

BALBOA PARK HISTORY

(Note: Except for places, wherein whole articles are given, the following is an index to articles and items in The Amero Collection at the San Diego Historical Society Research Archives. The proper citation is "Index to Balboa Park History, 1868-1999," Amero Collection, San Diego History Center Library, as compiled by Richard W. Amero.)

1868 - 1999

October 15, 1976, "San Diego's City Park, 1868-1902, An Early Debate on Environment and Profit," by Gregory E. Montes.

INTRODUCTION: The history of City Park in 1868-1902 has fascinating and amusing moments but above all it is sobering to think that the entire 1400-acre park was generally preserved in the late 19th century, heyday of shady land deals, whereas, in the presumably more enlightened 20th century, 322 acres of the park have been deeded or leased to freeways (109.2 acres), a burgeoning naval hospital (92.6 acres) and other incompatible uses.

CONCLUSION: The history of City Park in 1868-1902 has presented the major figures, issues, and possible motives related to the founding, attempted reductions, actual and proposed motives and tenacious preservation of the 1400-acre tract. Despite rife land speculation in San Diego, City Park remained intact until 1902, mainly due to the efforts of relatively few, although well-placed people who appreciated the unique, mild climate, diverse vegetation and dramatic scenery of San Diego. They had migrated to enjoy these assets and not just to get rich. These individuals faltered at times and allowed some park incursions which later bode ill for it, but generally they stoutly defended City Park and retained their vision of what it could and must become someday for inevitable, growing urban needs. The City Park advocates learned and convinced others, especially from the example of New York's Central Park, that a large, well-designed public park could improve not only the health and spirits of all classes of city residents but also the local tourism, settlement, tax base and economic growth. But beyond that the City Park champions who got their fill of economic realism in their daily work, prized a large park for providing near the hectic town, quietude, chances to reflect, romance, vast views of distant scenery, and close observation of colorful, native wildflowers.

History of San Diego, by H. C. Hopkins, City Printing Company, San Diego, 1929, pp. 319-328.

February 13, 1868. Isabella Carruthers purchased 40 acres for \$175.00 at the southwest corner of what otherwise would have been a square park of 1440 acres.

February 15, 1868. First park resolution stating that the present park board (E. W. Morse, Thomas H. Bush, J. H. Mannasse) reserve two of the 160 acres of city land for the purpose of securing a suitable park.

April 29, 1868. New board took office (Marcus Schiller, Jose G. Estudillo, Joshua Sloane).

May 26, 1868. Moved and seconded by Board of Trustees that Lots (by number) "be for a park."

"Byways of Old City Park," by Herbert G. Hensley, **San Diego Historical Society Quarterly**. Vol. 1, No. 3, July 1955, pp. 35-36.

The isolation camp for plague-ridden persons lay across the divide over which Pershing Drive now passes, in that branch-canyon up which the old Park Belt Line Railway ran for a brief while. . . . Another spot in the park was the cave-dwelling of Professor LeBatt.

Balboa Park --- in those days called City Park --- was a waste of canyon and mesa, when our family moved to town in 1882. It was not entirely unused, although nothing had been done toward its improvement for public recreation: there were two powder-houses, which were off and on, the cause of worry and near-tragedy, and the City Pound was located in the canyon more recently named Cabrillo. In the early nineties, the militia companies had their target ranges there.

Another institution in the park, which may have been thought to be sufficiently distant from town, was the so-called "pest house." This was the isolation camp for any plague-ridden persons, and it lay across the divide over which Pershing Drive now passes, in that branch-canyon up which the old Park Belt Line Railway ran for a brief while. The site was where the little, farm-like clump of houses can be seen now, in the bottom of the canyon, just east of the 30th street bridge; and I rather think that one of those small buildings is part of the original isolation camp.

The place was mostly unoccupied, but during the smallpox scare of 1887 it harbored several cases of that disease, and the town had equipped and furnished it generously in apprehension of possibly more of them. There were sixteen beds, supplied with good mattresses and blankets, chairs, tables, two stoves with cooking utensils, besides picks and shovels and sundry other tools.

During the following years of its vacancy nothing appears to have been removed by the town, and the place was left entirely unguarded. It lay so far beyond the built-up part of town that scarcely anybody ever passed within sight of it.

However, late in 1892, John Palmer, who had been its last keeper, having business in that direction, was moved to go over and take a look at it. He discovered that some very enterprising person had established himself there, evidently for a protracted period, and engaged in bee keeping. Palmer found many hives stacked in the main house, together with great numbers of empty combs from which the honey had been extracted. But every article of furniture, including stoves and bedsteads, had been carried off. And they were never recovered.

When this news got about, many people who had a liking for honey were worried. No doubt the bee keeper had sold his produce right in town and some of that honey might have dated from only shortly after the last smallpox patients checked out of the place --- alive or dead. Apparently, however, nobody took any harm thereby; nor, I believe, was the identity of the enterprising apiarist ever learned.

Incidentally, so concerned were people with the dangers of the "plague" that one citizen gave the following advice in his "letter to the editor" of the *Sun*: "Every person who has anything to do with smallpox patients should have a distinctive mark about him --- say a yellow band around his hat --- or something of this kind should be worn, thus advising the unwary that the wearer has been in contact with the disease."

Another spot in the city park, not so well known then and scarcely to be located now, was the cave-dwelling of Professor LeBatt. This unfortunate man, though said to have been highly talented, apparently was brought to the pass of living in a hole in the hillside, almost hidden by huge sumac bushes, through a strange inability to profit financially from his gifts or to make a fair living in other ways. At least, that was the general understanding. He was, people said, a pianist of brilliant parts; he gave at least one concert at Horton Hall, and for a time he tried to teach. He made one trip somewhere up north but soon returned to his cave, and he finally committed suicide there in the canyon.

San Diego Weekly Union, November 4, 1869, 2:3. Our Public Park, anonymous letter . . . The time was before the days of free schools, steam and telegraphs, when the dwellers in cities thought only of their narrow streets, gloomy buildings, their trades and occupations: when each one was concerned only for himself, and sought only his own interest or happiness. But happily the world has grown wiser since then, and men have learned that great public improvements concern and benefit every individual, just as much as they do the community to which he belongs. A park in which men may go and breathe the pure air, look upon the sky unobscured by smoke, and see grass and trees and shrubbery, undulations of surface combining to form an exquisite landscape, and hear the song of the birds, is the property of everyone who enters or possesses the privilege of entering it, and is maintained for his comfort and happiness. This is now so well understood that

every considerable city in Europe and the United States, with the exception of San Francisco, has its vast tract of land reserved and beautified as a park.

If San Diego is to become an important city, as seems now generally to be her destiny, we, like other cities, must have our public parks. Fortunately, 1480 acres of land upon the Mesa have been reserved for this purpose. The land has cost us nothing. The tract selected is admirably adapted to the purpose, being diversified by plain, valley, gorge and ravine, and which can be so modified and improved by art as to present a scenery, the most diverse, grand and beautiful.

Yet, strange to say, dishonest adventurers, under various pretexts, are attempting to have the Park Reservation wholly alienated or so reduced as to be comparatively valueless. The commonest plea alleged for this is the great size of the Reservation. So far from being too large, our park is almost too small, as a glance at other parks will show. The Philadelphia park contains 2200 acres; that at Chicago over 2080 acres; Central Park, New York, over 800, and the people are anxious to have it enlarged. Prospect Park, Brooklyn, is to be much larger; London Parks contain from 500 to 1200 acres each. The Bois de Boulogne at Paris contains over 2000 acres. San Francisco squandered its 8000 acres of land and is today without a park or the means to purchase one.

Let us all take an interest in this matter, and assist in preserving for ourselves and our children, this Park Reservation. Let us by our private sympathy, conversation and influence, and by our public action resist to the bitter end all bad men who seek to take this away from us. With this park we have a perpetual source of pride and satisfaction, without it, of shame and bitter unavailing regrets.

June 23, 1870, San Diego Union, 2:3. EDITORIAL - An Artesian Well: A good water supply is the most urgent necessity of San Diego. At present our citizens depend upon the bed of the San Diego River, in Old Town, and a very few good wells in New Town; but the tax is heavy upon ninety-nine one-hundredths of the people, who have to pay the water-carrier for a scanty supply.

The remedy lies in artesian well boring. One good artesian well, with a proper reservoir, would afford an ample supply for this city for four thousand inhabitants, and would besides furnish a fair surplus for irrigation in gardens. The results obtained from the experiment of artesian well boring in Los Angeles and San Bernardino counties fully sustain our position.

A singular fact connected with ordinary well sinking in this city is that while some wells contain pure, sweet water, others afford nothing but that which is muddy, brackish and unfit for even washing purposes. This is to be accounted for by the peculiar formation of this portion of the coast, consisting of alternate strata of sand and shells; first the wash of sand and then that of shell. These strata are not one upon another, but the lines of demarcation are perpendicular. Now where a well penetrates the same formation the result is pure water; where the layer of shells is encountered the water is bad, being impregnated with the salt and alkali of that formation.

But an artesian well sunk down through this shell formation to a proper depth would reach pure water. And our citizens should take a step in this direction. As it is beyond the means of any single individual, a plan should be devised whereby a company might be induced to undertake the work.

All know that we have laid off adjacent to town, a large tract as a Public Park. Nothing has yet been done towards its improvement; but with the completion of the Transcontinental Railroad this Park will become central, and will prove valuable as a place of recreation and pleasure to our people. With the present dry season nothing can be done in the way of cultivation there, and seasons of drought may affect us hereafter as heretofore. How important, then, that all the artificial means in our power be employed to aid in the improvement of the city's "breathing place."

We suggest, then, that a movement of this kind be initiated. The Public Park has an altitude of an hundred feet or more above the city. Why cannot the city donate forty acres of this land to a responsible company of citizens, on condition that they bore a well, make it a success, and forever furnish to the city free of charge all the water necessary for public purposes --- and especially the park. Then this company can easily lay

water pipe from the well and its reservoir to the city and all can be accommodated with a cheap and abundant supply of water. It is true that the Legislature must grant the authority to the City Trustees ere the work can be completed, and this action will be a wholesome check on any attempt at swindle or corruption. If the city builds to the extent we have reason to contemplate, then, of course, a water company of greater magnitude can operate. But we look to a present need; to actual work; and not to the sufficiency of a franchise as a matter of speculation.

We are not the advocates of the gratuitous giving away of city lands; but it seems to us this is practical, necessary and wise. Let something be done.

June 30, 1870, San Diego Union, 2:1. EDITORIAL: The Park of San Diego . . . One of the wisest things ever done by the city was the setting aside of fourteen hundred and forty acres for a public park. Owing to the want of such foresight the citizens of other places have been obliged, either to dispense with these luxuries, or to look for them to very precarious sources. The citizens of Chester, England, have received such a gift from the Marquis of Westminster; but he is the richest man in England, and few towns boast of such liberality in their citizens. The Grand Jury of San Francisco has proposed that space for a park be asked of the United States Government; but the Government is not an owner in the vicinity of every city, and, besides, is likely to hold on to her own where she is. In Chicago, land for a park has been taken up by a company; but even where such companies can find suitable tracts, it is better that public parks should belong to cities themselves. The wisdom of our officials in the Park reservation should be recognized by every citizen.

In favor of a large Park in the vicinity of San Diego, we have, at the outset, the usual arguments which are pressed elsewhere. Both health and pleasure are promoted by having near any seaport city, a broad tract, untainted by chimnies [sic] and other appurtenances of residence, and traced with roads and paths for pleasant walks and drives. But, in favor of a Park reservation near San Diego, we have arguments more special in their character. A Park becomes in time a botanical garden; and we are here so happily situated as regards climate --- occupying a middle position between the tropical and temperate belts --- that a botanical garden would embrace within its limits a variety scarcely to be found growing outdoors in any other part of the world. So, too, with animal life. The Central Park, New York, is becoming also a zoological garden. But the preservation of animals is expensive, owing to the need of artificial heat in the care of those from the tropics. Almost any animal can live the year round in the open air in San Diego. Indeed, we look forward to the time when not the least of the attractions of this place, will be its magnificent Park, with its unwonted wealth of vegetable and animal life.

July 13, 1871, San Diego Weekly Union, 3:1. The Artesian Water Experiment . . . Mr. O. P. Calloway was busily engaged yesterday in connection with the City Trustees in selecting a spot for boring an artesian well. The place selected is on the City Park Reservation, near the end of 11th street. The altitude of the point selected was found to be 94-1/2 feet above the level of the sea. The machine, which arrived on the steamer *Wm. Taber*, will be moved to the ground today, and will be put into place at once. As we have stated, heretofore, the drill is of the most improved kind, being Severance and Holt's famous Diamond Drill. The drill will be driven by a fine 20-horsepower engine. The experimental boring will be three inches in diameter, but should flowing water be obtained, the diameter can be enlarged to any extent desired. A daily record of the geological formation encountered will be preserved.

August 13, 1871, San Diego Union, 2:1. EDITORIAL: The Park

We had almost forgotten to note one point in the "People's" Confiscating Address. We refer to their denouncement of a supposed plan to divide up the City Park Reservation. We endorse their declaration that the Park must be preserved --- whether they are in earnest or not --- but we very much suspect that all this noise about the Park is only the cry of "stop thief: to cover a flank movement in that very direction. But, we say most emphatically, that any scheme to cut down the Park, come from what quarter it may, has out unyielding and determined opposition. We believe that magnificent piece of ground should be sacredly protected for the purpose to which it has been dedicated and the man or men who would attempt to touch it should be consigned to political oblivion. Let the Park Reservation stand.

August 31, 1871, San Diego Union, 3:4. Charge made at People's Nominating Convention, which nominated a ticket of county officers, that 1400 acres set aside for park use are to be handed over to members of the "Ring," of whom C. P. Taggart is one. . . . Excerpts from the address of the nominating convention to the voters of San Diego County.

The motives which prompted that actions of the "People's Nominating Convention," and which should influence the votes of all those who are in favor of pure principles, pure men and good government. The coming election is in consequence of the general dissatisfaction expressed by all the best citizens of San Diego with the majority of the nominees of the so-called Democratic and Republican conventions, and the corrupt manner in which both of said conventions were packed by the lavish expenditure of large sums of money and the promise of tidelands for the purpose of foisting upon the people of this county dangerous and bad men in order than an unscrupulous Ring of public marauders could successfully carry out their schemes of public plunder to enrich themselves at the expense of the people, by securing the election of an Senator and an Assemblyman to represent this county in the next Legislature committed and pledged to their program, which are as follows:

First. The passage of a bill relinquishing the State's ownership of the overflowed tide and marsh lands within the County of San Diego, and the ratification of all the acts of the present Board of City Trustees, thereby giving to C. P. Taggart & Co. all of the land extending from National City to the southern boundary of San Diego, nearly five miles of city front, and the remainder to other members of the Ring.

Second. The repealing of the law which reserves and sets aside 1400 acres of the Pueblo lands for a Public Park in order that it may quietly be deeded to the Ring.

Third. To oppose the extension of any line for the commencement and completion of the San Diego & Los Angeles Railroad, so that the lands owned by that popular and much needed highway may revert to the City, giving to the Ring immediate possession and ownership of said lands, they already having obtained deeds from the City Trustees to all of the aforesaid valuable property.

Fourth. To continue squandering the public funds, as they have for the past twenty years, consuming all the money paid into the public treasury, and piling up an enormous debt of over one hundred thousand dollars, taken together with that consumed by the political paupers that have foisted upon the body politic of this county for the last decade, amounts in the aggregate to the gigantic sum of over one million dollars! These are grave and astounding facts that cannot be truthfully be denied. We ask in all candor and fairness, what has become of this immense sum of public money, of which they have been the custodians? What have they done with our money, and what have the people to show for this vast profligate expenditure of the public treasure? Can they point us to one single public building? Have they constructed a solitary road? Can they direct us to a sown lot or an acre of land purchased by them for the people? Have we a graded street or a public sewer? And do we own one dollar's worth of public property anywhere in the county? Yet these men with the audacity of successful highwaymen, after having thus recklessly and fraudulently squandered the public money, and having recently, in collusion with their itinerant converts, secured the control of both political conventions, by the corrupting influence of money, have the impudence and bold effrontery to offer for our suffrages their two tickets, one they call Democrat, and the other Republican? They care not which you support, having made both, either will suit them; therefore in the election of either ticket the Ring will have triumphed. In view of the foregoing alarming and startling facts, and the action of the last Legislature in granting to the Board of Supervisors power to aid in the construction of railroads by giving subsidies equal to the value of five percent of the value of all taxable property; also giving power to a few to set in motion various non-elective commissions which with their numerous adjuncts will require increased taxation and expense that will enable bad men in office to harass our people, confiscate their property, and destroy their homes without compensation.

And the same Legislature, through the influence of the Ring, by special enactment conferred upon one of their leaders, two additional offices, giving him the power to appoint nine officers, and this same infamous bill authorized the Board of Trustees, of which this leader was and is now a member and the controlling influence, power to contract and pay their attorney an unlimited amount of money for services that had been performed by another. . . .

Proposals: Tidelands belong to the State and cannot be sold or given away by city officials.

Marsh, submerged and overflowed lands should be protected from land grabbers.

The Pueblo lands of the City belong to the people and should be equally distributed to the People.

City and county government should be economical and tax rates low.

Cultivated farm lands should be taxed at same level as non-productive and speculative land Grants.

Stock trespassing upon tilled lands should be detained and fed at expense of their owners or sold for damages.

The Romance of Balboa Park, by Florence Christman, San Diego Historical Society, 1985, pp. 14-15.

In 1871 there had been a conspiracy to repeal the legislation which upheld the park dedication of May 26, 1868. Some city officials and others were involved. They proposed to rush through the legislature a bill to rescind the Act of February, 1870, in order to “grab” this valuable land. But it happened that a San Diego resident, in Sacramento at the time, learned what was afoot. This information and threat were rushed to San Diego. Intense publicity and indignation followed. George Marston, Thomas Nesmith, Dan Cleveland, Mat Sherman and others organized and secured 366 signatures on a plea to keep the park intact, and these, sent to Sacramento, served to kill the McCoy bill.

September 1, 1871, San Diego Union, 2:1. EDITORIAL: The Senatorial Question . . . In our advertising column the claims of Mr. Horton are discussed at length. We have only to say that as to the title question, Mr. Horton informed us personally that he had no sympathy with the confiscators or the principles in their address, and that he wanted to have the outside titles confirmed. He said that his friends would take him on his record, and be satisfied with his work for it.

One of Mr. Horton’s friends objects to our endorsement of the gentlemen as a friend of San Diego specially. Well, we shan’t attempt to please everybody. But it strikes us that San Diego needs and has a right to ask for more consideration at the hands of the Senator than San Bernardino. This is the seaport, that is an inland town. And we don’t see that it follows that Horton’s devotion to our city interests must necessarily hinder him from representing the rest of the district.

September 1, 1871, San Diego Union, 2:3. Horton and the Confiscator’s Platform; Horton endorses the platform; 1100 acres for Horton’s \$285; Shall the poor man’s be confiscated?

Conclusion: If he has gone into co-partnership with the old Dr. DeWolf party, then he cannot be in fellowship with the Republican party of this county. If he is not in favor of confirming the titles of the poor men of this city, then the poor men will vote for McCoy, who is in favor of doing it. If he is opposed to letting each voter purchase two blocks of this land from the city, while he has half of a mile under the same sort of title, then he don’t know enough to be Senator if he does not know enough to keep hotel. All of Horton’s money came from the sale of city lands. He must be right on City Titles or he can’t get the votes of men who own these lands.

The De Wolf party can’t elect him.

September 5, 1871, San Diego Union, 2:2. EDITORIAL: The Title Question . . . Let the people of San Diego not be drawn aside by outside issues. The Confiscators cry: “Tidelands” - “Public Park” - “Peninsular” - to cover up their own outrageous schemes of spoliation. They hope to blind the eyes of the voters in this way to the real issues.

The people want the next Legislature to pass an act confirming all deeds of Pueblo lands made by the Board of City Trustees up to the first Monday in December, AD 1871. In other words, the Legislature should make good the title to all Pueblo lands lying outside of Horton's addition and known as "outside lands."

The people of San Diego regard this matter of confirmation of titles as of vital importance and they have a right to demand that every candidate for the Legislature shall pledge himself to use his best efforts to secure a perfect title if elected. A cloud over the title to the property in one portion of the Pueblo operates to the detriment of every other portion. And the value of lots in Horton's addition, where the title is perfect, is, nevertheless, affected by the doubt concerning the title to adjacent property. It concerns every persons whose lot is cast here, and who depends on the future of San Diego, to take an active personal interest in this matter, and make it the leading question of the campaign.

Let not our citizens, whose interests in the dry lands are at stake, suffer themselves to be bamboozled by an outside issue lugged in to detract them from the real issue by a set of unscrupulous manipulators who hope to enrich themselves by breaking up titles here.

October 12, 1871, San Diego Union, 4:3. The Artesian Well . . . The statement made some time since that water sufficient to run the engine at the artesian well had been obtained is not borne out by the facts. It appears that at a depth of 105 feet a bed of clay was reached through which the water soaked, but not in large enough quantity to answer the requirements of the engine. Since that time men have been engaged in sinking by hand, and the well has now reached a depth of 148 feet. Alternate strata of blue clay and rock, the latter composed of shell and lime, have been struck, and it is thought by Mr. Calloway that when these formations are passed the water will rise to the depth of eight or ten feet. The sinking is going on at the rate of 8 to 20 feet a day, and will probably be more rapid when the rock is passed.

December 28, 1871, San Diego Union, 2:1. EDITORIAL: The Title to the Land . . . We have been told (but can hardly credit the statement) that a petition has received some signatures urging the Legislature not to pass Senator McCoy's bill for confirmation of title to Outside Lands. Whosoever has devised such a petition has some sinister motive, which will probably be revealed in due season. We more than suspect that it has something to do with the Hartman-Luc's combination, who are striving to cut down our Pueblo to four leagues --- a scheme which, if successful, would deprive about 1,800 or 2,000 citizens of San Diego of their homes. By the way, we would ask the Honorable Secretary of the Interior why we have as yet no action on Commissioner Wilson's decision confirming our Pueblo titles: We do not like this delay; and we must confess that the appearance of a no-title petition just at this juncture has a very ugly aspect.

January 4, 1872, San Diego Union, (also December 31, 1871, 2:1). EDITORIAL: City Park . . . Petitions are just now the order of the day. One is in circulation praying the legislature not to allow our City Park reservation to be cut down. We don't believe anybody has any designs on the Park, and incline to the opinion that a little scare has been started by some of the disinterested "Peoples" party patriots. But still let the petition be signed; it can do no harm, if it does no good. Public opinion here is unanimous in favor of preserving the integrity of the park reservation, and any attempt to cut it down would be justly regarded by the people as an outrage.

But good people, be sure that watchfulness with reference to the title question will not be out of place. Keep an eye on the matter. We want our outside land title confirmed now.

November 30, 1872, (San Diego) The Weekly World, 3:3. CITY TRUSTEES Regular Meeting - Trespassers on City Park Cited to Appear; Members present: Boyd, Briant, Estudillo, Haight, and McCormick, president.

Mr. McCormick presented a resolution requesting the City Clerk to notify Messrs. Moses Ferrin and Charles Gassen to appear before the Board on Monday, the 9th of December, to explain by what authority they have appropriated to their private use a portion of the City Park.

January 19, 1873, San Diego Union, EDITORIAL: Provide for Our Public Schools.

