San Diego Sun, 6:1. Saturday will be Sigmund Lubin Day at Exposition in honor of moving picture producer; he has established one of his companies at Coronado.

September 22, 1915, San Diego Sun, 3:4. Colorado Day announced for Tuesday, September 28; program will be given in New Mexico building.

September 22, 1915, San Diego Union, 1:3. Mrs. William Cummings Storey of Washington, D.C., head of Daughters of American Revolution, was entertained at Exposition; 200 women pay respects at formal reception at 4 p.m. in Seven Southern California Counties building.

September 22, 1915, San Diego Union, 5:1. Gaiety will rule Sigmund Lubin Day fete, Saturday evening; serpentine battle and vaudeville program planned; banquet at Cristobal; Taft expected to speak.

September 22, 1915, San Diego Union, 14:1. Bankers say huge crowds due in California; First Cavalry entertains financiers at Fair.

September 22, 1915, San Diego Union, 14:5. San Diego Museum Association launches plan to preserve exhibits; articles filed.

September 23, 1915, San Diego Union, 4:1. EDITORIAL: A Slam at the Exposition . . . regarding statement in **The Organizer**, a booklet prepared for the Chicago agency of Mutual Life Insurance of New York: "San Diego is a fine place to go, but if you are in a hurry to get back, don't take the time to go there. The Exposition at that place is hardly worth the trip. The buildings are very magnificent, but exhibits are few and far between."

September 23, 1915, San Diego Union, 14:4-5. H. A. Bodine presented two ant eaters from South America to Park Commissioners; special houses built for them next to bear pit.

September 24, 1915, Minutes of the Board of Park Commissioners. Mr. G. R. Stewart, Superintendent, Purchasing Dept., granted the use of the powder magazine in Switzer Canyon to store small quantities of powder, etc. for the city.

Property owners on Upas Street between 28th and Oregon Streets granted permission to grade northerly half of Upas Street and to put in curbs and sidewalks between 28th and Oregon Streets.

September 24, 1915, San Diego Union, 1:4-5. D. C. Collier sought as directing chief of South American states body in New at \$20,000 year salary.

September 24, 1915, San Diego Union, 2:2. Admiral Cameron McRae Winslow, commanding officer of the Pacific fleet, inspected Fourth Regiment, U.S. Marine Corps, at Exposition.

September 24, 1915, San Diego Union, 5:1. Tars of flagship *San Diego* plan gala dance at Exposition tomorrow night; Admiral Winslow will attend.

September 24, 1915, San Diego Union, 9:2. Merry-makers will wage thrilling balloon battle on Isthmus tomorrow night as Lubin Day closes.

September 25, 1915, San Diego Union, 8:1. Lubin screen folk will celebrate at Fair today; head of motion picture corporation to be Exposition guest; open-air navy dance tonight at the Plaza de los Estados.

September 25, 1915, San Diego Union, 8:4. A number of local army and navy officers suggest military academy at Fair.

September 25, 1915, San Diego Union, 2:5-6. Gaiety reigns as tribute to Sigmund Lubin.

With one of the largest banquets ever held at the Cristobal café and the balloon and serpentine battle on the Isthmus which followed it, the celebration at the Panama-California Exposition yesterday in honor of Sigmund Lubin, head of the Lubin Motion Picture Company closed after a day of merrymaking by the big crowds in attendance.

Sigmund Lubin, who is familiarly called "Pop" from one coast to another, was at the head of the banquet table. At his right was vice president George Burnham and William Howard Taft and at his left Captain Wilbert Melville, who is in charge of the new picture plant at Coronado.

George Burnham, vice president of the Exposition, made the only address of the evening and his address was short. He welcomed Sigmund Lubin, saying that if there is one thing San Diegans delight in doing it is the welcoming of friends, and Sigmund Lubin has proved his friendship.

At the banquet scores of Lubin balloons were distributed and the banquetters amused themselves by hitting them from one side of the table to another. By request of Lubin, who pleaded that he had never made a speech in his life and did not want to begin, fearing he would talk too long, customary after-dinner talks were not given. When this announcement was made it brought a sigh of satisfaction from the orators who had been worked overtime since the Exposition opened and who silently gave Lubin a vote of thanks.

Although no part of the Lubin Day celebration, but an event which the Lubin Day devotees had been invited to attend, the naval ball, given at the Plaza de los Estados last night, was another feature of yesterday's program at the Fair which was highly successful. Under the lights which made the plaza as light as day and with two bands furnishing snappy dance music, the jackles' [sic] ball was declared as jolly an event of the kind as has been held at the Exposition.

Another event which a large number of the Lubin enthusiasts enjoyed was the address given at the Spreckels music pavilion yesterday afternoon by Mrs. Daniel Lothrop, author of "A Little Maid of Concord Town," who spoke on "The Five Little Peppers at the San Diego Exposition." Hundreds of children were in attendance, the address having been given especially for them.

With Vice President George Burnham and other officers of the Exposition, Sigmund Lubin was escorted to the Exposition yesterday morning and remained there nearly the entire day. Soon after his arrival, he was taken to the marine barracks, where a review of the marines had been planned. Colonel J. H. Pendleton invited Lubin and Burnham to walk with him while he made the inspection. Lubin described the drill of the men as "a beautiful motion picture," and heartily congratulated Colonel Pendleton on their work.

After the drill Lubin was taken on a tour of inspection of the buildings and grounds with all of which he was more than pleased. "San Diego and her Fair are wonderful and I hope to make it the location of my workshop which will be second only in importance to the bigger and older branch. Eventually we may make it the most important of all. I feel strongly the inspiration for this today," he said. "I also feel at home here and I promise to return frequently and pass much time in San Diego."

After the banquet last night 5,000 toy balloons were given to those on the Isthmus and the balloon fight which followed proved fun for a large number. The balloons were thrown into the air and those on each side of the street attempted to hit them to the other. A good many high jumps were made and the balloons were kept bounding back and forth for more than an hour. At one time several hundred gaily colored balloons were kept high in the air for several minutes.

With the balloons were given out 10,000 rolls of serpentine and this paper, strong of all colors, thrown high into the air, added to the amusement on the Joy Street. Wires were hung with serpentine and show entrances were covered with it by the time the crowd had finished.

Sailors from the cruiser *San Diego* had been busy all day yesterday hanging decorations at the Plaza de los Estados. The flags of the navy were used to advantage in the scheme of decorations. Thousands of flowers had been procured and were given to the guests as souvenirs of the occasion. Several barrels of fun-making toys and devices were also given out. Hundreds tripped the light fantastic to the music of the bands on the platform of the Spreckels music pavilion and there was not an interval in the good time until the hours began to grow small.

(A list of guests at the dance, including William Howard Taft and Sigmund Lubin, follows.)

September 26, 1915, San Diego Union, 7:4. Colorado Day set for Tuesday; New Mexico building to house celebration.

September 26, 1915, San Diego Union, 8:1. Exhibitors at Fair to celebrate; Exposition visitors will obtain variety of donations next Saturday; money gifts provided; souvenirs assured for first 10,000 persons entering grounds.

September 27, 1915, San Diego Sun, 10:1. Director General E. J. Chapin of the Exposition will start a touring car at Tijuana, Mexico, on a trip to Vancouver, British Columbia, tomorrow at 8 a.m.; trip will be made without car's motor being stopped; Bible Day will be observed next Saturday, the last day of the Methodist-Episcopal conference, which will be held in San Diego; Concessionaires and Exhibitors Day will be celebrated next Saturday.

September 28, 1915, Los Angeles Times, II, 7:6. Museum planned on Fair grounds; San Diego syndicate formed to take over big buildings.

September 28, 1915, San Diego Union, 3:2-3. Miss Claudia Albright, grand opera soprano, will appear in concert at Spreckels organ Thursday night.

September 28, 1915, San Diego Union, 9:1. Colorado Day at Fair to be observed today in New Mexico building; message from Governor Carlson to be read by President Dana of Colorado state society.

September 29, 1915, San Diego Sun, 7:3-4. Miss Claudia Albright, grand opera contralto, will appear in concert at the Exposition tomorrow night.

September 29, 1915, San Diego Union, 8:1. Colorado Day celebration.

September 29, 1915, San Diego Union, 14:1. Catholics to fill grounds next month; celebration October 24.

September 29, 1915, San Diego Union, 14:4. Prize list grows for visitors to Exhibitors and Concessionaires Day at Fair Saturday; \$150 in gold offered parade participants; big pageant arranged; Isthmus wedding plan; modern warfare will be demonstrated; balloon ascension on program.

September 30, 1915, San Diego Sun, 10:5. Professor C. W. Holmes engaged to make gas balloon ascension at the tractor field at 5 p.m. next Saturday.

September 30, 1915, San Diego Union, 2:2-3. School children will plead with President Wilson to visit Fairs.

September 30, 1915, San Diego Union, 4:1. EDITORIAL: The President May Come.

October, 1915, The California Garden, Vol. 7, No. 4. Monthly Excursion Through Exposition Grounds, by G. R. Gorton.

Japan is pretty well represented at the Exposition, even to a tea house and gardens, and it is these last which seemed deserving as one of the Exposition "excursions." The Japanese pavilion and gardens surrounding are full of symbolism, as is all Japanese architecture. In the first place, the pavilion itself is an exact reproduction (and the only one in the United States) of the Katsura temple, still standing in Kyoto [sic], after two thousand years of existence. The original is on nailless construction, so as to better withstand earthquake shocks --- to which it is apt to be subjected, and as far as is practicable the reproduction here is carried out in this respect, but not altogether so. Borne aloft on the ridge of the structure are gilded figures of the kind of all fish --- Sachi [sic]--- a large shark-like fish which is guaranteed to swallow devils of all kinds, and during its spare time understudies the Fire Department, as another of its good qualities is that it is gifted with the ability of extinguishing fires, by the simple process of spouting water from its mouth. Its mouth is now closed --- this was an error of the staff worker, as Sachi [sic] should have his mouth open in readiness to swallow devils. However, the Japanese manager, Mr. Watanabe, said to let it stay that way, as in this country we have no need of devil swallows. I am not so sure, though, but that we could use such a fish to advantage.

Guarding each side of the entrance of the building are figures of the dragon and of the Chinese bird Hoho, both symbolical of long life and happiness.

Not only the design of this tea house, but the construction (which is of a permanent nature) is Japanese, as the erection was carried on by Japanese workmen with Japanese tools.

Out in the garden are carved stone lanterns of various sorts, the taller one at the right of the entrance to the bridge, forming the approach to the pavilion, is of the type ordinarily used for temple ornamentation, the lower, broader type further to the right being the sort used for ornamentation of private grounds.

The steeply arched bridge is both practical and symbolical in design --- the first because it is so constructed as to better permit the flood waters to pass safely under, with less opportunity to wash it away, the latter because of the superstition which attaches to it that if one is able to cross its sloping surface without slipping, he is thereby assured of long life --- so the bridge is called the Bridge of Long Life, and no temple garden is considered complete without it.

The figures of cranes posed here and there in various attitudes are used as symbols of longevity, as the bird itself is reputed to be the longest lived of all birds.

On the north side of the lagoon, and west of the central bridge, is a venerable specimen of the "Sugi" Pine, nearly 100 years old, and less than three feet in height. There are Japanese Azaleas --- "Tsuiji" - -- in many colors --- pink, red, white and, of course, there are Wisterias --- both white and purple. On the right of the entrance are one of the two *Cycas revoluta* (Sago "Palms", so-called), familiar to the eyes of Southern Californians, but nonetheless typically Japanese.

Near the "Sugi" Pine, previously mentioned, are several specimens of dwarfed cedars --- tiny spreading midgets of only a few inches in height but fifteen years or so of age. There are of a glaucous color similar to our *Cedrus Deodora* in this respect. There are good specimens of dwarfed weeping Junipers, of Japanese two-leaved Pines, Maki Pines, and several others, odd Bamboos, also a Japanese dwarfed golden cedar --- the Hiba, this last at the southeast corner of the central bridge.

The Korai-shiba grass, which is always used to cover the artificial "mountains: which form a part of all Japanese gardens, is not the solution of the problem of pasture grass in a dry or any other kind of locality, as it costs something like three dollars per square foot. Like *Lippia*, it does not need to be mowed, although in the quantity in which one would probably plant it, the mowing would not be a serious consideration.

Between the walk and the east half of the tiny lagoon is a tall, sparsely branched shrub or small tree, possibly five or six feet in height, with leaves an inch or so in diameter and in shape somewhat suggesting those of the Maiden Hair Tree (*Ginkgo biloba*), excepting that they are indented at the tips. This is the sacred Icho, always to be found in gardens surrounding the temples of Buddha --- and not supposed to be used elsewhere --- so we are transgressing in having it here at our exposition. Scholars who wish to protect the books of their libraries against the ravages of the bookworm --- not the human kind --- press a few leaves of the Icho between the leaves of the books, and their books are never visited by this pest.

In the extreme northeastern corner of the garden is an *Aralia*-like shrub, with eight-lobed leaves --- which bears the Japanese name of Yatsuda --- meaning eight-fingered. Adjoining this is a Laurel-like shrub, called Tsubaki, which bears a mass of pink bloom, but only when it has attained great age.

West of the lagoon and flowing into it is the Izumi fountain, indicating a never failing supply of water. The Japanese manager facetiously informs one that in this case being connected with the city water system helps the unfailing part of it wonderfully. I hope so. The lantern near this fountain is the Yama or mountain lantern, generally carved from stone, this one being an exception to the general rule. If one wishes to inspect these two --- at closer range, it is necessary to use stepping stones, and it is advisable to commence with the right foot or there is danger of getting the feet tangled. Try it sometime.

Here and there are familiar plants --- especially close to the building, where almost no Japanese plants are used, among the more typically Japanese part of the plantings there are, for instance, *Cuphea microphylla*, which despite its Mexican origin, fits in with the Japanese plants as if it belonged there. So do the several species of *Eleagnus* which are scattered throughout the garden.

Apropos of Japanese plants, several of the *Aralia papyrifera* (Japanese Rice Paper Plant), are in flower in various parts of the grounds. The flower is not striking, but is interesting in its round feathery whiteness. Probably the best specimen is in the Botanical Building, just inside the main entrance to the building. We are told that the rice paper, of which this plant is the source, is used for the manufacture of paper flowers and for drawing purposes, whereas the paper which is made from the rice straw is more generally used for windows in the Japanese houses, such as are in the tea pavilion described above.

Some of the *Duranta plumieri* is yet in full flower, some has matured its bright yellow berries --- depending upon the location, but either in flower or berry it is one of our best shrubs.

In the "Gardens of Montezuma" one of the *Yucca pendula* in boxes in front of the exedra is in flower, the other is in bud, and soon will display its immense clusters of creamy white flowers.

October 1, 1915, Minutes of Board of Park Commissioners. San Diego Horsemen's Association requested building of a race track and county Fair grounds in Balboa Park inside Exposition grounds.

Mr. Forward opposed to allowing City Purchasing Dept. to store explosives in the Powder Magazine in Switzer Canyon.

October 1, 1915, San Diego Sun, 6:4. Mr. and Mrs. Clifford A. Sheller of San Diego to be remarried on the Ferris Wheel at the Isthmus at 3:30 tomorrow afternoon.

October 1, 1915, San Diego Union, 2:1. Davidson plans Washington trip to urge President Wilson to visit Fair; Los Angeles, San Francisco and other cities planning petitions.

October 1, 1915, San Diego Union, 7:3. Wedding suite by Dubois, organ number; celebrated composition on Doctor Stewart's Exposition program today.

October 1, 1915, San Diego Union, 7:4. Miss Claudia Albright, New Mexico contralto, charms an audience of 2,000 with carefully chosen program.

October 1, 1915, San Diego Union, 7:5. Major McKelvey, commanding the First Battalion, Fourth Regiment, U.S.M.C., to lecture on "Nicaragua Revolution" in New Mexico building tonight.

October 1, 1915, San Diego Union, 7:5. Coast Artillery band to give concert today.

October 1, 1915, San Diego Union, 8:1. Councilmen favor U.S. military and agricultural school of Fair grounds; request of J. F. Brookes, Civil War veteran and San Diego resident for 28 years.

October 1, 1915, San Diego Union, 8:6. One hundred and thirty five Telephone Pioneers of America were in San Diego yesterday to see Exposition.

October 1, 1915, San Diego Union, 9:1. Churches to hold Bible exercises at Exposition; 10,000 expected to attend celebration tomorrow; parade planned across Laurel Street bridge led by Sunday school pupils; picnic in Pepper Grove; stereopticon exhibition depicting life of Christ on program.

October 1, 1915, San Diego Union, 9:5. Wedding at top of Ferris wheel planned; romance to enter in Fair exhibitors and concessionaires celebration; souvenir list grows; first ten thousand people to enter grounds will be rewarded.

October 1, 1915, San Diego Union, 14:1. Music teachers hear splendid program; concert in patio of Seven California Counties building pronounced a success.

October 2, 1915, San Diego Union, 2:3. Call for President Wilson to visit Fair increases; school children sign petitions.

October 2, 1915, San Diego Union, 2:5. San Diego's stadium described in September 23rd edition of **Engineering News**; article written by F. A. Rhodes of San Diego, consulting engineer for project.

October 2, 1915, San Diego Union, 8:1. Ten thousand souvenirs free to visitors at Fair today; three cash prizes of \$25 each among concessionaires, exhibitors' donations; paid tickets with souvenir gifts; at 11 a.m. W. E. Roundtree, representative of the Holt Manufacturing Co., will give a demonstration of the methods of modern warfare in relation to the transportation of heavy artillery on the marine grounds.

October 2, 1915, San Diego Union, 14:1. Bible Day celebrated at the Exposition; churchmen and Sunday school students marched into Fair.

October 3, 1915, San Diego Union, 4:2-5. Joshua L. Bailey, Jr. favors annual Indian fiesta for San Diego; describes dances and games at San Diego celebration.

October 3, 1915, San Diego Union, 5:2-3. Miss Alice C. Hoffman and Clifford A. Sheller married by Reverent E. L. Lowe on Ferris wheel yesterday afternoon; "Dance of the Nations" given at Isthmus bandstand last night by Indians from the Painted Desert, Hawaiians from the Hawaiian Village, Spanish singers and dancers, and others.

October 3, 1915, San Diego Union, 5:4. Bible Day at Fair celebrated by more than 4,000 persons yesterday.

October 3, 1915, San Diego Union, 5:6. More than 2,000 souvenir packages of raisins and almonds distributed to visitors at Kern and Tulare building yesterday.

October 3, 1915, San Diego Union, 9:3. Holt caterpillar tractor demonstrated.

October 3, 1915, San Diego Union, 9:3. Exposition buildings will close at 5:30 p.m. instead of 6 p.m. beginning tomorrow.

October 3, 1915, San Diego Union, 9:4. George Hamlin, American tenor, to sing at Fair October 11.

October 3, 1915, San Diego Union, Entertainment Sect., 8:1. President's visit urged by 8,000 children; petition bearing 2,000 signatures to be turned in Monday; Mayor Capps issues proclamation.

October 4, 1915, San Diego Sun, 5:5. George Hamlin, grand opera and lieder singer, to give concert at Spreckels organ Monday night at 8 p.m.

October 4, 1915, San Diego Union, 1:2. From January 1 through September 30 a total of 1,653,962 persons saw Fair; September attendance 170,074.

October 4, 1915, San Diego Union, 1:5. Troops ready for dash to Mexico; attack on Americans by Yaquis reported.

October 4, 1915, San Diego Union, 3:1. Davidson will ask President Wilson to visit Exposition.

October 5, 1915, San Diego Union, 1:4-6. School children to greet Liberty Bell November 12; teachers' convention November 8 to 13.

October 5, 1915, San Diego Union, 2:4. Santa Clara County representatives arrange for donations of 10,000 packages of prunes at Exposition next Saturday.

October 5, 1915, San Diego Union, 4:1. EDITORIAL: Success of the Exposition

There appears reason to believe that the last three months of the year will be marked by even greater success for the Exposition than the first quarter was.

October 6, 1915, San Diego Sun, 7:1. When Governor Frank B. Willis of Ohio comes to the Exposition Saturday, he will be the 20th governor to have visited it since the opening; Santa Clara County Prune Day on program Saturday.

October 6, 1915, San Diego Union, 9:1. Three-day fete for Liberty Bell.

October 6, 1915, San Diego Union, 9:2-4. Big automobile show scheduled at Exposition, October 15-16; latest models to be displayed on Plaza de Panama.

San Diego Herald, October 7, 1915, 1:2-3. Exposition Notes.

October 7, 1915, San Diego Union, 9:2-3. Algy Barnes three-ring animal circus will arrive in San Diego November 16 or 17 to take up winter quarters at Panama-California Exposition at the old aviation field on the Isthmus; will stay until March.

October 7, 1915, San Diego Union, 15:3. Cadillac display arranged; eighths only will be shown on Plaza de Panama, October 15-16.

October 8, 1915, San Diego Sun, 7:4. San Diego Day planned for November 9.

October 8, 1915, San Diego Union, 1:4-6. Davidson to see President Wilson Monday.

October 8, 1915, San Diego Union, 2:4. Local fire department will show San Diegans and visitors efficiency on Exposition grounds tomorrow; ball on Isthmus at night.

October 8, 1915, San Diego Union, 4:1. EDITORIAL: Perhaps a Naval Station Here.

October 8, 1915, San Diego Union, 4:6. Civic and commercial organizations plans San Diego Day at Fair, November 9.

October 8, 1915, San Diego Union, 5:2. Café in "101 Ranch" and "Streets of Cairo" ordered closed at San Francisco Exposition; gambling has been eliminated from '49 Camp.

October 8, 1915, San Diego Union, 5:4. Naval station here advocated; base on Southern California coast request will be made to Congress.

October 8, 1915, San Diego Union, 7:1. Sailors of *U. S. S. San Diego* arrange boxing carnival tonight on Isthmus.

October 8, 1915, San Diego Union, 7:3. Council and mayor favor plan to donate 40 acres of city park to federal government for school.

October 8, 1915, San Diego Union, 7:4-5. Big auto show entry list continues to grow.

October 9, 1915, San Diego Union, 9:1. Governor Frank B. Willis of Ohio guest at Exposition today.

October 9, 1915, San Diego Union, 16:4. Firemen to rule Exposition today.

October 10, 1911, San Diego Union, 3:3. San Diego's Fire Department gave exhibit at Fair; fire alarm cut short demonstration which was given at the Plaza de Panama yesterday.

October 10, 1915, San Diego Union, 9:1. Delegations representing industries and lines of business are scheduled to visit the Exposition this month. The first of these will be members of the National Association of Ice Cream Manufacturers. The next arrivals will be members of the American Electric Railway Association. A third party will comprise 45 members of the American Institute of Architects. W. S. Hebbard, local architect, making arrangements for party.

October 10, 1915, San Diego Union, 8:5. George Hamlin to sing at Spreckels music pavilion tomorrow night.

October 10, 1915, San Diego Union, II, 2:1. Twenty thousand Catholics expected at Fair October 24; celebration postponed by bishop's death; military mass planned; great parade, picnic in Pepper Grove, athletic events on program.

October 10, 1915, San Diego Union, II, 7:3. Shut-ins to see Fair this week; Thursday will be Invalids' Day at Exposition; auto donations sought.

October 11, 1915, San Diego Sun, 12:2. Women's board of Exposition is busy with details of program to be given on Invalid's Day, October 14.

October 11, 1915, San Diego Union, 7:4. A thousand Aetna Insurance men due in San Diego this morning to see Exposition.

October 12, 1915, San Diego Sun, 12:2. School board will pay a caretaker \$60 a month to keep the stadium in first-class condition, and the high school students will have the use of the stadium at all times, provided that due notice of dates is given to the Park board. No charge is to be made to the students for the use of the grounds.

October 12, 1915, San Diego Union, 3:5. San Diego host to insurance men; more than 800 Aetna Company representatives Exposition visitors.

October 12, 1915, San Diego Union, 8:1. George Hamlin recital please hearers at Exposition.

October 12, 1915, San Diego Union, 8:5. Southwest eager for another year of Exposition according to newspapers.

October 12, 1915, San Diego Union, 9:3-4. "Speed" promised for Exposition auto show; great crowds will see cars; thirty-five thousand candle power illumination plant being installed; pigeons temporarily evicted from Plaza de Panama; more entries made.

October 12, 1915, San Diego Union, 9:6. High School given use of stadium at all times at meeting last night; San Diego School board to pay wages of caretaker; must give Park board notice of schedule of games; enrollment of high school and junior college is 1,722.

October 13, 1915, San Diego Sun, 14:5. Already for Invalids' Day; marines will give a review in Plaza de Panama at 10:30 a.m.; Mme. Gabrielle Chapin-Woodworth, soprano, will sing at the organ at 11 a.m., assisted by Doctor Humphrey Stewart, organist; tomorrow will be National Association of Ice Cream Manufacturers Day; 270 ice cream makers here to see Exposition; 45 architects to visit Exposition Friday, October 15; day designated American Institute of Architects Day; Automobile Club of America Day set for December 3.

October 13, 1915, San Diego Union, 1:5. President Davidson of Exposition visited Washington, D.C., to invite President Wilson to visit Fair; Wilson sent message and regrets to San Diego; cites need to be in East to stay in touch with "the problems that might arise from the present confused and unsettled condition of the world."

October 13, 1915, San Diego Union, 5:2. Exposition auto show entry list grows; Overland, Willys-Knight and Studebaker lines added to display.

October 13, 1915, San Diego Union, 8:4. Mme. Gabrielle Chapin-Woodworth, grand opera soprano, to donate her services and sing tomorrow at Invalids' Day at Exposition.

October 14, 1915, San Diego Herald, 1:1-2. The Plaza Contingent Have Interesting Ideas, by S. A. Raymond.

October 14, 1915, San Diego Sun, 1:6-7. Shut-ins enjoy wonders of Exposition for first time.

October 14, 1915, San Diego Sun, 1:5. Mayor Capps favors keeping Exposition going in 1916.

October 14, 1915, San Diego Sun, 7:3-4. Transportation Day at Exposition tomorrow; gathering of members of American Electric Railway Association; pack train drill to be given on tractor field at 2 p.m.; put on by civilian packers who are attached to squadron of the First Cavalry which is encamped near the Exposition; exhibition of speed in packing and unpacking mules; Children's Fair to be held November 12-13 by boys and girls under 16 years.

October 14, 1915, San Diego Union, 1:3-5. Wilson backs big Navy plan; \$400,000,000 for defense urged; increase in Army advocated.

October 14, 1915, San Diego Union, 2:2. National Association of Ice Cream Manufacturers due at Fair today.

October 14, 1915, San Diego Union, 3:3-4. Pack train drill pledged on tractor field tomorrow during Transportation Day through courtesy of Major William T. Littlebrant, commanding officer of the squadron of the First Cavalry stationed at the Exposition; 200 members of American Electric Railway Association to be in San Diego.

October 14, 1915, San Diego Union, 3:5. Hotel men of state favor continuing Fair.

October 14, 1915, San Diego Union, 9:2-4. Auto show will open tomorrow.

October 15, 1915, San Diego Sun, 1:1. Colonel D. C. Collier will marry next month; Miss Ruth Everson of Oakland to be bride. Colonel Collier is now in New York City where he is engaged in organizing a large

company to be financed by the South-American republics for the furtherance of trade among the republics and with the United States. Collier intends to return to San Diego about the last of this month, and the marriage will probably be performed in Oakland.

After a short wedding trip, it is said Colonel Collier and his bride will go to New York to reside at least for several years.

Mrs. Collier is now in Washington, D.C. The interlocutory decree of divorce will come up in court here about November 5. It is expected that the decree will be made permanent at that time.

October 15, 1915, San Diego Union, 1:3, 11:1. Auto show will open in garden of beauty today; exhibit set for two days.

October 15, 1915, San Diego Union, 2:3. Automobile show at Exposition; description of models and makers.

October 15, 1915, San Diego Union, 20:1. Shut-ins see Fair, honored guests of women; automobiles loaded with invalids tour Exposition grounds all day; marine drill seen on parade grounds; concert at Spreckels music pavilion; Indian Village attractions applauded.

October 16, 1915, San Diego Sun, 1:7-8. Second West Point is planned for Exposition site; Army and Navy officials in Washington, D.C. considering idea; City Council passed a resolution prepared by City Attorney Cosgrove unanimously in favor of plan; would lease part of grounds to federal government for a long term; Admiral Manney, retired and a member of Council, asked Council for speedy action; Council will vote on resolution Monday.

October 16, 1915, San Diego Sun, 3:3. Reverend James A. O'Callahan of Our Lady of Angels Church will baptize two Indian babies the Painted Desert at the Exposition on Catholic Day, October 24, both children are boys. The older one will be christened "San Diego" and the other will be named "Theodore Roosevelt"; military mass at Spreckels organ.

October 16, 1915, San Diego Union, 3:2-4. Description and general view of auto show.

October 16, 1915, San Diego Union, 4:5-7. Progressives would destroy structure of human liberty builded by rational partisans, by W. W. Bowers.

October 16, 1915, San Diego Union, 5:5. Robert Stead, prominent architect of Washington, D.C., arrived in San Diego last night; likes local buildings.

October 16, 1915, San Diego Union, 6:4. Today will be known as American Institute of Architects Day at the Exposition; luncheon at 12:30 p.m. at Cristobal Café; W. E. Hebbard, Walter F. Keller and Carleton M. Winslow arranging entertainment.

October 17, 1915, San Diego Union, 3:2. Fifty architects visit San Diego Exposition; "all of them seemed enthusiastic over what was shown them."

October 17, 1915, San Diego Union, 7:8. Army-Navy school in Balboa Park to be invited; Council will encourage establishment of training institution by government; site considered idea; resolution prepared by City Attorney Cosgrove filed with City Clerk yesterday.

October 17, 1915, San Diego Union, 9:1. Dealers say automobile show was a huge success; Union-Tribune enterprise at Fair drew thousands; many sales made; open-air autumn exhibit called unique; band concerts please.

October 17, 1915, San Diego Union, II, 1:2. Baptism of Indian babies at Exposition planned for Catholic Day feast; the Reverend James A. O'Callahan of Our Lady of Angels Church will baptize two Indian babies at the Painted Desert, one will be "Theodore Roosevelt," the other "San Diego"; A. V. Mayrhofer making arrangements.

October 17, 1915, San Diego Union, II, 1:4. Henry Ford and Thomas Edison expected at Fair; Vice President George Burnham: "It will be interesting to have both Ford and Edison here at the same time, their views on war being so entirely different. Edison says the next war will be one of machines and not men and advocates preparedness, while Ford offered \$10 million to save the United States against preparedness, believing preparedness breeds war."

October 17, 1915, San Diego Union, II, 1:5. Miss Josephine Eschenbrenner, child labor foe, will speak at public service building at Exposition tomorrow afternoon; will discuss child labor bill that will be introduced into Congress this fall.

October 17, 1915, San Diego Union, II, 2:3. An event of unusual importance will occur at the Painted Desert a week from this afternoon when the Acoma papoose recently christened Theodore Roosevelt will be baptized by Father James A. O'Callahan, rector of the Church of Our Lady of the Angels. The Acoma infant was christened by former president Theodore Roosevelt who picked the infant up in his arms and named it Theodore. A few weeks ago Mrs. Alice Longworth, the former president's daughter, made a special visit to the Painted Desert to call on the baby.

October 18, 1915, Minutes of Board of Park Commissioners. Board of Education agreed to pay \$60 per month toward the expense of maintaining the stadium.

October 18, 1915, San Diego Union, 7:5. Architects visit San Diego Fair, La Jolla, Coronado and Tijuana; names given.

October 18, 1915, San Diego Union, 12:1. Kilties will play at Exposition Saturday; concerts by famous band arranged for afternoon and night; Caledonian Club making arrangements to entertain the Kilties.

October 18, 1915, San Diego Union, 12:4. Chorus prepares for Catholic Day; military mass to be sung at Fair composed by Doctor Stewart.

October 18, 1915, San Diego Union, 12:4. Foe of child labor to lecture at Fair in public service auditorium of the Science of Man building this afternoon.

October 20, 1915, San Diego Union, 6:3. Kilties due at Exposition next Saturday.

October 20, 1915, San Diego Union, 16:1. The first of the Santa Fe's "Farmers' Excursions" will arrive at San Diego Wednesday; 125 wealthy Kansans to visit San Diego Exposition.

October 21, 1915, San Diego Sun, 1:7-8. Great 1916 Fair assured; north pledges funds.

October 21, 1915, San Diego Union, 1:3-6, 3:1. Los Angeles will back Fair for 1916; thousands pledged to continue Exposition; Davidson returns with message of optimism.

October 21, 1915, San Diego Weekly Union, 3:1-5. Dutch Flat as Naval base is idea of Spalding.

October 21, 1915, San Diego Union, 3:2-3. Space at San Diego Fair asked for by exhibitors at Northern Exposition.

October 21, 1915, San Diego Union, 4:4. Military mass to open Catholic Day; choirs of city will furnish 100 voices for chorus.

October 21, 1915, San Diego Union, 9:1-2. Farmers from many states to see Exposition; Fair's model ranch makes big hit with visiting agriculturists; nearly 150 representative citizens of East arrive on Santa Fe special.

October 22, 1915. Minutes, Board of Park Commissioners, Friday.

The regular meeting of the Board of Park Commissioners was held in the office of the Board at four o'clock P.M.

Present: - Commissioners, President Forward, Chandler and Ferris.

Absent: - None

The minutes of the last meeting were read and approved.

Mr. G. A. Reed, representing the New Mexico Building Commission, appeared before the Board regarding the disposition of the New Mexico Building. He was advised that the records did not show any agreement whereby his Commission would be permitted to dispose of or remove the building at the end of the Exposition, and unless he could produce such an agreement the Board would be compelled to prohibit the removal of the building. Mr. Reed was advised to confer with President Davidson and Colonel Twitchell regarding the matter and report at a subsequent meeting. Mr. Reed was also advised that it was the earnest desire of this Board to have the State of New Mexico maintain their building during the year of 1916, and hoped it would do so and that he would remain in charge.

Mr. Melville Klauber, member of the Board of Playground Commissioners, appeared before the Board regarding the planting and maintenance of the parkings and grounds of the La Jolla Playground, asking that the Board take over that part of the work at La Jolla. The Superintendent was instructed to investigate and report the amount of work necessary and the cost of same, same to be borne by the Playground Commission.

The Superintendent reported that a new boiler would have to be installed in the Exposition nursery and that same would cost approximately \$125, including necessary charges and removal of old boiler, etc. Upon motion duly made and carried he was authorized to have the new boiler installed.

Upon motion, the meeting adjourned.

October 22, 1915, Los Angeles Times, II, 4:2. The San Diego Exposition . . . The obvious thing to do is to fall in line behind the Los Angeles Chamber of Commerce and the San Diego directors, and give the movement they are marshaling such an immediate and forceful and irresistible impetus that its success cannot be doubted or delayed.

October 22, 1915, San Diego Sun, 11:2. Kilties band at Spreckels organ tomorrow; Canadian band of 35 pieces; Housewives Day set for October 30.

October 22, 1915, San Diego Union, 1:6. Angel City astir over San Diego Fair for 1916; newspapers, civic organizations and individuals enlisting for campaign.

October 22, 1915, San Diego Union, 3:4-5. Davidson bubbles with optimism after trip East; met President Wilson, William Randolph Hearst; Hearst subscribed \$5,000 toward \$100,000 guarantee fund for continuing Exposition.

October 22, 1915, San Diego Union, 9:1. Fair accords November 17 for San Diego to rejoice; monster civic demonstration planned.

October 22, 1915, San Diego Union, 10:2. Will C. MacFarlane, Portland, Maine, organist, to play at Fair this afternoon.

October 23, 1915, San Diego Sun, 1:5, 9:3. Impressive rites to mark Catholic Day tomorrow.

October 23, 1915, San Diego Union, 1:7. \$25,000 pledged to Fair in Angel City; Santa Fe contributes \$10,000; Automobile Club of Southern California busy.

October 23, 1915, San Diego Union, 1:7. Champ Clark, speaker of House of Representatives, coming to San Diego Friday; trifle more than two hours will be given to sightseeing.

October 23, 1915, San Diego Union, 5:5. Housewives' Day at Fair arranged; bread and cake contest will be held October 30.

October 23, 1915, San Diego Union, 8:1. Canadian Kilties Band of 35 members will play at Exposition this afternoon and tonight; reception for Scots will be held in Commerce and Industries Building; Kilties will drink first tea from Fair plantation.

October 23, 1915, San Diego Union, 8:3. Record-breaking crowds expected at Catholic Day.

October 23, 1915, San Diego Union, II, 9:2. Will C. MacFarlane proves ability at Spreckels organ.

October 24, 1915, San Diego Union, 1:4-5. Angel City fund for 1916 Fair to be ready Monday.

October 24, 1915, San Diego Union, 1:3-5. Champ Clark, speaker of House of Representatives, and wife pass major portion of brief visit at Fair; says Mexican problem is solved..

October 24, 1915, San Diego Union, 3:1. Kilties win way into hearts of Fair visitors; bare-kneed bandmen liberal with encores, but more demanded; two concerts please.

October 24, 1915, San Diego Union, 3:3. Catholics to celebrate military mass at Fair; Red Letter Day planned; athletic events will feature program; baptism of two Indian babies from Painted Desert announced.

October 24, 1915, San Diego Union, 3:6. Housewives' Day to be observed.

October 24, 1915, San Diego Union, 8:4. Alonzo E. Horton Day at Exposition; Pioneer Society to make special display; reminiscences on program.

October 25, 1915, San Diego Sun, 12:3. Catholic Day is enjoyed; Doctor Humphrey J. Stewart presided at organ and directed singing of his Mass in D Minor by more than 100 voices.

October 25, 1915, San Diego Union, 1:3. Fair in 1916 favored by Angel City pastors.

October 25, 1915, San Diego Union, 1:4, 3:1-4. Catholic Day at Exposition yesterday; military mass; parade from west entrance across Cabrillo bridge headed by 13th Band, Coast Artillery Corps, voluntary company from marine barracks, 2,000 laymen, 56 altar boys, 25 clergy; Doctor Stewart's mass was sung by 100 voices; celebrant was Right Reverent Mgr. John F. McCarthy, V.F., of Fresno; Reverent Paul Dillon of Saint Cecilia's Church, Los Angeles, preached sermon; picnic in Pepper Grove; athletic sport program.

October 25, 1915, San Diego Union, 2:1. Mayor Doctor G. A. Bading of Milwaukee praises Exposition.

October 25, 1915, San Diego Union, 7:5-6. Teddy's namesake yells under baptism of holy water on cliff dweller's home at Fair.

October 26, 1915, San Diego Sun, 7:3. Motorists of Southern California are laying plans for the grandest motor celebration early in November. The celebration will be to express their appreciation of the completion of the 140-mile concrete boulevard between San Diego and Los Angeles, which is about completed by the state highway commission.

October 26, 1915, San Diego Sun, 7:4. Los Angeles trying to raise \$75,000 to assure continuance of San Diego Exposition for another year.

October 26, 1915, San Diego Sun, 12:1. Great carnival for Halloween; goblin parade Saturday will be the opening performance of a sensational free act on the Isthmus; this is Whitaker Brothers bicycle high dive from a 100 foot platform into a tank of fire.

October 26, 1915, San Diego Union, 1:2. Catholic Day; Reverend Paul Dillon preached sermon at military mass; thousands attend.

October 26, 1915, San Diego Union, 5:1. Housewives' Day arouses interest.

October 26, 1915, San Diego Union, 8:4. Big impetus given Angel City Fair fund boosters; Davidson tells subscribers first profits will replace donations.

October 27, 1915, San Diego Union, 7:1. Exposition fund in Los Angeles passes \$37,000; Pacific Mutual and Baron Long each subscribe \$1,000.

October 27, 1915, San Diego Union, 8:4. Women's Christian Temperance Union national officers at Fair.

October 27, 1915, San Diego Union, 9:1. Southern California newspapers endorse plan to keep Fair open.

October 27, 1915, San Diego Union, 9:3-4. Prizes offered for all entrants in Housewives' baking contest at Fair; exhibits to be auctioned for charity.

San Diego Herald, October 28, 1915, 2:2. Another Exposition Year.

October 28, 1915, San Diego Sun, 1:4-5. Thomas Alva Edison coming tomorrow; Exposition festival arranged; marines to pass in review in front of Sacramento Valley building.

October 28, 1915, San Diego Union, 1:2. Automobile dealers of Los Angeles today added \$800 to San Diego Exposition fund.

October 28, 1915, San Diego Union, 1:4-5. Thomas A. Edison party to arrive at Hotel del Coronado today.

October 28, 1915, San Diego Union, 3:2. Secrecy cloaks attractive girl who will masquerade as witch at Exposition; Halloween joy time; captor to receive \$25 in gold; goblin and costume parade.

October 28, 1915, San Diego Union, 5:3-4. Chamber of Commerce of Northern San Diego County endorsed Exposition in 1916; favors U.S. military academy in Balboa Park.

October 28, 1915, San Diego Weekly Union, 4:7-8. EDITORIAL: The San Diego Exposition Is Worthy to Be Perpetuated.

San Diego's exposition is built on San Diego's acreage; it may be perpetuated if we so desire; and it will be perpetuated if it can be maintained; there is too little genuine beauty in the world that any of it should be wantonly wasted.

October 28, 1915, San Diego Weekly Union, 4:5-6. EDITORIAL: When Imperial Comes to San Diego . . . Soon, however, San Diego and Imperial will be reunited. When the San Diego and Arizona Railroad is completed, the commercial interests of San Diego and Imperial will be identical.

October 28, 1915, San Diego Weekly Union, 7:3. Champ Clark, speak of House of Representatives, and wife pass major portion of brief visit at Fair.

October 28, 1915, San Diego Weekly Union, 7:7. Kilties win way into hearts of Fair visitors; bare-kneed bandsmen liberal with encores.

October 29, 1915, San Diego Sun, 1;8, 11:5. City's latchstring out for Thomas Edison and Henry Ford.

October 29, 1915, San Diego Union, 1:2-3. Fund for Exposition in 1916 assured by Angeleno workers.

October 29, 1915, San Diego Union, 4:1. EDITORIAL: Charity at the Exposition . . . in support of Housewives' Day sale.

October 29, 1915, San Diego Union, 6:1-2. Housewives' Day; women enter baking contest; prize bakery exhibits sold for \$1,136; money given to charity.

October 29, 1915, San Diego Union, 8:5. Thomas Edison to arrive for Exposition visit today; Henry Ford expected.

October 30, 1915, San Diego Sun, 1:5-6. Mayor Capps says of Henry Ford: "You may know all about a fliver car, but what do you know about war?"

October 30, 1915, San Diego Union, 1:3-4, 2:2-3. Twelve thousand pupils encircle Thomas Edison with a wall of flowers; welcome stirs great inventor's heart; Ford voices plea for peace, by W. C. Getty.

Happiness which radiated from the kindly face of Thomas Alva Edison, the world's greatest inventor, penetrated hearts of thousands of San Diegans and visitors at the Panama-California Exposition yesterday afternoon when 12,000 school children nearly buried him from view with an avalanche of fragrant flowers.

It was the welcome of the school children that touched him more deeply than the applause of the thousands of grown ups who had assembled to add their welcome to that of the children. Between Edison and the children there seemed to exist that sympathetic understanding which made each child believe he had been given special notice.

Standing on the platform before the Sacramento building, under a beautiful pergola of green, banked with yellow chrysanthemums, built for the occasion by the San Diego park board, Edison was nearly hidden from view of the crowd after the children had passed and each one had deposited his bouquet. Nearly 4,000 bouquets were taken from the grounds of Balboa Park by members of the park commission. These were also showered on Edison and his party.

Many Seek Vantage Points

The welcome of the children to Edison was one of the prettiest functions of the kind ever given at the Exposition. With flowers strewn about him on every side, with great bunches of them in his arms, he smiled and bowed his pleasure to his young friends.

Long before the time set for the arrival of Edison and Henry Ford, Detroit automobile manufacturer, hundreds crowded the steps of the Sacramento building, many brought their own chairs.

When the automobile bearing Edison and Ford turned into the Plaza de Panama, a thousand voices cried, "Here they come." And thousands of other voices were raised in ringing cheers. When Edison alighted nimbly from the car, he was met by Norman Hackett Barber, Mary Elizabeth Pendleton and Marjorie Rice, a trio of happy volunteers who had been selected to greet him. They presented great bunches of flowers into his hands and he smiled his thanks. Then came the school children with a ton of flowers which were banked about him and which permeated the air with their fragrance. "I'm solid for children," said Edison, the only remark he made.

Reception Given Inventor

No more enthusiastic multitude has ever assembled at the San Diego Exposition to welcome and to honor to anyone that that yesterday for Edison. With the possible exception of the reception given Madame Ernestine Schumann-Heink, the gathering yesterday was without precedent in San Diego celebrations of its kind.

When it was all over, when all the children had passed, when the Kodak "fiends" had been satisfied and when all else was accomplished, save that of pressing nearer for a closer view of the great inventor's face, Edison escaped through the Sacramento building and along the beautiful garden walk behind the buildings to the California Building where a tea and reception were awaiting him.

Barely had he started to make his way through the narrow aisle opened through the crowd for him by Captain Charles P. Wright of the Balboa guards when there were calls for Henry Ford. "Ford," "Ford," cried the crowd and the modest owner of the biggest automobile factory in the world was forced to step into the crowd, in answer to calls for a speech. Ford held up his hands and followed Edison.

Ford had been standing I the crowd some distance from Edison where he talked freely of his fight against preparedness. He was frequently interrupted by those who rushed through the crowd to shake hands with him.

Edison Shuns Interviews.

One woman, who had bent closely to hear his words against war, extended her hand and said, "God bless you for what you have said."

Following his custom on his visit to other cities, Edison declined to talk for publication. "I always meet the newspaper boys and talk to them on the last day of my visit in that city," he said. Asked if he enjoyed his reception in San Diego, he merely swept his arms over the vast assemblage and looked his appreciation, apparently preferring to express it in that manner rather than in words. The anxious group of newspapermen wanted to ask about national defense, his latest inventions, the declaration of Champ Clark that he (Edison) is "nutty" so far as his idea of coast defense is concerned and ever so many other things, but Edison smilingly retreated after saying, "Not today, tomorrow perhaps."

The trip from Los Angeles over the new coast route of the Edison-Ford party was marked with incidents pleasing to both men. At all the towns along the way, the people turned out to see them and in some places, Santa Ana particularly, school children lined the road for half a mile.

Military Escort Given

When they arrived in San Diego, they were met by President G. A. Davidson, Colonel J. H. Pendleton, Vice President George Burnham and officers and directors of the Fair and taken to the U. S. Grant Hotel where officers and men of the First Cavalry were awaiting to escort them to the Laurel street entrance to the grounds. At the entrance the party was met by officers and men of the marine barracks and escorted across the Cabrillo bridge and into the Plaza de Panama, where the celebration in honor of their coming was held.

"I am about talked out," said Ford, but he straight way plunged into his favorite hobby, that of his fight against preparedness. He contends that preparedness makes war. He points to Belgium as an example.

"I did not say that I would give \$10 million to fight preparedness. I did say, however, that I would give one million dollars in aid in the fight against preparedness and I mean to fight it with all the power I can command. I mean literally that I will put all I have into a fight against it. I have been organizing for some time and the campaign will be systematically conducted. Money makes war; nations have to make money to make war. It is our business to keep money away from them."

"War Brings Only Woe"

"Look at that crowd," he said, sweeping his hand toward it, "war brings these people nothing but crepe, hardship, starvation and taxes. I don't believe in rallying around the flag. I don't believe in boundaries. I mean to help to direct the attention to other things --- farming, for instance. If we exerted more physical effort, our minds would work better. I plan to help make farm life more attractive. I am going to manufacture a light, cheap, economical tractor. It will be low enough in price to make its way into the possession of every farmer. It is still in the experimental stage, but we will eventually manufacture 1,000 of them a day, perhaps more.

"How much of the United States could you protect, even though for the next few years we devoted ourselves to building a navy, erecting forts, increasing the army? A foreign foe could land almost at will on our shore line on either the Atlantic or the Pacific. We couldn't begin to acquire equipment to protect our coasts. I would rather be with no protection at all.

Hate Declared Needless

Another thing. We must get over this idea of hating. A man who hates someone or something must take time away from his work to do it. It is a needless waste of time and effort. Simply because a man is a German or an Englishman or a Hebrew, or any other nationality, is not reason he should be hated. Class prejudice must be eliminated if we are to continue to expand as Americans. If my factory, twenty-two nationalities are represented. There is no war talk and the men mingle as true American should.

"Business! Business was never better. The factory is 100,000 orders behind and we are making the banks pay us interest on \$40 million. Yes, I drive one of my own cars. All the fun in riding is in the driving."

Ford was enthusiastic about Southern California. The drive from Los Angeles to San Diego over the new highway was greatly enjoyed by all members of the party. It was dusk when the party left the Exposition grounds and although several hours had passed there, little of the grounds was seen by the visitors. The duration of the public reception on the Plaza de Panama and the reception which followed it at the California Building had taken more time than had been anticipated.

Visitors To Leave Sunday

As the Edison-Ford party asked that no banquets or luncheons be planned for them and that no functions, save that of yesterday afternoon, be given, today will be passed in resting and sightseeing.

Immediately after tea early last evening, the visitors went to Hotel del Coronado where they will stay until tomorrow evening when they plan to start for the East.

Edison is in his 68th year and yesterday's activities were almost too much for him. He left Los Angeles early in the morning and many stops were made at points along the route. This, with the reception of yesterday afternoon, tired him and he wished to have today to rest and pass as he wished. Some time today the party members will go on a jaunt over the Exposition grounds and will motor to Point Loma and other points of interest.

Those in the party are Mr. and Mrs. Thomas A. Edison, Henry Ford and son, E. D. Ford, Mrs. and Mrs. D. W. Flint, Miss Grace Miller, D. Wilcox, H. S. Firestone, A. C. Miller, F. D. Fagan.

October 30, 1915, San Diego Union, 1:5-6. Fund for 1916 Fair leaps to \$65,281 in Los Angeles.

October 30, 1915, San Diego Union, 3:3-4. Housewives to test skill in great baking contest at Fair for charity today.

October 31 1915, San Diego Union, 3:5-6. Prizes for Housewives; their work aids charity.

October 31, 1915, San Diego Union, 8:4. Kilties play at Fair today; organ pavilion seats will be free for patrons of performance.

October 31, 1915, San Diego Union, Women's Section, 5:4. Anthropological Museum plan for San Diego; exhibits prepared under the direction of Doctor Ales Hrdlicka, curator of physical anthropology of the U.S. National Museum, fill five large connecting rooms in the Science of Man building at the Exposition; result of field work and exploration Smithsonian Institution shown; Natural history, human evolution outlined at Exposition.

November 1915, Art and Archaeology, Vol 2, No. 3. ANCIENT ART AT THE PANAMA-CALIFORNIA EXPOSITION, by Edgar L. Hewett. pp. 65-

Introduction

To one who has had familiar acquaintance with nearly all the American expositions, beginning with the Centennial 1876, it is a great privilege to have been able to take part in the wonderful creation at San Diego --- an exposition distinct from all its predecessors, historically, artistically, and scientifically. Conceived by local genius and executed with the assistance of especially qualified collaborators, in each department it forms a splendid setting for the celebration of the Isthmian wedding of the Atlantic and the Pacific. San Diego was selected as an appropriate city for the celebration, since it is the American port nearest the western gate of the Canal and besides has a sentimental claim in the fact that its port was the first north of Mexico to be entered by a European ship. Cabrillo, after rounding Cape Horn, explored the western coast and cast anchor in the broad bay behind Point Loma in 1542.

The reason why this Exposition appeals with such overpowering force to the imagination of the visitor may not at once be apparent. It is not stupendous as the international expositions, but an achievement far removed from these and possible only in the far Southwest. Should one venture to explain the fascination almost certainly felt by the imaginative visitor, he will think first of the superb site with its deep verdant valleys, of the many-arched Cabrillo Bridge, which leads over a profound gorge to the splendid Ocean Gate; of the songs of many unseen birds echoing back and forth from the empowered slopes; of the domes and many-storied towers which rise beyond --- dreams of grace and embodiments of permanency and strength; of the long arcades wreathed in ever-blossoming vines through which one finds his way; of the shaded and deeply secluded paths from which glimpses are had of the distant blue sea. All of these and more conspire with the soft sunlight and the sweet-scented air to dreams of Arcady. Is then then not all a dream? It was December at San Diego and the whole East was in the clutches of a fierce zero winter.

The charm of the Exposition is, however, not confined to its superficial features, for aesthetic attention has been extended equally to the interiors in many ways; but the serious side of human affairs, the arts and industries, history, science, and education are here given exceptional attention, the central idea being the history of man and more especially man in the early stages of his development. For the first time in the history of expositions, the story of the physical man is made a chief attraction, and native American culture is presented

Every lover of art will be interested in working out the archaeology of this magnificent building. Aids to this purpose are afforded in a room in the Fine Arts Building devoted to the architecture of the Exposition. Masterpieces of ecclesiastical architecture of the last fourteen centuries have furnished elements of utility and beauty, which are marvelously combined. For the immediate progenitor of the dome see that of Taxco. most beautiful of all the churches of Old Mexico. For its remote ancestry we go back to the Duomo in Florence. The cluster of domes recalls St. Mark's in Venice and Santa Sophia in Constantinople. The use of inscriptions about the base is common in Spanish churches. The legend at the base of the California dome, beautifully expressive of the Golden State, reads:

Terrain frumenti hordei ac vine-
arum in qua ficus et malogranata
et olivet a nascuntur terrain olei
ac mellis."

[Deuteronomy 8:8. "A land of wheat and barley, and vines and fig trees and pomegranates; a land of olive-trees and honey."]

Prototypes of the tower are numerous in Spain, as for example in Cordova and Seville. A strikingly beautiful effect is obtained by the concentration of ornament at the summit of the tower and in the center of the facade, in the sudden relief of a large expanse of bare wall with luxuriance of decoration. The embellishment of tower and dome with tile in brilliant colors is a fine Oriental touch, which it is hoped will be extensively used in Southern California.

The main facade will repay careful study (frontispiece). The best place from which to see this is from under the portales on the south side of the Plaza. It has been said of this facade, "There is no finer Spanish Renaissance facade in existence." Statues of noted characters connected with the history of San Diego have been placed in the niches. At the top, in the place of honor, stands Fray Junipero Serra, of the order of St. Francis, Father-Presidente of the missions in both Alta and Baja California, who arrived at San Diego in 1769. Immediately below, at the right as you face the building, is the statue of the Portuguese navigator, Juan Eodriguez Cabrillo, who discovered the Bay of San Diego in 1542. Above Cabrillo is the bust of his patron, the Emperor Charles V of Spain. At the left is the statue of Don Sabastian Viscaino, who sailed into San Diego Bay on the tenth of November, 1602. Above Viscaino is the bust of his patron. Philip III of Spain.

Below Cabrillo is the bust of Don (taspar de Portola, first Spanish governor of Southern California. Below Viscaino is that of George Vancouver, the English navigator who sailed into the harbor on the twenty-seventh of November, 1793, and made notes upon the condition of the Spanish settlement.

In the lower niche at the right is the statue of Fray Antonio de la Ascension, Carmelite historian and prior of the little band that accompanied Viscaino. At the lower left hand is the statue of the Franciscan priest Luis Jaume, who accompanied Father Serra, and who died at San Diego Mission at the hands of the Indians. He may be considered the first Christian martyr of (California.

Immediately above Viscaino is the coat of arms of Spain, and above Cabrillo that of Mexico. The coat of arms of the state of California is seen over the main doorway, and the shield of the United States of America at the top of the facade above the statue of Father Serra.

II: ABORIGINAL AMERICAN ART AND CULTURE

Inside the California Building will be seen the most important works of the ancient peoples of Central America. They present a picture of an age of which Americans generally are not well informed, namely, that which preceded the coming of Europeans to the western continent. Knowledge of American history usually begins with the period of discovery and

conquest, and follows down to the present time. Here we begin at the usual point and looking backward view the history of an American civilization that reached its zenith (p. 73) and went down before it was known to white men.

The cities that have long lain buried in the tropical jungle have been the subject of much misleading romance. Fantastic theories about these people, their Oriental or Egyptian origin, their empires, kings, queens, and courts, the mystery of "vanished races"-all this may be dismissed. There is nothing mysterious about it. The ancient temple builders of Central America were Indians. All the characteristics of the race are seen in these ancient monuments. Like other races they slowly struggled up through a long period of evolution, matured, for a time expressed their mental and spiritual power in great works, ran their course and died, as is inevitable with individuals and races when they grow old..

It would be misleading to pretend that any connected history of the Central American cities could be written at this time. Their records, in the form of oglyphic inscriptions, are a sealed ok, except as they relate to notation and chronology. None of the characters used in the writings of the Mayas bear any resemblance to those of the Egyptians or any other ancient people. It reports to the effect that Orientals have been able to interpret the symbols of the Central American monuments, or understand the language of the native ple, may be put down as false. For the study of the hieroglyphic writings we must depend mainly on the inscriptions carved in stone. These, on monuments, walls, tablets, and lintels, have survived the ruin of ages. Sacred books, or codices, were once numerous, but now only three are known to exist. Large numbers of them were destroyed at the time of the Spanish conquest of Yucatan on account of their supposedly pagan character. Nothing can be set down as final with reference to the date of any Central merican city in terms of the Christian. calendar. In the subject of Maya chronology there is little agreement among students. Certain authorities, who are worthy of the highest respect, date the Maya cities as early as the twelfth century, B.C. Others place them in the early part of the Christian era. The writer is disposed to favor the latter view. among the older cities are Copan, Quirigua, Tikal, and Palenque; the later are Chichen Itza, Uxmal, and other cities of northern Yucatan. When America was first seen by Europeans, the Central American cities lay in ruins in the jungles, as they do now. Evidences of a long period prior to the setting up of the sculptured monuments and the inscription of hieroglyphic tablets have been found at Quirigua in Guatemala. No proof exists to show that this civilization was derived from Egypt or the Orient. On the contrary, it appears certain that during a period of many centuries it rose, flourished, and declined upon the soil of Central America. In this it resembled the Egyptian, which ran its entire course in the Valley of the Nile. It is customary to speak of the people of all the Central American cities as the Mayas, but that they were all of one stock cannot be claimed with certainty. It could not be proved that the people of Copan and Quirigua in the Motagua Valley spoke the same language or that they were of the same stock as the people of Yucatan or the Usumacinta Valley in Mexico. The fact that they used the same architectural principles in building and the same hieroglyphic (p. 75) symbols is not conclusive of linguistic or ethnic identity. In the Rio Grande valley in New Mexico it is not uncommon to find two Indian towns less than twenty miles apart where the people speak entirely different languages, yet build their houses and sanctuaries in the same way, and use practically the same symbolic characters. The ancient cities of Central America may properly be spoken of as "Temple Cities." Among the ruined buildings there is little to suggest residential use or domestic life. It is probable that the ancient people lived much as do those of the present time, in houses of bamboo, or other light material, thatched with palm. This civilization was profoundly religious in character, a trait of the entire American Indian race. With probably no other people known has religious ceremony been so generally intermingled with all the activities of life. As the condition of society called for nothing elaborate in residence building, so also political organization was such as to require little in the way of public buildings for civic purposes. Monarchy was unknown. The government was theocratic and republican in character. There was no splendor of courts and no state government to provide for. Religious life was highly organized. Everything else was subservient. The mysteries of the priesthood necessitated sanctuaries, shrines, altars, gorgeous vesture, and representation of gods. Imposing ceremonies, processions, and rituals demanded temples, sacred

precincts, and facilities for the display of magic power with which to awe the populace. The building of a city meant the erection of temples and statues and their embellishment with images, inscriptions, and symbols decorating.

The art of the Mayas, the strength and beauty of which is illustrated in this building, gives a perfect picture of the racial mind. In their architecture, painting, and sculpture they uttered their deepest thoughts concerning life. If art is great in proportion as it reveals the experiences of life, then this is great art. With marvelous order and with technique entirely adequate to their purposes, the Maya artists tell in their sculpture what was of most concern to them-tell of human dignity and divine power-tell in a way that was perfectly naive and honest, of their belief in the efficacy of ritual, ceremony, symbolic ornamentation, gorgeous vesture in dealing with divinity-tell of profound veneration for life and life forces, even though enshrined in bird or beast. Man, Nature, God, Life-here was their realm of thought-here was their religion, and their art cannot be separated from it.

The most conspicuous characteristic of their art is order. Note this in both their architecture and sculpture. We do not recognize the work of individual artists. Technique was racial in character and was adequate for their needs of expression, which is the main think in style. It was progressive in its development, and one can readily trace improvement from age to age. While not an infallible guide, yet one finds it possible by studying this phase of Maya art alone, to determine the order of construction of the various monuments in a city, just as in modern cities one sees at a glance which are the buildings of the early days and which belong to later and more mature times.

Of painting there is little surviving with the exception of that found on vases. Color was used on statues and in the buildings, but only a few fragmentary (p.77) examples remain. In ceramic art there The works relating to Ancient America was the same fine sense of order and, that are displayed in the California judging from the few authentic specimens Building may best be seen in the order we have, the art was well advanced. in which they are here presented.

III

A. THE VESTIBULE: THE FARNHAM HISTORICAL FRIEZE

()n the wall is to be seen first the historical frieze by Mrs. Sally James Famham, the original of which, in bronze, adorns the room of the governing board in the Building of the Pan-American Union, in Washington. With the generous permission of this board and the courtesy of Hon. John Barrett, Director-General, this replica was obtained. It is justly regarded as one of the important achievements in modern American sculpture (figs. 8, 9).

1. Right of entrance to the rotunda: Landing of Columbus, October 12, 1492.

2. Left of entrance: Balboa taking possession of the Pacific Ocean in the name of the King of Spain, September 1513 (fig. 8).

3. Right (east) wall: Cortes, Conqueror of Mexico, with his army: his Indian wife, Marina, at his side, the onquered Aztec chief, Montezuma, borne in a litter by his warriors. The panel at the left of this tablet represents Mineral Wealth of Mexico, mined by the

Indians to enrich the conquering Spaniards. The panel at the right end represents Agricultural Wealth of Mexico. These vertical panels are framed by columns, the designs of which are taken from the sculptured monoliths at Copan in Honduras (fig. 9).

4. Left (west) wall: Pizarro, Conqueror of Peru, leading his army to the subjugation of the Incas. The panel at the left of this tablet represents a llama driver of the Andes. The panel at the right end represents a vaquero, or cowboy, of the pampas.

Below the Farnham frieze will be seen copies of four remarkable sculptures from the sanctuaries at Palenque, one of the most important ancient cities of Central America.

1. Right of entrance to the rotunda: Figure in bas-relief from the pier on the right side of the entrance to the Sanctuary of the Temple of the Sun at Palenque. In this tablet the face is ghostly in appearance. Comparison with the make-up of characters in the drama-dances of the North American tribes, in which shades of ancestors are impersonated, leads one to suspect that this figure is designed to represent the spirit of a deceased person. The garb indicates a character which among the Indians of our Southwest we would call a medicine-man. Note the symbolic head-dress, the jaguar mantle thrown over the shoulders and hanging down the back; also the decorated wrist and ankle bands. The straight tube held in the mouth, with the smoke or flame which appears to issue from it, suggests the ceremonial pipe or cloud-blower of the Pueblo Indians.

2. Left of entrance to the rotunda: Figure in bas-relief from pier on left side of entrance to the sanctuary above mentioned. The vesture is that of an Indian priest. Note the elaborate plumed head-dress, necklace of beads, richly embroidered mantle, sash and apron, leggings and sandals. The face is that of a living person. Above the head and in front of the face are hieroglyphic characters.

(FIG. 7. THE CALIFORNIA BUILDING FROM THE NORTHEAST.)

p. 79

3. Right (east) wall: This is the famous altar-piece known as the Tablet of the Cross. It occupies a wall of the Sanctuary in the Temple of the Cross and corresponds in many respects with the altar-pieces in other temples, such as the Temple of the Sun nearby. The tablet is of limestone, and the figures are sculptured in low relief. The cross is here used as an altar, and as in other parts of Ancient America, probably represents the Four World Quarters. Perched on the top is the Quetzal, the Sacred Bird of Central America. The two priestly figures in ceremonial attitude before the altar are in the act of presenting offerings. Remembering certain rituals and the significance of the cross among northern Indian tribes, this suggests a birth ceremony in which occurs the Invocation to the Four Winds. Columns of hieroglyphic inscriptions are seen at the right and left. The entire original of

this altar-piece may now be seen in the National Museum of the City of Mexico. One panel of it was, from the year 1842, kept in the city of Washington, D. C. As an act of international courtesy it was, on the recommendation of Secretary of State Elihu Root, after his visit to Mexico City in 1906, and by action of the Secretary and Regents of the Smithsonian Institution, returned to the government of Mexico.

4. Left (west) wall: This is another remarkable altar-piece known as the Tablet of the Sun Mask. It occupies the back wall of the Sanctuary of the Temple of the Sun and corresponds closely in many respects to panels in the other temples. The tablet is of limestone and the figures are sculptured in low relief. The two priestly figures are in the act of making offerings, doubtless, to the deity to whom the temple is dedicated.

Each stands upon the back of a grotesque human figure, and between these are two other figures of remarkable design, clothed in jaguar skins, supporting upon their upraised hands, Atlas fashion, a massive table upon which is the great mask with expanded eyes and protruding tongue. Columns of glyphic inscriptions occur at the right and left, and two small inscriptions near the upper margin of the tablet.

On opposite sides of the outer entrance to the vestibule will be seen upon the walls panels of hieroglyphic inscriptions from Palenque (fig. 10). These are the halves of what was formerly a single hieroglyphic panel. They afford an excellent example of the glyph carving in which Palenque appears to have surpassed all other Central American cities.

Above the door, between the vestibule and the rotunda, is a Maya inscription (fig. 11) arranged in the form of an initial series, expressing the date of the opening of the California Building to the public, that is, January 1, A. D., 1915. The difficult problem of correlating a date in the Christian calendar with one in Maya chronology, expressing it cor-

rectly, year by year, and day for day in Maya hieroglyphic characters, was undertaken by Mr. Sylvanus G. Morley.

The reading worked out by him and accepted as nearly a correct rendering as could be offered at the present time

is Cycle 13, Katun 8, Year 3, Month 10, Day 13, 6 Ben, 7 To. Without going into a technical explanation of

Mr. Morley's reading, it may be stated for the benefit of those who have not studied Maya chronology, that the date

here expressed as it might have been by an ancient Maya scribe, places the construction of this temple in the year

5363 of the Maya calendar.

IV

B. THE ROTUNDA: REPLICAS OF CENTRAL AMERICAN MONUMENTS

1. On passing through the door leading from the vestibule to the rotunda, everyone should notice the splendid columns reproducing the portal of the temple which is situated on the top of the pyramid, commonly called El Castillo, at Chichen Itza, Yucatan. The name appears to the writer so unsatisfactory that he prefers to designate it as the Temple of Sacrifice, for reasons which will appear later. These majestic columns are here reproduced for the first time under the direction of Mr. W. H. Holmes. The motive is the Plumed Serpent known all the way from the United States to Central America, and doubtless having throughout the same significance. The Avanyu of the ancient cliff-dwellers represented the major deity of these people; having to do with water, springs, streams, rain, and consequently with growing crops. The bird in Southwestern mythology was the emblem of the sky gods, as the reptile was of earth deities. In the Plumed Serpent we have a representative of both. In all probability the Quetzal coatl (quetzal, bird; coatl, reptile) stood for a similar concept of deific power in f Central America.

2. In the center of the rotunda (fig. 1 1) is a large relief map of Central America, made by the School of American Archaeology, showing the distribution of the ancient Temple Cities. Fifty sites are shown on the map. Note especially the location of Quirigua, Copan, Palenque, Tikal, Uxmal, and Chichen Itza. from which cities the various works of art and architecture shown in this building are derived. Note that these cities are mostly in the lowlands, in a region that is now extremely unhealthy for the white race, as well as the Indian. In the absence of known causes for the depopulation of Maya cities, one is disposed to attribute it to the development of diseases, such as caused the deterioration of ancient civilizations of southern Europe. At the time of the Spanish conquest, the native cultures of the salubrious highlands were flourishing, while those of the hot, fever-stricken lowlands languished or were extinct.

3. Arranged around the rotunda are replicas of the great monoliths of Quirigua. These remarkable monuments surpass everything else of their kind on the American continent. They are of two classes, namely, sculptured shafts, or stelae, and huge zoomorphic figures which bear the same kind of hieroglyphic inscriptions and show the same sculptural features as the shafts. Roth types appear to have had the same purpose, which doubtless was to serve as memorials of great men and women who occupied high positions as priests or rulers. Inscriptions were usually placed upon the narrow sides of the shafts, and the animal designs are likewise covered with hieroglyphics and decorative elements. This would seem to indicate a peaceable race. One notes also the absence of scenes of sacrifice, cruelty, or bloodshed. In the delineation of the human figure proportion was ignored. Little attention was paid to anatomical details. There is nothing in the dress, vesture, or insignia on which to base a determination of sex, but male figures are always bearded and female beardless. In the arrangement of the monuments about the Plaza at Quirigua, it is of interest to note that the north end was (FIG. 10.

HIEROGLYPHIC INSCRIPTION, PALENQUE) given over to monuments of men, while those south of the center are women's monuments. Nearly all are double-figured and in no case do the figures duplicate. There can be little doubt that these are portraits.

The story of the making of these reproductions is of great interest. The building of tracks and scaffolds; the transportation of vast quantities of glue, plaster, and clay; the repeated experiments ending in many failures, but ultimately in perfect success in the use of glue molds in the tropics; the handling of heavy masses with scanty mechanical appliances; the problems of crating, packing and transporting, and finally setting up the monuments in the rotunda of the California Building; repairing, pointing, coloring, finally achieving replicas correct to a hair line and preserving not only the art of the monuments but the very texture of the stone, is an important chapter in Central American archaeology..

FIG. 11. DATE OF THE CALIFORNIA BUILDING IN MAYA GLYPHS.

p. 85. Beginning at the left side of the rotunda on entering, we may notice the monuments in order. The first, called by Maudslay the Great Turtle (fig. 13), is the crowning achievement of native American art. In the beauty of its design, the richness of its execution, and the breadth of its conception, it is not approached by any other American example. The figure seated in the mouth of a mythic animal, which probably stands for some deific earth power, is that of a young woman bearing the manikin wand and ceremonial shield, and wearing the crown and elaborated head dress which characterize the costumes of all the sculptured figures at Quirigua. The entire surface of the block is carved. The principal inscription occupies the back part of the monument. The people who executed this probably reached the limit of their powers, for no later work of the people of Quirigua equals it, and a marked change in style appears in those of later date. The making of this replica of the greatest of all Central American sculptures became possible through the generosity of Mr. George W. Marston of San Diego.

The next monument is a shaft belonging to the group having low pedestals. On the front is a bearded figure, standing, with hands resting upon a breast-plate or bundle, which extends from shoulder to shoulder. Unlike the figures on the other monuments, the personage here represented does not carry scepter and shield, but instead holds the ceremonial bundle above referred to. On the back of the shaft is a grotesque figure in low relief, which stands in a peculiar position with one knee flexed and, instead of being presented full-face, is in profile. The figure represents the Death God. On the narrow sides of the monument, are columns of hieroglyphic inscriptions.

The next monument seen in making the round of the rotunda is an enormous shaft, the largest at Quirigua, in fact, the largest in the whole Maya world. It is placed in the center of the apse of the cathedral-like interior. It is between twenty-six and twenty-seven feet high, and the original has an unknown projection below the surface. It is approximately five feet broad and three and one-fourth feet thick. The original leans thirteen feet from the perpendicular; con-

sequently it is usually spoken of as the "Leaning Shaft." The writer has been able to prove that this monument never occupied a vertical position, in short, that the builders found themselves unable to raise it. The weight of the original is upward of one hundred thousand pounds. The material is red sandstone. The Mock was quarried some five or six miles from the temple area and hauled by means of ropes pulled by hundreds of individuals down the inclined way which leads from the quarry to the water. There it was probably loaded upon boats, floated down the Motagua to a point opposite the city, then brought in by means of the canals to the sacred precinct where it was erected. The human figures, both male, sculptured upon the two broad faces are the most imposing to be seen in Quirigua. They are of heroic size, and have the appearance of great strength. Each figure bears a manikin wand in the right hand and the tasseled shield in the left. The two narrow sides are covered from top to bottom with hieroglyphic inscriptions. The necessary means for the reproduction of this monument were generously furnished by Mr. Joseph W. Sifton of San Diego.

FKi. 14. "THE QUEEN." SCULPTURED STELE, QUIRIGUA.

p.87: The next monument, called The Queen, is eleven and one-half feet high (fig. 14). Upon its opposite faces are sculptured female figures in high relief. The faces are full and beautifully rounded. The figures are very short. The one facing the rotunda bears the manikin wand and tasseled shield. It was the last monument set up at Quirigua, and while lacking in the cruder strength of the older and larger shafts, and in the rich beauty of the Great Turtle, it displays a fineness of workmanship not to be seen in the earlier groups.

The last monument in the rotunda is one belonging to the zoomorphic group (fig. 15). It is carved to represent a huge dragon-like monster. From the mouth issues a human head with bearded face, the head crowned in the same manner as those upon the sculptured shafts. The hands rest upon the chest. On the arms and legs of the monster, which extend back along the sides and around the rear of the figure, are inscriptions in the intricate and elaborate style known as the full-figure hieroglyphic. The monument is generally known as The Dragon.

Y

C. THE BALCONIES: THE VIERRA FRESCOES OF ANCIENT
CITIES OF AMERICA

We may begin a description of the works of art upon the balconies surrounding the rotunda with the east side. The object of the entire display in the California Building has been to give a broad picture of Central American culture, omitting everything commonplace and showing the great achievements of the people in city building, architecture, art, together with their environmental conditions, religious ceremonies, industries, occupations, and beliefs. This has been done without introducing a single case of museum specimens.

First to be noticed are the frescoes, extending around the interior of the building on three sides. These were painted by Mr. Carlos Vierra of the School of American Archaeology. They show six of the most important ancient cities of Central America. They illustrate the typical arrangement of Maya cities together with the different types of buildings used in their architecture, all of which were probably for religious purposes. The so-called temples were used for religious observances, and the palaces were sanctuaries of the priesthood. With the exception of Quirigua, little restoration has been introduced in the paintings. They may be accepted as a fair representation of the appearance of these cities as they now lie in ruins, and have lain for many centuries. Considerable restoration has been done in showing the temples at Quirigua. The excavation of the city has not proceeded nearly so far as is indicated in the painting. It will be convenient to describe these frescoes in the order of their arrangement as we pass around the three balconies.

Quirigua (fig. 16) is situated in the flood-plain of the Motagua River in the Republic of Guatemala. This valley is one of incomparable richness of soil. The vegetation is indescribably dense. The city is devoid of written history and tradition is silent concerning it. The architectural remains consist of (p.89)ruined temples upon massive terraces of red sandstone, grouped about a Great Plaza and two smaller rectangular courts. These constituted the Sacred Precinct of the city. In architecture Quirigua is less imposing than other ruined cities of Central America. In sculptured monuments it is unequalled. These are arranged about the Great Plaza and in the Ceremonial Court south of it. There are thirteen of the greater monuments and three of lesser importance. Eight examples are installed in the California Building.

The ruins of Quirigua have been uncovered by the School of American Archaeology, which commenced excavations there in the spring of 1910. The work was made possible by generous contributions from members of the St. Louis Society of the Institute for three years. It received also an equal amount of financial aid from the United Fruit Company. The rest of the expenditure has been borne by the school, the exposition, and private subscribers. At the beginning it was a completely buried city. The ruins presented the appearance of earth mounds covered with enormous trees and dense jungles. Only a part of the Sacred Precinct was uncovered. It is estimated that five years will be needed to complete the work. Excavations will be resumed in 1916. The story of the uncovering of Quirigua will stir everyone who enjoys a battle with difficulties. The mechanical problems involved were usual in archaeological research. The destruction of a mass of tropical vegetation amounting to thousands of tons per acre, the removal from the buildings of trees a hundred and fifty feet high and twenty-five feet in circumference without destroying monuments, stairways, and walls was an enormous task.

Great stumps with roots spreading out over the mounds and penetrating them in every direction added to the difficulty of excavation. Two seasons were devoted to this part of the work alone, and happily all was finished without injury to a single monument or inscription.

The ruins of Copan (fig. 17) are situated in the Republic of Honduras not far from the frontier of Guatemala. It is in the valley of the Copan River, a tributary of the Motagua, upon the banks of which, some thirty miles away, we find the ruins of Quirigua, from which it is separated by the mountain range which forms the boundary between Guatemala and Honduras. Copan may be reached on horseback in two days from either Zacapa or Gualan on the railway which extends from Puerto Barrios to Guatemala City.

Unlike the majority of the Central American cities, Copan was situated in the hills at an elevation of approximately two thousand feet above sea level. The district is not heavily forested, as is the main valley of the Motagua, though from early accounts it would appear that the city was formerly surrounded by a heavy jungle.

Of Copan there is but little that is satisfactory in recorded history. We have a description of the ruins in a letter of Diego Garcia de Palacia written in 1576 to King Philip II of Spain. He speaks of "ruins and vestiges of a great population and of superb edifices of such skill and splendor that it appears they could never have been built by the natives of that province." His description of the ruins will still pass as reasonably accurate. As to his information gained concerning them he states (p. 91)

FIG. 16-18. MURAL DECORATION'S. PANORAMIC VIEWS OF ANCIENT MAYA CITIES
BY CARLOS VIERRA.

I endeavored with all possible care to ascertain from the Indians, through the traditions derived from the ancients, what people lived there or what they knew or had heard from their ancestors concerning them, but they had no books relating to their antiquities, nor do I believe that in all this district there is more than one, which I possess. They say that in ancient times there came from Yucatan a great lord who built these edifices but at the end of some years he returned to his native country leaving them entirely deserted.

Little of value was recorded concerning Copan until the year 1839 when Mr. John L. Stephens explored Guatemala, and with the aid of Catherwood, the artist, prepared a most interesting and valuable account of the ruins. For the first really important investigation of Copan we are indebted to the English explorer, Mr. Maudslay. Next in importance was the work of the Peabody Museum, Harvard University, prosecuted during the years 1891-1895. As results of these expeditions we have the valuable reports of Mr. Maudslay and of the Peabody Museum which afford a more satisfactory body of literature con-

cerning Copan than is to be found of any other Maya city. Unfortunately, the excavation of Copan was prematurely terminated, so that this great city has only partially told its story. A fact that should not be forgotten is that the Copan River is rapidly cutting into the temple area, causing serious destruction each year. Furthermore, great loss is occasioned by the vandalism of the native population. Unless these two causes of destruction can be speedily arrested, the loss at Copan will be irreparable.

Tikal is one of the largest of the ancient cities of the Maya people (fig. 18). Its ruins occupy an area of approximately a square mile. It covers three natural terraced hills, and like most other Maya cities, was composed mainly of temples built upon pyramidal bases. The walls of the temples are of enormous thickness in proportion to the room space as at Quirigua. The situation of Tikal is in the interior of Guatemala in the Department of Peten. Because of its extreme isolation the city has been seen by but few travelers. There is little authentic history of the place. Mention is made of its having been explored in 1848, and various other reports have been published during the latter part of the last century. The best known and the most satisfactory are those of Mr. Alfred Maudslay and Mr. Teobert Maler. During the last few years the ruins of Tikal have been under investigation by the Peabody Museum, Harvard University. An important development of the culture was the remarkable wood carvings that have been rescued from the temples. From nowhere else in Central America, and from but few places in the world, do we have such beautiful examples of ancient wood sculpture.

Palenque (fig. 19) is situated in the state of Chiapas, Mexico, bordering on the Republic of Guatemala. It is in the heavily wooded hills to the west of the Usumacinta River. The original meaning of the name Palenque is not certainly known, nor is anything definite known as to its history. In his expedition to Honduras in 1542-1546, Cortes must have passed within a short distance of the place. As no mention is made of it in the account of that expedition, it would seem certain that the city must have been completely in ruins and buried in the tropical jungle at that time.

p. 92. (Section indecipherable.)

culture are to be seen at Chichen Itza. In fact, it is by some authorities held to have been an Aztec rather than a Maya city. While the investigations of Chichen are insufficient to establish beyond question any important facts as to its history, students have reached the conclusion that it had its origin as a settlement of Maya people in the early centuries of the Christian era, and that the place is celebrated - due largely to the deadly fevers for which [the city] named - No excavations of any - importance have been carried on there,

Uxmal and Chichen Itza are poor in hieroglyphic inscriptions. Nowhere, however, has more beautiful sculpture in the round been found than at Uxmal. It is less known than any of the other

FIG. 22-24. PANELS FROM SCULPTURED FRIEZE BY MRS. JEAN BEMAN SMITH,
PORTRAYING SCENES FROM MAYA LIFE.

p. 95: VI: SCULPTURED FRIEZE OF ANCIENT AMERICAN LIFE

Returning to the east balcony, we may next notice the sculptured frieze which is placed above the frescoes just described, and which likewise extends around the interior of the building on three sides. This frieze is the work of Mrs. Jean Beman Smith, and is worthy of a more extended description than can here be given. It is a continuous band of sculpture in low relief. The entire length is 150 feet. The panels are each 9 feet long by 3 feet wide and are set in the wall at a height of 11 feet from the floor. The highest relief in the molding is about 2 inches. By coincidence the breadth of the frieze and the height of the relief correspond to those of the Parthenon frieze. The number of figures is about 150. There is no repetition, and all of the ornament, dress, and architectural design are purely Maya. The character and style of the work is also largely that of the ancient artists.

We may begin with the panel at the north end of the east gallery, and as with the frescoes, follow around the interior from left to right. The first panel (fig. 23), entitled The Sculptors, shows a scene of ancient activity, such as might have attended the building of Copan or Quirigua, namely, that of decorating one of the huge monoliths to be set up in the Plaza.

The second, The Builders, (fig. 24), represents the construction of a temple under the direction of a priestly figure. Here may be seen the stone cutters, naked save for their square aprons, wielding their stone hammers, chisels, and other implements. < ilicr toilers with carrying bands around their foreheads and over their shoulders are bringing the finished blocks to the builders of the wall.

In the third panel is shown the serpent dance, comparable in arrangement and action to what may be witnessed every summer among the Hopi Indians of our Southwest. It is noticeable that the serpent and bird symbolism of the Cliff Dwellers

are here developed into the gorgeous feathered serpent designs of the Maya columns and altar-pieces.

In the fourth panel is seen the transportation of a huge monolith through the tropical forest to the river where, after being loaded upon boats and transported to the city, the sculptors will decorate it and a multitude of workmen will erect it in the Plaza. The last panel on this side (fig. 22) shows The Quarrymen at work removing a block that has been detached from a ledge preparatory to hauling it, upon rollers, down the inclined highway to the river.

On the south gallery the first panel shows the entrance to a temple of Copan. About the doorway is an elaborate mosaic with symbolic serpents intertwined. The priest and assistants officiate before an altar in the background from which rise the sacred fires. In the foreground the altar receives the offerings of the people. A priestess, in rich costume, with netted skirt and ceremonial headdress, officiates, as musicians pass about the altar in procession. The theme of this panel, namely, a Ceremony of Dedication, is beautifully developed in the luxury and splendor of decoration, elaborately carved figures and hieroglyphics, and the activities of the participants.

The companion panel to the right (fig. 25) represents a Ceremony of (p. 96) Divination. It shows priests and people in ceremonial grouping before a monument which has just been erected. Incense issues from the sacred pipe and floats to the six directions. In the great portal is a priestess in flowing headdress.

Passing to the west gallery we see the most dramatic theme that Mrs. Smith has chosen for her expression of Maya activities. It is the Sacrifice of the Virgins. It is developed in three panels entitled The Procession (fig. 26), the Sacrifice, and the Return of the Oracle (fig. 27). The tradition on which it is based is set forth in the ancient chronicles. It was a propitiatory sacrifice of virgins to the rain gods in time of drought. The maidens prepared for the sacrifice are seen in the first panel proceeding along the paved causeway to the altar upon the brink of the cenote of Sacrifice. From here at daybreak occurred the plunge into the water of the Holy Well, from 70 to 100 feet below. If perchance, a maiden survived this plunge, she might be rescued at midday, after which the artist conceives her to have been accepted as an oracle. In the third panel is seen the Return of the Oracle, her approach to the altar in the form of a cross, upon the top of which, as in the Cross of Palenque, is seen the sacred Quetzal, and before which is seated the lord of the city upon his tiger-headed throne. The story of this sacrifice is quaintly told in a letter written by three of the original conquistadores of Yucatan in response to a circular sent out by the Council of the Indies in 1579 asking for information about the discovery and conquest of the country and the native inhabitants.

The next two panels depict the ceremonial ball game known to the Aztecs as tlachtli. It was described by Herrera as one of the diversions of Montezuma and his court, but doubtless was little understood by those early observers. The presence of the ball court at Chichen [tza ainl Uxmal is an evidence of a strong development of Aztec culture in northern Yucatan.

The first panel represents the assemblage of the spectators upon the great walls of the ball court. An Indian maiden bears the ball, which, according to the account of the chronicler, was "made of the gum of a tree that grows in hot countries, which having holes made in it distils great white drops which soon harden and being worked and moulded together turn as black as pitch." The second panel shows the game in progress. The ball was struck with any part of the body and sometimes it was necessary that it should rebound from the hip upon which was fastened a piece of stiff leather. The successful players were rewarded with loads of mantles and sometimes with gold and feather-work. The ball had to be cast through a hole in a great round stone fixed upon the wall of the court at a considerable height from the floor. Whoever succeeded in this remarkable feat, which rarely happened, was entitled to the mantles of all the spectators.

VII: OTHER REPLICAS AND RECONSTRUCTIONS

Upon the balconies are replicas of some other monuments of Quirigua. The one standing upon the south balcony belongs to an early period of Maya sculpture. The monument is double-figured, the one on the south side being badly defaced, evidently by the falling of a tree which has shaved off the principal features. The figure on the north is well preserved, and is one of the strongest examples at Quirigua. The monument is at the north end of the Plaza. Both figures are bearded. The one on the north side holds a scepter in the left hand and the right bears a tasseled shield. On the narrow sides are hieroglyphic inscriptions in the best style of glyph carving that has been found.

FIG. 28 ALTAR-PIECE OF ZAPOTE WOOD. TIKAL.

p. 99: On the west wall of the south balcony is in some ways the most remarkable specimen of Maya art that has been chosen to illustrate the aesthetic achievements of these extraordinary people. It is a replica of a famous wood carving (fig. 28), an altar panel of zapote wood, sculptured in low relief, from the Temple of the Sun at Tikal, Department of Peten, Guatemala. The design is exceptionally elaborate and in execution is not excelled by any similar work in America.

The subject is a richly costumed personage, holding a standard or baton in his right hand, his face framed in the open mouth of a grotesque monster. He is enclosed beneath the arched body of a feathered serpent of extraordinary design, the head appearing at the left. Perched on the serpent arch above is the figure of a mythical bird-monster, probably representing some important deity of the Maya pantheon. Hieroglyphic inscriptions occur at several points. Note especially the two exquisite portrait faces in the lower right-hand part. The original of this specimen is now preserved in the Museum at Basel, Switzerland.

The examples taken to show the greatest achievements of the Central American people in architecture are placed upon the east and west balconies. The first to be described is the one on the east side. It is called El Castillo (fig. 29), or as the writer prefers to name it, the Temple of Sacrifice. The structure is in the main well preserved, minor restorations being required at several points, but not involving the introduction of any feature not reasonably well verified. The pyramid is approximately 190 by 230 feet at the base, 80 feet in height, and about 60 feet square at the summit. In design and execution this structure is of exceptionally high order, indicating great progress in architecture. It has four grand stairways, each about 30 feet in width and bordered by balustrades, those on the north side (front) terminating at the base in two great serpent heads about 10 feet in length, each carved from a single block of limestone. The pyramid is built of coarse rubble, cemented and faced with blocks of hewn limestone, neatly dressed and tastefully panelled.

The temple which surmounts the pyramid is about 44 by 48 feet at the base and 24 feet in height. It is well preserved save that a portion of the facade has fallen as the result of the decay of the wooden lintels which spanned the wide doorway. The walls and roofs are four feet or more in thickness, and the stones of the facing were so well cut and fitted as to require little mortar.

As usual in Yucatan buildings, the exterior walls of the lower story are quite plain and are separated by a heavy molding from the upper story which is ornamented with panels and surmounted by a cornice. In this case the cornice was, according to Maudslay, crowned by a coping of open fretwork of exceptional beauty. The lower story is pierced by four doorways, that on the north wing being 21 feet wide and 8 feet 6 inches high, divided by two great stone columns. These support the wooden lintels and are carved to represent the feathered serpent divinity of Yucatan mythology. Passing into the outer chamber or vestibule between these columns and through a second doorway, the visitor enters a large chamber spanned by two high pointed arches, the separating walls being replaced by two square sculptured columns. This chamber was doubtless a sanctuary and served some important purpose in the religious rites of the people.

(p.100) The model was built under the direction of Wm. H. Holmes of the U. S. National Museum.

The final example of architecture presented and the one which may be said to represent the last word in the building art in Ancient America has been placed on the west balcony (fig. 30). The great building here shown is called . . . debris. The upper terrace, shown in the model, is 20 feet in height, and is ascended by a stairway of 30 steps, 120 feet long. The main terrace is about 20 feet in height, and is so extensive, covering several acres, that it could not be shown in the model. The foundation platform is only a few feet in height. The building proper is a massive rectangular

Reconstruction by W. H. Holmes.

FIG. 29 THE TEMPLE OF SACRIFICE, CHICHEN ITZA.

"The Palace" or "House of the Governor," and is one of the chief structures in the ruined city of Uxmal. The age of the city is not known, but the building is still well preserved, and but little restoration was necessary in completing the model. It is built of hewn limestone and is 320 feet long, 40 feet wide, and 28 feet high. It rests on a triple terraced pyramid, now almost wholly buried in structure with vertical walls, perforated by eleven rectangular doorways on the front, and a doorway at each end. It is pierced also by two pointed archways, 24 feet in height, passing entirely through the building. These arches are walled up and divided into chambers. In the model one is closed and the other is left open to show the construction. The building is exceedingly massive, about (p.101) one-half of the entire hulk being solid masonry. The walls, faced with cut stone and with rubble filling, are from three to five feet thick, excepting the hack wall which is nine feet thick. There are no windows or roof openings, and the hack rooms are necessarily very dark. The chambers are spanned by high pointed arches faced with hewn stone, the insloping ceiling wall being connected by elaborately costumed human figures, grotesque masks, and geometric fretwork, the whole including not fewer than ten thousand hewn stones, separately carved and laid in mortar against the concrete filling of the wall, forming a great mosaic. The use to which the building was devoted is not known. Since it appears to have been in many respects the most prominent structure in the city, it was

Reconstruction by W. H. Holmes.

FIG. 30 THE PALACE, UXMAL

flat capstones. The lower half of the wall, fourteen feet in height, is plain and contains the doorways, nine feet high, which were spanned originally by wooden lintels now entirely rotted away. The upper wall-zone, fourteen feet in height, is separated from the lower by a heavy molding and surmounted by a wide cornice. The intervening space is richly decorated with sculptures consisting of probably occupied by dignitaries of the priestly establishment. The model was constructed under the supervision of Mr. Wm. H. Holmes.

The work prepared to finish the picture of Ancient America presented in the California Building is a rectangular panel by Mrs. Smith, finished but not yet cast and set in place. It is called The Spirit of the Past (fig. 31). This (p.102) panel is of great size, requiring the entire space of twelve feet square below the large cathedral window. The theme is developed by means of a shrouded, brooding figure, looking out across the ruins of contemporary civilizations – the Maya, Greek, Egyptian – the spirit that has witnessed the growth, decline, and death of the great nations of the world, that has been cognizant of all the forces that have shaped human events, and that the artist conceives as eternally brooding over the affairs of man, from nation to nation and from age to age through all the cycles of time. The inscription for this panel, from the writings of Charles Kingsley, is an appropriate thought to place at the end of the archaeological exhibit : So fleet the works of men back to their earth again, Ancient and holy things fade like a dream.

Bj Mrs. Jean Herman Smith.
FIG. 31 "THE SPIRIT OF THE PAST"— SCULPTURED PANEL.

Primitive Arts and Industries

In the preparation of the exhibits at the Panama-California Exposition relating to the culture history of the native American race, and the division devoted to Ancient America, Director Hewett was in personal charge throughout. The foundation for the culture history exhibit was laid by the preparation, under the personal supervision of Mr. W. H. Holmes, of a series of groups illustrating, by means of lay-figures, such important steps in the beginning of native American culture as the manufacture of stone implements, the working of ancient soapstone quarries of Catalina Island (fig. 1), the prehistoric obsidian workers of California, the beginnings of sculpture among the ancient Mexicans, primitive copper mining on Isle Royale, Lake Superior, and prehistoric iron mining in the state of Missouri. This valuable exhibit was further extended to embrace collections representing the evolution of the stone art from its simplest forms to the highest achievements of the shaping of stone and the manipulations of metal.

A series of village group models, illustrating houses and house life in the most important culture areas from Greenland and Alaska to Patagonia were prepared under the direction of Dr. Walter Hough of the U. S. National Museum. Like the series just described representing the evolution of art in stone, this has proven to be of exceptional educational value.

Reproductions of the House Life of American Indians

Field work extending over a period of three years carried on by Mr. John P. Harrington of the School of American Archaeology has resulted in the preparation and installation in the Indian Arts Building of important exhibits reproducing the houses and house life of the Mohave Indians of the Colorado basin and of the coast and island peoples of California. These reproductions are accurate in every detail and invaluable in preserving phases of native material culture which must in their normal habitat soon completely disappear.

The Painted Desert

Through the munificent generosity of the Santa Fe Railway Company, it became feasible to construct a full sized replica of a typical Indian pueblo (fig. 5), and to fill it with representatives of living tribes, the Pueblo, Navaho, Apache, and Havasupai, engaged in their customary occupations. This exhibit has proved to be one of the most attractive and important features of the Exposition, and is credited to the genius of Mr. Jesse L. Nusbaum, of the School of American Archaeology. The extent of the work, the accuracy of the reproduction of the rocky site and the complete-ness of every detail of arrangement and construction places this exhibit on a plane of achievement far above anything of the kind ever undertaken. It is indeed a masterpiece.

pp.103-104

Exhibit of the State of New Mexico

New Mexico stands foremost among the states of the Union in recognizing the value of its antiquities and making them an asset in the welfare and development of the state. The extensive collections brought together in the state building comprise archaeological and ethnological models prepared by Mr. Percy Adams of the School of American Archaeology at Santa Fe, besides extensive series of specimens, photographs, transparencies, and many other exhibits illustrating the history, archaeology and ethnology of New Mexico. The building (fig. 6) in the archaic mission style of the Rio Grande Pueblos, antedating the oldest California missions by a century and a half, is one of the most effective in the Exposition city. A replica of this structure will be erected in Santa Fe at a cost of sixty thousand dollars on a site donated by the people of that city, contiguous to the ancient Palace of the Governors, as an addition to the Museum of American Archaeology.

Physical Anthropology

The highly elaborated exhibit illustrating the physical history and relative status of the races of man occupies, with the laboratory pertaining to it, five rooms in the Science and Education Building. It was prepared and installed by Dr. Ales Hrdlicka of the United States National Museum, who, with the sanction of the Secretary of the Smithsonian Institution, undertook the arduous task of collecting the material from many sources near and remote. After close observation of the attention paid to this exhibit by the general public and by scholarly visitors from many countries, the Director of Exhibits expresses the view that among existing exhibits within this important field of research it is without a rival and constitutes a distinct and eminent achievement in science.

A Permanent Museum at San Diego

There has been formed recently by disposal of the Museum by the City leading citizens of San Diego a Museum Park Board, and that the Exposition Association, which has for its object stockholders may turn over the valuable development and maintenance of a permanent collections to the Museum, public museum for the city. After the as contemplated in the original plans close of the Exposition it is hoped that agreed upon by the officers of the Exposition adequate buildings will be placed at the site and the Institute. The *International Congress of Americanists* the meeting of the International hold a joint session with the Americanists

November, 1915, The California Garden, Vol. 7, No. 5. Monthly Excursion Through Exposition Grounds by G. R. Gorton

It is probably safe to say that more than half of the visitors to the Exposition fail to see and, therefore, to enjoy what is considered by the other half to be one of the most delightful spots on the grounds. This portion of the Exposition, called the Pepper Grove, consists of possibly ten or twelve acres of charm.

Two giant urns bearing aloft as many rather tired looking Bougainvillea guard the entrance to the walk which, after wandering along the edge of Spanish Canyon for a few hundred yards, eventually passes under a tiny pergola west of the Exposition hospital and enters a *Veronica*-bordered path into the Pepper Grove. (The smaller-leaved *Veronica* forming the border proper is the variety Purple Queen: the large leaved one, scattered here and there along the walk and bearing the almost red flowers is *Veronica speciosa* var. *Imperialis*. The botany of these is a little mixed, but the above classification is quite generally accepted.

Turning to the right soon after entering the grove, the border changes to *Mesembryanthemum floribundum*, the small-leaved, magenta-flowered species which is so satisfactory under terraces and banks generally, besides its usefulness as an edging plant. Under the trees on the left the Mediterranean heath (*Erica Mediterranea*) furnishes a dense undergrowth, in some cases four or five feet in height. A few steps further brings one to a pergola or outlook which commands a magnificent view back towards the Exposition buildings and of the city and bay to the southwest. *Campsidium valdivanum* and Tecoma Queen of Sheba adorn this structure.

Everywhere through the grove one encounters the Brazilian Pepper (*Dchinus terebinthifolius*), bearing coarser and heavier leaves, but very attractive in foliage and habit. It is also a little later, apparently in coming into berry, as it is just now beginning to bring forth its clusters of decorative fruits. Various shrubs and vines have been used as a ground cover underneath the trees, mainly by way of naturalizing. English ivy is used extensively, and has been permitted to clothe the bare trunks of the eucalyptus trees in the south end of the grove. Someday, if we are not careful, their clothes will be the undoing of the Eucalyptus (as is sometimes the case with people) as in time the Ivy will probably kill the trees if permitted to obtain too much of a hold thereon. The Wire Vine or Maiden Hair Vine --- both names are descriptive --- and *Vinca major*, a more robust type of the old-fashioned Periwinkle --- often bearing the much misused name of Myrtle, which it is not, serve equally well for the desired purpose. There is a hillside at the western extremity of the grove which is covered with Pink Cherokees, a very realistic piece of naturalizing, suggesting the wild roses which some of us remember seeing "Back East." The Potato Vine, *Solanum jasminoides*, has in a number of instances ascended to the treetops there to spread out a canopy of snowy white bloom. It bids fair, however, to make a better showing a little later on. *Jasminum humile*, and *Carissa edulis* (or *grandiflora*, as you prefer) are among the shrubs forming a thicket under the trees. The latter is the Natal Plum, a leathery-leaved, spiny shrub which bears small white flowers, very fragrant with the perfume of orange blossoms. These are followed by fruits about the size of cherries, red and edible.

About this time the visitor is probably lost in the maze of paths which seem to lead nowhere, but they all have a destination and, if one stays with any one of them long enough, he will come out all right.

There is much to interest the children as well as the grownups. For instance, the American Playground Device of Anderson, Ind., maintains an exhibit of their playground apparatus and, of course, being an exhibit, it contains the last word in such equipment --- the most up-to-the-minute swings, slides, maypoles, etc.

There are picnic tables for those who care to use them, and sometimes a bright colored pheasant will come up, looking as sociable as he can, in the hope that he will be invited to luncheon. Many pheasants in many varieties roam at will throughout the Pepper Grove, but only the Silver Pheasants are tame enough to come near to be fed. The Golden, Lady Amherst and Reeves varieties are very gaily colored, but keep pretty much under cover, so that a fleeting glimpse is about all that may be expected. The Peafowl are quite tame and quite gorgeous in plumage. On the east side of the grove are some pure white Fantail pigeons confined in a fly until the learn where they belong, when they also will be released. In passing, it might be well to mention that near this fly is a group of the rather rare *Eucalyptus globulus* var. *compacta*, which being interpreted, means a compact bushy variety of the well-know blue gums --- the compact part being the reason for calling it rare.

For the children there are Guinea pigs --- the angora kind --- quaint little animals, some light buff and white, some decided brunettes. Your small children will caution you not to pick them up by their tails as the eyes will drop out, and then mention the fact that they haven't any tails.

Sometime ago Mr. Robinson presented the Exposition with a dozen Jungle Fowl, six gentlemen and five ladies. There are now seventy or more of these tiny fowl, scattered about the grounds. Because of their usefulness in destroying insects without destroying the plants which the insects are infesting, their popularity with the gardeners is in its ascendancy, and the poultry nursery in the Pepper Grove is swamped with requests for these fowl, the requests emanating from the various districts which as yet have not been equipped with the official insect ridders.

In the aforementioned nursery a diminutive Buff Cochon Bantam is mothering a flock of baby chicks, crosses between her kind and the Jungle Fowl. What they will look like when they are grown is a matter of much conjecture.

South and east of the Utah Building and covering several acres with fragrant bloom is what is known as the "Potpourri Rose Garden." This is largely a commercial enterprise, promulgated and carried to its present state (it is not yet complete) by the energy and perseverance of "The Rose Lady," as the proprietor is called. She says that she has constructed her garden and built up the business which is its principal reason

for being on a capital composed of 99 percent faith and 1 percent of real money, which is one way of saying that she has been ever oppressed by the bugbear of lack of adequate finances, and the garden has had to do without such necessities as fertilizers, etc., but a start has been made notwithstanding.

There are nearly 10,000 plants in about 50 varieties, many of which are as yet small, but show promise of a fine effect later on. There is a very thrifty bed of Cecile Brunner, covered with a mass of its dainty bloom, which is particularly attractive right now. On a little arbor nearby Climbing Testouts are planted, which have made a remarkably rapid growth so far, and already show considerable bloom. Several months' growth is needed before the arbor is completely covered, and then it will furnish a most inviting retreat in which the Exposition weary may rest and breathe the fragrance of the roses.

As has been previously stated, one of the objects of the rose garden is commercial --- namely the manufacture of an article known as "potpourri." Trusting that the ignorance of the reader on the subject of potpourri is not as abysmal a depth as that of ye scribe some months ago, when he thought that potpourri was something to eat --- possibly something Hungarian --- and had not the remotest idea how it was pronounced, a word of explanation might not, however, be out of place. Potpourri is pronounced "po-poo-ree," and means a blend of mixture --- sometimes of perfumes, sometimes of music or whatever it happens to be; in this case a blend of odors since many different flowers and aromatic leaves are used in its manufacture. Rose petals, orange blossoms, the old-fashioned lavender, tuberose, mignonette, lemon, verbenas and many others, even a pinch of the humble rose geranium --- all are utilized in the production of a bouquet of odors which is prepared according to an old colonial formula, although the use of potpourri antedates colonial days by many generations or even centuries --- it is difficult to say how many. The perfume of the various flowers is retained and perpetuated with assistance from oils and extracts, and is very pleasing.

One of the many slanders on this fair land of California is that our roses are lacking, either partly or altogether, in fragrance as compared with those of the effete east. There are several thousand answers to this allegation in the form of as many Kaiserin, LaFrance, Prima Conna, General McArthur, My Maryland, Testouts and Grussun Teplitz --- this last numbering upwards of 1,000 roses per day which could be used for their fragrance.

The garden contains other meritorious sorts, some of which are grown principally for their decorative value, rather than for their fragrance, notably the charming Souv. de Guillard. This is a new hybrid tea, which was awarded the Grand Prize at the Bagatelle Gardens at Paris for the best French rose. This was in competition with stock from the best French growers. The color is described as being a "beautiful saffron, shaded with coppery carmine."

There are many other sorts which would seem to be worthy of trial in our California gardens, and in this connection the idea of adding the growing of flowers for the manufacture of potpourri to the list of our infant industries here in Southern California ought to appeal to someone.

November 1, 1915, San Diego Sun, 12:3. Saturday afternoon girls from San Diego High School swimming club, Los Angeles and beach clubs will compete for cuts at a diving contest in the canal locks at the Panama Canal Extravaganza.

Auto Festival at Exposition November 25, 26 and 27; arrangement underway to celebrate completion of coast state highway between San Diego and Los Angeles; 500 machines will make run sponsored by Automobile Club of Southern California; Automobile Day, Saturday, November 27, will end with an open-air motor ball in Plaza de Panama.

November 3, 1915, San Diego Union, 8:1. San Diego girls to sing, dance with Kilties; bare-kneed bandsmen will make last San Diego appearance tonight.

As an added feature of the concert by the Kilties band at the Panama-California Exposition Miss Jean Davidson will give an exhibition of the sailor's hornpipe dance in kilties at the band's last San Diego appearance tonight. Miss Jean Souter, a San Diego soloist, will give several Scotch songs. The appearance of the San Diegans was arranged by Secretary Lawrence of the Caledonian Society.

November 3, 1915, San Diego Union, 14:3. B. H. Burrell, Colonel Ed Fletcher, W. B. Gross and Wilbur Hall left yesterday morning for Washington, D.C. via automobile; will investigate southern route.

November 4, 1915, San Diego Herald, 1:6. Exposition Notes

Twelve thousand San Diego school children showered Thomas A. Edison with flowers and built a bower of blooms about and above him on the occasion of Edison day at the San Diego Exposition, marking the greatest child tribute to any exposition visitor with the possible exception of Madame Ernestine Schumann-Heink.

The beautiful tribute came as a climax to a succession of smaller similar demonstrations paid by the school children of towns along the Pacific coast highway through which the Wizard of Menlo Park traveled by automobile from Los Angeles to San Diego. The noted inventor and chairman of the new naval advisory board was greatly affected.

Closely following the motor car which brought Edison and his party into San Diego was another bearing Henry Ford, Detroit automobile builder and member of the naval advisory board, and Ford shared largely in the demonstration given Edison.

Full military escort honors were paid both Edison and Ford by virtue of their new positions as members of the naval advisory board, under authorization of General George Burnett, commanding officer of the United States Marine Corps at Washington, who advised the commanding officer of the marines here to pay every possible courtesy. The newness of the naval advisory board, and lack of precedent, had caused the local commander to ask for instructions.

Accordingly, a squadron of First United States cavalry met the motor cars bearing Edison and Ford in the city and escorted them to the Exposition grounds. At the entrance, a battalion of the Fourth Regiment, United States Marine Corps, relieved the cavalry and conducted the party across El Puente Cabrillo to the Plaza de Panama, led by the Marine band. The floral demonstration by school children followed on the Plaza.

"This truly is the land of flowers and sunshine and joyousness," exclaimed Mr. Edison as he stepped from the bower of flowers, the happy children had erected about him. "I can imagine no more beautiful spot than this exposition and no finer paradise in which children may play and grow that your beautiful city."

Three days time were given by both Edison and Ford to their visit in San Diego and the greater part of their time was devoted to the Exposition. Mr. Ford found peculiar attraction at the exhibit of tractors and the demonstrations there. This was explained by his statement that, in his opposition to preparedness, he plans to divert all attention possible to peaceful pursuits and influence the farmer, in particular, by

manufacturing a low-priced, economical farm tractor. He has directed many experiments in this direction already, he stated.

The personnel of the Edison and Ford parties included Mr. and Mrs. Thomas A. Edison, Henry Ford and son, E. D. Ford, Mr. and Mrs. D. W. Flint, Miss Grace Miller, D. Wilcox, H. S. Firestone, A. C. Miller and F. D. Fagan.

Visiting the United States aviation station near the Exposition, at which Uncle Sam is training his military aviators, Edison urged the development of an aerial battle and reconnaissance fleet equal if not greater than any European power as one of the vital units of preparedness.

November 4, 1915, San Diego Herald, 2:1. The Mayor's Blunder.

It is regrettable that Mayor Capps in his zeal for national preparedness, should forget the courtesy due an honored guest from the chief executive of the city which is entertaining that guest. Last week Thomas A. Edison, the greatest inventive genius of the age, and Henry Ford, the world's greatest humanitarian and philanthropist, visited our city. While here, these two distinguished gentlemen publicly expressed their opinions on the absorbing topic of the day --- national preparedness for war.

Edison, as he has a right to do, favors national preparedness. Ford, with equal ardor, opposes preparedness because he considers war a crime. The special privilege class, the makers of war munitions and the press generally are with Edison. The peace-loving element of the country, those who represent the real patriotism, agree with Mr. Ford. Both men are, no doubt, sincere in their belief, and both have a right to their opinion regardless of which the future may prove to be in error.

Mayor Capps believes in preparedness, which is his right, and he denounces those who believe otherwise, which is not his right. The mayor in an interview in an evening paper, accuses Ford of treason, and spoke of him disparagingly. He said:

"The only real road to peace is a fourteen-inch gun. The best place I know of to sign enduring peace contracts and peace treaties in is the shadow of the most vicious-looking cannon. I see in the morning papers that Henry Ford made another absurd plea for what he calls peace up at the Exposition Friday. Such talk makes my blood boil. HENRY FORD MAY KNOW ALL ABOUT A FLIVER CAR, BUT WHAT DOES HE KNOW ABOUT WAR OR THE NECESSITY OF PREPAREDNESS FOR WAR? Absolutely nothing!"

The mayor has just as much right to believe in preparedness for war as Mr. Ford has to the contrary opinion. However, he had no right to belittle a prominent and patriotic citizen because he differs with him, and particularly is it in bad taste for the mayor to make such criticism while the man criticized is an honored guest of the city.

Of course, it is possible that the newspaper, for sensational reasons, misquoted the mayor, but in the absence of denial on the part of the mayor, we have to accept it as the act of the mayor, which is almost unpardonable. No doubt the great, generous-hearted Mr. Ford will pardon the mayor's indiscretion, even if the people do not. But, why did the mayor make such a break?

Mayor Capps is an engineer, so is Mr. Ford, but their fields do not conflict so it cannot be rivalry, although it may be envy. Capps has invented a great gun, or one he thinks is. Perhaps too much peace talk will make all guns useless. It is possible that the mayor in his intense patriotism and enthusiasm forgot the courtesy due a guest or he may have thought he was a greater man than Ford, or it may have been just ignorance. At any rate the people feel humiliated and think the mayor blundered.

On behalf of the people of San Diego, many of whom differ with Mr. Ford on preparedness, the **Herald** tenders to Mr. Ford an humble apology which it feels due a guest particularly so prominent and distinguished a gone, for the indiscretion of the mayor.

November 4, 1915, San Diego Sun, 1:5. Liberty Bell comes on November 13; great demonstration is planned.

November 4, 1915, San Diego Sun, 2:4. Housewives competition at Exposition last Saturday, October 30, netted \$260 for the Associated Charities through the sale of goods.

November 4, 1915, San Diego Sun, 5:5. Kilties secured for three more days of concerts, November 4, 5 and 6.

November 4, 1915, San Diego Union, 3:2-4. Bicycle driver risks life to provide thrills at Exposition; leaps from bicycle into tank of water; also leaps into a tank of flaming gasoline.

November 4, 1915, San Diego Union, 6:4. Liberty Bell to arrive November 12.

November 4, 1915, San Diego Union, 6:6. Kilties will remain at Fair for rest of week.

November 4, 1915, San Diego Union, 14:4. Miss Effie Stewart, soprano, gave recital Tuesday afternoon with Doctor Stewart; will sing again today.

November 5, 1915, San Diego Sun, 9:3. Constantino, famous tenor, coming to Exposition again next Thursday afternoon; Canadian Day is planned tomorrow; Colonel William Hutchinson, Canadian exposition commissioner, here to look over Exposition.

November 5, 1915, San Diego Union, 7:1. Celebration plans for Liberty Bell visit completed; U.S. Senator, Lieutenant Governor of Pennsylvania, Mayor of Philadelphia due; relic will be guarded; soldiers to keep souvenir hunters away; three festival days picked.

November 5, 1915, San Diego Union, 7:3. Ripe navel oranges on exhibition at Fair; Sacramento Valley furnishes fruit earlier than any other part of state..

November 5, 1915, San Diego Union, II, 1:3. Movement to keep Fair open during 1916; Los Angeles pledges \$150,000 to fund.

November 6, 1915, San Diego Sun, 6:2. Two thousand entries have been made for Children's Fair which will open at Exposition, Friday, November 12, Parent Teachers' Day; to be held in Commerce and Industries building; children's pageant will move through the streets at 2 p.m., Friday; 25 Exposition electricettes will be decorated by youthful fingers; every school in city will be represented by an electricette. (See also San Diego Sun, November 9, 1915, 5:3 and November 10, 1915, 8:1.)

November 6, 1915, San Diego Union, 1:4-5. \$75,000 raised for 1916 Fair in Los Angeles.

November 6, 1915, San Diego Union, 1:6. In honor of Colonel William Hutchinson, Canadian exposition commissioner, today will be Canadian Day at the Exposition; Kilties will give three concerts.

November 6, 1915, San Diego Union, 3:4. A party of nine Japanese newspapermen visit San Diego Exposition; entertained by Shiro Watanabe, principal Japanese concessionaire at Fair.

November 6, 1915, San Diego Union, 6:2-3. Girl's and men's diving contests today's attraction at Isthmus.

November 6, 1915, San Diego Union, 14:2. Alamedans lured Fairward today; \$1,500 worth of manufactured goods to be distributed.

November 7, 1915, San Diego Union, 1:3. Funds for 1916 Fair raised; jubilee held; L. A. boosters complete campaign to get \$75,000 cash; all but \$15,000 of similar guarantee already assured; San Diego Exposition president congratulates committee, cooperation means greater Southwest.

November 7, 1915, San Diego Union, 8:3. Alameda triumph at Exposition celebrated; 250 northerners attend.

November 8, 1915, San Diego Sun, 1:8. Approximately seven thousand teachers of Southern California and friends flock to Exposition; will be here all week.

November 9, 1915, San Diego Sun, 1:4-5. **Sun** urges readers to vote for Liberty Bell queen by sending in voting coupon; write in name of any girl attending a public or private school in San Diego County; coupon good for 100 votes.

November 10, 1915, San Diego Sun, 13:6. Mayor Capps tells of people who have never seen Exposition because they are too poor; suggests Cabrillo Canyon gate should be kept open on San Diego Day; says people holding annual passes could pay on this one day to make up costs.

November 10, 1915, San Diego Union, 1:4-5. Convention of California Teachers' Association to hold first session today at Spreckels music pavilion.

November 10, 1915, San Diego Union, 12:1-2. Shriners to thrill thousands today; spectacular flame battle at stadium will be feature tonight.

November 10, 1915, San Diego Union, 13:3-4. Miss Katherine Stinson, school girl aviator, will perform feats of aerial gymnastics at Exposition November 20.

November 10, 1915, San Diego Union, 18:2. Marguerite Buckler Stevenson, soprano, and Florencio Constantino, tenor, to give concert at Exposition tomorrow afternoon.

November 11, 1915, San Diego Sun, 1:6, 3:3. Liberty Bell due tomorrow for stay of three days; arrives at Santa Fe station at 6 a.m. and at Exposition at 7 a.m.; will be placed in north section of Plaza de Panama; Saturday is Liberty Bell Day; exercises on steps of Sacramento Valley building; at 8:30 a.m. tomorrow bells and whistles all over the city will sound for five minutes; school children to be admitted free at west gate tomorrow between 1 and 2; at 2:45 coronation of **Sun's** Liberty Bell queen will take place on steps of Sacramento Valley building followed by program of patriotic music and addresses; four detachments of marines to take charge of Liberty Bell.

November 11, 1915, San Diego Sun, 7:1-2. Children's Fair, the first to be held in any Exposition, will present in its array of exhibits a comprehensive idea of the after-school work of boys and girls from kindergarten to high school. It will be an exhibit of their handicraft in agriculture, arts and sciences. It will also display their inventive genius, for they will show present-day toys of their own making. Of the 2,700 entries, 320 exhibits are pets, 85 floral, 53 collections of stamps, coins, etc., 250 woodwork, 325 domestic science and domestic art; 300 toys, 50 mechanical and electrical appliances and 400 arts and crafts.

Exhibits in public service hall of Commerce and Industries building; pets in the Oriental Joy Gardens on the Isthmus. Children will receive prizes donated by merchants.

Tomorrow, an automobile parade of Parent Teachers' Association from State and Broadway to Exposition; children's pageant on Exposition grounds at 2 p.m.; music by Florence school orchestra at organ pavilion and songs by High School glee club at 3 p.m.; address by H. J. Francis, superintendent of schools of Los Angeles; music by Brooklyn school orchestra; a number by the Ukulele Club of the High School; address by Will C. Wood, commissioner of secondary education of California.

November 11, 1915, San Diego Sun, 9:4. Los Angeles representatives named to Board of Directors of Panama-California International Exposition.

November 11, 1915, San Diego Union, 1:3. 2,500 school children form living flag in afternoon; Shriners' charity carnival draws throngs to stadium; performances in afternoon and evening.

November 11, 1915, San Diego Union, 2:1-2. Teachers praise stadium; delegates attend Shriners' charity carnival.

November 11, 1915, San Diego Union, 9:1. Nine Los Angeles men on 1916 Fair board.

November 12, 1915, San Diego Sun, 1:1-3. Liberty Bell comes for visit here; Miss Jeanette Steibel, 16 years of age, chosen as **Sun's** Liberty Bell queen in county-wide contest; pupil at Washington school received 460,000 votes.

November 12, 1915, San Diego Sun, 1:4. Local divorce court granted Mrs. Ella Collier final decree of divorce today; temporary order of payment of \$100 each month for the support and education of the children of the marriage was made permanent until children are 21 years of age.

November 12, 1915, San Diego Sun, 8:4. Some employers to give employees half-holiday will full pay and the present of a ticket to the San Diego doings at the Exposition; Turner teams of boys, girls, men and women to stage an hour's show for the entertainment of San Diego crowds on Plaza de Panama next Wednesday; fraternal drill teams, companies of marines and coast artillery planning to participate in parades and drills on the Plaza; Senor Jose Amable and his Spanish señoritas and troubadours will return to Exposition for San Diego Day; Shriners to visit Exposition November 20.

November 12, 1915, San Diego Union, 1:3-5. Liberty Bell due at 1 p.m.; San Diegans to pay homage tomorrow; children will honor relic.

November 12, 1915, San Diego Union, 5:3. Ten thousand hear Constantino sing in concert at Exposition; strong breeze handicap; singers recalled many times, by W. W. B. Seymour.

November 12, 1915, San Diego Union, 8:2-3. Veil to lift on Children's Fair today; lads, lassies eager to display handiwork; juvenile event will begin with parade of decorated automobiles; pageant scheduled in afternoon; variety of exhibits entered.

November 12, 1915, San Diego Union, 8:6. Doctor Richard D. Hollington will speak on "Liberty Bell Story" at the New Mexico building tonight.

November 13, 1915, San Diego Sun, 1:3, 2:5. Great din is welcome for Liberty Bell, whistles and bells all over city sound greeting; festivities today; tomorrow at 5 p.m. U.S. Marine Corps and U.S. Cavalry military escort will escort Liberty Bell from Exposition to Santa Fe depot.

November 13, 1915, San Diego Sun, 3:1. Program for San Diego Day, next Wednesday: parade of decorated automobiles at 1:30 p.m.; concert by Raja Yoga orchestra; two baseball games; field concert by Marine Corps band; drills by fraternal organizations; concert by 13th band, Coast Artillery Corps; concerts by High School orchestra and glee club; Spanish wedding and reception; organ recital by Doctor H. J. Stewart; athletic exercises and dances by Turnverein and YMCA; floral showers from aeroplanes; carnival and banquet on the Isthmus; special music; Spanish singers and dancers and entertainers in all parts of grounds in afternoon.

November 13, 1915, San Diego Sun, 7:3. Prizes awarded at Children's Fair.

November 13, 1915, San Diego Union, 1:2-3, 3:3-5. Liberty Bell arrived at Exposition with message of patriotism; exercises for nation's freedom emblem scheduled today; 12,000 children will pay homage; speeches, songs on program; history of Liberty Bell linked with nation's life.

November 13, 1915, San Diego Union, 3:5. Los Angeles Exposition Committee settles down to canvass business interests.

The next important move will be the turning over of \$75,000 in cash which is to be used in rehabilitating the Exposition grounds and buildings for another year and for expenses incurred in securing the foreign exhibits from San Francisco.

November 13, 1915, San Diego Union, 7:2-3. Great pageant opens Children's Fair; fairies, pages, characters from fairy tales, flowers, flies, etc. passed in review before judges at the Sacramento building yesterday afternoon.

November 13, 1915, San Diego Union, 7:5. Local Typographical Union votes to furnish tickets to all members next Wednesday for San Diego Day.

November 13, 1915, San Diego Union, 14:3. Mrs. Collier won complete divorce yesterday; former husband must pay \$100 per month for support, education of sons; Colonel Collier and Miss Ruth Everson of Oakland are to be married at Oakland next Sunday.

November 14, 1915, San Diego Union, 3:1-2. Joy to reign San Diego Day when city and county hold revel.

Program San Diego Day at Exposition

Afternoon: Grand parade of decorated floats and automobiles winding about grounds

Raja Yoga College orchestra in concert at Organ Pavilion

Dress parade of United States marine battalion and marine band on Plaza de Panama

Spanish señoritas and troubadours in special entertainments in Plaza de California

Organ recital by Doctor H. J. Stewart

Burro race on Isthmus

Frolics on Isthmus, under management of San Diego Ad Club

Discovery of father of largest family

Evening: Old Spanish court wedding ceremony and reception at Organ Pavilion

San Diego Day dinner --- Cabaret, with thirty girl entertainers, and dancing in Café Cristobal

Carnival on Isthmus under auspices of San Diego Ad Club

November 14, 1915, San Diego Union, 3:3-6. Liberty Bell stirs throng, by W. C. Getty

American history was made, time was marked, when yesterday at the Plaza de Panama, the Panama-California Exposition, thousands with love of country rooted deeply in hearts turned out to do honor to that best loved of all American historical relics, the famous Liberty Bell.

Perhaps never in the history of the Liberty Bell in all its travels from time to time about the country has it occupied a position so harmoniously beautiful as that of yesterday.

It was Liberty Bell Day at the Exposition. San Diegans and their visitors were celebrating the first -- and what may be the last --- visit of the famous old relic. They had hoped for its coming for months and no festivity had awakened their slumbering patriotism as had the announcement. It was beheld in awe and wonder --- an object too sacred to touch.

"Bells mean much to California for mission bells were identified with early California history. They have learned to love these old bells because of the place they occupy in the early days of the padres. Perhaps it was because of this that the Liberty Bell seemed to mean more to them than it had to residents in other places," said a prominent Exposition official. "Visiting members are quick to realize and speak of the sincerity of the welcome of San Diegans."

Banked in flowers brought by hundreds of school children, thousands of the blossoms having been picked by childish hands, augmented by beautiful floral offerings by the San Diego park board and individuals, the old bell stood on its platform, the center of thousands of reverent eyes.

When those who chronicle the journeys of the bell will have written its history in 1915, San Diego and the Panama-California Exposition will be an important part of the story, for visitors of yesterday who came with the bell searched their vocabulary for appropriate words to describe the scene. "It is the most exquisitely harmonious setting, the most gorgeous and beautiful environment it has every been my pleasure to be a part of," said Boies Penrose, United States senator from Pennsylvania, whose admiration and enthusiasm for the Exposition was unrestrained.

Davidson Voices Pride

Thousands of school children opened the exercises when they passed through the Laurel Street entrance to the Plaza and deposited their floral offerings, which were banked high about the bell. It was a ceremony as pretty as it was inspiring. Bystanders lifted some of the smaller ones that they might get a better view of the bell and every flower dropped was quickly gathered up and placed on the platform.

It was a never-to-be-forgotten incident in the lives of the children and in years to come events will be measured by the date of the Liberty Bell at San Diego. Men and women, now children, will tell their children and their children's children of the time at San Diego when they were part of the Liberty Bell celebration.

Speakers vied with one another to emit the most patriotic utterances. And the particular crowd in attendance needed only the slightest word to touch off their enthusiasm in ringing cheers. Every patriotic outburst was the signal for applause.

President G. A. Davidson was the first speaker. He said:

"The Panama-California Exposition has had the honor of greeting many distinguished guests during this our Exposition year, men representing the great commercial, intellectual and political interests of America, men standing high in the civic life of state and nation, men giving voice to words of business, wisdom, intellectual advancement and national patriotism, all of whom we have considered it a privilege to welcome, but today we are accorded an honor little dreamed of when we opened the gates of this Exposition and we are proud indeed to welcome that grand old relic that proclaimed America's independence, that grand old relic that made possible that splendid citizenship that we have been heretofore permitted to greet and whose sentiments we have been allowed to listen to --- the Liberty Bell.

"We also are permitted to greet and extend a hearty welcome and express out thanks to that splendid body of men of Philadelphia who accompany the bell and made possible its presence here today. We welcome the prominent men of the grand old state of Pennsylvania and are glad of this opportunity of having them presented to you. Truly it is a great day for the Panama-California Exposition.

Marston Speaks

"It is my pleasure to present to you the chairman of the day, a distinguished citizen of San Diego and past president of the San Diego chapter of the Sons of the American Revolution, Mr. George W. Marston."

George W. Marston, who acted as chairman of the meeting, said:

"It is most fitting and most appropriate that the Liberty Bell should be sent by the citizens of the old city of Philadelphia to the old city of San Diego, the Plymouth Rock of the Pacific coast. The Liberty Bell means life, liberty and pursuit of happiness. It arouses our patriotic sentiment as perhaps no other relic of a time long passed could, and our welcome to the bell and to the committeemen who accompany it is cordial and sincere."

Mayor E. M. Capps was the next speaker. He defined liberty as the cement which binds together 100,000,000 Americans into one inseparable whole. "It is the cement which binds forty-eight states of this union into one monolithic mass. It is literally the most precious heritage of mankind, and to defend it every American citizen would lay down his life. The birth of liberty was in the Liberty Bell, and its home is still there. God permit, it always will be there. I but wish the bell would remain in San Diego throughout 1916. What true American can look upon this picture --- the Liberty Bell smothered in the folds of the Stars and Stripes --- and not feel his breast heavy with patriotism? I extend to you a cordial welcome. I thank you for the honor you have conferred upon us, and I hope you will find much of interest to you here, as well as much pleasure during your sojourn with us."

Joseph P. Gaffney, of the Philadelphia council, referred to Philadelphia as the grandest city in the world, the birthplace of the nation, the home of the Liberty Bell and the savior on more than one occasion of this country. "On July 4, 1776, in the state house of Philadelphia, was penned that important document which will live forever --- the Declaration of Independence. On July 8, that year, the old bell rang out American independence.

Bell Inspiration

"But Philadelphia loves her fellow Americans. She is more than patriotic, for she divides her honors. On more than one occasion she has sent the Liberty Bell over the country that it might be an inspiration to all loyal Americans. She sent it through Illinois, Indiana, the prairie states and on into the mountain states, and then to the great Pacific coast to the Golden Gate, and finally to San Diego, the land of the mission bells. Those mission bells taught your Indians to worship the great God, and brought civil as well as religious liberty.

"These days you hear much about preparedness. This old bell has renewed American patriotism in more than one instance. If the government of these United States will see that our harbors are protected and our coasts patrolled, 50,000,000 loyal Americans could be called to arms on short notice by a trip of the bell over the country."

Lieutenant Governor Frank B. McClain of Pennsylvania called the plaza "an environment of masterly architecture and of horticultural splendor --- a veritable fairyland. And under the golden sunlight of a smiling California sun it presents a picture impossible to improve. So long as there are scenes like this and patriotism such as you have shown, there can be no danger to this American union of ours. Stimulate the love of country in the hearts of the future generation. We came by it honestly from our forefathers. They taught it to us, and they expect use to hand it on. To the children I want to ask that the sight of this old bell

be a mute reminder that will stimulate patriotism in your hearts and help preserve the greatest government history has ever known. Take inspiration from the deeds of Washington, who made possible all the blessings we enjoy today. May the Stars and Stripes long wave over a government founded by Washington and preserved by Abraham Lincoln.”

Preparedness Urged

“It is an inspiration to be here today,” said Senator Penrose. “It is glorious to bask in your sunshine and share your enthusiasm. Our flag waves over forty-eight states and in Pennsylvania we are a long way from you in California, but we look with pride from that state to you in California because you are a part of our own glorious country. The completion of the Panama canal means great things for the Pacific coast, both from points of commerce and protection. Years ago the Spanish dreamed of a waterway across the Isthmus. Other countries tried to build it, and it cannot help but be satisfying to us to know that Americans overcame all difficulties and finally succeeded. It was a triumph for American engineering, American labor, American physicians.

“Our flag stretches half-way around the world, and the Panama canal brings Pennsylvania and California closer together. By the medium of this great work we will come to you and you to us. It will make us known one another better; it will strengthen our friendship. The canal doubles the force of our navy, and, as Americans, we want a navy to defend our rights and protect our interests.

“Why should we depend on England or any other country for protection of our merchant ships bound for neutral ports? We must have naval and military preparedness. We must maintain commercial and industrial freedom. It was a deplorable error that allowed the murder of American women and the destruction of American property just over the border to which you live so near. That border must be protected, for we will never tolerate an invasion on the part of any nation through Mexico. We stand for peace and for right, not invasion nor assault.

American Melting Pot

“America is the melting pot for all nations. I am glad to notice how quickly the foreigners become Americans and how quickly they acquire our spirit and our patriotism. I am not one of those who believes that if immigration to the United States is not stopped that we will be destroyed from the inside. Those who come to us are glad to stay. They become Americans. Why, on our trip down the state of California, I was told that at 2 a.m. 15,000 residents of a certain town were at the station to catch a glimpse of the Liberty Bell. They had waited patiently for several hours. This is the sort of sentimental patriotism which has made this nation what she is today.”

Led by the San Diego Choral Society, the audience sang “The Star Spangled Banner,” closing the meeting.

November 14, 1915, San Diego Union, 3:4-5. Throngs expected to visit Liberty Bell today.

The Liberty Bell will be on exhibition in the Plaza de Panama at the Exposition from 8 a.m. to 3 p.m. today. Even though thousands viewed it yesterday, it is expected that a great crowd will see it in its position of state today. The Sunday admission of 25 cents to the Exposition will be in effect all day. This will be the last opportunity to see the cherished relic at the Exposition.

At 3 p.m. a large military escort will form inside the Exposition. In this will be companies from the United States marine corps, troops from the First United States cavalry, companies from the coast artillery corps at Fort Rosecrans, two companies of the coast artillery corps, N.G.C., and Third division naval reserve, N.G.C.

This large military escort will take part in the final honors which San Diego will give the bell. The military companies will escort the relic out the east gate of the Exposition. The line of march will be south of

Twelfth street and to Broadway, thence west on Broadway to the Santa Fe station, where the bell will be loaded on a special car. Guarded by the Pennsylvania delegation, which accompanied it here, the relic will leave San Diego at midnight.

November 14, 1915, San Diego Union, 4:4-5. Nine men were selected to represent Los Angeles on Board of Directors of Exposition during 1916.

November 14, 1915, San Diego Union, 10:1-2. Ingenuity of school children shown in clever exhibits at little folk fair; pet animals, cookery machinery, models of vessel, Cabrillo bridge, electric theater, miniature auto, aeroplane, gas balloon, paintings.

November 14, 1915, San Diego Union, 11:2-4. Mother to watch daughter loop-loop; daring girl will fly upside down at fair next Saturday.

November 15, 1915, San Diego Sun, 8:1. Liberty Bell on way to the East. The bell was escorted to the Santa Fe station at 3 yesterday by marines and soldiers. . . . Queen Jeanette Stiebel rode to her coronation in a fine new Franklin car piloted by H. H. Browne, demonstrator for Wilson S. Smith Company, agents for Franklin cars in San Diego County; President Davidson of Exposition presented Jeanette with crown as the representative of the school children of San Diego.

November 15, 1915, San Diego Union, 1:5. Collier married November 14 in Oakland.

November 15, 1915, San Diego Union, 2:1. Campaign 1916 Fair fund starts today; San Diego citizens to raise \$50,000; Committee of 100 will work hard for success.

November 15, 1915, San Diego Union, 2:4. One hundred suits planned to collect Fair subscriptions; action against all delinquents will be taken by Exposition; thousands of dollars are outstanding.

November 15, 1915, San Diego Union, 3:3. Spanish dancers and singers will help celebrate San Diego Day.

November 16, 1915, San Diego Sun, 1:7-8, 6:5-6. San Diego Day tomorrow; business and public buildings to close at noon; Mrs. L. L. Rowan will sing at organ recital by Doctor Stewart beginning at 11 a.m.; concert by Raja Yoga orchestra and chorus at organ at 2 p.m.

November 16, 1915, San Diego Union, 3:2-3. Tomorrow is San Diego Day; legal half-holiday scheduled; program of music, gaiety arranged.

November 16, 1915, San Diego Union, 8:4-5. Katherine Stinson to loop in air at Fair Saturday, November 20.

November 17, 1915, San Diego Evening Tribune, 5:6. City's day is going strong everywhere; everything is closed except Exposition; Spanish ceremony is announced; pie stuffing contest feature.

November 17, 1915, San Diego Evening Tribune, 8:1. Free gate for poor is found inadvisable; Mayor Capps explains that too many people would take deliberate advantage of chance to see Fair.

November 17, 1915, San Diego Sun, 1:6-7, 2:4. San Diego Day started with a rush.

November 17, 1915, San Diego Union, 1:4, 3:1. Dream City to call San Diegans today; program given.

November 17, 1915, San Diego Union, 1:7. Entire floor space of Foreign Arts building contract signed in San Francisco yesterday by exhibitors of Italian marble, bronzes, tapestry, wood carving and antiques.

While the exhibit is not made by the Italian government, it is representative of Italy and was installed in the north at great expense. The Foreign Arts building, which it will occupy, has approximately 15,000 square feet of floor space.

November 17, 1915, San Diego Union, 1:7. San Diego committee raises \$32,500 for Fair; this leaves a balance of \$17,500 to raise before noon meeting Thursday.

November 17, 1915, San Diego Union, 2:4. San Diego Day was celebrated.

November 17, 1915, San Diego Union, 4:1. EDITORIAL: San Diego Day at the Exposition.

All San Diego --- and this means the entire county as well as the city --- is proud of the Panama-California Exposition and the success it has achieved. Everybody realizes what it has done for this locality and thousands recognize the fact that they have personally benefited from it. That sentiment of appreciation should be given free rein today.

November 18, 1915, San Diego Evening Tribune, 2:4. Attendance at Exposition 16,746 for San Diego Day; crowds have lively time.

November 18, 1915, San Diego Sun, 1:7. '49 Camp to open again tonight under new management; only games permitted by state law will be operated.

November 18, 1915, San Diego Sun, 9:4. San Diego Day enjoyed by all yesterday; uniformed ranks of various orders drilled and paraded and later mingled their lurid and picturesque raiment with that of the crowd; bands played incessantly; there was a potato race for girls, a sack race, a three-legged race, a pie-eating contest, and burlesque prize fight, a dive from a high tower done by a straw dummy that was substituted for a real man at the critical moment; total attendance was 16,746.

November 18, 1915, San Diego Union, 1:3-6. San Diego Day calls thousands to Fair.

It was San Diego Day "all the way" at the Exposition and throughout the city yesterday --- San Diego atmosphere, San Diego air, San Diego weather, in the heavens above and on the earth below.

San Diegans started in early to celebrate the day and to show their loyalty to the city by making their way to that part of Balboa Park enclosing the Panama-California Exposition. The streams of visitors poured into the Fair grounds by thousands all day and late into the night.

The program outlined for the day was carried out practically as planned, beginning in the morning with an organ recital by Doctor Humphrey J. Stewart, official organist, at the Spreckels music pavilion. He was assisted by Mrs. L. Rowan, contralto.

Early in the afternoon a parade formed at the north gate, preceded by a band and made up of members of the D.O.O.K. Modern Woodmen of America, letter carriers and gaily decorated automobiles.

The parade was followed by tam drills by members of the Modern Woodmen of America, Camp No. 7255, under Captain J. B. Busch, and a team of the D.O.O.K.; also a dress parade by a battalion from the San Diego Army and Navy Academy.

Concerts were given by the Thirteenth band, coast artillery corps, V. F. Safranek, conductor; the East San Diego band and the band from the Fourth Regiment marines, William B. Borreson, conductor, in various parts of the Exposition grounds at different hours of the day.

The regular Wednesday, half-holiday at the marine camp was deferred, and the Second battalion, Major W. N. McKelvey, commanding, gave its parade on the Plaza de Panama at the usual hour.

Turnverein and YMCA athletes gave exhibitions of clever acts on horizontal and parallel bars, and a team of pretty girls in white blouses, blue skirts, and big red bow ties did a number of turns in rope skipping.

The local color of Spanish setting was heightened by the presence of the troubadours, who have been such a popular feature of the Exposition. They sang and danced during the afternoon in all parts of the grounds.

Many dinner parties were given at the Cristobal in the evening, reservations being made by about 900 persons. A cabaret entertainment was a feature. The dining parties came and went until after midnight, every table being occupied and the dining space crowded with dancers who divided their attention between two-stepping and throwing confetti. The dining and dancing crowd was the largest since opening night, New Year's Eve.

Wedding Take Place

A pretty scene was enacted on the platform of the music pavilion in the evening when a Spanish wedding was enacted by a large group of young people in native costumes. Manuel Madriquel played the role of the embarrassed bridegroom and Miss Concepcion Gonzalez that of the orange-blossom-garlanded and blushing bride. Justice J. Edward Keating performed the ceremony and Otto Jeancon saw that the affair was handled according to the rules made and provided for such occasions.

Miss Edith Duncan Emmett danced the Highland fling and Pipe Major Black performed on the bagpipes.

Sports were not overlooked in the program for the day, two games being played on the diamond at the marine camp, the first between the Cycle and Arms Juniors and the San Diego Juniors, which was won by the former, and the second game between the Anakins and the Bee Gee Juniors, in favor of the first named.

The "1916 finance committee" displayed an enterprising spirit by mounting four large cash registers in front of as many large yellow signs inviting contributions to the guarantee fund for the continuance of the Exposition next year.

Two teams divided the four stations located on the edge of the Plaza de Panama, the teams being known by the physical characteristics of the members, one being called The Fats and the other The Slims. The former proved the advantage of weight, their register showing about \$25,000 while that of the latter had rung about \$500. The weighty ones were Fred Barbour, C. C. Graves, Sydney Wines and Fred Barnes, and the slender contingent included Gordon Gray, Roy R. Moss, Guy F. Keene, Charles Benton and Fred Spencer. The winning team had two or three subscriptions totaling nearly \$2,000, which made them invincible.

Ginger Injected

A lot of ginger was injected into the evening's entertainment by the Ad Club, which has entire charge of the "jinks" on the Isthmus and put on a number of events in the afternoon. The members of the club were dressed in the grotesque garb affected by sawdust clowns and kept things well stirred up until nearly midnight. Some of their "stunts" would have caused envy on the part of the late Phineas T. Barnum, notably the "great moral lesson --- the cigarette fiend," as the barkers announced.

One of the thrilling events was a high dive from the tower of the Cristobal Café into a blanket held at the four corners by physically capable men. Buddy King was the diver, a straw-filled dummy being substituted for him at the thrilling moment of the plunge.

A potato race for girls was won by Rita Lonan; two others for boys were won by Ron Godley and Wayne McCoy, respectively, Edmund Sear taking second price in the second race.

The sack race prizes were won by Arnold Aillaud, Allan Thomas and Israel Nathan. The winners of the three-legged race were Alvin Thomas and Miller Holzaptel.

The pie-eating contest resulted in favor of Alonzo Jones who was the first to master a full-grown raspberry pie. Robert Neyenesch succeeded in drinking a pint of milk from a nursing bottle in six and a half minutes and winning the prize. Driving two 20-penny spikes into four inches of planking was accomplished by Misses Bertha Gleason, Lorealeo Massey and Dorothy Wright, prizes being awarded in the order named.

A burlesque bullfight ended in a decision for Buddy King, who finished off Jack La Marche in four hot rounds.

Isthmus Thronged

The Isthmus was thronged with gay maskers in the afternoon and evening. Prizes offered by the Ad Club were won by Misses Lorealeo Massey, Helen Weldon and Fay Wrightman, and by Chester Richards, E. S. Richards and E. F. Pastore.

Large families in San Diego are evidently at a premium. The announcement that a prize of \$10 would be awarded the parents who brought the largest number of children to the Sacramento Valley building, met with no response, the committee waiting in vain for a claimant for the prize.

Virginia Ellis, aged 12 years, a talented daughter of the Mormon state, pleased large numbers in the Utah building in the afternoon with her recitations in Italian dialect. The most popular number on her varied program was the "Daisy Field"; one of her own compositions "The Organ Grinder," "Pap's Old Saying," "Guiseppi, the Barber," and "Beckie Miller" also were recited. Musical numbers on the piano were given by Mrs. Leola Harris during the intermission.

The Raja Yoga orchestra of sixty pieces was encored so often that several numbers on the original program were omitted.

November 18, 1915, San Diego Union, 2:1. Girl aviator here to dare death in air; visitor at San Diego Fair; big biplane seen by thousands on Isthmus; Miss Stinson dances at Cristobal Café..

November 18, 1915, San Diego Union, 2:3. San Diego subscribes \$44,000 for Fair; Committee confident \$50,000 required will be raised by noon.

November 18, 1915, San Diego Union, 2:4. S. Glenn Andrus, secretary-general of Chamber of Commerce at Sacramento, at meeting of San Diego Chamber of Commerce suggested San Diego Exposition be made permanent.

November 19, 1915, San Diego Union, 3:1-3. Katherine Stinson will be entertained at Cristobal Café today; discusses her Gnome seven-cylinder motor with aviator Oscar Brindley and A. J. Macey, inventor of the Macey Aeroplane Stabilizer.

November 20, 1915, San Diego Union, 3:2. Miss Katherine Stinson will defy perils at Exposition today.

November 21, 1915, San Diego Union, 3:2-4. Flying girl amazes throng; rosebuds rained upon spectators from 1,500 feet altitude; looped the loop eight times; two flights in afternoon at 3:15 lasting 17 minutes and at 4:30 lasting 15 minutes.

Miss Stinson flew a tractor biplane of forty-five foot spread. The motor was a seven cylinder of revolving type, a French Gnome brought to America fifteen months ago by Lincoln Beachey.

November 21, 1915, San Diego Union, 3:4. More than 125 members of the College Women's Club attended the Exposition in a body yesterday.

November 21, 1915, San Diego Union, 3:4. Gompers party due at Fair this week; President of American Federation of Labor and other high officials coming.

November 21, 1915, San Diego Union, 12:3-4. William Sterling Hebbard and Carleton Monroe Winslow designed Spanish-style building for University Club.

November 23, 1915, San Diego Union, 12:1. Strawberries ripe on model ranch at Exposition; cotton blooming, vegetables ready for use; gourd crop fills wagons; pumpkin weighing 125 pounds; turkey third as much; fruits and vegetables on exhibit in the display window in the Seven Southern California Counties building..

November 23, 1915, San Diego Union, 10:1. Exposition sues subscribers to Fair stock; \$6,888.55 demanded in complaints before Justice Keating's court.

November 24, 1915, San Diego Sun, 7:3. Exposition will open tomorrow, Thanksgiving Day; children's admission will be ten cents all day; adults fifty cents until 6 p.m., after that twenty-five cents.

November 24, 1915, San Diego Union, 1:4. "San Diego, 1916 Day" celebrated at Panama-Pacific Exposition in San Francisco.

November 25, 1915, San Diego Sun, 6:1. Canada to send big exhibit here from San Francisco Exposition.

November 25, 1915, San Diego Union, 1:3. The run of the Automobile Club of Southern California from Los Angeles to San Diego today will be biggest event in the history of automobile tours in any part of the world. There will be 285 cars in line. This procession will be joined at various points along the way until from San Juan Capistrano south there will be no less than 400 cars in line.

November 25, 1915, San Diego Union, 5:1. Canadian exhibit at 1916 Fair assured; agriculture department head favors transfer from San Francisco.

November 25, 1915, San Diego Union, 8:5. Walter Handel Thorley is giving the daily recitals in the absence of Doctor H. J. Stewart; was organist of Great Britain at Paris Exposition of 1889.

November 25, 1915, San Diego Union, 9:1. Exhibits at Fair open to public all day Wednesday (Thanksgiving Day); children admitted for ten cents; motorists on tour at café tonight; "Motor Day," Saturday; gymkhana program announced; military bodies contestants.

November 26, 1915, San Diego Sun, 14:1. Motor Day at Fair tomorrow; 500 cars will be in automobile parade starting at 10 a.m. from Front and Broadway.

November 26, 1915, San Diego Union, 1:5. More than 500 autos arrive from north; big parade tomorrow, by J. F. Pendleton.

November 27, 1915, San Diego Sun, 12:6. Motor parade leads the way; visiting autoists flock to Exposition; motor ball there tonight.

November 27, 1915, San Diego Union, 1:1. Railways to keep building at Fair open in 1916; former U.S. Senator William Clark, president of Salt Lake Railroad, announces continuance plans.

November 27, 1915, San Diego Union, 1:3. United States to rush Exposition marines south; Colonel Pendleton will command landing forces in Sinaloa against pillaging Indians and bandits; 25th and 28th companies to embark upon cruiser *San Diego* this morning.

November 27, 1915, San Diego Union, 9:2-3. Autoists to storm Exposition today for big celebration; great parade starting from courthouse at 10 this morning will open festival; dance on plaza night's feature.

November 28, 1915, San Diego Union, 1:6. Men, guns, stores jam United States cruiser; 1,500 troops rushed south.

November 28, 1915, San Diego Union, 4:1. EDITORIAL: The Exposition of 1916 expressing hope that Riverside, San Bernardino, Santa Barbara and other California counties will send exhibits.

November 28, 1915, San Diego Union, Automobile Section, 4:1. Motor Day events at Fair please spectators; more than 100 automobiles in parade; gymkhana program interesting.

November 29, 1915, San Diego Union, 3:5. Panama-Pacific Exposition at San Francisco will pass into history Saturday, December 4.

November 29, 1915, San Diego Union, 5:1. Destroyers await call to Mexico, but practice.

November 29, 1915, San Diego Union, 5:1. Panama canal costs more than receipts during month of September; shortage amounts to more than \$63,000, Balboa report says.

November 30, 1915, San Diego Sun, 6:2. Although Arizona was not represented at the Exposition this year with a state building or an exhibit, it is considered likely the state will exhibit at the 1916 exposition.

November 30, 1915, San Diego Union, 1:4-6. Samuel Gompers, chief American Federation of Labor, spoke at Germania Hall last night; visited Exposition yesterday; scorns Labor Party idea.

November 30, 1915, San Diego Union, 1:5-6. Renewed Yaqui raids feared by Americans.

November 30, 1915, San Diego Union, 8:1. U.S. to land men at Topolobampo, orders show; Admiral Winslow calls for destroyers and mother ship *Iris*; tug *Iroquois* arrives; marines and bluejackets to be taken from cruiser by smaller craft.

November 30, 1915, San Diego Union, 8:4. Fred B. Gooding, former governor of Idaho, here to visit Fair.

December 1, 1915, 1:6, San Diego Sun, 1:6. Free gate at Exposition December 20, the day Exposition stockholders turn over to the Park Board the equipment and property of the Exposition.

December 1, 1915, San Diego Sun, 1:8. Fine exhibits signed for 1916 Fair.

December 1, 1915, San Diego Sun, 2:2. Concessionaires and exhibitors have arranged with Exposition this morning to have free admission for the public tomorrow night; special attractions on Isthmus; prizes for best Yama-Yama costume.

December 1, 1915, San Diego Union, 2:6. Arizona planning 1916 Fair exhibit; meetings held in Yuma and Phoenix; committee named to consider subject.

Arizona is planning to exhibit at the 1916 Panama-California Exposition according to newspaper reports in Arizona.

A movement to participate in the 1916 Fair was first started at Yuma and later a meeting was held and an organization perfected at a meeting held at Phoenix. The Arizona legislature turned down the plan of exhibiting at the 1915 Exposition.

December 2, 1915, San Diego Sun, 5:3. Lady Aberdeen to lecture here in service hall of Exposition next Tuesday; Marchioness of Aberdeen; Marquis of Aberdeen formerly governor-general of Canada and later Viceroy of India; admission will be charged and proceeds given to Aberdeen fund; fund used for civic betterment.

December 2, 1915, San Diego Union, 1:6. Davidson says Canadian, Italian, French, Chinese, Swiss and Russian exhibits will be sent from San Francisco for 1916 Fair; Philippines asked; Honolulu, New Zealand, Australia willing; millions involved.

That a 1916 continuation of the Panama-California Exposition at San Diego is assured, that it will be better from the standpoint of exhibits than during 1915, and that San Diego has the undivided support of the entire state, was the enthusiastic declaration of President G. A. Davidson, who returned last night from San Francisco and Los Angeles, where he transacted business concerning next year's venture.

"The fact that Los Angeles residents are behind San Diego morally and financially has broadened feeling throughout the state and has brought about that hearty spirit of friendliness which could not have been obtained any other way," Davidson said. "The action of Los Angeles is the talk of the North and San Francisco and smaller cities of the northern end of the state have joyfully climbed on the wagon, and San Diego's 1916 Fair is being boosted on every side.

Hearty Reception Everywhere

"Never have I experienced so hearty a reception in my efforts for San Diego. Everybody from high officials to clerks at the Panama-Pacific International Exposition, are working to help us land some of the bigger exhibits. Thousands of people will see these exhibits at San Diego next year who were disappointed in not getting to visit San Francisco during 1915. Mayor E. M. Capps, H. L. Penfold, and L. G. Lewis are still in San Francisco, and they are having fine success in lining up exhibits.

"We have landed the Canadian exhibit, one of the best of the kind ever made. We have obtained the great Italian exhibit, which after January 1 will be housed in the Foreign Arts Building at the Panama-California Exposition, occupying that entire structure. Prospects for the French exhibit are rosy, and it is not at all unlikely that this exhibit, which really must be seen to be appreciated, will occupy the California Quadrangle. With these three exhibits, the finest of their kind, and many smaller but equally important ones, our Fair next year will have exhibits better than we could have hoped had it not been for the closing of the

San Francisco Exposition and the splendid cooperation of officials of that Fair and of those at the heads of the different government exhibits.

“Another exhibit which we are hoping to obtain is that entered by the Philippine Islands. This is an exhibit we must have if possible. We have asked the Philippine legislature for an appropriation of \$30,000, the amount the removal and operation should cost during 1916.

Cooperation Widespread

“What pleases me most of all the successes which have come to San Diego is the new feeling toward the city and the city’s enterprise. Everybody seems tumbling over themselves to help in every way possible, and it was because of this assistance that we have been so successful in getting the exhibits. This new feeling is evidenced in San Francisco as well as Los Angeles.

“The appropriation of \$150,000 from Los Angeles is practically subscribed, and, as is well known, \$75,000 of this amount is in cash. The nine Los Angeles men who are to act as directors in 1916 will come to San Diego within ten days, and the first meeting of the new organization will be held.

“The board will consist of thirty-one members, nine to be from Los Angeles and the remainder to be San Diegans. We will file our articles of incorporation within a few days, and, as soon as we receive our charter from the state department at Sacramento, we will be in a position to move things along faster than they have moved up to this time.

Exhibits Worth Millions

“Other exhibits practically assured are the Chinese, Swiss, Netherlands and Russian. The exhibits are worth several million dollars. As the time is short, the exhibits will be housed in structures already erected. It is possible that one or more additional buildings will be erected, but not probable.

“Commercial exhibits are being secured easily as manufacturers are realizing that at San Diego during 1916, an excellent opportunity will be presented for advertising. Displays will be made by Honolulu, South Sea Islands, New Zealand and Australia. The California counties now housing exhibits at the Fair will undoubtedly continue them. In each instance they are already planning on removing the best of their 1915 exhibits at San Francisco to San Diego for 1916. These exhibits will be enlarged. Tourists will have an excellent opportunity to study all California by visiting the different county exhibits.

“The railroad and steamship lines have been awaiting the signal for a definite decision, and now that the Fair is assured they are preparing their advertising to gather the 1916 business and also to direct pleasure and home seekers to San Diego. I am unable to praise too strongly the assistance from outside which is coming to San Diego for the new endeavor, and as San Diegans travel about the state from this time on, they will notice the marked change in the attitude of the people.”

Whether Balboa Park is to be under the jurisdiction of the city of San Diego during 1916 is a question to be settled at a meeting of the Exposition stockholders to be held at the California Building, December 20 at 10 a.m. The directors at a recent meeting adopted a resolution of conveyance, and the stockholders will be asked to ratify the action.

Care of the buildings and grounds will be vested in the Park Commission, the care of the streets will be left to the Street Department, and control of the grounds will be under the jurisdiction of the Police Department, if the transfer is made.

Resolution To Be Acted Upon

Following is the resolution to be voted on at the stockholders’ meeting:

“Resolved that it is the sense of this corporation that it transfer and convey to the Board of Park Commissioners of the City of San Diego and the inhabitants thereof the equipment, buildings, concessions, nursery stock in the warehouse, stock in store room, stock in the service station, supplies in the hospital, furniture and fixtures, excepting those in the Cristobal Café, and all personal property of which this corporation may be possessed, situated in the Exposition grounds in Balboa Park in said City of San Diego, excepting pro-rata or short-rate insurance, telephone salvage, cash on hand or in bank accounts and notes receivable judgments, ethnology exhibit, archaeology exhibit and anthropology exhibit. And that the consideration for such transfer and conveyance be the water furnished this corporation by the City of San Diego from the date of its incorporation and organization until the 31st day of December 1915, and the services rendered this corporation by the said Board of Park Commissioners of the said City of San Diego; and for the further consideration that the said City of San Diego and the said Board of Park Commissioners of the City of San Diego release and exonerate this corporation from all duty of liability in connection with the removal of any buildings, property or other goods and chattels owned by this corporation, for the removal of which this corporation is now liable, and shall release and exonerate this corporation from any liability which may now or hereafter exist to restore any portion of the grounds within the said Exposition in any manner whatsoever.

“Said transfer and conveyance to be subject to such contracts of occupancy as exist at this time and which shall not be disturbed by the said City of San Diego or the said Board of Park Commissioners of the City of San Diego, and that a special meeting of the stockholders of this corporation be called for Monday, the 29th day of December 1915, at 10 o’clock a.m. of said day at the office and principal place of business in the California Building on the Exposition grounds in said Balboa Park in the City of San Diego, California for the purpose of considering and settling upon the matters and things referred to in this resolution and to transact such other business as may lawfully come before the meeting.”

December 2, 1915, San Diego Union, 3:6. Exposition gates open for all tonight; admission free first time; children admitted without price in afternoon; big celebration planned; Yama-Yama carnival to make Isthmus gay; December 20 free day too.

December 2, 1915, San Diego Union, 6:5-6. Exposition attendance last month 149,066; since opening 1,936,353; November daily average 4,969; prediction is that 2,000,000 mark will be passed.

December 2, 1915, San Diego Union, 6:6. Exposition flora to be exploited next Saturday, December 4; San Diego Floral Association will act as hosts on special day; rose garden near Laurel Street gate, canna field in the rear of the California Building in gorgeous bloom.

December 2, 1915, San Diego Union, 7:6. Fourth contest party at Fair; Denver man escorts winners of Catholic paper competition; 1916 trips plan..

December 3, 1915, San Diego Sun, 1:2. Park line to be built by San Diego Electric Company; Clayton so indicates in a letter; asks to abandon University Boulevard line; completion of electric line through city park to El Cajon Avenue and thence to El Cajon held up because of jitney bus competition.

December 3, 1915, San Diego Sun, 1:5. City will pay its tribute as San Francisco Exposition ends; whistles to blow; San Diego Electric Railway cars to stop for 60 seconds at noon tomorrow as Fair closes.

December 3, 1915, San Diego Union, 3:2. Home phone company head to leave on business-pleasure trip; pledges Fair boost in East.

December 3, 1915, San Diego Union, 3:4. Free admission attracts crowd; thousands visit Exposition without paying; Isthmus ruled by gaiety.

December 3, 1915, San Diego Union, 3:6. Vegetation study at Fair planned for Saturday, December 4; tour of grounds under competent instructors Floral Day feature; children’s fee cut; reception will be held in Women’s Headquarters, California Building.

December 3, 1915, San Diego Union, 8:1. Utah, New Mexico, Montana and Kansas to make exhibits at 1916 Fair.

December 3, 1915, San Diego Union, 8:4. Free admission attracts crowd.

Several thousand took advantage of free admission to the Panama-California Exposition last night and the cafes and Isthmus concessions enjoyed a thriving business. Concessionaires had engaged a band and it played during the evening on the joy street. A costume parade had been arranged, but there were only a few who appeared.

People began pouring through the gates immediately after 6 p.m. when the free admission began. Children had been admitted free since 1 p.m.

It was one of the largest night crowds in several weeks and everyone seemed to enjoy himself. Concessionaires had arranged a number of interesting free attractions, and the throng distributed itself impartially among the different places of amusement.

December 4, 1915, San Diego Sun, 7:2-3. Lady Aberdeen will lecture at 3 p.m., Tuesday, in the public service hall of the Exposition; her subject will be "The Triumph of Civic Awakening"; Lord Aberdeen will also be heard on "Reminiscences of a Viceroy"; admission will be 50 cents.

December 4, 1915, San Diego Sun, 7:5. San Joaquin exhibit stays; Monday, December 6, will be "Utah Celery Day," celery to be given to visitors at Utah building in afternoon.

December 4, 1915, San Diego Union, 9:1. Tribute to Fair in North will be paid; stop street cars, sound whistles, ring bells, Davidson's request; Wilson toast pledged; celebration of closing of San Francisco Exposition planned today.

December 4, 1915, San Diego Union, 9:2. French government plans 1916 Fair exhibit; representatives make trip to report on situation.

December 5, 1915, San Diego Union, 1:4-5. San Francisco Fair passes into history as bugler sounds taps; 416,000 say farewell.

December 5, 1915, San Diego Union, 1:6. San Diego shares in celebration of Fair's close.

December 5, 1915, San Diego Union, 3:1. Advertising in United States and Canadian newspapers for 1916 Fair; railways ready for launching campaign.

December 5, 1915, San Diego Union, 4:1. EDITORIAL: The Exposition During 1916.

San Diego is to be congratulated on the successful outcome of the movement to continue the Exposition during the coming year. Arrangements to that end have now been virtually perfected. The financing of the project for 1916 has been accomplished. Plans for making the Exposition far more attractive than the present one have been crowned with success, and all has been achieved without any blowing of trumpets. In fact, the preparations for continuing San Diego as an Exposition City during the coming year have been made so quietly and in so matter-of-fact a manner that it may be doubted that the average citizen realizes the immense advantage that San Diego will derive from the project. To those who will give thought to the subject, however, it will probably be apparent that this city will be in much greater measure the gainer by the Exposition of 1916 than it has been that of the year just drawing to a close.

In the first place, the Exposition of 1916 will have every attraction that the present one has. More than that, it will have many new features that will render it more interesting. Much that is best of the San Francisco World's Fair that has just closed will be brought to San Diego. Foreign countries that have exhibited so lavishly at the northern Exposition are apparently only too willing to transfer their most

beautiful displays to San Diego. As a result, the Exposition here will become officially "international," a term that could hardly have been applied to it during the past year. In a word, the scope of the San Diego Exposition will be much larger than was originally contemplated. It will be more attractive and in every way better.

Viewed from the attendance and the pleasing comments of the visitors, the Exposition that is soon to close must be regarded as a great success. That which will open on January 1, 1916, will be even more successful, unless present indications are wholly misleading. There are the best of reasons for believing that the tide of travel to the Pacific coast next year will rise higher than ever. Europe is no longer open to the tourist, and promises to be closed for some time to come. Those who seek pleasure by travel will perforce yield to the mandate, "See American first," and California will appeal irresistibly to these people. Besides, plenty of money always promotes travel. Stupendous fortunes are being made all over the East out of war contracts, and the gains are fairly well distributed. The lion's share may go to the principal owners of the large industrial plants that are now working night and day. But the stockholders, of whom there are many, will also receive substantial profits. Then there is another source of wealth that has scarcely a precedent --- the combination of bumper crops and top prices for farm products. The American agriculturist will be on "East Street" next year --- in fact, he is already there. In brief, so far as it is possible to forecast the future from the present, an abundance of ready money will marvelously stimulate travel westward. And those who journey to the coast will visit the San Diego Exposition, which has become a household word the country over.

The decision to keep the Exposition open during 1916 and to add to its attractiveness was a wise one. San Diego and all Southern California will profit enormously thereby.

December 5, 1915, San Diego Union, 7:7. Description of Bell Telephone exhibit which is coming from San Francisco Fair; Company promises San Diego-New York talks; 600 instruments due; talking motion picture will be among features scheduled for Fair.

December 5, 1915, San Diego Union, 7:8. Celery will be free at Exposition Monday, December 6; Utah to celebrate triumph in producing bumper crops.

December 5, 1915, San Diego Union, 8:3-4. Aberdeen's visit, event; greeting awaits titled pair; reception will be given social workers by Women's Board at Exposition; society leaders enthusiastic over couple's coming.

December 5, 1915, San Diego Union, 10:3-4. Thirty in Yama-Yama contest; prize given for costume.

December 6, 1915, San Diego Sun. Just 18,875, 974 saw Panama-Pacific Exposition; Wreckers are busy removing ruins in San Francisco.

December 6, 1915, San Diego Union, 3:2. 18,871,857 total attendance at San Francisco Fair.

December 6, 1915, San Diego Union, 3:6. Article in **Philadelphia Record** says San Diego's Fair is the most artistic ever arranged; description of Liberty Bell visit.

December 6, 1915, San Diego Sun, 9:4. Just 18,875,974 saw San Francisco Exposition; daily average for ten months was 65,541 according to the Department of Admissions.

December 6, 1915, San Diego Union, 3:6. Philadelphia newspapers give San Diego Exposition a boost; description of visit by Liberty Bell.

December 7, 1915, San Diego Sun, 1:7-8, 9:2. Lord and Lady Aberdeen interested in the betterment of the health, morals and industries of Irish people; fought for pure milk and elimination of tuberculosis among Irish people.

December 7, 1915, San Diego Union, 1:6. San Diego Fair will get entire Canadian exhibit from San Francisco; \$100,000 French pavilion, which was a reproduction of the Palace of Honor at Paris, at San Francisco Exposition sold to a wrecking company for \$2,000..

December 7, 1915, San Diego Union, 2:1. A. E. Smith, manager of apple exhibit at Fair, say Northwest citizens will come here in 1916.

December 7, 1915, San Diego Union, 7:1. Aberdeens in city today.

December 7, 1915, San Diego Union, 7:3. Celery of Utah given to Exposition visitors yesterday.

December 8, 1915, San Diego Sun, 1:3. Council passes resolution today urging Kettner to do everything in his power to induce the government to accept San Diego's offer of the "Dutch Flats" for a naval base.

December 8, 1915, San Diego Union, 1:3. Lord and Lady Aberdeen were guests of honor at Exposition; laud Exposition, plead for fund to assist Irish children; Lord Aberdeen reminiscences about his public career in lecture.

December 8, 1915, San Diego Union, 9:1. Christmas number of **Trolleyman**, official organ of San Diego Electric Railway, has article about history of San Diego Exposition..

December 9, 1915, San Diego Sun, 1:2, 7:6. Mayor Capps say 1916 Fair to be finest in world; returned to city late yesterday from a two-week sojourn in San Francisco.

December 9, 1915, San Diego Weekly Union, 4:3-4. EDITORIAL: The Exposition of 1916.

December 9, 1915, San Diego Union, 7:4. Fair will be free to all at Christmas; Exposition pledges aid for Shriners during morning of festive day.

December 10, 1915, Minutes of Board of Park Commissioners.

Resolved that ground now used by Fourth Regiment be leased to Navy Department for five years at a yearly rental of one dollar per year.

Similar resolution also adopted regarding the First U.S. Cavalry.

Vote of thanks to the officers and enlisted men of the Fourth Regiment for the manner in which they participated in the San Diego Exposition.

Invitation extended for entire Regiment to encamp on the ground now occupied by the Second Battalion and on such additional ground as may be available for their use during 1916.

Secretary of the Navy requested to continue camp of the Fourth Regiment, U.S. Marines, now located in Balboa Park and to have First Battalion, now in San Francisco, encamped with Second Battalion during 1916.

December 10, 1915, San Diego Union, 4:2. Mayor Capps says best of exhibits to come south; greater portion of United States exhibits at San Francisco Exposition assured.

December 10, 1915, San Diego Union, 9:2. Forester Fair exhibit for San Diego plan.

December 11, 1915, San Diego Union, 1:4. Amos Weed, pioneer and forty-niner, presents gold cradle to California Historical Society; exhibited at Fair.

December 11, 1915, San Diego Union, 9:3. Tickets for 1916 Fair ready as gifts for Christmas.

With the title changed to "Panama-California International Exposition," San Diego's Dream City will begin its second year one minute after midnight, January 1, 1916, and continue open throughout the year. The rearrangement of old exhibits and the installation of new ones will be accomplished in one building at a time, so that no interruption to the Exposition's life will occur.

At a meeting yesterday of the special committee appointed by Mayor Capps to plan for the new Exposition, arrangements were made to issue certificates of purchase, representing annual tickets of admission, so that they may be used as Christmas presents and exchanged later, as the engravers have not delivered the tickets for next year.

A scale of prices for the tickets also was fixed, as follows: For adults, \$10; for children between the ages of five and sixteen, \$5; no charge will be made for children under five years.

It is expected that within a week the list of incorporators will be completed and the new board of directors elected.

It was announced at yesterday's meeting of the committee that A. H. Ford of Hawaii, representative of the organization back of the Panama-Pacific Exposition at San Francisco, had arrived in San Diego to look over the situation and to arrange for a comprehensive exhibit here in 1916.

The countries included in the organization are Hawaii, a portion of Australia, Japan, China, New South Wales, New Zealand, Queensland, British Columbia, Alaska, the states of Washington, Oregon and California, and some of the Latin American countries on the Pacific coast.

The Philippine Islands are figuring on bringing their exhibit from San Francisco. This exhibit was second only, perhaps, to that of Canada in size and interest. The Philippine legislature has been asked to appropriate \$20,000 to remove the exhibit to San Diego.

Those present at the meeting yesterday were Mayor Capps, G. A. Davidson, president of the Panama-California Exposition, H. J. Penfold, secretary, James MacMullen, John F. Forward, Jr., Sam Porter, Carl Ferris, Colonel Fred Jewell, and Charles T. Chandler of the park board.

December 11, 1915, San Diego Union, 9:3. Title of Exposition was changed to Panama-California International Exposition; fair tickets for 1916 are ready.

December 12, 1915, San Diego Union, 4:2-4. New York will talk to Fair; 1916 invitations awaiting notables; demonstrations of transcontinental telephone service beginning Monday, December 13.

December 13, 1915, San Diego Union, 7:5-6. Mrs. Mary Linck Evans, mezzo-soprano, to sing at Exposition tomorrow and Wednesday afternoons.

December 14, 1915, San Diego Union, 1:4. Chilly New York phones; Mayor Capps tells of balmy San Diego; hundreds hear wire talk; novel telephone conversation feature of day at Exposition.

December 14, 1915, San Diego Union, 1:6. Duplicates of the jewels which shone on the Tower of Jewels at San Francisco will be purchased to be hung on tower of California Building; electric scintillator to illuminate tower at night according to Irvin G. Lewis.

December 14, 1915, San Diego Union, 6:1. Annual tickets for 1916 were cut to half price; Mayor declares move will double Exposition attendance next year; low price will induce hundreds to purchase all over South; adult \$5.00 and children \$2.50 for annual tickets.

December 14, 1915, San Diego Union, 8:6. Kettner to press exhibit measure; balance of San Francisco appropriation amounting to \$86,868.51 sought for San Diego Fair.

December 14, 1915, San Diego Union, 9:1. "Rainmaker" gets contract from city to fill Morena reservoir for \$10,000.

December 14, 1915, San Diego Union, 9:4. Carols to float over Fair at night; three quartets will sing Christmas songs for hour; organists will aid.

December 14, 1915, San Diego Union, 14:1. Davidson to announce 1916 Fair plans at Chamber of Commerce luncheon today.

December 15, 1915, San Diego Union, 1:6. United States Fair exhibit to start south next week; Weather Bureau display of government also will be shown here.

December 15, 1915, San Diego Union, 5:3. Mrs. Mary Linck Evans, Alhambra woman, gave recital at Organ Pavilion between showers; will sing again today.

December 15, 1915, San Diego Union, 9:2-3. President Davidson tells plans for 1916 Exposition to Chamber of Commerce.

"A word as to the exhibits coming here from the San Francisco Exposition. The Canadian exhibit, probably is the finest ever constructed and is the result of 15 years of exhibit building, Canada having displayed her products at every international or other great fair wherever possible. Colonel Hutchinson, who is in charge of Canada's exhibit, was brought to San Diego and when he went away he was a booster of this city. The entire Canadian exhibit will be displayed here during the next year.

"The exhibit from France is priceless, including the rich treasures from the Luxembourg exhibit, and was the greatest from an artistic standpoint at the San Francisco Fair. The matter of sending it to San Diego is now up to the government officials in Paris. The French Exposition commissioners are unanimously in favor of its coming and I consider the chances most excellent.

"The fine exhibit of Italian art, consisting of marbles, bronzes and tapestries, will occupy an entire building, and the delegation from the Pan-Pacific countries asks for another building.

"We are also assured of the splendid Netherlands exhibit of pottery, and Russia asked for an entire building to display the 50 or 60 cases which arrived too late for installation at San Francisco and have been stored over since they arrived. It has been found impossible to comply with the request, and an arrangement probably will be made to house the exhibit of Russia, Switzerland and Spain under one roof.

"Central and South American countries --- Brazil, Argentina and Guatemala --- will be represented, including the Marimba band from the latter country.

"I am anxious to have the Philippine exhibit, which was next to Canada's in point of interest, and will include the constabulary band. The Philippine legislature, now in session, has been asked for an appropriation of \$30,000 to defray the expenses of removing and maintaining the exhibit, including a four-month's stay of the band. Secretary of War Garrison is in favor of having the exhibit come here.

"The U.S. Government had the finest display from its various departments --- navy, fisheries, weather bureau, war, commerce and industry, and interior departments it has ever made, and all this will be removed to San Diego, probably coming on the *Mars*, which sails about December 20."

December 16, 1915, San Diego Sun, 1:3-4. Davidson announces plans; loud bang will open Exposition for 1916; naval pageant on San Diego bay in which the U.S. cruiser *San Diego*, the *Oregon*, other ships of the Pacific fleet, torpedo boats, submarines, etc. will take part; fireworks; speech by Governor Hiram Johnson; music by half a dozen bands; concert; carnival.

December 16, 1915, San Diego Herald, 1:2. Exposition Christmas.

December 16, 1915, San Diego Sun, 1:3-4. Loud bang will open Exposition for 1916.

December 16, 1915, San Diego Union, 5:4. Cross-country phone at Exposition popular.

December 16, 1915, San Diego Union, 5:5. French Fair exhibit commission to arrive; removal of display for 1916 Exposition will be considered today.

December 16, 1915, San Diego Union, 5:6. Reopening of Panama canal in two months predicted; 1,250,000 cubic yards removed monthly from slide in Gaillard cut, says reports.

December 17, 1915, San Diego Union, 5:2. Commissioner, soon to leave for Paris, favors French exhibit at 1915 Fair.

December 17, 1915, San Diego Union, 7:3. Fair exhibits bill to be rushed in House; measure transferring government display to San Diego passes Senate.

December 17, 1915, San Diego Union, 16:1. Fair ticket sale to begin tomorrow.

December 18, 1915, San Diego Union, 2:7. Fair exhibit act passed by House; transfer government display, \$80,000 fund here lacks only President's signature.

December 18, 1915, San Diego Union, 6:1. City of San Diego budget estimate for 1916 nears 2 million mark; Taxpayers' Association busy with plans to keep levy down.

December 18, 1915, San Diego Union, 6:1. Railroad boost for great Fair in 1916 pledged; Southern Pacific behind San Diego.

December 18, 1915, San Diego Union, 8:1. Mighty welcome to rise at Fair when 1916 dawns.

December 19, 1915, San Diego Union, 1:3. Russian exhibits for Fair arrive from Bay City.

December 19, 1915, San Diego Union, 5:3. Stage set for big Christmas tree at Fair; celebration to be given under direction of Women's Board of Exposition; stage setting at Spreckels Organ Pavilion depicts birth of Christ and coming of wise men.

December 19, 1915, San Diego Union, 12:4-5. Samuel Slack, English gardener, explains secret of blooming roses.

December 19, 1915, San Diego Union, III, 3:2-3. Carnival to ring out old Fair, ring in new.

December 19, 1915, San Diego Union, III, 5:1-2. Contributions for Shriners' Christmas treat for needy pouring into headquarters; distribution to be made Friday, December 25; kiddies' celebration at Fair arranged at 10:30 a.m. Christmas day; stocking presents will be given to children at Organ Pavilion and then they will be taken to Isthmus.

December 20, 1915, San Diego Sun, 1:5-6. Stockholders' Day draws big crowds.

December 20, 1915, San Diego Union, 1:2. Sixty-foot pine from Cuyamaca ready for Christmas; difficulties overcome in bringing tree to Fair; will be in front of organ; festivities set for Christmas morning; hundreds of little red stockings containing candy and toys to be given to needy children who will be admitted free to grounds before noon.

December 20, 1915, San Diego Union, 6:1. Warships to aid New Year's fete if request made; battleship *Oregon*. Cruisers *South Dakota* and *Milwaukee* here.

December 21, 1915, Minutes of the Board of Park Commissioners

A committee from the San Diego Museum Association, consisting of G. W. Marston, W. T. Johnson, E. F. Smith, R. C. Allen and Dr. Hewett appeared before the Board; exhibits in the Science of Man building and the Indian Arts building had been presented to the Association.

Marston wants Science of Man building set aside for the Association by 1916 Exposition officials; granted; wants use of California and Fine Arts buildings after close of 1916 Exposition; no objection by Board.

Hewett wants New Mexico building, Indian Village and room in California Quadrangle as laboratory of the Anthropological Station at San Diego; no objection by Board if arrangements can be made and no costs to Board; lease to buildings could be granted subject to a vote of the people ratified by the State Legislature.

December 21, 1915, San Diego Sun, 1:3-6. Monster Shriners' tree, 70-feet high, to be placed on Exposition grounds where Santa Claus will give thousands of stocking gifts to San Diego kiddies on Christmas day; admission up to noon will be free to everybody; tree will stand just north of organ; after gifts have been handed out, Shriners' band will lead kiddies to Isthmus; Christmas carols will be sung and anthems played on organ in afternoon; birth of Christ in the manger will be stage setting at the organ.

December 21, 1915, San Diego Sun, 6:3. Exposition to cost city \$100,000; that amount is asked in budget for police upkeep and repairs; \$64,000 for upkeep of Exposition grounds by the Board of Park Commissioners; \$27,000 asked by Police Department; \$7,200 for repair of streets.

December 21, 1915, San Diego Union, 1:3-4, 5:2. Debt-free Exposition was turned over to city; stockholders voted to turn their interest in Fair over to city; Davidson and Belcher honored at outdoor meeting of stockholders in California Quadrangle; stockholders agree to give a silver service to Davidson and Belcher.

December 21, 1915, San Diego Union, 1:3-4. Gist of important business transacted by Fair stockholders; \$200,000 stock unpaid.

December 21, 1915, San Diego Union, 5:1. Captain C. P. Wright named assistant Chief of Police.

The Council passed a resolution to the effect that the guardhouse and quarters of the Balboa guards at the Exposition should be turned over to the city police department.

December 21, 1915, San Diego Union, 6:1. Salt-Lake Route Union-Pacific exhibit to be continued here in 1916.

December 21, 1915, San Diego Union, II, 11:1. Friends advise L. J. Wilde to make Congress race; former banker will if all parties combine on him.

December 21, 1915, San Diego Union, II, 11:3. "Free day" lured big crowd to Fair yesterday.

December 21, 1915, San Diego Union, II, 11:4. Council bars jitneys from operating on Fifth Street.

December 22, 1915, San Diego Union, 3:1. Nine warships to pass Christmas in Port of San; navy vessels' guns will roar greeting as 1916 Exposition is opened.

December 23, 1915, San Diego Sun, 1:4. Davidson will be reelected at a meeting of the directors Monday, December 20, it was announced today.

December 23, 1915, San Diego Sun, 2:1. District Attorney Marsh issues order to close Spanish cantina dance hall on Isthmus at once; gambling discovered.

December 23, 1915, San Diego Sun, 10:3. New Year's Eve celebration at Exposition; 500 aerial bombs, costing close to \$2,000 will be discharged; three bands to play on the Isthmus.

December 23, 1915, San Diego Union, 4:5. Articles filed to incorporate Fair yesterday in County Clerk's office.

December 23, 1915, San Diego Union, 4:5. Marines guests today at "War of the Worlds"; Manager John H. Whitaker feels their services and demeanor entitle them to his recognition.

December 23, 1915, San Diego Union, 8:1. Fair Christmas tree branches stripped from one side during move; new branches attached by workmen; tree a gift of San Diego Consolidated Gas & Electric Company; quartets to sing from balconies of Home Economy, Science of Man and Indian Arts buildings from 7 p.m. to 8 p.m. at Exposition, Saturday, December 25.

December 23, 1915, San Diego Union, 8:4-5. Fair Christmas tree damaged; repaired by branches.

December 23, 1915, San Diego Union, 16:3. Five hundred aerial bombs to explode to make close of 1915 Fair; \$7,000 set aside for celebration.

December 24, 1915, San Diego Union, 1:3. Christmas tree put up; Christmas carols sung at celebration.

December 24, 1915, San Diego Union, 3:3. Miss Edna Forler, San Diego girl, to blow biggest siren whistle in world to usher in New Year's Eve celebration and opening of 1916 Exposition; whistle will be mounted on standard between Isthmus and Alameda County building.

December 24, 1915, San Diego Union, 14:1. Stream of Fair exhibits flowing south.

December 25, 1915, San Diego Sun, 1:7-8, 2:3. Joyous day is celebrated here.

December 25, 1915, San Diego Union, 5:1. Kettner writes of his work for Fair and citrus growers.

Congressman "Bruder" Bill Kettner is doing his mightiest to obtain a cent on citrus fruits for the growers of his district. The difficulties he has to encounter and the strenuous efforts he is making to protect the industries he represents are revealed in a very touching tone that is heard a moment only in a letter to an intimate friend.

"If only our good citrus people," he writes, "would put in one-tenth of the time getting me the information I want so I can make a showing before the committee, that is put in abusing me as "a free-trade Democrat," I have more than a fighting chance to secure the relief they are asking for."

Before Kettner left for Washington he asked for data and often expressed regrets that clear and convincing facts and figures were hard to obtain, principally because an organized effort was lacking to that end. He was busy entertaining notables in national affairs to make them acquainted with the needs of his district and he often went deep into his own pockets to meet the expenses. He had hardly the time to go into explicit details, which are necessary to meet every argument, and he asked and prayed that growers, who are most concerned, combine to formulate their needs so that he would be prepared with the proper ammunition for the battle in which he was to become engaged.

Expense Too Much

Kettner again declares emphatically in his letter that he will not be a candidate for congress and gives a number of sound business reasons for his decision. The natural goodness in him is so big that it oozes through his prose at times and in his broad, generous way he expresses his gratitude to the people who have honored him by entrusting him with their interests in national affairs, and his hope, too, that he will always be of service to them; but the expense of it all is more than he can bear, and he feels that in justice to

himself and his associates in business, he must retire to private life and give more time to the little pewter teapot in which old-fashioned folks hide their savings for their gray-haired years.

Some of the efforts he is putting forth are shown in his homely narrative of the struggles to transfer the remaining \$86,000 from the San Francisco Exposition to the San Diego Exposition.

Kettner Tells About It

Kettner's letter says:

"Now, for a little straight talk. The other day I sent you the bill I had introduced for \$86,000 to be transferred from San Francisco to the San Diego Fair. Yesterday at noon the committees were appointed; at 3 o'clock I got hold of the chairman of the committee, Mr. Cantril, and after an hour's talk, he agreed to call his committee together today at 10:30 and try to get my resolution through the committee. I saw all of the committee last evening and again this morning, and, with the assistance of Charles Curry, of Sacramento, and Will Stephens, of Los Angeles, we finally got eight of the fifteen members, just a quorum.

"After discussing pros and cons, believe me, for a while I thought they were going to turn us down, because \$86,000 looks pretty big with the treasury \$42,000,000 behind and a "preparedness" budget on our hands, they finally passed it unanimously. I then hiked over to the Senate and asked Senator Phelan if he would not get a move on it over there. He said he would, but there is an old saying, 'If you want anything done, do it yourself,' on which I acted.

Did It Himself

"I interviewed every senator on the committee and my old friend Senator Martine, chairman of the committee, whom we entertained last summer, promised me he would try to get the bill out tomorrow. Mr. Underwood, another friend, who is now a senator, Senator Overman and Senator Myers of Montana promised to give it their personal attention, while all of the others stated they saw no objection in passing the bill. Incidentally, it is promised that the bill will be sent over to the house immediately. I can then get our friend, the speaker, Mr. Clark, to hold it on his desk, instead of sending it again to the house committee. He will then recognize me and I will make a motion to substitute the senate resolution for my bill, and in that way I expect to get it through tomorrow or the next day.

His Homely Simile

"If I take my bill up first, I shall have to get unanimous consent and out of 435 members there is always one crank. This is the plan to get quick legislation on this bill. It reminds me of a mule I used to own, when I wanted him to get into the barn, I would have to back him in.

"With kindest regards to you and yours, I am

Yours faithfully,

Bill."

"PS Hurrah! My plan for the exposition bill has worked like a charm until now. It is on the speaker's desk waiting for this war emergency bill to be disposed of before he can recognize me."

December 25, 1915, San Diego Union, 5:2. Theosophical Society buys Kansas building

Madame Katherine Tingley has purchased the Kansas building at the Panama-California Exposition and will establish the 1916 headquarters of the Theosophical Society there, it was announced yesterday by Frank Knoche, her business manager.

The State of Kansas decided a few days ago not to continue its exhibit at the Exposition next year.

The Theosophical exhibit, which is now in the Science of Man building, will be transferred to the new quarters. The exhibit during the coming year will contain a number of paintings and examples of arts and crafts work which could not be exhibited during 1915 because of lack of space.

The interior of the new quarters will be redecorated in a style appropriate to the exhibit.

December 25, 1915, San Diego Union, 14:1. Exhibits sent from San Francisco to San Diego for Fair described.

December 25, 1915, San Diego Union, II, 9:2-4. Mme. Schumann-Heink will lift voice in opening ceremonies at Fair on New Year's Day; "Lark Ellen" to sing too.

December 26, 1915, San Diego Union, 1:3, 3:3. Christmas carols set hearts aglow; thousands listen to old songs at night in San Diego's Dream City.

December 26, 1915, San Diego Union, 3:3-6. 4,500 children gladdened at Shriners' Christmas tree on Exposition grounds.

December 27, 1915, San Diego Sun, 12:1. Every show on the Isthmus is going to be free to all New Year's Eve. There are \$3.25 worth of them at regular admissions; day's admission of 50 cents for adults will be continued at night; cabaret entertainment at Cristobal Café will feature a "Follies" show, quarters, megaphone trio, Spanish singers and dancers, Madame Santone and her orchestra, Oriental dancers, and tableau depicting the passage of the old year and the dawn of 1916.

December 27, 1915, San Diego Sun, 12:5. Famous "Clansmen" shown at Cabrillo.

December 27, 1915, San Diego Union, 5:1. Free night on Isthmus brings hearty approval for farewell 1915 celebration; permits to children, adults "without string," rides on devices without limit; comedy boxing carnival planned by newsboys.

December 27, 1915, San Diego Union, 7:6-7. Enos Marshall, chairman of the National Parks Commission of the American Civic Association, says 600,000 will urge big park betterment in United States; George W. Marston, San Diego, member National Parks Committee.

December 28, 1915, San Diego Union, 9:5. State gave charter for Fair yesterday.

December 29, 1915, San Diego Sun, 7:3. Davidson elected last night to be president of Exposition in 1916 by unanimous vote.

December 29, 1915, San Diego Union, 1:4. Frank A. Hezelbaker, Montana exposition commissioner, says 1916 Fair will get cream of exhibits.

December 29, 1915, San Diego Union, 1:6, 4:7. Six out of nine Los Angeles directors are at first session of Board last night; Davidson to head 1916 Fair; other officers selected.

December 29, 1915, San Diego Union, 9:1-3. Old Fair will honor military bodies at "closing program"; diplomas to be presented to Cavalry, Marines and Coast Artillery Corps in recognition of their service toward making the 1915 Exposition a success; ceremony to be held at 3:45 p.m. in Plaza de Panama on December 31; a salvo of aerial bombs will announce beginning of "free joy" on Isthmus at 6 p.m.; patrons will become owners of dolls that were sold at from \$3.00 to \$7.75 at the Fair grounds throughout the year at a "doll scramble" arranged for Café Cristobal.

December 29, 1915, San Diego Union, 9:6. President Davidson praises Women's Board; last session is held.

December 30, 1915, San Diego Sun, 1:8. \$40,000 to be asked for Exposition in taxes; special levy proposed by Council; will be submitted soon; money is in addition to \$96,000 allowed by charter.

December 30, 1915, San Diego Sun, 9:1. Ready to close Ol' Man 1915; Exposition plans complete; great crowds expected here.

December 30, 1915, San Diego Sun, 9:2-3. Closing Exposition Program.

December 30, 1915, San Diego Union, 5:3-4. Rush on for Cristobal reservations; "Broadway Follies," a girl show, to be held; flock of pretty girls to dance at Fair as old year dies.

December 30, 1915, San Diego Union, 14:2. Montana to have big 1916 exhibit; directing commissioner Hezelbaker arrives to arrange farming, mining displays.

December 31, 1915, San Diego Sun, 1:7-8, 2:4-6. Howdy, New Year; 1915 Adios; help tear off that lid at Exposition!

December 31, 1915, San Diego Sun, 2:4-6. Long before the shrieking of the largest siren whistle in the world and the opening salvo of aerial bombs at 6 o'clock the closing celebration will be underway. At 3:45 p.m., the cavalry, marine corps and Coast Artillery Corps will pass in review in the Plaza de Panama. At 6 o'clock, the din of the big whistle and bombs will announce the opening of the reign of fun and entertainment.

December 31, 1915, San Diego Union, 1:6, 4:8. Merry fete to mark close of 1915 Fair tonight; bombs and big siren will announce celebration opening; elaborate program.

The closing of the Panama-California Exposition tonight will be merely technical. The gates will not be closed until the same date a year in the future, but the Panama-California International Exposition, with new and greater exhibits in the same matchless buildings and grounds will automatically begin as the old one ends.

Elaborate presentations have been made and all is in readiness for the celebration to begin at 6 o'clock p.m. Throughout the day, however, it is expected thousands will pay their last visit to the Exposition as it has been. This is the last day, the last opportunity to go and view the exhibits, more or less familiar, and yet perhaps not wholly known to any one person.

December 31, 1915, San Diego Union, 4:6. Chamber of Commerce praises Fair officials in resolution adopted at meeting.

December 31, 1915, San Diego Union, 4:1. EDITORIAL: Last Day of the 1915 Exposition.

After a year of success that surpassed the hopes of its most sanguine friends, the Panama-California Exposition comes to an end today, and tomorrow it will be succeeded by the Panama-California International Exposition, which will remain open during the coming year. It is only fitting that the last day of the Exposition of 1915 should be the occasion of festivities that will commemorate the prosperous career of that great enterprise, and an elaborate program to that end has been prepared. It is not doubted that as large and as enthusiastic a throng will be present at the closing ceremonies as was that which witnessed the brilliant opening of the Exposition last New Year's Day.

The people of San Diego have every reason to entertain kindly sentiments toward the Exposition that is about to close and toward all who have been instrumental in promoting its success. For decades to come there will only be pleasant memories of the great enterprise and of the liberality and courage that made it possible in spite of conditions that were for a time almost disheartening. Of course, it is usual to base on hard commercialism estimates of the success of an enterprise of this sort. Thus regarded, the Panama-California Exposition can be truthfully said to have more than realized the expectations of its promoters.

But had the large attendance been many times greater and the receipts correspondingly larger, the pecuniary advantage thus gained would be a small matter in comparison with the great services that the Exposition has rendered to the people of San Diego. It has given them an impressive object lesson of the fact that by working in harmony and courageously surmounting obstacles they can achieve results of which a much larger and wealthier community might well be proud. Scarcely less important has been the service that the Exposition has rendered by making San Diego and its advantages known to tens of thousands of persons who previously, perhaps, scarcely knew how to pronounce the city's name. They have been here in multitudes during the past year, and there is reason to believe that they were as charmed with San Diego as with the most beautiful Exposition ever held in the United States.

The people of San Diego should be present as a community at Balboa Park today and tonight. The occasion may well be one of the carnival festivities that are planned to celebrate a triumphant success. Tears were shed, it is reported, when the San Francisco World's Fair closed its doors. There will be none at the passing of the San Diego Exposition of 1915. For it will renew itself under its broader title during the year to come --- the same Exposition, but more comprehensive in scope, and, if possible, more beautiful than before.

December 31, 1915, San Diego Union, 5:4. Santa Barbara Chamber of Commerce in favor of sending exhibit to San Diego for 1916 Exposition.

MISCELLANEOUS NOTES FOR PANAMA-CALIFORNIA EXPOSITION

(Sources for the most part unknown.)

San Diego	39,578
Los Angeles	319,198
San Francisco	416,912

Panama-Pacific International Exposition, San Francisco, Calif.

Opened	February 20, 1915
Closed	December 4, 1915
635 acres	
41 nations and 43 states represented	

Panama-California (International) Exposition, San Diego, Calif.

Dedication Ceremonies, Midnight, December 31, 1914

Spreckels Organ Dedication, 9:00 p.m.

Cost of organ itself \$33,500.
 Popular Symphony Orchestra conducted by Chesley Mills.
 200-Peoples' Chorus under direction of Willibalt Lehman sang "The Heavens are Telling" from Haydn's **The Creation** and "Unfold Ye Portals" from Gounod's **Redemption**.

Band Concerts by Panama-California Exposition began in Plaza de Panama at 11:00 p.m.

Described as "the only outdoor organ in the world" . . . A big organ at Chautauqua, New York, stood in an open-air pavilion.

Cabrillo Bridge

Work began September 16, 1912
Carpenters, concrete men and steelworkers
Nearly 1,000 feet long, including approaches
40 feet wide with a 24-foot roadway and an 8 foot walk on either side
Highest point above canyon 120 feet

Buildings

140 acres of main buildings

Alameda and Santa Clara Counties Building

Commerce and Industries (Electric) Building: colored cornice of crimson and gold

Employee cottages: east of Midland Drive.

Fine Arts Building: inlaid wood ceiling on exhibit hall on lower floor.

Indian Village: 10 acres.

International Harvester: 240,000 square feet of space.

Kern and Tulare Counties Building

Mill with a capacity of 8,000 feet of lumber board measurement; built on grounds; equipped with facilities for rip, crosscut, planing and scroll or band sawing; located midway on the grounds.

Nevada Building: cost \$40,000 for building and exhibit.

Sacramento Valley Building: imposing pillars along front in back of which was a deep alcove; woodwork within great hall was of burned pine.

Sacramento County

Solano

Tehemma

Eldorado

Glenn

Yuba

Colusa

Shasta

Plum

Placer

San Joaquin Valley Building

San Joaquin

Stanislaus

Maders

Merced

Fresno

Kings

Calaveras

Mariposa

Southern California Counties Building

Los Angeles
San Bernardino
San Diego
Ventura
Orange
Riverside

Utah Building: surmounted with two large cupolas in red tile and four smaller pinnacles grouped around them at the corners.

Cavalry

Troops A, B, D and M of First Cavalry occupied a model camp on western slope of Switzer Canyon, east of Isthmus Gate; headquarters, tents, troop streets and stables were located in the vicinity of Indian Village.

Marines

Fourth Regiment of U.S. Marines, under command of Colonel J. Pendleton, Jr., stationed in lower plateau; purpose to show the visitor the real life of the American soldier and sailor.

Exhibits

Arizona in 1916 had an exhibit in the Pan-Pacific Building

Australia and New Zealand in 1916 had exhibits in the Pan-Pacific Building

W. L. Cleveland of Los Angeles exhibited roadgraders, concrete mixers and tractor engines in Tractor Building.

Pioneer Paper Company had exhibit in the Varied Industries Building in which roofing material manufactured by the concern was subjected to intense heat and water to illustrate its lasting qualities under different conditions.

U.S. Forest Service had 600 square foot exhibit in New Mexico Building.

Isthmus

5,000 foot frontage

Captain balloon skyrides, Ferris wheels, merry-go-rounds, roller coasters, Circling the Way, Climbing the Yelps.

Thomas P. Getz - Story of the Missions presented through painted scenery and scenic effects.

Hawaiian Village - native huts, Hawaiian foliage, natives in dress of years ago; women gave the Hula Hula and other dances of the islands; poi, awa and other native drinks and dishes were served; Ernest Kaai, Hawaiian music featured.

New York Motion Picture Studio

Frank Salmon's Pala Gem Mine - showed how premium stones were found in San Diego County and prepared for market.

West side going north: Alhambra Cafeteria, News Stand and Kelp Goods, Smith & Cowden Candy, Kelly Game, Imperial Art Gallery, Peanuts Pavilion, Exposition Motor Chairs, Neptune's Wonderland, Palaise de Danse, Doll Pavilion, Hawaiian Village, Temple of Mirth, Cider Mill, Carousel, Racing Coaster, Smith &

Cowden Candy, Shooting Gallery, Observation Wheel, Panama Canal Extravaganza, Captive Balloon, Painted Desert.

East side going north: War of Worlds, Imperial Concessions Ice Cream, White House Café, Skee Ball, Baseball Game, Cawston Ostrich, Spanish Restaurant, Fresh Fruit, Japanese Street of Joy, German Rotisserie, Gem Mine, California Missions, Panama Film Company, Bean Put, Joy Wheel, Chinatown, Postcard Building, Orange Juice, Cane Pavilion, Motordome, German Rotisserie, Dairy Building, Climbing the Yelps, Deep Sea Diving, Circling Wave.

Grounds & Plants

Brick red bougainvillea clambered up over the arches of the arcades and onto the roof.

Floral rug at lower end of Plaza where at various seasons of the year new blossoms appeared
Two great cages in Botanical Building from which came the songs of the linnet, the thrush and the canary.

Rows of fig, date, apricot, olive, avocado and apple trees planted in model farm and beneath them rows of peas, beans, potatoes, artichokes, onions and cabbages.

Acacia baileyana planed in Canyon Espanol.

Nursery: for the large trees a style of box enclosure was devised so one or two sides could be removed easily and the whole box used time and time again; jars and crocks thrown away by hotels and steamship companies were used for small plants.

Farmer and family lived in the model home.

A potpourri rose garden, planted east of the Marine Camp, was in charge of Mrs. Jesse C. Knox.

“Rose trellis” or wire fence surrounded Exposition compound.

Parking

Patrolled parking at south and north gates; attendants garbed in a rainbow caballero uniform, assisted in parking and stocked gas and oil while visitors were away.

Only vehicles in grounds - a small motor chair, known as “electricquette,” carried two or three people at a speed of three and a half miles per hour.

Transportation

Department of Tours of the Chicago, Union Pacific and Northwest Lines operated tours to the California Expositions.

Transcontinental Garage Services Incorporated of San Diego marked highway from San Diego to Kansas City with guideposts directing the tourist to San Diego, arranged for garage and hotel service for motorists along the way, and issued a complete guide along the trail to be available at Kansas City and other places of entry.

Zoo

Groups of animals scattered throughout Balboa Park

1911 - deer and bear pens located near Cabrillo Bridge on west slopes of Canyon.

1914 - 13 elk kept in a 20-acre enclosure in Canyon running through Howard Tract outside the Exposition grounds

1916 - Group of animals owned by Mission Bay Corporation exhibited opposite Indian Village on Park Boulevard in a series of cages; consisted of lions, tigers, bears and monkeys

January, 1916, California Garden, Vol. 7, No. 7. Monthly Excursion Through Exposition Grounds, by G. R. Gorton.

Adjoining the Southern California Counties' Building on the north is a replica of an old English formal garden --- not of any one in particular, but nevertheless of the type. However, the designer, Captain Gray, says that when he planted the grass strips which form a part of the borders of each flower bed, he had in mind the grass walks in the famous Kew Gardens. Here the grass walks would not be practicable, so the idea was adapted to fit the changed environment.

The symmetrical boxed cypress placed at regular intervals throughout the garden, the formally pruned borders of Crimson Rambler Roses and of *Myrtus communis*, the latter suggested the box borders of the old world, together with the *Dracaena indivisa* set exactly in the center of things, all intensify the formality of design.

The two beds nearest the building are almost entirely of shrubbery, including masses of *Hypericum grandiflorum*, conspicuous for its clusters of small yellow flowers, now coming into bloom. *Salvia splendens* is used to furnish a note of bright color in both beds. Besides these two, shrubbery has been used in each of the flower beds to lend a bit of variety.

On the side of the garden is a colorful bed of *Penstemon* in mixed colors, combined with *Blue Ageratum*, *Agathaea coelestis* (the tiny blue African daisy). The shrubbery group of this bed contains the variegated form of *Veronica Purple Queen*, *Duranta plumieri*, the Golden variegated *Euonymus*, and *Arbutus unedo*, the Strawberry tree. The bed next adjoining is of *Blue Ageratum* and *Poinsettias*, and *Alyssum Little Gem*, the shrubbery used being *Raphiolepis ovata*, the Japanese hawthorn, which, true to its native home, is to other Southern California shrubbery as the Japanese dwarfed Cypress is to the Monterey Cypress.

The last bed on this side contains Zinnias and Dahlias in many colors, later on to be supplemented or succeeded, as the case may be, by *Gladiolus*, *Mrs. Francis King* --- one of the best. *Leptospermum laevigatum*, *Veronica imperialis* and *Pittosporum viridiflorum* occupy the corner of the bed. On the east is a bed of Gertrude Pearson Geraniums, with a similar group of shrubbery. In season, this bed will blossom forth with *Gladiolus America*. Another bed of *Penstemons* and *Agathaeas* adjoins this, varied with a *Ficus Australis* and the variegated *Veronica Purple Queen*.

Next south are *Gaillardias*, the Indian Blanket Flowers, edged with *Pyretherum aureum* (Golden Feather). This bed will also contain *Gladiolus Mrs. King* when their time comes.

Again to the south, the bed of Petunias and Shasta Daisies will, at Easter time, be augmented by a fine mass of Easter Lilies. This is rather far to look ahead, but it offers the pleasure of anticipation. A large *Musa* graces the corner, and relieves the planting from being too flat.

A bed nearby is carpeted with *Lemon Gazania*, well-named Peacock Flower; not that Peacocks are yellow, but because the markings on the base of the petals suggest those on the peacock's plumage. Grouped around the *Phoenix canariensis* at the corner of the bed are *Veronicas*, both the *Purple Queen* and *Imperialis*.

The rose beds on the east and partly on the north side of the garden contribute on inconsiderable part to the charm of the whole, and even now make quite a respectable show of bloom, suggestive of what they will be when the warmer months come.

Conifers have been quite extensively used throughout the entire landscaping of the grounds surrounding the building, and there will be found many different species to delight the lovers of this great order of trees.

Under some *Cedrus deodara* (the Himalayan or Mountain Cedar), *Casuarinas*, etc., at the northeast corner of the building, the ornamental strawberry (*Fragaria repens*) has been quite successfully used as a ground cover.

The open court which overlooks the garden is itself a beauty spot. In the corners are grouped *Muehlenbeckia platyclados* (against the building), flanked with *Begonia ororata*, *Mme. De Lesseps* and others, combined with such ferns as *Woodwardia*, *Pteris tremula*, the well-known *Nephrolepis tuberosa*, etc. The charm of the place is further enhanced by hanging baskets of *Asparagus Sprengeri* and vases of *Rhapis humilis* guard the entrance to the building proper.

If the visitor is a lover of gardens, we assume that he has visited this one before entering the building, so he is now ready regretfully to leave the court and proceed to view the marvels of the English walnut elephants and creamery butter cows, prodigiously large fruits, vegetables and stories, together with the other wonders which are there displayed. When, in due time, he leaves by the south entrance, he passes through another court or patio, much larger than the first and distinguished, to the mind of the horticulturists, by the masses of *Chorizema illicifolia*, which surround each of the *Chamaerops excelsa* (the most dwarf of all fan palms, by the way), which occupy the corners of the patio. This place is further distinguished by that fact that the last exhibition of the Floral Association was held there. Baskets of *Asparagus Sprengeri* hang from the arches, and form a pleasing contrast to the white stucco.

The planting across the front of the building contains several specimens of interest. On the east of the entrance, almost concealed by a group of *Acacia verticillata*, *Grevillea thelemanniana*, *Casuarina stricta*, etc., a specimen of Lawson's cypress trees tries to be seen. A large *Melaleuca* is an interesting feature of the group. West of the entrance there is more *Acacia verticillata* and *Grevillea thelemanniana*, a fine specimen of *Crataegus lalandi*, a little past its best, but still good. Very conspicuous and striking are the *Wigandias* occupying the center of the group, two species of this genus being represented. There are what Professor Stevens would call "accent plants," which is a very apt way of classifying this type of subjects.

The southwest corner of the building is embellished by a good specimen of *Ficus Australis*.

The Botanical Building is still in holiday attire. *Poinsettias* greet one everywhere from out of the foliage of other plants. *Azaleas*, particularly the much admired *Niobo*, and excellent white, *Star Cinerarias*, *Primula obconica*, *Cyclamen* in many colors --- in fact, all the plants which one expects to see at holiday time were there at that time, and are still worth seeing.

Pansies, blue, yellow and white, have succeeded the border of *Vernon begonias* on the esplanade facing the Music Pavilion, and the cannas north of the California Building have had to give place to stocks, planted in solid colors, which ought to make a gorgeous effect when their time to bloom arrives.

January, 1916, California Garden, Vol. 7. No. 7. Pickings and Peckings, by the Early Bird.

Like many another bird, I am distinctly pleased that our Exposition is to be maintained another year and hope that readers of this magazine will take the unique opportunity of studying the wonderful vegetation there displayed, and that the powers that be will see their way to having color slides made of the most striking things. Economy is our present day fetish, coming a little like locking of the door after the horse was gone, for it is undoubtedly born of rather light pocketbooks, and is a necessity, but it is to be hoped that means will be forthcoming to accentuate the wonderful out-of-doors side of the Fair.

I cannot refrain from asking what is being done about a Californian wildflower display; something really compelling that will just make our visitors gasp? It could be planted this month and would have all the better chance as the first crop of weeds would be killed. What is going in the canna beds back of the California Building? Would not it be very appropriate if these were filled with our own flowers? Would not that plot look better with low growing stuff? I like cannas but I understand that back east they have them for breakfast, dinner and tea and then decorate ballrooms with them. The Sweet Pea is peculiarly California; the seed is grown here for the world, and at San Francisco some wonderful ones were grown by our specialist

Morse. Are we going to have a big show of these? Why not get some of the seed men to make an annual display?

Of course, it is too late for lots of things and we don't want lots of others, but there is time enough to do a whole lot. Probably our most efficient Park Board with their ubiquitous Superintendent Morley have thought of all this and much besides. (I hope Mr. Morley will understand that the ubiquitous is intended to be complimentary.) There is quite a decent handful of use now who want to be Californian so badly that it almost hurts, and to those who have not reached that stage let it be said that strangers expect us to be so and are sorrowful when we are not. We did not have any display of our marvelous Matilija poppy, one of the marvels of the West that is treasured elsewhere as beyond the value of orchids. It is hard to start, some say, but surely that does not excuse our Balboa Park with its thousands of odd acres not having an acre or two of them. In the course of conversation lately the canyon on Sixth street, whose mutilation was to make us all rich, and its future treatment came up, and it was suggested that the Matilija poppy should be planted freely in the bottom and that the sides should be filled with Ceanothus and Rhuses, and as time went on native bulbs, the Calchortus and Fritillarias, and vines like the Lathyrus splendens and wild clematis should be added. In the bottom could be kept real damp the Cardinal Lobelia would be gorgeous and the various mimulus and penstemon offer wonderful possibilities.

Considering the progress made in the Park the last few years almost anybody ought to be satisfied, and this is in no sense criticism, only following the intense desire to be Californian. We have pines and cypress, eucalyptus and acacia till you cannot rest, but these are the things one sees in every Pacific park where climate allow, and under and among them grow the omnipresent shrubbery. Do we have to have these everywhere? The question is asked in all humility because I have seen the Herculean labor involved in getting ready for planting, and perhaps it does seem extravagant to plant a native shrub in a hole that cost a barrel of giant powder, but I would like to be able to say to the stranger whose ears I had filled with fleets of merchant men sailing away with cargoes of back country products, "Now let's both have a rest and walk four blocks and see with futile loveliness was here before those elegant structures covered it up." The stranger might not always be impressed, but then he could be told how the street was cut through in spite of the opposition of some cranks and a right about face would disclose some pleasing smokestacks.

Of course, I think that someday the city offices will be up there in the Park, and others think they should be but are timid about saying so. I am outspoken because no one pays any attention to me and I cannot do any harm even if I do no good. I like to shut my eyes and see a white group of buildings on that hill, looking like Temples, approached by graceful curves, a center and an eminence. One day I was talking to a quite sensible person, not given to fits at all, and I mentioned this notion and he said to my intense surprise, "I have often thought of that but there is not room for the proper treatment in front, the city must buy the blocks on Fifth street." Since then I have adopted his vision and someday it will be a reality, then ships coming into the bay will see a monument worthy of the superbly unique situation, and know that the city must be somewhat worthwhile.

A long way ahead you think? Not a bit of it. The city that dug up millions for an Exposition to run a year, the following year was a happy afterthought, could do wonders for a permanent and equally unique civic center if it wanted to. When the Exposition is over, what then? Are we going to sit still and pose as the one city that kept an exposition running two years? We shall tackle something else big, and there are signs that the big thoughts of cities tend towards civic centers and the like. San Francisco is putting millions into one, and when citizens generally identify themselves with their city they will want it to have of the best, just the spirit in any well-ordered family. Oh, yes, we want sewers and paving and a host of little things, besides the ever agitated water question. They will all come, and now, at the New Year, it is just as well to stir the taxpayer into protest at a distant prospect, so that he gets used to the idea by degrees, and one day he will make a slip and talk of our new civic center and then he can never go back to the same position of objecting again. Further, it is only fair to the occupants of the blocks between Sixth and Fifth that will be taken over to give them plenty of notice to seek other locations.

January 1, 1916, San Diego Sun, 1:8. 7:1-4. Joyous throng welcomes 1916; attendance not the equal of last year's; celebration centered on Isthmus attractions; 100 newsboys staged a comedy-burlesque on north band stand of Isthmus at 9 p.m.

“We’ve had a good year in San Diego,” Davidson said. “The new year is going to be more successful. San Diego’s exposition is international in scope now. It has long been the most beautiful, it is now the most complete exposition in the world.”

WELCOME 1916! While great bursts of aerial artillery flashed across the sky, sirens blew, horns tooted, and a pandemonium of noise awoke the echoes of the California night, the great throng of merry-makers that had packed and jammed its way onto the Isthmus at the Panama-California exposition lifted its voice at midnight last night, in one great resounding cheer for the passing of the old year and the coming of the new.

Three bands crashed simultaneously into life, and the air they played was humanity’s song of friendship the world over, “Auld Lang Syne.”

Although attendance at the exposition was not the equal of the celebration last year, the gay festivities that marked the opening of the second and greater year of San Diego’s fair set a record here in point of enthusiasm.

From early in the evening, when the crowds gathered on downtown streets amid a deafening din, until 1916 had been welcomed in at the exposition, at the cafes, and on the downtown streets, one glad, happy thought was foremost in every mind. This thought was of the wonderful opportunities made possible to the city by the Harbor of the Sun by the immense international scope of the exposition that was born in 1916.

And last night at the exposition, while the wonderful buildings of San Diego’s Spanish Dream City, lit by the radiance of one of the most elaborate displays of fireworks ever attempted, echoed with the shouts and laughter of thousands, practically every man, woman and child in San Diego felt in their hearts that the new year is to be one of the most prosperous and successful in the history of the city.

It was a New Year’s celebration long to be remembered.

Last night, for the first time during the year, every attraction on the Isthmus was free to all. That this fact was known to just about every boy and girl in the city, and to grown folks too, made itself evident early in the evening. Hundreds of happy families came in early in order to avoid the rush, only to find that the crowds were already assembled. There was room for all, however, and before the night was very old, youngsters who couldn’t stay too late to view the celebration had the time of their lives riding the merry-go-round, speeding around the Figure 8, hitting at the baseballs, wandering through the gem mine, and otherwise having the time of their lives.

The preliminary program began at 3:45 o’clock in the afternoon, the cavalry, coast artillery and marine corps, Uncle Sam’s defenders whose presence through the exposition year had meant so much to San Diego, paraded on the plaza. In recognition of the hearty cooperation of the military branches of the service during 1915, President Davidson of the Exposition presented the commanding officers of the various branches with diplomas. The presentation was preceded by a short speech, in which Davidson thanked the boys in blue and khaki for their generous assistance.

Promptly at 6 o’clock, a din of whistles and sirens announced the formal opening of the festivities. With the music of three bands to put joy into the hearts of the carefree throngs, the march to the Isthmus was started.

Aerial bombs and fireworks early in the evening notified all San Diego that the celebration of the passing of the old year had begun in earnest and it wasn’t long after dinnertime before the crowds began jamming the gates.

The fun was well underway at 9 o’clock when the crowds made a sudden break for the north bandstand of the Isthmus. Here more than 100 newsboys, with the assistance of scores of their friends, had

made all arrangements to stage a grand comedy-burlesque boxing tournament. The earnest, eager spirit of the newsies as they put on their entertainment soon became the spirit of the crowd that was watching them. Applause was generous, laughter was spontaneous, and everybody enjoyed the bill immensely.

And when the newsies were through, back trooped the gay, happy throngs to the Isthmus concessions.

It took a **Sun** man several hours to try to determine just which amusement enterprise was the most enjoyed by folks last night. And at the end of that time he was forced to give it up as hopeless.

Everybody, it seemed last night, had heard of the wonders of Hawaiian village, of the sweet-voiced singers from the sunny isle of the Pacific, and of the plaintive music of their native instruments. The line in front of the Hawaiian village concession was a long one and the singers within sang and played as they had never sung nor played before.

Then there were the wonders of the Cawston ostrich farm. Lots of folks who thought they knew all there was to know about the strange, old, long-legged bird visited the exhibit and found out how little of the ostrich industry in California they really knew.

As a hush suddenly fell upon the great crowd a few minutes before midnight, the costly display of fireworks redoubled its splendors in the midnight skies. Aerial bombs sounded. And then cheers arose as 1915 slipped into eternity.

At that hour of celebration probably not a single person on the exposition grounds was happier than G. A. Davidson, president of the exposition and one of the main factors in the exposition's success.

What Davidson saw, and what every loyal son and daughter of San Diego saw, too, was a greater, more magnificent, more splendid, and more marvelous exposition rising at the stroke of midnight, from the ashes of the old.

The noise and merrymaking, the fireworks and siren blasts at midnight carried a single meaning to all. Men and women who cheered the old year out saw in their mind's eye the thousands of visitors who will pass through the exposition city in the new year. Everyone at the exposition last night was thinking of the numerous exhibits from the exposition in San Francisco that will charm all who pass through the gates here during 1916.

"We've had a good year in San Diego," Davidson said. "The new year is going to be more successful. San Diego's exposition is international in its scope now. It has long been the most beautiful, it is now the most complete exposition in the world."

And Davidson's words, in spirit, were taken up and cheered by thousands while the bands played "Auld Lang Syne" last night.

While the New Year was being welcomed on the Isthmus, folks who could afford to plunk down \$5 a seat were enjoying music, gayety and revelry at the Café Cristobal on the exposition grounds. With the dining room elaborately decorated with lanterns, streamers and pennants, the café presented a lively scene. Wine flowed freely; care was banished, for the time being at least, and dancing was the order of the night.

A feature of the entertainment at the Cristobal was the Broadway Follies, a chorus of young women especially imported from the north for the occasion.

Outside of the exposition grounds, too, New Year's festivities were observed in many of the downtown cafes, many of the merrymakers taking dinner downtown and later visiting the exposition.

Downtown streets were noisy and merry with holiday crowds until the rain started falling about midnight.

While San Diego's New Year's celebration last night was voted on all sides today as the most successful ever held here, hundreds of out-of-town visitors, who came here for the celebration, were still in the city today. Hotel lobbies were crowded at noon and many of the visitors had announced their intention of spending some time giving San Diego and the exposition the "once-over."

"It was a great celebration," said everybody who took part last night.

"And judging from the number of tourists already coming to San Diego, it's going to be a great 1916," echoed all loyal San Diegans today.

January 1, 1916, San Diego Sun, 2:1. Thousands of San Diegans celebrating the first day of the New Year were to hear Madame Schumann-Heink and Ellen Beach Yaw sing at the Organ Pavilion at 3 p.m.; all seats to be free; military parade from center of town to Exposition beginning at 10:30 a.m.

January 1, 1916, San Diego Union, Annual Edition (The annual edition is in several sections which are not classified by number or name and, therefore, they bear the same page numbers. The only way to check which pages belongs to which section is by reading the original.)

1:1. Opened midnight, December 31, 1914 and closed December 31, 1915; attendance for year about 2 million; record by months given; highest attendance for any one month was 301,937 for July.

1:1-7, 2:4. Finest exhibits of northern Exposition secured; Committee overwhelmed with offers, selects best collections only.

Visitors to the Panama-California International Exposition at San Diego during the year 1916 will see the cream of the exhibits that were at San Francisco last year --- new exhibits that were at neither of the expositions, and an entirely new arrangement of some of the exhibits that were shown at the San Diego Exposition in 1915.

First in importance and extent are the United States government exhibits --- they covered 197,000 square feet of space at San Francisco. More than a week was spent by the San Diego exhibits committee in going over this great exhibit, scattered as it was through all the buildings of the Exposition --- in an effort to make a selection of those things that best suit the needs here and are most interesting from the visitor's point of view. Such a selection was made.

From the navy department are some of the most interesting guns --- new models of field pieces like those now used in the European war --- models of famous ships and the wonderful panorama that so excited Secretary Daniels, a revolving perspective --- a lighted model frame containing every ship that ever flew the American flag as a vessel of war. The Bonhomme Richard, flagship of John Paul Jones leads, and from her are inclined all the ships down to the very latest, the wonderful California super dreadnought. Spectators stand before it and with apparent ease pick out this and that famous ship, even to our own good cruiser San Diego. There is a large amount of extremely interesting material in this section. Supplementing this exhibit, the old battleship Oregon will be anchored in the bay probably most of the year.

Federal Progress Shown

Treasury exhibits include those showing the mints and the progress in the care of public health; those from the war department, the most approved methods of destroying life by military operations. The war department exhibit will include a new six-inch howitzer, made in the United States, an exact counterpart of the deadly guns so much used in Germany; a great tank showing submarine mines and the method of blowing up a ship; tanks showing the dry docks and the method of docking vessels; shells of all sizes; solid shot and armor plate with holes punched clean through it; working models of the great dredges and docks at Pearl Harbor and elsewhere; wonderful lighted

panoramas of famous battles; and last, but by no means least, a complete cartridge-making plant, one that turns our cartridges as fast as two men can pack them.

From the department of commerce come the different styles of wonderful lighthouse lenses, all operated by electricity. The first light ever shown on the Pacific coast, the latest wonder that is to be installed at Galveston are in this collection and the two gun, such as are used in life saving, and a number of other most interesting exhibits are included.

Indian Work Displayed

The department of the interior sends a wealth of material pertaining to the management of Uncle Sam's vast domain, not the least interesting of which is a complete arts and crafts section showing the work of boys and girls in Indian schools of the country, and giving opportunity to see the progress of the Indian race by comparing this exhibit with the archaeological exhibit already installed at our Exposition.

Agricultural department exhibits include the absorbing weather bureau apparatus --- the new forestry department, the great collection of harmful patent medicines with their analyses, to say nothing of the complete results of Dr. Wylie's quarter century of work and investigation; the soil investigations of the department, the plant investigations, all the bugs ever heard or dreamed of, and their use and disuse are shown; the animal industry section, the biological survey --- in fact, so many things of an interesting character are included that it is impossible to enumerate them.

Each of the government departments contributes the most interesting features of its departmental work --- selected by the committee --- so that the visitor in 1916 will not be compelled to go over the whole of the Exposition to see it all, nor to see it all in hunting those things most interesting to him.

Roads Exhibit Promised

As a feature, Professor Bramson-Scribner, chairman of the government exhibit board, is bringing the wonderful good roads exhibit, with its models showing roads from the famous old Appian Way to the boulevards of San Diego County and the other paved roads of California. Another wonderful feature is the fisheries' exhibit, which, if the fishes can be gathered again, will be installed here.

Chief among the foreign exhibits is the big Canadian display --- a collection that has been brought together by years of effort and has been shown in nearly every quarter of the world. All embracing, it covers the Dominion of Canada from Saint Johns, N. F., to Prince Rupert, from the Arctic Ocean to Winnipeg. Nothing has been unimportant and nothing too important for the use of this exhibit. It occupied one of the largest buildings at the San Francisco Exposition, and will be housed here in the great Commerce and Industries Building.

Next in magnitude to the Canadian exhibit is that of France.

This exhibit is a wonderful collection of art works, relics of famous French men, personal things they used --- tapestries of the wonderful Gobelin weave, paintings, sculptures, and all the wonderfully beautiful things the most artistic nation in the world could gather in one exhibit to be shipped out of the country. The United States government sent a war vessel to carry this exhibit from France to the United States, and will return it to France in like manner. If the complete exhibit comes here, it will be housed in the California and the Fine Arts Buildings. The value of the tapestries and relics, art works and specimens is estimated at more than 7,000,000 francs.

Art Works Wonderful

The Italian exhibit will consist almost entirely of art works, sculptures and paintings, beautiful marbles, most exquisite carvings, gold, silver and silk work, bronzes and plasters. The catalogue of one exhibitor who is coming here is a large book in itself, the illustrations in which are works of art. Other Italian exhibits are from the Turin and Rome expositions of 1911 and are very complete and interesting.

Netherlands will send a very complete exhibit, including paintings and the quaint Dutch forms of art that have been preserved through hundreds of years of changing fashions and conceptions of art work in other countries. Netherlands made a very complete horticultural exhibit at San Francisco, the flowers of which will come here.

In point of size, the Pan-Pacific exhibit comes next. This includes material from Australian, New Zealand, Borneo, Sumatra, Java, the islands of Oceanica, the Philippines, China, Japan, Hawaii and all the other great nations living on the shores of the Pacific Ocean. The wonderful fisheries exhibit of Hawaii will be included. For variety of exhibits, the Pan-Pacific group is unsurpassed by any single exhibiting nation.

Cutlery to be Exhibited

Germany will be here with a very comprehensive exhibit of manufactures, textiles and metals, including the wonderful Haenkel cutlery exhibit.

Among others are Russia, Switzerland, some Japanese and Chinese art exhibits, Mexico, Spain --- with a wonderful collection of art and manufactures --- and several of the countries of Central and South America. Dr. Dahne has just returned from Brazil with an enlarged exhibit.

Half a dozen commissioners of foreign countries are awaiting permission from their respective governments to come, they having recommended that their exhibits be shown here.

As to the domestic or so-called commercial exhibits, the committee made a selection of less than 20 from the entire San Francisco Exposition, the idea being to invite only moving or process exhibits to take part this year. Among these are Ridgeway's Tea Company, Simmons Hardware Company, with its wonderfully complex cutlery exhibit, Herter Looms Company, with its silk weaving machinery, Niagara Maid Company, the Gantner-Matter silk thread reeling machinery and weaving looms, the Fearn Company, with its silk-weaving machinery, Oregon City Woolen Mills Company, Belding Brothers silk culture, Baker's Cocoa, Quaker Oats Company, Stollwerk Company, Lyon and Raas glace [sic] fruit exhibit, Rosenblatt Brothers, with their wine fountain, Standard Felt Company, Cadillac Motor Car Company, Ford Motor Car Company, with an assembling plant, and _____ of like interest.

Poor Exhibits Excluded

The problem has not been to secure exhibits, but to keep from taking a lot of exhibits that would prove uninteresting. Some of the old exhibitors will stay will newly arranged exhibits, and the commercial section of the Exposition, simply will be more interesting than at San Francisco or any other exposition.

Some of the foreign exhibits already have arrived and are warehouses, some are en route, and some are being packed for shipment. The great government exhibit was brought here on the collier Mars, which vessel is carrying the United States government exhibit to Panama.

President Davidson, Secretary Penfold, Mayor Capps, and I. G. Lewis passed many days in San Francisco selecting the exhibits wanted and arranging for their transportation here and, if interest by spectators as shown at San Francisco is any criterion, when assembled the exhibits will surpass anything shown in this country. As an evidence of the care taken in this selection, it may be

stated that from the entire Zone at San Francisco, only three concessions were invited to come here, and from the great manufactures building only three exhibitors were invited.

1:7-8, 6:4. Twin celebrations usher in New Year and 1916 Exposition; trains and boats pour visitors into city; plans for coming 12 months assure great prosperity of Harbor of the Sun.

Combining two great civic celebrations --- that of opening the Panama-California International Exposition and the festivities always in force New Year's Eve --- thousands of San Diegans and their visitors crowded the Isthmus and its amusement places and Exposition cafes last night.

Hardly less auspicious than the opening of the Fair a year ago, the celebration of last night was another of those highlights in San Diego history by which future time will be marked. A happy, carefree crowd roamed over the grounds, giving vent to their enthusiasm for the continuance of our Exposition in countless ways.

More than 2,000,000 visitors came to San Diego during 1915. An equal number is expected in 1916. Popular demand and the hearty support of all Southern Californians conspired to keep the Exposition open an additional year. The first year's Exposition has been held, records have been broken, and San Diego accomplished it practically unaided. It will be the first time in history that an Exposition has been open to the public every day and every evening for two years.

Fair Grounds Alive With Light and Color

As **The Union** went to press for the annual edition, one great purpose of which is to direct the attention of the nation to the continuance of the Panama-California International Exposition and the future possibilities of Southern California, as well as the more concrete facts of what has been accomplished in the past, the Exposition grounds were alive with light and color. San Diegans and their visitors --- many thousands of them --- were celebrating the passing of the old year and the welcoming of the new --- which gives promise of being the greatest since Balboa landed on the glittering sand of a newly-found empire.

For several days past trains and boats to San Diego have again carried record-breaking loads of passengers. Hotels are filled. A greater number have come from Los Angeles, San Francisco and smaller cities of the state to help San Diegans celebrate the continuation of the Fair. It was largely due to the hearty support and cooperation of these Californians that the continuation of the Exposition was made possible.

Yesterday afternoon a great review of officers and men of marine barracks, the First cavalry and the coast artillery was held at the Plaza de Panama at the Exposition. The review was featured by the presentation of diplomas given the various branches of the military services stationed at San Diego during 1915. President G. A. Davidson made the presentation speeches and highly complimented the men on their loyalty.

Aerial Bombs Discharged

Festivities at the Exposition began at 6 p.m. with the discharge of a volley of aerial bombs and the blowing of the world's largest siren whistle. The sound of the whistle and the discharge of the bombs were scheduled to continue up to midnight, when there was to be a gathering of all the noise-making devices produced by the ingenuity of man. They were all to be turned loose at a single minute before midnight and continue several minutes after the birth of the new year.

Admission to the Isthmus, the great white way, or the Joy Street of the Fair, was free to all. Every concessionaire on the street had thrown open his show place to the public free. Staid adults, who have paid strict heed to convention in times gone by, were found riding of the Toad-stool and

throwing baseballs at "Kelley." Others were merrily riding over the bumps of the roller coaster or watching hula dancers at the Hawaiian Village.

With all Southern California behind the 1916 venture, with all working as a unit for one purpose --- that of eclipsing 1915 records in 1916 --- the new year promises much for the prosperity of the Southland.

State Exhibits Continued

All the state buildings, with the possible exception of Nevada, will continue their exhibits. All of the exhibits will be augmented by the cream of their exhibits which were shown in San Francisco, which makes certain bigger and better displays at San Diego than during 1915.

Railroads have rallied royally in support of the 1916 Fair and have made heavy contributions in cash and have arranged summer transcontinental rates which will make a visit to the Pacific coast look attractive to Easterners and Middle Westerners. Citizens of Los Angeles, anxious to have the Exposition continued, also have given liberal financial and other support. This also is true of the different California counties, whose exhibits without an exception, will be continued.

The great Canadian exhibit, perhaps the best of the kind ever made at any Exposition, is on its way to San Diego from San Francisco. It will be housed in one of the largest of the main exhibit buildings. Russia will exhibit, as will Italy, and several other countries. While a positive statement cannot be made regarding the French exhibit, it is considered that it also will be a feature of the foreign exhibits.

Government Exhibits On Way

Appropriations from congress, sufficient for the upkeep of the government exhibit shown at San Francisco have been made. The exhibit was packed and shipped several days ago and a great part of it already is here and a corps of workers are busy installing it. The government has also promised to have as many war ships in the harbor during 1916 as possible. The marine camp at the Fair will be continued, as will the cavalry camp, and a camp of infantry is to be established. Each division has its band, which gives promise of many musical treats during the year.

Doctor Humphrey J. Stewart, an organist of fame, brought to San Diego to play the Spreckels open-air pipe organ, the only instrument of its kind in the world, will play daily throughout 1916. The organ was given to the people of San Diego by John D. and A. D. Spreckels.

Shortly after the opening it is expected a new troupe of Spanish troubadours will be engaged, and on every day of the new year the sweet voices of the señoritas and the mellow music of the stringed instruments will be heard in various parts of the grounds. This form of entertainment is conceded to fit perfectly into the romantic Spanish atmosphere of the Exposition, and it elicited as much favorable comment from Eastern visitors as any form of entertainments during the past year.

Many Conventions Secured

Committees of citizens have been busy for some time lining up conventions for 1916. It now looks as though San Diegans will be hosts to at least twenty large conventions before the passing of a twelve month. San Diegans love to play the role of hosts. During 1915 they made themselves popular with representatives of practically every city in the United States.

The Isthmus, the amusement street of the Fair, will also be continued. A solid mile of amusements, many of which have never been shown at any Exposition, will be ready for the entertainment of the visitor. The Painted Desert, the Indian exhibit of the Santa Fe Railroad, will be continued. This exhibit has become known all over the country for its excellence and probably will prove a larger drawing card in 1916 than in the past.

A full attendance of the new executive board of thirty-one members, representing all Southern California, is expected by President G. A. Davidson today, when official ceremonies will take place. Members of boards of supervisors of the various California counties have announced their intention of being present. Governors of all the western states participating have been invited and will probably attend.

Schumann-Heink To Sing

The celebration of today will begin at 10:30 a.m. with a grand military parade, which will start from the foot of Broadway. The parade will march through the principal downtown streets and to the Laurel Street entrance of the Exposition. First will come a battalion of the coast artillery corps, then a battalion of sailors, headed by their band, two companies of the marine corps and band, a squadron of cavalry, two companies of coast artillery corps reserves, division of naval reserves, Army and Navy cadets and band. The official formal ceremonies of the day will follow immediately on the arrival of the parade at the Exposition Plaza de Panama.

Directors of the new Exposition will be hosts to officers of the army and navy at a luncheon to be given at noon at the Cristobal Café. The luncheon will take place immediately after the military and naval pageant. Rear Admiral Fullam, Pacific reserve fleet commander, will review the pageant at the Plaza de Panama with other officers of the army and navy and directors of the Exposition.

Perhaps the greatest appeal of the entire celebration program will be the concert by Mme. Ernestine Schumann-Heink and Mme. Ellen Beach Yaw at the Spreckels Organ Pavilion at 2 o'clock in the afternoon. All seats will be free.

1:1-8, 3:6. Distinguished visits make tourist Mecca of Sun City.

2:1-8, 3:1-8. Nation's papers spread fame of San Diego; excerpts from articles in **The Nation**, **National Magazine**, **Dayton News**, **Christian Science Monitor**, **Review of Reviews**, **United Presbyterian**, **Photo-Era**, **Buffalo News**, **Philadelphia Inquirer**, **Saturday Evening Post**, **Boston Herald**, **Evanston**, **Illinois Index**, **Peoria Journal**, **Philadelphia Public Ledger**, **Chicago Post**, **Boston Journal**, **Dayton Journal**, **Peoria (Illinois) Journal**, and other newspapers and magazines (note: microfilm of this article is extremely hard to read).

2:1. Davidson to pilot Fair another year; San Diego welcomes world to Exposition, by G. A. Davidson.

2:2-5. Year's music sets new standard; organ charms thousands; by W. W. B. Seymour.

With the Christmas services at the Exposition as its crowning event, the greatest year of music San Diego has known passed into history last night. This afternoon concerts by Madame Schumann-Heink and Madame Ellen Beach Yaw, two singers whose fame covers both continents, will furnish a noteworthy beginning for the 1916 season.

In quality as well as quantity, the music of the year has set a high-water mark for San Diego activities and the educational result has been evidenced in a demand by local music lovers for performances of greater excellence than ever before.

A glance over the artists who have appeared in this city shows it to be almost of metropolitan pretensions: Schumann-Heink, John McCormack, Fritz Kreisler, Marcella Craft, Efram Zimbalist, Florencio Constantino, Ellen Beach Yaw, Mrs. H. H. A. Beach, Carrie Jacobs Bond, George Hamlin, Charles Wakefield Cadman, Alys Larreyne, Julia Culp, Tina Lerner and Cecil Fanning, all names familiar to followers of music in American and Europe and all standing for the highest in the melodic art.

It is difficult for one to realize without having figures at hand how much music San Diego has heard during the past year. The greatest source of musical enjoyment has been the Spreckels organ at the Exposition where 359 (?) regular recitals were given, in the course of which nearly 3,000 selections were played on the noble instrument. Thirty-three outside soloists and ten San Diego soloists appeared at the organ, either in separate recitals or in connection with organ recitals. These do not include the soloists and singers who appeared at the organ in the four performances by the People's Chorus for the members of the Popular Symphony Orchestra which played on Dedication Night; the members of the San Diego Symphony Orchestra and the San Diego Choral Society in the Ninth Symphony; the singers in the military mass on Catholic Day; nor those of the Ogden Tabernacle Choir, the Haydn Society of Chicago, or the Chicago Sunday Evening Club Choir.

Six musicians were honored by having days at the Exposition named after them, as follows: Schumann-Heink, March 22; Carrie Jacobs Bond, June 1; Mrs. H. A. Beach, June 23; Charles Wakefield Cadman, July 6; Marcella Craft, July 14; and Ellen Beach Yaw, August 24.

Twenty-three San Diegans were soloists at teas held in the women's headquarters in the California Building.

Numerous concerts were given in the Blue Room in the Southern California Counties building, at which many outside and local artists appeared.

Concerts by the bands of the Fourth Marines, U. S. N., and the First Cavalry, U. S. A., were almost daily occurrences throughout the year, and for many months the Exposition has its own band. Visiting bands were the Creatore (?) band, which played an engagement of two weeks; the Australian Boys' Band, here on week; the famous Kilties Band, here nearly a week; and the Los Angeles Police Band and the Coronado Tent City Band for one day each only.

Three colored quartets, the Tuskegee Singers, the Dixie Singers, and the Hampton Quartet were among the visiting organizations.

In point of attendance and prominence of the artist, the concert given by Madame Schumann-Heink at the Spreckels organ on the night of June 23 easily has first place in the year's events. More than 25,000 heard the great diva singer. She was assisted in her program by Toni Hoff, accompanist, Dr. Humphrey Stewart, organist, and Mrs. Frieda Foote Chapman, violinist. Eight thousand children thronged the Plaza de Panama at the Exposition on the afternoon of March 22 to hear the wonderful contralto sing especially for them, and formed a guard of honor for her on her way to the Spreckels organ, where she was presented with the keys to the city and made an honorary citizen of San Diego.

Marcella Craft and Ellen Beach Yaw were two other sopranos whose recitals at the Exposition drew thousands of people, and John McCormack, the noted Irish tenor; Fritz Kreisler, the world's greatest violinist; and Efram Zimbalist, the Russian violinist; Florencio Constantino, the great Spanish grand opera tenor; George Hamlin, the well-known American tenor; Charles Wakefield Cadman, the pianist and composer of Indian songs with Princess Tsianina Redfeather, soprano; and Claude Gotthelf, pianist; Julia Culp, the noted Dutch lieder singer, all names to conjure with, drew audiences running into the hundreds and thousands.

Fifteen prominent organists played at the Spreckels organ, and one, Dr. Sidney Durat, of Cincinnati, at the White Temple. The guest organists at the Exposition included such men as Clarence Dickinson, William Carl, Richard Keys Biggs, Harold Gregson of Australia, and William Gomph of Buffalo.

In point of picturesque setting and impressiveness, the ceremonies at the Exposition Christmas night exceed any other musical event of the year. In no other portion of the United States

could such a program have been given out of doors, and in no portion of Southern California could it have been give more successfully than in San Diego. A balmy night, with stars shining softly overhead, served to increase the Christmas spirit that pervaded the 5,000 people who attended.

Three vested quartets stationed at different points on the Plaza de Panama sang Christmas carols, the echo of one quartet scarcely dying away before another quartet took up the succeeding verse. Before each singer blazed a tiny candle, and the effect was that of three choirs singing in a giant cathedral.

This effect was heightened when at the Spreckels organ I the Plaza de los Estados, the listeners gazed upon of a hut of thatched palms within which were figures of the Madonna, the Christ Child, the Three Wise Man, and Joseph. There in the semi-darkness, lighted only by the blaze of the giant Christmas tree nearby, the choristers in vestments of red and white, sang of Christ's birth to the silent throng, and the great organ pealed forth its noble tones, while in the western sky hung a long star of exceeding brightness.

A feature of this entertainment was that is was managed entirely by women, and it is difficult to conceive that men could have exceeded their handiwork. Great credit for Exposition music is due Miss Gertrude Gilbert, chairman of the music committee of the Woman's Board, and to Mrs. L. L. Rowan and Mrs. Florence Schinkel-Gray, who assisted her throughout the year.

When the music lover turns from the Exposition, he discovers that in other parts of the city, the musical results of the year are of importance. Sixteen artists from other cities gave recitals in San Diego theaters, hotels and churches. There were eight concerts by orchestras, give performances of oratorio by choral societies, two recitals by visiting string quartets and one by a local string quartet, and two concerts by a children's orchestra. Six outside artists appeared as soloists at these orchestral and oratorio performances. In addition, there were half a hundred musicales and recitals given by local artists, the records of which are not available to the writer.

Four concerts were given during the year by the Popular Symphony Orchestra under the leadership of Chesley Mills. This organization is having its troubles with finances at present, but it is sincerely to be hoped that the lack of dollars will be remedied in time to save the orchestra from dissolution.

The People's Chorus, under the leadership of Willibald Lehmann, has given four concerts at the Exposition and one at the Spreckels Theater during 1915, and has scheduled for early in 1916 a performance of the oratorio "Samson." The Spreckels Theater performance was that of Haydn's "Creation." Its success led to a repetition of it on Easter Sunday at the Spreckels organ, the result being of even greater artistic merit. To this organization, in conjunction with the Popular Symphony Orchestra, was given the honor of assisting in the dedication of the organ on last New Year's Eve.

Four concerts were given by the San Diego Symphony Orchestra and four by the San Diego Choral Society, both of which are under the leadership of B. Roscoe Schyrock. Two performances of Mendelssohn's "Elijah" were given and one performance of Handel's "Messiah." Another performance of this latter oratorio will be given tonight.

Perhaps the most influential and prosperous musical organization in the city, and the one which has brought more high-class artists to San Diego than any other institution this year than any other institution, except the Exposition, is the Amphion Club. Under the leadership of Miss Gertrude Gilbert, president, ably assisted by Mrs. Florence Schinkel Gray and Mrs. Edward T. Lannon, vice president and secretary respectively, the club has brought to San Diego during 1915 Fritz Kreisler, the king of violinists; Julia Culp, the Dutch contralto, who has the reputation of being the greatest lieder singer of the present day; Tina Lerner, the brilliant Russian pianist; Efram Zimbalist, the Russian violinist who is giving Kreisler a hard fight for supremacy among the fiddlers of the world; the Soellner String Quarter, an organization whose rise in the musical world has been

phenomenally rapid; and Myrtle Elvyn, an American pianist of unusual technical attainments and great promise.

In addition to its concerts by outside artist, the Amphion Club has held a number of concerts at the Wednesday clubhouse, at which the leading local musicians have given the programs. The result has been a series of concerts of high standing and an increasing appreciation by San Diegans of the worth of musicians who live in their midst.

An organization which has worked quietly but nevertheless effectively for the best interests of San Diego music is the Mendelssohn-MacDowell Club. Its members meet once a month or oftener in various homes and its programs are given exclusively by local musicians. These programs have been of unusual excellence and the meeting have afforded the club members an opportunity for much musical education as well as for social recreation.

Another musical organization which should be mentioned is the Children's Orchestra, under the leadership of Chesley Mills. This orchestra has had only two public appearances, but on each occasion its work was of a standard superior to many adult orchestras.

The Tuesday noon free musicales of the Y. W. C. A. also have contributed no little share to the education of the San Diego public in musical appreciation, especially among those who have been so unfortunate as not to be able to hear many of the great artists who have given concerts in this city. The leading artists have freely donated their services to this worthy cause.

Of the many performers and teachers in San Diego, who are working quietly and bravely to inculcate high ideals on the youth of San Diego and to raise their standards of musical performance, space forbids mention. They are an earnest and conscientious band to whom the high principles and the beauty of their calling mean more than its monetary returns.

What the financial benefit of music has been to San Diego in 1915 is incalculable. Music, it is contended, has drawn more people to the Panama-California Exposition than any other single attraction, and the result of the concerts given there, as well as in other parts of the city is evidencing itself daily in the demands for musical instruments and for performances of a high standard by professionals. L. S. Behymer, the Los Angeles music manager, who has had more than a quarter of a century of experience in his line, recently estimated that San Diego has invested in music more than a million and a quarter dollars. Even he admits, however, that he cannot estimate in dollars and cents the return which this investment is bringing in advertising, education, and the raising of artistic and esthetic ideals in the present and the coming generation.

THE SPRECKELS ORGAN

When on the night of December 31, 1914, John D. Spreckels presented to the people of the city of San Diego the magnificent organ and pavilion that stand in the Plaza de los Estados of the Panama-California Exposition, few persons in the throng that stretched away from the donor as far as he could see realized what hours of delight that gift would bring to San Diegans and the strangers within her gates. Few could foresee that the pick of organists and singers of America would be eager to be heard at the organ, that its fame would be heralded throughout the western hemisphere, that the eye of the camera would project its likeness upon the pages of every great newspaper and magazine of America, and that the musicians of two continents would look back with pride upon their recitals with it as events in their careers.

These are not idle boasts. There are facts and figures to prove them, and logic to back them. With the exception of the Exposition itself, the Spreckels Organ, as it is called, has done more than anything else in San Diego to make this city known and discussed throughout the United States. And as far as the musicians and music lovers (who are legion) are concerned the organ in a way takes precedence over the Exposition.

The Spreckels Organ is the only outdoor organ in the world. There is nothing similar to it in Europe, and the nearest approach to it in America is the big organ in Chautauqua, New York. But the Chautauqua organ stands beneath an immense open-air pavilion and is only slightly more entitled to be classed as an open-air organ than is the big organ in the Tabernacle at Salt Lake City.

Being the first of its kind, the Spreckels organ was, in a sense, an experiment. To secure a given volume of sound from an outdoor instrument is a much more difficult problem than is presented by an indoor instrument. In the latter, the builder may count upon the acoustic properties of the building to help attain the needed volume and intensity of sound is dependent entirely upon the strength of the vibrations which are produced in the instrument itself. For instance, at the San Francisco Exposition players upon the big organ in Festival Hall discovered that they might not use the full power of the instrument because the flood of sound was overpowering. The Spreckels organ, on the contrary, can be played at its full power and, with favorable winds, its tones have been heard a full mile or more distant.

Another experiment was in the problem of preserving an equable temperature. Even in San Diego, with its ten-degree thermometer, changes of temperature must be guarded against in this instrument for a change in temperature of five or six degrees will, by expansion or contraction, alter the pitch of the metal pipes. This problem was partially solved by double walls in the organ pavilion, but this was not enough, and it has been necessary for Organ Tuner R_____ to go over some of the pipes every day to insure their accurate pitch.

In the construction of this instrument are to be found all of the up-to-date features and conveniences which the great organ builders of the world have invented. Its action is electrical and, therefore, instantaneous. It has every variety of stop and every resource for tonal coloring known to the art of organ building. There are four manuals, or keyboards, not counting the pedals, eighty-six stops and eight pushbuttons to each manual by means of which the organist can make any changes of stops he desires in a fraction of a second. Each of the four manuals is in reality a keyboard for a separate organ, with its own stops and pipes. Counting from the top down, there are the solo organ, the swell organ, the great organ, and the orchestral organ. Each can be used alone, and any or all may be linked together, with no more exertion on the part of the player than is required to play one. The same strength of touch is required, whether the organist plays the softest pianissimo or the most tremendous fortissimo. The electrical power does the extra work for the organist. A twenty-horsepower motor furnished the power that operates the stops, the pipes and the windchests. The depression of a key forms an electrical contact which instantaneously opens the valve of its individual pipe and instantly closes the valve when the pressure upon the key is withdrawn. Originally, it was necessary to have wire cords and strings to manipulate these pipe valves. All the organs in Germany are built with this cumbersome obsolete action. The burdens which it places upon the performer can be realized by anyone who has played a melodeon using the octave double stop.

Apart from the value of the Spreckels organ to San Diego as a means of spreading its fame abroad, and infinitely more important to those who see in the culture of a city its greatest advancement has been the educational value of this noble instrument to the citizens of the city, this in spite of the fact that owing to the mixed character of the crowds that have attended the recitals during the last year and will attend them this year, Dr. Humphrey J. Stewart, the official organist, has made no special effort to educate his hearers to an appreciation of organ classics. Later, when Dr. Stewart may calculate upon the greater number of his audience attending all his recitals, he intends to take up the educational side of his work through chronological programs, annotated programs, and other approved methods.

During its brief existence of one year, the Spreckels organ has sent forth melody more times probably than any other organ in America in a like period. Only seven times in the 365 days of the year has Dr. Stewart been forced to abandon his daily recitals because of weather conditions. Daily and Sunday the recitals have been given diligently by him or other organists. Eight numbers were played at each recital making a total of 2,864 selections played during the year at these recitals.

alone. In addition to this, Dr. Stewart or his substitutes took part in a number of special programs, such as the night when Madame Schumann-Heink sang to 20,000 people, and when Marcella Craft, George Hamlin, Hugh Allen, and Alys Larreyne were heard in concert. Others that may be mentioned are the dedication concert on the night of December 31, 1914, the performance of "The Creation" by the People's Chorus on Easter Sunday, the Military Mass on Catholic Day, and Christmas night. Also the organ was played at special concerts by persons other than the regular organist, among them the concerts by the Tabernacle Choir of Ogden.

During the year the following guest-organists have played on the organ:

Dr. Frank Wilbur Chase, Sewickly, Pa.; Dr. George Whitefield Andrews, Oberlin, Ohio (two recitals); Clarence Dickinson, New York (two recitals); Warren D. Allen, San Jose (one week); Dr. Roland Diggie, Los Angeles (three recitals); William J. Gomph, Buffalo, N. Y. (two weeks); Richard Keys Biggs, Brooklyn (two recitals); Ernest Douglas, Los Angeles (three recitals); Miss Caroline Lowe, Cleveland, Ohio; Harry L. Vibbard, Syracuse, N. Y. (two recitals); Dr. William C. Carl, New York; Harold Gregson, Auckland, New Zealand (three recitals); Will C. MacFarlane, Portland, Maine; Walter Handel Thorley, San Francisco (seven recitals); Archibald Sessions, Los Angeles (two recitals).

Outside artists who have sung at the organ as part of the recital programs, or in whose concerts the organ was used were:

Madame Schumann-Heink, contralto; George Hamlin, tenor; Marcella Craft, soprano; Cecil Fanning, baritone; Mlle. Alys Larreyne, soprano; Hugh Allen, baritone; Ethelynde Smith, soprano; Eleanora Patterson, contralto; George von Surdam, tenor; Mollia Byerly Wilson, contralto; Alexander Gray, baritone; Effie Stewart, soprano; Earle Meeker, baritone; Edwin House, base; Haydn Jones, tenor; Alice Brown, contralto; Dr. Victor Laurent, baritone; Mrs. Mary Linck Evans, soprano; Claudia Albright, contralto; Ellen Beach Yaw, soprano; Florencio Constantino, tenor; George Alamand, baritone; and M____ Buckler Stevenson, soprano.

Local artists who have sung at the organ are:

Miss Blanche Lyons, soprano; Mrs. L. L. Rowan, contralto; Dean Blake, baritone; Frederick Beyer, tenor; Mrs. J. M. O'Toole, soprano; Mrs. J. Perry Lewis, soprano, Otto J____, baritone.

In addition to concerts on the dedication night and on Easter Sunday, the People's Chorus also gave two Sunday afternoon concerts during the year, and the San Diego Choral Society one. Other artists and organizations who appeared in concert at the organ, but without the assistance of that instrument will be treated of in another article.

As illustrating the variety of the organ recitals, it may be mentioned that selections by 150 composers have found places on the programs. According to the number of different selections, the most prominent of these composers were: Bach, seven; Beethoven, six; Chopin, three; Brahms, three; Dubois, seven; Diggie, five; Foote, five; Grieg, four; Gounod, four; Guilmant, eleven; Handel, eight; Mendelssohn, twenty-three; Mozart, two; Rossini, two; Raff, two; Ruby, three; Stewart, ten; Schumann, three; Salome, six; Schubert, four; Saint-Saens, seven; Spohr, three; Verdi, two; Wagner, nine. In the number of times a composer was represented on the program, Mendelssohn led with ninety-six appearances, while Wagner came second with sixty-nine. The most popular number was Mendelssohn's "Spring Song," which was played twenty-nine times; next came Schumann's "Traumerei," which was played seventeen times.

During the year requests have been made for many selections which were not given because of their non-suitability to the organ. The wonderful "Fire Music: and the "Ride of the Valkyries" from Wagner's "Die Walkure" are in this class, as is also the "Tannhauser March." Many of Tchaikovsky's compositions have been found unsuitable also. The composers of these

selections have depended largely upon rapid violin passages for their principal effects. As yet no organ device has been invented which will serve as an acceptable substitute for fast and sweeping string work.

2:3. Women's Board spends active year; "Persimmon Room" at Exposition proves entertaining center.

The Women's Board of the Panama-California Exposition was appointed as a committee by the president of the board of directors to represent the women of the city and county of San Diego, and to care for Exposition fields especially feminine. Appointed as 20 members, it was added to by 13 of the directors' wives, who accepted the invitation to become working members and, ex officio, by the wives of mayors during 1915, Mrs. Charles O'Neill and Mrs. Edwin M. Capps. Its work, looking back over 1915, has centered in three places: the women's reception room known as the Persimmon Red Room in the California Building; the silence room on the lowest floor of the same building, which has rested many feet and heads from all over the United States; and the children's day nursery, maintained in a little bungalow beyond the gorgeous canna gardens on the north of the Prado.

The furnishing of the first, the reception room, is the work of Miss Alice Klauber and her committee, and from the ardent daily questioning of visitors and succeeding letters from every state in the Union, has evidently furnished to many men and women ideas for their own drawing rooms, tea rooms, and sales rooms, in large and small corners of the country. It is maintained by a house committee, headed by Mrs. Jarvis Doyle, whose daily care has been the keeping of fresh flowers and fruits, typical of the prodigality of California, and shrubs and plants gathered as well from the sands of the desert --- as the much-noticed Crucifixion thorn --- as from the peaks of nearby mountains. At Thanksgiving time, even vegetables _____ San Diego's county abundance: strings of picturesque red peppers, great pink pumpkins, which one little girl visitor hailed as "those giant baby tangerines." The room has been hostessed by ladies from every organization in the county, and the Hostess Committee from the Woman's Board, Mrs. A. E. Frost and Mrs. J. G. Burne, feel that their acquaintance has been enlarged and enriched by hundreds of gracious women who for the past 365 days have greeted and chatted with thousands of guest of the Exposition who daily pass through the women's rooms.

It is here that the cordial hospitality of California has been manifested to many distinguished guests of every world-interest: the arts, politics, organized labor, men and women high in every conceivable and diverse walk of international life. These teas, simple in their appointments, were under the direct responsibility of Mrs. George McKenzie and her committee, and, while tea was served to the nucleus of distinguished guests, it invariably included every guest in the room, and that number in an afternoon has reached a thousand. Such welcome, in its spirit and action, goes far to perpetuate in the minds of Eastern visitors the well-known phrase "famous California hospitality."

The music for varied afternoons in the Persimmon Red Room has been in charge of Miss Gertrude Gilbert and many local San Diego musicians.

Downstairs, on the same floor as the Pioneers' Room and the lovely chapel of St. Francis, is the Silence Room, its conception and equipment the work of the brains and hands of the Woman's Board, and itself the special protégé of the president, Mrs. Ivor N. Lawson. Furnished in soft pinks and grays by Miss Klauber, presided over from 9 to 5:30 by a graduate nurse, not a day has gone by when its cots, beds and wicker rockers have not rested women, weary with much sightseeing. Sometimes only a footbath or cup of hot tea, sometimes expert medical care were required, and of the four thousand or more cared for, it has been to the amazement of all guests that no fee was ever accepted. Perhaps, among women guests, no impression of the Exposition's courtesy and completeness was a better silent advertisement than this.

A later need, unprovided for by the Exposition, appeared and was met by the Woman's Board in the children's day nursery. Financed by the committee, under Mrs. Uriel Sebree, the equipment of the little brown cottage was entirely provided by donations, from cribs to toys and perambulators, secured by Mrs. Julius Wangenheim, Mrs. Arthur Marston, Mrs. E. Thelen, and Mrs. Frank Von Tesmar. Untiring in their efforts to provide for the baby visitors, the nurse in charge reports from her checking cards 800 babies in the months since April, when the nursery was started. What expense of time, thought and money it has meant to the devoted and resourceful children's committee, has been recompensed by the relief of many a weary visiting mother and the content of the visiting baby.

The Woman's Board, as appointed, designated the following officers and heads of standing committees which have served without charge throughout the year:

Mrs. Ivor N. Lawson, president; Mrs. Uriel Sebree, first vice president; Mrs. A. E. Frost, second vice president; Mrs. T. B. Wright, corresponding secretary; Mrs. Earl Garrettson, recording secretary; Miss Alice Halliday, treasurer; Mrs. George McKenzie, entertainment; Miss Alice Klauber, furnishing; Miss Gertrude Gilbert, music; Mrs. Jarvis L. Doyle, house; Miss Daisy Barteau, organized labor; Mrs. B. D. Saville, Federated States; Mrs. A. E. Horton; Mrs. J. G. Burne; Mrs. Clark W. McKee, San Diego County representative of Woman's Auxiliary of Southern California Panama Expositions Commission; Mrs. A. S. Bridges; Mrs. E. Thelan; Mrs. Frank Von Tesmar; Mrs. Ernest E. White; Miss Gertrude Longenecker, education.

2:3. Museum succeeds Exposition as cultural center.

The San Diego Museum was established on the Exposition grounds for the purpose of cooperating with the city, through its park commission and with correlated societies, in making the benefits of the Exposition perpetual. The park buildings and scientific collections are the permanent possession of the people. By developing a great cultural and recreational center the Exposition was made a permanently productive investment.

The scientific collections that were acquired with the assistance of the Archaeological Institute of America and the Smithsonian Institution are in the museum. Of great initial value, they have now become priceless. Private collections made at great expense can, after serving the purpose of the owners, be kept intact forever and multiplied in value by depositing them in the public museum. Valuable collections are in the museum as gifts and loans.

The museum is not a mere depository for collections, but an active educational institution. Lecture courses, art exhibitions, concerts, pageants and moving pictures are regular museum activities. Scientific laboratories in affiliation with national institutions are maintained. These laboratories are of great service to the schools, courts and social agencies.

2:4-5. Ubiquitous Exposition president amazes tourists by speedy changes and calm demeanor.

The rush of functions and courtesies extended on behalf of the Panama-California Exposition to prominent visitors by President G. A. Davidson personally during the year would have racked the nerves of any man less evenly tempered and placed him in a rest cure sanitarium indefinitely.

Imperturbable in temperament, polished in manner, quietly if not slowly spoken, those who observed him on various occasions during a day and evening wondered where he showed the speed that enable him to appear so calmly sedate, in the proper garb of the hour and occasion, without seeming to have disappeared at any interval from the round of events.

One could see President Davidson at 10 o'clock receiving some governor and party in high fiat and formal morning dress in his reception room in the California Building and see him a few

hours later taking the governor to luncheon on the grounds, but wandering over to the delightful Pepper Grove, one would see him there, as if by magic, making the guests at some society picnic at home, in flannels and soft white hat. Hurry, if one would to the open-air organ pavilion, and he would be seen there delivering an address of welcome to some visiting organization in the proper formal dress. Hungry, one could wander to a certain swell café on the grounds, and there he would see the president again presiding at some stag affair in dinner jacket, and then, attending some elaborate ball, see him bowing in evening dress.

How was it done? Nobody knew. Perhaps, however, there was a presto-change dressing room with a handy valet somewhere near his office. Anyway, being an Exposition president keeps one busier than work, and there was no pay for President Davidson either.

2:6-8, 7:5-7. Noted manufacturers win merit awards at San Diego Exposition; list given.

3:1-4. States, counties of West add spender to San Diego; northern valley displays State's size.

Extending across the entire north end of the Plaza de Panama stands the Sacramento Valley and Mountain Counties building, pronounced by architects and artists to be one of the most beautiful buildings on the grounds, occupying, as its beauty justly deserves, the most prominent location within the gates of the Exposition.

Within this building is housed an exhibition of the wonderfully diversified products of the Sacramento Valley and its tributary mountain counties. The interior of the building is as unique and artistic as the exterior. An installation of the products of this great valley presents a pleasing contrast to other beautiful installations to be found in the various buildings.

The feature that arrests the eye of the visitor is the impression of space, room, the wide, unobstructed aisles being devoid of the too often congested grocery store features of exposition installation. This liberal use of space was designed to impress the visitor with one of the Sacramento Valley's principal resources, the vast acreage of splendid, unoccupied agricultural land.

The next impression that the visitor will not fail to note is the unique beauty of the native pine wood, from which the various installation features have been constructed. This feature was also designed to exhibit the _____ lumber industry of the mountain section, east of the Sacramento Valley, an industry which totals about \$25,000,000 annually. The only treatment of the wood has been to slightly fume in with a painter's torch, which accentuates but does not change the grain, after which it was treated with a light coat of varnish.

Mineral Resources Shown

Along the broad aisles have been arranged the wonderfully diversified agricultural, mineral and forest resources of this empire in the northern section of California. Beautiful transparencies show the Sacramento River, which flows from the base of Mount Shasta in Siskiyou County to the Bay of San Francisco. On the east bank of this river, ninety miles from San Francisco, stands Sacramento, the capital city of California.

In the Sacramento Valley Building will be found the most complete mineral exhibit at the Exposition. Prominent, of course, is gold, the output of which from this section of California has maintained the state in the position of the leading gold-producing state in the Union since 1848 when Marshall took out the first nugget on the south bank of the American River in El Dorado County, forty-two miles east of the city of Sacramento. Included in this mineral exhibit is every mineral found in California, with the single exception of mineral oil. The grand prize was awarded this mineral exhibit by the Panama-California Exposition jury of awards.

The lumber exhibit, while not large, is interesting, showing the soft wood timber industry, comprising sugar pine, white pine, yellow pine, spruce, fir and cedar. One clear sugar pine plank measures 54 inches in width.

There is installed in this building an exhibit of every agricultural product grown in California, with the single exception of cotton. There is no agricultural product grown in California that does not grow commercially and profitably in the Sacramento Valley and its tributary mountain counties. All agricultural conditions, soil, water and climate are typically Californian. These conditions are as near ideal as can be found in any part of the state.

Representative Board

The Sacramento Valley Building and its exhibit was created and has been maintained by the Board of Exposition Commissioners composed of the following representatives from each of the ten counties exhibiting at San Diego.

(The names follow.)

The building and exhibit has been under the management of C. H. Dunbar of Sacramento, with a staff of assistants consisting of A. B. Barker, Solano; C. E. Robinson, Glenn County; E. G. Atwood, El Dorado County; Clarence Smith, Sacramento County; Evelyn L. Gwinn, Sacramento, and Miss Gertrude Hutchins, Colusa County.

3:1-2. Rice lands yield abundant crop.

One of the most interesting exhibits in the Sacramento Valley building and one that means much to the future, not only of the valley, but of the state of California, is the splendid rice exhibit installed in this building. Rice is one of the leading cereals of the world. There are probably more people who live on rice than any other cereal grown. We consume annually in the United States about 100,000,000 bushels and of that amount 80,000 bushels in imported annually into the United States. About 23,000,000 bushels are raised in the southern states.

In 1909 the secretary of agriculture became convinced that rice should be grown in California. He knew we had the soil and climate. The only unknown quantity was water, and as the most abundantly watered section of California is the Sacramento valley, he established an experimental rice-growing station at Biggs in Butte county. The experts experimented on 100 varieties of rice, finally settling on some half dozen varieties as being adapted to our soil and climate.

In 1911 the first field of 150 acres was planted. It yielded a crop of about 80 bushels to the acre. In 1914 we harvested 15,000 acres of rice, yielding about 1,000,000 bushels. This year we have just harvested 30,000 acres of rice, yielding over 2,000,000 bushels. There are about 300,000 acres of rice land in the Sacramento valley, and an abundance of water available for every acre. The average yield of this crop is about 80 bushels to the acre in California, so that when the entire 300,000 acres shall be in rice, as it will be within the next ten years, the output in the Sacramento valley of this basic cereal will be in the neighborhood of 25,000,000 bushels --- more than is produced in the entire rice area of the southern states. The quality is not excelled in any section of the world where rice is produced.

3:1-7. New Mexico returns rich from display at San Diego, by Waldo C. Twitchell, assistant manager, New Mexico building.

3:8. Montana exhibit boosts state resources; sixteen awards captured at Panama-California Exposition; fine mineral display; paintings of natural scenery and crops decorate building, by L. A. Pyle

The Montana State Building and exhibit at the Panama-California Exposition was made possible by the generosity of ex-Senator W. A. Clark, of Butte, Montana, who donated the building. The exhibit was furnished by the state.

The Montana Building has one of the best locations on the Exposition grounds, being built on the highest knoll, from which there is a beautiful view of the "Harbor of the Sun" and Balboa Park. The building is one of the largest state buildings and was built along lines different from the rest of the Exposition buildings.

The interior of the building shows the most artistic work of grains ever seen at any world's fair. There are beautiful panels of oats, barley, clover, alfalfa and a wonderful frieze of oats, braided straw, wheat, wild grasses and flax.

A large reception room contains a beautiful old-fashioned open fireplace with a rustic mantel made of boulders. The pretty baby grand Starr piano is made of weathered oak to match the rest of the room. Papers are received from all cities and towns in Montana and kept on file for persons visiting the building. The walls are hung with paintings of the Glacier National Park and pictures of some of the finest mountain scenery in the world, furnished by the Great Northern Railway Company. There is also a smoking room for gentleman and a rest room for ladies.

Besides other exhibits there is a fine mineral display. Montana has always been one of the leading mining states in the Union, producing large quantities of copper, zinc, gold, silver, and coal; and recently the third largest gas well in the world was struck in the northern part of the state.

A display of large sugar beets showing Montana's sugar beet, raised from seed grown in Montana. Up until the European war America has been getting its sugar beet seed from Germany. The exhibit includes a display of potatoes that made Montana and the Northern Pacific Railway famous: "the route of the big baked potato." Some of them weigh as much as eight pounds, solid and with as fine flavor as the small ones.

Montana spent the least of any state on its exhibit, and received almost three times as many awards as any of the other states --- sixteen awards in all. Montana was awarded grand prize for agriculture exhibit and gold medals for wheat, oats, barley, peas, flax, grasses, rye, alfalfa, clover, four, brick, graphite, and park exhibit building.

The management of the building in boosting the state has had the advantage of Montana's wonderful 1915 crop. This means winter wheat going as high as 78 bushels to the acre, and a total crop of 40,000,000 bushels; also a heavy yield of oats of an extra fine quality and a bumper crop of the famous Mackintosh wormless red apples. The state as a whole is in the most prosperous condition it has ever been in its history. Copper and zinc mines and smelters are running overtime. Butte, a city of 70,000 population, has a monthly payroll of \$2,000,000. Railroad construction work is starting up and settlers are flocking in from all parts of the United States.

The state with its wonderful natural resources, still undeveloped, needs people and capital, and expects great results from its exhibit at the Panama-California Exposition.

3:8. Continue Fair demand from Southland; San Diego heeds call of California that Exposition run second year.

3:8. Salt Lake exhibit, homelike center.

Known as the home of hospitality, the beautiful building erected and maintained at the San Diego Exposition by the Salt Lake and Union Pacific System was the center of continuous social activity during 1915.

As testifying to the popularity of the building, the Exposition jury of awards awarded the building a gold medal and designated it as a unique structure at the Exposition.

The building itself is as novel as its location and contains a magnificent exhibit room illuminated with photographs and photographic transparencies illustrating the scenic and development features along the Salt Lake Route, the Union Pacific, and the Oregon Short Line. At one end of this exhibit hall is a gigantic bird's eye map in oils, showing the Salt Lake Route and its tributary country, while the other end of the room is occupied by a comparison map of Yellowstone Park as reached by the Union Pacific System.

4:1-2. EDITORIAL: The **Union's** 1916 Annual . . . Another Year of the Exposition . . . A Most Encouraging Outlook.

4:1-4, 7:1-3. Exposition Beautiful triumphantly closes first successful year, by Lewis H. Falk, Director of Publicity, Panama-California Exposition.

Attended by practically 2,000,000 visitors from all quarters of the world, the Panama-California Exposition at San Diego has just rounded out twelve months of operation which will be set down in exposition annals as a distinctive achievement in the world of big endeavor. Like a thoroughbred which has made every post a winning one, the Exposition has made each month of its operation since its opening, January 1, 1915, return snug financial gain. Thus, such forecasts that have been made in the past that expositions at best can be operated only a sort time successfully, have been contradicted. The prophets did not figure with golden climate, wealth of resources or immeasurable pluck and determination.

Three hundred and sixty five days have elapsed since San Diego gave birth to its dream of years, and now, secure in success, this city of big ideas points with pride to its accomplishment, for the Exposition stands as a monument to its daring, business acumen, and liberality. It is not a task of small proportions for a city of San Diego's size to build and operate an exposition which should win unstinted praise from world travelers.

Exposition Attendance Is Cosmopolitan

With Europe's doors closed to tourists on account of the war, the Exposition drew a heavy attendance in its opening month last January, satisfied its patrons, and they went back to their homes imbued with the idea that the sons of the West had built on a high mesa overlooking San Diego an Exposition Beautiful, far different from and in history and so different in detail from the one at San Francisco that the two could not be considered rivals. Through an average attendance which, will not up to expectations, was sufficient to yield a profit, the Exposition was operated January, February and March. The tourist rates took effect in March and soon an appreciable increase in visitors was noticed. Then came May, the last of the spring months, and attendance totaled 179, 818. June gave approximately the same figure, while the vacation months of July and August contributed heavy patronage, July going down as a banner month of 301,937. Throughout the late summer and fall the decline in attendance has been the natural result of the slight decrease in Western travel, but, with the advent of cold weather in the East, travel to the Exposition again increased. According to estimates of Exposition officials, attendance in November was approximately 125,000, while the December's was over the 100,000 mark.

The Exposition has been cosmopolitan in its attendance as well as in its attractions. During the year it has been visited by twenty governors of states in the United States; Vice President Marshall; Colonel Theodore Roosevelt, former president; William Jennings Bryan, former secretary of state; Franklin K. Lane, secretary of the interior; Josephus Daniels, secretary of the navy; Lindley M. Garrison, secretary of war; William M. McAdoo, secretary of the treasury; and scores of United States senators and representatives. Had it not been for important international problems brought on by the European war and the Mexican situation, President Wilson would have headed the list of distinguished visitors. His regret at inability to attend is expressed in a message in which he gives

liberal praise of the perseverance and pluck necessary to building and operating successfully for a year such a laudable Exposition. The United States has not alone, however, contributed all of the distinguished visitors throughout the year, for dignitaries have come from many countries, all to be entertained by President G. A. Davidson, whose devoted to the Exposition has been a large factor in its success. At sacrifice of private business, Mr. Davidson has been a twenty-four hour man on the job throughout the year and his energies were directed toward making the Exposition successful, not for any financial remuneration he would receive, but purely for the love of directing an enterprise which had been associated with since its inception.

As has been indicated, attractions at the Exposition, aside from those furnished by the beauty of the grounds, artistic arrangements and comprehensive exhibits, have been as cosmopolitan as its personnel and patronage. The Exposition has been the common meeting ground of all classes and creeds, likewise the clearing house of ideas for the entertainment of those who will be amused by departures from stereotyped programs. Entertainment has been of a hodgepodge variety, diversity being the keynote. Whether special attractions took the form of an open-air ball at night in the Plaza de Panama, competitive drills by crack military and fraternal organizations, spellbinding oratory from nationally known men, a Shakespeare festival on greensward, or an aerial insanity furnished by some heedless aviator, it was always something new. Thus the Exposition with its diversity was able to attract and amuse everyday those residing in its nearest territory.

Convention bodies in great number visited the Exposition. Practically every line of industry and many of the arts and sciences were represented by these gatherings. Long before the Exposition opening, national organizations seemed to realize the benefits to be derived from choosing the Exposition as a convention ground. Several special trains pouring in convention delegates in large numbers arrived each week and conventions ran the gauntlet of variety from that of the National Association of Ice Cream Manufacturers to the California Teachers' Institute, Southern Section, which had an attendance of 6,000 school teachers from the Southland.

Each holiday was made the occasion of special celebration. To show that the Exposition in its celebration was without comparison by attention in narrow lines drawn by creeds or nations, the observance of the Chinese New Year in February is cited. Then again the celebration of Japan is mentioned. Canada also was given a special day, while each state had a state day. Standing out as distinctive for the influence created for better citizenship was the three-day exhibition of the Liberty Bell. In no place in the country where the Liberty Bell was exhibited on this year's tour was more honor paid to it than at the Exposition. Well did it seem to fit in with the Exposition atmosphere, an atmosphere which reflects in architecture of buildings the early struggles in Southern California shores for the establishment of Christianity and a better liberty.

Children's Fair Successful

Exposition success must not be measured along by work contributed by grownups. Young America had its part to play and well has it fitted in throughout the year, in pageants, parades, festivals and juvenile exercises. San Diego children have worked successfully and a share in the triumph of the Exposition must not be denied them, for at times one was reminded of the Biblical declaration, "a little child shall lead them." One of the most notable examples of child endeavor was shown in the presentation of the Children's Fair, and here again the Exposition achieved another record, being the first exposition to conduct a children's fair. This fair had more than 3,000 exhibits of youthful handicraft in arts, science, agriculture, and mechanics. Leading educators pronounced the display startling and one that well reflected the great advance in recent years in child education.

The Exposition was indeed fortunate in having military stationed on the grounds, for without this important adjunct, there would have been an absence of the proper pomp and ceremony incident to the visits of dignitaries. The military also was a part of daily Exposition life, supplied snap and precision to increase attractiveness of daily programs. On a commanding mesa, just in the rear of the state buildings, the Second Battalion, Fourth Regiment, U.S. Marine Corps, commanded

by Major W. N. McKelvey, established a model camp with the Exposition's opening. At this camp was seen the daily life of Uncle Sam's men and their drills and reviews have done much to give the public a better understanding of military service. In these days when greater national preparedness is being urged, it is but the natural result that Exposition visitors should give the military at the Exposition scrutinizing attention. Through the efforts of Colonel J. H. Pendleton, commanding officer of the regiment, the Marines have been available for many programs throughout the year, while the regimental band has played daily concerts.

Military Plays Part

With its camp pitched just outside the Exposition grounds, a squadron of the First Cavalry, commanded earlier in the year by Captain George Van Horn Moseley, and more recently by Major William T. Littlebrant, has taken part in all the military activities. At various times the companies of coast artillery from Fort Rosecrans have participated in the big military turnouts, escorts and parades. The Thirteenth Band, Coast Artillery Corps, which has been a musical attraction during the entire year, took quarters near the grounds in the summer that it might be more readily available at short notice.

But Uncle Sam's land force did not hold all the attention, for frequently the commissioned and enlisted personnel of Pacific fleet warships responded with drills and parades. This was accomplished through the courtesy of Admiral T. H. Howard, who until recently commanded the Pacific fleet, and his successor, Admiral Cameron MacRae Winslow, has established his willingness for a continuance of the navy's participation in Exposition events. Of national importance, one event stands out in luminous light in connection with the navy's activities. This was the visit to the Exposition of 500 Annapolis midshipmen, all of whom made the cruise from the Atlantic seaboard through the Panama Canal to San Diego, the first port of call. Military organizations not in the regular establishment also made official visits to the Exposition, and notable among these were the Richmond, Virginia Light Infantry Blues, the First Regiment Infantry, National Guard, Illinois, and the Salt Lake City High School Cadets.

Music Prominent Feature

In an exposition which is developed with art, it was surely appropriate that music should be given much consideration. Throughout the year, the daily programs at the Spreckels organ by Doctor H. J. Stewart, official organist, have been a pleasing feature. This organ, the greatest outdoor organ in the world, was presented to the City of San Diego by A. B. and John D. Spreckels. In a commanding position, it stands as a monument to their generosity, for the structure and instrument cost \$100,000. This organ has been the scene of many successful entertainments, at times calling the world's greatest soloists and musicians. The concert given by Mme. Ernestine Schumann-Heink to the citizens of San Diego proved a distinct success in the Western musical world. Mme. Schumann-Heink sang to 25,000 people.

On the long list of artists who have appeared at the organ are the names of some of the world's best known singers, musicians, composers, and dramatic stars. A few who have been heard during the Exposition are Signor Florencio Constantino, Ellen Beach Yaw, Carrie Jacobs Bond, Claudia Albright, Hamlin Hunt, Warren P. Allen, Will O. MacFarlane, and Mme. Alla Nazimova. Several times San Diego talent has been heard in musical programs.

Throughout the Exposition year San Diego awaited with keen anticipation its greatest day. This, San Diego Day, was observed November 17 when an attendance of about 40,000 testified to the popularity of the Exposition with San Diegans. In preparing for an exposition, San Diego has much experience with celebrations and public exercises, so it was well equipped to turn a mammoth crowd into the Exposition gates on San Diego Day. Loyalty of commercial San Diego was shown on this day, when all places of business were closed at noon. This city-wide closing also established another record and for the first time since San Diego was a city, excepting on the days required by the state laws, the saloons also joined in the closing movement. Of the many celebrations held at

the Exposition throughout the year, none was attended with such success as San Diego Day. It came at a period when the Exposition could make its success known by its deeds rather than by words. It was a celebration of achievement.

Western Resources

Built for the purpose of exploiting the resources of California and the states closest to it, the Exposition stuck steadily to its purpose throughout the year. It was the point from which information to colonists and homeseekers was distributed. Such information was circulated at the various state and county buildings and by mid-summer an increase in settlement on Southwestern lands was noticeable as a direct result of the Exposition.

In commercial and industrial displays a difference between this and other expositions was noticed. The Exposition marked the departure from the old line of exhibiting where one can of baking powder or one make of washing machine or a certain order of agricultural implement contested with dozens of others for honors. In choosing exhibits for the Exposition displays were solicited only from the leading manufacturers in each line and thus mediocre exhibits were eliminated. The appreciation of this arrangement is shown in the profitable advertising which exhibitors have gained. With only one exhibit from each branch of manufacturing and that one truly representative, visitors were not compelled to divide their attention among rival exhibits in the same line. Thus there was created an inquiry about exhibits which made future business.

Along in mid-year exhibitors put on these best clothes, so to speak, for the jury of awards convened and competing with products and manufactures from all parts of the Southwest, Southern California again asserted its supremacy as the land for the homeseeker. It was awarded the greatest number of prizes and medals for agricultural display, while the northern part of the state was ably represented by Alameda County, which was given fifty-six awards for its display of manufactured articles. This was a greater number than that secured for manufactured exhibits by an county represented at the Exposition.

Police Arrangements Perfect

With liberal attendance on everyday and big crowds pouring through the grounds on special occasions, it had been expected that the usual influx of the criminal element would be noticed. Long before the opening, however, the policing and protection of visitors had been well organized. This important point was placed under the direct charge of Colonel William A. Pinkerton of the Pinkerton Detective Agency. Bunco men, pickpockets and others of the class who follow criminal pursuits were warned that the San Diego Exposition would be a decidedly unhealthy place for them. The warning was sufficient and throughout the year visitors were afforded entire protection and the Balboa Guard, with its plain clothes detail, made a record for efficient policing. Not a single robbery or work of pickpockets was reported while the guards found numerous articles which had been lost and restored them to their owners. In many cases the property was found and delivered to the owner after the Exposition visit had been concluded.

Fire protection was also entirely adequate throughout the year and, while the fire companies from the City of San Diego stationed within the grounds, responded to several alarms, the fire loss was trivial. It did not exceed \$500.

Fair's Efficient Staff

Businesslike arrangements marked the handling of all Exposition business and with the assistance of an efficiency expert expenses were kept at a minimum. In its employment the Exposition had a number of specialists and yet these did not specialize to the degree where they could

not do any other work when the occasion was presented. It is noticeable that there existed between the various departments a cooperation which worked for the Exposition's success, while back of the project to rule on important questions and preside as a sort of watch dog of the treasury was an executive committee composed of San Diego's leading businessmen. It was the members of the committee who discarded through loss much of their private business that they might best serve the Exposition cause. Through the Exposition building and during its early operation H. O. Davis, as director general, was its chief executive. His resignation was tendered and accepted August 1, and E. L. Chapin, who had been identified with the Exposition in important positions for three years or more, succeeded him. Thus, Director Chapin became the direct representative of the directors and the executive committee and all of the various departments which were under his charge. Directors who have held office during the year are: R. C. Allen, Lucius R. Barrow, Frank J. Belcher, Jr., L. A. Blochman, George Burnham, William Clayton, G. A. Davidson, C. W. Fox, D. F. Garretson, Percy Goodwin, C. H. Heilbron, M. F. Heller, H. H. Jones, W. F. Ludington, Arthur H. Marston, J. W. Sefton, Jr., W. A. Sloane, John D. Spreckels, C. L. Williams, Julius Wangenheim, D. C. Collier, F. W. Jackson and E. J. Burns. The executive committee was composed of the following: Frank J. Belcher, Jr., G. A. Davidson, P. H. Goodwin, M. F. Heller, H. H. Jones, C. L. Williams, W. A. Sloane, and E. J. Burns.

History of Fair

A superficial review of pre-Exposition history discloses obstacles confronting San Diego which it surmounted in carrying to completion its dream born in civic enterprise and nursed by liberality of its citizens. The birthday of the Exposition can be considered as September 4, 1909. It was on this date that the San Diego Chamber of Commerce got behind the proposal to have the first port of call hold the official celebration of the Panama Canal opening. Rapidly plans were formulated. San Diego subscribed liberally and voted municipal bonds and the project was launched. The official groundbreaking was held in July 1910.

After the Exposition was chartered and underway, San Francisco entered the field and sent a delegation to Washington to seek government recognition and patronage. Thus San Diego and San Francisco became rivals in this one respect. New Orleans saw opportunity of taking advantage on account of the division and made a bid for the 1915 world's fair.

San Diego withdrew voluntarily that the great event might be held on the Pacific Coast. This resulted in San Francisco having a clear field for her world's fair, but San Diego decided to hold an exposition of vastly different type from that planned for San Francisco. So it went ahead with its plans and made a bid for foreign participation, sending Colonel D. C. Collier, the first president of the Exposition, into the field for this purpose. Various conditions existing at that time made it obvious that the foreign participation at San Diego would be the participation of industrial leaders rather than governments. Thus San Diego early in the project abandoned the idea for foreign government participation.

Old Spain Architecture

The decision to build the Exposition in the 1400-acre Balboa Park, owned by the City of San Diego, was a popular one and in its building those considered the best landscape and building architects were engaged. These carried to successful completion the beautification of the grounds, construction of buildings, an arrangement which as a whole has been set down as a fine example of engineering skill.

It is the architecture of the buildings which strikes the keynote of harmony, for Mission predominates in California. Back to the days of the good Franciscan fathers the architects went for their types, and well did they portray a class of architecture which has attained great popularity in recent years. It was fitting indeed that they should draw on early California history for Exposition building. Throughout the different types it is seen that the Spanish-Colonial predominates. The

Home Economy Building resembles the hacienda [sic] of the Conde d'Heras. In the Indian Arts Building are many suggestions of the Santuario de Guadalupe at Guadalajara.

In the Science and Education Building there are found points resembling the cathedral at Puebla, Mexico, and in the Varied Industries Building there are resemblances to the eighteenth-century monastery at Queretaro, Mexico. The California State Building, of course, bears many resemblances to the beautiful [sic] at Oaxaca, Mexico.

Indian Life Shown

The San Joaquin Valley Building bears an extremely close resemblance to any one of a half dozen of the municipal buildings of Spanish America, although, of course, there are details which originated in the mind of the architect. The building of Kern and Tulare County suggests strongly any number of palaces. The unique building which New Mexico has erected is a copy of the old mission on the rock of Acoma in New Mexico, with a few details introduced from the church of Cochiti.

In the Painted Desert these resemblances are equally marked. The larger pueblos are copies of those at Hopi and Taos and the interior of the lower structure, where the Rio Grande tribes are quartered, is a copy of the ancient Governor's Palace, El Palacio Real, of Ornate, at Santa Fe. The buildings and small structures throughout the Painted Desert are, of course, an exact imitation of typical scenes in the great Southwest.

Throughout the grounds the planting shows an artistic arrangement such as only could come from the hands of a master. It is such a project as Father Serra must have dreamed of years ago when he laid the foundation of California civilization. Crossing the great Puente Cabrillo, the visitor approaches a massive arch, flanked on one side by a rich cathedral, and, on the other, by a plain mission. The cathedral is the California State Building and the mission is the Fine Arts Building. Once inside this gateway, the visitor looks down the Prado, the main street of the Exposition, on one of the most beautiful views ever seen. Lining the Prado are scores of black acacia trees, behind which stand the wonderful Spanish-Colonial buildings of the Exposition. Over the buildings clamber a riot of vines, the rich green of the leaves giving way here and there to bright flashes of color of the blossoms.

Flowers and Romance

Several of the buildings are large but, except for the great dome and tower of the California State Building, standing at the west approach near the end of the great Puente Cabrillo, few are tall. Instead they spread luxuriously over broad spaces on the mesa which looks down on the sea and the strand of Coronado, or back up the fertile valleys to the Sierras, with long cool cloisters and acacias lining their facades. Instead of making streets, there are prados bordered with acacia and lawns and thick beds of gladiolas and poinsettia, and low shrubbery which droops through the arches of the arcades. Up the walls, up to the Spanish domes and towers and the belfries where pigeons nest and mission bells swing, clammers the gorgeous growth of rose and honeysuckle and bougainvillea, the superb vine whose bloom does much to make a fairyland of Southern California. A portal invites one past the cloister, and beyond there lies a quiet patio, green with foliage illuminated by the color of an occasional flowering shrub, murmuring with the soft play of a fountain.

San Diego has an individual interest in the development of the back country, but broader than that interest was the genuine intent of the Exposition to stimulate bigger things, the upbuilding of the entire West, and in this program Washington and Montana and Kansas took as much interest as Nevada and New Mexico and Utah and the other states which may be considered as in the Southwest. Their state buildings were devoted to a sort of follow-up system of the Exposition's program for developing the nation's agricultural resources by methods as novel as the architectural program and as effective.

Back-to-the-Land Movement

The back-to-the-land movement has been urged by pen and brush and oratory. It can be conceded that the country is fairly well aware that there should be a shifting of population from city to country, instead of country to city. It can be conceded that no city man who has made more or less of a failure and his brother who has made more or less of a success in the metropolis alike have a longing to get out of the dust and turmoil and tension of town and into the clear air of the fields. But the land is not occupied, The government has held land shows, but the movement to the farm is not a big one.

The failure of the methods is due to just one thing, the lack of any real information to the possible farmer as to how he was going back to the farm and what he was going to do when he got there. The same is true of world's fair agricultural exhibits which have shown majestic pyramids of oranges, and a great array of other fruits and vegetables and cereals and grasses. None was materially different from those the possible farmer might have seen in his own city at the grocery or produce exchange. There was another significant difference between San Diego's new type and the old type world's fair.

Model Farm Feature

Down the Alameda from that large-scale farm display is the model intensive farm. Many there are in the back-to-the-land movement who can afford to take up 120 or 160 acre tracts, equip them and cultivate them, but many others there are who for financial or physical reasons can do nothing of the sort, but of these men who can see a five-acre tract bearing a variety of fruits and an intensive cultivation bearing still greater variety of vegetables in the soil beneath the fruit trees, if they can see a little section given over to vineyards, another to berries, another to a small poultry farm, if they can see that this tract produces four or five times as much as the same area did under old-style methods and with less labor, if they can catch the spirit of the "little lander," who gets "a sure living and a good profit on a little land," then there is a meaning to them. The effort was to show just such men exactly what they can expect if they are willing to work.

In the center of the model intensive farm is a typical Western bungalow. And while the prospective farmer discovered that modern machinery would save him the drudgery that his grandfather had to bear, the prospective farmer's wife learned that other machinery will save her the drudgery that was her grandmother's. She could see that the modern bungalow has equipment just as complete as the city apartment.

Across the ravine from the intensive farm is an orchard in full bearing, designed to show the operation of the latest type of orchard machinery and across the way is another orchard of citrus fruit, picked from the best orchards of Southern California (?), showing the orange, the grapefruit, the lemon, the kumquat and the other citrus fruits growing alongside the paths. The exquisite fragrance of the citrus blossoms lingers long in the nostrils of him who has sniffed it.

Lesson of Exposition

That is the spirit of all the exhibits, many of them out-of-doors, many indoors in the missions, the palaces, the cathedrals of the Spanish city. The broad lawns, the grove of pepper trees, the patios, the wide stretch of open country abloom, stretching down to the canyons, encourage one mightily. He realizes that this space after all is concentration in a small space of the whole life of the new West and he is filled with a longing to see more, to see the great vineyards of olive and orange, to see the vast apple and cherry country to the north, to roam in the forest reserves and up the slopes of the snow-capped Rockies, and over the agricultural empire beyond. It is typically Western, this, but its great lesson, the utilization of possibilities, is as applicable to the cut-out timberlands of Wisconsin, the neglected lands of the South and of New England. He who is willing to learn can learn plenty, wherever his interests may be.

Exposition year would have been without its light entertainment had it not been furnished by the Isthmus. This, the Exposition's Joy Street, was in previous expositions known as the Pike or Midway, and it was the gathering place of many carnival crowds. Not only did the Isthmus furnish amusement with its standard attractions, but it proved a continued source of revenue to the Exposition and to the concessionaires. Almost innumerable is the list of special events held on the Isthmus and many times it presented a scene of gay carnival, rivaling the famous New Orleans Mardi Gras.

Onward the Exposition has gone through its twelve month's operation, gathering impetus with each thirty days and profiting by experience. Its record proclaims to the world that a great future awaits San Diego and that its progressiveness may at any time be looked of to make history.

6:1-2. Fair grounds festive scene as world-famed performers delight responsive crowds; list of special events.

6.6. Schumann-Heink and Ellen Beach Yaw to sing today; program is announced.

6:7. Arizona accepts Fair space for big display; Commerce Chamber resolutions provide conference of state bodies to plan exhibit.

7:2-3. Ramona's Marriage Place in Old Town restored.

7:2-5. Efficient street railway handles Exposition crowds; "Clover Leaf Trip" touches all famous scenic points.

7:3. Scenes of Saint Marks, Venice, duplicated at the Plaza de Panama during the Exposition year.

7:3. Only one small conflagration in a special building on the Exposition grounds during the year; damage less than \$500.

7:3. Not a single serious accident occurred on the grounds during 1915.

7:3-4. Cabinet members, federal officials, San Diego guests.

7:4. Resources shown by Southland's Model Farm, Southern Counties unique exhibit attracts eyes of entire nation.

In 1911, when the commission took up the matter of preparing exhibits from the counties of Imperial, Los Angeles, San Bernardino, San Diego, Ventura, Orange and Riverside, it was felt that something different from the exhibits which people were accustomed to seeing at an Exposition should be presented at either one or both of the expositions to be held in California in 1915. As a result of this, about 17 acres of land were secured from the Panama-California Exposition, and it was decided that a part of this should be devoted to a practical working demonstration of the methods used in Southern California in growing its various products, and that this should be an object lesson to the visitors from the Eastern states in the cultivating of the soil and the proper methods for caring for the various crops.

With this end in view, what has become known all over the United States as the "Model Farm" was laid out and a model bungalow was added as an additional exhibit with the Model Farm. The farm proper covers six acres and in addition there is a demonstration field of about three acres and a large citrus grove of five acres.

Since the beginning of the farm, January 1, 1915 (?), there has been raised four successive crops of vegetables through intensive cultivation, intelligent fertilizing and rotation of crops. In one or two instances, the fifth crop is in the ground and is now growing. The farm is planted with all varieties of citrus and deciduous fruit trees, berries and other small fruits.

In connection with the farm, a model poultry plant was established, and here, with the same care given other parts of the farm, it has proved a success. The produce of the farm has not been sold, but has been placed on exhibit in the Southern California Counties Building.

The model bungalow on the farm probably has attracted as much attention as any other feature. As a result, it was found necessary to prepare working blueprint plans of the bungalow. Hundreds of these have been sold and given away to persons living in all parts of the United States and Canada. The commission is constantly in receipt of letters requesting information concerning the farm and bungalow.

Also conducted as a model, the yield from the citrus groves must come as a surprise to commercial citrus fruit growers. The careful attention given to fruits at the Model Farm has resulted in a growth and production that compares favorably with results obtained by commercial growers who cultivate their trees under the most favorable conditions.

In addition to the model bungalow, a cottage of three rooms was built for the use of the superintendent. Showing that automobiles were not forgotten, a combined garage and stable was built. Indeed, nothing was overlooked that would contribute to the convenience and comfort of the farmer and the economic handling of work on his farm.

The commission desired to show not only to the Eastern man, but to the farmer in California, also, that it is not necessary to live in a bare, unadorned piece of land. Grounds around the farmer's house were beautified and, in corners ordinarily devoted to rubbish, flowers were planted that would bloom or blossom throughout the year. The object of the whole exhibit has been to show how artistic and beautiful attributes of a farmer's home can be combined with the practical uses of a small farm.

7:8. Utah exhibit at Fair shows Western sentiment; resources and attractions of State vividly described in fine building; results satisfactory.

7:4-5. Cabinet members, federal officers, San Diego guests.

8:1-8. Celebrities captured by camera at Exposition: Theodore Roosevelt; Nicholas Longworth; Vice President Thomas Marshall; Honorable Champ Clark; William Howard Taft; Theodore Vail; Joe Cannon; Governor Hiram Johnson of California; Mrs. Eleanor Wilson McAdoo; William McAdoo, Secretary of the Treasury; Senator John Weeks of California; Admiral W. F. Fullam; William R. Hearst; Mrs. William R. Hearst; Governor James Whitman of New York; Mrs. Whitman of New York; Maharajah of Karpotala; Maharanee of Karpotala; Mrs. James Rolph; John Barrett; Thomas A. Edison; Boise Penrose; Henry Ford; Admiral Thomas B. Howard; Colonel George Goethals; Governor Spry of Utah; Mayor George Thompson of Chicago; Mrs. George Thompson of Chicago; Minister Martin Burrell, Canada; Governor Fielder of New Jersey; Charles Maryland; Admiral Dew, Japan; James Lynch, New York Labor Commissioner; Madame Schumann-Heink; Honorable Seth Law; William Jennings Bryan; Count Del Valle de Salazar; Countess Del Valle de Salazar; Franklin D. Roosevelt, assistant Secretary of the Navy.

Business Section

8:7-8. San Diego reality active; Exposition boosts values.

Industries Section

3:1. City park system covers 1,867 acres; portions of recreation grounds are left in natural state; 7,000 rose bushes planted in Balboa Park flower gardens.

The park system of San Diego has an area of 1,867 acres, which comprises Balboa Park, 1,400 acres, Torrey Pines Park, 363 acres, Collier Park, 65 acres, Mountain View Park, 15 acres, La Jolla Park, 6 acres, Mission Hills Park, 5 acres, New Town Park, 3 acres, Plaza Park, 1 acre, Old Town Park, 2 acres, and has a total valuation of \$8,492,700 for the land and \$2,127,000 for improvements, which include the buildings of the Panama-California Exposition, Cabrillo Canyon bridge, the improvement and planting of the grounds of the Exposition, and \$352,000 for general park improvement, the most of which was spent for the improvement of Balboa Park outside the Exposition grounds.

Balboa Park lies practically in the heart of the city, few large parks being located so conveniently for the use of the public. The topography has a more varied character than that of any other park so situated; the beautiful views of the mountains, bay and ocean are unsurpassed by any city. There are many canyons, both large and small, which when improved will further enhance the landscape beauties of the park.

It is the policy of the Board of Park Commissioners to leave several large areas of the park in their natural state, preserving all the native shrubs and wild flowers which grow abundantly in these places; in other sections the development is along regular park lines, such as the planting of trees, shrubs and flowers, large expanses of lawn, the installation of playgrounds, ball fields, waterfalls and small lakes in some of the hills and canyons, and the building of a fine system of roads and bridle paths.

The climatic conditions of San Diego are excellent for park development as nearly all the world may be drawn upon to provide suitable trees and shrubs for planting, a boon that few cities enjoy. Australia, New Zealand, South America, China and Japan furnish a large number of the variety of trees, shrubs and flowers that are utilized in the development of the park system, and experiments are now going on with plants which are at present very rare in this section of the country.

Up to four years ago very little had been done to improve the park system, but the holding of the Panama-California Exposition in 1915 was the incentive for the commencement of extensive improvements in the Park Department and the planting of the Exposition grounds. Several hundred thousand trees, mostly acacias, eucalyptus, *arucarias*, *sterculias*, *figus*, *hymenospermum*, *cupressus*, *camphora*, cedars, avocados, sapotes, over a million shrubs, *draceneas*, *dasierions*, *nolinas*, *strelitizias*, bananas, agaves and others have been planted. Seven thousand rose bushes in the rose garden, and hundreds of thousands of flowering and budding plants and bulbs.

The results that have been obtained are certainly appreciated by the people of this city and the hundreds of thousands of visitors to the Exposition have voiced their appreciation of the landscape beauty of the park and Exposition grounds.

Of the smaller parks scattered throughout the city, La Jolla Park, New Town Park and Plaza Park are completed, several others have had some improvement, and with the balance nothing has been done as yet. Torrey Pines Park, which has an area of over 300 acres, is located on the Torrey Pines Grade, on the north boulevard from Los Angeles, and has a frontage along the Pacific Ocean of about one mile. This is a very interesting place, as it is the native habitat of the famous Torrey pines, and is the only location in the world where they are native, and, being on the crest, they have a rugged, gnarled and windswept appearance, and when planted inland, they are beautiful trees and among the most admired of the conifers of the western hemisphere. The park is a favorite resort for picnickers and fisherman as the beach along the ocean front is noted for corvina and other surf fishing.

La Jolla Park is located about 15 miles from the heart of the city along the ocean to the north, and while it is only small park of 5 acres, it is much favored as the rugged cliffs along the ocean are very picturesque and the beach at the cove is a favorite bathing place.

The conservatory and Botanical Building have been greatly admired by visitors owing to the fine condition of plants that are very seldom seen in other parts of the country.

The zoological section of the park will soon be a very important one, as there is gradually being gathered together a fine collection of animals, such as buffalo, bear, elk – both valley and mountain, several species of deer, and also a fine collection of birds in the aviary division, all of which are much appreciated by the visitors.