The matter of adequate common school facilities is one of the most important that can engage the attention of our citizens. Almost the first question asked by those who come to San Diego with a view to permanent residence is, "What are your school facilities?" The people who are flocking hither from all parts of the United States are accustomed to the most perfect systems of public education; and the turning point in the minds of many heads of families, in deciding whether to locate here will be the probability of securing good school advantages for their children.

Considering the fact that our city is scarcely four years old, and taking into account the present population, we may fairly congratulate ourselves upon the possession of better school facilities than can elsewhere be found under like conditions. We have an excellent public school, with grammar, intermediate and primary departments; and we have in addition, three private schools --- one of them, more properly speaking, an academy, in which the higher branches are taught. But, even now, these means are beginning to be found inadequate. Every department of the public school is filled with pupils, and many children who would attend are barred for lack of accommodations, so that, already our Board of Education are considering the question of ways and means with a view to extending the present facilities. The buildings now occupied cannot much longer meet the wants of this growing community.

In reflecting upon this subject, a suggestion has occurred to use which we submit for public consideration, and which, we think, will commend itself to the favor of our readers. The city owns a magnificent tract of land --- fourteen hundred acres --- set aside by Legislative enactment for a public park. The southeastern corner of this reservation contains the finest location for public school buildings that can be found in the city. Here there is a gently sloping eminence which commands a view of the whole city, the bay and the ocean beyond. It is within half a mile of the present center of population, and may be reached by an easy walk from any part of the city. Why should not, say, ten acres be taken in this portion of the park for the public school buildings and grounds? A most desirable site can here be obtained without cost --- a site which possesses the advantages of healthfulness, a magnificent view, nearness to the center of population yet sufficiently removed from the noise and bustle of the city and from the danger of fire. A fine two-story frame building (after the model of the school houses now being erected in San Francisco) surrounded by spacious grounds ornamented with trees and shrubbery, would constitute one of the most attractive features of our city. It would be a practical first step toward the improvement of the park. It may perhaps be questionable whether under the strict construction of the Park Reservation Act the City Trustees have legal power to dedicate any portion of the tract even to public school uses, but we opine that the Legislature would grant the requisite authority upon the petition of our citizens. Let the matter be considered.

March 19, 1873, (San Diego) The Daily World, 3:4. Special Meeting of the Board of City Trustees: the San Diego Water Company; their proposition agreed to . . . The Board of City Trustees held a special meeting at their rooms last night for the purpose of considering the proposition of the City Water Company submitted at the previous meeting.

Members present: Messrs. Boyd, Briant, Haight and McCormick, President.

The article of agreement submitted by the Water Company, the substance of which was published in **The World** only, was read.

Messrs. Boyd and Haight, of the committee, appointed to examine the agreement, suggested that it be amended so as to read, "That no part of the Park Reservation upon, which improvements had been commenced should be set aside for the purpose asked," and "that nothing in this agreement should be so construed as to prevent the Board of Trustees from granting like privileges to other water companies."

These amendments being satisfactory to the company, the Board of Trustees passed the following resolution:

BE IT RESOLVED, That the agreement now before the Board, presented by the San Diego Water Company, be adopted and that the President and Clerk of the Board of Trustees, of the City of San Diego, be instructed to execute the same in duplicate and affix the corporate seal.

Adjourned.

March 19, 1873, San Diego Union, 3:3. City Trustees granted permission to San Diego Water Company to dig wells in park provided that the company not use any part of the park which can be improved or fenced.

April 25, 1873, (San Diego) The Daily World, 3:1-2. Beginning to move; a stroll to the well of the city water company; three holes to be drilled to a depth of 290 ft.; oyster and clam shells found in great numbers at a depth of 80 ft.; surface of ground on which wells are being drilled is 90 ft. above the level of the bay; the water rises to within 80 ft. of the surface and it is asserted that it cannot be exhausted by any present need of the city; from the well it will be pumped to a reservoir on the mesa and distributed over the city in mains.

We yesterday took a stroll out to the spot on the City Park Reservation, where the City Water Company are sinking their artesian wells. We left a region of building activity and were surprised to find the note of building preparation sounded all over the city. San Diegans have that capital element in building a city --- faith. Any number of cozy and elegant residences are going up on every hand. There are few places on earth, where a little care and industry are better repaid than in San Diego. Those who take the trouble to provide themselves with water can have a market garden attached to their residences from which they may cull green peas and strawberries almost every month of the year. We could not forego, in passing, noting the beautiful gardens of Messrs. Gale and McDonald. The floral show of Mr. McDonald's garden is a sight well worth the walk. His house is beautifully embowered in shrubs and flowers. The Australian pea and creeper are trained over the house and on trellis work. A perfect wealth of foliage gladdens this cozy home on all sides. Any number of varieties of verbena, geranium and other bright flowers trail over the ground and even over the fences.

Skirting Mr. McDonald's place a few hundred yards brought us to the scene of the labors of the City Water Company. When we arrived they were hard at work screwing the drills together. The boring is done by means of a twenty horsepower engine, made at the Miners' Works, at San Francisco. They have about five hundred feet of drills. They purpose, as we explained some time ago, to dig a well around three holes which have been drilled to a depth of two hundred and ninety feet. Two of these holes have been sunk to the requisite depth, and the third was within fifteen feet of the stopping point when we came upon the ground. The persons who had it in charge expected to finish the third hole today. From twelve to twenty-five feet are sunk daily. The drills work in an iron casing, and the borings are "hydraulicked," out of them. The work is pushed mainly through sandstone and limestone.

A curious circumstance of the work is that, at a depth of eighty feet, oyster and clam shells were found in great numbers, demonstrating pretty conclusively that the mesa was once the bed of ocean. The surface of the ground where these wells are being built is just precisely on a level with the spire of the Baptist church, or ninety feet above the level of the bay.

On the completion of the third hole the engine will be cleared away and work will begin on the well, which will be sunk to a depth of one hundred feet. It is uncertain yet whether it will be made fifteen or twenty feet wide. The water rises to within eighty feet of the surface, and it is asserted that it cannot be exhausted by an present need of the city when the well is completed. From the well it will be pumped up to the reservoir on the mesa, and distributed over the city in mains.

Work will shortly begin on a well which the gentlemen of the City Water Company intend to push until a reliable artesian flow is the result. We see no reason why they should not succeed, and are delighted to find, from actual observation, that our chances for an adequate supply of water for all purposes of utility and ornament are so gratifying. We wish the company all imaginable success. We trust the day is not far distant when the citizen will not have to fall back upon his own enterprise and industry for water.

May 29, 1873, (San Diego) The Daily World, 3:3. The Mesa: a splendid spread for a city; another glimpse of the picturesqueness of our surroundings. There is something *distingue* in our Mexican mountains which show up bald and symmetrical and put the sun to his trumps to get beauty out of them. And he succeeds perfectly.

February 26, 1874, San Diego Weekly Union, 3:3. EDITORIAL: The Park Boundaries.

A rather heated discussion took place in the Board of City Trustees last evening on the question of the Park reservation boundaries and feeling was manifested which was altogether uncalled for and which can produce no good result. The question at issue is one that must have arisen sooner or later, and it is better for the city and for all parties interested that it should be determined now, than years hence, when property values shall have reached enormous figures compared with the present standard, and when great improvements shall have been made. The intelligent predecessor of our present efficient City Attorney, who possesses a thorough familiarity with the Pueblo titles of San Diego, advised the Board of Trustees during his incumbency that it was of the utmost importance that the lines of the city property should be accurately determined. It is a well-known fact that all of our titles (with the exception of the tier of "alphabetized" lots location north of the Park reservation by Mr. Pascoe) are, according to the official map of the city made by Mr. Pascoe in 1856. When Mr. Pascoe found the surplus land by his survey of 1870, he located it in the position given on his map; and this second map and survey were also adopted and made official by the city authorities. It has been decided by the Supreme Court in a recent case that Mr. Pascoe's location of this surplus land cannot stand, and the question of its proper location was, therefore, an inevitable one that could not be avoided by delay. It is impossible that the rights of any person can suffer in the most remote degree by the adjustment of this question. The city cannot possibly be wronged; nor do we believe that there is any desire on the part of any of the persons whose names have been so freely used, to establish anything more than their just and equitable rights. A suit at law to quiet title will certainly result in justice to all concerned, although we question the propriety of the commencement of the action by the city. It should have been left to the parties in interest to begin proceedings. And, moreover, the Trustees would have done well to have acted upon the counsel given by their legal adviser two weeks since --- that is: to have procured all the evidence obtainable before proceeding. So far as Mr. Horton is concerned, his interests here are too great; his entire devotion to the welfare of San Diego so well established by a thousand acts; his character for integrity and just dealing is too high to admit of the supposition for one moment that he would seek to hold one inch of land rightfully belonging to the city. Such a supposition is altogether too preposterous to be entertained by intelligent men. This is a simple question of legal rights, the decision of which can injure neither the city nor any of its people. It cannot be reached by the excited talk of persons who are utterly ignorant of the merits of the case. Bad men may endeavor from interested motives to lead the public astray, and to stir up passion and prejudice. We are satisfied that some of our City Trustees have been led by such false representations to take a view of the matter which in their better judgment and a calm examination of the facts will show them to be utterly without foundations.

April 14, 1874, (San Diego) Daily Union, 3:2. The City Attorney reported that today a quit claim deed from the City to Mr. A. E. Horton, relinquishing any right the City may have to interfere with Horton's boundaries, has been executed by the President and Secretary of the Board of Trustees, and duly recorded; whereupon Mr. Horton had quitclaimed to the city any right he might possess to interfere with the Park Boundaries as defined by the latest official map of the City. The City Attorney stated that upon filing of the quit claim deeds the suit of the City against Horton to quiet title had been dismissed.

August 4, 1874, (San Diego) Daily Union, 3:2. Mr. H. M. Covert asked the privilege of leasing forty acres in the city park for a period to twenty years, for the purpose of planting and improving the same. The Consideration of the matter was laid over until the next meeting of the Board of Trustees.

October 6, 1874, (San Diego) Daily Union, 3:2. Board of City Trustees: A communication from Mr. Covert of the Water Company, with reference of the improvement of the public park, was referred to the City Attorney for his opinion.

October 14, 1874. San Diego Society of Natural History files articles of incorporation.

November 12, 1874, San Diego Union, 3:1. The idea of organizing an Exposition Association in San Diego, recently broached by Mr. M. S. Patrick, is an eminently practical one, and should commend itself to the attention of our citizens. There cannot be the least doubt that such an institution could be made a paying investment to the stockholders, besides being of inestimable benefit to the city. What it requires is the management of men possessing the experience, energy and business sagacity of Mr. Patrick; and we believe

there are enough good men to undertake this important project and carry it out. We have everything else --- the country, the stock and land for grounds.

November 12, 1874, San Diego Union, 3:2. EDITORIAL: Expositions: What have heretofore been known as industrial fairs in the United States are now called "expositions," and with the new name comes also an enlargement of the scope of these popular "shows." The exposition of the period comprehends a display of agricultural and horticultural productions, machinery, inventions, manufactures, works of art, fine stock, and last, but by no means least, races --- or "trials of speed," as they are more politely called, according to the fashion of the time. The popularity of these institutions is constantly increasing, and no town of any considerable size fails to have its annual exposition.

In some of the cities of the Western states, immense sums are expended in preparing for these fairs; in nearly all of them extensive grounds are owned by the Association under whose auspices the exhibition is given. In most cases permanent buildings are erected, to which temporary additions are made according to the requirements of each annual occasion. One of these expositions "in full blast" is an inspiring affair. The halls and galleries are richly decorated, the display of works of use is always interesting, while that of works of art is seldom commonplace, there are throngs of spectators day and night, and the town puts on its festive appearance in honor of the event. Hotel keepers and storekeepers drive a thriving business and times in that place are exceedingly "lively" for many weeks.

This year in Chicago, Cincinnati and Louisville, the expositions were remarkable affairs in every way, that at Chicago (which, by the way, was founded by our esteemed townsman, Mr. M. S. Patrick) being a wonderful success. In California, we have had the Mechanics' Institute Fair at San Francisco; the Fair of the State Agricultural Society; Fairs at Stockton, San Jose, Marysville, Petaluma and other towns, and latest of all the fine Fair of the Southern District Agricultural Association of Los Angeles.

We believe in these expositions. They are doing a great work --- especially in California. They are aiding in the development of the country, by bringing together fine collections of specimens from our vineyards and orchards, our farms and forests and mines; specimens of improved horses and cattle and sheep; specimens of our manufactures and general industries, --- in brief, the exposition is a comprehensive annual exhibit of the progress of the section in which it is given.

And the exposition is of immense benefit to the city in which it is held. It makes trade for the place; and trade that is not merely transient. The money taken over the counters of the hotels and shops during the progress of the fair, flows into numerous channels, quickening every branch of industry and laying the foundations for permanent local enterprises.

It is time that a movement in this direction were made in San Diego. We have every natural advantage that could be desired and nothing is needed to make a start but the will. Once begun, there is enough of the live spirit of enterprise to make the exposition a permanent institution in San Diego --- an institution of steady growing prosperity and usefulness.

December 11, 1874. San Diego Lyceum of Natural Sciences incorporated.

June 8, 1875, The Daily Union, 3:1. Board of City Trustees

The Board met yesterday afternoon at two o'clock, a full Board present.

The minutes of the last session were read and approved.

The Committee on the water question submitted the following report which was adopted:

To the Honorable Board of Trustees of the City of San Diego:

Gentlemen: Your Committee to whom was referred the proposition of the San Diego Water Company to supply the city with pure and wholesome water, having had the same under consideration beg leave to submit the following report:

It being evident to the citizens as well as your Committee that the present supply of water is inadequate to the increasing demands of the present inhabitants of said city; and also in case of fire, the city is liable to be at the mercy of that element if some further means in not adopted for protection, and as it will require considerable outlay to capital to get water upon the mesa at a sufficient height to be useful for fire purposes as well as irrigation on the Park grounds, your Committee deems it no more than right and just that the city should become a customer to an amount sufficient to pay a portion of the interest on the capital required to bring in said water.

And your Committee are further of the opinion that the amount asked for by said Water Company will add but a trifle to the taxes already paid by the property owners of the city, and will be more than compensated by the increased valuation of all real estate within the city limits.

And your Committee believe that in order to make said water available for fire purposes it will be advisable, when the funds of the city will permit, to conduct a separate line of pipes from the mesa through the principal streets to which hydrants only should be attached, and to be in charge of the Fire Department of said city exclusively:

We therefore offer the following resolution and recommend its adoption:

Resolved. That the Board of Trustees of the city of San Diego agree to and with the San Diego Water Company, or any other Water Company who will first deliver on the mesa, or near the Park grounds, a sufficient supply of pure and wholesome water to use and consume of said water to the amount not to exceed 200,000 gallons in one month, and for compensation thereof the said Board of Trustees agrees on behalf of said city to pay for the same in warrants drawn on the general fund of the City Treasury the sum of one hundred dollars per month for the term of five years from the date of the delivery of the first water and the continuance of the same; provided that the Board of Trustees on behalf of the city shall have the privilege to tap and receive the water from the Company's works (on giving five days notice) at any and all places which they may deem most convenient for the public use and benefit.

W.H. Begole,
John M. Boyd,
M. Keating.

July 1, 1876, The Daily Union, 3:2. The Water Question --- To the Trustees of the San Diego Water Company:

WHEREAS, in the opinion of the property owners of this city, the location of the well from which the city is supplied with water, is such as to create in the minds of strangers a prejudice against the quality of the water drawn there from, an such prejudice is affecting the value of all property in the city, and thereby rendering your great enterprise less beneficial to the citizens, and your patrons; therefore, the undersigned patrons and friends of your company, without intimating of expressing any opinion in regard to the quality of the water, most respectfully ask that the location of the well from which water is supplied, be changes to some point above the slaughter house, which will be satisfactory to the public, as a matter of policy: A. E. Horton, Geo. P. Marston, Charles Hubbell, Douglas Gunn, and about ninety others.

October 3, 1876, The Daily Union, 3:1. Board of City Trustees: The City Engineer was instructed to notify the Chief of Police of all encroachments upon the public streets, plazas or park.

(San Diego Union, May 30, 1926. San Diego Pioneer tells history of Balboa Park, by Daniel Cleveland.

On **August 8, 1881**, the City Trustees allotted a small tract of land in the southern portion of the park as a site for a building for the first high school established at San Diego. Joseph Russ, at that time the leading lumber dealer in this state, volunteered to donate all the lumber to be used in the high school building. In grateful recognition of this gift, his name was given to the building and school and was retained for more than twenty years. The building was completed and occupied in 1883.)

March 21, 1882, San Diego Sun, 4:3. And then it rained! What it has done hereabouts; wettest effects to be seen at the mouth of Switzer's canyon, which was dammed up by the construction of C street; dam formation broke away early this morning and some of the moisture escaped.

March 29, 1882, San Diego Union, 3:3. San Diego Revisited: Letter in **San Francisco Bulletin** from Dr. C. C. Parry, a botanist.

San Diego has wisely set aside a public park of 1400 acres occupying the high mesa overlooking the town and bay; this ground, apparently unfit for any private uses, may yet constitute the glory of a flourishing seaport city, at present occupied only by a pest house and the skeleton of a commodious school house, may yet add to its magnificent views the attraction of artistic decoration and the display of perennial plants and flowers equaling but hardly exceeding what it now presents in its short floral season. The principal water supply of the town already crosses that high mesa, and, if the supply is sufficiently abundant, a part of it at least may be diverted to beautify its magnificent park.

April 14, 1882, San Diego Sun, 4:3. Board of City Trustees: Trustee Snyder reported that owners in the vicinity of the park object to any portion of the same near the southern and western boundary thereof being used for the purpose of a milk ranch.

December 23, 1884, San Diego Union, 3:1-2. Local Brevities: The present is an excellent season to take steps toward improving and beautifying San Diego and vicinity; it is time that improvements be made on the grounds that have been laid out for a park; at present there is no attraction for visitors except the mild and healing climate; and the suggestions which have been made by several of late, that a commencement be made with a view of permanently improving the park is one that should meet the unqualified approval and support of all who have an interest in San Diego.

December 24, 1884, San Diego Union, 3:1. Money judiciously expended in making public improvements, such as the improvement of the grounds selected as a city park, and in other ways making San Diego more attractive will bring a reward a hundredfold in time to come.

December 25, 1884, San Diego Union, 3:1. Every resident and every property owners who desires the welfare of San Diego will be pleased when the work of improving the park is actually begun.

December 28, 1884, San Diego Union, 3:3. THE CITY TRUSTEES: The following petition was read:

To the Honorable Board of City Trustees of San Diego: Gentlemen --- We the undersigned ask for permission to plant and maintain a number of trees on the tract known as the City Park Reservation. The expense would be defrayed by subscription.

We propose to set out this present season, an avenue of eucalyptus trees alongside one of the roads leading over the mesa and continue such improvements whenever there are sufficient funds on hand.

Hoping that this will meet your approval, we are willing to do such work under the instructions of a committee that may be appointed by your honorable body.

Very respectfully,

A Wentscher
Geo. W. Marston
A. Klauber

G. W. Jorres
C. F. Francisco
Douglas Gunn

A. Blochman
S. Levi
H. P. Koster

Allison Bros.
Chas. S. Hamilton
Chas. A. Chase

The petition was ordered granted, the improvements to be made under rules and regulations of the Board, and the petitioners were requested to appoint a committee of three to prepare plans for improvements of the park and present the same to the Board on Saturday, January 3rd.

San Diego Union, November 14, 1965, G-3:1-4. Union Park: A Convivial Spot, by Jerry MacMullen . . .
San Diego may not have been enough of a metropolis to boast of anything as sophisticated as a Union Square, but at least she had a Union Park and, as beer gardens go, it was quite a place.

Of course, all trace of it has long vanished, together with traces of the rest of San Diego's **1885** beer gardens. And it's a great pity, because what modern civilization sorely needs is more relaxing under a tree, with no go-go girls to interfere with the enjoyment of a thick glass seidel or schooner, filled from a huge oak keg by a walrus-whiskered host, complete with sleeve garters and a celluloid collar. If you offered to buy him one, he would politely refuse; in doing so he might even, if you were lucky, favor you with a few lines from the old classic ---

I never drink behind the bar,
I always take a mild cigar.

Union Park was not, as one might think, on Union Street; it was at 13th and K, across the street from a saloon; both were operated by H. C. Schuette, and those engaging in the more serious type of drinking used the saloon. It was a quiet neighborhood, with lots of space between the houses; to the east, in fact, there wasn't very much until you got to the old tannery, up around 24th and K. Union Park bothered no one, and no one bothered Union Park. The local constable never --- well, at least hardly ever --- had occasion to visit the place for anything more than quietly hoisting one if nobody was in sight.

There was a little platform where musicians performed, or someone sang or recited poetry of the beer-garden type; at times the audience would join the musicians and the air would ring with the happy notes of "Ja, es ist ein schnitzelbank!" There was enough clear space for the performance of various types of horsemanship, and on one occasion Union Park rang to the clash of sabers on steel armor as two plumed knights had at one another on horseback. The challenger was a "professor" with a German name, while the defender was a cavalry sergeant from old San Diego Barracks, hastily recruited for the event as a matter of civic pride. The affair was said to have ended in what was at least a technical draw.

Of course, there were other better gardens in the era of the Great Boom and bust of the late 1880s. Over the hills and far away (it was away out in the boondocks at 32nd and N Streets) a man named Lippert opened a place called the Silver Gate. Fred Kaiser ran what was appropriately if unimaginatively called Kaiser's Garden, at Front and F Streets. And the next time you stand in front of the new First National Bank Building and look diagonally across 5th and B to the southwest corner, half close your eyes and try to imagine that you see a modest, ship-lap house, shrubbery, and lattice fence and a sign which says "City Garden --- L. Mayrhofer, Prop."

Times change, and at the end of that fantastic real-estate boom they changed swiftly and ominously. People moved out as if the place has the plague, and Union Park --- briefly known as K Street Gardens --- went to join a lot of other pleasant things, such as knowing where the next meal was coming from. The "K Street Gardens" sign was taken over and applied to the saloon, but it wasn't the same; it changed hands and policies and clientele and now the gendarmes left it alone chiefly because there are times when discretion is the better part of valor. A crowd of Cape Horn sailors, relaxing earnestly after six months at sea, was not to be taken lightly. And they liked the K Street Gardens.

In preserving Union Park for posterity, publishers of the 1886 City Directory have let us down badly; they locate it not at 13th and K but at Union and K which, at that time, was under several feet of salt water, at least at high tide.

October 15, 1976. "San Diego's City Park, 1868-1902, an Early Debate on Environment and Profit," by Gregory Montes.

About **1886**, Elisha Babcock and H. L. Story built a steam power street car line, the University Heights Motor Road (or Park Belt Line) through the southeast section of the city, up Switzer Canyon, and onto the Mesa. (Pourade, p. 185, Hopkins, p. 324).

December 1886. U.S. Army offered to trade its downtown barracks for a City Park location.

G. W. Marston favored proposal (San Diego Union, December 29, 1886, 3:2-3).

Levi Chase proposed selling park in stages until 600 acres remained.

Barracks exchange opponents included John G. Capron, Mr. Parrish, and Daniel Choate (San Diego Union, December 30, 1886, 3:4).

The Union noted that among those against selling or bartering parts of City Park were speculators, "connected with land-grabbing syndicates," who owned land near the park and feared the deflationary prices if more choice, adjacent land were put on the market. (San Diego Union, December 30, 1886, 3:4).

After the above arguments the City Trustees resolved to ask the State to authorize San Diego to sell 760 acres of City Park and to approve the barracks exchange. Then no further steps were taken and the whole matter died away. (San Diego Union, December 30, 1886, 3:4).

March 3, 1886, San Diego Union, 3:3. On motion of Trustee Sherman, the City Marshall was instructed to ascertain whether any persons are using the City Park for pasturing stock, or whether any stock is running upon it, and, if so, to give proper notice that such stock be removed and kept off.

December 24, 1886, San Diego Union, 3:1. The committee of the "Society for Improving and Beautifying San Diego" have secured, it is said, some 250 names to a petition to the Board of City Trustees, memorializing them against the division, though ever so small, of the City Park; we are opposed to the sale of even one foot of it.

December 25, 1886, San Diego Union, 3:2. "Progress" writes letter to the editor questioning the need of a 1400-acre park.

In my limited acquaintance I find that there are a good many people who think that the reservation of more than 1400 acres of land forever for park purposes is an absurd piece of folly; some are of the opinion that a Park of 600 acres is a pretty big thing to take care of; why should the handsomest residences in the city be forever locked up?

December 29, 1886 San Diego Union, 3:2-4. OUR BIG PARK RESERVE: Conference of Trustees and Citizens Yesterday; Interesting Directions. . . . At the regular meeting of the Board of City Trustees Monday evening, a communication from George W. Marston suggested the feasibility of setting aside a portion of the park lands as a military post for the Government in lieu of the ground now occupied by the barracks. The Committee of the Whole was instructed to confer with citizens upon the subject. Yesterday afternoon the meeting room of the Board of Trustees was filled by representative citizens who has assembled to consider the matter. State Senator Bowers and Assemblyman Young were present by invitation as also Lieutenant Mason, U.S. Army.

Trustee C. S. Hamilton, President of the Board, was called to the chair, and City Clerk Christian acted as secretary.

The proposed amendments to the Fourth Class Charter were first discussed, when at the suggestion of Senator Bowers that on the meeting of the Legislature each city interested would probably send up amendments, and that time should be taken here to embody in proper form the wishes of the city. It was

resolved that a committee of five be appointed by the chair to formulate amendments, the same to be forwarded to our delegation at Sacramento.

The matter of exchanging a suitable tract of park land for the present site of the Government barracks was then brought up. W. Parrish, Esq., addressed the meeting, taking strong ground against the alienation of a single foot of the park grounds for any purpose whatever. He believed 1400 acres was not a bit too large for a park. Parties were talking about selling a portion of the park land; but when such a movement began there would be no park land left. Some people thought 100 acres was enough. If we ever began to touch that reservation, it would all go, there would be no agreement where to draw the line. Philadelphia, St. Louis and Chicago were cited as instances where larger parks existed than our own. We wanted a park big enough to turn a buggy round in, and we needed every foot of that 1400 acres.

Levi Chase, Esq., said he had seen the principal cities of the United States and Europe, and he regarded the idea of improving so immense a tract of land as that here reserved as absurd. The cost would be enormous, beyond the power of a city as large as San Francisco. He was in favor of selling, under proper regulations, a limited portion of the park lands from time to time, the proceeds to create a fund to be applied to the improvement of a park of reasonably limited dimensions. He thought 640 acres would make a large park for a city of 250,000 people. That would be a square mile of land. And it would be as much as we could reasonably undertake to improve as a very large city. He was in favor of selling part of the land to improve the rest. The land as it stands now is a mere burlesque upon the name of a park. He was in favor also and very decidedly of setting apart a liberal tract of this reservation for a military post. He believed such action would not only be wise but financially profitable. The lands now occupied by the barracks were of great value to the city commercially, and of no value to the government, while the park lands were at present of no value to the city, but exceedingly desirable to the government. Both parties to the exchange proposed would gain by the transaction. A larger military post would be established here, and the officers would take pride in improving and adorning the lands allotted for the post. It would be a first and practical step in improving these now waste lands.

Trustee Stewart thought if the present location of the barracks was unsuitable, a better location than any in the park, and one perfectly salubrious could be found on the government's own reserve on the Playa. If the blocks which had been given by the city for the use of the post were abandoned, the land should be held for the erection of government buildings.

Judge Puterbaugh was decidedly against setting aside any of the park lands for a military post. He did not think the contiguity of a post was a desirable thing. He thought the park reservation should be sacredly held in its entirety. The area of 1400 acres was little enough for such a city as San Diego was certain to become. He was opposed to the sale of any part of it, or its use for any purpose whatever than a public park.

John G. Capron said that if we once began to meddle with the park, we might as well say good-bye to the whole thing. He did not think we could spare one foot of it. If anything, it was not big enough. He believed there was no legal power to touch it. He said that, as a citizen, he had a fee-simple interest in the park, and that, if any attempt was made to touch it, injunction proceedings would be commenced at once. He read the form of a petition and agreement which was in circulation protesting against the disposal for any purpose of any portion of the park lands, and pledged the signers to fight any movements of the kind in the courts.

Senator Bowers said that, as a resident of San Diego for the last 17 years, he had personal opinions on this subject. He desired to express his views as an individual and not as a representative at this meeting. Whatever his personal ideas might be on this or any other question, however, he wished it to be understood that as member of the Legislature he should be governed by the will of the people. If public opinion in this city should be contrary to his private opinion, he should deem it his duty to obey the expressed wishes of his constituents. Speaking here as a citizen he desired to say that the notion of locking up for all time against building improvements of the finest residence sites in San Diego seemed to him about as foolish and shortsighted a policy as can be imagined. The idea of holding so enormous a tract as 1400 acres as a park reservation he had long thought absurd. The revenues of no city in the United States would be adequate to the improvement of such an area as that. We must consider that in the eastern country the lands reserved for public parks were made more beautiful by nature than by the hand of man. That is a land of trees and natural

vegetation. Here, on the seacoast of California, man must create at great expense the verdure and shade that nature freely bestows in the East. Look at the enormous expense of the improvement of Golden Gate Park in San Francisco. Now here we are 12,000 people. Suppose a time when we have 50,000 or 100,000 --- will we even then begin to take care of so large a park as one square mile? Certainly the idea of improving 1400 acres is preposterous. The speaker wished to have a public park, in fact, and within the lifetime of some people now living. Every stranger visiting his house has asked what the barren waste meant, why there were no buildings beyond 5th Street, and when they were told it was our 1400-acre City Park, it made them laugh. Let the city sell some of the beautiful residence property on the south side of the park, and it would have a large revenue to beautify and improve the rest of the land. He did not believe in rushing it all into the market in a lump, but sell enough from time to time to meet the current requirements in the creation of a real park. As to the proposition to set apart enough of this land for military uses, he was decidedly in favor of it and thought the city could not do a better thing.

L. S. McLure offered a resolution, which was seconded, requested the San Diego delegation in the legislature to introduce an act authorizing the City Trustees to set apart a proper amount of land in the park reservation for a military post; also authorizing the Board to sell such portions of the park lands as they deem advisable. Mr. McLure addressed the meeting in support of the resolution, declaring that the reservation of so large a park tract was unreasonable and prejudicial to the growth and prosperity of the city. The true policy was to foster building improvement. The land now lying barren and worse than worthless, could be made to yield an immense revenue, and would quickly be covered with handsome buildings and grounds. Six-hundred acres was land enough in all reason and commonsense for a park, and more than could be improved in years. Instead of holding this land forever unoccupied and unimproved, let some of it be sold and diminish taxation, while adding to the taxable value of the city by the creation of valuable real property that would be improved by costly residences.

Mr. Parrish said the sale of park lands now would be bad finance; by holding them fifty years they would be worth enormously more than at present.

Mr. McLure said that if all the land in the Pueblo had been held by the city until now, there would be no town here. It was the sale of city lands to Horton and others that made the building of the city possible.

Major Chase said he thought that what was good finance in private business was good in public affairs. Owners of large tracts here are cutting them up and putting them on the market. They are selling a part to make the rest more valuable. Why not apply such a policy to the park lands? Why don't these gentlemen do with their own tracts what they advise the city to do with the park; refuse to sell any of their land; wait fifty years for it to enhance its value?

Mr. Carlson introduced an amendment to the resolution asking legislation to authorize the sale of sufficient park lands in twenty years to pay bonds of the city for sewer construction and park improvement.

Major Chase opposed the amendment; he was against the creation of bonded indebtedness.

Douglas Gunn said, while he favored the general idea of the original resolution, he thought it should be more precise in terms. He believed that a public park should be maintained as one of the most important features of our city, both as an attraction and in a sanitary point of view. He believed such a reservation should be liberal in its dimensions and he thought the area suggested by Mr. Chase of one square mile was liberal enough to satisfy the ambition of a city as large as San Diego was expected to become by the most sanguine of its citizens. He thought that legislation should provide for the setting apart as a permanent park reserve a tract of 640 acres within the present park limits, the ground to be selected with care and competent engineering assistance by a Board of Park Commissioners, and when selected to be properly enclosed, and a system of improvements begun under a comprehensive plan --- not at haphazard nor in any desultory way. He would have the Board consist of say three members --- one to be appointed by the Governor, one by the Board of City Trustees or Common Council, and one by the Chamber of Commerce. This would insure the appointment of citizens of high character who would serve without compensation but would be empowered to employ the necessary engineering and clerical assistance, and should not only have supervision of all improvements, but of the entire existing park reservation.

The funds for improving the park proper, or permanent reserve, should be raised by the sale of exterior park lands. The Board of Trustees, or Common Council, should be authorized to sell these lands at stated periods, and in limited quantities, a public sale, after giving at least three months notice of sale; the selection of lands so offered to be made by the Park Commissioners.

. . . The natural trend of the city's growth is toward those slopes. As 5th Street extends northward over the mesa; so would 6th, 7th and 8th, and all the numbers eastward. . . .

D. Choate said not one foot of the existing Park Land should ever be sold. He followed Mr. Capron in declaring that he had a fee-simple title in the reservation as a citizen and they would go into court and stop any attempt to dispose of the lands for a military post or anything else. The citizens would band together to prevent the stealing of the park.

George D. Copeland said then when, in behalf of the San Diego Flume Company, he presented their proposition to the Trustees to being in the water of the river, he made the assertion that San Diego was the richest municipality in the State; and that was the fact. Possessing this 1400 acres of Park reserve, this city could either be the richest or the poorest town in California. If a commonsense policy was adopted, this tract would be worth millions to the city. If it was kept locked up as it is now, it would be worth a great deal less than nothing at all. . . .

President Hamilton said that Lieutenant Mason was present; and they would like to hear from him.

Lieutenant Mason said there seemed to be some misapprehension in regarding the proposed change of location of the post. The military authorities of the Government had no proposition to make. General Howard thought that a proposition might come from the city, or citizens, to give a more suitable location than the present one, and such a proposition, he thought, might be favorably entertained. It was not likely that the present location would be much longer maintained. The accommodation was limited and unfavorable to the military policy of concentration of troops. A location was required sufficiently large for three or four companies with ample ground for drill, etc. There were several points in the Park reservation that would meet the requirement.

The meeting was then adjourned, subject to the call of the chair.

December 30, 1886, San Diego Union. EDITORIAL: Discuss It On Its Merits

The question of selling a portion of the city park is the chief topic of local interest and is bringing out a goodly number of "letters from the people." It seems to be quite possible in a discussion of this kind, to get on without the usual quantity of insinuation, personal abuse and harsh language, although this contributes nothing to the force of the argument on either side.

Because a citizen favors reducing the park's limits, it does not necessarily follow that he is a thief, and because another citizen opposes reduction, it is not therefore to be concluded that he does so from motives of personal interest. Men may and do differ radically and at the same time with perfect honesty upon matters of public policy; and while self-interest undoubtedly has a potent influence upon individual judgments, it is foolish to assume that it is the controlling motive with everyone who cannot see things as we see them.

Admitting the existence of purely selfish reasons for the positions assumed by different people, there are higher grounds on which such subjects may and should be discussed. Let the park question be considered on its intrinsic merits, without reference to the real or supposed motives of the individual advocates of either policy. Whether it is better for the present and future welfare of San Diego to maintain intact the existing park lines, or to contract them, is a question of far greater importance than any that has arisen in the city since the railroad issue in the days of the Texas Pacific. We must take it up in a cool, commonsense way, and settle it on sound business principles.

Looking to the distant future, will our city every need for a park so large a tract as fourteen hundred acres? Looking to the near future, will not wants be developed that cannot be met without a very large revenue? Looking to the present, are there not important needs requiring an outlay that can only be met by increased taxation, or by some other revenue? If, for example, we can have permanently set apart and improved a tract of one square mile in area, San Diego will have a magnificent public park. San Francisco's reservation is scarcely larger.

It is worthy of reasonable thought, where such provision is not a sufficient legacy to the unborn inhabitants of the city of the future. At our present rate of increase, this city will have a population of 25,000 at the close of the coming year. It is certainly not extravagant to estimate the population five years hence at 50,000. During the coming five years this city will want some public buildings -- a City Hall, fire-engine houses, more public schools, etc.; it will also be asking for Government buildings --- Custom House, Post Office, bonded warehouses, etc., and it will very much facilitate the erection of such buildings if we have it in our power to offer the Government free building sites.

We shall need a first-rate system of protection from fire losses --- storage reservoirs and cisterns for this special use, a paid fire department with ample apparatus. Surely nothing is so important as the making of our harbor as near a free port as possible, and a city wharf or wharves whose tolls would only be large enough to keep up repairs, would be vastly beneficial to our commerce.

Certainly we shall want more than one big park, three or four small parks right down in the city ought to be made; they would add immensely to the attractiveness of the place. And for present needs, is anything more important than the establishment of a thorough sewer system?

How shall the city raise the revenue to pay for these things? Can we afford to increase the rate of local taxation? There can be but one answer to that question. Now, if it can be shown that by the wisely regulated sale of surplus park lands ample funds can be obtained not only to carry on continuously the improvement and maintenance of the permanent city park reserve of 600 or 1,000 acres, but also to purchase and improve land for smaller parks in the midst of the city, to erect public buildings, buy sites for Government edifices, provide for the best fire protection, build public wharves, complete a sewer system, and do all other things needful, and at the same time increase the taxable wealth of the city and lower the general rate of taxation --- is it not good financial policy to do it?

There is another point. If we become a large city, we shall have a large working class. The working men are the majority, largely so, now; their majority will increase as the city grows. What is the basis of our present and coming prosperity as a city? Commerce and production, certainly; but we cannot have these things without labor. It is the busy hand that carried out the planning of the active head. There must be remunerative employment for labor here, and, as we advance step by step in cityhood, we shall comprehend this more and more. That is a wise policy that increases the field of industry, and it is sound business policy to promote private and public improvement to this end.

The opening of surplus park land for residence creates first taxable real estate; next taxable improvements in the form of new buildings, and the construction of these gives employment to mechanics and laborers. In the improvement of the park lands, in the erection of public buildings, in the building of sewers and other public works, a host of men will have steady employment during the growing years of our city.

And finally there is something to be urged on behalf of the present generation. The San Diegan who is now on top of the ground ought to have some of the fruits of his own work while building for the future. There ought to be some park privileges for the children of the city now growing up. Some of the benefits as well as the burdens of city improvement, ought to be enjoyed by the people who are here now.

Editor, Union: We have a local reputation of extensively advertising our property and when an offer is made of the price stated --- of getting out from under and marking it higher. General Howard has suggested the exchange of a few acres of land of what is now, has been, and will be for a long time a large tract of useless land for a piece of property that the city can't well do without. The pros and cons were before the people. Some threatened injunction on having any part of the Park sold; others were in favor. It's the same way with our Government lands, in which we all have similar rights with the injunction class referred to. Until the Government lands are disposed of, the park will remain the largest elephant any city ever had to carry. Give 10 acres to the Government and it still leaves 1320 acres. With the barracks on the hill and with the Government appropriation for improvement, San Diego's mesas will begin to look like a new Jerusalem, and, as time is money, we shall (have?) our days a few minutes longer as the sun rises earlier and sets later from that standpoint.

We have had some very social gatherings in the interest of the park, proposing to admit members to the Park Committee for five dollars each. It would take as many members as the city can inventory to build a rabbit-proof fence around it. Contract its limits and it can be managed. One member did remark in the old vernacular, "We may not, and you may not see the day, when it will be all improved, but what difference does it make?" That gentleman should go further in the application of his doctrine. We have a large county on hand, and if none of it is let loose for railroads or sold to producers, it would make big difference to the people who have united here to live. That gentleman should take a walk around some of the German states or of Rhode Island, nearer home, and inquire what they would be with 1,400 acres of arable land (if they had it). That party must have been living in Texas or Old Virginia, where a farm is never half cultivated or fenced in.

The advocates of a park on such a giant scale should consider that breathing places will be wanted in other sections of the city. There are vacant lots between 11th and 12th, that require immediate attention for city parks. Either of these plats are as large as Washington on Tompkins in New York City, and nearly as large as Boston Common, the only park in that city.

Have plenty of park roots, but more parks. Cut down the present one to 800 acres, take the money and sewer grade the streets, and be consistent. If this city with its possible number of inhabitants undertakes to tax the people to cultivate 1,400 acres and irrigate it, we shall soon find ourselves further in and over the hill to the poor house, which institution is further over and needs attention more than that park does. Sell off a few squares and put that in shape, then work on the park.

Citizen

December 30, 1886, San Diego Union, 3:2. SAVE THE PARK

Editor, Union: Honest old Daniel Choate was right when he talked right out in the meeting and told the men who are trying to steal the public park that they were thieves. That's just what they are. Talk about "progress" and "development" and all such trash!

Suppose the hills are "bare" for a few years longer, what of it? There is something better than fine buildings on those hills. It is better to hold that park land sacred for the use of future generations, as it was meant to be. We are building houses fast enough. Let us have something for our children and our children's children. A hundred years from now, when we are forgotten, that two and a half square miles of park will be a proud monument of the early days of San Diego.

Let us stamp down the men who would for one instant touch one single foot of this sacredly-dedicated ground. Not for a military post, nor any other purpose should this land be given. It was fatally bad to give the occupation of the ground for the Russ School a few years ago; that was the entering wedge. By such spacious pleas the thieves try to get in their work. I should like to see the city even now provide lands outside the park and remove the school building; it has no proper place there.

There is land enough outside the park for “development” and “progress.” There are “additions” on every hand where good lots can be bought cheap.

Watchman

December 30, 1886, San Diego Union. THE CITY PARK RESERVE

Editor, Union: With myself, I doubt not that many of our old residents were highly amused in reading your report of the emphatically eloquent remarks and the virtuous threats of several impassioned citizens of the “park” meeting held under the auspices of our kind-hearted City Trustees. Amused in noticing how some of the speakers who demurred so strongly at the idea of selling any portion of our 1,400-acre reservation, are among those who are and have been connected with land-grabbing syndicates in the vicinity of “our” reservation. Dry lands that they have been gobbling up recently (as well as years ago) in a very quiet way for a mere song, they are selling and preparing to sell for \$1,000 to \$3,000 an acre, when cut up into lots. Amused to notice how suspicious they were, lest the park lands be stolen. No, no, it’s all wrong to place 200 acres of the city’s lands on the open market until the thousands of lots they are interested in are sold. It’s all right to expend tens of thousands of dollars for boulevards, etc. on the park for this will make their additions, and the Methodist church property more valuable.

The **noli me tangere** park law was passed by the Legislature on the petition of a large majority of the voters of San Diego. We wanted to keep it from being “stolen” by men who were grabbing city land for additions. That race hasn’t died out yet.

I believe that when the people of this city realize that the time has come to improve a portion of the desolate-looking park lands adjoining Horton’s addition, and sell the same legally by public auction, and the majority petition for it, **the land will be sold**. Those gentlemen who are so greatly interested in not having the park lands “stolen” cannot then stop the sale by any “stop thief” cry.

Our visitors laugh at the absurdity of keeping 1,400 acres of bare, brown land as a “reservation” for raising jack rabbits, or as a supposed flower garden on which to feast the eyes of said visitors.

I will add that the men who own these many additions to San Diego, don’t own everything. They don’t own three-fourths of the voters of San Diego.

Anti-Monopoly

December 31, 1886, San Diego Union, 4:2. CITIZENS’ IMPROVEMENT ASSOCIATION

Editor, Union: Some citizens have recently taken steps to form a “Citizens’ Association to Improve and Beautify San Diego.” Under the head of “Preposterous Parks,” there was published in your issue of yesterday a communication from “Citizen” in which he intentionally or ignorantly misstates the objects of the Association. In either event, the misstatement is inexcusable. As a citizen he should have public spirit enough to learn the objects of any citizens’ association to improve the city before attempting to deceive the public by belittling its aims.

The objects of the Association were printed in full in a recent issue of **The Union**. Had he read them, he would have learned that the society desires to do all that he contends for except selling off part of the “preposterous park.” With the selling or subdividing of the park, the society has nothing to do. It may hereafter make suggestions and recommendations, but whether these will favor selling or subdividing the park will depend upon the opinion of the members therein.

It is a society wherein the majority will rule, but the minority can be heard. Its objects are to advise as well as to work. Every citizen should belong. Its objects are as much to improve the “vacant lots” near 8th, 10th, 11th and 12th Streets as to improve any part of the city park or county. In short,

its objects are very comprehensive in every way, and I cannot imagine how any citizen could wish to obstruct its work with any unfavorable comments.

No one can doubt the fact that this town, aside from its grand natural beauty, needs beautifying. It's like the man who asked the doctor what he should do for his bad breath. The doctor told him, "anything would help and nothing would make it worse."

All citizens are solicited to become members of this Association and it does seem to me that all good citizens will do so. The five dollar membership fee can be paid in work or money, and, under the direction of the Society, the work can be done in front of a member's own property as well as elsewhere.

Is it now high time for our citizens to cease all personal abuse and begin pulling for the good of the whole city, and drop the detestable habit of throwing cold water on all public enterprises? The best thing for Mr. "Citizen" to do is to apologize for this slurring insinuations and hasten to become an active member in our Association.

One of Them

Source Unknown, Date Unknown. Indigent Gentlewomen Make Way for Needy Children: In **1887**, the good ladies of the San Diego Chapter of the Women's Christian Temperance Union found themselves with an expanded treasury. As a result, \$1,000 was invested in a "home for indigent gentlewomen," located at 1365 16th Street.

When the San Diego Children's Industrial Home, on the present site of Naval Hospital, burned to the ground a decade later, the gentlewomen made way for the children; since that time this location has been the San Diego Children's Home.

San Diego Children's Home Association, founded 1887 (5.4 acres)

Women's Home and Day Nursery before June 1898

Women's and Children's Home after June 1898

San Diego Children's Home after 1904 . . . 16th and Ash

Russ High School . . . 14th northwest corner A

Public Works Department (14.2 acres, since 1940)

February 12, 1887, San Diego Union, 8:1. George W. Marston claimed 1400 acres not too large for a park; Bryant Howard replies. (Note: entry taken from card index, California Room, San Diego Public Library; newspaper of that date does not contain article in question.)

June 8, 1887, San Diego Union, 5:4. For Beauty and Improvement . . . Last night in the rooms of the Society of Natural History, the organization known as the Citizens' Association for Improving and Beautifying San Diego held a well-attended and very interesting session; Bryant Howard, president, Kate Sessions, secretary . . . Attention was called to the reckless manner in which earth is being removed from the City Park, in the region of Florence Heights.