On the whole San Diego can be proud of its park system, which in a few years will be the equal in beauty of any park system possessed by any city of its size in the country.

Mission Section

3:3-6. Pala Indians forsake chase for quiet life; three-day Fiesta at Exposition.

In August, on invitation of the officials of the Panama-California Exposition, about 200 Mission Indians from Pala, Pauma, Rincon, La Jolla and Los Conejos reservations held a Fiesta in the Exposition grounds. Their visit was one of pleasure to themselves and to the visitors, but, besides this, it was an educational lesson to these children of the woods who seldom wander far from the reservation.

Shortly after this Fiesta an amusing article in a newspaper magazine stated that the Indians were only restrained from feasting on dog meat by the intervention of the Society for the Prevention of Cruelty to Animals. The writer had evidently visited the Igorrote Village in a northern city and mixed his stories. The same writer also noted that the Indians “gambled all night with their exciting Peon game.” All gambling was prohibited within the Exposition grounds.

During the three-day stay of the Indians, five Indian policemen, two Exposition guards, and a government special officer never left the encampment. Mr. T. McCormick was there most of the time and the reservation chaplain, Reverend George Boyle, arrived with the Indians, remained with them, and accompanied them home. Every game of Peon, or any other kind, was played for a prize donated and afterwards presented by Exposition officials. There was absolutely no gambling. But then the magazine writer was giving readers an Indian story and felt that his or her presumption would not be resented. The Mission Indians are neither gamblers nor drunkards and their morals are of a high standard.

7:2-3. Ramona Marriage Place in Old Town, San Diego, restored.

Real Estate/Building

8:2-4. Drawing of University Club on east side of Seventh Street between A and Ash; William Sterling Hebbard and Carleton Monroe Winslow, architects.

Regular Pages

of floating dry docks, feature.

II, 1:6. Exposition sues 200 subscribers.

January 1, 1916, San Diego Union, pages not known. Pioneer Society preserves city records; accomplishes important service for future Southwest historians; Exposition collection; display at San Diego Fair attracts attention of world tourists, by Mrs. Margaret V. Allen, president Pioneer Society of San Diego County.

The Pioneer Society of San Diego County was organized in 1895 (?) and incorporated in 1911. "Regular or pioneer members are men and women who became residents of the city or county of San Diego prior to January 1, 1880. Associated members are the husbands of wives of regular members and also sons and daughters of regular members when they have attained their majority."

The purpose for which the society was formed, as recorded in its bylaws are: "To unite in friendly association the early settlers and pioneers of San Diego and their descendants, together with other persons in sympathy with the purposes of the association.

Pioneer Spirit Renewed

For twenty years the Pioneer Society has carried out the purposes and aims expressed in these bylaws. On the last Monday of each month a business and social meeting is held, usually at the home of some member. At these meetings the neighbors and friends of the early village life exchange reminiscences and renew the rare spirit of those pioneer days: a spirit which should be the common heritage of the generations to come as well as of those whose part in them was immediate and personal. Twice a year open meetings of the society are held at which the families of pioneers and invited guests are entertained. A program of addresses and music is given, usually followed by old-fashioned-dances. Many of the older pioneers would be lonely, indeed, if it were not for the social life and the personal contact with old friends that these pioneer meeting furnish.

The interest taken by the society in its members, as one by one they ____ out from the ranks of active workers by reason of old age or illness had endeared it to all. At each meeting reports are given of invalid or infirm members and messages of interest and sympathy are sent to the absent ones. Few calls have ever been made for financial help from the members of the association, but many responses have been given to appeals from local charities or to meet the needs that have arisen after some great national calamity.

Story of City Told

The third purpose for which the Pioneer Society was formed, as explained by its bylaws, the conservation and preservation of the vast amount of historical material belonging to this section of the state has received a great impetus during the years of preparation for the Panama-California Exposition. At a meeting of the Pioneer Society, held shortly after the public announcement of plans for this Exposition, a motion was passed providing that the secretary should ask for space for an historical exhibit "similar to the historical exhibits of other exhibitions" at the Fair to be held in San Diego in 1915.

A few months before the opening of the Exposition, the lower floor of the Fine Arts Building was assigned to the Pioneer Society and here, during the past year, in the gallery of California history, thousands of visitors from all portions of the United States have learned the story of our state and city from the day when Fray Junipero Serra raised the cross on Presidio Hill and California history began.

Railroad History Kept

The society has never attempted to collect objects for an historical museum. Curios and relics have a small part in the Pioneer exhibit in the gallery of California history. Every article on display illustrates some phase of life in early California; every document is a link in the chain of history; all newspapers, letters, diaries, legal documents and business papers have their use as a valuable source material for the preparation of local history.

The railroad section, with its reports of surveys, maps of routes, minutes of stockholders' and directors' meetings and long lists of stockholders and subscribers to subsidies that were voted to prospective road builders from the days of the San Diego and Gila Southern Pacific and Atlantic, in the early 50's to the San Diego & Arizona of the present day, is of great value, not only to engineers and business men, but reveals much of the spirit of optimism characteristic of the typical San Diegan of the past and present alike. A collection of plats, maps, pictures and photographs present graphically to the tourist or newcomer the story of the formation and growth of the city, and make its geography familiar to him at a glance.

Exposition Year Successful

The political and civic life of the earlier years is revealed in election reports, proclamations, notices and petitions to the trustees, to the county officials and to the voters on every imaginable subject connected with the community interests. The library of early California books that is being collected is rich in local history from the pens of men and women whose fame is nation-wide.

On the walls and in cases are the portraits of the men and women that had a part in the activities of the pioneer community, solving its problems and bearing its burdens. So in this glad year that is witnessing the triumph of San Diego, marking as it does the accomplishment of a great work in the building and equipping of an Exposition as well as an entrance into a large place in the industrial and commercial life of the world, the Pioneer Society thinks that these good citizens should not be forgotten. For this reason the members of the society, their contemporaries and their children have made the Pioneer section of the gallery of California history a memorial to the men and women that made not only the Exposition but the city itself a possibility.

January 1, 1916, San Diego Union, pages unknown. City lands held solve labor problem; pueblo farm, once barren, now covered with rich forest; roads increase value; La Jolla to Del Mar mesa cost beauty spot of county, by Max Watson, Supervisor Public Lands.

"Contract for Atchison, Topeka and Santa Fe Railway," 2 January 1916, Box 3, folder A-B, Panama-California Exposition Collection, California Room Research Archives, SDPL.

January 2, 1916, San Diego Union, 1:1-2, 3:6. Twenty thousand voices ring enthusiasm at 1916 Exposition opening.

20,000 voices ring with enthusiasm at 1916 Exposition opening; President Davidson springs surprise by announcing that big French exhibit will be displayed here; concert of Schumann-Heink and Ellen Beach Yaw thrills thousands; great celebration in March is being arranged.

A great joyful crowd, estimated at 20,000, made its way to the Panama-California International Exposition yesterday to participate in the reopening ceremonies. Madame Ernestine Schumann-Heink, the world's greatest contralto, and Ellen Beach Yaw, the California songbird, both resident Californians, sang to large and appreciative throng. And, as an additional feature, President G. A. Davidson happily surprised his hearers, reading to them a telegram from Albert

Tirman, commissioner general for the Republic of France, which announced the decision of the French government to exhibit at San Diego in 1916. A full account of the great out-of-doors concert given by Schumann-Heink and Ellen Beach Yaw will be found in another section of this newspaper.

Decision of France Greeted With Cheers

Thousands of voices were raised in ringing cheers at the Spreckels music pavilion when President Davidson announced the decision of France to exhibit.

The announcement, coming as a New Year's surprise, was greeted with an enthusiastic demonstration by San Diegans and their visitors. Hats were flung in the air and deafening applause was given. President Davidson has received the news in a telegram a short time before. He told the crowd he had a happy New Year's surprise, and then he read the telegram as follows:

"I am pleased to inform you that the French government has granted me authorization to loan to the San Diego Exposition the collections of the state, including the pictures."

The message was signed by Albert Tirman, commissioner general for the Republic of France, who was in San Diego some weeks ago.

Exhibit Best of Kind

This means that during 1916 the great French exhibit, considered the best of the kind ever made at any Exposition, will be on display in the California Building and the big art collection will be on exhibition in the California Quadrangle.

Officers of the Exposition have been at work some months to secure the French exhibit. The first definite word came yesterday, spelling success to the San Diegans who have worked tirelessly for it.

An additional reopening of the Exposition I March, which it is claimed will eclipse all previous events at the Exposition and will direct the attention of the nation to San Diego for a single day at least, was the announcement of President Davidson yesterday.

The celebration will be one of the biggest of the kind ever held in Southern California. Within a few weeks committees will be appointed to arrange it. The committees will be told to "go the limit" in giving San Diego the biggest, noisiest festivity in her history.

Support by State

President Davidson made the announcement as a part of his talk in reopening the Fair. "It has been a wonderful success and we are proud to have entertained so many enthusiastic visitors in 1915. We now stand on the threshold of a new year, one which brings great promise to use and which should prove equally as successful as 1915. We have received loyal assistance from all parts of the state in an effort to keep the Exposition open another year, and today we have the hearty cooperation and support of all Californians."

Beginning with a military and naval pageant and ending with the open-air concert given by Madame Ernestine Schumann-Heink and Ellen Beach Yaw, yesterday's festivities of opening the Panama-California International Exposition will live long in the memory of those who were on the grounds.

Thousands lined the streets to see the military and naval parade of which Major Herbert F. Ray was the grand marshal. It proved an inspiring sight and the several divisions of the army and navy were heartily cheered. First came a battalion of the coast artillery corps headed by the Thirteenth band of the coast artillery, then a battalion of sailors, also headed by a band. Two

companies of marines from marine barracks, headed by their band, a squadron from the First cavalry, two companies of coast artillery corps reserves, and a division of naval reserves followed.

Officers Entertained

Army and navy officers reviewed the parade with officers of the Exposition as the Sacramento Building. Rear Admiral W. F. Fullam with member of his staff, State Adjutant C. W. Thomas, Jr., President Davidson, Carl Heilbron and other officers of the Exposition occupied the reviewing stand.

At noon at the Cristobal Café, President Davidson gave a luncheon party for the officers of the army and navy. Rear Admiral Fullam was the guest of honor. Among others present were S. R. Flynn, Carl I. Ferris, J. P. Smith, Frank Spalding, I. Carl Schindler, Don M. Stewart, Carl H. Heilbron, Major Herbert R. Fay, and C. W. Thomas.

A troupe of Spanish singers and dancers roamed about the grounds yesterday and added to the pleasure of visitors. So much was the entertainment enjoyed that many times the crowd insisted on keeping the performers in one place. Spanish entertainment will be more than ever a feature of the Exposition during 1916, it was announced.

With several large attractions in different parts of the city yesterday, thousands seemed to prefer the Exposition. Fully 20,000 were on the grounds during the day it was estimated. The day before 17,074 passed through the entrance turnstiles.

By yesterday's opening ceremonies and the great crowd which attended them, the Panama-Californian International Exposition got away to a flying start. More than 2,000,000 people visited the Fair during 1915, and this record will easily be broken in 1916 it is believed.

January 2, 1916, San Diego Union, 3:7. Schumann-Heink is given ovation; Ellen Beech Yaw cheered, by W. W. B. Seymour.

One of the greatest tributes which man or woman can receive was paid to Madame Schumann-Heink, world-famous contralto and first citizen of San Diego, yesterday when she walked out upon the platform of the Spreckels organ.

Fifteen thousand men, women and children arose en masse and stood silently at the feet of the great singer, tendering by that silence the mead of honor due the art and the personality of the woman whose glorious voice and rare musicianship have delighted hundreds of thousands throughout the civilized world.

A moment later a roar of applause rang out, drowning the voice of President Davidson. No introduction was needed, for everyone knew the great Schumann-Heink, who was there to sing to her fellow citizens in honor of the opening of the new Exposition.

Bach's "My Heart Ever Faithful" was the singer's first number. Its first note proved that the great contralto was in rare voice, and in reverent mood the throng listened as words and music of the melody which has comforted thousands poured out to them in a stream of sound that was vibrant with feeling.

Schubert's beautiful "Die Allmacht" was the next number, after which the beaming singer gave "Danny Boy," an Irish love song, as she herself announced to the throng.

Then came the most beautiful and impressive number of the program, the beautiful "Stille Nacht, Helige Nacht." This was sung to organ accompaniment played by Dr. Humphrey J. Stewart, the official organist. Sweet and simple, its rendition went straight to the heart of every listener, proved beyond cavil the singer's art, and gave the finishing touch to her program.

"Lark Ellen" Wins Favor

Although the reception accorded Madame Ellen Beach Yaw on her appearance by no means compared with that given Schumann-Heink, before she had finished her numbers she had leaped into tremendous popularity and was called back again and again

"Lark Ellen," as she is called, began by singing the famous "Bell Song" from Delibes' "Lakme," a number rarely given because of its difficulty, in which characteristic it exceeds even the well-known "Mad Song" from "Lucia," beloved by coloratura singers. Full of trills, arpeggii and cadenzas, the song rolled from the singer's lips with birdlike ease, and when Madame Yaw transposed a note a full octave to F sharp above high C, ending with a soft glissando to the middle register, the crowd listened in amazement, and from the front ranks came a soft hand clapping.

Madame Yaw then sung a song of her own composing entitled "California," the last verse of which dedicated to San Diego, was written by her on her way here from Los Angeles, Friday.

These songs were rendered before Madame Schumann-Heink's appearance, and after the great contralto has sung, "Lark Ellen" reappeared and sang her song "The Skylark," which has brought her fame on two continents. A startling feature of this song is its conclusion in which Madame Yaw soars up in a swift run to the almost unbelievable pitch of B flat above high C. There is a flutelike quality to these upper notes which reminds one of exquisitely played harmonics, and which explains to the listener why Madame Yaw is called "Lark Ellen."

In startling contrast to "The Skylark" was the last number, the ever beautiful "Last Rose of Summer." It was beautifully sung and demonstrated that the singer's beauty of tone is not confined to her upper register.

In the reviewer's opinion, both Madame Schumann-Heink and Madame Yaw sang better yesterday than they ever have before to a San Diego audience. In fact, the more years they gain, the more beautiful become their art and their voices.

Singers Ably Assisted

Both singers were ably assisted by their accompanists, Miss Edith Evans of Maryville, O., who is with Schumann-Heink this season, acted in that capacity for the great contralto, while Miss Grace Bowers of San Diego performed a like service for Madame Yaw.

Dr. Stewart played two numbers on the big organ, both of his own composition, the first being "Fantasia on Christmas Melodies" and the second (by request) "Medley of Hawaiian Airs."

Altogether the concert was, to borrow a timeworn oratorical phrase, "a most auspicious occasion," and will be remembered long as an event in the musical history of San Diego.

January 2, 1916, San Diego Union, II, 1:6. More than 200 suits aggregating thousands of dollars were filed Friday by Panama-California Exposition in effort to collect unpaid balances of stock subscriptions; C. H. Tingley, auditor of 1915 Exposition; names of delinquent subscribers given.

January 3, 1916, San Diego Union, 4:1. EDITORIAL: Two Successful Expositions.

January 5, 1916, San Diego Sun, 9:4. Greater Exposition is in the making; exhibits being installed; seal is designed; Women's Board honored; Isthmus will open formally February 15.

January 5, 1916, San Diego Union, Classified, 9:1-2. Funeral services for Mme. Ernestine Schumann-Heink's son Hans Schumann-Heink will be conducted tomorrow at Saint Joseph's Catholic Church.

January 6, 1916, San Diego Sun, 1:3. Senator Luce asks state aid for Exposition; bills will grant use of Balboa Park for another year and appropriate \$50,000 for maintenance of California Building.

January 7, 1916, Minutes of the Park Commissioners. Transfer of Washington State Building on the Exposition grounds to Mr. A. E. Smith, to be maintained as an exhibit building for the productions of the State of Washington and the northwest was approved.

January 7, 1916, San Diego Union, II, 9:2-4. A De Khodijayan, Russian commissioner, promises big display; says Muscovite misunderstood in United States.

January 7, 1916, San Diego Union, II, 9:3. Fair officials have "round table" talks in Cristobal Café.

January 7, 1916, San Diego Union, II, 9:4. Numerous trips from East to Fair planned; schedules indicate travel will surpass 1915; Raymond & Whitcomb Company arranges 19 trips.

January 8, 1916, San Diego Sun, 1:6. Exhibits arriving for Exposition; United States display arrives tomorrow; others are being installed.

January 9, 1916, San Diego Union, 1:4-5, 3:2-3; Building for exhibits being rushed at 1916 Fair.

January 11, 1916, San Diego Sun, 9:3. Exhibits arrive at Exposition.

During the reorganization period several of the buildings will be open. There will be organ recitals at 2:40 p.m. daily by Doctor H. J. Stewart, the 13th Band, Coast Artillery Corps, and the 4th Regiment Marine Corps Band will alternate in playing concerts; the marines will hold guard mount on the Plaza de Panama at 3:40 p.m. every day, excepting Wednesday, Saturday and Sunday, and will give at the camp at 9:30 a.m. each day, excepting Saturday and Sunday.

The San Joaquin Valley, Kern-Tulare, Alameda-Santa Clara and the Southern California Counties buildings are being kept open.

Commerce and Industries building is being remodeled inside for Canadian exhibit. Every exhibit from the 1915 exposition is being moved out of the building and a big force of carpenters, under the direction of G. L. Murphy, is remodeling the interior. J. O. Turcotte will have charge of the decoration and it is promised that when the remodeling is completed, no bare rafters, posts or beams will be seen. While the building is being prepared, the first shipment of Canadian exhibits is being unloaded today.

January 11, 1916, San Diego Union, 1:1, 3:2-3. Exposition bills passed by state solons; one providing the use of Balboa Park until 1917 and the other an appropriation of \$50,000 for Exposition.

January 11, 1916, 1:3-4. Mrs. Ivor N. Lawson, president of Women's Board, honored at luncheon at Cristobal Café at noon.

January 11, 1916, San Diego Union, 7:4. Washington building on grounds sold to San Diego Society of Natural History.

January 11, 1916, San Diego Union, 14:3. Exposition placing Canadian display; admission to Fair twenty-five cents during remodeling.

January 12, 1916, San Diego Evening Tribune, 1:7-8. Cavalry, Marines and Infantry coming here; Marines will camp on the 1915 site; site will be enlarged; only a handful of Marines at the Exposition now.

January 12, 1916, San Diego Union, 8:2. San Diego chosen base for Fourth Marine Regiment; other Navy units expected to establish quarters here; may get Navy Academy.

January 12, 1916, San Diego Union, 8:3. A battalion of United States infantry and a band have been offered to the Exposition to augment the government's participation for 1916.

January 13, 1916, Los Angeles Times, Editorial Section, 1:7, 11:4. Most of San Francisco's "zone" to come here; flower of Exposition's fun to great Seal Beach at a cost of several hundred thousand dollars; work on buildings will begin early next month.

January 13, 1916, San Diego Sun, 5. Exhibit space is at a premium; plans are being made to bring the Knights Templars, attending convention in Los Angeles, to San Diego Exposition, June 24..

January 13, 1916, San Diego Union, 1:2-3. S. Osmanoff, aged Russian Cossack, part of Czar's exhibit at Exposition; cross of St. George awarded him for killing 39 men in battle in war with Turkey.

January 14, 1916, Minutes of the Park Commissioners. Mr. H. W. Allen and Secretary L. A. Clark of the Washington State Commission stated deal with Mr. A. E. Smith had not been consummated; presented a bill-of-sale of said building to the San Diego Society of Natural History; Board refused to ratify the sale.

January 14, 1916, San Diego Union, 3:4-5. Picture and description of Exposition seal for 1916.

January 14, 1916, San Diego Union, 14:1. Big Pan-Pacific exhibit at Fair to be installed in Home Economy building; manager arrives to supervise works, Economy Building to be used, name changed; to be open in three weeks; 12 tanks of Hawaiian fish, tea garden, movies, Alaskan display among features.

C. F. Donaldson, managing director of the Pan-Pacific exhibit at the Panama-California International Exposition, arrived in San Diego yesterday to superintend the installation of several exhibits. They will be in the Home Economy building, the name of which will be changed to the Pan-Pacific building.

Donaldson is a veteran of Expositions. He has been engaged in the work since the Exposition in Philadelphia in 1876. A number of the exhibits have arrived and others are on their way. There are to be sections devoted to the Philippines, Siam, Java, New Zealand, New South Wales, Hawaii, Alaska, China and several South American countries. The Pacific Coast Steamship Company, the Oceanic Steamship Company, the T. K. K. Steamship Company, a Japanese concern, and the Union Line will have exhibits.

Exhibits Require 14,000 Square Feet

"Our exhibit will consist of 14,000 square feet of as interesting material as was ever placed in one building," said Donaldson. "The Hawaiian exhibit of fish will be particularly interesting. There are twelve tanks of fish.

"At San Francisco we had to experiment a long time before we found how to keep the fish alive. We finally discovered the trouble was with the water. After we began taking it from the three-mile limit in the ocean, we had no further trouble.

"At other sections of the Hawaiian exhibit, there will be fruit, sugar cane, and natives who will sing and dance and show many of the older customs, beliefs and superstitions of the people of the islands.

Pictures Will Show Customs

"We are planning a tea garden on the second floor of the Pan-Pacific building. As we hope to make our building the center of social activity during 1916 we want the tea room as a meeting place. We also are planning a motion picture theater in which will be shown life in all the countries represented in the building. The pictures visitors will find, will prove unusually interesting.

"The exhibits from Alaska, which consist of furs, curios and minerals, are already here. Other exhibits are on the way, and by the time we have finished remodeling the interior of the building, we will have the material with which to install the exhibits. The building will be ready for public inspection in three weeks, I think."

January 15, 1916, San Diego Union, 5:1. Fair buildings get new names; exhibits changed; "International" put on title.

January 16, 1916, Los Angeles Times, II, 2:1-3. Fresh frocks for the Fair; San Diego Exposition redressed for another year; quaint beauty to be retained but brightened; plans for new season grow with big exhibits.

San Diego, January 14. --- San Diego's exposition is being made over for 1916, to be ready by the middle of March. Carpenters, decorators and artists are busily engaged in remodeling the interiors of the big exhibit buildings, tearing exhibit booths out to make room for works of art and for the wonderful foreign exhibits to be installed.

"Making over" the exposition is not exactly true and the San Diegans would indignantly deny that they would permit their Exposition Beautiful to be "made over." For the San Diegans are jealously proud of the beautiful architectural gem they have built and bitterly resent any attempt to change the architectural scheme.

When some over-zealous publicity man sent out a report that the Tower of Jewels was to be sent south to surmount the California Building, San Diegans held up their hands in horror. Signed communications appeared in the newspapers from irate citizens who criticized the president and directors of the exposition for permitting such desecration.

When President Davidson explained that he was as determined as any one to have not a single line of the exposition's architectural beauty changed things came peaceful once more. In fact, this determination of the directors to retain the completeness and artistic beauty of the exposition which was the delight of all who visited it last year will probably prevent them from putting up additional buildings that are need for exhibits. For it was the scheme of the exposition that not a building could be added without in some measure detracting from the general scheme.

But this does not prevent the entire interior of the exposition from being transformed. It was found necessary while doing the tremendous work of tearing out booths and exhibits and installing the new to close the main buildings.

REMAINS OPEN

However, the exposition is kept open and admission prices reduced one-half. Daily musical programs are given at the big organ and by the Marine and Coast Artillery bands. Marine Corps drills and guard mount are also held each day at the fair. Some of the buildings are open.

In the Commerce and Industries Building every exhibit booth is being removed to make way for the Canadian exhibit. No changes will be made in the San Francisco display from Canada except where the building dimensions limit it. The first shipment of the exhibit, which arrived this week, consisted of six fifty-foot cars.

In the Sacramento Valley Building and in the Nevada State Building the government exhibit, which consists of 140 tons dead weight or 500 tons measurement, is being installed. The United States fuel ship Mars brought the exhibit this week. The government fisheries exhibit, which will arrive later, will be installed elsewhere in a new building, erected at the southern end of the Isthmus.

France requires two buildings to house its offerings, the California and Fine Arts Buildings. The art treasures of the valuable Luxembourg collection will occupy the entire Fine Arts Building. Walls are being thrown up in the large rotunda of the California Building to make room for the French art there.

Italy will make an interesting showing of bronze, marbles and statuary. A part has arrived and is now being installed in the Foreign Arts Building. Two carloads of the German-Austrian

exhibit for the Foreign Arts have arrived and are being unloaded. Spain, Japan, Persia and Egypt will have exhibits in this building. Russia and Brazil will have their exhibits in the old Indian Arts or Arts and Crafts Building adjoining the Fine Arts.

The commercial exhibits that occupied the Home Economy and the Varied Industries and Food Products Buildings have been removed and [the buildings} will hold industrial, art and commercial exhibits from foreign lands. The Home Economy Building will be called the Pan-Pacific Building and will house a most interesting exhibit showing commercial and industrial progress in the countries of the Pacific Ocean. C. J. Donaldson is her now overseeing their installations.

The Pan-Pacific includes exhibits from the Philippines, Australia, Siam, Java, New Zealand, South Wales, Hawaii, Alaska, and a number of Pacific steamship lines, including the Pacific Coast, the Oceanic, the T. K. Japanese line, the Union, and the Alaska Steamship Company.

THE INDUSTRIES

The Netherlands exhibit will be housed in the Varied Industries Building, which will be the Foreign and Domestic Industries now. Montana, Utah and Washington will again have exhibits in their buildings although in the Washington there will also be a fine museum placed there by the San Diego Pioneer Society. Historic curios and antiques of the country will be placed there.

The Kansas State Building has been purchased by the Theosophists for their display.

On the Isthmus, too, there will be great changes. The high-class shows, such as the Painted Desert, the War of the Worlds, the Panama Canal and Hawaiian Village, have been retained. There will also be the painting Stella, the Escorial and a number of new attractions from the north.

The Model Farm, perhaps the best of the exhibits of the San Diego fair last year, will be conducted again. As will the Southern Counties Building of which the Model Farm was an adjunct.

The formal reopening of the main part of the exposition will be March 15. The Isthmus will be reopened February 15, when a suitable program will be given.

Much attention will be paid to special events the coming year. There will be big athletic events and several transcontinental aeroplane flights with the exposition the destination. The out-of-door features will be played up by the management more than ever and weekly or bi-weekly open-air balls in the plazas, open-air operas and entertainments will be frequent.

The Spanish troubadours and dancers, which were so closely associated with the Spanish atmosphere and architecture of the place that they seemed almost a part of it, will again sing and dance through the day and evening in the exposition streets, on the plazas and from the balconies. Numerous bands will play constantly.

MILITARY PARTS

The military, as heretofore, will play an important part in the entertainment of the fair. In addition to the Marine Corps and the cavalry that have been encamped all year on the exposition grounds, there will be a battalion of Coast Artillery stationed on the grounds.

The extra battalion of Coast Artillery and a cavalry have been recently offered by the government to the exposition. This, with the Coast Artillery from Fort Rosecrans, which has always furnished a band for the fair, and the sailors and marines from battleships in the harbor, will give all branches of the service representation.

Although part of the exposition is closed, thousands of visitors are on the ground each day, enjoying the beauty of the grounds and attending the band and organ recitals. The buildings now open are the San Joaquin Valley, Alameda-Santa Clara, Southern California, Kern-Tulare and the Salt Lake-Union Pacific Buildings. The grounds were never so beautiful as now since the rains have made the flora and foliage more luxuriant and more brilliant in coloring.

An organ recital is given daily by Dr. Humphrey J. Stewart. The Marine band gives a concert at the organ pavilion and the Fort Rosecrans Coast Artillery band, one of the best military bands in the country, plays each day in the Southern California patio.

With the beautiful setting which the southern exposition offers for the great art collections and exhibits, the cream of the exhibits of the San Francisco exposition, the Panama-California International Exposition should surely be one of which all California will be justly proud.

January 16, 1916, San Diego Union, 1:3. Hear this girls --- Leap Year court at Fair; Why not regular nook to pop question?, pretty maid asks; directors at variance on proposed establishment of place to snare bachelors.

January 17, 1916, San Diego Sun, 1:7-8. Record rainfall hits Southland as Hatfield the Rainmaker is working.

January 17, 1916, San Diego Sun, 7:3-4. Typical San Diego girl sought by Exposition heads; will adorn Fair poster.

January 18, 1916, San Diego Union, 5:4. Buildings stand weather test; structures at Exposition, although temporary, unharmed by wind and rain.

January 19, 1916, San Diego Union, 4:7-8. Exposition organ in perfect condition, says annual report.

January 19, 1916, San Diego Union, 14:1. Work rushed on installation of exhibits at Fair; more than 350 recitals have been given and 2,597 compositions performed by some of the Country's leading artists, according to statement by Dr. Stewart, organist.

January 21, 1916, Minutes of the Park Commissioners. San Diego Museum Association appointed custodian of the "Tilden collection."

Log Cabin, formerly displayed by the Towle Maple Products Company in the Varied Industries Building, donated to Park Board for erection in a suitable place in Balboa Park.

Superintendent reported recent rains had done some damage to the park driveways, but nothing of a serious nature.

January 21, 1916, San Diego Sun, 1:2. New building at Exposition will house exhibit; government structure is erected on Isthmus for the Bureau of Fisheries; 100-tank display, hatchery exhibit and exhibits showing the government's work in stocking lakes and streams; government band will play twice daily on verandah.

January 21, 1916, San Diego Sun, 8:1. Plans made for grand opening on Isthmus and for a free carnival night in early March; Selig Wild Animal Show, Madame Ellis and her intelligent horse "Captain," picture "Stella," etc.

January 21, 1916, San Diego Sun, 8:3. Exposition directors accepted two large Cupid statues decorated with floral wreaths and a cast of the California bear surmounted by a California goddess; gifts of Sacramento Valley Commission from San Francisco Exposition, f.o.b.

January 21, 1916, San Diego Union, 8:1. Great dinner in honor of Boards of Exposition considered.

January 22, 1916, San Diego Union, 3:2. Singalese masters "Exposition English"; father forgives, beseeches son to return to Ceylon.

January 22, 1916, San Diego Union, 6:4. One hundred year old spinning wheel spun cotton at 1916 Fair; Mrs. Ella Swicard demonstrated with California cotton.

January 22, 1916, San Diego Union, 8:2-5. Prize exhibits unloaded at Exposition; many displays being installed; alterations in buildings being made.

January 22, 1916, San Diego Union, 8:3-4. Exposition guards balk at racetrack uniform.

January 23, 1916, San Diego Union, 1:4, 2:5. Neutrality reigns at Fair; Germans, "Allies" clasp hands; German flag over exhibits.

January 23, 1916, San Diego Union, 4:3. Big business coming; D. C. Collier Company ready.

January 23, 1916, San Diego Union, 5:2-5. Plan of the Government building for fish exhibit; Carleton Monroe Winslow, architect.

January 23, 1916, San Diego Union, 10:1-6. Marvelous Russian paintings at Fair; picture of Saint who is said to have sacrificed his life for country, portrait of Tolstoy.

January 24, 1916, San Diego Evening Tribune, 7:3. German colors hosted in the Foreign Arts building at Fair; commissioner not sure of decoration scheme; big firms to enter exhibits; Golden Eagle conspicuous; 11,000 square feet of exhibit space; Solingen steel exhibit to be added to display; Stollwerck Chocolate Company will serve chocolates free and furnish a rest and reading room.

January 25, 1916, San Diego Sun, 7:5. Three males and nineteen female elks, gift from Southern Pacific Railway Company for park, are being shipped from Miller and Lux Ranch at Buttonwillow, California.

January 25, 1916, San Diego Union, 4:7-8. Wonders of Pacific lands to be shown at Exposition.

January 23, 1916, San Diego Union, 10:1. Photographs and descriptions of paintings shown in Russian exhibit.

January 24, 1916, San Diego Evening Tribune, German colors hoisted at Fair.

January 27, 1916, San Diego Sun, 1:1-2. Dynamite dam in park; at 11:15 a.m. today workmen dynamited the west end of the Switzer Canyon dam. The dam was badly cracked at the time, and it was feared that if the heavy rain continued, it might go out. The dynamite cleared a path for the waters, which were rushing in torrents from the hills; waters rushing from the canyons of the big park swept down 14th, 15th, 16th and 17th streets.

Houses on 16th Street were turned on their sides.

Switzer conduit runs from 20th Street and Balboa Park to bay.

At the Switzer Canyon dam, water began pouring over the top of the dam at 5 a.m.

Horses were taken out of the city barns, a short distance from the Switzer dam.

January 27, 1916, San Diego Sun, 6:2. The purchase of the Washington State Building by the San Diego Society of Natural History has been revoked. Washington will stay at Exposition for 1916. Funds raised by commercial clubs and organizations throughout Washington.

January 27, 1916, San Diego Union, 4:7-8. Fine Netherlands' exhibit to be installed in Foreign and Domestic Industries building at Exposition; display of pottery, paintings and carpets to surpass that at San Francisco; government fisheries exhibit assured; Washington keeps building.

January 27, 1916, San Diego Union, 4:7-8. Wonders of Pacific lands to be shown at Exposition; representatives from west coast states and islands of the sea will assemble best products each can boast; all will aim to advance Pan-Pacific interests.

January 28, 1916, San Diego Union, 1:4-5, 2:2. Old Town concrete bridge swept away by torrent.

January 28, 1916, San Diego Union, 4:1-4. Floods in past caused small loss in comparison to present storm.

January 28, 1916, San Diego Union, 5:3. Flood rushing down park canyon sweeps busy section; view of Switzer Canyon dam.

January 29, 1916, San Diego Union, 1:1-2. Lower Otay dam gone.

January 30, 1916, San Diego Union, 9:1. Fair exhibits are held up by flood.

February, 1916, The California Garden, 10-11. Monthly Excursion Through The Exposition Grounds, by G. R. Gorton

If this were Japan, and we were Japanese, about now we should probably celebrate "Acacia time," much as the beauty-loving Japanese make a festival of Cherry blossom time. Surely the Acacias are worthy of a fiesta in their honor, as witness the gorgeous masses of bloom evident and about-to-be evident in

different portions of the Exposition grounds. They greet the visitor immediately entering the gate --- especially the west gate --- and continue to meet and charm him from time to time as he makes his tour of inspection up and down the different paths and roadways.

Looking east and a little south from the Cabrillo Bridge a whole hillside, covered with *Acacia Baileyana*, displaying its charms attracts much attention by reason of the striking foliage effect, even when the shrubs are not in flower. But now the silver of the foliage loses caste (no pun intended) in competition with the superior charm of the golden bloom. Apparently a gold standard obtains even among plants. Nothing is free from commercialism in these materialistic days.

The Montezuma Gardens suffered considerably from the recent embarrassment of riches in the form of rain, and it was deemed advisable to take advantage of the opportunity to rearrange as well as replant where necessary, so in common with many of the buildings, the gardens present an appearance of undergoing reconstruction. There is, however, in the northeast corner of the gardens, a group of *Coronilla glauca* and *Coronilla variegata* which have escaped the hands of the "transplanters" and is well worth seeing. The small, round glaucous leaves are at all times attractive, and the canary yellow flowers still more so.

Just west of the Montezuma Gardens and skirting a small canyon which is tributary to Cabrillo Canyon, a walk leads to a curved pergola adorned with Cecil Brunner roses and honeysuckle and cozily lined with *Eugenia myrtifolia*. Leading to the right from this pergola is another walk which, after devious twists and turns, finally returns to another part of the pergola. This is the Trail of the Acacia, at least for the first half of its horseshoe-shaped course. *Baileyana*s again, *floribundas* and *latifolias* abound, followed by peppers, and forming an undergrowth is a mass of *Vinca major*, the Periwinkle of our grandmother's garden, or rather an improved form of it. This is covered with its familiar blue flowers, and is very pleasing, as is indeed the entire effect of this rather obscure spot.

Returning to the pergola, and thence following the path around the stretch of lawn and towards the east, one comes presently upon some very good *Acacia latifolia*. Still further on, just before the Kern-Tulare Building is reached, are several specimens of *Senecio petacitis*, intermingled with the groups of cactus, agaves, palms, *dracaenas*, etc. These are in bloom now, and are interesting as being really yellow. *Cinerarias* (a synonymous term being *Cineraria petacitis*). Nearby some *Aloe soccotrina* are lifting up their torch-like flowers. In front of the Alameda-Santa Clara Building, at the end of the path, the row of *Cinerarias* (star *Cinerarias* this time) makes a brave show of color in front of the shrubbery planting.

In many portions of the grounds the *Viburnum tinus* (or *Laurustinus* if you prefer the older name) is decidedly at its best at this time. Although it may be found in flower at almost anytime of the year, it does not always look as well as now. An especially good specimen adjoins the Commerce and Industries Building (rechristened the Canadian Building) and south of the arcade.

All along the Prado changes may be observed. In some instances, the groups are being augmented by the addition of more *Leptospermum*, *Grevilleas*, or other shrubs of species which are already represented there. In other portions of the planting several species of *Ericas*, new to the Exposition grounds, are being planted. In fact, throughout the Exposition, the process of thinning out where it is needed, and using the shrubs so obtained to fill in the bare places, has been going on for sometime.

Near the east end of the Prado, overhanging the retaining wall north of Spanish Canyon, a good specimen of *Acacia mollissima* is now in full flower. The delicate, feathery foliage of this species, combined with the masses of familiar yellow flowers, is different and very attractive.

The first hundred feet or so of the path leading to the Pepper Grove is a riot of red and gold, and when the *Acacia latifolia* add their quota of yellow blossoms, it is safe to say that the total effect will be very beautiful.

The planting on the edge of the canyon west of the Botanical Building contains a number of *Hardenbegia monophylla alba* in flower. This species, as well as the purple-flowered climber, deserves to be better known and used.

Many more plants have been added to the collection in the Botanical Building. More Azaleas have arrive in the nursery, and will be put in place before this goes to print, several large Birds Nest Ferns are there now, together with more *Cinerarias*, *Primulas*, etc. An especially striking effect has been attained by massing *Cyclamen* near the center of the lath house. There is quite a variety of colors and markings in this group, including a pure white variety which is very good. If you visit the Botanical Building soon, ask the gardener to show you *Begonia Gloire de Cincinnati*, another recent addition, and if the writer is a true prophet, you will add this variety to your list of desirable sorts.

La Lagunita, in front of the building, has a decidedly tired look, as if the strain of being on show all summer long had had a dispiriting effect upon it and its environs. There is, however, one brave lonesome little plant which deserves mention, not because it is holding the fort alone in its flowering, but because it really had many good qualities as an aquatic, chief among them being its fragrant white flowers, bearing a Hawthorn-like odor. This is the Cape Pondweed, *Aponogeton distachyon*.

February 1, 1916, San Diego Union, II, 9:5. There are nineteen cars of Canadian exhibits, one car of Holland, one car of Italian, and several other cars containing exhibits which can be installed in the exhibition palaces.

February 2, 1916, San Diego Evening Tribune, 3;3. Storekeepers now aiding marines; threat to establish free supply depots alongside those who raised prices has desired effect; about 75 marines in squads of four and five are patrolling in Tijuana and Otay valleys.

February 2, 1916, San Diego Union, 5:1-2. Gems of Italian art were shown at San Francisco Exposition; pictures of vases and marble statuary on exhibit that took prizes at San Francisco; exhibits being placed in Italian section of Commerce and Industries Building. (?)

February 3, 1916, San Diego Evening Tribune, 1:6-7. Marine base is permanent; Colonel Pendleton and his men returned here this morning on the cruiser *Buffalo* from the Mexican coast; Kettner doing everything possible to get the marine regiment a site opposite the Point Loma country club; 25th and 28th companies and regimental headquarters disembarked this morning; other companies are leaving on the *Buffalo* today for San Francisco to pack their equipment there and return to San Diego in about ten days.

February 3, 1916, San Diego Union, 4:7-8. Spectacular auto tests at Exposition will determine prowess of competing cars.

February 3, 1916, San Diego Union, 4:7. Two statues of Cupid will be unveiled in Leap Year court when Fair will formally be opened.

February 3, 1916, San Diego Union, II, 14:2. Boats to bring delayed exhibits for Exposition; Luxembourg paintings arrive and will be open for public view next Wednesday in the Fine Arts Building.

February 4, 1916, Minutes of the Park Commissioners. Superintendent reported that owing to last storm the damage in Balboa Park would probably amount to \$4,500; a large part of the damage being to roads and driveways.

February 4, 1916, San Diego Union, II, 9:1. D. C. Collier arrives; "advance agent" for prosperity.

February 5, 1916, San Diego Sun, 1:4-5. **Sun**, through United Press, tells world Exposition is open and not hit by storm. Although Santa Fe line may not be running for several weeks, incoming steamers are crowded to capacity, and hotels are filled.

February 5, 1916, San Diego Sun, 1:5-6. President Davidson thanks the **Sun** and United Press for tell truth about Exposition.

February 5, 1916, San Diego Sun, 3:4. The battleship *Oregon* extended a formal farewell to San Diego with a grand ball at Dreamland Pavilion last night.

February 5, 1916, San Diego Sun, 3:4. More than 800 residents of Utah arrived in San Diego last night to visit Exposition. Although the Exposition is not running full blast, because of the installation of foreign exhibits and reorganization of many features, recognition is being given to the visitors. The transferring of troops from the Exposition to the flooded districts has left the Exposition without a single band during the present week.

February 5, 1916, San Diego Sun, 3:5. D. C. Collier to boost local Exposition; new elected Commissioner-General. He will seek the aid of railroads, steamship lines, tourist agencies, travel bureaus, hotels, commercial organizations, newspapers and magazines.

February 5, 1916, San Diego Union, 9:4. Colonel D. C. Collier was made Commissioner General to promote 1916 Fair throughout United States; will start on campaign in East next week; chosen by directors of Exposition; aid of roads, steamship lines in 1916 is sought; as advisory board chairman he will enlist support of nation's prominent men.

February 6, 1916, San Diego Union, 5:2. Painted Desert in film acts; old Aztec romance is subject; spectators have privilege of witnessing battle today; 500 persons in scenes.

February 6, 1916, San Diego Union, 9:4. Love statue for "Leap Year Court"; figures of bear, goddess and two children gift from Sacramento Valley Commission; sculpture is by R. Schmid.

February 7, 1916, Los Angeles Times, II, 1:4-5. Mine exhibit planned for San Diego Fair by A. E. Smith and J. E. Babcock.

February 7, 1916, San Diego Evening Tribune, 7:4. Marines direct relief work now; 60 marines and four officers from 4th Regiment, stationed at the Exposition grounds, are on duty in the flood districts at the head of the bay; Colonel J. H. Pendleton, commander of the 4th Regiment, is expecting full daily reports from Captain Charles P. Westcott, commander of the detachment; marines patrolling Otay and Tijuana valleys and supplying the homeless.

February 7, 1916, San Diego Sun, 1:4. New exhibits at Exposition opened in Science and Education building; work being rushed on other exhibits; about 25 members of delegation of Southern Pacific passenger agents here yesterday.

February 7, 1916, San Diego Sun, 6:3. Davidson tells Exposition plans for 1916; battalion of infantry with band expected soon; Philippine constabulary band may be engaged for four months; March 18 will be reopening day.

February 7, 1916, San Diego Union, 1:4-5. False account of damage to Fair shattered by Davidson's statement.

February 7, 1916, San Diego Union, 12:3. Utah state exhibit custodian arrives; E. W. Bolling, who is preparing agricultural trains, assumes duties at Exposition.

February 8, 1916, San Diego Sun, 3:3. Davidson asks schoolchildren, business houses and adults to write letters on February 11, Letter Writing Day, telling of San Diego's Exposition and undamaged condition from recent floods.

February 9, 1916, San Diego Sun, 2:1. Workmen at Exposition are tearing down the comic signboards along the Isthmus amusement street. Animal cages with a frontage of 12 feet each are being installed and about 80 beasts of different kinds will be placed in them as a free attraction during the ensuing year.

Most of the animals are to come from Ocean Beach where a large number have been quartered for some time. A number, however, will be furnished by the city, buffaloes and elks possibly. Among the animals to be on exhibit are ___ monkeys, 4 lions, 3 pumas, 5 bears, 2 coons, 2 leopards, 12 birds, 1 bobcat, 2 coyotes, 1 anteater, 2 buffaloes, 1 sacred cow, ___ wolf, 1 hyena, 1 kangaroo and 1 goat. The monkey cage will be arranged so that spectators can walk around it. The cages will be several feet from the street line.

An interesting feature in connection with the placing of the animals in their new quarters will be the method used by F. G. Kauffman, the trainer in charge, to accustom the lions and leopards to one another. In each cage two of the beasts will be tied so that they cannot harm each other. A week or more will be required for them to get acquainted. It will take an additional two weeks to complete their training. When the new attraction opens two free shows will be given daily.

February 9, 1916, San Diego Sun, 3:7. Saturday will mark the opening of the Luxembourg art exhibit in the California Building. The collection was sent to this country by the French government at the opening of the war and contains about 80 paintings valued at \$500,000. Collection is to remain in San Diego until April 1.

Paintings by Detaille, Henner, Carriere, Monet, Morot, Bema, Ziem, and Bonnar.

February 9, 1916, San Diego Union, 14:2. D. C. Collier tells Chamber of Commerce opportunities for San Diego have never been brighter; railroads are expected to spend millions boosting Exposition.

February 10, 1916, San Diego Sun, 12:1. Truth is told about Exposition; wild reports are denied throughout the East; exposition authorities send telegraphic denials to incorrect reports.

February 10, 1916, San Diego Union, 5:1. D.C. Collier to begin Exposition boost campaign today; hopes to discourage false reports of damage to San Diego during flood.

February 10, 1916, San Diego Union, 6:2. Art gems will be displayed at Fair, Saturday; public to view \$500,000 collection of paintings; Luxembourg exhibit, owned by French government, to be kept open until April.

Saturday morning at the Exposition the great Luxembourg art collection will be opened to the public. This collection of paintings owned by the French government will be on exhibition in the Fine Arts Building until April 1. There are eighty paintings, ranging from two feet square to almost 200 feet square. A conservative estimate of the value of the great collection is \$500,000.

Jean Guiffrey, commissioner of fine arts from France at the San Francisco exposition and occupying the same position at the Panama-California International Exposition, arrived Tuesday, and is superintending the hanging of the paintings.

Among the great art collection are such pictures as "The Dream" by Detaille, which is approximately 15 feet by 10 feet and is especially valuable at this time because of its portrayal of French soldiers in battle. "The Christ" by Henner and "The Christ" by Carriere are other notable paintings to be seen in this collection. "Green Balcony" by Monet, two pastels by Degas, "Rezouville" (?) by A. Morot, and "Evening" by Jule Breton are other paintings sure to attract the attention of Exposition visitors.

"Marquise de A---" by Carolus Duran, "Daudet and His Daughter" by Carriere, "Portrait of Negroes" by Bema, "Portrait of Mme. Pasca" by Bonnar, "Impressionists" by Claude Monet, "Renner" and "Harbor of Antwerp" by Ziem, are a few of the other notable canvases.

"Although coming several weeks before the 1916 dedication, I believe the showing of these paintings is one of the big events of the entire year," said President Davidson yesterday. "San Diego citizens should realize the great opportunity brought to their door by the coming of this French display. The Luxembourg art collection is one of the great attractions for American tourists, and this year, when travel to Europe is impossible, some of Europe's best is to be seen along with the greatest attractions that can be seen in America."

February 11, 1916, Los Angeles Times, II, 7:3-4. Hundreds of workmen repairing flood damage.

San Diego, February 10. --- It's an ill wind that blows no one any good, and the ill wind that blew floods and damage into San Diego county also blew thousands of idle men work at good wages repairing the damage caused by the recent rains, according to the agents of the big corporations who were hardest hit.

The Santa Fe Railroad now has 1500 men on its payrolls out of San Diego all the way from National City to Oceanside. The road expects to resume service March 1, but according to Allen F. Hunt, who is in charge of the work of repairing, there is a possibility that trains will be running a week earlier.

Two hundred men are at work on the plant of the Hercules Powder Company of National City. The County Supervisors are employing hundreds of men repairing the roads and bridges throughout the county and the San Diego and Arizona Railway is building a shoo-fly tract, the construction crew already having go across the Sweetwater Valley.

The La Jolla road also has a considerable force working to get its line in order and will be running very shortly, while the city of San Diego has added 200 more men to it payroll in an effort to get an early repair of the water system.

ART COLLECTIONS

The great Luxembourg art collection will be opened to the public Saturday at the Exposition. This collection of paintings, owned by the French government, will be on exhibition in the Fine Arts Building until April 1. There are eighty paintings, ranging from small ones two feet square to great canvases of almost 200 square feet.

Jean Guiffrey, commissioner of fine arts from France at the San Francisco exposition and occupying the same position at the Panama-California International Exposition, arrived Tuesday and is superintending the hanging of the paintings.

Among this great art collection are such pictures as "The Dream: by Detaille, which is approximately 15x10 feet in size, and is especially valuable at this time because of its portrayal of the French soldiers in battle. "The Christ" by Henner and "The Christ" by Carriere, are other notable paintings to be seen in this collection. "Green Balcony" by Monet, two pastels by Dejas, "Rezouville" by A. Morot, and "Evening" by Jules Breton, are other paintings sure to attract the attention of exposition visitors.

"Daudet and His Daughter" by Carriere, "Portrait of Legros" by Bemar, "Portrait of Mme. Pasca" by Bonnar, "Impressionists" by Claude Monet, "Renoer" and "Harbor of Antwerp" by Ziem are a few other notable canvases.

February 11, 1916, San Diego Evening Tribune, 4:1-2. EDITORIAL: Making It Appear That California's Exposition City Is Badly Crippled.

The most robust lying concerning flood conditions in San Diego county has been perpetrated by the Scripps "string" of newspapers, in which E. W. Scripps of San Diego owns a controlling interest.

February 11, 1916, San Diego Sun, 3:3. Letter Writing Day is a success.

February 12, 1916, San Diego Union, 4:7-8. Famous Luxembourg art exhibit to open today.

February 13, 1916, San Diego Union, 9:3-4. Luxembourg art exhibit attracts hundreds; rare French paintings are shown at Exposition.

February 14, 1916, San Diego Union, 5:1-2. Collier predicts heavy Eastern travel to Exposition; resumption of railroad traffic on Santa Fe will bring thousands here; advertising campaign will be launched.

February 14, 1916, San Diego Union, 5:6. Selig animals to act on Isthmus; film company shows will be shown at Exposition thirty days with option for extension.

February 15, 1916, San Diego Evening Tribune, 5:2. Marines are due back tomorrow; battalion from San Francisco due at 10 a.m., Thursday, on transport *Buffalo*; Colonel Pendleton announced resumption of afternoon band concerts and parades; present force is 505 men; when absent battalion comes regiment strength will be almost 1,000 men.

February 15, 1916, San Diego Union, 2:7. Treasury report read; Exposition had surplus of \$53,383.84 at close of 1915.

Any profits which may accrue from the operation of the Exposition during 1916 will go to the park fund of the city.

February 15, 1916, San Diego Union, 4:4-5. City parks' beauty attracts hundreds.

February 15, 1916, San Diego Union, II, 9:2. Last of big Canadian exhibit at Exposition; only German and French displays are yet to be sent here from San Francisco.

February 15, 1916, San Diego Union, II, 14:2. Montana adds ore to exhibit at Exposition; Anaconda Mining Company sends copper specimens.

February 16, 1916, San Diego Union, 5:2. Salt Lake route advertises Fair; railroad company decides to keep building open at Exposition.

February 17, 1916, San Diego Evening Tribune, 12:3. Naval transport *Buffalo* arrived early today with marines.

February 17, 1916, San Diego Sun, 12:1. 19 nations, 16 counties of California, seven states and territories and two United States possessions (Philippine Islands and Hawaii) represented in 1916 Exposition.

February 18, 1916, San Diego Union, 3:2. Los Angeles to boost Exposition; Chamber of Commerce takes hand; excursion planned and information regarding Fair given out.

February 18, 1916, San Diego Union, 4:5. French exhibit arrived; \$100,000 tapestries, Rodin sculpture and Luxembourg art collection in big display.

February 18, 1916, San Diego Union, 4:6. Exhibits arrive from Philippines; eight carloads of display material come into port.

February 18, 1916, San Diego Union, 5:3. Three companies of U.S. Marines arrive at Exposition; cruiser *Maryland* ordered here on March 3; to remain until Exposition closes.

February 19, 1916, San Diego Union, 5:1. Colors of Spain gift from King to Exposition; to be raised March 18; Count del Valle de Salazar to represent monarch at presentation ceremonies.

February 19, 1916, San Diego Union, II, 9:1. Utah's governor accepts position on Fair Board; Collier appoints Spry to membership on advisory committee for year term; state support promised.

February 20, 1916, San Diego Union, 3:5-6. Women's Fair Board holds first 1916 public function; reception given in honor of Rear Admiral and Mrs. Fullam; more than 1,000 persons attend; marine band supplies music; full attendance of new directors.

February 20, 1916, San Diego Union, 14:1. French exhibit arrives; work of placing is begun; \$100,000 tapestries, Rodin sculptures in big display.

February 21, 1916, San Diego Evening Tribune, 1:1-2. Bond election to be held March 31.

February 21, 1916, San Diego Union, 1:3, 3:3. World-wide toast to 1916 Exposition; "Dream City" will be dedicated noon Saturday, March 18; nineteen nations plan part in festivities.

February 22, 1916, San Diego Evening Tribune, 3:4. Forest service exhibit now ready; occupies a room in Nevada Building.

February 22, 1916, San Diego Union, 1:4. Novel features in scientific exhibit at Fair; strange British Guiana folk, Eskimos shown; Dr. Hough hurrying installation of Smithsonian Institution display for 1916.

February 22, 1916, San Diego Union, 1:6, 3:5. Denver to boost San Diego Fair; Collier appointed Colorado governor member of Exposition's advisory board.

February 23, 1916, San Diego Evening Tribune, 3:3. Commissioners from Holland here.

February 24, 1916, San Diego Sun, 3:3-4. Exposition progress shown as work is rushed; United States Forestry exhibit in Nevada Building ready; exhibits of Brazil and Russia ready; work still going on Canada exhibit; Smithsonian Institution exhibit being installed in three halls of Science and Education Building.

February 24, 1916, San Diego Sun, 9:5-7. Oscar Aeolus is name of goat mascot in the Deer Park near Laurel Street entrance; has lived in park for more than four years; donated by Frank Wyatt.

February 24, 1916, San Diego Sun, page unknown. '49 Camp with no gambling, new Exposition plan; a semi-circle of individual concessions has been installed back of the place where the old entrance used to be.

February 24, 1916, San Diego Union, 1:5, 6:5. Miss Marian Vodges chosen "Miss San Diego," native daughter named to represent Fair.

February 24, 1916, San Diego Union, 7:2. Concerts at Fair to open March 4; Alfred Tommasino and band of 30 musicians on way.

Tommasino's Royal Italian Band, under the leadership of Alfredo Tommasino, will be the official band for the Panama-California International Exposition for 1916. He will open his engagement at the Exposition on March 4. The contract was signed yesterday by Exposition officials and Louis Gasdia, manager of the Italian band.

Tommasino is the youngest band master in the world and is a native of Naples. He was leader of the First Regiment Royal Guards of Italy until he came to this country, and is a composer of note. He has studied under such masters as Chevalier Constantino Gozzi and Professor Ullise Trovati and has completed many important engagements since coming to the United States.

In connection with his band of 30 pieces, Tommasino will bring equipment for rendering grand opera numbers and beginning with dedication day, March 18, three vocalists will present a special program of opera with each concert.

Tommasino is on his way from New York and is expected to arrive in Los Angeles within a few days.

Following the debut of Tommasino's Royal Italian Band, the Tuskegee singers from Tuskegee Institute will sing to the accompaniment of the band on March 5. Although the Exposition will not be dedicated until two weeks later, this event will inaugurate the first of the 1916 special events.

Signor Tommasino's programs will include gems from the old and modern operas, the picturesque peasant music of Hungary, Poland and the Slav provinces, and the characteristic themes of French and

German composers. There are also impressionistic studies, and such composers as Bucalossi, Offenbach, Massenet, Rossini, Schubert, Leoncavallo, and all of the greatest composers are numbered in the works he gives.

February 24, 1916, San Diego Union, II, 9:4. Netherlands' exhibit to be Fair feature; art, pottery and other valuable exhibits to be installed at once in Domestic and Foreign Industries building.

February 26, 1916, San Diego Sun, 5:1. Four girl shows will feature Isthmus at the new Exposition; 12 diving girls from San Francisco Exposition; 15 or 18 in "Paris After Midnight" performance; 12 in "Sultan's Harem," and we in Hawaiian Village attractions.

February 26, 1916, San Diego Union, 1:4-5. World's largest scissors shown; bit cutlery exhibit installed in German exhibit at Exposition.

"You're next!"

A welcome word this in the ordinary downtown barber shop on a busy day, but not as enticing at the Foreign Arts Building on the Exposition grounds yesterday.

Miss Esther Schier, the "barber," who uttered it, certainly was attractive, but the implements with which she planned to do the job positively were formidable.

She temporarily was the proud possessor of a pair of scissors nine feet in length and of a "pocket knife," in lieu of a razor, of almost equal length.

President Davidson, who said he needed a haircut, but who had never dreamed of cutlery of such proportions, except in the days when he used to read fairy tales, was one of the first to disappear.

The immense knife and scissors exhibited by Miss Schier, a San Diego girl, are part of the Henckels' cutlery exhibit in the German section of the Exposition.

Miss Schier also displayed what is said to be the smallest pair of scissors in the world. They appear almost like a speck in the palm of her dainty hand. Between her thumb and forefinger she also held one of the smallest combination pocket knives in existence. This tiny knife is a veritable tool box. It contains a corkscrew, screwdriver, nail file and can opener.

February 27, 1916, San Diego Union, 10:3. Skilled work of Indians will be shown at Fair; Federal government display at Exposition to require 18,000 square feet.

February 27, 1916, San Diego Union, 10:4. Naval Station here is cause for worry; plan to move base here brings criticism from press of San Francisco.

February 29, 1916, San Diego Union, 3:1-2. Exposition wins Madame Melba's heart; refused to consider a contract to sing at the Exposition this time; will appear at the Isis tonight.

February 29, 1916, San Diego Union, 14:2. Night programs at Exposition to begin Saturday night when Tommasino's Royal Italian Band will present its first program in the Plaza de Panama; Exposition price will return to the usual admission of 50 cents following this first concert.

March, 1916, The California Garden, 8-9. Monthly Excursion Through the Exposition Gardens, by G. R. Gorton

Lovers of aquatics have something to look forward to this year when the "open season" for Lotus and Lilies arrives. La Laguna de la Espejo is undergoing radical changes, and, in addition to the rainbow of color which the upper pool will present again this year, the lower and larger later on will contain some of the rarest and best in water plants, in the form of an exhibit by E. D. Sturtevant of Hollywood, recognized as one

of the foremost growers of aquatics in America. The wonderful Victoria will be represented by some eight or ten specimens, all of the hardy species *Cruziana*. This species apparently has all of the desirable qualities of the well-known *Regia* (adding that of greater hardiness). Several species of Lotus will be used, and the elite of Water Lilies will be present, including some imported novelties which cost so much money that it is not best to quote figures, lest we be accused of lapsing into "Exposition exaggeration," but suffice it to say that the cost of one of these rarer sorts would stock a good-sized pond with pretty good varieties. Besides these rare lilies, many of the best standard varieties will be seen, as, for instance, the beautiful Zanzibar or Royal Purple Lily (*Nymphaea Zansibarensis*), considered by connoisseurs to be the finest of all blue water lilies. Several of the various varieties of the species *gracilis*, which is distinguished in part by the fact that the flowers are borne on small stems, fifteen inches or so out of the water, George Huster, a gorgeous crimson, and other tropical lilies will be planted in compliment [sic] to this favored portion of the globe where such tender plants may safely be planted out of doors.

The Botanical Building is ablaze with color --- more than it has been for some months. Much new material has been added, including some very showy Rhododendrons in very good colors, more *Cincerarias*, *Primulas*, *Schizanthus* in many colors, and in the glass house several different species of Anthuriums are in flower.

The path which loops the loop around the wild flower field north of the California Building might prove interesting enough to reward the visitor for going a little bit out of his way and following it around its circuit. Commencing from the northwest corner of the stock beds which occupy the site of the late lamented canna exhibit, the first object of interest which greets one is a *Leptospermum laevigatum* bending under its burden of white bloom. Continuing along past a stone wall, which is opposite an outlook towards Cabrillo Canyon, groups of Solanums of two species will be seen: one *Solanum Warcezwiczii* (it will avail nothing to try to pronounce it --- it can't be done --- the gardeners who have had to call it something have corrupted the specific name into "Worsethanwhisky" --- which is a slander, although it has its faults). It bears large, deeply lobed leaves, quite tropical in appearance and slightly suggesting those of some of the Arailias. The stalk, however, is very thorny, the flowers white, and rendering the plant easy of identification as a Solanum. The growth is very rapid, and according to the introducers the plant attains a height of about six feet, but here it has exceeded the specifications, and rises up to a height of eighteen feet or more in favorable spots. Its relative, the "New Zealand Holly," which will be found nearby, is also a Solanum, but of a species which seems to be unknown to this part of the country. However, the plant is quite decorative when it bears, as now, clusters of bright red berries. The leaves are simple, entirely dull green in color, with the new growth very downy. The whole plant is dwarfier than its relative of the Russian name, averaging about six or eight feet in height.

Returning via the same path, but skirting the east side of the field, the most conspicuous feature of the immediate vicinity is a clump of *Echium fastuosum*, bearing giant spikes of rich blue flowers. This plant seems to be a popular resort of bees, which may be seen at anytime earning their daily bred (bee bread, you know) therefrom. Further along, as the path turns into the one which leads towards the Botanical Building, is a large group of *Polygala dalmaisiana*, a bright cheerful sort of a plant which is constantly maintaining a show of magenta blossoms, but is inclined to be a bit quarrelsome with most other colors, except perhaps pale yellows or, of course, white.

Due west of the Government Building (known during the past year as the Sacramento Valley Building), at the fork of the path, is another *Echium*, a white flowering species --- *Echium simplex* by name. Opposite the northwest corner of the same building is more *Echium fastuosum*. Across the walk, and down into the canyon, a large planting of *Genista carnariensis*, one of the Brooms, has contributed much yellow bloom to the general yellowness of things. Sometimes it seems as if all the plants in Southern California bore yellow flowers.

Near the north door, about opposite the center of the building, *Acacia armata* is in flower. This is one of the most curious of Acacias, "armed," as its name indicates, with thousands of needle-like thorns; north of the Botanical Building the dainty *Diosma Ericoides* --- Breath of Heaven --- with tiny, white flowers and aromatic, heath-like leaves gracing the front lines of the planting bordering the path; and just before the Japanese Tea Garden is reached, a *Cantua buxifolia* may be seen, hung with clusters of funnel-shaped,

orange-red flowers. Around the corner, the path is flanked on both sides for a few feet with the orange and yellow of *Streptosolen jamesonii*.

Among the other Acacias which have come into flower since last month is *Acacia cultriformis*, the "Knife-leaved Acacia," a very odd species, with small, seamless, triangular-shaped leaves, bluish in color. Specimens of this species are planted east of the glass section of the Botanical Building, in the angle formed with the lath portion, and are rather hard to see, being a considerable distance back from the path. *Acacia verticillata* is more accessible, in fact, quite conspicuous on several sides of the Plaza de Panama. This is a species which is often mistaken for a conifer of some sort by the casual observer --- at other times of the year --- by reason of its needle-like leaves. At this season the typical Acacia flowers remove every possible doubt as to its identity. The group of these along the balustrade south of the Plaza bids fair to redeem a promise made for it sometime ago that it would furnish a very attractive blue and gold combination in conjunction with the Heliotrope planted alongside.

March 1, 1916, San Diego Evening Tribune, 7:3. Park Board may prohibit big mat go in stadium; opposition to allowing wrestling match in civic edifice on Sunday voiced.

March 1, 1916, San Diego Sun, 7:1-2. Plans ready for formal opening of Exposition; program given.

March 1, 1916, San Diego Union, 1:1. Exposition sets stage for opening; President Wilson expected to attend dedication on March 18; many events arranged to make day a success.

March 2, 1916, San Diego Herald, 2. EDITORIAL: For Congress

The question of who will be the next congressman is of vital importance to the people of this congressional district and particularly so to the people of San Diego. It should be the aim to send to Washington a representative who will be able to get results, rather than reward some political favors or some popular "good fellow."

The latest names mentioned as candidates are D.C. Collier, Republican; Edgar Luce, Progressive; and Colonel Fred Jewell, Democrat. Colonel Jewell is a popular gentleman and has many friends, but there is no possibility of again electing a Democrat in this district. The race will be won by a Progressive or a Republican, or rather by a Progressive Republican, so Edgar [Luce] can never again be elected to any office.

D. C. Collier is a Progressive Republican and is exceedingly popular, but it is a question whether he is as well fitted for the work which a congressman is expected to do as he is as a publicity man and a booster. Whether or not he is the best man for the place, his popularity will make him a factor in the race. What the people should do is to select some man who they know will get results regardless of friendship or politics.

The Herald still insists that Ed Fletcher and L. J. Wilde have those qualifications for getting results that makes them the two best men for the office of congressman, if either could be persuaded to enter the race. Colonel Fletcher has stated he cannot and will not be a candidate. So far Mr. Wilde has refused to commit himself. The refusal of Fletcher to be a candidate makes Wilde the one best man available.

If the people of San Diego are wise, they will get together, center on Wilde, and insist that he enter the race. So far, Mr. Wilde has refused to be a candidate for any office, but now that he has retired from active business, he might be persuaded to do the public a great service if he was shown that it was a public desire. Organize and go for Wilde.

March 2, 1916, San Diego Sun, 3:4. Alfredo Tommasino and his Royal Italian Band will give first concert Saturday, March 4, at 7:30 p.m. in Plaza de Panama.

March 2, 1916, San Diego Sun, 4:4. Canadian exhibit getting finishing touches; red and gold felt decorations cover ceiling and side walls; beavers turned into the beaver "haunt" yesterday.

March 2, 1916, San Diego Union, 8:4-5. Pageant at Fair April 22 to honor memory of Shakespeare; children of schools to participate.

March 2, 1916, San Diego Union, II, 9:5. Ethnology exhibit at Fair opened to public view in Science and Education Building; installed by Smithsonian Institution and National Museum.

March 3, 1916. Minutes of the Board of Park Commissioners: Panama-California International Exposition requested to pay \$3,000 per month for the care and maintenance of Exposition grounds.

March 4, 1916, San Diego Union, 1:6. A magna-vox is to be installed at Spreckels Organ Pavilion and at other places on the grounds; will send music into Plaza.

March 4, 1916, San Diego Union, 1:7-8. A squadron of military biplanes piloted by four aviators will circle over Exposition grounds dedication day.

March 5, 1916, San Diego Union, II, 1:4. Six programs of music scheduled at Exposition; three band concerts; Tuskegee singers, church choir and organ recital today.

March 6, 1916, Los Angeles Times, II, 3:5. Chamber of Commerce plans San Diego excursion.

March 6, 1916, San Diego Evening Tribune, 3:3. Special events to be high caliber.

March 6, 1916, San Diego Evening Tribune, 3:3. Isthmus puts on new show.

March 6, 1916, San Diego Evening Tribune, 3:3. W. W. Bowers says it is a shame that California Building tower is not lighted.

March 6, 1916, San Diego Evening Tribune, 3:4. Exhibits ready for opening of Fair.

March 6, 1916, San Diego Evening Tribune, 9:1-2. More than 6,000 persons visit Exposition Sunday afternoon; Italian band, organ and Jubilee Singers popular.

March 6, 1916, San Diego Sun, 3:1. Tuskegee Jubilee Singers at Exposition yesterday.

A cordial greeting was accorded the famous Tuskegee singers at the exposition yesterday. The day was delightfully warm, and the large audience enjoyed to the utmost the exceptional advantages offered by the mild climatic conditions and the unusually interesting open-air concert. The Jubilee Singers gave some genuine old plantation darkey songs with fine effect, and were encored again and again. Among their songs were "Good-News, Chariot Coming," "Go Down Moses," and three old favorites, "Swanee River," "Carry Me Back to Old Virginia," and "Swing Low, Sweet Chariot."

Charles Winter Wood, manager of the organization, added much to the interest of the program by reading selections from Paul Laurence Dunbar, the Negro poet. He also made a few remarks concerning the splendid work for the education and uplift of the Negro race which has been made and is being carried on at the famous Tuskegee Institute.

March 6, 1916, San Diego Union, 3:4. Grape Day fete at Exposition, aim of State viticulture board member.

March 6, 1916, San Diego Union, 3:5. Arizona to have 86 feet of exhibit space in Panama-Pacific building.

March 6, 1916, San Diego Union, 3:6. "War of Worlds" will be ready for opening.

March 6, 1916, San Diego Union, 5:1. Changed Isthmus will teem with new joy devices.

The Exposition's new Isthmus, which is being reorganize for the March 18 dedication, will provide amusement of every description and promises to be one of the successful features of the Exposition during

the year. Repainted, relighted, "fur-lined," and offering dozens of new features, real carnival is scheduled to reign afternoons and nights.

A list of 1916 attractions was prepared yesterday and a number of others will be added later. H. E. Croft's Crocodile and Alligator Farm, where alligators from six months to 800 years old are shown; the Sultan's Harem, a realistic reproduction of spectacular dancing and singing; Elizabeth the famous midget who was visited by thousands at San Francisco; Robinson's educated animals; heroes and heroines of motion picture plays; a Grizzly Gulch, to be a reproduction of '49 days are among the amusements to be opened.

Many New Attractions

Paris After Midnight, a reproduction of the Latin Quarter of Paris; Jerusalem, a reproduction of the Holy City; Captain and Madame Ellis, two headliners in the intellectual realm, as Captain offers a program to show that he thinks and Madame Ellis startles by her feats of mental telepathy, will be seen.

Stella, whose greatest claim is the publicity gained at the San Francisco Exposition, is expected to be forgotten when Cleopatra at the Bath and other nudes are shown in the Imperial Art Gallery.

The War of the Worlds will be as strong a drawing card as in 1915; the Painted Desert will claim its patronage; the Panama Canal will open March 15, to be ready for Dedication Day; the Exposition's free zoo, on either side of the Isthmus, will offer a hundred interesting animals.

Climbing the Yelps, Chinatown, the Gem Mine, the Ostrich Farm, the Doll House, and the Temple of Mirth are said to be ready for the amusement-seeking public.

S. P. Free Display

The Hawaiian Village will be one of the big attractions of 1916. The Roller Coaster, Race Horse, Dancing Pavilion, the Merry-go-round, the Kelly game, Clothes' Pitch game, Ferris Wheel, Shooting Gallery, the Motordome, the Joy Wheel, Japan Joy Garden, and Skee Ball are interesting features.

The Southern Pacific Railway building is presenting a free display, reproducing scenes along the right-of-way of this company.

The Palace of Mines, the Rotissery, Alhambra Cafeteria, Cider Mill, knife and cane racks, novelty stands, baseball, White House Café, and others not yet signed are to make up the Joy Street district.

A new stage has been built at the north end of the Isthmus and on this will be offered extensive free programs each Saturday night. Tommasino's Royal Italian Band will play in front of the government aquarium building, which is at the south end of the Isthmus.

March 6, 1916, San Diego Union, 5:7. Wide scope of work revealed by United States exhibit.

March 7, 1916, San Diego Sun, 1:4. United States exhibit is complete; display of government vocational Indian schools; miniature sea where a battleship is sunk by a submarine in mine explosion; models of U.S. Navy ships; movies.

March 7, 1916, San Diego Union, 8:1. Two thousand troops to be stationed at Fair during 1916.

March 7, 1916, San Diego Union, 8:2-6. Six thousand persons listened to the concert of Tommasino's band and the Tuskegee Institute singers at Exposition Sunday, March 5; weather was not favorable.

March 7, 1916, San Diego Union, 8:4. Colonel D. C. Collier is expected in San Diego today; had been on a boosting trip through Midwest.

March 8, 1916, San Diego Union, 3:2-3. Holiday March 18 assured for Exposition dedication.

March 8, 1916, San Diego Union, II, 9:2-3. Southern California Counties Building at Exposition ready for another year.

March 8, 1916, San Diego Union, 14:5-6. Exhibits of United States at Exposition will be thrown open today.

The United States building at the Exposition, containing the exhibits of the departments of treasury, war, navy, commerce and interior, will be open to the public today.

Demonstration of methods to employ in resuscitating persons drowned or suffocated, instruction in giving first aid to the injured, and a demonstration of the way in which harbors of the United States would be mined in time of war will be given daily.

The United States aquarium, which is to house the exhibit of the bureau of fisheries, is under construction at the head of the Isthmus, adjacent to the War of the Worlds concession. It will be ready to exhibit about the middle of April.

32 Cages in Zoo

The Exposition Zoo, in charge of F. L. Kaufmann and consisting of buffaloes, kangaroos, bears, lions, leopards, hyenas, wolves, baboons, monkeys, parrots and cockatoos, is the latest acquisition for the Isthmus.

The zoo, to be situated at the far end of the Isthmus, will contain thirty-two cages, which will spread out along the amusement street so that every animal will be in plain view. Each cage will have a plate giving the pet name of the animal, the species, and the native country.

No pains have been spared to make the Exposition zoo the best of its kind in the west.

The Isthmus free stage occupies a prominent position in the midst of the row of cages. On this stage, the exposition animals will give a free performance. The carnivorous animals will be fed daily at 4:30 o'clock.

Auto Race Resolution

After a stormy session yesterday at a special meeting of the Isthmus concessionaires, Kenneth Croft, manager of the Hawaiian Village, was chosen to draft a resolution to be presented to President Davidson, concerning the 50-mile race set for Saturday, March 25.

The following is the text of the resolution of the concessionaires:

"At a meeting of the concessionaires this morning, at which were present Tommy Getz, Dentzel Cooch, Quinn, Croft and Gardiner, it was resolved that it should be respectfully presented to you two points in connection with the proposed Exposition automobile race and protest against the same entered.

"First: The danger to the fronts in case of accident.

"Second: The loss entered into in closing the Isthmus on the afternoon of this race.

"The foregoing appointed me their representative to bring these matters to your notice and ask you to consider same."

The executive committee will consider the matter of danger to Isthmus attractions, and if proper safeguards cannot be made to protect life and property, another course will be sought on the Exposition grounds, and if this is not available, the big contest may be called off.

March 9, 1916, San Diego Union, 3:3-4. Louis XVI desk reproduced and sent to Exposition for exhibit in Southern California Counties Building.

March 9, 1916, San Diego Union, II, 9:2-5. Four rich musical programs at Exposition today; Tommasino's band will present two concerts.

March 9, 1916, San Diego Union, II, 9:3-4. Lots to see at Exposition; buildings open; music daily.

March 9, 1916, San Diego Union, II, 9:4 Room for San Diego artists at Fair, aim; collection of paintings by Californians proposed by the Woman's Board.

March 10, 1916, San Diego Sun, 1:1. President Wilson orders troops to Mexico; American Army will hunt down Villa.

March 10, 1916, San Diego Union, 4:2-3. Doctor H. J. Stewart favors San Diego Symphony.

March 10, 1916, San Diego Union, 5:2-3. Coast road will be ready for opening, report.

March 10, 1916, San Diego Union, 5:4. Nude figures of French display shock ex-mayor Wadham.

March 11, 1916, San Diego Evening Tribune, 15:4. Colonel D. C. Collier sticks with Bull Moosers.

March 11, 1916, San Diego Union, 5:1. First United States Cavalry at Fair in readiness for service in Mexico.

March 11, 1916, San Diego Union, 5:7. Exposition's 50-mile automobile race set for March 25; objections of Al Waddel, representing the Los Angeles American Automobile Association, have been overcome.

March 11, 1916, San Diego Union, 16:5. Exposition's zoo now real jungle land.

If Noah's ark had been unloaded at the north end of the Isthmus the effect would not have been a great deal more wonderful from a zoological standpoint than exists at present, with the opening to the public of the great Panama-International menagerie on that spot.

The exhibit of wild animal life, which is free to all Isthmus visitors and which is well worth the price of admission to the grounds alone, is a veritable jungle land, transported almost to your very door.

In a long row of neat and substantial cages fronting on the Isthmus are to be seen lions, leopards, bears, hyenas, catamounts, wolves, jaguars, monkeys, and other beasts and birds of rare species representing almost every country in the world. Most any circus would be proud of such a collection, but, unlike the circus animals, these wild captives have not come to San Diego for a single day, but for the entire year. Once on the Isthmus one can now hear the roar of the lion, the cry of the smaller cats, the grunt of the bear, the chatter of the monkeys, the wild piercing shriek of the hyena, and, in fact, an entire jungle chorus, both at night and day.

Most of the animals are friendly --- in their strong iron cages --- and their trainer has them all well in hand, eliminating, it is said, all possible danger.

The zoo is sure to make a great place for the little folks. The exhibit is as instructive as it is entertaining. The monkeys' cages, which contain many baby simians, as well as the larger baboons, will be especially attractive. The monkeys are already at home in their new surroundings and are cutting all kinds of funny capers. No trip to the Exposition will be complete without a visit to the zoo.

March 11, 1916, San Diego Union, 16:4. Jack Johnson arrives; not former prize "pug," but fighting alligator.

Jack Johnson, black and smiling, arrived in San Diego yesterday. Johnson weighs 1,000 (?) pounds, is 12 feet tall, and is still some fighter; but it is not Jack Johnson, the black man of the prize ring, but a fighting alligator to be installed in the alligator farm on the Isthmus. Samson, a 14-foot crocodile and one of the tank containing the only crocodiles in captivity, is another famous animal in the special car of more than 250 alligators and crocodiles that came to the Exposition yesterday. Everyone of the animals, which range in age from six months to 800 years, made the trip from the north with their mouths tied shut. This precaution is necessary to make the size of the crates a fraction of what they would have to be if they were permitted to open their jaws, and, also, it prevents fighting.

The male crocodiles are valued at \$1,000 (?) and the females from \$600 to \$800.

The alligator farm is being built opposite the Hawaiian Village on the Isthmus and will be open before Dedication Day. H. E. Croff is manager of this Exposition attraction.

March 12, 1916, San Diego Union, 1:4-5. Brilliant program will flash 1916 Exposition into life next Saturday with many present.

March 12, 1916, San Diego Union, 7:5. Rich Botanical Building's blooms charm visitors.

March 12, 1916, San Diego Union, 12:4. Display of tapestries and rugs, dating back to the reigns of Louis XIV, Louis XV, and Louis XVI, in French exhibit adorn walls of California Building.

March 12, 1916, San Diego Union, 15:5-6. Day full of music planned for Sunday Fair visitors.

March 12, 1916, San Diego Union, II, 1:3. Fifty paintings by San Diegans to be on exhibition in the Woman's Board Headquarters at the Exposition March 14.

March 13, 1916, Los Angeles Times, II, 7:3-4. Until brought to the San Diego Exposition by her parents, who have charge of the Alaskan exhibit, three-year old Margaret Marie Bales, never saw another child.

March 13, 1916, San Diego Evening Tribune, 4:7-8. San Diego ores shown at Palace of Mines.

March 13, 1916, San Diego Evening Tribune, 7:3. Four troops of cavalry leave San Diego.

March 13, 1916, San Diego Sun, 7:1-3. Fine program arranged for Exposition opening beginning at 11 a.m.; Franklin K. Lane, secretary of the interior, to make speech of day; flags of all nations, surmounted by Stars and Stripes, will be unfurled at Plaza de Panama after 11 a.m.; military parade starting at 10 a.m.; Governor Hiram Johnson of California and Governor Strong of Alaska to speak; five bands will be in action; aero flights by members of North Island Aero Corps in afternoon; grand ball in Plaza de Panama in evening; Count Salazar, official representative of the King of Spain, will unveil Spanish flag.

March 13, 1916, San Diego Union, 1:4-5. Cavalry to leave today; 40 cars to carry squadron; Douglas, Arizona is troop destination.

Orders for the entraining for services in Mexico of the First United States Cavalry, 300 strong, stationed at the Exposition grounds, were received yesterday morning by Captain Frank B. Arnold, divisional squadron commander. The cavalymen, accompanied by a pack train of sixty mules and the hospital corps, will leave San Diego for Douglas, Arizona in a special train of forty cars about 9 o'clock this morning.

The division of the First Cavalry consists of troops A, D, K and L. Six troops of First Cavalry left the Presidio of Monterey at 4 o'clock yesterday afternoon in a special train of seventy-six cars. These troops will join the First Cavalry squadron from San Diego at Douglas.

According to word received from Western Division Headquarters here yesterday the First Cavalry will be sent into Mexico to act as rear guard for the troops which already have been sent across the border in pursuit of Villa.

Lieutenant C. Enos is in command of Troop A; Lieutenant W. W. Gordon of Troop D; Captain Frank Arnold of Troop K; and Lieutenant W. C. McChord of Troop L. There are approximately seventy men to a troop. Lieutenant J. K. Boles is in command of the quartermaster department.

Troops B and M of the regiment are expected to be kept at Calexico, where they are stationed now.

March 13, 1916, San Diego Union, 3:2-4. Rush work on United States building; fisheries exhibit at Fair to be varied.

Among the many new features at the Exposition this year will be the United States government fisheries exhibit, to be arranged in a fine new building now under construction facing the Calle Colon, adjacent to the War of the Worlds at the extreme south end of the Isthmus.

The building, built in conformity with the other Exposition structures, is a thing of rare beauty. A large force of workmen is engaged in rushing the edifice to completion.

The great government fisheries exhibit in this building will be one of the most wonderful of the kind every placed on display, showing many specimens from Hawaii.

March 13, 1916, San Diego Union, 3:4. French exhibit at Fair to open tomorrow; Tommasino's Band to play "La Marsellaise"; President Davidson, others to speak.

March 13, 1916, San Diego Union, 3:4. Guards to prevent scalping of Exposition souvenir badges.

March 13, 1916, San Diego Union, 3:5-6. Gong will announce Exposition opening.

March 13, 1916, San Diego Union, 3:6. San Diego artists' collection to be thrown open to visitors in the Woman's Board Headquarters this afternoon.

March 13, 1916, San Diego Union, 5:2. Banquet to end opening program.

March 13, 1916, San Diego Union, 5:2. Program at Fair attracts crowd.

March 13, 1916, San Diego Union, 5:6. Many events of today's program at Exposition; guard mount by marines; submarine mine demonstration; music attractions.

March 14, 1916, San Diego Union, 3:1. Car will spread word that road to Fair is open.

March 14, 1916, San Diego Union, 3:2-3. Two armed girls hike to Fair.

March 14, 1916, San Diego Union, 3:4. French exhibit at Fair to open tomorrow.

March 14, 1916, San Diego Union, 3:5. Brazil's exhibit at Fair to be enlarged.

March 14, 1916, San Diego Union, 3:6. Paintings by San Diego artists on display in Woman's Board Headquarters.

March 15, 1916, Los Angeles Times, II, 6:4-5. Program for opening of big new Exposition.

March 15, 1916, San Diego Sun, 12:1. Put final touches on Magic City; French exhibit dedicated today.

The Southland's Magic City --- the Panama-California International Exposition was a beehive of activity today.

Artists and workmen, concessionaires and exhibit managers, were putting the final touches on the Southern California wonderland --- one of the very finest international exposition's in the world's history. All will be ready for the grand opening Saturday when thousands of visitors are expected.

The gala event of today was the dedication of the fine French exhibit. With M. Jules Heltner, French consul general at San Francisco present and with other dignitaries in attendance, a fine program was scheduled.

This program included the raising of the national colors above the building and speeches by President Davidson, Superintendent of Schools Duncan MacKinnon and Jules Neltner (?). A concert of French national airs was to be heard from Tommasino's band.

THROWN OPEN

On completion of the program the building was thrown open to visitors.

The arrangement of the French exhibit is an artistic one. On entering the building a large Gobelin tapestry --- the portrayal of an incident in the campaigns of Alexander the Great is hung, at either sides of which hangs the blue and gold tapestries made for Napoleon, and below which lies the famous carpets of "The Cohortes," ordered made in Tournay by Napoleon for the Palace of Moudon. On the walls at either side of the building hang a Gobelin as artistic as it is historically significant, below which is spread a magnificent savonnerie, ordered for the Palace of the Louvre by Louis XIV. An effective placing of vases and statuary and artistic _____ of historic furniture about the building adds to the impressiveness of the display.

In the balcony at the front of the building is the display of models on which are to be seen the latest Paris creations. The _____ of models is a labyrinth of colors --- not harsh colors, repulsive to the esthetic eye, but soft, delicate shades which please the most artistic tastes.

The French exhibit does not show the finer sides of the nation's life only, but contains ample proof of the economic development and industrial efficiency of France.

EXPO NOTES

The Dedication Day dinner at the Cristobal Café will have the personal supervision of Mr. and Mrs. Kenneth Croft, who yesterday took over the management of this exposition enterprise. Elaborate decorations and many alterations have been made at the café to make the big banquet hall as attractive as possible.

When President Davidson offers his international toast to peace at the exposition a few minutes before noon Saturday, it will be drunk in orange juice in honor of Orange day, which falls on that day.

An entertaining feature of the night Dedication day program at the exposition is the outdoor ball in the Plaza de Panama from 8 till 10. The grand march will begin at 9 o'clock and will be led by "Miss San Diego - 1916," Secretary of the Interior Franklin K. Lane, Count and Countess Del Valle de Salazar, Governor and Mrs. Hiram Johnson and visiting notables at the exposition.

In order to permit dedication day visitors to the exposition to have a full evening on the exposition grounds, the La Jolla electric line will run extra dedication night car service. The last car will leave the Fourth street office at 1:15 a.m. Sunday.

March 15, 1916, San Diego Union, 5:1. Franklin K. Lane, secretary of the interior, sent to San Diego to represent President Wilson at opening of 1916 Fair.

March 15, 1916, San Diego Union, 5:2. Leading houses will close Dedication Day.

March 15, 1916, San Diego Union, 5:2. A nude "Magdalen," painted by Murillo one hundred and fifty years ago and stolen from Mexican cathedral sixty years ago exhibited at Fair by Frank Strauss.

March 15, 1916, San Diego Union, 5:4. Universal Film Company of Los Angeles filming the play "The Eye of God" on Exposition grounds.

March 15, 1916, San Diego Union, 5:4. Two carloads of wild animals due today.

March 15, 1916, San Diego Union, 5:5. French exhibit to be opened today.

March 15, 1916, San Diego Union, 5:5. Mr. and Mrs. Kenneth Croft take over management of Cristobal Café.

March 15, 1916, San Diego Union, 5:7 Montana exhibit exhaustive.

March 16, 1916, San Diego Evening Tribune, 3:3. Complete plan for reopening of Fair.

March 16, 1916, San Diego Evening Tribune, 4:1-2. EDITORIAL: Thanking the Women's Board for a Favor to California Art.

March 16, 1916, San Diego Union, 6:1-5. New Maryland Hotel is opened with big reception.

March 16, 1916, San Diego Union, 8:2. Rare brilliancy of French exhibit thrills throng.

March 16, 1916, San Diego Union, II, 9:1-5. Cheers ring as French exhibit is opened at Fair.

March 16, 1916, San Diego Union, II, 11:1. Nations of world listed for parts in reopening of Fair.

March 16, 1916, San Diego Union, II, 11:3-4. Isthmus to have big part in dedication.

March 16, 1916, San Diego Union, II, 9:1-5. Cheers ring as French exhibit is opened.

March 17, 1916, San Diego Evening Tribune, 1:1, 8:3-4. New and great Fair ready; President Wilson will give opening signal.

March 17, 1916, San Diego Evening Tribune, 4:1-2. EDITORIAL: San Diego's Duty to Its Exposition.

San Diego's exposition is primarily for San Diegans.

Therefore, let San Diegans consider it their duty as well as their pleasure to swell the daily attendance upon the feast of reason spread for them, trusting that in their own flow of soul they will appreciate the high worth of what they have themselves provided.

March 17, 1916, San Diego Evening Tribune, 5:2-4. Working model of big battleship *Massachusetts* to be exhibited by inventor at Fair.

March 17, 1916, San Diego Evening Tribune, 6:1. Women's Board gives outdoor ball; event in honor of personal representative of President Wilson takes place on Plaza de Panama.

March 17, 1916, San Diego Sun, 1:8, 3:3. President Wilson will touch button at start Fair going at noon tomorrow in the White House; an immense gong loosened by the flash over the electric wires will clang out the message in the Plaza de Panama; flags of all nations will be unfurled.

March 17, 1916, San Diego Union, 1:3-4. Visitors flock to city to help in celebration as Exposition is dedicated.

March 18, 1916, Los Angeles Times, 1:3, 3:7. Reopening of San Diego Exposition; gala day promised in San Diego; thousands of arrivals from Los Angeles and the north crowd hotels; Secretary of the Interior Lane represents President Wilson at Dedication, by Lewis Havermale.

March 18, 1916, San Diego Evening Tribune, Dedication Number

1:1-4. City again triumphs this day.

1:1-2, 18:3-6. Notables of many nations take part in big ceremony, by George H. White.

Noon! The great gong at the United States government exposition building sounded under pressure of an electric button in the White House at Washington. United States warships in the harbor and United States marines within the grounds fired salutes, the Stars and Stripes were raised by Miss San Diego, the flags of eighteen nations unfurled, the band played "Star Spangled Banner," the exposition toast was made by President G. A. Davidson --- and the Panama-California International exposition, San Diego's 1916 fair, was officially opened with its welcome to the world.

This noon, today, was, therefore, the most signally significant in San Diego's history, for unless all signs fail, the new exposition will mark the beginning of a new and greater era for San Diego.

The mid-day ceremony of so great import was but a brief ten minutes' incident in the formal dedicatory exercises of the new exposition. It followed an hour of formalities and speeches and was to be followed by another hour of similar character. Still another hour earlier, the day's program was really begun with the imposing military parade which passed up Broadway to the exposition grounds, and was reviewed on the Plaza de Panama. And afterwards events of the auspicious day were to follow with rapidity until midnight, or beyond.

Following the review of the military parade in the plaza, and selections from Tommasino's Royal Italian Band, President Davidson at 11 o'clock, delivered the opening address from the steps of the United States government building fronting the Plaza de Panama on the north.

Crowds began clicking the turnstiles early this forenoon and by 11 o'clock, when the dedicatory exercises began, the bureau of admissions estimated closely that more than 20,000 persons had entered the grounds. The heavy line continued to pass in and it was predicted that 40,000 or more would be registered as the day's attendance.

Senator Robert N. Bulla, of Los Angeles, first vice president of the new exposition and chairman of the day, was the first speaker introduced by President G. Aubrey Davidson. Senator Bulla said:

"Ladies and Gentlemen and Distinguished Guests --- A little more than one year ago the Panama-California exposition was dedicated in this place, designed originally to commemorate the greatest material achievement of modern times, the completion of the Panama canal: the elements of beauty, science and sentiment were, nevertheless, the most characteristic features of its construction. Barren hills and rugged canyons had been converted into a garden so entrancing as to captivate and compel the admiration and wonder of even the most practical minded visitor. Its architecture was the realization of an artist's dream without one jarring note to mar the exquisite whole. Unconsciously one found himself recurring to the romantic past, when the holy padres landed on the shores of the "Harbor of the Sun" and California began.

(Senator Bulla's talk was followed by remarks by Mayor Edwin M. Capps of San Diego, R. W. Pridham, chairman of the Los Angeles County supervisors, and John S. Mitchell, president of the Los Angeles Chamber of Commerce. After the introductory speeches, Count Del Valle de Salazar, representing King Alfonso of Spain, raised the Spanish flag, following which Mayor C. E.

Sebastian of Los Angeles, Governor Strong of Arizona, and Governor Hiram Johnson of California gave short addresses. These were succeeded by the chief address of the day, given by Franklin K. Lane, secretary of the interior, representing President Wilson.. He described the burdens of the presidency that kept President Wilson from attending the dedication, complimented San Diego on its daring and achievement, and ended by suggesting that men should fight nature rather than one another:

What has this nation to say to those who lie before it and around it? We answer that we have come to know that this world is made not for the gratification or the desire of a few but for the benefit of the many; that power must be common capital; that nature not man is the enemy man must conquer, and that the world belongs to him who reclaims the desert, who bores the mountains, who most swiftly sails the seas and most surely masters the air; who with plow and microscope, furnace and blow pipe, test tube and machine makes this world serve mankind best.

Outstanding features of the evening are the dedication day dinner to be held at 7 o'clock at the Cristobal Café, and the grand open-air ball to begin at 8 o'clock on the Plaza de Panama, under auspices of the official woman's board with music furnished by the Marine and Flagship bands.

The exposition has adopted its new flag, but the designer has not been rewarded with the season ticket promised. Executive Secretary H. J. Penfold is willing to reward the author of the design if he will come forward and make himself known.

A trio of singers from Milan Grand Opera company, consisting of Eilina Lebbycot Tronbett, soprano; G. Ingar, tenor, and David Silvia, baritone, will assist Tommasino's Royal Band in two concerts today.

The young woman in charge of the exposition studio on the second floor of the Russia and Brazil building will hold open house this afternoon and will have the new impressionistic paintings on display. Entrance to this gallery is through the Montezuma gardens.

2:1. Women's work is given high place at new Exposition.

2:2-7. Famous United States Marine Corps Regiment makes San Diego home, by Sergeant Major Thomas F. Carney.

2:4-5. Model Farm justifies existence.

2:8. Model aeroplane meet, first of its kind, to be held here; trophy cup to go to winning school.

3:1-6. Swiss watches form a part of unique exhibit in Foreign and Domestic Industries building; commissioner will entertain in pretty chalet.

3:1-7. Holland's exhibit in Foreign and Domestic Industries building artistic and most interesting.

4:1-7. Magnificent Brazilian exhibit reward of untiring efforts of Doctor Eugenio Dahne.

5:1-6. Russian exhibit at Exposition typifies tremendous industries of large nation.

5:7. San Francisco Chronicle writer amazed by fine examples of peasants' shown at Russian exhibit in the Transportation building at the Panama-Pacific International Exposition in 1915.

6:1-3. Spain's display in Foreign Arts building at Fair; paintings, etchings, bronzes, tapestries; tile work, silks, laces and crockery from Valencia; jewelry, wools, cloth and other articles from Barcelona.

6:1-7. Combination of Oriental displays from Persia, India, Turkey and Egypt offered by J. Gazvini in Foreign Arts building.

6:1-7 Spirit of Arabian nights prevails over exhibits from mystic lands.

6:4-7. Beautiful Italian Colonies exhibit in Foreign Arts building.

7:1-7. Union Oil Company's exhibit in Foreign and Domestic Products building proves worth of Golden State's products.

8:1-2. Aquarium curio section in Pan-Pacific Building.

8:1-2. Pacific Coast Steamship Company in Pan-Pacific Building.

8:1-2. Pearl carvings display of Afana brothers in Pan-Pacific Building.

8:1-7. Mission Wine Company in Pan-Pacific Building

8:1-7. Displays from Philippines, Western America and Sunny Islands group fill Panama-Pacific Building.

8:1-7. Hawaii, seat of Pan-Pacific movement.

8:3-4. Arizona section in Pan-Pacific Building.

8:3-4. Oceanic Steamship Company in Pan-Pacific Building

8:3-4. Hawaiian Coffee section in Pan-Pacific Building.

9:1-4. Twenty nations exhibiting at new Fair.

9:6-7. Athletics to have place in big Exposition.

9:8. Ethnology Hall display vast in scope; central room of Science and Education Building to be known as the Hall of Ethnology.

9:8. Fine French paintings lead all; million dollar Luxembourg paintings in Fine Arts gallery.

11:1-7. Canada's exhibit is one of best at Exposition.

12:1-7. Counties united in exhibiting in the Southern California Counties Building; assessed valuation \$949,784,180; Valuation of products in 1914, \$572,032,055; population, 1,750,000.

12:1-7. The Story of California, by John Steven McGroarty.

13:1-7. Oriental Joy Garden on Isthmus; S. Sekiguchi, proprietor; dining room; six Japanese dancing girls; kissball and Japanese rolling ball game.

16:7-7. Magnificent Italian exhibit at main entrance of Foreign Arts Building.

17:1-2, 18:3-6. Exposition opened to world.

They had intended to use them at the Alhambra ice rink last night. But the plant could not be installed in time, and the opening of the rink had to be postponed at least a week.

March 19, 1916, San Diego Union, II, 8:3. ON THE MARGIN by Yorick . . . California art at the San Diego Exposition.

March 20, 1916, San Diego Sun, 4:1. EDITORIAL: The Exposition

The Panama-California International Exposition is formally opened today and San Diego is justly proud of the successful opening festivities.

Our thousands of visitors were greeted with an enthusiastic welcome, and they were evidently well pleased with the entertainment offered at the Magic City in the park.

One thing, however, the exposition authorities learned on the opening day. That is the need of an A1 special events man --- an amusement expert who can direct special events throughout the year; one who knows the business of entertaining exposition throngs and who can see that the advertised events are run properly.

The need for such a man was plainly shown as hundreds waited for the ill-fated open-air ball to start at the Plaza Saturday night.

Perhaps someone in planning the amusement for the 600 in the Cristobal forgot that there were 30,000-odd outside to be entertained.

No doubt the exposition officials will profit by their early experience, however, and that future special events will be handled to the satisfaction of all.

March 20, 1916, San Diego Sun, 12:5. Over 45,000 flocked through three main gates of Exposition Saturday; all buildings to be open hereafter on Sundays.

“All ready for a great year.”

So said the exposition officials today. Notwithstanding a fine spring shower that arrived during the morning, they were wearing the proverbial “smile that won’t come off.” For exposition attendance records were shattered on Saturday, the day of the formal opening, over 45,000 flocking through the three main gates.

The exhibit buildings were crowded, both Saturday and Sunday, almost all being open yesterday. It is announced that all the buildings will be open on Sunday hereafter, an announcement that was greeted with enthusiasm by many today.

Isthmus shows did a land-office business Saturday. All the concessions were well patronized.

“We are highly gratified with the opening of the exposition,” said President Davidson today, and a highly successful and prosperous year is predicted on all sides.”

Music programs yesterday pleased the exposition throngs. The band and organ concerts and the singing of the Peoples’ Chorus and the Choir of All Saints’ Episcopal Church pleased greatly.

Evidence that Governor Hiram Johnson had not lost any of his popularity here came Saturday during the addresses at the exposition. The governor got the biggest hand of all the speakers, and his remarks were given enthusiastic attention.

March 20, 1916, San Diego Union, 1:4, 5:1. Exposition officially opened; 45,000 persons saw Exposition on Dedication Day; Saturday’s throng smashes all attendance records; Davidson says mark to be passed many times in year; biggest business in history of Isthmus; thousands view Canada exhibit; Davidson thinks the greatest number during any single day in 1915 was 32,000.

March 20, 1916, San Diego Union. Exposition Sidelights: George P. Pitkin, chief yeoman of the navy, attached to the government exhibit, and Sergeant Major J. F. Carney, ranking sergeant major of the marine corps, hoisted the flag at the flag raising on the Plaza Saturday.

March 21, 1916, San Diego Evening Tribune, 11:1. New shows join Isthmus; Princess Wenona, woman rifle shot; Reckless Vernon speeds on a perpendicular wall at a speed of 100 miles an hour, using a motorcycle and miniature auto; “Nude Magdalen” by Murillo, valued at \$50,000.

March 21, 1916, San Diego Evening Tribune, 11:2. Exhibit of Spain in Foreign Arts Building will be ready soon; owing to the lack of space the entire Spanish exhibit cannot be displayed at once.

March 21, 1916, San Diego Union, II, 9:4. Five hundred children on program April 29 honoring Shakespeare; high school will present characters to represent Queen Elizabeth’s court.

March 22, 1916, San Diego Sun, 6:6. Automobiles to be allowed on Exposition grounds every Monday beginning March 27; will give invalids a chance to make excursion.

March 22, 1916, San Diego Union, 7:2-4. La Belle Seville, Spanish dancer, wins acclaim; retained for 1916 Fair; is in complete charge of Spanish troupe.

March 22, 1916, San Diego Union, 8:3. Change in Cristobal Café; Mr. and Mrs. Kenneth Croft have taken over.

March 22, 1916, San Diego Union, 8:5. George Wharton James sang California’s praises at a weekly luncheon of Chamber of Commerce.

March 22, 1916, San Diego Union, 8:8. Pass given George P. Thompson, designer of Exposition flag.

March 23, 1916, San Diego Evening Tribune, 8:1. EDITORIAL: The Preservation of San Diego’s Garden.

We can, in course of time, by the expenditure of comparatively little money, have a garden as beautiful and as profitable to the community as that of Rio.

But we must begin to think of the ways and means now.

March 23, 1916, San Diego Herald, 1:3-4. EDITORIAL: 1916 Exposition

The Exposition, which started its second year so auspiciously last Saturday, is receiving praises from nearly all the state press, and from many of the eastern papers. It is now generally conceded that the

Exposition this year will be even better and more successful than it was last year. The **Fresno Republican**, in a brief editorial notice, summed it up as follows:

“The pre-dedication of the San Diego Exposition, for its second year, is singularly propitious. Last year the Exposition at San Diego served a useful but necessarily secondary purpose. This year it is the whole thing. And this year it is bound to be not merely as good as it was last year, but much better. The climate will be as good --- which is the best in the world. The buildings will be as good outside, and inside much better, by reason of increased exhibits made possible by the closing of the Exposition at San Francisco. There wonderful gardening will be one year older and better. And last year’s unique achievement --- an Exposition open twelve months in the year --- will be doubled to twenty-four months. Only in California would this be climatically possible, and nowhere in California so well as in San Diego. The Exposition at San Diego is on a scale which it is financially feasible to maintain over an extended period, and it is a credit and an advantage, not merely to San Diego, but to the whole state to have it done.”

March 23, 1916, San Diego Union, II, 9:4. Three band concerts at Exposition today.

March 24, 1916, Minutes of Board of Park Commissioners: Monkeys donated by Coronado Beach Company; cage to be prepared.

March 24, 1916, San Diego Union, 5:4. Palace of Mines in the Washington State building will open soon.

March 24, 1916, San Diego Union, 5:5. Big artificial ice rink to be dedicated on the Isthmus Monday night; Davidson will “cut first ice.”

March 24, 1916, San Diego Union, 5:5. Captain Karl Offer, German aviator, will remain here during Exposition in charge of the jewelry display at the German section.

March 24, 1916, San Diego Union, 5:6. Carmen Costillo, widow of William Carlson, noted auto race, sings at Cristobal.

March 25, 1916, San Diego Sun, 1:6-7. Exposition 50-mile auto race today; starts in front of Grizzly Gulch at 2 p.m.

March 25, 1916, San Diego Sun, 12:2-3. Tonight will be “Carnival Night” with free vaudeville program on Isthmus stage; Tommasino’s Royal Italian Band to give concert in front of United States Fisheries Building; trophy cup to be presented to winner of auto race.

March 25, 1916, San Diego Union, 1:6, 2:3. Four daring auto pilots await start; Oldfield, Burman, Tetzlaff and Durant eager for Exposition event today.

March 25, 1916, San Diego Union, 1:3. Big auto race won by “Wild Bob” Burman.

March 26, 1916, San Diego Union, 8:2-4. House just finished at corner of Spruce and Second Streets; architect Carleton Monroe Winslow.

March 27, 1916, San Diego Evening Tribune, 1:1-2. Importance of city bond election urged.

March 27, 1916, San Diego Evening Tribune, 9:3. School boy to appear as Bard of Avon.

March 27, 1916, San Diego Evening Tribune, 10:1. Exposition may give day for Mrs. Carrie Jacobs Bond.

March 28, 1916, Los Angeles Times, II, 12:2. To exhibit riches of mines at Fair; collecting specimens from great western fields; Washington State Building will house display of earth's treasures at San Diego.

To arouse interest in mining in this county and more particularly in California, James E. Babcock, manager of the Palace of Mines at the San Diego Exposition, will leave today on a tour throughout the Southwestern mining districts.

Mr. Babcock bears the endorsements of the Chamber of Commerce, the Chamber of Mines and Oils of this city, and other civic bodies.

"There has been a great need of a mineral exhibit in the San Diego exposition and we have acquired the Washington State building for the housing of the displays," said Mr. Babcock yesterday. "There are a number of single exhibits at the exposition, but not one cooperative display. In the Palace of Mines we shall have a display embracing the entire Southwest and the rest of this country.

"The Palace of Mines will be free to the public, the expenses being met through the financial support of the districts represented and by private subscriptions. At the present time the territory tributary to Los Angeles is producing approximately \$300,000,000 annually, but that the field is only partially opened and the Palace of Mines will forcibly impress the thousands of possible investors who will visit the exposition with the opportunities offered in the legitimate investment of the mining industry."

One exhibit already in the building is that of the Couer d'Alene district of Idaho. This exhibit occupies 200 square feet space and contains more that sixty tons of specimens.

Mr. Babcock had charge of the Nevada State exhibit at San Francisco last year. His exhibit was awarded the grand prize. The Boundary Cone Mine of Oatman will be represented by a collection of its ores. Mr. Babcock secured the use of the collection yesterday from the officers of that company.

Mr. Babcock took formal charge of the building on the 15th inst. Since last Friday the sum of \$1,100 has been subscribed by prominent mining men of this city and surrounding territory. The exhibit will be fully equipped by May 1

March 28, 1916, San Diego Union, 6:2-4. Walter Damrosch to hold baton at Exposition; New York Symphony Orchestra will give two concerts, April 22 and 23.

March 29, 1916, San Diego Evening Tribune, 1:3, 7:4. Great cast drawn for pageant at Fair; play is called "The Masque of Shakespeare's Children"; Virginia Church, English instructor at San Diego High School, is author; to be given on the afternoon of April 29 at the Exposition organ pavilion..

March 29, 1916, San Diego Evening Tribune, 10:1. April 27 to be Carrie Jacobs Bond Day.

March 30, 1916, San Diego Evening Tribune, 1:1-2, 5:2. City Attorney warns all voters to vote.

March 30, 1916, San Diego Evening Tribune, 3:3. **Indianapolis News** praises Fair here.

March 30, 1916, San Diego Evening Tribune, 3:4. Dinner dance de luxe at Cristobal Café tonight.

March 30, 1916, San Diego Herald, 1:7-8. San Diego's live ones, who is who and why, by S. A. Raymond.

It has been the custom for many years to write a series of "who is who" by the newspapers in the several cities. These articles have been run as new articles and "boosted" every fellow who paid the price,

and as only one man was sketched for any one issue, the game was made profitable as long as there were “suckers” to pay the price.

I am going to give the **Herald** readers an honest chapter on “who is who” in San Diego and why, without the permission or knowledge of those whom I have selected for an interesting story for the benefit of newcomers. There will be no bill sent to any of the victims, and they will all be bunched in one article, and each will be given due credit for what he has done for San Diego, and if anyone is given more prominence than another, it will be because they are entitled to it, for what they have done for San Diego.

This will not be an historical work, because it will treat only that limited portion of the population which has really done something above the average in the way of making San Diego a city. It will not give recognition to any man for his wealth, his official position, nor his professional standing, but to each for what his work has benefited out city. Of course, to begin right we will first have to mention the man who laid the foundations for this modern city.

Alonzo E. Horton, better known as “Father” Horton, came here in 1867 when everything south of Old Town was sage brush and cactus. Father Horton realized that the ideal climate, the fertile soil, and the beautiful harbor would someday be the home of millions if they could be made to realize what we had here. Instead of showing the natives how to let the world know what they had here, he, like a good business man, bought a good portion of the city land at 26 cents per acre, and, after cutting into city lots, proceeded to sell it at prices ranging from \$40 per acre to several hundred dollars per acre to those who came here to enjoy this delightful climate. Father Horton did splendid work in bringing to the notice of the world the wonderful natural resources of this section. He was rewarded by making a fortune out of his efforts, which he subsequently lost by trying to boom the city.

Some people think Cabrillo is entitled to greater credit than Father Horton, because Cabrillo discovered this section, but neither Father Horton nor Cabrillo created the land, the bay or the sunshine, so the real glory antedates them. However, Father Horton is entitled to the credit of advertising these advantages which places all of us under obligation to him. However, had Father Horton worked to build a city for the people instead of for Father Horton, he would have induced people to come here and use the land instead of buying it, in which case he would have made it a taxless city and a greater one than it is now.

After the boom of 1887 the city stagnated and declined. The man who had made the city possible was engulfed in the wreck, and the hope of the citizens centered on a new genius. About that time E. S. Babcock conceived the idea of building the Coronado Hotel, which he made the finest of American resorts at that time. Babcock also engaged in other enterprises which aided in the development of the city, the greatest of which was the building of the Southern California Mountain Water Company, in which he interested John D. Spreckels. For years after the boom collapsed, the city gradually declined and would have been almost depopulated but for the enterprise and genius of E. S. Babcock.

About 12 years ago when San Diego was languishing and all the people were discouraged and in the dumps, L. J. Wilde sauntered into the city and thought it looked good. After a careful study of the city, Mr. Wilde decided that what it lacked most was the confidence of its own people and he made it his particular business to restore lost confidence and arouse enthusiasm. The first thing he did was to make the people realize that San Diego had a future, and that real estate was being offered below its value without buyers.

To convince San Diegans that he was sure his judgment was right, he bought considerable centrally-located property, some of which he immediately improved. The first building which he erected was the Pickwick Theater, and later, through his efforts, were erected many of the best structures of the city: the best of which are the U. S. Grant Hotel, the American National Bank Building, and the building occupied by the United States National Bank, and many other buildings of lesser note.

Mr. Wilde has been generous, philanthropic and public-spirited. He has subscribed liberally to every public charity, encouraged every enterprise, aided more people in distress than any other San Diegan, and has favored all public improvements. He was the second largest subscriber to the Panama-California Exposition, and donated to the public the splendid electric fountain in the plaza. Although his every

enterprise has been successful, excepting his newspaper, he has given to the public more than the profits on his San Diego investments.

D. C. Collier, aroused to enthusiasm by the faith of Wilde in San Diego, became the greatest booster for the city and helped its growth by encouraging outsiders to come here to make their homes. Because of his faith, ability and enthusiasm, D. C. Collier was made the director-general of the Exposition, and through his efforts was raised the necessary funds to make the Exposition a success, in which later he contributed a fortune in giving it publicity.

The splendid work of Wilde and Collier not only gave San Diegans confidence in their city, but attracted the notice of outsiders, which started the city to activity and growth. John D. Spreckels of San Francisco had large interests in San Diego which he had offered for sale at a sacrifice, but he too became inspired with confidence in the new San Diego so that he decided that with his help it could be made into a great city. Instead of selling his holdings, he made further investments, and through his wealth and energy has done more and is doing more to build up the city than all other interests combined.

Since making this his home, Mr. Spreckels has invested several million dollars in different enterprises in and around San Diego. Several business blocks, two new hotels, and the finest theater in America are to his credit. The fine water system planned and begun by Mr. Babcock was completed by Mr. Spreckels and sold to the city. And he has given San Diego the best street car system of any city of its size anywhere. Besides he established some prosperous industrial enterprises and is building the San Diego and Arizona railroad. Take it all and all, Mr. Spreckels has contributed more to the prosperity of San Diego than any other man, and is doing more than ever to make a greater San Diego.

G. Aubrey Davidson, in originating the idea of the Panama-California Exposition, gave to San Diego the opportunity for world-wide publicity, and as president of the Exposition, he has been instrumental in making his dream come true. As the founder of one of the largest financial institutions in San Diego, Mr. Davidson has already won a place in the sun which is made more secure by his splendid work for the Exposition.

Space will not permit mention of some who perhaps have done something to deserve mention in the "who is who" in San Diego, nor will it permit extended mention to some who I feel have done more than will be given them credit in this limited article, so the others will be briefly mentioned for the splendid things they have done for San Diego. By making his home here, U. S. Grant, Jr. did the city a service because he is well known everywhere. But, in addition, he gave to San Diego its finest hotel, which did much in making the city popular with the traveling public.

Madame Katherine Tingley, in locating on Point Loma the headquarters of the Theosophical Society, added a great attraction to San Diego, and her splendid school has aided many of the youths of San Diego besides bringing to us bright minds from many parts of the world. The late A. G. Spalding, who made his home on Point Loma, did much for the beautifying of the city and making it more attractive.

George W. Marston came to San Diego when it was a mere village and remained during its trying period and is still here. Mr. Marston has taken an active part in everything which meant a better and more prosperous city and has given much of his wealth to aid others. His best work for San Diego was the building of his great store which is the equal of the dry goods stores in the great cities of the east.

Ed Fletcher came to San Diego when things were quiet, looking for a job. He did his work so well that he was soon in business for himself in which he made a success. Fletcher has done more for the development of the back country than any other man by inducing men of capital to invest and make improvements. For the past 10 years he has devoted his time to getting control of all the unused water sites of the county which he hopes to consolidate in one great system to permanently solve the water question. The work he is doing will make the settlement of the whole county a possibility, which means much for San Diego.

H. H. Timken is not much in the lime light, but he has given San Diego some of its best buildings, is for all improvements, and has contributed many thousands of dollars for public charities. Mr. Timken is carrying to success the splendid things planned by the late A. G. Spalding.

I. I. Irwin is one of San Diego's successful business men, who has not [only] encouraged public enterprise, but he had done more in a quiet way to help others to do things and get a start in life than is generally know. He has done things for San Diego.

"Joe" Sefton is a San Diego boy, who has grown up here from boyhood to manhood. Joe inherited a fortune from his father and is now demonstrating the he also inherited his father's ability to handle it. He is the head of several financial institutions and has just completed the splendid Maryland Hotel, which proves his faith in the future of San Diego.

Nathan Watts is another of the younger men of San Diego who is doing things for San Diego. Besides building the splendid Watts Building, one of the best office buildings in the city, he is planning another which will be a monument to his enterprise.

H. H. Jones, manager of the Consolidated Gas and Electric Company, is a comparative newcomer, but under his management the patrons of his company have received a service which is seldom equaled in a city the size of San Diego. Besides, since the advent of Mr. Jones, the company has extended its services to the entire surrounding country, giving comfort, and encouraging suburban improvements which otherwise would have been impossible. After the recent flood, Mr. Jones distinguished himself by the quickness with which he restored to the country districts a satisfactory service. Mr. Jones has few equals as an executive, and he realizes the public's rights and those of the men who work.

James H. Holmes, manger of the U. S. Grant Hotel, is another of the latecomers who has helped make San Diego attractive. The splendid service of his great hotel, the wide publicity given, and his personal acquaintance with globe trotters, travelers, and men of means has brought to San Diego that class of people which adds to the city's prosperity.

John S. Akerman, president of the Chamber of Commerce, may hardly be eligible for a place in this list, but his present work in the Chamber of Commerce, which he is doing to secure factories and encourage home patronage, if successful will entitle him to first place on the list.

There are two noticeable and remarkable things about this list of notables. All of them are still living, except Father Horton and A. G. Spalding. Another is that among this list of men who have done things for San Diego, not one of them has been elected to public office. As a rule they are not the ones who want office, but of those who have consented, they went to defeat, although the successful candidate had done nothing to distinguish himself and afterwards proved to the voters that they had made a mistake.

March 30, 1916, San Diego Sun, 9:1. An extensive display of minerals and ores is assured for the Palace of Mines at the Exposition by the Julian Chamber of Mines; Arizona display will include minerals and ores from Oatman and Kingman Counties; New York Symphony, conducted by Walter Damrosch, to give concerts April 22 and 23 at Organ Pavilion; "April Fools' Day Hunt" for gifts will begin at 9 a.m., Saturday, April 1.

March 30, 1916, San Diego Union, 5:1. Exhibit of Spain to open next week in Foreign Arts Building.

March 31, 1916, San Diego Evening Tribune, 1:5. Interest in voting on bonds lags; first and second propositions transfer bond money now idle to reconstruction of the water system; third proposition is Encanto annexation..

March 31, 1916, San Diego Sun, March 31, 1916, 14:1. A battalion of the 21st Infantry, 266 men, accompanied by a band, to be stationed near north end of the Isthmus on Exposition grounds; Alaska exhibit to be installed in Pan-Pacific Building.

March 31, 1916, San Diego Sun, 14:4. Isthmus parade of floats set for downtown tomorrow at noon.

March 31, 1916, San Diego Union, 1:3. 5:5. Lioness treated after fierce struggle; crowd at Fair to see queen's paw cured.

All said and done --- trying as the ordeal was --- Queen is the better for her operation. In her cattish way, the big lioness seemed to realize as much last night.

Just as forecasted in yesterday's **Union**, a surgical operation of the most unusual, and at times the most terrifying character, was performed at the north end of the Exposition zoo yesterday afternoon, with Queen, largest of the lionesses, as the unwilling victim. Failing to realize that her own welfare was the chief consideration, the big cat, who was suffering from an ingrown claw, fought against the efforts of her friends to relieve her suffering, tooth and nail. A crowd of several hundred people watched her roped and tied and operated upon. Queen lacking perhaps in gray matter what she makes up in muscle and sinew, thought they were all against her. Her struggles shook the iron cage --- her roars vibrated for blocks around, and her hisses were like that of escaping steam. Yet, with all her brute strength and agility, her stubborn and outraged determination to fight off the attention which she so greatly required, Queen was as a baby in the hands of her keepers.

Roped From Outside

There was an utter lack of an operating table or glittering, sterilized instruments so popular in the big hospitals. In fact it was impossible to get into the cage with the lioness. They roped her from the outside, sticking the lassoes through the bars with the aid of iron poles drawing them taught.

When it all began, Queen, playful despite the tender, swollen foot seemed to think it was a joke. She sprang lightly from the floor of her cage to the shelf where she is wont to recline in the sun, and back again, friskily as a kitten. She toyed with the wooden poles and iron bars, extended with the ropes attached, and bit them coquettishly.

Then the first noose fell across Queen's shoulders, and her ears went back. Keepers of great cats known what that means. It is the first signal of an approaching storm. The massive tail, another sign of temperament among the feline kind, swished nervously; the great brute lifted her whiskered lip in a superb snarl, hissed with the fervor of a thousand snakes, and grabbing the rope, shook it like a rat.

From that moment on the lioness, thinking herself tormented, was at bay. She grabbed the wooden bars thrust through to carry the ropes and splintered them with blows from her enormous paws and with savage attacks from her great jaws, the long tusks flashing in the sunlight.

Beast in a Fury

Time and again the keepers extended the noose, but the lioness avoided them. Her rage was now a fury. She crouched and lunged, the weight of her big, yellow body against the bars of the cage, causing them to shake and quiver. One sweep of the flying paws would have shattered the head of any of her "surgeons" like an egg had it reached them. The mouth at times was open --- a cavern of red and white --- and upon the back of the great she-lion the hair stood in bristles. It was the same lioness that an hour before had purred and rubbed the bars with her cold nose as a child passing had stopped to peer with wide eyes into the cage.

Finally man's ingenuity conquered over the cat's ferocious agility. The noose was slipped from the neck over the legs and around the brute's middle. Then the legs were caught with other nooses and the struggling beast dragged to the bars, where she was held as in a vice.

The operation that followed --- painful as it was -- although the paw of the lioness was deadened with cocaine --- was nothing in the way of suffering compared to the torture she endured from the offending claw for week's past. Curled under, the claw had penetrated the flesh for nearly an inch.

Chews Up Stick

With placers, resembling in size those used by a blacksmith upon a horse's hoof, the attendant clipped off the troublesome claw close at its bases. They gave Queen a stick to chew on during the operation --- it was a 2 x 4 scantling --- but she reduced at least three feet of it to pulp before it was all over. Then they cleaned the wound, put antiseptics upon the sore paw and cut her loose. They would have given Queen a bandage, but they knew she wouldn't stand for that.

Released Queen shook herself from tip to tail, surveyed the cheering crowd wickedly. She was still full of fight, but the flesh was weak, and with a bound in which the usual agility was lacking, she returned to the shelf high up against the wall, sank into a reclining position, curiously surveyed, smelled and licked the bloody paw, then closed her eyes and seemed to forget.

By the end of the week, should Queen's admirers call up the Exposition and ask for the patient, Head keeper A. F. Kauffman says the answer will be:

Purring again and rubbing the bars to show her friendliness for all mankind.

March 31, 1916, San Diego Union, 5:5. Baby camel at Fair will be christened for Al Bahr Shrine.

The Exposition has surrendered to Al Bahr Shrine.

President G. A. Davidson was authorized by the executive committee last night to capitulate to the Shriners who are demanding that the Exposition's new baby camel be christened by their lodge.

Potentate Fred J. Lea gave assurance last night that no one would have any objection to the formal program that is being planned, and that he would have back of him 345,000 Shriners in all parts of the United States who would make the Exposition's baby camel famous.

Committees are now being appointed for every detail for the big event which promises to be one of the most interesting special nights ever held at the Exposition. In addition to the big dinner, formal dinner and a brilliant ceremony, there will be a score of other features.

March 31, 1916, San Diego Union, 5:5. Effort made to keep exhibit over Sunday.

In response to the hundreds of requests from thousands who have not been able to visit the Luxembourg art collection in the Fine Arts building at the Exposition, and from thousands who desire still another opportunity to inspect these wonderful French paintings, Exposition officials are making an effort to have this art collection remain Saturday and Sunday.

The eighty paintings must be packed and delivered to Wells-Fargo Express Company by Wednesday afternoon, in order to reach Pittsburgh in time for the opening of the Pittsburgh art exhibition. It was considered impossible to allow the pictures to remain on view longer than Friday night, but Executive Secretary H. J. Penfold is attempting to have extra workmen lessen the time required for packing and giving the extra two days to Exposition visitors.

During the six weeks that the pictures have been at the Exposition they have been viewed by thousands.

March 31, 1916, San Diego Union, 5:5. Black opal exhibit obtained for Fair.

The famous \$50,000 black opal collection owned by Percy Marks and now displayed by Marshall Field and Company in Chicago is to be one of the latest exhibits obtained for the Exposition.

Miss Irene Miller, representing Percy Marks, was in San Diego yesterday to make arrangements for the bringing of this wonderful collection, which was the greatest feature of the Australian exhibit in San Francisco and which won the Grand Prix.

This collection will be exhibited in the Pan-Pacific building as a part of the New South Wales exhibit, and A. H. Ford is highly pleased at this great addition to the displays.

Percy Marks will arrive in San Diego within a few weeks to superintend the placing of the exhibit.

March 31, 1916, San Diego Union, 6:3-5. Thursday night dinner dances are inaugurated at Cristobal Café.

Miss Mae Murray, premier danseuse, who has appeared with the Metropolitan Opera Company, will open an engagement at the Cristobal Café tomorrow night.

March 31, 1916, San Diego Union (page unknown). Last day to buy tickets to Fair

You will have to hurry!

Annual tickets to the Panama-California International Exposition will not be sold after 5:30 p.m. today.

The annual tickets have been on sale for several weeks and hundreds have purchased them at a low price. It was decided sometime ago to place a time limit on the sale and the limit was set for 5:30 o'clock this afternoon.

They can be secured at almost any bank, at several of the department stores, or at the Federation of State Societies in the Spreckels Theater Building. Certificates may be exchanged for annual tickets up to May 1.

March 22, 1961, San Diego Union, A-17:1-3. NATURE OR HATFIELD: 1916 Flood Cause Discussed in County Control Study, by Charles Ross.

April, 1916, The California Garden, 8-9. Monthly Excursion Through Exposition Grounds, by G. R. Gorton.

The majority of visitors to the Botanical Building are impressed more by the masses of color than any other feature, still it would seem as if the collection of ferns were entitled to consideration from those who have the necessary time to observe them.

Entering the building from the front and turning to the right in the lath section are specimens of *Gymnogramme sulphurea*, Sulphur Fern, so named because of the sulphur-like spore on the back of the fronds. On the left, across the walk from these, is a specimen of *Pteris inequalis* with fronds very variable in character.

Next to this is *Cyrtomium Rockfordianum*, one of the Holly Ferns, a very interesting genus, in appearance not in the least fern-like, but strongly suggesting the holly whose name it bears, very fresh and attractive in appearance and useful for the purposes of contrast in fern plantings.

Still turning to the right, just before entering the east wing of the building, the attention is directed to *Pteris serrulata*, var. *ouvardi*, reposing in the shelter of a tall *Dracaena indivisa*. On the south side in the center bed of this wing the most conspicuous ferns are the several *Dicksonia squarrosa*, Australian Tree Ferns.

These were grown to their present height in their native country, and were then uprooted, packed, and , with about the same elaborate care which characterizes the handling of railroad ties, were shipped bare-rooted to San Diego. In spite of this consideration which was shown them, several of them lived, and now grace our Botanical Building. Nearby, adjoining a *Phoenix rebelini*, are one or two *Pteris flabellata*, rather an unusual *Pteris*, and *Crytomium falcatum*, similar to *Crytomium Rockfordianum* mentioned above, excepting that the fronds are longer and about one-half as wide, not quite as holly-like as its relative.

Having circumnavigated this portion of the house and returning to the circular bed under the dome in the center of the building, one finds several specimens of *Lomaria gibba*, a smaller genus of tree ferns and very attractive. *Alsophila Australis*, another Australian tree fern, and *Sitalobium cinctarium*, these last two not as similar as appears when viewed separately. On the north side of this bed, opposite the entrance to the glass section is a group of *Blechnum occidentale*, not easily distinguished from the *Lomarias*.

On the right hand, as the west wing is entered, the corner is ornamented by *Woodwardia Americana*, our own California Brake, which abounds in certain portions of the back country and transplants very nicely if handled with reasonable care.

Passing on to the extreme west end of the building, the attention will be arrested by a very fine specimen of *Alsophila Australis* enshrined in the arch together with other ferns, palms, etc. *Alsophilas* ought to be more grown where sufficient space is available, but allowance must be made for their enormous spread or they will be crowded and the effect spoiled. Properly grown, however, as a background for smaller ferns, begonias, cinerarias and cyclamen in season, the result will be all that could be desired. Near the southeast corner of the center bed are one or two *Polypodium Mandalanum* or *glaucum*, as you prefer; the main difference between the several varieties of this type being financial rather than botanical. One of the interesting features of this fern is the curious arrangement of the spore, resembling diminutive brass buttons on a gray coat.

The glass house contains its share of the collection, including some excellent specimen plants of different species of ferns. The oval bed on the east side of the house contains more *Alsophila Australis*, while underneath Club Moss, *Selaginella denticulata* lends a charming touch as a ground cover. On the bench along the side is *Nephrolepis elegantissima*, much ruffled and crested, and when well grown very decorative. Very distinct from these species are two sword ferns, *Nephrolepis Tuberosa* and *Nephrolepis Exaltata* which are to be found together on the opposite side of the Conservatory along the west wall. In the former, the fronds are narrower and shorter and of a darker shade of green than *Nephrolepis Exaltata*. It is from latter the crested type are bred. But it does not need the ruffles and crests to make it an attractive fern, as witness several immense hanging baskets in different portions of the house.

On the same side of the building is a choice specimen of the Bird Nest Fern, *Asplenium nidus-avis* which in its habitat grows to such proportions that a full-grown man may be concealed in the "Nest," which is merely the fiber at the base of the fronds. Its resemblance to a bird's nest gives the fern its name. The fronds of this species are upwards of five inches in width and except for the spore on the back bear no especial resemblance to the conventional type of fern.

Borne aloft on the portion of the steel structure south of the pool is another unfernlike fern, *Platycerium grande*, the Moose Horn Fern (nothing to do with Bull Moose, T. R. etc.). A decided resemblance to the antlers of the moose makes this fern conspicuous among the other plants also making their home on the same steel column. One characteristic which distinguished the Moose and Elk Horn ferns from most others is their epiphytic habit, growing as they do on live or dead tree trunks or smaller support, sustenance solely to be obtained from the moss in which they are rooted. Several species of *Platycerium Alcorni*, in which, however, the resemblance is not nearly as perfect, may be seen on the column rising out of the center of the pool.

Nearby, supported on a pedestal so that its fronds hang out over the water, is a very typical specimen of *Goniophlebium subauriculatum*, the fronds of which are as long as its name, frequently attaining six or eight feet in length.

About the center of the bench along the west side is a specimen of one of the species of the famous Japanese Fern Ball, *Davallia Canariensis*, while near the northwest corner of the oval bed on the same side of the house is a specimen of another species of the genus, in this case being *Davallia lucida*. On the steel column at the extreme south end of the center of the house is a specimen of *Lygodium Japonicum*, the climbing fern, really quite a dainty little plant twining its way upward on a support whose very strength serves to attenuate the delicate foliage of this very attractive species.

The above is by no means a comprehensive account of the fern collection in the Botanical Building, and a careful observer will find, scattered through the lath house and conservatory, many species not mentioned, for instance, there are many other species of *Pteris*, such as *Pteris Victoriae*, with the narrow almost grass-like fronds with silver variegation; *Pteris Tremula*, almost a tree fern in habit; and the same is true of the other genera.

The gardens of the Montezuma have been completely reconstructed; but, in the language of the poet, that is another story.

April 1, 1916, San Diego Evening Tribune, 2:3. Annexation of Encanto and bonds win in light vote.

April 1, 1916, San Diego Evening Tribune, 3:5. Schoolboy soldiers and sailors of the San Diego Army and Navy Academy at Pacific Beach to pitch camp near the model camps for the marine battalion for eight days, beginning April 7.

April 1, 1916, San Diego Evening Tribune, 3:3-4. Miss Mae Murray premier danseuse of the Metropolitan opera house, New York engaged for one week at Cristobal Café.

April 1, 1916, San Diego Sun, 12:8. Almost 1,000 schoolchildren, April 29, will present a pageant at the outdoor organ which will include scenes in pantomime from Shakespeare's plays.

April 1, 1916, San Diego Sun, 15:6. April Fool's Day; gift zones along Isthmus, in Pepper Grove, in Exposition corridors and on motor demonstration field; concessionaires' parade downtown starting at 11:30 a.m.; masquerade carnival on Isthmus beginning at 7:30 p.m.; second appearance of 21st Infantry Band today at U.S. Government building on Plaza de Panama; German and Austrian exhibit being installed; cadets of San Diego Army and Navy Academy to be on grounds for eight days beginning April 7; will pitch their camp near the quarters of the regular army men.

April 1, 1916, San Diego Union, 16:1. April Fool's Day parade to have many features; parade to begin at noon; gift hunt in morning at Exposition..

April 1, 1916, San Diego Union, 16:2-3. Elephant in the Robinson animal show is a gunner; fires off Gatling gun to prove it.

April 1, 1916, San Diego Union, 16:3-4. Schools enter many contestants for today's model aeroplane contest on motor demonstration field; trophy cut offered for the school making the best record in distance, height and duration of flight.

April 1, 1916, San Diego Union, 16:3. 21st Infantry band will play at concert at Exposition today.

April 1, 1916, San Diego Union, 16:3. H. G. Kauffman, zoo keeper, to lecture on wild animals for tots.

April 1, 1916, San Diego Union, Woman's Section, 7:1-2. Notes among concessionaires: Miss Elizabeth, the charming Lilliputian lady; new show may be attempted in War of the Worlds building; Lee Chong, Chinese dramatic actor, secured for Underground World; exact reproduction of the Panama Canal as it is today; old '49 Camp of last year rejuvenated by L. M. Quinn; Patio Café, located next to War of the Worlds; Oriental dancers by real artists in their liven given at Sultan's Harem; beautiful models in living poses of famous subjects in Paris After Midnight; Tokyo Café, located midway on the Isthmus, offering copy suey.

April 2, 1916, Los Angeles Times, III, 2:1. Women play a great part in Exposition; official board noted for hospitality and unique social functions, plans for this season complete and many prominent persons are to be entertained; efficiency of systems makes duties easy, by Mary S. Gulliver.

April 2, 1916, San Diego Union, 1:6, 5:1. Toy aeroplane race at Fair; schoolboys enthusiastic over contest; another scheduled Saturday.

April 2, 1916, San Diego Union, 6:5. Beautiful mosaic work done with cigar bands on display in Foreign and Domestic Industries Building.

April 2, 1916, San Diego Union, 10:4. Isthmus parade comes downtown.

April 2, 1916, San Diego Union, 10:5-6. Miss Mae Murphy, dancers, begins engagement at Cristobal.

April 2, 1916, San Diego Union, 15:1. Tommasino's Royal Italian band contracts to play at Fair until September.

April 3, 1916, San Diego Sun, 12:4. State tour will leave city April 24 carrying 125 San Diegans, a special band, the Exposition's Spanish dancers and singers, a quartet, and a baggage car filled with fruits and gifts.

April 3, 1916, San Diego Union, 1:4-5, 5:2-3. Exposition City Special to begin whirlwind tour of state on April 24.

April 4, 1916, San Diego Sun, 6:5. Girls of San Diego will be shown how to use "Court of Leap Year" by Miss Mae Murray, dancer, at two exhibitions tomorrow; Princess Lei Lokelini will show how Hawaiian maidens propose; Harold Lloyd and Beebe Daniels will be on grounds making pictures for Rolin Film Company; Philippine exhibit in Pan-Pacific building to be dedicated Saturday afternoon.

April 4, 1916, San Diego Sun, 12:3. Benefit at Isthmus tonight in Hawaiian Village for widow of Ben Crockett; 35 acts and 2 bands; probably biggest vaudeville program ever given in San Diego.

April 4, 1916, San Diego Union, 1:3-4. New baby arrives at Fair; proud mother guards monkey carefully.

April 4, 1916, San Diego Union, 2:4. Added exhibits are arriving daily at the Pan-Pacific building; those from Australia and New Zealand are being installed and the first of the Hawaiian schoolhouses is now in position.

April 4, 1916, San Diego Union, II, 1:1. Councilmen endorse "Exposition Special."

April 4, 1916, San Diego Union, II, 1:3. War? Word unknown at Fair. "Allies" to aid German reception.

April 4, 1916, San Diego Union, II, 1:4. San Diegans prove it easy to direct Tommasino's Royal Italian band.

April 4, 1916, San Diego Union, II, 1:5. Big benefit on Isthmus tonight; Indians from Painted Desert to give war dance; proceeds go to Mrs. Crockett.

April 4, 1916, San Diego Union, II, 1:5. Leap Year court event Wednesday afternoon; Mae Murray and Princess Lei Lokelini to demonstrate; Spanish singers will aid.

April 5, 1916, San Diego Union, 1:7-8, 3:4. Ready to herald arrival of "Al Bahr" baby camel.

April 5, 1916, San Diego Union, 5:1. Enthusiasm for Exposition tour of state grows.

April 5, 1916, San Diego Union, 5:2-5. War chasm bridged at the Exposition by "peace party" given at German exhibit.

April 5, 1916, San Diego Union, 5:4. Coupons will be given with admission tickets at Fair as experiment.

April 5, 1916, San Diego Union, 5:5. Ice-skating rink to open on Friday night.

April 6, 1916, San Diego Herald, 1:6. Eventful Week at Exposition

Three events of unusual importance took place at the Exposition grounds this week. Monday the stork brought a baby simian to the zoo family, which is highly prized by its mother and fully appreciated by the throng of visitors who paid their respects to the new arrival.

On Tuesday afternoon, Mr. and Mrs. Walter W. Schultz, who are in charge of all the German exhibits, held a "peace party," in the Foreign Arts building, which was the most brilliant and successful event that has been staged since the Exposition opened. Exposition officials, city and county officials, army and navy officers, professional and business men and a good sprinkling of women made up an interesting crowd.

That is was a success was evidenced by the presence of the representatives of all the other European nations, who fraternized as cordially as if they were one family. The English, French and Russian representatives heartily congratulated the German exhibitor and seemingly forgot the little unpleasantness across the big pond. The only notable absentee was President Davidson, who is absent from the city but is expected back in time for the christening of the newly-arrived baby camel.

On Wednesday the stork visited the zoo at the Exposition grounds and brought Miss Al Bahr, the youngest camel in America, which has been adopted by the Al Bahr Temple and will be christened at the Cristobal Café on Friday, April 7, at 6:30 a.m. The celebration attending that event will be made a royal occasion by the Shriners and their friends.

April 6, 1916, San Diego Union, 1:3. Stork swooped down upon the John Robinson trained animal menagerie yesterday morning, leaving baby "Al Bahr" there.

April 6, 1916, San Diego Union, II, 1:2-5. Infantry ready to join chase in Mexico; soldiers dig trenches for water pipe at Fair.

April 7, 1916, Minutes of the Board of Park Commissioners: Document No. 98114 being a communication from Mr. J. A. Robinson in regard to the use of Balboa Park for the location of moving picture studios was read and by unanimous vote the Secretary was instructed to advise the Common Council that this Board went on record as being in favor of upholding the integrity of the City Park and opposed to commercializing it, and protested against any action on the part of the Council in favor of the suggestion referred to in the above named document (Commissioners Forward, Ferris and Chandler).

April 7, 1916, San Diego Sun. Shriners to christened baby camel "Al Bahr" tonight; dinner at Cristobal Café; camel will be a speaker's table; moniker to be attached in such a manner that it cannot be removed; parade to Robinson's Animal Show after dinner; command performance of Robinson's animals will be given for benefit of visiting Shriners and their wives; tour of new \$20,000 ice rink; dancing at Cristobal Café; sacred concert will be given in Chapel of Saint Francis Sunday afternoon, April 8, by Sunset Male Quartet; high school boys and girls will act as leaders of Tommasino's Royal Italian band Monday night at 7:30 concert in from of U.S. Fisheries building.

April 7, 1916, San Diego Union, 4:2-5. Shrinedom bows low tonight at throne of baby camel; christening at Exposition.

April 8, 1916, San Diego Sun. Chairman Smith of County Supervisors urged a city/county building in Balboa Park yesterday; "the southern entrance to the park would probably provide a fine site for such a building. Another site would be the ground west of the high school buildings."

April 8, 1916, San Diego Sun, 11:5. Philippine exhibit is dedicated; Long Beach boosters planning two special days, April 21 and 22.

April 8, 1916, San Diego Union, 1:4, 8:4. Mayor Capps rips \$5,000 check Scripps gave; incident follows argument between city officials and members of Flood Relief Committee.

April 8, 1916, San Diego Union, 5:1. Two baby camels at christening oust pretender; Shriners had substitute, but stork brought rightful heir; crowd on Isthmus.

April 8, 1916, San Diego Union, 5:2-3. Cadets prepare for two weeks' encampment.

April 8, 1916, San Diego Union, 5:2. San Diego expected to attract big percent of tourist travel this year.

April 8, 1916, San Diego Union, 5:2. Male quartet to sing at Chapel of St. Francis tomorrow.

April 8, 1916, San Diego Union, 5:3. Experts skate on ice; public next; trouble with generating plant, but expect better results at rink tonight; Stanley Hale, manager..

April 8, 1916, San Diego Union, 5:3. Los Angeles Chamber lauds Exposition officials.

April 8, 1916, San Diego Union, 5:4. Philippine exhibit in Pan-Pacific building to be dedicated this afternoon.

April 8, 1916, San Diego Union, 5:4. Boys busy with air boat models; entry list for aeroplane meet at Exposition today includes 12 fast machines.

April 8, 1914, San Diego Union, 5:4. Proposed additions to the New Mexico exhibit.

April 9, 1916, San Diego Union, 6:2-5. Army and Navy Academy cadets given instruction at Exposition; "Camp G. A. Davidson" is established; two companies and band added attraction; take mess with Marine Corps.

April 9, 1916, San Diego Union, 7:1-2. Notes Among Concessionaires: New system to be inaugurated on Isthmus tomorrow night, coupons issued with each ticket; Elizabeth, the living doll, arrested for speeding on Isthmus; Patio Café owned by Imperial Concession company; Alhambra Café moved a little further down next to motor chair concession; Chamber of Art in Paris After Midnight; C. Shellaberger to take charge of store in the Painted Desert; Sultan's Harem one of the sensational shows on the Zone at San Francisco; dance floor and table d'hôte at Casino; Madame Ellis and Captain from San Francisco; Mr. Harrison in the character of Joe, the hophead, in Underground World; concessions in the streets of Grizzly Gulch; Madam Isabell, palmist, opposite the Cawston Ostrich Farm..

April 9, 1916, San Diego Union, 8:4. Events at Fair today for Sunday patrons.

April 9, 1916, San Diego Union, 8:4. Music schedule for week at Exposition.

April 9, 1916, San Diego Union, 9:3. Official Philippine exhibit dedicated.

April 9, 1916, San Diego Union, 13:3. Ice rink at Exposition is thronged.

April 9, 1916, San Diego Union, II, 2:5. \$15,000 residence present for Mrs. Wegeforth by father; Louis J. Gill, architect.

April 9, 1916, San Diego Union, II, 8:4, 9:1. ON THE MARGIN by Yorick: Palms of San Diego.

April 10, 1916, San Diego Union, 1:4-5. Sunday's attendance record at Fair for 1916 shattered; Saturday's mark is 7,000.

April 10, 1916, San Diego Union, 4:1. EDITORIAL: Support the Exposition.

There was a large attendance at the Exposition yesterday, much larger it appeared than is usual on a day when perfect weather invites us to an outing. It was a good-natured gathering, and everybody seemed to have no lack of enjoyment. And there is especial gratification in the fact that the great throng was largely composed of San Diego people, their presence suggesting that to residents of the city the Exposition in its second year has not become an old story, but is as alluring as in the early weeks of 1915. Of course, there were many outsiders in the crowd. There is no lack of visitors in the city, and naturally for all of them the superb display in Balboa Park is a strong attraction. But it is obvious that if the Exposition is to be the success this year that is hoped, reliance must not be placed mainly on the transient population --- the people of San Diego must continue their generous support.

It has been generally noted that much of the success achieved by the San Francisco Exposition last year was due to the loyal support given to it by the people of the northern metropolis. While it is true that tens of thousands of men and women journeyed to San Francisco, many of them from the far Atlantic coast, for the sole purpose of beholding the wonders of the great world's fair, it is also a fact that the volume of the gate receipts was in large measure swelled by the attendance of San Franciscans. San Diego people may well take a lesson from what their brethren of the northern city did last year, and contribute generously toward the success of the Panama-California International Exposition of 1916.

Besides, the Exposition this year is incomparably superior to that of 1915. The new features, some of them of exquisite beauty, are a pleasing revelation to all who see them. Many of them have never been surpassed by any world's fair displays, no matter how pretentious. The beautiful exhibits that were shown last year are retained, of course, and the Exposition as a whole, with its artistic setting in charming Balboa Park, now leaves nothing to be desired.

It is worth noting, too, that the Isthmus this year presents a more varied program of attractions than its predecessor of 1915. The better features, which have been retained, are now supplemented by new sources of diversion. This is as it should be. An avenue lined with popular attractions, whether it is called a "midway," or a "zone," or an "Isthmus," or what not, is now recognized as an indispensable feature of a modern Exposition. It is a place designed to entertain with harmless fun and manifold features of human interest. It caters alike to amusement seekers and more serious-minded persons. There is something for all. And it is probably not exaggeration to say that the success of an Exposition is usually in proportion to the success of its amusement avenue. The Isthmus of the Panama-California International Exposition is one of its best features.

San Diego's Exposition will continue for more than eight months. When it shall have closed, one may safely predict it will be missed as an attraction that has served so good a purpose that it cannot be spared without regret. So, looking to the near future, San Diego people will do well to make the most of their beautiful Exposition while they may.

April 10, 1916, San Diego Union, 4:5. Alfred J. Goodrich writes Exposition standards lowered; objects to attempts of amateurs to lead the Italian band.

April 10, 1916, San Diego Union, 5:5. Helen R. Hewitt, Carmel, California, praises rose garden and potpourri.

April 11, 1916, San Diego Union, 5:1. Many attractions at Fair today (Tuesday); three band concerts; Army and Navy cadets will give first drill on grounds.

April 11, 1916, San Diego Union, 5:3. Rush for seats at symphony concerts still on.

April 12, 1916, San Diego Union, 5:2. "Bargain nights" at Exposition prove popular; free vaudeville acts given; ostrich egg one of prizes to be given away this evening.

April 12, 1916, San Diego Union, 5:5. San Diego Army and Navy Academy Day to be observed.

April 13, 1916, San Diego Sun, 9:6. This is San Diego Army and Navy Academy Day; drill in Plaza de Panama; Spanish exhibit will be informally dedicated Saturday afternoon, April 15.

April 13, 1916, San Diego Union, 5:1. Four band concerts at Exposition today.

April 13, 1916, San Diego Union, 5:2. La Belle Seville's heart weakens as she starts to enter leopard cage at Robinson Animal Show.

April 13, 1916, San Diego Union, 5:2. Reopening of ice rink on Saturday and Sunday; two crack skaters engaged.

April 13, 1916, San Diego Union, 5:3. Embryo soldiers to drill at Fair; cadets from San Diego Army and Navy Academy to have a full day at Exposition.

April 14, 1916, San Diego Sun, 7:6. San Diegans honor Spain at Exposition; reception in Spanish section of Foreign Arts building in afternoon; La Belle Seville, leader of Spanish dancers and singers, will give a special dance in the cage of the leopards at the Robinson Animal Show at 8:30 this evening; Ford Motor Company will install exhibit on motor demonstration field within the next 30 days.

April 14, 1916, San Diego Union, 5:3. San Diego Army and Navy Academy competitive drill on Plaza de Panama yesterday.

April 14, 1916, San Diego Union, 5:5. Spanish exhibit to be dedicated in Foreign Arts Building tomorrow afternoon; exhibits of fine arts, liberal arts, manufactures and agriculture; fine arts collection of over 60 masterpieces of Spain.

April 14, 1916, San Diego Union, 5:6. Within 30 days the Ford Motor Company will have five cars and a big exhibit on the motor demonstration field.

April 15, 1916, San Diego Sun, 1:4. Spectacular Shakespeare pageant planned at Dream City April 29; occasion of Shakespeare's tercentenary.

April 15, 1916, San Diego Sun, 11:2-3. Ten coaches to comprise train that leaves San Diego April 24 on grand tour around state.

April 15, 1916, San Diego Sun, 15:2-4. San Diego, in addition to being the home of the Exposition Beautiful, has at the same time one of the most beautiful and attractive parks in the world.

While folks back home are still buttoning up their coat collars and shivering under the blast of a biting north wind, San Diego's great Balboa Park --- 1400 solid acres of it --- is blooming in all its verdure and with the glory of its many and vari-colored blossoms.

Probably no one spot in the entire world is so worth seeing 12 months out of the year.

Like a frame in which the Panama-California Exposition is set off to best effect, the public park has fascinated hundreds of winter visitors.