June 8, 1887, San Diego Daily Bee, 1:7. A Good Work: Meeting of the Citizens' Improvement Association met in the rooms of the Society of Natural History on 6th street last evening; Bryant Howard, president of the Association; Kate Sessions secretary : A Plea for the Missions; New Sidewalks, Tree Planting Along Streets; Building Improvements, etc. . . . Other points brought up before the society were the removal of dirt on 6th street near the City Park, and the building of sidewalks all over the city in places needed. . . . A

topographical map of the city park was ordered made for the use and benefit of the society in making future improvements.

June 25, 1887, San Diego Union. OUR CITY PARK

Editor, Union: Our City Park should be utilized. It contains much more ground than is necessary for park purposes. It strikes me that it might be used in some small degree by the erection on it of a building for public purposes. Why not set aside a sufficient portion for the use of a county fair ground? It would be no difficult matter, if the grounds were first obtained, to raise sufficient funds to erect the necessary buildings. Again, the erection of other public buildings might be encouraged and facilitated by the proffer of the use of grounds for their location. For instance, we need and should ask at the next session of Congress for a time ball and signal service establishment. Certainly the proffer of the ground would encourage and increase the probabilities of our obtaining an appropriation for the same. Already the farseeing and liberal Farm and Land Company have offered lands for the location of the Custom House and other offers will probably be made. Now why not proffer the eligible site for this, for with street car conveniences already established and others in contemplation, the southern portions of the park will be in easy access from all parts of the city. We need other public institutions, such as parade grounds and an observatory. Some of these, if not all, might be brought to a successful conclusion if steps were taken in the right direction. Our public park would be utilized and our citizens materially benefited thereby.

Surely we have more land in that park than will be needed for park purposes for the next half century, if indeed it is ever to be made useful for such purposes. Then why not make use of it for our more immediate wants? Now, Mr. Editor, lend your journal as a powerful influence towards having something done to our present worthless park.

G.G.B. . . . (apparently G. G. Brandt, president, Chamber of Commerce)

June 25, 1887, San Diego Union, 4:2. EDITORIAL: The City Park . . . The utilization of some portion of the city park is again made the subject of discussion by a communication in another column. Among the uses to which our correspondent would devote a part of the 1,400-acre area are county fair grounds, public buildings, such as Signal Service establishment and Custom House, public parade ground, an observatory, etc. The discussion of this subject ceased when the vote on the sewer bond proposition was taken. It is a subject on which there is a wide variance of opinion. Some oppose the appropriation of any portion of the area to any other than park purposes. Some favor selling a portion of it off in residence lots. Some oppose doing anything at all with it at present, claiming that it should lie in its present condition and await developments. One of our correspondent's suggestions at least can be commended. A county-fair ground ought to be provided. A portion of the park might well be taken for this purpose. If the ground were available, it would be an easy matter to secure the buildings. And with these provided in permanent form, it would be an easier matter to carry out the annual enterprise of an exhibit of the produce and resources of the county. If there are legal obstacles in the way, let steps be taken to have these removed.

August 5, 1887, San Diego Union, 3:3. Bryant Howard appeared before the Board of City Trustees and urged the necessity of making a boulevard; a petition for one had been filed with the City Clerk some time ago; Howard thought drives should be laid out in the park and asked that a topographical map be made of the park; ladies would build a Women's Home on the grounds and beautify and adorn the park; details.

August 13, 1887, San Diego Daily Bee, 1:3. FAMILIAR TALKS: Opinions of Various Men on Various Subjects; Park Improvements.

Judge M. A. Luce: I am in favor of a boulevard on the west side of the park; in fact I would be willing to pay my share to construct a boulevard all around the outside of the park. I do not think, at the present time, it would be necessary to go to a very great expense. I do not mean a level grade, but a good highway, and bridged where it might be necessary over the canyons intervening. The grades would be light, and if completed within six months, at the end of the rainy season the track would be in a very fine condition, and become a very pleasant drive for the people of our city. It

would be one movement towards beautifying and improving the Park. I do not think such a highway would cost to exceed \$2,500. There is no grade needed, except, perhaps, at one place. It certainly would not require over \$4,000 if properly expended, and I think the amount could be raised by subscription. There is another thing I would like to say. I would gladly be one to give \$100 towards sinking an artesian well in the Park at some point which might be considered best for the purpose, provided the well should be sunk 1,000 feet if necessary to get water. I think it would be well enough to try it and give it a fair test. We might just as well find out and if we cannot strike water, we may strike something else.

August 18, 1887, San Diego Union, 3:1. City Trustees instructed Chief Engineer to draw up a topographical map of park and to draw up plans for a grand boulevard. 200 ft. wide, to be constructed on the west side of the park.

August 18, 1887, San Diego Union, 3:4. IN A WORTHY CAUSE . . . A benefit performance to be given at the Louis Opera House to raise funds to pay off a \$700 debt owned by the Women's Home Association, after which the Association will proceed to erect a Home for Women on a site in the City Park.

August 21, 1887, San Diego Union, 3:4. Sherman's Illusions drew quite a large audience to Louis Opera House last night. The entertainment was given for the benefit of the Women's Home Association.

September 19, 1887, San Diego Daily Bee, 3:1. EDITORIAL: The City Park . . . Early Improvements Contemplated in this Locality; Trustees Take Action; Horton Plaza, Old Town Plaza, Plaza de Pantoja.

Parks, boulevards and recreation grounds go hand in hand with civilization and progress and in almost every city which has arrived at any reasonable degree of commercial importance, these desirable improvements can be found. In this respect, however, San Diego is lamentably deficient and for a long time expressions of surprise and regret have been freely vented at the seeming negligence of the city authorities to provide a suitable place for this purpose. It is a well known fact that in 1871 the city council then in power laid aside 1400 acres of land on Florence Heights for a city park, although no attempt has been made to utilize it and at present it lies a barren waste. The reason that the matter has not been hitherto taken in hand is owing to the press of other matters connected with municipal legislation which were deemed of infinitely more importance. Four weeks ago, however, the city trustees issued orders that the park should be surveyed and laid off in boulevards and drives, and O. N. Sanford, city engineer, was instructed accordingly. The plot of land is so located as to command a full view of the bay, with National City and the head of the bay in the distance, while the Mexican mountains stand out in bold relief, making the situation one of the most charming and delightful of any in California. The boulevard will be 200 feet wide and will be laid out with every variety of trees and plants peculiar to tropical climes. It is proposed to build a military school upon the grounds, a home for the widows of soldiers and sailors, and other institutions of an equally beneficial nature. When completed it will be the largest Park in the State and will not only be an ornament and credit to the city, but will supply a long-felt want from a domestic point of view. Children can disport themselves to their hearts' content away from the bustle and business activity of city life, and when the daily toil is over lovers can hear find a lonely retreat and pour sweet nothings into each other's ears, wafted by the gentle zephyrs which ever play on old Pacific's shores.

This is a consummation devoutly to be wished, and the energetic matter in which the Trustees are pushing the scheme is commendable in the extreme and gives assurance that in the near future San Diego will have a park to which it can point with pride and admiration.

At present there are three parks in the city. One is called the Old Town Plaza, but is located within the city limits. One is the Horton Plaza, between 3rd and 4th Streets on D, and the other is called the Plaza de Pantoja, and is situated on F Street, between State and Columbia. The last named two are well cultivated and the city has provided experienced keepers to improve and beautify them. They are very small and totally inadequate to the requirements of the population. They are frequently visited by lovers of solitude, and indeed large numbers of citizens and Eastern visitors make them a daily resort.

In view of these facts, too much importance cannot be attached to the park question, and their early construction and adaptation to the public requirements has now become a most urgent necessity in conjunction with the many developments of the city.

September 25, 1887, San Diego Union, 4:1. EDITORIAL: Improve the City Park . . . The time has come when San Diego, with its 20,000 population, that is soon to be doubled, should begin in an energetic and systematic manner to improve its park. The city possesses a noble domain of 1,400 acres devoted to park purposes, which, with proper management and a wise expenditure of money, can be made one of the handsomest and most attractive public resorts in America. Thus far little has been done to improve this future playground of the populace, for the reason that the City Trustees saw no way to secure the necessary funds, save by public subscription. This plan was not considered safe or practicable, and the result is that these broad acres are a barren, dull, uninviting waste. All that is required are the magic influence of water, and the application of labor to change this valuable possession from its present condition to one of beauty and attractiveness. We understand that there is and has been a general desire on the part of the Board of Trustees and the public to bring about this desirable transformation, and we are pleased to announce that there is nothing to prevent such action. The Trustees, owing doubtless to the fact that they are driven with work six days a week, have overlooked the fact that the last Legislature passed an act relating to public parks, that was approved by the late Governor Barnett on March 8th last. Under this act, "The Common Council and Board of Supervisors of the several cities, counties, cities and counties in this State, are authorized to levy taxes for the maintenance of public parks having an acreage of over ten acres within their respective corporate limits." The tax to be levied shall not exceed 3 cents on every \$100 assessed valuation of property real and personal in such city, or city and county. This law was passed particularly for the benefit of Golden Gate Park in San Francisco, but was of necessity made general. San Diego comes within the scope of this law, and, in consequence, there is no reason whatever why the city should not begin the improvement of the park without needless waste of time. It would not be necessary for some years to come, to levy the full amount authorized by the law, for a levy of 1-1/2 or 2 cents of the \$100 assessed valuation would furnish a handsome sum for beginning the work. The initial improvement might well be in the shape of a graded driveway, with a long avenue of trees planted like the famous and beautiful Alameda between San Jose and Santa Clara. In connection with this work, the growth and maintenance of greensward should be commenced and a certain area thus reclaimed each year. San Diego's park is capable of being made to rival the far-famed Golden Gate Park of San Francisco, and the sooner the work of beautifying it is begun, the better for the city. Now that there is no obstacle in the way, we hope to see the City Trustees take the matter in hand and begin this important undertaking. The question, whether or nor the park should be improved, rests entirely with them.

November 2, 1887, San Diego Union, 5:3. Complaints about smoke from garbage fires north of Russ School house.

November 3, 1887, San Diego Daily Bee, 8:1. FACTS AND FIGURES: the double track on 5th Street, its probable cost and workings; meeting of Woman's Home Association held yesterday at residence of Mrs. Marston; proposal to organize an exchange and build a home at the City Park; two hundred men and eighty teams at work grading streets; cost of grading.

A meeting of the directors of the Woman's Home Association was held at the residence of Mrs. G. W. Marston, yesterday. There were present Mesdames W. W. Stewart, president; C. C. Babcock, Dr. Murry, G. W. Marston, and Miss E. M. Chapin. The meeting was called for the purpose of discussing the establishment of a Woman's Exchange in connection with the Woman's Home. It was decided to appoint a vice-president from each of the churches, in order to make the work more universal and to promulgate where it would do most good. It was further decided to hold a meeting on the 15th inst. for the purpose of appointing a board of managers.

The Woman's Home Association was incorporated on the 17th day of February last, at the instance of several ladies who took an interest in Christian work, with the object of forming an institution similar to the YMCA. A building was erected and a room set apart for social purposes, and many beneficial results have accrued. The object of the new branch is to form an exchange where women can leave articles which are for sale. It has been found that a large number of women are able in their leisure moments to prepare fancy and useful

articles of which they have at present no means of disposing. The association has applied to the Board of City Trustees for permission to erect a home on the city park. The directors propose beautifying the grounds and providing an institution worthy of the city.

October 15, 1976, "San Diego's City Park, 1868-1902, An Early Debate on Environment and Profit," by Gregory E. Montes - The Howard Tract

November 4, 1887, B. Howard and E. W. Morse asked the City Trustees to grant them and several associates 100 acres of City Park on the promontory between Cabrillo and Florida Canyon (San Diego Union, November 4, 1887, 5:3).

Howard said that his group could obtain free land elsewhere, but wanted the charitable institutions "near the heart of our city, within easy access of the larger number of those they are intended to benefit." (San Diego Union, November 4, 1887, 5:3)

December 2, 1887, City Trustees granted 100 acres to Howard and Company and also 5 acres to the Women's Home Association on which to house indigent women (San Diego Union, December 3, 1887, 5:5).

November 4, 1887, San Diego Union, 4:2. EDITORIAL: A Great Beneficence

Messrs. Bryant Howard and E. W. Morse applied to the Board of City Trustees last night for a grant of one hundred acres of the City Park, extending from the south line of the park north between the extended lines of 14th and 20th streets, for the use of the following named institutions: An Orphans' Home, the Pierce Boys' and Girls' Home, a Kindergarten, an Industrial School and a School of Technology. The principal objects of these institutions as stated in the application are:

To protect and provide homes for orphans and other poor children, to educate younger ones in the Kindergarten, to give them all a good common school education, to teach them in the Industrial School a useful trade, and to afford the more proficient ones among them an opportunity to study the higher branches of the useful arts in the School of Technology. The Kindergarten, the Industrial School, and the School of Technology will, however, be open to all respectable and deserving children and youth who may wish to avail themselves of such means of education. These institutions are to be purely benevolent and educational and are not to be under the control of any church or sect. The sole purpose for which they are established is to help the young, to aid not only the children of the deserving poor, but to save from vice and pauperism and crime, homeless orphans and children of the cruel and debased. It is intended to give all who come under their charge a useful education, to train them for some honest calling, to instill in their minds the principles of morality, and to prepare them for right living, with strong and healthy bodies, skilled hands, active minds, and high and noble aims.

The foregoing outlines of this charitable and educational scheme show it to be one of great beneficence, one that will be of incalculable benefit not only to the city but also to the State, and one that will be a grand and enduring monument to the charity and generosity of its founders.

The grant of land is not desired for any purpose of doubtful accomplishment. The funds to carry out the scheme are already provided. The munificent bequest of the late James M. Pierce, which will amount to \$150,000 has been supplemented by equal amounts contributed by Mr. Howard and Mr. Morse and a gentleman whose name is not mentioned; making a total fund of \$600,000 available for buildings and endowment. This will be ample not only to establish the institutions, but to permanently sustain them. Aside from the charitable and educational benefits that will result from this scheme, there will be the additional advantage of improving and beautifying a portion of the City Park.

Beyond question this project is one of the grandest benefactions of the time. And it will ever justly be a matter of local pride that it was conceived and executed by men closely identified from the first with the history of San Diego, men to whose faith and courage and effort we are largely indebted for the San Diego that is and the still greater San Diego that is to be.

San Diego Union, November 4, 1887, 5:3. CITY TRUSTEES: At the regular meeting of the Board of City Trustees, Bryant Howard, as one of the executors of the estate of the late J. M. Pierce, presented a petition requesting 100 acres of that portion of City Park situated on a ridge north of the south line of the park, and between 14th and 20th Streets where those streets extend northward, for the use of the following institutions: Orphans' Home, Pierce Boys' and Girls' Home, a Kindergarten, an Industrial School, and a School of Technology; matters were referred to the Committee.

We are willing and indeed it is our desire that the land we ask be granted under the most careful and guarded restrictions.

In putting under the control of private citizens so much and such valuable property, the interests of the city should be fully protected. Bonds should be required that good buildings be erected and that the grounds be improved and kept open to the public, so that the purpose for which the Park was established shall not be defeated or in any wise interfered with. If you will grant our request, we will accept the trust with all these restrictions and give bonds to establish and maintain the institutions we have named in a creditable manner.

Should you accept our proposition, it is our intention to plough the grounds and commence improving them during the coming winter; and, as soon as an Act of the Legislature can be obtained ratifying your action so that we shall be protected from future improper interference, we shall at once commence the erection of the buildings necessary to carry out our design.

Bryant Howard
E. W. Morse

Mr. Howard also spoke regarding the Woman's Home, asking the Board to take some decisive step toward granting land for the buildings of that institution. On motion both matters were referred to the Park Committee.

November 4, 1887, The Daily San Diegan, 5:3. OUR CITY FATHERS: The Pierce executors ask for 100 acres of the public park; a fund of \$600,000.

Ordinances: An ordinance granting a railway franchise to D. Choate and others for a line to Choate and Klauber's addition via the City Park was adopted.

November 11, 1887, San Diego Union, 5:1. Captain William Blanding, of the National Soldiers' Home for Disabled Volunteer Veterans, in a communication to the Board of City Trustees, asked that the City Attorney look into the matter of granting or leasing 160 acres of City Park for Veterans' Home purposes.

November 11, 1887, The Daily San Diegan, 1:5. BOARD OF CITY TRUSTEES: City Park and Soldiers' Home . . . Captain William Blanding of the National Soldiers' Home for Disabled Volunteer Veterans, in a communication, asked that the City Attorney look into the matter of granting or leasing 160 acres of the City Park for Home purposes. While Captain Blanding was before the Board of Trustees, it was a question of doubt whether the Board had the right to lease any portion of the Park for such purposes. Captain Blanding also asked if the Commission would be allowed the privilege of selecting any site it should choose. The City Attorney will report on the matter at the next regular meeting.

November 11, 1887, San Diego Daily Bee, 4:1. Soldiers' Home . . . The commission which is to determine the location of the soldiers' home is already on the way to the coast. Only a few days will elapse until they will be with us. We should well remember that we are not alone in our application for the location. San Jose, Napa city, Monterey, Salinas, Los Angeles, San Buenaventura, Santa Barbara, and we know not how many other places are begging for the location at their respective cities. . . . We must remember that, though Captain Blanding's expressions were most favorable to our city, there was no positive assurance on his part that his voice would be in our favor, and besides, he has but one vote in the commission. . . . San Diego can not fail to win the prize.

November 15, 1887, San Diego Union, 5:3. THE WOMAN'S HOME . . . Among the many evidences of the rapid growth of this city is the establishment of institutions of a benevolent and charitable character and the prompt and cheerful readiness with which the people respond. . . . In order to begin their benevolent labor without delay a fund of a few hundred dollars was raised and a temporary building on leased ground on 7th Street between E and F was erected. . . . The rapid increase in the population of the city demands the erection of a permanent home sooner than was anticipated and the association expects that the City Trustees will give a decisive answer to their petition at an early date. . . . In connection with the Home, the ladies desire to establish a "day nursery," where working women can leave their children by the day or week while they are earning their own support.

November 17, 1887, San Diego Union, 4:2. The laudable enterprise of the Woman's Home Association in providing a home for indigent women is one which deserves the commendation and assistance of all.

November 17, 1887, San Diego Union, 5:1-2. Meeting of Woman's Home Association yesterday afternoon at the residence of Mrs. George W. Marston; revised constitution and by-laws adopted; ways and means of procuring buildings, etc. for the establishment of an Exchange discussed; Bryant Howard authorized to petition the Board of Trustees for 5 acres of land in the park for the site of the Woman's Home building.

November 18, 1887, San Diego Daily Bee, 8:3. CITY COUNCIL: important measures discussed at meeting last night; proposition to establish fine benevolent institutions on a portion of the City Park; licenses of two 5th Street saloons rescinded through a disregard for the City Ordinance.

The bond presented by [Bryant Howard] was for the sum of \$100,000, stipulating that upon the instigators neglecting to comply with their agreement, the land and property would revert to the city. He further offered a security bond that \$250,000 would be expended within a specified time. Mr. Howard stated that they proposed spending \$600,000 in these improvements and the buildings to be erected would probably cost over \$50,000 each.

Mr. Woolman thought that the only chance to improve the park was by selling a portion of it, and he did not agree in disposing of that part of the land.

Chas. Hamilton stated that the proposition to form a horticultural and agricultural association had resulted in their appearing before the board to ask them for a certain portion of land upon which to erect a suitable building.

The matter was referred to the park committee.

November 19, 1887, The Daily San Diegan, 4:1. Slicing the Park . . . The Horticultural Association only wants 40 acres of the City Park, and will be satisfied if the City Council will donate this unnecessarily large tract from that portion of the park property that forms a continuation of 6th, 7th and 8th Streets. On commonsense grounds we agree with the **Sun** that 10 acres would be amply sufficient for the purposes of a Horticultural Association. About a year ago, the cry was "not a foot of the park for any purpose except a park." Now a vehement cry is made for a partition of the park in big blocks without any regard to the possibility of maintaining the tracts donated in a manner worthy of the purposes designed. Nothing seems to satisfy those who are trying to prey on the patrimony of the city, but the most desirable portions of the park, and they want all or nothing. The Horticultural Association wants "40 acres and a mule," the mule to crop the sage brush. We should think the better way would be to try 10 acres, and after that had been utilized, additions could be made as necessity required. We do not think the committee should consider for a moment the idea of donating any part of the park at present west of 12th or 15th Street, but for certain reasons they probably will. At present, about 250 acres are asked for by various societies from the park reservation. The flood gates are being opened. If the whole park is to be gobbled up in big mouthfuls, better begin at its eastern limits, and work this way. It is an old saying that beggars should not be choosers. The Horticultural Association simply ask the city to donate a piece of property that at the lowest calculation is worth over \$1,000,000 cash, and we fear they will get it, and get it where they ought not to have it. Improve the park by all means, but keep a little of the 1,400 acres for park purposes.

November 28, 1887, The Daily San Diegan, 1:4. Soldiers' Home: Making Arrangements for the Reception of the National Board . . . time and place of holding a banquet and reception discussed; Point Loma Land and Town Company offers \$25,000 in cash or 80 acres of Point Loma land as a location for the Soldiers' Home. . . . It was the opinion of all present that a site for the Home in the Park is the only location that would be acceptable. . . . J. A. Melten responded that as far as the Park is concerned, the Board of City Trustees cannot give a title to any portion of it, without special permission from the Legislature. A decision to this effect has recently been given by City Attorney Titus.

November 30, 1887, The Daily San Diegan, 4:1-2. Our City Park.

Messrs. Editors: The question of "What shall we do with our Park?" has been propounded so many times, and so different were the answers, that the writer now propounds the conundrum: "What can we do with the Park?" And the law on the subject seems to imply that we can do nothing with it, but make it a free park. Certainly we cannot sell any part of it, and it looks as if we could neither lease nor give any part of it away to anybody, but must forever keep it a free public park. That a part of it could be sold to good advantage, none can deny; that a part of it ought to be given to the Soldiers' Home, a Horticultural Hall, or to aid benevolent enterprises, all will concede; but how to override a decision of the Supreme Court, and disregard the statue under which the park was created is the question. In California, reports, statutes of 1869-70, page 40, section 1, reads as follows:

"That so much of the resolution heretofore passed by the President and Trustees of the City of San Diego setting apart and dedicating certain lands, to wit: Pueblo lots 1129, 1130, 1136, 1137, 1142, 1143, 1131, 1144, containing 1140 acres of land, said numbers being according to the official survey of the City of San Diego as made by Charles H. Poole in the year 1856, to the use of the citizens of said city for a public park, is hereby approved, confirmed and ratified, and the said lands, and none others, are by this statue declared to be held in trust forever, by the municipal authorities of said city, for the use and purposes of a free and public park, and to be under the control and management of the said authorities, and for no other or different purpose, as fully and effectually as though set apart and dedicated in strict pursuance of a statue passed by the legislature for such purpose."

If we could repeal that statue, it would be an easy matter to utilize the park, but our Supreme Court decisions would seem to indicate that we cannot. In the case of San Francisco vs. Canaran, Forty-Second California Reports, pages 553-554, the court expressed the following views which are pertinent to our park:

"Until accepted, the dedication, whether may by deed or otherwise, may be revoked by the owner of the land. To constitute a valid and complete dedication, two thing must occur to-wit: an intention by the owner clearly indicated by his words or acts, to dedicate the lands to public use, and an acceptance by the public of the dedication. This acceptance is generally established by the use by the public of the land, for the purpose to which it had been dedicate. The use must be of such duration that the public interest and private rights would be materially impaired if the dedication were revoked, and the use by the public discontinued."