From the aviary at the south end, to the great lawn that stretched for blocks in the center, to the trees brought from all corners of the earth, that spread their branches in the sheltered places, and to the rose garden near the exposition entrance, with its hundreds of blooms, Balboa Park is at the same time the workingman's playground and the tourist's paradise.

April 16, 1916, San Diego Union, 5:1. Dedication of Spanish exhibit draws a big crowd; Commissioner Jose Fernando and Managing Director A. Bruno praise San Diego Exposition.

April 16, 1916, San Diego Union, 9:1-2. Notes among concessionaires: Billy Carmen and 50 chorus girls from San Francisco to put on special numbers at Casino between dances; Hawaiian Grill in Hawaiian Village has opened its doors; questions people as Elizabeth; every line of business that goes to make up a mining camp in Grizzly Gulch; Frank Johnson and family of the Acoma tribe, Henry and his wife, Tula; David and wife of the Hopi tribe, and Henry Starr and family of the Apaches tribe at the Painted Desert; Edward Fesser, proprietor of the Alhambra Cafeteria, wants to spring alligator eggs on the bunch of Odd Fellow coming here soon; Captain Ellis, the equine wonder, and Madame Ellis, the telepathist, drawing crowds; dining room of Tokyo Café decorated in cherry blossoms and lanterns; radical changes are to be made in Sultan's Harem; famous models in Paris After Midnight; ice rink tea room located at southern end of Ice Rink building; new show in the War of the Worlds building on Monday evening; Frederick Harrison in role of Joe, the dope fiend, in Underground World..

April 17, 1916, San Diego Sun, 1:8. More than 600 boys and girls of San Diego High School were dismissed because they did not present their vaccination certificates.

April 17, 1916, San Diego Sun, 7:6. A children's day nursery opened today in the garden back of the
April 18, 1916, San Diego Sun, 12:5. California Building; charges of 50 cents a day and a minimum of 25 cents; a quarter spent at the admission gates tonight will be good for 25 cents in coupons to be spent anywhere on the grounds.

April 17, 1916, San Diego Union, 1:6. Palace of Mines robbed; gems are taken; stolen specimens, accumulated by Dr. C. C. Valle in 30 years of collecting; valued commercially at \$1,000; cut and uncut specimens of opal matrix, turquoise, hyacinth, jasper, tourmaline, barite, agate and other precious and semi-precious stones chosen to represent San Diego County among similar exhibits from western states..

April 17, 1916, San Diego Union, 8:1. Interest keen in "Thank You Train"; northern cities anxious to show appreciation to San Diegans for making trip.

April 17, 1916, San Diego Union, 8:2. Among musicians: next appearance of People's Chorus at Exposition expected to be the latter part of May.

April 17, 1916, San Diego Union, II, 8:5. Nursery to be opened today; consists of tent house surrounded by a wire fence; charge made.

April 17, 1916, San Diego Union, II, 8:5. Model of tungsten plant at Fair, plan for Palace of Mines; will show the resources of Pima County, Arizona.

April 18, 1916, San Diego Union, 5:3. Noted educators guests at Dream City today; Mrs. Ella Flagg Young will speak; Mrs. Lucy Flower to attend reception; former president of Wellesley expected by Woman's Board this afternoon.

April 18, 1916, San Diego Union, 5:1. Rest Haven of rest for kiddies is ready; little Robert Mansfield is first visitor..

April 18, 1916, San Diego Union, 5:3. Three hundred Angelenos coming April 29.

April 18, 1916, San Diego Union, 5:7. Programs sent for two New York Symphony concerts; cream of numbers will be given here; rush at Monarch Drug Store for seats.

April 19, 1916, San Diego Sun, 2:5. Palace of Mines to open May 1; jewels to be used to decorate exterior; exhibits to include Borden collection valued at upwards of \$50,000.

April 19, 1916, San Diego Union, 5:2. Board of Park Commissioners opposed to allowing the Door of Hope to use city lands near Ocean Beach on which the institution now stands; says this land is a part of Collier Park.

April 19, 1916, San Diego Union, 16:2. Mrs. Ella Flagg Young of Chicago spoke to noted educators.

April 19, 1916, San Diego Union, II, 1:2-5. Exhibitors at Fair organize; Foreigners pledge hearty cooperation; representatives of 17 out of 20 nations form association with elongated name; Walter W. Schultz, representing the German section, was chosen president; L. H. Hymans of the Netherlands, secretary, and J. C. Donaldson, of the Pan-Pacific countries, treasurer.

April 19, 1916, San Diego Union, II, 1:5. California Art exhibit on view in Fine Arts gallery at Exposition; interesting paintings will remain until arrival of Holland exhibit next month.

April 20, 1916, San Diego Union, 5:2-3. Exposition City Special will visit 30 cities; 125 prominent San Diegans on board..

April 21, 1916, San Diego Sun, 9:4. Walter Damrosch and New York Symphony give first of two concerts at organ tomorrow at 8 p.m.

April 21, 1916, San Diego Union, II, 1:4. No standing room at New York symphony concerts, decision.

April 22, 1916, San Diego Sun, 2:3. District Attorney Marsh says "Sultan's Harem" on Isthmus must close; charges "indecent exposure."

April 22, 1916, San Diego Sun, 11:1. Long Beach captures Exposition City; almost 500 headed by major and city commissioners are here; Long Beach band played in downtown streets and at fair grounds.

April 22, 1916, San Diego Union, 1:4-5. Long Beachers take city; 50 autos bring 250 persons.

Last night the Long Beach people were guests at a banquet at the Cristobal café. Tommasino's band played several numbers, Miss Mae Murray gave exhibition dances, the Long Beach band played several selections, President G. A. Davidson delivered an address of welcome, and Mayor Lisenby of Long Beach responded briefly.

April 22, 1916, San Diego Union, 5:1. Damrosch party will arrive here this afternoon; first concert will be given at Exposition tonight.

April 22, 1916, San Diego Union, 5:2. Model air ships in decisive meet; boy builders and designers of flying craft confident of winning loving cup; Harley Knox has been declared winner of the cup offered for distance and duration by Ariel Millaise, principal judge of the meet.

April 22, 1916, San Diego Union, 5:3. Miss Ruth Roland, Easter lily of filmdom, to attend Photoplayers' ball at the Exposition; special motion picture dance to be attended by 50 leading screen favorites.

April 22, 1916, San Diego Union, 5:4. George Gray and his Diving Girls, late of the Zone in San Francisco, are to give diving exhibitions in the locks of the Panama canal in front of the Panama Canal Extravaganza on the Isthmus.

April 22, 1916, San Diego Union, 5:5. 1500 delegates to the eighth California State Conference of Social Agencies to visit Exposition, May 6 and 7.

April 23 1916, San Diego Union, 1:5. Suffrage squadron in city, will speak at Exposition this afternoon.

April 23, 1916, San Diego Union, 3:1. Booster special leaves on state tour tomorrow.

April 23, 1916, San Diego Union, 4:5-6. "The San Diego Garden Fair" by Eugen Neuhaus, volume on Fair, out. Book concludes: "The atmosphere of sanguine Spanish life will prevail, under the same skies which led Father Serra to feel at home in a new country full of promise and danger alike. The effect of the Exposition,

in a country scarcely shaped into a permanent type, cannot but yield the benefit of this revival of an old, impressive civilization. It will be considered a milestone in the civilization of the West.”

April 23, 1916, San Diego Union, 5:3. ON THE MARGIN by Yorick: Goodhue’s Dream City of Balboa Park.

The wonderful composite which we praise without knowledge in this architecture of the San Diego Exposition, is the reality of Goodhue --- the outward semblance of that which was the man and the artist; the visible expression of a beautiful conception. . . . Somewhere, let it be mentioned in simple phrase plainly writ so that the curious may read, that these clustered sonnets of the builder’s art were from the inspiration of Bertram Grosvenor Goodhue, Architect.

April 23, 1916, San Diego Union, 6:3-4. Night festival on Shakespeare program; pupils to give “Romeo and Juliet” and “Taming of Shrew” at Organ Pavilion.

April 23, 1916, San Diego Union, 7:1-2. Notes among concessionaires: Patio café, a wonderful “bower of flowers”; Captain and Madame Ellis, their power seems supernatural; George Kuman will do portrait work and cartoons of people in Tokyo Café; a cinnamon bear, attracted by the smell of good cooking, has taken up residence in the Alhambra Cafeteria; Princess Lei Lokelani’s hula dancing is such that many visitors return to see her time and time again; Horsemen’s and Jockey’s Ball at Casino tonight; three suspicious characters found hanging around (from?) a cedar tree on the edge of the Grizzly Gulch Camp; several Navajo families arrived at Painted Desert last week; Madame Isabelle knows all about your past, present and future; Elizabeth has shown at all the world’s expositions since 1910.

April 23, 1916, San Diego Union, 10:5-6 Symphony orchestra greeted by throng of music lovers; anticipations fostered by fame of organization and Walter Damrosch, fully realized in excellence of performance last night, by D. D. Whedon.

April 23, 1916, San Diego Union, 11:2-3 Free-standing room for 10,000 at concert today.

April 23, 1916, San Diego Union, 12:2. Walter Damrosch and New York Symphony Orchestra at Exposition.

April 24, 1916, San Diego Sun, 2:2.

Saturday, April 22, attendance	10,264
Sunday, April 23, attendance	12,948

Large attendance due in great part to New York Symphony concerts; these two days, barring Dedication Day and the Sunday following, are the records for 1916.

April 24, 1916, San Diego Union, 14:1. Church, like park, is right in John Morley’s line; takes hand in decorating White Temple for Easter.

April 25, 1916, San Diego Sun, 5:1. Shakespearean celebration Saturday to be greatest in United States; program of the night’s festivities will be presented by the San Diego School of Expression under the direction of John Lane Connor.

April 25, 1916, San Diego Union, 6:1. Shakespeare pageant is delightful.

April 25, 1916, San Diego Union, 6:4. New York Symphony’s success leads to plans for other big musical events at Fair; concert by Madame Melba and John McCormack being considered; sale of seats for two concerts of New York Symphony had amounted to \$3,285; total attendance for the two days was 23,212 with 10,264 on Saturday and 12,948 on Sunday. The cash income for the gate for the two days was \$2,800.

April 25, 1916, San Diego Union, 6:6. Mrs. Carrie Jacobs Bond is first to have day at Exposition; program Saturday will include singers own productions.

April 26, 1916, San Diego Sun, 3:4. Colonel D. C. Collier, United Republican delegate to national convention, presided at banquet in Los Angeles attended by more than 700 supporters of Theodore Roosevelt.

April 26, 1916, San Diego Sun, 7:1. Shakespearean Festival program at Exposition ready; tree planting ceremony in Montezuma gardens will precede pageant; Queen Elizabeth and her court, King James and his court, and William Shakespeare will be impersonated at organ in afternoon; scenes from "As You Like It" and "The Taming of the Shrew"; Carrie Jacobs Bond day tomorrow.

April 26, 1916, San Diego Sun, 7:2-4. Photoplayers' Day, May 6.

April 26, 1916, San Diego Union, 1:3, 3:4. President E. P. Ripley of Santa Fe stirs commotion among Indians on visit to Painted Desert.

Ripley visited the Painted Desert and when the Indians learned that their "Big White Chief" was a visitor, they poured from their dwellings to busy themselves at their various tasks. The Indian boys quickly saddled their burros and held a race through the village. Navajo Sam a three-year old Pueblo land, insisted that Ripley become acquainted with his pet goat. The big railroad man complied with the request gingerly.

April 26, 1916, San Diego Union, 3:2-3. Setting for night performances at the Organ Pavilion will be true to time of Shakespeare; first evening rehearsal at Pavilion proves satisfactory; 500 children this morning will begin preparing for pageant; verse is written for tree planting.

April 26, 1916, San Diego Union, 3:3. Cecil Fanning day at Fair is called off..

April 26, 1916, San Diego Union, 10:2. Carrie Jacobs Bond Day; concert and other events given in honor of composer.

April 27, 1916, San Diego Sun, 3:1. A protect on the part of members of the local Socialist party against the refusal of the Panama-California executive board to allow Eugene V. Debs, Socialist orator, to speak at the Exposition during his recent visit here, was made public today.

Secretary Penfold of the exposition said: "The executive board have nothing against Mr. Debs, nor against the Socialist party. They have simply drawn the line against speeches advocating any special propaganda whatever."

April 27, 1916, San Diego Sun, 6:5. Mrs. Carrie Jacobs Bond, composer, honored at Exposition today, the first person to be honored with a special day during the present year; Olive day, May 16.

April 27, 1916, San Diego Union,, 5:2. Exposition will pay tribute to Mrs. Bond today; special organ recital.

April 27, 1916, San Diego Union, 5:2. For the benefit of their employees, San Diego business men may obtain a limited number of Exposition annual tickets and pay for them on the installment plan.

April 27, 1916, San Diego Union, 5:5. Los Angeles Exchange to hold jinks at Fair; produce dealers' annual outing to take place on April 29 and 30.

April 27, 1916, San Diego Union, 5:6. Association of International Representatives to hold meeting in Holland section; pledge aid to the Exposition.

April 27, 1916, San Diego Union, 10:1-4. Handsomest man in world to be in San Diego for Photographers' Day at Exposition, May 6.

April 28, 1916, Minutes of the Board of Park Commissioners: Board of Education unwilling to pay an equal amount to clean up and plant the strip between the railroad tracks and the high school grounds.

Superintendent authorized to improve aviary and duck ponds.

April 28, 1916, San Diego Sun, 9:1. Record-breaking crowd turned out to honor Mrs. Carrie Jacobs Bond. She sang "What You Can't Help Forget," "I Wish I Had a Dog," "My Pussy Cat," "I Want To Go Home," and "Practicing Piano."

April 28, 1916, San Diego Union, 5:2-4. Mrs. Bond given record-breaking reception at Exposition.

April 28, 1916, San Diego Union, 5:4. Mile-race is being staged at Ice Rink tomorrow night.

April 29, 1916, San Diego Sun, 11:3-4. Men of First Regiment, U.S. Cavalry, have experimented with elephants and camels at Robinson's Animal Show at the Isthmus.

April 29, 1916, San Diego Sun, 11:5. Avon bard is honored by pageant; observance of the tercentenary of this birth; masque presented this afternoon by over 500 school children; tree-planting ceremony; tonight pupils of San Diego School of Expression present "Romeo and Juliet" and "Taming of the Shrew."

[July, 1967, San Diego Magazine, 54-55. 104-105. A perfect day: In 1916, 500 San Diego children were entangled in a monster Shakespeare Pageant in the park, by Roberta Ridgely.

William Shakespeare's (1564-1616) tercentenary in 1916, the 300th anniversary of the playwright-poet's death, was celebrated in various metropolitan centers throughout the United States and Europe but nowhere with more determined enthusiasm than in San Diego, California. San Diego was just emerging from town into city. The previous year, the Southland port has joined with even-then-cosmopolitan San Francisco in fostering a Pacific International Exposition in each city. Our Exposition, of course, centered in Balboa Park, where Spanish-Renaissance buildings rose swiftly. It was here that the world for the first time saw San Diego. And San Diegans felt that they, too, were seeing the world.

In 1916, the second year, San Diego's population numbered about 50,000 as against San Francisco's half million. Vast naval and military installations were still part of our future, to come with the sudden impetus of our country's entry into World War I. There was little industry. A few people were predicting that fisheries someday might be important to the Southern California economy. But just as much attention was paid to the vaticination that San Diego would become the flax center of the world. Or the motion picture capital of America. Balboa Park, with its Fair buildings and tropical shrubbery, was impelling many a fly-by-night movie producer to utilize it for location shooting and to announce grandiose plans for a new motion picture company to be established here.

As Chicago had discovered with its Century of Progress in 1893, there was nothing like a Fair to quicken a city's "I will" spirit. San Diegans, as well as outsiders, formulated ambitious designs for utilizing their Exposition, its grounds and its visitors. In 1915, pupils of John Lane Connor's San Diego School of Expression (this was the age when every town had its teacher of "elocution") had commandeered the Park and its lush garden setting for an outdoor performance, the high point of which was the rendering of the balcony scene from *Romeo and Juliet*. Perhaps it was the favorable reception of this venture which stimulated such high-flown plans for the Spring of 1916. San Diego High School pushed a full-scale production of *As You Like It*, set for the Park's Botanical Gardens in May. It was rehearsed with so much gusto that Jo Kilpatrick, the HS athlete recruited by Drama Class to play Charles the Wrestler, had his ankle broken when hero Orlando (Irwin Schlink) threw him against a fountain.

Meanwhile, scheduled for a prior Balboa Park unveiling to catch tourists arriving in late April before the Exposition officially reopened, 500 of the town's grade-school children were enmeshed in a Shakespeare pageant and masque of unprecedented magnitude. At the same time, in a bristling expression of intercommunity rivalry, La Jolla (often called the Little City of Heart's Desire) and Coronado each whipped up an early festival of its own. Many of greater San Diego's most distinguished residential areas were

adopting a competitive, more-cultured-than-thou attitude toward one another. Mount Helix took pride as the dwelling place of Carrie Jacobs Bond ("composer of heart songs") and the great diva, Madame Ernestine Schumann-Heink. On Coronado the mansion called Bello Sguardo was the home of opera singer Chevalier Scovel, who had been married to Peggy Roosevelt, T. R.'s cousin, and wore a ring on his thumb. La Jolla got the drop of the opposition by unfolding a Shakespeare Festival at the Woman's Club on April 26. "Miss Mary A. Richmond scored a triumph as the Bard of Avon himself," declared a San Diego *Union* communiqué. Indeed, the *Union* stated, Miss Richmond's make-up and costuming were so perfect that many club members were quite shaken to find themselves gazing upon Shakespeare's apparition. Second hit of the matinee was Mrs. August Knudson. Perhaps harboring certain scruples about transvestitism, Mrs. Knudson elected to appear as Lady Macbeth while giving a selection from *Hamlet*.

Five hundred kiddies in the elementary grades of both public and private schools having been drafted to appear in a monster pageant in which they were required to wear Shakespearean costumes proclaimed to be "locally dyed and largely made by the children themselves," many homes in the city had already been touched by that ordeal which invariably accompanies the birth of art, and were acutely aware of the up-coming red-letter day of April 29. The heretofore uniformed head of the impending spectacle when the *Union* broke the story on April 23, it revealed how the children had been working all semester on costumes, posters and Maypole and Morris dances, as well as rehearsing a complicated pageant composed by Mrs. Virginia Church, local aesthete and San Diego High instructor. All would be part of a daytime extravaganza at the Spreckels Organ Pavilion. Further, it was announced that the schools had joined with Mr. John Lane Connor. He would direct the afternoon spectacle. Then, as part of the package, his students from the San Diego School of Expression would star in the evening's offering.

Like many facilities in Balboa Park today, the Organ Pavilion was booked heavily and not often available for rehearsal time. The first attempt to coordinate the performance of half a thousand children took place on one harrowing Sunday morning between eight a.m. and noon, about a week before opening. Director Connor already had his troubles. Because of "family illness," Romeo had dropped out of the cast and the director had been obliged to assume the role.*

After four hours, with five hundred shuffling, snuffling, squirming, prodding, whispering, tittering youngsters, Connor-Romeo and Chesley Mills, conductor of the 45-piece children's orchestra from the San Diego Conservatory of Music pronounced themselves "greatly pleased with the ability displayed by the principals in impersonating the characters of the pageant, and by the grace and ease shown by the children in the various figures and poses." However, Connor reversed himself at the children's last dress rehearsal when, growing testy under tension, he somewhat snidely remarked to the press that the speaking parts would be heard to better advantage at the evening performance. He may have been piqued because he himself had to donate a tree --- a live oak --- for the pageant's important tree-planting ceremony.

Another snag developed after the *Union* report than Duncan McKinnon, Superintendent of Schools, who had been seriously ill, was pulling himself together to be on hand for Shakespeare's big day and would read the following especially-written verse in conjunction with the tree-planting ceremony in back of Montezuma's Garden:

Since Nature's own memorial we be
Most meet for him who loved her passing well,
We plant today this fair young greenwood tree
To men unborn our Shakespeare's fame to tell.
And like that fame, may it still grow and grow
A year shall come and years shall go.

* Our only description of John Lane Connor comes to use from Harry Pflimlin: "Mr. Connor . . . at the time . . . was head of the Drama Department at San Diego High School, and also a teacher of English. He was a very handsome man, large of frame, with clear fair skin, and a great shock of golden blonde hair. In general appearance he closely resembled the young Nelson Eddy."

Did someone in English Lit snitch to the committee that the last line did not scan? Or was it simply a typo? Be that as it may, the composition summarily was scratched. In its place, Superintendent McKinnon was handed a 23-verse poem entitled "Shakespeare Radivus" and written for the occasion by Fannie Hodges Newman (Mrs. Harry).

According to the *Union*, out-of-town spectators already had been noting the Park rehearsals and commenting upon the real extraordinary talent of San Diego progeny. The 1915-1916 Exposition welcomed such luminaries as Mme. Nelly Melba, Ann Pavlowa, Rabindranath Tagore, Ruth Roland, Douglas Fairbanks, William Randolph Hearst and family, Ruth St. Denis and Ted Shawn, Geraldine Farrar, J. Warren Kerrigan and Dustin Farnum. However, since this was early in the 1916 tourist season, not many dazzling names yet had arrived in town. But there was on hand at least so august a personage as the venerable General William Gates Le Duc, 92, who had just checked into the New Palace Hotel. A front-page story in the local press lauded him as the Exposition's oldest tourist, an ex-Indian fighter, and, perhaps no less remarkable, a man who only a few years ago had survived being hit by a Los Angeles streetcar. (He had been unconscious for about seven hours and had awakened to find himself being laid out for burial.)

Distinguished visitors and townsfolk alike filled the Organ Pavilion on April 29 to do tribute to the Bard. The house had many free seats, although the first 23 rows had been rather stiffly priced at twenty-five cents each and the ticket sold at the Thearle Music Company. The day was sunny but a harsh wind ruffled the little ones and their costumes. Nevertheless, the performance went off with a single hitch. So insisted an enthusiastic review splashed all over the *Union's* page one. Thing started off with the tree-planting ceremony. The first spadeful was scooped up resolutely by little Betty Church, as she posed for news photographers. Little Betty Church's mother just happened to be the author of the delightful Shakespeare masque. After the live oak had been planted, bending to the wind, the entire procession of children in "bizarre costumes" wended their way to the Organ Pavilion. In contrast to the brightly arrayed young performers, were the ladies of the committee. It was an era of dark suits for women, long narrow skirts falling to the ankles and high-topped shoes. The committee ladies shouldered and bosomed their way along with the marching children to all attention to an organizing job well done. Once at the Pavilion, William Shakespeare and sever other costumed figures sat with the stage shell and reviewed the procession of Shakespeare's plays in chronological order. This merits enumeration if only because such an effort today, with its cost in dressmaking hours, damaged manicures and frayed nerves, would precipitate a march on the Education Center.

First, dressed predominantly in red, swarmed children from Grant School (*Love's Labor Lost*), Brooklyn School (*Comedy of Errors*), the Army and Navy Academy (*King John*), Sherman School (*Richard II*), Our Lady of Peace (rather inappropriately assigned *Two Gentlemen of Verona*). The second shock wave was garbed in yellow: Franklin and Lowell Schools (*A Midsummer Night's Dream*), the Bishop's School of La Jolla (*Much Ado About Nothing*), Washington School (*A Merchant of Venice*), San Diego School of Expression (*Seven Ages of Man* --- this was an effort of the school's evening class and included some housewives) and Florence School (*As You Like It*). Francis W. Parker School performed Morris dances, Part three (?), all in green; YWCA Campfire Girls (*All's Well that Ends Well*). Roseville School (*Othello*), Fremont School (*Henry V*), Lincoln School (*Macbeth*), YMCA Boys' Department (*Julius Caesar*), and Jefferson School (*Twelfth Night*). Violet was the color of the fourth and final onslaught by costumed kiddies: Emerson and Stockton School (*The Tempest*), Normal Training School (*King Lear*), Garfield School (*Winter's Tale*), Logan School (*Henry VI*), the Bishop's School of San Diego* (*Hamlet*) and Ocean Beach School (*Cymbeline*). Children trained at Golden Hill Playground staged a Maypole dance.

How's that for openers?

Next on the program came the delightful masque, the original work of Mrs. Virginia Church, president of the local branch of the Drama League of America. Here is the synopsis, in the authoress' own arch words:

* Bishop's School originated in San Diego in 1909 and until 19__ its day school was situated here on Redwood Street.

“It is April, birth month of the Bard of Avon. The children from his plays, on learning that the Clowns and Fantasticks are to celebrate the Master’s birthday at fairy headquarters in the Forest of Arden, pursue their schoolmaster Pinch into the woods to demand a holiday. They plot with Puck and Touchstone to drop the juice of a flower, Love In Idleness, on Master Pinch’s eyelids so that awakening he may dote on some woodland creature and leave them to their own devices. The result is unexpected. Pinch, lulled to sleep . . . is aroused, sees the children about him. But instead of giving them a holiday, he falls so in love with them that he resolves to increase their work, giving them lessons everyday in the week, including Sundays and holidays. With this resolve, he rushes off to procure books. In despair, the children call upon the Macbeth witches for a fatal brew . . . “

Before the little blighters could cash in their Mr. Chips, Shakespeare himself appeared and --- well you get the idea.

The evening entertainment was devoted to a cutting from *Romeo and Juliet*, the Seven Ages of Man tableaux again, this time as an entr’acte; and *The Taming of the Shrew*, in a mutilated “tabloid” version handed down by Edwin Booth.

The *Union* critic found the balcony scene from *Romeo and Juliet* “especially excellent” and remarked with apparent surprise that despite a twenty-five cent admission charge, the evening show was almost as well-attended as the matinee.

In a fairly blunt statement in an early publicity release, Director Connor had blurted, “On account of lack of stage facilities, both plays will be given in as nearly Elizabethan fashion as possible.” Nevertheless, the production was not without embellishment. “In the ball scene, a pretty gavotte was introduced.” The juvenile orchestra had “made a diligent search for Shakespearean music.” Among other selections they came up with Handel’s *Largo* and Verdi’s *March* from *Aida*. The orchestra was not led by little Master Frederick Oleson, as previously had been announced, but by conductor Chesley Mills himself. However, the orchestra’s 45 members were genuinely juvenile, “some of them scarcely big enough to hold an instrument.”

Thus ran the official account of San Diego’s first Shakespeare festival. To the adult mind, from the civic viewpoint, the day was a cultural triumph. How did it appear to one of the performers – say to little Harry Pflimlin (young Macduff), Lincoln School (*Macbeth* --- green)?

“It is no easy matter to recall in detail the happenings in a day which passed into history more than a half-century ago. Events tend to take on a dream-like quality, there is considerable blurredness. . . . Now, please bear in mind that in writing of that April day, I am seeing it again through the eye of a twelve-year boy. I was not conscious of its significance. I endured it and its trials with the stout heart of one who is confident such things can’t go on forever. . . .

“The members of the cast were recruited (shanghaied?) from the several grade schools of San Diego at that time, and from San Diego High School. I was then in the sixth grade at Lincoln School. (This school was located at 12th and E Streets and later became a warehouse for the school system.) . . .

“The costumes were made by the Domestic Science classes at the High School, by the teachers, and by any other easily-swayed unfortunates who happened to be in the vicinity at the time. . . . I would say that the material used was of a quality that could be worn only one time, and seemed little better than cheesecloth, but Joseph’s coat had nothing on us for variety and brilliance of coloring, and I am sure we were a dazzling sight. . . .

The Lincoln school contingent of players walked up the hill to the High School, which was the assembly point for all the participants. Here adult females laid eager hands upon us and literally sewed us into our costumes. There was much squealing, shouting and confusion. Model T Fords labored up the hill to deposit loads of the stricken from other schools.

“The costuming complete, we were taken to Balboa Park, some by the old streetcar that used to run past the High School, and some by other conveyances. We were deposited at the Organ Pavilion, and formed

into a processional at the right. We proceeded slowly across the pavilion stage from right to left, and I believe there was a narrator to identify the characters, who said nothing. Certainly, no one in the role of Macbeth exhorted me to "Lay on!" I did not . . . know that I was Macduff; had I known it at the time, I would surely have sought out the blackguard Macbeth and given him his comeuppance for murdering my family.

"When the processional was over, the players were free to wander about among the spectators. The event had drawn a capacity crowd, and I the warm, soft sunshine of a beautiful San Diego day in April, people were in a gala mood. There were murmurs of delight and good humor everywhere, cameras clicked, and for a time there in Balboa Park all was right with the world. . . .

"When the afternoon began to wear off, the players were gathered together and returned to their respective points of origin. The Lincoln School group were deposited at the High School and left to their own devices. When I tried to remove my costume, I found that the leg parts, which resembled the leggings worn by the doughboys of World War I, were so thoroughly sewn to my pants that they could not be removed. To the jeers of the boys I met on the way, I ran all the way home, stopping now and then to try again to remove those accursed wrappings. When I got home my mother cut me loose, and I was speedily off to the old Rose Park playgrounds at 12th and Island, there to take up for a time the really worthwhile things of life. . . ."

April 29, 1916, San Diego Sun, 14:1. Los Angeles produce men arrive by special train today; met by circus parade made up of displays from Isthmus concessions which escorted visitors to Cristobal Café.

April 29, 1916, San Diego Union, 6:6. Series of lectures on forest conservation, fire prevention, development of west at New Mexico building.

April 29, 1916, San Diego Union, II, 1:2-3. Shakespearean characters to people Exposition today; 500 children to take part in pageant in honor of the great dramatist on his tercentenary.

April 30, 1916, Los Angeles Times, 9:1. Fair boosters dispense joy; San Diegans back from tour of triumph in north; glad welcome everywhere for Exposition party; Los Angeles entertained by band, singers, dancers.

The Spanish dancers and singers, headed by La Bella Sevilla and La Bella Toledo, and under the management of Eduardo Cota, made a big hit at the Alexandria.

April 30, 1916, Los Angeles Times, 9:6. Sultan's Beauties Cause of Dispute.

San Diego, April 29 --- Although the Sultan's Harem on the Isthmus at the exposition has been ordered closed by the District Attorney, the Sultan's beauties continue to draw the crowds. Today the hearing of an application before Judge Andrews by District Attorney Marsh for an injunction to stop the show was postponed one week at the request of the proprietor, Joseph Weiss.

Throughout the week the show has been off and on. First the Mayor has the show stopped; then, after viewing a special performance given for him and the exposition officials, he decided the show was all right, as the proprietors had promised to "be good" and he ordered it opened.

Later, at the request of the District Attorney, Assistant Chief Wright closed the place, but it was immediately opened by other officers under orders of Chief Wilson and the Mayor. "The concession is to be closed," says the District Attorney, but Mayor E. M. Capps holds that the District Attorney has no jurisdiction over the Isthmus, which is in the city.

April 30, 1916, San Diego Union, 1:3-4, 4:2-4. Brilliant spectacle for memory of Shakespeare; performers in pageant and masque depict days of three centuries ago.

April 30, 1916, San Diego Union, 8:3. H. J. Penfold, secretary, answers District Attorney's criticism of Fair.

April 30, 1916, San Diego Union, 8:4. Three hundred produce man invade Exposition; Los Angelans met by reception committee and Tommasino's Italian Band.

April 30, 1916, San Diego Union, 8:4. Reverend F. M. Preble of Auburn, Maine charmed with Exposition, City and its attractions.

April 30, 1916, San Diego Union, 8:4. Police hunt for gem lost in Cristobal Café.

April 30, 1916, San Diego Union, 8:5. "Thank You" train homeward bound; tour is a success.

April 30, 1916, San Diego Union, 9:1-2. Notes among concessionaires: Princess Lei Lokelani to offer a new dance at Hawaiian Village starting today; four parasol stands at Tokio Café; Silver Bell Concert Hall at Grizzly Gulch honored baseball teams of the First Battalion, 21st Infantry Wednesday night; Captain and Madame Ellis, one of the best things on the Isthmus; Manager Barrett put the horses and ponies through their paces at Robinson's Animal Show during trainer Captain Harrison's absence; steaks and pork chops at Patio Café; Sinking of Titanic will open Thursday, May 4, in War of the Worlds building; Elizabeth is a Lilliputian, not a dwarf; Theatrical Masquerade Banquet and Ball at Casino, May 3; opening cut out for a front entrance to Alhambra Cafeteria so passers by can view the interior; Painted Desert, an interesting and educational exhibit.

April 30, 1916, San Diego Union, 9:2. Invalids' morning program arranged; popularity of weekly event at Exposition shown by large number attending.

April 30, 1916, San Diego Union, II, 1:3-4. Mrs. H. H. A. Beach, woman composer, to be honored by Exposition.

May, 1916, The California Garden, 8-9. Monthly Excursion Through Exposition Grounds, by G. R. Gorton

May is one of the perfumed months where flowers grow. Especially is this true on the Exposition grounds where the honeysuckle, Spanish broom, roses and other odoriferous flowers hold sway. South of the Organ Pavilion, a spot which hitherto has been innocent of verdure --- either wild or cultivated --- has been grades, walks have been laid out, and planting is in process. Many old favorites will be seen among the bedding plants, such as would be found in an old-fashioned "scented garden," like Lavender, Stocks, etc. The multi-colored Zennias, the cheerful Marigolds --- this, you know, is the "Marygold" of Shakespeare's time, the bright Gazanias, the humble Geranium, the ever-present Marguerite --- a goodly assemblage suggesting the days of Paisley shawls, hand-wrought hosiery, cameo brooches, tintypes, etc. However, the plants are small just yet and if one wished to revive such memories, he had better wait until the garden had had time for further development.

The opposite condition prevails in the Gardens of Montezuma as practically everything there is in flower.

As mentioned last month, the gardens have been completely remodeled, having this time been given the formal treatment which the shape of the beds indicates. Just now --- Decoration Day --- lilies form the dominant note in all the beds. The same design obtains in all corner beds, viz. that next inside by formally pruned border of *Veronica elliptica*, which surrounds all the beds. The edging consists of dwarf blue *Ageratum*, Floss Flower, flanked by Vernon begonias, petunias --- the type known as Ruffled Giants, Salvias.

The four side beds (two on each side) are edged with the new *Lilas Alyssum*, surrounding Phlox and Penstemons.

The larger center bed contains the tall Jerusalem cherry interspersed with *Pelargoniums* and *Anchusa italica*, a blue-flowered plant with somewhat mullion-like leaves, and is bordered with *Amberboa*, whose pale lilac flowers suggest the common corn flower (*Dentaurea cymacea*), together with Vernon Begonia and Scarlet Verbenas.

Gladiolus in several varieties is to be found in each of the beds. Skirting the outer edges of the gardens, across the walks from the formal beds, the planting is variously composed of Hibiscus, Heliotrope, Marguerites, an occasional specimen of Lion's Tail (*Leonotis leonurus*), the inevitable Geranium, etc., while on the shady side there is a considerable showing of Fuchsia *recartoni*.

The usual seasonal changes are taking place inside the Botanical Building, the Cinerarias, Azaleas, Rhododendrons, etc. are on the wave and the tuberous Begonia, Gloxinias, Streptocarpus, etc. are commencing to put in an appearance. The "Orchid" vine (*Stigmaphyllon ciliatum*), close under the roof of the conservatory, has covered itself with canary-yellow flowers. Here and there potted plants of *Saintpaulia ionantha* --- the so-called South African violet --- are beginning to put forth their violet-like flowers. The plant, however, bears no relation to the true violet, but is a "cousin" of the *Gloxinia*, order: *Gesneraceae*.

Hydrangeas will soon play a prominent part in the color scheme of the lath section, several groups being already in place and in bud. In the northeast corner of the west wing there is a considerable showing of *Achyranthes brilliantissima*, very popular in many parts of the world as a foliage plant for bedding. Its brilliant red foliage with veination of a lighter shade renders it a very useful and attractive subject for this purpose.

Dracaena braziliensis, at the entrance to the east wing, is in flower. There are two varieties of this species, both bearing lavender shades of flowers. In front of the building the mosses of *Sallya heterophylla* --- the graceful Australian Blue Bell creeper --- is plentifully sprinkled with tiny flowers.

May 1, 1916, Los Angeles Times, II, 2:5. Alaskan guide shames nation; installs territorial exhibit at own expense; typical Alaskan display at the San Diego Exposition came into existence after government had refused appropriation; founder was pioneer of the Yukon.

There are not many citizens of any State or nation as patriotic as Capt. L. L. Bales, guide, big game hunter, and a 27-year resident of Alaska, who is in charge of the Alaskan exhibit at the San Diego Exposition.

To say that Capt. Bales is in charge of the Alaskan exhibit is not fair to him, as he is in reality the "founder" of the display. When he learned that the United States government had made no plans for an Alaskan exhibit at either exposition, he took it upon himself to get the indorsement of Gov. J. F. A. Strong, and started out to see that the territory that meant home to him should be known to the exposition visitors.

Wholly at his own expense and without the aid on one dollar from the territory of Alaska, United States government of private individuals he has collected a typical Alaskan display, taken it to San Diego, and had it installed in the Pan-Pacific building.

In addition to a few exhibits loaned by the government, he has brought his own collection of fur skins, ivory carvings and pictures of Alaska. A pretty Eskimo maiden, No Lu La Ka Masak, born at Mary's Eagle, Alaska, 125 miles northeast of Nome, and educated in the government schools, gives demonstrations of wonderful needlework. Capt. Bales had a shipment of imitation "Totem Pole," which he refused to place on display, claiming that he would not "disgrace Alaska."

Samples of grass basket weaving by the natives of the Aleutian Islands is another feature of the northern exhibit, and Bales insists that this art is fast being lost despite the encouragement given it by the government. When Capt. Bales presented his letter of indorsement to the head of the government exhibit at San Francisco, he was told there was no room, but after talking on Alaska for three days, other exhibits were discarded and the Alaska exhibit used.

May 1, 1916, San Diego Sun, 7:5. Mrs. H. H. A. Beach, composer, to be honored at Fair tomorrow.

May 1, 1916, San Diego Sun, 7:8. "Thank You" special to reap good; booster trip through state put Exposition City on map.

May 1, 1916, San Diego Sun, 7:8. Saturday attendance 11,010; Shakespearean pageant presented in afternoon; Sunday attendance 5,680.

May 1, 1916, San Diego Union, 1:4-5, 2:6. "Thank You" special returns; lessons learned in boosting.

May 1, 1916, San Diego Union, 5:7. This is Invalid Morning at Fair; automobiles will be allowed to enter grounds after paying fee.

May 2, 1916, San Diego Union, 5:2. Mrs. H. H. A. Beach, composer, to be honored at Fair today.

May 2, 1916, San Diego Union, II, 11:3. D. C. Collier boosted Theodore Roosevelt last night for three-quarters of an hour at a sparse gathering in a theater of small dimensions.

May 3, 1916, San Diego Sun, 5:1. Mrs. H. H. A. Beach was guest of honor yesterday; reception on steps of California Building at 2:30 p.m.; recital at Organ Pavilion at 3 p.m.; Mrs. Beach played two of her piano compositions, "Scottish Legend" and "Fantastique." "Fairy Lullaby," "Song of Love," "Romance," "Suen a Van," and "The Year of the Spring" were sung; guest at military review at 3:45 p.m.; second program in Woman' Pavilion in California Building followed by tea.

May 3, 1916, San Diego Union, 5:2. Woman composer honored at Fair; admiring throng gives tribute to Mrs. Beach.

May 3, 1916, San Diego Union, 5:6. Painted Desert Indians to have part in motion picture acts this morning; football scenes for drama to be taken at stadium; Indian drama being made by Lubin Manufacturing Company.

May 3, 1916, San Diego Union, 6:2. Director-general of Film day at Fair busy staging big event; motion picture stars Blanche Sweat, Dorothy Gish, and Kathleen Williams to be present.

Los Angeles Times, May 4, 1916, II, 6:4. Movie players to have day at Fair; will show crowd how film drama is made; special train to carry members of 26 companies of Southland to San Diego for weekend of entertainment and outing.; Mrs. Ruth Rowland, the Balboa star, is to sing from the rotunda of the organ. Miss Myrtle Stedman of the Morosco studio is to give several popular songs.

May 4, 1916, San Diego Union, 1:3. Attendance for 1916 passed 400,000 mark; April admissions were 9,564 more than the same month in 1915..

May 4, 1916, San Diego Union, 2:4. Varied attractions on program at Fair today.

May 4, 1916, San Diego Union, 5:2. Model school from Hawaii displayed at Exposition.

May 4, 1916, San Diego Union, II, 13:3. Senta, the dancer who is appearing at Cristobal Café, enters leopard's cage.

May 5, 1916, Minutes of the Board of Park Commissioners.

Board requested to set aside 50 foot strip of land on the eastern boundary of Balboa Park between Thorn and Upas for the purpose of widening 28th street, making it conform with same street between Palm and Redwood streets; granted.

Superintendent John Morley advised that grade for 28th street between Thorn and Upas, established by Board, should not be changed.

Board of Playground Commissioners requested use of lawns at 6th and Juniper in Balboa Park for May 30th "Decoration Day" festival; granted.

May 5, 1916, San Diego Union, 5:1. Music teachers to be honored at Exposition; one of the greatest programs ever given here is being arranged for July 6.

May 5, 1916, San Diego Union, 5:2. Miss Mildred Leo Clemens, cousin of Mark Twain, lectured at Exposition.

May 6, 1916, San Diego Sun, 5:1. Photoplayers' Ball at Cristobal Café tonight; special train from Los Angeles bearing players of film world to arrive at 6:30 p.m.

May 6, 1916, San Diego Union, 5:3. Photoplayers to throng Cristobal at ball tonight.

May 7, 1916, San Diego Union, 5:2-3. ON THE MARGIN by Yorick: The dire consequence of a misplaced tribute.

Joe Sefton writes letter objecting to Yorick's giving Goodhue credit for Exposition:.

To begin with, Mr. Goodhue did not conceive the general architectural style of the Exposition. The Spanish Colonial was selected by the Board almost as soon as the Exposition itself was conceived, and Mr. Goodhue was employed merely because we were told that he was the best authority on this particular style. In other words, the architectural style was first conceived and then Mr. Goodhue was employed to carry it out. If the idea was good, the credit belongs to Charlie Collier. And now as to the carrying out of the idea itself. Mr. Goodhue designed the California State Building and the Archaeological Building, the two permanent buildings at the east end of the bridge. * * * (The other buildings) were conceived, designed and built by Mr. F. P. Allen, Jr., who undertook this work at the suggestion of the Board of Directors after Mr. Goodhue had failed to submit tentative sketches in time to complete the buildings for the opening. Mr. Allen undertook and carried this work to a successful conclusion without any increase in compensation. Furthermore, Mr. Olmsted, who was originally the landscape architect, and Mr. Goodhue both favored sticking the Exposition into the canyon back of the High school. It was only through the untiring efforts of Mr. Allen that it was finally located on the plateau where it now stands.

Eugen Neuhaus, is assistant professor of decorative design at the University of California. He has written a book on the architecture of the Panama-California Exposition. . . . In this book (which is an authority until something better is offered) Mr. Neuhaus devotes more space and larger praise to the California Quadrangle than to all the other architectural features combined and on page 48 I find this explanatory and critical paragraph:

It will be observed immediately on leaving the California Quadrangle that a somewhat different spirit pervades now in the architecture. One's attention is first drawn to the differences in texture and color of the buildings outside the California Quadrangle. The cement finish in the permanent group has a darker tone, while a certain smooth and light plaster of paris quality seems to be the controlling note of the temporary buildings. But it is not this alone. The architecture, while it has the same constructive dignity as the California Cathedral, has not the refined reserve that one so greatly admires in that building. This is particularly true of the ornamental detail. It will readily be seen that a decorative style of architectural ornamentation, such as the Baroque, can very easily become over-elaborate and loose, forgetting its true function of supporting the constructive forms of the buildings. *While Mr. Goodhue was the guiding mind of the (whole?) ensemble, it becomes very evident that other workers interpreted his ideas, and not always in the spirit of the reserve style of the master.* There is a great deal of variance in feeling and scale in the many buildings. They are not all equally successful.

Wherefore I am much puzzled; for if, as Friend Sefton says, Mr. Goodhue is not responsible for anything except the Quadrangle and the Archaeological building, he cannot be blamed for anything wrong with the "interpretation" of the other buildings. But if, as herein stated, he was "the guiding mind," there can be no excuse for him. In the matter of "conception," too, perhaps I used the wrong term: I said that Goodhue

“conceived” the architecture of the Exposition; maybe I should have credited him with the “composition.” Anyway, whatever it is, Friend Sefton says it was badly “interpreted.” I am glad I didn’t mix in with the Olmsted row; for I would have been almost certain to have argued in favor of “sticking” some of the Exposition at least “into the canyon back of the High school.” --- I am that contrary; but I am glad for Mr. Goodhue’s sake that it wasn’t buried in that sunken garden; for if it had been so hidden, his *chef d’oeuvre*, the California Building, the masterpiece of the Exposition, would have been completely lost to view, however dear to the memory of those who took the trouble to climb down to it.

May 7, 1916, San Diego Union, 7:4-5. Moviedom stage big dance at the Exposition.

May 7, 1916, San Diego Union, 8:5. Italian display in Foreign Arts building is dedicated.

May 7, 1916, San Diego Union, II, 8:3-4. Screen stars to enact scenes at Fair today; Exposition crowds will appear in motion pictures to be filmed this morning; lectures by George Wharton James and Waldo C. Twitchell on attractions of California and New Mexico will be given during day.

May 7, 1916, San Diego Union, II, 8:3. Dr. George Wharton James to be guest on “clover leaf trip; lecturer at the San Joaquin building will take first outing since coming here for engagement at Exposition.

May 7, 1916, San Diego Union, II, 8:4. Automobile and Invalid morning at Exposition today.

May 7, 1916, San Diego Union, II, 8:4. Reception and tea at Woman’s Board Headquarters Tuesday afternoon in honor of the foreign commissioners now at the Exposition.

May 7, 1916, San Diego Union, II, 8:4. Women of the Social Service Delegation were guests at a reception and tea at the Woman’s Board Headquarters yesterday afternoon.

May 7, 1916, San Diego Union, II, 8:5. Italian display in Foreign Arts building dedicated.

The Italian section is considered one of the most impressive on the grounds for its display of marble statuary, ceramics, paintings and laces.

May 7, 1916, San Diego Union, II, 7:4-5. Notes among concessionaires: new cowgirls at Grizzly Gulch; Alhambra Cafeteria this year is in the former location of the aquarium last year; theatrical ball at the Casino Wednesday night was a success; “The Dance of the Red Poppy,” part of hophead’s dream in Underground World; inaugural performance of the Sinking of the Titanic at War of the World’s building Thursday; parasols for sale at east gate by S. Sekiguchi.

May 8, 1916, San Diego Union, 1:4. Pied Piper of Hamelin coming to Fair May 27.

May 8, 1916, San Diego Union, 5:6. Film folk pass day at Exposition.

May 9, 1916, San Diego Sun, 1:5. Arrangements are being completed whereby Colonel D. C. Collier is to become a member of the legal firm of Henning and McGee, occupying a suite of offices on the seventh floor of the Timken building.

May 9, 1916, San Diego Sun 5:5. Miss Kate Sessions spoke for an hour and three-fourths last evening at the parlors of the First Congregational Church on the chaparral and wild flowers of San Diego County. She took occasion to say that she thought a strip of 100 feet in width on each side of the road through the “municipal farm” of several thousand acres between La Jolla and Torrey Pines, devoted to the natural growth of shrubs and flowers, would form a parking which would be a vast improvement over the present conditions. The few exotic trees which struggle here and there at present are, she declared, a disgrace to the roadside.

The speaker dwelt upon the tendency of real estate promoters to grub off all the native shrubbery from subdivisions, for instance, the large and handsome *Rhus integrifolia* [Lemonade Berry], with its dark

green leaves and spreading branches. A very fine specimen of this plant may be seen at the 25th Street entrance of Balboa Park.

May 9, 1916, San Diego Sun, 9:1. Our harem is getting San Diego famous: Its troubles go up to Appellate Court in Los Angeles. "A superior court injunction is the only way to close the show," ruled Judge Andrews yesterday.

May 9, 1915, San Diego Union, 1:3-7, 2:3. Army of Rebekahs and Odd Fellows storms city; 401 California lodges represented at convention; hotels thronged.

May 9, 1916, San Diego Union, 12:2. Hawaiian Village

The Hawaiian Village as usual is presenting an excellent program, and the sweet singers and players from the islands are giving a program that cannot be excelled anywhere. The beautiful scene effects of the village, constructed by Kenneth Croft, are always interesting, particularly that portion representing the beach at Waikiki.

The charming Princess Lei Lokelani is winning favor with her wonderful conception of the famous hula, and, together with her co-workers, presents a most interesting entertainment. The fact that the hula dance is given in the hula house adds much to the charm of the performance. Eddie Shaw, with his Hawaiian steel guitar, continues to please and is adding new numbers to his repertoire.

The grill is serving excellent meals and it is now the proper idea to dine at the village and enjoy the excellent program offered by the troupe of native entertainers. Visitors can dine at the grill without entering the village if they so desire as an entrance has been arranged from the Isthmus proper.

May 9, 1916, San Diego Union, 12:3. Baby animals delight children at Exposition; two coyotes are latest arrivals at the Isthmus zoo.

Baby animals are arriving at the Exposition in such numbers that President G. A. Davidson is considering a proposal to hold a baby day on the Exposition grounds with the Exposition babies as the entertainers. The muster of babies that could be called upon to entertain visitors include baby coyotes, bears, burros, goats, a sacred ox, camel and monkeys.

The latest arrivals are the two coyotes at the Exposition zoo, at the north end of the Isthmus, and the birth of these little animals Saturday has brought out a peculiar situation in the coyote family. Following the arrival of the coyotes, the mother refused to own them and a new task has developed for the zoo superintendent F. J. Kaufman. The first hours Kaufman used a bottle in feeding the coyotes, but they are now willing to take their nourishment from a plain saucer filled with milk,

In the Canadian building, the four tiny black bears are considered "the cutest things on the grounds," and the big cage alongside the beavers is surrounded from morning until night by visitors. The bears were captured a few weeks ago in the northern part of Canada. Although not yet acclimated, they are beginning to cut antics about the cage, and never fail to respond to the lure of honey.

On the days that the Exposition's babies appear as the principal attraction on baby day, it is possible that names will be asked for the various animals not yet given fitting cognomens, and among these yet to be christened are two burros, four bears, two coyotes, and the sacred ox. Although the christening ceremonies will not be as elaborate as those for the baby camel, Al Bahr, which was named by the local Shriners, the events will be made important.

May 10, 1916, San Diego Sun, 1:1. Companies A, B and D and band of 21st Infantry leave Exposition today to join bandit hunt.

May 10, 1916, San Diego Sun, 5:5. Friday evening has been named Tommasino night in honor of band leader whose compositions will make up entire program; presentation by San Diego Choral Society at Organ Sunday afternoon.

May 10, 1916, San Diego Union, 3:2-3. Who will be Pied Piper at Exposition?

May 10, 1916, San Diego Union, 8:1. Pupils rehearse "As You Like It"; will be given on evening of May 17.

May 10, 1916, San Diego Union, 8:4. Italian band to play in exhibit buildings.

May 10, 1916, San Diego Union, II, 9:1. Odd Fellow and Rebekahs to plunge into work of convention today; confer degree of Grand Lodge on 284 candidates.

May 10, 1916, San Diego Union, II, 9:3. History room of the Pioneer Historical Society in basement of Fine Arts building will be closed this afternoon.

May 10, 1916, San Diego Union, II, 9:5. May music festival to end next Sunday.

May 10, 1916, San Diego Union, II, 9:5. Julius Wangenheim and William Templeton Johnson give visions of a City Beautiful yesterday at weekly luncheon of the civil bureau of the Chamber of Commerce.

May 10, 1916, San Diego Union, II, 9:5. Portrait of W. A. Clark in Montana building done in minerals of Montana.

May 11, 1916, San Diego Sun, 3:5. John Ezra of Jerusalem Isthmus concession booked at jail yesterday for fighting with Isaac Yuker, who has a concession in the Foreign Arts building; Judge Puterbaugh fined both fighters \$15.00; Yuker was trying to sell two ladies some rugs when Ezra interrupted him; Ezra tried to get the ladies to come to his place to buy.

May 11, 1916, San Diego Union, 1:3-4, 2:3. Two hundred and forty-five officers and men of the First Battalion of the 21st Infantry hurry from Fair to border; soldiers eager to hunt for Mexican bandits.

May 11, 1916, San Diego Union, 6:2. Animal school to be conducted at Exposition; visitors will see how beasts are trained.

May 11, 1916, San Diego Union, II, 1:1. Odd Fellows to control Isthmus tonight.

May 12, 1916, San Diego Sun, 1:2-3. **Sun** route carriers, 70 strong, will be entertained at a banquet at the Cristobal tonight; Mr. Gillespie of the Green Auto Line has donated two green buses to convey the boys to the Exposition; after a big feed, the boys are to be the guests of the concessionaires on the Isthmus.

May 12, 1916, San Diego Sun, 5:1. San Diego Choral Society at Organ Sunday afternoon, the final event of the San Diego May Music Festival; Exposition visitors will act as judges Saturday evening at a special dancing competition to be given by four colored couples on the Isthmus stage at 8:15 p.m.; Fraternal Brotherhood will camp at Exposition August 14 to 19, occupying camp site prepared by 21st Infantry, visiting drill teams will give daily parades and drills; Pied Piper will appear at Laurel street gate at 11 a.m. Saturday, May 27, and will lead a throng of children through the gates of the Dream City; Alameda County day, June 10, cherries to be given away.

May 12, 1916, San Diego Union, 2:1. Pied Piper's identity well-guarded secret; crippled little folks to be carried across bridge in his wake on motor cars.

May 12, 1916, San Diego Union, 2:3-7. Rebekahs, Odd Fellows take possession of Joy Street.

May 12, 1916, San Diego Union, II, 1:3. Dr. Wharton James enthusiastic over "Clover Leaf" tour to Point Loma.

May 12, 1916, San Diego Union, II, 1:5. Foresters' day, July 1, to be big event.

May 13, 1916, San Diego Sun, 1:6. \$100,000 Netherlands' art collection to open in Fine Arts Gallery Monday morning; system of artificial lighting is being installed; upstairs and downstairs to be used.

May 13, 1916, San Diego Sun, 6:3. Motor demonstration will begin Saturday, May 20; 45 makes of automobiles represented.

May 13, 1916, San Diego Union, 16:2. Olive day to be observed May 26.

May 13, 1916, San Diego Union, 16:3. Schoolchildren visit zoo inmates at Exposition.

As usual, the first stop of any considerable length was made with the pigeons, where the children insisted on feeding them for a full half hour. The four tiny bears in the Canadian exhibit, the pet burros in the Painted Desert, the baby monkey, the coyotes, the sacred ox, and the camel at the Exposition zoo came in for a long visit later in the afternoon.

May 13, 1916, San Diego Union, II, 9:2-4. Odd Fellows-Rebekah Convention ends; officers installed; day at Exposition and Hotel Coronado banquet last night conclude festivities; Visitors express thanks to hosts.

May 13, 1916, San Diego Union, II, 9:3. Imperial Valley day is set for June 10.

May 13, 1916, San Diego Union, II, 9:4. Rehearsals for "As You Like It" please directors; elaborate lighting effects to transform setting into moonlit forest of Arden.

May 13, 1916, San Diego Union, II, 9:4. Superior Court Judge C. N. Andrews yesterday continued The Sultan Harem's suit to May 26.

May 14, 1916, San Diego Union, 3:2-5. Thousands of pupils in music pageant; annual May festival at stadium crowned with success.

May 15, 1916, San Diego Sun, 8:1. "As You Like It" to be presented by San Diego High School and Junior College on Botanical Gardens, Wednesday evening at 8; exposition electrician C. S. Harper has provided a number of electrical effects which will flood the court in "moonlight" splendor.

May 15, 1916, San Diego Union, 4:6. 8,000 autos to be at the Exposition; 45 makes of cars granted space on motor demonstration field for May 20.

May 15, 1916, San Diego Union, II, 1:3. Cristobal Café changes management.

May 15, 1916, San Diego Union, II, 16:3-4. \$100,000 Netherlands art collection in Fine Arts Gallery at Exposition will be opened to public view this week; 251 paintings in the lot; position of honor to be given work of Anton Mauve, recognized as one of best; artificial lighting has been installed and all openings closed; plush settees will be placed in each room; the honor paintings by Mauve are "Returning Home," "Sheep Shearing," "A Warm Day," and "Sunset in Winter"; other painters are N. V. D. Waay, Jacob Dooyewaard, J. van Essen, M. A. J. Bauer, C. F. Balive, Jan Jans, Herman Hayenbrock, and Miss Robert Janseen.

May 16, 1916, San Diego Union, 1:4, 9:1. Ripe olive to reign today; big celebration at Exposition.

May 17, 1916, San Diego Sun, 1:2. Citizens vote down road, bridge and hospital bonds.

May 17, 1916, San Diego Union, 1:7-8. County bonds for roads and hospital beaten by wide margin in yesterday's election.

May 17, 1916, San Diego Union, 3:4. Merchants urged to patronize Exposition; Secretary Penfold speaks at Commerce Chamber luncheon; Olive Day observed.

May 17, 1916, San Diego Union, 5:1. College Women's Club day observed.

May 17, 1916, San Diego Union, 5:1. Alfred Hartz, former Metropolitan orchestra leader, and Mrs. Hartz honored by tea at Woman's Board Headquarters.

May 17, 1916, San Diego Union, 8:6. Exposition pays tribute to olive; program offered; many visitors join in exercises in patio of the Southern California Counties building in honor of California product..

May 17, 1916, San Diego Union, II, 14:2. "As You Like It" to be given tonight at the Exposition.

May 18, 1916, San Diego Sun, 3:1. "As You Like It": The artistic entrance of the Varied Industries building, located on the east side of the lagoon, with its classical columns, its velvety lawns and its pretty fountain, formed an effective setting for the scene at Duke Frederick's court, while the Forest of Arden was represented among the trees and shrubbery to the right of the entrance.

May 18, 1916, San Diego Sun, 6:1 Swedish day, June 25; 4,000 to 5,000 visitors expected.

May 18, 1916, San Diego Sun, 7:1-2. Eagles of state to be next at Exposition; 5,000 to 6,000 coming; convention will bring visitors from all over California next week; program arranged by local lodgemen.

May 18, 1916, San Diego Sun, 8:1-2. Motor car will be king at Exposition on Saturday; big parade and all kinds of contests on program; races, tire changing, gasoline, hill-climbing contests; maneuvers by California Automobile Reserve Corps and drills by Los Angeles Military Academy cadets; automobile carnival in evening on Isthmus; cash prizes for best costume representing a make of automobile, an automobile accessory, and for small noise-maker capable of creating the greatest amount of noise.

May 18, 1916, San Diego Union, 5:2 Motor demonstration field to be opened Saturday.

May 18, 1916, San Diego Union, 8:1. Young actors and Arden forest delight throngs.

The production, which was under the direction of W. Luzerne Grandall and Clarence W. Bowers of the High school was a highly praiseworthy one.

May 18, 1916, San Diego Union, 8:2. Want to act? Exposition will give you a chance. First amateur night scheduled for Monday; theatrical firms looking for "find."

May 19, 1916, San Diego Union, II, 1:3. Automobile night on Isthmus expected to bring forth mass of striking effects.

May 19, 1916, San Diego Union, II, 10:6. Germans will throng Exposition June 25; Teutonic gymnasts and singers to compete for prizes.

May 20, 1916, San Diego Union, 3:2-3. Mrs. Susan Egan, centenarian celebrates birthday at Fair; tours Exposition in auto; is delighted by pigeons in Plaza who feed from her hand.

May 20, 1916, San Diego Union, 3:2-3. Modern Dutch school of art represented at Fair.

May 20, 1916, San Diego Union, 4:2. King Automobile reigns at Fair today; thousand cars expected in line; carnival tonight on Isthmus planned.

May 20, 1916, San Diego Union, 5:5. Piper's identity still a mystery.

May 21, 1916, San Diego Union, 4:5. Throngs attend auto demonstration.

May 22, 1916, San Diego Union, 1:4. Piper sends his photograph; identity of flute player still a mystery.

May 22, 1916, San Diego Union, 5:3. Value of automobiles in warfare shown in maneuvers yesterday at Exposition.

May 22, 1916, San Diego Union, 5:7. Big attendance at Exposition; special Sunday night dinner at Cristobal proves popular with patrons; official count for Saturday, 6,281.

May 22, 1916, San Diego Union, 12:3. "Thessalian Fantasy" to be presented at Organ Pavilion, June 16 and 17.

May 23, 1916, San Diego Sun, 3:2. Commercial Vehicle Transportation day is planned for Saturday, July 15, in honor of 30 or more contestants who are expected to participate in the truck run from Los Angeles to the Exposition on that day.

May 23, 1916, San Diego Union, 1:4. Eagle convention opens today.

May 23, 1916, San Diego Union, II, 9:1. United States Fisheries building formally opened; exhibits said to compare favorably with those at San Francisco last year

The exhibit of fish . . . includes rare fresh water fish from every port of the country, in addition to the rarest salt water fish which are indigenous to Pacific coastal waters of the United States.

May 23, 1916, San Diego Union, II, 9:2. Deep mystery still enshrouds identity of the Pied Piper.

May 24, 1916, Los Angeles Times, II, 4:2. EDITORIAL: San Diego and Tia Juana.

The Times notes that the people of San Diego are righteously and riotously indignant with the Earl newspapers because of their virulent attacks on San Diego with irrelevant regard to the race tract, the gambling and the vices at Tia Juana.

May 24, 1916, San Diego Sun, 6:1. Exposition ready for big events; United States day, Friday, May 26; Pied Piper day, Saturday, May 27; Imperial day, June 10.

May 24, 1916, San Diego Sun, 9:2. May Festival will be held at 6th and Juniper in park; Playground Department in charge of event; Decoration day, Tuesday, at 2 p.m.; architect Winslow is designing throne for Miss. Kathleen McDonald, the May queen; Children's Orchestra of San Diego Conservatory of Music will give a half-hour concert before the program.

May 24, 1916, San Diego Union, 5:1. Government Day at Exposition Friday.

May 24, 1916, San Diego Union, 5:5-6. Features planned for Pied Piper day at Exposition.

May 25, 1916, San Diego Sun, 6:1. Admiral Cameron McRae Winslow, commander of the Pacific fleet, will make plea for preparedness tomorrow at Fisheries building during United States day exercises; new aquarium to be dedicated.

May 25, 1916, San Diego Union, 3:2-3. Mayor Capps deems imitations of Charlie Chaplin to be detrimental to dignity of city.

"Imitations of Chaplin, like Chaplin himself, should be confined to the movie screen."

May 25, 1916, San Diego Union, 5:2. Dancing children will welcome the Pied Piper; thousands of kiddies will follow musician into Exposition grounds.

May 25, 1916, San Diego Union, 8:1. Ad Club promised big day at Exposition, June 10.

May 25, 1916, San Diego Union, II, 1:1. Parade tonight crowning Eagles' visit; drill feature.

May 25, 1916, San Diego Union, II, 1:3. Tommasino's band to play at Cristobal Sunday evening.

May 26, 1916, San Diego Sun, 12:1. Eagles coursed through streets last night, ending at Exposition; drum corps competed for honors in Plaza de Panama; Isthmus celebration.

May 26, 1916, San Diego Union, 1:4. Madame Rappold (?), American soprano, given reception at Woman's Board Headquarters.

May 26, 1916, San Diego Union, 4:4-5. 48th anniversary Balboa Park founding is today.

May 26, 1916, San Diego Union, 5:1. Tomorrow Pied Piper appears at Exposition; thousands of children will be gratified by sight of this strange character.

May 27, 1916, San Diego Sun, 2:4. Bicycle races to be held on Alameda-Isthmus race course on afternoon of Memorial Day.

May 27, 1916, San Diego Sun, 3:5. Pied Piper leads tots to Fair; Pied Piper asked for payment of mayor, was refused, and then led children through the Exposition gates and up to the aviation field; an afternoon of pleasure had been prepared with peanut races, pie-eating contests, three-legged races, and other contests.

May 27, 1916, San Diego Union, 1:4. Crowd applauds Admiral Cameron McRae Winslow's plea for preparedness at dedication of United States Fisheries building.

May 27, 1916, San Diego Union, 1:5. San Diego marine base practically assured by House; \$250,000 voted for site near Dutch Flats.

May 27, 1916, San Diego Union, 5:1. Pied Piper to emerge today from Cabrillo canyon; eleven o'clock will be fateful hour when piper will lure children across bridge

May 27, 1916, San Diego Union, 5:2. Bike riders anxious to enter Fair races Tuesday afternoon.

May 27, 1916, San Diego Union, 5:3. Many entries received for bicycle contests at Exposition on Memorial Day, Tuesday.

May 27, 1916, San Diego Union, 5:3. Fair to entertain credit men today; Los Angeles visitors to have big dinner at Cristobal this evening.

May 27, 1916, San Diego Union, 5:3. Thousands visit art collection in Fine Arts Gallery at Exposition.

May 27, 1916, San Diego Union, 5:4. Ad Club is out for record at Exposition, June 10; committee proposes to give all other occasions stiff race for place.

May 27, 1916, San Diego Union, 5:4. Favorable comment heard on banquet given by Rotary Club Thursday night at Cristobal.

May 28, 1916, Los Angeles Times, 11:2-3. Pied Piper of Hamelin Town Delights Kiddies.

San Diego, May 27 --- Like the children of Hamelin town of long ago, the children of San Diego, thousands and thousands of them, were lured by the music of the Pied Piper across the long Cabrillo bridge into the exposition today.

The beautiful story of the Pied Piper of Hamelin was enacted today at the exposition by the schoolchildren and the Pied Piper, impersonated by Attorney Hubert Collins, while thousands of persons witnessed or entered into the play.

The only difference in the story of the children of Hamelin town and that of the children of San Diego was that instead of forever disappearing, the San Diego youngsters returned to their homes tonight tired, but happy and filled with wonder at the things that the Pied Piper had shown them.

The day opened with the merry-making of the Mayor of Hamelin and his council on the lawn in front of the west gate of the exposition over the riddance of the town from rats. As children were dancing folk dances and their elders joined in, the entertainment was suddenly stopped by the Pied Piper who demanded his money from the Mayor for leading the rats into the river. Charles Jackson as Mayor and other leading citizens as the Council and the piper engaged in some witty dialogue in which San Diego's recent experience with rainmaker Hatfield was referred to.

When the Mayor refused to pay the piper, the musician, announced he would take the children of Hamelin town away with him. He soon appeared in the Cabrillo Canyon playing beautiful music and garbed in the costume as painted by Max Parrish. As he advanced up the canyon and over the Cabrillo bridge, the children followed him, singing, shouting and blowing horns.

The great bridge and the Prado were a seething mass of arms waving in the air, caps of all colors that were thrown by the children in their merriment and bobbing hats and hair bows of the girls. The children followed the piper up the Prado and down the Isthmus where they disappeared into the mountain of the story, which, in this case, was the great mountain at the Panama Canal concession.

Here hobgoblins, strange gnomes and dreadful thunder and lightning storms were encountered by the children, who afterwards emerged safe and sound and went to the aviation field where the Pied Piper conducted a vaudeville show for them.

Children of the Hopi Indians of the Painted Desert gave their famous Katchina dance, clowns performed, boxers gave exhibitions, and the Tommasino Band, and other musicians played and sang as the piper commanded.

In the afternoon, after the children had eaten their lunches in the pepper grove, a program of sports was held. There was a pie-eating contest, a greased pig contest, and other games that delighted the youngsters. Every child was admitted free to the exposition and every attraction on the Isthmus was open to them at half price.

From morning until late tonight the children frolicked and romped, forgetting their elders so completely that many had to be delivered to their homes by the exposition guards when they admitted they were lost.

But all through their merriment not a child was seen to molest the beautiful gardens, flowers and shrubs of the exposition, and each seemed on his or her good behavior.

More than 13,000 children followed the piper into the exposition and spend the day there.

May 28, 1916, San Diego Union, 1:3-7, 6:3-4. Happier San Diego reproduction of "Tragedy of Hamelin" puts ancient tale to shame.

Remoulded to the heart's desire, turned from a deep tragedy to the most joyous and pleasant of comedies, the tragic tale of Hamelin town five hundred years ago was re-enacted, surpassed and outdone in a festival of make-believe in which some 13,000 juvenile actors of San Diego took hilarious part at the Exposition yesterday.

With a Pied Piper, whose garb was most gorgeously pied and whose piping must have been at least the equal of the magical player of old, an army of children, which numbered more than the entire population of Hamelin town and a scenic setting more resplendent than the ancient one a thousand times, the tale of Hamelin town was belittled and put to shame by San Diego's children's greater, happier reproduction of it.

As nearly as could be though, the woeful day of Hamelin as sung by Robert Browning, the immortal, was, with the woe left out, depicted yesterday. A tall, gaunt, strangely-clad musician who had in an imaginary chapter rid the town of Hamelin of a great pest of rats; a grotesque and arrogant City Council which denied him when he claimed his promised dues; and the enormous throng of children which followed the piper away, lured by enchanting strains from his magic pipe --- all were there.

In San Diego the drama had its opening in the flat green park near the western gate of the Exposition. A big jubilee in celebration of the imaginary riddance of the pest of rats began the spectacle. The mayor of Hamelin, smug, and his four councilmen, complacent, sat viewing the jubilee when the Pied Piper appeared.

Out of a deep canyon, supposedly from the river to which he had lured and drowned the great rat herd, the piper came. A pretty dance by fairylike little girls was in progress when his red cap and its jaunty peacock feather arise from a faraway bush.

The dance stopped. On came the piper. The townspeople of Hamelin, in happiness over their delivery from rats, had forgotten the wonderful man who has accomplished it. On he came. The Council and the mayor squirmed in their chairs, conscious of something impending.

With his long red and yellow legs moving in a fascinating, fearsome fashion, his pipe dangling from a silken cord about his neck, his pied cape flapping in the breeze and his crest feather dipping and waving continuously, the towering piper drew to a stop before the awe-struck city corporation and demanded his pay.

"We won't pay you any \$5,000," said the mayor. "We might consider giving you \$10, but \$5,000; no, never." And he laughed and his Council laughed and the populace laughed. The piper shrugged his shoulders.

He who wrote the poem has it thus:

"So, friend, we're not the folks to shrink
From the duty of giving you something for drink
And a matter of money to put in your poke
But, as for the guilders, what we spoke
Of then, as you very well know, was in joke."

So they had it yesterday, with dollars substituted for guilders, but with all else as originally. They offered the Pied Piper \$10 instead of a promised \$5,000, and he refused it. So he threatened them all with the loss of their children, and they jeered him. The mayor spoke to him in this fashion:

"You threaten us follow? Do your worst,
Blow your pipe till you burst!"

From that point on, the poet has it thus:

“Once more he stepped into the street,
And to his lips again
Laid his long pipe of smooth straight cane;
And ere he blew three notes, such sweet
Soft notes, as yet musician’s cunning
ever gave the enraptured air.”

And, as it has been written, it was literally enacted. As the lank piper moved away, the mass of children that covered the great park lawn trooped after him. A swelling, surging, laughing crowd swept to a common center --- the gate that leads to Puente Cabrillo and across it to the Exposition.

“Little hands clapping and little tongues chattering,
Out came the children running,
All the little boys and girls,
With rosy cheeks and flaxen curls,
And sparkling eyes and teeth like pearls,
Tripping and skipping, ran merrily after
The wonderful music with shouting and laughter.”

Across the long, high bridge that spans a deep canyon and crosses a little pond, and under which roads run that seem painted brown upon the green velvet, the tempestuous torrent of little humanity, led by the picturesque figure in red and yellow, flowed. The last were but entering the gate, more than a half a mile behind, when those who closely followed the musician turned off the Prado and toward the Isthmus and the mountain cavern that was to swallow them up.

“When, lo, as they reached the mountain’s side
A wondrous portal opened wide,
As if a cavern was suddenly hollowed;
And the piper advanced and the children followed,
And when all were in to the very last,
The door in the mountain side shut fast.

Part way down the Isthmus, to the mountainous, mad-made duplicate of the Panama canal and its environs, they went. And sure enough, as they came to it, a portal opened wide. From within came a fierce red glare and the whistling of winds and hob-goblins’ eyes shone out of the darkness. But the piper never faltered, nor did one of his thousands of followers. Wide as the portal was, it was small for the vast herds that wanted entrance. It was a long time and an exciting time before they all were through.

And beyond the mountain! That is a point that the original tale has always lacked. A happy land it was where Indian papooses did war dances, Savoy trios sang, legless boxers boxed, a quartet of big men made sweet music, pretty girls and dark-skinned men in the strange costume of Spain danced and sang and played stringed instruments.

Beyond the mountain! Few adults there. Some got in, some way, but they were obedient and were seen and not heard, which is as it should be. Greased pigs in a pen, for catching, and a dollar for the catcher! Back another way to the long Isthmus with its wonderful sights. A race where you carried a spoon in your mouth and an egg on the spoon, and most likely dropped the egg and smashed it to smithereens, but spending money for the winner and plenty of places to spend it. And a peanut race where you roll peanuts down the

pavement or carry them on treacherously unsteady knife blades, and always spending money for the winners, and a million places calling to you to come in and see the marvelous, the terrible, the beautiful, or to ride around and around and around!

Beyond the mountain! The Pied Piper didn't have the only horn. Far from it! There seemed to be wagon loads of horns, and they gave them away. Most everybody got one. They were red, white and blue and made the loudest noise you ever heard. When you blew them at the monkeys, they would grab the sides of their cages and shake and scream as though they were trying to sing. The baby burro didn't mind the noise and the coyotes were afraid of it. And when you get up in the Ferris wheel, you can see all over. They had half price or even less for children all up and down the Isthmus and lots of free things they don't have every day.

The "beyond the mountain" part of the day, which was really supposed to have taken place on the inside of the fairy mountain, was the longest and best part of the day. It lasted until night when the Exposition men had a picture show --- free --- at the upper end of the Isthmus, and showed the piper's parade across Puente Cabrillo and into the mountain. They must have made them in a hurry, but they were very good.

Oh, and the Pied Piper was Mr. H. A. Collins, who is a city trustee in Coronado. He got tired after awhile and took off his piper's suit, but came back on the Isthmus again, and a lot of the children knew him anyhow. The mayor of Hamelin was Mr. C. W. Jackson and the councilmen were Frank A. Frye, Will S. Hill, Stuart Kendall, W. F. Carpenter, and John Gillons, dressed up.

The Exposition people estimate that there were close to 13,000 children who followed the piper across the bridge and through the mountain. They couldn't really count them, and maybe there were more than that. The people in all the buildings and along the Isthmus say they never had a better time in their lives. They like these children's days.

When lunch time came, the Pepper Grove was the popular place. To get there you had to go down long winding paths between flower beds and under shady trees. There were swings and slides and pretty-colored funny birds there, and the nicest greenest grass to eat your lunch on. A lot of kids were tired and went to sleep on the grass, but were awake again when things started on the Isthmus in the afternoon.

Quite a few of the smaller children got lost in the crowd, and a few of them cried. At the headquarters of the Balboa guards they listed 20 or more. None of them was lost for very long though, for their people came right away to hunt for them. Nobody was hurt during the whole day. Police Sergeant Ed Forbes, who is in charge of the Exposition guard, says that that is a wonderful record for such a big crowd of children.

Some of the real little ones were afraid of the Pied Piper at first, but after he smiled awhile and talked to them, they were crazy about him and would have followed him anywhere.

Those singing numbers and dances on the tractor field on the other side of the mountain were arranged by Scott Palmer of the Savory Theater and Harry Hayward of the Spreckels Theater. And Carl Ferris, who is a park commissioner and who had charge of the events of the day, "worked his head off," one of the Exposition men said.

The dancing on the grass before the piper came was done by 32 girls from the Jefferson school. They had been practicing it for a long time, instructed by Miss Norma Pierce and Theodore Treutlein, who is supervisor of physical education in all the schools.

It will be a long time everybody says, before there will be anything in San Diego or anywhere to equal the day of the Pied Piper at the Exposition.

May 28, 1916, San Diego Union, 7:3. Foreign Arts week inaugurated at Exposition today; \$900 worth of gifts to be distributed.

May 29, 1916, San Diego Sun, 1:3. Exposition heads open war on race track gambling in San Diego; request Council to pass ordinance making race-track betting in city unlawful.

May 29, 1916, San Diego Union, 5:1. Pied Piper day attendance joy to directorate; more than 20,000 passed gates; Exposition's second biggest day.

May 29, 1916, San Diego Union, 5:4. Invalid morning at Exposition today.

May 29, 1916, San Diego Union, 12:2-3. Indians at Painted Village have time of lives at Coronado, by B. P.

May 30, 1916, San Diego Sun, 3:8. L. J. Wilder, San Diego banker, says 1916 Exposition is not sufficiently advertised in the East.

May 30, 1916, San Diego Sun, 7:2. Festival of Music will be offered; hundreds of schoolchildren to be heard at Organ Saturday; boys' chorus of 250 voices; mixed chorus of 300 voices; 20 young ladies from National City High School to be a bird-whistling chorus.

May 30, 1916, San Diego Union, II, 1:3. L. J. Wilde says Fair and city are not well advertised.

May 31, 1916, San Diego Sun, 6:1. Ad Club to stage Exposition doings on June 10.

May 31, 1916, San Diego Sun, 12:4. Music of Ernest L. Owen trio of piano, violin and cello to be offered every afternoon in Foreign Arts building during Foreign Arts week. The \$900 worth of gifts which are being displayed daily in various sections of the building were inspected by thousands of persons at the inauguration of Foreign Arts week, Sunday afternoon. The gifts will be awarded next Saturday afternoon in the Foreign Arts building; list of exhibitors contributing gifts.

May 31, 1916, San Diego Union, 2:1. Greek pageant at Exposition, June 16 and 17.

May 31, 1916, San Diego Union, 8:1. Ad Club, Imperial Valley, Alameda County, and Los Angeles Times days, June 10.

May 31, 1916, San Diego Union, 8:3. "Roulette Dance Nights" will be introduced at Cristobal Café; a number of special gifts will be given to visitors in a novel manner; Café is now under management of George A. Cheney, formerly of Hotel del Coronado.

May 31, 1916, San Diego Union, 8:4. Potpourri charms visitors to Exposition; more than 10,000 visitors to the Fair last year carried away some of the potpourri..

May 31, 1916, San Diego Union, 8:5. Nona Malli, mezzo-soprano known in private life as Mrs. Kenneth Croft, delights audience with recital at Organ, by Main 3 K.

[She] has a voice of charming quality, particularly in the lower and middle registers, which she knows how to use. The full round tones carried perfectly despite the handicap of being sung in the open air, and the more serious disadvantage of having persons in the outskirts of the audience keep up a constant chatter while the music was in progress.

May 31, 1916, San Diego Union. 10:3. Everett Lloyd won two bicycle events at the Alameda-Isthmus race course yesterday afternoon.

June 1, 1916, San Diego Union, 5:1. Musical program to be given by schoolchildren; grammar grade pupils will illustrate class room work at Exposition.

Ensemble singing by more than 500 grammar school pupils of songs which are illustrative of the class room work in music in the public schools will be one of the many features of the Children's Day program Saturday afternoon at the Exposition. All children will be admitted to the Exposition free Saturday and another day of pleasure is assured the children who attend.

The musical program at the organ pavilion at 2:30 p.m. will be participated in by Chesley Mills' Juvenile Orchestra, the girls' bird whistling chorus of National City high school, Wesley Peterson, 11-year old pianist, Julia Gardner, 8-year old violinist, Dorothea Hull, 11-year old cornetist, and Helen Morgan, 13-year old dancer.

June 1, 1916, San Diego Union, 5:2. Louis Hels, talented French artist, sketched President G. A. Davidson, Secretary H. J. Penfold, and Director of Publicity Guy R. Kingsley the other day (sketches).

June 1, 1916, San Diego Union, 5:3. The civic bureau of the Chamber of Commerce at its regular meeting indorsed the attitude of the Exposition directors in their expression of disapproval of the racing and attendant gambling at Tijuana.

June 1, 1916, San Diego Union, 5:3-4. Take off your hat Mr. Ad Man to be slogan at Fair, June 10; prizes offered visitors who identify mysterious man; also for best displays in parade and costume ball; Imperial Valley, Alameda County to celebrate; there will be six mysterious men on the grounds who will have emblems on their hats; each finder will be given a dollar bill except for the finder of the Ad Man with an emblem on hat redeemable for \$20 in gold; a pushball contest will be held on the Plaza de Panama with marines and sailors as competitors; children's contests will be held on Isthmus.

June 1, 1916, San Diego Union, 5:4. A new song "From the Quaker City up to Bunker Hill has been dedicated to the Panama-California International Exposition by Cassius M. Loomis of San Diego.

June 1, 1916, San Diego Union, 5:5. Large crowds are being attracted daily to the Foreign Arts Building to view the hundreds of gifts, valued at \$900, which are to be awarded Saturday afternoon at 3:30. These gifts are on display in the various exhibit sections and are labeled so that visitors can see the articles that are to be distributed.

Among the gifts that are attracting attention are the head of "Mignon," constructed of three-color marble and valued by the Italian commissioner at \$100; the embroidered table cloth in the Italian section valued at \$66; the silk matinee suit in the German section valued at \$20 and vases in the Japanese section.

The daily recitals by Ernest L. Owen's trio of violin, piano and cello are proving exceedingly popular as a part of the entertainment which is being given each day of Foreign Arts Week.

June 1, 1916, San Diego Union, 5:7. "Roulette" new dance will be given at the Cristobal Café tonight; numbers being painted in circles on the dance floor; a special orchestra will supply music and valuable souvenirs will be given.

June 2, 1916, San Diego Sun, 1:4. Fifteen gold nuggets worth \$2,000 taken from ore case in New Mexico building yesterday afternoon.

June 2, 1916, San Diego Union, 2:2. Elizabeth, Exposition's littlest woman, arrived at twenty-third milepost; celebration held; giant birthday cake, messages, gifts gladden tiny girl.

June 2, 1916, San Diego Union, 5:1. Charlie Chaplin and his goat coming to Fair.

June 2, 1916, San Diego Union, 5:1. Imperial Valley prepares for day at Fair; spirited contests are waged in Imperial County for Queen of the Exposition.

The program includes receptions and entertainments in honor of the Queen of Imperial Valley and her princesses, a cantaloupe feast at the Southern California Counties Building, lectures at the building on the Valley's resources, and a ball in the evening for Imperial Valley people.

Many car owners who desire to make the trip are awaiting work of repair work on the San Diego County end of the highway so that the run may be made smoothly.

June 2, 1916, San Diego Union, 5:1. Dr. Hector Aliot, director of the Southwest Museum of Los Angeles, makes Fair tour; studies Exposition from education standpoint; pleased with trip.

June 2, 1916, San Diego Union, 5:1. J. A. Marshall and J. F. Gallagher, Alameda County representative at the San Diego Exposition, want glare of limelight on Alameda County Day, June 10; pretty girls in costume will distribute Alameda county cherries and other products of county; reception and dance in evening.

June 2, 1916, San Diego Union, 5:2-3. Miss Helen Morgan, toe dancer, will be seen at the Organ Pavilion in connection with the Children's Music Festival tomorrow afternoon (photo).

June 2, 1916, San Diego Union, 5:2-3. Children will give music program at Fair tomorrow; two big choruses, one with 300 voices will be heard at Organ Pavilion; Children's orchestra and young soloists to aid festival; National City girls to whistle.

Though maintaining a high musical standard, the program is composed of the popular home songs, plantation melodies, standard instrumental selections, semi-classics, and the classical selections which appeal to all musical tastes.

June 2, 1916, San Diego Union, 5:7. "Burlesque Derby" feature on Isthmus tomorrow night; the track will be full length; the "ponies" will be of several kinds that will appear in the over-night entries; the betting ring will be reproduced in all its glory.

June 2, 1916, San Diego Union, 5:7. Announcement by the Exposition that annual tickets would be placed on sale June 1, for thirty days, was received with popular favor yesterday, the first day of the sale.

June 3, 1916, San Diego Sun, 3:1. Fourth Regiment of U.S. Marines, Colonel J. H. Pendleton, commanding, to leave today on special Santa Fe train for New Orleans where they will sail for Port au Prince, Santo Domingo, to put down Art's revolution against the government.

Orders for the Fourth Regiment came unexpectedly yesterday. Tents were promptly struck and the work of packing baggage and equipment was continued from an early hour today.

June 3, 1916, San Diego Sun, 3:3. Children's program pleases thousands; for near two hours Saturday schoolboys and girls entertained one of the largest crowds that has ever assembled at the Organ Pavilion with singing, dancing, orchestral music, and special numbers by choruses and individuals.

June 3, 1916, San Diego Sun, 9:3. Charles Rann Kennedy's great drama, "The Servant in the House," will be presented at the Organ Pavilion next Thursday at 8 p.m. by Tyrone Power and an excellent supporting company.

June 3, 1916, San Diego Union, 5:1. Charlie Chaplin coming to Fair; also his goat; Flicker comedy cut-up to pass day with children; Woman's Board plans to increase membership of the auxiliary board to stimulate interest in the Exposition and gain the support of women in whose power it is to send many talented artists here for entertainments to be held on the Exposition grounds.

June 3, 1916, San Diego Union, 5:1. Mixed program for Southern Counties Building this afternoon.

June 3, 1916, San Diego Union, 5:1. Dutch exhibit is highly praised.

June 3, 1916, San Diego Union, 5:3-4. Best stables represented in Fair's Burlesque Derby.

June 3, 1916, San Diego Union, 5:5. Schoolchildren will entertain at Fair today; chorus numbering more than 500, with soloists, will render extended program.

June 3, 1916, San Diego Union, 5:5. Lecture on "Moral Hygiene --- Race Betterment --- Life's Vital Question" by Mrs. Sara Walrath Lyons tomorrow in New Mexico Building.

June 3, 1916, San Diego Union, 5:6. Montessori method to be shown at Fair; work begins on outdoor plant under eucalyptus trees for demonstrations during the summer months near Pepper Grove.

June 3, 1916, San Diego Union, 5:6. This afternoon at 2:30 o'clock the \$900 worth of gifts donated by exhibitors will be awarded in the Foreign Arts Building.

June 4, 1916, San Diego Union, 6:2-5. Children's music magnet for throng; five hundred take part in program at Organ Pavilion; record crowd greets the efforts of pupils of city and county schools; program consists of choruses by hundreds of children, orchestral music, whistling, instrumental music and dancing by individuals.

June 4, 1916, San Diego Union, 6:3-4. Interesting program at Exposition today; popular Sunday 75-cent supper to be served at Cristobal with music and entertainment; all exhibit buildings will be open; Royal Italian Band to play; baseball game also.

June 5, 1916, San Diego Evening Tribune, 2:4-5. The "Servant in the House," English play, to be seen at Exposition.

June 5, 1916, San Diego Sun, 3:1. Marines bound for Haiti; Exposition camp is deserted, but boys will return.

June 5, 1916, San Diego Sun, 3:4. Children's program pleases thousands.

June 5, 1916, San Diego Sun, 9:4. Tyrone Power will present great play at Organ Pavilion; an ignorant, wronged and embittered man is so regenerated he leads his brother, a vicar of the church, to a realization of his duties as a servant of God and a brother of man

June 5, 1916, San Diego Union, 1:1, 2:3. Rush local marines to Haiti; telegram from Washington hurries Fourth Regiment to West Indies; will entrain this evening; Colonel Pendleton says men will return here when their services on the island are over.

June 5, 1916, San Diego Union, 5:1. San Diego Ad Club to set Isthmus aglow; grand parade will be feature of fete Saturday night; prizes offered.

June 5, 1916, San Diego Union, 5:2. "Servant in the House" at Organ Pavilion Thursday; Tyrone Power to have "drainman" role; gifted players in company.

June 5, 1916, San Diego Union, 5:2. James B. Whittemore, amusement promoter, employed on Isthmus.

June 5, 1916, San Diego Union, 5:5. Amateurs will act at Isthmus tonight; cash prizes to be offered to performers; contest open to vocalists, monologists.

June 5, 1916, San Diego Union, 12:3. Former rule by which automobiles were required to leave the grounds abolished; Automobile and Invalid Day at Fair to last until midnight.

"Automobile and Invalid Day" will be inaugurated at the Exposition today to supplant "Automobile and Invalid Morning," which has been offered in the past. By this action the 1 o'clock rule, by which

automobiles were required to leave the grounds, is abolished and automobiles may enter the grounds from 8 p.m. until midnight and enjoy the same privileges for the entire day which pertained to "Automobile Morning." The same fee of 25 cents for the car and the regular admission price for each occupant will be charged.

This change of policy, which comes at the request of hundreds of motorists who have expressed a desire for more opportunity to view the grounds and exhibits by automobile, is expected to be welcomed by Automobilists generally.

At 10:30 o'clock there will be singing and dancing entertainments on the Calle Cristobal by the Spanish troupe. Lectures will be given in the Southern California Counties building at 10:50 and 11:15 o'clock, and in the New Mexico State building at 11 o'clock. There will be motion pictures in the Kern-Tulare building at 11 o'clock, the making up of the daily weather map in the United States Agricultural building at 11 o'clock, a submarine mine demonstration at 11 and a mine rescue and first aid demonstration in the United States Government building at 11:10.

Tommasino's Royal Italian band will give a concert in the Plaza de Panama from 1:15 to 2:15 o'clock. Dr. Humphrey J. Stewart will give an organ recital at 2:30 o'clock, the Spanish dancers and singers will entertain at the United States Fisheries building at 2 o'clock, and a reception and tea will take place in the blue room of the Southern California Counties building from 3 until 5 o'clock. Tommasino's band will play again at 4 o'clock.

There will be offered during the afternoon a number of practical demonstrations in the United States Government building and several interesting and instructive lectures in the Kern-Tulare building, the Southern California Counties building, and the New Mexico State building.

The evening program consists of a band concert from 7:30 o'clock until 10, with three-quarters of an hour intermission for viewing the Isthmus attractions and "Amateur Night" on the Isthmus open stage at 8:30 o'clock.

June 6, 1916, San Diego Evening Tribune, 12:5. Great drama to be produced at Exposition; Tyrone Power and company of artists to appear in "The Servant in the House" at the Organ Pavilion.

June 7, 1916, San Diego Evening Tribune, 2:2-4. Company of stars to appear in dramatic triumph at Exposition.

June 7, 1916, San Diego Sun, 6:3-4. Tyrone Power appears at Exposition tomorrow night.

June 7, 1916, San Diego Sun, 7:7-8. Advertisement: "The Servant in the House," 8 o'clock, Thursday night, all seats 50 cents.

June 7, 1916, San Diego Sun, 7:1-2. Awful menace of Tijuana's dives and track related at city hall conference; Mayor Capps, Julius Wangerheim, George W. Marston, Colonel Fred Jewel, Reverend R. D. Hollington and others deplore conditions.

Carl Ferris, exposition director, said: "It is not wickedness, but spirits and life that attracts our people to such things." As a counter-attraction Ferris suggested cafes and cabarets in San Diego be allowed to stay open until 2 a.m.

June 7, 1916, San Diego Sun, 9:4-5. Foresters Day set for July 1: Southern California Independent Order of Foresters will initiate candidates in evening on Exposition grounds; parade, fancy drills, concert by Tommasino's band in afternoon.

June 8, 1916, San Diego Evening Tribune, 2:1. Greek fantasy to be given at Fair; beautiful theme woven into plot of "Admetus" which will be produced at Organ Pavilion June 16.

June 8, 1916, San Diego Evening Tribune, 2:2. Many visitors are expected for Alameda Day, Saturday.

June 8, 1916, San Diego Evening Tribune, 2:2. George Burnham is confident that the bills for a marine base here and for government dredging of the municipal pier channel will be passed.

June 8, 1916, San Diego Evening Tribune, 2:3. Mrs. Lillie Stibolt Hanssen, soprano, to be heard tomorrow night in classic night concert with Tommasino's Royal Italian Band.

June 8, 1916, San Diego Evening Tribune, 2:3. Chamber of Commerce will handle big special; agrees to take charge of booster excursion to Pasadena June 24 to capture annual Ohio picnic.

June 8, 1916, San Diego Evening Tribune, 3:3. "Servant in the House" to be given at Organ Pavilion tonight.

June 8, 1916, San Diego Sun, 6:3. Special coming events:

June 9. Ad Club Day, Imperial Valley Day, Los Angeles Excursion Day, and picnics of Maine, New Hampshire and Vermont State Societies.

June 13. Escondido Day

June 14. Elks' Tag Day.

June 15. Laundryman's Association Convention Day, bringing 2,000 visitors.

June 16 and 17. Production of "Admetus" by Normal School

June 17. Bunker Hill Day and California Druggists' Day.

June 18. California Motorcycle Day.

June 24. Swedish Day and Knights Templar' Day.

June 25. German Day, Swedish Day, and Knight Templar' Day.

June 28. Federation of State Societies Day.

June 8, 1916, San Diego Sun, 5:1 "The Servant in the House" to be given at Organ Pavilion tonight; a distraught, defiant wretch is made to see the sweetness, the righteousness and the nobility that is in life.

June 8, 1916, San Diego Union, 6:2-3. Stage is ready for play at Organ Pavilion this evening.

June 8, 1916, San Diego Union, II, 9:1. Entire Pacific Coast urged to back advertising plan; \$150,000 fund proposed to boost Exposition in the East.

June 9, 1916, San Diego Sun, 11:4. Fine production is given at Exposition. In the last act the obnoxious drainman makes his dramatic entrance direct from the defective drain which undermines the church.

June 9, 1916, San Diego Union, 5:4. Strong play is well presented by Tyrone Power, by Main 3-K.

June 9, 1916, San Diego Union, 8:4-5. Three-barreled entertainment at Exposition tomorrow: Ad Club, Imperial Valley and Alameda County to hold forth at same time.

June 10, 1916, San Diego Evening Tribune, 2:2-3. Nona Malli to render Puccini selections in the Hawaiian Village on the Isthmus tomorrow night; she will be accompanied by Dr. H. J. Stewart and assisted by Master Freddie Olson, an accomplished boy violinist of this city.

June 10, 1916, San Diego Evening Tribune, 2:4. The paintings of Hendrikus Alexander Van Ingen, notably "Head of a Cow," in the Netherlands' art collection at the Exposition, are the subject of much study and admiration by art lovers.

June 10, 1916, San Diego Sun, 1:7-8. San Diego Ad Club, Imperial Valley boosters cheered as fine parade winds through city.

June 10, 1916, San Diego Sun, 3:2-3. Nona Mali, star of "Gypsy Love" fame, will sing at Hawaiian Village Sunday; Dr. H. J. Stewart will accompany her on piano.

June 10, 1916, San Diego Sun, 11:7-8. State convention of Music Teachers' Association to be held here July 5-8; Thursday will be Music Teachers' Day at Exposition; People's Chorus to give concert at Organ Pavilion, Sunday, June 18.

June 10, 1916, San Diego Sun, 12:2-3. Pan-Hellenic banquet, June 22, when members of Greek letter fraternities and their guests will dine in the evening at the Cristobal Café.

June 10, 1916, San Diego Union, II, 1:1-2. Imperial Valley caravan in; Ad Club ready for parade; Alameda County program ready.

June 11, 1916, San Diego Union, 6:1. Season tickets at low rates to be sold at Fair; directors believe reduced price will result in larger crowds.

June 11, 1916, San Diego Union, 6:4. Mrs. Davidson, as camera woman, joins motion picture colony for a moment during the taking of moving pictures at Universal City near Los Angeles.

June 11, 1916, San Diego Union, 6:5. Pageantry rules in Greek play; "Admetus: A Thessalian Fantasy" will be participated in by Normal pupils.

June 11, 1916, San Diego Union, 8:2, 9:2. Multitude revels in three celebrations; Imperial Valley, Ad Club and Alameda County fill day with events.

June 12, 1916, San Diego Sun, 7:3. Majority of Exposition's guests are visitors; strangers contribute 85 percent of cash admissions; members of Elks Lodge to build Liberty Bell with flowers for Flag Day exercises at Organ Pavilion, Wednesday evening, June 14; more than 12,000 persons visited Exposition Saturday; combined Ad Club-Imperial Valley-Alameda County Day was one of the most successful celebrations yet held at Fair.

June 12, 1916, San Diego Union, 7:5. Exposition lures 12,000 persons in single day; Saturday proves big drawing card; winners in Isthmus parade announced.

June 13, 1916, San Diego Sun, 7:1-2. Preparations being rushed to safeguard San Diego Exposition against attack:

A military map of the Exposition grounds is in the hands of the proper authorities. The possible use of some of the buildings as citadels of defense is being looked into. The troops will be on hand for the defense of the Exposition. This is assured today.

The attack will be made July 4. This will be in the midst of a sham battle by Uncle Sam's regulars stationed in and near San Diego.

"Liberty Queen" is to be selected for July 4 celebration; festivities to last four days, July 1 through July 4; preparedness parade on July 4.

June 13, 1916, San Diego Sun, 7:2-3. Blaming San Diego citizens in general and the city and Exposition officials in particular for the evils of the Tijuana race track, editor E. T. Earl, millionaire publisher of **The Los Angeles Express** and **Tribune**, has opened a campaign of vilification and abuse of this city in his newspapers. He has refused to pay his pledged subscription of \$5,000 toward the Exposition on this flimsy excuse. Among his charges is that the local newspapers have slighted the Exposition in their columns; G. A. Davidson denies charges, cites attendance records: Dedication Day, March 18, 45,000 against 30,000 for the biggest day in 1915; other figures given.

June 13, 1916, San Diego Sun, 7:3-4. Marguerite Buckler will sing at Elks' Flag Day ceremony at Exposition tomorrow night; recital by Dr. H. J. Stewart, parade of colors.

This is the first time the Flag Day ceremony has been given outside the Elks' lodge room.

June 13, 1916, San Diego Union, 1:2-3. Bunker Hill Day, Saturday, June 17; Mrs. Frank K. Gray to be "Goddess of Liberty."

June 13, 1916, San Diego Union, 5:2. Elks celebrated Flag Day at Exposition.

June 13, 1916, San Diego Union, 5:3. Miss Marguerite Buckler, grand opera singer, to aid Flag Day show tomorrow.

June 13, 1916, San Diego Union, 6:1. Russian skaters gave exhibition at Exposition.

June 14, 1916, San Diego Sun, 12:5. Mrs. Frances K. Gray will be "Goddess of Liberty" in Bunker Hill celebration, June 17.

June 14, 1916, San Diego Union, 5:3-4. Elks will honor the flag at Organ Pavilion tonight.

June 14, 1916, San Diego Union, 16:2-3. Girl athletes to compete at Exposition; Turners planning many events for German Day.

June 15, 1916, Los Angeles Times, II, 10:2. May close the Harem; Appellate Court denies writ sought by amusement man to prevent San Diego District Attorney from closing "Isthmus" show.

June 15, 1916, San Diego Union, 1:3, 8:1-2. Thousands cheer, pay homage to nation's flag.

June 15, 1916, San Diego Union, 7:2. Fair to send message across United States; first auto to start for eastern states on booster trip will leave here Sunday.

June 16, 1916, Minutes of the Board of Park Commissioners.

Deed of conveyance to certain property located in Balboa Park by Panama-California Exposition, dated March 31, 1916, accepted by Board of Park Commissioners.

Board allowed property owners on east side of Balboa Park between Redwood and Upas to open 28th street to a width of 60 feet, with the understanding that said roadway is to be extended to 80 feet at the pleasure of the Board; property owners to pay cost; engineering work to be done by the Engineer of the Park Department; said improvements shall not interfere with any plans of the Park Department for the future improvement of 28th street.

Messrs. Gabrielson and Carl Heilbron appeared before the Board regarding the purchase of animals formerly at Wonderland Park, but now exhibited at the free zone at the Exposition, requesting the Board to make arrangements to purchase said animals; upon being advised that this Board had no funds for the purpose, they asked the Board if they would care for the animals in the City purchased the same and

presented them to the park zoo; upon being informed that the Board would do so, they requested that the Board recommend that the Council purchase these animals and present them to the park zoo; request granted.

Secretary requested to make a request for one full-grown buffalo and one two-year old male buffalo from the San Francisco Park Department.

Superintendent instructed to purchase one pair of white swans and place same in the lagoon in front of the Botanical Building.

June 16, 1916, San Diego Sun, 5:1. Bunker Hill Day will be gala event; parade in afternoon will form inside west entrance and march across Cabrillo Bridge; soldiers from Fort Rosecrans; sailors from U.S.S. Pittsburgh; naval reserves; Civil War veterans; Ladies of Grand Army of the Republic and Daughters of American Revolution; sons of American Revolution; children of public schools; afternoon concert at Organ Pavilion and evening concert at United States Fisheries Building by Tommasino's Royal Italian Band.

June 16, 1916, San Diego Sun, 5:5. Irving E. Outcalt's Greek musical drama and pageant play "Admetus" at Organ Pavilion tonight and tomorrow night at 8; presented by senior class at state Normal School.

June 16, 1916, San Diego Union, 1:3, 8:1-2. Thousands cheer, pay homage to nation's flag; Admiral Fullam in speech at Organ Pavilion voices pleas for preparedness in United States.

June 16, 1916, San Diego Union, 14:1. To give Greek drama at Organ Pavilion two nights; elaborate illuminating effects will enrich play on which much effort was spent.

June 17, 1916, San Diego Sun, 3:1. Canadian and San Diego ice hockey teams tied score at Ice Rink last night.

June 17, 1916, San Diego Sun, 7:3-4. Pathfinder "Lena," the Exposition's official car, will start from Plaza de Panama late this afternoon for Denver, Omaha, Des Moines, Fort Wayne, Chicago, Pittsburgh and Philadelphia along route of Lincoln Highway; twin six will start from Plaza de Panama Monday afternoon on first trans-continental high-gear run; New York City to be destination.

June 17, 1916, San Diego Sun, 8:4. George Wharton James to lecture on California literature in the entrance hall of the San Joaquin Building each Saturday and Sunday beginning June 24 and 25.

June 17, 1916, San Diego Union, 1:6, 4:6. Bunker Hill celebration to be held at Organ Pavilion this afternoon.

June 17, 1916, San Diego Union, 4:3-6. Earl's Los Angeles paper now refers to Davidson as sycophant and liar.

President Davidson himself we find carrying water on both shoulders. He is a quibbler. In one breath he admits that the Exposition appealed to the outside world for \$150,000 in order that it might be perpetuated for another year. In the next breath he tells us that the Exposition is making money, and adds that he has no fears for the success of the Fair. Moreover, this remarkable president would have us believe that the Exposition is not losing admissions as a result of the establishment of the race track at Tijuana.

June 17, 1916, San Diego Union, 6:2-3. Great preparedness parade assured at rousing meeting; expect at least 15,000 in line of march on July 4; marching, not riding, to be order of day for all those able to walk; G. A. Davidson, grand marshal of the day.

June 17, 1916, San Diego Union, 6:4. "Sultan's Harem" is seized on attachment suit.

June 17, 1916, San Diego Union, 6:5. Five thousand motorcycles expected at Fair; chug-chug riders will assemble for special day tomorrow.

June 17, 1916, San Diego Union, II, 9:2-3. In night as perfect as Attica ever produced Eros conspires toward success of "Admetus," by D. D. Whedon.

June 17, 1916, San Diego Union, II, 9:4-5. Ministers denounce race track at Tijuana.

June 18, 1916, San Diego Union, 4:5-6. Davidson refutes Earl's calumnies.

The Panama-California Exposition in San Diego is bigger than Mr. Earl's attack. It is bigger than Mexican vices; it is an institution international in character. Eighteen foreign nations are represented in the exhibits. The Fair is beautiful and it is building for the greater prosperity of all Southern California.

June 18, 1916, San Diego Union, 8:4. Knights Templar to be honored at Fair today; advance program will be given for the 500 lodge men expected in city.

June 18, 1916, San Diego Union, 10:2-4. Official Exposition advertising car starts on tenth transcontinental trip.

June 18, 1916, San Diego Union, II, 8:3. Liberty hailed by thousands at Organ Pavilion; Bunker Hill Day celebrated.

Mrs. Francis K. Grey appeared in the costume of the "Goddess of Liberty" and wore a buckle, half of which had been shed away, which had been worn by General Vogdes in the battle of Bunker Hill

June 19, 1916, San Diego Union, 5:2. Auto Day at the Exposition.

June 19, 1916, San Diego Union, 12:2. Motorcycle Day held at Fair; 150 enthusiasts make run from Los Angeles; events staged.

June 20, 1916, San Diego Union, 13:6. "Ramona" shown in pictures at local theater.

June 21, 1916, San Diego Sun, 1:4-6. Patriotism stirs San Diegans to enlist in preparedness parade on July 4; fifty auto trucks in line of march; one out of every six residents expected to march.

June 21, 1916, San Diego Sun, 4:2-3. "The Architecture and Gardens of the San Diego Exposition," published by Paul Elder & Company of San Francisco.

June 21, 1916, San Diego Sun, 5:6. Salt Lake Building to be official headquarters of Knights Templar, Saturday, June 24; special drills by landing force of United States reserve fleet on Plaza de Panama at 10:30 a.m.; concert by Tommasino's Royal Italian Band at organ at 11 a.m.; welcome by President Davidson in Southern California Counties Building from 3:30 to 4:30 p.m.

June 21, 1916, San Diego Sun, 5:7. Male chorus and mixed choir to sing Swedish national airs at Organ Pavilion at 2 p.m. Saturday following parade through downtown streets in honor of Swedish Day; reception in Southern Counties Building and banquet at Cristobal Café at 7:30 p.m.

June 21, 1916, San Diego Union, 4:5. Clement B. Stern, Milwaukee, Wis., commends plan to advertise Fair.

June 21, 1916, San Diego Union, 4:6. Knights Templar to throng Fair; several thousand visitors expected from Los Angeles Saturday to see Exposition.

June 22, 1916, San Diego Sun, 4:6-7. Mrs. A. G. Spalding offers Sunset Cliffs esplanade to city for public park system; land lies between main boulevard and ocean.

June 22, 1916, San Diego Sun, 12:3. German Day program Sunday morning, June 25, will begin at 8 a.m. on Plaza de Panama with gymnastic dancing, dumbbell exercises and model drills; from 9 until noon there will

be competitive gymnastics and track and field events for men and women on marine parade grounds; formal exercises at 2 p.m. on Plaza de Panama will include raising of German flag; music by massed chorus of 100 voices and addresses by President Davidson and Emil Roedel of Los Angeles.

June 22, 1916, San Diego Union, 14:1. Mrs. Spalding gives esplanade to city for park.

June 23, 1916, San Diego Union, 5:3. Swedish Day to be celebrated at Exposition Saturday.

June 23, 1916, San Diego Union, 7:3-5. "The Architecture and Gardens of the San Diego Exposition" describes architecture of Fair, by B. P.

June 23, 1916, San Diego Union, II, 1:4-5. Knights Templar' Day tomorrow.

June 24, 1916, San Diego Sun, 9:1-2. Swedish people will assemble at Plaza de Panama tomorrow to hold devotional services presided over by Swedish pastors of Los Angeles and San Diego; services to be conducted at Organ Pavilion beginning at 10:30 a.m.

June 24, 1916, San Diego Sun, 9:1-2. Impressive events at Exposition as Knights Templar arrive.

June 24, 1916, San Diego Sun, 12:3. "Jumping" Jack Little, engaged for July 3 and 4, to jump through the air seated behind the wheel of a Maxwell 25 touring car.

June 24, 1916, San Diego Sun, 16:5. The second match of the Exposition's amateur wrestling tournament will be held in the Robinson Animal Show arena on the Isthmus Monday night at 8:30.

June 24, 1916, San Diego Union, 5:1. Knights Templar celebrate today.

June 24, 1916, San Diego Union, 8:7-8. Swedish hosts to capture Exposition today; big program this afternoon and evening.

June 24, 1916, San Diego Union, II, 9:1-2. Sawtelle, California minister retracts libels at Exposition heads; parson accuses Fair officials of boosting Tijuana race track and gambling; after being threatened with suit, he admits he reached "mistaken conclusion"; apologizes..

June 25, 1916, San Diego Union, 6:1. Knights Templar honored at San Diego Fair.

June 25, 1916, San Diego Union, 7:1. Turner Societies best card at Exposition today; athletes of both sexes; exercises on Plaza de Panama this afternoon; in their honor this is German Day at the Exposition..

June 25, 1916, San Diego Union, 10:2-5. Swedes loyal to Stars and Stripes; crowd cheers sentiment.

June 25, 1916, San Diego Union, II, 8:2. Exposition honors Pavlowa who attended a reception and tea given by the Woman's Board of the Exposition.

June 26, 1916, Los Angeles Times, 5:1. Annual sports of Turnverein; German Day at Exposition attracts thousands; men and women take part in athletic games; John Burholter, San Diego Turner, winner of the most points.

June 26, 1916, San Diego Sun, 5:1. An hour of grand opera will be presented at 2:45 tomorrow afternoon at the Organ Pavilion by Signor Italo Picchi, Madame Paola Picchi and H. E. Van Surdam.

June 26, 1916, San Diego Union, 6:6. This is Invalids' Auto Day at Fair.

June 26, 1916, San Diego Union, 8:5-6. Athletic events feature German Day at Fair; more than 1,000 members of Turnverein attend exercises; prizes are awarded.

June 27, 1916, San Diego Union, II, 9:4. Exposition boosted in Yosemite Valley; special commissioner Irwin stages big celebration at Camp Curry.

June 27, 1916, San Diego Union, II, 9:5. G. A. Davidson asks people of San Diego to wear Loyalty and Preparedness badges Tuesday, July 4 at Independence Day celebration of the Exposition grounds.

June 27, 1916, San Diego Union, 8:6. City's newest park on Soledad Hill as yet unnamed.

June 27, 1916, San Diego Union, II, 9:4. Preparedness Day badges on sale today.

June 29, 1916, San Diego Sun, 1:5. Tomorrow is free night for all at the Exposition; it is hoped that the Oregon National Guard will be here by that time and in camp at the Exposition

June 29, 1916, San Diego Sun, 4:6-7. Great celebration to mark Independence Day:

Foresters' Day, July 1 --- parade and fancy drills, initiation ceremony in afternoon, carnival on Isthmus in evening.

Sunday, July 2 --- concerts by San Diego choirs and Tommasino's Royal Italian Band

Monday, July 3 --- "Jumping Jack" Little to hurdle 20 burning barrels; Pathfinder twin-six car starts from Plaza de Panama at 1 p.m. on first high-gear transcontinental run even attempted.

Tuesday, July 4 --- 1,500 marchers to march from Broadway through Exposition gate without charge; 350 schoolchildren on Plaza de Panama present patriotic drills; Ellen Beach Yaw gives concert in afternoon at Organ Pavilion and two at night in front of United States Fisheries Building; D. C. Collier reads "Declaration of Independence and an orator delivers Fourth of July oration; "Jumping Jack" makes two of his leaps in the afternoon and evening; night fireworks.

June 29, 1916, San Diego Union, 1:3-5. Colonel J. H. Pendleton leads Fourth Regiment of Marines against Dominican rebels.

June 29, 1916, San Diego Union, 1:4-5. Gravity of Mexican situation slightly relieved by action; General Carranza heeds demand for liberation of American captives, but question of attitude toward Pershing's troops unsettled preparation for was continues despite apparently favorable turn.

June 29, 1916, San Diego Union, 1:6. Exposition's camp sites offered to Oregon soldiers.

June 29, 1916, San Diego Union, 4:8. Three-day patriotic celebration outlined.

June 30, 1916, San Diego Union, II, 9:1-2. Enthusiasm high for parade July 4.

June 30, 1916, San Diego Union, II, 9:3. Admission is free tonight; concession made so citizens may welcome troops who will camp at Exposition; "classic night" concert by Tommasino's Band.

June 30, 1916, San Diego Union, II, 9:4-5. Fourth of July program liveliest ever planned in San Diego.

July 1, 1916, San Diego Sun, 1:6. Oregon troopers detrain; Troop A of Second Battalion, Third Oregon Cavalry and Infantry go into camp east of Exposition; first section of Oregon National Guard arrived yesterday and went into camp on high ground overlooking Tijuana valley.

July 1, 1916, San Diego Sun, 3:3. Foresters own great Fair today. . . . At 1:30 this afternoon the Foresters marched from Maryland hotel to Exposition; at 2:30 fancy prize drills by crack teams and concert by Tommasino's Royal Italian band; candidates to "ride goat," wrestle, box and be executed by shots from 5-inch brass cannon during initiation ceremonies beginning at 8:30.

July 1, 1916, San Diego Union, 5:1. Foresters will be honored at Exposition today; parade will move from Maryland Hotel to grounds at 1:30 this afternoon; fancy prize drills in afternoon; band concert and public initiation in evening; carnival on Isthmus.

July 1, 1916, San Diego Union, 5:24. Miss Bessie Killeen, San Diego High School girl, Goddess of Liberty; chooses nine schoolmates for her attendants.

July 1, 1916, San Diego Union, II, 9:1-2. Parade totals mounting; plenty of martial music assured for thousands in preparedness line; scores of organizations promise big representation; plans for sections are prepared.

July 1, 1916, San Diego Union, II, 9:3. Girls couldn't get away with gold; Exposition visitors stagger under \$4,000 bar; all a joke perpetrated by commissioners of New Mexico building; it required the strength of both girls to hold the bar and the two were not able to carry it out of the building.

July 1, 1916, San Diego Union, II, 14:1. Absent troopers responsible for throng at Fair; Oregon militiamen guest of honor at Fair; few who arrived rushed to border.

July 1, 1916, San Diego Union, II, 14:4-5. "Jumping Jack" Little is to make a sensational automobile leap Monday night and twice Tuesday at the Exposition; San Diego young woman who will defy death prefers to remain unknown.

July 1, 1916, San Diego Union, II, 14:5. All Saints' Choir will give a program of sacred songs at the Exposition organ pavilion tomorrow.

July 2, 1916, Los Angeles Times, IV, 10:8. Swedes guests of Exposition; bonds of amity drawn closer during celebration; many thousands participate in three-day events; music is prominent feature of the program.

July 2, 1916, San Diego Sun, II. W. A. Clark, former senator, entertained at Fair; not in mood to talk railroad, but says copper is booming in Arizona where he is building the town of Clarkdale.

July 2, 1916, San Diego Union, 9:1. Automobile Day at Exposition tomorrow.

July 2, 1916, San Diego Union, 10:1. Foresters throng Exposition of Fraternal Day; parade, drills, concerts and initiations given to entertain visitors.

July 2, 1916, San Diego Union, 10:6-7. Program of stirring events for celebration at the Fair tomorrow and Tuesday.

July 2, 1916, San Diego Union, 11:3. Ellen Beach Yaw will sing at the Exposition on the afternoon and evening of the Fourth; Mrs. Helen Engel Bosworth will play the violin obligato..

July 2, 1916, San Diego Union, 12:1. Esther Palliser, well-known dramatic soprano, will sing at Exposition this afternoon.

July 2, 1916, San Diego Union, II, 1:3. W. A. Clark, former senator of Montana, entertained at Fair.

July 3, 1916, San Diego Sun, 7:1-2. Exposition ready to entertain thousands with big Independence Day program; 1,600 militiamen from Oregon now encamped on grounds at the First Cavalry and 21st Infantry sites; open-air ball on Plaza de Panama tonight in honor of visiting soldiers; pavement will be soap-stoned; Pathfinder twin-six leaves Plaza de Panama at 12 today; Esther Pallisher, soprano, sings at organ at 4; at 4 p.m. and 10:15 p.m. "Jumping Jack" Little makes his leap covering ____ feet and clearing 22 barrels of flaming oil; at 5:30 p.m. and 10:30 p.m. George Gray gives his wildfire dive on locks of Panama Canal at

Isthmus; July 4 parade from foot of Broadway to Exposition grounds starts at 9:30; formal exercises at Organ Pavilion at 11:30.

July 3, 1916, San Diego Union, 1:5-6. Girls barred from auto leap; Little will make plunge alone.

July 3, 1916, San Diego Union, 9:2. This is Auto Day at Exposition; varied program offered; open-air ball tonight.

July 3, 1916, San Diego Union, 9:4. Mme. Esther Palliser, soprano, sings at Exposition organ this afternoon.

July 3, 1916, San Diego Union, 10:1. Classical dances will be feature of Teachers' Day; leading musicians of California to participate in program.

July 4, 1916, San Diego Sun, 1:8, 5:1-3. 15,000 men, women and children marched for Old Glory and Preparedness today. In the place of the nation's regulars, who have been called to face a serious threat at the border and showing the whole-souled enthusiastic support that the boys in khaki and blue may expect from the folks now at home, was a great, eager, loyal army --- an army made of men and women and children in every walk of life, of every calling and profession, of every religion and creed.

July 4, 1916, San Diego Union, 2:4. Big fireworks display at Exposition will begin at 9 o'clock tonight.

July 4, 1916, San Diego Union, 5:1. Exposition ready for great crowd of patriots today; dynamite blast to announce start of big parade; 350 children will drill.

July 4, 1916, San Diego Union, 5:2. Throng delays Pathfinder's start; thousand cheer as big car leaves Exposition; machine will make no attempt to break record on trip across continent.

July 4, 1916, San Diego Union, 5:3-4. High spots at Exposition today.

July 4, 1916, San Diego Union, 5:7. "Jumping Jack" Little did not leap a 40-foot canyon yesterday; he leaped seven barrels instead.

July 4, 1916, San Diego Union, II, 14:6-7. Ellen Beach Yaw will sing today.

July 4, 1916, San Diego Union, II, 14:8. Exposition crowd nears 15,000 mark; estimated that more than 1,000 automobiles entered grounds during day.

July 5, 1916, San Diego Sun, 1:3. Independence Day was greatest ever; attendance of 45,259 or, by actual count, 32,259; cash receipts up; between 9,000 and 10,000 marchers in parade and between 2,000 and 3,000 automobiles and floats.

July 5, 1916, San Diego Sun, 5:1. Arthur Blakely, who is to give an organ recital at the Exposition at 4 o'clock tomorrow afternoon in the Music Teachers' Day program, is considered Canada's foremost organist; Miss Helen Morgan and six assistants to present a series of interpretive dances in front of the Court of the Leap Year.

July 5, 1916, San Diego Sun, 6:2. Ohio Week at Exposition, July 14-20.

July 5, 1916, San Diego Union, 1:2. Loyal San Diego citizens thrilled by Spirit of '76; preparedness slogan's patriotic appeal stirs enthusiasm in city.

July 5, 1916, San Diego Union, 2:1. July 4 program ends in fireworks; more than 10,000 persons saw celebration pass into history.

July 5, 1916, San Diego Union, 6:5. Big program for Music Teachers' Day at Exposition; first concert will begin at 10 o'clock tomorrow; seven pretty girls to dance.

July 5, 1916, San Diego Union, 7:1. Musicians will convene here today; California Teachers will begin Sixth Avenue gathering; many recitals planned.

July 5, 1916, San Diego Union, 7:3. Drills by pupils entertained crowd at Exposition yesterday afternoon; children went through evolutions without hitch; spectators applaud.

July 5, 1916, San Diego Union, 7:5. Ellen Beach Yaw gave two recitals at Exposition; "California Nightingale" draws crowds; patriotic songs and "Skylark" on program.

July 6, 1916, San Diego Union, 1:3, 5:3. Music teachers open state convention; world-famous artists on program at Fair today; organ recital by Oakland man first on list of attractions.

July 6, 1916, San Diego Union, 4:8. Glimpses of past in San Diego's life: excerpt from **Union** of July 6, 1876.

July 6, 1916, San Diego Union, 5:1. Attendance record at Exposition; Chairman Heilbron estimates that 45,259 persons passed through the gates.

July 6, 1916, San Diego Union, 5:2. Deiro, accordionist, to play at Exposition Sunday.

July 6, 1916, San Diego Union, 5:5. Pacific division of American Association for the Advancement of Science met at Exposition.

July 7, 1916, Los Angeles Times, II, 6:8. "Artist's Model" stirs soldiers.

San Diego, July 6. --- There will be no more Paris after midnight at the exposition, nor Streets of Algeria. Paris after midnight got so "wuff" last night that the place was raided by the police, much to the chagrin of the soldier boys from Oregon who packed the show.

The trouble was brought about because May Hayden, a 22-year old girl, discarded everything but Mother Nature's garb and appeared on the stage. She was greeted with a shower of coins and shouts of approval. The girl was arrested today for vagrancy and stated that she is an artist's model. She was released on \$25 bail.

The Streets of Algeria, which was running in the same place as the former Harem, partook so closely of the characteristics of the preceding show that the District Attorney ordered it closed, and the police took it in hand last night also.

July 7, 1916, San Diego Sun, 7:4. Native Sons and Daughters of the Golden West planning Admission Day celebration, September 9.

July 7, 1916, San Diego Sun, 9:6. Fletcher replies to City Attorney

Accused of being a "knocker" by City Attorney Cosgrove, Colonel Ed Fletcher came back at Cosgrove in a long statement in which he justifies claims made at Washington during El Capitan water controversy.

Fletcher said in part:

"I stated to Secretary Lane that the city of San Diego had approximately a four-year's supply of water on hand in its reservoirs, and read the report of Manager of Operations Lockwood for June 1, 1916, showing on hand at that date 14,252,000,000 gallons of water, which is more than a four year's supply,

including leaking and evaporation, as the entire demands on the San Diego system last year was 3,117,000,000 gallons.

“What I did say was, ‘I am in a position to show that the city of San Diego is absolutely assured of an eight year’s supply of water at the present time; and that no emergency exists.’

“It is my opinion that San Diego has 10,000 less population today than at the commencement of the depression. I will let people be the best judge of that, and I expect San Diego will lose 5,000 more within the next 12 months, after the exposition closes.

“We can have our fairs, our municipal piers, our Tijuana race track and everything possible to draw people to San Diego, but in the last analysis, sooner or later, the people of San Diego will become convinced that until a large scheme of water development of San Diego’s back country is completed, and water put on our suburban lands, San Diego cannot expect to have any permanent prosperity or appreciable growth.”

Colonel Fletcher said he was sorry to see so much publicity given to a matter of comparative unimportance.

July 7, 1916, San Diego Union, 5:2-5. Enthusiasm at music meeting; artists heard in six concerts at Exposition; business this morning at 9 and banquet at Hotel del Coronado tonight.

July 7, 1916, San Diego Union, 6:1. L. J. Wilde’s reason for leaving city is “no reciprocity”; banker says he has been popular when money was sought, but not honored; building deal spoiled; plan for skyscraper broken up, he adds; no singing swan song yet, he says.

July 7, 1916, San Diego Union, II, 14:3. Classic selections by Pietro Deiro, accordionist, feature Fair concert Sunday afternoon.

July 7, 1916, San Diego Union, II, 14:4. Many long distance buttons distributed; Exposition gives bronze emblems to 150 motorists traveling over 500 miles.

July 7, 1916, San Diego Union, II, 14:5. Admission Day celebration at Fair : Native Sons and Daughters plan elaborate program and parade for September 9.

July 7, 1916, San Diego Union, II, 14:5. Thousand see Netherlands’ exhibit; new shipment of war paintings recently received from Holland are proving of unusual interest

July 7, 1916, San Diego Union, II, 14:5. The California division of the United Boys’ Brigade of American will drill on Plaza de Panama tomorrow afternoon..

July 8, 1916, San Diego Sun, 1:6. Oregon National Guardsmen to drill on Plaza de Panama at 3:30 Sunday afternoon; at conclusion of parade and drills, regimental band will give a concert on the Plaza.

July 8, 1916, San Diego Sun, 2:5. Spalding Park overlooking Ocean Beach accepted by city.

July 8, 1916, San Diego Sun, 3:2. “Automobile and Invalid Day” will be offered again Monday; permits automobiles to remain on grounds from 8 a.m. until midnight on payment of 25 cents for the car and the regular admission price for each occupant.

July 8, 1916, San Diego Sun, 3:4. United Boys Brigade Association of America drilled and played music in Plaza de Panama at 3 o’clock this afternoon; cadets numbers 140; have been encamped at Ocean Beach this past week.

July 8, 1916, San Diego Sun, 8:1. W. M. Irwin, director of publicity for the supervisors, returned from a 2,500 mile automobile publicity tour through the Sacramento and San Joaquin valleys in a car decorated with

Exposition streamers; showed moving picture exhibit depicting scenes at Exposition to large audiences in cities he visited.

July 8, 1916, San Diego Sun, 9:1-2. San Diego is second in state in building permits so far in 1916; San Francisco is first.

July 9, 1916, San Diego Union, 11:5-6. Oregon guards to drill at Exposition today.

July 9, 1916, San Diego Union, II, 8:2. Daivo, piano-accordionist, gave recital.

July 10, 1916, San Diego Sun, 1:7. Secretary State of Chamber of Commerce announced today that at the regular weekly luncheon of the Chamber to be held tomorrow at the San Diego Grill, Colonel D. C. Collier would discuss San Diego County road matters.

July 10, 1916, San Diego Sun, 1:7-8, 2:3. To keep the Exposition intact; new plan for permanent structures to replace temporary buildings.

What's going to happen to San Diego's fine exposition next year?

Will it be necessary to close the gates, and let the grounds and buildings go to rack and ruin?

Will it be possible to get the U.S. Government to establish a military or naval academy on the grounds?

Will it be possible to get the State Legislature to locate on the Exposition grounds a department of the state agricultural college?

Will the cost of maintenance of the grounds be in excess of the value of the Dream City to the city?

That's just a few of the questions asked by San Diego citizens.

What's the answers?

It became known for the first time today that numerous San Diegans of prominence, backed by local civic organizations, are working the problem out along the most practical lines.

For one thing, a movement is on foot to have those exposition buildings which are temporary reproduced in exact detail by permanent structures, to serve as memorials to wealthy and public-spirited San Diegans. Carl Heilbron, who saw the preparedness parade through to success and who has been a prominent worker on the exposition board, has taken this proposition up. The idea is to have the names of the reconstructed buildings changed in honor of the men of wealth who pay for the new buildings. It is estimated that many of the structures can be torn down and rebuilt permanently at a cost of from \$100,000 to \$150,000.

It is believed that a number of San Diegans will be bound who will help boost the game along by taking over a building.

The California Building, the Fine Arts building, the Southern California Counties building, the Oregon building, the beautiful Horticultural building, and the ideal ranch house are some of the structures that are already permanent. These will remain for many years as a monument to the exposition builders.

It was said today that a number of the foreign exhibitors will agree to leave in the buildings some of the most attractive exhibits. The permanent buildings will also be used as museums for the preservation of the products of the arts and industries. San Diego, in this way, will be able to preserve and to further build up one of the most magnificent museums in the country.

The cost of the upkeep of the grounds will, according to present plans, be taken over by the city park board. The council will be asked to supply free of charge the water needed to keep the grounds. It was said today that, under these conditions, the upkeep cost will not be excessive. A small admission fee should be charged on special occasions, it was pointed out, and a tidy sum realized from time to time to help defray expenses.

In this way, the beautiful grounds of the exposition would in reality become a part and parcel of the splendid city park system, and would serve as a playground for the men, women and children of this city.

The exposition boosters were also planning today to have the attention of the state legislature called to the fact that the section of the exposition grounds now devoted to agriculture would be ideal for use as a state experimental agricultural station or college.

It is also probable that the exposition grounds will be put to a use first advocated here a number of months ago by W. C. Bobbs, Indiana publisher, who was an enthusiastic exposition visitor here. This would provide for the maintenance of an annual fair of Southern California, for the exhibition of the products and the exploitation of the advantages of the most wonderful section in all creation. This one attraction alone would draw thousands to San Diego annually, and would be of inestimable value to the southern part of California.

Congressman Kettner has also agreed to keep things moving at the nation's capital and to have a U.S. military or naval academy or training school established on the exposition grounds, as soon as such an institution is located in the west. The U.S. army authorities will also be asked to station a guard of marines or regulars on the exposition grounds.

These, and many other plans, are being worked out.

One thing is certain, the San Diego exposition grounds, comparable to the most beautiful gardens of the old world, and one of the most remarkable show places on the globe, are not destined, after 1916, to perish from the face of the earth.

July 10, 1916, San Diego Union, 6:2-3. Oregon militia wins praise by splendid drill at Exposition.

San Diego paid homage to Oregon yesterday on the Exposition grounds. When the Third regiment, Oregon National Guard, under the command of Major T. Bowman, gave a splendid series of drills to the music of its own regimental band. Exposition visitors are accustomed to the parades and drills of the marine corps, the Fourth regiment at that --- and the United States service can offer nothing better --- but those Oregon boys gave Exposition visitors one of the big surprises of their lives yesterday.

Every movement was done with precision. The applause was enthusiastic and broke out many times during the drills. If the National Guard of every state is as efficient as the troops from Oregon, which has the credit of being the first to mobilize, Exposition crowds will be quick to place a stamp of approval on these volunteer defenders.

Following the drills the Oregon band remained on the plaza and played a short concert, which proved its merit and increased the popularity of Oregon. It was, in fact, Oregon Day on the Exposition grounds, although it had not been so designated on the Exposition calendar. President G. A. Davidson was one of the first to compliment Major Bowman and his staff on the excellent showing of the Northerners.

It was a big day at the Exposition. In addition to the regular concerts by Tommasino's band and the organ recital by W. W. Carruth of Oakland, who played an excellent concert in place of Doctor Humphrey J. Stewart, Guido Deiro, piano accordionists, was one of the hits of the day. Deiro gave a half-hour concert of classical numbers, without even a ragtime selection as an encore. So insistent was the crowd the Deiro had one of the hardest afternoons of his career, and when he concluded the warmth of the afternoon and his exertions had given him the appearance of a man who had taken a shower bath fully clothed.

The crowd was one of the best of the year and was estimated at better than 8,000. The exhibit buildings were thronged during the day and the Isthmus had a big play.

Among the Exposition visitors yesterday were Mr. and Mrs. Irving J. Smith of Los Angeles. Mr. Smith is excursion manager of the **Times-Mirror** and predicts big Los Angeles travel for the remainder of the period.

July 11, 1916, San Diego Sun, 3:6. Local people support plan to keep Exposition; favor establishment of State Experiment Station.

Keep the gates of San Diego's exposition open during 1917!

With this as a slogan, a large number of San Diegans were today discussing with interest **The Sun's** exclusive story yesterday on plans for the maintenance of the exposition grounds next year.

Improvement clubs and civic organizations are today planning through the appointment of special exposition committees to cooperate with the exposition board, the city council and with others in this city, with a view to keeping the grounds in trim at the smallest possible expenditure.

State Senator Edgar Luce said today that he is heartily in accord with any effort that will bring to San Diego's exposition a department of the state agricultural college. It is planned to have Senator Luce head the combined campaign of San Diegans at Sacramento for the establishment here of such a agricultural station. Ranchers in Southern California, it became known today, have been "sounded" as to their interest in an annual Southern California products fair at the exposition, and many of them have fallen in enthusiastically with the plan.

"While the permanent buildings at the exposition will always be there," said Carl Heilbron, who is prominent in the movement to keep up the exposition grounds, "it will be a good many years before even the temporary structures crumble away. These, I believe, can be replaced from time to time; and renamed in honor of the loyal citizens who contribute to the work of reconstruction."

It is planned to have the park board assume the expense of maintenance of the exposition grounds while the city council is to be asked to supply water free of charge.

July 11, 1916, San Diego Sun, 6. Writes in defense of Oregon boys.

Editor, Sun: The visiting Oregon militiamen who have been encamping here, arriving not long ago, have naturally tired of the constant camp routine and have sought recreation by visiting the local fair. A few days ago some of the boys were invited by a "California" showman to view a nude California girl for the price of "ten cents." It was in a concession located on the Isthmus, known as "Midnight in Paris." This was indeed a curiosity to some of the boys, as such exhibitions are unknown in their native state. It is only natural that out of any large body of men some will be found who would view such a disgusting exhibition. The interior of this show house is very small, accommodating only about 40 or 50 persons, and after investigation the writer has found from reports that there were only two of the shameless exhibitions viewed by the Oregon boys, and they were not all Oregon boys at that. For this and other reasons, it is respectfully requested that you withdraw your statement about the "howling mob of Oregon militiamen." The boys of Oregon would ask if there has been any record of arrest for drunkenness or disorderly conduct, or any reports of same in this city.

It appears to the visiting troops that such a splendid fair as the local exhibition would offer some recreation other than dances now being conducted on some parts of the grounds, where one must mingle with an element beneath the moral standard of any respectable man. We wish to call your attention to that fact that a heavy percentage of the Oregon boys represent some of Oregon's most prominent men. Should it become necessary for the "howling mob of Oregon militiamen: to shed blood for the protection of the "Native Sons," we sincerely trust that the sacrifice will be received with more spirit than their entrance into

this city. If it becomes necessary for the California militia to visit the state of Oregon, they are assured a warm and hearty welcome.

C. A. Adams

July 11, 1916, San Diego Sun, 7:6. CORRECTION: San Diego leads Los Angeles not in total permits issued, but in percent increase over 1915, according to figures of the California Development Board. Permits issued since the first of the year total \$1,117,305.

July 11, 1916, San Diego Union, 5:6. Attorney James C. Needham chosen chairman of Republican Day at Exposition.

July 11, 1916, San Diego Union, II, 14:4-5. Freddie Olson, boy violinist, will direct Tommasino's band today.

July 12, 1916, San Diego Sun, 6:3. Exposition commercial car endurance contest to be run from Los Angeles to Exposition, Friday and Saturday; Saturday named Commercial Vehicle Transportation Day; program of motor tests and novelty contests on motor demonstration field in afternoon; open-air ball in evening.

July 12, 1916, San Diego Union, 4:2-3. Netherlands' art exhibit to leave in three weeks.

The opportunity for viewing the \$100,000 Netherlands art collection in the Fine Arts gallery at the Exposition will be offered only three more weeks. July 31 has been set as the date of departure for this collection of Dutch masterpieces.

Of all the paintings in the Netherlands collection it is doubtful if any have met with more popular approval than those of Herman Hayenbrock, known throughout Europe as the painter of the great industries. The paintings of this artist of men and machinery, of which "New Building," "Steel Work," "Belgian Colliery," "Factory in Winter," "Extinguishing Coke," and "Belgian Glass Factory" form a part of the Netherlands collection are the result of an intensive study of conditions in the industries and factories of Europe.

Concerning the life and work of Hayenbrock, Miss Florence Larrabee Lattimore, art critic, writes in the "Survey" magazine:

"He wanted to demonstrate what may be called a twentieth-century genre --- not the conventional genre showing the people in their cottages at homely tasks or a work in the fields, but a genre of the changed life, depicting the people as they were in the long days of labor in mines and factories and mills.

"To carry out his dream he needed a better understanding of the people and the best way to gain it was to study them at their tasks. So he picked up his easel and followed them into the great industries. From the Botinage he went into other mining and factory districts of Belgium. Then he sketched in the copper, iron and chemical works of Wales, Newcastle, Middlesborough and Glasgow. He traveled to Germany to visit the giant Krupp works at Essen and those of Horder Verein and then back to Belgium again. At Charleroi and Mariemont he gained vivid insight into the daily life of the children employed in the glass factories."

July 12, 1916, San Diego Union, 5:2-3. Conservatory of Music Day yesterday at Exposition.

July 12, 1916, San Diego Union, II, 10:1. Feminine visitors admire two ocelot kittens at Exposition zoo.

Villas has been captured in Mexico and is in a cell at the Exposition. Along with him is Zapata, who has succumbed to the Americans. They were turned over to the Exposition authorities for exhibition yesterday after they had been taken in a fight fifty miles below Tijuana. They are known technically as

ocelots, although Zoo Keeper Frank Coffman [sic] says they are a cross between a mountain lion and a lynx. The pair are about seven weeks old.

The two cunning little bandits were taken in a fight after the mother had killed a valuable colt belonging to an American resident. Later the three kittens were found and were stunned into submission.

Every feminine visitor to the Exposition zoo at the north end of the Isthmus wants to pet the "cunning little kittens." Yesterday when this privilege was accorded Miss Elvira Kirchhoff, it resulted in Villa stabbing her hand and causing a stream of blood to flow. Villa and Zapata were promptly put into a sack and returned to their cell, where they are providing entertainment for Exposition visitors, along with the lions, leopards, hyenas, bears, and other Exposition animal celebrities.

July 12, 1916, San Diego Union, II, 14:2-5. Wilhelm Reiss collection is attracting many art lovers to German section of Foreign Arts building; portrait of Von Hindenburg at Fair.

The collection of paintings by Wilhelm Reiss, now on display in the German section of the Foreign Arts building, has attracted great attention during the last few days.

Included in the collection is a portrait of von Hindenburg by Karl Berg, which Reiss bought in 1914. This is a striking painting of the great German general and gives a true conception of the giant size of the German hero. While a **Union** photographer was photographing this likeness, a group of German women passed the painting and each, quietly believing herself unobserved, wafted a kiss toward the painting.

"Lobster Hole," a painting of the rocks at Ocean Beach is one of the productions by Reiss, which was painted in May. "The Three Mourners" --- a dog, squaw and horse at the grave of the Indian chief --- was painted in 1894 in Wyoming, and is considered by Reiss one of his best. "The Doll Maker," depicting an Arapaho Indian girl making an Indian doll, was painted in 1912 in Wyoming.

Reiss, in addition to being an artist of great ability, is the editor of the "People's Post," a monthly magazine published in Indianapolis. He has his studio in the exhibit section of the Foreign Arts building and may be found at work there displaying his paintings every day.

July 13, 1916, San Diego Sun, 1:6. Troop A of cavalry at Exposition camp to be moved to a point on the border.

July 13, 1916, San Diego Sun, 4:2-3. James F. Brooks writes letter urging Exposition buildings be used for United States military and for an agricultural college.

July 13, 1916, San Diego Sun, 8:4. Burlesque horse derby on Isthmus Saturday night; famous scenes of Tijuana will be reproduced in minute detail; first event at 8:30 p.m.: a Shetland pony race of three heats --- the length of the Isthmus --- following moonlight dance on Plaza de Panama in honor of employees of Los Angeles stores; paddock being built in arena in front of '49 camp; second race will be for saddle ponies; goats will provide motive power for last even with simians from free zoo doing the encouraging.

July 13, 1916, San Diego Sun, 8:4. Free night after 6 o'clock this evening; Tommasino's Royal Italian band to give concert; dance at Cristobal Café; cabaret shows and movies on Isthmus free stage at 8:30.

July 13, 1916, San Diego Union, 3:6. Free admission at Fair tonight (Thursday); band concerts, entertainment by Spanish singers and dancers.

July 13, 1916, San Diego Union, II, 9:2. Bernice Pasquali, dramatic soprano, to sing at Fair, July 23.

July 13, 1916, San Diego Union, II, 9:5. Children are trained in Pepper Grove kindergarten; out-of-door school held on grounds surrounded with low fence, growing vines.

July 13, 1916, San Diego Union, II, 14:1. Informal opening of Tent City at Mission Beach Saturday.

July 14, 1916, San Diego Union, II, 9:2-3. Ohio Week at Exposition begins today.

July 15, 1916, San Diego Sun, 1:1, 8:3. Community Center at Exposition, Plan.

The ball will be started rolling on Tuesday in the question of keeping the big exposition intact as a perpetual monument to the achievements of San Diego and Southern California.

Ever since **The Sun** opened the subject a week ago local citizens have been busy on the matter.

The Reverend R. D. Hollington has made a thorough and painstaking study of the whole subject. He is anxious to point out to members of the chamber of commerce and friends of the city and the exposition that there are many things in favor of making the exposition grounds and buildings into something permanent that few have thought of. He will tell about them at the Tuesday chamber of commerce luncheon at the San Diego grill.

Doctor Hollington's plan, as indeed it is the plan of thousands of San Diegans, is to make the big place a community center for the culture and education of the Pacific coast.

This "community center" idea also embraces the formation here after the close of the exposition of a nucleus for a "University of the City of San Diego," starting first on a modest scale and gradually working up in a period of years to a really large institution, the center of education and culture on the Pacific coast.

"Oakland paid some \$2,000,000 for her auditorium. Other cities have expended similar amounts for other educational advantages," said Doctor Hollington today. "If we were New York and wanted something like San Diego wants, it would cost us \$20,000,000 to begin from the bottom.

"But here it is different. We have the grounds --- beautiful grounds. And we have buildings on them that will last 20 or 25 years as they now stand, and in which our great undertaking could be started. As it progressed, the present structures could be replaced with new and permanent ones and thus eliminate the expense customary in starting such a big undertaking on a large and flashy scale."

It is expected that the largest and most interested gathering of the year will be present to hear Doctor Hollington. It is a certainty, too, that following the many new, unthought of points he will present, the question will be taken up throughout the city with the enthusiasm that has made possible the original successful "dream city."

July 16, 1916, San Diego Sun, 13:4. Great times at Exposition as many come.

The "Burlesque Derby," which is to be offered on the Exposition Isthmus at 8:30 o'clock tonight, promises to be one of the greatest free amusement attractions every seen on the Joy Street, and is expected to prove the biggest feature of Ohio Day, Commercial Vehicle Transportation Day, and Los Angeles Stores Day, which are being observed today.

The Isthmus presents the scene of a veritable race track and the paddock in front of the '49 camp, the judges' stand near the Isthmus stage, and the "betting ring" at the head of the street provide the evidence to show that nothing has been overlooked to make the scene realistic and complete. Four events will compose the big racing card. The first will be a pony harness race of three heats; the second, a running handicap with ponies; the third, a sprint with donkeys, and the fourth or exposition handicap, a race between goats with monkey jockeys.

At 7:30 o'clock this evening there will be a grand moonlight dance on the Plaza de Panama in honor of the 2,000 employees of Los Angeles stores. The plaza has been attractively decorated, and spotlights have been placed which are expected to add to the beauty of the scene. From 9:15 to 10 o'clock free motion

pictures will be shown on the Isthmus open stage, and at 10 o'clock there will be five dive exhibitions in the locks of the Panama Canal.

More than 20 trucks arrived at the Exposition this noon from Los Angeles on the Panama-California International Exposition commercial car endurance contest. This afternoon the final mechanical tests will be made on the motor demonstration field, and certificates of merit awarded by the Exposition to trucks who made a perfect score on the two-day run from Los Angeles. At the completion of the tests a program of novelty motor events was to take place on the demonstration field.

This afternoon on the Plaza de Panama the Ohio Day program was being held with special music and addresses. The speaker of the day is Judge William A. Spill, the silver-tongued orator of Ohio. From 4 o'clock until 5:30 there was to be a reception in the Woman's Board Headquarters to all Ohio residents and former residents.

Mrs. Pope, who is in charge of the Aged People's Day at the Exposition, Monday, July 17, has obtained the names of more than 100 aged persons who have expressed a desire to visit the Exposition. With this number of persons, many of whom have never had the opportunity to view the beautiful grounds and buildings, eager to make the trip, Mrs. Pope believes that the movement has proved itself a worthy one. Automobiles have not been offered in sufficient numbers to assure everyone of the 100 persons being cared for, and Mrs. Pope, at the Proctor telephone Main 1008 would appreciate the loan of automobiles for Monday morning.

July 15, 1916, San Diego Union, 3:2. Burlesque Derby at Exposition tonight; monkeys, donkeys and goats among speed burners.

July 15, 1916, San Diego Union, 5:1. Exposition art collection is enriched; 35 new paintings added to \$350,000 exhibit of Spanish paintings; gold medal winner added to Spanish exhibit; "The Brown Flower" and "The Key to the Bull Pen" are attracting much attention.

July 15, 1916, San Diego Union, 5:4. Lecture program at New Mexico building; subjects for next week cover scenery, early history and industries of state.

July 15, 1916, San Diego Union, II, 14:3. Mission Beach opened to public today.

July 16, 1916, Los Angeles Times, 11:1. "Egyptian Wiggle" hangs woman jury.

San Diego, July 15. --- Although an entire venire of women was called for the jury for the trial of Miss May Hayden, because it was thought her own sex would be more unbiased than the opposite sex in this particular trial, a hung jury left the case unsettled last night.

Miss Hayden was accused by Police Sergeant Ed Forbes, who arrested her, of dancing perfectly nude at the Paris After Midnight concession on the Isthmus at the exposition and of giving a lewd and dissolute exhibition.

Miss Hayden and her witnesses today denied that she did the "Egyptian wiggle" or "Harem Rotary," as the policeman termed it, and said she merely ran across the stage to make her exit after posing as "Stella" in a picture.

She insisted to the satisfaction to some of the jury that she did wear "something known as a theatrical band" or guard. Walter W. Praul, her attorney, challenged so many of the venire women that a jury of but ten tried the case as no more women were present in Police Judge Puterbaugh's courtroom.

July 16, 1916, San Diego Union, 7:3. Vaudeville actress says Fair fine site for Woman's College.

July 16, 1916, San Diego Union, 9:1-4. New car line runs directly to Mission Beach Tent City.

July 17, 1916, San Diego Union, II, 6:1. Hugh J. Baldwin, former County superintendent of schools proposes State University branch for Exposition grounds.

July 18, 1916, San Diego Union, II, 14:3-4. Willis Polk, noted designer, praises California Building architecture.

Goodhue's chief motif of the design of the Panama-California International Exposition --- the California Building, its tower and dome, and the quadrangle is, without the slightest doubt, the finest architectural expression in the whole world.

July 19, 1916, San Diego Sun, 7:3-4. Madame Bernice de Pasquali to be heard at Exposition, July 23.

July 19, 1916, San Diego Sun, 7:5. Dr. Hollington urges people at Chamber of Commerce luncheon to make Exposition permanent; wants Exposition center to be "the artistic, literary and musical center of Southern California; replace temporary buildings with concrete structures; use buildings as a civic center and as branch of University of California; turn Southern California Counties Building to a permanent auditorium..

July 19, 1916, San Diego Sun, 9:3. Plans for Admission Day.

July 19, 1916, San Diego Sun, 9:3. Kites will fly August 1.

July 19, 1916, San Diego Sun, 12:1-3. Art exhibition week of July 19 to 26.

July 19, 1916, San Diego Sun, 12:5. Exposition program.

July 19, 1916, San Diego Union, 2:4. Head of Indian affairs goes to Capitan Grande; Commissioner Sells refuses to discuss city's plans to obtain reservoir site.

July 19, 1916, San Diego Union, 5:1. Reverend R. D. Hollington, pastor of the First Methodist Church, urges turning the Exposition site into a civic center; municipality gain in rental saving shown; \$250,000 in endowments promised.

July 19, 1916, San Diego Union, 5:2-3. Mme. Pasquali allowed to select two prisoners at San Quentin for pardon; to appear at Organ Sunday.

July 19, 1916, San Diego Union, 5:4. William E. Bowker asks for damages in the sum of \$25,000 for alleged permanent injuries sustained by him while he was an employee of the Exposition through alleged malpractice of the Late Dr. Charles L. Caven, who was in charge of the Exposition emergency hospital..

July 19, 1916, San Diego Union, 5:4. Catholic Days at Exposition, August 12-13; YMI drill team from Los Angeles to be present; big mass planned.

July 19, 1916, San Diego Union, 5:5. Rehearsals are being held daily at Berkeley for the big Ruth St. Denis and Ted Shawn pageant. "The Life and After-Life of Greece, Indian and Egypt."

July 19, 1916, San Diego Union, 5:5-6. Big noise at Isthmus Saturday night.

July 19, 1916, San Diego Union, 5:6. More than 100 aged people view Exposition as guests Mrs. B. M. Pope.

July 19, 1916, San Diego Union, 5:8. Free night set aside at Exposition; dance is feature.

July 19, 1916, San Diego Union, II, 9:3-6. Democrats hold stage center at Exposition yesterday; Senatorial candidate George S. Patton was chief speaker.

July 20, 1916, San Diego Sun, 5:4. Dances featured at Exposition free night.

July 20, 1916, San Diego Sun, 5:6. Cut children's admission charge.

July 20, 1916, San Diego Sun, 8:5. Exposition as place for boxing bouts.

July 20, 1916, San Diego Union, 1:3, 2:6. Noise-making devices to be unleashed on Exposition Saturday night.

July 20, 1916, San Diego Union, 4:3-5. San Diegans rallying to plan to make buildings at Exposition part of a civic center.

July 20, 1916, San Diego Union, 5:2-5. Free kites for boys at Exposition today; lots of fun promised at competition, August 2.

July 21, 1916, San Diego Evening Tribune, 5:3. Dance tonight free to all.

July 21, 1916, San Diego Evening Tribune, 5:5. Dancers coming from Brazil.

July 21, 1916, San Diego Evening Tribune, 6:1. Ruth St. Denis to dance at Exposition.

July 21, 1916, San Diego Evening Tribune, 6:5. Madame Pasquali here for concert.

July 21, 1916, San Diego Sun, 3:1. Grand ball tonight at Exposition; "corn dance" and barbecue will be held in the Painted Desert tomorrow night; 259 paintings by American artists, from the Trask collection, will be displayed in the Fine Arts Gallery for several weeks, beginning August 1..

July 21, 1916, San Diego Union, 4:3-6. Prominent businessmen oppose plan to establish municipal civic center on site after Exposition is over; John Forward, Jr., George W. Marston, C. L. Williams, Carl H. Ferris express opposition..

July 21, 1916, San Diego Union, 8:3. Souvenir ball at Fair tonight; no admission to be charged; arrangements have been made to care for 10,000 visitors.

July 21, 1916, San Diego Union, II, 14:2. Two Negro orators to speak at Exposition; colored residents of Los Angeles and San Diego to celebrate here on Sunday..

July 21, 1916, San Diego Union, II, 14:3. Brazilian dancers to come to Fair in August.

July 22, 1916, San Diego Evening Tribune. Pasquali concert to be feature tomorrow.

July 22, 1916, San Diego Sun, 1:2. Citizens plan permanent Exposition.

July 22, 1916, San Diego Sun, 5:5. Exposition program.

July 22, 1916, San Diego Sun, 5:6. Noise will be kind at Exposition tonight.

July 22, 1916, San Diego Sun, 9:4. Automobile Day at Exposition.

July 22, 1916, San Diego Sun, 12:5-6. Art and Artists at Exposition (week of July 24 to 31), by Beatrice de Lack Krombach: Spanish artists in the furthest corner of the Foreign Arts building.

Our final conclusions reached from viewing this collection is that it is excellent and instructive --- that the artists of Spain prefer figures, as did their forebears; that land and seascapes are not a much loved

subject with them --- and that they should by all means be placed where they may be seen to better advantage.

July 23, 1916, San Diego Union, 9:3. Society women will assist in pageant to be presented at Exposition August 5; Ruth St. Denis and Ted Shawn at head of spectacle depicting wonderful dances.

July 24, 1916. (712.5) Exposition: Letters and Minutes/Committee of Preservation of Exposition Buildings

Minutes of general committee to discuss preservation of present exposition grounds and buildings; reference made to play of Rev. R. D. Hollington as recited in his address before the Chamber of Commerce, July 21, 1916; first official meeting of general committee to be held August 3, 1916.

July 24, 1916, San Diego Evening Tribune, 6:5. Madame Pasquali heard by an estimated 10,000.

Mme. Bernice de Pasquali's concert at the exposition organ pavilion yesterday proved one of the greatest musical events at this famous out-door concert pavilion. An audience estimated at 10,000 persons was held throughout her generous and varied program, and then was loath to leave without further numbers, so entranced they had become with the rippling song of the coloratura soprano, Metropolitan prima donna.

Mme. De Pasquali was accompanied by S. Camillo Engel at the piano, Mrs. Freida Foote Chapman with the violin, and Warren D. Allen at the organ. Tommasino's Italian band also contributed to the program, and in one instance served as accompaniment to Mme. de Pasquali. This was when the band played "Star Spangled Banner" at the close of the program and the singer was heard singing it within the organ pavilion.

A remarkable feature of the concert was that the rare quality of the singer's song was not lost in the wide expanse of the open-air pavilion, her voice carrying to its far reaches with fine clearness.

July 24, 1916, San Diego Union, 5:1. Madame Bernice de Pasquali, prima donna, is heard by 10,000 at Exposition.

July 24, 1916, San Diego Union, 5:2-4. Burro is first prize in kite contest; many other valuable awards offered.

July 24, 1916, San Diego Union, 5:5. Auto Day at Exposition.

July 25, 1916, San Diego Sun, 7:1. A committee consisting of Carl Heilbron, chairman, Julius Wangenheim and Stanley Hale appointed today at meeting of seven delegates from Chamber of Commerce, Cabrillo Commercial Club and others to investigate the phases of maintenance of San Diego's Exposition buildings and grounds after 1916; proposal to incorporate the Exposition as part of the city park system leaving the cost of maintenance to the Park Board, and looking to the city to supply water for the grounds free of charge.

July 25, 1916, San Diego Union, II, 9:4. Plan to preserve Exposition buildings; committees appointed at meeting of civic bodies, will report August 3.

July 26, 1916, San Diego Union, 6:2-3. Mrs. Maud Godelia Magee, contralto, sang at Exposition yesterday during farewell concert of Warren D. Allen, a San Jose organist.

July 26, 1916, San Diego Union, 8:1. Kettners to have Exposition Day if plan carries.

July 26, 1916, San Diego Union, 8:2. One hundred pretty girls to aid dance spectacle.

July 26, 1916, San Diego Union, 8:3. Negroes enjoy day at Exposition; hundreds attend barbecue and hear addresses by members of own race.

The principal event in the evening was the address on "The daring charge of the black regiments at San Juan Hill in 1898," by the Rev. J. Gordon McPherson, nationally known as the "Fighting Parson," and the "Black Billy Sunday."

July 26, 1916, San Diego Union, 8:4. Los Angeles Elks to be honored at Exposition.

July 26, 1916, San Diego Union, II, 10:2-4. Eagle dance to be given on Isthmus; three new lion cubs to join zoo at Exposition; amateur night program offers visitors much amusement.

July 27, 1916, San Diego Evening Tribune, 1:4. Park work hampered by city law.

The good work of the park board bids fair to be disrupted through civil service activity, according to Carl I. Ferris, a member of the park commission. The civil service board has called an examination for general foreman to be held August 24. The park board yesterday asked the council to exempt General Foreman F. A. Bode and nine other employees from civil service rules because of their efficiency. This the council refused.

The park commission requires efficiency and does not question an employee's place of residence or nationality, according to Commissioner Ferris. All employees have for several years resided in or near San Diego, he claims.

Park Commissioner Ferris said this morning he was under the impression that when the council was ready to act the park commissioners would be notified so they could be heard. Instead the board was not represented when the matter was considered by the council yesterday afternoon. Ferris said he would ask that it be reconsidered so the commissioners could state their reasons why the present force should be continued. The request that they be exempted from civil service rules was in writing. Ferris declared the council could do this by ordinance.

In addition to calling an examination for general foreman, Secretary Ernest Davies stated this morning that this would be followed with examination for gardeners and other employees.

According to Park Commissioner Ferris the technicalities by which at least six park employees may be barred from the examination include non-residence and non-citizenship. Three employees live in Normal Heights, just outside the city. This could be overlooked by ordinance, according to Ferris. A half dozen employees have taken out their first naturalization papers and must wait a certain time before they are granted full citizenship.

"The park forces are well organized and it appears to me to be foolish to disrupt all that has been accomplished by the present force," said Commissioner Ferris.

"There is no better man to be found in San Diego or elsewhere for that matter than Foreman Bode. He was in charge of the exposition grounds for Frank P. Allen when the present commission took over the park. Perhaps the only men in the city who might qualify are Otto and Bernard, and I doubt if they would give up their business for \$100 a month salary. It is true that Bode lives in Normal Heights as well as do some of the others. They spend their money in San Diego and Normal Heights should be regarded as a part of San Diego.

"Sam Harvey is an expert powder man. He is a Canadian who has taken out his first papers. He also lives in Normal Heights. We know that he is an expert and the board does not feel like trusting such risky work to someone who might be able to answer questions but not be able to protect the lives of a number of workmen. We know that all the men under us are efficient, for if they were not they would not be kept on the payroll.

“A visit to the park and exposition grounds would satisfy any resident that the park board has in its employ only men who know their business and who do not shirk. The civil service board might send us some man who has successfully passed a technical examination, yet he might not be able to do the work to the satisfaction of the park commissioners.”

In all ten men are involved by the council's ruling. They are F. A. Bode, R. Grah, G. Call, Sam Harvey, C. Battista, G. Sharp, A. Stark, A. Anderson, W. M. Harrah and D. C. Pereler.

Bode has been the general foreman of the park department since February 1, 1915. Prior to that he was foreman of the nursery at the exposition. He is regarded as an expert in floriculture and horticulture.

Grah had charge of the Botanical Building at the exposition. He worked at the exposition from January, 1912 to February 1, when he was transferred to the park.

Sam Harvey has been with the park board three years and is regarded as a fine gardener.

Harrah and Battista have been with the park over three years. The latter is a blacksmith and looks after the repair of park tools.

Sharp has been a gardener in the park for three years.

Stark has been in the park over four years. He is an expert on lawns and has charge of the sprinkling service.

Anderson and Peveler have been worked on the exposition grounds two years and have been with the park since last February.

Gall is an expert tree pruner who has been regarded as one of the best men of the department.

July 28, 1916, Minutes of Board of Park Commissioners:

International Harvester requested privilege of selling and removing Company's building and shed, now situated on Exposition grounds; granted, but buildings not to be removed until after the Exposition.

Request from Exposition for privilege of installing tennis courts on Plaza de Panama denied.

Chamber of Commerce requested camping ground inside Balboa Park; suitable camping grounds now provided by the Exposition for the accommodation of automobile parties; no action on request until after Exposition.

July 29, 1916, San Diego Evening Tribune, 2:8. Signor Giovacchini to give opera recital.

The half our operatic recital to be given at the exposition organ pavilion tomorrow afternoon at 3 o'clock by Signor Michele Giovacchini, dramatic baritone, will mark the appearance of one of the most popular present-day opera singers of the United States.

Of Signor Giovacchini's voice the **Chicago Tribune** recently said: "Mr. Giovacchini's voice is warm and sympathetic. It is well schooled and faultlessly controlled. It accomplishes every dynamic nuance with ease and becomes the servant of an admirable interpretive intention." The **San Francisco Examiner** said: Giovacchini is a genuine artist, worthy of any baritone place in the Metropolitan.

Giovacchini studies seven years in Bologna, under the great maestro and composer, Donzelli, a brilliant pupil of Rossini, and made his debut in Pavia 24 years ago. After spending eight years in Spain, in which country he sang a repertoire of 50 operas, he came to Mexico City with a noted Italian grand opera

company headed by Helen Fons, the greatest genuine Spanish "Carmen." At the outbreak of the revolution the company disbanded and Giovacchini joined the Lombardi opera company in San Francisco.

Signor Giovacchini will be accompanied in tomorrow's recital by Charles R. Stickney on the piano, and will sing among other selections the "Canzone-Barcarola" from "Gioconda: (Ponchielli), Tosti's "Serenade" and the "Credo-Monologue" from "Otello" (G. Verdi).

July 29, 1916, San Diego Evening Tribune, 16:4. Visiting Elks join in big carnival.

July 29, 1916, San Diego Sun, 12:5-6. Art and Artists.

July 29, 1916, San Diego Union, II, 9:2-3. Elks will take charge of Exposition today.

July 29, 1916, San Diego Union, II, 10:1. Signor Michele Giovacchini, baritone, to sing at organ recital tomorrow afternoon.

July 30, 1916, San Diego Union, 1:4, 6:1. Joy reigns supreme at Exposition as Los Angeles Elks celebrate; merriment reaches zenith during races and baseball game.

July 30, 1916, San Diego Union, 5:1. ON THE MARGIN, by Yorick: The romance of a heroic age is written by this architecture.

San Diegans who love their city, who have faith in its destiny, and glory in its inspiring traditions, will welcome two sumptuous volumes issued by the press of Paul Elder and Company of San Francisco descriptive of the salient architectural and garden features of the Panama-California Exposition, Historically San Diego is the genesis of all things Californian; the Panama-California Exposition is a culminating memorial of this history stretching across five generations from Junipero Serra to G. Aubrey Davidson --- a retrospect, a fulfillment and a promise. Or if we would go back to the beginning, we may trace the lineage of the city to the vague vision of Balboa when with eagle eyes he stared at the Pacific; or to the far-flung ambition of Cortez dreaming of empire on these mysterious shores of El Dorado; and we may date the reality coincident with the coming of Juan Rodriguez Cabrillo, more than three centuries before the American flag was raised at the Old Town of San Diego --- more than two centuries before Padre Serra planted the palms that mark the place where he founded the Mission of San Diego de Alcala.

Books That Tell the Story

The books published by the Elder company deal chiefly with the esthetic features of the San Diego Exposition. The volume entitled, "The San Diego Garden Fair," was written by Eugen Neuhaus, assistant professor of decorative design at the University of California, from personal impressions of the architecture, sculpture, horticulture, color scheme, and other esthetic aspects of the Exposition. The later publication, entitled "The Architecture and the Gardens of the San Diego Exposition" is a pictorial survey described by Carleton Monroe Winslow, together with an essay by Clarence S. Stein, with an introduction by Bertram Grosvenor Goodhue, advisory and consulting architect of the Exposition, and illustrated from photographs by Harold A. Taylor. Both works are authoritative, but the last named is explicitly so, and we are informed as to the designers and builders of each structure --- a phase of the great enterprise that has been but vaguely comprehended even in San Diego. We now know, for example, that the permanent buildings of the California Quadrangle, the California State building, and the Fine Arts building, were from the designs of Architect Goodhue; that the noble approach to the Exposition from the west, across the Puente Cabrillo, was designed and constructed by Frank P. Allen, Jr., director of works, who also designed and laid out the pergolas and walks of the Montezuma Gardens; that the Administration building and the Foreign Arts building were designed by Carleton M. Winslow, as was the Serra Memorial at the end of the chapel apse of the Foreign and Domestic building, facing the Botanical Garden; that the landscape gardening is largely the work of John Morley, the superintendent of parks; that nearly all the decorative features were designed and modeled by the Piccirilli brothers, New York sculptors; and that John Olmsted was the consulting landscape architect. Nothing has been omitted except the myriad detail which, after the general effect, engages the

delighted attention of the observer, be he connoisseur, amateur, or uninstructed layman. But what the text cannot depict the Taylor photographs amply supply to the finest minutiae of line and form. Those pictures, of which there are sixty-nine in the volume of Architecture and thirty-two in the book of the Garden Fair, are more than admirable. Each little illustration is a little work of art which will serve as a fond recollection and cherished souvenir for this generation of San Diegans and all who have found their idea of rest and beauty amid the gardens and palaces of this unique Exposition; and when posterity shall look back to this event in the city's history, they will see it as we saw it, but mellowed and interpreted through an artist's vision.

July 30, 1916, San Diego Union, 8:1. Felix Peano, local sculptor, makes improvement upon lost-wax molding process.

July 30, 1916, San Diego Union, II, 1:6. Michele Giovacchini, noted baritone, to give half-hour free recital at the Organ Pavilion today; a reception in his honor will be held at the Woman's Board Headquarters at 4 o'clock.

Signor Giovacchini is a big man, weighing 262 pounds, and possesses a voice of immense volume which is admirably suited to open-air singing and to the renditions of operatic selections which require a dramatic interpretation. Although his voice is one of unusual power, it is smooth and well modulated, warm and sympathetic.

July 31, 1916, San Diego Union, 5:3-4. Hundreds of autoists given Exposition's bronze button.

July 31, 1916, San Diego Union, 5:5. Music was chief Exposition attraction yesterday; half-hour program of operatic music given by Signor Giovacchini in afternoon; many take advantage of last opportunity to view the Netherlands paintings.

July 31, 1916, San Diego Union, 6:5. Automobile Day at Exposition; varied program arranged for motorists and invalids.

July 31, 1916, San Diego Union, 6:6. "Group of Cattle" by Hendrikus Alexander van Ingen, the honor painting of the Netherlands art collection, has passed into the private art collection of Appleton S. Bridges of Point Loma.

August 1, 1916, San Diego Union, 5:2. Fifteen hundred kites expected to fly; Chinatown will send unique designs; children's gala day at Exposition tomorrow to begin at 1 o'clock.

August 1, 1916, San Diego Union, 10:3-5. Russian carved toys at Exposition valued at \$20,000; odd amusement devices in lot.

August 1, 1916, San Diego Union, 10:6. Ted Shawn, who studied for ministry, says his mission is to express religion in dance.

August 2, 1916, San Diego Evening Tribune, 12:1. Kites dot Exposition skyline.

August 2, 1916, San Diego Sun, 3:4-8. Art and Artists, week of August 2 to 9.

August 2, 1916, San Diego Union, 7:1. Fleet of kites to hover over Exposition today; expected greater part of 4,000 contributed will be represented in contest; Chinatown to take part

August 2, 1916, San Diego Union, 7:2. Reunion dinner in Cristobal café Friday night of those who took part in April tour of "Thank You Special."

August 2, 1916, San Diego Union, II, 10:3. Miss Viola Le Clair to christen three baby lions at Exposition tonight.

August 3, 1916, San Diego Evening Tribune, 2:5. Kites dot sky.

August 3, 1916, San Diego Sun, 3:1. Kite Day voted success.

August 3, 1916, San Diego Sun, 3:2. Permanent Exposition plans underway.

August 3, 1916, San Diego Union, 1:3, 5:1. Squadron of kites swarm in sky at the Exposition; boy, 13, wins burro as first prize in contest; design made of postage stamp given palm of victory in race of small fliers..

August 3, 1916, San Diego Union, II, 9:2. Exposition building committee to meet; Lyman J. Gage expected to head organization.

August 4, 1916, Los Angeles Times, 6:4. Act to Preserve the Exposition; Former Secretary Gage heads general committee.

San Diego, August 3. --- The first definite step toward retaining permanently the beautiful grounds of the Panama-California International Exposition in their integrity, with the buildings subservient to the general scheme, were taken today by representative San Diegans.

Lyman S. Gage, former Secretary of the United States Treasury, was elected chairman of the general committee of the organization formed today to preserve the exposition permanently. Earl F. Drake was elected secretary. Mayor Capps and other members of the civic government, representatives of the Chamber of Commerce and other business organizations and musical organizations, the San Diego Historical Society, the Art Guild and many other organizations were represented at the meeting.

A report submitted by Julius Wangenheim, Carl H. Heilbron and Stanley Hale urged the preservation of the gardens as a whole, with the buildings subservient for an auditorium, a hall for grand opera, an art gallery, a museum and similar purposes.

August 4, 1916, San Diego Evening Tribune, 7:3. Dance pageant rehearsals begin.

August 4, 1916, San Diego Sun, 7:1-2. Permanent Exposition plans: Lyman G. Gage chosen general chairman of committee; Earl F. Drake, permanent secretary; special committee composed of Heilbron, Hale and Wangenheim reported: "We believe the integrity of the park should be preserved and that the buildings should be incidental to park treatment, if not necessarily to park purposes. We believe that to this end the street effect should be broken up and that the planted section of the park to the north and south brought within the general scheme, and the road system adapted to park requirements."

August 4, 1916, San Diego Union, 4:3-5. "Les Cohortes," carpet ordered made in Tournay by Napoleon for the palace of Meudon, prize of French exhibit at Fair; four silk Gobelin tapestries also have places of honor in California Building at Exposition.

August 4, 1916, San Diego Union, 5:1. John E. D. Trask, new chief of fine arts exhibit at San Diego, arrives at Exposition; brings with him between 300 and 400 paintings by American contemporary artists.

August 4, 1916, San Diego Union, 7:1. General committee considering future use of Exposition buildings urges study of park problem; report of special committee establishing guidelines unanimously adopted.

August 4, 1916, San Diego Union, 8:4. Heavy calls for tickets to new dance pageant; music especially written for Miss St. Denis will be played by large orchestra.

August 4, 1916, San Diego Union, 8:8. To baby deer have been loaned to the Exposition and have been placed in Pepper Grove.

August 4, 1916, San Diego Union, 14:2. Two special dinners at Cristobal tonight; "Thank You Special" banquet and Society Souvenir dance to be given.

August 5, 1916, San Diego Evening Tribune, 2:7-8. Dancers to give pageant tonight.

August 5, 1916, San Diego Evening Tribune, 8:2. Plan to exempt park employees from examination.

August 5, 1916, San Diego Sun, 3:6-8. Art and Artists, week of August 5 to 12.

August 5, 1916, San Diego Sun, 8:1. Dancers to appear at Organ Pavilion.

August 5, 1916, San Diego Union, 1:6. Women jurors fail to convict "Stella" poser; second trial of girl accused of appearing in nude ends in disagreement.

For the second time in a month a jury of women in Justice George Puterbaugh's court yesterday failed to convict Miss Linda Weatherbee, also known as May Hayden. The jury disagreed and was discharged.

On the complaint of Sergeant E. F. Forbes of the police department, Miss Weatherbee was arrested July 3, after a performance at the Paris After Midnight concession, where it is alleged she posed in the nude as "Stella."

The first jury, also entirely of women, failed to agree. At the second trial of the case yesterday nine women composed the jury. They were said to stand seven to two for acquittal.

The members of the jury yesterday were: Mrs. J. Fishburn, Mrs. George Swain, Mrs. Ida Stickney, Mrs. Hilda Temple, Mrs. H. G. Muller, Mrs. W. J. Fulkerson, Mrs. L. Greene, Mrs. W. C. Cling, and Mrs. E. Graham.

Several police officers who testified yesterday were of the opinion that Miss Weatherbee appeared to be nude. Members of the Oregon cavalry camp testified that the lights were turned dim and they were unable to tell whether there was a violation of the law or not. The soldiers testified that Miss Weatherbee did not perform any objectionable dances. Other performers at the Paris After Midnight show said that Miss Weatherbee wore a flesh-colored piece of satin.

The jury was out for about two hours and when it was reported that the members were not able to agree, it was dismissed by Judge Puterbaugh. It is unlikely that the case will be tried again, according to police officers.

August 5, 1916, San Diego Union, 5:2-6. Classic dancers would bar free spectators; Exposition compelled to rope off space at Organ Pavilion.

August 6, 1916, San Diego Union, 7:2. Five thousand cheer Ruth St. Denis and Ted Shawn dance pageant; glory and fall of Egypt depicted; East Indian idea of reincarnation presented..

Charles Evans Hughes to be San Diego's guest at Hughes Day; Exposition gates will be thrown open to public at 12:30 with no admission to hear Republican candidate speak; parade will start from Santa Fe station at 10 o'clock; Point Loma trip and other entertainments prepared.

August 21, 1916, San Diego Union, 5:1. Irish fete at Exposition.

August 21, 1916, San Diego Union, 7:1. Wonderful meet, verdict for the stadium event, athletes enthusiastic over track, field and boxing contest held in San Diego.

August 21, 1916, San Diego Union, 8:4. Boosters for 1916 Fair back from trip to Atlantic states.

August 22, 1916, Los Angeles Times, 5:1-5. Visit of Hughes marks Exposition's greatest day; 25,000 persons, record admission.

San Diego, August 21. --- A period of unalloyed pleasure, one that made me forget the labors of the campaign is the way Charles Evans Hughes described his day at the exposition. For the San Diegans it was also a red-letter day, for the largest crowd that was ever within the gates turned out to see and hear the Republican candidate for President and his charming wife. More than 50,000 passed through the gates, and an eager crowd of 25,000, the largest the standard bearer had addressed up to that time during his tour, packed and jammed the big, open-air organ pavilion, the peristyles of the organ and every available space within hearing distance, when Mr. Hughes made his address this afternoon.

From 9 o'clock in the morning until 1:30, the time of the speech, at least 1,000 persons sat patiently waiting in the sun to hear Mr. Hughes. They came early to get seats and had their lunches with them in boxes. And they were well repaid, judging from the enthusiastic shouts and applause with which they greeted Mr. and Mrs. Hughes and punctuated his address.

Many who did not get close enough to hear the speech had the pleasure of shaking hands with Mr. and Mrs. Hughes at the great public reception of the plaza, and so it was a red-letter day for them, too.

And if the San Diegans were happy, the guests of honor, Mr. and Mrs. Hughes were equally so, and entered into the program prepared for them with all their hearts. They were graciousness personified, and whether it was shaking hands by the hour with countless people, posing for kodak fiends, viewing the exposition, visiting with the Indians of the Painted Desert, or watching the Hawaiian hula hula girls and the Spanish señoritas dance, they were intensely interested and pleased.

If San Diegans thought the Presidential candidate is cold and haughty, the idea was dispelled today a hundred different times. As the auto bearing Mr. Hughes to the exposition was passing the Grant Hotel this morning a good-natured Irishman from the crowd on the sidewalk shouted:

"Have you seen the harbor yet, Mr. Hughes?"

And the former Justice smilingly nodded that he had. Later he referred to the incident to those about him as the best thing he had heard today. Again he said in his address he was glad to be able to say he had seen the magnificent harbor, which he described as a great national asset.

Their graciousness was seen again when Mr. and Mrs. Hughes posed repeatedly for people with kodaks, while seeing the Point Loma view. When in front of the old lighthouse, Mr. Hughes posed, as requested for some kodaks, and then as he was leaving an eager mother rushed up and asked him if he would please pose with her little boy, and he did with the same happy manner.

At 5:30 o'clock this morning the Hughes train arrived and by 8:30 o'clock Mr. Hughes was ready for the day's program, having had breakfast on the train, prepared under the direction of Mrs. Hughes, who assumes personal charge of every meal served aboard the train to her husband.

Shortly after 9 o'clock, the distinguished visitors were greeted by President and Mrs. G. A. Davidson of the exposition, John A. Akerman, chairman of the committee in charge; Mrs., Akerman and the reception committees and the woman's board for the exposition. Mrs. Hughes was presented with a huge bouquet of carnations by the woman's board. The visitors were then whirled away for a drive to Point Loma and Fort Rosecrans escorted by eighty members of the reception committee.

They viewed the beautiful scene of city, harbor, ocean and the Coronado islands in the distance, while numerous aeroplanes from the government aviation camp at North Island whirled over their heads.

"Wonderful, wonderful!" said Mr. Hughes, and he then fired question after question at Colonel W. A. Glassford, commander of the North Island aviation school, who was in the party.

The same keen interest was displayed by him at the exposition where the high cultivation of the shrubbery and plants in so short a period seemed to impress him strongly.

At 10 o'clock they returned to the train and Mr. and Mrs. Hughes were transferred to an elaborately flower-decked auto, which carried them to the exposition. All along the way of the procession of automobiles the crowds on the streets shouted and waved to Mr. and Mrs. Hughes, who smiled and bowed in a pleasant manner.

The distinguished guests were quickly taken through the French building and to the beautiful rooms of the woman's headquarters where coffee was served by Mrs. George McKenzie and other ladies of the board. Mrs. Hughes was presented here with an exquisite bouquet of Los Angeles roses, a new variety, by Miss Teresa Morley, daughter of the park superintendent. A small reception was held, the public being excluded, that Mr. and Mrs. Hughes might rest a little.

The great reception on the Plaza de Panama followed and there more than 2,000 persons shook hands with and spoke to the standard-bearer and his wife. As many more were turned back by the guards as the time for luncheon approached.

Before the handshaking began, Ellen Beach Yaw, the California songbird, sang her "Skylark" and "California."

From the plaza the party was escorted to the Cristobal, where 600 guests were assembled. Republicans, Progressives, men and women of every party, were in the crowd. Mrs. Vernon Root presented to Mrs. Hughes a handsome bouquet, in appreciation of the latter's attitude on women's suffrage.

Then the candidate's party visited the Painted Desert exhibit.

When Mr. Hughes talked to his vast audience at the organ, he was introduced by Lyman J. Gage. The standard bearer spoke gracefully of his reception and impressions of San Diego, and then launched into a telling arraignment of the Underwood tariff, especially as it strikes at the sugar industry of America.

“Our friends,” he said, “discovered their mistake after awhile, but we desire to be represented by those who have foresight and not simply hindsight.”

He declared against any action that involved the crippling of American industry, saying:

“I protest equally against any abuses. I protest against any use of tariff schedules in favor of the few at the expense of the many or rather to build up private privileges at the expense of public interests.

“There is not going to be an grip on public privileges or right for any corporate interest, or any combination of interests, at the expense of the people of the United States if I can prevent it.”

The speaker then referred to conditions that will be faced after peace comes to Europe. Then it is that America must find itself, he declared --- when Europe is recalling her strength from trench to factory.

Continuing, he said in part:

America must be sound and honest in its public life and it must have business-like administration; it must be direct, it must be patriotic with America first and the America efficient. I believe that we are going to lay a broad foundation in this work. I would lay that foundation deep in a consideration of human needs and the requirements of the betterment of human life. I do not look upon men and women as mere economic factors. We are cooperating as human beings to build up the standards of human living and to diffuse happiness and prosperity. (Applause)

The man who looks upon the laborers in his employ as mere economic units has not caught the vision of the twentieth century. (Applause)

I should see to it that our race is protected. You may be sure that there is not a great nation in the world but what is going to look after that. I should have the foundation of our security laid in protecting women from extortion, in preventing children from being imposed upon by being drawn too early into the hardships of industrial life.

I believe we can control public utilities in a straightforward way. You need not suppose that I favor in the slightest way any interest getting the best of the public interest. (Applause) At the same time I favor justice in public enterprises as well as in individual work outside the scope of ordinary regulation, I have stated that firmly. And I shall continue to stand for justice to the man who has got his investment, and for justice to the laborer who is laboring for his wages, the preservation of individual incentive and the strength and paramouncy of the public interest in all public concerns. (Applause)

I desire to see this nation inspired with a respect for American citizenship. I deplore the way in which, down in Mexico, American lives have been sacrificed because of our failure to protect them. American citizenship, you must hold in the highest esteem, whatever the individual may be who bears the name of American citizen. (Applause) If we ever lose that sense of national obligation we shall become a decadent people.

I spoke a moment ago of Mexico. It is not necessary to deal with the facts before this audience. You know perfectly well what the conditions were and are. But the administration has not right to attempt to control Mexican politics, and to destroy the only government Mexico had, and leave the people of Mexico and our citizens to the ravages of revolution. (Applause)

We had one clear duty. That duty was to see that American lives and the property of American citizens were protected in Mexico. (Applause) That duty we could insist upon performing, and Mexico should have understood that. That is the primary duty of nations. We lost not only the friendship of the Mexicans, but we lost their respect when we failed to do that which they knew it was our duty to do.

My friends, we have got to begin, in a sense, over again. We want Mexico to understand that we are friends. We desire a stable government there. We do not desire to meddle with what does not concern us. We are anxious that the past shall be retrieved. Those people are starving --- they need assistance; they need every sort of aid that we can give. We want them to be established with a firm government and prosperous. We want to do all that we can properly to assist them to that end. Mexico, however, must understand that first and last American lives and the property of American citizens are going to be safeguarded. (Applause and cheers)

I wish I could go into some matters that I wanted to speak to you about with respect to our reasonable preparedness. I believe that this nation should have the strength which self respect requires. Not threaten anybody, but that we may not be misunderstood because of obvious weakness unrelated to our real power. (Applause) I want not simply appropriations. I want competent administration, military and naval, under leadership that is efficient, competent and qualified for the task.

This great country cannot afford to have its great departments in charge of those who are unequal to the task of administration. I make no criticism of individuals so far as personal character is concerned. But I want to see this whole government set up to a standard of efficiency which will command the respect of the world and satisfy the just ambitions of Americans. (Applause)

From this remote corner of our country, I shall turn to another remote corner of our country with a new inspiration and an intense desire, if you wish it, to serve to the best of my ability our common country --- the United States. (Applause and cheers)

August 22, 1916, San Diego Evening Tribune. Thousands welcome Hughes; candidate and wife inspect exposition and take auto ride.

August 22, 1916, San Diego Evening Tribune, 4:1. EDITORIAL: The Essence of An Able Statesman's Utterances.

Charles Evans Hughes is not an orator of the "spelling binding" class; he appeals to reason rather than to the emotions of the man and women whom he addresses.

His vocabulary is ample, but he does not waste it in ornamental rhetoric or use it to tinsel generalities already glittering! Nor does he adorn it with meaningless epithet after the manner of those silver-tongued orators who delight to draw the thread of their verbal finery rather than the stable of their argument.

He is eloquent, but it is the eloquence of a thinking man who has resolved the questions which he discusses by deducing his conclusions from incontrovertible data through processes of cold logic.

Mr. Hughes does not ask his hearers to agree with him unless they are convinced that he has stated his proposition truthfully, in the first place and argued it accurately thereafter.

No person going away from a Hughes speech will ask himself why he yielded to the "spell" of the speaker in his presence, seeking to analyze in cold blood the substance of what he has heard divested of the florid emotionalism that held him while listening to mere words artfully combined to produce a factitious effect.

The keynote throughout all that Mr. Hughes utters is efficiency.

It is not enough, in his opinion of what constitutes good government, that a public official should be honest and capable --- those are qualities that are presupposed in all officials --- he must know how to apply his knowledge and energy to the best purpose.

This purpose must be the highest well being of those whom the official is elected to serve.

The personality of the public servant must sink in the office with which he has been entrusted; he must become the embodiment of the will of the State.

In his public addresses thus far during this campaign Mr. Hughes has made it clear that he knows thoroughly the duties of the chief executive of the nation, and he has also made it clear that he has no desire to usurp any of the functions of the coordinate branches of the government; but he insists that in the exercise of his executive functions it is part of the duty of the chief magistrate of the Republic to see that all the other departments perform their full duty within the limits prescribed by the Constitution and the statutes.

As Mr. Hughes expounds the science of government to his audiences competency is the very first requisite; and incompetency through political favoritism has been the chief defect in the present administration --- to many spoils have been appropriated by victors unfitted to transact the business of the State.

He does not think that "the voice of the people" is ever uttered through an incompetent administration of the people's affairs; not does he believe that the people are ever satisfied with such administration.

When a great national party persists in conducting the affairs of the nation in an incompetent manner because it permits the administration of those affairs by . . . incompetents it admits its own incompetence; it admits that it lacks the proper material of efficiency in its ranks; and it confesses to the indictment that its sole purpose as a political organization is the procurement of emolument for its leaders and their political serviceable following.

No person who listens to the clear thinking of Charles Evens Hughes on this phase of his exposition of principles will have the slightest doubt that he not only knows what he is talking about but that he means what he says, and that if elected to the executive control of national business he will see to it that fitness shall be the first desideratum of public service; that economy shall be the moving feature of the administration; and that the greatest good for all concerned shall be the dominant policy.

August 22, 1916, San Diego Sun, 4:6-7. Hughes' speech refers to many of the great problems of the nation.

Candidate Hughes has come and gone.

Probably the biggest crowd in the exposition's history heard the distinguished guest speak at the exposition yesterday. Hughes praised our city and harbor, scored the Democratic tariff policies and flayed Wilson's Mexican policies.

"What sense is there," he said, "in enacting tariff laws that will destroy American industries, so that we can buy goods abroad? This is the policy of the Democratic party. The Republican party stands for protection of our home industries, a doctrine which we are particularly in need of at this time. Our friends on the opposite side do not believe in protection to build up industry, but only to raise revenue. The Underwood tariff was not enacted for the benefit of United States industries --- in fact, it proved injurious to many of them, notably the sugar industry.

"We must all work together at this critical time to mold an efficient and capable nation. This great nation must hold to unswerving loyalty, one allegiance to one flag, and overcoming all prejudice of race and creed, work together for the common welfare of our country."

Speaking on the advantages of San Diego harbor, Mr. Hughes said:

"While I was riding through your streets this morning, an enthusiastic citizen ran alongside of my automobile and asked me, as soon as he could catch his breath, if I had seen your harbor. I am very proud to say that I have seen the harbor. I am very proud to say that I have come to understand its wonderful

advantages. If I am entrusted with official powers by the American people, I will know to what good purposes your harbor can be put.”

In speaking of the exposition, Mr. Hughes said:

“In this beautiful exposition we have exemplified the unswerving loyalty and progress of the people of San Diego.”

“This is the most beautiful auditorium from which I have ever spoken. Within the grounds of your exposition you have nature enabled by art. There is no more beautiful spot on the face of the globe. Regardless of the result of the political campaign, I shall feel that I have been repaid for the strenuousness of this trip by the beauties of this favored spot. I have yet to meet a San Diegan who does not hold first a spirit of allegiance to his city.

In taking the crack at the Democrats for their lowering the sugar tariff and then later raising it, Mr. Hughes said: “The Democrats came to see their mistake. The Republicans knew that the sugar tariff reduction was a mistake from the start. We ask your support for a party that displays foresight and not simply hindsight.”

While Mr. Hughes was speaking, the platform, the peristyles on either side of the organ, and the great open space in front of the organ as far back as the Plaza de Panama was jammed and packed with a tremendous crowd. Thousands there were who came too late to get within sound of Mr. Hughes’ voice. Half an hour before Mr. Hughes started to speak a great crowd was jammed for half a block in front of the Laurel street gate. A crowd almost equally as large was forcing its way through the gate at the east entrance.

In referring to the Mexican problem, he said it was not a question of Huerta or no Huerta. That was a question for the judgment of the administration in power, he said. But he declared the administration had no right to attempt to control Mexican affairs, destroy the only government Mexico had, and leave Americans in Mexico to the dangers of anarchy.

“It was our duty to see,” he said, “that American lives and American property in Mexico should be protected. Out of it all we have lost Mexican respect and in its place is only Mexican contempt for us.”

He reiterated former statements of the “blunder” at Veracruz. “There was no salute, no reparation, and nothing but hatred from the Mexicans.”

Hughes’ statement about Mexico brought the biggest applause of the day. He warned all to prepare against the cooperation which the European nations have learned to use and which after the war will be turned from military to industrial pursuits. He again warned the United States to prepare against the “inevitable industrial invasion.” He then left in an automobile for his train.

August 22, 1916, San Diego Sun, 4:1. EDITORIAL: Mr. Hughes Did Not Answer.

San Diego entertained in her usual hospitable style a distinguished visitor yesterday.

We refer, as you may have guessed, to Charles Evans Hughes of New York, who aspires to succeed Woodrow Wilson as president.

Disagreeing with Mr. Hughes in many of his policies, and differing still more with the Big Interests that are shouting the loudest for him, **The Sun** refrained yesterday from printing an attack on our city’s visitor. Had we followed the lead of our contemporaries, who have on a number of occasions insulted men high in office on the day they came at our invitation to open our exposition, and to similar affairs, we could have been just as disagreeable as that. But we didn’t.

Mr. Hughes has come and gone. We heard him tell what this country should have done on different occasions, but not HOW it should have been done. We heard strenuous protests against the policies of one man who sits far away at Washington and wrestles conscientiously and devotedly with non-political problems affecting every man and woman in that great audience, as well as every man and woman in America.

But we did NOT hear Mr. Hughes answer any one of the half-dozen pertinent questions propounded to him by a coterie of distinguished non-partisan writers in an advertisement in yesterday's **Sun**.

We did not hear Mr. Hughes say what HE would have done in specific instances. The eternal question: "What would you have done?" remained in the mind of every fair listener. Mr. Hughes offered no solution to our great national problems.

San Diego ever delights in honoring her guests. We did so yesterday to our everlasting credit.

But no political history was made!

August 22, 1916, San Diego Union, 4:1. EDITORIAL: Hughes and Booth.

It was entirely apparent long before Mr. Hughes came to California that Hiram Johnson would be a misfit in a Republican senate. Mr. Hughes' tour of the state has emphasized that fact. If he is deserving of the vote of Republicans --- and none of them doubt that he is --- they also owe it to him to do what they can to secure to him a senate whose majority shall work with him. California has only one senate seat to fill. Republicans should make sure that it is filled by Willis H. Booth, the only Republican who is a candidate for it.

August 22, 1916, San Diego Union, 1:8; 3-1-6. Charles Evans Hughes, Republican candidate for president, spoke at Exposition; text of address; account of visit to San Diego.

Charles Evans Hughes has seen San Diego. San Diego has seen Charles Evans Hughes. Neither was disappointed.

To the contrary, Mr. Hughes and the Exposition City seemed to blend perfectly. They were friends from the very start and when his special train shot away for the north yesterday afternoon, fully 40,000 San Diegans who had seen him and heard him speak joined in the verdict that the Republican standard bearer is even bigger and better and more generally lovable than they had so fondly pictured him.

"Hughes Day" was a four-ply success from beginning to end. Not a single hitch was recorded. A veritable sea of humanity surged into the Exposition grounds yesterday to welcome the presidential candidate. It was not only estimated as the largest crowd that ever thronged the Fair grounds to greet any speaker, but was declared to be without doubt the most enthusiastic. A great patriotism and love of country seemed to swell in the heart of every person there. Republicans of city and county, who heard the candidate's inspiring, sensible, masterly address, went home with a new and mightier pledge to work untiringly for his election until the last vote is cast.

Scores of the leaders of the united party were in evidence to pay their personal respects and give assurances of support to the standard bearer.

To meet Charles Evans Hughes is to admire him. He has a genuine personality. His eye is clear as a cloudless sky, merry at times, severe at others, but always kind and sympathetic. His famous whiskers are neatly trimmed and really becoming, hiding to no extent a strong set of regular, white teeth. His smile is radiant, and his handshake is firm and cordial. Even after he had shaken hands with fully 3,000 San Diegans, who formed in line, he displayed no signs of weariness, and hand-shaking is hard work. Moreover, a smile went with every shake of the hand, and he smiled in such a way to show that he meant it.

That the sentiment of San Diego is overwhelmingly for Hughes was manifested by the tremendous ovation that was accorded him when he stepped on the platform in front of the great Spreckels organ pavilion. The air literally rang with cheers, and hats, parasols and handkerchiefs were waved in wild profusion. On the speakers' platform with the candidate were Mrs. Hughes, John D. Spreckels, President and Mrs. G. A. Davidson, Lyman J. Gage and Senator M. L. Ward. On the organ platform in the rear were others of prominence.

The candidate made a masterly address, which will be found in full elsewhere in today's **Union**. No more convincing speaker has ever visited San Diego. He felt free to criticize the Democratic administration, but he did so with a simply dignity, eliminating personalities.

Speaking with a sincerity that was easy to see, Mr. Hughes indulged in the highest praise for San Diego and its Exposition, pointing out that the people of this city should be an example to the people of the entire nation because of their patriotism, loyalty and manner of doing business. In fact, he took the "San Diego Spirit" as the text for his remarks.

The speaker was not slow to enthuse over San Diego harbor. He declared that he had seen it, and knew what he was talking about.

"As I came along the streets of San Diego in the parade this morning," he said laughingly, "an enthusiastic citizen ran alongside the car and, as soon as he was able to speak, shouted, 'Have you seen the harbor?' I was glad to be able to inform him that I had seen the harbor. That harbor is a great national asset. One cannot fail to consider its potency, its importance, its available national uses. I am glad that I have seen something of the Pacific coast, and I would not willingly have missed a visit to San Diego harbor, in the company of those who could tell me about it, so that in the coming days if I am entrusted with official responsibility, I shall know something of the uses to which it should be put in the interests of the United States."

Did San Diego appreciate this coming from a man like Hughes? San Diego certainly did. The crowd cheered the speaker until he was forced to desist and hold up his hand for silence. Governor Hughes' visit to Point Loma, where he viewed the harbor, was one of the features of the day. It is fully described in a separate article in today's **Union**, as are also the happenings at the Hughes luncheon at the Cristobal Café at the Exposition.

Hughes told of his desire to give both capital and labor an equal chance. He denounced the Democratic tariff and explained that Californians are well able to judge as to its effects, without being told. He flayed the administration's Mexican policies. He declared that regardless of the results of the election he would always consider that his visit to San Diego was worth his long campaign tour. And to President Davidson, on parting, he said, looking that official squarely in the eye:

"Mr. Davidson this is the red-letter day of my trip. It is one of the biggest days of my life. I am glad that I came. I hope to come again."

Mrs. Hughes, just a plain American woman, sweet of manner, intelligent, thoughtful of others, and at all times modest and sincere, voiced the same sentiments.

The American Indian went on record as being strong for Hughes. Mr. and Mrs. Hughes and party visited "Poor Lo" in his wigwam at the Painted Desert, following the luncheon at the Cristobal. They had a typical reception.

"Ugh!," grunted one of the oldest chiefs, sizing up the candidate and admiring his beard. "Hughes, him big man."

As Hughes seated himself to watch the weird Indian dances started for his benefit, Chief of Police J. Keno Wilson picked up a papoose and thrust it into the candidate's arms. The papoose was delighted. So

was Mr. Hughes. He placed it on his knee and chucked it under the chin until it crowed with delight. At the same time Mrs. Hughes put one arm over the shoulder of an older Indian child and kept it there during the dances. A mountain goat, owned by the Indians, strolled over for a look at the candidate and happened to sight a large bouquet of roses carried by Mrs. Hughes. He "bahed" expressively as if to say, "This is great. I haven't eaten a rose this year," and proceeded to munch on the bouquet. Mrs. Hughes and her husband both laughed merrily. As the candidate and his wife made their way back to the automobile, the Indians followed, chanting their approval. Later they sent a painted, feathered delegation down to the organ pavilion, to give the candidate a final send-off. Hughes was tickled. He smiled upon the Indians like a great big boy, and the crowds smiled with him.

"I have always wanted to see San Diego," said Mr. Hughes to a **Union** reporter. "I feared at first that I should not be able to include this city on my trip, but when it was announced that we could make it, my heart rejoiced. You have a wonderful city. It is one of the most beautiful spots I have ever seen. I hope that sometime I may become better acquainted with San Diego and its people."

The candidate talks little on national affairs with the newspaper men, holding this for his speeches.

Regarding the Republican party he said:

"I am glad to stand as the spokesman for a party that stands for the protection of American industry. I desire to see the United States hold up its head among the nations of the earth."

Charles Evans Hughes is just like a man from home. Get "the governor" away in a corner somewhere and talk about anything sensible, and he'll talk right back and make you feel so much at home that you might be induced to try to borrow money from him. He seems like a next door neighbor, quiet and dignified, but as easy as an old shoe. His laugh is cheery, although a bit husky after he has delivered an address. He meets all sorts and conditions of people, but he plays no favorites. When asked a question, he answered quickly as the snapping of a steel trap. He has the ability to remember names as well as faces. He says a great deal in a few words, and, whether you agree with him politically or not, you leave his presence convinced that he is a fine type of American gentleman. Hughes has not difficulty in making himself agreeable. He is naturally that way. He is particularly fond of children and went out of his way yesterday to speak to the little folks.

One small boy wanted to shake hands with "the governor," but seemed afraid. Hughes' clear eye took in the situation. He walked over to the boy, grabbed the little hand in his, and said, "How are you this morning, my little man? I am glad of the chance to shake hands with you."

Despite his dignified appearance, you feel sure after meeting Mr. Hughes that if you were a little better acquainted, he would insist on calling you by your first name. It wouldn't take much to make you call him by his, big as he is, if you only dared.

As the writer talked with Hughes, he couldn't help recalling a little occurrence said to have happened back East, shortly after the governor was nominated.

The newspapermen at that time began calling him, "Mr. Justice."

"That will hardly do, boys," he said. "I am not entitled to that honor anymore, you will recall."

"What is it then, Mr. Hughes?," they asked, "shall we call you judge?"

"No," he smiled. "I am no longer that either."

"It must be 'governor' then," they said, "or would just plain 'Mr.' be best?"

Hughes told them they could take their choice of the two last, and among those best associated with him it has since been "the governor." But, of course, when they are personally addressing him, they always drop the "the."

Men and women were heard to compare Hughes to Lincoln up at the Exposition yesterday. In fact, one old Republican was heard to say, "He looks like Lincoln all over again and talks like him. He's more handsome, that's all."

"Governor" Hughes sticks to facts and logic, as he sees them. He seldom resorts to anecdotes or stories to hold his audience. Yet once in a while, behind the scenes, he enjoys these little pleasantries as much as anyone.

Traveling together on this long tour, Mr. and Mrs. Hughes seem to be repeating their honeymoon. His hair is shot with gray, and Mrs. Hughes is not as young as she once was, but they are just like boy and girl when in each other's company.

Not far from the press box, where a **Union** reporter was covering a big part of this story, a woman with a black parasol said something about Mrs. Hughes that made me think she is almost as popular with her sex as the "governor" is with his. She remarked:

"I think Mrs. Hughes would make a good neighbor."

It is pretty hard to beat a compliment of that sort, paid to one woman by another.

To those who yesterday met Charles Evans Hughes it appeared that he has read a great deal and forgotten nothing. He seemed to know almost as much about the San Diego Exposition as the men who built it. The one gloomy thing, he declared, in connection with his visit here, was that he was to be torn away just as he was getting started on his Exposition explorations.

Talking with the newspaper boys who have been with the candidate since the day he set foot on the campaign trail, the writer of this found that they were all fond of him as a traveling companion. He was one of them, they said, and frequently came back to the newspaper car to talk with the correspondents after work hours. At these times he talked socially, and for a few hours at least he seemed to be willing to forget that he is probably the most conspicuous man in the United States today. Everywhere he went in San Diego he was the mark for movie men and camera artists. He stood up under the fire nobly, scarcely seeming to notice that they were there. The motion pictures of the candidate taken here will be shown all over the United States within the next few weeks --- with captions telling of the different points in the Exposition grounds where they were taken.

The writer of this story paid special attention when the governor stood in front of the United States Government building shaking hands with the long line of his admirers as they passed in single file before him. Hughes seemed to enjoy it as much as they did. A man with grease-covered overalls received the same hearty grip and cheery word as the man next to him in the Palm Beach outfit. A ragged woman, carrying a baby, received even more of his attention than the fashionably dressed woman a few feet behind.

The candidate was closely guarded. At the reception where he was shaking hands, the secret service men paid keen attention to every person that passed. When a pocket seemed to bulge, it was cautiously felt. At the Cristobal a suspicious-looking character who had made his way close to the candidate and who was muttering under his breath, was quietly ejected. Outside he said that he meant nothing and was merely excited. He carried no arms. Letters written elsewhere threatening Hughes and sent out in the press dispatches were hardly ever taken seriously. Yet precautions against a possible attack upon the candidate by a crank were increased. Mr. Hughes, himself, only smiled when he heard of it. It didn't seem to worry him at all.

When the Hughes special pulled away at 3:10 o'clock just behind the regular train, a crowd of prominent San Diegans had assembled to say farewell. At almost the last moment, Mrs. Claus Spreckels arrived, accompanied by her husband, and presented to the candidate a huge bouquet of California poppies. Mr. Hughes gracefully acknowledged the gift and shook hands with many of the persons gathered to bid him goodbye. As the regular 3 o'clock train pulled out, the passengers crowded to one side and waved from the windows and platforms at the candidate, who bowed and waved his hand in return. Just as the candidate's special pulled away three rousing cheers were given. He answered with a last wave of farewell. Mrs. Hughes smiled goodbye. Then the two turned and went within the car for the next leg of their journey.

Members of the Hughes committee and vice presidents of "Hughes Day" are entitled to no little credit for the splendid manner in which the entire affair was conducted. It was clock work all the way.

Aside from Mr. and Mrs. Hughes, an executive staff of fifteen men and the newspaper correspondents were included in the Hughes' party. Charles W. Farnham, who has wide experience on campaign tours, is the manager of the present Hughes' trip. W. R. Van de Bogart, of the New York Central, is the manager of transportation, and with Mr. Farnham is responsible for much of the arrangements of the tour. Dr. Norman E. Dittman is the physician of the party.

Lawrence H. Green is the private secretary of Mr. Hughes and Carl D. Shepard is the director of publicity for the tour. Sergeant Brierton, whose whiskers somewhat resemble the candidate's and Frank W. Tyree, formerly a member of the Roosevelt parties and later United States marshal of West Virginia, were the secret service men of the party. A part of Mr. Shepard's work is to furnish all local newspapers and the correspondents of the party with transcripts of the candidate's speeches, and three shorthand reporters, James G. Marsiott, Charles A. Morrison, and Frederick D. Elmer, worked in relays when Mr. Hughes delivered his addresses.

In San Diego the stenographers did not have time to conclude transcribing the speech, but **The Union** had its own stenographer on the ground and later an official transcript of the candidate's remarks, typewritten on the train before it reached Oceanside, was brought to **The Union** office from Oceanside by a special messenger. It appears in **The Union** today.

August 22, 1916, San Diego Union, 5. Mrs. Hughes wins way to hearts of San Diegans.

August 22, 1916, San Diego Union, 5. Aviators make novel escort for Hughes; brilliant display of feats adds to pleasure of his trip to Point Loma.

August 22, 1916, San Diego Union, 5. Governor Hiram Johnson reiterates pledge to aid Hughes.

August 22, 1916, San Diego Union, 5. Republican victory in Texas possibility; Lone Star State dissatisfied with Mexican policy, says national committeeman.

August 22, 1916, San Diego Union, 5:5. Takes south by storm; Hughes sentiment at flood tide following tour of nominee.

Mr. Hughes has characteristically adapted his subject matter to the peculiar interests appertaining to each community in which he has appeared and in every place he has shown a remarkable knowledge and grasp of local conditions, together with sound judgment and convincing pledges touching on the manner in which they should be cared for.

August 22, 1916, San Diego Union, 8:1 "Lark Ellen Day" at Exposition Thursday; first concert scheduled at Organ Pavilion at 3 in afternoon; autos admitted.

The appreciation of the Exposition and San Diego for the generous service given Exposition celebrations during the year by Ellen Beach Yaw, California's popular singer, will be expressed at a special

day in her honor at the Exposition Thursday. Miss Yaw will give two concerts during the day for the invalids and crippled children who are to spend the day at the Exposition through the efforts of Dr. Belle M. Pope.

The first concert will be given at the organ pavilion in the afternoon at 3 o'clock, and for the first time in the history of the Exposition, automobiles will be permitted to park near the organ pavilion for a concert. While preference will be given to automobiles carrying invalids and crippled children, all cars will be allowed to take advantage of the special privilege.

Miss Yaw will appear again at the evening concert of Tommasino's band at the United States Fisheries building at 7:30 o'clock, and will sing the aria, "A Fors a Lui" from **La Traviata** and the "Swiss Echo Song." At 10 o'clock she will sing the "Star Spangled Banner," accompanied by the band.

Ellen Beach Yaw Day will begin at 2:30 o'clock in the afternoon with a reception to Miss Yaw by the women's board of the Exposition in the California Quadrangle. A singing and dancing entertainment will be given by the Spanish troubadours as a part of the entertainment. From the reception the party will go to the organ pavilion for the special concert. Assisting Miss Yaw will be Walter E. Hartley of Pomona, who will play several selections on the organ. Miss Grace Bowers will be the accompanist.

At 4 o'clock there will be a reception and tea in the women's board headquarters, and a musical program in which Miss Yaw will participate. At 10 o'clock, immediately following the singing of "The Star Spangled Banner," there will be a special Ellen Beach Yaw supper at the Cristobal café.

The program to be given Thursday afternoon at the organ pavilion for the invalids and crippled children is as follows:

"Queen's Aria" from **Les Huguenots** (Meyerbeer)

"Queen's Aria" from **The Magic Flute** (Mozart)

"My Mother Bids Me Bind My Hair" (Haydn)

"Who is Sylvia" (Schubert)

"You" (Mary Carr Moore)

August 23, 1916, San Diego Union, 5:1. Mrs. Josiah Evans Cowles, head of Federation of Women's Clubs, entertained.

August 23, 1916, San Diego Union, 5:1-2. Ellen Beach Yaw Day to be celebrated tomorrow; singer makes special request that crippled children and invalids hear her program of songs; automobiles will be admitted into grounds on payment of usual fee

Miss Yaw is spending a few days in San Diego and offered her services Monday at the special reception for Mr. and Mrs. Charles Evans Hughes. It was following her special number that Mr. and Mrs. Hughes shook her hand and congratulated her enthusiastically. When they were told that she was known as the "California Nightingale," Mr. Hughes replied, "I should say "American's Nightingale." "

August 23, 1916, San Diego Union, 5:4. Free lecture Thursday afternoon at 4 o'clock in Southern Counties building by Dr. Paul Bornson of Washington, D.C. on the production from samarskit deposits and uses of radium; \$500,000 worth of radium will be displayed.

August 24, 1916, San Diego Herald, 2:3-4. EDITORIAL: Hughes' Presidential Qualifications.

The splendid, forceful and inspiring address made by Charles Evans Hughes at the Exposition grounds Monday afternoon made a good impression on the great audience which showed its appreciation by hearty applause each time the speaker made a telling point.

That Mr. Hughes is fair-minded and that his feeling, his sympathies and his heart, are with the great mass of people was plainly evident in his speech. He stands for all the things which help humanity and is as progressive as anyone could demand. When he told the audience that he was opposed to special privilege which benefit the few at the expense of the many, but that he demanded justice for all, he made a telling point.

Mr. Hughes is a broad-minded American who believes the people should rule, but he is in no sense a demagogue. His idea is that the productive power of the people is so great that it is possible to so administer the government that the general condition of all people can be improved and the whole country made prosperous without doing injustice to any interest.

Mr. Hughes is for protection to all American industries. Not only a tariff, but those wise laws that will encourage every man to do his best and to get his full reward. We should build up and not destroy, but the great workers of the country are entitled to such remuneration as will make them all comfortable. Mr. Hughes insists on justice to the people without injustice to the big corporations. It is these ideas, forcibly expressed, which command the respect of every fair-minded person.

September 5, 1916, San Diego Union, 6:5. Carly gives concert at Exposition; dramatic baritone heard in opera airs; songs by Mrs. Gage rendered.

Victor Carly, dramatic baritone, was heard yesterday afternoon before a large audience at the Spreckels organ pavilion in a concert consisting of opera airs --- and seldom, if ever, has Mr. Carly been heard to better advantage. Miss Ethel V. Widener acted as accompanist.

A feature of the concert was the baritone's rendition of two songs, "Because I Love You," and "Consecration," both by Mrs. Lyman J. Gage and in both of which Mrs. Gage accompanied the singer.

The program was an exceptionally attractive one, well elaborated and very interesting, representing the classic, romantic and modern tendencies in operatic music. It was given in six different languages --- English, French, Spanish, Latin, German and Italian.

Many among the audience thought Mr. Carly was heard to best advantage in the arioso from "Benvenuto," by Diaz and the canzone from Verdi's "Falstaff." The former is a soul-stirring air that does justice to the vocal attainments of a dramatic singer; Benvenuto Cellini, the great sculptor and chiseler of the Renaissance, being a political prisoner and becoming blind, in asking for light to his eyes so he can see once again his masterpieces. The rhythmic and gay canzone of Falstaff gives a fair and impressive illustration of modern Italian music, when it is considered that the number which preceded it was the descriptive prologue from "Pagliacci," by Leoncavallo and Puccini's pathetic solo of Colline in "La Boheme."

The first number presented the "Air of Hidraot" from "Armide," by Gluck, the great reformer in musical drama, who established the French school on solid foundations, and who gave the inspiration to Wagner in the rebuilding of the lyric style. A very important number was the grand air from "Henry VIII," by Saint-Saens, a masterpiece of modern lyric music, full of intense dramatic power. These two numbers were new to the San Diego audiences. The brilliant song of Mephistopheles, the golden calf, is a splendid example of the great composer, Gounod, in "Faust."

The next number was from Rossini --- one of the best musical pages from that composer's immortal "Stabat Mater." The beautiful invocation to the evening star, representing the second period in the evolution of lyric music in Wagner, is always deeply appreciated by discriminating audiences. The good American music has a standard in the MacDowell song, "Thy Beaming Eyes," while the Spanish song, "La Paloma," gives just a touch of local color in harmony with the surrounding atmosphere of the Exposition.

September 7, 1916, Los Angeles Times, II, 4:1. EDITORIAL: San Diego Fair Will Continue

The myriad tongues of rumor have been busy telling this, that and some other thing about the exposition at San Diego, and numbers of people have heard and believed that the fair is likely to close before December 31.

As a matter of fact, according to a statement recently issued by G. A. Davidson, president of the exposition, it will not only continue to December 31, but it has been more successful this year than last. Some of the exhibitors are even seeking permission to remain on the ground in 1917.

The average daily attendance during this summer was between three and five thousand paid admissions, and, according to President Davidson, the report of the auditor shows that June, July and August have produced such substantial profits that even though the remaining months should fall far below expectations in attendance, the financial condition is such that the exposition will be able to continue to the end of the year.

Numbers of big events are planned for the closing months, and preparations are already being made to present one of the most remarkable demonstrations every seen on New Year's Eve, when the Panama-California International Exposition will end.

September 8, 1916, San Diego Union, 5:5-6. Council considers offer to sell Exposition zoo to city; owners ask \$2,500, declare animals are worth \$15,000; Park Board favors purchase, but lacks funds; City Attorney instructed to find method of raising money.

Up at the Exposition zoo yesterday, although the inmates didn't know it, the fate of the entire menagerie hung in the balance.

The monkeys chattered just as usual, the lions roared, the leopards purred, and the sacred cow chewed his cud in the old accustomed style, but down at the city hall, office holders and men of affairs debated for more than an hour the question as to what is to become of the big and widely assorted animal show when the Exposition closes January 1.

It was finally decided to keep the entire lot as an added city park attraction, if funds can be found for their purchase and money for their upkeep provided.

D. C. Collier, representing the old Mission Bay Beach corporation appeared before the Council and announced that the inhabitants of the zoo, loaned to the Exposition by his company, could be purchased by the city for \$2,500. The animals, consisting of beasts and birds from almost every corner of the globe, were once the property of the Wonderland Amusement Company. Since they have been taken to the Exposition they have been better fed and tended and have become positively rejuvenated.

Councilman Fay was strong for the purchase, declaring that the city park zoo is one of the chief attractions of the park and should be enlarged through the taking over of the Exposition collection. Other Councilmen thought the same way about it. John F. Forward, Jr., president of the park board, declared that although the park commission would gladly take over the entire outfit, it has so many other things to do with its funds when the Exposition closes that it cannot be expected to foot the bill. Mr. Forward told of all the things that the commission would be compelled to look after, and said that even more money than is now in sight would be needed.

It was finally voted to have the park commission confer with the city attorney as to the best means of raising the \$2,500 for the purchase. Collier said that the money could be paid in installments of \$100 a month. He said that the animals were fully worth \$15,000 and cost the Wonderland people more than that amount. He declared that he did not want to see them sold to an outside concern as they were too valuable a municipal asset. The cages, costing \$4,000, now used for the animals on the Isthmus could be moved to the present park zoo, near the Laurel Street entrance to the park, it was agreed.

September 16, 1916, San Diego Union, 5:2. Mock bull fight will feature today's Mexican Exposition program.

September 16, 1916, San Diego Union, Classified, 9:5. Plan to preserve Exposition buildings nears realization.

Preservation of the buildings and conservation of the grounds of the Exposition for the benefit of the citizens of this city and county came a little nearer realization yesterday when the executive committee of the "Preservation Committee" met at the rooms of the Chamber of commerce and heard a report from a sub-committee. It was adopted with thanks.

The report will be presented to the full committee next Friday afternoon at 4 o'clock. It is said that the work of the general committee and the executive committee has been performed with great thoroughness, opinions of experts in various lines having been obtained as to the performance of buildings, cost of upkeep, etc.

The executive committee of the Exposition board has signified its willingness to set aside a day between now and the close of the Exposition, or to name January 1, 1917, as "Preservation Day," and to devote receipts from all sources on that day to the purposes of the committee in setting aside the more permanent buildings for park use.

Hon. Lyman J. Gage, chairman of the general and the executive committees, reported that Chesley Mills is willing to organize a new orchestral association which will give concerts without pay if accommodations for the association are established. This was referred to the general committee.

The executive committee is said to oppose the preservation of any parts of the Exposition as an exposition, except possibly the New Mexico building, which might be used as a home for a permanent exhibition of the mineral and other resources of the southwestern part of the United States.

It is thought that recommendations will be made to do away with all the state and county buildings at the Exposition, except the Southern Counties building and the New Mexico building. The buildings comprising the California quadrangle are of a permanent character and have not entered into the discussion.

It is said there will be available for carrying out the preservation propaganda, between \$25,000 and \$30,000 from the operations of the first year of the Exposition, provided a fair return from unpaid subscriptions is received, and after certain liabilities are liquidated.

September 17, 1916, Los Angeles Times, 12:1. New San Diego Awards: James E. Babcock, in charge of the Palace of Mines at San Diego, has just telegraphed Secretary Swindeli, of the Chamber of Mines and Oils, as follows: "Following awards just announced: Boss mine, platinum ores, the grand prize; one gold medal each to Yellow Pine mine, Gail Borden Occidental College collection, C. C. Valle collection and Friday Mineral mine. Silver medal to Oatman Chamber of Commerce for display of free-milling gold ores. Boss award most important and a fitting tribute. Friday award also important Oatman award made possible only through assistance of you, Sprague and a few other friends of the camp."

September 17, 1916, San Diego Union, 1:3, 3:5. Mexicans celebrate Independence Day at Exposition.

Many a pretty, happy crowd has taken and held the Exposition grounds on given days in the nearly two years of its existence, but none seemed more appropriate in the place and none more jubilantly happy than that made up of Mexican citizens who swarmed the Plaza and Prado all of yesterday and until late last night.

Against the background formed by the white buildings of Spanish architecture, the lurid red, white and green banners of the southern republic stood out in picturesque contrast, and the colorful holiday garb of many dark-eyed señoritas and laughing, bronze-skinned men added to the beauty of the picture. In corridors and low-roofed buildings the soft language that is called the language of the dons was heard on every side. Through the day the music and the fetes that are popular in the country below the border were in order everywhere on the grounds. And at night the Plaza was a great open-air ballroom where dancing continued until after the moon arose. Thus was Mexican Independence Day celebrated by the Mexican citizens of San Diego.

As in all Mexican festivals, children played a large part in the one of yesterday. The games and sport of Mexico were reproduced before applauding crowds. A mock bullfight, in which the bull was a joke and none of his blood was spilled, furnished amusement on the tractor field, And on the Plaza, "La Pinata," a game in which blindfolded children break big jars of candy with sticks and scramble for the contents, occupied the attention of children and grown-ups alike for some time.

Programs of Mexican music were interspersed with American patriotic airs, and when the national hymns of each country were played the crowd rose to its feet and heads were bared, presenting a strange sidelight on the recent affairs along the Rio Grande.

Senor Teodoro Frezieras, Mexican consul to San Diego, made the opening address in the formal patriotic celebration of the morning. Addressing his speech to officials of the Exposition, he said:

"Your exquisite courtesy in inviting our chief, Mr. Carranza and his cabinet to attend these festivities on behalf of the Mexican people, has found in our hearts a sincere echo. It has rung the true note of international friendship based on mutual respect and esteem.

"In the name of our first chief and his cabinet, whom I have the honor to represent on this auspicious occasion, I avail myself of this opportunity to express to you our admiration of your spirit and enterprise, as well as your business energy, out of which this beautiful Exposition has sprung.

"On this occasion we Mexicans feel that there is a community of interest between the people of the United States and Mexico. That in the internal struggle which is now being waged in Mexico our country is dealing with the same problems that confronted your beloved Abraham Lincoln in 1860. These problems and your understanding of them will prove to be a bond that will draw us ever closer."

The Senors David Zarate, Alberto Rodgers and Francisco Gonzales also delivered addresses. Senor Zarate said:

"Ladies and Gentlemen:

"For Mexicans --- thousands of them --- I speak in English to those who do not understand what is being said or done in these exercises today.

"On alien soil, enjoying the absolute liberty of the United States, we Mexicans who are only temporary residents of this country, revere and respect the liberty that the United States constitution gives all and everybody within its borders.

"We Mexicans are, as I said already, temporary residents, but when we go back to the land of our birth, we shall certainly remember the hospitality and kindness that have been bestowed upon us during our permanence in your midst, and it will be a debt of gratitude that we always will be too glad to reciprocate if the opportunity should be afforded us.

"We are about to have the rights of a free and independent people, same as you have. We are sure of a complete establishment soon that will give everybody regardless of their situation in life the sovereign

right of life, liberty and the pursuit of happiness, as is exemplified in your Declaration of Independence and guaranteed by your constitution.

“To the real Americans within range of my voice, I wish to state a case to those who are citizens of this country. To those who do not reverence liberty, I have nothing to say.

“You claim to belong to the land of the free and the home of the brave. So do we, your brother Americans in Mexico. We of Mexico want for all time the same principles to obtain in Mexico that which you should always demand in this --- your country. The good people of both the United States and Mexico demand untrammelled liberty --- a liberty without license, borne of a sound constitution and universally respected.

“Permit me to tell you that fourteen millions of human beings in Mexico are, without exception, hungry for liberty. All they demand is the God-given right to go their respective ways in diligence and industry. That they will and shall have that simple sovereign privilege is destined by God. All right-minded people must necessarily admit it.

“Now, to go a little further, permit me to tell you that today is our day of liberty --- the same as your Fourth of July. On the 16th of September, 1810, a humble Catholic priest, Hidalgo, appeared on the arena of Mexico, as your George Washington in 1774 --- he left his priesthood for manhood and sheer love of country.

“He decided --- as every good man should decide --- that one’s nation is more than one’s life and infinitely more than a belief in dead people --- even if they become saints in a religious sect. He was butchered by the evil partisans of oppression and died a martyr for liberty.

“The life of Hidalgo is a fine and beautiful page in the history of the world. That his life was given to the cause of Mexican liberty is wholly incidental, I say --- and say as vehemently and as loud as I can --- that the good, intelligent, philosophical man, trained from earliest opportunity for Rome and the best that the Romist church stood for, in prime of manhood, with the most careful deliberation, fully realizing he must be a martyr, finally decided that the liberty of Mexico was more than all else, and it was thus that he called his people to arms and fought and died.

“To all intelligent students of world history, Hidalgo necessarily stands out as a unique and glorious character for reason of his acts and fate, as I have just mentioned. So we are here today to pay homage to his splendid memory and are determined to live up to and ever maintain the spirit and principles inculcated by him.

“May his soul rest in peace. May the Almighty grant that all men may see as Hidalgo, not only in Mexico, but elsewhere, that folk will be better for his novelty of sentiment, his magnificent example, and his utter sacrifice. I say again, may his soul rest in peace! I mean so far as the hereafter is concerned, with which we mortals on earth have no governance. But so far as the good spirit of Hidalgo is concerned, it is as deathless as fame --- worshipped by all true Mexicans and all other lovers of liberty, and, as time goes on, the sacrifice and splendid example of Hidalgo are more to us today than ever before. We are a patient, long-suffering people. The injustices and arbitrary acts of self-imposed authority beyond our sacred constitution has been the main, the sole cause of all the troubles which Mexico has gone through in the last six years. What we Mexicans desire is to have Hidalgo’s principles obtained forever. I sincerely believe that that is the desire of all others who, if not Mexicans, are for right and liberty.

“Long live the memory of Hidalgo. May the principles of liberty in the United States never conflict with those of Mexico. Finally, let us all abide by the glorious efforts of the patriots of Mexico!”

September 17, 1916, San Diego Union, 1:7. Exposition head sends greetings to southern Fair; officials of Centennial Celebration at Gulfport, Mississippi, return compliments.

September 17, 1916, San Diego Union, 3:2. Mayor of Los Angeles and other officials visited Exposition.

September 17, 1916, San Diego Union, 5:4. Fine Distinctions in the Immodesty of Art, Yorick discusses the original "Stella."

My own objection to the original "Stella" was not that it was "immoral" or that it was bad art. Good art in sculpture or painting cannot be "immoral," whatever may be the subject treated by the artist. "Stella" was the figure of a naked woman, but so is the Venus de Medici, and only the nastiest-mind prude would denounce the Mediciean Aphrodite as "immoral." I am unable to pronounce on "Stella" as good or bad art, because it was fake art, and whatever is faked is beyond critical judgment. I would have to see "Stella" divested of her glamour of lights and shadows as she is divested of raiment before I could say whether she is artistically good, bad or indifferent. Honest connoisseurs of feminine beauty decline to pass upon specimens of it paraded for inspection half-attired, under the deceptive glare of the shadowed electrics of a society reception or a *danzante* of the "younger set." The best time to judge a woman's beauty is in the early morning after the curl papers have been removed and before the powder puff has been applied --- in that unguarded hour, woman, lovely or unlovely, is all herself.

But perhaps I digress. What I intended to say was that Oakland (Cal.) is blushing furiously and paling spasmodically in contemplation of a "Stella," which some of the purest moralists of the town say is absolutely unfit for publication, but which others insist is all right except in the salacious imaginations of the objectors. The remainder of the community, of course, did not miss the opportunity of crowding the exhibit hall to the doors in a avid desire to pass judgment on the controversy by personal observation. Consequently, the town is hopeless divided into the pro-Stellas, who declare that she is all right, and the anti-Stellas, who as emphatically insist that she is all wrong.

Perhaps I ought to explain that this Oakland Stella is not the one we saw in San Diego a few months ago. This Oakland thing --- of beauty --- is not a painted creature of an artist's fancy from a living model; she is the real thing --- of beauty --- she is a model and painting all together in the altogether. At first blush this "Stella" seems to be a replica of the famous one --- she might be "Stella" herself, so cleverly is the other fake faked in this fake. The chief of police of Oakland came and looked at the lady and approved. The chief of police of Oakland is not an artist --- he is only a policeman --- but he knows a good thing when he sees it; and this "Stella" looked good to him --- until she moved. As a work of art the chief of police found "Stella" unobjectionable, but as an escape from the "life class" of an art school she was "immoral" under the rule of the police department of Oakland. Wherefore the chief told the "exhibitors" of the "work of art" that every little movements must be suppressed --- there must be no hint to spectators that "Stella" was alive. He also suggested (and a hint is as good as a kick from the chief of police of Oakland) that future trouble might be avoided if the lady in the picture were clothed in conventional tights. Curiously enough that was the first intimation from any quarter that "the picture" was *in puris naturalibus*.

September 17, 1916, 9:2. Society to take tea at Exposition in aid of Mercy Hospital; parties being planned for Exposition Monday to swell fund being raised for cause.

September 18, 1916. Letter from Executive Committee to General Committee on Preservation of Exposition Buildings (1915 Exposition, Letters and Minutes/Committee on Preservation of Exposition Buildings, n. p., 1916).

All state and county buildings to be removed with the exception of New Mexico and the Southern Counties

Three groups of buildings on El Prado to be separated by planting

1. California and Fine Arts group
2. Five buildings around Plaza de Panama

3. Southern Counties Building and surroundings

Horticultural building, Fisheries exhibit, organ and model farm to remain; Canadian and Varied Industries Buildings to be eliminated

Object --- to make buildings adjuncts and appurtenances of the park rather than the remains of an Exposition

Park will flow into general scheme between California Building and central group on both north and south; a splendid vista of the park in both directions will become a feature of the landscape by elimination of Canadian and Varied Industries Buildings.

Isthmus to be abandoned, except for Painted Desert

U.S. Government Building to be used of music pavilion; Pan-America Building for county exhibits; Foreign Arts Building for industrial fairs; Southern California Counties Building for an auditorium.

Natural History Museum to go in one of the minor buildings.

Fine Arts Building for art; Russia and Brazil and Science and Education Buildings for anthropological displays

California Building use to be determined

Cost --- \$1,600 to repair staff work

\$10,000 annually to preserve buildings in present condition

September 18, 1916, Los Angeles Times, II, 3:5. Imperial Cotton Wins.

The quality of Imperial Valley cotton has again received official recognition. The international jury of awards has given the exhibit of Mrs. Ella Swickard at the San Diego fair two grand prizes, one on long and one on short stable. Mrs. Swickard this year only made the two groups.

Miss Swickard's exhibit and spinning wheel have attracted much attention at the fair. Her work for the valley product has spread the fame of the California Dixieland far and wide. She is particularly pleased with the United States Imperial Valley cotton.

September 18, 1916, San Diego Sun, 1:5. Mayor Capps releases Carl Ferris, of Ferris & Ferris Drug Store, from his services as Park Commissioner and appoints L. A. Blochman; Ferris sold drugs to city in violation of a charter provision.

September 18, 1916, San Diego Union, Classified, 9:5. Aid for hospital expected today at Exposition grounds; Mercy Hospital fund committee to share in gate receipts; interesting program made.

September 19, 1916, San Diego Union, 1:1, 3:1-4. Night chase to get mayor fails; Ferris is exonerated and Capps' act is criticized.

September 19, 1916, San Diego Union, 8:1. Mercy Hospital Day held at Exposition; Miss Margaret Harvey, contralto, sings; 700 people have tea at Ridgeway Pavilion.

September 19, 1916, San Diego Union, 8:3. Southern District Federation Day at Exposition tomorrow.

September 19, 1916, San Diego Union, 14:2. Exposition attendance figures given; more than million and quarter persons pass through gates in 1916.

Exposition attendance for 1916 is a quarter past the million mark with a total to day of 1,240,175. The total attendance for the entire Exposition period, beginning January 1, 1915 is 3,270,131 and Exposition officials believe the attendance will reach close to the five million mark for the two-year period.

Up to and including July 4, the attendance for 1916 was 28,000 greater than for the same period in 1915. Although the attendance since that time has been extremely gratifying to Exposition officials and every big day of the period has been greater than the same day of last year, the total for August and the first part of September was slightly less than for those months of last year.

At present the daily attendance is equal to last years at the same period and as the special events department has a number of big days planned with special programs it is believed that the final months will be greater than those of 1915.

September 19, 1916, San Diego Union, 14:5. Hotel manager taught story of Exposition; Fair Board advises head of local hostelry grounds are open Sundays.

September 20, 1916, San Diego Union, 8:2-3. Miss Margaret Konig of Portland, bride-to-be, asks public to wedding at Isthmus Saturday afternoon.

September 20, 1916, San Diego Union, 8:3. Tommasino's band will give request program today.

September 20, 1916, San Diego Union, 8:4. Mrs. C. C. Arnold, guest of honor at Exposition; president Southern District Federation Clubwomen arrives in San Diego.

September 20, 1916, San Diego Union, 8:5. Westlake Club artists of Los Angeles Exposition guests Saturday.

September 20, 1916, San Diego Union, 8:6. Miss Helen Bowles, San Diego soprano, to sing at Organ Pavilion Thursday evening.

September 21, 1916, Los Angeles Times, IV, 9:5. Gets the Grand Prize, Salt Lake Route-Union Pacific Building is declared by jury to be worthy of highest honor.

Word has just been received that the jury of awards, acting for the Panama-California International Exposition at San Diego, has given the grand prize for buildings of its class to the Salt Lake Route-Union Pacific Building, which has been operated by these two railway systems since the beginning of the exposition in January, 1915.

This building has been one of the features of the exposition, carrying with it a most interesting exhibit bearing upon the country tributary to the Salt Lake Route and also maintaining an efficient information bureau covering every section of the great West.

Two of the special attractions in this building are the massive maps, each occupying one end of the great reception hall. One of these maps covers in detail the entire country tributary to the lines of the Salt Lake Route, while the other is equally illustrative of the wonders of the Yellowstone. Each of these maps was last year awarded a gold medal by the Committee of Awards, and the building itself was given like recognition in 1915, to be followed this year by the award of the grand prize.

In addition to these exhibit features, the Salt Lake Route-Union Pacific Building has been noted for its entertainment features, its hospitality having been extended to all prominent visitors and its doors kept open for the entertainment of every gathering of importance that has made a tour of the fair.

September 21, 1916, San Diego Sun, 2:1. Forward denies he will resign from Park Commission; Council has refused to confirm Blochman and has attacked Capp's appointment of Thomas O'Hallaran to succeed C. T. Chandler because O'Hallaran is inheritance tax appraiser for state.

September 21, 1916, San Diego Union, 1:4. The breach between the mayor and the City Council grew wider yesterday afternoon when the Council for the second time refused to confirm the appointment of L. A. Blochman to succeed Carl I. Ferris on the Park Commission.

September 21, 1916, San Diego Union, 4:1. EDITORIAL: There will be general regret because of the withdrawal of Carl I. Ferris from the Park Commission.

September 21, 1916, San Diego Union, 5:2. Jules Guerin art work displayed at Exposition.

September 22, 1916, Minutes of the Board of Park Commissioners.

Resolution No. 21896 of the Common Council of the City of San Diego regarding the purchase of animals now located on Exposition grounds and belonging to the Mission Bay Corporation was read and ordered filed.

Secretary was instructed to write letters to Senators Phelan and Works and Congressman Kettner asking their aid toward getting the U.S. Government to maintain the Fisheries Building permanently after the close of the Exposition.

September 22, 1916, San Diego Union, 3:4. Report today on Exposition buildings; committee to devise play to preserve Exposition is ready with its recommendations.

September 22, 1916, San Diego Union, 5:3. Children to revel in Isthmus Day frolics at Exposition tomorrow.

September 23, 1916, Los Angeles Times, II, 3:3-4. Southern California prize winners named; many Los Angeles individuals and firms included in award list of Panama-California International Exposition for Southern Counties' Building; grand prizes and medals given in a score of classes.

September 23, 1916, San Diego Evening Tribune, 2:5. Ceremonies commemorating the first mass held in California in Old Town, September 24, 1769, by Father Junipero Serra and his band of followers will be held on the lawn in the rear of the Montezuma Gardens at the Exposition tomorrow afternoon.

September 23, 1916, San Diego Evening Tribune, 5:4. Troops are quartered at the Exposition grounds again; the Second Battalion of the 21st Infantry arrived yesterday from the border. The First Battalion, at the Exposition early this year, is expected here soon when it will make camp near the Tijuana border.

September 23, 1916, San Diego Sun, 1:1-2. Exposition buildings will be used for museums; all state and county buildings, except New Mexico and Southern Counties buildings, to be removed, those named to be used for exhibits of the southwest; grouping of buildings on the Prado in three distinct groups to preserve the harmonious landscape effect, eliminating the Canadian and Varied Industries buildings; the abandonment of the Isthmus except the Painted Desert; buildings chosen to stay will remain 15 to 20 years with expenditure for upkeep estimated at \$10,000 a year; California State Building to be used for some purpose not yet determined; Fine Arts Building for periodic exhibits of paintings and other fine arts; the two buildings west of the central plaza for the installation of archaeological exhibits; the building to the north for a music pavilion and possible dance hall; the present Pan-American building at the northeast corner of the plaza for county exhibits, to be maintained largely by the county; the present Foreign Arts Building at the southeast corner for automobile shows, industrial fairs and other large exhibits; the Southern Counties Building to be used as an auditorium; the installation in one of the minor buildings of the exhibit of the Natural History Museum.

September 23, 1916, San Diego Union, 1:3. Infantry arrives at Exposition grounds from Yuma camp.

First Battalion en route to San Diego

Border call issued three months ago for First Battalion, which was stationed here at the time

First Battalion expected to be ordered to camp at Imperial Beach.

Second Battalion headquarters established at Exposition

Second Battalion answered call from Vancouver barracks

Twenty-first Infantry Band accompanied Second Battalion

Third Battalion, which has been stationed near Calexico, not under orders at present

September 23, 1916, San Diego Union, 3:2-3. Preservation of Exposition buildings, committee plan; recommends "middle course: in report to General Board.

Recommending a "middle ground: course of action between tearing down all the temporary or semi-temporary buildings of the Exposition after January, and preserving all of them, the executive committee of the general committee for the preservation of the buildings and grounds of the Panama-California International Exposition yesterday made its report.

September 23, 1916, San Diego Union, Classified, 7:1. Public wedding is feature of Isthmus program.

September 23, 1916, San Diego Union, Classified, 7:1. Antonius Salazar, the Provencal and head of the Franciscan order of the Pacific coast, to preside on Father Serra Day at the Exposition tomorrow; will plant two palms on the lawn back of the Montezuma Gardens and unveil bronze table placed between the trees in honor of padre.

September 23, 1916, San Diego Union, Classified, 7:2-3. Indians to celebrate Thanksgiving Day; ceremonies to be held at Exposition; barbecued goats, corn and squash, feature of Fiesta on Painted Desert today.

September 24, 1916, San Diego Union, 4:3. Charles T. Chandler, president of the University Avenue Bank, raps Mayor Capps; says he ought to quit; former Park Commissioner charges Mayor with "tearing down" policy.

September 24, 1916, San Diego Union, 6:2-4. Isthmus Day at Exposition voted success; auto race and public wedding day's features.

September 24, 1916, San Diego Union, 11:4. Will honor memory of Father Junipero Serra; plant palms; unveil bronze table at Exposition.

September 25, 1916, San Diego Union, 5:3-4. Father Serra Day observed before crowd at Exposition; anniversary of "the earliest San Diegan" celebrated at Exposition where church dignitaries consecrate palms and bronze tablet in Franciscan's memory..

September 26, 1916, San Diego Sun, 4:2-5. F. Weber Benton wrote letter urging retention of all buildings as a repository of art and all the sciences known to man; wants limpid lakes and winding lagoons in park for gondolas and aquatic bipennates; rustic bridges, pergolas, driveways: "There is nothing here lacking in the combination and multiplicity of the natural advantages and charms to contribute to the perfection of the embryonic Eden."

September 26, 1916, San Diego Union, Classified, 9:4-5. Hawaiian Islands' needs told in Balboa Day address; anniversary of discovery of Pacific Ocean observed at Exposition.

September 26, 1916, San Diego Union, 14:4. Philip Morse, San Diego pioneer, has composed a special poem for Cabrillo Day which is to be celebrated at the Exposition today. The poem will be read by Otto Jeancon as part of the formal program to be held at the Organ Pavilion at 2:30 o'clock.

September 26, 1916, San Diego Union, 14:5. Camera contest for Exposition views arranged; valuable prizes offered in four classes to Kodak artists who visit Exposition.

September 26, 1916, San Diego Union, 14:5. Bringing a detachment of fifteen marines for duty at the marine barracks at the Exposition and mail, coal and supplies for ships in southern waters, the naval collier *Nanshan* arrived from Mare Island last night.

September 26, 1916, San Diego Union, 14:5. Grand prize awarded the French official exhibit by the Exposition superior jury of award.

September 27, 1916, San Diego Union, 2:5-6. San Diego zoo plan of animal life students; may form society to support large collection.

Drs. Harry M. and Paul Wegeforth are interested in the promotion of a zoological society for San Diego which will have for its object the development and support of a zoological garden to be maintained out of the funds that the society will raise through dues and subscriptions.

There are a number of physicians and scientists, such as Drs. Baker, Thompson, Gregg and Archie Talbot in this city and county, who are interested in the study of animal life and it is proposed to combine them in a nucleus which will later be developed into an efficient organization

"We already have a good start," said Dr. Harry Wegeforth, "in the collection we have at the Exposition. The cost of maintaining these animals is not large.

"There are tons of animals from Mexico, Central and South America coming through our port and being distributed among cities like Chicago, New York and San Francisco. These animals are gifts. Why can't we keep some of them here? Zoological societies trade animals with each other and we can do the same thing when we get a surplus of any one species."

September 27, 1916, San Diego Union, 9:3. Many Elks coming for visit to Exposition following convention in Santa Barbara, October 9 and 10.

September 27, 1916, San Diego Union, Classified, 9:4. Cabrillo Day at Exposition celebrated.

September 27, 1916, San Diego Union, Classified, 9:4. Colonel Joseph H. Pendleton, of the Fourth Regiment, US marines, now in the midst of an active campaign in Santo Domingo, has written President G. A. Davidson that if there is any possibility of the marines "finishing their job" they want to be back in San Diego in time to take part in the close of the Exposition.

September 28, 1916, San Diego Union, 1:5. City Council again rejects Blochman for Park Commission.

September 29, 1916, Minutes of the Board of Park Commissioners.

Superintendent stated plans had been adopted earlier in the year for a pergola at the south side of the "Rose Garden: to cost approximately \$1,400, but recommended construction be withheld until after the close of the Exposition as sufficient lumber from the salvage of buildings would be available to construct the pergola.

October 3, 1916, San Diego Evening Tribune, 1:5, 5:3. Frank P. Allen says Exposition buildings must come down, by Bertram Holmes.

October 3, 1916, San Diego Sun, 1:4. Fairbanks' Day in honor of vice-presidential candidate Charles W. Fairbanks, running mate of Charles Evans Hughes.

October 3, 1916, San Diego Sun, 9:3. Soldier Boys To Parade At Exposition.

Beginning tomorrow the second battalion of the 21st Regiment, U.S. Infantry, stationed at Camp Walter R. Talliaferro on the exposition grounds, will have an important part in the special events on the exposition grounds. Col. D. J. Baker has approved of drills, parades, reviews, band concerts and inspections as follows:

Every Monday morning the 21st Regiment Band, under the direction of C. Butler, will play on the Plaza de Panama at 10:30. Drills by one company in closed order will be given in the Plaza de Panama Wednesdays, Thursdays and Fridays at 10 o'clock. Other companies will drill near the Infantry camp. Parades, reviews and escort of colors will be held daily at 3:30 on the Plaza de Panama except Saturday, Sunday and Tuesdays. Inspection of troops will be held on the Plaza de Panama every Saturday morning at 10 o'clock.

October 3, 1916, San Diego Union, 1:3. Charles W. Fairbanks, Republican vice-presidential nominee to speak at Organ Pavilion today; gates open to public without charge 1:00 to 1:30 this afternoon.

October 4, 1916, San Diego Sun, 3:1. Fairbanks, Republican vice-presidential candidate, reception a cold one; spoke before about 3,500 people at Organ Pavilion; applauded once when he mentioned name of Roosevelt.

Following an enjoyable luncheon in honor of Vice Presidential Candidate Charles Warren Fairbanks at the Café Cristobal, the distinguished visitor spoke yesterday afternoon at the exposition organ before about 3500 people.

A good breeze blew and the sun stayed intermittently on the job as Mr. Fairbanks expounded the points upon which the party will go to the polls in November to attempt to wrest victory from the Democrats. He was applauded once, when he mentioned the name of Roosevelt. Very scanty applause greeting him at other times.

He said in beginning his speech at the organ pavilion, "The last four years of Democracy have been the longest years of my life. Time has dragged; progress has been halted; there have been uncertain delays. It is always thus when the Democrats are in power.

"Let us draw near to each other now, and discuss in an intimate way our mutual welfare as American citizens.

"We are at the present time facing a greater crisis than at any time since 1861. Great changes will take place after the war. Just reflect what it will mean when 30,000,000 men lay down their arms.

"Four years ago the Democrats forswore principles adopted by the Republican party and started in to pass laws of tariff for revenue only. To 100,000,000 people this meant virtually a revolution. The tariff principles of the Democratic party have already been felt, I am informed, on the coast. It would be a very foolish Californian who would vote to perpetuate that party in power.

"This country was never devised by the Maker of all things good to be a place of panics. For this reason, it was never intended that the Democratic party should be in power."

Fairbanks left for the north following a trip to local scenic points with members of the reception committee.

October 4, 1916, San Diego Union, 1:2-6, 2:2-3. Fairbanks denounces Democratic policies in address before crowd at Organ Pavilion.

October 5, 1916, San Diego Union, 6:2. "Kings of Harmony" rival Spanish singing troupe at Exposition.

October 6, 1916, San Diego Sun, 1:6. Claude Woolman, member of Board of Education, wants one of the Exposition buildings for a high school; would relieve overcrowding.

October 6, 1916, San Diego Union, Classified, 11:1. Park Board asks for conference on Exposition buildings; some doubt on preserving the Exposition buildings by Frank P. Allen's published interview.

October 6, 1916, San Diego Union, Classified, 11:1. Verdi Day will be observed at Exposition October 9.

October 6, 1916, San Diego Union, Classified, 11:2-4. Ring Tail monkey born at the Exposition's free zoo yesterday morning.

October 6, 1916, San Diego Union, Classified, 11:5. Illinois senator J. Hamilton Lewis to speak tonight to crowd at Organ Pavilion; gates will open to the public without charge after 6 this evening.

October 7, 1916, San Diego Sun, II, 11:3-4. Senator J. Ham Lewis is applauded to echo as he rips into Charles Evans Hughes; splendid speech before a crowd that jams War of Worlds at Exposition.

October 7, 1916, San Diego Union, 1:2-3, 3:2. Large audience hears Illinois senator J. Hamilton Lewis rap Republican opponents.

October 8, 1916, Los Angeles Times, II, 12:1-5. Plan preservation of Exposition buildings; San Diegans actively at work to realize dream of great park and permanent structures on Exposition site; growing beauty of grounds powerful argument in favor of perpetuation.

October 8, 1916, San Diego Union, 13:2. Henri La Bonte, dramatic tenor, to sing at Organ Pavilion today.

October 9, 1916, San Diego Union, 14:1. Five thousand Exposition visitors attend operatic recital by Henri La Bonte, well-known tenor.

October 11, 1916, San Diego Union, 11:1-8. Second Battalion of 21st Infantry has jumped into instant popularity with Exposition visitors. . . . The four companies of the battalion, fresh from their services on the Mexican border, have added greatly to the daily events of the Exposition grounds.

October 12, 1916, San Diego Union, 8:7. 104th anniversary of birth of Father Horton will be celebrated in the gallery of California history in the basement of the Fine Arts building today.

October 14, 1916, San Diego Sun 1:1-2. Senator Phelan spoke to a big throng at the War of the Worlds building on the Isthmus last night; defended Wilson's foreign and domestic policies and praised Kettner.

October 14, 1916, San Diego Sun, 1:4. Plans for holding a Southern California products fair at the Exposition for a month each year; scheme would provide for a permanent experiment station under auspices of the state university; would advertise Southern California to the world.

October 14, 1916, San Diego Sun, 2:4-8. Art and Artists, by Beatrice de Lack Kromback: Week of October 15th to October 21st.

October 14, 1916, San Diego Union, Classified, 9:1. United States Senator James D. Phelan and George S. Patton, senatorial candidate, spoke to about 1500 people at the Exposition last night; denounced policies of Governor Hiram Johnson.

October 14, 1916, San Diego Union, 14:2. Joe Bocquel, world-renowned aviator, to fly at Exposition last of month.

October 15, 1916, San Diego Union, 2:4. Chrysanthemum garden, just back of Organ Pavilion, wins praise from numerous visitors; about 10,000 blossoms representing 40 varieties.

October 15, 1916, San Diego Union, 6:2. Los Angeles County Day draws record Saturday crowd at Exposition; Hollywood musicians give formal program at Organ Pavilion.

October 16, 1916, San Diego Sun, 9:3. Sham battle feature at Exposition; Second Battalion of 21st Infantry to be seen Wednesday.

The Second battalion of the 21st U. S. Infantry, in command of Major J. P. Harbeson, will be inspected in heavy marching order and will attack a trench defended by an imaginary enemy on the Plaza de Panama at the Exposition Wednesday afternoon at 3:30 o'clock, in addition to presenting the regular review and parade. These drills are designed to show the various military ceremonies of the army and the preparations for war constantly being made by the army units.

The inspection of field equipment will precede the sham attack and will consist in each man preparing his individual equipment for the inspecting officer. In the attack one company will move towards the enemy under imaginary fire, supported by the other two companies, and will make the final charge with fixed bayonets.

ENGAGE TENOR

The engagement of Enrico Aresoni, celebrated dramatic tenor, by the Exposition for a series of concerts with Tommasino's Royal Italian Band, has met with numerous expressions of approval on the part of local music lovers, who view it as one of the most important musical events of the Exposition period. Signor Aresoni will make his first appearance at the concert tomorrow afternoon from 4 to 5 o'clock on the Plaza de Panama, and will sing several selections of operatic airs.

Aresoni has sung with many of the leading opera companies of American and Europe, including the Milan Grand Opera Company, the Boston Grand Opera Company, the Paris Grand Opera Company, and the Belgian Royal Opera Company, and has appeared as soloist with the Minneapolis Symphony Orchestra. The Exposition engagement marks his first appearance in California, and will last one week.

October 16, 1916, San Diego Union, 5:4. Varied program offered today.

A varied program of events including concerts and military drills will be offered at the Exposition today, which is automobile and invalid day. Automobiles will be allowed on the grounds from 8 a.m. until midnight.

From 10:30 to 11:30 this morning the band of the Twenty-first U.S. Infantry will play at the U.S. Government Building, and at 3:30 o'clock this afternoon the Second Battalion will present a review and parade on the Plaza de Panama. From 3 to 5 o'clock a tea and reception will be given for Exposition visitors in the blue room of the Southern California Building and Tommasino's band will play in the patio of the building from 3:30 to 4:30 o'clock.

In addition to these events the regular program of band concerts, an organ recital, entertainments by the Spanish singers and dancers, lectures and demonstrations, and free motion picture entertainment on the Isthmus stage at 8:30 o'clock tonight will be offered.

October 16, 1916, San Diego Union, 5:6. Battalion plans sham battles at Exposition.

October 17, 1916, San Diego Sun, 4:2. The Twenty-first U.S. Infantry band will give concert tonight at the U.S. Fisheries Building.

October 18, 1916, San Diego Sun, 1:2. Ex-park commissioner Charles T. Chandler appropriated park shrubs and labor to decorate 4th Presbyterian Church last June in preparation for the wedding of his daughter according to a bill placed before City Attorney Cosgrove by Mayor Capps.

October 18, 1916, San Diego Sun, 1:8. Mayor Capps wants efficiency manger in charge of Park Board's bills and expenditures; expert Hetzel discovered unpaid bill to San Diego Electric Company for \$3,807.50 to be due for excavating work rendered to Spreckels Corporation in its park line.

October 18, 1916, San Diego Sun, 7:1. Socialist Allen Benson to speak tomorrow evening at Organ Pavilion; directors declared a free night after 6 o'clock.

October 19, 1916, San Diego Sun, 1:6. Forward resigned from Park Board yesterday afternoon, leaving Thomas O'Hallaran, Mayor Capps' recent appointee, the only member; Forward blames O'Hallaran for creating furor in regard to \$3,800 bill against Spreckels Railway. . . . Forward said: "Mr. Spreckels had agreed to put \$2,500 toward building a new roadway, continuing 12th Street boulevard through the Exposition, the Park Board to do the work. On completion it was discovered that it totaled \$3,800. The Railroad has not agreed to such an amount and was holding the bill pending some settlement."

Charles T. Chandler said decorating church for his daughter's wedding was not done at his request, but was performed as a courtesy by the Park Department. He said he would pay the bill rather than see anybody fired.

October 19, 1916, San Diego Union, 1:3, 2:3. Forward offers to quit Park Board; President of Board sends in resignation to mayor.

October 19, 1916, San Diego Union, 1:6, 2:6. Chandler answers charges; park flowers sent to his daughter's wedding as a courtesy; came as surprise to him; relates his version of the case.

October 19, 1916, San Diego Union, 4:1. EDITORIAL: Mr. Forward's Resignation.

The city cannot afford to lose Mr. Forward's services in the position that he has filled so long and so creditably.

October 19, 1916, San Diego Union, 4:5. Explains matter of park grading; former official tells about bill to railway company and steps to adjust it.

October 19, 1916, San Diego Union, 5:2-3. Infantrymen will rehearse sham battle at Exposition.

October 19, 1916, San Diego Union, 14:2. "Taking a Trench," Exposition program a hit; Infantrymen and Italian tenor afford entertainment to big weekend crowd.

October 20, 1916, San Diego Sun, 1:4. Mayor Capps will present names of two citizens before Council to succeed Carl Ferris and John Forward; Council had previously refused to confirm L. A. Blochman.

October 20, 1916, San Diego Sun, 2:2. Battle of the Painted Desert will be fought at Exposition tomorrow afternoon between the Second Battalion of the 21st U.S. Infantry and the Indians; scenario formulated by Major J. P. Harbeson.

October 20, 1916, San Diego Sun, 9:1-2, Benson scores Wilson and Hughes; spoke to more than 3,000 men and women.

October 20, 1916, San Diego Union, 4:2-3. Frederick W. Taylor of Denver says San Diego hits new note in Expositions.

October 20, 1916, San Diego Union, 5:1. Socialists hear standard bearer Benson speak at Exposition; hits Wilson and Hughes.

October 20, 1916, San Diego Union, 5:2-3. Infantrymen to fight Indians at Exposition; sham battle tomorrow.

October 20, 1916, San Diego Union, 5:5. Bret Harte Day today.

October 20, 1916, San Diego Union, 8:1. Park secretary Pendleton assumes blame for floral gift to Chandler wedding.

October 20, 1916, San Diego Union, Classified, 9:1. Mayor Capps to accept resignation of Park Board president.

October 21, 1916, San Diego Union, 5:1. Roar of battle to sound at Exposition this afternoon.

October 22, 1916, San Diego Union, 1:4-5, 3:5. American troops storm Painted Desert, driving Indians to surrender with big losses.

October 22, 1916, San Diego Union, 10:7-8. Big parade will feature Housewives' Day program.

October 23, 1916, San Diego Sun, 1:2. Governor Johnson to speak at Exposition tomorrow at War of the Worlds building at 8 p.m.

October 23, 1916, San Diego Sun, 1:4. Expert Hetzel finds Park Board purchased large carp at \$4.40 each.

October 23, 1916, San Diego Union, 1:4-5. Peace Day planned at Exposition October 29; Mabel Normand to be guest.

October 24, 1916, San Diego Sun, 1:2. Chandler sends check for \$95; railroad bill pending.

October 24, 1916, San Diego Sun, 1:3-6. EDITORIAL: Consider California and Governor Hiram Johnson, her distinguished son.

October 24, 1916, San Diego Union, 1:4, 2:3. Fish "scandal" hits snag; purchase made by Exposition officials, not Park Board.

October 25, 1916, San Diego Sun, II, 9:1-2. Governor Johnson fighting to carry state's progressive laws to nation; declares he's man who routed machine politics.

October 25, 1916, San Diego Union, 6:3. Edwin Markham, California writer, to be honored at Exposition tomorrow.

October 25, 1916, San Diego Union, 14:4. Governor Johnson addresses large audience at Exposition; says Republican party stands for "America First, America Fit, American Efficient."

Governor Hiram Johnson spoke last night before an audience which not only filled every seat in the War of the Worlds Building, but which necessitated 200 extra chairs --- all that could be added to the place -- and then packed the aisles and stood two deep around the walls. The normal seating capacity of the building is 1,466. Governor Johnson spoke to urge the candidacy of Charles E. Hughes for president, in support of the Republican platform and for national preparedness of industry and government as well as for fighting, equal suffrage, protective tariffs, social health and social justice.

“My ambition is to write the glorious story of California’s political achievements in the last six years into the laws of the nation.”

October 26, 1916, San Diego Sun, 1:6. San Diego today has a Park Board largely as the result of an exclusive story in **The Sun** last night that Councilman Fox and Schmidt were blocking the mayor’s plan to appoint George W. Marston and Arthur Cosgrove to fill the places of the former commissioners Carl Ferris and John Forward, Jr.; at 2:15 Fox changed his mind.

October 26, 1916, San Diego Sun, 2:1. Peace Day plans are completed; occurs at Exposition tomorrow; famous aviator flies today.

October 26, 1916, San Diego Union, 1:7-8. G. W. Marston and A. Cosgrove placed on Park Board.

October 26, 1916, San Diego Union, 5:1-4. Housewives’ Day will be made regular event following success of initial event at Exposition.

October 27, 1916, Letter, F. H. Wurster, Wurster Construction Company to Mr. Stanley Hale and Mr. George W. Marston (1915 Exposition: Letters and Minutes/Committee of Preservation of Exposition Buildings, n.p., 1916).

By waterproofing the outside walls below grade, and giving the exterior plaster and staff sufficient preservative and paint and the roofs a layer of pitch and some minor repairs and by renewing the paint at the usual intervals the buildings in question can be preserved in good shape for a period of from 15 to 20 years.

Science and Education, Russia and Brazil, Panama-Pacific, Foreign Arts, Southern California counties.

October 27, 1916, Minutes of the Board of Park Commissioners.

Present: O’Hallaran, Marston and Cosgrove (Forward and Ferris had resigned)

Marston: Mr. Wurster of Wurster Construction Company reported 18 inches of water was standing under the Panama-Pacific Building.

October 27, 1916, San Diego Sun, 1:3. Nationwide Woodrow Wilson day is to be observed at the exposition tomorrow.

In all the cities of the country President Wilson’s message to his fellow citizens will be read at gatherings. In San Diego the meeting will be held at the exposition organ at 7:30. H. L. Moody will read the president’s message to the people, and Joe Rush, of Los Angeles, will give an address. W. F. Reyer will sing “My Own United States.”

Tommasino’s band will give a half-hour concert preceding the program. Because of the fact that it is Saturday, no free gate will be in force.

The committee in charge today requested all citizens to decorate stores and homes with flags in honor of Woodrow Wilson day.

October 28, 1916, San Diego Sun, 2:8. Peace Day plans completed; committee of schoolchildren to bury implements of war; to be held on lawn in back of the Montezuma Gardens at 4 o’clock; Miss Mabel Normand will plant an olive tree and make a short address; aviator Joe Boquel will fly over the spot and drop a wreath.

October 28, 1916, San Diego Union, 1:4. Bulldog becomes foster mother to lion cubs at Exposition.

October 28, 1916, San Diego Union, 6:5. City officials quickly contradict William Templeton Johnson; deny that water system is polluted.

October 28, 1916, San Diego Union, Classified, 9:2-3. Charles C. Moore, northern Exposition chief, guest of San Diego Exposition.

October 28, 1916, San Diego Union, 14:3. Joe Boquel will fly above Exposition aviation field today.

October 29, 1916, San Diego Union, 7:2. Boquel startles crowd with evolutions in air above aviation field.

October 29, 1916, San Diego Union, Sports, 2:1-4. City playground work grows; extensive program arranged.

October 30, 1916, San Diego Sun, 5:1. Superintendent MacKinnon appeared before the Preservation Committee recently and asked for the use of one of the Exposition buildings; after that, the question of selecting a site on the Exposition grounds for a new group of high school buildings could be undertaken; a similar report will probably be submitted to the Park Board.

October 30, 1916, San Diego Sun, 5:4. Free dance night at Exposition casino; first public dance to be held; two concerts by Tommasino's Royal Italian Band in front of U.S. Fisheries Building; motion pictures on Isthmus stage.

October 30, 1916, San Diego Sun, 6:1-2. Twelve thousand men and women listed to a debate on the wet and dry question at the stadium yesterday.

October 30, 1916, San Diego Union, 1:3-4. Mabel Normand, movie star, presided at Peace Day exercises yesterday at the Montezuma Garden.

October 30, 1916, San Diego Union, 1:7, 5:1-7. Thousands hear liquor debate at City stadium; minister and attorney present "wet" and "dry" sides of prohibition question.

October 30, 1916, San Diego Union, 3:3-4. Moore's plan is for annual Spanish festival at Exposition.

President Charles C. Moore of the San Francisco Exposition, who left Saturday by automobile for his home after he and Mrs. Moore had passed several days visiting the Exposition as guest of President G. A. Davidson, was greatly impressed with the wonders he found on the Exposition grounds. Before leaving San Diego Moore was asked for an opinion of the Exposition, and the following statements made by him show his wonderful grasp of fundamentals and offer of a constructive idea for the future. It also is a warning to every San Diegan;

"I am confident that the people of San Diego and California do not realize how near to a close is the beautiful exposition that for the last two years has been so much a part of all their lives, and their pride and their affection, that unconsciously the thought has come that it is going on just as it has indefinitely.

"While San Diego is be congratulated that no city --- no Exposition city --- ever before will be able to retain for permanent public use such a large percentage of the Exposition grounds and buildings, yet it must not be forgotten that an Exposition is something more than an material things --- it is, in a sense, a spirit, and by such reasoning it has a soul. By the measure of earthly things, therefore, the Exposition finis is written for December 31 --- New Year's Eve ---. Even if some of the exhibits remain, and though the lights are just as bright, and the shrubbery just as green, yet the Exposition will be dead. Its spiritual light is out, and all that its lovers will have is the journeys in the realm of memory.

"It is a beauty spot and, as so often expressed, a real gem. The transformation of the barren park acres a few years ago to the present entrancing picture shows the possibilities of California soil and sunshine. As such it is, and always will be, a real asset to the Golden State. I will not attempt to paint the lily, nor can I

hope to embellish by words the great praise and beautiful word pictures that have been presented by master minds on the beauties of the San Diego Exposition; but Mrs. Moore and I have enjoyed our visit immensely -- enjoyed the Exposition and the hospitality of San Diego people and carry away with us the most cordial and kindly thoughts and will hold for San Diego and its future always the warmest good wishes and as friends and fellow Californians.

“One final thought: I can see with the arrangement of the architecture, the beautiful grounds, the space available, the lordly setting, a chance on the part of San Diego to do not only a good to California, but really national --- almost world service. San Diego is connected in the mind of the visitor with the early days of California, with the mission life. If it were possible to arrange to have held here annually for say two weeks a real festival commemorating the days of Spanish occupation, the mission life, presenting in true California spirit, and as San Diego can so well interpret such spirit, a portrayal of the life, the customs, the sports, the ideals of those early days, I believe earnestly that such an institution would in a short time become the Mecca for all those --- and numbers legion --- who will have the thought of early and romantic California and what the missions and the padres stand for.”

October 31, 1916, San Diego Sun, 7:6. Halloween Ball to be held at Casino tonight.

October 31, 1916, San Diego Union, 3:1. Aviator Boquel's life endangered by searchlight; giant beam turned on aeroplane in flight at Exposition Sunday night; there will be no flight tonight and none tomorrow.

October 31, 1916, San Diego Union, 3:2. Alaskan exhibit at Exposition adds seven samples of Arctic zone products; vegetables grow to full size in one day.

October 31, 1916, San Diego Union, 3:2. Tomorrow afternoon the organ recital will be given by Royal A. Brown.

November 1, 1916, San Diego Sun, 1:4. Park gets valuable collection; Mrs. H. J. Tilden of Venice donated a collection of antiques to city last year; given into custody of Park Board; expert Hetzel and U.S. appraiser Furlong appraised their value at \$5,450; some of collection were at home of Carl I. Ferris, ex-park commissioner, another portion in basement of Fine Arts Building; collection deteriorating because of neglect and poor treatment.

November 1, 1916, San Diego Sun, 3:4. Ina Coolbrith Day tomorrow at California Counties Building; reading of poetry, songs and lecture.

November 1, 1916, San Diego Sun, 3:6. Children's Fair to be given December 1, 2 and 3 under auspices of Federated Teachers' Association; more than 600 awards to be given for children's work; open to every school child in San Diego County.

November 1, 1916, San Diego Sun, 6:5. Joe Boquel made 15 corkscrews yesterday afternoon.

November 1, 1916, San Diego Union, 8:5-6. A joint celebration in Honolulu and at the Exposition will be held Thursday, November 16, marking the 23rd anniversary of the abdication of Queen Liliuokalani, ruler of the former Hawaiian monarchy.

November 1, 1916, San Diego Union, 14:2. Harold Bell Wright to be honored at Exposition on November 9.

November 2, 1916, San Diego Sun, 2:3-4. Carl Ferris, the Park Board, expert Hetzel and **The Sun**.

The Sun denies inference of any crime or misdemeanor on the part of Mr. Ferris in the story regarding the Tilden collection.

November 2, 1916, San Diego Union, 5:5. Ferris says **Sun's** story is unfair and outrageous; former park commissioner makes statement on sick bed at St. Joseph's Hospital; reference to his part in procuring and protecting a collection of antiques donated to the city park system by Mrs. H. J. Tilden of Venice, California.

November 2, 1916, San Diego Union, 5:3. Children's fete to be celebrated at Exposition, December 2.

November 2, 1916, San Diego Union, 5:4. People to vote on giving Dutch Flats to government.

November 3, 1916, Minutes of the Board of Park Commissioners.

City Auditor Moody showed a balance in the Park Improvement Fund of \$27,315.14 as of October 31.

Secretary showed balance of \$26,918.28, the difference due to 1915 bills payable in 1916.

Committee of Preservation of Exposition Buildings appeared before the Board (Mrs. Kendall, Dr. Hollington, Mr. Hale and Mr. Drake); recommendations accepted as a general statement for a tentative plan only.

President G. A. Davidson explained necessity of post-Exposition period; gates to grounds should remain closed for 3 to 6 months to protect property; Canadian, French, United States Government and other exhibits could be persuaded to remain for a least 90 days; 21st U.S. Infantry and band could be retained in its present quarters; efforts being made to secure early return of 4th Marine Corps with its band, and a squadron or more of the First U.S. Cavalry and band; admission fee to be charged but not to exceed 25 cents during post-Exposition period; small expenditure necessary to provide guards for exhibits.

Superintendent recommended:

planting front of stadium

planting 20,000 pine trees that are in Nursery rows in Switzer Canyon

planting about 2,000 oaks north of Cabrillo Bridge to the north boundary of Cabrillo Canyon

realigning, grading and surfacing Cabrillo Canyon Road

consolidating Park and Exposition nurseries

realigning east side of Golden Hill Road

regrading road from 18th Street to the foot of the grade near Cobblestone Bridge

widening Cobblestone Bridge in Switzer Canyon

enlarging aviary cage

providing quarters for bears donated by Colonel Hutchinson

building suitable cage of monkeys donated by J. D. Spreckels

Mr. Frank G. Kaufman petitioned to operate a zoo in park; proposition held in abeyance until matter could be discussed with certain citizens who are contemplating the forming of the San Diego Zoological Association.

November 3, 1916, San Diego Sun, 5:1. Women's Wilson Day is observed at Exposition; free hour in morning; Kettner and well-known women speak.

November 3, 1916, San Diego Union, 1:4-5, 3:4-5. Hot protests meet District Attorney Marsh's reflections on pupils' morality; Parents Teachers Association expresses confidence in high school instructors.

November 3, 1916, San Diego Union, 3:6. Ferris to confer with attorneys on **Sun** attack; former park commissioner taken home; declares he will not tolerate stories.

November 3, 1916, San Diego Union, 5:1. Plan to preserve Exposition buildings meets with favor; Committee to confer with Park Board on subject this afternoon.

November 3, 1916, San Diego Union, 5:2. Exposition aviator claimed he wrote the name of next president on air lane; crowd is still in suspense.

November 4, 1916, San Diego Sun, 12:1-2. Enthusiasm for President Wilson is unbounded as speakers are heard at Organ Pavilion.

November 4, 1916, San Diego Union, 5:1. Gold medal to be presented to Boquel by Exposition; daring aviator will write his farewell in sky at Exposition tonight.

Before Joe Boquel writes his farewell in the sky tonight at the Exposition the management will present him with a gold medal as a token of appreciation for his wonderful feats. The "sky dragon" will be honored this afternoon, following his flight at 3:30 when President G. A. Davidson will present him with a specially engraved medal.

A stand will be brought to the aviation field so that all may see the little program to show that San Diego appreciates Boquel's wonderful work. Boquel's night flight will be a 9 o'clock.

He established himself in San Diego at his first flight, and since that time he has given some new examples of brilliant daring every time he has gone into the air. His wing over wings, spirals, quick turns and low loops have startled San Diego residents and have aroused the admiration of the army flyers of the government aviation station at North Island. They concede Boquel to be "the best ever," and there has not been a single flight without a good delegation of the army flyers on hand. In turn, Boquel has received many favors at the hands of these men who have aided him in repairing his motor.

November 4, 1916, San Diego Union, 7:3. Ina Coolbrith Day at Exposition Thursday afternoon great success; lecture by George Wharton James in Southern Counties Building.

November 4, 1916, San Diego Union, 8:3. Women speak for President during Woodrow Wilson Day yesterday at Exposition.

November 4, 1916, San Diego Union, Classified, 9:1. Minutes of Fair Board show prosecutor Marsh's charge to be baseless; Marsh was not asked to wink at law, Belcher asserts.

November 4, 1916, San Diego Union, Classified, 9:2-3. Marsh opens mouth too wide and puts foot into it; then raises cloud to befog issue.

November 4, 1916, San Diego Union, Classified, 9:4-5. Protest at Marsh's words continue; are regarded as reflection on school.

November 5, 1916, San Diego Union, 1:8, 3:5-6. Boquel, trying greatest flight, crashes to death; throng at Fair sees long drop; daring aviator, finishing one of sensational feats, is swept to earth in dizzy swoop; instantly killed; cause of drop unknown; flyer foresaw tragedy.

November 5, 1916, San Diego Union, 15:5. Park Board approves committee plans; preservation of several buildings at Exposition is discussed in conference.

Approval of the preservation committee's plans for the retention of several of the Exposition buildings for recreational and other purposes substantially was given by the park board yesterday at a conference between that body and a committee from the preservation committee, consisting of G. A. Davidson, Mrs. E. I. Kendall, Dr. R. D. Hollington, Stanley Hale, and Earle F. Drake.

The reports of the Wurster Construction Company and John L. Bacon were submitted and discussed. These reports were in practical agreement that with comparatively small expense the buildings which it is desired to preserve may be put in condition to last from ten to fifteen years.

The park board unanimously agreed to accept the report of the committee as to its tentative plans and asked the committee to continue in an advisory capacity to work out the details with the board.

The suggestion has been made that Preservation Day be observed on the Exposition grounds, January 1, and this may be done to arouse public interest in the movement.

November 5, 1916, San Diego Union, Classified, 1:4. Miss Eleanor Lee, contralto from Claremont, will appear in ten numbers at Exposition today.

November 6, 1916, Minutes of the Board of Park Commissioners

Mr. Davidson and Secretary Pendleton requested to prepare a memorandum of the fixed monthly expense necessary to carry on a Post-Exposition period.

November 6, 1916, San Diego Sun, 11:1. Military honors were paid here to daring Joe Boquel, intrepid aviator, who fell to his death at the Exposition Saturday while doing his hair-raising "Falling-leaf" trick; military escort accompanied body from Johnson and Saum's establishment to the train where it was shipped to Boquel's wife in San Francisco; may have become dizzy in his fall and lost control of his facilities or may have encountered a pocket of wind that prevented him from righting his machine as he fell into a deep canyon; Boquel did the most hair-raising stunts of his entire career in Saturday's flight. After writing "Farewell" in the sky he tumbled about like a madman, finally dropping west of the tractor field, across the canyon. He fell close to 300 feet in the final drop as thousands watched. Few of them realized he was going to his death, as he had done the same thing before in play. The aeroplane crashed with a thud into a small sapling and practically drove the radiator into the ground.

Boquel left a wife and 13-year old daughter in San Francisco. He was 32 years old, and had been flying since 1912. He was probably the most daring aviator in the business.

November 6, 1916, San Diego Union, 1:3. Citizens to pay honor to airman; military funeral for Boquel to be held; body will be sent to wife in north; crowds visit wreck scene.

November 6, 1916, San Diego Union, 2:5-6. Treacherous air current dragged Boquel to death.

November 6, 1916, San Diego Union, 7:1. Kettner parade plans arranged; public invited; Democratic Congressional candidate will close campaign at Exposition.

November 7, 1916, San Diego Union, 1:4-5, 3:4-5. Thousands bow heads in grief as funeral of aviator moves slowly through streets; San Diegans pay last farewell to Joe Boquel.

November 7, 1916, San Diego Union, 2:2-3. Kettner makes final speech of campaign; crowd cheers Congressman at Exposition following long automobile parade.

November 7, 1916, San Diego Union, Classified, 9:3. Hawaiian Day at Exposition; Queen Lil to press button; royal salute to be fired when flag of old monarchy is raised.

November 8, 1916, Minutes of the Board of Park Commissioners

Secretary reported that the monthly expense for a Post-Exposition period would be approximately \$5,252.50, which would include the expenses the Exposition will be responsible for during the packing up of exhibits and winding up of all Exposition business; also a report showing the approximate monthly expense to the Park Board, should it undertake the management of a Post-Exposition of \$1,575.00.

Motion carried that the Park Board is not in favor of conducting a Post-Exposition.

November 8, 1916, San Diego Sun, 1:4-5. Woodrow Wilson leads County; Kettner wins.

November 8, 1916, San Diego Sun, 2:4. Thursday, November 9, to be Harold Bell Wright Day and George Sterling Day.

November 8, 1916, San Diego Union, 1:1-8. Election is in doubt; prohibition in state seemingly beaten; close contest being waged between Wilson and Hughes in California; Wilson leading with 232 electoral votes; Hughes records 218.

November 8, 1916, San Diego Union, 2:3. Hughes carries County by 450; prohibition amendment also wins here; Johnson gets a heavy vote.

November 8, 1916, San Diego Union, Classified, 10:6. Plan for growth of high school; two propositions made: One is to give the board of education the use of the Southern Counties building and the model farm at the Exposition. The other is to donate 15 acres of ground in the vicinity of the Golden Hill playground, where a new building would have to be erected.

Superintendent MacKinnon said yesterday that it is imperative that the high school should have more room. He maintained that class rooms are needed and that the agricultural and horticultural departments should be separated from the present group and situated where the students can carry on agricultural pursuits on a large scale.

If it is found impractical to use the model farm at the Exposition grounds, Superintendent MacKinnon's plan is to ask the City Council for the use of a part of the pueblo lands.

Plans discussed by the park commission in a tentative form is to cut off the south section of the park at Date Street and devote the strip from the high school to the Golden Hill playgrounds to locating public and semi-public institutions.

November 9, 1916, San Diego Sun, 7:1. Exhibitors favor spring continuance of Exposition; officials not in favor because of \$1,000 a day cost of operation aside from municipal services such as fire and police protection and street cleaning; indications from railroads and other sources is that after the holidays an unprecedented influx of eastern tourists will invade Southern California; Mayor Capps favors continuance as do French, Italian and Canadian exhibitors.

November 9, 1916, San Diego Union, 1:1-8. Hughes jumps in lead; state stays wet by substantial majorities; GOP leader has 239 electoral votes and President Wilson 232.

November 9, 1916, San Diego Union, 1:1-8. Wilson tops Hughes in California by 4,410 with race undecided.

November 9, 1916, San Diego Union, 1:1-8. Hughes holds slight lead in San Diego County vote; Republican candidate's majority is slightly more than 100.

November 9, 1916, San Diego Union, Classified, 9:2-3. Isthmus attractions are setting for "The Butterfly Girl," a movie comedy being filmed by the Pollard Motion Picture Company.

November 9, 1916, San Diego Union, Classified, 9:3. Model bungalow tea program this afternoon.

November 10, 1916, Minutes of the Board of Park Commissioners.

Dr. Harry Wegeforth and Dr. Thompson appeared before the Board regarding the handling of the park zoological collection; advised to put proposition in writing.

Dr. Wegeforth and his brother also interested in acquiring Exposition emergency hospital.

Change of grade of roadway at 28th and Date Streets on east boundary of park approved; Mrs. J. Frank Over to bear expenses of same.

Secretary advised to instruct Mr. F. G. Kaufman that his proposition regarding the park zoo was respectfully declined.

November 10, 1916, San Diego Herald, 1:2. Boquel buried with military honors.

November 10, 1916, San Diego Sun, 2:4. Saturday, November 11, Isthmus parade and taking of motion pictures; dance in Casino.

November 10, 1916, San Diego Sun, 4:2. "Welcome Day" to be observed at Exposition November 18; children of San Diego County schools to be actors; planned as a welcome to California migrants, including birds and people.

November 10, 1916, San Diego Sun, 8:3. George Sterling and Harold Bell Wright greeted at Southern Counties Building yesterday; George Wharton James talked about Sterling's life and works.

November 10, 1916, San Diego Union, 1:1-8. Wilson re-elected; winner in California by less than 3,000.

November 10, 1916, San Diego Union, 2:2. French nation expresses thanks for Exposition award.

"The grand prize that has been awarded to the French national exhibit is a new and precious mark of your appreciation and the esteem in which you hold the efforts of our artists and manufacturers."

(Signed) "Tirman"

November 10, 1916, San Diego Union, 2:4. Colonel Pendleton selected for Brigadier General.

November 10, 1916, San Diego Union, 8:1. "Welcome Day" to be observed at Exposition, November 18; program being prepared for bird and people migrants by pupils.

November 10, 1916, San Diego Union, Classified, 9:4-5. Samuel Stack, city park gardener, recommends new rose.

November 11, 1916, San Diego Sun, 5:2. George Sterling Day a success.

November 11, 1916, San Diego Union, Classified, 9:2. Leopold Godowski, famous pianist and his wife visit Exposition.

November 13, 1916, San Diego Sun, 1:5. Exposition attractions are closed up; '49 Camp and another beer garden, known as Weiland's have suspended operation; O'Hallaran said: "Credit is due Mayor Capps." The Park Board had been directed by him to order the "raw" attractions closed.

The exposition officials were warned by the park board to clamp the lid on some Isthmus attractions in conformity with state and municipal laws.

Secretary H. J. Penfold of the exposition board denied that the liquor concessions had been summarily barred from business.

"Their licenses expired," said Penfold.

November 13, 1916, San Diego Sun, 3:3. Mrs. Jane Litzenberg, dramatic soprano, appeared in concert at Organ Pavilion yesterday afternoon.

November 13, 1916, San Diego Union, 5:1. Closing weeks of Exposition to be lively.

November 14, 1916, Minutes of the Board of Park Commissioners.

Proposition from Mr. Guy A. Reed, secretary of the New Mexico Exposition Commission, regarding disposal of New Mexico Building.

President Davidson stated Exposition was bound to give exhibitors and concessionaires 90 days to get packed up and out of the grounds; requested Board to grant Exposition right to close gates for four months from January 1 with authority to charge 25 cents for adults and 10 cents for children between ages of 6 and 16 for admission to grounds; Exposition would agree to turn over to Park Board all funds received over and above the actual operating expenses; Board not to be liable for any expenses in connection with the operating of the grounds during said period; Park Board to confer with Mayor.

Secretary instructed to notify Santa Fe Railway Co. it would gladly accept the Indian Village.

Secretary instructed to advise the Harvester people it would accept their building and planting.

Davidson recommended Board allow Pollard Moving Picture Co. picture studio on Isthmus.

Superintendent instructed to provide guard for the San Diego Museum collection after the close of the Exposition period.

Secretary authorized to purchase show cases in the Southern Counties Building to house the Tilden collection.

Tommasino's Band permitted to continue playing in the park until the date of their engagement with the Coronado Beach Co., June 1; all expenses of said band to be taken care of by Louis Gasdia, manager of the band.

November 14, 1916, San Diego Union, 7:1. Camera contest to close New Year's Eve; prizes to be awarded a few days later.

November 14, 1916, San Diego Union, 7:5. Hawaiian program arranged for Thursday.

November 14, 1916, San Diego Union, Classified, 9:2. Children's Whistling Chorus will lead Bird Day program at Exposition Saturday.

November 15, 1916, San Diego Sun, 2:5. Thursday, November 16, Joaquin Miller Day and Hawaiian Day.

November 15, 1916, San Diego Union, 5:1-6. Rufus Choate explains benefits of tidelands cession to United States.

November 15, 1916, San Diego Union, Classified, 10:2. Ice Rink at Exposition will close tonight with prize contest between masked skaters.

November 15, 1916, San Diego Union, Classified, 14:1. Hawaiian flavor will pervade Exposition tomorrow pressing of button in Honolulu by former Queen Lil to inaugurate program.

November 16, 1916, San Diego Sun, 9:4. Hawaiian Day dinner and dance tonight at Cristobal Café.

Hawaii is honored at the exposition today and the ceremony that is being held this afternoon and tonight is providing entertaining features to thousands of exposition visitors. Following the formal program on the Plaza this afternoon, the reception in the Hawaiian section of the Pan-Pacific building, and the organ recital by Dr. H. J. Stewart, featuring a fantasia of Hawaiian melodies of his own arrangement, a program of special interest is to be given tonight.

A Hawaiian dinner will be served at the Cristobal café and at 8:45 the big Hawaiian ball will begin at which every woman guest will be give one of the Hawaiian ilima leis. The music for the dance will be novel in San Diego and every number will be to Hawaiian song sung by natives of the islands.

At 7:30 a Hawaiian tableau will be given on the Mirror Pool where red fire will be burned, and motion pictures of Hawaii's famous Kilauea volcano will be shown. Hawaiian singers in outrigger canoes will paddle about the waters of the Mirror Pool, lending a picturesque touch to the entertainment.

The program for this afternoon includes the unfurling of the flag of the Hawaiian monarchy by wireless flash from Queen Liliuokalani in Honolulu; concert by Twenty-first Regiment, U.S. Infantry band on the Plaza de Panama; reading of messages from Queen Liliuokalani and Governor Lucius E. Pinkham; addresses by Vice President Carl H. Heilbron and Frederick A. Halton. Today is the anniversary of King Kalakaua and the anniversary of the Queen's abdication of the Hawaiian throne.

Among the dinner parties arranged for the Cristobal tonight is that of Frederick J. Halton, who will have as his guests exposition officials and several prominent San Diegans.

November 16, 1916, San Diego Union, 1:6. Birth mystery puzzles zoo Superintendent Kaufman; officials fail to learn number of cub lions born owing to mother's disposition.

November 16, 1916, San Diego Union, 5:2. Fairies and birds to dance, warble greetings on California Welcome Day; Exposition Board announces program for Saturday's festivities on Isthmus.

November 16, 1916, San Diego Union, 5:3. Unique hotel to be erected at Exposition; hostelry will cater to animals exclusively and be situated on Isthmus; will be occupied by dogs and monkeys exclusively as the Don Carlos show has just entered into a contract with Exposition officials for this novel attraction that appeared in the San Francisco "Zone."

November 16, 1916, San Diego Union, 5:5. Monty Austin, San Francisco baritone, will sing with Tommasino's Band tomorrow afternoon.

November 16, 1916, San Diego Union, 6:3-4. San Diegans to honor Joaquin Miller at Organ Pavilion today.

November 17, 1916, Minutes of the Board of Park Commissioners.

Pollard Picture Plays Company wanted permanent use of buildings on the Isthmus for a motion picture studio; held over.

Executive Committee of Exposition asked to be relieved from further expenditure for the care and maintenance of Exposition grounds; Secretary asked to prepare financial statement of costs.

Mr. Victor Kramer wanted to use the entire Isthmus as a moving picture studio; held over

Commissioner O'Hallaran and Superintendent appointed as a committee to provide suitable signs and place same at various entrances to the west side of Balboa Park; said signs requesting citizens to protect plants and other property belonging to the Park Department.

November 17, 1916, San Diego Sun, 4:2. "Welcome Day" plans completed.

November 17, 1916, San Diego Sun, 5:3. Famous cats are coming to Exposition; visitors will have reception everyday they are on the grounds in the Casino.

November 17, 1916, San Diego Union, 5:2-4. Queen Lil extends greetings to San Diegans on Hawaii Day.

November 17, 1916, San Diego Union, 8:3. F. G. Kaufman, keeper at Exposition zoo, saves life of big leopard by antitoxin serum treatment.

November 17, 1916, San Diego Union, 8:4. Ice Rink at Exposition to remain open until end of year.

November 17, 1916, San Diego Union, 10:1. Children to take part in Welcome Day program tomorrow; will play, sing, speak and whistle at Organ Pavilion.

November 23, 1916, San Diego Union, Classified, 10:4. Judges to announce cat show awards.

November 24, 1915, Minutes of the Board of Park Commissioners.

The regular meeting of the Board of Park Commissioners was held in the President's Office, in the California Building, at 4:00 p.m.

Present: Commissioners Marston, O'Hallaran and Cosgrove. Absent: None.

Mr. Guy a Reed, Secretary of the New Mexico Exposition Commission, appeared before the Board, requesting that his Commission be advised as to the disposition of the New Mexico Building, stating that he had orders from his Commission to sell same and unless the Board and Park wanted to purchase it, they would be forced to dispose of it to the highest bidder. Mr. Reed stated that his Commission would be pleased to present the building to the Park Board, providing they were reimbursed for the amount they were charged by the Exposition for planting and parking around the building, which amounted to \$3,200. Mr. Reed was advised that the Board would take his proposition under consideration and notify him as soon as a decision was reached.

President G. A. Davidson, Senator Bulla, and Secretary H. J. Penfold, representing the Executive Committee of the Panama-California International Exposition, appeared before the Board, in reference to closing the Exposition grounds for four months while exhibitors and concessionaires were packing up and moving their wares from the grounds.

President Davidson stated the Exposition was in honor bound to the contracts with exhibitors and concessionaires, to give them 90 days to get packed up and out of the grounds, during which time, it will be necessary to keep the gates closed to the general public, and requested this Board to pass a resolution granting the Exposition the right to close the gates to the general public for period for 4 months from January 1st with authority to charge 25 cents for adults and ten cents for children between the ages of 6 and 16 for admission to the grounds during this period.

As this period covers the session of heaviest tourist travel, it was believed that considerable revenue would be derived from the gates and the Exposition would agree to turn over to the Park Board all funds received from gate admissions over and above the actual operating expenses. This Board not to be liable for any expenses in connection with the operation of the grounds during said period.

President Davidson stated he had conferred with the Mayor regarding this matter, and he was favorable to same. He also stated it was absolutely necessary that the Exposition have an answer immediately to the Committee's request, and upon motion duly made and carried, the Committee was advised that this Board would confer with the Mayor at the earliest possible moment and advise the Committee of its action as soon thereafter as possible.

President Davidson also advised the Board that the Atchison, Topeka and Santa Fe Railway Co. had signified their desire to present this Board with the Indian Village, located on the Isthmus, known as "The Painted Desert," and requested this Board to advise said Railway Co. of its intentions regarding same. Upon motion duly made and carried, the Secretary was instructed to notify the Santa Fe Railway that it would gladly accept the Indian Village, expressing the Board's thanks and appreciation for same.

President Davidson also advised the Board that the International Harvester Co. would present their building, together with all plants, trees, etc. on the grounds occupied by them to this Board, and upon

motion, duly made and carried, the Secretary was instructed to advise the Harvester people that this Board would accept same, expressing thanks and appreciation for same.

President Davidson also stated that the Pollard Moving Picture Co. had been given a location on the Isthmus in the buildings known as "The Streets of Panama" and that they had spent considerable money in fitting up same as a moving picture studio, building a large stage in connection with it and they were producing moving pictures of a high type, and he understood they had requested this Board to give them permission to remain in their present quarters, subject to the pleasure of the Board. He stated these people were responsible and among the cleanest and best in the profession, and were spending considerable money in San Diego, and would continue to do so as long as they were allowed to remain, increasing the amount as they progressed in business, and he recommended to this Board that favorable action be accorded these people on their application.

Dr. E. E. Hewett, representing the San Diego Museum Association, appeared before the Board and stated that after the close of the Exposition it would be necessary, in order to give proper protection to the Museum collections, that a night guard be provided for the buildings in which the collections are housed. Upon motion duly made and carried, the Superintendent was instructed to provide the necessary guard for this collection after the close of the Exposition period.

Dr. Hewett also advised the Board that in order to install the Tilden collection, now in the custody of the Museum Association, suitable show cases would have to be provided. That he had been informed that the handsome show cases, now in the Southern Counties Building, would be disposed of during the month of December at a greatly reduced price, stating that these show cases were of the very best construction and could not, at this time, be purchased for less than twice their original cost, and recommended that the Board purchase as many of them as they possibly could, urging the purchase of all of the cases if possible.

Upon motion duly made and carried, the Secretary was instructed to draw a requisition for \$475.00 for purchase of as many show cases as could be secured for this amount. Dr. Hewett and the Secretary to pick out the cases wanted, and the Secretary to be given full power to make the purchase when same were put upon the market.

The Secretary advised the Board that Tommasino's Band, which has been playing at the Exposition during the year of 1916, desired a permit to continue playing in the park after the close of the Exposition until the date of their engagement with the Coronado Beach Co., June 1st; said Band to give 6 concerts each week and to be under the rules and regulations of this Board; said Board to be in no way obligated or responsible in a financial way to said Band, or any member thereof; it being agreed between the Band and this Board that all of the expenses of said Band will be taken care of by Mr. Louis Gasdia, Manager of the Band. Upon motion duly made and carried the request was granted.

November 24, 1916, San Diego Sun, 3:3. San Diego voters last week granted government more than 500 acres of Dutch Flats; new marine base and barracks to be built on 232 acres of land on bay shore of Point Loma.

November 26, 1916, San Diego Union, 3:4. Children's Fair December feature of Exposition; thousand lads and lassies expected to take part in pageant next month.

November 26, 1916, San Diego Union, Classified, 1:2. Thanksgiving Day open-air services planned at Exposition; Los Angeles pastor will deliver sermon; buildings closed 1 hour.

November 27, 1916, San Diego Sun, 7:2. Banquet given tonight at Cristobal Café in honor of Admiral William B. Caperton.

November 27, 1916, San Diego Sun, 9:4. Thanksgiving open-air service at Exposition next Thursday, November 30; every building on grounds will be closed and every member of the Exposition family will be permitted to join at the service at the Organ Pavilion; Twenty-first Regiment with colors will be present; Reverend Edwin M. Locke, pastor First Methodist Church of Los Angeles, will give sermon; Ellen Beach Yaw will sing.

It will be the only place in the United States where Thanksgiving services are held in the out of doors.

Just before the ceremony, the Second Battalion of the Twenty-first Regiment, U.S. Infantry, will drill on the Plaza de Panama, giving the Butt manual

November 28, 1916, San Diego Sun, 2:1. Great zoo in Pepper Grove here; plans for permanent feature on Exposition grounds; Park Board has picked Pepper Grove as best available site; association is being formed to handle this permanent park feature.

November 28, 1916, San Diego Sun, 2:5-6. Admiral Caperton, U.S.N., commanding the Pacific fleet, with headquarters in San Diego, honored at banquet; Colonel Glassford, of the Aviation Corps, declared North Island the only place in the world for an aviation base; Spreckels, who owns the island, wants exorbitant sum; Los Angeles could furnish a site within the \$300,000 Congressional appropriation agreed upon.

November 28, 1916, San Diego Sun, 7:2. Twenty-first Regiment to defend their camp at Exposition against force of sailors, marines and aviators; attacking forces will swing up through deep canyons; land mines will be touched off; bayonet charge will take place with both sides wearing masks and padded coats.

November 28, 1916, San Diego Union, 5:1. School pageant at Exposition will be an elaborate one.

November 28, 1916, San Diego Union, 5:4. Three lion cubs introduced to spectators at Exposition grounds; Cleo, the mother, was coaxed into an adjoining cage, the connecting door was closed, and the little cubs were taken out in a basket.

November 29, 1916, Minutes of the Board of Park Commissioners.

President Bard, Board of Playground Commissioners, requested Stadium be turned over to Board of Playground Commissioners; request taken under consideration.

President Bard advised Board that playground equipment in Pepper Grove was the property of the Equipment Co. who placed it there and that they had offered to sell it to the Board for \$300; matter taken under consideration.

Twenty-first U.S. Infantry request by Colonel O'Neil, Captain Page and Captain Hart to continue the use of the grounds now occupied by them as a campsite taken under consideration.

Request of Mr. Victor Kremer for use of Isthmus to establish a "film city" denied; Board has not legal right to lease any part of the park for commercial purposes.

November 29, 1916, San Diego Union, 10:1. Ellen Beach Yaw to sing at Fair on Thanksgiving; churches will unite in service at Organ Pavilion during afternoon.

November 29, 1916, San Diego Union, 10:2. Betrothal dinner held in Leap Year Court when motion picture company films new play, "The Devil's Assistant," being filmed by the Pollard Motion Picture Company.

November 29, 1916, San Diego Union, 10:5. Douglas Fairbanks, movie hero, will have day at Exposition, December 5; reception is planned; Fairbanks and his company will return to the Exposition grounds Thursday for ten days during which time they will take the final scenes of the motion picture drama they have been working on for several weeks.

November 30, 1916, San Diego Union, 5:1. Mimic battle to be held at Exposition, December 9; Infantry, Marines and Aviators will take part in Army maneuvers.

November 30, 1916, San Diego Union, 5:2-3. San Diegans to honor poet John Vance Cheney with reception at the Southern California Counties Building today.

November 30, 1916, San Diego Union, 14:1. Outdoor service at Exposition today only one in United States; motion pictures of event to be displayed throughout country.

November 30, 1916, San Diego Union, 14:2-3. Henry Rigoletto will try to catch potato dropped from California Tower with fork held in his teeth; the Rigoletto twins are appearing at the Savoy Theater and a feature of their act is catching potatoes and apples thrown to them by the audience.

December 1, 1916, San Diego Sun, 6:1-2. Children's Fair to be held at Casino Friday, Saturday and Sunday; 7,000 exhibits; no admission charge.

December 1, 1916, San Diego Sun, 9:2:3. Thousands attend service on Thanksgiving at Organ Pavilion.

December 1, 1916, San Diego Union, 1:3-4, 6:2-8, 8:7-8. Great throng of 15,000 joined in giving thanks, Exposition audience heard Reverend Charles Edward Locke, pastor of First Methodist Church of Los Angeles; a union service participated in by San Diego churches; "the Infinite Father created the material world that here He might enforce his sublime purposes in a world of truth and spirit"; subject of sermon: "America, Child of Providence."

December 1, 1916, San Diego Union, 2:3. Children to rule at Exposition; novel exhibits will be shown today; school pageant to feature three day's program.

December 1, 1916, San Diego Union, 5:1. San Diego paid tribute to John Vance Cheney, California poet, at Southern Counties Building yesterday.

December 1, 1916, San Diego Union, 10:1. Henry Rigoletto, actor, expects to catch apple on fork in mouth, to be dropped from top of California Tower today.

December 2, 1916, Minutes of the Board of Park Commissioners.

Natural History Society requested use of Nevada Building; deferred.

Zoological Society of San Diego requested Board to set aside Pepper Grove and Emergency Hospital Building for the Zoological Gardens; the Board to furnish food and housing for the animals, and labor for the upkeep of the grounds; the Society to furnish a trained naturalist as Superintendent of the Garden, a licensed graduate veterinary surgeon to examine and care for the animals; to purchase and place on exhibit the best collection of animals on the Pacific Coast; to play and stock a Reptile House, and to maintain a collection of reptiles that will be second only to New York; to place scientific and descriptive labels on the cages; to place labels on exhibit cases showing the life history of bees and local insects; to open a free library; to publish guides to the Zoological Garden, and to give each year a series of free lectures on Natural History; Board would take proposition under consideration and the Secretary would advise Committee on its decision.

Motion carried that playground equipment on Pepper Grove be purchased.

Playground Commission given exclusive management of Stadium beginning January 1, 1917.

Twenty-first Infantry, U.S. Army, permitted to occupy Isthmus, Indian Village, Alameda, tractor field and cavalry field from January 1, 1917 to June 30, 1917 with the privilege of renewal for one year, at the rate of \$1.00 per year.

Mr. Spreckels to maintain organist and organ tuner during 1917.

Mrs. C. H. Lynn, custodian of the Model Bungalow, requested a free lease for 1917; deferred.

December 2, 1916, San Diego Union, 5:4. Douglas Fairbanks Day at Exposition; movie star will show how pictures are made next Tuesday.

December 2, 1916, San Diego Union, 8:1. School pageant will be held today on Plaza de Panama.

December 3, 1916, San Diego Union, 1:3, 6:1. Children parade in beautiful pageant; Miss Mabel Smith exhibits clay modeling in "The Rodeo," which took first prize.

A pageant of the schools presented at the Exposition yesterday by several hundred children, organized by the Parent-Teachers Association, provided the spectacular feature of the three-day Children's Fair. Twelve schools were represented by floats which proceeded through the principal streets of the Exposition and to the Plaza de Panama where they were reviewed.

The judges, who were Mayor Edwin M. Capps, O. E. Darnell, Mrs. E. D. Miller, Mrs. S. R. Flynn, Mrs. O. W. Cotton and Mrs. George S. Barker, awarded first prize to the Brooklyn School, representing "San Diego, Old and New"; second prize to Garfield School, showing California history; and third prize to the children of the Normal Heights School, who represented "Peace Abiding All Nations." The awards were blue, red and white official ribbons.

The Brooklyn School, in presenting "Old and New San Diego," showed the Indians and miners of the early days and the rough equipment of this time in contrast to the wonderful flowers of San Diego's gardens.

(Names of children representing schools given.)

Following the pageant a program was offered at the organ pavilion at which Prof. J. A. Cranston, superintendent of the Santa Ana city schools, gave an address on "The Purposes and Possibilities of the Parent-Teachers' Association. Mrs. Joy Babcock played a number of violin solos.

The children's fair being held in the Casino will close this evening at 8 o'clock and has proved one of the biggest features of the year, by far excelling the 1915 display.

December 3, 1916, San Diego Union, 6:1. Hatfield sues city for "filling Morena reservoir"; asks \$10,000 payment of alleged contract with Council.

December 3, 1916, San Diego Union, 13:2-4. War map prepared for night flight; Exposition to be field for strife Saturday; officers prepare men for affair.

December 3, 1916, San Diego Union, II, 8:1. Pacific Coast Historians end sessions at Exposition; new officers chosen; visitors entertained at Cristobal.

December 3, 1916, San Diego Union, 8:2. Los Angeles Transportation Association to visit Exposition, December 9.

December 3, 1916, San Diego Union, 12:3. Della crew of New York City travels by auto 18,000 miles to see Exposition.

December 3, 1916, San Diego Union, 13:3. Map of battle maneuvers to be held at Exposition next Saturday.

December 4, 1916, Minutes of the Board of Park Commissioners.

Resolution turning management of Stadium to Playground Commission held in abeyance; Board of Education to be consulted.

Panama-California International Exposition granted a 90-day extension of their agreement with Board of Park Commissioners subject to following conditions.

Selling of merchandise to be discontinued after January 2, 1917.