In our City Park, it might be contended that, as we have never spent any money on the park, that the dedication was incomplete, but in the case of Hoadley vs. San Francisco, California Reports 50, page 273, this contention is settled.

In this case the Supervisors of that City attempted to sell some of their public parks to private individuals, and, as the lands were valuable, the best of lawyers were employed by each side. As the decision of the Court is rather lengthy, I will only quote that part which would apply to our park:

"It is contended that the order of the Justice of the Peace was void on the ground that they could not be invested by the Legislature with the power to perform duties of that character; but it is unnecessary to determine that question, for, conceding it to have been void, the question to be determined is what was the effect of the act of March 1st, 1858, in ratifying the ordinances and order, all of which were void at the time of their adoption; that is to say, void, so far as they attempt to convey titles to private persons, and select and dedicate to public use the squares involved in the case? The act of March 1st, 1858, ratifying and confirming the ordinance, and the order there recited, operated, as we construe it, as a selection and dedication to public

use of the squares in controversy, and no further acceptance by the public than was afforded by the act was needed in order to make the dedication complete.”

This decision would imply that the statue of 1869-70 confirming the resolution of the City Trustees was a full and complete dedication, and as it now stands, the city only controls the park in trust for the purpose named: a free public park forever --- and the decision in California Reports 42, page 553, seemed to decide the question whether a dedication can be revoked, to wit: if the dedication is accepted, such dedication cannot be revoked, and in California Reports 50, page 273, it states that the ratifying of the dedication by the legislature acted as a complete dedication and acceptance. Returning to the question, what can we do with the park? Let us beautify a part of it, say 10 or 20 acres in the westerly part, about where Fir Street would intercept 7th Street. This is one of the highest and sightliest parts of the mesa and commands a view of the entire bay and ocean, National City and Point Loma. Let us do something, if nothing more than a few acres put into blue grass and a few trees and flowers.

PRO BONO PUBLICO

November 30, 1887, The Daily San Diegan, 4:1-2. Editors Note: we publish today a forcibly written article on the important question of the disposal of any portion of our city park for any purpose, philanthropic or otherwise. A prominent citizen presents some legal points that will prove interesting reading to those who believe in the partition of the park, and we are among that class.

December 1, 1887, The Daily San Diegan, 4:2, 5:4. Soldiers’ Home . . . The Commissioners who have been appointed to select a site for a Soldiers’ Home in California arrived this morning and are domiciled in the Florence Hotel. We do not deem it necessary to multiply words in regard to climate and ozone, as the distinguished gentlemen who compose the Commission have probably been surfeited with such talk during their progress through California, and particularly through Los Angeles. Good wine needs no praise. San Diego, her beautiful site, ocean view and commodious harbor, are eloquent of merits, without the addition of sky-scraping adjectives. If our actual merits will not convince the Commissioners of our superior advantage no words of newspaper praise could add to the conclusion they may reach. Of course, it is all nonsense to say that a portion of the City Park cannot be appropriated for philanthropic or other proper and legitimate purposes, for it certainly can be at the request of the municipality and by an act of the legislature. We certainly believe no city in the United States --- and surely none in California --- can furnish more substantial esthetic merits than San Diego by virtue of her climate and commercial resources.

December 2, 1887, San Diego Union. City of San Diego deeded 100 acres across the south end of what is now Balboa Park to Bryant Howard, Chas. S. Hamilton and M. A. Luce as trustees for the purpose of establishing thereon an Orphans’ Home, a Boys’ and Girls’ Home, a Kindergarten, an Industrial School, and a School of Technology.

December 3, 1887, San Diego Union, 5:5. CITY TRUSTEES: Site granted for the Pierce Beneficiary Institution --- President Hamilton in chair and trustees Julian, Woodman, McRea and Valle at meeting last evening; voted unanimously to grant Bryant Howard and Ephraim W. Morse 100 acres in the City Park to erect buildings of a benevolent institutions provided in the will of the late J. M. Pierce; petition for five acres of the City Park for the Woman’s Home Association for the erection of buildings for indigent women also granted.

December 3, 1887, The Daily San Diegan, 1:4. The Board of Trustees . . . Bryant Howard appeared before the Trustees in behalf of himself and E. W. Morse asking that they be granted a deed in trust of 100 acres in the City Park, upon which to erect the buildings for the benevolent institutions provided for by the will of the late J. M. Pierce. He presented to the Board a synopsis of the plans, partially matured. The tract asked for lies nearly in the center of the park and includes the most elevated portions. The petition was granted by a unanimous vote of the Board.

A petition was presented asking that five acres of the City Park be set aside for the Woman’s Home Association, the organization to erect buildings for the benefit of indigent and poor women. The petition was granted.

A petition was presented by a number of citizens on 22nd and 23rd Streets, in the southeastern part of the city, asking that the Indians camped in that vicinity might be compelled to fold their tents and steal away for sanitary and moral reasons. Referred.

December 5, 1887, San Diego Union, 5:1. The Board of City Trustees last Friday granted to Bryant Howard and E. W. Morse a trust deed of 100 acres in the City Park for the purposes specified in the estate of James W. Pierce; the initial step in what promises to be the most extensive and comprehensive system of benevolent and educational institutions in this country, if not in the world.

December 5, 1887, The Daily San Diegan, 5:3. The Parks . . . The proceedings of the Board of City Trustees shows that that body has concluded to donate from the big park 100 acres of land for the Pierce charitable institution, and 5 for the woman's home. We hope the Trustees understand exactly what they are doing; and are doing their work so that their acts will not be called in question hereafter. Of course, this action, unless it be the property is merely leased, will have to be subjected to further legislation or to a vote of the people. The Board may be entirely right, but it is not in consonance with the views we have entertained, unless it is intended by placing these gifts well back on the park, to hereafter utilize portions of the frontage so as to meet and pay off a city debt, which is unnecessarily adding to our tax bills. That may be the intention. We will see further on.

December 8, 1887, The Daily San Diegan, 5:2. Soldiers' Home Located . . . A dispatch from Las Vegas, New Mexico, dated yesterday says the Board of Managers of the National Home for Disabled Volunteer Veterans at a meeting at the Phoenix hotel last night selected 300 acres of land adjoining the town of Santa Monica, Los Angeles County, for the Pacific Branch Home for Disabled Veterans. . . . During their visit to the Pacific coast they visited ten different cities in California and inspected 20 sites offered.

December 13, 1887, San Diego Union, 5:5-6. Contractor dumping at least 20 wagon loads of garbage daily in ravine just above Ivy Street in City Park.

December 16, 1887, San Diego Union, 5:2. Health officials have put a stop to the dumping of garbage in ravines in City Park.

December 30, 1887, San Diego Union, 5:1. CITY TRUSTEES The last regular meeting of the Board of City Trustees was held last evening. Bryant Howard read the form of a deed conveying five acres of the City Park to the Woman's Home. The deed conveys the property in trust for a benevolent purpose, and it is to be kept open as a public park. Mr. Howard wished the Board to authorize its president to sign the deed, and on motion it was so ordered. By the terms of the deed the projectors of the Home agree to commence building within one year after the passage of an act by the State Legislature confirming the grant.

At the request of W. J. Mossholder, the ordinance granting to Albert E. Castle and others the right to construct a street railway connecting the eastern terminus of the D street road with the City Park terminus of Steiner, Klauber, Choate and Castle's Motor Railway was read and adopted.

January 1, 1888, San Diego Union, 5:5. For the purpose of a thorough topographical survey of the City Park its exterior boundary has been retraced and nearly 15 miles of meander and contours have been run. In addition, about 1,000 stations have been located in the park where the elevation of the grounds has been taken.

January 10, 1888, The Daily San Diegan, 5:1. The survey of the belt road to extend around the City Park by way of D and 5th Streets, University Heights and Steiner, Klauber and Choate's addition, was completed yesterday by the staking of the link connecting the two suburbs named. The road in Switzer Canyon is ready for the steel, as it is graded and the bridges and culverts have been completed. Ties are on the ground. Tract laying on the line through Steiner, Klauber and Choate's addition will commence within ten days, and in less than three weeks Superintendent of Construction Howard expects to have trains running.

January 25, 1888, San Diego Union, 5:2. Park Committee in favor of leasing not over 5 acres to John A. Helphingstine to develop a lime deposit; City Council instructs City Engineer to survey a boulevard 150 feet wide from City Park line on 12th Avenue to College Heights.

January 25, 1888, The Daily San Diegan, 1:4-6. CITY FATHERS: The Committee on Parks recommended that no ground be leased to anybody for the purpose of building a baseball park, but that a general permission be granted to play in the park. Adopted.

The same committee reported in favor of granting the lease to John Helphingstine and Company to five acres in the park for the purpose of taking off the lime there from, they paying the city a royalty on each barrel taken out.

The joint committee on streets and parks reported upon the matter of laying out a boulevard in the park to connect with the University Heights boulevard, and recommended that the city engineer be instructed to lay out a drive 150 feet wide along the ridge where the road now extends, and prepare estimates for the work.

February 15, 1888, The Daily San Diegan, 1:4-6. CITY FATHERS: The Park Committee reported that they had visited the park and found that several parties were occupying different portions of it, and that brick makers are damaging it considerably by great excavations. The matter was referred back to the Park Committee for further investigation.

An ordinance was adopted creating the office of pound keeper, and locating the city pound in the City Park, near block 24 of the Bay View homestead. A Mr. Logan was elected pound keeper.

March 7, 1888, San Diego Union, 5:1. Chamber of Commerce advocates building an Agricultural Hall.

March 21, 1888, San Diego Union, 5:8. D. Cave and others protest granting leases to different institutions.

March 30, 1888, San Diego Union, 8:3. "Mayor" W. J. Hunsaker, president of Board of Trustees, opposes granting portions of park land to institutions.

April 17, 1888, San Diego Union, 1:4. A flower festival will be held in this city early in May, the proceeds going to the Woman's Home.

May 16, 1888, San Diego Union, 5:2. The ladies and management of the Woman's Home Association have determined to raise the fund as nearly as possible from the people at large by giving the contributors entertainments.

June 23, 1888, San Diego Union, 2:2. At yesterday's meeting of the Woman's Home Association the subject of the day nursery was considered and acted upon. . . . The object of the day nursery is to provide a comfortable and suitable place for children while their parents are at work during the day.

July 4, 1888, San Diego Union, 5:2. The Woman's Home . . . At a recent meeting of the Woman's Home Association it was decided that the society make an early effort towards meeting the needs of a day nursery.

August 1, 1888, San Diego Union, 5:5. Judge M. A. Luce returned from an extended trip; reports the Republican party united; says San Diego known in the east as a winter resort; "streets must be paved, proposed boulevards built, and the park pushed to completion."

September 5, 1888, San Diego Union, 1:5. City Council meeting yesterday . . . A petition asking permission to store manure in a portion of the City Park was referred to the Board of Health. . . . E. D. Switzer and others asked that the Indian Rancheria in Switzer Canyon be removed; accordingly, a committee, consisting of Councilman McRae, Arnold and Pringle, was appointed to look into the matter with power to act. . . . The City Lands Committee reported favorably on the petition of George Currenreid for permission to prospect for coal in the City Park. Adopted.

September 23, 1888, San Diego Union, 5:4-5. San Diego Charity: a million dollars on behalf of the needy; a benevolent institution; the work of Bryant Howard.

The grand system of charitable educational institutions towards the establishment of which the first steps were taken in the closing of the month of last year by the grant of 100 acres in the City Park as a site for the buildings and grounds is about to commence its active and practical developments.

An outline of the system, as presented in the columns of **The Union** last December, showed it to be the grandest, most comprehensive, most practical and most useful charitable educational project which has been devised in this country, and probably in the world. So broad and liberal were its purposes, so complete its objects, so practical and so striking in their evident usefulness were the features of the plan that it has attracted the attention of the educational and philanthropic world.

Mr. E. T. Dooley, who was for seven years superintendent of the boys' and girls' aid society of California, is now in the city in charge of the preparatory work necessary to the perfection of the plans. Mr. Dooley, who nearly a year ago resigned his position as superintendent of the boy's and girls' aid society to take charge as manager of the great San Diego project, has since last June been busy in the east; having made a three month's tour; visited all the representative charitable and educational institutions of the country, and attended the conference of national charities and correction held in Buffalo, New York, last July. To the Buffalo conference he went as state commissioner of charities by appointment of Governor Waterman, and, besides making the great San Diego project prominent before the conference, he lost no opportunity of presenting its remarkably commendable features to all the prominent societies and persons in the country interested in charitable and educational work.

Mr. Dooley, who was seen at the St. James last evening, said: "The object of my work in the east was to come in contact with the foremost men and women interested in all the various departments of charity and education, to lay before them the plan of this great institution which is to have its center in San Diego, to get their ideas of the work, and to bring back with me all the information obtainable from the best sources in the country for the benefit of the institution. All with whom I counseled, among them being Dr. J. D. Rankle of the Boston School of Technology, the father of the idea of manual training as an educational factor by principles; Dr. Feliz Adler of New York; Dr. Belfield of the Chicago manual training school; and scores of other men whose lives are devoted to various departments of the work contemplated here, declared that the San Diego plan provided for the most complete and comprehensive system of charitable-educational institutions ever devised in this or any other country. It is not intended to ask any money from the state for the support of the system, and it will not be dependent upon any private source beyond what has already been provided, though any aid which may be furnished can and will be put to a good use. It is to be a San Diego institution, and will continue to attract, as it already has, the attention of the philanthropic world."

The outline of the plan of the work and the institutions, as given by Mr. Dooley as state commissioner of charities for California to the conference of national charities and correction at Buffalo is substantially as follows:

Without doubt the most comprehensive system of charitable educational institutions in America will be that now being established in San Diego for the benefit of the children and youth of the Pacific coast. The enterprise will represent an investment of over \$2,000,000, and will comprise a chain of institutions intended to receive children of all ages and both sexes mainly but not exclusively of the "dependent" class, and equip them physically, morally, mentally, and, I may add, industrially for the everyday business of life. For the present, details can hardly be given, but a glance at its history will convey some idea of the work designed.

Bryant Howard, several years ago, conceived the idea of founding an industrial school for poor children --- not a reformatory, but an establishment to supplement the common school and prepare its pupils to effectively cope with the realities of their sphere. He saw that education of the intellect alone was not enough, that the greater number of our boys and girls needed most to express themselves through their hands, that their fingers, so to speak, should be taught to think, and so to think that from the start they might be the guaranty of a proper solution of their owner's life problem. He discussed the matter with the late James M.

Pierce and other friends, one of whom, whose name is for the present withheld, immediately provided the equivalent of \$250,000 to found an orphans' home.

About a year ago, Mr. Pierce died, bequeathing property which is today worth another \$250,000 to the establishment of a child-saving institution, to be conducted mainly upon the theory of the boys' and girls' aid society. This is known as the Pierce bequest. These gifts were the foundation of the large present and larger prospective resources of the scheme. Bryant Howard, Judge M. A. Luce, and C. S. Hamilton were named by Mr. Pierce to be the executors of his estate --- this trust. Mr. Howard and another leading San Diegan, E. W. Morse having agreed that they would each contribute as much as the Pierce endowment. We thus have in money a certain million of dollars. These gentlemen have secured in trust from the City of San Diego one hundred acres of the City Park land for the purposes of this child-saving university, which was conveyed to Messrs. Howard, Morse, Luce and Hamilton as trustees; Messrs. Howard and Morse voluntarily executing a bond of one hundred thousand dollars for the faithful observance of the conditions of the trust. Another very important gift has been secured from the flume company by these philanthropic men --- the guaranty of a full supply of water for the entire one hundred acres for all time to come.

Thus it will be seen that nothing but proper administration and the devotion of personal interest and experience are required to develop this scheme, the like of which, I believe, has never been undertaken or devised elsewhere in this department of humanitarian service. Every care will be taken to unfold a system as nearly perfect as may be, that there be no reaching upon ground already covered, no overlapping, but a perfect interlacing each department sustaining its proper place and its just relation to a symmetrical whole.

In general it may be said that the establishment will include first (the idea of protection, shelter, subsistence) the orphans' home. The family idea will be observed as closely as possible in every detail of the work. Cottages will be erected --- each to be in charge, probably, of a man and wife --- to contain, say, twenty boys or girls; and the cottage arrangement will admit of a careful, general classification of inmates. The little children will be instructed in the kindergarten, others will attend the public school, and the natural principle of human development will permeate the entire work. There will be a manual training school with various departments, containing every requisite for such an establishment, for both sexes of the pupils, between, say, 10 and 13 years of age, and particular attention will be given to the instruction of girls in sewing and domestic duties. There will be a technological department for the older and brighter, those who evince inclination and capacity for advanced training. It is the intention of the directors to have on the premises and under the same administration a hospital for women and children and a training school for nurses. The nurse graduates they hope to be able to develop from the larger girls of the establishment, and the hospital will specially provide for the care of children having infectious diseases. There will be the adoption and indenturing of children and their proper supervision when placed out as practiced by Michigan and by the aid society in San Francisco.

Finally the entire establishment will be a school or college for the preparation of young men and women of character and general education, who have fondness and capacity for it, for life service in child-saving and child-training, and who, after a two or three-year course of systematic study and discipline will be given diplomas. It is also proposed as part of this same general scheme, to erect in the heart of San Diego an institution for youths and men, which will include eventually the best features of the Cooper Institute of New York and the Christian Union in Boston.

Among the results of Mr. Dooley's work in the east, where he lectured in many towns and cities and in the Buffalo conference, was the securing to San Diego the next annual meeting of the conference of national charities and correction. This important result, which, as heretofore reported in **The Union**, was one for which Bryant Howard of this city has been actively interested, and which was accomplished against the efforts of Baltimore, Philadelphia, and a score of other eastern cities, all of whom were desirous of obtaining the coveted prize, will bring to San Diego a body of men and women embracing more culture, education and wealth than any other in the country. It is believed that fully 1,000 representatives will be present at the San Diego conference, and it promises to be the largest event ever held in the United States.

Mr. Dooley states that a large number of inquiries and applications for the benefits of the institution have been received, and that the work of classification will begin at once, without waiting for the erection of the

magnificent buildings which are to constitute the plant of the completed system. For temporary accommodation, it is likely that a number of cottages will be built.

The final plans of the institution include the erection of large structures and a great expenditure in beautifying the lands in the city park with lawns and landscape gardening to make it equal, if not superior to the beautiful grounds of the eastern institutions, and it is expected to be one of the most famous attractions of the Pacific coast.

October 10, 1888, San Diego Union, 5:5. City Council meeting yesterday . . . January 23, 1889, San Diego Union, 4:2. EDITORIAL: The Charity Grant.

The Sun makes the absurd claim that the location of the park charities, with their "decrepit old men and women and orphan children", in a place which was "originally intended for beautiful landscapes, flowers, shrubbery," etc. is likely to depress "the overburdened and weary people of the city" who may visit the park for recreation. And a little further along in the same article, it says, "if it [the Charity land] should be located upon the park, let it be put up on the opposite corner, away from the bustle and confusion of the city." It is to be presumed that the "overburdened and weary people" will hardly seek that 100-acre corner of a 1400-acre park, which is not near "the hustle and confusion" they want to avoid. What **The Sun** really proves by its amazing paradoxes is that the charity grant is in just the place that its kind of pleasure-seekers would prefer to have it. "Mr. Howard may think it hard," as **The Sun** says, "that other people do not see as he does," but our esteemed contemporary need not take that to heart, so far as its own dissent is concerned. Mr. Howard and the other trustees of the charity fund are doubtless perfectly willing to have such opinions advanced, for the very ease with which they can be refuted and destroyed.

There is no good reason yet adduced why San Diego should refuse the million-dollar benefit which the charity trustees wish to give it. The objections rest upon the most puerile and mischievous fault-finding. Mr. Howard and his friends are concerned in no "deal" or "job," and contemplate no private gain whatever except

such as may come from the thanks of the sick, the motherless and the suffering. They ask for 100 acres of land out of a city park which is six times as large now as the city can improve and twice as large as it [the City] would care to tax itself if it had 250,000 inhabitants, a park larger than that of New York and Brooklyn combined, and which, from the nature of its soil, would incur a heavier daily expense for care and cultivation than do those metropolitan pleasure grounds. This 100-acre reservation, moreover, is not asked as an out-and-out gratuity. Under the terms of the deed, it must always be subject to the general boulevard system and can be traversed freely by the city's pleasure seekers. All the right which Mr. Howard and his associates reserve is the right to expend several hundred thousand dollars upon it, relieving the city of the tax for its maintenance and thereby fixing a place where children can be taught to earn a living and where the sick can find care and medicine.

Suppose that the malcontents succeed in their crusade against the grant, causing the charity trustees to withdraw, discouraged, from their humane enterprise, and what does the city gain? The answer is easy enough. It gains the right to add just that amount to its taxes which the improvement of the 100 acres would call for. And what does it lose? Why, the possession of the noblest system of charities on the Pacific coast. Let every reader sum up the profit and loss for himself.

We have too much respect for the people of the city to think they would join **The Sun** in objecting to the presence of "decrepit old men and women and orphan children" in the park; and that they would insist that such unfortunates be driven away from all that might serve to cheer their declining days or raise their drooping spirits. San Diegans, however, "weary and over-burdened," would not protest when "sad-eyed orphans" catch a glimpse of "beautiful landscapes, flowers and shrubbery"; and the assumption they would is an insult to their humanity.

January 26, 1889, San Diego Union, 4:1. EDITORIAL: (untitled) . . . The attempt to convict the City Park philanthropists of self-seeking in the matter of the charity grant would be amusing were it not for the motive than inspires it. Here are men who want to spend a million dollars for the public benefit and are restrained in every legal way from speculating with their trust. They ask 100 acres of mean land to improve for the common good, and, in no possible manner could they use it to line their own pockets. The men who stand in their way are little less than public enemies.

January 26, 1889, San Diego Union, 6:1-2 (See also February 6, 1889), MR. MARSTON'S VIEWS, He Discusses the Park Charity Question and Explains His Action.

Editor Union: In compliance with the conversation in our recent interview, I beg to hand you my letter upon the park grant question.

It is consistently asserted that our City Park is too large, and instances are given of larger cities with much smaller parks. But there is no force in the objection, for San Diego is not to be measured or treated by the examples of other cities. What other city of this size has a hotel that is comparable to the Coronado? Such a palace would be a complete failure and absurdity in almost any city of five times our population; San Diego should have a park also of grand proportions and capabilities. The large cities of the United States are far behind the cities of Europe in respect to great parks, and much to our disadvantage, as we are beginning to discover. London has 22,000 acres of parks; Paris, 17,000; Vienna, 8,000; and Berlin, 5,000; as against 1,000 to 3,000 in our largest cities. New York City, with only 1,000 acres, is now endeavoring to add nearly 4,000 acres to the park area at an estimated cost of \$9,350,000. San Diego is comparatively small, but she has "great expectations" and the time for securing great and invaluable advantages is before the city grows large and the difficulties are increased a thousand fold. Instead of arguing from the smallest of these cities' parks, that we do not require _____, let us consider it their misfortune and congratulate ourselves upon our rich inheritance. Our resources for growth and prosperity are not only commercial and agricultural, but

they lie largely in the attractiveness of the city and its suburbs. The climate is an unfailing capital, but other cities also boast of good climate. Tourists and health seekers went beautiful surroundings. In its natural features, San Diego should be built up more like Paris than London, a city of resort and residence for the wealthy and leisure classes. Our park lands are not too extensive for long, wide boulevards, numerous driveways and bridle paths, masses of trees, open groves, stretches of greensward, plazas and parade grounds. Since the opening of the new road, I have been surprised to find how quickly one may drive around the elevated portions. Our park is actually too short by a considerable distance on the northern side; and the park committee were compelled to run the boulevard into Fifth street at the northwest corner, so as to get around the large canyon by way of University Heights. The new boulevard is horseshoe in shape, with the curve outside the park. Between the driveways, the ground is broken up with canyons and ravines. The east boulevard is on the high, wide ridge near the center of the tract. Further east, there are more canyons and arroyos, with some spurs of mesa land.

This central ridge, running northerly and somewhat easterly from the Russ schoolhouse, is the principal portion of elevated plateau in the park, and it extends further south and nearer the central part of the city than the other high lands. It is this crowning, magnificent promontory that Messrs. Howard and Morse have selected for the site of their institution, and I admire their good taste and discernment. One needs to drive up to the north line of their grant in one of our glorious days and then come toward the city to the very crest of the land to appreciate its beauty and desirability. Canyons to the left and ravines to the right are carefully reserved for the city. To say that we are only giving one-fourteenth of the park is not so true as to say that it is one-fourth, when location, accessibility and value are considered.

As one of the Park Committee of the council, whose duty it is to guard the city's interests, I cannot recommend the grant and use of this valuable property for any other than park purposes, however worthy and beneficial their object. The Park Committee are accused of being obstructionists and opposers of charity. Just as well accuse a man of cruelty to animals if he should object to a watering trough in the doorway of his business office. Electric light is a good thing for a city to have, but would a citizen lack public spirit if he objected to a 300-foot mast being planted on his lawn. In their petition to the Board of Trustees, Messrs. Howard and Morse used these words: "While we can, without cost, obtain the land necessary for our purpose and a large bonus, also, by locating these institutions elsewhere, we are desirous of placing them near the heart of our city, within easy access of the large number they are intended to benefit, and besides, we wish to avoid the appearance and even the suspicion of being engaged in a real estate speculation." In his recent communication to the papers, Mr. Howard has stated that if this deed is annulled, San Diego will lose these charities, and they will be compelled to write to the National Conference of Charities that San Diego does not want them to assemble here. How does this follow? Why must they have a full hundred acres in the park, and in exactly that part of it, or else the charities go? Would the National Conference stay away if the city should give only twenty-five acres in another part of the park? By their own statement, the institution builders can obtain land without cost and a bonus besides. The word "elsewhere" evidently does not mean in another city, for they say they desire a location near the heart of the city, easy of access for those they are intended to benefit. And James M. Pierce, without _____, meant to provide for a San Diego school without a grant of the best one-hundred acres in the park. In the early days of San Diego, Mr. Howard and Mr. Morse were among the foremost opposers of any encroachment whatever on park lands. They are both signers of the petition to the legislature upon that subject, and did their part toward forming the public sentiment that our park should be maintained intact. It is still necessary to keep up that public feeling, or else by gradual compliance with the petitions of associations and societies, and the efforts of discontented taxpayers, our park will be cut down from time to time. So able and influential a citizen as Senator Bowers thinks now that the western portion should be sold off, and many share his views. In my opinion, this tendency to narrow down the park should be opposed and no precedent established even in behalf of charitable and money-distributing projects. Already the water company are asking for a reservoir site at the very crown of the west boulevard, and several other organizations are seeking for sites, and they all want the choicest tracts.

It is claimed, and with fair reason, I admit, that the managers of the charities would be able for some time to improve their tract more highly than the city would. Even if this be so, it still seems to me more desirable and wise to make all the improvements under one comprehensive plan, and put the park management entirely under on Board of Commissioners. My study of the subject leads me to believe that these grounds can be

splendidly utilized and improved with far less expenditure of money than is commonly thought necessary. In the springtime, it is even now a beautiful place and in a few days it will afford the pleasantest drive there is about the town. I am not afraid of a few taxes for good purposes, but if our city government would adopt a policy that would lessen the need for so many policemen, judges and jailers, there would be more money on hand for trees and flowers. But if there or four citizens are able to beautify a hundred acres of land, besides supporting a whole series of institutions, I think a whole city full of people are not unable to compass and care for a little larger portion of public land.

George W. Marston

January 30, 1889, San Diego Union, 4:2. EDITORIAL: An Original Bear Movement . . . The City Council in passing a condition which may deprive San Diego of a million-dollar benefit misrepresents the people, misuses the taxpayers and creates the impression that some of the members are "bearing the town." The proposition set before it has been clearly set forth in these columns, and may be briefly outlined again. The council was asked to exchange 100 acres of land for a million-dollar system of charities, and, after the charities are built, to regain all necessary control of the site. This it refuses to do, because it prefers the whole tract --- larger than that covered by the great parks of New York and Brooklyn combined --- to spend the people's money upon. In place of organized benevolence on 100 acres of the 1,400 public acres, it seems to prefer the organized rapacity that will appear as soon as park construction gets fairly started.

If this is the way San Diego is to be run, the sooner the new charter is adopted and a council made of public-spirited citizens elected, the better for all concerned.

February 2, 1889, San Diego Union. Citizens quoted favoring charities grant.

February 6, 1889, San Diego Union, 4:2. EDITORIAL: Where A Critic Errs. . . . Mr. Marston explains his attitude toward the park charity in a letter which **The Union** prints this morning and accepts as the best presentation of their side which the anti-grant people have yet made. Throughout the letter bears the mark of candor and thoughtfulness, and but for the fact that it proceeds from a false assumption, might well be deemed conclusive.

If it were true, as Mr. Marston believes, that the 100-acre tract is sought as an out-and-out donation, all rights going with the deed, his attitude might be supported by hundreds, instead of dozens. But, as **The Union** understands the case, the Pierce trustees propose to improve the tract with trees, flowers, shrubs, drives, walks and stately buildings and then throw the grounds open to the public. There will be no regulations to conflict with those of the Park Commission, and for all purposes of pleasure and sight-seeking the 100 acres will not differ from the 1,300, unless in greater attractiveness.

There is a deal of civic pride in the statement that San Diego may one day need as much park room as London, Paris and New York, and we certainly hope that Mr. Marston is right in thinking so. But when that time comes, San Diego ought not to have all its park behind one fence, but should enjoy instead, enough smaller parks to accommodate a widely diffused population. If the city intended to legislate for a million or two inhabitants, and had but 850 acres for its central park --- about the area covered by New York's great pleasure ground --- and additional acreage beyond Old Town, National City, and out in the direction of Chollas Valley, the situation would be better than it is now. Then San Diego might properly go further, and consult the charitable needs of that vast prospective city as well as its requirements for pleasure; seeing to it that hospitals, industrial schools and other humane institutions of a great metropolis are grouped at some

central and easily accessible point. We merely throw out these suggestions as the better plan in case the City Fathers wish to adopt a useful device for the San Diego generations which are still waiting for their grandfathers to be born.

No, let us have some of the city park opened to the hand of private improvement and charity, and we answer for it that the millions of San Diegans who will be here in 1989 won't bewail the forethought which prompted the concession.

February 10, 1889, San Diego Union, 4:2. EDITORIAL: The Grant Confirmed.

February 17, 1889, San Diego Union, 6:1. THE BILL PASSED BY THE STATE LEGISLATURE CONFIRMING THE TRUST DEED TO THE CHARTIES TRACT.

At the request of a correspondent, **The Union** republishes the bill recently passed by the State Legislature confirming the trust deed to this tract. It will be seen that this bill prohibits the land from being used for private or sectarian purposes, and requires that it shall be kept as a public park.

THE BILL

Section 1. Whenever the City Council or Trustees of any city of less than 50,000 inhabitants, or of any incorporated town, has by deed of trust conveyed property, or any portion thereof, that has been set aside for a public park, to Trustees for charitable or educational uses, such conveyance is hereby ratified and confirmed; provided that no institution now existing or to be established on such property shall be private in its benefits or sectarian in its teachings, or be to any extent under the management or control of, or in any way tributary to any religious creed or order, church or sectarian denomination whatsoever; provided further that land so conveyed shall be kept open as public grounds by the trustees of such institutions as are or may be placed thereon, and that public visitation of such grounds may not be restricted, excepting by such reasonable regulations as park property and the proper maintenance of such institutions may require; provided further that the property so conveyed shall revert to the grantors whenever and so far as the grantees do not use the same in accordance with the stipulation of the deed of trust and with the requirements of this statute.

March 28, 1889, San Diego Union. Letter from C. S. Babcock stating election of Capps would retard progress.

The coming city election gives the voters an opportunity to express their desire, which expression I shall accept as the will of the people. Should they elect Mr. Capps, who is the candidate of the San Diego Water Company, I will accept the result as an endorsement of that company and a declaration by the voters that they are satisfied with present conditions. I will then by default permit the San Diego Water Company to have the bonds declared void, which will annul the water contract, and will conclude the people do not want municipal ownership, either of the water supply or distributing system.

September 7, 1889, San Diego Weekly Union, 2:3-4. Chamber of Commerce, Park Improvement Discussed. (from Friday's Daily)

There was a larger attendance at the meeting held in the YMCA auditorium last night under the auspices of the chamber of commerce for the discussion of the park improvement question than at any of the previous meetings of a similar character. It is a pretty good indication that the interest in the meetings is increasing and that they are accomplishing the purpose for which they were planned, namely, the arousing of interest in matters of public improvement.

Secretary H. P. Wood of the chamber of commerce presided at last night's meeting in the absence of President Marston and Vice President Ballou. The remarks of C. S. Hamilton, who was the first speaker and who told of the efforts which have so far been made toward park improvement, were very interesting and gave a bit of past history to many who are not old residents of San Diego. An unusually excellent paper on park improvement was read by Miss Kate Sessions. She told of how the desert could be made to bloom as

the rose. Mayor Capps read an interesting paper, giving his plan for the improvement of about thirty-five acres in the city park by building dams across three large canyons and making artificial lakes.

Mr. Hamilton, in his remarks, first told of the effort made in 1886 to build a boulevard to Old Town on the bay shore. The moisture from the bay, it was thought, would keep the road damp and there would, therefore, be no dust and chuckholes. The plans were not completed before another council took office, and the new body abandoned the project. Mr. Hamilton then spoke of the main roads entering the city. He said that it was his idea that the principal roads leading to the back country should be kept in good condition. The minor roads should be sacrificed, if need be, for the good ones. The speaker then told of the reservation of the park lands over thirty years ago. After a large amount of land had been sold in this section, the city trustees decided to sell no more, and had the legislature pass an act reserving 1,400 acres on the hill for a city park. From that time to this, there have been numerous efforts to subdivide the park, but all have failed.

The New Town park was spoken of. This block was formerly the Spanish plaza and was set apart in 1886 for a park. The work of the Woman's Annex, which laid out that portion of the park north of Sixth street was touched upon, and also the park charities, on which \$100,000 was spent by the late Judge Witherby and Bryant Howard. The Howard tract was laid out by these parties. Mr. Hamilton praised Mr. and Mrs. Howard for what they had done. Mr. Hamilton then gave his idea as to the manner in which the park should be improved. He said it would be done gradually, at the rate of \$5,000 or \$6,000 a year, and in that way the appropriations would not be missed. He was opposed to bonding the city, believing that the money which would be paid for interest would be sufficient to help the work along.

Miss Sessions's paper was listened to with marked attention. She said San Diego is so unique in her geographical location, so beautifully set on the hill slopes above the sea, and so individual in her climate, that the people need to be educated to the fact and keep it continually in mind that this park must not be like any other park in the United States.

"We can grow a magnificent collection of palms that shall make one realize the beauty of a tropical growth," she said, "we can arrange bamboo in groves and clumps that cannot be excelled in famous Japan, we can train vines over arbors and hillsides that will cover acres and be a marvel of growth and brilliant coloring, we can grow cacti from the deserts of California, Arizona and Mexico that will flourish and bloom and be of more interest to all travelers than almost any other order of plants. We cannot see these possibilities and results elsewhere for they have not been accomplished for several good reasons.

"Imagine a broad driveway, one to two miles long, bordered on both sides with a double row of palms, like the largest date palm in the court of Hotel del Coronado. The plant is only twelve years old, yet its spread is forty feet from tip to tip, and its glorious crown of feathery, vigorous greenness is magnificent and superb. Let us turn and admire those two fine cocos plumosas in the court, now forty to fifty feet high. Along some broad path, rows of this variety of palm would make the landscape a close second to many of the celebrated palm avenues of the tropics.

"Select one of these sun-beaten, rocky south slopes of the park leading down to a canyon, blow out with dynamite half a dozen holes, put in good soil and plant bougainvillea in the month of June. The pelting sun will start every cell into action, the great strong shoots will burst forth and revel in growth and vigor, and in three years they will spread themselves over the hillsides and to the very top, a solid mass of oriental and extravagant coloring, gorgeous and artistic against the surrounding grayness.

"On the south slope a collection of a variety of eucalyptus trees would flourish. On the mesa a low rambling arbor, covered with palm leaves, would give inviting shelter and resting places. Hedges of pepper trees as a windbreak would give an ideal ferny background for a mass of poinsettias that might be acres in extent. On some gentle eastern slopes to receive the first rays of the morning sun the California poppy would grow to the exclusion of even the weeds. If we had but \$1,000 a year to spend the money would be building a part of the grand whole, and not paying for work that in the future might be changed."

Mayor Capps read a paper outlining a plan for the improvement of a tract of about thirty-five acres of the park. His idea is to confine the flood waters of Switzer, Powder House and Pound Canyons, connecting them

with ditches in the form of a chain, and allowing the water to flow from the lake in Switzer Canyon to that in Powder House Canyon, and then this water to flow into the lake in Pound Canyon, making a park under each one of these lakes. Mr. Capps confined his remarks last night to the proposed work in Pound Canyon.

It is proposed to construct a dam thirty feet high across the canyon to catch the winter rains. Several tables were given showing the amount of the rainfall and the amount of water that would be impounded. Mr. Capps said his idea of the true design for a park is to copy wild nature as nearly as possible; all set designs should be excluded. As the water would be under pressure, waterfalls, fountains, springs, and geysers could be made. There could be a running stream between the lakes, with rustic bridges across the stream. Clumps of tropical and semi-tropical trees and plants could be scattered here and there, interspersed with wildflowers and shrubs of this county; fill in the interstices with glades and glens of blue grass neatly trimmed, place in the shady nooks and dells lounging rustic seats and benches, and construct winding, strolling paths and carriage roads.

At the conclusion of Mayor Capps' paper, R. H. Young moved that the chairman appoint a committee of five to prepare a memorial and present the same in the common council, the memorial to embody the plans of park improvement as set forth in the several papers presented to the meeting, also to urge as speedy action as possible. The resolution was adopted, and D. F. Garrettson, Miss Kate Sessions, C. S. Hamilton, Capt. Maize, R. H. Young were appointed to the committee.

San Diego Union, October 8, 1889, 5:2. CITY COUNCIL MEETING YESTERDAY . . . The City Attorney submitted a report on the proposition to sell portions of the city park stating that the city has no power to sell any portion of the park without legislative enactment

October 18, 1889, San Diego Union, 2:4. City Heights (Steiner, Klauber, Choate and Castle addition), part of city, to have rapid transit; two miles through Park to City Heights; trains will be running three round trips or six trains per day.

October 30, 1889, San Diego Union, 2:3. THE LADIES AT WORK

The Ladies Annex was called to order by the President, Mrs. Hill, and the minutes of the last meeting ready by the Assistant Secretary, Mrs. McConaughy. . . .

Mrs. Ben (Emma) Lake explained her plan for improving a portion of the park. She had watched the improvement of the San Francisco parks and thought San Diego has better soil and better climate and that our park could be more easily improved, surveyed and plot out by a landscape gardener, then make an effort to get free water. Each lady might take some shrub or flower and the school children also. Mrs. Gregory was mentioned as being willing to give a wagon load of plants, etc. It would be an easy matter to disprove the idea that the park was infertile. The park, if improved, would be a resort to which women and children could walk and thus get health and pleasure.

A committee was appointed to see the proper authorities about getting the privilege of improving the park, consisting of Mrs. Ben (Emma) Lake, Mrs. Sargent, Mrs. Lawson, Mrs. King and Mrs. Hale.

Mrs. W. G. Riffenburg sent a letter which was read, outlining a plan for park improvement much the same as that of Mrs. Lake,

November 6, 1889, San Diego Union, 5:1. THE LADIES ANNEX . . . Mrs. Lake, for the park committee, said they had met with the Mayor, who received them cordially and that he would present their

paper to the City Commissioners. The members of the committee are Mesdames Sargent, Margam, Hale and Lawson. . . . Secretary of the Chamber, Mr. Nolan, here stated that while the park subject was before them, he would say that he had been requested to inform them that Mr. Garrett, a San Francisco millionaire, will donate to whatever part of the park tract the ladies beautify a \$50,000 statue. This announcement was received with enthusiasm and the hearty thanks of the Annex were given Mr. Garrett.

November 12, 1889, San Diego Union, 1:7. BOARD OF DELEGATES MEETING YESTERDAY . . . The request of the Ladies Annex that they be permitted to improve 10 acres of the city park was granted.

November 24, 1889, San Diego Union, 7:3. A NOBLE WORK: The Quarterly Meeting of the Woman's Home Association . . . work of Day Nursery at 10th Street near H described; the largest number of children at any one time was 15, the smallest 4.

December 12, 1889, San Diego Union, 6:2. Letter regarding park charities

To **The Union**: The paper of Andrew Carnegie in the December **North American Review** is commended to the San Diego millionaire philanthropists who covet our City Park. But since some of them may not have convenient access to that periodical, the publication in your popular journal of the extracts from the paper referred to may be opportune:

"The first requisite for a really good use of wealth by the millionaire . . . is to take care that the purpose for which he spends it shall not have a degrading, pauperizing tendency upon its recipients, and that his trust shall be so administered as to stimulate the best and most aspiring poor of the community to further efforts for their own improvement. It is not the irredeemably destitute, shiftless and worthless that it is truly beneficial or benevolent to reach and improve. For these there exists the refuge provided by the city or the State, where they can be fed, sheltered and clothed, and kept in comfortable existence and --- most of all --- where they can be isolated from the well-doing and industrious poor, who are liable to be demoralized by contact with these unfortunates.

"The individual administrator of ample wealth has as his charge the industrious and the ambitious; not those who need everything done for them, but those who, being most anxious and able to help themselves, deserve and will be benefited by help from others and the extension of their opportunities at the hands of the philanthropic rich.

"Those who have surplus wealth give millions every year which produce more evil than good, and which really retard the progress of the people, because most of the forms in vogue today for benefiting mankind only tend to spread among the poor a spirit of dependence upon alms, when, what is essential for progress is that they should be inspired to depend upon their own exertions.

"In the very front rank of benefactions, public parks must be placed. . . . No more useful or more beautiful monument can be left by man than a park for the city in which he was born or in which he has long lived. . . . If a park be already provided, there is still room for many judicious gifts in connection with it.

"While the bestowal of a park upon a community as one of the best uses for surplus wealth will be universally approved, in embracing such additions to it as conservatories, or in advocating the building of memorial arches and works of adornment, it is probable that many will think we go too far and consider these somewhat fanciful. The material good to flow from them may not be so directly visible, but let not any practical mind, intent only upon material good, depreciate the value of wealth given for these or for kindred, aesthetic purposes as being useless as far as the mass of people and their needs are concerned. As with libraries and museums, so with these more distinctively artistic works; these perform their great use when they reach the best of the masses of the people."

Henry Shaw probably entertained such notions during all the years that he devoted to the Mission Botanical Garden and the Flower Grove Park, which he presented to the City of Saint Louis, after spending hundreds of thousands of dollars beautifying them.

PARK

December 24, 1889, San Diego Union, 5:1. Letter to Board of Delegates from Ladies Annex regarding park.

Gentlemen: Inasmuch as the Common Council has already assigned to the Ladies Annex a tract of ten acres for city park improvements, it is desirable to know whether the city will also survey and pipe said tract, as the Annex desires to begin improvements immediately.

On the 17th inst. this petition was presented to the Board of Aldermen who instructed the City Engineer to survey the tract desired and furnish estimates for piping. His report will be made at tonight's session of that Board.

Will not your honorable body facilitate action in the matter by instructing the Park Committee to secure this report so they may be able to report on it at the next meeting of the Board.

Respectfully: Mrs. James Lawson . . . Mrs. Chas. Hamilton . . . Mrs. Z. May Waite
Mrs. Emma L. Rifenberg . . . Frances M. Bagby
Committee

On motion of Delegate Wagner, the matter was referred to the Park Committee to report as requested.

1890

May 12, 1910, San Diego Union, 16:2. Planned Fair for City Park in **1890** . . . “The Panama-California exposition was not the first project of its kind,” said Deputy Clerk Alex H. Wright yesterday, holding up for inspection a bundle of old papers. “These papers contain an application for the setting aside of a portion of City Park to be used by the Southwestern Exposition Company. This was in **1890**, just at the time of the breaking of the boom. There is no record I can find that shows what finally became of the proposition.” . . . The papers were signed by George B. Hensley, H. C. Palmerston, and Philip Morse, while a committee report on the reverse side was signed by H. A. Begola and H. F. Norcross.

October 15, 1976, “San Diego’s City Park, 1868-1902, An Early Debate on Environment and Profit,” by Gregory E. Montes.

Spring **1890**. Howard planted the grounds of the “Charities Tract” with over 10,000 trees --- mainly blue and sugar gums, acacias, pepper trees, fan palms, and cypresses (San Diego Union, March 15, 1890, 5:2; April 27, 1890, 7:1). . . . Irrigating water pipes and winding drives laid out; 3-story Children’s (or Orphans’) Home and nearby Woman’s Home built (San Diego Union, April 27, 1890, 7:1, 2.).

January 1, 1890, San Diego Union, 5:1. Mrs. Chas. Hamilton, Ladies Annex, explains Mr. Howard’s position regarding park improvements. . . . He had said to the Annex that he desired their sympathy, advice and cooperation, but did not want their money. Also said, he would far rather the Annex would assist in improving the Woman’s Home tract of five acres than the Park Charities grant.

January 4, 1890, San Diego Union, 5:2. Description of activities of Ladies Annex.

January 5, 1890, San Diego Union, 1:5. A NOBLE CHARITY: The Woman’s Home and Day Nursery and Its Good Work. . . . By act of the Legislature in February, 1889, the grant of the City Trustees of a tract of five acres to the Woman’s Home Association was confirmed but on condition that within one year said Association begin the work of building.

January 7, 1890, Report of Park Committee regarding Ladies Annex . . . we thoroughly appreciate the necessity of beautifying a portion of our City Park for as the lungs are to a human body, so is a park a breathing spot of the people; Offered tract of two acres at south between Date and 7th; planting may be difficult because of limited depth of soil and unlimited quantity of rock; told not to obstruct view of bay; reference to a tract between Ivy street on south and Palm street on north with good soil and a magnificent view.

February 13, 1890, San Diego Union, 6:2. The Woman’s Home . . . Plans for a very desirable building will cost \$5,500 have been donated. To build, more than \$2,500 more is needed.

February 20, 1890, San Diego Union, 4:3. The Woman’s Home . . . Plans for a suitable building have been presented to the Association by architect Trotsche and it is the desire of the ladies to use them. The plans contemplate a Home to cost about \$5,000 or \$6,000.