Isthmus to be closed to general public after January 2, 1917.

Gates to be opened at 8 a.m. and closed at 5 p.m.

Exposition to assume expense and liability in connection with Exposition grounds and buildings during this period.

December 4, 1916, San Diego Sun, 4:6. Sham battle at Exposition next Saturday; night battle will open with an aerial bombardment by fliers from North Island aviation station; searchlights of defenders will show marks for the anti-aircraft guns.

December 4, 1916, San Diego Union, 4:1. "Reel" revolution program at Exposition tomorrow.

December 4, 1916, San Diego Union, 8:1. Bird House Day to be observed at Exposition, December 16; children to be given prizes for handiwork.

December 5, 1916, San Diego Sun, 9:4. Southern California Counties Building to be used as a public auditorium; measure decided at joint meeting of Park Board and Preservation Committee yesterday; former Sacramento Valley Building to be used as headquarters of San Diego Society of Natural History; question of turning stadium over to High School or to Playground Commission discussed; stadium now controlled by Park Board, although a caretaker, employed by the High School, maintains it.

December 5, 1916, San Diego Union, 5:4. Exposition will honor movie man Douglas Fairbanks today.

December 5, 1916, San Diego Union, Classified, 9:1. Park Board urges Exposition building for auditorium; Society of Natural History to have quarters in Nevada Building.

December 5, 1916, San Diego Union, Classified, 14:1. Troops to defend Exposition in mimic attack.

December 5, 1916, San Diego Union, 14:2-6. Awards in Children's Fair at Exposition announced.

December 6, 1916, San Diego Sun, 4:1. EDITORIAL opposing giving High School control of the stadium.

December 6, 1916, San Diego Union, 6:2. Fairbanks Day delayed; sun fails to shine and movie actors go back to studio near Los Angeles.

December 7, 1916, San Diego Sun, 2:3. The State Legislature granted the right to maintain an Exposition and to charge admission to public park grounds; this right expires January 1 and Park Commissioner O'Hallaran does not favor a continuance.

December 7, 1916, San Diego Sun, 4:2. F. A. Binney writes letter protesting lease of park for military purposes or for motion picture business: "The Council has no power to lease the park."

December 7, 1916, San Diego Union, 2:5. Exposition to close at midnight of January 1, 1917; exhibitors and concessionaires notified that sales will not be allowed later.

December 8, 1916, Minutes of the Board of Park Commissioners.

Superintendent Duncan MacKinnon and Mr. Leo M. Schiller, representing the Board of Education, appeared before this Board and protested against the management of the Stadium being turned over to the Playground Commission. Petitions, signed by the Principals of the Grammar Schools of the City of San Diego and from the Parent-Teachers' Association of the Garfield School, were presented requesting that the management of the Stadium remain in the hands of this Board, but should this Board desire to relinquish the management of the Stadium that said management be placed in the hands of the Board of Education, believing that a larger number of citizens would derive benefit thereby.

Superintendent MacKinnon outlined the work of the students of the High School, also the various grammar schools in connection with the Stadium, showing that the Stadium was used every day in the year for the benefit of some 11,500 school children and under the management of the Park Board the affairs at the Stadium had been handled to the entire satisfaction of the Board of Education, and said Board most earnestly requested the Park Board to continue the management of the Stadium; but if they desired to relinquish said management, the Board of Education desired that their request that the management be turned over to their Board be given careful consideration before taking final action.

Superintendent MacKinnon also stated that if the management continued in the hands of the Park Board, the Board of Education would make arrangements whereby a large part of the expense of maintaining the stadium would be raised by their Board. Upon motion duly made and carried, final action in regard to the management of the Stadium was deferred until a special meeting to be called by the President.

Mr. Reed, Secretary of the New Mexico Commission, appeared before this Board and requested a decision in regard to the final disposition of the New Mexico Building. Mr. Reed was advised that the Board had failed to reach any decision regarding the matter and would have to defer action on his request until another meeting.

The Secretary was instructed to take the disposition of the New Mexico Building up with the Exposition, and to request the Exposition to secure the building and present it to the Park, as this Board did not want the building wrecked or removed from its present location.

Upon motion duly made and carried, the Secretary was instructed to advise the Exposition that this Board most urgently requested that the admission fee to the Exposition grounds during the Post-Exposition series be placed at 10 cents for all ages.

December 9, 1916, Los Angeles Times, II, 4:3-4. EDITORIAL: Bravo San Diego!

. . . San Diego kept a first-class exposition healthy and prosperous for more than twice as long as the longest hitherto; San Diego with a population of 70,000 souls, with none of the historic glamour of metropolitan dignity of the cities of other expositions. It was a great feat of civic enterprise, civic courage, civic management and efficiency. It has placed San Diego on the map for all time and forever associated her with all that is best in civilization.

December 9, 1916, San Diego Sun, 3:1. Battle rages in San Diego; enemy repulsed at Exposition; fighting tonight; Douglas Fairbanks Day at Exposition tomorrow; scenes of production Fairbanks is working on to be filmed at north end of Plaza de Panama; a revolution will be incited and Fairbanks will leap from a balcony to a tree many feet below.

December 11, 1916, San Diego Union, 8:5. Thousands see Douglas Fairbanks make movies at Exposition; daring leap for balcony and wedding scene feature films made.

December 11, 1916, San Diego Union, 14:1. Coronadans raise funds to aid Indians; destitute at Mesa Grande owing to cold weather in mountains.

December 12, 1916, Minutes of the Board of Park Commissioners.

After thoroughly considering the request of the Board of Education regarding the management of the Stadium, a motion was duly made and carried to reconsider the action of this Board on December 2, whereby the exclusive management of the Stadium was given to the Playgrounds Commission and same hereby revoked and the management left in the hands of the Board of Park Commissioners as heretofore.

The Superintendent reported an accident which occurred December 11, between a car of the San Diego Electric Railway Co. and an automobile, at the first crossing south of the nursery in Balboa Park, whereby 4 people were killed and one injured, and recommended that necessary action be taken with the Railway Co. to safeguard the public at the crossings in the park.

Upon motion duly made and carried the members of this Board were appointed a committee to visit and investigate the railway crossings in Balboa Park in company with the superintendent and take such action as they find necessary to safeguard the public.

The Superintendent reported that Colonel O'Neill had notified him that the First Battalion of the Twenty-first Infantry would shortly be added to the camp in Balboa Park and requested the privilege of placing the kitchens on the northwest side of the park in order to make proper sewer connections, and recommended that the request be granted. Upon motion, duly made and carried, the request was granted and the superintendent so instructed.

December 12, 1916, San Diego Union, 2:4-5. Plan to preserve buildings at Exposition takes definite shape; Park Board members discuss arrangements of structures after Exposition closes; Canadian Building and Varied Industries Building (except for west portion) to be leveled..

December 12, 1916, San Diego Union, 8:8. Schumann-Heink to sing final song at Exposition.

December 12, 1916, San Diego Union, 14:1. San Diego holds world's record for expositions; Los Angeles paper editorial shows no other Exposition has run one-half the time.

December 13, 1916, Minutes of the Board of Park Commissioners.

The account of this Board against the San Diego Electric Railway Co. was taken up for consideration, and upon motion duly made and carried, the President was instructed to confer with Managing Director Clayton of the Railway Co. and try to effect a settlement of the claim before the 22nd day of December.

The President was empowered to make the settlement on a basis of \$2,500 agreed between the former Board and the Railway Co. for the work done on the High School hill, which allows a credit of \$795.81 for dirt used on the road work in the park, plus the cost of work done on the parking strips and club house cut, the total amounting to \$3,011.69 as per statement below.

To blasting parking strip north of High School

321.13

To finishing 12 th Street Road (Midland Drive)	45.00
To replacing 3" water pipe near Country Club	55.92
To grading Russ Hill, as per agreement	2500.00
To drains from railroad track across Midland Drive	<u>89.64</u>
	\$3011.69

The budget for the maintenance and upkeep of the Park Department for the year 1917 was submitted by the Superintendent and Secretary, and after considering same item by item, a motion was duly made and carried, approving the budget, which totaled \$113,310.20, and instructing the Secretary to file same with the City Auditor.

A motion was duly made and carried, instructing the Superintendent to purchase necessary dwarf roses to border the paths of the formal Rose Garden in Balboa Park.

December 13, 1916, San Diego Sun, 4:3-4. Fifteen thousand schoolchildren to participate in Exposition events Friday; program arranged.

December 13, 1916, San Diego Union, 5:2. Schoolchildren to hold sway at Exposition today.

December 13, 1916, San Diego Union, 5:4. Clothing funds for destitute Indians needed.

December 14, 1916, San Diego Sun, 1:2. Plan post-exposition for winter; matter of keeping gates open longer to be decided.

December 14, 1916, San Diego Sun, 9:1-2. Schoolchildren ready to flock to Exposition for biggest day; 4,200 children will participate in games on the Plaza de Panama; no automobiles will be permitted on grounds tomorrow as a precaution against accident.

December 14, 1916, San Diego Union, 1:4-5, 4:5. Josephine Clifford McCrackin, 78, woman writer to be Exposition guest today.

December 14, 1916, San Diego Union, 4:4. Fifteen thousand children to have day at Exposition tomorrow; youngsters will sing, drill, play games, dance and inspect various exhibits.

December 15, 1916, Minutes of the Board of Park Commissioners.

A communication from Bennington Camp. No. 20, United Spanish War Veterans, was read, requesting one or more buildings in the Exposition grounds for Brigade Headquarters for the United Spanish War Veterans of the Southern District of California. Upon motion duly made and carried, the request was referred to the Preservation Committee.

A request from Mr. Zera Snow was presented desiring a site on the west side of Balboa Park, on one of the lawns, for a clock golf course. Upon motion duly made and carried, the matter was referred to the Superintendent for investigation and report.

A request from the County librarian was read, asking this board for the use of the Kern-Tulare building for the San Diego County free library. Upon motion duly made and carried, the Secretary was instructed to advise the County librarian that the building desired was one scheduled to be removed, but the board felt favorable to her request and advised her to have the Board of Supervisors make a formal application for space in some one of the buildings, to be used as a County library.

In view of the fact that the asphalt pavements within the Exposition grounds are of very light construction, and, as it will be necessary to permit heavy hauling over same during removal of exhibits, concessionaires properties and building materials, a motion was duly made and carried instructed the Superintendent to prohibit all heavy teams or any light teams, unless flat shod, from hauling said asphalt pavements, confining, as much as possible, the hauling inside of the grounds, to automobile trucks.

The request of the Panama Supply Co. for the privilege of removing two buildings from the Isthmus out through the north gate, was respectfully denied; also their request that the Casino building, owned by them, be allowed to remain as it now stands for a period of 5 years, and the Secretary instructed to so advise them.

December 15, 1916, San Diego Herald, 1:1-3. Councilman Benbough, as censor, will regulate cafes and clubs.

December 15, 1916, San Diego Sun, 1:7. Thousands of schoolchildren at Exposition on last day of school before Christmas.

December 15, 1916, San Diego Sun, 9:-4. Birdhouse Day at Exposition; exhibition in Foreign and Domestic Products Building.

December 15, 1916, San Diego Union, Classified, 9:1. Exposition will be host to 15,000 schoolchildren today.

December 16, 1916, San Diego Sun, 1:1-2. Exposition grounds to remain open; 10-cent admission; decision by Park Board allows exhibitors a post-period of three months to remove exhibits.

December 16, 1916, San Diego Sun, 1:3. Car Company pays bill to Park Board; allowed \$795.81 for material from cut used in streets; check for \$3,011.69.

December 16, 1916, San Diego Sun, 1:7. Southern California Counties commissioners decided yesterday to donate their building to the park; main building cost \$80,000 and bungalow \$4,000.

December 16, 1916, San Diego Sun, 9:5. Josephine Clifford McCracken, vice president of State Audubon Society, was honored at Southern Counties Building on Thursday, December 14.

December 16, 1916, San Diego Union, 1:2, 2:2-3. Sixteen thousand children attend school at Exposition; Christmas vacation period inaugurated under sun's warm rays at Exposition.

There are official figures to prove that sixteen thousand San Diego children has the time of their lives yesterday at school. The figures are for the attendance records of the Exposition. The proof of the pleasure of the day was expressed in at least 15,000 different and emphatic ways.

The Exposition grounds formed the vast school room. Every grammar school pupils in the city, practically, was enrolled in one great class and the 600 city teachers supervised the happy, hilarious, new studies.

The school records of yesterday saw no tardiness, and a very small number of absentees. Almost every pupil named on the roster that is kept in the office of the board of education was present in the big, pretty, our-of-door school room.

The course of study was greatly revised, too, to meet the requirements of the place and occasion. The sting was taken out of history by romance; geography was magically turned into a most interesting subject by visible objects in the displays from all parts of the world, zoology suddenly became popular under

the influence exerted by monkeys, wolves, bears, etc. on the Isthmus and arithmetic, when it comes to counting marching soldiers in pretty blue uniforms, is not the doleful matter that it has been reputed to be.

A thousand or more new studies were placed in the curriculum of the San Diego schools yesterday. An absolute innovation was the presence of ice cream and candy stands within the school precincts. But they were no more unusual and no more unpopular with the masses of pupils that were the merry-go-rounds and roller coasters, which were among the principal items on the study courses of kindergartner and eighth grader alike.

School began yesterday at almost the customary hour. The classes and their teachers having come from all parts of the city, gathered at the several gates of the Exposition and were admitted in a body. The "studies" of the morning were not at all tedious. They consisted chiefly of wandering through great buildings filled with the most wonderful things. There was just one admonition --- "keep out of mischief" --- and people connected with the Exposition said, when the great day was over, that mischief had been almost entirely lacking during the day.

It was a perfect day for out-of-door schooling. It easily might have been called a summer day, even in San Diego, which means that weather conditions could not have been improved at all.

Children were everywhere. Each nook and corner of the uncountable nooks and corners in the Exposition grounds was all during the day alive with children and noise with the noises that children make when busy at play.

In addition to the great crowd of children, there were, it is estimated, about 10,000 adults on the Exposition grounds yesterday. They were in the background of the picture, though. The foreground almost was overcrowded with laughing, dancing figures in short dresses of knickerbockers.

The Plaza, when one was there, seemed to be the place of all places. The pigeons were crowded clear off by children, but there was something riotously joyful going on all the time, and none missed the pigeons. And then when one went back to the Isthmus again it seemed that the center of things had been moved there from the Plaza. Those who conduct the places of amusement along the fun street provided and were provided with all sorts of amusement yesterday. Juvenile jollity abounded.

By their banners and the colored bands they wore on their arms one could know from which school almost every child came. The banners, in the hands of appointed color guards, waved in the breeze on the Plaza most of the day. The standard was a rallying point for the children from the school whose initial the banner flaunted, and yellow L's --- meaning Lincoln --- and E's and G's and other letters traveled together in bunches.

In one big assembly all of the schools gathered at the organ pavilion in the morning. Accompaniments to songs, which all knew and could sing lustily, were played on the organ by Dr. Humphrey J. Stewart. Some of the songs were "My Old Kentucky Home," "America," "Santa Lucia," "The Merry Life," and "Dixie."

Thousands of lunches --- 10,000, perhaps --- were spread out on the lawn and in the groves at noon. Schools kept together until luncheon was over. After that the school parties separated.

The nearest approach to regular school work came in the afternoon when, on the Plaza, more than 4000 (?) boys and girls, under the direction of Theodore Treutlein, supervisor of physical education, gave exhibitions of their physical training. There were wand drills and Indian club drills and, later, indoor baseball games between teams of girls. Eight such games were in progress at one time. No record was kept of the winners, but the games were nonetheless exciting. The baseballs were kept merrily popping for an hour or more.

Because the moving picture cameras have taken scenes of San Diego children at play before, and because the world has signified its liking for such scenes, moving picture photographers were on hand all day yesterday, twirling the handles of their instruments. Pictures were made of almost everything that was done, and the pictures will be sent broadcast to show the last day of school before Christmas, 1916.

By a special order all automobiles and other vehicles which may have caused accidents were ruled off the Exposition grounds yesterday. There were no accidents. A dozen or more of the smaller children became separated from their guardians during the day, but all were quickly and carefully returned. A headquarters for the lost ones was established at the Exposition police station. There was little grief from the lost ones, for they were furnished with entertainment by the officers on duty at headquarters.

It was one of the greatest children's day in the two years of the Exposition, said officials of the Fair. They placed yesterday on a par with Pied Piper Day, which is recognized as the most successful of children's days.

STREET CAR COMPANY CARRIES VAST THRONG OF CHILDREN TO FAIR

Seldom has such a tremendous strain been placed on the operating department of the San Diego Electric Railway Company as was experienced yesterday between the hours of 7:30 and 9:30 a.m. The task of getting the children back to their homes was not quite so difficult as many of them made a comparatively early start from the Fair to avoid the rush hour.

Five extra cars carried the children coming in on the 10:05 a.m. S. D. & A. E. Railway train in addition to the regular 9 cars; two 2-car trains in addition to the regular cars handled the Stockton school and from one to three extra cars each took care of children from the Logan Heights, Sherman, Grant, Normal Heights and East San Diego schools.

Pupils who went in a body from their respective schools in the extra equipment were taken direct to the entrance of the Exposition without charge and this convenience offered on the part of the railway company was largely responsible for eliminating any delay which might have been caused in transferring from one car to another.

Approximately 15,000 Exposition visitors were carried on the cars of the San Diego Electric Railway Company yesterday within less than two hours.

At a late hour last night, after most of the conductors' reports were turned in, not an accident involving any of the youngsters had marred their special day, a noteworthy achievement considering the immense crowds of children of all ages handled.

The duties of railway employees were not confined entirely to the handling of patrons to and from the Exposition. Their lost and found department to the Exposition grounds, and representatives of the company took care of several little fellows who had strayed from their parties and saw to it that they reached home safe. Many lost their tickets in one way or another and these also were taken care of by the company's men at the gates.

December 17, 1916, San Diego Union, 8:5. Board considers Post-Exposition period to April 1.

After a meeting of the park board yesterday it was announced formally that the board had granted the Exposition an extension of three months as a post-Exposition period extending until April 1.

According to Exposition officials, no formal action has been taken regarding a post-Exposition period extending until April. A resolution of the park board of December 5 granted the Exposition directors an extension of three months with certain restrictions.

According to officials of the Exposition this means that three months will be given for the removal of all exhibits and the restoring of the grounds to proper condition for use by the city park board.

Whether the gates will be open to the public will be determined by Exposition directors. Already notices have been sent to all Isthmus concessionaires and exhibit sales managers ordering them to close their business January 1.

"The Exposition closes January 1," said Carl I. Ferris, member of the executive committee of the Exposition and assistant to the president yesterday. "If the directors of the Exposition decide to open the gates during the time that exhibits are being removed on a post-Exposition period, announcement will be made through proper Exposition channels. As I understand it, the park board has extended the Exposition management until April 1, with certain restrictions, and for that reason the program for the three months following January 1 is entirely in the hands of the Exposition"

Following is a text of the notification of December 5 sent by the board of park commissioners to H. J. Penfold, secretary of the Exposition:

"Mr. H. J. Penfold, Secretary of Panama-California International Exposition City.

"Dear Sir. Beg to advise you that at the adjourned meeting of the board of park commissioners held Monday, December 4, the following action was taken:

"Motion made and carried that the request of the Exposition for an extension of the agreement between the park board and the Exposition, regarding the use of that part of Balboa park for Exposition purposes be granted subject to the following conditions:

"That the selling of merchandise be discontinued after the second day of January 1917.

"That the Isthmus be closed to the general public after the second day of January 1917.

"That the gates be opened at 8 o'clock a.m. and closed at 5 o'clock p.m.

"The Exposition to assume all expenses and liability in connection with the Exposition grounds and buildings during this period.

"Yours very truly.

(Signed) "J. B. PENDLETON, Executive Secretary."

December 17, 1916, San Diego Union, 14:4. Christmas night program planned; carols and living pictures portraying Story of Nativity will be included.

December 18, 1916, San Diego Sun, 8. Miss Lena Frazee, contralto soprano, sang at Organ Pavilion yesterday afternoon.

December 19, 1916, San Diego Herald, 1:1-3. Chamber of Commerce closes successful year.

December 19, 1916, San Diego Sun, 1:5. Army and Navy Day to be observed December 27; John D. Spreckels Day, December 28; D. C. Collier Day, December 29; and G. A. Davidson Day, December 30.

December 19, 1916, San Diego Sun, 1:8. Mayor Capps wants City Attorney Cosgrove's salary cut from \$6,000 yearly to \$3,500; Council lopped \$900 a year from salary of Mayor's secretary.

December 19, 1916, San Diego Sun, 3:3. Christmas program at Exposition; morning will be for children; big tree pageant in afternoon at Organ Pavilion; pageant written by Katherine Howard includes King of the

World, Fairy of the Christmas Tree, Old People, Dragon, Piper, Hawthorn Tree Dryad, Pepper Tree Dryad, Cassia Tree Dryad, Eucalyptus Children and Pepper Tree Children; old-fashioned Christmas dinner to be served at 4:30 in Cristobal Café; Christmas carols will be sung from balconies of Plaza de Panama; story of Nativity will be told by tableaux at Organ Pavilion.

December 19, 1916, San Diego Union, 2:4. Boy Scouts pitch tents at Exposition for one week.

December 19, 1916, San Diego Union, 7:1. Christmas tree pageant features Exposition program.

December 19, 1916, San Diego Union, 8:1. John D. Spreckels, D. C. Collier and G. A. Davidson to be honored by Exposition Board.

December 20, 1916, San Diego Union. 5:4. Story of Nativity will be shown in special tableaux.

December 20, 1916, San Diego Union, 6:2. Miss Marguerite Caperton, daughter of Admiral W. B. Caperton, presented colors to soldiers at Exposition yesterday.

December 20, 1916, San Diego Union, 16:3. Plans underway to honor local men at Exposition.

December 21, 1916, San Diego Sun, 1:3. On December 30 **The Sun** will issue a special edition devoted to San Diego's parks.

December 21, 1916, San Diego Union, 2:1. Davidson back; reports city is in eye of East; marine base assured; President is hopeful of coming here.

December 21, 1916, San Diego Union, Classified, 9:1. Kiddies and Peter Pan will rule at Exposition on Saturday; 250 San Diego children to take part in pageant.

December 21, 1916, San Diego Union, Classified, 10:2. Music program at bungalow planned.

December 22, 1916, Minutes of the Board of Park Commissioners.

Mr. Louis Gasdia, manager of Tommasino's Band, appeared before the Board regarding the concerts to be given by said band in the Exposition grounds, during the Post-Exposition period, and requested the Board appoint a committee to solicit subscriptions for the maintenance of said band. Mr. Gasdia was informed that the Board would give their approval to his scheme, but thought it best for a committee of citizens to be selected outside of Board members to solicit subscriptions.

Captain Offer, representing the foreign exhibitors at the Exposition, appeared before the Board and requested permission for those exhibitors who are bona fide importers of foreign exhibits, or representing foreign government, to sell their goods during the Post-Exposition period, giving as their reason that on account of the war in Europe, these exhibitors are not able to return home, and will either have to open up stores down in the business section, or be permitted to continue doing business on the Exposition grounds. Captain Offer was advised that the Park Board was favorable to his plan if the Merchants' Association would endorse same, and was instructed to take the matter up with the Association.

The President reported the payment of the bill against the San Diego Electric Railway Co. for \$3,011.69, as per instructions of this board upon date of December 13th.

A letter from Mayor Capps recommending Mr. Frank Thomas for a position in connection with the reconstruction work on the Exposition grounds, was read, and the Secretary instructed to advise the Mayor that Mr. Thomas' application would be given favorable consideration.

A letter from Herbert R. Fay, Lieutenant Colonel, Coast Artillery Corps, requesting that the Southern Counties Building be wholly or in part turned over to the National Guard, to be used as an Armory, was read, and the Secretary instructed to advise Colonel Fay that nothing would be done along these lines until after the Post-Exposition period.

December 22, 1916, San Diego Sun, 9:1. Novel plan for holiday exposition fetes; tree pageant to be given on lawns back of Montezuma Gardens at 3 o'clock Monday, December 25; at conclusion, Old Folks of San Diego's Homes will be guests at a reception in Woman's Board Headquarters; carols to be sung from the balconies of Plaza de Panama following dinner at Cristobal Café; out-of-doors spectacle at Organ Pavilion at 8:30 will include tableaux telling story of Nativity.

December 22, 1916, San Diego Union, 4:5-6. **Los Angeles Graphic** editorial of December 16: "A Brave and Beautiful Dream Appreciated."

December 22, 1916, San Diego Union, 6:5-6. D. W. Craig proposes public fund to maintain Exposition band.

December 22, 1916, San Diego Union, Classified, 10:2-3. Plans prepared for Collier Day at Exposition.

December 23, 1916, San Diego Sun, 9:1-2. San Diego preparing of happy holiday; Christmas will be observed at Exposition.

December 23, 1916, San Diego Sun, 9:3. Harold Bell Wright Day at Exposition Thursday, December 21; Dr. Wharton James spoke in auditorium of Southern Counties Building.

December 23, 1916, San Diego Sun, 9:7-8. Colonel D. C. Collier to be guest at Exposition, Friday, December 29; special program in his honor; George W. Marston, chairman of the day, will preside at luncheon to be given in Cristobal Café at 12:15 and at formal exercises to be given at Organ Pavilion at 2:45.

12:00 Collier will be met at west gate by President Davidson, George W. Marston and Exposition officials and escorted by Tommasino's Royal Italian Band to Cristobal Café

12:15 Luncheon

2:00 Review of troops, Plaza de Panama

2:45 Formal ceremonies, Organ Pavilion; Opening Remarks by George W. Marston; Address by George Burnham; Address by Dr. Edgar L. Hewett; Talks by A. D. La Motte, president Merchants' Association; F. M. White, past president Manufacturers' Association; O. E. Darnall, president Cabrillo Club; W. S. Dorland, president Chamber of Commerce; Address by President Davidson.

December 28 John D. Spreckels Day

12:00 Meet at west gate

12:15-1:45 Lunch, Cristobal Café

2:00-2:30 Review troops, Plaza de Panama

2:45 Formal ceremonies, Organ Pavilion

6:30 Dinner, Cristobal Cafe

December 23, 1916, San Diego Union, 3:6. Story of Nativity to be given at Exposition Christmas.

December 23, 1916, San Diego Union, 6:4. Harold Bell Wright Day celebrated at Southern California Counties Building on Thursday.

December 23, 1916, San Diego Union, Classified, 9:1. John D. Spreckels Day Committee completes plans.

December 23, 1916, San Diego Union, 14:3-4. Cast for floral pageant at Exposition completed.

December 24, 1916, San Diego Union, 1:2. Exposition officials insist on day for Davidson; committee opposes president who objects to honor.

December 24, 1916, San Diego Union, 11:1. Carols, tableaux, tree pageant for Exposition, Christmas.

December 24, 1916, San Diego Union, 12:1. Committee named for Collier Day exercises; Marston, chairman.

December 25, 1916, San Diego Sun, 5:3. Local merchants will say farewell to Exposition Thursday evening at Cristobal Café.

December 25, 1916, San Diego Sun, 5:4-5. Peter Pan to rule over pageant of flowers to be given at Exposition, Saturday, December 30, as part of closing ceremonies; San Diego dancers to take part in spectacle.

December 25, 1916, San Diego Sun, 7:5-6. Coming events

Tuesday, December 26	Rose Hartwick Thorpe Day
Wednesday, December 27	Army and Navy Day
Thursday, December 28	John D. Spreckels Day
Friday, December 29	D. C. Collier Day
Saturday, December 30	Floral pageant presented by 250 children; Alaska Day, G. A. Davidson Day.
Sunday, December 31	Tommasino-Gasdia Day
Monday, January 1	THE END: parade in morning; sham battle in afternoon; day fireworks; closing program at Organ Pavilion; lights out at midnight with Mme. Schumann-Heink singing "Auld Lang Syne"; display of set piece surmounted by flags of all nations released in bombs.

December 25, 1916, San Diego Union, 5:1. Christmas program marks beginning of last week of San Diego Exposition.

December 26, 1916, San Diego Sun, 3:8. Praise for Christmas program at Exposition last night; curtains at Organ Pavilion parted to show Christmas tableaux; names of participants.

December 26, 1916, San Diego Sun, 7:1-2. Tree pageant at Exposition, under auspices of **The Sun**; witnessed by 3,000 on lawns of the Montezuma Gardens; bird houses presented to trees and old people given tokens of love by school children; King of the World played by H. J. Penfold, secretary of Exposition, opened program; tree dryads represented palm, oak, olive, acacia, eucalyptus and olive trees; youngsters from Children's Home served as pepper and eucalyptus tree children.

December 26, 1916, San Diego Sun, 9:1. Army and Navy Day tomorrow; picnic luncheon for enlisted men at Pepper Grove; luncheon at Cristobal Café at noon for officers; field sports and games on marine field for enlisted men at 2 p.m.; reception at 3 p.m. at Woman's Board Headquarters for officers and retired men and their wives; Tommasino's Royal Italian Band will provide music and California Quadrangle will be prepared for dancing.

December 26, 1916, San Diego Union, 5:2. Children's tree pageant pleases crowds; fairies and dryads dance and sing under trees.

December 27, 1916, Los Angeles Times, 6:2. Final plans for closing of Exposition; will honor the president G. A. Davidson.

December 27, 1916, San Diego Evening Tribune, 12:2. Demolition of Exposition buildings delayed; first to come down three months after Exposition closes will be concessions on Isthmus, it is stated.

December 27, 1916, San Diego Evening Tribune, 12:2. Monday to be Davidson Day; date of honoring Exposition head changed from Saturday on account holiday.

December 27, 1916, San Diego Evening Tribune, 12. Officers and men of every branch of the United States service are the guests of the exposition today where Army and Navy Day is being celebrated.

December 27, 1916, San Diego Sun, 3:1. Exposition will close with roar; "Dream City" to go out with a blaze of glory; sham battle will be one of features; task of capturing "Dream City" will fall to Major William A. Brock and the men of the First Battalion of the 21st Regiment, U.S. Infantry, now encamped in Imperial Beach. Colonel Joseph P. O'Neal and the Second Battalion will defend the grounds; will begin at 2 p.m.; more than 1,000 men will be engaged.

President Davidson will be honored by a special ceremony at 10 a.m.; military parade will arrive on grounds at 11 a.m.; sham battle at 2 p.m.; reception for President Davidson and Mrs. Davidson at Woman's Board Headquarters at 3 p.m.; formal dinner at Cristobal Café at 6:30 p.m.; formal closing ceremonies at Organ Pavilion at 11:30 p.m.

December 27, 1916, San Diego Union, 1:1-2. Spectacular battle to mark San Diego Exposition close.

December 27, 1916, San Diego Union, 4:2-3. Reuben B. Hale, father of San Francisco Exposition, visits city.

December 27, 1916, San Diego Union, 5:1. Exposition to honor Davidson with program, January 1.

December 27, 1916, San Diego Union, 5:3-4. Exposition to honor George Wharton James today.

December 27, 1916, San Diego Union, 5:5. Army and Navy to hold sway at Exposition today.

December 27, 1916, San Diego Union, 8:2-3. \$2,500,000 shipbuilding plant planned; lease sought for 75 acres of local tidelands.

December 28, 1916, Minutes of the Park Commissioners.

The Secretary reported that Mr. F. G. Spalding had agreed to act as Chairman of the Band Committee to assist Manager Gasdia in securing subscriptions for the purpose of maintaining the band in the Exposition grounds. The Secretary was instructed to advise Mr. Gasdia that this Board desired to have the band known as the "Balboa Park Band."

The Secretary read a letter from J. T. Butler, County Clerk, in reference to a location in the Exposition grounds for the County Library. Upon motion duly made and carried, the Secretary was

instructed to advise the Board of Supervisors that quarters for the library would be furnished in some one of the buildings, said location to be determined at a later date.

The application of the employees of the Park Department for raise in salaries was read, and, after taken under consideration, a motion was duly made and carried that all \$2.50 men should be raised to \$2.75 per day; all \$2.75 men should be raised to \$3.00 per day; the general foreman raised from \$100 to \$125; foreman of roads and teams from \$90 to \$100 per month; foreman of the nursery from \$85 to \$93.50; caretaker of the organ pavilion from \$75 to \$85; caretaker of New Town Park from \$80 to \$90; caretaker of La Jolla Park from \$80 to \$90; foreman of the water service from \$85 to \$90; blacksmith from \$3 to \$3.25 per day; Superintendent from \$275 to \$300 per month.

December 28, 1916, San Diego Evening Tribune, 9:1. Collier Day to be celebrated tomorrow; program begins at noon with luncheon to be followed by review of troops on Plaza.

December 28, 1916, San Diego Sun, 1:5. President Davidson announced a 25 cents admission fee will be charged after January 1; Park Board members favored a 10 cents gate.

December 28, 1916, San Diego Sun, 5:5. Dance Festival at Exposition Saturday at 2 o'clock when 250 San Diego dancers will appear in colorful pageant which will represent the outdoor beauties of California in midwinter; to be held at Organ Pavilion; Master Billy Whitten, 7 years old, as Pan will open action.

December 28, 1916, San Diego Sun, 6:2-3. Colonel D. C. Collier to be honored tomorrow; President Davidson to give him an embossed testimonial.

December 28, 1916, San Diego Sun, 6:3. Spreckels paid honors at Exposition today.

December 28, 1916, San Diego Union, 1:4-5, 3:3-4. Exposition and city to pay tribute to Mr. Spreckels and his work.

December 28, 1916, San Diego Union, 5:1. Exposition directors to give D. C. Collier unique token tomorrow.

December 28, 1916, San Diego Union, 5:3-4. Army and Navy attachés thanked for aid to Exposition.

December 29, 1916, Auditor's Daily Report of Revenue and Expenses

Total revenue month to date	\$45,976.25
Total expenses	<u>32,792.39</u>
Gain	\$13,183.86
Cash receipts	\$33,931.08

December 29, 1916, Los Angeles Times, 6:2-3. San Diegans do honor to John D. Spreckels.

December 29, 1916, San Diego Evening Tribune, 2:3. D. C. Collier honored today.

December 29, 1916, San Diego Evening Tribune, 2:4. Record breaking crowds at Cristobal yesterday where John D. Spreckels was the guest of honor.

December 29, 1916, San Diego Evening Tribune, 6:1. Writers' day is celebrated at Exposition; program is held in honor of authors and poets in Southern Counties building.

December 29, 1916, San Diego Evening Tribune, 6:6. Big farewell to Exposition; Merchants' Association holds closing event to John D. Spreckels Day.

December 29, 1916, San Diego Herald, 1:4-5. Superiority demonstrated as Exposition and Convention City.

December 29, 1916, San Diego Herald, 4:1. Closing days of Exposition.

December 29, 1916, San Diego Herald, 5:2. Beauty and expanse feature of parks, by Jerome H. Pendleton.

During the construction of the Exposition a bond fund of \$1,850,000 was expended for park improvement, consisting mainly of constructing the permanent buildings and grounds for the Exposition, also magnificent Stadium, and general improvements of Balboa Park. Most of this fund was expended under the supervision of the Park Board; the construction inside the Exposition being by the Exposition management, with the exception of the Fine Arts Building, which was built by contract under direct management of the Board, as was the Stadium, which was constructed under the personal supervision of Commissioner Ferris.

The department has a complete up-to-date nursery where a majority of the trees, plants and flowers are propagated for use in the entire park system. During the Exposition period, a continuation of flowering plants has been furnished for the grounds, Botanical Building, and the outside park, from the park nursery.

The Stadium is controlled and managed by the Board of Park Commissioners through the executive secretary's office. The Stadium is for the use and benefit of all citizens of San Diego and can be reserved by any organized club or team by making application to the executive secretary. Application blanks can be secured either at the Stadium or at the office of the Park Department in the Administration Building. There is no favoritism shown in reserving the Stadium --- first come, first served, yet the Park Board retains the right to cancel any reservation of the Stadium is desired for some purpose or attraction which, in the opinion of the Board, is of greater importance than the one for which reservation had been made.

San Diego has twelve parks besides the Plaza, varying in size from two acres in the smallest one to 1400 acres in the largest. During the past six years more money has been spent in beautifying San Diego's parks than in all the former years of the city's history, and today San Diego has the most comprehensive park system of any American city, and, its largest one, Balboa Park, may be said to be the most beautiful and attractive on the coast, if not in the whole United States.

The park improvements were designed as a setting for the great Exposition which is just now drawing to a close, and vied with it for the plaudits of the millions of visitors who came to see the Exposition, and departed with fond recollections of Balboa's famed beauty. Some of the other parks of San Diego are still in their pristine "beauty," while some others are in a partial state of development. It is the intention of the park authorities to beautify all the parks of the city as rapidly as money is available. And, as the people of San Diego seem to appreciate fine parks, it will be but a short while until the whole park system in San Diego will be made as beautiful and attractive as Balboa already is.

December 29, 1916, San Diego Sun, 1:2. Colonel D. C. Collier honored guest at Exposition.

December 29, 1916, San Diego Sun, 7:1-2. Spreckels is honored guest at Farewell Dinner given by Merchants' Association at Cristobal Café last night; President La Motte, of Merchants' Association, referred to Spreckel's \$100,000 organ gift and \$500,000 he spent to build the electric line into the park.

December 29, 1916, San Diego Union, 1:3-4, 3:1-2. High tribute paid to John D. Spreckels; largest crowd in months gathers at Exposition.

George W. Marston: . . . "I wish to thank Mr. Spreckels for this pipe organ on behalf of the present park board, the members of the park board when it was presented to the city, who took excellent care of it, and for the people of San Diego through the park board.

"I consider the giving of this instrument greater than building railroads or steamships. We who live in San Diego can live without means of transportation, for we never intend leaving here anyway, but we cannot live without music. The pipe organ is the noblest musical instrument of them all and this organ has been and will continue to be the center of the great civic celebrations."

December 29, 1916, San Diego Union, 2. Merchants' Association of San Diego takes leave of Exposition at dinner in Cristobal Café.

December 29, 1916, San Diego Union, 5:1. Schumann-Heink to be presented homemade medal; famous diva to sing "Auld Lang Syne" as Exposition lights go out.

December 29, 1916, San Diego Union, 5:2. Juvenile orchestra will be heard at Exposition pageant; children rehearse for final floral festival of Exposition.

December 29, 1916, San Diego Union, Classified, 9:2-3. Exposition Board to honor Collier, whose dream came true.

December 30, 1916, San Diego Evening Tribune, 1:7-8, 10:8. Big program to mark Exposition close.

December 30, 1916, San Diego Evening Tribune, 10:7. Children give dances today.

December 30, 1916, San Diego Sun, 1:6. Great Exposition will close with roar.

December 30, 1916, San Diego Sun, 15:5-6. Citizens pay loving tribute to Collier; dreamer of Exposition; watch is presented at Exposition.

"He dreamed a dream, and then he did his whole splendid part in making his dream come true." In these words, toastmaster George W. Marston spoke of Colonel D.C. Collier, the "father of the Panama-California Exposition," at the luncheon given in his honor at Cristobal Café yesterday noon.

Two hundred business and professional men, with their wives, were present. The day was "Collier Day," set aside by the exposition directors to do special honor to the man who more than any other one, is responsible for the beautiful exposition which has brought fame and honor to the city of San Diego.

"I knew Charley Collier, when he was a little curly-headed boy messenger to a bank at Fifth and F streets, where I was cashier away back 30 years ago," said Mr. Marston, "and I said then that that little boy would someday make his mark in San Diego, and my prediction has come true. Without the services of Colonel Collier I believe we would not have the exposition here today."

SERVICE LAUDED

Senator M. I. Ward spoke briefly and eloquently of the splendid services of Colonel Collier, and he was followed by Colonel Fred Jewell, who told of being present at the first meeting of 30 businessmen in the fall of 1909, when he offered the resolution declaring in favor of holding the fair and of calling it the Panama-California Exposition. That meeting was called by President Davidson of the chamber of commerce, and Colonel Collier was the most enthusiastic member of the gathering.

Afterwards, when Colonel Jewell made a trip around the world at his own expense in 1913, as a special commissioner for the exposition, he found in every one of the 19 foreign lands he visited that Colonel Collier has been there before him, spreading the fame of San Diego and the exposition that was to be.

FROM OLD FRIEND

Colonel Collier's old friend, Douglas White, of the Salt Lake Railroad, paid his friend a great compliment when he said it was a source of the greatest honor to him to be permitted to be present and pay his tribute to the worth of Collier.

Carl Ferris also spoke in a similar strain.

After the splendid parade and review of the troops of the 21st Infantry on the Plaza de Panama, the crowd adjourned to the organ pavilion where speeches were made by George Burnham, Dr. Edgar L. Hewett of the Science of Man museum, W. S. Dorland, president of the chamber of commerce, and many others.

Resolutions of thanks for the work done by Colonel Collier were presented the guest of honor by President A. D. LaMotte, of the Merchant's Association, on behalf of the various commercial organizations of the city.

President Davidson of the exposition presented Colonel Collier with a beautifully engraved and jewel-studded watch and fob, as a gift of love on the part of the exposition directors.

Colonel Collier, when called upon to respond, was visibly moved and for a moment unable to speak. The crowd cheered and yelled and vented its enthusiasm vociferously.

COLLIER'S SPEECH

When the crowd had quieted down somewhat, Colonel Collier said:

"I have sat here today with mingled feelings. I have been deeply touched by this demonstration of your kindness to me and it is harder for me to speak to you than some of you realize.

"Back in the old days when we stood on the roof of the Administration building and showed visitors the beauties that were to be and sent them back to their home cities as boosters --- Ah, that was living indeed. I am not much of a hand to live in the past. I like today, for yesterday is gone and tomorrow has not yet come. I did not do my exposition work for pay, but I was amply repaid while I was doing it, for, I give you my word, those years were the happiest of my life.

"I would like to go back through the years and give credit where credit is due and tell of many things the public does not know in connection with the sacrifices others have made that the exposition might be a success. Many besides me worked from daylight until midnight every day for several years to make this dream of ours come true, and I would like to tell you all about them. But the sun is sinking fast and I cannot tarry. I thank you for your kindness and appreciation and I assure you that this day will be a never-to-be-forgotten time in my life."

December 30, 1916, San Diego Sun, 16:1-2. EDITORIAL : The Exposition and Parks: It is for the purpose of bringing to the attention of the world the possibilities of our fine park system, one of our greatest assets, that this Park Edition of **The Sun** was conceived.

December 30, 1916, San Diego Sun. Stirring scenes will mark close of Exposition; great sham battle to be feature.

The closing days of the exposition are expected to break all attendance records of the two-year period, according to exposition officials who have noted the great number of out-of-town visitors here. The program that will be offered from early in the morning until after midnight Monday will be one of varied interest, and will provide big entertainment for everyone.

It is announced that exposition officials have had a wonderful jeweled medal made of San Diego county precious stones, which is to be presented to Mme. Ernestine Schumann-Heink just before she sings

“Auld Lang Syne” at the organ pavilion at midnight Monday. The medal will be inscribed, “To our beloved Schumann-Heink from the San Diego Exposition, 1916-1916.”

The great diva’s interest and support of the exposition has not been forgotten in the hour of its greatest success. Schumann-Heink day was celebrated March 22, 1915, and at her night concert, June 23, 1915, 28,000 people were in the audience. New Year’s Day, 1916, she had part in the formal opening, and it will be her honor to close the great Exposition Monday.

The Program

The first event on the program Monday will be the honors bestowed on President Davidson, who for two and one-half years has been at the head of exposition affairs. As he enters the grounds for the last day of his untiring labors, he will be met by directors, officials and Tommasino’s Royal Italian Band, and escorted to the Plaza de Panama, where he will be in the reviewing stand for the great Army and Navy parade that is to move from downtown at 11 o’clock. Immediately following the passing of the parade, a formal ceremony will be held on the Plaza de Panama, at which time Mr. Davidson will be made the recipient of special honors.

The committee in charge of the program is composed of the directors of the 1915 and 1916 expositions and officials of the present exposition organization. At 3 o’clock in the afternoon, President and Mrs. Davidson will be honored at a reception held in the women’s board headquarters, and at 6:30 in the evening a formal dinner will be held at the Cristobal to which more than 400 have been invited.

At 2 o’clock Monday afternoon a great sham battle will be given at the north end of the exposition grounds in which the methods employed in the European war will be shown. Trench fighting, barbed wire entanglements, land mines and other spectacular features will be used in the engagement. The attacking forces will be made up of the first battalion of the Twenty-first regiment, U.S. Infantry, encamped at Imperial Beach, and under command of Major Wm. E. Brooke. The second battalion, under Colonel Joseph P. O’Neil, will defend the exposition grounds. More than 1,000 men will be engaged in the battle maneuvers. At the close of the engagement, day fireworks will be discharged.

The formal program will be held at 11:30 at the organ. Lieut. Gov. Wm. D. Stephens, Mayor James Rolph, Jr. of San Francisco, Mayor F. T. Woodman of Los Angeles, Gov. Wm. S. Spry of Utah, and R. D. Hale, vice-president of the Panama-Pacific International Exposition at San Francisco, will be among those having a part in the final program. As the lights are turned out at midnight, Schumann-Heink will sing “Auld Lang Syne,” and the audience will join in the chorus. As the last words of the song are spoken, a great set piece on top of the organ will be lighted, showing in a spectacular manner San Diego’s message to the world. Above the set piece giant bombs will be exploded and the flags of all nations will float away and present the last act of the Panama-California International exposition.

December 30, 1916, San Diego Sun. Medals for Heads of Exposition Band

Tommasino-Gasdia day will be observed at the exposition tomorrow when President G. A. Davidson will present to the leader and manager of the exposition’s official band beautiful gold medals, fittingly engraved.

Tommasino’s Royal Italian Band will have established a record of 43 continuous weeks with the close of the exposition Monday, and this is said to be the longest engagement of any band in the United States. Considering the two parts of each afternoon and evening concert, the band has given 1200 concerts during this period. Although Tommasino and Gasdia lived with seven miles of each other in Italy, they did not meet until a few years ago in the United States.

The concert will be given at the organ pavilion Sunday afternoon and the following numbers composed or arranged by Tommasino will be given:

1. March, "San Diego Exposition," Tommasino
2. "Second Hungarian Rhapsody," Lizi
3. "Mazurka Elegante," Tommasino
4. Operatic selection from "Tosca," Puccini

December 30, 1916, San Diego Sun. Mayor pays fine tribute to parks of San Diego

Mayor Edwin M. Capps: Civic character is shown by the condition of a city's parks, just as an individual's character is advertised by the care he displays in maintaining attractive, healthful home surroundings. No finer public spirit has ever been displayed by any city than that of the citizens of San Diego in the superb development of our parks. It is the highest duty of present and future city officials to protect and foster San Diego's park system.

I regard a highly improved system of parks as one of the biggest assets any city can possess; therefore, I have always advocated park development for San Diego. Parks form one of the most potent inducements to tourists and homeseekers; nothing can compete with them in make an alluring environment. The character of our people, their refinement and high type of citizenship are reflected in the parks of San Diego.

December 30, 1916, San Diego Sun. Colonel D. C. Collier tells of days when park was desert; he did much to develop it.

Too much cannot be said by way of appreciation for the tremendous things Col. D. C. Collier has done for Balboa Park. As first director-general of the exposition his energy, ability and grasp of the large affairs under his control marked him at home and abroad as pre-eminently responsible for the carrying through of the exposition plans against such strenuous opposition as was encountered.

In a recent address at the exposition, Gov. Hiram Johnson stated that one man was responsible for the success of San Diego's mammoth undertaking, and that man was Col. D. C. Collier,

What he did for the exposition has had a direct and important bearing upon the development of Balboa Park. One of his first acts as director-general was to authorize the purchase of all the larger trees and shrubs contained in the nurseries of the state. This acquisition made possible the wonderful growth in the exposition portion of the park.

ONLY VACATION

In the fall of 1911, after the close of the session of congress, when the house of representatives passed the resolution giving recognition to San Diego --- which was subsequently defeated by the senate --- Mr. Collier went to Santa Fe, NM, to take the first, last and only vacation he attempted during the progress of his strenuous campaign in behalf of our exposition. There he was introduced to Dr. Edgar L. Hewett, head of the School of American Archaeology. After a discussion which extended almost through the night, Mr. Collier made preliminary arrangements for an exhibit under the auspices of the Archaeological Institute of America, which was later consummated after negotiations of several months between Dr. Hewett, Mr. Collier, the board of directors of the exposition, and the governing body of the institute. This science of man exhibit will be one of the permanent features of Balboa Park, and will spread our fame far and wide in educational circles. Its value, according to many eminent archaeologists who have visited here from abroad, is many times greater than the \$100,000 for which it was secured through Mr. Collier's efforts. The wonderful frieze in the California Building --- the only duplication of that in the Pan-American building in Washington ever permitted --- is another of the permanent possessions the people of San Diego acquired through the effort and ability of Mr. Collier.

It was Charlie Collier, too, who fought for and won the state appropriation which erected the California Building, one of the most inspiring monuments bequeathed by the exposition.

Some personal reminiscences from such an old and staunch friend of the parks will be welcomed by our readers.

REMINISCENCES

"My earliest recollections of Balboa Park," Col. Collier says, "go back to the spring of 1884, when as a boy I attended the Russ school, which occupied the position now held by the high school. None of the streets leading to the park were graded. There were no sidewalks, save for the plank walks in the business section, and our trail to school led over the hills and down across the canyons.

"One of San Diego's earliest sources of water supply came from a well and old water works in what is now Cabrillo canyon, then known as 'Waterworks canyon,' also 'Pound canyon.' When I first visited the spot --- just below the high school in the first canyon to the west --- it had been abandoned for a small plant on the San Diego river at Old Town, but the engine and pumps were intact and still held in reserve, and the old reservoir was still on the hillside. Day after day, when the noon intermission came, I would go down with my lunch basket and sit in the shade of a pepper tree on the rim of the reservoir and eat my lunch, after which I would curl up and read **The Golden Argosy**. Ralph I. Conklin, now our sheriff, and Harvey B. Small, at present a mining engineer in Colombia, are among my chums of those days who have not passed into the Great Beyond.

"Within my recollection at this time, the only trees planted in the park were those surrounding the waterworks, where they still live to beautify the spot. There were no other houses near the park north of Cedar street, and no roads graded or any improvements of any kind in the park. It was a barren waste of sagebrush, cactus and hardpan.

"Among the early efforts toward beautification of San Diego, and, I think, toward the park was a movement headed by Matilda G. Bancroft, wife of Hugh H. Bancroft, historian, who organized a tree-planting movement which we helped, planting a line of Grevillea trees which today beautify upper Fifth street and other streets in that vicinity.

TRIBUTE TO GEORGE W. MARSTON

"I cannot speak of park development --- or any other enterprise for the public good --- without speaking of Mr. Geo. W. Marston. He is the man who first conceived the idea of harmonious and comprehensive development of our parks. The entire expense of employing Samuel Parsons, at that time the foremost landscape architect in the United States, was borne by Mr. Marston personally."

December 30, 1916, San Diego Sun. City parks in use for entire year

There is no 'closed season' in San Diego's fine parks.

Chicago, New York and eastern cities may close their parks for half the year, while snow and sleet take possession, but in the sunny Southland the flowers bloom and the sun shines the year around.

There are different flowers each month in the year, so a continual possession of blooms comes and goes in the public parks.

On most days of the year outdoor picnics may be held on the grass and in the pepper grove of the big Balboa Park.

But the parks never close for the winter.

December 30, 1916, San Diego Sun. Park heads in last few years

The park commissioners since the first organization, public-spirited citizens who have directed park affairs in San Diego through our most active period of development are as follows with the dates of their appointment:

Ernest E. White, April 15, 1905; George W. Marston, April 15, 1905; A. Moran, April 15, 1905; L. A. Wright, May 9, 1907; U. S. Grant, Jr., May 23, 1907; Laurance P. Swayne, June 18, 1908; Thomas O'Hallaran, July 23, 1909; M. A. Luce, July 23, 1909; Clark Braly, May 3 1911; Patrick Martin, May 8, 1911; George R. Harrison, May 24, 1911; F. W. Vogt, May 29, 1911; Julius Wangenheim, June 28, 1911; John F. Forward, Jr., June 28, 1911; F. J. Belcher, Jr., July 31, 1911; Samuel T. Black, June 3, 1912; Carl Ferris, May 5, 1913; John F. Forward, Jr., May 5, 1913; Charles T. Chandler, May 5, 1913; Thomas O'Hallaran, August 24, 1916; Arthur Cosgrove, October 25, 1916; George W. Marston, October 25, 1916.

December 30, 1916, San Diego Sun. Romantic history of the city parks goes back to early days

Balboa Park, which we all know at the greatest of the units in San Diego's system of public parks, was not the first plot of land to be reserved for recreational purposes here. Way back in 1850 William Heath Davis and his associates dedicated to public use the block bounded by F, G, Indian and Columbia streets, known as the "New Town Plaza."

That was San Diego's first park.

The site of Balboa Park was then an undeveloped stretch of mesas and wild canyons. Sagebrush and cactus covered the slopes which are now adorned by beautiful flowers, shrubbery and trees. San Diego had just become an incorporated city, about three years after the close of the Mexican War. The fact that our first park was so promptly dedicated goes to show that our present earnestness for improvements of public benefit must be an inherited trait of civic character.

To "New Town Plaza," belongs the glory of being our oldest park. The flagpole from which Old Glory now waves above its shaded lawn was erected in 1869 (?), after being brought here from the territory of Washington by steamer. It was 125 feet in length the day it was raised, but decay necessitated cutting off its lower portion.

"New Town Plaza," with its fine grass and shady trees, is a decided asset to a portion of the city which, owing to its situation closer to the wharves and railroad switching yards, needs just such a touch of nature to offset its commercial atmosphere.

It is extremely well patronized. Dinner-pail noonday meals of workers employed nearby are converted into picnic lunches by the refreshing greenness and wholesomeness of it. Such a park, in such an industrious locality, must always be of big value to San Diegans. It provides conveniently for those who most need and most deserve such an oasis of rest and fresh air.

BALBOA PARK, OUR 1400-ACRE PLOT

Before Horton came and succeeded in transplanting the city from Old Town to its present location, San Diego owned so much land, valued at next to nothing --- an official account of the sale of lands on June 3, 1867, tells of the sale of two 160-acre lots at \$11 apiece, or less than 7 cents an acre --- that her citizens did not consider it necessary to reserve any particular area for park purposes. In those days lands were being offered at public auction after 10 days' notice, upon the petition of anyone desiring to buy. Pueblo lots were dealt out with prodigal generosity, as rapidly as the tracts could be surveyed. And it was not unnatural that a sparsely-settled community should adopt this means of encouraging settlement and raising money, for San Diego embraced 11 square leagues, amounting to 32,000 acres. The city treasury needed fattening.

Later, in Horton's new town, came a larger population and an increased demand for city lands. It was then that a few far-seeing citizens began to realize that soon no land would be available for public uses. With the best interests of San Diego in mind, they took prompt action to reserve the proper site for a park.

February 15, 1868, is the date which E. W. Morse presented a resolution --- Mr. Horton has said that he made the suggestion to Mr. Morse --- to the board of trustees, "that the present board reserves two of the 160-acres tracts of the city lands for the purpose of securing the inhabitants of the city of San Diego a suitable park."

That board of trustees consisted of J. S. Mannassee, president; Thomas H. Bush and E. W. Morse. The minutes show that the president requested Thos. H. Bush and E. W. Morse to officially select and map the park site. Minutes of subsequent meetings reveal no further mention of this transaction, save that, later on, the board "concluded to lay out a larger park."

A growing number of influential citizens got behind the movement, and on May 26, 1868, the minutes of the board reveal that lots 1131, 1130, 1129, 1135, 1136, 1137, vacant part of 1144, 1143 and 1142, comprising an almost solid block of none quarter sections --- all save 40 acres in lot 1144 --- which the city had sold --- "be for a park." Guadalupe Estudillo, Marcus Schiller and Joshua Sloane were then the trustees.

The clerical entries of the secretary of the board on that day are not on the high literary and historical plane with present-time records of council meetings. They are very brief and incomplete.

The 40 acres missing from lot 1144, to quote Mr. Wm. E. Smythe in an interesting bit of park history --- one might properly call it an interesting bite of park history --- shows that the value of the present park as a real estate holding was appreciated by the pioneer antecedents of our present wise real estate dealers. Mr. Smythe's history says:

"In the meanwhile, however" --- before the appointed committee selected the lots to be reserved --- "on the 15th of February, 1868, Isabella Carruthers stole a march upon them and bought the southwest quarter of lot 1144 for \$175, which took a 40-acre 'bite' out of the southwest corner of their tract."

NO TROUBLE TO GET A BUYER NOW

None of our energetic operators of today would experience any difficulties in securing a buyer for that 40 acres, which is bounded by Date, Eleventh, a line between A and Ash, and Sixth streets, at a figure representing a very handsome profit on Isabella Carruther's 4.375 cents per acre "snap." Some of the lots in Carruther's addition are now held at as much per front foot as was paid to the city of San Diego for the entire 40 acres.

Fourteen hundred acres was quite a large chunk of land for a city the size of San Diego in 1868 to reserve for park purposes. Small wonder that many citizens opposed such an extensive scheme, some out of purely unselfish belief that the city could never maintain and improve such a large tract, others --- who were interested in the profits they could make through speculating in these lands if they should be placed on the market --- out of motives which took the future welfare of the city less into consideration. Many and well-organized were the efforts made to cut down the size of what was then called "City Park." But, to insure the permanency of the reservation, a bill was introduced into the state legislature during the session of 1870-71. The usual legislative dangers attended the passage of the bill, among others the discovery after its introduction that a surreptitious effort was being made to divert 480 acres of the tract from its intended purpose, and open up the same for public sale. At this juncture a number of San Diego's best citizens organized to fight the bill. They had the entire city canvassed with a petition of remonstrance against the surreptitious insertion and stood fast for the preservation of the entire tract. The bill was pushed through for a final conclusion in its original form on Feb. 4, 1870. The act declares that these lands (legally describing the reserved lots) are "to be held in trust forever by the municipal authorities of the said city for the use and purpose of a public park . . . and for no other or different purpose."

Again, in 1871, the citizens who had so faithfully fought for the big park we enjoy today came to its rescue. In December of that year a bill for the repeal of the park act of the preceding year was introduced in the state legislature with a view of authorizing the sale of San Diego's city park lands. Again they banded themselves together to keep the park intact. A petition protesting against the repeal of this act and asking that any future legislation affecting public lands or relating to the action of the trustees of San Diego and all park and cemetery lands be excepted.

Balboa Park of today is a fitting monument to those men whose forethought, loyalty and ability preserved it for the thousands who now boast of its beauty and generous proportions. Many who fought against them were actuated by purely selfish motives. Others fought honestly because they believed the San Diego they loved was "biting off more than she could chew." The former are justly condemned by our historians, but the latter must not be too harshly censured. Foresight is not given to all of us.

Among those pioneer friends of the parks and ours, some of whom has passed away leaving memories San Diegans will always cherish, are Daniel Cleveland, Levi Chase, George W. Marston, E. W. Morse, Dr. R. L. Gregg, Charles Hubbell, A. E. Horton, George N. Hitchcock, James M. Pierce, Thos. L. Nesmith, Charles S. Hamilton, Capt. Matthew Sherman, Joshua Sloane and many others who worked for and devoted time to a worthy cause. Space prohibits giving much prominence to each individual as he deserves. Such historians as Mr. Smythe and Mr. Black have been privileged to do this. Mr. Marston, one of our most active and valuable citizens today, and others on the list who have been interviewed, seem to be alike in possessing a certain trait of character which, while not at all satisfactory to the interviewer, is the really the greatest tribute he could pay to them. They request that their own donations and efforts be not separated from the collective work of their associated body. "We all pulled together," is their summing up of events. Modesty has been an admirable quality in so many really big men.

THEY WERE STAUNCH SUPPORTERS OF PARKS

These men were staunch supporters of our parks during a slow period of development for San Diego when enemies, mindful of present personal gain only, attempted to take advantage of conditions certainly unfavorable for maintaining the site intact. Many of them knew its full benefit could never be reaped in their time. It was for generations of San Diegans to come that they fought and planned. And they won.

Those who have known San Diego for the past 20 years --- aye, the past 10 years --- can recall sneering comments made by the thoughtless and shortsighted who referred to those 1400 acres as a desert waste, a sagebrush and cactus-barren in the center of the city. They called it foolhardy for San Diego, for any city to attempt such a vast undertaking. They accused those who backed it of playing real estate politics, of having questionable motives --- which, however, they never put into definite words, preferring to make their thrusts in that vague, "mud-slinging" manner, which, sometimes unfortunately, gains some public attention.

Can anyone name a man today who regrets, as a San Diegan, having fallen heir to his share of the joys of Balboa Park? There are hundreds of cities, many of them our biggest centers of population, who now envy San Diego this possession more than any other, including her harbor. Citizens in those places bitterly regret that their pioneers were not so thoughtful of the welfare of their descendants as were the men who founded San Diego as an American city.

San Diego today is a home community which ranks high in intelligent, progressive citizenship. Many of our most loyal citizens have lived here only a short time, attracted to us by the advantages of climate and home environment which San Diego has to offer. Our city seems to be particularly fortunate in the quality of the settlers who come here to make it their home. Does not the fact that our pioneer settlers displayed the hardihood, the intelligence to fight for the reservation of a vast park whose development must clearly come at a period later than most of them could enjoy --- does not this speak volumes for the quality of the strain which San Diegans first attracted? There seems to be a sort of destiny behind it all, a destiny which only communities populated by the most intelligent classes can ever fulfill.

As we bear our heads to enjoy a rest on some cool lawn beneath shady trees, we do reverence to those who pioneered San Diego's intelligence, whose early efforts made these lawns and trees ours. Our hats are off to the courtly pioneers!

This short historical account will serve to correct a not uncommon impression which still exists --- though often the true facts have been published --- that the 1400 acres of park lands were not the gift of an individual to the city. Almost every prominent San Diegan has been spoken of by the mistaken ones as the donor.

THE FIRST DEVELOPMENT WORK

A special act of the state legislature in 1889 made it possible for city councils to grant the use of portions of park lands "for charitable and educational uses," under certain specified conditions which kept the grounds open to the public. Under this act, the Howard tract of the park lands became the site for an industrial school, but again reverted to the city when the plan was not carried out. Some benefit to the park was gained, however, through the planting of trees which still remain.

But the credit for the first comprehensive scheme of park improvement goes to the Ladies' Annex of the chamber of commerce. About the year 1889 they succeeded, through popular subscription, in raising \$500. This fund was expended in planting a 10-acre strip along the west side of the park to trees. Many of these have survived and today cast a welcome shade. Their advantage in years has made them tower above most of their brothers and sisters of later planting. Mrs. Ben Lake was the leading spirit in this improvement campaign.

Miss Kate Sessions leased a tract of 36 acres in the northwest corner of the park in 1892 for nursery purposes. Her lease stipulated that she plant 100 trees to remain permanently, and that she donate 300 more annually to the city. Her skill as a forester added much to the attraction of the park long before the present lawns and general scheme of improvement were started. It was the first satisfactory tree planting in the 1400 acres.

Another portion of the park was improved at about this time, under the care and direction of the civic committee, an organization of citizens in the Golden Hill vicinity. It was named Golden Hill park, and the taste displayed in planting and perfecting the design speaks well for its promoters who also financed the undertaking. The situation of this park, on a bluff, in the extreme southeastern corner of the 1400 acres, is one of rare beauty, commanding a view of city and harbor which is unsurpassed.

OTHER AREAS FIRST IMPROVED

The golf links of the Country Club were formerly situated in the northern portion of the park. The club house stood not far from the northeast corner of the exposition grounds. Members of the Country Club at that time, prior to its removal to Loma Portal, will always include the old golf links among their most pleasant recollections. Their grounds and the course were well cared for, and were an attraction to the old park. It has been suggested by certain citizens that, in the future, San Diego might well afford a public golf links in the park. Such recreation places are features of parks in many cities, providing a pleasant and enjoyable sport to those who might not otherwise take it up.

James E. Mulvey made a very successful improvement of park lands adjoining his home grounds. A well-developed grove of trees accrues to the park from his public-spiritedness.

Save for the improvements of areas mentioned, the balance of our vast park domain remained undeveloped until comparatively recent years. But even in its virgin state, it was a possession to be proud of, with its picturesque canyons and flower-carpeted mesas.

Such widely-known artists as C. A. Fries loved, and still love the undeveloped portions of the park. His paintings, admired by San Diegans wherever exhibited, are mostly of the rugged, golden-brown

landscapes, as they basked in the sun before the landscape architect came to take advantage of their natural charm.

THE PARK IMPROVEMENT COMMITTEE

On Aug. 15, 1902, Mr. Julius Wangenheim made suggestions to the chamber of commerce which resulted in the appointment of a park improvement committee. Its members were Mr. Wangenheim, chairman; George W. Marston, U. S. Grant, Jr., William Clayton and D. F. Garrettson.

A liberal act on the part of Mr. Marston --- and when has he ever been other than a whole-hearted, open-handed San Diegan? --- at this time made possible the park's first pretentious development. Briefly, he offered to provide funds for the preparation of adequate plans. This expense he refuses to put into figures, but some who were in close touch with the situation state that the money he donated in this valuable and practical way would build a \$10,000 house on one of our highest-priced lots. Sub-committees obtained subscriptions amounting to \$8,000, to this was added \$3,000, bequeathed to the city by the late John Allyn for park improvement, making a fund of \$11,000, exclusive of Mr. Marston's contribution.

The late M. B. Coulston was employed as a secretary of the park improvement committee. Unstinted praise for her capable and efficient service is to be heard from all who were in touch with park affairs at that time. For 10 years she had been one of the editors of "Garden and Forest," New York, and had developed remarkable talents in her profession. These she devoted tirelessly to the betterment of our parks.

After much work had been accomplished by the committee in the discussion of plans for improvement, after correspondence with many eminent landscape architects, Mr. Marston, while on an eastern trip, engaged Samuel Parsons, Jr. and Co. of New York to prepare the improvement plans. Mr. J. B. Lippincott, eminent engineer of Los Angeles, prepared the contour map. As fast as sections were completed, they were sent to the architects in New York. In May, 1903, the maps of roads and paths for the southwestern section of the park was received by the committee. A planting list, showing painstakingly the varieties and number of trees, was received. In July George (?) Parsons spent five weeks in San Diego. In August water pipes were laid on the west side of the park from a \$1,700 appropriation. George Cook [sic], Mr. Parson's partner, arrived on Dec. 20, with a sketch of the entire tract to be worked out. Grading was commenced at the south end at once, under Mr. Cook's direction. The park map was approved in January, 1904.

These dates will interest many who have seen our biggest park for the first time during exposition years. That such abundant shrub and tree growth could take place during the few years intervening between the present time and the date of the planting, is held as nothing short of a miracle by those who are unfamiliar with the speed records of nature under our sunny skies, where abundant water is supplied. During that brief period, rocky, wild hillsides have been converted into finished masterpieces of landscape gardening which are now famous.

With the emphatic approval of the voters our city charter was amended on Jan. 27, 1905, so as to provide an annual park appropriation of not less than five or more than eight cents on each \$100 of assessed valuation. The park commission has charge of this annual appropriation.

The first board of park commissioners was appointed on April 17, 1905. Its members were Mr. George W. Marston, president; Mr. Ernest E. White, secretary; and Mr. A. Moran.

The balance of the history of our biggest park and of the other parks in the system will be taken up under several headings by men who are now actively in charge of the work. In consenting to undertake this additional task --- for each and every one of them is an unusually busy man --- they are but showing the park spirit, the spirit of friendship and willingness to do things for others. It is this same energetic spirit which has made it possible for them to take a big share in making San Diego today the "City of Beautiful Parks."

December 30, 1916, San Diego Sun. Birds galore in great park; lover of feathered beauties tells of their pretty homes, by Carroll De. W. Scott.

Enos Mills in his book, "In Beaver World," says that if could come back to earth and live his life over he would choose the life of a beaver. Today, when I watched the birds in the big clean aviary in the park, I thought they must enjoy existence as much as any creature could. Safe from all their enemies --- man included --- housed in the beautiful park with flowers always in bloom at their back, front and side doors, with their friends around them and with a keeper as kind and thoughtful as Mr. Anderson to save them from any worry --- well, who wouldn't like to be a bird under these conditions?

There live in these aviaries on the park about 500 birds of more than 30 species. They are so well taken care of that a month often goes by without one dying. This is a good record, I think, because many of the birds --- for example, all the ducks and quail --- are wild, undomesticated species.

A lonely, red-winged blackbird in one cage has been there for several years --- he looked lonely, but he was cheerily calling "kong-er-lee," as she would from a cattail swamp. There is a pair of long-crested mountain quail and several valley quail in one house. They never breed here but they might if they were by themselves in a large cage with some bushes and grass to make them feel more at home.

The birds that are most numerous and catch your eye quickly are the little green paroquets, or Australian "love birds." These birds raise young ones anytime of year in nests in boxes with a round entrance, like that of a woodpecker.

CANARIES

Among the canaries are two beautiful little finches, the Black Nun and the Zebra Finch, which, as the name implies, is striped and checked in many colors. Across the aisle is a large cage of Java sparrows, called "rice birds," because, like our bobolinks in the southern states, they grow fat in the rice fields. You will know them because one species is pure white and the other has a pink bill, black head with snowy sideburns, or ear lobes of cheek ruffs --- I couldn't tell which.

Of course, long before now, if you were at the aviary you would have seen and heard some brilliantly-dressed creatures that looked as though they had borrowed poinsettia leaves about Christmas time and made themselves fashionable clothes. The parrots and the great macaw, who has to stay in a little cage by himself because he cuts off wires of the big cage with his powerful beak, the Blue Mountain Lory and "Billy," the African parrot, are all from the tropics, Brazil and Mexico, and the islands that bask in the eternal sun heat, where nature is extravagant with color as well as with life.

On the ground are the gorgeous pheasants, eight in all, Golden Silver and English --- the aristocrats of the ground as the parrots are of the trees. Here are three large Brazilian paroquets that like to perch on Mr. Anderson's head and teach him by pulling his mustache. Here is a pair of beautiful Australian pigeons with long-crested topknots. In a tree sit some wonderful Japanese "nightingales." They have a sleek oriental look about them --- seems to be I have seen them in Japanese prints.

Then there is the duckery --- almost the same as rockery, because the duck's home is pretty well rocked and cemented. Many kinds of ducks are here --- teal, mallard, redhead, pintail, some great snowy and black-necked geese, and, above all, the glorious wood duck. With the ducks is a great yellow-crested snowy cockatoo, who loves attention and screams like a planing mill saw. With the ducks also is a stately wild Great Blue Heron, who has thriven in this cage several years on a diet of raw meat --- the only meat eater in the aviary. Of course, he would rather have minnows and a frog now and then.

MANY SPECIES

In a walk through the park recently I saw 32 species of birds in just two hours.

I wish I had space to tell you about the wild birds of your park. But go into it and get acquainted with them yourself. You will find robins, thrushes and warblers, visitors from the Sierra mountains, eating holly berries, song sparrows and white-crowned sparrows, humming birds among the tame flowers all the year, meadow larks and butcher birds and phoebes on the uplands and in the unfrequented nooks, gnat catchers, bush tits, the shy rufous-crowned sparrow, thrashers, towhees and wrens. You will hear the pealing note and the flicker and, maybe, the ground owl will make you a pretty bow.

I wish I had time to talk about the Audubon Society which **The Sun** has helped to organize in San Diego. No city ever had a finer bird home in its midst than San Diego. Our great park will keep alive our native birds for all time, where we can see and love and protect them; if we save some tracts just as nature made them, where they can feel at home and get the kind of food they need. From the park these birds will come into our gardens. They will make our own homes seem more like homes to us. Does not the home of our dreams always have a garden with flowers and trees and birds?

San Diego Sun, December 30, 1916. Women's Board has done fine work, by Miss Alice Lee.

The wonderful work which was inaugurated by the Women's Board of the Panama-California Exposition of 1915, and which has been carried on through 1916 by the succeeding board, will serve as an object lesson for the future. The members of the park board have announced that they intend to retain the beautiful rooms in the California Building to be used for virtually the same purpose.

The tale of the gracious hospitality which has been accorded to hundreds of visitors --- ex-presidents, governors, diplomats, educators, philanthropists, labor leaders, musicians, artists and representatives of all the great business interests --- has spread throughout the country, and there has been a general appeal to continue the same.

The list of hostesses from every distinguished club and from the schools and churches of the city and county would fill many pages, the endeavor having been to make the hospitality as representative of the community as possible. The San Diego Museum Association, which holds in trust the great collections for the city, and which is most democratic in its control, will endeavor to assist the city and the park board in every possible way in continuing the unique scheme. Much good work of this kind has been accomplished in other cities by a Women's Museum board, with the cooperation of other women's organizations, and this will all develop as the necessity for it arises in the near future.

December 30, 1916, San Diego Sun, 2:1-3. Regulars in our parks are counted by hundreds; they hold open forum on seats, by Stanley Hofflund.

Some of us motor through the parks, some of us ride bicycles, some of us still favor our old friend the horse. Many of us walk --- though a stranger would have to be convinced of the fact after observing the number of automobiles in the city. But, regardless of our means of locomotion to and through them, all of us love the parks.

There are few motorists here who have not driven out of their regular courses many times in order to consume as much of the journey as possible amidst the beautiful surroundings our parks offer to tempt them. Going and coming, they add a few blocks to the trip for the sake of a "run through the park."

To some extent all of us take advantage of these beautiful recreation grounds, so conveniently located in our city. Going back to nature is no difficult matter; just a few blocks from business and there you are, as far removed from the turmoil as though you had traveled a dozen miles. Picnic gatherings, May-day celebrations, band concerts --- Yes, we make good use of our parks. Our children are personally acquainted with the animals in the zoo and the birds in the aviary.

THOSE REGULARS

But most of us are merely transient guests of Host Park. Have you met any of the regulars, the ones who enjoy a majority of their waking hours in one or another of our parks? You should get acquainted; for they are an interesting fraternity, friendly and hospitable, like their host.

No, I do not refer to those birds and animals who love the park glens so much that they even sleep in them. Br'er Rabbit and Friend Quail and Bill Squirrel --- he's positively nutty about the parks --- are in the "regular" class, of course, but the "regulars" I refer to are plain humans, like you and me.

Some of them are old men, many of them pensioners who wear the bronze button of proven patriotism. They don't miss many years out of the year from the benches they and their cronies have selected as their headquarters. Even when umbrellas are required, you will find some of the hardier ones there to answer the roll-call of the clan. Beneath sunny skies of peace --- or those rare rainy ones --- they resume the Battle of Gettysburg where they left off the evening before. No shots are fired, of course, and those who fought with the Boys in Blue chum with those whose uniforms were of gray; but all the battles of the civil war are fought over again. Between campaigns, so to speak, the Blues and Grays enjoy a little game of quoits or checkers, these old veterans who once charged against the enemy with fixed bayonets.

MANY THERE

There are few parks in the chain without faithful squads of these "regulars." They select a spot best situated in regard to distance from their homes or lodgings, one which has a view or seclusion which pleases them most.

Many are not war veterans, but veterans of those struggles of life which most of us go through. They have won in their fight and with the wives who helped them and fought side by side with them, are now enjoying the fruits of victory. In a land of sunnier skies and balmier days than those of their battle grounds. From early morning until late in the day they live in the parks, reading, resting or enjoying the reminiscences of their brothers and sisters who have won an easy place on the retired list with them --- honorably discharged from active service.

Up at the aviary there are certain of them who have frequented the place so regularly that the birds have come to know them and will feed from their gentle hands when not distracted or frightened by too many visitors.

One old veteran has struck up such a friendship with a fat little duck --- a fowl with an appetite and capacity any ostrich might envy --- that it will waddle up to him at the snap of his fingers. Then he pokes his finger through the wire grating and scratches its little green head --- after the customary ceremony with the slice of bread has been properly performed to the entire satisfaction of the duck, of course. This "regular" claims that his feathered friend has taught him to speak duck. Anyway he quacks back at Green Head in a way which seems to please both of them hugely.

At the zoo, also, there seems to be sort of an understanding between the animals and the "regulars" who frequent that quarter, a friendship which is very interesting to watch.

(There follows a description of the habitués of the Plaza.)

San Diego is particularly fortunate in being a resort city, a place where the best people come from the world over to recreate. Here one encounters astonishingly few of the undesirable class which frequents the parks of all eastern cities.

IN CHICAGO

A night trip through Lincoln Park, Chicago, will reveal scores of miserable wretches, outcasts from society, and unfortunates who are temporarily without funds for proper beds, sleeping on the benches --- in spots which the park policemen have missed. Even in cold weather such parks as these accommodate many

overnight. But San Diego has on numerous occasions proven herself anything but a haven for the undesirables of the "soapless order." Our rockpile is probably largely responsible for the comparatively easy matter of policing our parks. Unfortunates are cared for as well as possible, but the dangerous criminal idler is harshly received. We are not entirely free from those midnight occurrences which fill police court blotters, but San Diego is far safer than the average city, and her parks are markedly free from members of the unsafe element. The tap of the policeman's club upon the frayed soles of feet at the end of a bench is a sound we never hear.

San Diego's "regulars" of the parks are, for the most part, regular lodgers in regular rooms, also. They love the parks, and the parks seem to reciprocate.

December 30, 1916, San Diego Sun. Development of arts will be encouraged in museum buildings on fair grounds, by Miss Alice Klauber

That department of the San Diego Museum association covered by the fine arts is to be in the hands of its art committee, acting with such affiliated societies as the Art Association and the Art Guild. The galleries at the southern end of the California Quadrangle will house all the fine arts exhibitions, and it is expected that local artists and craft societies, acting with the museum committee, will exhibit from time to time in the smaller galleries above.

There are a number of large exhibitions of paintings which yearly make a circuit of the west and middle west. Arrangements will be made to include the San Diego museum as one of the important and appreciative havens in the west for such exhibits. The American Federation of Arts and the Society of Western Artists have in the past sent large and interesting collections west, and recently a fine showing of the work of western painters has been visiting in eastern galleries. This method of exchange and of mutual benefit is but just begun; and the development of a definite plan will mean at least four traveling exhibitions in the west during 1917.

It is many years since any loan exhibition has been attempted here, and those who know San Diego homes realize that a wealth of material must be brought together which would make a deeply interesting study if judiciously installed. The committee will keep in touch with the private collections at all times.

POSSIBLE PLAN

A possible plan for 1917 might include two traveling eastern exhibitions, one from Washington and one from New York. With one good loan collection, one of the California Art club, and two of the local group of artists, we would have six important events in the galleries. Paint exhibitions, architectural and other drawings, photograph collections, etc. could be made to fill in the interim so that at no time need the galleries be empty. This is a department that would not require financial expenditure. The general interest of the public and a committee responsible for the care and maintenance of the department would go far in the first year, amply meeting all demands.

From the museum membership must be chose those most interested in this department to serve on its art committee. It is too early to say what the personnel of this group might be. Among those mentioned have been the names of Rev. Mr. Hollington, Mrs. Ivor N. Lawson, Miss Jane Perry, Mr. Ernest White, and Mr. Templeton Johnson.

MUST COOPERATE

As with other departments of the museum work, much depends on the hearty cooperation of the entire membership, which should be made up of all residents who find it possible to join.

Nothing in San Diego today promises more for its future than does this great feature in its park. Alike for citizen and tourist, our best asset is our beautiful recreation ground, and no one can say what uses San Diego may still find for its 1400-acre breathing space.

The exposition has given the city matchless architectural settings for its museum. The landscape gardening surrounding these buildings is a demonstration of planting as a fine art.

It remains for the population of San Diego to make possible further development of the arts, where it has long been prophesied that a great school of art shall one day be in a flourishing state of existence.

December 30, 1916, San Diego Sun. Natural History Society is busy, by Mrs. Kate Stephens, curator.

The San Diego Society of Natural History has applied to the board of park commissioners for the use, after the close of the exposition, of the building formerly known as the Nevada building, which now contains the exhibits of the U.S. Department of Agriculture. The park commissioners are willing to let us have the building if they find it is under their control.

It is the intention of the society to place its collection and library in this building and open it as a free public museum. Keeping it open from 9 a.m. until 5 p.m. every day in the year. Our present quarters in the Hotel Cecil are so small that we have been unable to give much room to exhibition material, and the museum has therefore been used as a student's museum, the results of these studies being published in our transactions. When we get into larger quarters, we intend increasing our exhibition material as rapidly as funds permit, to make the museum as useful as possible to the public.

The society has a small reserve fund which will be nearly exhausted in repairing the building, fitting it up for our use and moving the collection. Our income has never been more than \$1,000 a year. It can readily be seen that building up a public museum will be very slow on so small an income. We believe we will be able to show that we deserve public support. We solicit donations of natural history specimens of all classes suitable for public exhibition, but we do not want mere curios. Our object is not to amuse the public, but to show things that are instructive and educational. We particularly wish to make the museum interesting and useful to public school pupils. We would be very glad of gifts of books or pamphlets on any natural history subject. We now have a library of over 6,000 books and pamphlets, which is at the service of any student.

December 30, 1916, San Diego Sun, 4:1-2. All permanent buildings are to become portion of park beautiful.

The report of the executive committee to the general committee on the preservation of the exposition buildings follows:

To the general committee on the preservation of the exposition buildings. Gentlemen: Your executive committee begs herewith to render this its first report.

Conforming to your expressed wishes and the evident desires of the community, we have approached our problem with sympathetic consideration for the preservation of as many of the exposition as satisfy the fourfold test of harmony of effect, fitness of purpose, strength of construction, and practicability of finance. We beg to tender you our conclusion under each of these topics.

HARMONY OF EFFECT

As most important of all, we have deemed it imperative that any plan to be adopted must preserve and maintain the integrity of the park and that all buildings that were to remain should be adjuncts and appurtenances of the park, rather than mere remains of the exposition. To this end we recommend the removal of all state and county buildings, with the exception of that of New Mexico, which can be maintained for an exhibit of the southwest, and that of the Southern Counties as hereafter mentioned.

As to the buildings on the Prado, we recommend the segregation of these into three distinct groups, each occupying its separate station in the park scheme. These are not to be contiguous, but are to be widely separated by planting effect. The first will be the California and Fine Arts group around the quadrangle; the second, the five buildings outlining the Plaza de Panama; and the third, the Southern Counties Building with

its surroundings. In addition to these, there will, of course, remain the Horticultural Building, the Fisheries exhibit, the organ and the model farm.

The grouping in this way will break the long street effect, while still maintaining an architectural axis. The park will flow into the general scheme between the California Building and the central group on both the north and south, and by the elimination of the Canadian and the Varied Industries buildings a splendid vista of the park in both directions will again become a feature of the landscape.

PURPOSES OF BUILDINGS

We have aimed to give due consideration to the purposes to which these buildings are to be devoted, and tentatively recommend the following:

The California State building is to be used for some purpose as yet undetermined, the Fine Arts building for periodic exhibits of paintings and other fine arts, the two buildings west of the central plaza for the installation of the archaeological exhibit.

The building to the north for a music pavilion and possible dance hall, the present Pan-American building at the northeast corner of the plaza for county exhibits, similar to that of the present Southern Counties building, and to be maintained largely by the county; the present Foreign Arts building at the southeast corner for automobile shows, industrial affairs, or other large exhibits that may from time to time present themselves. The Southern Counties building is to be used as an auditorium, for which it is splendidly adapted, and the need for which is generally recognized.

We also favor the installation in one of the minor buildings, of the exhibit of the Natural History Society, which we believe will be an attractive feature of the park.

The entire Isthmus is to be abandoned, with the exception of the Painted Desert, and the road will be used as a much need park thoroughfare.

CONSTRUCTION OF BUILDINGS

We have made a thorough examination of the buildings and find many of them not of sufficient permanence to warrant their use for hospital, educational or similar purposes, and hence, if for no other reason, have eliminated any consideration along these lines.

As to the buildings which we deemed available, we consulted with practical builders as to their possible preservation, and found that the interior construction and foundations are such as to give reasonable promise of their remaining for 15 or 20 years. On the exterior it will be necessary to give them, during the first 10 years, three coats of preservative paint, and in many places repairs must be immediately made in order to preserve the staff work. The roofs will require considerable attention, but, on the whole, it was decided that, with reasonable expenditure, such buildings as above outlined might be retained for many years.

PRACTICABILITY OF FINANCE

We have conferred with the park board, under whose control all exhibits and buildings will be. They have cheerfully promised their cooperation with our plans; believe them feasible, and express a desire that your committee should outline a definite scheme to guide them in the work. We have consulted with practical builders to ascertain the probable expense of maintaining the buildings during the next few years, and for your information would say that some provision must be made to enable the park board adequately to preserve the exposition portion of the park. An immediate expenditure of \$1,600 is necessary to repair the staff work before the early rains, but we believe that arrangements have been made for meeting this contingency. An annual expense of approximately \$10,000 will be necessary to repaint and repair the buildings to preserve them in their present condition, and while we believe that the necessary funds can be

readily provided to take care of the buildings herewith recommended, we believe that the preservation of more buildings could hardly be financed, even if otherwise desired.

We recommend the above for your approval and adoption.

THE EXECUTIVE COMMITTEE

The above executive committee was composed of George W. Marston and Stanley Hale, who had been appointed by the general committee on the preservation of buildings, a body elected at a big meeting of representative San Diego businessmen and the Chamber of Commerce. The members of this general committee were: Lyman J. Gage, Earl S. Drake, Julius Wangenheim, George W. Marston, G. A. Davidson, Dr. J. D. Hollington, Stanley Hale, Carl Heilbron, Willet S. Dorland, Mrs. Fred van Buskirk and Mrs. E. S. Kendall.

AFTER THE EXPOSITION

Active steps are being taken by the park board toward formulating definite plans for the future use of the exposition buildings for the housing of permanent exhibits and local organizations along lines of general public benefit and interest. A vast amount of work is yet to be accomplished before programs of events, etc., will be prepared for publication. Following is a brief outline which will furnish the public an idea of the scope of the work.

Balboa park, board members declare, is to be made the great public recreation ground of San Diego, also an educational center in the broadest sense. The park commissioners propose to devote large spaces to playgrounds and to encourage the development of children's games, athletics and general recreation. The stadium Golden Hill playground, the pepper grove, and many other places in the park will be utilized.

SOCIETIES

Cultural activities will be fostered by such societies as the San Diego museum association, Natural History Society of San Diego, the San Diego Historical Society, the art museum and art guild, and the musical and dramatic societies. The park commissioners will cooperate with these and other organizations.

A botanical society will possibly be formed by the floral association. A zoological society will take a large part in the care of animal life. The Audubon society is to be formed to preserve wild bird life. Women's organizations will carry on a work similar to that which they been devoted to during the exposition years.

Public festivals, children's holidays, fetes and entertainments of all kinds will be encouraged and accommodated. Receptions for distinguished guests and the hospitable entertainment of strangers will be given special attention. Public meeting of every desirable character will be held.

The group of exposition buildings to be preserved and the surrounding grounds will be a place for a permanent exposition of the social, educational and artistic life of our city.

December 30, 1916, San Diego Sun. Wild spots in center of city.

Balboa park contains 1400 acres and is situated in the heart of San Diego.

Only a small portion, comparatively, of this 1400 acres is developed. The result is that in the midst of the city is a great tract of land in its natural state.

Within walking distance of the city's business district one can find wild spots that give no evidence of being in the confines of an incorporated city.

The scenic park drives are a constant source of pleasure to the motorist, and the winding paths to the pedestrian.

December 30, 1916, San Diego Sun, 4:3-5. How San Diego's fine Balboa Park compares with parks of other great American cities, by Thomas O'Hallaran.

San Diego has 2,000 acres of parks, 1,400 of which are in one park in the heart of the city, near to the business center, known as "Balboa Park," this name having been given to it in October 1910 by the then park commissioners L. A. Wright, M. A. Luce and Thomas O'Hallaran.

San Diego's 2,000 acres of parks have been acquired without expense, this land having been set aside by the city for park purposes; while in many cities the land required for their parks has been obtained through expensive condemnation proceedings and by private purchase.

MORE FORTUNATE

The City of San Diego is more fortunate in the location of its large park than is any other city in America, in its central location, the only exception being Central Park in New York City, with its 800 acres.

In Los Angeles all the easily reached parks are small ones, the only large park there, Griffith Park, being a considerable distance from the city proper.

Denver, with its largest park, City Park, of from two to three hundred acres, which includes within its borders a large museum of curios and an art gallery, is in the center of one of its residential districts.

Kansas City has a large number of small parks, that are well planted and cared for, the only one of large dimensions, Swope Park, being some distance from the city.

St. Louis' Forest Park of 1,380 acres is about three miles from the business section of the city.

Hanscome Park in Omaha, of 300 acres, is well located, and is its one large park.

Rock Creek Park, Washington, D. C., of 1,680 acres, is a long distance from the heart of the city.

THE IDEAL PARK

The ideal park is one located near the center of a city, easy to reach by cheap transportation, yet secluded from smoke, dust and noise of a busy city.

This we have in Balboa Park. The landscape artists of the country unite in pronouncing this the ideal park of the country, the beautiful contours, undulations and canyons being the work of the great master hand of Nature, such features in most parks having to be produced artificially at great expense. One feature most welcome is its absence in Balboa Park, a feature to be observed in many parks of large cities, is the artificiality of their formal gardens. In San Diego's parks there are no grotesque features obtained by attempts to reproduce inanimate objects. Landscape architects by common consent pronounce these efforts as most inartistic.

San Diego is very fortunate in having a public-spirited citizen gifted with artistic discrimination. Mr. G. W. Marston, who selected such a man as Samuel Parsons of New York City to do the first planting that was done in Balboa park. Under his plan and direction there was planted about 200 acres, and roads laid out. The Frederick Law Olmsted firm of Boston was the next one employed and under this direction about 100 acres was planted, and the finishing touch as we see it today in Balboa Park is the planting of the exposition grounds by Frank P. Allen, a beautiful whole, not equaled in any park in the country in artistic designs and floral beauty. These exposition grounds include 625 acres, which belong to Balboa Park, and which will be open to the free access of the public upon the closing of the exposition.

Another feature of Balboa Park not to be found in any other park in America is the beautiful Spreckels Organ, the only outdoor organ in the world, which is to be more and more one of its chief attractions.

ALL THE YEAR

Comparing the upkeep of San Diego's parks with most other cities, here care is necessary 12 months in the year, in planting, irrigation, etc., while only half or three-quarters of the year at most in other climates is required of this intensive care-taking, and, incidentally, San Diegans, beyond all others, may enjoy their parks throughout the year.

There is no other city of its size in America that has so many acres of its parks so well improved for so little expense as San Diego, but what is most needed is the free use of these grounds by its owners, the citizens of this city.

Well-equipped picnic grounds, with free use of water, tables, swings and other features of playground equipment are at hand and shady nooks abound, for a quiet hour with a book.

"Beauty frees the spirit," and beauty is everywhere at hand in Balboa Park.

December 30, 1916, San Diego Sun. Public health and parks, how recreation grounds affect entire community, by Marian Pounds, member Board of Health

The beneficial influence of parks on the health and well-being of a community cannot be overestimated. Health, physical development and out-of-door exercise go hand in hand.

Many of the older nations recognized that fact and gave great consideration to the welfare of their growing generations by encouraging out-door sports and contests of strength and skill. Greece and Rome of the ancients may be mentioned as examples. Their histories show that while such practices were continued they held their grip on the affairs of their limited worlds and maintained their national honor and prestige, but that later, as they began to neglect those things, and devote their time to acquiring wealth, and to waste their energies in revelries --- what our friend Tad would call "indoor sports" --- they became the prey of those people better prepared, and, as powerful nations, practically ceased to exist.

The words "prepared" and "preparedness" are just now basking in popularity, and they would not be out of place in this connection. Until very recently our own nation has not deemed it necessary to devote anything, either time, thought or money, toward the physical preparedness of her people, which is one of the greatest forces toward the preservation of health and the prevention of disease. It is true that considerable study has been given to the best way to feed and care for pigs, how to guard against foot and mouth disease, and eradicate boil weevil, but that doesn't go far toward the physical perfection of the race.

The medical fraternity, with some help from the government, has made enormous strides in preventative medicine, eliminating to a large extent dangers that formally surrounded us in the form of epidemics from contagious diseases, etc.; but even that is only a small part in the scheme of physical preparedness, so it apparently devolves upon the people individually or as communities to take such means toward that end as they find available.

IDEALLY SITUATED

San Diego is ideally situated in that respect. Here we have sunshine the greater part of the year and an unlimited supply of pure, strength-giving air, fresh from 3,000 miles of ocean. The numerous parks, especially the large one, allow one to take advantage of these features and enjoy almost any form of recreation suitable to his needs or nature, from those of the baby to the one advanced in years.

The broad expanse of lawns, the grassy hillsides and shade, and the delightful flower-sheltered nooks afford opportunity for complete relaxation and thought --- unless one prefers simply to relax. No place could be better for the babies to roll and their older brothers and sisters to romp. The winding paths and trails through the canyons and up and down the hills furnish pleasantly diversified routes for those desiring to spend a hour or so walking.

The city has generously provided at different points public playgrounds, equipped with apparatus for the use of children, under the care of those who know how to assist and instruct the youngsters in their games. These are excellent for the health and development and even the morals of the little fellows, not to mention the beneficial influence they exert upon the dispositions of the mothers concerned.

THE STADIUM

Near the high school is the beautiful stadium where all sorts of athletic sports are promoted.

These are most excellent, so far as they go, but at present adequate provisions for the amusement and recreation of the older ones have not been made.

It would seem that the future of the parks as a means of "physical preparedness" would be the most important, for they present many possibilities along that line.

The time is coming when San Diego will develop into a congested, commercial city, with all the accompanying noise, confusion and smokestacks. A large majority of her population will be living in apartments and hotels with little opportunity to get out into the open. Then the parks, situated in the various parts of the city, will become the refuge and playground of thousands of fagged and toil-worn people, whose bodies will be rejuvenated by the fresh air and sunshine and the beauty of their surroundings. There they will spend their holidays with their children, when they may not have the energy or feel that they cannot spare the money to transport their families to the beaches or the back country. Those who are blessed --- or otherwise -- with an automobile or have a backyard and a little flower garden of their own may, perhaps, not fully appreciate what the parks mean to others less fortunate.

THE PLANS

It is to be hoped that the park commission will keep intact the gardens and groves of the exposition, and as many buildings as possible. Why not convert one of them into a public gymnasium or another into a municipal dance hall, and then, even if the board is not able to contribute anything financially, they may at least give those who desire it, the privilege of establishing golf links, tennis courts, cricket, baseball and football fields at convenient points in the park, as playgrounds for the "grown ups." At first glance these might not seem necessary in view of the beautiful stadium and public playgrounds already provided, but they are; for they would serve a different purpose entirely.

Equestrianism has always been regarded as one of the best forms of exercise for health and physical development, and I am looking forward to the time when our citizens and tourists will temporarily desert their automobiles for a morning horseback ride along the flower-bordered drives in the canyons of Balboa Park.

December 30, 1916, San Diego Sun. Municipal music in park, is plea, by Miss Gertrude Gilbert

Municipal music is one of the latest phases in civic development in many cities of America, both east and west, and beneficial results are being demonstrated more and more each year. In fact, municipal music, in one form or another, has ceased to be an experiment, and has become an established fact in the most progressive communities in the country.

San Diego, with her wonderful out-of-doors organ, with her beautiful park, lying almost in the heart of the city, and with her equable climate, is peculiarly adapted to the carrying out of this idea, and the many

free concerts given at the exposition during the last two years, have been the beginning of what may be developed into a wonderful open-air civic institution.

We hope that at the close of the post-exposition period, it will be possible, with the generous cooperation of the musicians and musical organizations of the city, to establish in our park a series of free concerts which shall be a credit to San Diego and an honor to our municipal life here.

Letters from artists of national reputation have assured me of their cooperation, and altogether the whole idea opens up great possibilities.

December 30, 1916, San Diego Sun. San Diego Museum plan is outlined by director; to make exposition benefits lasting, by Edgar L. Hewett.

The Panama-California exposition, through its magnificent setting, architecture and permanent collections, was a distinct contribution to science and art in America. It gave the city of San Diego an enviable reputation throughout the nation as a place of beauty and culture, and educational and scientific advantages. No other exposition ever held has left so much of a lasting character to the city holding it. The museum of San Diego is its logical successor.

The museum was established for the purpose of cooperating with the city through its park commission and with correlated societies, in making the benefits of the exposition perpetual. The park, buildings, and scientific collections are the permanent possession of the people. By developing a great cultural and recreational center, the exposition is made a permanently productive investment. The museum is planned to meet the high standard of the exposition and the park, and to develop with the future growth of the city of San Diego. Nothing less would be acceptable to the people.

THE COLLECTIONS

The board of directors of the 1915 exposition transferred to the San Diego Museum association, in trust for the people, the scientific collections that were acquired with the assistance of the Archaeological Institute of American, and the Smithsonian Institution. Of great initial value, they have now become priceless. Private collections made at great expense can, after serving the purpose of the owners, be kept intact forever and multiplied in value by depositing them in the public museum. Already recognized and valuable collections are coming to the museum as gifts and loans.

THE QUARTERS

The park commission has granted quarters to the museum in the California Quadrangle, administration, Science of Man and Indian Arts buildings. This will provide space for collections, art galleries, offices, laboratories and studios for some years. The buildings that are not fireproof can be provided with concrete foundations, steel lining and metal conduits for light wires when funds are secured for the purpose.

With such improvement they will be safe and serviceable for many years.

The museum is not to be a mere depository for collections, but an active educational institution. Lecture courses, art exhibitions, concerts, pageants and moving pictures are new regular museum activities. The San Diego museum will maintain scientific laboratories in affiliation with national institutions. These laboratories will be of great service to the schools, courts and social agencies. By modern methods of circulating lectures, exhibitions, libraries, etc., the museum serves a clientele far beyond the limits of its own neighborhood. It may, in fact, become nationwide in its service. By so doing, it best serves the interests of its own locality.

FINANCIAL FOUNDATIONS

The museum will be maintained by membership fees, endowments and admission fees charged non-members on certain days of the week. Corporate members pay an annual fee of \$5 and have all the privileges of the museum, including voting. Life members pay \$100 down and are free from all further dues. They have the privilege of corporate members. Patrons are those who contribute \$1,000 or more to the invested funds of the museum. The board of directors intends that life membership fees and contributions of patrons (unless given for other specific purposes) shall not be expended, but shall be invested in interest-bearing securities for the perpetual support of the museum. For the work of the initial period it is asking for the support of not less than one thousand corporate members and for that purpose it will endeavor to secure 500 life members and 20 patrons.

PRIVILEGE OF MEMBERS

The collections, galleries, lectures, exhibitions and other activities above enumerated are free at all times to members and patrons. The card of a member or patron will also secure access to laboratories and workrooms that are not open to the public. They are privileges in all social functions and private views; are entitled to vote at elections of officers and are qualified to hold office in the corporation. They will receive all published literature of the museum. They will form a roll of honor as founders and supporters of an institution which they, as citizens, establish and maintain for the education and pleasure of the community.

Every member of the board of directors is authorized to receive membership applications. Inquiries and correspondence with reference to the museum may be addressed to Dr. Edgar L. Hewett, secretary of the finance committee, Fine Arts building, exposition.

December 30, 1916, San Diego Sun. Zoo in park will be one of biggest features; is to be located in Peppers, by J. C. Thompson, Surgeon, U.S. Navy.

Of the many problems associated with the closing of the exposition, that have confronted the board of park commissioners, one of the foremost has been that of the maintenance of the zoological garden.

In looking into the subject, the park board investigated the organization and management of the largest zoological parks, such as those in London, Berlin and Washington, and learned that the most desirable conditions were to be found in the New York zoological park.

The New York zoological park is the foremost institution of its kind in the world. Its success is in large measure due to the ideal relations that exist between the park commissioners and the New York zoological society. These relations, which are very simple and have in operation nearly a generation without a hitch, consist roughly of the following: The city of New York allots and loans a definite portion of one of its public parks to the New York Zoological Society, and each annual budget contains an appropriation for the upkeep of the buildings and grounds. The Zoological society in turn purchases and places on exhibit the specimens and, above all, employs a highly trained director, who has under him a corps of naturalists and helpers to care for the animals.

With the sole object of extending to the park commissioners every possible aid in their task of giving to San Diego a zoo which bids fair to be one of the best in America, there has just been formed the Zoological Society of San Diego.

The board of directors consists of the mayor of the city, the president of the board of park commissioners, Dr. Fred Baker and Mr. Frank Stevens, the two most distinguished naturalists in Southern California, and Doctors Harry and Paul Wegeforth, who are among the best known local hunters.

The society has only just come into existence, but already has over 100 members, and will probably have 500 within a few months.

TO BUY EXHIBITS

The society will, in the beginning, purchase and place on exhibit representative series of San Diego county mammals, birds and reptiles. These will be housed in a type of cage which is entirely original and used here for the first time. The cages will be built of steel frames supporting a large meshed steel wire, which will be of an olive-green tint. The cages will not be placed in rows, but will be situated in the alcoves formed by the trees in the pepper grove.

This arrangement will give the San Diego zoological park an artistic setting that will be second to none in the world.

In connection with all the large zoos there are maintained children's playgrounds, where the little ones can come to picnic and feed the remains of their lunches to the animals. This, Balboa Park will also have, for the oval in the Pepper grove, with its swings and tables, will remain absolutely undisturbed. The small animals will be scattered among the trees outside the oval and the larger animals will have quarters on the plateau to the south of the grove and near the elk paddock.

On one of the ledges leading down into the canyon to the west of the grove there is going to be built a reptile house. This exhibit, owing to the wonderfully favorable climate of the region and the proximity of Southern Mexico, which is very rich in reptile life, will prove to be of the highest interest.

The Zoological society is prepared to do much more for the community besides placing animals on exhibit. There will be a published series of guides and elementary text books bearing upon the local animals, their breeding habits and the game laws. There will be given a weekly series of conferences, usually Sunday morning, when some naturalist will guide impromptu groups of visitors around the gardens and spin yarns of the animals and their lives.

The emergency hospital at the exposition will be converted into the headquarters of the society. There will be a free reading room and a library devoted to works on zoology, voyages and explorations of famous naturalists, travels of noted hunters, and allied subjects such as the conservation of bird life and game preservation.

LARGE COLLECTION

The society has already obtained a collection of books worth considerably over \$2,000.

There will be a lecture hall with charts, blackboards and stereopticon in which will be given a course of free lectures. One set will be arranged for children and will be given in the daytime.

A fine zoological garden is one of the most distinctive marks of culture that a city has to offer visitors. We have a park of marvelous beauty and a climate that will allow animals from almost any part of the world to be kept in the open without artificial heat being necessary.

With the closing of the exposition a great many things of beauty will of necessity be removed, but their loss will in a measure be compensated for by a fine zoo.

Therefore, it is of the highest importance that this project of the park commissioners to give the city of San Diego a zoological garden should receive the staunchest support from all who, in any way, have the interest of the community at heart.

December 30, 1916, San Diego Sun. Tribute is paid city for energy, wonderful accomplishments lauded by director of museum, by Florence De Z. Morgan, Science of Man Museum.

In taking thought for the morrow of the exposition, the park board has been consciously and wisely cooperating with the Museum association and with the enthusiastic body of scientists, artists and educators who have for years cherished the hope that San Diego's future is to be one with great things that are planning in both science and art. Scientists and artists, however, might dream long dreams and never realize them

unless they found response in the heart and mind of the people at large. Surely, never were response more swift and whole-hearted and intelligent than that of the people of San Diego.

The desire that the beautiful exposition buildings might be preserved was widespread. Their wonderful fitness to their surroundings, their satisfying charm, their remarkable appearance of stability made this seem to inexpert critics quite within possibilities; but the park board has undoubtedly reached a wise, far-seeing decision. The buildings actually retained will be used at once and for years to preserve the collections already secured and housed there for the extension and display of these collections, so that they may become, under the museum's direction, of the greatest educational value.

The San Diego Museum board has generously provided quarters for the Anthropological station, which is intended to be a research branch of the School of American Archaeology.

The preparatory years of the exposition, together with the two wonderful years of its duration, have established a truly wonderful cooperation between the people of San Diego, the Archaeological Institute of America, of which a branch exists in San Diego, and with the Smithsonian Institution, which is a possession of the whole people of the United States.

The thing that San Diego set out to do and has so bravely accomplished has touched the imagination of people from coast to coast. The writer has for years lived in the beautiful country south of sue, with its wonderful heritage from two building races, the Indian and the Spaniard peoples, who wrought their dreams into stone that makes the country today one of the fascinating lands of the world. A newspaper cut of the California Building and the Cabrillo bridge brought her thousands of miles to the city by the sea that cared to gather together and rebuild, for its mind and heart, these lovely examples of the dreams of the older peoples.

December 30, 1916, San Diego Sun. Balboa Park described as masterpiece in a perfect frame, by C. A. Fries.

If your imagination is capable of the feat, sweep all handiwork of man from San Diego bay and vicinity and gaze upon the scene as first witnessed by Cabrillo. The long stretch of land terminating in the Coronado islands, almost kissed by the bold headland of Point Loma, enfolds and protects the still waters within from the dashing billows outside --- which seem to rear with fury against the unlooked-for obstacle which bars their onward rush. Look at the quiet, peaceful, low-lying hills and dales beyond, their lines tending upward and onward to the foothills farther back, to be finally framed by the broken skyline of the Coast range. The scene is one of virgin beauty, unsurpassed.

Gaze upon it again, as it stands today, aided by the intelligence of man's loving hand. Then center your attention upon one certain feature of the landscape, a masterpiece among all these artistic human touches. Follow up these same undulating hills, not through sagebrush, as of yore, but by beautiful wide avenues bordered by groves of eucalyptus, pepper and other semi-tropical trees, by rarest flowers and shrubs --- paint pots of brilliant color against softer hues of refreshing green.

Balboa park, the masterpiece, is the result of the forethought of the founders of San Diego, who, in their clear vision of the future, saw its possibilities, appreciated the coming necessity for it as a breathing space for the thousands who were to follow. Theirs was surely an intuitive sense for the beautiful. Our gratitude and pride are well founded. Theirs was the initiative. We, their children, have been loyal to their trust in carrying out to the fullest ability the development of the gift they bequeathed to use in its virgin state.

DOUBLY WONDERFUL

Our park is doubly wonderful. It offers us not only the joy of its own artistic surroundings when we visit it, but it affords use from its many viewpoints panoramas enchanting beyond compare. As we pause upon one of these crests and gaze back toward the setting sun, the strong and beautiful lines forming bay and harbor and the ocean beyond, the color, the life, the work of nature, and the development of man seem to mingle into one harmonious whole. Landward a mass of foliage in the distance marks another spot where

weary mothers and happy children have, consciously or unconsciously, given thanks for a refreshing recreation ground, a soothing bit of nature. In the middle distance looms out the low, cold gray stone buildings of the high school, surmounting a slope of beautifully spreading lawns. Nearby, the stadium, clinging to the hillsides and a part of them, marks another spot where recreation is king.

Golden Hill Park forms another portion of that middle distance, another retreat from the strife of life. The children who romp in it are ample testimony of its value.

WHAT INSPIRATION!

Silhouetted against the evening sky, rich masses of blue gum foliage reflect and absorb on their silken bark the rays of the sun as it goes down. What inspiration of natural laws of harmony wafted to use from faraway Australian shores the seed of those stately monarchs, so strong in their rugged beauty, so harmonious with the prevailing gray sage, green under foot.

To the north we gaze and our eyes linger upon the pinnacles and towers which mark the exposition, pointing inspiringly toward the darkening heavens. From the organ pavilion we catch the strain of a beautiful melody. Lights begin to twinkle, then, finally a blaze of light reflects in the evening mist. As we depart down the hill, we wonder why we should have been selected to be so blessed in our ideal surroundings and in the possession of citizens who had the forethought and courage, and finally the artistic ability, to so intelligently take advantage of them.

December 30, 1916, San Diego Sun. Park system well handled during period of the exposition; those who had part.

During the construction of the exposition, and for the first 20 months of the two exposition years, the park department was controlled by the board of park commissioners, consisting of John Forward, Jr., president; Carl I. Ferris, and Charles T. Chandler, and for the last portion of this period by George W. Marston, president; Thomas O'Hallaran and Arthur Cosgrove. John G. Morley has been park superintendent, and Jerome B. Pendleton, executive secretary of the board.

During construction of the exposition, a total bond fund of \$1,850,000 was expended for park improvement, consisting mainly of constructing permanent buildings and grounds for the exposition. also the magnificent stadium and general improvement of Balboa Park.

Most of this fund was expended under the supervision of the board first named above; the construction inside the exposition grounds being by the exposition management with the exception of the Fine Arts building, which was built by contract under the management of the board, as was the stadium, which was constructed under the personal supervision of Carl I. Ferris, to whom is due much of the credit for the success of this superb feature.

During 1910 and 1911, the first two years of preparation for the exposition, Olmstead [sic] Bros., eminent landscape architects of Boston, with the assistance of several expert park gardeners who came here with them, established the nursery.

THE NURSERY

The continuation of flowering plants, which has made our exposition such a fairy flowerland, was supplied from this nursery. It has become one of the most attractive park features, as well as being an economical source of supplies for park planting, which was the chief reason for its installation. Plants, trees and flowers are here propagated, under the care of expert gardeners employed by the park department.

OLMSTEAD [sic] BROTHERS

These capable architects also planted the northern and eastern boundaries of Balboa Park. Their success has attracted widespread praise from San Diegans and visitors to San Diego.

FRANK P. ALLEN, JR.

As director of works for the exposition, Mr. Allen deserves special mention in a park edition, because of the general landscape and gardening work which he carried out in the exposition grounds, after they were established in the center of the park. Over 600 acres are within the boundaries of the exposition fence, and the skill and executive ability displayed by Mr. Allen in the parking of this big area are displayed today.

(Note: this article appears to have been abruptly cut off due to an error in spacing.)

December 30, 1916, San Diego Sun. State's history gallery is plan, by Mrs. Margaret Allen

The buildings of the Plaza de Panama were set aside during the exposition for educational purposes, and here were installed exhibits of great educational value. A room in the basement of the Fine Arts building was assigned to the Pioneer Society, for an exhibit illustrative of the early history of Southern California, especially that of San Diego county. At the suggestion of the commissioners of the California Building, the members of this organization undertook the task of arranging the material already in its possession and of collecting all available records and historical matter suitable to exposition purposes.

A small but very valuable library of rare books on the early history of the state is in the possession of this society. Recently several contributions have been made, and it is hoped that when the entire collection is removed to more attractive and commodious headquarters this will become one of the most important features of the gallery of California history. It has been the aim of the Pioneer Society to lay the foundations for an historical library for the students of history in this county, which shall, in a small way, fill the place that the state historical collections occupy in other sections of the country, and at the same time given to historical writers an opportunity to study "sources" on the very spot where the events and movements they are recording took place.

San Diego is so rich in historical associations, and its history has been so unique in many ways that this aim does not seem visionary. The Gallery of California History, then, is to become what the name implies --- a place where one may learn something of the life and attributes of a people who for 150 years have made no small part of the history of the Pacific coast.

The work of this important organization, it is hoped, will include, in some way not yet decided upon, the supervision of the present zoological department of the park. Our zoo is one of the most attractive features, to residents and guests of San Diego alike. Its preservation and increase are earnestly desired by this community.

December 30, 1916, San Diego Sun. Scenic drive to connect all city parks, urged by park head, by John G. Morley, Park Superintendent.

The park system of the city of San Diego comprises 12 parks, located in various portions of the city, and contains a total of 1972 acres.

The developed portion of the system includes two small squares in the business district of the city, La Jolla and Balboa park, which includes the exposition grounds, and Golden Hill park.

Balboa park has an area of 1400 acres, is located in the center of the city, and the largest park so situated in the country, with the single exception of Fairmount park, Philadelphia. San Diego is indeed to be congratulated for having so large an area easy of access both from the business and residential districts for the enjoyment of citizens.

The topography is such that it lends itself readily to landscape development, the canyons hills and mesas, and the beautiful views obtained of the mountains, bay and ocean are unsurpassed and are the admiration of all citizens.

THE CLIMATE

The climatic conditions are such that a greater variety of trees, shrubs and plants may be grown than in any other portion of the country, which gives us an opportunity to utilize all the best varieties for planting from the temperate and semi-tropical zones, thereby adding greatly to horticultural and landscape possibilities. The soil conditions, however, in a large area of the park are very poor. The soil is very shallow and underlaid with hardpan, and, unless broken up with powder, the trees and plants would have very little room for root action. During the past five years we have used tons of dynamite for blasting, and, I believe, the results attained are proved by the luxuriant growth of the trees, shrubs and plants.

The landscape treatment of the park has been and should be carried on in large groupings of trees and shrubs, with wide open vistas for lawns, and the whole planting scheme so arranged that all the beautiful views are kept open for the enjoyment of the people.

The natural beauty of the park should be taken into consideration in the scope of all development. The native vegetation must be protected in large areas and added to by the planting of native shrubs and trees, wild flowers, bulbs, etc., indigenous to Southern California. There are many picturesque small canyons, hillsides and large portions of mesas, covered with native vegetation, making them more beautiful than any artificial landscape that can be developed. The only improvement I could suggest would be the making of paths or trails whereby these sections would be easy of access.

There is plenty of room for a well laid out botanical garden, with the wide area from which we could procure plants for this climate. The possibilities are such that San Diego would be famed far and wide.

We should provide space for the enjoyment of both young and old, for games, baseball, tennis, cricket, football, bowling greens, etc.; picnic grounds should be laid out and planted and trees provided and placed beneath the trees so the people can come and enjoy themselves in the open air.

ZOOLOGICAL GARDEN

A fine zoological garden, well planned in regard to the buildings and grounds, will be an instructive and interesting feature to add in some portion of the park.

The stadium in Balboa park is a feature that has no equal in any other park system in the country, and has a seating capacity of 28,000.

The landscape development of Balboa park has nearly all been accomplished during the past five years, the incentive being the holding of the Panama-California exposition to commemorate the opening of the Panama canal. The expression is unanimous that it has been the most beautiful exposition in regard to landscape and horticultural features of all previous expositions. When we realize the conditions that had to be overcome, and the thousands upon thousands of trees, shrubs and plants that were utilized, the wide expanse of lawns, the floriculture, etc., that had to be provided for on the barren hills and in the canyons, and see the results that have been attained in so short a space of time, we, as citizens of San Diego, can well feel proud.

In the further development and extension of the park system attention should be given to neighborhood parks, especially in the more congested sections of the city. There should also be taken under consideration a boulevard plan in connection with the park system, connecting various parks and providing a scenic drive to be enjoyed by the citizens and visitors.

At the close of the exposition the rearrangement of the grounds of the exposition will be quite extensive owing to the removal of buildings. However, when completed, the planting will be so arranged as to blend with the beauty and charms of the present surroundings.

December 30, 1916, San Diego Sun. One joyous feature of our parks.

KEEP OFF THE GRASS

In some city parks, but not here. Our park grass is year 'round grass --- a big lawn for you and the rest of the children --- from one month to 100 years of age --- to romp on. It has WELCOME written upon it; welcome to San Diegans and San Diego visitors. Our park sign reads:

PLAY ON THE GRASS

December 30, 1916, San Diego Sun. Park Board chairman has praise for the **Sun's** edition, by George W. Marston.

It is now 14 years since the great task of improving Balboa park was begun. From 1902 to 1905 the work was carried on in a pioneering way under the auspices of the chamber of commerce; from 1905 to 1910, under a park commission, with moderate tax support; and for the past six years under both commission and exposition directors, with greatly increased revenue from bonds and annual tax levies. Such a rapid, comprehensive and satisfactory park development has probably never taken place in any other city of this country. To those who recall the physical aspects of the parklands a few years ago it seems almost a miracle.

The Sun is doing a valuable service in presenting to its readers a history of the parks and a forecast of their future. Another critical time has come, with problems as difficult and important as those that have been mastered in the past. Shall the great accomplishments of the past 14 years --- and especially the extraordinary construction of the last six years --- be considered as a foundation for even finer civic values in the future? Shall Balboa park become, not only a park of natural scenery, but a meeting place for many parts of community life? Shall the exposition site and its rare buildings be the perpetual home of science and art, of the drama and music, of children's festivals, stately ceremonials, and a widening range of social activities? These are questions of such deep significance to the people of San Diego that public discussion and treatment in the press are very necessary. Therefore, I earnestly commend **The Sun's** admirable purpose to place before its readers the fullest information on the subject.

December 30, 1916, San Diego Union, 1:3, 6:4. D. C. Collier showed with congratulations at Exposition; presented with watch.

December 30, 1916, San Diego Union, 3:4-5. Expect record crowd at Exposition's end; closing ceremonies, starting at 10 a.m. Monday.

December 30, 1916, San Diego Union, 6:1. Exposition band given Gulfport Fair contract.

December 30, 1916, San Diego Union, 6:2-3. Club women object to death of Exposition.

December 31, 1916, Los Angeles Times, V, 8:7. Exposition ends; new work in sight; President Davidson guiding spirit in big venture; now that the work of the Fair is over, civic activity will be devoted to securing new factories for harbor; Davidson's accomplishments highly praised by all.

December 31, 1916, San Diego Union, 1:4, 3:2-3. Elves, flowers butterflies revel in Children's fairyland pageant at Exposition.

December 31, 1916, San Diego Union, 1:8, 3:1-2. Throng to see Exposition's end.

December 31, 1916, San Diego Union, 6:4. Alaska Day was celebrated at the Exposition last night by a dinner at the Cristobal Café.

December 31, 1916, San Diego Union, 13:3. Exposition to honor its president with program.

December 31, 1916, San Diego Union, Classified, 1:6. Building activity in 1917 indicated; permits for year just closed amounted to \$1,870,000, an increase of \$592,840 over last year.

ANNUAL REPORT SUPERINTENDENT OF PARKS, CITY OF SAN DIEGO, YEAR 1916.

To the Honorable Board of Park Commissioners of the City of San Diego, California

Gentlemen:

San Diego has again demonstrated that it is able to successfully hold an Exposition and show to the world not only the exhibits within the buildings provided for the same, but also the beauty of the floral and horticultural development of its Park system in conjunction with the Exposition.

I believe the Park Department can feel proud of the part it has had in such success, and the commendations almost unanimously expressed by the delighted visitors is ample reward for the part his department has contributed towards the building of an Exposition successfully for two years --- a feature that has never been attempted by any other city.

Owing to the continuance of the Exposition, strenuous efforts were made to have the maintenance of the Department in as perfect condition as possible. The renovation of the planting in the Exposition grounds during the pre-Exposition period was hampered by the very heavy rains of January and February, yet at the opening on March 18th, everything was in perfect condition and the beauty of the floral and horticultural display contributed largely to the success of the day. Many thousand of plants and shrubs, large quantities of soil and fertilizers were utilized in the renovation of the grounds and the same degree of efficiency was carried out during the year.

Mr. E. D. Sturtevant of Hollywood contributed to the success of our floral display by donating a large quantity of water lilies for the aquatic display, as also did Howard & Smith of Los Angeles with their exhibits of dahlias, chrysanthemums, and the new Los Angeles rose. The area south and adjacent to the Music Pavilion and east of the Alameda and Utah buildings was laid out for a temporary flower garden and planted to dahlias, cannas, roses, chrysanthemums, cosmos, asters, zinnias, etc. The Botanical Building and Conservatory were provided with a gorgeous display of bloom --- azaleas, begonias, cinerarias, cyclamens, gloxinias, rhododendrons, lilies, chrysanthemums, spireas, and foliage plants, grown in the nursery department, and, when in bloom, sent over to furnish a continual display throughout the year.

Balboa Park, outside the Exposition grounds, was maintained in a high state of efficiency, a limited area was added to the improved section; large quantities of bedding plants and summer flowering bulbs and tubers provided for a continual succession of blooms during the year. There were also planted several thousand trees and shrubs in various portions of the park. We also donated to the school department 693 trees and 448 shrubs, the Marine and Twenty-first Infantry camps were donated 6,112 flowering and bedding plants to beautify the camps in the Exposition grounds, and the U.S. Government was furnished 2,400 plants, shrubs and trees for Fort Rosecrans to add to the landscape development of the grounds at the Fort.

The park roads have been kept in as good a condition as possible. The heavy rains in the early part of the year caused considerable damage on some of the canyon roads, especially Cabrillo Canyon, north of the Laurel Street bridge. Twelve hundred lineal feet of roadway was destroyed and three small wooden bridges washed out. New bridges have been built in their place, one rustic wooden bridge and two of

concrete. Sixteen hundred and eighty lineal feet of road, twenty-five feet wide was rebuilt, seven hundred and thirty years of hardpan gravel used for surfacing, new drains and catch basins put in at frequent intervals, and the channel of the waterway relocated and widened to take care of the storm water. I desire to call your attention to the condition of the water courses in the three main canyons of Balboa Park; owing to the grading and paving of adjacent streets we are going to have to take care of storm water from a continually increasing area, as the majority of streets are graded with the drainage towards the canyons leading into the park. This, of course, is the natural course of the water in most instances, but other streets have been graded to discharge storm water in adjacent canyons, so that eventually we will receive all the water from the various streets.

I believe it will be necessary in the near future to provide well built, permanent channels to control the water, as under present conditions a large amount of damage is done by the water cutting new channels and washing away large areas of land, as well as causing damage to the roads, and also to build a concrete ditch on the west side of the lake under the Laurel Street bridge, to prevent the gradual filling of the lake with gravel and debris deposited there by the storm waters in Cabrillo Canyon the removal of which is very expensive.

The Cabrillo Canyon road, from the Eleventh Street entrance to the foot of the Quince Street hill grade, should be realigned, widened to 25 feet of roadway, and regraded and surfaced, also a planting border on the west side of the road, not only for the landscape effect, but for protection to traffic, as, under present conditions, there are some dangerous curves, and also the possibility of frequent accidents by autos going over the embankment. There would be no excuse for this if a heavy border planting was made on the west side of the road. The same line of improvement should also be done on what is called the Club-house grade, from Cabrillo Canyon to Upas and Vermont Streets.

A large amount of surfacing has been done --- 4,550 yards of material were used, new cobblestone gutters have been put in, as well as several large drains for proper control of the water. The roadways in Mission Hills Park have been realigned and graded, drains and catch basins put in to care for the storm water. This was a much-needed improvement and very much appreciated by the residents of the vicinity.

The additions to the water system have been limited this year, 4,177 feet of pipe of various sizes, with the necessary fittings, have been laid. The repairs, however, have increased and will continue to do so in the older portions of the system from year to year.

All the buildings have been kept in good condition and repairs made where necessary. I would advise that the comfort station adjacent to the Pine Hill Road be either rebuilt at its present location or moved to a more convenient place, as, at present, it is not easy of access, and is not up to the requirements of the Health Department.

As we are to wreck or dispose of a number of buildings of the Exposition owned by the Park Department, I would advise that new stables be built from such of the material as is found available. The present stables are inadequate for the proper care of the teams --- are just common sheds added to from time to time as more horses were acquired. They are unsightly and inconvenient. We have only an open shed for storage of hay, with great danger of fire, and should, by all means, have plans made for stables, hay barn, implement and wagon shed, blacksmith and machine shop, located at the most central and convenient place for the efficient carrying on of the work.

The Nursery Department has been consolidated into one. Formerly we had the Park and Exposition nurseries separate. All of the plants and lath houses have been moved to the Exposition nursery, thousands of plants, trees and shrubs have been grown, and large quantities of flowering plants transferred to the Conservatory and Botanical Building when in bloom. Our greenhouse equipment is very limited, and we have to use every resource to be able to grow on a continual display for transfer to the parks, Botanical and Conservatory buildings. I would especially advise that a new greenhouse, 18 feet by 100, be erected for better efficiency.

The Zoo and Aviary in the park have been well maintained. Early in the year plans were made for a new monkey house, bear dens and duck house and ponds for the ducks etc. Owing to the proposed purchase

of the animals and birds in the Exposition Zoo these plans were not carried out, as it was proposed to change the location of same, except the ponds, etc. for the ducks. I believe it would be advisable to have all the water fowl provided for in the new location for the zoo, and not do anything towards maintaining them in the present section of the park when the plans and specifications of the zoo have been adopted. Two deer and one buffalo have been added to the zoo. I am sorry to report, however, that the two large elk on the west side died during the year.

The Rose Garden, as usual, has been one of the main attractions of the park, the gorgeous display of roses has been enjoyed by thousands of visitors. The garden is not yet finished as planned; the pergola at the south end of the garden should be built, with plenty of seating for the people. The walks have all been curbed, regraded and surfaced with a mixture of two-thirds screened cinders and one-third gravel, and give the garden a much improved appearance. Along the borders of the walks nearly 4,000 dwarf roses have been planted for edging, and, when in bloom the coming season, will add very materially to its attractiveness.

The smaller improved parks have been well kept, notably the Plaza, New Town and La Jolla. La Jolla Park has been improved on the southeast side, the street graded and grass seeded to the property line of the park. There still remain the curbing of the street and the improvement of the parking space.

The Old Town Plaza, located adjacent to Ramona's marriage place, is visited by nearly all visitors to the city on account of the historic interest of that portion of the city. Plans should be made and the park improved. It is not very large, and would not cost a great deal of money for its maintenance and would be an added attraction for the visitors to the original part of the city.

Torrey Park is continually proving a favorite place for visitors who admire not only the pine trees and rugged cliffs, but the marine view as well. It is a favorite place for picnic parties and a stopping place for tourists to and from San Diego. At present there is no protection to the few remaining pines. I believe it would be of great benefit, not only to the city, but also to visitors, if water pipes were laid to furnish water to the people and also for pine trees that should be planted to add to the fast disappearing trees. A nice house, conforming to the landscape, could be built, refreshments served at a moderate price, and, I believe, the income would soon be large enough to care for the park in its present state and for as many trees as might be planted from year to year, with trails made to the different points of interest for the enjoyment of visitors, with picnic grounds and comfort stations in several sections of the park

STADIUM

The Stadium has proved to be a very popular addition to the park attractions. It has been in almost constant use during the entire year.

The field has been regraded and the drainage is almost perfect, as the field is in good shape for games, after the rains are over. Many fine athletic programs have been given by the city schools, Playground Department, and several prominent organizations, the most important of which was the Far Western A. A. U. meet, which was the greatest success of any athletic meet ever held west of the Rocky mountains.

Prior to the meet the running track was rebuilt, and was pronounced by the athletes taking part, one of the best in the entire country. Worlds records were broken not alone on the track, but also in other events on the field. Jumping pits were put in and provision made for all kinds of athletic events in the future.

Football and baseball proved very successful in the stadium during the year, and should be increasingly so during 1917.

The continuation of the landscape improvements of the stadium and vicinity were materially extended during the year, the slopes on the south, east and west placed on proper grade and planted to mesembryanthemum, a total of 41,250 square feet; Acacia melanoxylon trees planted at the foot of the slopes on the east and west; groups of trees planted adjacent to the east and west entrances on the south side, and a Pittosporum Undulatum hedge at the top of the slopes.

Curbs and gutters put in from the east and west entrance to the south entrance, a total of 1,662 lineal feet of cement curb, 8 inch by 12 inch, and 6,060 square feet of cement and cobblestone gutter. These improvements now take care of all the storm water on the drives and slopes, preventing any more damage from heavy rains.

The landscape improvements of the north and south portion of the Stadium grounds are well underway and I hope to have them completed during 1917. The road between the High school and Electric R. R. has been graded and surfaced, with a planting border between, which will be completed during the next few weeks.

There has been planted in the park system, including the Exposition grounds, 2,597 trees, 12,152 shrubs, and 235,253 bedding and flower plants and bulbs; and 22,625 flowering decorative plants and bulbs furnished to the Conservatory and Botanical Buildings during the year.

Appended is a list of varieties and the amounts of each, also the Secretary's report of the financial expenditures for the year 1196.

(Not included.)

In closing I desire to thank the Board for their hearty cooperation in the work and also the employees for the faithful performance of their duties.

Respectfully submitted,

(Signed) John Morley, Superintendent of Parks.

SPECIAL DAYS - 1916

April 22	Special events - Damrosch Orchestra
May 17	Photo Players Day
May 20	Carnival on Isthmus
May 27	Pied Piper Day
June 3	Children's Musical Day

January, 1917, California Garden. The Real Exposition Still Lives.

We have been upon a short visit to a city north of here a mile or so and found it almost in tears over the passing of our beautiful Exposition, the prevailing remark being, "Isn't it too bad your exposition is done away with?" Investigation showed that the Exposition in the minds of these people was not the exhibits, nor the Isthmus nor the special events; not even the silk hats in which some of the officials bravely martyred themselves, but the lovely grounds and gardens, so to these it was said, "The gardens with the buildings that count in the picture are to remain and where inharmonious or useless structures are removed, additional landscape features will be installed so that, far from passing, the real exposition will be growing ever more beautiful. That which differentiated San Diego from every other exposition is a living thing, a heritage for the children of today, and not a passing show. Possibly it might be worth the while of those who send abroad the message of the city to emphasize THE LIVING, not the passing of our Exposition.

This brings to the top our extreme sympathy with the present park board, struggling with the applications of numberless bodies, thinking their title good to some of the exposition buildings, while this momentous problem of the maintenance of the exposition picture is so insistent. Gradually those features maintained for straight exposition purposes must merge into park items absolutely harmonious with the general scheme. To instance any of these now would be only to give a handle to protesters to protest and would serve no useful purpose, but that there are such must be known to all who know the grounds and have thought of their disposition. We also recognize the folly of even referring to this matter while it is in ferment, so to speak, but were we a Park Commissioner, which the good sense of the mayors and our good luck has prevented, we would deem it a prime necessity in parceling out the loaves and fishes from the exposition basket that everyone fell to a legitimate parking use. Mere merit would legitimize such a long list of applicants, and might restore the Isthmus.

January, 1917, California Garden. Monthly Excursion, by G. R. Gorton.

We are loath to give up our exposition, even after two years of it, so we are to have three months of post nuptials. Nevertheless, this month marks the beginning of many months of metamorphosis --- if the alliteration may be pardoned --- and from now on there will be decided changes in the aspect of things: buildings will be razed, and necessary adjustments of the landscaping made, but in the opinion of a great many of the visitors to the exposition, so vital a part of it is the landscaping that if all the buildings were removed, which they will not be, the real exposition would still remain. Many of our guests during the past two years have been from among those who have "seen them all," and reached a point where they don't care very much about the exhibits housed in the buildings, or the attractions noised about on the Isthmus, but are absolutely smitten with exterior aspect of the "Garden Fair," as Mr. Neuhaus rather punnily calls it. Fortunately, the principal and best buildings will, as we know, be spared the ravages of the wrecker, so the spell will not be broken.

As to what important landscaping changes will be made, it is probably a bit early to ascertain, but certain needed alterations will be made at once. The cannas, north of the California Building, will give place to Stocks in four varieties; the Montezuma Gardens will undergo a complete transformation, and so on. In the Botanical Building, necessary arrangements are now being made, which consist principally in the removal of such plants as have outgrown their environment, and substituting those of a more suitable size, and in the repotting of these which have merely outgrown their containers. The building is especially attractive just now by reason of a very creditable display of seasonable flowering plants. The Cinerarias have made a good strong start in flowering, while the Poinsettias look very well. There are some exceptionally fine specimens of potted Schizanthus, in mixed varieties, especially among those grouped near the pool in the conservatory. Cyclamen, Azaleas, Freesias, Primulas in abundance --- *obconica*, *chinensis* and *melacoides* all being well represented.

In the immediate vicinity of the Botanical Building, there are several high spots of interest, e. g., a gorgeous *Cotoneaster argustifolia*, which is worthy of anyone's time and attention, as these shrubs and their kindred generally are. This particular specimen is near the west entrance of the Foreign and Domestic Arts Building. Then there are the Nandinas, northeast of the Botanical Building. These are always there, but it is well from time to time to call attention to the fact, as they are so very worthwhile. Just now they are displaying their very typical autumnal tints, which constitute their principal charm. Along the same walk,

and further toward the west, *Pittosporum rhombifolium* has come up to the scratch with its annual crop of golden berries, which are always pleasing. Still continuing along the same walk, this time to the south, a group of *Hardenbergia monophylla alba* brightens up the landscape with its very attractive masses of pea-shaped flowers. East of the Botanical Building is a planting of Candytuft --- Machet by name --- which is there to please those who delight in fragrances, and particularly the fragrance of those flowers which have always been our friends, and those of our parents before us.

To return for a moment to the subject of the colorings which we are apt to associate with the fall of the year, the *Cryptomeria japonica*, which ornament a corner of the walk north of the California Building, are blushed with a smoky tinting which needs someone more proficient in the subtle art of color determination than the perpetrator of these notes. Suffice it to say that the colorings are good, and compensate to a large measure for certain difficulties attendant upon the growing of these trees in Balboa Park. Bordering the same walk the *Viburnum tinus* are enjoying on of their many seasons of prosperity, and are celebrating with a new crop of bloom.

North of the U. S. Government Building, forming an edging for the walk for a few feet, *Stevia serrata* fills the air of the immediate vicinity with the delicate perfume of its equally delicate white flowers. It is passing strange that this excellent plant does not occupy a larger place in our gardens, decoratively used as it is in so many ways. Not far away is a hillside of *Cassia tomentosa*, a sort of stable article in shrubbery plantings, and properly so. It has no bad habits, and can quality to enter the society of the most exquisite exotics. Also on the hillside, and somewhat to the west, there is an example of what *Solanum Warcezwicii* (this is a bona fide name, the printer did not insert it to fill up space) can do with half a chance. The specimen referred to is really two grown close together, but appears as one, and is an enormous thing. Also, it is very decorative. Probably the exposition landscapers may claim credit for the introduction of this very ornamental species to Southern California, as while it is somewhat grown in the East, it had not been planted hereabouts until the advent of the exposition.

History of San Diego County, ed. Carl H. Heilbron, San Diego: San Diego Press Club, 1936, Part II-Narrative, 401-406.

HISTORY OF THE PANAMA-CALIFORNIA EXPOSITION OF 1915
AND THE
PANAMA-CALIFORNIA INTERNATIONAL EXPOSITION OF 1916
BY G. AUBREY DAVIDSON

In 1909 San Diego had a population of about 35,000. It had reached that figure once before, in 1887 during the big boom, but after the bubble burst, the population dropped within a few years to 17,000. The lost ground was being regained only very slowly, and the future, at the existing rate of growth, wasn't too promising.

San Diego had no Navy then. It had a 1,400 acre city park but practically none of it had been developed. A bond issue of \$100,000 with which to improve a section of the park facing Sixth avenue, had been voted down. Ours was a struggling overgrown country village, becalmed in the doldrums of its own despair.

As president of the Chamber of Commerce, in July 1909, I proposed to the board of directors that upon completion of the Panama Canal, which had been set for about 1915, San Diego should stage an Exposition. It was fitting from many standpoints that we do this. Ours was the first American port of call on the Pacific coast north of the canal, although our situation at the time did not look promising for much port business with freight or passenger vessels. An occasional naval vessel came into the harbor and a small coaling station was located on Point Loma. We had the world's most beautiful bay, but very little was being done with it.

On the other hand, we were the smallest city ever to propose a world's fair. Money would be needed with which to finance it, and the action of the voters toward our park bond issue had not been encouraging. But I felt something must be done to get our city on the map and advertise it to the rest of the

world. I knew we had something here that no other city had, and that all that was necessary was for the people to know about it.

In August 1909, the Panama-California Exposition was formally organized with the following as directors:

L. A. Blockman	John H. Gay	L. S. McLure
George Burnham	Ralph Granger	Arthur H. Marston
William Clayton	U. S. Grant, Jr.	J. W. Sefton, Jr.
Col. D. C. Collier	C. E. Grosbeck	A. G. Spaliding
G. Aubrey Davidson	F. W. Jackson	John D. Spreckels
Lyman J. Gage	Fred Jewell	Julius Wangerheim
D. F. Garrettson	Simon Levi	C. L. Williams

Plans were formulated and steps were taken to raise the funds necessary for this gigantic enterprise.

About that time, however, San Francisco came forward and said that inasmuch as they had already announced an Exposition for 1915, and had thought of the idea first, they believed our venture was ill-advised. But we had gone so far by that time that it was impossible to back down. Nor could San Francisco back down, and so it happened that 1915 saw two great expositions on the Pacific coast.

It has happily proven, however, that the two expositions complemented each other, each helping toward the other's success, and through them a very friendly and lasting relationship was created between the two cities

Our decision to hold the Exposition was immediately justified. The population of San Diego, which had been at more or less of a standstill for a considerable time, began to increase. By the time we opened the Exposition, it had increased from 35,000 to about 60,000.

Once the die had been cast for an Exposition, there was no holding the city back. Instead of the \$100,000 improvement bonds for the park, the city voted \$1,750,000. In addition, it raised \$1,000,000 by popular subscription, an achievement which I believe is unprecedented for a community of that size. The result was that, instead of a mere \$100,000, we had \$2,750,000 for park development. Then the state came to the front and contributed \$250,000 for construction of the California building, the tower of which has become a national landmark. It further enabled San Diego to develop one of the most renowned parks in the world.

J. D. and A. B. Spreckels installed their big outdoor organ in the park, at an expense of many thousands of dollars. Cabrillo bridge was built, linking the east and west sides of the area. Actual work on laying out the grounds began.

The first point upon which to reach a decision was the type of architecture that would be used. Owing to the beauty and charm of the buildings that had been left by the early Spanish and Mexican settlers, it was decided to use the Spanish type. We obtained the services of the greatest authority on Spanish architecture in the United States, Bertram Goodhue of New York City. The California building and tower was built under his direct supervision and all the other buildings were more or less reflections of his plans and ideas ably carried out by his associate, Carleton Winslow. Before any of them were built, drawings and photographs of the most famous buildings of Mexico and Spain were studied, with the result that every structure was the replica of some famous Spanish or Mexican building. Spanish Colonial architecture prevailed and the park has been called the scene of the finest examples of that type in America.

The landscaping of the park presented a real problem. Barren, except for tufts of grass, sage, mesquite, and a few trees, it was discovered that the soil was hard and would have to be blasted before it could be loosened sufficiently to encourage horticultural growth. More than 100,000 holes were drilled and blasted to loosen the terrain before planting began.

The landscaping work at first was in charge of Olmstead [sic] Brothers of Boston, but they soon retired from the organization, following a disagreement over our insistence to group the Exposition buildings in the center of the park. Upon their retirement, the work was carried on under the direction of Frank P. Allen, director of works, and Paul Theine, his assistant. John Morley, then and now superintendent of parks, gave much valuable assistance to this task.

Between 1909 and 1915 the following were added to the Board of Directors of the Exposition:

R. C. Allen	F. S. Belcher, Jr.	Rufus Choate
L. R. Armstrong	John E. Boal	S. R. Flinn
Lucius Barrows	E. J. Burns	John F. Forward, Jr.
Charles W. Fox	I. Isaac Irwin	H. L. Miller
Percy H. Goodwin	H. H. Jones	W. R. Rogers
Carl H. Heilbron	W. F. Ludington	W. A. Sloane
M. F. Heller	B. W. McKenzie	F. C. Spalding

The work progressed rapidly, and on January 1, 1915, the gates of the Exposition opened. It continued throughout all the year, closing on December 31. More than 3,000,000 persons, from every state of the union and from every nation on the globe attended. We had dignitaries from all over the world: maharajahs from India, members of the nobility from many nations, former presidents Roosevelt and Taft, and William Jennings Bryant, the great commoner. Franklin D. Roosevelt, then assistant secretary of the Navy, and his chief, Josephus Daniels, who headed the navy department, also visited the Exposition.

It was during the visit of the latter two that San Diego first received recognition as a potential naval center. I recall that I took Mr. Daniels upon a tour of the bay. He remarked:

“You have enough water in the bay here to float every naval vessel in the world. What are you doing about it?”

Our reply was that if the government would dredge the harbor to sufficient depth and send the Navy here, we’d be glad to render every possible aid. I wasn’t long before activities along that line began. The naval training station was moved from Goat Island in San Francisco Bay to its present site here. North Island was purchased and became the great air center of both the Navy and the Army. A destroyer base was established and a marine base constructed. A naval hospital was built in Balboa Park. Thus San Diego reaped more benefit from the Exposition than any of us had ever dreamed.

The loyalty of every member of the Board of Directors and San Diego’s citizenry generally, toward this great enterprise was manifest from the beginning and in large measure was responsible for its success, but I feel that special mention should be made of citizens who rendered outstanding service: U. S. Grant, Jr., first President Colonel D. C. Collier, first Director General and for several years of the construction period years, President --- correctly referred to as “the creative genius of the 1915 Exposition” --- it was unquestionably through his dynamic leadership that such outstanding results were obtained; John D. Spreckels, a tower of strength in all our activities; William Kettner, who as Congressman, rendered great service at Washington; George W. Marston, chairman of the Building and Grounds committee; R. C. Allen of the same committee; George Burnham, in the reception of distinguished guests; Frank J. Belcher, Jr., and Julius Wangerheim, on Finance; and Carl H. Heilbron, on Special Days, Special Events, and Public Speaking.

Before the closing of the 1915 Exposition, the question of continuing the Exposition for another year was discussed by the directors but the majority of the board members, most of whom had already given years of their time to the project, felt they did not wish to continue.

John D. Spreckels, George Burnham, Carl H. Heilbron, and myself were the only members of the 1915 board who were willing to continue the Exposition another year. We four formed the nucleus of a group which organized the Panama-California International Exposition of 1916, with the following officers and directors:

President	G. A. Davidson
First Vice-President	Robert N. Bulla, Los Angeles
Second Vice-President	John D. Spreckels
Third Vice-President	Edwin M. Capps
Fourth Vice-President	Carl H. Heilbron
Fifth Vice-President	John F. Forward, Jr.
Secretary	H. J. Penfold
Treasurer	Frank C. Spalding

San Diego Directors

E. M. Capps, Mayor	John F. Forward, Jr.	Carl I. Ferris
C. T. Chandler	G. A. Davidson	James MacMullen
J. Fred Schlingman	Col. Ed. Fletcher	Col. Fred Jewell
H. J. Penfold	Harry L. Titus	Carl H. Heilbron
John D. Spreckels	J. P. Smith	Duncan MacKinnon
L. J. Wilde	L. R. Barrow	Col. D. C. Collier
S. R. Flynn	Lane D. Webber	Judge W. A. Sloane

Los Angeles Directors

Robert N. Bulla	J. O. Koepfli	R. W. Pridham
Vernon Goodwin	M. A. Hamburger	Fred L. Baker
S. L. Weaver	C. D. Hamilton	F. J. Eisenmeyer
John S. Mitchell		

The Los Angeles group was added after an appeal had been made for financial support, and a subscription of \$250,000 had been pledged by the commercial and industrial leaders of Los Angeles.

It was apparent that with a well directed effort, many of the foreign exhibits which had been displayed at the San Francisco Exposition could be secured for our 1916 Exposition. This effort was made, and we were successful in securing the great Canadian Exhibit, and the exhibits of France, Germany, Holland, Spain, Brazil, and other nations.

Two months and a half elapsed between the closing of the 1915 Exposition and the opening date of the 1916 Exposition on March 15.

We had a Midway both in 1915 and 1916 that was the talk of the world. Called "The Isthmus," it extended far beyond the limits of the present one and represented an estimated investment of a million dollars. It has been said that no Midway has ever been built that compared to the one we had in 1915-1916.

Nine states erected state buildings, some of which are still in use.

When the books were closed after both seasons, it was discovered that we had not only paid all expenses, but that we had a comfortable balance. We financed an expedition into the Yucatan jungles, where the gigantic Mayan monuments and monoliths --- replicas of which are in the San Diego Museum, were unearthed. This was done at a cost of \$150,000, and the expedition was under the direction of the Smithsonian Institution in Washington. It enabled us to bring back these remarkable symbols of a lost civilization, as well as most of the material for the great science of man display in the museum, which has been described as one of the greatest of its kind in the world.

These things were done through Exposition funds, and there still was a comfortable balance, which was turned over to the Museum, to keep alive that institution which has become so integral a part of San Diego's cultural life.

The foregoing represents the actual preparation and operation of the great Exposition of 1915-16. But the story of its accomplishments does not stop there. In fact, it just begins. For not a year has passed since then that some outstanding benefit has not been reaped for the city's present and future growth. A large part of our present substantial population first was attracted here either by a personal visit to the Exposition or by a description of its charms carried away by someone who did visit it.

January 1, 1917, San Diego Sun, 1:3-5, 2:3. GOODBYE!

Marking an epoch in the history of San Diego, the exposition, after two years and one day of success that has surpassed even the fondest dreams of its builders, ends tonight at 12.

Visiting thousands who are here today to behold the closing ceremonies and are joining in the joy and hilarity of the season, see a note of sadness in the passing into history of the most beautiful of fairs. For loyal San Diegans, who for two years have watched with pride the progress of the great undertaking, and the praise and fame it has brought the Harbor of the Sun will miss it.

But the marvelous dream city, with its acres of luxuriant foliage, and gleaming towers and beautiful buildings, will not go. It will remain forever the nucleus of Balboa park, and will be one of the famous beauty spots of California, and even though its period of actual operation will have passed, its gates will remain open to visitors from all over the world, an inspiration to San Diego and a monument to its creators -- a wonderland of America.

A sham battle, an army and navy parade, day and night fireworks, an open-air concert surpassing many shown in the best theaters of the country, and other special features will make today's program one of the greatest days in the two years of existence. The celebration will end at midnight in a blaze of glory when bombs, high in the sky above the gleaming courtyards, will release the flags of all nations. As they waver in the sky, the band in the plaza will render "The Star Spangled Banner." Then the visiting thousands below will join in mighty chorus in singing "Auld Lang Syne," led by Madame Schumann-Heink. And the San Diego exposition, as an exposition, will then become history.

The great sham battle, in which battalions from the vessels in the harbor, carrying heavy field pieces, will bombard the entrenched 21st Infantry, will provide one of the most spectacular numbers of the day's program. It was to begin at 2 p.m.

President G. A. Davidson of the exposition will be the honored guest of the great dream city today, in recognition of his invaluable efforts in conducting the famous fair to such a successful conclusion. At 8 p.m. directors of the exposition will assemble at the Cristobal at a dinner in his honor.

A resolution of thanks, signed by representative members of the principal commercial and civic organizations of the city, today was presented the citizens of San Diego and all California.

"We feel it our duty and consider it a privilege and pleasure to give this public expression to our appreciation of the largest and noblest service contributed by all of California in bringing the Panama-California International Exposition to such a happy culmination, and of the wholesome and generous support, assistance and cooperation of the people, cities and counties of California," is the recognition of the broad-minded endeavors of the people who are entitled to a liberal portion of the credit warranted by the gratifying outcome of the great undertaking.