April 13, 1890, San Diego Union, 4:1. EDITORIAL: Water for the Annex Park . . . The trees that the Ladies Annex had planted in the park are suffering from the want of water. Unless water can be obtained immediately the trees will die and all the good work amount to nothing. J. H. Woolman has the contract for piping water through the park tract, but it will take some time to do the work. Unless the Council makes some special provision for paying him there will be a long delay as the park fund is exhausted.

Residents in the vicinity of the park are willing that water should be taken from hydrants on their premises to supply the immediate need, but the water company have notified them to permit no more water to be taken. If the company will allow water to be used until the pipes can be put in the 700 trees can be saved; otherwise

they will die. The water company is not in good humor but it can hardly be believed that the company will refuse a favor as the Ladies' Annex have requested. Even a water company should not show bad temper to ladies.

April 15, 1890, San Diego Union, 4:2. The Water Company and the Annex Park.

It is evident **The Union** was right when it said on Sunday morning that the water company, although not in the best of humor toward the city, would hardly be guilty of ill-temper toward the Ladies Annex, nor defeat the efforts of that admirable body by refusing water for the park trees. . . . Mr. Flint of the water company says that rather than let the trees dies for want of water he will send water up there at the company's expense.

April 16, 1890, San Diego Union, 6:2. Mrs. Watkins donated to the Annex Park one horse chestnut, one sugar maple and one elm tree brought from Oswego, New York.

April 27, 1890, San Diego Union, 7:1-2. Improvements on the Park.

Most of San Diego's citizens have doubtless noticed a large building now being erected on the City Park, northeast of the Russ School house, but probably made of them are not aware of the other extensive improvements going on there. On visiting the locality yesterday a **Union** reporter noted the following facts:

A hundred acres of the highest and most sightly portion of the park have been cleared of brush and the debris which had been dumped there for several years and the land ploughed as deeply as possible, harrowed, and a thousand loads of fertilizers spread over it to enrich the soil, which, however, is naturally of a very fine quality. The whole tract has been laid with water pipe and over ten thousand trees have been planted. The principal varieties of trees set out are the blue gum, red gum sugar gum, cypress, pepper, several varieties of acacia, pine and Grevillea robusta. These trees have been carefully watered and cultivated and are growing finely. Winding drives have been made and well graded and in a year or two our citizens will have a beautiful park half as large as the cultivated portion of Golden Gate Park, San Francisco, and much more sightly --- all without being taxed a single dollar towards its accomplishment. We are informed that Mr. Howard contemplates, if the city will provide the water, the construction of a series of small lakes with miniature waterfalls between them, in the deep canyon the head of which is in the upper portion of the tract, but the final outlet for the water being along two or three of our principal streets. Such a flow and exhibit of water would be of more value to the city than almost any other improvement.

The building now being erected on the tract is the first of a series which will be built as fast as the requirements of the great charity of which it is a part shall demand. It is three stories high, with an attic, and though intended to accommodate about thirty children, can accommodate sixty if necessary. It is being constructed in the most substantial manner and will doubtless be the most symmetrical and beautiful building in the city. Its cost will be \$12,000. The ground dimensions are 77 by 55 feet. The basement is of pressed brick, with a height of 10 feet, the two stories above each being 14 feet high. Its architecture is of the Queen Anne modern style. A handsome round tower occupied the northwest corner of the building. There are eleven, large comfortable rooms, each heated by a fire place. The main front of the building is toward the west and on all sides is a magnificent view of the scenery which has made San Diego famous. The view to the westward is particularly fine, as the complete outline of the harbor and of Coronado can be seen at a glance.

A short distance southwest of this building, which will be called, the Orphans' Home, is another beautiful and substantial building going up. This is the Woman's Home and is located on five acres deeded in trust by the city to the Woman's Home Association. The building stands near the south end of the park, near the head of Sixteenth Street. It faces the south and will have ten rooms heated by fireplaces. It is of Queen Anne style of architecture, and will cost \$7,000. To the left of this building, at the head of Eighteenth Street, a broad avenue leads in graceful curves to the Children's Home previously mentioned.

Comstock & Trotsche of this city, are the architects of these buildings.

A brief account of these noble charities will be interesting to our readers.

Some years ago four of San Diego's citizens, Messrs. Bryant, Howard, E. W. Morse, James M. Pierce and another gentleman who does not wish his name mentioned, concluded to devote the main portion of their fortunes to founding a number of charitable institutions. The depreciation of the value of real estate for a time retarded the work, but two of the parties are now pushing it rapidly forward. The plan outlined by one of their number, who had devoted much thought to the subject for years, was to rescue from evil surroundings the children most likely to grow up criminals, paupers, or prostitutes --- that is: orphans and children of dissolute parents --- place in homes, care for their wants, give them a good physical, mental and moral training, and if proper homes could be found for them, to place them in private families where they will be under the refining influences of home life and become happy, useful, and worthy citizens. The most watchful care will be used to see that they are properly treated and cared for in these families. The plan contemplated:

First - Children's or orphans' homes where, under the most careful sanitary provisions and surroundings and physical and moral training, all their wants can be provided for.

Second - The establishment of kindergartens.

Third - The location of a common school near these homes that the children may receive a good common school education. Water has been procured from the flume company to put upon a five-acre tract of the Park, upon which it is expected the building will be placed.

Fourth - The establishment of an industrial school, where the pupils may be training preparatory to following some useful calling in the mechanic arts. In connection with this school, however, it is intended to train the children in the knowledge and cultivation of such plants and trees as it may be desirable to cultivate in this climate.

Fifth - The establishment of a school of technology, where the most advanced or skilled pupils of the industrial school may acquire a knowledge of the higher branches of art.

The kindergarten, industrial school and school of technology are intended to be open to all who wish to avail themselves of this means of education.

From the time the children are able to write and have a knowledge of the four cardinal rules of arithmetic, they will be given what is much neglected in our schools, a careful business training. They will be encouraged and stimulated by a system of rewards and payments for whatever they do well and will be required to keep their own books of account, so that when they go out into the world to act for themselves, they will have a much better business education than is ever given to children under our present system of education. The young men or women who have the thorough training which will be given in these homes and schools will be made as nearly perfect physically, mentally and morally, and as well prepared to obtain a livelihood and become useful citizens as in their nature it is possible for them to become. The symmetrical development of the whole man is the aim of this plan of education. "A sound mind in a sound body," with every sense acute, with every faculty educated, with every purpose in life noble.

These homes will not be a reformatory. Vicious and incorrigible children, who may chance to fall under their charge, will be sent to the State reform schools. Nor will the homes be used to encourage pauperism. The greatest precautions will be adopted to prevent imposition on the part of unworthy parents who may attempt to escape their duties and responsibilities.

To carry out this comprehensive system of charities required not only the use of large sums of money but also a large tract of land, and the thought occurred that a portion of our large and unimproved public park might be devoted to the purpose. No better use could possibly be made of a part of our park than to dedicate it to charity, provided that the part so given be kept open to the public as part of the park. In such case it would not be diverted from the purpose for which it was intended. It would be a deed of charity. It would be patriotic, for it would be doing a great good to our city by improving the park without taxing the citizens. It would be helping and educating poor children and be giving work to the laborer.

Fortunately for our city and for humanity, we had a wise and generous City Council and the petition which was presented by Bryant Howard and E. W. Morse, asking for 100 acres of the public park to be deeded in trust for charitable uses, after being considered several months, was granted unanimously, and shortly afterwards, through the efforts of Mr. Howard, five acres more were granted on precisely the same terms to the Woman's Home.

Some months later the flume company deeded the necessary water for the use of these two tracts, and in a short time they will, no doubt, be so improved as to become the most beautiful part of San Diego.

The Woman's Home has done a noble work by establishing the Day Nursery, which takes care of many children, while the Children's Industrial Home, the organization incorporated for the purpose of carrying out the purpose of the men whose generous munificence will found and endow the noble charities to be established on the hundred-acre tract, has already provided homes in good families for fifty four boys and girls who might otherwise have become paupers or criminals.

April 27, 1890, San Diego Union, 7:2. The Flower Festival. . . . The Flower Festival in Loomis Hall, Tuesday through Friday evenings, is to raise funds for the support of the Woman's Home and Day Nursery.

May 21, 1890, San Diego Union, 2:3. Board of Public Works permits target practice in park; details.

June 15, 1890, San Diego Union, 2:3. The Woman's Home; further assistance necessary to complete the establishment.

The Building Committee of the Woman's Home and its Day Nursery department report that the finishing of the exterior of the building is nearly completed. Much credit is due the architect and contractor for the degree of thoroughness with which this has been done. The architect not only donated the plans and specifications, but has gratuitously superintended the work.

The present contract, which includes no interior work except rough flooring, is for a little more than \$3,200. This, thanks to generous donors, the ladies are able to meet. . . .

While workmen and tools are on the grounds and while labor and material can be obtained at present rates, the work of finishing the rooms on the first two floors can be accomplished at much less expense than by attempting to do the same at intervals as was at first proposed. The cost of this, including plumbing, will be about \$2,800. Toward this amount the county appropriates \$1,000 on condition that for the next five years such county cases as come within the scope of the work of the Home be received there.

It is the hope of those who have this institution in charge that the necessary \$1,800 may be raised at once in order that the workmen now employed may be continued.

There are ten children in the Day Nursery Department and it is important to have them in a more healthy locality by midsummer; also, as soon as possible, to discontinue the payment of rent.

September 13, 1890, San Diego Union, 5:1. The Woman's Home On the knoll at the south line of City Park Heights, where 16th Street has its northern terminal, the building for the Woman's Home Association is receiving its interior finish. If the ladies' expectations are realized, the early part of November will see the Woman's Home and the Day Nursery moved to this commanding height, but one terrace below the thrifty young forest trees rounding from the Associated Charities Tract.

The Board of Supervisors gave all the trees and shrubs removed from the Courthouse grounds and Mr. Trotsche befriended the Association by raising some \$150 among his acquaintances to pay for transporting and transplanting them to the Association's five-acre tract.

The six large peppers have been set in a big circle on the edge of the slope, and between them and the verandah will be laid out a circular grass plot. The agaves, date palm and fig trees fill out the corners. On

the east have been placed in irregular fashion the fourteen orange trees, and on the side next the Russ school is a circular arrangement of pomegranates and maples.

November 5, 1890, San Diego Union, 8:2. To Help the Woman's Home . . . A concert for the benefit of the Woman's Home will be given at Louis' Opera House on the 20th by Ohimeyer Bros. Orchestra.

December 5, 1890, San Diego Union, 5:2. The Woman's Home; It is Now Occupied . . . Mrs. Adair, matron of the Woman's Home and Day Nursery, has moved with her assistant and fifteen little charges into the commodious Woman's Home building at the head of 16th Street'

December 30, 1890, San Diego Union, 2:1. Colonel Dan Stone tells of advantages of Exposition

So much interest has been awakened in favor of the exposition project, that a **Union** reporter called yesterday to see Colonel Daniel Stone, the Chairman of the Provisional Committee, to get his views. Colonel Stone is very confident that the convention on January 1 will be largely attended, and that it will lead to the final success of the exposition. Though, owing to the pressure of private business, he never took any part in the executive management of the famous Cincinnati expositions, Colonel Stone was instrumental in bringing about the preliminary steps of organization, and so had ample opportunity of seeing the inside workings. The main difficulty in Cincinnati was with the first exposition, and with this the only real trouble was in raising the money. This once found, and with a good executive board, the path was clear. Out of fourteen expositions held, Colonel Stone says all were financial successes except the last. This unfortunately became a political affair, and was consequently carelessly and extravagantly managed. During the period in which these expositions were held, Cincinnati grew very rapidly in population, and her trade expanded in all directions. The direct results were the creation of a permanent exposition building, a college of music, a music hall and an art museum. They were the cause of a series of great operas being given annually in Cincinnati and from then directly sprang the May festivals, so famous throughout the United States.

"We found," continued Colonel Stone, "that the results of the exposition were these: First, they advertised the city and county; second, they brought an influx of people; third, in Cincinnati an exposition brought 2,000,000 people into the city and probably put at least \$5,000,000 into circulation. They were, therefore, profitable, first, to the merchants; second, to the hotels, lodging-houses and restaurants; third, to the street car companies, liverymen, etc.; fourth, in enlarging business acquaintances they widened the channels of trade and were of immense advantage to the business community at large. Let us now," said Colonel Stone, "take a conservative estimate of the number of people likely to come to San Diego next Winter. Let us say that 10,000 people are brought here as a result of the exposition. Say they remain on an average of a fortnight and spend \$5 a day each. This alone would put \$750,000 into circulation. This does not include any wholesale trading which, of course, would be a direct outcome from country people coming into the city, nor does it include any possible investments which may result from Eastern parties coming into the county. Further, we should not underestimate the value of such an increase of travel to the railroads nor the possibility of influencing in this way another transcontinental line to extend to San Diego." As it is generally known that Colonel Stone is a great believer in the future of this city, he was asked what, in his opinion, were

the possibilities for 1891. He said that there were seven substantial possibilities overhanging the future of the city: First - An appropriation of \$50,000, which will be spent in building a quarantine station at once. Second - Exposition building to cost \$75,000. Third - A possibility of getting a railroad to San Quintin. Fourth - A ten-company military post. Fifth - An excellent chance of the city getting an appropriation for a Custom House and Post office, as the bill has already passed the Senate and is now favorably before the House. Sixth - A State appropriation of a sea wall. Seventh - An electric railroad to National City.

December 30, 1890, San Diego Union, 4:2. EDITORIAL: The People Want It (the Exposition)

December 31, 1890, San Diego Union, 2:1. Colonel Olin Welborn tells why he favors Exposition.

1891

February 14, 1891, San Diego Union, 5:4. Over \$80 recently received from guests at Hotel del Coronado for the needs of the Woman's Home and Day Nursery.

February 26, 1891, San Diego Union, 2:1. Women and Children . . . Very interesting reports for the year ending February 1st were made yesterday afternoon at Mrs. Geo. W. Marston's parlors where the annual meeting of the Woman's Home and Day Nursery was held. Mrs. D. F. Davison, president of the home, presided. Mrs. J. H. Carter, secretary, reviewed the history of the commodious new building in which the noble charities have been housed since December 3rd last, the inmates now numbering one woman and fifteen children. During the year six woman were cared for an aggregate of twenty-three weeks, for which the total amount paid was \$19.

In the nursery there have been thirty-four taken care of by the week or month. The average cost per month was \$13.02. Nine were not paid for, and seven were partially paid for by working mothers. There are now three motherless children being take care of. The little children have been almost wholly clothed by donations and the kindergarten maintained for them is nearly entirely supported by the mite boxes kept at Hotel del Coronado and the Woman's Exchange. . . .

February 26, 1891, San Diego Union, 2:3-4. Children's Industrial Home - Special Object: To serve in every way practicable the various needs of Homeless, Abused or Neglected Children; Boys and Girls for service at Wages, for Indenture, or for Legal Adoption; Board of Trustees: E. W. Morse, M. A. Luce, James McCoy, Chas. S. Hamilton, Bryant Howard.

February 27, 1891, San Diego Union, 5:1. Seven working mothers, who paid something for their board, kept their children at the Day Nursery during the past year.

May 21, 1891, San Diego Union, 2:1. Judge M. A. Luce writes letter about Park Improvement

To **The Union**. What shall the city do this year in the way of improvement is a question that appeals to every progressive citizen. It is contended on the part of some that we should pave more streets, or that we should

build a city hall. I do not agree with either of these propositions. As long as suitable accommodations can be obtained at present rentals, it would be folly to build a city hall. As to the pavement of streets, I think it will be conceded that all our business streets are paved and that by the free use of water on the residence streets, there is no real necessity for paving at this time. But I wish to call the attention of the people to a proposition that seems to me to be a feasible one, and one which will add greatly to the beauty of the city. And this is that the city should issue bonds to the amount of \$100,000 for the purpose of improving the park. The expenditure of this money in the planting of groves of trees and the building of two small lakes in the upper part of the two valleys, together with valley roads and wide boulevards over the high lands, would make the foundation for a most beautiful park. These two lakes need not cost to exceed \$10,000 each. They could be built so as to be enlarged if found necessary, and the water which flows into them will find an outlet down the valley and thus water the whole extent of these two valleys so that trees and plants might grow along the line of these outlets. It is a very proper thing that bonds be issued for this purpose, for the benefit of the park will be greater to those who may hereafter come among us than even to those now living here, and it is but fair for them to pay a portion of the debt. The completion of this system of improvements would be a great advertisement to San Diego and would make this city an especially attractive home for all classes of people. I see that the city of Tacoma has voted to issue bonds in the sum of \$100,000 for the purpose of improving their park. We should not be outstripped in real improvements by any city on the coast, and especially in this respect, when we have so beautiful a tract of land for park purposes. If this improvement is undertaken, we will not only add to the value of our homes much more than the amount of taxes we shall have to pay, but will also give occupation to many of our citizens who may be in need of employment at this time. It is to be hoped that our citizens will investigate and agitate this question.

M. A. Luce

May 24, 1891, San Diego Union, 4:2. EDITORIAL: Park Improvement . . . In order to sound public opinion more accurately on the subject of park improvement, **The Union** obtained a number of interviews yesterday with representative taxpayers. The intention was to publish these interviews this morning, but it was inexpedient to do so, therefore they will appear on Monday morning. To a man they favor park improvement, many of them enthusiastically and a large portion of them also favoring bonding the city to raise the necessary funds. As suggested by a prominent businessman and an able financier, it probably would be advisable in case of issuing \$100,000 bonds for park improvement to make that amount cover a period of, say, three to five years and thus keep a number of persons steadily employed and a large sum of money in constant circulation, instead of spending it all in one great effort. The expenditure of \$20,000 a year would work a mighty transformation on the rough, brown hills. Everyone now concedes the wisdom of granting Bryant Howard the park charity tract, and the \$20,000 per year for five years would reproduce several areas even more elaborately beautified than that beautiful tract that now commands much attention and praise. Just contemplate five hundred acres of trees, lawns, fountains, lakes and flower plots, instead of the meaningless, desolate stretch of hills that now excite nothing but derision from strangers and regrets from citizens and then ask whether it will not be wise to issue bonds.

May 27, 1891, San Diego Union, 2:1. Kate Sessions writes letter about Park Improvement

To **The Union**. The subject of park improvement is more interesting to me than any other public improvement, and I hope that this discussion will lead to a substantial beginning --- otherwise I would not care to speak. I am positive that our park lands are more favorably situated than any others that could be selected in any place in any state of the United States. They have every advantage of climate, water and soil we can commend. I believe the improvement of our park would be more advantageous to our city than anything else that could be done for its welfare. I quote from an excellent and reliable article on park improvement: "So essential have public parks come to be _____ in a satisfactory city life, that a city destitute of one stands at a great commercial and financial disadvantage. Beyond the considerations of health, public parks directly pay for themselves. There is no doubt that the millions which Central Park has cost New York have been returned through the profit that has accrued from the attractiveness of the city as a residence for men of means and from increased sales of real estate alone, taxes are actually lighter than they would have been, but for the park."

San Diego needs park improvement more than any city in California, for which I can give many reasons. I have seen Golden Gate park grow up from a sand dune and I can foresee better results for ours in less time, for which I also have substantial reasons.

The beginning of public park construction in cities of the United States soon demonstrated the far-reaching advantages to be obtained in the employment of competent advice and superintence [sic] in the laying out of expensive public grounds, and it brought into prominence the occupation of landscape architect. Among the foremost members of the profession today throughout the world stands Frederick Law Olmsted of Brookline, Mass., whose services have been employed in nearly every principal operation of park construction in America. Here is a man of long experience and great ability whom we can employ to give us the best park in the best place in the United States. He is the one to advise with in regard to the best methods for raising park funds, the amount of money to be advantageously spent each year, and the best way to make a beginning, etc. His ability I have known of for a long time and had some correspondence with the firm in regard to parks at the time the ladies began their work on the park. The right time for me to speak of Mr. Olmsted has never seemed at hand until now. The Leland Stanford University grounds are in his charge entirely. I am confident that he would make the work the one grand success of his life, for think for a moment of the materials here at his command.

With Mr. Frederick Law Olmsted as landscape architect, Mr. J. D. Schuyler as engineer, financiers such as Mr. Jacob Gruendike, Mr. Bryant Howard, and Mr. J. W. Collins, park commissioners selected from our citizens of travel, leisure and taste, how could there be failure? I refer all interested to *Harper's Weekly*, September 27, 1890, for the most excellent articles on the Boston parks and a sketch of Mr. F. L. Olmsted. This subject I am most earnestly interested in, and the many facts of data and value I may have I should be pleased to discuss with those interested, and will be glad to help on the good work in any way in my power.

K. O. Sessions

May 27, 1891, San Diego Union, 2:1. Colonel Kastle Has Something More to Say

To **The Union**. It seems a little strange to me that anyone could misunderstand any suggestions I made on the above subject through the columns of your esteemed paper on Saturday last. I stated distinctly that I thought it possible that there were several hundred families in this city who owned their homes who would take it as a godsend to lease a five or ten acre tract, under the restrictions that they plant trees upon a given plan in a given time, thus earn a living without leaving their homes and possibly add greatly to our exports besides. I repeat how anyone could conclude that I was in favor of moving "shanties" or "rookeries" on the park is beyond my conception. Indeed, I beg to refer _____ to my communication of two or three years ago, having gone into details at that time. I am at a loss to know how anyone can conclude from such a proposition that I desired to make a sort of poor farm out of our park. There are people here besides capitalists and paupers, and they are the ones who usually build up cities, and are not ashamed to till the soil if needs be.

Mr. N. evidently has not traveled very much, as in Europe and in portions of this country, the tillers of the soil live in cities and villages, and the countries where that is done are a perfect panorama as far as the eye can reach. You there see grain fields, vineyards and orchards without a single "shanty" to obscure the view for miles in every direction, and the workers live a greater distance away from their work than they would if they lived in the most remote part of the city from the city park.

I have no desire to push any particular plan, and am perfectly willing to vote for bonds for that purpose, but would like to see something done, if we cannot carry the bonds. I would, however, much prefer to vote for bonds to build a county road from Lakeside to the line of the Southern Pacific, and cannot understand why that project has not been pushed. Public sentiment seemed to be in favor of the project and an earnest effort ought to be made to carry it out.

John Kastle

May 27, 1891, San Diego Union, 4:1. EDITORIAL: Park Improvement - To What Extent? . . . Recent agitation in park improvement is all too certain to share the fate of many other projects for the betterment of the community, unless representative men of the city make some move toward crystallizing public sentiment into action. While there certainly is an overwhelming majority of taxpayers in favor of improving 10 to 100 acres of the reservation, it is probable that a large majority would vote against the issuance for \$100,000 bonds for the purpose, because so large a sum would, no doubt, be considered unnecessary at this time and disproportionate to the wealth of the community. People who are worth from \$25,000 up might favor bonds, but the great body of voters would be pretty sure to consider such a large amount of bonds at this time a hardship. Would it not be more expedient to improve, say fifty acres this year and fifty the next upon a plan with which subsequent improvements will harmonize, as long as may be found practicable, increasing the amount to be beautified from year to year as may seem best from time to time. The chief prerequisite is water. Absolutely nothing can be done without an abundance of that, and if the water lease is signed by the English company, the city will have an ample supply for park purposes. A very moderate amount of money, five to ten thousand dollars, would be sufficient to make a beginning. The main thing most need is to get trees to growing and to make a showing of lawns and flower gardens. The making of a park is an evolution, not the creation of a single year nor a dozen years. The average taxpayer and the small property owner must be protected, and such improvements undertaken as will not work a hardship upon the people at large. This can be done and improvements made commensurate with the city's rank and prospects at the same time.