The resolution is signed by President G. A. Davidson; Mayor E. M. Capps, in behalf of San Diego; W. S. Dorland, president of the chamber of commerce; A. D. LaMotte, head of the Merchants' Association; O. E. Darnall, president of the Cabrillo club; F. M. White, representing the Manufacturers' Association, J. C. Thompson, head of the Ad Club; and John A. Gillons, president of the Rotary club.

The gates of the exposition will remain open for three months at 25 cents admission, during the "clean-up" period. After that, at 10-cent gate will probably be established for the purpose of maintaining the

great wonder city as a playgrounds for visitors from all over the world. All the principal buildings will remain intact, so the beauty and harmonious grouping of the idyllic structures will remain as one of the greatest outdoor attractions of the country.

President Woodrow Wilson, in a telegram of congratulations today, applauded the efforts of San Diego in bringing to a successful closes the great fair.

January 1, 1917, San Diego Union, Special Section, 1:1-2, 8:5. Local park system: expanse of lawn, shrubs, flowers delights visitors; 1,867 acres of parks: Torrey Pines 369; Collier 65; La Jolla 5; Mission Hills 5; city does not intend to improve all of Balboa Park --- large areas will remain in natural state; genuine zoo built up containing buffalo, deer, elk, birds, lions, leopards, bears, monkeys and alligators; Balboa Park valued at \$4,735,000.

No city in the world, regardless of size, offers to its people a more superb system of municipal parks than San Diego. The story of the San Diego parks reads like the traditional fairy tale. It is little less wonderful than the story of the city itself. And both are as beautiful as they are true.

Scores of attractions demand the attention of the visitor, but he carried with him at his visit's end no sweeter memory than all that the parks have offered, with their delightful contours, splendid foliage, exquisite roads and by-paths and their everlasting gardens of rare and fragrant flowers. The great Balboa park, covering an area of 1400 acres, has been referred to by tourists, because of its bewitching advantages, as a veritable Paradise on Earth. San Diegans, proud of their parks and mostly daily visitors to them, share the opinion. Each of the various parks is a genuine playground. In the very heart of the city, a few moments' walk from the busy corners, one may find the rest and quiet and all the beauty seldom available except on the outskirts of the ordinary "park proud" town.

Summed up, the park system of San Diego has an area of 1867 acres. Think of it! Room for a city in itself. In addition to the great Balboa, or city park, there is found the Torrey Pines of 369 acres; Collier park, sixty-five acres; Mountain View park, fifteen acres; La Jolla park, five acres; Mission Hills park, five acres; New Town park, three acres; Plaza park, one acres; and Old Town park, two acres. The park system has a valuation of \$8,492,700 for the land and \$2,137,000 for improvements.

San Diego's remarkable park system is due to wonderful foresight on the part of the city's pioneers; to enterprise in the years that came after; to climatic conditions; to love of home; and to the broad, free spirit of the people who made its development not only a pleasure but a duty and a joy forever. The average San Diegan thinks as much of every park acre as he does of his own little flower garden or well-kept lawn. He counts them as one. Civic beauty is the slogan throughout. The park's are the people's playground --- not a "keep off the grass" sign in sight. San Diego was built in a region offering tremendous opportunities for such work. To the San Diegan, a tree is an adorable thing, a plant of similar worth, a flower a boon to all mankind. In such he has reveled. And out of his enthusiasm, his love for the beautiful things of nature, have come the gardens that have caused the world to marvel. Few people ever get acquainted with the San Diego parks without some kind of reverence to the Lost Gardens of Eden.

Probably no great park in the world is located so near the center of things --- so near to the people -- - as Balboa park, home of the great Exposition just closed. A veritable bower of beauty, the home of birds and bees and rainbow-tinted butterflies. It commands a view of the mountains, the bay and the ocean, with rugged canyons, some improved, cutting through the landscape in superb contract to the flower-strewn fields and rose gardens and jungles of spreading, blooming tropical trees and falling vines.

All of the great Balboa park has not been improved. It will never be. The policy of the past and future is to be the same. Several large areas have remained --- will remain --- in their natural state. Here will be preserved all the native shrubs and wild flowers. And there are those who turn to these natural plots first of all --- turn to them with the adoration that comes with the love of first things, the love of the soil as it was before man came. For every inch of the undeveloped land is in the primitive state --- not even a stone overturned, not even a bridle path between the sagebrush and the greasewood.

In the main sections, however, wonders have been brought to pass. In districts once semi-arid and green alone in the rainy season, the development has been such as to arouse the envy of a New York or Chicago landscape artist. The lawns, like those in the residential districts, are green throughout the year, the roses and other flowers bloom continually, the trees are never bare of leaves.

The system of roads through the great park is beyond improvement. The bridges, some concrete, some rustic, are a revelation. The pathways, leading from the main roads into the well-kept gardens, are never forgotten by those who travel them. From many of these gardens, the magnificent Cabrillo bridge, spanning the great Cabrillo canyon, and costing \$350,000, is visible. Well-paved roadways sweep from the highlands into this vast canyon at intervals, the full length of the park. The sequestered canyon roads finding their end at many of the most improved city streets.

In Balboa park, fields for all classes of outdoor amusement are provided, and here and there in the canyons and even upon the hills are constructed ponds and waterfalls.

San Diego's climate and soil will grow anything. No better proof of this can be found than in the parks of the city. Trees and shrubs from Australia, New Zealand, South America, China and Japan flourish therein. Many of the growing things are strange to tourists or to the prospective or new resident, but he soon learns to know them by their names and to glory in their beauty. A list of the trees, shrubs and plants today growing in the great Balboa park, if printed here, would fill a solid column.

The botanical life of the park was greatly augmented because of the Exposition. Thousands of trees and plants never before planted on American soil were brought to San Diego and raised to perfection in the parks following their transplanting from the Exposition nurseries. Of the many varieties, only a few failed to "make good" away from their native environment. Among the most popular of the tropical trees are the acacias, eucalyptus, Araucarias, sterculias, Ficus, hymendars, avocados, sapotes, and over a million shrubs, palms, dracaenas, dasylirions, nolinias, bananas, strelitizias and agaves.

Varieties of roses number more than 7,000, most of which blossom the year around. There are also hundreds of thousands of flowering and budding plants and bulbs. In addition to this wonderful collection of "strangers," practically all of the old-fashioned plants, dear to the eye of the Easterner, are found in profusion in Balboa park.

Many of the smaller parks are of sufficient beauty and size to be the "whole thing" in less-favored communities. New Town park, situated only a few blocks from the center of the city, is one of the most popular and is filled daily with those who love the out-of-doors, which almost everybody in San Diego does. The City Plaza park, with its electrical fountain, in the center of the business district, is a genuine beauty spot, fresh in the minds of all tourists and a genuine joy to those who frequent the business portions of the city day by day.

La Jolla park is improved to some extent, and, at all times, attractive. Torrey Pines park is as yet in the rough, except for the roadways, but because of its wild state --- such pines being found nowhere else in the world --- it is considered by many to be the most alluring. This park covers 200 acres and is on the main highway from Los Angeles and the north. The frontage along the ocean is more than one mile. The pines have a rugged and wind-swept appearance, standing high upon the bluff above the surf, and are photographed annually by thousands. Placed inland, they grow to larger proportions, some of those in Balboa park being of great height and spreading beauty. Torrey Pines park is a favorite place of picnickers and fishermen, many fine catches of surf fished being reported at that point annually.

La Jolla park is of similar beauty. It is located about twenty-five miles from the city, overlooking the ocean. Just below is found the famous La Jolla cove, so popular with surf bathers. Off to the north is the celebrated biological station.

The conservatory and Botanical Building in Balboa park, a part of the Exposition, are permanent and are second to nothing of that character on the Pacific coast. Many of the plants in this building have never been seen before in the United States.

In addition to the many other attractions, a genuine “zoo” has been built up in Balboa park. It contains buffalo, deer, elk, birds of almost every description, lions, leopards, bears, monkeys and alligators.

The valuation of San Diego park lands and improvements is given as follows:

Balboa park, 1400 acres	\$4,735,000
Collier park, Point Loma	51,600
La Jolla park	44,000
Playground park	56,000
New Town park, F Street	108,800
Plaza, Broadway	450,000
Old Town park	6,300
Mission Hills park, 5 acres	9,400
Torrey Pines park, 369 acres	49,380
Union Heights park	<u>9,100</u>
	\$5,519,580
Municipal farm lands and equipment	794,680
Unimproved properties, 10 blocks and 75 lots	200,000

January 1, 1917, San Diego Union, Special Section, 1:2-3. International Harvester Company presents Exposition building to city (Exhibit 33); includes about 100 citrus trees on grounds.

January 1, 1917, San Diego Union, Special Section, 1:1-3, 2:2. Model Ranch at Exposition proof of possibilities; C. L. Wilson managed Model Farm for two years; city plans to continue the farm in operation, by W. C. Getty.

“When settlers realize that farming is as much a business as selling dry goods or groceries and they place it on the same basis --- and I mean buying and selling and producing --- people will more than ever realize that a good living and enough over for a comfortable savings account --- may be taken from five to ten acres of California land each year.”

That is the statement of C. L. Wilson, who has for two years managed the model farm at the Panama-California International Exposition. And Wilson should know, for farming has been his business.

“Every man is not naturally a farmer and unless he knows the business --- for, I insist, it is a business --- before beginning, he will have to face some great disappointments, as have thousands who have tried the experiment on experience gained in an office building in some city.

“First of all a plot of land must be secured on which a supply of water for irrigation is sure from month to month and from year to year. Then he must have a knowledge of soils and for what production the land is best fitted. Many a failure has come from planting the wrong tree or plant in a soil which God meant to grow something else. One part of the land may be fitted for fruit trees; another, only a short distance away, may be found more productive for vegetables.

“System in farming is as important as system in business. A man must make up his mind the sort of farmer or rancher he is going to be before he selects his land. He must know whether he is going to go in for fruit trees or poultry or garden produce or all of them. And his land must be selected carefully for that which he intends using it. That’s common sense, isn’t it?

“A wholesale grocery house would naturally be located near the best shipping facilities. A ranch must be located near a good market, where transportation costs are fair, where there is a fair chance of an advance in the price of the property, where the supply of water is sure, where the land is fitted for whatever purpose it is intended.

“Many men make a complete failure of farming because they do not understand it. Every man feels that if he should lose his position in the city, he could make a good living from the land. This is not true. A man needs the same sort of an agricultural education to make the soil produce a living for him as a lawyer needs to successfully defend his clients in court.

“A large number of the failures are attributed to a lack of knowledge of farming, of markets, or location and to the fact that ranching is considered ‘small business.’ Many do not believe that much money is required. I would not advise anyone to make their home on a piece of land unless they have enough money to pay for it, to erect suitable buildings, and to wait several months for the first return. Reverses come to a rancher as well as those in other lines of business, and reverses mean loss in money. To one family may come illness, to another ill luck in another form. A man must protect himself against these emergencies. I do not mean by this that a large sum of money is necessary, but I do mean that there have been too many failures because of a lack of sufficient capital, and this discourages others. Failures are bad for the community and are bad for the State at large and we must have fewer of them.

“After being in charge of the model farm at the Exposition for two years, I have no hesitancy in saying that from seven acres of good California land a profit of from \$2,000 to \$2,500 a year can be taken by a man who understands his business.”

The model farm has been such an interesting attraction at the Exposition in San Diego has been such a success from every standpoint that it is understood that the city park board will continue it as a lasting advertisement for Southern California. The seven southern counties under which the farm has operated during past two years will, it is understood, take it over to the San Diego park board soon after the closing of the Exposition.

A model farm, patterned after that at San Diego, is soon to be established in Los Angeles, it was announced recently.

(The table follows.)

Vegetables, berry and fruit crop for 1915. All deciduous fruit trees, berries and vines were planted March 10, 1913.

All citrus fruit trees were planted August 20, 1912.

(Refer to the newspaper for crop yields.)

January 1, 1917, San Diego Union, Special Section, 1:6-8, 2:3. Great West shown at best says Exposition President G. A. Davidson reviewing past two years; was chairman of executive committee and vice-president before he became president

Now that the Panama-California International Exposition is about to close its gates, it seems fitting that we should pause and consider the benefits already accrued, or to accrue to San Diego and the Southwest from the Expositions which have been in continuous operation since the first day of January nineteen hundred and fifteen.

In the conception of our Exposition, in the year nineteen hundred and nine, certain definite results were anticipated --- certain direct benefits were expected to result to the advantage of the Southwest, in the holding at San Diego of this great enterprise. These expectations have been realized. In fact, more than realized.

The West has been seen at its best. The wonderful and vast possibilities of this great empire have been successfully exploited to the amazement and entertainment of our visitors. The West undoubtedly is appreciated today as it never has been before. What might be termed the artistic, the aesthetic side of the West --- has been presented to the visitor, and the West's full appreciation of the cultured side of life has been ably shown. The Expositions have set standards in music, in art, in architecture, in landscape effects,

and those elevated standards must and undoubtedly will have a beneficial effect east of the Rocky mountains, as well as setting high standards for ourselves, here at home.

The Expositions have been the objective point for many of our country's prominent citizens and government officials. They have been the means of introducing the West to these men under most favorable circumstances. The knowledge that these visitors have obtained at first hand, of the resources and tremendous possibilities of the Southwest, will, without a question of a doubt, rebound to the lasting benefit of our district in its future development. Many of these men have deemed it a privilege to become conversant with Western conditions, concerning which they have previously known comparatively little.

Great interest has been exhibited by the Expositions in the development of the younger generation. Many special days have been devoted to child welfare work. The influence of this effort unquestionably is to be a factor in the upbuilding of the children of today --- the men and women of tomorrow.

Of special interest has been the musical side of the Expositions. Organizations and artists, famous throughout the musical world, have been heard in concerts and recitals. Our great out-of-door organ has been one of the outstanding features of the entire Exposition period, and the official organist, Dr. J. Humphrey Stewart, is deserving of the warmest commendation of Exposition visitors. Exposition musical reminiscences would never be complete without mention of the part taken therein by our beloved Madame Ernestine Schumann-Heink, who so generously gave of her time and energy for the entertainment of the people of the Southwest. The thanks of all our people are also extended to Miss Ellen Beach Yaw for her ever willingness to appear in recitals.

The influence of the type of architecture adopted and carried out in the construction of the Exposition buildings marks an epoch in Exposition architecture. Literally hundreds and perhaps thousands of our visitors have journeyed to view and study this phase of the Expositions. Plans of one structure on the grounds have, upon request, been sent broadcast over the country, and we have evidence wherein some of these plans have been utilized in the erection in widely scattered sections of the United States, if not abroad, of buildings similar in design. This is but one of the many results that might be expected along this line.

The archaeological and anthropological exhibits which have been maintained throughout the two-year Exposition period are said to be the most complete exhibits of this character ever assembled, with the one exception of those maintained by the Smithsonian Institute of Washington, D. C. Due to this fact, San Diego's Expositions have been the Mecca for scientists desiring to study the various units that make up these exhibits. The Expositions will be remembered in the scientific world for the efforts displayed in these departments of this international enterprise.

Many special days were held in honor of personages prominent in literary life and much effort has been expended by Exposition officials in the interests of the best in literature.

Rare art collections have been shown throughout the Exposition period, many of these collections being of great intrinsic value. Artists of great renown have been listed among the exhibitors.

So much for the artistic and scientific phases of the Exposition activities. Now, let us consider briefly the materialistic benefits resulting from the Expositions.

The term "the World's Greatest Outdoor Advertiser" has been applied to our Expositions, and, in a sense, this tribute is deserved. They have been the media through which the attractions and recourses have been exploited of not only the Southwest, but also the United States and the foreign countries. Already permanent results are reported by the various countries, states and communities participating. Already have the maintenance of the comprehensive exhibits borne fruit in new and permanent settlers to those Western communities setting forth to homeseekers the advantages of their respective localities.

Between the foreign exhibitors of France, Holland, Germany, Austria, Spain, Italy, Switzerland, Japan and Turkey and the people of this country has come a greater and more comprehensive understanding of the possibilities of our future trade relationships. A greater knowledge has been obtained by the people of

the United States of the vast natural resources of our neighbor and friend to the north, the Dominion of Canada. The Canadian exhibit, with that of the Republic of France, formed the nucleus of a very remarkable foreign section. Due to the participation of two of our most valued territories --- Hawaii and Alaska, and our Far Eastern possession --- the Philippines --- we became acquainted with the latest progress of these new additions to the United States. We are also bound closer together, which augurs well for future commercial activity between these territories and the Southwest.

Credit is due every member of the Women's Board of the two years, and, although it is impossible to mention all who have won the admiration of the directors, mention must be made of Mrs. Ivor N. Lawson, president of the 1915 board; Mrs. Uriel Seabee, president of the 1916 board; Miss Gertrude Gilbert, who, with the aid of her music committee, has been of inestimable value to the Exposition during the two years; Mrs. George McKenzie and her splendid social committee; Mrs. E. Thelen and her active house committee; and Miss Alice Lee with her hostess committee.

The city of Los Angeles, collectively and individually, has assisted not only by an appropriation of money, but in many other ways well known to every Exposition director. Men of Los Angeles have served faithfully and unselfishly as directors and mention must be made of the conscientious effort put forth by Senator Robert N. Bulla and J. O. Koepfli, the Los Angeles members of the executive committee. The wonderfully complete exhibit of the seven southern counties, as displayed in the Southern Counties exhibit at the Exposition, is typical of the advantages that are to be obtained by intelligent cooperation.

Recognition must be made at this time of the enthusiasm of one individual, responsible more than any other for the opening of the Exposition of January 1, 1915. This man, known for his untiring efforts, has endeared himself to the people of the Southwest. His name is Colonel D. C. Collier.

Frank J. Belcher, chairman of the 1915 executive and finance committee, rendered such valuable aid that any review of Exposition activities, no matter how brief, could not omit his name.

The time unselfishly devoted to Exposition activities by Messrs. George Burnham, Carl H. Heilbron and Carl I. Ferris has been of great assistance in the execution of Exposition buildings and the entertainment of guests.

One other name must be mentioned for his generosity in giving to the people of this community a permanent out-of-door organ and for furnishing the services, for the entire Exposition period, of the official organist. Our appreciation is extended to Mr. John D. Spreckels.

Of great pleasure to the members of the Exposition directorate during the two-year period has been the loyal support and hearty cooperation accorded the Exposition officials by the people of this community. For this manifestation of their approval of the work undertaken and carried out, the directors express their sincere thanks to the people of San Diego and vicinity. This splendid support and cooperation has achieved a record in Exposition history never before accomplished --- the continuous operation of an Exposition for two full years and a day.

The people of San Diego should be commended for their courage in the building of our Exposition and the wonderful spirit always manifested in supporting the enterprise during its operation. The building of this great undertaking in the southwest corner of the United States is typical of the character of the people making up the community in which it has been built.

January 1, 1917, San Diego Union, Special Section, 1:5-6. B. W. Lee, on Exposition payroll from first to last; assistant auditor during construction period and in charge of income from exhibits, concessions and admissions in 1915 and 1916.

January 1, 1917, San Diego Union, Special Section, 2:1-2. Exposition will pass into history tonight.

San Diego's "Exposition Beautiful," adjudged by critics from every point of the compass as more superb in every detail than all that had gone before or may come after, will pass into history today.

But, unlike all other attractions of similar character, the end is not yet --- the best is still to come. In future years the great Exposition grounds will remain practically intact, forming, as a feature of the vast Balboa Park, a resort unequaled in any of the world's most famous playgrounds.

Comparatively few of the splendid buildings will be destroyed. Many of them have been built of solid concrete --- others, well kept year by year, will endure until the children of today have found their way well into middle life. A veritable Enchanted City, as a result of the Exposition, will open wide its gates to every San Diego visitor and to the citizenry for a time at present beyond estimate.

Many of the exhibits will be gone, but in their place will be installed things of permanency. The Exposition with its foliage, its marvelous plazas and prados, its incomparable courtyards, its bridges and towers and gardens will remain the same. And to all who may come there will be offered, in addition to the superb exterior effects, exhibits forming a museum of which even the most pretentious European city might well be proud.

The Exposition has given to San Diego a resort beyond the dreams of the builders of ancient Spain. Shattering all records for period of operation, meeting every expense with "something to the good," the Exposition, in passing, is but bringing things into closer touch with the people. A small admission fee will be charged during the first three months of 1917, while the exhibits of nations and of men are being removed. Thereafter the great gates will be thrown wide to all who may journey there --- a place of recreation and joyous freedom for the men and women and an all too busy world.

The great Plaza de Panama will be held intact. The Cabrillo bridge, the California Building and others of the great structures will escape the wrecker's mallet. In fact, under present plans, on a few of the buildings are to go. The Isthmus structures soon will be cleared. The San Joaquin Valley building will come down, the Canadian building and the Kern County building will be leveled. But upon the ground of these minor structures, when the debris is cleared away, will arise sunken gardens, the equal in beauty of anything in the park. One year hence, it is promised, the Exposition grounds will be even more of a delight than they are today. Crowds in the grounds, it is predicted, will exceed at times those of "Exposition Days."

Presenting one of the greatest out-of-door attractions in the world today, the great Spreckels organ, built to last for many years, will be daily in operation. Band concerts and military drills, upon the famous Plaza de Panama, will be regular features. Many local events will be staged in the grounds day by day. Art exhibits, science exhibits, pioneer plays, government exhibits and many of the most interesting features of the Exposition will remain untouched. These will be added to from time to time.

Under present plans a 25-cent admission fee will be charged after January 1 for a limited time. This is to be during the "clean-up" period. After that the park board will favor a 10-cent rate. Later it is probable that the grounds will be free to all. If the Exposition officials decide that a 10-cent rate will carry them through the clean-up period during January, February and March, the plan of charging 25 cents may be abandoned at once and the lower charge put into effect.

Balboa Park stands today, with its Exposition buildings, as a resort second to none throughout the land. Further improvements are to follow. A majority of expositions have resulted in little, as regards permanent beautification, to their builders. San Diego, to the contrary, is left, through its vast enterprise, what may be well termed a perpetual exposition --- an attraction descending to generations.

Those who have failed to visit the Exposition still have that treat in store, practically as it always was. They will find it awaiting them in their journey to the Pacific coast --- to the Harbor of the Sun.

January 1, 1917, San Diego Union, Special Section, 2:2. United States gun crews to bombard Fair.

Four three-inch field pieces, manned by gun crews from the cruisers *San Diego*, *Pueblo*, *Chattanooga* and *Albany*, will be used in the bombardment of the Twenty-first Infantry trenches during the

battle at the Exposition today. The guns will be employed in making a "barrage" fire for the Second Battalion of the Twenty-first Infantry, which will storm the trenches of the First Battalion.

A battalion of bluejackets and marines from the armored cruiser *San Diego* will participate in the military and naval parade this morning. The bluejackets from other warships in the harbor will not be in the line of march. The *San Diego* battalion will be commanded by Lieut. W. W. Bradley.

Admiral Caperton announced yesterday that the flagship band will give two concerts at the Exposition today, one in the afternoon and the other this evening.

The cruiser *Raleigh*, flagship of Rear Admiral Fullam, will hold a full power speed run off the heads Thursday, returning to the harbor immediately after the tests are completed.

The cruiser *Albany* will weigh anchor and proceed to Bremerton tomorrow.

January 1, 1917, San Diego Union, Special Section, 2:3. Day fireworks to feature program arranged for young America.

Joy will outweigh sorrow in the celebration at the Exposition grounds today and tonight when San Diego and thousands of visitors to the city say "Farewell" to the Panama-California International Exposition. San Diego, in its deep appreciation of the Exposition, is not backward looking and, therefore, considers the close of the Exposition a matter of justification as a forerunner of the great things to be accomplished in the future.

A big program of entertainment has been prepared for today and tonight, including a sham battle, army and navy parade, reception, day and night fireworks, singing by Madame Ernestine Schumann-Heink, dinner at the Cristobal in honor of President Davidson, open house at the Southern Counties building and music by three bands.

The sham battle this afternoon at 2 o'clock will be the most spectacular of the day's programs and will include an engagement between the First and Second battalions of the Twenty-first Regiment, U. S. Infantry. Major William Brooke will command the attacking forces, which will march on the Exposition grounds promptly at 2 o'clock; Colonel Joseph P. O'Neil and his Second Battalion will defend the Exposition grounds and an intricate system of trenches has been prepared to stand off the invaders. Land mines, barbed wire entanglements and heavy artillery will be used in a spectacular manner, so that the great crowd will have a repetition of the wonderful battle maneuvers held on the Exposition grounds, December 9.

Day fireworks will be shown for the children at 4 o'clock on the aviation field and the set pieces at midnight tonight will be the most elaborate every displayed in San Diego. This gigantic display has been placed on top of the Organ Pavilion and after the lights have been turned out at midnight will present San Diego's message to the future in a beautiful motion picture etched with fire. The climax will come when great bombs explode above the set piece, releasing the flags of all nations, while the three bands join in playing "The Star Spangled Banner."

A few minutes before Madame Schumann-Heink sings "Auld Lang Syne" at the formal ceremonies at the organ, which will begin at 11:30 o'clock, the world-famous diva will be presented with a jeweled medal by President G. A. Davidson on behalf of Exposition directors. The jewels of the setting are taken from San Diego county mines and the inscription that has been engraved reads: "To our Beloved Schumann-Heink, from the San Diego Exposition, 1916-1916."

The blowing of "taps" by buglers on the balconies of the Plaza de Panama will be the signal for Schumann-Heink's final song.

Those who will speak at the formal ceremony will be Lieut. Gov. William D. Stephens; Mayor James Rolph, Jr., of San Francisco; Mayor William T. Woodman, of Los Angeles; R. P. Hale, representing

the Panama-Pacific International Exposition; President G. A. Davidson; John S. Mitchell, representing the Los Angeles Chamber of Commerce; and D. C. Collier.

The army and navy band will start downtown at 10 o'clock this morning and is scheduled to arrive on the Exposition grounds at 10:35 o'clock, where it will be reviewed by President Davidson, army and navy officials, distinguished guests and directors of the Exposition. All buildings on the grounds will be open until 10 o'clock tonight to add to the gaiety of the program and provide diversions for the great crowds expected to be on hand for the official closing of San Diego's great two-year Exposition.

January 1, 1917, San Diego Union, Special Section, 2:5-7. Outdoor Organ has awakened taste of public for best in music and harmony.

The Spreckels outdoor organ, costing with its pavilion and peristyles approximately \$125,000, was presented to the people of the city of San Diego by John D. and Adolph B. Spreckels, the deed of gift reposing in the park commission, for the perpetual use and benefit of the people of San Diego. The organ was dedicated December 31, 1914. It is located on the Plaza de los Estados of the Panama-California International Exposition in Balboa Park. The Exposition closed formally last night, but the organ, with its pavilion, will remain to furnish music for years to come to San Diegans and their guests. By the terms of the deed of gift, no admission fee may ever be charged to any organ recital, and although a money fee has been exacted for various attractions which have been given at the Organ Pavilion, no one has ever had to pay a cent to hear an organ recital.

The organ was constructed by the Austen Organ Company of Hartford, Conn. Dr. Humphrey J. Stewart, who has been the official organists all the time the organ has been in operation and will act in the same capacity for at least another years, learned his profession under some of the greatest English organists, having played that instrument since he was 14 years of age. For many years he was organist of St. Dominick's Church in San Francisco.

So far as is known, more recitals have been given at the Spreckels organ in the last two years than upon any other organ in the world in a similar period. Dr. Stewart was prevented from giving recitals only 18 times in the past 365 days. With eight selections to each recital, this gives a total of 1,768 compositions played upon the organ during 1916, and during 1915 there were 2,864 compositions played, making a grand total of 5,632 compositions. Ten times during 1916, rain prevented the recitals and eight times they were not given because other attractions were being presented at the Organ Pavilion at the recital hour.

During the last year the following guest organists gave recitals at the Spreckels organ: Uda Waldrop, San Francisco (eight recitals); Albert Conant, San Diego (three recitals); Walter E. Hartley, Pomona College, Claremont, Cal. (two recitals); Royal A. Brown, San Diego (three recitals); Arthur Blakely, Los Angeles; W. W. Carruth, Oakland (two recitals); Warren D. Aller, San Jose (seven recitals); Walter Handel Tworley, San Francisco (twelve recitals); John Doane, Chicago (three recitals); Harold Geer, Santa Rosa; Dr. William C. Carr, New York City.

Among the artists who appeared during 1916 as soloists at organ recitals or in whose concerts the organ was played were:

Madame Ernestine Schumann-Heink, contralto; Madame Ellen Beach Yaw, soprano; Madame Bernice Pasquali, soprano; Henri La Bonte, tenor; Edwin House, baritone; George Van Surdam, tenor; Signor and Signora Picci, tenor and soprano; Signor and Signora Giovacchini, tenor and soprano; Mae Buckler Stevenson, soprano. In connection with the State Music Teachers' Association, one session of which was held at the organ, soloists were: Royal A. Brown, organist; W. A. Carruth, organist; Mina Gorgianna Strauss, contralto; Homer Henley, baritone; Miss Constance Balfour, soprano; and Henri de la Platte, basso.

Practically ever local San Diego singer of prominence has taken part in the recitals as soloist.

(More statistics given of number of composers (213) and number of their compositions played during the year.)

January 1, 1917, San Diego Union, 2:8. Love of music is characteristic of San Diego people; noted artists perform during past years before crowds of appreciative listeners, by W. W. B. Seymour.

January 1, 1917, San Diego Union, Special Edition, 3:1-6, 5:1-4. Exposition's duration, charm to long remain unique among world's amusement enterprises, by Guy R. Kinsley, Director of Publicity, Panama-California International Exposition.

Father Time, countless centuries young, took a peep at his wrist watch early this morning, and ran his attenuated finger through his Doomsday Book, and opened the pages of the Index at "E." His shrewd old eye scanned the page and noted with satisfaction the red lines drawn through every entry. Suddenly he reached for his scythe, knocking over the latest wrinkle in hour glasses that had been ordered returned to the makers, and shouted to his secretary, aroused by the racket:

"Is that San Diego Exposition still alive. That little beauty will get me yet. Twenty-four long months it has held one and instead of getting weaker, by Jove, it gains strength every day. I've tried wars, floods, elections, slides in the canal and even false gossip, but it's no use. Get me a complete report quick," and as the lieutenant hurried out a half-dozen new gray hairs appeared in the old man's beard.

As he paced back and forth in the room, watching the stock ticker to see how his corner on hours, minutes and seconds was keeping up the price of time, his mind ran over the history of other expositions. The San Francisco affair gave him a scare when it lasted nine and a half months and closed with such a mighty rally that he feared Fate, who gave him his job for life, had handed him that hated token of mortals, the "double cross."

He recalled that back in 1876 the Philadelphia Centennial has set the style for expositions with a length of six months, which was burning the candle of summer at both ends. In 1885 the World's Cotton Centennial Exposition was held in New Orleans and, although favored by climate, six months was considered enough. In 1893 the great Chicago Columbian Exposition endured six months and required twenty years to wind up its affairs. The California Midwinter Exposition at San Francisco in 1894 continued five and a third months. In 1898 the Trans-Mississippi Exposition at Omaha closed in six months; the Pan-American Exposition at Buffalo was over in six months; the Louisiana Purchase Exposition in St. Louis was satisfied in seven months; the Lewis and Clark Exposition at Portland lasted only four and a half months; the Tercentennial Exposition at Jamestown in 1907, closed in seven months; and the Alaska-Yukon-Pacific Exposition at Seattle in 1909, found four and a half months entirely sufficient.

"Father, its' over at midnight tonight," interrupted the lieutenant from the doorway with a cry of joy. Father Time sat down, and slowly drew a red line through the entry "Panama-California International Exposition," as he wrote, "twenty-four months ad a day," at the end of the line he smiled broadly, shook his head, and sighed: "SOME SHOW!"

The world agrees. The smallest city that ever attempted a world exposition has beaten them all. The Panama-California International Exposition has been recorded as the most beautiful --- so judged by men and women capable of passing critical judgment. To be a champion, whether ward of world, and know the joy of success in anything, from marbles to millions, is a sensation never traded, but to win, when every friend calls you foolish, heaps ice-cold gloom on your plans, predicts sudden and overwhelming failure; quotes history, scripture and weather reports; and whispers, "I told you so" every time a black cloud hovered over --- well, San Diego knows that feeling.

In December 1915, President G. A. Davidson and members of the executive committee and board of directors chosen for the 1916 organization visited the San Francisco Exposition to get the one feature needed to make San Diego's Exposition complete and well-rounded. That was exhibits. When Colonel William Hutchinson, Canadian Exposition commissioner, consented to move his display to San Diego, the Southern California enterprise was assured the most wonderful display ever made by any state or nation anywhere.

As an added feather in the cap of the City by the Silver Gate, it can be said that Colonel Hutchinson has pronounced the Canadian display in San Diego superior in many ways to that in San Francisco, and before the close of the year believed the results obtained by Canada through the exhibit were equally as good as in the northern city.

The French exhibit, housed in the Palace of the Legion of Honor at San Francisco, was another wonderful asset to come to San Diego. Because of the historical value of the collection owned by the French government this exhibition was housed in the California Building, which is fireproof and capable of giving protection of every kind to the display. Another feature for the first few months of the new year was the famous Luxembourg art collection in the Fine Arts building. Italy, Germany, Austria, Russia, Spain, the Philippine Islands, Alaska, the Netherlands and Turkey were among the exhibitors that accepted the invitation tendered by San Diego Exposition officials.

Another addition to the 1916 Exposition was the wonderful growth of the shrubbery and foliage which intensified the beauty of the setting. The Isthmus was reorganized with many new shows, adding one attraction which permitted us to day it was "the first fur-line amusement street in the world." This free zoo, in charge of Superintendent F. G. Kaufman, has proved one of the most interesting features of the Exposition and was a source of constant entertainment and education for adults as well as children.

Before the formal opening, Tommasino's Italian Band had been engaged for the year through negotiations with Louis Gasdia, manager of the band. This musical organization proved to be one of the finest heard in the West, and, without exception, the best band that ever played at the Exposition. Tommasino came direct from his engagement at Atlantic City, where he had been exceedingly popular. Although a band was not maintained at the Exposition's expense more than the first four months of 1915, Tommasino's band was kept from the opening day in 1916 until the final ceremony of closing tonight.

The Spanish dancers and singers of the first few months of 1915 were included in the 1916 program and La Belle Sevilla was chosen leader of this musical organization, which added wonderfully to the daily programs of the year. These entertainers made good friends of all visitors, and their pleasant appearance, good music and dancing, working in absolute harmony, proved the wisdom of the directors in maintaining this feature of the 1916 Exposition.

The Dedication Day attendance was more than 45,000, which was 15,000 greater than the banner day of 1915, which had a total attendance of 30,000. The Fourth of July exceeded even this 1916 record by several hundred. On the night of July 5 the attendance of 1916 had been 28,000 greater than for the same period in 1915. The months of June, July, August, September and December proved the best, financially of the year.

One of the big features of March was the fifty-mile automobile race on the Isthmus in which Bob Burman, Barney Oldfield, Cliff Durant and Teddy Tetzlaff completed. Bob Burman, who won the trophy cup and prize money, was killed in his next race at Corona. His mechanic, Erich Schrader, who rode with him in the Exposition race, was killed also, and, as he was removed to the ambulance after the accident, he muttered until he died, "Not so fast, Bob, not so fast," which told pathetically the wild reason Burman long ago was given the sobriquet of "Wild Bob."

Two features stood out in the events of May, the first being the production of "As You Like It" by the students of the high school, and the other, Pied Piper Day, when Henry Collins of Coronado impersonated the Pied Piper and was host to 13,000 children, who trooped across the Puente Cabrillo and spent a wonderful day on the grounds.

In June, Tyrone Power, with Sarah Truax and a strong company, presented "The Servant in the House." The Ad Club offered a day filled with entertainment features, joining with Imperial Valley and Alameda County. "Admetus" as produced by the pupils of the Normal School, under the direction of Irving J. Outcalt and this production ranked with the finest ever presented in San Diego. In July, Ellen Beech Yaw gave her first 1916 concert. Madame Pasquali sang at the organ, Michael Giovacchini, baritone, gave an

attractive concert, and the Preparedness Parade of July 4 provided the most interesting feature of the sort held during the year.

Kite Day, on August 2, was a successful kid day, followed by a Ruth St. Denis pageant, August 5. The biggest athletic events ever held in Southern California were contested August 18 and 19 when the Amateur Athletic Union champion boxing matches and Far Western Amateur Athletic Union track and field meet were held in the high school stadium.

Charles Warren Fairbanks was entertained, October 3, and spoke at the Organ Pavilion, October 4. J. Hamilton Lewis added to the political aspect of the Exposition calendar and spoke to a great crowd in the War of the Worlds building. Senator Phelan was honored October 13 and was the principal speaker of the day. Housewives' Day, Mabel Normand Peace Day, Allen L. Benson Day, and Los Angeles County and Hollywood Day were prominent during the latter part of the month.

Joe Boquel, considered by many the greatest trick aviator, opened his engagement at the Exposition, August 28. One week later, after he had startled San Diegans by his wonderful gyrations and had won the unqualified admiration, he drove his aeroplane into the ground, causing his death just five minutes before he was to have been awarded an Exposition gold medal by President G. A. Davidson in recognition of his wonderful feats in the air. Boquel was doing his famous corkscrew at the time and, instead of falling, his machine was actually speeding toward the earth in graceful swings with the engine running at full speed.

Boquel was given a military funeral, participated in by soldiers of the Twenty-first Regiment, U. S. Infantry and members of the aviation corps at North Island. The medal, which was to have been given to the great flier, was sent to the widow in San Francisco.

In November, Hawaii Day, California Welcome Day, the big Cat Show, November 21, 22 and 23, Mother Goose Day, November 25, and Thanksgiving Services, November 30, were the most important. A feature of California Welcome Day was the bird-whistling contest of National City, under the direction of Miss Elizabeth M. Worthley. The cat show was managed by Mrs. A. E. Banks, and took its place as one of the finest shows ever held in the West. Mother Goose Day was a wonderful day for the children and grownups. The exercises were in charge of Miss Cornelia Strobhar and Miss Hulda Harker, two San Diego young women who drilled the children and superintended every detail of the program. The Treble Clef chorus gave a concert at the Organ Pavilion, November 19, and La Rue Hewes, San Diego tenor, delighted a big crowd, November 25. Dr. Charles Edward Locke delivered the Thanksgiving sermon and Ellen Beech Yaw was soloist in the greatest out-of-door Thanksgiving service ever held in the United States.

During the final month of December many big events were held. The Children's Fair, December 1, 2 and 3, on the Isthmus, brought together more than 7,000 exhibits showing the wonderful creative work of the children and providing an attraction of great merit for all visitors. The battle maneuvers, Saturday December 9, were considered by many better than any ever given in Southern California. The work of the troops and the aviators showed modern methods of warfare "at its worst." Colonel Joseph P. O'Neil was in charge of the Twenty-first Regiment, U. S. Infantry, which defended the Exposition grounds. The sailors were led by Lieutenant W. W. Bradley, Jr. and the marines were in charge of Captain Earl C. Long. The battles were fought in the afternoon and evening and brought the greatest battery of motion picture cameras ever seen on the grounds. Practically every Western company was represented and all benefited by the wonderful mimic engagement.

January 1, 1917, San Diego Union, Special Section, 4:1. EDITORIAL: The Old Year and the New.

The year that has just closed has been for San Diego marked by achievement and fair promise for the future. The great Exposition has had a second year of brilliant success and will be formally closed today after affording gratification to countless throngs during a period of twenty-four months --- a record that has no parallel in the United States. Regret that the great Fair comes to an end is tempered, however, by the knowledge that many of its most pleasing features will be preserved to add to the attractions of Balboa park, so that the visitor to San Diego this year and for years to come will be able to form a very clear idea about the

great Exposition of 1916 and 1916 that aroused the admiration of all who gazed upon its manifold beauties during those two memorable years.

But the Exposition just closing has been only one of San Diego's achievements during the past twelve months. The city has had substantial growth. Building operations, which were interrupted here, as elsewhere, during the previous period of depression, were resumed during 1916, and the grand total of new construction, begun or completed, during the year, makes an impressive showing of the city's growth. New industries, too, have been established and have brought the payrolls that mean so much in building up a locality. And more are promised in the future. Generally speaking, too, business has been good. San Diego is having its share of the prosperity that has come to the country during the past year or two. Its farming district has been enjoying good crops and remunerative prices. On the whole, the year just ended has been a prosperous one.

The outlook on this New Year's day is, perhaps, brighter than at the beginning of any previous year. One of its most encouraging features is that the early completion of the San Diego and Arizona Railway is now absolutely assured. Very recently the welcome announcement was made that the final arrangements for completing the line had been effected and that the great Southern Pacific Company had joined hands as a partner for finishing the road to Colorado. Since that time a large building contract has been awarded, and there is every reason to expect that the last gap of construction will be filled in the near future. In fact, as matters stand, there is every reason to believe that the road will be in operation long before the close of the present year. It ought to be unnecessary to suggest what this line will mean for San Diego. It will have the effect of making this city, with its superb harbor, the commercial port of the great Pacific Southwest. San Diego has waited long for this consummation. That it is now close at hand is clearly revealed in the dawn of 1917.

Readers of this Annual, too, will find on this New Year's day other developments of great importance are in sight. The war and navy departments are preparing to avail themselves of this port. A great marine base, aviation station, and the increased use of the harbor for naval purposes are among the projects to be carried out in the near future. Truly, the year 1917 begins most auspiciously for this city.

January 1, 1917, San Diego Union, Special Section, 4:2-3. Exposition Rose Garden recalls fond memories.

Among the legion of delightful memories of the Exposition which thousands of visitors have carried away, none has been more prominent than the recollection of the Potpourri rose garden back of the Organ Pavilion, conducted by Mrs. Jessie C. Knox.

Ample visual evidence of this is found in the guest book which Mrs. Knox keeps and in the letters from all parts of the world which she has received in the last two years.

When Mrs. Knox nearly three years ago broached the idea of a rose garden to the Exposition authorities, her argument was based on the fitness of the establishment of such a "Garden of Hospitality" in a land which has been noted for its largesse of roses, where roses cluster around every home. The Exposition quickly saw the logic of establishing a place where visitors from localities in which flowers are luxuries could gather roses with a free hand, and where moments of rest under rose-draped pergolas and strolls through rose-lined walks should become priceless memories in after years. But the Exposition was hard pressed for funds and could not afford the \$10,000 which the plan demanded.

Nevertheless, the rose garden was established, more modestly than first planned, contributions being made by friends and flower lovers from all parts of the Union.

In many ways this humble acre of stony ground has reached out across space and carried to hundreds of persons delightful and unexpected associations. Anne Morgan heard of it and ordered some of the flowers and vases. "We enjoyed the rose garden more than any other part of the Exposition," wrote Dr. Starr of Columbia University. "To us the idea of a rose garden for visitors and the potpourri of California flowers to take to one's home is the most beautiful thing we ever heard of," wrote A. D. Nordren from faraway Stockholm. Elmer Ellsworth Gornsey, a noted mural artist, and his wife made a special trip to the

Exposition to revisit the garden, and Mrs. Cleveland Preston, widow of President Cleveland, having heard of the garden through the daughter of Dr. Erdmann, president of Princeton University, has written that she hopes to visit it.

January 1, 1917, San Diego Union, Special Section, 4. City's artistic life of high development and steady growth, by Sydney L. Snow.

(Excerpts)

For the last two years most of the art life of the city has been centered about the Exposition, and the beautiful grounds and buildings still are to be the hub of the cultural activities of San Diego. Housing of the many societies, representing art, music archaeology, history, botany and other sciences already affiliated with the museum project at the Exposition, is being considered.

Famous artists have visited the city during the year. Mr. and Mrs. Colin Campbell Cooper, whose work has been them loved in more than one nation, gave an exhibit at the Exposition.

Robert Henri has been resting at La Jolla during the last summer. Maurice Braun --- San Diego's own artist, who has transcribed the colors, the atmosphere of the hills and sea of California so faithfully --- has accomplished much that is beautiful during the last year, and now has a collection traveling on a circuit of galleries in the big cities of America.

In a letter to Henry Lord Gay, president of the San Diego Art Guild, Colin Campbell Cooper said he would lose no opportunity to recommend San Diego as a place of inspiration to artists, with a climate most suitable to their work. In addition, he said:

"I was glad to hear before we left San Diego that the committee on the preservation of buildings at the Exposition has decided to keep the art gallery as a permanent institution. This seems to be a very wise plan and undoubtedly will be of benefit to the city. If, as you hoped, the other buildings are to be used for the kindred arts and sciences and for museums in which to install various important collections, in many respects this continued permanent Exposition will be better than the one which is to close December 1.

"I should think that much could be done to arouse a general interest in art if an art association were formed. An art association would have a wide field of influence than the Guild (of which the Guild, of course, would be a part), because it would draw into it those who, though not trained in any of the arts, have a great interest in them, and are oftentimes excellent workers."

.

Naturally the most noteworthy exhibits shown during the year have been those shown at the fine arts gallery at the exposition. Of these, the Luxembourg collection and the Holland collection were the most interesting. Exhibits by American painters, by California painters, by San Diego painters, and by different modern schools were held.

.

Particular praise should be given to the work of Miss Alice Klauber, chairman of art of the women's board at the Exposition, whose efforts to bring interesting things to San Diego have been untiring. The Art Guild has held many delightful exhibitions of work of its members during the year.

January 1, 1917, San Diego Union, Special Section, 4:4-5. Edgar L. Hewett: Museum of San Diego is successor of Exposition; will perpetuate its work; "established for the purpose of cooperating with the city through its park commission and with correlated societies in making the benefits of the Exposition perpetual. The park buildings and the scientific collections are the permanent possession of the people. By developing a great cultural and recreational center the Exposition has made a permanently productive investment. The museum is planned to meet the high standard of the Exposition and the park, and to develop with the future growth of the city of San Diego. Nothing less would be acceptable to the people."

Board of Directors of the 1915 Exposition transferred the scientific collections acquired with the assistance of Archaeological Institute of America and Smithsonian Institution to San Diego Museum.

Park Commission granted quarters to Museum in California Quadrangle, Administration Building, Science of Man and Industrial Art Buildings. Temporary buildings will be fire-proofed, rewired, and concrete foundations laid when funds permit

Museums to be maintained by membership fees and paid admissions on certain days of the week.

January 1, 1917, San Diego Union, Special Section, 4:1-4. Faithful efforts and skill of women members important aid to directors of great Exposition, by Mrs. Uriel Sebree, President, Women's Official Board of the Exposition.

Few, if any, of the many thousands who have visited the San Diego Exposition have the faintest idea of the stormy seas, the dangerous shoals, this beautiful craft has crossed. And it seems mere justice that more light be thrown on the part the women have played in bringing her safely into port than can be given in the statistical form of an annual report, and, in this case, is especially necessary because at the beginning their assistance was regarded as, more or less, the last straw to the heavy burden.

When the beautiful buildings were finished and the organizing and conducting of the Exposition has to be considered, the directors realized that they faced a Herculean task --- that only the most skillful financing could avert disaster. To the minds of most men, women and extravagance are indissoluble ideas; consequently, when a women's department was proposed, resignation took the chair, protest had the floor. "Women's board!" --- a polite synonym for a Squabble Court, where the poor dears would meet, discuss, weep, even fight with umbrellas for weapons, and then proceed to sulks and hysterics --- when the Lords of Creation refused to regard their vaporings as having serious import. But one --- and he had taken as his life partner a woman who has been the inspiration of most of the delightful happenings at the Exposition, and has, more than any other factor, by her unselfish devotion to its interests, contributed to its success --- approved.

So, the Women's Board was organized. President Davidson has given two years' consideration to the personnel, and no more fortuitous choice could have been made than that of Mrs. Ivor N. Lawson for president; the other members of the board consisting of Mrs. Uriel Sebree, first vice president; Mrs. A. E. Frost, second vice president; Mrs. T. B. Wright, corresponding secretary; Mrs. Earl Garrettson, recording secretary; Mrs. Alice Halliday, treasurer; Mrs. George McKenzie, entertainment; Miss Alice Klauber, furnishings; Miss Gertrude Gilbert, music; Miss Daisy Barteau, organized labor; Mrs. B. G. Saville, Federated Societies; Mrs. A. E. Horton, Mrs. J. G. Burne, Mrs. Clark W. McKee, San Diego county representative of the Womens' Auxiliary of Southern California Panama Exposition Commission; Mrs. A. S. Bridges, Mrs. E. Thelen, Mrs. Frank Von Teamar, Mrs. Ernest E. White, Miss Gertrude Longenecker, education, showed further his excellent judgment.

The businesslike way in which the women went to work; the skill shown in organizing committees; the many different branches of the work of the Exposition they undertook, dissipated at the outset most of the fears of the directors. Still, with the immense financial burden facing them, the deeply-rooted idea of women as "spenders," it is not to be wondered at that the men preached economy first, last, all the time, and entrusted to the women's hands an incredibly small sum in the light of what they accomplished.

So, having little to spend and taking pattern from the children of Israel, they decided to borrow when they could not buy. They borrowed the beautiful collection of Beauregard's pictures from Mr. Springer, and, taking them as the keynote, the furnishing committee, composed of Miss Alice Klauber, Mrs. Ivor N. Lawson, Miss Alice Halliday, Mrs. George McKensie, Mrs. Julius Wangenheim and Mrs. Ernest White made the women's reception room the wonder and delight of the thousands of visitors who have passed its hospitable doors. They borrowed the beautiful Chines hangings from Mr. Quon Mane.

They borrowed a Kenyon portable house for a day nursery for the babies --- because the Exposition, being planned by mere men, had not taken these small but much-in-evidence persons into account; and it was only when employees, guards, even marines, were almost shanghaied for nursemaids that the management found a place for the house --- but not money.

Nothing but hypnotism can account for the way in which Miss Gertrude Gilbert inveigled the greatest musical talent in the world into giving its services free or at a minimum cost, nor words can ever express how generously not only the musical, but the artistic talent of all sorts in San Diego gave of their best. The art department, under the direction of Miss Alice Klauber, was considered by critics of this country and abroad as exceptionally fine. To some, at first, it appeared as if did to one visitor who remarked to her friend, "Oh, let's go on, I never did care for the beginner's work."

At the end of the year one realized that the exhibit has given us the Twentieth century point of view and a liberal education in modern art. And in years to come some mothers will realize what a debt of gratitude they owe to Mrs. Templeton Johnson for her part in getting the wonderful child welfare exhibit --- certainly a source of vital educational value. The women's rest room was another unique feature of the Exposition and furnished rest and repair for tired bodies.

Recognizing the fact that the number of exhibits was small, the quality was exceptional. The women decided to combine with the Spanish architecture the old true hospitality of California ranch life for which the Golden State was so famous, and make that the feature of our exhibition. Here again was Economy lashed to the mast and Mrs. McKenzie entertained anywhere from five to 500 with dainty afternoon teas, at a cost that would make the authors of articles on how to feed a family of six on five cents (or thereabouts) a day feel they were inculcating ideas of reckless extravagance.

The day nursery goes on record as having run for eight months at no expense to the Exposition, with never an accident nor a case of disease contracted, and having cared for over 900 children. Books and literature were loaned or given by the city's libraries and publishing houses furnished reading for the rest room; and here two women, selected by the Hostess committee, were in constant attendance to receive visitors and given information of all sorts concerning the Exposition. Indeed, so great became their reputation for universal knowledge that when one of the guards was asked where is the building that shows "The Fall of Man" (meaning the Science of Man), he answered: "I don't know, but I think you can find out about it from the Women's Board."

When it was decided to continue the Exposition for another year, so great had been the success of the Women's Board and so equally generous were the directors and other members of the management in admitting the mistake in the estimate of the value of their assistance, that the women no longer had to fight for recognition, but were cordially accepted as coworkers.

January 1, 1917, San Diego Union, Special Section, 4:5-7. Montana brand of hospitality delight of numerous guests, by Mrs. H. E. Cowles, in charge of Montana Building.

I have tried in person and in the atmosphere of the building to exhibit something of the spirit of Montana hospitality. I have wanted our visitors to know, in some measure, the hearts of our people. I have desired earnestly to leave such an impression upon the mind of everyone entering our door, that the very name of Montana would always recall a happy association. We feel that we have not failed in this, because we have had many expressions of appreciation.

Most of our guests enjoyed the open fire, the flowers, the music and the general homelike atmosphere of our reception room. Often would one drop into a chair with the exclamation, "Well, this is a place where I would like to say --- it seems homelike!" Many came to us tired, having made the rounds of the Exposition. It was a joy to supply these with a comfortable couch or an easy chair.

Then, as to my further duties as hostess and exhibitor, I find that a large number of our visitors are merely sightseers. Among these guests, however, were many who has some special interest; many looking for a place to spend a summer vacation. I spoke with pride of our National Glacier park --- where I passed

many summers --- as one of the rarest spots on earth. I told them of its many glaciers, of its marvelously beautiful lakes, such as McDonald and St. Mary, of its waterfalls, of its rollicking streams, its forests, high mountain peaks, its deliciously bracing air, its pure ice cold water from the base of the glacier, and of the opportunities it affords for quiet rest as well as health-giving exercise.

Frequently guests asked of the mineral resources of our state. To those I spoke of Butte, the richest hill in the world, of its thriving prosperity, its employment of 13,000 miners at the highest wages paid to that class of labor in the world, of its output of \$50,000,000 worth of copper in 1915, and of its revolutionizing the treatment of zinc ores by electric process, recently introduced by the Hon. W. A. Clark.

As closely allied to the mining industry, I spoke of the sources of motive power in our state, especially of electricity.

And, last, there were the homeseekers, who come to us and inquire about government and other lands. Many of these I have directed to the vast stretch of country lying between the Rocky Mountains and the Dakotas, and between Alberta and the Missouri River.

While engaged in speaking thus the praises of our great Northwest, I have not been unmindful of the attractions of Southern California --- especially of San Diego. Many came to use seeking a winter climate, or desiring to retire from business. To each I recommended most warmly the climate and social life of San Diego.

In this account of my work, I have had constantly in mind the part taken by my faithful and efficient assistant, W. W. Parrott. Whatever has been accomplished is largely due to his cooperation. I would like also to express my deep appreciation of the unfailing courtesy shown me by the management of the Exposition.

January 1, 1917, San Diego Union, Special Section, 4:7-8. Special events of year well arranged.

January 1, 1917, San Diego Union, 6:1-8. Picture of fire station at Exposition

January 1, 1917, San Diego Union, Special Section, 7:1. List of distinguished visitors in 1915 and 1916.

The list of distinguished visitors at the Exposition during 1916 is not as great as for the first year because of the double drawing power of the two Expositions. A few of those who have had a part in Exposition programs during the last twelve-months are: Count del Valle de Salazar and Countess del Valle de Salazar; Governor Hiram Johnson, Secretary of the Interior Franklin K. Kane, Edward Rainey, Walter Damrosch, Carrie Jacobs Bond, Mrs. H. H. A. Beach, Tyrone Power, Madame Ellen Beach Yaw, Madame Pasquali, Ruth St. Denis and Ted Shawn, Sarah Bard Field, Charles Evans Hughes, Mrs. Josiah Evans Cowles; William Kettner, Dr. William C. Carl, Charles Warren Fairbanks, James Hamilton Lewis, Senator James D. Phelan, Allan L. Benson, George Stirling, Governor Simon Bamberger of Utah, Fred Emerson Brooks, Sir Rabindranath Tagore, Madame Nellie Melba, Madame Pavlowa, Leopold Godowsky, Admiral W. B. Caperton, Admiral W. F. Fullam, C. M. Winslow, Uriel Sebree, Charles C. Moore, Madame Geraldine Farrar; Governor Ernest Lister of Washington, and Mr. and Mrs. Alfred Hertz.

Among famous movies picture stars who have visited the Exposition are Myrtle Stedman, Ruth Roland, Myrtle Gonzales, Jack Kerrigan and Douglas Fairbanks.

January 1, 1917, San Diego Union, Special Section. Unselfish devotion of Fair's executive highly appreciated.

(Excerpt)

Since the historic meeting of the Chamber of Commerce in 1909, when Mr. Davidson first presented the idea of celebrating the opening of the Panama Canal by an Exposition as the first "Port of Call," he has been known as "The Father of the Exposition." When the project had been well started, Mr. Davidson was

made vice president and later chairman of the executive committee. For the last two years that the Exposition has been open, he has held the title of president. Although the problems that have confronted him during these twenty-four months have been great, he has maintained an unruffled disposition and the solution has invariably been for the best interests of San Diego and the Exposition and has won new friends for the president.

Only those on the inside of the Exposition management full realize the value of the service rendered by President Davidson, not only to the Exposition, but to the city. His diplomacy and determination have won many battles absolutely unknown to the citizens, but which will bear fruit for many years to come. Exceedingly modest, Mr. Davidson has never taken advantage of the position with which San Diego has honored him by seeking personal recognition. In fact, one of the most difficult duties to which he was forced to accustom himself was as a publicity subject. The frequent uses of his name and photograph were distasteful to him, but he always yielded to the argument that his title and the position with the Exposition had publicity value for the Exposition that could not be represented in any other manner.

The cordiality of his welcome has been the same for rich and poor, cabinet officers, former presidents, and township officials. Considering the opportunities that President Davidson has in greeting guests to San Diego and the fact that he has performed these obligations in such admirable manner, causes the belief that he had made more friends for Southern California during the past two years than any organization or man.

He represents the highest type of American manhood characterized by integrity and simplicity, and although San Diego may understand, in a manner, the wonderful work he has done, it is certain that the appreciation will increase many fold when time has given the true perspective.

“A quiet stroll through the Exposition grounds,” for President Davidson usually meant a program punctuated by such interruptions as those of an employee who desired to know the president’s idea about a future event; the visitor who complained of alleged unfairness on the part of a guard, a gateman or other employee; an exhibitor who wondered when certain changes would be made; a friend who offered suggestions about concerts by the band; a loyal San Diegan who had strong dislikes for a show on the Isthmus; a photographer who wanted a special pose; a young woman who wondered why futurist painting had been excluded from the 1916 art exhibits; a long-time resident of San Diego interested in the Exposition’s finances; a friend who knew a man capable of filling an Exposition jog far better than an incumbent.

And, further, a stranger from the East who wanted to express his appreciation of the Exposition and bemoaned the fact that so many did not realize the great attractions offered; the automobile owner who believed machines should be given the run of the Exposition grounds every day instead of one day a week; the mother who held it a crime that any cars were permitted on the grounds, even Mondays; the life-long friends who had always paid her way into the grounds, but would like to have a few passes for some Eastern friends; the booster who wished the Exposition would get some “pep” and put on attractions that interest the people; the stranger who had a million good ideas he would part with --- for so much per idea; and on and on, with a new list every day, until the head of the enterprise found more pleasure in staying inside the office and having a little warning of the matters to be discussed before the visitor was ushered into his presence.

January 1, 1917, San Diego Union, Special Section. Feature of Exposition, music programs, presented public; people’s taste receives praise of committee chairman in her summary, by Miss Gertrude Gilbert

(Excerpt)

The harmonious setting, the unity of architecture and planting has never failed to call forth the very best that the artist can give; and when we think that everything has been done in the open, under the blue sky of Southern California, the experience is the more unique.

Madame Schumann-Heink sang last year to the largest crowd ever assembled on the grounds, with the exception of the opening days. Madame Ellen Beach Yaw has sung several times each year and never failed to draw many thousands; Madame Pasquali attracted an immense audience, and concerts by our local musicians, which early in the year found the St. Francis Chapel too small, then outgrew the balcony of the California Quadrangle, and now, for several months, have been given at the Organ Pavilion, fill benches to overflowing every Sunday afternoon. The honor days named for Schumann-Heink, Ellen Beach Yaw, Carrie Jacobs Bond, Mrs. H. H. A. Beach and Charles Wakefield Cadman, with appropriate programs for each, have brought large enthusiastic audiences, and, on Easter Saturday and Sunday, when Damrosch with his entire orchestra, at a tremendous expense, appeared at the Exposition for two concerts, so hearty was the response from the public that we not only cleared out expenses but made a great surplus besides.

And so it has been during the entire two years. Good music of any kind, whether by local artists or visiting artist, band, organ or orchestra by our citizens, and now the cry is "Must we give up this music in the park when the Exposition closes?" Fortunately for the city, we have a Mr. Spreckels and a park board who realize how much this means to our people. Mr. Spreckels has retained Dr. Stewart at the outdoor organ for another year, and the park board has asked the present music committee to carry on in the park the same musical policy we have maintained during the two Exposition years.

January 1, 1917, San Diego Union, Special Section. Summer playground camps source of fun and benefit, by Howard B. Bard, President, Playground Commission.

The municipal playgrounds of the city can no longer be considered as an experiment of fad in which a few people are emotionally interested, for they have become one of the great vital realities of the city's work, and it can readily be seen that they are meeting a vital need of the city when we realize the number of people who are constantly using them. The playgrounds may not be looked upon as mere places of play and recreation, but must be considered in a larger and more vital relation to the welfare of the city, to the building of good citizenship, and to the working out of the principles of democracy in the community.

First of all, they are great centers where cooperation is taught and where the boys and girls are trained to respect the rights of others; where they learn the lesson of a "square deal" because in their play they are not alone to get the enjoyment for themselves out of their play, but they are also to cooperate with others and see that they, likewise, have a full opportunity for a good time.

They are also centers for the development of a community spirit, for they bring not along the boys and girls of the community together, but also the mothers and fathers; in fact, all of the people of their locality, into social relations so that they begin feel that they are indeed members of the same community.

They also help to break down the barriers between different nationalities, because frequently we find that there are several nationalities represented in the play and social gatherings and whatsoever cooperative work may be carried on.

The city is in possession of four municipal playgrounds that are open every day in the year from 2 o'clock in the afternoon to 9 o'clock in the evening. These grounds are directed by a staff of eighteen workers who give all of their time to the carrying on of this municipal enterprise. That the people in the communities in which these playground are located are appreciative of their privileges is seen from the patronage of the playgrounds, which has become so great at practically everyone of the playgrounds that the facilities are inadequate to meet all the social and recreational needs of the people. One can readily see to what extent the communities avail themselves of these privileges when we consider that during the last year the four playgrounds have had a patronage of approximately 350,000 people.

The usual activities of the playgrounds and of free play, of the games of basket, volley and playground ball, tennis and other games, both for the separate grounds and for the inter-playground activities, are carried on regularly throughout the whole year. In these activities boys and girls and men and women are given the systematic training that helps them to be stronger in all of their physical life.

There are many special lines of work. The field houses of the playgrounds become the centers for the club life of their communities. There the mothers' clubs meet; the clubs for boys and girls; the campfire girls; the mother's dancing clubs; the regularly slated community dances, both for adults and children; the classes in domestic activities; the dramatic organizations; the musical organizations; University extension lectures, all find a place of meeting and development and, under the able direction of the playground staff, these clubs come to be successful organizations.

There have also been carried on during the year, many special lines of work in the production of features, games and dances with the boys and girls which have added much to the different entertainments and celebrations at the Exposition.

January 1, 1917, San Diego Union. Point Loma Club Grounds scene of brilliant play by star performers.

At the time the San Diego Exposition was organized, the San Diego Country Club had golf links in the park. ____ nine as sporting holes as could be found anywhere in Southern California. The club was notified that the site of its gold links would be included in the great Exposition and that it would have to find other grounds.

At this time there stepped into the breach that great all-around sportsman A. G. Spalding, who offered, on behalf of the San Diego Securities Company, to build a clubhouse and an 18-hole golf course that would be second to none in California. The offer was gladly accepted by the members of the old club and in 1912 ground was broken and the foundation laid for the Point Loma Golf clubhouse. The services of Tom Bendelow and Frank J. Szarinsky were enlisted in laying out the course.

In April of 1913 A. G. Spalding himself drove the first ball off the No. 1 tee and declared the course open to the use of members.

(See original article for a more detailed description of the golf course and clubhouse.)

January 2, 1917, Los Angeles Times, 2:7. Big Fair now history; closing scenes of San Diego's famous exposition; "Auld Lang Syne" sing by Mme. Schumann-Heink; President Davidson recipient of distinguished honors.

January 2, 1917, San Diego Sun, 1:7-8. "Exposition Beautiful" remains open to charm thousands for three months; "Farewell" exercises in name only; grounds and buildings to remain, with principal exhibits in place; band to play; admission reduced; Canadian, French, United States, Sacramento and Southern Counties buildings to remain open; 21st Infantry will drill several times a week; organ recitals will be given daily.

January 2, 1917, San Diego Union, 1:4-5, 3:1-4. Midnight's solemn chimes ring out passing of world's greatest two-year exposition; undaunted by lowering skies, loyal San Diegans bid last farewell to world's greatest Fair; Davidson honored at banquet; grounds, buildings permanent city exhibit.

The "Exposition Beautiful" --- San Diego's own Exposition, perhaps, the most wonderful that the world has ever known --- passed into history at the stroke of 12 last night.

It came to a triumphant close amid laughter and tears, frivolity and heartaches, after a remarkable run of two full years. It finished as it started a thing of wondrous beauty and exquisite charm. A success throughout the long gay period which it occupied, it will still live today and in the years that are to come fresh in the memory of those who loved it. To them, it always will remain as complete, as superb, as enchanting as in the magic past, of which it was so brilliant a part.

Permanent Heritage to City

Nor has all, as regards to the Exposition, been said and done. Many of its great buildings will remain as a permanent heritage to the people who made their construction possible and to their children after them. Its superb grounds will continue into the future as a magnificent beautification of the great Balboa Park. In one sense, it will be an Everlasting Exposition.

Undaunted by lowering skies San Diego, thousands strong, sent attendance records at the big Fair glimmering yesterday and last night as they surged through the massive gates to say their last farewells. Exposition officials could not estimate the crowds, but predicted that a count today will show the greatest attendance in the history of the Fair.

After a long, eventful day, in which sentiment and hilarity were splendidly blended, the Exposition formally was closed at midnight when taps were sounded and Madame Schumann-Heink, with tears in her eyes, sang "Auld Lang Syne," as she alone can render it. The closing ceremony was held on the pavilion at the great Spreckels organ. As Madame Schumann-Heink concluded, the lights of the Exposition were extinguished and a giant set piece, showing San Diego's message for the future, was touched off. The din that followed was tremendous. People cheered until they were hoarse. The immense crowd surged back and forth in a spirit of revelry never before equaled in the city. The combined bands struck up "The Star Spangled Banner," and the people poured out into the plaza shouting excitedly, blowing horns, ringing bells, and otherwise giving the Exposition the send-off to which it was entitled.

The great set piece displayed above the organ heralded a message of peace to all nations, displaying a feeling of friendship and good will toward men, truly a marked characteristic of the people of San Diego. The exact word in fire were: "World's Peace, 1917."

With these ceremonies the Exposition had officially ceased to be. But for three full months the directors will continue to operate the Fair during the "clean-up" period. Meanwhile, the plans of the park commission for permanency of grounds and buildings will be underway. The Exposition closed, as it had opened, in a blaze of glory, and a majority regretted to see it go. It was a Fair that had caused a world to marvel --- an Exposition that has won the plaudits of state and nation and made the name of San Diego a familiar one throughout the land.

One big feature of the evening program was the formal dinner given to President G. A. Davidson at the Cristobal café by the directors of the Exposition. It was a brilliant affair, attended by the city's most representative citizens and men of prominence in both army and navy. Closing day was also Davidson day and the dinner proved a fitting climax to the many honors extended President Davidson in the afternoon.

Exhibit buildings at the Exposition were officially closed at 10 o'clock last night. These buildings were crowded with visitors during the day and evening. The Isthmus, which is to be wrecked immediately, was thronged until a late hour last night.

Exhibits to Remain

The halyards of the United States standard on the government building at the Exposition were drawn at 4:52 o'clock yesterday afternoon --- the official sunset hour. A telegram was received from the navy department last night directing federal employees on the grounds to suspend packing operations until further orders. This is taken to mean that the federal exhibit will be on the grounds for at least three months, perhaps permanently.

The Exposition never looked more beautiful than last night. The illumination was superb under the starless skies. San Diegans rejoiced that most of the buildings and grounds will be kept intact as a place of recreation in the future. Thousands of visitors from far and near also rejoiced. News that the great Spreckels organ will continue operation indefinitely was received with general delight.

During the "clean-up" period an admission fee of 25 cents will be charged unless it is found that a 10 cent fee will be sufficient. Later on the Exposition grounds will be free to all. Everything on the Isthmus will be wrecked, with the exception of the Painted Desert. Some weeks hence the Canadian building and Varied Industries building and several of the state buildings will be razed and beautiful sunken gardens will be established where these buildings now stand. The grounds, if possible, will be made even more beautiful in the future than in the past. And many attractive educational exhibits will be found in a majority of the buildings for years to come.

January 2, 1917, San Diego Union, 3:2. President Davidson is presented gold watch by Exposition official.

No greater compliment was ever paid a high government official or foreign prince at the Panama-California International Exposition than that paid President G. A. Davidson yesterday morning by thousand of San Diegans who stood for almost two hours in a drizzling rain before a stand in the Plaza de Panama in compliment to "the originator and father of the Southland's Fair."

There were different versions of the rain. Some thought the elements felt so bad over the closing of San Diego's fairyland after a two-year success that the heavens were weeping. Others said the occasion was a joyous one and that the rain only tended to create greater enthusiasm for a man who for two years had devoted nearly his entire time to making the Exposition a success.

The climax of the portion of the closing day's exercises in honor of President Davidson came when Carl Heilbron, one of the vice presidents, in a neat little speech, presented President Davidson with a beautiful watch --- a gift of the Exposition directors.

Coming as a complete surprise to Mr. Davidson, he was visibly touched by the gift and it was some minutes before he could respond. Taking advantage of the president's embarrassment, Senator Robert N. Bulla of Los Angeles, another vice president, who acted as chairman of the meeting, stepped forward and announced, "Mr. President, if there is anything you wish to say before sentence is pronounced, you may proceed." This brought a general laugh and relieved the situation.

Holding the beautiful watch aloft so that all might see it, and share in his happiness, President Davidson began:

"Friends, for all of you seem to be that or else you would not be here in this rain to help me made my day at the Exposition a success, I don't know where to begin or what to say. It has been a pleasure and a joy to labor for you and with you, and I am happy to know that our efforts have been with success. San Diegans have been loyal to their Exposition to the last day. Help has come during these two years from all quarters and each of you, I feel, has done his part without which we might have fallen down in some particular. We all dislike to see the passing of that which has brought us such joy, made us so many friends,

and attached so many to Southern California. Our friends in Los Angeles have been loyal too, and we must not forget to thank them.

“During the last few days you have heard much of the Exposition and its struggles. I am not going to keep you out in the rain and tell you more. I want to thank you all for your courage, your loyalty, and your untiring support.”

The watch given President Davidson is a beauty. It is of open-face type and on its back it bears his initials done in raised platinum. With it is a beautiful chain and an ornament done in platinum, this bearing the seal of the Exposition.

President Davidson was met early in the morning at the Laurel street bridge by directors of the 1915 and 1916 Exposition, guards and Tommasino's band and escorted to the Plaza de Panama, where he reviewed the army and navy parade. The review of soldiers and sailors was one of the prettiest held at the Plaza in a long time. That San Diegans have never grown tired of these reviews was shown by the big crowd which was out early to see the last one before the Exposition passed into history.

The exercises were held on a stand which had been erected at the point in the plaza where the opening exercises were held a year and two years ago. One on the platform with Mr. Davidson was John D. Spreckels, who was honored at the Exposition a few days ago, and several hundred prominent San Diegans and Coronadans. The large crowd in attendance stood up in front of the stand during the entire program, nearly all of them having been provided with umbrellas. When the rain was the hardest, only a few of them gave up their places to seek points of shelter.

Hon. Lyman J. Gage was one of the first speakers. He told of the work of President Davidson and of the esteem in which he was held by friends made at the Exposition who lived in all parts of the country.

President A. D. LaMotte of the Merchants' Association represented the merchants; F. Darnall represented the Cabrillo Commercial Club; W. S. Dorland spoke for the Chamber of Commerce; and Carl I. Ferris read the resolutions prepared by the directors of the Exposition.

Later in the afternoon a reception was tendered Mr. and Mrs. Davidson in the Persimmon Room of the California Building by women of the women's board. Hundreds called to congratulate Mr. Davidson upon his success and to wish Mr. and Mrs. Davidson a happy new year.

The military and navy parade consisted of officers and men of the Twenty-first Regiment and sailors from the ships in the harbor.

At the Cristobal café a luncheon was given at noon for Mayor James Rolph, Jr. of San Francisco, H. H. Van Torchiana, consul general of the Netherlands at San Francisco, a vice-president of the San Francisco Exposition, and others who had come to San Diego to help in the closing exercises.

January 2, 1917, San Diego Union, 3:6. Thousands attend sham battle at Fair grounds.

Breaking through wire entanglements on the aviation field yesterday amid popping guns and exploding mines, and the accompanying cheers of several thousand spectators, Maj. William Brooke, in command of the First battalion, Twenty-first Infantry, captured the fort of the Second Battalion, under the command of Col. J. P. O'Neil and Lieut. Col. Fred W. Sladen.

Giving by far the best sham battle ever staged at the Exposition, officers and men of the two battalions were busy receiving congratulations immediately after the fray.

The engagement was set for 2 p.m. but Maj. Brooke and his stalwart officers and men planned a little surprise and began a random peppering attack from the brow of the canyon opposite precisely at 1:30 o'clock. A matter of luncheon is nothing to a soldier, and it didn't take Col. O'Neil's men long to fling

themselves into the trenches. They tore across the field, taking their places in the front line trenches in plenty of time to do some peppering themselves.

Fortified behind their mines and their wire entanglements they began their engagement with all the confidence in the world. The enemy appeared from beneath the brush on the other side of the canyon, dropping on their stomachs at intervals as they crossed the ravine, and appeared suddenly in groups in a sort of wedge formation at the top of the hill and within a few hundred yards of the camp.

When the engineering corps, headed by Maj. Brooke, appeared at the head of the troops and began cutting the wire entanglements, men of the Second Battalion thought the Indian Village would be a safer place for them, and they sought shelter in double quick time, taking refuge behind the walls and continued to pump blank cartridges at the fast-approaching foe.

Like a lot of Indians, their yells becoming almost more prominent than the popping of the rifles and the bursting of mines, the men of the First Battalion gained the ground of their enemy, completely routing them.

For a time, the aviation field was a miniature European battlefield. The mines hurled stones high in the air and the soldiers rushed here and there through the dense smoke. It was considered the most spectacular battle ever given on the Fair grounds.

January 2, 1917, San Diego Union, 4:1. EDITORIAL: The Exposition.

As this is written it is not hard for one who sits a mile away from San Diego's great exposition to imagine that the song "Auld Lang Syne," sung at the formal closing exercises, would reach the ears of one who was even farther away. It is even easier, however, to imagine that the refrain in some way will be transformed into something like "New Lang Syne," for, as the two-year Exposition passes into history, there has come a new San Diego, into whose future it is pleasant to look.

Looking back now, one can recall with ease that when the Exposition project was broached there were many who openly and frankly said that it was too much of an undertaking for a city no larger than San Diego. They who spoke, and perhaps others who kept silent, doubted that it could be a success, even if run for only a few months. And later, when San Francisco decided to have an Exposition, the doubt may have grown in the minds of the less confident. But by that time there had been made in San Diego the spirit of a city, the spirit of confidence which stilled the voice of the doubter, the spirit which brought all together to aid the project that was to bear San Diego's name, and to carry it all over the land. And the Exposition opened successfully.

There is no need here of telling the whole story of the Exposition and of its success. But no one who claims the name San Diegans can be blamed for referring at least briefly to what it has done. It has brought to the beautiful Southland, of which San Diego by many natural rights is the capital city, thousands of visitors who might never have turned hither if the Fair had not appealed to their pleasure-seeking desires. They have come, have been enchanted by the beauties of the Fair and the city which made it, have lauded the courage of the people who stood back of it, and have gone away to repeat those expressions to others all over the nation. Thus the story of San Diego has been carried far and wide. And those who have admired the Exposition cannot have failed to see that here was a city ready to grow --- a city with a great harbor, a climate which has no superior, a city near some of the richest agricultural and mining sections of the whole world, soon to be reached by a great railway with marked advantages over any other transcontinental line running to the Pacific coast. Many of those who came here strangers went away friends of San Diego. Many have said that they would return to stay, to be San Diegans. It is easy for San Diegans to believe that the many whose business ties are such that they will be able to come here will at least influence many others to come and join in the upbuilding of a greater city on this, one of the most favored sites in the world.

So, with all the regret that must be felt as the Exposition ends formally, the people of San Diego have a feeling of pride which more than compensates for that sentiment.

Here it is also fitting that tribute should be paid to those men and women who have been the most active and so unselfish and patriotic in carrying on the work of the Exposition. It would be hard in a newspaper page to say all that could be said, to mention all the names that so richly deserve mention, to give all the praise that San Diegans would be glad to give these men and women. But those who read this will join heartily in the vote of thanks that is expressed here and in the chorus of "Well done." For all realize that, as the Exposition ends its two highly successful years of life, San Diego is going ahead to be greater, better than ever, with the eyes of the nation on it, and with the country saying, "There is a real city!"

January 3, 1917 (?), Minutes of the Board of Park Commissioners.

Tablet shall be placed upon the Southern California Building and the Model Farm Bungalow, similar to the tablet now installed in the State Building at Exposition Park, Los Angeles; inscription on tablet to contain the names of the Commissioners of the Seven Counties Building, including the secretary, and any other inscription that the Southern California Exposition Commission might determine; tablet to be a permanent memorial of the presentation of these properties to the City of San Diego.

Resolution of thanks to the Southern California Exposition Commission approved.

International Harvester Company's Building turned over to the 21st Infantry for use as recreational quarters, providing suitable quarters are furnished the Y. M. W. A. in said building; building to remain under control of Park Board and supervision of Superintendent of Parks.

Superintendent instructed to purchase second-hand tools from Southern Counties Building.

Secretary instructed to negotiate a purchase of carpets, draperies, etc. in Southern Counties Model Bungalow if satisfactory terms could be made.

Secretary instructed to purchase Grand Piano in "Blue Room" of Southern Counties Building for \$750 (valued at \$1,750), with payments being made over a term of three years and no interest for the first two years.

January 3, 1917, Los Angeles Times, 7:5-7. Three months to remove exhibits; exposition park will open during the day; when dismantling is complete preservation work will start to save certain buildings; although books not closed, Fair makes some profit.

January 3, 1917, San Diego Sun, 1:3-5. **Sun's** park edition received high praise.

January 3, 1917, San Diego Sun, 1:7-8. Southern Counties structure, orchard and bungalow given to city today for one dollar; valued at over \$100,000.

January 3, 1917, San Diego Sun, 3:1-2. Reception committees are organized by Chamber of Commerce to entertain visitors in Exposition city.

January 3, 1917, San Diego Sun, 7:4. Exposition president honored by many at dinner in Cristobal café Monday night, December 31, 1916.

January 3, 1917, San Diego Union, 1:6. Madame Schumann-Heink presented the colors to officers and men of the 21st Regiment, No. 2, at the Plaza de Panama yesterday afternoon when the first review since the close of the Exposition was held.

January 3, 1917, San Diego Union, 5:3. Effort to retain Tommasino's band for next three months being made; fund started.

January 3, 1917, San Diego Union, Classified, 1:1-3. Citizens mourn Exposition's close; 27,000 attend final ceremonies; for first time in two years grounds of San Diego's great Fair are practically deserted; park of exhibits, however, will remain open for about three months longer.

For the first time in two years the grounds of the Panama-California International Exposition were well-nigh deserted yesterday.

There were still evidences of the 27,000 people who attended the closing day's ceremonies, and up to a late hour yesterday afternoon attendants were busy trying to remove the traces of the celebration of the night before.

Confetti of the various colors of the rainbow was scattered all over the grounds. Several vacuum cleaners were busy trying to remove traces of the debris.

The official count, which was completed yesterday, showing that nearly 30,000 people visited the grounds during the closing day. The east and west gates looked as though there had been twice that number and as though the entire congregation had pushed against each one of them.

An automobile driven by one who was evidently in a hurry to leave the Exposition behind, scattered the Laurel street gate beyond what the reporter would call "recognition." The east gate was in a little better condition and workmen were busy yesterday attempting to repair the damage.

Chairs and benches used on the closing day in the Plaza de Panama, were piled high in front of what once was the Sacramento Valley building, but which last year housed the United States government exhibit.

Tables and chairs were turned up on end as though they never expected to take part in another scene of festivity. The Isthmus looked as deserted as a haunted house. Managers were removing their exhibits, and with the glare of the electric lights gone, the streets looked as uninteresting as a page from the Congressional Record.

Illusions which the night before had blasted forth from the electric signboards, girls who had done a dance "in the front of the house" and had created a sensation in a scene from "Paris After Midnight" were missing. Now and then a few stray girls had come for their costumes and were shaking hands with former proprietors and taking leave of former friends on the amusement street. Some were bound for the East, others were on their way to San Francisco.

Isthmus attractions were being boxed for shipment to different vaudeville theaters. Others were being sent to street fairs, others to the winter quarters of a circus, and still others were being sent to warehouses to await the word of their owners who are still negotiating for engagements in other parts of the country.

Work on tearing down the Isthmus is already in progress. Some of the smaller buildings were being razed yesterday and a few San Diegans stood by and watched the proceeding sorrowfully.

The street, which for two years had been one of light and color and fun and frivolity, saw its end on Monday evening. All the shows ended their two years with a tremendous business. The street seemed to be more popular after a run of two years than it had been at any time in between.

Even the pigeons on the Plaza de Panama seemed depressed yesterday afternoon. They missed the photographer, who used to take their pictures with the crowds, they missed the music of Tommasino's band, the review of the soldiers of the Twenty-first Regiment and, undoubtedly, they missed the glowing words of enthusiastic orators who, for two days past, has waxed eloquent at closing exercises.

At the administration building, stenographers were filing the last letters. Guy R. Kinsley, who for the last year had made it his business to let the people of the country know that the Exposition was doing business at the old stand, was trying to find out over the telephone how much money would be required to

transport an automobile weighing 2,400 pounds from San Diego to his home in San Francisco. Secretary H. J. Penfold was busy gathering up the scattered ends, lost in the general shuffle of closing confusion.

Signs directing people about the grounds seemed to have grown old over night. Uniforms of the guards seemed to have faded. Many of the exhibit buildings looked as they had before the opening of the Fair --- strewn with boxes and excelsior and workmen in overalls and men directing with as much precision and as long voices as D. W. Griffith's henchmen in producing the "Clansman."

Where there was not confusion, there was silence, and confusion was much preferred to silence by the few San Diegans who were on the grounds to see what the Exposition looked like "the morning after."

The Cristobal café looked like the last rose of summer --- and then some chairs had stopped in the tracks, just where they were pushed when the last guests left the café the night before. Tables, stripped of their linen, stood out like skeletons in a dark closet. There was now and then a glass --- which might have contained wine, now and then a water bottle --- empty, and one lonesome waiter stood with arms folded and a forlorn expression near the entrance.

The wild animals on the Isthmus were fed as usual, but not in the presence of the usual crowds, and they didn't seem to know what to make of the quiet. The Ferris wheel was not in motion, the roller coaster -- - the scene of shrieking women and men who held on like grim death --- was silent for the first time in months. There were not the usual Hawaiian airs and the weird strains of stringed instruments at the Isthmus Village. There were no "sample" Hula girls out in front and no loud-voiced crier, the noisy music of the merry-go-round had ceased --- in fact, the Isthmus was devoid of interest and the only signs of habitation were on the motor trucks which had been engaged to cart away that which for two years had entertained San Diegans and their visitors.

There were now and then a few Easterners who strolled through the grounds and deplored the fact that they had not arrived in the city early enough to see the Fair in full blast.

A few visited the Administration building with the proverbial after-date kicks, some came to offer belated congratulations, others wanted special privileges, others wanted to bid on wreckage, some wanted to buy scenery and fixtures, and some wanted --- their pay. They were all heard and satisfied.

Even the organ recital, which was given by Dr. Humphrey J. Stewart as usual, was given to only a scattering of guests --- the Plaza de los Estados consisted mostly of yawning benches. The state buildings were closed and their managers were in the throes of moving operations.

But all this was yesterday --- the day after the formal closing. The Exposition --- at least a part of it --- will remain open for three months.

Secretary Penfold announced that the Canadian building, the Fine Arts building, the French exhibit in the California Building, and the Science and Education building will be open for about ninety days. As soon as the Russian exhibit can be moved, the building will be utilized by Dr. Edgar L. Hewett as a museum building. Exhibits which will make this building always interesting to San Diegans and their visitors have been secured.

Dr. Humphrey J. Stewart will play as usual each day at 2:30 (?) and the officers and men of the Twenty-first Regiment will at different times during the week give a drill in the Plaza de Panama. The first drill will be held Thursday afternoon and Madame Schumann-Heink will present the colors.

It was estimated by Exposition officials yesterday that had the weather been favorable on closing day and night, fully 50,000 would have been in attendance during the day.

January 3, 1917, San Diego Union, Classified, 1:1-3. General Pendleton sends greetings from the Fourth Regiment, U. S. Marines, at Santo Domingo, Dominican Republic.

It is understood that after internal affairs in the Dominican Republic have sufficiently quieted to permit the withdrawal of United States marines from the island, that General Pendleton will be placed in command of the San Diego brigade post and that the Fourth Regiment will, at his request, be made a part of the brigade.

January 4, 1917, San Diego Sun, 2:6. Exposition band fund is raised; plan to have Tommasino's band play every afternoon but Monday on Exposition grounds.

January 4, 1917, San Diego Union, Classified, 1:1. Municipal band, city's dream; committee will raise funds to keep Tommasino's band at Balboa Park.

No stone is to be left unturned to raise sufficient funds to keep Tommasino's band in San Diego for the next three months. With this end in view, President Davidson of the Exposition, yesterday appointed Frank C. Spalding, chairman of a committee to procure from the people the amount required. Other members of the committee will be appointed in a few days and a plan of campaign outlined. In the meantime, checks or cash may be sent to Mr. Spalding at the Administration building in the Exposition grounds.

A number of persons prominent in musical circles will be placed on the working committee.

It is the plan to have the band play at the Exposition every afternoon, except Monday, for the next three months. It is the hope to have the band remain permanently as a "San Diego band." The organization probably is the most popular that ever made music in Southern California. Tommasino and his players have many friends here, they all wish to make San Diego their home.

The Exposition officials would like to pay the expenses of the band for the next three months, but announce they are unable to do so, now that the price of admission has been cut to 25 cents. They will, however, stand part of the expense. Subscription blanks are being printed and are to be circulated and placed in the banks throughout the city. Amounts subscribed will be payable monthly or quarterly. The money will be spent only to pay actual salaries to the bandsmen. There are 29 members of the band but it is hoped to make the total number of players thirty-two.

The Tommasino band has given pleasure to thousands of San Diegans, all of whom would like to see the band retained. It also will prove a big attraction for tourists at the Exposition during the next three months.

January 4, 1917, San Diego Union, 1:7. More than three and one-half millions of people visited the Panama-California Exposition in its two years of existence, according to a report made public yesterday by Secretary H. J. Penfold.

In 1916, a total of 1,697,886 people visited the Fair. In 1915, 2,050,020 passed through the turnstiles, making a total of 3,747,916 for the two.

The month of the biggest attendance in 1916 was July, when 269,485 people passed through the gates. The smallest month in point of attendance, was January, a year ago, when 35,440 visited the Fair.

(Attendance figures by month for 1916 are given.)

January 4, 1917, San Diego Union, Classified, 1:2-3. International Harvester Company presents Fair building to San Diego.

An instrument signed yesterday by Frank Culbertson, vice president of the International Harvester Company of America, gave the city of San Diego, through its park board, the beautiful building which for two years has housed the exhibit of the concern on the Alameda at the Exposition.

The gift came as a surprise to the officers of the Exposition, as they had supposed the building would be razed by the International Harvester Company immediately after the exhibits had been removed. The building is one of the best on the grounds and is substantially built.

Use of the building will be determined by members of the park board at a meeting to be held in a few days. It is probable that, for the present, it will be unused, but that later a permanent exhibit of some kind will be installed.

With the building are the beautiful grounds in which the company has taken such pride during the two years past. There is a citrus orchard of about 100 trees included in the property, as well as palms, decorative shrubbery and shade trees. The building is situated on ground described as Exhibit No. 33. It was finished slightly before the opening of the Fair, and is considered in as good condition now as then.

As the park commissioners have had many requests for the use of every building which is to be left on the grounds, there were none of them yesterday who would predict the ultimate use of the structure, further than to say that it would be used for whatever purpose seeming fitting in the Exposition grounds.

(Extract from letter signed by Frank Culbertson, Vice President, International Harvester Company of America)

This transfer is made as a gift without legal conditions, but with the expectation that the said board of park commissioners will fulfill the assurances heretofore given that said grounds will be kept up and the main "Harvester Building" will continue to be known as such and utilized in its present for some public purpose.

January 5, 1917. D. C. Collier made honorary life member of the San Diego Museum.

January 5, 1917, San Diego Herald, 1:2. Buildings donated.

The Southern Counties building in the Exposition grounds, the model farm and model bungalow were all presented to San Diego by the commission in charge in a deal consummated Tuesday. The magnificent structure and the farm, valued at over \$100,000, were tendered to the custody of the park board for the consideration of one dollar.

The formal conveyance occurred at the Exposition New Year's day. R. W. Pridham, of the Southern Counties commission, a Los Angeles County supervisor, tendered the bill of sale of Thomas O'Hallaran, who responded in a speech thanking the commission in behalf of all San Diego. O'Hallaran and Arthur Cosgrove represented the Park Board, Mr. Marston being ill and unable to attend. Those of the Southern Counties present were: Charles Hamilton of Riverside; R. L. Ripley of San Bernardino; R. L. Shaw of Imperial; Fred Struck of Orange; W. M. Irwin of San Diego; and R. W. Pridham, Los Angeles representative.

This means the Southern Counties building will be maintained as a part of the permanent exposition, and kept up by the Park Board.

The fixtures of the lecture room in the building, said to be one of the best equipped in Southern California and valued at \$1,710, may be brought by the supervisors, according to Irwin. He secured a figure of \$700 on the entire equipment, and the Park Board, in a letter, requested the supervisors to make the purchase. The matter was to be placed before the county lawmakers for a vote.

January 6, 1917, San Diego Union, 3:6. The Second Battalion of the 21st Infantry will hold field drills on the aviation field at the Exposition every day at 9 a.m., but Saturday and Sunday, until further notice; reviews on Plaza de Panama each Tuesday and Thursday at 2 p.m.; 21st Infantry Band will give program on Plaza de Panama each Wednesday and Friday at 3 p.m.; daily organ recital at music pavilion at 2 p.m.; Canadian building, Science and Education building, Fine Arts building, and French exhibits in California Building to be open everyday except Sunday.

January 7, 1917, Los Angeles Times, 3:2. Fair buildings being dismantled.

San Diego, Jan. 6. --- The dismantling of the buildings and the removal of the exhibits at the exposition is rapidly being carried on.

Although each day many tourists visit the grounds and band concerts and drills of the army troops are held as before, the exposition spirit has gone.

Plans are being made by Dr. Edgar Hewett and the exposition officials for an extensive museum to be installed in one of the buildings as soon as the exhibits are removed. This museum of Dr. Hewett's will contain Indian and American archaeological specimens. These with the science of man, the Canadian and French [exhibits] which remain will constitute an attractive feature.

The Foreign Arts Building was almost completed vacated this week. The Southern Counties Building will require a longer time to vacate as the contents must be properly packed and stored. The building is closed.

The Isthmus is a thing of the past. The Painted Desert, at one end of the street, will remain.

January 7, 1917, San Diego Union, 9:1. What is to follow Fair? Subject before Ad Club; G. A. Davidson and D. C. Collier to offers suggestions and prophecies at Wednesday meeting.

January 9, 1917, Minutes of the Board of Park Commissioners

The President stated that Captain Long, representing the Fourth U. S. Marine Corps, had requested that all the State buildings south and west of the Organ Pavilion be turned over to the U. S. Marine Corps, to be used for barrack purposes for the additional men that were to be stationed at the Marine Camp. Upon motion duly made and carried, Commissioner Cosgrove and the Superintendent were appointed as a committee to inspect the buildings with Captain Long, and report to the Board at a called meeting to be held Wednesday, January 10, at 11 a.m.

The members of the Board of Supervisors, together with Assistant District Attorney Scheuermeyer, appeared before this Board in reference to a location in some of the buildings on the Exposition grounds for County Library purposes. After considerable discussion, in which the Supervisors were advised by this Board that favorable action would be taken regarding same just as soon as the post-Exposition period was over and they had opportunity to decide upon a favorable location; this was entirely satisfactory to the Board of Supervisors, and the matter was left to be handled after the post-Exposition period closed.

The Secretary reported that the Southern Counties Building had offered to take \$800.00 for all furniture, carpets, draperies, etc. in what is known as the "Blue Room," the buffet, kitchen, men's smoking room, ladies dressing room, and the floor coverings, draperies, etc. in the Modern Bungalow. Upon motion duly made and unanimously carried, the Secretary was instructed to make the purchase through the Exposition, crediting the Exposition with the same on bills for the maintenance of the grounds.

The Secretary reported that he could purchase four show cases in the Art Gallery in the Southern Counties Building for \$160.00; one large case in the Holland exhibit, including all velvet-covered stands, etc., for \$150.00. Upon motion duly made and unanimously carried, the Secretary was instructed to make the purchase on the requisition issued in December for same.

Mr. Max Youngman, who has looked after and tuned the pianos for the Starr Piano Company during the Exposition period, offered to care for and tune all pianos owned or controlled by the Park Board free of charge, provided the Board designated him as the "Official Piano Tuner" for the Board of

Park Commissioners. Upon motion duly made and unanimously carried, Mr. Youngman's offer was accepted and he declared to be the Official Piano Tuner for this Board.

Colonel J. P. O'Neil, commanding the Twenty-first Infantry, having offered to care for and guard the "Indian Village," provided same be turned over to him with the privilege of having the regimental headquarters in the Village store, he to make all repairs, etc. to the Village, this Board furnishing material therefor, a motion was duly made and unanimously carried turning the Indian Village over to the Twenty-first Infantry, with the distinct understanding that said Village remains under the control of the Board of Park Commissioners and supervision of the Superintendent of Parks.

Colonel J. P. O'Neil, commanding the Twenty-first Infantry, having requested the use of the International Harvester's Building for recreational quarters for the men of the Twenty-first Infantry, a motion was made and duly carried turning said building over to the Twenty-first Infantry to be used for recreational quarters, provided suitable quarters are furnished by the Army branch of the Y. M. W. A., in said building; said building to remain under the control of the Park Board and under the personal supervision of the Superintendent of Parks.

Upon motion duly made and carried, the Secretary and Superintendent were instructed to take up the matter of maintenance of animals at the Isthmus Zoo with Mr. Kaufman will full power to act.

January 9, 1917, San Diego Sun, 10:2. Davidson to head Museum Association; to succeed George W. Marston who is now head of Park Board.

January 9, 1917, San Diego Union, 1:7. Japanese give Fair building to city; Exposition officials surprised with splendid gift; plan to keep gardens open.

The city of San Diego today is the owner of the Japanese house and the miniature tea garden surrounding it at the Exposition.

It was given to the city yesterday through the park board, by the Japanese Exhibit Association, which has maintained one of the best of the foreign exhibits on the grounds for two years past.

The garden has been declared one of the prettiest in the country by countless Exposition visitors and the gift came as a complete surprise to members of the park board.

Since the flowers and shrubbery and dwarf trees were planted two years ago, the grounds surrounding the tea house, with its spacious porches and figures which represent many quaint Japanese superstitions, have improved so greatly that San Diegans have feared for sometime that the exhibit would be torn down.

Secretary Penfold is trying to make arrangements for the serving of tea and afternoon lunches so as to keep the pavilion and the ground open during the next three months.

January 10, 1917, San Diego Daily Transcript, 4. The announcement has been made of the early completion of the street car line through the city park. The distance remaining to be built is about one and one-half miles. Three bridges will be necessary to complete the line, which will afford a much shorter road to East San Diego, giving residents of that section quicker service.

January 10, 1917, San Diego Sun, 1:5. Park car line to be extended soon.

January 10, 1917, San Diego Union, 1:2-3. Completion of car line through park announced; big saving of time to passengers between East San Diego to Fifth and Broadway; work to begin at once.

January 10, 1917, San Diego Union, 1:8, 6:3-4. Madame Schumann-Heink is sponsor of a plan to make San Diego an American Bayreuth; festival of grand opera, symphony concerts scheduled in July at organ; diva deposits \$10,000 as part of her guarantee.

January 10, 1917, San Diego Union, 4:1. EDITORIAL: The Great Music Festival.

The establishment of these festivals may be regarded as a dividend which the citizens of San Diego are reaping from their investment in the Exposition, an investment which will continue to pay dividends for many years.

January 10, 1917, San Diego Union, 7:3. Davidson heads Museum Society; succeeds George W. Marston who resigned; membership campaign planned.

January 10, 1917, San Diego Union, 16:2-3. Junior College students seek Exposition buildings for foundation of a Junior College, now part of High School; Southern California Counties Building, the most desirable.

January 11, 1917, San Diego Sun, 2:3. Exposition program schedule.

January 11, 1917, San Diego Sun, 4:4-5. Elizabeth S. Miller protests against post-Exposition.

"The beautiful exposition has done its work, and lived its life, has been 'officially closed' and, in the eternal fitness of things, should be allowed to pass. And Balboa Park, as it stands today, should be developed along strictly public park lines for public park purposes, and not be used to exploit the pathetic remains of defunct structures.

January 11, 1917, San Diego Union, 4:2-5. Prominent citizens pledge cooperation in carrying out Shumann-Heink's plan to make San Diego America's Bayreuth

January 11, 1917, San Diego Union, Classified, 1:3. Indian Village has been given over to 21st Infantry; officers' quarters are maintained in some of the buildings with the enclosure and guards, who are stationed along the Isthmus at night, have their headquarters there.

The city park commission in session yesterday adopted a plan that is practically a guarantee to the heads of the various branches of military stationed here that grounds and quarters will be provided for them on the Exposition grounds as long as such grounds and quarters are needed.

Further than that the park board has taken no definite action, excepting in the case of the Southern California Building, in regard to the many requests that have been received for the use of Exposition buildings. These many petitions are given consideration at almost every meeting of the board, said George W. Marston, chairman, last night. But the three-month post-Exposition period may be far advanced before the final decision is made in regard to most of the buildings, he stated.

The junior college, upper branch of the San Diego High School, is the latest organization to enter the competition for use of the buildings. Those interested in this plan were advised by the park board's secretary yesterday to file an application in writing.

The Southern California Building, the only one that has been set aside for a specific use, is to be a public auditorium. The building and furnishings have already been taken over by the park commission, and the date of dedication of the building to its new use is to be made public in the near future.

The buildings that have been turned over to the park board are the Southern California Building, the model bungalow and the Indian Village. The Indian Village has been given over by the park board to the use of the Twenty-first Infantry. Officers' headquarters are maintained in some of the buildings within the enclosure, and guards, who are stationed along the Isthmus, night and day, also have headquarters there.

The Alameda County building, the Salt Lake Railroad building, and several of the state buildings are some of those which are to be turned over to the park board in the near future. Others, it is expected, will be given to the park near the end of the post-Exposition period.

Many of the buildings on the Isthmus are being razed, and the two-year old joy street is a scene of desolation. The Isthmus, however, is the only portion of the grounds where the wrecking has been started.

The Isthmus zoo is still open to the public, and is to be kept open during the next three months.

January 11, 1917, San Diego Union, 9:3. Assure military grounds in park will be provided; guarantee given by Board yesterday of plenty of room as long as sites there are needed.

January 11, 1917, San Diego Union, 14:1. Southern California Chapter of American Organists Guild arrange recitals at Fair beginning next Monday.

January 11, 1917, San Diego Union, 14:4. Exposition board elects directors at annual meeting.

January 12, 1917, Letter, Executive Secretary, Board of Park Commissioners, to Lieutenant Louis H. Bailey, Office of the Quartermaster, Camp Walter R. Taliaferro, San Diego, Cal.

Dear Sir: In reply to yours of the 10th, ult., requesting permission to place gate in south wall of Indian Village, I wish to advise that your request has been granted by the Board of Park Commissioners, on condition that the location and design of the gate shall meet with the approval of the Park Superintendent, Mr. Morley, under whose supervision all alterations to park buildings must be made.

January 12, 1917, Letter, Executive Secretary, Board of Park Commissioners, to Captain E. C. Long, U. S. M. C., Exposition Grounds.

Sir: Referring to your recent application on behalf of the United States Government, for the use of certain buildings on Balboa Park grounds, we beg to present, first, the status of matters in relation to these buildings and the limitations of authority of the Board of Park Commissioners; and, second, our proposals for meeting your needs.

There are six state buildings in the park section south of the organ plaza and contiguous to the military camp. Only one of them, the Washington, is now in actual possession of the Park Board. The Kansas Building has been sold to the Theosophical Society. The New Mexico Commission refuse to convey their building to either the Exposition or the Park, and propose to wreck it for the salvage value. The other three, the Alameda, Utah and Montana, will probably come under park control after the close of the Exposition in April.

According to plans of park treatment recommended by the Citizens Advisory Committee and adopted by the Park Commission, all of the above mentioned buildings, except the New Mexico, were to be wrecked and removed at the close of the Fair on as soon as practicable.

Again, under a strict construction of state and municipal law applying to Balboa Park, the Board of Commissioners should not grant a permanent occupancy of its grounds other than would conserve its landscape or contribute to its use as a park. The extraneous use in 1915 and 1916 by the Exposition was provided for by a special act of the legislature which terminated December 31, 1916. The present commissioners are now confronted by many concessions that were made during the Exposition years and have to adjust them as best they may. The complications of the situation are, therefore, placed before you, in brief, as an explanatory preface to our proposed adjustment of the housing requirements of the U. S. Marine Corps.

The Board has decided to offer for occupancy as barracks the four buildings known as "Washington," "Utah," "Montana," and "Kansas." The Kansas building will have to be bought in

order to include it, but we will undertake to do that and to make the necessary arrangements with the other state commissions and the Exposition authorities. The New Mexico building cannot be promised, under the peculiar circumstances of the case, and the Alameda needs to be retained as part of the equipment of the organ and musical societies.

You have asked us if a lease can be made for these buildings for two or three years. In view of the various phases of the problem as noted above the Board would prefer to give a permit without a time stipulation. It is also questionable whether one Board can bind a succeeding Board to any agreement of this kind. There is no question whatever of your holding through 1917, and, in the opinion of the present commissioners, the attitude of succeeding Boards would be quite as friendly and cooperative as the present one. The City of San Diego and its representative organizations have always encouraged and assisted the army and navy in their plans for making San Diego a base of operations. The Park Commissioners are also appreciative of the parade and musical contributions of the Marine troops in many park functions of a public character.

Referring to personal conversations, it is understood that some conditions regarding sanitation, care of the grounds and the limitation of mess houses to the district now occupied, will be noted in the proposed agreement.

Trusting that the arrangement we have suggested will prove satisfactory to the Marine Corps, we have the honor to remain.

Very faithfully yours.

January 12, 1917, San Diego Herald, 1:3. Car line extension through park is now assured.

January 20, 1917, San Diego Sun, 1:3-4. George W. Marston for mayor.

The decision of George W. Marston to be a candidate for the office of mayor of San Diego is a cause for congratulation on the part of every citizen of this community regardless of party affiliation or economic status.

George W. Marston is easily the first citizen of this city. No other man is so enshrined in the hearts of his fellow citizens. For months, scores and even hundreds of men and women have been urging him to accept the nomination, but in every case he has urged the name of someone else.

The person so suggested in every case has either found it impossible to accept for most excellent reasons or has been found unacceptable by the voters who were approached on the subject.

The candidacy of George W. Marston clears the political atmosphere of San Diego.

No other candidate will seriously oppose him. That he will be chosen mayor of the city he has loved and served so well for 46 years, as a private citizen, is a foregone conclusion.

San Diego is to be congratulated upon Mr. Marston's decision. Let us now, all get together for once in our lives, forgetting past differences and misunderstandings, and let us join hearts and hands in bringing about an

ERA OF GOOD FEELING IN THE GOOD OLD TOWN.

January 20, 1917, San Diego Sun, 9:1. Would keep Pollard Company in city; ordered off Exposition grounds; chamber will act.

January 20, 1917, San Diego Union, 1:5. Marston named for mayor, gives consent to plan; willing to "be run" for office as candidate of Citizens' and Civic League, he says.

January 27, 1917, San Diego Sun, 2:1-2. San Diego closed down the "Stingaree" four years ago; Mrs. Jennie M. Bennett, Rev. W. E. Crabtree, Rev. W. B. Thorp, Dr. Charlotte Baker, Rec. Chas. E. Spalding, Mrs. Harry H. Weddle, Mrs. R. C. Allen, Rev. R. H. Hollington, and Rev. Edwin F. Hallenbeck quoted..

January 27, 1917, San Diego Union, 2:5. Mayor Capps delays verdict in park investigation; too busy with other things; denies intention to humiliate Marston.

January 30, 1917, San Diego Sun, 3:8. Want to aid in building up that zoo; here's chance for children and grownups as well.

Children of the public schools, attention! You can now secure memberships in the Junior Zoological Society of San Diego at 50 cents per year. Membership cards will be ready tomorrow at the office of the treasurer, John F. Forward, Jr., vice president American National Bank. Every boy and girl in San Diego from 1 year to 17 years and 11 months is entitled to membership.

All you have to do is call on Mr. Forward with your half dollar and you will be presented with a membership card entitling you to full membership privileges in the zoo society.

Now, you older folks attention, also! President Harry Wegeforth, office 316 Granger block, Fifth and Broadway, has secured the membership cards for adults and every man and woman in this city is invited to join the society right now, on payment of the annual dues of \$5.

The society is fully organized and all ready for business. We are going to have the finest zoological gardens in the world right here in Balboa park. We want \$10,000 right off quick to buy the animals and provide for them for the coming year. Don't delay, but get right in the procession tomorrow morning early.

February, 1917, California Garden. Monthly Excursion, by G. R. Gorton.

The Botanical Building is surely the brightest spot on the Exposition grounds at this writing. Many of the various flowering plants therein have broken their own records for size, form, floriferousness, etc., and the resultant effect leaves little to be desired, especially in the way of color. *Primula obconica* has exceeded itself somewhat this season, and the plants in the lath house have produced flowers fully a third larger than is usual under similar conditions. The *Cinerarias*, which are there by the hundred, are quite up to expectations, possibly beyond that. The *Azaleas* are in the pink of condition --- some literally, some figuratively. The variety *De Schryveriana*, a maculated pink, is very beautiful, as are several other similar sorts. *Niobe* is an excellent white, clear of color, and profuse of bloom --- more floriferous than its contemporary, which is, however, a purer, and which shall remain anonymous as far as ye scribe is concerned. There is a specimen of *Nephrolepis*, suspended over the pool in the conservatory, which reminds one of the German legend of noses, the owner of which could not stop from growing. However, no one has any desire to hinder this fern in its attempt to emulate *Alsophilas Dicksonias* and others of their ilk. Many gardeners and nurserymen pronounce it to be one of the finest, if not quite the most beautiful specimen of its kind they had ever seen. It has now a spread of six or seven feet, and is most impressive. Apropos of size in ferns, this *Nephrolepis* has a companion --- a *Goniophlebium*, also in a hanging basket, which has developed fronds some seven or eight feet in length and nearly a foot in width, but we expect that sort of thing from representatives of the genus *Goniophlebium* and do not marvel at it.

Adjoining the south edge of the lily pond in the conservatory is an excellent specimen of *Carica papaya* (the papaw or pawpaw of South America, better known simply by its specific name papaya) bearing both flowers and fruit. It is interesting to note the number of uses to which the different portions of the plant are put. The fruits are served raw or as a sauce or boiled or pickled --- in fact, almost any way one chooses. The leaves furnish papain, known to medical science as a proteolytic enzyme --- whatever that is --- and appears to possess properties similar to peptol, which are (untechnically) to act as a leaven for the results of indiscretion in diet. It is also possible to produce tenderloin, or at least tender steaks, from the plebeian round variety by the simple process of wrapping the steaks in the leaves of *Carica papaya*. This ought to appeal to use who look with emotions of terror upon the ever-rising barometer of prices of foods. The leaves of the papaya are saponaceous, which suggests still another possible use, and even the seeds of this man-purpose plant have value, medicinally.

Another economic plant of interest is *Cyphomandra betacea*, tree tomato, a specimen of which is located on the west side of the conservatory. This plant is also of South American origin, and is of the Solanaceae, as its common name suggests. In flavor and uses the fruit is somewhat similar to its cousin, the garden tomato. It is pear-shaped and of an orange color. *Cyphomandra betacea* is one of about thirty species of this genus.

In the process of rearrangement of the conservatory, one of the *Platynerium*s has been placed closer to the work at the southwest corner of the house, which will be appreciated by those who wish to observe this very curious epiphytic fern at closer range. This particular specimen is *Platynerium alicorne*, Elk Horn Fern.

The *Philodendron asperatum*, which entwines itself around one of the steel pillars of the conservatory just opposite the entrance, has made excellent growth during the last few months, and now is quite typical of this species of a most interesting genus of plants.

February 1, 1917, San Diego Union, 8:3. Exposition flags at half mast in respect to Carl I. Ferris, former member of Park Board, who died Wednesday morning.

February 3, 1917, San Diego Sun, 5:7. Procession to join the Zoo Society; support is given to plan to provide a fine zoo.

Well, well, boys and girls, the procession of the "Youth of the City" toward the American National bank has begun and calls for "Front, Mr. Forward" are the order of the day. For Mr. Forward is the treasurer of the Junior Zoological society of San Diego and every boy and girl of school age from 5 to 18 is preparing to call on Mr. Forward at once with 50 cents in cash for the purpose of joining the aforementioned society.

Every cent of the money received by the children of San Diego is to be used to buy the collection of lions and leopards and bears and monkeys and parrots and other animals and birds now on the Isthmus in the park, and to establish them in first-class quarters in the city park, where they can be seen and enjoyed by all the children and all the grownups of the whole world.

Boys and girls of San Diego, don't you want to have a part in the purchase of a great zoo for San Diego?

And grownups, can you think of any finer way to spend 50 cents than by buying a membership for your boy or girl or some other boy or girl you happen to know?

We want 10,000 members right away quick. We ought to have 20,000 members, but 10,000 will help a lot.

Mr. Forward has the membership cards and the handsome buttons already for the juniors. Supt. MacKinnon of the city schools and Supt. West of the country [sic] schools have gone into this thing enthusiastically. The city and county boards of education have endorsed the proposition, also the Ad club, and all the other public bodies are endorsing the idea as rapidly as it is presented to them.

February 3, 1917, San Diego Union, 2:5-6. J. H. Penfold urges expansion of Fair grounds; plan to make Exposition site playground of America advocated; attendance records for January show 29,676 persons passed through the gates; other facts.

The Exposition has just started, in the opinion of J. H. Penfold.

"New is the time," said the secretary of San Diego's World's Fair, "to build on what has been accomplished."

"We often have talked about making San Diego the playground of the world. Well, here it is --- the park. All is done. All's paid for.

"The great out-of-door organ is there for all time. We can combine music, painting, sciences, everything that goes to mental development and soul uplift --- right here.

"And just over there is the stadium for the world's athletes. That stadium is a much a part of the Exposition as the park itself.

"The Exposition has put San Diego on the map. The world knows that we are here, and much of the world has marveled at what San Diego has accomplished.

"Let us not be too hasty. Why should we recommend now that this building be torn down and that building retained? Let time develop the need or the usefulness of these buildings.

"There they are. Any of them can be made permanent with little expense. It costs money, however, to build them, and it will cost more money to tear them down. Why spend the money for destruction when at some future time we may need the very building we have pulled down?

Use of Building

"The Southern Counties Building can be made into a great auditorium, and San Diego has none.

"Dr. Hewett has arranged for pictures within the next thirty days which will start an art gallery into becoming a permanent institution. The art guilds of San Diego, Los Angeles and San Francisco are cooperating.

"The museum will retain all the exhibits in the Science of Man building as a permanent feature, and collections to show Indian life on the Pacific coast will be added.

"One hundred and twenty thousand dollars were subscribed for research expeditions in Guatemala. The obelisks and inscriptions on rocks are still here to become a part of the permanent museum exhibits. The Sacramento building will house the display.

"It's up to the people of Southern California to help in making all these great things permanent for the general good of Southern California.

"Los Angeles came across magnificently last year, the big men of that city showed they entertained no prejudice against use. Why, if San Diego develops into as great a city as Los Angeles, there wouldn't be a barren spot along the coast between the two places. The seashores would be lined with beautiful villas and the dry mesas would be converted into gardens. The only persons in Los Angeles who knock San Diego are a few apartment housekeepers who want to hold the tourists a few days longer for a few dollars more."

Canada's Exhibit Goes

The Canadian exhibit will be removed to some other part of the United States to advertise Canada, and its place probably will be taken by a permanent Southern California exhibit, for which Senator Jones' bill would appropriate \$100,000.

Colonel O'Neil and the Twenty-first Infantry will occupy the Painted Desert. The Indian store will be the headquarters and the other buildings will be used by the officers. The regiment will keep the buildings in repair and the entire place, which is to remain intact, will be open to visitors.

The International Harvester building also has been thrown open to officers and men and the Y. W. C. A. branch of the service.

Meanwhile, the state buildings, south of the Cabrillo bridge, will be used by the marines for temporary quarters.

Because of a "sleeper" which it is alleged that Gulfport put into the congressional appropriation for the Mississippi Exposition, the Fisheries building here, whose equipment was considered permanent, has been dismantled and all tanks and machinery have been moved to Gulfport. The bill provided that all federal exhibits, including "the fisheries," should be transferred to Gulfport. An effort will be made to install new machinery that keeps the water fresh and new tanks through federal appropriation.

The park commission will take over the Exposition April 1 and will have to solve all the new problems.

The attendance for the month of January was 29,676.

February 3, 1917, San Diego Union, Classified, 1:3-4. San Diego Museum Society asks public cooperation; retains services of Dr. Hewett; Board seeks new members; Park Commission has granted quarters in California Quadrangle, Administration, Science of Man and Indian Arts buildings..

February 8, 1917, Letter, Executive Secretary, Board of Park Commissioners, to San Diego Society of Natural History. . . . Society given permission to occupy U. S. Government Agricultural building, formerly known as Nevada building,

February 9, 1917, San Diego Sun, 3:5-6. Lincoln's birthday to be celebrated at Exposition.

February 12, 1917, Los Angeles Times, 4:3. War rules at North Island; airplane camp under strict army discipline; more activity now than ever manifested before; actual figures of cost and profit of Exposition.

For the first time the exact figures on the cost of constructing the Panama-California Exposition were made known today, covering a period from the inception of the exposition in 1910 to April 30, 1916, at which time the Panama-California International Exposition took over the affairs. The figures are as follows:

Total expense and construction of the exposition, \$2,567,779.

Profits during 1915, \$233,721.

Net cost of the Exposition to its backers and San Diego citizens, \$2,353,695.

The city of San Diego has \$1,481,580 invested in the Exposition in permanent improvements. These include the Puente Cabrillo, grading and planting, a Botanical Building, irrigation system, retaining walls, paving and surfacing roads, and paths, pools and fountains, Administration, Home Economy, Science of Man, Indian arts, Foreign Liberal arts, Varied Industries and Food Products, and Commerce and Industry buildings.

The gate revenue for both pre-exposition and exposition periods amounted to \$569,740, and the concession revenue \$184,233. The largest attendance was drawn by musical events at the Spreckels organ. A net surplus of \$56,570 was turned over to the Panama-California International Exposition.

February 12, 1917, San Diego Sun, 2:3. INFORMATION: Exposition Program.

February 12, 1917, San Diego Sun, 7:1-2. Memory of Lincoln honored.

February 12, 1917, San Diego Sun, 7:5. Original Expo Figures Given.

The total costs of constructing and operating the Panama-California Exposition, according to W. I. Palethorpe, who has just completed an audit of the books from 1910 to April 30, 1916, the date when the original Exposition was dissolved and its affairs taken over by the Panama-California International Exposition amounts to \$2,567,779.52. Profits during 1915 were \$233,721.81, leaving a net expense of \$2,353,695.97. After paying off a pre-expo indebtedness and an operating deficit covering the first four months of 1916, a net operating surplus of \$56,570.45 was turned over to the new board.

Out of the mass of figures in the report can be gleaned some items of special interest. Just \$1,481,580 had been invested by the city of San Diego in buildings, pavements, comfort stations, lighting and newer systems and other items of permanent character. Of this amount the park board paid \$1,337,109, while the exposition paid \$144,471. The Cristobal café, Hawaiian Village and Panama Canal, which were constructed by the exposition, cost \$212,333.59. A loss of \$35,659 was suffered in their operation and \$18,167 was lost through the bankruptcy of the War of the World concession. Postcards and official views lost \$3,887 and \$3,177 is charged to uncollectable sundry accounts.

The total gate revenue for both pre-exposition and exposition periods was \$569,740.71. During 1915 the total number of paid admissions was 1,462,338. Passes totaled 587,692. The total revenue derived from concessions was \$184,233.70.

February 12, 1917, San Diego Union, Classified, 9:1-2. Exposition cost since 1910 shown in official report; expense and construction cost given as \$2,567,779.52; profits in 1915 placed at \$233,721.81; Park Board gives large fund to cause; admissions disclosed.

Exact figures of the cost of constructing and operating the Panama-California Exposition were given out yesterday for the first time when the audit by W. J. Palethorpe, public accountant, of the Exposition books was made public. The audit covers a period from the inception of the Exposition in 1910 to April 30, 1916, when the Panama-California Exposition was dissolved and its affairs taken over by the Panama-California International Exposition.

The report shows that the total expense and construction cost of the Exposition was \$2,567,779.52; the profits in 1915 amounted to \$233,721.81; and that the net cost of the Exposition to its backers and to the citizens of San Diego was \$2,353,695.97. Of the surplus earned in 1915, \$173,763.63 went to pay the indebtedness incurred before the Fair opened and \$3,287.53 was required for an operating deficit during the period from December 30, 1915 to April 30, 1916. A net surplus of \$56,570.45 was turned over to the Panama-California International Exposition on the latter date.

The apparently dry and uninteresting array of figures in the auditor's report conceal a mine of information which every citizen of San Diego will welcome.

City's Investment

The City of San Diego has \$1,481,580 invested in the Exposition in permanent improvements, including the Puente Cabrillo, which cost \$225,154, grading and planting valued at \$357,374, a Botanical Buildings valued at \$53,386, and a host of other permanent improvements. The irrigation system cost \$18,168, the sanitary and storm system \$38,156, retaining walls \$13,564, paving and surfacing roads and paths \$114,552, and pools and fountains \$14,785. The Administration building cost \$26,483, the Home Economy building \$41,719, the Science of Man building \$44,328, the Indian Arts building \$40,113, Foreign Liberal Arts building \$54,681, Varied Industries and Food Products building \$93,342, Commerce and Industries building \$74,403. Other items were street and road grading, top soil and fertilizer, miscellaneous construction, fire station, lighting and electric system, Ethnology building, pergolas and park furniture, comfort stations, Service building, hospital, preliminary expenses, architects' fees and insurance. The Exposition paid \$144,471 of this expense, the Park Board contributing \$1,337,109.

Preliminary planting and grading outside the Exposition cost \$64,442, which also was paid by the Park Board, making its total donation \$1,401,441. In addition, the Board has spent \$150,000 for the stadium, \$100,000 for a Fine Arts building in the Exposition, and \$100,000 for improvements in the park outside the Exposition grounds. For all of the work except the stadium and the outside improvements, the Exposition acted practically as contractor doing the work while the Park Board paid the bills.

Construction Cost

Recapitulation of the expense of constructing the Exposition shows that buildings, streets, bridge and other items under Park Board jurisdiction cost \$1,545,912; sewers, entrance, marine camp, telephone system, etc., \$80,700; financing the Exposition, discount on bonds, including interest on borrowed money, campaigns for subscriptions, etc., \$103,655; expenses of administrative and executive directors, legislative, accounting and collection departments, president, secretary and director-general, \$108,827; advertising and exploitation, \$291,992; expense of exhibit, traffic and concessions departments, \$102,861; expense of constructing Cristobal café, Panama canal and Hawaiian Village exhibits (owned by the Exposition), \$212,333; admission and protection during pre-Exposition period, \$35,202; net expenses of works department, being the difference between earnings and expenses, \$21,695. Other small items brought the total expense to \$2,567,779. This amount was paid for as follows:

Park Board, \$1,401,441; miscellaneous revenue during pre-Exposition period, \$40,320; stock subscriptions and donations, \$952,253; amount taken from 1915 profits to pay previous deficit, \$173,763.

During the audit only two errors, each of ten cents developed. As they were in different accounts they balanced. As the operations of the Exposition period covered hundreds of thousands of entries, the showing is considered remarkable.

Cost of Publicity

"Advertising, publicity and exploitation during the five years of the pre-Exposition period cost a great deal of money," reads the report. "The result of this expenditure was to cause the whole of the United States to become familiar with San Diego and its Exposition, and it is extremely doubtful if the same amount of money could have been expended for advertising with anything like the widespread knowledge of San Diego in any other form. The advertising was necessary, of course, and has caused San Diego's fame to become familiar to most of the inhabitants of the United States. While the item is large, it cannot be considered as anything but insignificant compared with the widespread publicity which has been attained.

"The Department of Ethnology, costing \$113,585.39, provided an unique exhibit of the Southwest, which has attracted the attention of visitors and probably was well worth the money expended.

"The items for the Cristobal café, Panama canal and Hawaiian Village were necessary expenditures from the standpoint that it was not possible to get any outsiders to take these concessions. The Cristobal café was a necessity, as the Exposition was forced to have some administrative restaurant where the visitors could

be decently entertained. The Panama canal exhibit was planned as the biggest feature of the Isthmus, or amusement street, and seemed to be necessary in order to follow the general idea that the Exposition itself was a celebration of the completion of the building of the Panama canal. The Hawaiian Village, which was another of the principal attractions on the Isthmus, became a burden on the Exposition, and these three enterprises cost the Exposition the large amount of \$212,333.59."

In another portion of the report it is asserted that the operation of these three concessions resulted in a loss of \$35,659. The Exposition also lost \$13,887 on its postcard and official views sales, and \$18,167 advanced to the War of the Worlds, which later went into bankruptcy, as well as \$3,177 in uncollectable sundry accounts that are marked down in the loss column.

"The gate receipt for both pre-Exposition and Exposition periods amounted to \$569,740.71," continues the report. "During the year 1915, the operation period, the total number of paid admissions was 1,462,338 (from coin annuals and purchased tickets), while the admissions on passes (concessionaires, exhibitors and employees) amounted to 587,692. Thus we have a total admission for all classes of 2,050,030. This does not represent the total number of admissions to the Exposition, as there was no count kept of soldiers and sailors in uniform who entered the Exposition without passing through the stiles. It will be noted that the number of paid admissions was smaller than had been anticipated. The revenue derived from concessionaires amounted to \$184,233.70. This revenue is low when compared with gate revenue."

In view of the proposed annual music festivals at the Spreckels organ every July, the following tribute to the drawing power of music at the Exposition is of interest:

"In a study of the revenue items, it was very plainly indicated that many thousands of gate admissions were due to the outdoor entertainment provided at the organ and organ platform. The special attractions seemed to center very largely around the organ platform and that the people of San Diego appreciated this magnificent gift is plainly demonstrated by a study of the statistics showing the increased attendance whenever there was any special entertainment offered at the organ.

"The marine camp was an added attraction that seemed to be much approved by the visitors. The drills were well attended and the band concerts given by the military bodies helped the Exposition out wonderfully, not only in providing entertainment for the visitors, but in saving the Exposition the very heavy expense which would have been necessary in keeping a permanent Exposition band organization.

"It would be difficult to praise too highly the indefatigable energies of those workers who gave their time and labor without any remuneration in the directing of the finances of the Exposition during 1915. Their work is plainly evident throughout the reading of the records of the operations of the Exposition, and the results attained during the Exposition period show the high class of service which was rendered.

"The stockholders may well be grateful that their representatives were so faithful to their trust."

The report does not deal with the operations of the Panama-California International Exposition, which is understood to have cleared a small surplus, or with any portion of 1917.

Although the permanent improvements in the Exposition owned by the City are valued at only \$1,500,000 in the report, in reality they are much more valuable. Nothing is said about the California Building, erected by the state at a cost of \$250,000 and donated to the city; the Southern Counties building worth \$100,000, which has also been presented to the city; the Spreckels organ and pavilion, valued at \$125,000, and the numerous state and county buildings, the aggregate value of which probably totals \$50,000 or \$75,000.

February 14, 1917, San Diego Union, 8:2-3. David A. Curry, Yosemite park host, will lecture every afternoon this week in Exposition auditorium, formerly Southern California Counties building.

February 16, 1917, San Diego Sun, 7:2. Plans for zoo given good boost; many get behind movement to place animals in city park.

February 17, 1917, Los Angeles Times, 7:1. BIG TIME: La Mesa will hold a jollification over the substitution of motor cars for the steam trains which now run into town; the Panama Canal extravaganza, the last of the show; plans made secure financing for San Diego Zoological Society by securing honorary and life memberships.

February 17, 1917, San Diego Union, 2:2-3. Children's day at Exposition awaits school board sanction.; Washington birthday program for kiddies planned by officials; parade, band concert, military review and Panama Canal performance are among features.

Women's Club Day, Thursday, March 1; Joseph Jessop archery collection being installed in Army (?) building at north end of Plaza; Park Commissioners to arrange an archery range at some suitable place in the park; Society of Natural History has taken over Nevada building.

February 18, 1917, San Diego Union, 1:1. Operatic soloists to come; nine stars, 25 choristers and 40 musicians will be brought from Metropolitan to San Diego; four great operas to be given at festival; Gadski and Goritz among those engaged, says telegram; noted artist will build scenery.

February 18, 1917, San Diego Union, 2:1-3. Appeal to Congress forecast; President Wilson will ask legislators to clothe him with full power to act should emergency arise; big increase in navy measure is proposed.

February 18, 1917, San Diego Union, 2:3. German raider identified as cruiser *Vineta*.

February 18, 1917, San Diego Union, 5:2-3. Marston for Mayor club campaign workers named; city executive maintains silence regarding candidacy; three men announce intention to make race for official toga; school and council aspirants file petitions.

February 18, 1917, San Diego Union. Playground Commissioners plan May Day Festival, by Josephine Randall, director, Golden Hill Playground.

February 19, 1917 (?), Minutes of the Board of Park Commissioners.

After thoroughly discussing the proposition, a motion was duly made and unanimously carried authorizing the President of this Board to confer with Senator Edgar Luce in reference to securing a lease by State Legislature of the California State Building to the San Diego Museum Association.

The Superintendent having reported that a number of complaints had been made regarding women and children being insulted on the West side of Balboa Park during the past week, a motion was duly made and carried instructing the Superintendent to report such cases, or any other infractions of the rules and regulations of the Park to the mounted police.

Upon motion duly made and unanimously carried, the Executive Secretary was authorized to write a letter of thanks and appreciation to Superintendent of Police Steer for his kindness in placing a mounted policeman on the West side of Balboa Park, stating that the President of this Board would call upon him at an early date in reference to same.

February 19, 1917, San Diego Daily Transcript, 4. Ten-minute talks will be given next Saturday at the meeting of the Audubon Society at the Sacramento Building at the Exposition. About 300 invitations have been issued and these will be good for admission into the grounds.

February 19, 1917, San Diego Sun, 7:65-6. High cost of living not felt at Isthmus zoo; it costs but \$3.09 per day., by J. C. Thompson, Surgeon, U. S. Navy.

The acceptance of a gift depends upon several factors. Of these the vital question is whether after receiving it one can afford to keep it. At present the best collection of animals in any zoo on the west coast is

to be seen on the Isthmus at the exposition. As it is now well known, there is a movement on foot headed by the Zoological Society, fostered by **The Sun**, approved by the park board, and supported by the chamber of commerce to purchase these animals and give them to the Zoological society, which in return will maintain them and place them on exhibition in the future zoological garden in the pepper grove.

Before accepting this charge, it was necessary for the Zoological society to obtain some data as to what the upkeep of the animals would cost. To this end one of the members of the society volunteered to undertake the care of those belonging to D. C. Collier, some loaned to the Zoological society, and a few that belong to the park.

When the question of the acquisition of these animals is broached to certain conservatives they appear stricken with fear at the enormous amount of meat the lions and tigers are supposed to consume, quoting figures they must have obtained from some farmer's almanac, and shrinking from joining the Zoological society because of the supposed high cost of maintaining large animals. Some compromise by desiring the Zoological society to only place on exhibit the local ground squirrels, gophers and field mice, thereby losing sight of the real function of a great zoological garden, which is to house and exhibit, along with the local fauna, a representative collection of the large exotic species. When these people think of a lion eating 15 to 20 pounds of meat a day, they think of the cost in terms of beefsteak at the butcher shop. As a matter of fact, the meat problem at a zoo is far more simple than at a home as the animals are fed horse meat. Old horses cost from \$2 to \$4 depending upon their size, and on fair-sized horse last all the animals in the Isthmus zoo for one week.

There is here submitted for the information of the public an accounting of the receipts and expenditures for 31 days during which record was kept.

RECEIPTS

D. C. Collier	\$ 93
Zoological Society	10
Park Board	<u>10</u>
Total	\$ 113

EXPENDITURES

Salary of keeper	\$ 45.00
Horse meat	5.25
Bread (156 loaves)	9.42
Carrots (4 bags)	5.00
Hay (2500 pounds)	29.00
Drinking pans	.60
Medicine	<u>.50</u>
Total	\$ 95.77

As will be seen there is a balance of \$17.22.

It may be seen at a glance that the upkeep of these animals is far below what one unacquainted with the management of a zoological garden would estimate. The animals have actually been fed and care for at a cost of \$3.00 per day. This surely is a figure that should not terrify even the most conservative.

Results of this kind are only obtainable in a natural history society in the early years of its life when much of the work is done by the members who are students of nature and lovers of animals, and who will give of their time and labor.

The funds of the Zoological society will be devoted to the purchase of animals which will be placed on exhibition for the instruction and pleasure of the public. The officers will for years be chosen from the ranks of volunteers. There will be no high-salaried directors or costly secretaries. The money subscribed by

members to the society will revert to the public increased one hundred fold exactly as it does to the people of New York from their zoological garden.

February 20, 1917, Letter, Carleton M. Winslow to Dr. Edgar L. Hewett regarding disposition of Exposition buildings (George W. Marston Papers, Collection 219, Box 2).

Dear Dr. Hewett:

It has been in my mind to put in writing what, after much thought, seems to be the logical disposition of the Exposition buildings and grounds now that the fair has closed and especially this disposition in relation to the Museum Association.

In the interest of brevity, even with the possibility of losing emphasis in a matter in which I feel very strongly and earnestly, I will write the following in as few words as possible.

First, I think it is clear to anyone who has given careful thought to the matter, that the temporary buildings, having now fulfilled the purpose for which they were built, should go. This good work had been commenced in the Isthmus and should proceed with as much rapidity as possible until everyone of this class of the whole group has been razed and the premises cleared and restored to their natural condition.

The same is true of the State and County building group, and I hear, with regret, that the demolition of these buildings has not yet begun. I understand that these buildings have been turned over to the government to be used as barracks for a term of years, and that one reason for this action was that it would assist the laudable purpose of keeping the troops, with their payroll, in the community. This reason for keeping the buildings in the park is wrong for it is certain that the troops will stay in San Diego and satisfactory quarters could be found for them elsewhere, and most emphatically a public city park is not an appropriate nor satisfactory place for them.

As to the temporary main buildings of the Exposition, all of them, viewed in the light of logical park improvements, should go, leaving the permanent California Quadrangle group, as was the original intention, the only, or rather, the main exception. The other exceptions are the Santa Fe Indian Village at the north end of the park and the Botanical Building (both of which are of permanent construction and for obvious reasons should be retained), the Service Building, the Organ Pavilion, the Administration Building and the two buildings flanking the California Quadrangle to the East, all of which I will touch upon.

The Santa Fe exhibit is educational and entertaining and is naturally retained as a picturesque and valuable park improvement. It is clearly of interest to the whole public.

The retention of the permanently constructed Botanical Building is necessary and the reasons obvious. It is the work room and show place of the Park Board.

The Service Building is practically necessary and is not unsightly.

The Organ Pavilion is, in the abstract, a permanent feature of the park. It's [sic] location during the Fair, as part of the Exposition group and tied in by temporary, adjoining buildings, was good enough, though not ideal. Standing alone --- I say it most respectfully --- it will be unsightly in the extreme. My personal relations with its architect are most cordial and I would be glad indeed to have him equally frank with me in similar circumstances, when I say that I consider then [sic] building is not successful, either in regard to the site or design. The front of the organ should face the South and the City. This would bring the sun to the backs of the audience and into the face of the performers. The building is too ornate and is not in harmony with the architectural character that the park should surely have. The building should be at the head of the large plaza instead of at its foot, perfecting the future architectural part of the park arrangement.

"But what of the cost?" the generous donor of this fine gift may say. This question should be met squarely, bravely, honestly and generously, and the change made.

As to the Indian Arts, the Science of Man and the Administration Building, these should be retained, not because of a desire to keep any of the temporary buildings as such, but simply as an extensive and necessary part of the California Quadrangle.

The Museum Association is the only project which should have a permanent home in the park. Its work is the only one to which the buildings of the Quadrangle are appropriate. The precedent established by the New York City Board, concerning the Metropolitan Museum Association in Central Park, should be followed. Granting this, the California Building and the Fine Arts Building are not adequate to the needs of the Association, and it is obvious that the Indian Arts and Science of Man Buildings should be used by the Association, until such time when buildings identical in site and plan can be substituted.

In the opinion of the writer an architectural framing of the larger plaza would be a logical and beautiful park improvement and should consist of the arcades or portals around it, and built into the East front of the two buildings mentioned, and also tied into the Organ Pavilion on the North.

An important bearing upon the subject of the demolition of the temporary buildings is their present and future condition. This is a matter of considerable speculation. Their two weakest points are the staff work and the foundations. The staff ornament and moldings will soon go to pieces. This is clearly seen throughout the Exposition. The foundations may last satisfactorily for, possibly, two to four years more.

To make the Indian Arts and the Science of Man Buildings satisfactory for a longer term of years it will be necessary to shore up the outside walls and to put in concrete foundations of [sic] the future permanent extension of the Quadrangle, and to remove the staff decoration, covering the void spaces with expanded metal lath and plaster. In my opinion, this would make the buildings usable for a long term of years. The present imitation roofing tile could be removed and replaced with mission tile. This work would not be wasted as it would form part of the future permanent building. The buildings could be made fireproof by taking out the present electric wiring and replacing in conduit what little wiring is found necessary. General illumination in buildings of this sort would not be a necessity. The floors could be covered with linoleum which is reasonable [sic] fireproof and sightly; in any event, the floors should be protected.

The cost of making these changes would be small and the work to be done does not present any mechanical difficulties.

The Administration Building should be retained because it is the only building with office facilities in the park. It has permanent foundations and its practical position is obviously good. The writer has always believed that architecturally it helped the permanent group from the West. Its fenestration is not good, but the windows have quite disappeared in the planting which surrounds it. Its only weak point is the staff entrance ornamentation, which is not necessary to the appearance of the building and could be removed and repaired with plain plastering at small cost.

The writer wished to reiterate with emphasis that the Science of Man Building and Indian Arts Building should be retained only because they are a necessary extension of the California Quadrangle and because their repair would be in the nature of permanent park improvement and reasonably inexpensive.

Everything else of a temporary nature should most emphatically go and this conclusion has been reached after the question has been viewed from every angle, sentimental, educational, artistic and economical.

Very faithfully yours,

(Signed) C. M. Winslow

February 20, 1917, Los Angeles Times, 6:7. Oppose wrecking of Southern Counties Building; Fire Chief Almgren, City Engineer George Cromwell, and Building Inspector J.E. Field recommend demolition of this building and the San Joaquin Building because of weak foundations and weak trusses supporting the roof.

The Southern Counties Building cost Los Angeles, San Diego and other southern counties about \$250,000 and was considered one of the most substantial structures of the exposition.

February 20, 1917, San Diego Sun, 2:5. INFORMATION: Exposition schedule.

February 20, 1917, San Diego Sun, 2:6. Fund grows fast; many favor zoo; three life members and many active members join Society.

February 21, 1917, San Diego Sun, 7:2. Park Board's claim denied.

The park board was severely rapped by the auditing committee today and a \$97 claim by it was rejected.

The claim was for payment of a Los Angeles architect for making plans for a bear den and aviary in the park.

"There's an architect in the city engineer's office who can do such work," declared Cosgrove.

"If the park board could not have used him, it could have, at least, employed a San Diego architect," said Mayor Capps.

"The principle of this claim combats the best interests of the city," stated Moody. All three voted to reject it. Fay was absent.

February 21, 1917, San Diego Union, 8:1. "Miss San Diego" (Marian Vodges) to lead children to Organ Pavilion tomorrow afternoon, Washington's birthday.

February 22, 1917, San Diego Union, 8:2. National holiday to be celebrated at Fair today; "Miss Columbia" will lead children across bridge; patriotic program arranged.

February 23, 1917, San Diego Sun, 3:3. Exposition program in commemoration of Washington's birthday to be held tomorrow.

February 23, 1917, San Diego Union, 1:7-8. City votes bonds for great Lower Otay Dam.

February 24, 1917, San Diego Sun, 4:6. Washington is honored at Fair.

February 24, 1917, San Diego Sun, 12:6. Many joining Zoo Society of San Diego; fund to buy animals for park is increasing rapidly.

February 24, 1917, San Diego Union, 5:1. First President will be honored at Fair today; observance on birthday deferred because of rain; school children will attend patriotic program in honor of George Washington.

February 25, 1917, San Diego Union, 3:2-4. Memory of George Washington honored with celebration at Exposition; Daughters of American Revolution arrange fitting program; school children participate on deferred occasion; infantry drill; organ recital.

February 25, 1917, San Diego Union, 4:4. Letter from George W. Marston about Carleton M. Winslow.

Editor, San Diego Union: It has recently been reported in the daily press that the city auditing committee has severely criticized the board of park commissioners for employing C. M. Winslow as an architect for park building. The chairman of the committee, according to reports, expressed great indignation that the park commissioners should select a Los Angeles architect to design a "bird cage," etc.

We desire to state the simple facts of the matter.

The former board of park commissioners considered Mr. Winslow as their advisor and designer for architectural work. For about four years he was Mr. Goodhue's representative in the planning of Exposition buildings and was also the superintendent of construction of the California and Fine Arts buildings. Owing to the close relationship between Exposition and park organizations, it was very natural that Mr. Winslow should be selected for distinctly park architectural service.

Mr. Winslow, with his family, lived in San Diego nearly five years and only recently removed to Los Angeles. His last work for the park --- plans for a bird house, or aviary and bear pit --- was done in 1916 while he was a resident of San Diego, his bill, therefor, was \$95, which the present park commissioners approved, although the work was ordered by a former board.

In brief, the present board has never employed any architect, the former board never employed a Los Angeles architect, the criticized bill was properly authorized and properly allowed.

George W. Marston,
President, Board of Park Commissioners

February 25, 1917, San Diego Union, 8:3. Panama Canal exhibit at the Isthmus will be open this afternoon for the special benefit of children who will be admitted free regardless of age.

February 26, 1917, San Diego Sun, 4:6-8. Just Among Ourselves, by W. H. P.

The tourists, whom we had expected in large numbers in the winter of '14-15 and '15-16, went to Florida, although, of course, many came to California to see the expositions; but the only substantial evidence we received of the big prosperity wave was the establishment of the big potash works in Chula Vista. The depression seemed rather more acute than was actually the case, because of the tremendous growth we had received in the four years preceding 1913.

Now, however, the tide has turned and is coming toward us with increased volume and velocity.

March, 1917, California Garden. Monthly Excursion, by G. R. Gorton

The Stadium and other portions of the park adjacent thereto have been the beneficiaries of considerable improvement in the way of new planting --- particularly the Stadium proper. The automobile parking station at the north gate is being planted with *Acacia longifolia*, grouped near the corners and all along the inside of the fence. *Acacia decurrens* and *Acacia cultriformis* have also been used in or near the corners, while the groups of *Acacia longifolia* have been varied with occasional *Eucalyptus globulus* or *Eucalyptus corynocalyx*, and further augmented with *Pittosporum undulatum*. The terraced slopes inside the amphitheater are clothed with *Mesembryanthemum acinaciforme*, while on the outer banks the finer leaves *Mesembryanthemum floribunda* forms an excellent cover.

The circular plot north of the Stadium is to be planted with white and pink Cherokee roses --- possibly to excite the envy of visitors from colder climes where Cherokees cannot be grown. The area south of what is known as the "Magnolia diamond" is being planted with Peppers and *Acacia Baileyana*. Over towards the west on the narrow strip of ground between the street car track and the High School, *Coprosma* forms the body of the planting --- bordered with *Veronica Imperialis* and edged with *Mesembryanthemum floribundum*, while further south the *Coprosma* gives place to *Veronica elliptica*, varied through the center with a single row of *Acacia Baileyana* spaced about twenty-five feet apart.

The unusually early frost which visited this vicinity was rather harsh in its treatment of some of the planting in the lower levels. In Cabrillo canyon, below the U. S. Marine barracks, a number of *Eucalyptus globulus* and *Eucalyptus corynocalyx* succumbed entirely and others were severely nipped, but *Eucalyptus rudis* came through scathless. *Pinus muricata* was somewhat damaged. Nearer the bridge which spans this canyon, *Acacia longifolia* were touched. *Acacia melanoxylon* and *Myoporum* were killed outright. The casualties among the *Pinus canariensis* consisted of several killed and many injured, but of the Torrey pines nearby of which there are, by the way, something like twenty acres, no injury was observed.

Adjacent to the Torrey pines planting, another twenty acres is being planted with oaks, both *Quercus Suber*, the cork oak, and the native live oak, *Quercus Agrifolia*, which in years to come should make a very impressive showing --- as a sort of heritage to posterity.

A little gulch or "canyonette" (if a coined work is pardonable), about opposite Spruce street, is to be metamorphosed into a *Rhododendron* canyon, with suitable varieties. The location would seem to be ideal -- - at least from the west boulevard or from the Cabrillo canyon below. The planting of this shady canyon in this manner will form an interesting experiment in *Rhododendron* growing in this part of the world.

Above, on the West Drive, *Spirea Reevesii* is in full bloom and looks very well indeed. Later on *Spirea Van Houttii* will be doing likewise. The outlook for the "strawberry" crop, or *Arbutus unedo*, nearby is very good, as this interesting tree is now bearing its curious and surprisingly strawberry-like fruits.

In the Golden Hill section of the park, *Ceanothus thrysiflorus* and *Ceanothus cuneatus* are displaying a wealth of blue and white bloom. These groups are forcible arguments in favor of planting more of the native shrubs.

The Exposition section of the park has not come in for its due share of attention in this month's "Notes"; but this is not because of any lack of merit, but merely because the writer is not twins. The Botanical Building is especially beautiful at this time, not only having lost nothing of its effectiveness since last month, but having gained by the addition of new material. The fern collection has been augmented by several new species of *Davallia* which promise well. *Davallia phyxidata* has not yet borne enough fronds to warrant an opinion of its qualities. *Davallia fijiensis*, as far as one is able to judge, should prove to be a valuable addition as the fronds so far in view are very delicate and lacy in appearance, both in this species and in the sub-species major. *Davallia ornata* is somewhat coarser, but attractive.

Saxicophylla spectabilis (or *Akokanthera spectabilis*) is a conspicuous feature of the conservatory, several specimens having been placed at the extreme north end of the building. This shrub, which is said, by the way, to possess toxic properties, is now bearing clusters of white flowers which contrast very pleasingly with its bronze foliage. Here and there through the conservatory *Clivias charmas*, as always with their trusses of "persimmon red" flowers.

The *Gloxinias* are just commencing to put in their very welcome appearance. There are a number of fine specimens already in place and there will be many more before long.

March, 1917, "San Diego Military Sites," by Jerome W. Hinds, 1986.

CAMP WALTER R. TALIAFERRO

A semi-permanent camp established March 1916 to shelter Regular Army troops in the Morley Field area of Balboa Park. The camp was named in honor of First Lieutenant Walter R. Taliaferro who was killed in an aviation accident in 1915. At times this camp was headquarters for the Army's Southern California Border Patrol District. It should be noted that in Florence Christman's "The Romance of Balboa Park," the author states that the Army used the 1915-16 Indian Village during World War I and that the 21st Artillery was there?

March 1, 1917, Los Angeles Times, 7:3. Pick San Diego and San Pedro; Naval Commission makes report to Congress; favors establishing academy for training; submarine base for Los Angeles harbor.

March 1, 1917, San Diego Union, 1:1-8. Bernstoff's hand seen in scheme involving joint attack on U. S.; expose German plot with Japan, Mexico.

March 1, 1917, San Diego Union, 1:7-8. Details of amazing diplomatic intrigue by Kaiser known to U. S. since February 3.

March 1, 1917, San Diego Union, 3:1-2. Declaration of war on Germany by U. S. expected in empire.

March 1, 1917, San Diego Union, 3:2. Women to hold sway at Fair grounds today; review of 21st Infantry on Plaza de Panama at 2 p.m.; program at Organ Pavilion following; reception in California Building at 4 o'clock,

March 1, 1917, San Diego Union, 10:2-3. World's noted grand opera stars urge music festival; Miss Gertrude Gilbert, member of San Diego Exposition Board, returns from New York after visit with Mme. Schumann-Heink and assures promised event in July.

March 2, 1917, San Diego Sun, 5:3-4. Clubwomen boycott spud and proud onions; Miss Alice Lee presented a plan for the municipal collection of garbage; session held yesterday at the Cristobal café on the Exposition grounds; address by Mrs. C. C. Arnold of Riverside; boycott resolution presented by Mrs. E. M. Capps.

March 2, 1917, San Diego Union, 4:2-3. George W. Marston announces platform in communication to club.

March 2, 1917, San Diego Union, 6. San Diego County Federation of Women's Clubs ban odoriferous onion and soaring spud; resolutions declaring boycott on precious commodities adopted; two staple articles of food have reached an almost prohibitive price to a large percentage of the people in the country; present price is largely attributable to speculation; boycott is the most speedy and effective means of lowering the price of these food products to a normal value.

March 2, 1917, San Diego Union, 12:4-5. General music committee hears report on festival; final decision regarding date of proposed production is postponed; plan take shape on presentation in New York, Miss Gertrude Gilbert tells local board.

March 4, 1917, San Diego Union, Classified, 1:4-5. Unique stunts planned for Hotel Guests Fair Day; old stage coach will be used as part of program next Thursday.

March 4, 1917, San Diego Union, 3:1-2. Club Women of County meet at Exposition; addresses, music are feature of program at organ; Mrs. Barnes sings.

March 5, 1917, Letter, A. S. Hill, Executive Secretary, to Dr. Edgar L. Hewett, San Diego Museum; Board of Park Commissioners Correspondence, Box 1, File, San Diego Museum, 1916-1930, San Diego Public Library.

The Board decided upon a location for an archery range south of the organ.

March 6, 1917, San Diego Union, Classified, 1:5. Exposition wins subscription suits; Orange County judge sits in cases regarding stock of 1916 Company.

March 7, 1917, San Diego Evening Tribune, 7:3-4. Tomorrow will be Hotel Guests Day at Exposition.

March 7, 1917, San Diego Sun, 9:7. Hotel Day at Exposition tomorrow.

March 7, 1917, San Diego Sun, 12:3. Pollard Company will remain in city; stock selling campaign inaugurated.

March 7, 1917, San Diego Union, 3:3. Program outlined for Hotel Guests Day at Exposition tomorrow; early days of city to be depicted at Organ Pavilion at 2 o'clock.

March 8, 1917, San Diego Evening Tribune, 2:2-4. Exposition Notes.

The exposition is arranging for an old-fashioned barbecue complimentary to the Twenty-first Infantry on Wednesday, March 14, which will be held on the tractor field, adjacent to the Twenty-first Infantry camp, at which time a program of athletic sports will be rendered to add interest to the occasion.

The Ancient Order of Hibernians are arranging a program to be given at the Organ Pavilion on St. Patrick's day, March 17, at 2:30 p.m., at which time the Rev. M. C. Keating of Del Mar will deliver the address and Wm. A. Steffin, of Los Angeles, who has won himself the title of the "John McCormick of California," will give a recital of Irish songs characteristic of the occasion, full program of which will be announced at a later date.

The children of San Diego county are invited to attend a free performance at the Panama canal on Saturday and Sunday afternoons, continuous from 1:30 to 5 p.m. The admission for adults has been placed at 10 cents.

At noon, Monday, March 12, a reception luncheon of the members of the "Thank You Special" will be held at the Cristobal café. The Spanish troubadours will make a special trip from Los Angeles to entertain the guests and, no doubt, will add much to the success of the function. This will be the last appearance of the Spanish troupe before their departure for the east where they have secured an engagement to tour the country with one of the circuits, and their many friends are cordially invited to be present on the occasion, for which the management of the Cristobal café has arranged a splendid menu.

In addition to the regular program for hotel guests day, Thursday, March 8, the Spanish troubadours, who entertained visitors so successfully during the period of 1916, will have a part in the program which, no doubt, will be greatly enjoyed by their many friends.

March 8, 1917, San Diego Evening Tribune, 3:8. Chief Iodine died at the Sawtelle Soldiers' Home early this week; he was 89 years old.

March 8, 1917, San Diego Evening Tribune, 14:4. Guest Day at Exposition unique.

March 8, 1917, San Diego Sun, 7:7-8. George W. Marston announces platform: the waterfront, factories and industries; health and sanitation..

March 8, 1917, San Diego Union, 1:7-8. Mme. Nellie Melba, famous soprano, sang at Organ Pavilion yesterday morning during informal visit as Dr. Stewart was ready to rehearse his daily program.

March 8, 1917, San Diego Union, 7:1-2. Old stage coach will dash through streets today; original vehicle used in Horton House days to make trip from Plaza to Exposition as part of Hotel Guests Day entertainment.

March 9, 1917, San Diego Evening Tribune, 3:5. Hotel Guests have big time at Exposition.

March 9, 1917, San Diego Sun, 4:4. Hotel Guests at Exposition yesterday.

March 9, 1917, San Diego Sun, 9:4. Valuable Murillo painting, once at Mission San Diego de Alcala, may leave city.

March 9, 1917, San Diego Union, 5:2-4. Hotel managers act as bellboys at Guests Day celebration held at Organ Pavilion; hundreds attend program; old stage coach used to deliver performers to hotel desk where stunts were put on before crowd; battle for grips enlivens occasion.

San Diego hotelmen and their guests has a merry frolic at the Exposition yesterday afternoon when they entertained with a program of their own making.

It was a visitor's day --- hotel guest day --- and members of the San Diego and Coronado winer [sic] colonies were out in force for a good time. The program was held at the Spreckels Organ Pavilion.

It would be hard to imagine anything funnier than James H. Holmes of the U. S. Grant Hotel, Sam Porter of the San Diego, E. A. Cole of the St. James, Ernest White of the Sandford, and William Kamps of the Maryland, as bellboys. They sat on a bench and alternately went to sleep and engaged in a battle of words and threw the dice, to the great amusement of spectators.

George W. Marston, who was a clerk in the old Horton House, which stood on the site of the U. S. Grant Hotel, was proprietor and master of ceremonies. Orrin L. Chaffin, assistant manager of the U. S. Grant Hotel, was chief clerk. For the most part the program was impromptu, and that seemed to make it all the more enjoyable.

The old stage coach, which made many a trip overland and which deposited guests at the Horton House, came rattling up to the hotel, which was on the stage of the organ. It was filled with passengers and their luggage, and the "bellboys" fought over the old-fashioned telescopes and handbags, just as was done years ago. When they reached the office, which was a duplicate of that of the Horton House, some of the old furniture being used, the guests were met by Proprietor Marston and assigned to rooms by Clerk Chaffin. There were some suspicious guests who fought for possession of their grips with the bellboys and Chaffin was forced to reprimand bellboy Holmes severely when he told a stranglehold on the valise of one of the guests, determined to make him "come through: with a thin dime. Towards the last of the performance, the "bellboys," all of whom were hotel managers, jumped fairly out of their chairs as the word "Front."

In the old days there was a potato kept on the desk of the old Horton House into which each guest speared the pen after he had registered. There was no potato on the desk yesterday. Potatoes cost too much money nowadays, explained Proprietor Marston. There was, however, a large bell, which Chaffin punched religiously, mainly to impress guests with the wonderful service they were getting, and, incidentally, to wake up the bellboys. It is not considered good form these days for bellboys to sleep, although it has been done Chaffin admitted.

The program was unique. The speakers and singers and entertainers were paged and brought up to the lobby, where they did their stunts, instead of being introduced to the audience. And when a man had talked long enough in the opinion of both Mr. Marston and the audience, the stage coach would come rolling up, the clerk would get action from the noisy end of the bell, the bellboys would scream, the passengers would chatter, and the speaker --- would stop. It was a splendid way of giving the performer "the hook," although it was not given too frequently.

R. C. Godfrey, technical director of the Pollard Picture Plays, was responsible for the splendid reproduction of the scene which depicted the lobby of the old Horton House. Godfrey was complimented highly on his work. The old stage was loaned by T. P. Getz, proprietor of Ramona's Marriage Place at Old Town.

Charles Linwood opened the program with a few stories. Raymond Baldwin, Graham McWilliams and Theron Stendal, comprising the U. S. Grant grill entertainers, gave an enjoyable number. Miss Amber Fay and Miss Margie Fay, also of the U. S. Grant Hotel, gave a pretty duet number, which brought them volumes of applause. Mr. Flanders was at the piano.

One of the hits of the afternoon was contributed by Gertrude McDonald and Beatrice Snyder of the Polhemus Hotel, who, dressed as Spanish troubadours, gave a dancing number. The children made a decided impression on those present.

Mr. and Mrs. Frederick Reyer of the Carnegie apartments gave a vocal duet which was enthusiastically received. Mr. Stickney was accompanist. Miss Joy Babcock and Miss Nellie Hartman, of the San Diego Hotel, scored a hit. Mrs. Hartman's singing was one of the high spots of the program. In fact, every number was received with great enthusiasm. Signor Picci, of Hotel del Coronado, baritone soloist, gave an enjoyable operatic number, and Jack Holland and his dancing partner, Miss Florence Gustave, gave an exhibition of ballroom dancing.

Colonel W. R. Riley, one of the passengers on the old Concord coach yesterday, was stage agent for the Northwestern Stage Company in 1870, the line running from Salt Lake City, Utah, to Portland, Oregon, 1250 miles. Mr. Riley also saw the last spike driven which connected the Union and Central Pacific Railroad Companies at Promontory, Utah, in 1869. He came to San Diego six years ago, and now resides at Thirty-Second and Myrtle Streets.

Before the program at the organ, there was a review of the Twenty-first Infantry at the Plaza de Panama, when the colors were presented by Mrs. Susan Meigs Corliss. After the organ program a reception was held in the California Building. This was under the direction of a committee of women headed by Elizabeth T. Arnold.

At the reception tea was served with a dainty lunch, and an enjoyable musical and literary program was given. Among those who took part were Miss Marian Grace Hopper, whistler; Miss Nellie Hartman, soprano; Miss Babcock, violinist; Miss Maybell Brightwell, who gave Irish songs; Miss William Casebeer, who was accompanist, and the Spanish singers and dancers who were employed at the Exposition during 1915 and 1916.

The committee in charge of the celebration consisted of E. A. Cole, chairman; Sam Porter, William A. Kamps, H. A. Frisbie and Frederick B. Wilson.

March 10, 1917, San Diego Evening Tribune, 2:1. Miss Dorothy Spinney, Greek tragedienne, to be guest at luncheon in Cristobal Wednesday.

March 11, 1917, San Diego Union, 5:2. Noted Jessop archery collection installed in San Diego Museum.

March 12, 1917, San Diego Evening Tribune, 7:4. St. Patrick's Day at Exposition to be held at Organ Pavilion Saturday afternoon.

March 14, 1917, San Diego Evening Tribune, 5:1. Colonel D. C. Collier spoke in behalf of George W. Marston for mayor at University Heights Improvement Club last night.

March 14, 1917, San Diego Union, 2:5. French exhibit to be sent home; Consul-general here to make arrangements.

March 14, 1917, San Diego Union, 3:1-2. Marston discusses campaign from personal standpoint.

March 15, 1917, San Diego Sun, 2:5. INFORMATION: Exposition Schedule.

March 15, 1917, San Diego Sun, 6:3. U. S. boys are honored at Exposition; barbecue and celebration given the men yesterday at the tractor field.

March 15, 1917, San Diego Sun, 7:3-5. George W. Marston for mayor.

March 15, 1917, San Diego Sun, 8:2. Boxers at Exposition; prior to the barbecue held at the Exposition yesterday afternoon the U. S. service men were entertained with two boxing bouts and a battle royal.

March 15, 1917, San Diego Union, 3:4-5. Marston tells of early struggle for railway.

March 15, 1917, San Diego Union, Classified, 1:4-5. Exposition gives barbecue to Uncle Sam's men in blue; two battalions of Infantry participate in feast witnessed by officials and friends; medals presented band winners; Davidson addresses soldiers; Secretary Penfold planned celebration.

March 16, 1917, San Diego Sun, 4:6-8. Marston tells union workers why he favors organization of toilers; gives his side of former dispute with labor.

March 16, 1917, San Diego Sun, 9:4. Ready for gala St. Patrick's day event at Fair; fine program arranged; Congressman to be there.

March 17, 1917, San Diego Sun, 13:3-6. Marston's work on behalf of railroad to the east deserves the gratitude of every San Diegans.

Today **The Sun** makes a categorical assertion that with the single exception of John D. Spreckels (who, by the way, is not running for mayor) George W. Marston has done more to bring about the dreams of half a century --- a direct eastern railroad --- than any other San Diegan. Without the aid of George W. Marston there would probably be no S. D. & A. railroad today!

March 17, 1917, San Diego Union, Classified, 1:4. St. Patrick's Day to be observed at Fair today; congressional party will witness review; concert and luncheon planned.

March 18, 1917, San Diego Union, 1:3-7. St. Patrick's memory honored; Members of the House Committee on Naval Affairs and their wives attend celebration; program at Exposition yesterday voted one of post-season's most successful; Father Martin C. Keating of Del Mar delivered the St. Patrick's Day oration on "The Influence of the Irish in Colonial Days"; Mrs. L. P. Padgett presented the colors at the review of the Twenty-first Infantry; well-known Irish airs played by Dr. Stewart and sung by soloists at the organ; reception given by the Women's Board at the California Building..

March 18, 1917, San Diego Union, 2:1. Bib celebration planned to close Fair season March 31; dinner and ball at Cristobal Café.

March 18, 1917, San Diego Union, 4:2-4. Exposition grounds will become nation's most beautiful civic center, by Rev. R. D. Hollington.

Do you know, Mr. San Diego, that two weeks from today, April 1, marks the opening of the most complete and beautiful municipal center in the whole United States? On that date the control of the Exposition grounds within our park passes back into the hands of the people. Do you realize that while San Diego has been "put on the map" and has become well known through the Exposition, yet the greater value of the Exposition remains?

Consider if you will what it means to have free and open access to a wonderful Spanish city of magic and beauty. Mr. Howe in his lecture on "City Building" rather astonished you, Mr. Resident Citizen, when he said that these grounds and buildings were the most beautiful combination of landscape and architecture to be found anywhere in the whole world, and yet this is what has been told you again and again, and the best is that it is not flattery, but absolutely true.

Meditate on the meaning of almost two miles of gardens on one side of our park, connected by the broad and graceful Puente Cabrillo with the stately city on the hill. Nowhere else in the world does the line of maximum winter temperature cross the line of minimum summer temperature, and this unique climatic condition has made possible the wealth of fern, palm, vine, shrub and flower impossible of cultivation anywhere else in the country. From the standpoint of agriculture, arboriculture, horticulture and flowering

plant, one may walk through the palm jungles that are reminiscent of Honolulu, into the tea gardens of Ceylon, or the fragrant oranges and hardy applies of colder climes. The model farm, the Botanical Building, and the formal gardens are in this unequaled and unrivaled.

Architecture Effects

Then crown your landscape gardening with what probably is the most complete working out on a large scale of a single type of architecture that has heretofore been attempted. The California Building is an artistic triumph. It breathes of Old Spain and Mexico, the Franciscan missions, and freezes into stone our heritage of Old World Spain.

For from five to twenty years those of the remaining buildings which are desired will remain to line the Plaza and the Prado and their construction is such that when the event is necessary, they can be molded into permanent concrete, and thus the artistic spirit be caught forever. Something, however, beyond mere artistry haunts the imagination and memory of the saunterer as the spell of this beauty steals over his senses and exults and exalts his spirit. Do you realize what it means for people with time on their hands to have directly at hand this retreat and refreshment of soul?

It probably will astonish you, Mr. Citizen, when you walk through the open gates April 1, to realize the multitude of pleasures which await the desire of the people of the city. In illustration, the great California cathedral will be the depository of the remains of the great civilizations lying in the America to the south. Three or four arms in the Quadrangle will be used for the exhibit of Chinese and Japanese art. The women's quarters will be occupied by a load exhibit and it is probable that the art gallery will contain some exhibit --- at least arrangements have been made for exhibits of the works of great artists from time to time. Remember also the museums of general culture. The old Indian Arts building is to be known as the Museum of General Culture and in it will be placed the remarkable collection of figures showing the development of the race.

To Remain Museum

The Science of Man building will remain as the Museum of Anthropology, the exhibit being somewhat extended and including a lecture hall seating about 800 people, where free lectures for the general culture of the people will be given.

The old government building at the head of the Plaza will be magically transformed into the greatest exhibit of bows and arrows and weapons of war to be found anywhere in the world. Probably this building will be ready with the opening of the grounds. Then one other great building (name deleted by censor) will be opened with one of the finest exhibits ever shown in this country.

Also, consider the Indian Village in the New Mexico building [sic], reproducing the Indian life and the mission architecture, will be pictures of all comers of the early days of California, and probably one other of the worthy exhibits on the Isthmus (name censored) will be bought by the park board and thrown open to the public.

Do you realize that when certain roof irons are put in place, the Southern Counties building, presented by the southern counties to the city of San Diego, will become the finest public hall in this section, seating 3,500 people, with the new street car service accessible both ways through the park. Here will be the great musical entertainments, lectures, conventions and other civic movements.

Unique Zoological Garden

Then, friends of San Diego, count the unique zoological gardens, the stadium with its pageants, and the park becomes a magnificent playground. Halt your imagination before the swinging arms of the organ and remember that Mr. Spreckels has not only given to the city this greatest outdoor organ in the world, but has also given the services of Mr. Stewart, recognized as the foremost organist in the country, for free recitals every afternoon during the year.

Again the Plaza with the Twenty-first Infantry band, the regulars, the marines, the Presidio, like the Spanish cities of old, with its drills, parades and reviews.

Most of all, Mr. Citizen, Balboa park belongs absolutely to the people, all the people of San Diego, and no association, organization of firm will be permitted to exist or control one building or one foot of ground in this park that is not for the benefit of all the citizens of San Diego. Building lots may seem high in this city, but every property owner in this city is also a part owner of the 1,400 acres of the "City Built by the Fair."

The old Exposition has gone and a new democracy has come to reign in the park, the most beautiful civic center and public pleasure grounds in the nation.

March 18, 1917, San Diego Union, 10:6. Melba promises free concert here; expects to give recital at Spreckels Organ Pavilion next September.

March 19, 1917, San Diego Sun, 1:2-7. Give George W. Marston the vote he deserves.

March 19, 1917, San Diego Union, 5:2-4. Exposition arranges big program for entertainment next Thursday; songs and dances by San Diego School of Expression to feature afternoon's card.

March 19, 1917, San Diego Union, 11:1. Dr. M. P. Rooseboom, assistant secretary of the permanent court of arbitration at the Hague, visits San Diego; sees Exposition.

March 19, 1917, San Diego Union, 11:2. "The San Diego Garden Fair" by Eugen Neuhaus and "The Architecture and Gardens of the San Diego Exposition" by Bertram Goodhue, books on Fair with photographic illustrations by Harold Taylor, to be given to **Union** readers at one-half the regular price; clip coupon in today's paper and obtain your copy tomorrow.

March 20, 1917, San Diego Evening Tribune, 3:4-5. Exposition Notes (condensed):

The exposition is arranging an unusually attractive program to be held at the Organ Pavilion, Thursday, March 22.

A number of pupils of the San Diego school of expression, John Lane Connor, director, and Miss Rose M. Bennett, teacher of dancing, will appear in a number of dances representative of the various schools in the United States, including the aesthetic, character, oriental and stage dancing.

Miss Grace Grubb, of Los Angeles, a protégé of Ellen Beach Yaw, will sing a number of songs, including Waltz Song from "Romeo and Juliet"; Nightingale's Song (Nevin); Matinata (Tosti); Swallows (Cowen), California (Ellen Beach Yaw).

The afternoon's entertainment will commence with a drill by the Twenty-first Infantry at 2 o'clock after which the program will be rendered.

Dances by the pupils of Miss Rose M. Bennett: "Pierrot"; "Minuet Antique"; "Carnival Night"; "Greek"; "Gypsy Mazurka"; "Gavotte"; "Hindu Afternoon".

At 4 p.m. a reception will be held in the women's headquarters in the California Building.

The dinner and dance at the Cristobal café on the closing night, Saturday, March 31, is not intended to be exclusive, but inasmuch as we must of necessity limit the number of guests to 400 in order to leave ample space for dancing, those wishing to be accommodated should make reservations early.

The exposition has had many telephone calls asking the price of reserved seats for the Thursday afternoon program, and the officials beg to announce that there will be no extra charge for the program to be rendered at the Organ Pavilion on Thursday afternoon next.

March 20, 1917, San Diego Sun, 1:7. Two paintings by M. Guignon of Egyptian subjects in the hallway between the French building and the Women's Headquarters at Exposition stolen; owner offers reward for their return.

March 20, 1917, San Diego Sun, 3:5. Miss Gertrude Gilbert planning municipal concerts at the outdoor organ in Balboa Park after the close on the exposition on March 31; Cecil Fanning, baritone, and H. B. Turpin, pianist, engaged for concert Easter Sunday afternoon, April 8..

March 20, 1917, San Diego Union, Classified, 1:6. Princess Tsianina Redfeather, noted Indian singer, and Charles Wakefield Cadman, pianist and composer, will give concert at Spreckels organ, Saturday afternoon, March 31.

March 20, 1917, San Diego Union, 14:3. Mrs. W. H. Porterfield to sing at Organ Pavilion today.

March 21, 1917, San Diego Union, 1:8. L. J. Wilde leads Marston in mayor's race in primary election yesterday; D. C. Collier made ticket for Council.

March 22, 1917, San Diego Sun, 1:4-5. D. C. Collier charges L. J. Wilde loses sight of civic duty to vent "spleen."

March 22, 1917, San Diego Sun, 5:4. Dancing festival at Exposition by pupils of the San Diego School of Expression, March 22.

March 22, 1917, San Diego Sun, 9:7. Exposition Notes: Hundreds of varieties of ferns, palms and other tropical growths to be seen in Botanical Building.

March 22, 1917, San Diego Union, 10:4. Baritone Raphael Pizzi to sing at organ recital Sunday afternoon.

March 22, 1917, San Diego Union, 12:2-5. Children to be on program at Organ Pavilion this afternoon; dancing will feature entertainment.

March 23, 1917, San Diego Evening Tribune, 14:5. Celebration to close Fair March 31.

March 23, 1917, San Diego Union, 5:1. Women organize committee for George W. Marston; start with enrollment of 100; former Mayor O'Neill predicts Marston's election.

March 23, 1917, San Diego Union, 8:1. Smile to stay, L. J. Wilde's replay to D. C. Collier; mayoralty candidate says he has nothing else to say to attack in letter.

The local political campaign was enlivened a little yesterday when D. C. Collier, who was nominated at Tuesday's primary for the City Council, leading the ticket, gave out a letter to all the local newspapers, attacking Louis J. Wilde, candidate for mayor. In this letter, Collier accused Wilde of having tried to defeat him. **The Union** last night asked Wilde if he had any reply to make. He said:

"Not a word. When I entered the campaign, I put on a smile, and it won't come off. We are dealing in the interests of a live-and-let-live campaign for a prosperous San Diego, through the independent voter and have no time for mud-slinging or personalities.

"If any of our opponents are at a loss for campaign stuff of a clean nature, they may resort to any methods they choose against the best interests of the city, and start the campaign with discord, but we shall continue to conduct a dignified, gentlemanly campaign to the very end."

Collier's letter, addressed to the Editor of **The Union**, follows:

I am greatly pleased with the vote I received at the polls on Tuesday. As all of my friends know I have never sought the office of councilman, nor am I seeking it now.

If I am elected, I will give the best that is in me to the service of San Diego, and I would certainly be devoid of appreciation if I were not gratified with the unsolicited compliment contained in Tuesday's vote.

It is an additional source of gratification that I should have received such a vote, notwithstanding the vicious fight made upon me by Louis J. Wilde and some of his supporters.

From entirely reliable sources I learned that during the primary campaign, Louis J. Wilde stated that if he was elected mayor, he would refuse to serve if I was elected to the Council. He also stated that he would spend more of this effort, time and money, to defeating me than in securing his own election.

In the past I had believed that Mr. Wilde would, if elected, endeavor to control his passions and unreasonable prejudices sufficiently to make a passable mayor. I see now I was mistaken.

In addition to the above he has made other statements and caused them to be circulated by his paid workers that are so manifestly untrue that they could only emanate from the type of man who lacks balance and lose sight of every civic duty and obligation to vent his spleen.

I have five distinct pledges to make to the voters of San Diego:

First - I will not spend one cent in aid of my election.

Second - I will not ask one single voter to cast a vote for me.

Third - I will not leave town if I am defeated.

Fourth - I will not offer my property for sale at half price.

Fifth - Whether elected or defeated, I pledge my best ability to the service of San Diego, the city I love.

D. C. COLLIER.

March 23, 1917, San Diego Union, Classified, 1:3. San Diego asks War Department for training camp.

The executive committee of the local officers' reserve corps was besieged with applications all day yesterday from the time petitions were circulated among the business and professional men of the city, requesting the commanding general of the western department at San Francisco to authorize the establishment on the Exposition grounds or elsewhere in San Diego of a local "Plattsburg" camp for the training of applicants for military service.

Prominent club men, business men of experience and professional men have not only petitioned the war department for the establishment of such a camp as contemplated, but are filing their applications to be designated for service whenever the government needs them.

Among the prominent men who have applied for the establishment of this camp at San Diego are:

U. S. Grant, Jr., F. J. Belcher, Jr., H. H. Jones, George W. Marston, J. W. Forward, Jr., D. F. Garrettson, Simon Levi, R. L. Gunnis, Wheeler J. Bailey, Richard Jessop, H. H. Peters, Jr., M. Hall, Louis J. Wilde, Charles W. Hiller, C. S. Marston, Gordon Decker, E. O. Hodge, G. Aubrey Davidson, C. L. Williams, T. C. Hammond, J. H. Zitt, Henry H. Sprague, Leroy A. Wright, Fred Jewell, Frank A. Salmons, E. I. McClintock, Duncan McKinnon, G. W. Barney, L. T. Chamberlain, L. M. Schiller, Charles F. O'Neill, H. B. Bard, C. H. Bartholomew, E. F. Drake, George H. White, H. W. Sumption, F. A. Bennett, R. D. Spicer, J. M. Perry, H. S. Clark, Harold Anglers, M. B. Fowler, W. P. Cary, F. M. Billings.

As stated in yesterday's **Union**, copies of the petition can be signed today and Saturday morning only at the following places:

Cuyamaca Club, University Club, Cabrillo Club, Yacht Club, San Diego Rowing Club, Bank of Commerce and Trust Company, San Diego Savings Bank, H. H. Sprague, 1032 Fourth Street, and at the offices of Jefferson Davis, Central Mortgage building.

It is urged that all public-spirited citizens who desire to have a part in this application sign the petition at one or the other of the above named places in order to complete the petition and file it not later than Saturday.

March 25, 1917, Los Angeles Times, V, 16:4. After the Fair; many important buildings and attractions to remain as permanent features of Balboa Park, Infantry and Marines encamped.

A lively touch to park activities is given by the camp of the Twenty-first Infantry, U. S. A., occupying 35 acres at the north end of the grounds, and by the 80 acre camp of the U. S. Marine Corps at the southern end of the park.

March 25, 1917, San Diego Union, 4:4-5. Marston promises citizens business-like administration; women declare candidate is friend of laboring classes and tell why; various meeting held; committees named; other statements.

Pledging himself to give the city a good business-like, common sense administration of municipal affairs if elected mayor, George W. Marston addressed an enthusiastic meeting last night at the Women's Marston Campaign Club headquarters, 5th and B street.

"I will be true to the interests of all the people," he said.

Marston was lauded as the true friend of the laboring classes by Mrs. Elsie Webster and Mrs. C. W. McKee, who also spoke. Mrs. Jesse Shreve, president of the women's committee presided.

"I have enjoyed speaking at labor union meetings the last few days," Marston said in opening his address. "Some one has said that San Diego needs a mayor who will put ginger into the city government, I think it is necessary to put common sense into it. All I really contend is that I can put into the office of the mayor as the ability I have put into my private business and the city offices I have held in the past.

"As park commissioner my attention was given to a more beautiful city. I feel the development of the city's beauty and civic welfare can go along with the industrial development. San Diego is a favored city for location. Commerce is as sure to come to the shores of the bay as we are of building the transcontinental railroad.

"I believe a mayor should aim for the welfare of the whole people. A mayor's work is to execute, carry out and see that the city's business is carried on rightly.

Urges Public Aid

"I believe a great deal in the power of the people in the city's business. It seems to me there is not enough connection between the city hall officials and the people. I believe I can bring harmony in city hall. I would try to get peace even if I had to fight for it. My purpose would be to build a harmonious and efficient system of government. I believe a mayor can do a great deal to bring about cooperation."

Marston also said that he felt no discouragement over the primary result as his friends had been stimulated to even greater efforts to put him in the mayoralty chair and are now waging a vigorous campaign for him. He also spoke of his experience as a councilman in the boom days of 1887 and 1888. He said that

one-half of the last thirty years he had occupied city offices for the welfare of the people without remuneration.

Mrs. McKee said, "We hear a great deal about smokestacks but that does not pour smoke over the city. Anybody can promise, but there must be something behind the promise. "Prove what you can do by what you have done," is a good motto to follow. Marston will always be for San Diego and will not run away if things do not go to suit him."

March 25, 1917, San Diego Union, 4:4-5. Letter from A. C. James.

Editor, **San Diego Union:** To the smug, well-fixed man, living on income from investments in the industrial centers of the east, and living, mind you, in snug, steam-heated, well-furnished homes or apartments, it does not matter who is mayor of San Diego, or whether we have any mayor at all. This man's investments are in manufacturing plants in Pennsylvania, Ohio, New York or Indiana and these plants all have smokestacks --- so he can wave aside all efforts to industrialize our local assets and say, "All I care for is beauty of outlook, landscape of flowers, rapture of mountains, bay and skyline; my income comes in just the same with San Diego as it is, so I am for George W. Marston for mayor."

But we are not engaged in this election for the purpose of making mayors for this man, or his kind of man. We are making a mayor for the citizens of this city whose income is created right here in San Diego and whose income does not come in "just the same," whether San Diego remains as it is or not. You see, it is a vastly different income from that of clipping coupons. It (wages) depends on employment, in commercial activity, and so wages and salary come at last to smokestacks.

No smokestacks, no wages, or low wages. Plenty of smokestacks, higher wages and steady all the year jobs.

The biggest thing in Wilde's platform is "smokestacks" and plenty of them, with plenty of jobs at good wages.

The biggest thing in Marston's platform is esplanades, flowers and parks.

The least thing in Wilde's platform is esplanades, flowers and parks.

The least thing in Marston's platform is industrial development for our city.

Mr. Voter, take your choice.

March 26, 1917, San Diego Sun, 1:5-6. Louis J. Wilde, promoter.

March 27, 1917, San Diego Evening Tribune, 4:1. EDITORIAL: Mr. Marston's Candidacy.

Mr. Marston is a business man with ideals. He has frequently informed his fellow citizens of San Diego concerning his ideas of civic improvement and the conservation of civic resources. There is no doubt that he would apply business principles to the conduct of public affairs. His idea is a better, greater and more beautiful San Diego; and even those who oppose his candidacy will not deny his ability to conduct the mayoralty as a strictly business proposition, in the community interest; nor will they deny the practicality and the beneficial purposes of his ideals.

March 31, 1917, San Diego Union, 4:2. Exposition will close tonight; post-season to be danced into history.

The closing hours of San Diego's Exposition, the longest exposition the world has known, will be danced into history tonight. Joyful waltzes, one-steps and fox trots will be its requiem, and laughing, whirling dancers its mourners. It will end as it has lived --- a place of pleasure and beauty.

While officially tonight's acts will constitute the closing of the post-Exposition period only, the formal Exposition closing having taken place with a blaze and a bang on the night of January 1, 1917, in reality it will be the final curtain. Within a few days thereafter the actual work of wrecking such buildings as are to be removed will be started, and the grounds and permanent buildings will be turned over to the park commission henceforth to remain as a park and a beauty spot for San Diegans and their visitors and a home for its music and fine arts.

The day's program will begin at 11 o'clock when the Spanish dancers will give an entertainment on the Plaza de Panama. A special luncheon will be served at the Cristobal at noon, and in the afternoon the Isthmus attractions will be open. At 4 o'clock there will be a reception at the headquarters of the women's board in the California Building, and a dinner and dance at the Cristobal will follow, beginning at 6 o'clock. Finally, an open-air dance on the Plaza de Panama, the last to be held under Exposition auspices, will begin at 7 o'clock and last until 9:30 o'clock, Music for the dance will be furnished by the band of the Twenty-first Infantry, U. S. A., which will be stationed on the portico of the U. S. Government building. The beautiful California tower will be lighted and there will be general illumination throughout the grounds.

Organ Recital

The feature of the day's program will be the concert at the Spreckels organ, beginning at 3 o'clock, by Charles Wakefield Cadman, the well-known pianist and composer, and his protégé, Princess Tsianina Redfeather, in a recital of Indian songs. At the request of Dr. Humphrey J. Stewart, official organist, Cadman, who also is an accomplished organist, will play the big instrument. Two of his numbers will be his own compositions, "Melody in Folk Song Style" and "March In."

Announcement is made by the management of the Salt Lake-Union Pacific Building that it will be open from 2 to 4 o'clock and that punch will be served to visitors.

There is more than a mere musical and concert interest in the concert by Tsianina and Cadman today. Cadman and the Indian singer are the greatest exponents of Indian folklore in America.

The regular music talk will not be given today on account of the open-air condition, but for this occasion the very cream of the song, piano and organ numbers will be given. In this way the people of San Diego may hear a straight concert of harmonized and idealized Indian songs, visualized beautifully by Tsianina in her attractive costume and graceful acting.

(The program of songs, organ and piano pieces follows.)

March 31, 1917, San Diego Union, 4:2-5. San Diego Museum will open Sunday; dream of Exposition builders soon to be realized.

Impressive and appropriate exercises will be held at the Exposition Sunday when the buildings, transformed into a beautiful and permanent fine arts gallery and museum for the people, will be thrown open to all free of charge.

Tomorrow marks the opening day of the real purpose for which the Exposition was erected --- the opening of a beautiful permanent park and museum free to all the people, the dream of the earliest builders of the Exposition. A great crowd of visitors is expected.

The exercises will begin at 2:30 with a sacred concert at the Spreckels organ with Dr. Stewart presiding. Following there will be speeches by several prominent citizens who have been connected with the work of the city, Exposition, park and museum. G. A. Davidson, president of the museum board and president of the Exposition last year, will preside.

Beginning Sunday, the museum grounds and buildings will be open to the public each day from 10 a.m. to 5 p.m. Dr. Edgar L. Hewett will be in charge as director of the museum.

Three Buildings Open

Three buildings, which have been arranged for the fine arts and museum collections, will be open Sunday. These are the Fine Arts building, which has four galleries, the Science of Man and the Archery buildings. Dr. Hewett said yesterday the archery collection is the greatest in the world and the famous archery exhibit in the British Museum cannot compare with it. The archery collection will be seen here for the first time. All three buildings have been closed since the 1916 Exposition closed January 1.

The Indian Arts building has not yet been repaired, but arrangements have been made to open it later. This building became well known in 1915. The California Building will be thrown open in about a month after it has been vacated by the French exhibits. It will be devoted to museum purposes mainly and will have the sculptures of the ancient world. The elaborate exhibits of 1915 will be increased by others now being gathered, Dr. Hewett said.

In the first room on the ground floor of the Fine Arts building is an exhibition of the drawings and sketches of the proposed exposition buildings of the past. Many pictures have been hung about the room. In

the east gallery is a great collection of English water colors, including an exhibit of seventy-two paintings by noted English artists. Among these artists are Harold Knight, Laura Knight, Eleanor Hughes, R. M. Hughes, Gertrude Harvey, Harold Harvey, Charles W. Simpson and S. J. Lamonia Birch.

Another gallery is devoted to an extensive Oriental collection. This includes the Tilden collection loaned by Mrs. Tilden, a former resident of San Diego, and a Japanese exhibit occupying three rooms. The Japanese pictures are loaned to the museum by Miss Alice Klauber and Dr. R. D. Hollington.

The galleries on the second floor of the Fine Arts building, which have been the women's headquarters of the Exposition, have a fine collection of the paintings of Donald Beauregard. Many of these paintings never have been shown in San Diego before. Those exhibited in 1915 are also on exhibit so the people may have a final opportunity to view this great collection. In May it will be sent to the Memorial art gallery in Santa Fe, New Mexico, which was built for it.

Beauregard won fame as an artist and died May 2, 1914, before he was thirty years old at the home of his parents near Fillmore, Utah, while he was in the midst of work for the Exposition.

The Science of Man building, which has been open, is unique and contains material gathered from all parts of the world. Such subjects as models of the ancient cliff dwellers of the southwestern part of the United States are on display. One room is devoted to all the industries of man from savagery down to the present day. The whole history of the human race, showing the evolution of man, is shown by models, life-size groups, charts and maps. Of special interest is the collection of trephining of skulls.

Archery hall, which is the building at the north end of the plaza originally known as the Sacramento Valley building and used last year for the government exhibits, contains an entirely new exhibit. It is devoted to a great collection of primitive weapons of all kinds collected from all parts of the world during the last twenty-five years. It has been loaned to the museum by Joseph Jessop.

Pictures of the people and maps of the country whose weapons are shown make the exhibit the most complete in the world, Dr. Hewett says. Among the countries and states represented are: Australia, Guinea, Java, Borneo, Philippine Islands, Japan, China, Mongolia, Tibet, Korea, Siberia, Alaska, British Columbia, California, Mexico, Brazil, Patagonia, South Sea Islands, Fiji Islands, Africa, Congo, India, Ceylon, Andaman Islands, England, France, Belgium and Poland. Weapons used by the Indians in San Diego in the early days are shown.

Dr. Hewett says the exhibit of archery in England, the Robin Hood county, is of special interest. The entire display has been installed in the cases of the Southern California Counties exhibit.

"Tremendous benefits will come to the people by the opening of this great free museum," Dr. Hewett said yesterday.

April 1, 1917, San Diego Union, 1:4. Exposition now free to public, Park Board announces that gates are thrown open today.

The Board of Park Commissioners sent the following letter to **The Union** last evening:

Editor: Will you kindly notify the public tomorrow (Sunday) through your paper that the board of park commissioners will throw open the gates of the Exposition free, April 1. Gates will be open from 9 a.m. to 5 p.m.

The park board is anxious to see the citizens and visitors to San Diego get the largest possible benefit out of the Exposition grounds, but desire to call attention to all who visit the grounds that the park board is unable, on account of the expense, to provide adequate guards to protect the flowers, shrubs, lawns and buildings, and that they will trust to the loyalty of the citizens and courtesy of the visitors to remember that the property belongs to the public, and in order to maintain the present high state of efficiency it will be necessary for all to use the same precaution in caring for the park property that they would for their own.

The organ recitals will continue daily from 2:30 to 3:30 p.m., with Dr. H. J. Stewart as organist.

The Twenty-first Infantry will continue to give parades on the plaza at 2 o'clock p.m. on Tuesdays and Thursdays of each week, with field drills on the aviation field daily, except Saturday and Sunday, from 9 o'clock a.m. to noon, and band concerts at the U. S. Government building at the plaza, Wednesday, Friday and Sunday at 2:30 o'clock p.m.

Very respectfully yours,

George W. Marston, President
Thomas O'Hallaran, Secretary
Arthur Cosgrove

By J. B. Pendleton, Executive Secretary

April 1, 1917, San Diego Union, 1:4. The 21st Infantry will continue to give parades on the Plaza at 2 p.m. on Tuesdays and Thursdays of each week, field drills at aviation field daily, except Saturday and Sunday, from 9 a.m. to noon, and band concerts at U. S. Government Building on Plaza, Friday and Sunday at 2:20 p.m.

April 1, 1917, San Diego Union, 7:3. Thousands close Exposition.

With an undertone of regret and sadness running through the gaities of the day, the final curtain was rung down last night on the Panama-California International Exposition, after two and a quarter years of existence, constituting by far the longest run of an exposition of any kind.

When the fun was at its height last night in the Cristobal café, the orchestra struck up "America." Then followed one of the most patriotic demonstrations ever witnessed at the Exposition. The merrymakers

and dancers helped themselves to the flags and bunting used for decorations and waved them in time with the music. Then the crowd joined in singing "The Star Spangled Banner," and they sang it with great fervor.

The exercises began with an entertainment of the Plaza de Panama by the Spanish dancers, who have proved a popular attraction at the Exposition for many months. This was followed by a special luncheon at the Cristobal café during the noon hour.

The afternoon's entertainment was reminiscent of the days of the "Original Americans," the program at the Spreckels Organ Pavilion consisting almost exclusively of Indian music by Charles Wakefield Cadman, who played most of the accompaniments for Princess Tsianina Redfeather, who sang the plaintive or merry or amusing words in tones and manner suitable to the moods of the songs. She was easy, natural and graceful in her gestures and posturing, and her tones were soft and liquid, as was to be expected of a daughter of the forest. She appeared in a becoming Indian costume of light brown.

Plaza Crowded

In addition to the vocal numbers, Cadman played a number of his Indian compositions on piano and organ. The plaza in front of the organ was crowded with a sympathetic and appreciative audience which generously applauded the Indian maiden who feelingly interpreted the songs of her race, and also the composer who accompanied her singing.

A reception to composer and singer was held in the Women's headquarters in the California Building, and the rooms were crowded with men and women who came to express appreciation of the pleasure afforded them earlier in the afternoon.

Mrs. William Crane and Mrs. Marcus Miller presided at the tea tables, and they were assisted by Mrs. E. T. Lannon, and the Misses Townsend. The room was decorated with Indian daisies and nasturtiums, which harmonized with the color scheme of the permanent decoration of the room.

An interesting feature of the day was the presentation of the colors by the princess at the battalion parade of the Twenty-first Infantry. She was attended by Mr. Cadman and two children dressed in Indian costumes.

A review of children dressed in the habiliments of the red man followed, and prizes were awarded to Richard Wolf, Crystal Swanson, Virginia Wennrich and Ernest Pewald for costumes approaching closest to the Indian types.

Especial credit was given Secretary H. P. Penfold for the success of the day's entertainment as he had devoted much time and effort in planning and arranging for the final exercises.

The Salt Lake Route-Union Pacific building, which has been the rendezvous of thousands of Exposition visitors, was the scene of a farewell reception from 2 to 4 o'clock, at which T. M. McCarty, contracting freight and passenger agent for the two lines, was host.

The final act of the day was the dinner at the Cristobal café, following by dancing on the Plaza de Panama, both of which functions were attended by large crowds.

April 2, 1917, San Diego Daily Transcript, 4:1. Exposition grounds thrown open to public yesterday; park commissioners have decided to allow autoists to drive through grounds without restrictions

Cecil Fanning, noted baritone, will sing at Exposition organ on Easter Sunday and will be accompanied by H. B. Turpin.

April 2, 1917, San Diego Evening Tribune, 2:5 Exposition is City Park now; appearance to be practically unchanged for some time to come, it is stated.

San Diego's exposition is San Diego's park today, and no doubt will continue to lend the city fame as it has throughout the 27 months of operation as an exposition.

Control passed from the exposition company to the city yesterday, amounting a little more than a legal technicality, and as a part of Balboa Park, under supervision of the city park commission, it will continue permanently in appearance the same except for razing of a few more temporary buildings and with exhibits that will continue to draw wide interest.

As a beauty spot for the recreation of the people of San Diego and their visitors it will continue as one of, if not the finest in America. And it will be free of admission to all. Automobiles, so long as the privilege is not abused or lives endangered, will be allowed to drive through the beautiful surroundings.

Simple ceremonies marked the transfer of control yesterday, members of the park commission, George W. Marston, Arthur Cosgrove and Thomas O'Hallaran assumed jurisdiction over the exposition grounds and buildings in exercises at the Organ Pavilion which will continue hereafter, as during the exposition, the scene of notable musical events and an admirable setting for open-air meetings.

Permanent exhibits now ready in the museum, fine arts and archery buildings were viewed by many yesterday, and are the nucleus of an important educational feature of the permanent park.

April 2, 1917, San Diego Evening Tribune, 4:1. EDITORIAL: The Marston Method.

April 2, 1917, San Diego Evening Tribune, 8:1-4. D. C. Reed tells why he is for Wilde.

April 2, 1917, San Diego Sun, 16:4. Exposition thrown open; free to everyone; gala events mark closing of great Fair.

April 2, 1917, San Diego Union, 1:5, 4:6. Citizens take over Exposition site.

Yesterday was a red letter day for the people of San Diego.

It was the day whose dawning brought into concrete being the beautiful abstract dream which for more than six years has been dreamed by the far-seeing citizens who have had the welfare and enjoyment of the people --- and all the people --- of San Diego at heart.

It was the day when all the citizens of San Diego, rich and poor, young and old, entered into their own, taking possession of their beautiful park, their stately buildings, their magnificent organ, their museum and art galleries, their drives and walks, lined with flowers and shrubs --- all theirs to enjoy to the full without money and without price.

No pomp or pageantry featured the day. The exercises which characterized the throwing open of the people's playground to them were simple and unpretentious. Instead of the blaze of bands and the waving of banners, there was the proud but quiet rejoicing of the people in their own; the laughter of children playing on the green lawns; the parade that wound across Puente Cabrillo was not the usual ordered, rhythmic procession, but the sauntering holiday procession of happy San Diegans.

After the daily organ recital, addresses were delivered by a number of men who have been prominent in Exposition and park affairs. Representing the mayors of San Diego since the exposition plan was first conceived was Grant Conard; for the park were the three present park commissioners, George W. Marston, Arthur Cosgrove and Thomas O'Hallaran; and D. C. Collier and Professor Edgar L. Hewett represented the Exposition.

Early History

Conard told of the scenes and ceremonies in connection with the groundbreaking for the Exposition; Marston, O'Hallaran and Cosgrove spoke of the efforts of the park board and of the Exposition to build

permanently for the benefit of the people of San Diego and of the future plans for the park. It was declared that San Francisco had spent \$15,000,000 on her Exposition and now had nothing to show for it but the Palace of Fine Arts which, however well it fitted into the architecture of the Exposition, now stands in incongruous surroundings. San Diego expended \$3,000,000 on her Fair, and her people now possess a beauty worth twice that amount in the gorgeous hills and canyons, the beautiful buildings and organ, and in the museum and art galleries --- a gem of the architect's and the landscape gardener's art.

Collier told of the dreams of the Exposition founders that at its close there should remain to the citizens of San Diego a beauty spot wherein could be housed all those things that make for the upbuilding of the artistic nature of a people, while Professor Hewett described the museum, the art galleries, and the scientific and Indian collections which are to form the nucleus of a great archaeological, historical, scientific and educational institution.

Several thousand people listened to the addresses and gave the speakers much applause.

Yesterday's crowd was one of the largest that has gathered within the confines of the Exposition since its opening. From as early as 9 o'clock in the morning there was a constant procession of automobiles crossing the Cabrillo bridge, while the street cars running to the park were crowded all day long. No restriction was placed upon automobile traffic, and the park commissioners announced that as long as automobiles do not abuse their privileges or endanger pedestrians they will be welcome. In the crowd were seen several families who had not been inside the Exposition grounds until yesterday. There were no guards to drive them off the lawns, no gate men to exact admission fees from them, and they enjoyed themselves to the utmost.

Exhibits Attract

While the archery collection, the art galleries and the Canadian exhibit drew large crowds of people, the greater part of the throng preferred to explore the beautiful little side paths and byways which heretofore had escaped them, apparently being of the opinion that the day was too fine and the scenery too beautiful to permit waiting even a few minutes indoors. The children found a never-ending source of amusement in the pigeons on the Plaza de Panama while their elders listened to the concert by the Twenty-first Infantry band or attended the organ recital.

And, as the sun was sinking into the blue Pacific, the crowds slowly wended their way home, each citizen with the proud feeling that what he had enjoyed was his own from now henceforth.

Telegrams of congratulation on the successful closing of the Exposition were received by President G. A. Davidson from John S. Mitchell of Los Angeles, one of the directors of the Exposition; Minister of Commerce Tirman of France, and Etienne Clementel, former French minister of commerce and agriculture.

April 3, 1917, San Diego Union, 1:7-8 (whole page). ADVERTISEMENT FOR L. J. WILDE FOR MAYOR

(Excerpt)

The following clipping from the **San Diego Union** of December 29, 1916 quoted the following from the speech made by George W. Marston at the dedication of the Spreckels pipe organ at the exposition:

"I consider the giving of this instrument greater than building railroads or steamships. We who are in San Diego can live without means of transportation, for we never intend leaving here anyway, but we cannot live without music."

Mayor Capps, Ex-Mayor Wadham and U. S. Grant, Jr. endorse Wilde for mayor.

April 4, 1917, San Diego Evening Tribune, 4:1. EDITORIAL: The Lesson of the Election.

Animosities were conspicuously absent from the local election just ended in this city. Mr. Wilde was elected mayor by personal preference of the voters rather than by dislike or distrust of his opponent. His "smokestack" slogan was a happy thought and it caught the humor of the populace.

April 4, 1917, San Diego Sun, 1:6-7. To Mayor Louis J. Wilde.

Mr. Wilde was elected mayor of San Diego on a categorical promise of himself and his managers to bring "smokestacks," by which they mean factories, producing industries, to the city of San Diego. By their verdict the people of San Diego have definitely and clearly taken Mr. Wilde at his own appraisal. He says he can bring these factories to San Diego. We do not know whether he can or not.

But we do know this. He cannot bring them if we hang back and refuse to help.

THE SUN HAS ALWAYS BEEN FOR FACTORIES, NOW LET'S BRING THEM ON!

(April 19, 1926, San Diego Union, 1:8. Louis J. Wilder, former San Diego mayor, succumbs following operation; wartime civic leader was outstanding character in city's history; political career spectacular here.)

April 4, 1917, San Diego Union, 1:1-2. L. J. Wilde is elected mayor by 3,700; received 12,918; Marston received 9,167; D. C. Collier lost for Council with vote of 7, 149.

Collier, who led in the race for the Council at the primaries, failed of election and ran near the bottom of the ticket. Collier was a leader in the Marston campaign and made a personal fight with Wilde. He said in his speeches he would willingly accept defeat if Marston could be elected.

April 5, 1917, San Diego Daily Transcript, 4:1. Botanical Building at Exposition closed today; Easter display of flowers is being arranged.

April 5, 1917, San Diego Evening Tribune, 7:5. Dr. Stewart plays Easter Sunday afternoon in the park; Cecil Fanning, baritone, assisted by H. B. Turpin, accompanist, to sing; seats on sale at an admission fee of 25 cents; concert appearance arranged by Miss. Gertrude Gilbert.

April 6, 1917, San Diego Evening Tribune, 1:1-2. President Wilson proclaims war.

April 6, 1917, San Diego Herald, 2:1. EDITORIAL: What the Election Means

The election on Tuesday was a miniature revolution, a pocket edition of that which occurred in Russia a few weeks ago. The people of Russia overthrew the Romanoff dynasty, which had, for over three hundred years, made serfs of the Russian people. The voters of San Diego overthrew the invisible government which as bamboozled the people for a generation or more.

The people of San Diego for a long time have been chafing under the yoke and hoping for relief. They were ready for rebellion and waited only for a leader. In Louis J. Wilde they found a general who carried the hosts to speedy victory and the city is now rejoicing because the people expressed their will at the polls despite the threat, influence and pressure of their former tyrants which [sic] are now dethroned.

Under the new order of things and the leadership of Mayor Wilde, San Diego will take her rightful place as the industrial metropolis of the Southwest.

The friends of both Marston and Wilde were claiming for their respective candidates a record of achievements, and it is a record that neither needs to be ashamed of.

Mr. Marston's public record shows that he has been president of the Chamber of Commerce, member of the county charter committee, member of the park board and other city commissions for fifteen years. Mr. Wilde's public record shows that he has been president of the Cabrillo Club, member of the charter committee for the city of San Diego, and member of the playground commission for the city of San Diego.

Mr. Marston has built two residences in San Diego, two mercantile houses (one of them being the best store in the city), did much toward beautifying the park, and was largely instrumental for the building of the Y. M. C. A. Mr. Marston was also a leading spirit in the effort to induce capitalists to build a road to Yuma.

Louis J. Wilde built the Pickwick Theater, American National Bank building, the U. S. National Bank building, the Frances apartments, huge fireproof warehouse at Arctic and B, and the Plaza fountain. Mr. Wilde also raised the first fifty thousand dollars for the Washington school, when the bankers and city officials declared that because of hard times it would be impossible to finance the building.

Mr. Wilde also originated the idea of building the U. S. Grant Hotel on the site of the old Horton House, and, when the task of raising the money for its completion was too great for those in charge, Mr. Wilde was called in to complete the work which the others had abandoned. Mr. Wilde also organized the Home Telephone company. Besides these achievements, he negotiated the sale of the old Methodist church so that a more modern edifice could be built. Mr. Wilde also founded the Citizens Saving Bank, the American National Bank, and the U. S. National Bank.

Both candidates have an enviable record, but in the fourteen years since Mr. Wilde came to San Diego he has accomplished more than did Mr. Marston during his forty-seven years' residence. Mr. Marston is getting along in years, while Mr. Wilde is still in his prime. It was up to the people to decide on the merits of these two good men, and they decided in favor of Mr. Wilde by a tremendous majority.

The people are more interested in the future than in the past. Mr. Marston has a record for achievement, but Wilde has a record of greater achievement, besides he has the energy of youth and the will to perform greater things, which is what the people require, and they so expressed themselves.

The election of Louis J. Wilde is a victory of the "little" fellow over the "big" one. The big bankers, the big business representatives and the big dailies went to defeat, while the common people and the weekly papers went to victory.

April 6, 1917, San Diego Herald, 1:1-2. Just how it happened Wilde is mayor; everybody except Marston and his managers knew Wilde would be; "El Toro" did good work.

(Excerpts)

The second contributing cause was a candidate for council --- a candidate who feared the consequences of his own inane life, and who hoped to ride into favor by discrediting a man whose life could carry a dozen Colliers and yet not feel the load. His first attempt to make Mr. Wilde discredit himself aroused resentment no because of the innate vileness of the attempt itself, but rather because of the abject puerility of mind which the writer displayed.

And if Mr. Marston has lost the mayoralty, he has at least gained this --- a knowledge of those who called themselves his friends which only the campaign like the last could have brought him. Mr. Marston might have been a good man for the place, but Wilde is a better one. And, even if Mr. Marston were fitted for the mayor in no degree whatever and if our antagonism to him was such that it could draw its weapons from every arsenal of assault, we yet would hesitate to raise the sword against one who so narrowly escaped a false initiation into the "Third Degree, Ancient Knights of Ye Golden Calf --- El Toro."

The Wilde forces were much better organized than the Marston forces and their publicity was clean and effective. The Wilde speakers also inspired such enthusiasm that they always electrified their audiences and from the start it was certain that Wilde would be elected. The splendid work of C. C. Benjamin in directing the Wilde campaign was in beautiful contrast with the kindergarten work of the Marston managers.

Of course, the Marston workers not knowing their campaign was being mismanaged, could not realize that they were doomed to defeat and, as a result, they are sadly disappointed and deeply chagrined. Even Mr. Marston was so thoroughly disappointed that he had not sufficiently recovered from the shock to be able to call Mr. Wilde to offer his congratulations. Or it may be that from habit he is waiting for instructions from Julius before he decides it is the proper thing to do.

It was a great election, the greatest ever held in San Diego. Besides the determination to make this an industrial city, it proved that the people of San Diego were able to overthrow the old political machine which has so long dominated the city.

April 6, 1917, San Diego Sun, 1:1-2. War is declared on Kaiser.

April 10, 1917, San Diego Evening Tribune, 2:5. Rally draws crowd to park.

Several hundred of the 100,000 citizens of San Diego and adjacent territory turned out for yesterday's parade and patriotic rally at the Organ Pavilion in the Exposition grounds. Led by Colonel J. P. O'Neil, U. S. A., and the available companies of the Twenty-first Infantry regiment, the marchers hiked from the Santa Fe depot to the Exposition grounds.

The parade included, besides the military, the Spanish war veterans of San Diego and Coronado, the Pacific Beach military academy students, the members of the navy's new motorboat reserve, the Coronado boy scouts and the Coronado girl scouts. In the last division there was a turnout of about 300 citizens from the various fraternal organizations, stores, and city and county offices.

The exercises at the Organ Pavilion opened with the song "America," participated in by everybody. Rev. Charles E. Spalding, Christ church, Coronado, delivered the invocation, and then Chairman R. H. Harris introduced Mayor E. M. Capps. The mayor spoke in the rain that ended as he finished speaking.

Colonel O'Neil made one of the principal addresses, in which he reminded the audience of the likelihood that the allies and Germany might arrange a peace and leave Germany free with 7,000,000 men and a friendship with Mexico to fight the United States at its leisure.

Several others made strong addresses, including Captain S. W. Bell of the G. A. R.

April 10, 1917, San Diego Sun, 7:3. Patriots at Exposition cheer for liberty.

April 14, 1917, San Diego Evening Tribune, 16:4. Report has it that O'Hallaran is off Park Board; resignation in hands of Mayor Capps.

Mayor E. M. Capps stated he would leave the vacancy for Mr. Wilde to fill. O'Hallaran's resignation, according to report, was due to a difference of opinion between him and Wilde on civic matters.

April 15, 1917, San Diego Union, 12:2. "Zoo" in Balboa Park planned; animals exhibited on Isthmus transferred to Zoological Society; about 40 animals originally the property of the Ocean Beach Amusement Company and also the Kaufman collection of animals which have been in the park; lions, tigers, leopards, Kodiak bears, black and brown bears, buffalo, sacred cow, pumas, baboons, monkeys, badgers, foxes and coyotes. Dr. Harry G. Wegeforth, president of Society, said last night that Carl H. Heilbron and D. C. Collier, receivers of the Amusement Company, were entitled to much credit in aiding the society in its efforts to secure the animals for San Diego's park.

April 16, 1917, San Diego Daily Transcript, 4:1. Colonel J. P. O'Neil, commander of the 21st Infantry, has announced that the usual reviews, drills and band concerts given by the regiment band have been discontinued.

April 19, 1917, San Diego Union, Classified, 1:4. Mayor Capps yesterday recommended Harry C. Ryan, San Diego attorney, to Park Board to fill vacancy left by the resignation of Thomas O'Hallaran; Council confirmed appointment.

April 20, 1917, San Diego Union, 8:3. Odd Fellows plan big celebration in Balboa Park; 98th anniversary of founding of organization will be observed April 28; picnic in Pepper Grove in afternoon and dance in Cristobal Café in evening.

April 21, 1917, San Diego Sun, 9:2-3. Playground fete will be beautiful; many children to take part in pageant to be held in Balboa Park, May 5.

April 22, 1917, San Diego Union, 5:2. Annual rose show of San Diego Floral Association will be held in Kern County building at Exposition next Saturday and Sunday; proceeds will be turned over to Red Cross.

April 22, 1917, San Diego Union, 8:1. May Day Festival program made up by Park Board; affair will be given in Balboa Park, May 5, beginning in afternoon at 6th and Juniper streets.

April 23, 1917, San Diego Daily Transcript, 4:1. Mr. Murray P. Corse, formerly with Cram, Goodhue & Ferguson of New York, to talk about stained glass at Science of Man building at Exposition tomorrow evening.

April 24, 1917, San Diego Daily Transcript, 4:1. Colonel D. C. Collier offered Exposition grounds as a training and concentration camp for 15,000 soldiers during interview with Secretary Baker.

April 24, 1917, San Diego Evening Tribune, 12:3. Petitions asking the removal of Thomas O'Hallaran as appraiser of inheritance tax for San Diego county are in circulation, it was reported yesterday.

April 24, 1917, San Diego Union, 2:2. Exposition site offered as training camp; free use of grounds tendered to Secretary of War Baker by D. C. Collier and Representative Kettner at Washington, D. C., April 23; buildings which remain intact can hold 15,000 men while the grounds include 1200 acres

Secretary Baker thanked the Californians for their offer, but said that he was unable to accept until after Congress had passed the pending Army legislation. This done it was thought the offer would be accepted..

April 25, 1917, San Diego Daily Transcript, 4:1. San Diego Floral Association will hold its exhibit at the Kern County building at Exposition on Saturday; admission is 10 cents.

April 25, 1917, San Diego Evening Tribune, 1:5. War Department to use Fair.

Referred to the commanding general of the Army's western department with power to act, San Diego's offer of the exposition grounds and buildings for the accommodation of a division of the army has been accepted by the war department and now rests with the San Francisco headquarters for acceptance as soon as needed.

Secretary Home Sumption, chamber of commerce, received this morning a telegram to that effect from D. C. Collier, who was sent to Washington to assist Congressman Kettner in securing the government's acceptance of the offer.

While en route to Washington, Collier stopped over at San Francisco for a conference with General Bell and secured from that officer a hearty endorsement of the city's offer. A change in commanding generals since that time is not expected to effect a change in sentiment.

The exposition facilities for accommodating a large body of men are said to be ideal for the army's necessities at this time. It is estimated that 10,000 or 15,000 men can be quartered comfortably in the exposition buildings.

The suggestion for using the buildings was broached first by Colonel J. P. O'Neil, commanding the Twenty-first Infantry at a patriotic banquet here a few weeks ago. An citizens' committee acted upon the suggestion at once.

Besides being an ideal site for the location of a divisional camp, the committee says the use of the site will keep San Diego before the national public and the presence of a division of men in training here will assure for this city degree of protection in excess of any contemplated emergency.

April 28, 1917, San Diego Union, 7:3. Constantino to sing at Organ Pavilion Sunday, May 6.

April 28, 1917, San Diego Union, Classified. Rose show will open today in the Kern-Tulare Building on the Exposition grounds; proceeds to go to Red Cross; vegetable department to be a feature in response to President Wilson's appeal for all to raise foodstuffs, by Guy Keene; a fee of ten cents admission will be charged.

April 28, 1917, San Diego Union, Classified. Organ designed for all people.

The case of the Tracy Brick & Art Stone Company versus the Wurster Construction Company is being heard in the Superior Court, with attorney Leroy A. Wright as attorney for the latter company. The case hinges on the question of alleged faulty material furnished in the ornamental molding of the Spreckels Organ Pavilion at the Panama-California International Exposition. It was declared that a part of the molding had fallen away and that the cost of repairing it would amount to \$18,000.

An interesting fact was brought out in the testimony yesterday after John D. Spreckels had been on the stand. He testified in regard to the contracts for the Organ Pavilion and as to the molding falling. Fred H. Wurster, president of the Wurster Construction Company, while testifying as to the disputed points, brought in the interesting sidelight. He said that when the question of the gift of the organ was being considered, the suggestion was made to Mr. Spreckels by an employee of the street railway company, of which he is the principal owner, to have the organ in Mission Cliffs Gardens, the argument being that location would result in an increase in street car fares.

Mr. Spreckels said, Wurster testified, that the matter of street car fares did not enter into the consideration at all. What he wanted was to locate the organ in the park, where it would be within walking distance of the people of the city, especially those not able at odd times to pay car fare.

The faulty material will be replaced at once and the case has been continued until Monday to fix the responsibility for the alleged imperfect molding.

April 25, 1917, San Diego Union, 8:1. More than 100 young San Diegans, future colonels, majors, captains of reserve corps, scour Balboa Park; Lt. Cyrus Sweet, U. S. A., retired, and Captain Thomas Davis of Army and Navy Academy training rookie army.

April 28, 1917, San Diego Evening Tribune, 16:3. Park car line will be opened June 1; double track line from the east entrance to University Avenue is nearly completed and new service will serve big territory; relieves two lines.

April 28, 1917, San Diego Union, 7:3. Florencio Constantino, tenor, to sing at Organ Pavilion, Sunday, May 6; arrangements made by Miss Gertrude Gilbert.

April 28, 1917, San Diego Union, Classified, 1:3-4. Rose Show will open today in Balboa Park; 10 cent admission charge.

April 28, 1917, San Diego Union, 1:5. Organ designed for all people; testimony in suit shows Mr. Spreckels' desire to have all enjoy its music; case of Tracy Brick & Art Stone Company versus Wurster Construction Company; part of molding has fallen off and cost of repairing would amount to \$13,000; Spreckels wanted organ in park even though its location in Mission Cliffs Garden would have resulted in an increase in street car business.

April 29, 1917, San Diego Sun, 12:2-3. Rose show is bower of beauty; opened today in Kern-Tulare building in Balboa Park.

April 29, 1917, San Diego Union, 1:7-8. Admiral Caperton suggests Exposition as training camp for U. S. Navy.

The grounds and buildings of the Exposition may be used by the Navy Department for housing and training the recruits of the Navy who are enlisting at a rapid rate. This was indicated yesterday when word was received by the Army and Navy Committee of the Chamber of Commerce that Admiral William B. Caperton, commander-in-chief of the Pacific fleet, had suggested to the Navy Department that such use be made of the buildings and grounds.

It is said that the Navy Department has not adequate facilities for taking care of the instruction of "rookies." The group of buildings at the Exposition are ideally adapted for a training school of the character desired.

The suggestion of Admiral Caperton was made without solicitation from San Diego, and not until word was received from General William I. Sibert, commander of the western department, U. S. A., that the plans of the War Department did not at present include anything which would require the use of the buildings which had been generously offered by the Park Commissioners.

Supplementing Admiral Caperton's suggestion, Congressman William Kettner is using his influence in Washington to have the offer of San Diego accepted.

April 30, 1917, Resolution of the Board of Park Commissioners tendering former Exposition grounds to the U. S. Navy Department.

(COPY)

WHEREAS, General Sibert, Commanding the Western Division of the U. S. Army, has declined the offer of this Board to use the unoccupied buildings in the Exposition grounds, and

WHEREAS, Admiral Caperton, in behalf of the U. S. Navy Department, has advised the San Diego Chamber of Commerce that the Navy Department is in urgent need of suitable buildings and grounds to accommodate large bodies of naval recruits for training purposes.

NOW THEREFORE BE IT RESOLVED the Board of Park Commissioners of the City of San Diego that all unoccupied buildings on the Exposition Grounds East of the Plaza de Panama, which have not been tendered to the 21st Infantry, be and are hereby tendered the U. S. Government for naval purposes, also such unimproved lands in Balboa Park, outside the Exposition grounds, as may be considered suitable by the Navy Department.

Also that Col. D. C. Collier be and hereby is authorized to tender the use of said buildings and grounds to the Navy Department of the U. S. Government for an emergency concentration training camp; the rental of said buildings and grounds to be free. The said Navy Department to pay for all water, gas, electricity, etceteras used by them.

The permit for the use of the buildings and grounds referred to above to be the same as made to the U. S. Marine Corps.

BOARD OF PARK COMMISSIONERS

By /s/ Henry C. Ryan, President

/s/ G. W. Marston

/s/ Arthur Cosgrove

April/May, 1917. Records of Park Department in Relation to Taking Over of Exposition Grounds and Buildings by the Navy Department for Training Station, July 20, 1923; George W. Marston Papers, Collection 219, Box 2, File 32, San Diego Historical Society Research Archives.

The initial records of the Park Department of the City of San Diego regarding occupation of Exposition buildings and grounds in Balboa park by the Navy Department for use as a naval training station are such as to indicate that the idea evolved some time prior to its presentation before the Board of Park Commissioners, and that plans for tendering the premises to the government were well developed before official action was taken by the park commissioners.

Whether this idea originated with one or more of the park commissioners, with members of the Exposition Board, or with Chamber of Commerce or naval authorities is in no way indicated by park records.

The first official mention in park files is in the minutes of the Board of Park Commissioners, held on the fifth day of April, 1917, this being a special meeting held for the express purpose of authorizing Colonel D. C. Collier to proceed to Washington, D. C., and there tender to the War Department use of the premises. The following resolution, it not being shown by whom it was introduced, was unanimously adopted:

“Whereas the U. S. Government will be in immediate need of buildings and grounds to accommodate large bodies of troops for mobilization purposes, and

“Whereas there are a number of Exposition buildings in Balboa Park now unoccupied and adaptable for the use of the U. S. Army for temporary barracks, now therefore,

“Be it resolved by the Board of Park Commissioners of the City of San Diego that all the unoccupied buildings in the Exposition grounds east of the Plaza de Panama be and hereby are tendered to the U. S. Government for army purposes; also that Colonel D. C. Collier be and is hereby authorized to proceed to Washington, D. C. and to tender the use of said buildings and grounds to the War Department of the U. S. Government for an emergency concentration camp, the rental of said buildings and grounds to be free.”

The second document in this record is a letter from the park commissioners to D. C. Collier, enclosing resolution, and authorizing him to proceed in accordance therewith.

Under date of April 6 are filed letters from the Merchants' Association and Rotary Club, endorsing the action of the park commissioners.

Also under date of April 6, in the minutes of the regular meeting of that date, is shown a motion ratifying the adoption of the above resolution as the special meeting on April 5 in the Chamber of Commerce offices.

On April 10, the park commission telegraphed Colonel Collier at Washington to withhold from his offer the Alameda, Kern County, San Joaquin and Salt Lake buildings, as these structures were desired by the U. S. Marine Corps, having occupied a large area south of the Organ Pavilion for several months prior to that time.

In accordance with authority given him by the park commission, Colonel Collier, on April 17, offered the buildings and grounds to the War Department, who referred the matter to General Silbert, commanding the Western Division of the U. S. Army. This was reported by Colonel Collier to the Chamber of Commerce, who in turn reported to the park commission.

General Silbert telegraphed the Chamber of Commerce that it was impracticable for the army to use the premises and that the offer was therefore declined. This telegram was under date of April 28, together with a letter from Melville Klauber, chairman of the Army and Navy Committee of the Chamber of Commerce, in which he states that:

- (1.) General Silbert, acting for the War Department, has rejected use of the premises for army purposes.
- (2.) That Admiral Caperton, on his own initiative, has taken up the matter of naval occupation on the premises with G. A. Davidson, president of the Exposition.
- (3.) That Admiral Caperton said that the navy badly needed space for a training station and urged that steps be taken toward offering the premises to the Navy Department.
- (4.) That the Army and Navy Committee of the Chamber of Commerce had tentatively offered the premises for naval use and desired that the park commission ratify the action at the earliest possible moment.

On April 30, the park commissioners received a telegram from D. C. Collier to the effect that, in accordance with telegram from the Chamber of Commerce, he and William Kettner, Congressman from this district, had tendered the premises to the Navy Department, and had changed the letter and resolution of the park commission so that it authorized use of the premises by the Navy Department, instead of by the Army. The telegram also stated that the tender would be accepted. Also, on April 30, a telegram was sent to Colonel Collier, advising him that his change of resolution and letter of authorization had been confirmed. This telegram was authorized at a called meeting of April 30. At this meeting Lieutenant Swanson, port commandant for the U. S. Navy, appeared before the board and asked that a permit be drawn in accordance with the offers made. Superintendent and executive secretary were directed to draw a form of permit similar to that under which certain parts of the park were already occupied by the U. S. Marine Corps.

At a called meeting of May 8, 1917, Lieutenants Menocal and Clements first appeared before the Park Commission and requested that offices in the Administration Building be turned over to them, saying that one of the Exposition officials, Mr. George Burnham, had advised them that they might use the same. This request was granted and the formal permit for naval occupancy of the premises was adopted and signed.

Superintendent Morley was later authorized to make such structural alterations as might be required by the navy, and he, with Electrical Foreman C. S. Harper, employed a large force of men for this purpose. Within the next few months, all the main buildings east of the Plaza had been refitted by park forces for naval use, and more than 5,000 naval recruits were receiving training in the park before the close of the year. This work of repairs and alteration cost the park department nearly \$30,000 and this expenditure was refunded by the navy department. Park forces were engaged on this work day and night, and Messrs. Morley and Harper were highly praised by naval authorities for their able and untiring efforts.

July 20, 1923

I hereby certify that the foregoing has been compiled from records of the Park Department of the City of San Diego, that the essential facts from all records of the department in relation to the establishment of a naval camp are, to the best of my knowledge and belief, included herein.

(Signed) T. N. Faulconer, Executive Secretary, Park Commission.

May 1, 1917, San Diego Sun, 1:1-3, 3:3-4. U. S. Training Station at Exposition grounds assured; the Navy Department has accepted the grounds and buildings for use as a naval training station; offer proffered by Colonel D. C. Collier.

May 1, 1917, San Diego Union, Classified, 9:1-2. Navy boys to train at park; great base probably will be established at Exposition for instruction of apprentice seamen; commissioners offer site to government; commander of port will be prepared today to make final announcement regarding location.

May 2, 1917, San Diego Union, 5:1-5. Big Navy Training Station Recruits Soon in Exposition Buildings; five buildings to be prepared for first units; extensive repairs and alterations to be made for men to be sent here.

Five Buildings Selected

Five buildings have been selected by Lieut. Ernest Swanson to form the first units of the training station. These are the Panama-Pacific, Foreign Arts, Varied Industries, Southern California Counties buildings and the Cristobal café. It is estimated that \$10,000 will have to be expended in repairing the roofs and sides of buildings and a like sum for installation of bathing and washing facilities and sewage.

Balconies will be erected in some of the buildings to be used as dormitories for the apprentice seamen. The mess hall and galley will be at the Cristobal café and in the Varied Industries building. Gas ranges and other cooking equipment probably will be furnished by the San Diego Gas and Electric Company.

The California Building, if the navy department determines to expend a small sum of money for repairs, will be used for the general storekeeper's department. Clothing, washing gear and other equipment will be stored in this building while awaiting distribution to the recruits.

That not more than 3,000 seamen will be quartered at the Balboa Park training station at a time was the statement made yesterday by Lieutenant Swanson. One of the chief objections to having more recruits stationed there at one period, he said, is the lack of drill grounds for a large body of men.

Lieutenant Swanson expressed the opinion, however, that greater efficiency in training and administration could be secured by limiting the first increment to 3,000 men.

One of the principal problems now facing the navy department is the selection of properly qualified instructors for duty at the San Diego training station. It is believed that a number of retired army officers will be recalled into active service to assist the navy personnel in instructing the recruits the rudiments of rifle, company, battalion and other drills, leaving instruction in seamanship, signaling and gunnery to officers of the navy.

According to Washington advisors, a flotilla of steel submarine chasers will be sent to San Diego to instruct apprentice seamen attached to the local training station. These submarine chasers will be 110 feet long, will have a speed of 45 miles an hour, and will be armed with 3-pounder guns. Six of these boats, it is reported, will be stationed here, supplementing the flotilla of motor and steam launches that will be sent here from Mare Island for service with the naval training station.

Official announcement was made yesterday that the Balboa Park naval training station will not be a permanent institution. After the war, it is understood, a site nearer the waterfront will be decided on and the

work of the training station carried on permanently there. This will mean the ultimate expenditure of hundreds of thousands of dollars in construction of barracks, officers' quarters and supply buildings. This training station will be distinctive from the marine brigade post in Dutch Flats.

May 3, 1917, San Diego Union, Classified, 9:1. 7,000 Navy men may train here by end of year; plans for remodeling park buildings sent north; recruits to arrive soon.

May 7, 1917, San Diego Union, 2:5-6. Wilde to become mayor today; refuses to announce appointments; three solons will take office

May 8, 1917, Permit to U. S. Navy Dept. to occupy Balboa Park Buildings.

1. In consideration of the Resolution passed by the Board under date of April 30, 1917, permitting the use of the unoccupied buildings East of the Plaza de Panama, which have not already been tendered to the Twenty-first Infantry, and such unimproved lands outside the Exposition grounds as may be considered suitable for naval purposes, this permit is hereby granted the U. S. Navy Department to occupy said buildings, viz:

Pan-Pacific, Foreign Arts, Foreign and Domestic Industries, Southern California Counties, Emergency Hospital, U. S. Fisheries, Balboa Guards Building (Hospital), Canadian Building, when released by the Canadian government, and the Cristobal Café, providing same is release by the 21st Infantry.

2. None of said buildings are to be used for mess halls or kitchens except the Cristobal Cage should said buildings be released by the 21st Infantry.
3. That said U. S. Navy Department shall not make or allow to be made any change of any description in any of the said buildings included in this permit without the full knowledge, consent and written approval of this Board or its Superintendent of Parks.
4. That said U. S. Navy Department shall not disturb any trees, plants, shrubbery of lawns or make any changes of any nature in the area adjacent to any of said buildings or to erect any buildings, dig trenches or in any manner disturb the grounds surrounding or adjacent to any of said buildings without the full knowledge, consent and written approval of this Board of its Superintendent of Parks.
5. That all repairs, improvements, alterations, etc. permitted by the Board or its Superintendent of Parks shall be done by the U. S. Navy Department at its expense and that the said U. S. Navy Department shall maintain and keep in repair all the said buildings and shall maintain and care for the grounds immediately surrounding said buildings and to keep same in as good condition as when turned over to said U. S. Navy Department. Said buildings to be returned to this Board at the expiration of this permit in as good condition as when received from the Board, ordinary wear and tear excepted.
6. Said U. S. Navy Department is to take every reasonable precaution to see that the men occupying said buildings and grounds commit no act of vandalism and that every precaution shall be taken to protect the lawns, flowers, shrubbery and all other park improvements surrounding said buildings and that the officers in charge of said buildings and grounds shall be instructed to see that the men under their command carry out this provision.
7. It is hereby agreed that all refreshment stands of stands for the sale of any commodities inside the Exposition grounds are to be operated and controlled by the Board of Park Commissioners.
8. This permit shall not in any manner interfere with any employee of this Board in going or coming to work or in the performance of his regular duties for this Board or in carrying out any order of this Board or to interfere in any way with the general improvement of the landscape feature of that part of Balboa Park occupied by or adjacent to said buildings or to interfere with the free access of the general public to that part of the grounds occupied by said buildings during the hours that the Exposition grounds are open to the public

BOARD OF PARK COMMISSIONERS

By /s/ HENCY C. RYAN, President

By /s/ G. W. MARSTON, Commissioner

By /s/ ARTHUR COSGROVE, Commissioner

Adopted by the Board of Park Commissioners in Special Session, May 8th, 1917.

Attest: /s/ T. N. FAULCONER, Executive Secretary.

May 8, 1917, San Diego Sun, 1:4-5. Tax rate to be about \$2 mark now; fire budget is increased; park board accused of wasting water.

May 8, 1917, San Diego Sun, 1:6. 5,000 are to train at Exposition; first great body of Navy recruits will arrive soon.

May 8, 1917, San Diego Union, 1:3-6, 4:3-6. Mayor Wilde delivers rousing speech, Council goes into Star Chamber session; Mayor L. J. Wilde, speaking of city parks, declared they use a lot of water. He said,

however, that we should not practice economy that would mean the tearing down of anything that we have built up.

“We give too much thought,” he declared, “to the tourist’s pleasure and too little to things that will fill the dinner pail.”

May 8, 1917, San Diego Union, 2:3. Naval engineers arrive to survey Balboa grounds; officers will inspect buildings at Exposition grounds and Dutch Flats.

May 9, 1917, San Diego Sun, 7:6. Private conference with park board members held in Mayor Wilde’s office yesterday afternoon for the purpose of decreasing park expenses.

May 9, 1917, San Diego Union, 14:2-3. Children ready for Spring Festival to be held Saturday at Organ Pavilion; funds raised at entertainment to be turned over to Red Cross.

May 10, 1917, San Diego Union, 1:3-6, 5:5. “United States Forever,” cries Schumann-Heink as climax of patriotic citizens’ meeting in dinning room of U. S. Grant Hotel yesterday.

May 11, 1917, San Diego Sun, 1:6-7, 2:3. City funds apportioned; tax rate \$2.14 or \$2.23; present system is scored.

May 11, 1917, San Diego Union, 1:5, 3:3. Navy boys to arrive in camp; first contingent apprentice seamen scheduled to come here soon, Captain William D. Brotherton named commander of Naval Training Station.

May 11, 1917, San Diego Union, 5:2-4. \$120,000 cost of building street railway park extension shown in report; three steel bridges cost \$60,000.

May 11, 1917, San Diego Union, 8:1. Y. M. C. A. song service at Exposition organ Sunday morning; President George W. Marston of Y. M. C. A. will speak; Miss Gertrude Gilbert, chairman of municipal music committee, to cooperate in organ arrangements.

. . . Colonel O’Neil has granted permission for these weekly song services and Miss Gilbert had volunteered to provide a special program of music.

May 11, 1917, San Diego Union, 14:1. Jack Hendee, new Zoo chief, to take charge; Balboa Park collection of animals attracts hundreds of visitors daily.

Jack Hendee, formerly in charge of the “Zoo” at Universal City, and for years prior to his connection there a trainer and caretaker of animals in various parts of the United States has been appointed superintendent of the zoological gardens in the northeast section of Balboa Park.

The large assortment of animals, which has been a popular attraction for thousands of visitors, especially at feeding time in the afternoon, has been taken over by the Zoological Society of San Diego. With Hendee in direct charge a number of improvements and additions are expected to be made which will provide quarters for a larger number of animals.

A guard of soldiers has been placed at the zoo to prevent careless people from climbing over the fence and getting too close to the cages.

When the new park street line extension is completed, a stop will be provided for the accommodation of the camp of the Twenty-first Infantry, near the north end of the park, and this will be considerably closer to the zoo than the present terminal of No.7 line at the east gate of the Exposition.

May 11, 1917, San Diego Union, 14:2. Navy Department to ask vast sum; Government leases various sites throughout country to start training camps, including the new naval training station established at the Exposition grounds here.

May 12, 1917, San Diego Union, Classified, 9:1. Dance Festival set for today.

The spring dance festival of the children of the dancing school of Misses Hulda Hanker and Cornelia Strobhar will be held this afternoon at the Spreckels organ pavilion in Balboa park. It will be given for the benefit of the Red Cross Society.

The final rehearsal was held yesterday afternoon and every indication was for the most successful entertainment of the kind the school has ever given.

One of the features will be a parade from the Southern Counties Building to the organ. There will be a big Red Cross flag carried by children at each corner. Into this will be tossed money, from pennies up.

The flag will be carried by Misses Betty McGee, Carrie Mitchell, Beatrice Henning, Dorothy Smith, Caroline Clarke and Frances Du Pond. They will mark up and down the aisles in front of the organ, coaxing coins from the public purse. The Twenty-first regiment band will take part in the parade. Seats may be obtained at downtown music stores or after 1 o'clock at the Exposition booth near the organ.

The final number will be an American flag song in which all the children in the audience are invited to come upon the stage and participate, provided that they, too, carry flags.

May 13, 1917, San Diego Union, 14-5, 2:3-4. Work on Balboa Park Naval Station Will Be Rushed; Army officers arrive to inspect site; Uncle Sam's apprentice seamen will be trained; location lauded by officials; plan of rebuilding arranged.

With the arrival in San Diego yesterday of Capt. W. H. Brotherton, commander of the navy training station planned for Balboa Park, the last step in the progress made in the last ten days in the establishment in this city of one of the five new naval training stations authorized by the secretary of the navy was completed. Accompanying Capt. Brotherton were Lieut. E. A. Lofquist and Paymaster Skipworth.

The party of naval officers was met yesterday afternoon by Melville Klauber, chairman of the army and navy commission of the Chamber of Commerce; John G. Morley, superintendent of city parks; J. B. Pendleton, executive secretary of the Park Board; and George W. Marston, Arthur Cosgrove, and Thomas Ryan, members of the board of park commissioners. At the Exposition grounds, the visitors were met by Lieut. A. H. Clements, who had been commissioned to obtain a site for a training station of the Pacific coast, and who later was directed by the secretary of the navy to avail himself of the offer of Balboa Park at San Diego, and Civil Engineer A. J. Menocal, under whose direction the adaptation of the park buildings to the needs of proposed training station was made. Immediately upon the arrival of the naval party at the grounds, they reviewed the work which had been accomplished by Clements and Menocal in the last ten days. This review included, particularly, the changes required in the various buildings.

The San Diego naval training station will take in the Southern Counties building, the Cabrillo café, the Foreign and Domestic Industries building, the Fisheries building, the old Missions building, the Foreign Arts building, the Gas and Electric building, the pepper grove, the Canadian building, the Pan-Pacific building, and the United States government building.

According to both Lieutenant Clements and Civil Engineer Menocal, the changes which have been made in the various buildings will not impair either the utility or beauty of any the structures inside or out. In addition to this, those who have had the work in charge have discovered that many of the buildings can be used for purposes allied to those for which they were originally built. Thus the Cabrillo café will be used as a kitchen and mess room, the Fisheries building for washing and bathing purposes, and the Exposition hospital as a sick bay.

The Southern Counties building will contain the administrative offices of the station, while the Foreign and Domestic Industries building will be used as a barracks, and also as a post office and a storage room for bag racks and other equipment. The Foreign Arts and Pan-Pacific buildings will be used as

necessary. It is estimated by the officers in charge that the Foreign and Domestic Industries building will provide quarters for 1400 men, while it is computed that the facilities now at hand will provide ample accommodations for at least 5000 recruits. In fact, the last figure is said to be so low, considering the facilities of that part of the park which has been given the government for the training station, that Lieutenant Clements has already notified the secretary of the navy that the local station will take care of, at least, 14,000 sailors.

Lieutenant Clements is a graduate of Annapolis and served as an officer in the navy for fifteen years when he resigned to take up the practice of law. Some years ago he purchased a ranch near Portrero, but, when the emergency call came, he immediately placed himself at the disposal of the secretary of the navy, and for some time has been in touch with the navy department in the manner of training stations.

Civil engineer Menocal has been in charge of the examination of the site of the proposed marine base on Dutch Flats. He is considered to be the navy's foremost authority on naval training stations, and the quickness with which the station in Balboa Park was put in readiness is due, in great measure, to his thorough knowledge of training station requirements. His only comment yesterday on the station at San Diego was that it was superior in every respect to the naval training station at Newport, the largest naval training station in the United States.

In addition to the training station at San Diego, the navy department has authorized temporary stations at New York, Boston, Philadelphia, and Chicago. In the original authorization, a station was also allowed for "the Pacific coast," but upon the offer to the government of the site at Balboa Park by Col. D. C. Collier, Lieutenant Clements, who had already been sent by the department to San Francisco, was notified to make immediate plans for the taking over of the Exposition buildings and grounds.

"The first direct appreciation of San Diego as an ideal site for the training and conditioning of troops," said Lieutenant Clements yesterday, "came from Lieut. L. C. Richardson, better known to San Diegans as Commodore Richardson, who found that the climatic conditions and surroundings of the city were admirably adapted to the training and drilling of his own men. He first urged the navy department to consider San Diego as a permanent base for his command, and also asked that the coaling station here be improved and made fit for practical use.

"Acting on his recommendations, the secretary of the navy appointed a board consisting of Rear Admiral Aaron Ward, Capt. Emil Thies and Civil Engineer A. C. Cunningham, who were instructed to report on the facilities of the Pacific coast in general. This board commenced its investigations in the north and examined the possibilities of every seaport town from the Canadian line to San Diego.

"The members of the commission arrived in San Diego during the mayoralty of Grant Conard. When they stepped from the train, they were met by a delegation from the Chamber of Commerce, of which I was then a member, but the board upset all the plans for their entertainment by the simple statement that upon leaving Washington they had resolved to accept no courtesies from representations of any city which might have training station facilities.

"Before the findings of the board were made known in Washington, Commander Richardson again urged the necessity of establishing a naval base at San Diego, and he was followed by Clements, who strove to make the institution of such a base an immediate reality.

"The report of the board was confidential, but it soon became known that it favored San Diego, not only as a proper site for a training station, but as a permanent base for the torpedo flotilla.

"The plan the board appointed at that time received the endorsement of every commanding naval officer to whom it was submitted, and has been consistently supported by Congressman Kettner who, to my knowledge, has never hesitated in advancing the possibilities of San Diego before the army and navy authorities.

“When the plan of increasing the strength of the navy to 150,000 men was adopted and executed the navy department found itself on the horns of a dilemma. The training stations of the government speedily became overcrowded, and was forced either to bring recruiting to a close, or accept the patriotic offer of San Diego, the facilities of which had never been used, notwithstanding the fact, as I have already said, the navy department was fully cognizant of their worth.

“I was at this time in Washington and funds were placed at my disposal to use in the establishment of a training station on the Pacific coast, but no definite location was assigned to me. The funds which I was to use for this purpose had been given the department by various individuals, and I was commissioned to use them unless a naval appropriation became available in time.

“I arrived in San Francisco on Friday, May 4, 1917. Within a day of my arrival there I received a telegram from Congressman Kettner that the secretary of the navy had accepted the offer of the Exposition buildings at San Diego. By Sunday morning I had met Civil Engineer Menocal at San Diego. Two days were spent by us in drawing up plans for the training station, and on Tuesday morning I received orders from Washington to proceed with the utmost dispatch, as we could expect the first unit, consisting of between 500 and 1000 men in a few days. We reported back that we could be ready for 1000 by Friday, and for further units as fast as they could be recruited and sent to us.

“I wish to day we have received the kindest treatment and heartiest cooperation from the city government of San Diego and the board of park commissioners, which has actual charge of the greater park of the work.

“Thus, with the excellent facilities afforded us, we were able, in less than a week, to equip the station, to make provision of each recruit, to arrange all the details of cooking and mess room requirements, and even to provide a prison and a hospital.

“It has been a subject of the greatest satisfaction to me that the station has been established in San Diego, and my experience leads me to believe that the government’s acceptance of the patriotic offer of the park board is an earnest of the establishment here of permanent bases for both the army, the marine corps and the navy.”

May 13, 1917, San Diego Union, 1:4-5. Cross-Country Air Race During Friendship Fiesta; crack aviators will struggle in non-stop contest between San Diego and San Francisco; North Island fliers expected to complete; several governors will attend.

A non-stop airplane race between San Francisco and San Diego with crack military and civilian aviators participating is being planned as one of the features of the Friendship Fiesta to be celebrated at San Diego, June 21-24. It is proposed that the start of the cross-country aerial race will be made at San Francisco, probably at Golden Gate Park. The finish will be either at the military aerodrome at North Island or at the aviation field in Balboa Park. The same course as that followed by Slias Christofferson in his San Francisco-San Diego flights three years ago. Many prizes will be awarded.

San Diego’s Friendship Fiesta promises to eclipse any celebration of its kind ever held in California. The governors of the states of California, Utah, Arizona, New Mexico, Nevada and Texas, we well as the mayors of 356 cities in these states have been invited to attend the fiesta as the city’s guests.

Governor Esteban Cantu of Lower California, with the members of his staff, already has accepted the invitation extended by the San Diego progress commission to attend the celebration. With Governor Cantu will come the crack band of the Twenty-third regiment of Mexican infantry and delegations of school children from Mexicali, Ensenada and other points on the peninsula.

The complete program was announced yesterday.

May 13, 1917, San Diego Union, 5:2-3. Hundreds attend dance festival; held at Organ Pavilion for benefit of Red Cross.

May 13, 1917, San Diego Union, 6:3-5. Constantino and fellow stars to sing a Organ Pavilion week from today.

May 16, 1917, San Diego Union, 2:6. Use of building at park granted for Y. M. C. A. work; structure to be occupied s headquarters of members in camp.

Colonel O'Neil, 21st Infantry, granted use of International Harvester Building to Y. M. C. A. yesterday; twice a week band concerts at Plaza by 21st Infantry; Standard Oil Building to be turned over to 21st Infantry.

May 16, 1917, San Diego Union, 5:2. Library branch to be installed at training camp; public asked to donate magazines and books for use of soldiers and sailors.

The public library will open a branch early next week in the building at the Exposition formerly occupied by the Indian Arts exhibit. The Museum Association has generously granted the space recently devoted to the Rolland Reed photograph collection, and a library of more than a thousand circulating books and twenty-five of the best current magazines will be at the disposal of the soldiers and sailors and others who find the location convenient either as a place to read or from which to draw books.

All San Diegans who feel interested in helping to give wholesome enjoyment to the young men who have entered the country's service are asked to donate novels of adventure, books on history or naval matters, aids in elementary French, and such practical subjects as hygiene and care of the sick in war. These contributions should be sent to the public library at Eighth and E streets where they will be entered for circulation from the park branch. People are also urged to bring recent magazines to the library for use in the same cause.

May 18, 1917, San Diego Sun, 5:4. Will dedicate Women's Shrine.

May 19, 1917, San Diego Sun, 1:4. Marston leaves Park Board for Y. M. C. A. labors.

May 19, 1917, San Diego Union, 3:1. Park seed garden advocated; committee of Chamber of Commerce urges use of public properties to aid growers.

May 20, 1917, 7:1. Training camp ready for 5,000 naval recruits; first detachment expected to reach San Diego from San Francisco within week.

San Diego, fully equipped and ready, today awaits the coming of the 5000 or more U. S. navy recruits who are to receive their training in the Exposition grounds, Balboa Park. At headquarters in the old administration building yesterday it was announced that the first detachment of recruits may reach here within the next week from San Francisco. They are expected to arrive on short notice.

Lieut. A. B. Clements, who has been in charge of the work of arranging the buildings and grounds for the men, said yesterday that the camp probably will be the most practical as well as the most attractive ever offered Uncle Sam's volunteers for training purposes. It is possible that 10,000 recruits may be in training at the local camp if the war continues for any length of time.

Exposition buildings have been renovated and put in fine condition to be used as barracks. Hundreds of cots were installed in each of these buildings yesterday. The recruits will come to San Diego equipped with their own bedding. The Cristobal café building has been rearranged to serve as a mess hall for the men. The Southern Counties building will be used as a lecture hall and for general offices. The U. S. Fisheries Building has been reconstructed into a bath house, with ninety-six shower baths. Both hot and cold water will be available. Equipment for the washing of clothing has been installed in the building. The concrete streets in that part of the grounds will be used for drill purposes as well as the Plaza de Panama, which also will be used by the army and marine corps. There are now more than 1500 soldiers in the park, encamped chiefly in the north end. The marines are stationed in the south end of the park.

San Diegans who feared that the soldiers and sailors would destroy the foliage can set their minds at rest. The men now there are taking as much interest in the upkeep of the foliage and buildings as if they belonged to them. They say they are delighted to have the privilege of camping in such ideal surroundings and unite in declaring that the grounds will not suffer in the least from their presence. Many citizens and tourists visit the grounds daily to watch the men in camp and at drill.

The navy recruits to come to San Diego will mostly be from points west of Kansas City. They will go first to Goat Island, San Francisco, where they will be vaccinated and equipped. From there they will be sent here for several months before they are assigned to their ships. The camp will be capable of caring for 5000 men at one time, and as soon as a unit is sent away, another will arrive to take its place.

May 20, 1917, San Diego Union, 12:1. Marston leaves Park Board as term expires; former official to go east on Y. M. C. A. work; Mayor Wilde regrets decision.

His term of office closed as city park commissioner, and desiring to give his attention to the National War Work Council of the Young Men's Christian Association, George W. Marston yesterday, by letter, informed Mayor L. J. Wilde that it will be impossible for him to continue in the work. Mr. Marston will leave for the East soon on war council work.

Mayor Wilde received Mr. Marston's letter with regret. He said that he had intended to reappoint Mr. Marston to the park board. Until he has consulted with the Council and other members of the park commission, the mayor will not decide upon Mr. Marston's successor. Mr. Marston's letter to Mr. Wilde, saying that he is not prepared to accept reappointment is as follows:

"My Dear Mayor Wilde: I beg to remind you that my term of office as park commissioner expired on May 7, and that you have not yet named my successor. As I have accepted an appointment on the National War Council of the Young Men's Christian Association and leave for the East in a few days, it will not be possible for me to give even temporary service as park commissioner after this week.

"This is not a resignation, because my term of office has closed; but I beg leave to urge the early appointment of a new commissioner on account of the extraordinary attention that the park business requires since the transfer of the Exposition properties to the park board and the recent occupancy of grounds and buildings by soldiers and sailors.

"The duties of a park commissioner are now quite arduous and the responsibilities are serious. Balboa park has become a city within a city. Besides problems of roads, landscape treatment and gardens, there are problems of costly buildings, educational institutions, civic festivals, art exhibitions and field athletics. The museums, the zoological garden, the botanical exhibit, the stadium, the reception halls, and many other parts of this great civic center, all require the constant attention of the directing heads. Therefore, it is very plain to see that the city should have in its park organization the service of able men; men who have a high sense of the value of parks, broad knowledge of all related civic activities, and strong practical business capacity.

"I heartily commend the work of my associate commissioners and also the present superintendent, executive secretary and their force of men. Our relations have been very pleasant and I bespeak for them the hearty cooperation of the general municipal administration."

May 20, 1917, San Diego Union, 4:3-4. Constantino will sing at Balboa Park today; seats on sale at 50 cents for first seven rows and 25 cents for remainder.

May 21, 1917, San Diego Union, 3:5. Naval contingent arrived in camp yesterday; advance detail of apprentice seamen reach Balboa Station in San Diego for the Mare Island navy yard; contingent composed to 66 apprentice seamen and five chief petty officers who will act as instructors and four cooks.

May 21, 1917, San Diego Union, 8:1. Constantino charms music lovers; famous tenor hear in musical recital at organ; assistants win praise.

May 22, 1917, San Diego Sun, 9:3. F. F. Grant on Park Board; other appointments made.

May 22, 1917, San Diego Union, Classified, 1:1. Naval Training Camp supplies being received; 35 tons arrive on steamer; cooks and bakers enlisted for 1,500 men.

May 23, 1917, San Diego Sun, 4:7-8. Great work in San Diego Museum told in statement out today.

The building heretofore known as the Science and Education Building will become the Indian Arts Museum. It contains the Hall of Southwestern Archaeology, the Hall of Culture History, and, after the transfer of the Science of Man collections, will receive the Indian collections of the California coast and island tribes, the Mohave, Pueblo and other Indians of the southwest. This building will have a large lecture hall, seating 750 people, class room seating 150, the ethnological library and employees' rest room.

The Science of Man Building (formerly Indian Arts) will receive the famous anthropological collections assembled with the assistance of the Smithsonian Institution, under the direction of the ethnological division of the Exposition. This collection ranks as the most important of its kind in existence. In the south wing of this building, there will be developed later the sociological museum and in the balconies the laboratory of physical anthropology and that of sociology. By arrangement with the Library Board there is being installed in this building a park branch of the San Diego Public Library, which, merged with the museum library, will constitute a most important department.

Edgar L. Hewett

May 23, 1917, San Diego Union, 2:2-3. Exhibit of California artists installed in Fine Arts building.

May 23, 1917, San Diego Union, 2:3. G. M. Whitney arrested for picking roses from the garden in Balboa Park.

May 25, 1917, San Diego Union, 1:1. Approximately 8,000 acres of land on Linda Vista mesa accepted by U. S. Government as site for permanent army camp.

May 25, 1917, San Diego Union, Classified, 9:5. Park car line extension will open June 1; cost more than \$425,000.

May 26, 1917, San Diego Sun, 9:1-2. Memorial Day exercises at Organ Pavilion Wednesday.

May 26, 1917, San Diego Union, Classified, 1:3. New park street car line to bring change in routing.

May 28, 1917, San Diego Union, 1:4-5, 3:5. Figures show more than fifty million dollars to be spend by federal government in San Diego within next 17 months.

May 28, 1917, San Diego Union, 1:4. Naval lads due here Wednesday; succeeding contingents will arrive at two-day intervals until 2,000 or more apprentice seamen are stationed at the Exposition.

May 30, 1917, San Diego Union, 1:3-6. French 21st Infantry sent greeting to American 21st; regimental adjutant read a translation of letter to soldiers standing at attention yesterday; Miss Ruth Chatterton, the actress, presented the colors and Schumann-Heink sang the "Star Spangled Banner"; two troops of cavalry arrived from Palm City in time to take part in the review.

May 30, 1917, San Diego Union, 7:1-2. Memorial Day in San Diego will be fittingly observed; parade may set new record; program at Organ Pavilion to portray spirit of day.

May 30, 1917, San Diego Union, Classified, 1:1-2. 21st Infantry forces camped at Balboa Park (group photograph); Memorial Day in San Diego will be observed at Organ Pavilion; parade.

May 31, 1917, San Diego Sun, 9:4. New Park Line opens tomorrow.

May 31, 1917, San Diego Union, 1:1. North Island chosen as Naval Aviation Base; Board of naval officers ask \$500,000 for purpose; submarine station also recommended; latter would be located at La Playa and would cost \$375,000.

May 31, 1917, San Diego Union, 1:3, 5:1. Heroes pay tribute to departed; gravity of war lends significance to this year's memorial service and parade in San Diego.

May 31, 1917, San Diego Union, 8:3-5. "Let America Be Faithful to Trust," says C. A. A. McGee, orator of the day, in stirring address at Organ Pavilion to Memorial Day throng.

May 31, 1917, San Diego Union, 8:5. New line through Balboa Park to operate Friday; schedules announced for East San Diego, Adams Avenue Routes Nos. 7 and 11

May 31, 1917, San Diego Union, 10:2. Army and Navy sections of Y. M. C. A. plan service of song at Organ Pavilion Sunday for fighting men

May 31, 1917, San Diego Union, 10:6. Mrs. L. L. Rowan, San Diego contralto, will be heard in seventh free municipal concert inaugurated by Miss Gertrude Gilbert at the close of the Exposition at Organ Pavilion Sunday.

June/July, 1917, California Garden, Vol. 9, No. 1, 16-17. At the Zoo

Since my annual passport expired with the expiring Exposition, I had not been over to the grounds until recently (you know, "two bits" are worth money these days). Being a Pennsylvania dutchman by descent I have naturally a well-rounded and rather cheerful cast of features, yet they must have seemed somewhat awry and dejected as I sauntered through the Isthmus --- having entered via the north gate --- not, however, that I cared for the Isthmus; it never appealed to me, but rather, taking in connection with the Exposition proper, it has always seemed as an Excrescence on an otherwise perfect creation.

The first objects that attraction my attention was a pair of Golden Eagles, of recent acquisition to the Zoo. They had a scared droopy, forlorn look, uncomfortably perched upon a slanting limb that was too small to get a good grip with their talons. No Fourth-of-July-spread Eagle sort of attitude toward the unfriendly world about them. An aeries on some high mountain cliff would be more to their liking.

I next paid my respects to Mrs. Cleo and her interesting little family. The youngsters seemed to be in quite a kittenish mood and would have enjoyed a romp with the lady who flourished her veil so tantalizingly before them. They too looked haggard and hungry, and, but why should I do down the line of the "Zoo" in such a grouchy critical mood? Caesar, too, claimed my attention. He was the big African lion with the stentorian voice. Mr. D. A. Curry, the "stentor" of the Yosemite has nothing on Caesar as an ear-splitting, hair-raising howler.

Caesar's nocturnal habits are often wafted on the high breezes to my wakeful ears, a mile away. It is only when I come to those Canadian "teddies" that I become really interested. I could write a book --- if I could write a book --- on the fund I have in watching their inimitable antics. For me they were "simply killing." But, alas, they too, at present, are looking the part of a forlorn hope --- a cross between a badger and a hairless god --- bare bears. These little fellows have never had a fair deal by Expo chroniclers and I dare give them but a "mere mention" here. They, too, no doubt, will be included in the nucleus of our "Zoo" that is to be.

Should we or should we not encourage the school children to invest their money in helping to purchase the animals now on the Isthmus? The rising generation seems to be coming into its own. Note the

nation-wide interest that is being taken in the formation and guidance of all sorts of boys and girls clubs. (Big digression here.) . . . But getting back to the Isthmus, I wandered through the "deserted village" of the Painted Desert, which, somehow, recalled Goldsmith's pathetic story. The ocular things were all there save the Indians themselves, and with them has gone the spirit of the place. The same is true of the grounds as a whole. This, I think, explains the psychological effect that one experiences on entering the grounds. The Exposition spirit has flown --- fled when the "lights" went out, January 1, 1917. Yet the beauty of it all is here inviting us to its restful quietude.

I am pleased to learn that there is to be amicable relations between the Floral Association and the Audubon Society. It did seem doubtful at one time, judging from some remarks at a recent meeting of the latter society. . . .

F. C. ARTER

June 1, 1917, San Diego Sun, 1:3. Work will start on great marine corps base at Dutch Flats.

June 1, 1917, San Diego Sun, 1:4. Preparing for Navy boys here; Exposition is scene of activity; apprentices coming.

June 2, 1917, San Diego Union, 1:7. Naval camp in Balboa Park in full commission; apprentice seamen arriving in large details from Goat Island; kitchens equipped.

June 4, 1917, Letters, Board of Park Commissioners: Jerome B. Pendleton resigned as Executive Secretary of the Board of Park Commissioners.

June 4, 1917, San Diego Union, 4:3. Art Notes, by R. R. --- exhibit at San Diego Museum.

June 4, 1917, San Diego Union, 5:4. Rev. W. E. Crabtree, minister of the Central Christian Church, spoke yesterday at services at Organ Pavilion conducted by Chaplain Griffin of the 21st Infantry.

June 5, 1917, San Diego Union, Classified, 1:5. At a called meeting of the Park Board yesterday afternoon, the resignation of J. B. Pendleton, executive secretary for the last four years, was received and accepted. Upon request of Mr. Pendleton to be relieved at the earliest convenience of the Board, Commissioner F.F. Grant moved the appointment of T. N. Faulconer to succeed Mr. Pendleton. The motion was seconded by Judge Ryan and unanimously carried.

June 11, 1917, San Diego Sun, 1:2-3. EDITORIAL: Park Commission, a political mistake.

No graver political blunder can be imagined than the action of a majority of the park commissioners in asking for the resignation of Park Superintendent J. G. Morley on the grounds of economy.

June 11, 1917, San Diego Sun, 1:2. Park Board is hotly rebuked; a petition being circulated and signed protesting the action of Park Commissioner H. C. Ryan in calling for the resignation of Park Superintendent Morley.

June 11, 1917, San Diego Union, 1:6, 5:3. Park Board asks Morley to hand in resignation; Mayor urges reconsideration, say economy plea is insufficient.

Rumors that John G. Morley, for several years superintendent of parks, has been requested by the park commission to hand in his resignation at a special meeting of the park board to be held at 4 o'clock this afternoon in the Administration Building in Balboa Park, were confirmed last night by Judge Henry C. Ryan, president of the Board.

When asked last night by a **Union** reporter if the rumor was based on fact, Judge Ryan said that it was, but that it was impossible for him to give the reason which had prompted the board in asking Morley's resignation. This was also the gist of an interview with another member of the Board who supplemented his remarks by saying that Morley had shown himself to be a "competent" man, and that it appeared unwise to supplant him at a time when the naval training camp needed a man of experience in Balboa Park.

Mayor Wilde said over the telephone that he had received information that Morley's resignation has been asked for, and that he had requested the park commission to reconsider its action as he believed that the reason given him --- that of economy --- was insufficient. He also said that he had received word that the resignation would not be requested, but members of the park commission said later that the request was still in force and that the resignation would be looked for at the meeting this afternoon.

The following letter was sent to **The Union** yesterday afternoon by Charles Cristadoro of Point Loma.

B _____ Sanitarium,
Coronado, Calif.
June 10, 1917

Editor: Permit me to call to the attention of the public the perpetuation of what seems to me a great injustice. It may be raw politics, but that cannot be regarded as a mitigating circumstance.

The Park Board is to let out the man who for five years has worked so faithfully and intelligently to make our Exposition grounds such a spot of horticultural and floral beauty as to make the world of visitors marvel. Mr. J. G. Morley, your superintendent of parks, is to leave the park.

Incidentally, the injustice of this move has been accentuated in a most pointed manner.

About two weeks ago the Park Board, with the view of securing all the time possible of Mr. Morley, requested him to vacate his former home and occupy the Model Farm bungalow. At considerable expense, he moved into his new quarters, only now to be forced out without a moment's notice.

To protest may be fruitless, but those of Mr. Morley's friends who would like to give forth an expression of appreciation for the great work he has done for our park, and protest, can do so if they will attend the meeting of the Park Board in the Administration Building at 4 p.m. on the 11th instant, Monday.

Personally, I much regret that such a department as our park, that requires the best of technical administration, should be dragged into the political slough and, perhaps, turned over to the tender mercies of some political worker whose knowledge of a shrub or tree is worse than minus.

Charles Cristadoro

June 12, 1917, San Diego Union, 14:3. Protests against Morley's removal; citizens circulate petitions; meeting announced for yesterday postponed.

The meeting of the Board of Park Commissioners scheduled for yesterday afternoon has been postponed until next Friday at 4 p.m. It will be held in the Administration Building at Balboa Park. It was given out that the Board had contemplated the removal of J. G. Morley from the position of superintendent of parks for well-founded reasons. It was apparent meanwhile that there was much activity in behalf of Morley by citizens from every section of the city.

The activity took concrete shape in the form of a petition which was circulated in the downtown district and which bore, among others, the signature of W. S. Dorland, president of the Chamber of Commerce; President La Motte of the Retail Merchants' Association; Julius Wangenheim of the city planning commission, and G. A. Davidson, former president of the Exposition.

June 15, 1917, San Diego Sun, 1:7. Mayor Wilde for Morley as park head.

"It is not in accord with my wishes. I have written them a letter asking reconsideration. But I cannot be bossy. I have always said a department head should be allowed to use his own discretion, and this principle, I intend to adhere to."

June 15, 1917, San Diego Herald, 1:6. Morley's dismissal causes comment.

The friends of John G. Morley, the deposed park superintendent, are quite indignant over the action of the park board; they insist that Morley is an efficient man and that his removal is purely a matter of politics, this and similar remarks are made by those who wish to find fault with the park board, whether they be friends of Morley or not.

Whether Morley should have been removed from the office in which he has done creditable work is not the question in the minds of that element which likes to find fault and criticize, but it furnishes them with a new theme in connection with the school board activities, and the lack of activity in choosing a chief of police. The gossips are having a harvest of discussion regarding school, park and police matters.

This story, however, was started to tell more particularly about the things that are being said about the removal of the park superintendent, regarding which there are various opinions. Some of the opinions expressed, are the genuine sentiments of those who give them expression, while others are mere gossip, sensation or political dope. It is quite generally agreed that Morley is a competent park man, but that he lacks other qualifications is the opinion of some, even those who pretend to be his friends.

Those men who have been keenly interested in the development of the park all regret the dismissal of Mr. Morley and insist that he is entitled to the credit for having made Balboa Park the beauty spot we are all so proud of. Some of these admit that Mr. Morley has been extravagant in his management, but claim results justify it.

Those who approve the change in management admit that Mr. Morley has done good work but claim that his work, if properly managed, could have been done just as well for much less money. It is also claimed that organized labor has quietly demanded the removal of Mr. Morley. The charge is made that Mr. Morley would not employ a union man when non-union was available.

C. C. Benjamin, the man decided on as the successor of Mr. Morley, is a man of large experience and has had a splendid business training. It is claimed that there are men employed on the park work in the several departments who know more about practical park development than either Morley or Benjamin, and that Benjamin will make use of the talents of these men for better development and greater economy.

June 15, 1917, San Diego Union, 8:1. Morley must go; decision of park commissioners; Board to give place to Charles C. Benjamin, indicated by member.

That the park commissioners have determined that John G. Morley, superintendent of parks, must be displaced this afternoon when the board meets, and that they have decided to give the position to Charles C. Benjamin of the real estate firm of Benjamin and James, was the substance of a statement made by F. F. Grant, member of the park board yesterday.

When asked by a **Union** reporter concerning the reasons which prompted the board to request the resignation of Morley, Mr. Grant said:

"While there is sometime that Morley is an efficient man, the park board, after an examination of his work, has concluded that he has not managed his department with that degree of efficiency which is conducive to business-like results. He had kept man and horses idle when they could have been used in plowing lots in various sections of the city; he has kept no invoices of the equipment in his charge; and he has not prepared the reports which are due from his office monthly. These things do not appear to the park board as indicating exceptional worth in the superintendence of parks, and it is because we wish the parks of the city [have] the best service obtainable that we have decided upon a change.

"In support of this, Judge Ryan, head of the park commission, was told by George W. Marston, himself a supporter of Morley, that the [superintendent] had not been business-like."

Grant said, also, during the interview, that Morley had not been a friend to the present city administration, and that, in addition to Mr. Marston, several of his feigned friends were Julius Wangenheim, W. S. Dorland, president of the Chamber of Commerce; A. D. La Motte, president of the Ad Club; and G. A. Davidson, president of the Southern Trust and Savings Bank.

In speaking of Benjamin, Grant said: "As far as I know [there] has been no intimation in this affair that Mr. Morley was to be removed as a matter of economy. No plan to lower the salary of the superintendent of parks has been made, and I do not think it will be broached.

"Mr. Benjamin has been in the employ of the U. S. Steel Corporation for a number of years, and while he may not have an extensive knowledge of landscape gardening, parking, or in planting and caring of trees and shrubbery, his success with the steel company only was that he was a man of efficiency, and will inject into the park improvement proposition, business methods calculated to give the people of San Diego the worth of their _____ in work done for the park."

Morley said last night he had not as yet handed in his resignation as reported in the evening papers yesterday, and has no intention of doing so until he has a definite understanding of the reasons behind the request. The meeting of the board is scheduled for this afternoon at 4 p.m. and will be held in the Administration Building at Balboa Park.

June 16, 1917, San Diego Sun, 1:3. Meeting planned at Plaza Monday night to protest actions of Board of Education in its dealings with teachers and employees of San Diego schools.

June 16, 1917, San Diego Sun, 2:1-2. Park Board charged with politics in hot meeting; firing of Morley postponed.

The entire meeting was in the nature of an ovation to Supt. Morley, who sat quietly in a chair directly in front of the table around which the commissioners were seated.

Miss Sessions presented a telegram from John McLaren and said that she wanted to speak a word of charity for the present commissioners. "They don't know what efficiency really is," she said. "I don't believe either of you could make a success of a garden. Morley is a plant man, a landscape gardener, and a keen judge of landscape values."

June 16, 1917, San Diego Union, 5:1-3. Morley still in park place; many favor park superintendent.

After listening yesterday afternoon to a score of men and women who spoke in favor of the retention of John G. Morley as superintendent of parks, the board of park commissioners deferred action until another meeting of the board. This is what they did in effect --- actually they merely turned to the consideration of routine business, and did not mention Mr. Morley's name again until they adjourned to meet again at the call of the chairman.

More than fifty friends of Mr. Morley crowded into the president's room in the Administration Building at Balboa Park at 4 o'clock, and for nearly two hours they devoted themselves to eulogies of his work as superintendent, his efficiency and his standing among horticulturists.

The only dissenting voice came towards the end of the meeting when A. H. Anderson, 345 Fifth Street, advanced to the center of the floor and charged Morley with have been careless in the handling of the men employed under him, with having sold plants and equipment belonging to the park without proper accounting of the money received, and with being a drinking man. Anderson's statements were unsupported by any proofs, and several men in the crowd subjected him to a series of vitriolic remarks before he left the room

When the meeting opened, Chairman Ryan asked if there were any present who wished to address the Board, and Melville Klauber immediately took the floor. His speech was a clam review of the park situation as developed by Morley since 1915, and he summed up his remarks by saying that the Board should rescind its demand for Morley's resignation for three reasons. First, the action taken by the Board is not for the best interests of the city; second, the demand for the resignation was not fair to Mr. Morley as a man; thirdly, the action of the Board is hindering the progress of the present city administration.

G. A. Davidson, president of the Southern Trust & Savings Bank, a former president of the Panama-California International Exposition, followed Klauber, and, in part, said:

"I am here because I am a friend of Mr. Morley, and also because I have my knowledge of Mr. Morley's work and character at first hand. Mr. Morley did not lay out the park at the inception of the park's development, but he has laid out all the portions of the park outside the boundaries of the Exposition, and, since 1915, he has been in charge of the entire ground. The beautiful park we now have is not the work of chance, but it is due only to the fact that we have had such a man as John G. Morley in charge."

At this point, there was loud applause. Mr. Davidson said:

"We all know that Mr. Morley was responsible for the fine condition of the Los Angeles parks, and, it is my firm opinion that if he is replaced our park work, what has been accomplished under his direction, is bound to deteriorate."

Colonel J. F. O'Neil, commanding the Twenty-first Infantry with headquarters in the park, spoke of the amicable relationships existing between the superintendent of parks and the military authorities, and mentioned the fact that Morley had done more than any other city official to assist the army and navy in the arrangement of the park for the use of the naval training camp.

Councilman Bard spoke at some length on the attitude of the city administration in the matter and voiced the opinion that the resignation of Morley has been requested to pay political debts and, on the other hand, to embarrass the mayor and City Council. "I know," said Bard, "that the proposed successor to Mr. Morley has been an active candidate for the position of city manager. I also know that one of the most prominent supporters of Mr. Benjamin for this position has been a candidate for the place of district attorney. I know that the candidacies of neither of these men met with a great deal of enthusiasm and I want the city of San Diego to know who is behind this attempt to oust Morley."

Miss Kate Sessions then talked to the Board and was the recipient of much applause.

“I have been identified with the growth of San Diego for more than 30 years,” she said, “and I want to tell you members of the Board that you are ignorant and that this is proven by the manner in which you dispensed with the services of the best secretary you ever had.”

Stephen Connell, Julius Wangenheim, former mayor Charles F. O’Neill, also spoke in favor of the retention of Mr. Morley, so did Ernest Bernard, George Otto, A. A. Darmand and Mrs. Daniel Boyle, florists and horticulturists. A teacher from the botany department of the high school also made a few remarks concerning the need of such a man as Mr. Morley in the city park, following which a number of visitors to the city and others expressed the hope in short speeches that Morley would be retained.

Several letters, including a communication from Mayor Wilde, were then read as was a petition signed by a dozen men who either have served on the park board or who are prominent in the life of San Diego. Arthur Cosgrove, who with F. F. Grant and Judge Henry C. Ryan composes the Board of Park Commissioners, also had a letter on the table in which he said that he had investigated several rumors concerning Mr. Morley’s inefficiency, unseemly habits and incompetency, but that he found every rumor to be unfounded. He followed this by saying that “Morley should be retained for the reason that he has good executive ability in the selection and handling of men; he makes good roads; is a fine plant man; understands San Diego soil, climate and flora; is a thorough botanist and horticulturist. His experience during the Exposition period will prove most valuable for future work and Balboa Park would, no doubt, suffer from making a change at this time.”

Mayor Wilde’s letter to the Board said:

“I understand you are quite determined on calling for the resignation of J. G. Morley, superintendent of parks.

“Thirty days ago I had thought that was the best thing to do in the light of economy and because of many unconfirmed reports detrimental to Mr. Morley’s work, but a close investigation of these complaints did not prove anything to me other than to resolve itself into a political preference, which is sometimes well-meant and deserving, but very often abused and ill-advised.

“Many prominent protests from scores of leading citizens, including prominent navy and army officers, leads me to believe that, for the present at least, it is not quite the harmonious and economical thing to do.

“A new condition within 30 days has come upon us by reason of an army cantonment and new rulings from Secretary of War Baker, and many other elements have entered into the atmosphere since election that are far greater to the rank and file of the average citizen than political reciprocity.

“My real friends, who are deeply interested in a productive and constructive administration, should lighten the mayor’s burden by giving due consideration to any radical changes until satisfactory proof of inefficiency, disloyalty or extravagance is established and corroborated.

“I have no political debts since I did not contract any, nor make any promises other than to serve San Diego.

“This letter is written in a kindly spirit and as a recommendation only.

Sincerely yours,

Louis J. Wilde”

The petition handed to the Board is as follows:

"Gentlemen: Understanding that you are contemplating the dismissal of John G. Morley, superintendent of the park, we, the undersigned, feeling keenly and strongly in this matter, ask you to pause and give proper consideration to what your action will mean.

"In the first place, we consider that should action would be flagrantly unjust. We, the undersigned, have come into relations with Mr. Morley in official and personal capacity and have found him uniformly efficient and courteous. During his incumbency in office the park has made such splendid growth as to have won the love of all San Diegans and the plaudits of every visitor.

"As to Mr. Morley's efficiency as a superintendent, the park itself attests. It is San Diego's greatest asset. It takes a long time to get acquainted with our climatic, soil and horticultural conditions, and to introduce a new man at the present would give a tremendous setback to the park.

"Further, the one essential in a park is continuity of plan. This does not depend so much on continuity of commission as on the continued employment of the superintendent, and the gradual evolution of his plans, unless, of course, he shall have been proven unworthy.

"Those of the undersigned who have been officially interested in the park and Exposition, not only realize Mr. Morley's uniform efficiency, but truly believe that his work, in so far as results are concerned, has been more economical than that of any other administration in the city.

"We earnestly request you not only to put out of your mind all thought of dismissal of Mr. Morley, but, instead, give him your fullest cooperation and support, and we feel satisfied that, in this spirit, he will make a most excellent and faithful superintendent and servant.

"We are sure that in the request we are not voicing our individual sentiment as much as that of the entire community, and you would indeed make an unfortunate step for the park and the city as a whole, by taking the action that is threatened."

This was signed by Julius Wangenheim, former president of the Park Commission, under whose incumbency Mr. Morley was engaged; G. A. Davidson, president of the 1915 and 1916 Expositions; Melville Klauber, president of the Playground Commission; W. S. Dorland, president of the Chamber of Commers; John F. Forward, Jr., former president of the Board of Park Commissioners; F. J. Belcher, chairman of the executive committee, Panama-California Exposition; Arthur H. Marston, for George W. Marston; A. D. La Motte, president of the Merchants' Association; Stephen Counell, president of the San Diego Floral Association; Frank P. Allen, Jr.; Leroy A. Wright, former president of the Park Commission; Charles T. Chandler, former park commissioner.

June 17, 1917, San Diego Union, 12:4-5. The People's Forum: Letter from Charles T. Chandler supporting Morley.

Editor: I attended a meeting with many other San Diegans held at the Administration Building Friday afternoon in the interest of John G. Morley, superintendent of parks of San Diego, and listened to the many forcible arguments in his behalf, and, as I did not make any remarks myself, I desire to express them through your valuable paper.

I was a member of the Park Board for some three years, and when I came on, succeeding, I believe, Mr. Julius Wangenheim, he made the remark to me, "Whatever you do Chandler, by all means retain Mr. Morley as superintendent of parks as I fully know his worth."

During the last three years that I was on the Board there was a great deal of new construction work done in the park, and Mr. Morley must certainly be given all the credit for the laying out and supervision of general planting. We were fortunate in getting considerable money for park improvements, and it would have been utter folly for use park commissioners to have attempted to tell Mr. Morley how to spend the money to the best advantage, as we were not capable of telling him what to plant or how to plant or lay out the grounds anymore than the present Board is capable. We simply turned to him to use [the money], and

told him to go to it, and we would advise from time to time the best we could. We soon learned he was all that he had been represented, and we saw results as they developed.

While he did not lay out the grounds in the Exposition, indirectly he had, more or less, to do with it in providing plants and shrubs from the nursery that was maintained in the park, but he had supervision and maintenance of the entire park, and if he is let out now, no one can rob him of the credit that is due him for the beautiful park that is in existence at present. In the future, as we have more money to do with, there will have to be more of the park brought into cultivation, and no member of the present Board will be capable of advising how this should be done. It takes someone who is an expert and a master of his profession, like Mr. Morley, to accomplish this.

It has been stated that Mr. Morley has made enemies, outside of a few in the audience yesterday who seemed to have a grievance and, I think, an unfair one, and knowing those parties as I do, and the caliber of the men bringing those charges, and the high-class citizens who were present to speak in Mr. Morley's behalf, I consider it ridiculous that such a body of representative citizens should be compelled to come up and plead the cause of such a capable superintendent as Mr. Morley has proven himself to be against the charges of a few disgruntled office seekers.

One of this disgruntled bunch made that charge that Mr. Morley was a booze [drinker]. Of the three years that I was a member of the Park Board, I never saw Mr. Morley under the influence of liquor, or even detected the smell of same on his breath, and, as far as his ever neglecting his duties or his work, I was never aware of same during my entire term.

He has always appeared to me as a quiet, unassuming gentleman, one who is master of his profession second to none; and I honestly believe it is the desire of ninety-nine percent of the taxpayers and citizens of San Diego that Mr. Morley be retained as superintendent of parks as long as he makes good, which he certainly has up to the present.

Respectfully.

Charles T. Chandler

June 19, 1917, San Diego Sun, 3:1-2. What the Navy lads do from morning until evening; routine at local camp, by Raynor De Burn.

There are now practically 1000 men and officers at the San Diego naval training camp at the exposition, and hundreds more are expected until the total of possibly 4000 or 5000 will be in training here. The exigencies of war prevent the maintaining of a set schedule for the schooling of the seamen, and the advanced classes may be called to sea at any time, to fill the complements of ships short of men. San Diego boys enlisted in the seaman branch may soon be assigned to the local station.

June 19, 1917, San Diego Union, 5:3. One thousand apprentice seamen in camp at Balboa Park.

How long it takes to make a sure enough bluejacket of raw material has not yet been decided as the naval station training is a comparatively new idea with Uncle Sam.

San Diego Union, June 20, 1917, 5:2-4. Dr. Montessori is drawn back to San Diego by charm of Exposition, by Edgar L. Hewett.

June 22, 1917, San Diego Herald, 1:3. Friendship Fiesta draws big crowd.

June 22, 1917, San Diego Sun, 1:3. Visitors flocking into city for Friendship Fiesta.

June 23, 1917, San Diego Sun, 1:5, 2:6. Parade is high spot of Fiesta.

June 23, 1917, San Diego Union, 14:1-3. Attorneys watch meeting of Park Board, then leave; one is Deputy District Attorney, but he declines to tell errand; no charges filed against Superintendent Morley, Board President announced; playground for soldiers at Park.

One mystery follows another in city park affairs.

Earl F. Drake, deputy in the district attorney's office, attended a meeting of the park commissioners yesterday. It was rumored that he was there on official business.

Drake left before the meeting was over without saying anything.

Called up at his office later and asked why he was present at the meeting, Drake said, "Oh, I just dropped in. I can't tell you anything further. Just say I dropped in."

When asked if he was present in an official or private capacity, Drake said, "I don't know."

He said District Attorney Marsh didn't even know that he (Drake) was there.

"Marsh is busy with the trial of a case," said Drake. "Just say I merely dropped in."

Attorneys A. H. Sweet and Lane D. Webber also attended the meeting. Mr. Webber said he represented John G. Morley.

"I would like to know if any charges have been preferred with the Board against Mr. Morley," said Mr. Webber.

"There are no charges," said President Ryan. "I announced that the other day."

"Have there been any charges filed in the meantime?" asked his attorney.

"No," said Ryan. "There is nothing to conceal."

"I trust that I'll be notified if there are," said Webber.

President Ryan ordered the secretary to inform Mr. Webber if any charges were filed with the Board.

The discharge of Mr. Morley was recently threatened, Secretary F. F. Grant of the Board making an open statement to that effect, but the Board has so far failed to take any action along that line. Morley was on the job yesterday and made reports to the Board, giving advice as to park work when called upon. It had been announced that Charles C. Benjamin, of Benjamin and James, would be given Morley's place. Mayor Wilde announced a few days ago that it was purely a departmental affair and he had no idea of interfering.

There was a full attendance of the Park Commission at the meeting yesterday. President H. C. Ryan, F. F. Grant and Arthur Cosgrove were all there. Ryan and Cosgrove said after the meeting that they

did not know why Deputy Attorney Drake had attended the meeting. They said they know nothing about charges being preferred against anyone.

Considerable business was transacted by the Board yesterday. The Playgrounds Commission was given the right to equip a piece of park ground for a playground to be used by the army and navy men now in the park. This will probably be a piece of land just north of the old Fisheries Building. It was also practically decided that the playgrounds people would be allowed to use the mesa just south of the Golden Hills playground for a free municipal golf links. The park commissioners and the playgrounds commissioners will look over the two sites Monday afternoon. Representatives of the army and navy appeared before the Board and urged the establishing of a playground. Melville Klauber spoke for the Playground Commission.

Officials of the navy served notice that they would have their own canteen on the grounds for the sale of ice cream and soft drinks under government supervision, and that the men in training would not be permitted to patronize stands run by the Park Commission or individuals. Several applications were received by the Commission from people wanting to run stands. President Ryan announced that the city attorney had been called upon for an opinion regarding concessions in the park and that no action regarding civilian patronage on the grounds would be taken until this opinion was received.

Before the Board adjourned, a resolution introduced by Mr. Grant was adopted as follows:

“Be it resolved that all expenditures contemplated or made for use of the parks of this city, or any of them, shall be made only on requisition in writing first submitted to the Board and approved by its secretary, except at times of great emergency, when the secretary of the Board, or in his absence, any member of the Board, may approve such requisition or purchase.”

A copy of this resolution was ordered filed with the city auditor.

June 24, 1917, San Diego Union, 1:7-8. Friendship Day celebrated.

(Excerpts)

The boundary line between the United States and Mexico wasn't exactly erased yesterday. It still seems to exist, as originally surveyed. But “neighbors” from both sides of the dividing mark seemed to forget that it was there. The Friendship Fiesta --- the great Carnival of Good Will --- accomplished that.

Pledged to amity, they met almost as one people in San Diego yesterday. Under the Stars and Stripes, they gathered and clasped hands. The hearts of one country beat true to those of another. And today these same “neighbors” will assemble at Tijuana, beneath the Mexican banner, to proclaim anew the enduring friendship that has been the keynote throughout this great festival.

San Diego has extended the full hospitality of its people. Mexico at Tijuana today will offer in return the complete hospitality of its citizens. The gay carnival spirit --- the desire to cement a lasting friendship such as has prevailed in San Diego for the past two days --- will be personified “South of the Monument.”

Not since the gay, glittering days of the Exposition has anything been staged in Southern California to equal the festivities of yesterday. The parade exceeded all expectations. It was witnessed by a crowd estimated at 10,000 people and it required a full hour to pass a given point.

The exercises at the Spreckels organ in Balboa Park were impressive and were joined in by thousands. The dinner last night at the U. S. Grant Hotel was one of the most elaborate ever given in the city. The street carnival and band concerts on the streets of the city last night drew immense throngs of merrymakers and afforded an evening of keen enjoyment. Society turned out in force at the ball given by Mayor Wilde in honor of the city's guests at the U. S. Grant ballroom.

At the Exposition yesterday afternoon, Governor Cantu made a short but eloquent speech in Spanish, bespeaking friendship for the people of San Diego and thanking them for the honors paid him here. He was cheered for several minutes. Mayor L. J. Wilde delivered the address of welcome. He said in part:

“It is extremely significant that in this hour of international conflict, when the world is afire with war, that two great republics of the northern division of the western hemisphere should meet and mingle as friends and neighbors.

“This splendid Friendship Fiesta must and shall be marked by that wealth of hospitality for which the community of San Diego, and, in fact, the entire Southland is renowned. It must and shall be marked by that entertainment and those recreational and special features which will rekindle the spirit of romance that came to us from the land of Old Spain, under the leadership of those intrepid navigators, Balboa and Cabrillo, and the legion of the brave and dauntless who accompanied them; that this thought will quicken in use again the spirit of empire builders and turn our thoughts to the sacrifice and suffering that was endured by those who wrested the western hemisphere from barbarism and savagery to civilization and culture, and will cause us to renew the debt of honor and appreciation that we owe to Junipero Serra and the devoted and heroic padres who carried the cross through the trackless forests and over the untrailed mountains throughout the entire length of El Camino Real, from sun-kissed San Diego to snow-covered Shasta.”

June 24, 1917, San Diego Union, 10:2-4. Balboa Park great naval training camp; apprentice seamen thrive in perfect surroundings.

The finest naval training camp site in America, say naval experts in developing Balboa Park, the home of 1,000 bright-faced American lads being trained to take their places with the high-seas fleet.

Under smiling skies, living in one of the most beautiful spots in Southern California, with plenty of athletic exercises to develop their muscles, the apprentice seamen sent here for preliminary training are more rapidly whipped into shape for sea duty than at any other training station in the country.

The irrepressible humor of American youth is not to be denied, even with the shadow of war hovering over their daily life. This is exemplified in their drills, despite the strict discipline enforced.

At bayonet drill Thursday morning several of the apprentice seamen did not go through the exercise with the vigor demanded by the instructor, a husky gunner's mate with a foghorn voice, that boomed clear across the Plaza de Panama.

“Right thrust, parry, left thrust, lunge,” shouted the instructor. “Now listen, shipmate, you haven't got a pitchfork in your hands. Handle that gun as if you were face to face with a German. Put some ginger into your drills. Hey, you, don't stab that fellow with your bayonet. The hospital is already full of soup hounds. Now, let's go through that drill like you mean business. Thrust, parry, lunge. Ah, that's the stuff. You fellows will make fighting men yet.”

Within two weeks after the raw recruit is received at the Balboa Park naval training camp, improvement is noted. He stands more erect, walks with the spring of the trained athlete, and goes through the various evolutions on the drill grounds with a vigor and snap that bring smiles of satisfaction to the faces of his instructors. Within ninety days he is ready to take his place in the finest body of seafighters in the world --- the commissioned and enlisted personnel of the United States Navy.

Clad in white duck uniforms, the 1,000 youths at the naval training camp offer an inspiring sight at their daily drills, especially during the morning setting-up exercises and during battalion and regimental maneuvers.

Uncle Sam does not believe in all work and no play. The naval lads are allowed plenty of time for amusement. The eastern section of the Pan-Pacific Building has been fitted up as a Y. M. C. A., where men off duty may find wholesome amusement. The building has been supplied with a motion picture machine, a

pianola and Victrola, and the latest periodicals and newspapers. Billiard tables will be installed within another week.

The western half of the Pan-Pacific Building is being fitted up as a dormitory. Stanchions for swinging the hammocks are nearing completion. The main dormitory is located in the Varied Industries Building. This is equipped with cots. The Foreign Arts Building is not utilized as a quarantine depot. A new draft of men are received from Goat Island, they are quarantined in this building for a period of three weeks in order to eliminate the possibility of an epidemic of measles, mumps or other contagious diseases.

Butts' manual exercises, Swedish drills, company and initiation drills keep the youngsters busy from first call until recall is sounded at 11:30 o'clock. Dinner is served at noon. First call for afternoon drill is sounded at 1:30 p.m. and recall at 2:30 o'clock. There is a fourth drill period from 3 to 4 o'clock. Supper is served at "four bell" and from then until tattoo is sounded at 9 p.m. the apprentice seamen are at liberty to do as they please.

The mess hall, bakery and gallery are models of cleanliness and efficiency. W. J. West, ship's cook, first class, is in charge of the galley. Associated with him in preparing the meals of the 1,00 healthy seamen are R. Fultz, H.J. Brown, J. I. Henry, F. W. DeMoss, L. L. Jernberg, a. Derowitsch, F. L. Hardesty, fourth class; and seamen F. C. Sefton, A. S. Sylvester, W. M. Rands, and C. Evans. The bake shop is in charge of F. V. Korn, baker, first class, and seamen H. Miller and R. O. Dunbar; H. H. Ham, yeoman, third class, is in charge of the issuing room. R. F. Dunn and I. F. Kettner act as "jack-of-the-dusts."

(A roster of officers of the naval training camp follows.)

The lowest paid man in the United States Navy during these stirring wartime days received \$35 a month. Payday at the naval training camp came a few days ago and because some of the youngsters has two months pay due them the naval disbursements [were] approximately \$45,000.

June 25, 1917, San Diego Sun, 6:5. Friendship Fiesta has been closed.

June 28, 1917, San Diego Sun, 3:1. Playground for men of United States force; city to provide recreation spot at Exposition; the new playground is to occupy an area north of the Fisheries Building..

June 28, 1917, San Diego Sun, 4:6. Army Y. M. C. A. was opened in the former Harvester building last evening; equipped with reading and writing rooms, gymnasium, basket ball court, billiard room, piano, phonograph, motion picture machine, etc.

June 28, 1917, San Diego Union, 5:1. Soldier's Y. M. C. A. is thrown open; Harvester Building turned over to servicemen; speeches made.

June 28, 1917, San Diego Union, 5:5. Charity concert is set for July 15 in park

June 28, 1917, San Diego Union, 6:4. Dr. Stewart will give special recital for Bluejackets this afternoon at 4 o'clock.

June 28, 1917, San Diego Union, 7:1. City Council orders playgrounds for soldiers; sets aside \$3,000 for park work and addition to La Jolla playgrounds.

June 29, 1917, San Diego Sun, 11:5. Hundreds dance at Exposition plaza.

Participating were men from the three branches of the military service, the marine corps, army and navy. More than 700 of San Diego's daughters in attendance.

June 29, 1917, San Diego Union, 7:2-3. July 4th program at Balboa Park promises to be greatest ever given.

June 29, 1917, San Diego Union, 7:5. Art exhibit in the government building on the Plaza makes room for Uncle Sam in hurry; Director Lovins patriotically moves to new quarters in Indian Arts Building; quarters needed for 400 boys from the naval station in San Francisco who were to arrive today.

June 30, 1917, San Diego Union, 8:1. Park theater permit granted Madame Tingley.

Mme. Katherine Tingley yesterday afternoon was granted permission to establish temporarily at Balboa Park, a "non-sectarian, non-denominational, non-political" amusement place for enlisted men, the tenure of the premises to be revocable at any time, either by the park board or the military authorities.

It is planned to use the Standard Oil Building, which has been turned over to the Twenty-first Regiment, U. S. Infantry, for the time being. Mme. Tingley will build an open-air theater in the rear of this building, and here plays of the best character will be given by members of the International Brotherhood League.

Mme. Tingley appeared before the members of the park commission and emphasized that the work she is to do is to be completely non-sectarian. She was accompanied by J. Frank Knoche, Mrs. Ethelind Dunn and Joseph H. Fussell. Mme. Tingley's work at Montauk Point during the Spanish-American war was described and praised.

She declared that the work of the Brotherhood does not refer to the Theosophical Society, but to the humanitarian task of helping soldiers. She offered to build the open-air theater, and, after it ceased to be used, to remove it and leave the grounds in good shape.

Colonel J. F. O'Neil, ranking military officer at San Diego, said he approved the plan, provided it was thoroughly non-sectarian, but there had been definite orders from the war department prohibiting sectarian work of any kind, except through the Y. M. C. A. and the Knights of Columbus. He praised the atmosphere of the entertainments given by Mme. Tingley at the Isis Theater. Colonel O'Neil will appoint an officer to act with the secretary of the park board as censors of literature and entertainments given.

A communication was received from F. A. Binney urging that a concession be granted someone to rent roller skates to the men for skating on the Plaza. He proposed that one of the canyons east of the Isthmus be dammed and a swimming pool for soldiers and sailors constructed. There were other suggestions made for recreation for the enlisted men. The letter was referred to the playground commission.

F. J. Benbough appeared before the board with a petition to cut down six cedar trees located on the south side of Date Street, between Seventh and Eighth, declaring them detrimental to a building he plans to erect. He agrees to replace these trees with such other trees as the board may direct. He also asks permission to build 200 feet of concrete sidewalks, a driveway, and a cement stairway across the strip owned by the park. Commissioners Grant and Cosgrove were appointed a committee to inspect the place and report at the next meeting.

A communication was received from the military and naval authorities announcing that they were policing the park, but asking that one city policeman be stationed upon the grounds. The speed of automobiles is being limited to fifteen miles an hour on the Isthmus and eight miles an hour in more congested portions of the grounds.

Dr. Edgar L. Hewett, director of the San Diego Museum, appeared before the Board and invited the members to make a trip of inspection with him of the work on reinstallation of exhibits which is just being completed.

The matter of the Sacramento Building, badly needed by the navy, was considered. Dr. Hewett declared that the Jessop archery exhibit, now housed there, as the most valuable in the world, even excelling that in the British museum. It took a number of weeks and about \$1,200 to install it, and he declared that with the present force it would take until September 1 to remove the exhibit without danger to the collection. The proposal to give the navy the top floor temporarily was considered.

A communication was read from Dr. Harry M. Wegeforth, president of the Zoological Society, saying that the organization had been given \$500 worth of animals that need better quarters. The Society asks for funds for this. A kangaroo, a sacred cow and an emu are included in the request for cages. It also was asked that three corrals, each forty feet square, be built for slaughter houses for food for the animals and the use of incinerators.

A motion was carried that no more slaughtering of animals for food for the zoo be permitted within the main grounds, and that a suitable place, with adequate sewer connection, be established and moved into within fifteen days.

Circa June 30, 1917, Superintendent's Report for June 1917, Board of Park Commissioners Correspondence.

The work in the department has been chiefly maintenance owing to the reduction in the force of men. Because of financial conditions it is impossible to keep the maintenance to as high a standard as during the past two years.

The realignment and grading of the main road on the East division of the Park has been completed at a total cost of \$820.00.

The roads in the Park are liable to deteriorate owing to the increased amount of traffic caused by the large amount of heavy hauling for the Army, Navy and Marine Corps, as we have not the amount of men to continually keep the roads in perfect condition.

Decorations have been furnished to several civic organizations and for performances at the Organ Pavilion. While there is more or less expense attached to these items, it is much appreciated by the people of the city. We are also furnishing a movable bandstand twice a week at the Plaza for the concerts given by the 21st Infantry Band.

The work now being done for the Navy Department causes a large amount of extra work in the office and, I believe, there should be some assistance given to Miss Smock until all the Navy Department construction is completed, as, at present, we are unable to keep up with the account. The extra expense entailed can be taken care of in the 10 percent overhead charges.

Two thousand and seventy-eight plants have been used in the Botanical Building during the month and four thousand planted in the Exposition grounds, and nine thousand six hundred and forty-eight flowering plants, trees and shrubs planted in other portions of Balboa Park and Cabrillo Terrace.

Several events have been given at the Stadium during the month, Viz.: the Field Meet of the Army and Navy Departments, the Flag Day exercises, High School graduation, etc. These extra events tend to increase the cost of maintenance as we have to transfer men from other work to have the grounds in perfect condition on these special occasions, in addition to the regular upkeep of the grounds.

June/July 1917, California Garden, Vol. 9 No. 1, 5-6. Monthly Excursion In and Around Balboa Park, by G. R. Gorton.

It is sometime since the Park Nursery has received the consideration which it its due. This is not just, for obviously the nursery is the genesis of things, and without a good nursery --- which we have --- we should not have much of a park, which we do --- very much. Here we have a history in the making, and it is interesting to step behind the scenes and see it done.

When the Exposition became a memory, the stock and equipment of the Exposition nursery, which had been maintained at the head of 18th Street for growing stock for that portion of the park not included within the boundaries of the Exposition, was combined with the Exposition Nursery at the location of the latter.

Primarily, the Park Nursery, like any other nursery, is for purposes of propagation, but there is another very important service which it renders our park system --- namely that of receiving the thousands of plants and bulbs which have a dormant season or a resting period --- during which they are not of much value for decorative purposes, and yet must, in many instances, receive, if anything, even more care than when they were doing their bit in ornamentation of our park. Probably the most of this class of material emanates from the Botanical Building, in the form of Gloxinias, tuberous Begonias, Rhododendrons, Anthuriums, Caladiums, etc., although the territory outside occasionally has patients that need a rest cure. This calls for the handling and rehandling of tens of thousands of plants every year, which must be loaded and hauled to the nursery, unloaded and placed in frames or houses, or wherever they go, and then, after due time, the process is repeated conversely, and these plants which have been temporarily incapacitated for display purposes, must be returned from whence they came. During the time they spend in the nursery, they are barbered and manicured, and conditioned generally to bring them back into show condition, and this alone is no small task.

But in all this the principal reason for the existence of a nursery is not lost sight of, and the work of propagation goes steadily on, so that the bulk of the planting material used for replacing and for new plantations is produced within the Park Department. For instance, just now there are several thousand Chatelaine Begonias which are well on their way towards supplying the Botanical Building with the wherewithal to charm the beholder. For the same purpose there are some three thousand *Exacum affine*, one of the daintiest of the more modest type of subjects used in the conservatory. It will interest those who have private conservatories to investigate the merits of *Nertera depressa* as a ground cover of almost unbelievable rapidity of growth. Twelve two-inch pots of this subject were obtained not over eight weeks ago and, under glass, these have multiplied into over two thousand two-inch pots. These are ready now to be divided and their progress henceforth seems to be merely a matter of arithmetical progression. The plant is of a bright green color, the leaves, which are possibly a quarter of an inch in diameter, somewhat suggests the segments of the fronds of some species of *adiantum*s. The whole plant is of very dense habit, and admirably suited for use in conservatory decoration.

Then, of course, there are quantities of *Primulas* --- *obconca* and *chinensis* varieties, *malacordes* and *verbesii* --- all useful types, *Cinerarias* by the thousand, bedding plants of all kinds --- all good kinds, that is --- including *ageratum*s, *antirrhinum*s, *Petunias*, French Marigolds, *Salvias*, *Lobelias*, *Geraniums* (of course) and dozens of others which are indispensable. There are *Coleus*, both from seed and from cuttings. Not very many seedlings, as these have the very undesirable trait of flowering prematurely, and are lacking in the richness of color which those propagated from cuttings seem to possess.

There are a number of *Azaleas* planted in the ground under lath which were severely headed back at the close of the flowering season. This apparently harsh treatment appears to have been exactly correct, as the plants are coming out well, and exhibiting promise of being very good specimens, indeed, when their time comes around.

There are several thousand very prosperous looking seedling *Cotoneasters*, *pannosa* and *nepalensis*, which will in time gladden the hearts of many who appreciate the decorative value of this genus of shrubs.

There are over sixteen thousand *Chrysanthemums* being grown for use in the Botanical Building and elsewhere, and the prospects are that the display will be even finer this year than heretofore.

For years the Park Nursery has grown a great deal of its material in cloth houses --- in fact cuttings of certain plants, such as *Eric Melanthera*, may be stuck under cloth when it is difficult indeed to get results under cloth --- at least with ordinary treatment. It is interesting to note that a quantity of *Lawson's Cypress* is being grown from cuttings in one of the cloth houses, as is also *Ceanothus arborea* --- an arborescent species as its specific name indicates, indigenous to the Santa Barbara islands and elsewhere. *Pentstemon* in varieties is also being grown under cloth.

Out in the fields are roses, bedding plants --- "many plants of many kinds" --- the very eccentric and deceptive *Belladonna* "*Lily*," which has a fetching way of feigning death, and just as its possessor is

mourning the fact that the plant has died down without blooming, it arises Phoenix-like and hangs flowers on itself.

There is a plantation of Ericas, which demonstrates the fact that this subject needs shade in this land of sunshine. There are a half dozen species being grown, both in the sun and shade, and invariably those grown in the sunny locations bear resemblance to singed cats, while those in at least partial shade, flourish like the bay tree (that is, as the bay tree does elsewhere than here). Of the six species, probably melanthera deserves first place, and when properly located is very effective indeed. There are some very thrifty Pittosporums --- one of our best general for Southern California --- in four species: three best known --- undulatum, engenoides and tobira, and one less known but equally desirable, viz.: phillyraeoides. There is a field of Cearus deodara --- Himalayan or Deodar Cedar, one of the most graceful of conifers, thriving here as many of its order to not. There are Pomegranates in four varieties, Poinsettias, Spireas, etc. A very interesting collection of Agaves, Aloes, Dasylerions, and other succulents was part of the inheritance from the Exposition, which will furnish material for additional desert plantings when the occasion shall arise.

June/July, 1917, California Garden, Vol. 9, No. 1, 10-11 Pickings and Peckings by the Early Bird.