June 5, 1891, San Diego Union, 4:2. EDITORIAL: A Suggestion for Park Improvement . . . Now that the city owns the water plant and supply and has a greater amount of water to dispose of than it has present use for, one of the principal and long-standing obstacles to park improvement is removed, and it would seem that there can be no tenable reason for not utilizing at least a portion of the water to beautifying a tract of the park reservation. If city funds were abundant, it would, of course, be advisable to engage the services of an expert landscape gardener, such as Frederick Law Olmstead [sic] to lay off the reservation in one grand design, arranging, however, for the improvement of tracts from year to year in such a manner as to conform to the general plan. That is, of course, what ought to be done, but at present it may be inexpedient to do it. However, there is a much simpler plan, the execution of which would in no way interfere with future operations. That is for the city council to have the city engineer lay off a wide boulevard, say 200 feet wide, on the margin of one or all of the four sides of the park, have all or a part of it graded, as may be deemed best, and then have trees planted on both sides of the boulevard continuously all the way around. In the middle of the roadway a space twenty feet wide ought to be reserved to be planted with palms and other semi-tropical shrubs and with flowers, this portion to be improved as rapidly and as extensively as may be deemed best. In this way the city would soon have a magnificent boulevard, far surpassing anything in Southern California, without incurring a serious financial burden. It would be a great attraction for visitors and a perpetual source of pleasure to our own people. The interior could subsequently be designed and improved without disarranging the previous work, and no matter how the interior might be improved, the boulevard would always remain a thing of stately beauty and of great pleasure.

June 27, 1891, San Diego Union, 4:2. EDITORIAL: Improve or Cultivate the Park . . . There seems to be a not at all creditable apathy regarding the improvement of the park, as recently suggested by Judge M. A. Luce. The city is owner of the 1,400 acres comprising the park reservations, which it has been held cannot be sold without consent of the legislature. If it is the sense of the city that it would be financially inexpedient to develop it, some means ought to be agreed upon by which it could at least partially improve the great tract, even if it were leased, under ample restrictions as to buildings, fence, etc., in small tracts for potato patches. In its present condition it is worse than useless. Its desolate aspect cannot fail to produce other than an unfavorable impression upon spectators, who will be very apt to draw their conclusions as to the remoter sections of our surrounding country by the appearance of this vast tract right on the city's edge. Now that an abundance of water is assured and the water commission settled, it has been suggested that the leasing of the reservation in small tracts would be practicable and advisable. Heretofore, no one has wanted the land because without water its cultivation would be unprofitable, but this objection is now permanently removed. The rich mesa soil would yield immense crops of vegetables, berries, potatoes, etc., the experience of market gardeners and fruit growers in this and neighboring counties, particularly in the Cahuenga foothills in Los Angeles county, having effectually exploded an old foggy notion that mesa lands are unprolific, for they have in fact yielded results in every way equal to valley lands. There is no doubt a large number of persons in this

city who would at once avail themselves of the opportunity to cultivate small tracts on a reasonable lease, and the rents thus accruing to the city would go a good way toward defraying the annual rent of the water plant, besides making the tract more presentable to strangers.

June 27, 1891, San Diego Union, 5:2. Despoiling the Park Tract . . . The ten-acre tract in the southwest corner of the city park reservation, which the women control, is being degraded by the rowdy boys of upper 6th Street, a committeewoman reports. "They have partially destroyed the vine house," she says, "hacked the benches and broken the shrubs. What is worse, there are adults not over scrupulous in staking their horses or other animals out on the tract under cover of darkness. These creatures have done more damage than the boys. Nipped shrubs and trees show where they have grazed, although it is seldom that one is observed there after the early morning hours. We have protested and explained, where possible and feel that each person should in a sense be a guardian instead of a despoiler of this public tract."

June 28, 1891, San Diego Union, 6:1. Bryant Howard's Fruit Trees . . . The arboreal growth of the 100-acre charity tract, which now contains the first of the buildings for a children's industrial home, is a refreshing oasis in the brush solitudes of the great central reservation known as the city park. The western slope, from the site of what will at an early day be opened as a home for orphans, is already showing its cypress lettering of "A sound mind in a sound body"; but on the slopes east and south the most rapid growth has been made by the eucalyptus trees. To **The Union's** question as to whether forestry was meant to dominate the tract, Bryant Howard replied that his plans included horticulture on an extended scale. This spring there have been set out about 8,000 guava bushes of the strawberry variety, and some thousand Villa Franca lemons and oranges of the Malta blood variety and budded navels. These fruit trees have not been planted solidly, but are scattered among the forest trees, Mr. Howard believing that this protection for several years will be advisable for the young trees. He intends, when prudent, to have the forest growths cut out, except for certain groves that have not been invaded, and gradually to put in more fruit trees. Several thousand will be added next year. Thus the whole tract, nearly in the center of the south boundary of the park, is practically covered with a growth that is itself a convincing reply to the skeptic who asks if the back country will grow anything. That portion of the 150-ft. boulevard of the park system which crosses the Howard tract is over a quarter of a mile in length and without any delay Mr. Howard has had his gardeners plant it in a way that will make it one of the great sights of the region, and which, if continued over the city's line of the boulevard, would give San Diego the most beautiful boulevard of the coast. Mr. Howard has divided this thoroughfare into twenty-foot walks, separated by two forty-five feet roadways. The center walk has on each side a line of fan palms, the alternating spaces being filled each by a red castor bean tree and a poinsettia (Christmas flower) tree. The walk on the outer side of each of these roadways has for its further edge a line of sugar gums and Grevillea robustas, while each inner side has a line of rubber trees, their alternating spaces each being centered with a red castor bean and a poinsettia. Mr. Howard says that magnificent as this stretch will be when it is fully grown, he shall not consider it completed until he adds a double row of oranges beyond the tree line of each outer walk.

June 28, 1891, San Diego Union, 6:1. The Howard Kindergarten . . . There will enter the primary department of the public schools this fall a class of fifteen children from the Howard kindergarten. Thirteen of these are girls and the ages range from 5 to 8 years. When this kindergarten closed its first year a few weeks ago, the enrollment was about ninety, although there have been over 100 under the care of Mrs. Anne Porter and her four training school assistants. The term, which opened in October, was uninterrupted except for the fortnight vacation at Christmas. With the exception of a few who voluntarily paid something toward the tuition of their children, the year's expenses were borne wholly by Bryant Howard, who lavishly filled the schoolroom with the latest conveniences in kindergarten training and furnishing. Three buses were employed every forenoon to gather and carry up the pupils who, in like manner, had to be driven down at noon to their various corners for dispersion.

Mrs. Porter found it necessary to supply some clothing for the little ones not comfortably clad, and was most enthusiastically assisted by the King's Daughters of the Congregational tabernacle, who mended and made over many a half-worn or too sizable garment. Contributions were always forthcoming when she mentioned the children's needs, the misses of the Southwest Institute being especially generous in collecting and donating.

What effect the new law may have, admitting to public schools at the age of four, will not be known until the next school year begins. But as Mr. Howard's declared intention was to supply a free kindergarten for the public until this branch should be incorporated in the school system, it is probable that the one will go on until the other is established.

August 24, 1891, San Diego Union, 2:2. Notes on Planting by Miss K. O. Sessions

The Ficus or fig family is a large and useful one, furnishing the fig of commerce, the India rubber producing tree of the tropics, and not a few ornamental trees and shrubs. If you will observe the large rubber tree on 8th Street, between C and D on the east side, with its large dark green leaves and strong substantial trunk, and then compare the shrubby tree directly opposite on the west side with similar but smaller leaves, quite a lesson can be learned. The former is the *ficus macrophyllum* (meaning large leaf) or the Australian rubber tree, often called the Moreton Bay fig. This does not produce the rubber of commerce, but it is one of the grandest trees in cultivation, where a large and spreading shade tree is needed. The smaller leaf variety is the *ficus australia* and is more desirable for a large shrub and for grouping than shade. At Mr. D. C. Reed's corner, D and 10th, and at Mr. Levi Chase's corner, 11th and D, are fine and symmetrical plants of this shrubby variety.

The Australian rubber tree is planted extensively on the sidewalks and roadways of Melbourne, a city famous for her magnificent avenues. On the park charity tract last spring, a double row of 100 of these trees was set, which, I believe, is the only long avenue of them in the state. The cost has been a drawback to extensive planting, while the climate of northern California is too severe for successful cultivation on streets.

Mrs. Keating also planted a row on the sidewalk to the south of her residence and Judge Puterbaugh, owning the opposite block, intends to plant the same tree. Ten years hence these rows will form grand avenues of shade, fully fifty feet high.

The best ficus for planting within the gardens of the city, unless the grounds are spacious, is the true Indian rubber tree, the *ficus elastica*. It is of smaller growth, yet branching with the most beautiful foliage of all the rubbers, shading from the darkest green to russet and brown. At Mr. George Copeland's corner, A and 7th, a thrifty young plant may be seen, and at the Coronado botanical gardens and the Del Coronado grounds three-year old plants are making a fine showing.

San Diego Union, August 25, 1891, 2:1. Board of Delegates . . . Delegate Pauly moved that Section 18 of the ordinance forfeiting the franchise of the Park belt street railway granted A. Klauber, S. Steiner, D. Choate, et al, be stricken out. There was an objection that if they began striking out section after section there would finally be no ordinance. The ordinance passed in 1887, granting the franchise, was called for and read.

The opinion of the city attorney was asked for. He said that he had taken no official notice of the failure of the road to operate the franchise, but he knew personally that the road or a portion of the road had not been operated for over a year. As for the litigation, he said that he had been told that one of the stockholders had brought suit to compel the company to operate the road but had failed. He was of the opinion that it was the duty of the company to operate the franchise, and if it failed to do so within a reasonable time, that, under the law, he believed it forfeited; however, the council had not the right nor power to take away any vested rights belonging to the corporations or individuals.

Judge Luce, appearing for the Klauber franchise, stated that Messrs. Klauber, Cassell and Choate paid \$65,000 out of their own pockets to build the road. He spoke at some length against forfeiture of the franchise, going over the legal obstacles in the way of its operation.

The motion to strike out was carried.

November 29, 1891, San Diego Union, 1:1-2. Douglas Gunn Dead; his body found yesterday afternoon in his private office; paralysis of the heart suddenly terminated an honored career; death finds him alone with his books and papers; anxiety about business career; something of his life and work in this city.

1892

“San Diego City Park, 1868-1902,” by Gregory Montes . . . In February, 1892, even before the Sessions’ lease had received complete city approval, Riley R. Morrison and S. G. Blaisdell requested city park land for “experimenting in growing trees and flowers” under the same terms granted to Miss K. O. Sessions (CCO, BP-1, Doc. 311, filed February 1, 1892, p. 1). . . . In October, 1892, the City Park Commission, which included Bryant Howard, informed the City Board of Delegates that the Morrison-Blaisdell lease was sought for “private purposes” and that several other parties were waiting to see if the land request succeeded and, if so, they would jump for slices of city park. The Commission summarized, “If these leases applied for are granted, there will be no limit to them.” (CCO, B.P.-1, Doc. 312, filed October 23, 1892, p. 1).

February 10, 1892, San Diego Union, 5:4. BOARD OF ALDERMEN: The ordinance granting Miss K. O. Sessions the use of a certain tract of land in the city park for an experimental garden and nursery was adopted.

City Council granted 36 acres of the extreme northwestern portion of the park to Miss Kate Sessions for a term of years for use as a nursery and garden; consideration being the donation of 300 trees yearly to the city and the permanent planting of 100 additional trees; nursery covers 10 acres.

March 6, 1892, San Diego Union, 5:2. A debt of \$1,000 still remains on the Women’s Home, which cost \$6,500. The annual report shows that in the past year 11 women had been provided with a temporary home and 56 children of average age of 5 years had been cared for.

May 25, San Diego Union, 2:1. BOARD OF ALDERMEN: The Board of Public Works presented a report asking for the fixing of the salary of the superintendent of parks at \$60 per month to commence May 1st. Mr. Gassen though such recommendations should come from the mayor. The recommendation was referred to the Committee of Streets, Highways and Parks.

July 19, 1892, San Diego Union, 5:2. BOARD OF DELEGATES: The ordinance increasing the salary of the superintendent of parks was defeated.

July 25, 1892, San Diego Union, 5:2. Suggestions of Miss K. O. Sessions on tree planting.

To **The Union**. I firmly believe that San Diego is in more need of improvement than any other city in Southern California and I am very sure, as I have said before through your columns, that no public improvement could be undertaken that would do more good for the city than a moderate expenditure annually in beautifying the park and streets.

San Diego is like San Francisco. It was laid out for a city from the beginning of its existence, and their location was on the comparatively barren seashore.

Man can redeem these shadeless hill slopes and prove that everything is at hand for the success of the tree. See what Golden Gate is daily proving to every visitor in the way of plant growth, and what the shores about San Francisco can accomplish in ten years can be done in six here.

A committee of citizens with leisure and with ambition for the beautifying of our city can accomplish a great deal. There is work in abundance for a beginning today in giving attention to and demanding respect for every tree now growing within our city.

What seems to me to be the most important part of the preliminary work and a foundation of a grand success in this worthy undertaking is a plan of tree planting.

It will necessarily take time to secure this, but it can be done long before the season for extensive tree planting is at hand and no time will be lost.

A careful discussion and investigation of the most expeditious and at the same time most practical methods for accomplishing these ends, a committee can certainly undertake at once, and with such men as Capt. Maize and Capt. Sweeney as volunteers in this work of organizing, we are certain of success.

The work done by the Improvement Association of San Diego four years ago, as recorded in the pamphlet that the society published, will be of material aid to this work and, no doubt, the small funds in their treasury will be available.

K. O. Sessions

July 29, 1892, San Diego Union, 5:3. For Tree Planting

To **The Union**. In your short editorial referring to the water lease in Saturday's **Union**, in view of the tree planting movement now on foot, your assertion that "it is an excellent time to go slow," as far as it is applicable to the water question, has special weight. If the proposition to plant trees in all the resident streets of the city is worked out to a successful issue, the subject of cheap water or dear water is a most important factor.

The article in this morning's (Sunday's) **Union**, under the head of "The Water Question," deserves the serious consideration of every individual who is an impartial and unbiased advocate of improving the city permanently, and who has the welfare of San Diego at heart. Abrogate the water lease we have at present and all our work will go for naught, and San Diego will remain the barren, unsightly town it is, for, putting aside all buncombs, there is nothing lovely about San Diego as a city, but its site, that unquestionably cannot be surpassed.

Mr. Bryant Howard and the other trustees of the water lease, as well as every solitary member of the city council, know full well, without being told, that any attempt to beautify the city by arboreal or horticultural means must be a failure now, as it has been in the past, if anything is done toward reducing the present supply of water, or adding to the cost thereof, it would be time, money and energy thrown away to plant trees, individually or collectively, if we cannot have cheap water. By breaking the present water lease and going back to the old system, we might as well drop the tree question right now.

It is sincerely hoped that the good sound sense of the gentlemen composing the Board of Trustees of the water lease will guide their action in the premises, and induce them to retain the present supply of water for the city use and allow us to carry out the plans for planting street trees, so auspiciously begun, and which are being fully and thoroughly digested, so as to have all the information obtainable to lay before a mass meeting of our citizens, which it is hoped will be called during the present week.

Henry Sweeney

July 29, 1892, San Diego Union, 5:3. Trees and Water: two sensible plans proposed for park improvement; maintain the lease, build a reservoir in the park; use water to beauty city; a promised money contribution.

"I am emphatically opposed to annulling the water lease," said Daniel Cleveland, the well-known attorney, yesterday. "And," he continued, "my opposition is based on several, as I believe, good and legitimate reasons.

"In the first place, we must beautify the city with lawns, flowers and trees. We cannot go away from home without being told that our city looks so dry and barren. We can remedy this, but to do it will require plenty of water. To secure an adequate supply will necessitate the city either owning its own plant or effecting a lease. The former proposition is not at all practicable at present. We have a lease now and the city has been

operating the plant for over a year. It is true there is a deficiency, but this will be lessened year by year, and it will not be long before the city will be deriving a handsome revenue from its lease, as I am so firm a believer in the future of San Diego that I am positive its population will soon rapidly increase. In connection with this, the increased assessment of property improved under the operation of the lease will lessen the rate of taxation on the many to make good the deficiency.

"I will admit that I opposed the lease when it was first under consideration, on the ground that I did not think the railroad proposition had a solid basis, but now, laying aside all reference to the railroad, I am convinced that the water lease will be a handsome investment for the city, and I am perfectly willing to go on record as advocating the continuance of the lease."

A Park Reservoir

Several prominent gentlemen were in the office of the Board of Public Works yesterday discussing the all-absorbing topic of the water lease. They were generally in favor of a continuation of the lease, and the question of the city paying for more than it was using was under consideration.

"I have a proposition," said one, "which I think will meet with general favor. We are paying for 3,000,000 gallons of water daily, and using 1,000,000. Build a reservoir in the highest portion, the northeast corner of our 1,400 acre park. At night, when there is no danger of lessening the pressure, run this surplus water into the reservoir, shutting off the feed pipe in the daytime. Then, by popular subscription and donation, secure trees for the park, set them out and have them well under way by the time we get ready to improve the park as a city park should be improved. The work can be done under the supervision of the park commissioners or board of public works, and the expense would be light. A 1,400-acre grove in the heart of the city would do much to do away with that dry and barren criticism. The water that is now going to waste would be turned to good advantage, as every acre of the park could be irrigated from the reservoir." This proposition was agreed to by the gentlemen present and they pledged themselves to subscribe \$25 each for a tree-planting fund.

July 30, 1892, San Diego Union, 2:1-4. An organization formed for an aggressive campaign for tree planting.

The mass meeting called by Mayor Sherman for last evening at the chamber of commerce to formulate a definite plan of action regarding the tree-planting proposition drew forth a large and representative gathering of property owners. Numerous expressions in favor of the movement were made and a plan was agreed upon.

Capt. H. Sweeney called the meeting to order in the following language:

Gentlemen: Being the first of the names mentioned in the call for this meeting, made by his honor, the mayor, I beg to state partially in a few words the object of the meeting. We have assembled here this evening to adopt some organized system of tree planting on the residence streets of the city. To do this we must have the assistance of the city government to regulate by ordinance the distance, both maximum and minimum, each tree shall be set out, one from the other, and the distance inside the curb. Whatever may be the sense of the meeting on this subject, it should be formulated by resolution and a copy of the same sent to the proper city official to be laid before the city council as a basis for their action in the premises, asking the council to give it attention as soon as possible. That this meeting will adopt plans for the practical carrying out of the work is hoped and expected.

Now gentlemen, I presume it is in order to select a chairman.

Acting on this suggestion, Dr. W. B. Woodward nominated, and Capt. W. R. Maize seconded, H. M. Kutchin was unanimously elected. Capt. Sweeney was elected secretary.

In taking the chair, Mr. Kutchin expressed his appreciation of the compliment paid him in being called upon to preside at a meeting of such a character and composed of such representative citizens. He stated that the

good work which those present had been called together to discuss had been fully outlined in the public press and that he would not attempt to repeat. Upon calling for an expression from those present, Capt. W. R. Maize responded in the following lengthy and full presentation of the subject, with valuable suggestions, resulting from his observations of the tree question:

Having given a great deal of attention to the subject which we are here to discuss this evening, I think it best that this should be a voluntary movement on the part of the people resident in San Diego. In order that the best results may be obtained from this movement without further delay, I would suggest that an advisory committee of live, active men be appointed. That authority be given the committee to appoint all sub-committees, consisting of one for each street, which will organize, superintend and encourage the uniform and early planting of shade and ornamental trees on that street. The street committees to consult and to act in concert with the advisory committee. By selecting active and energetic men on each street committee, a healthy competition will be incited between the residents of the different streets, and the best results will be accomplished.

If we succeed in getting the trees planted in front of our own residence --- and I blush to think how many of us have neglected to do so --- we will have a first claim to call for a small assessment on the non-resident owners and non-improved property. Ordinances may then be secured to plant, care for and provide such property with trees, in order to have it conform to the streets generally.

But few, if any non-resident lot owners will object to this slight tax, providing we have planted our trees one year or a few months in advance of the assessment. But, gentlemen, there are people in San Diego who would like to have the city dig the holes, plant and water the trees in front of their houses, and care for the trees as well. This can be done later on for non-resident property owners by a city ordinance, and for residents who are not living on their lots, by taxation. But let us set the example and plant in front of our own homes before we advocate taxation of the non-resident or other property owners.

Let it be understood that this tree-planting movement has no connection with politics or water corporations, but has for its motto, "*Pro bono publico.*"

For present work, let us secure a city ordinance regulating the distance at which trees may be planted from the property line and the distance that the trees may be planted apart from each other.

The distance is a most important item. I will read from a paper by Miss Kate Sessions, which was read at the annual meeting of the Pomological Society of Southern California May 4, 1892: My observation has proven to me that the first necessity of tree-planting along any street is to have the same sort of a tree planted on both sides for as great a distance as possible. Nature everywhere gives us examples of such symmetry. The weeds and shrubs growing on either side of the road are about the same; of course, soil and conditions are the same, but nature has made the tree, the shrub, the flower, the seed pod, the shell of the sea, asymmetrical to some medial line. She has not laid out her parks, the forests, in square and straight lines, but she has ornamented the paths through them harmoniously. The rivers, her highways, are symmetrically ornamented on the banks. If high trees grow on one side, they do on the other, or where they are growing man detects the greater beauty. We do not tire of an avenue with the same tree on both sides for a mile or more, or even five. We do not wish some other tree would appear, but, on the contrary, the repetition, the continuation of the same, intensifies our enjoyment and appreciation, and we are proud and interested in the length and regularity of the avenue. We compare tree with tree, we observe the foliage, the branching, the bark, the flower, the seed. We calculate the age and the habit, and become a student filled with thoughts of nature, inspiring us to better deeds and thoughts.

The next great need in tree planting to the one already mentioned, is that the trees be set far enough apart. In California, and particularly in these southern counties, where the growths of plants is so continuous, owing to the slight difference in the seasons, in a few years we find trees with their branches intermingling, forming a perfect hedge and barrier in mid-air. Their graceful outline against the sky entirely obliterated, except at the top, and the individuality of each tree entirely lost. Often beautiful views of mountain and landscape entirely hid by the wall of green, while if the trees were well apart, the scene would be even more beautiful viewed between their graceful boughs. If we stop to calculate and observe a little, we are soon convinced of the

short time it takes for trees to touch each other. Trees growing symmetrically extend as far on one side as the other. If set twenty feet apart, they will only need to throw out branches ten feet long before they are touching. Where can you see a shade tree in California only a few years old that has branches less than ten feet long? You find more with branches twenty feet. If the trees are set fifty feet apart that space will allow each plant a perfect development for at least ten years before they appear to think of approaching each other; and yet many a tree can be found shading a space spreading over more than fifty feet --- observe the pepper, the rubber, the locust, the oak, the eucalyptus that has been properly trimmed. Most of our trees can be made to spread more if trimmed, but they grow out of our convenient reach so soon that we stand helpless at their base, and well it is so. If for the first five years or so the rows seem scant, and we think more of ourselves than posterity, set some deciduous tree or slender and slower tree between, or plants like the *dracaena*. We do not plant trees upon our streets in California for shade, but for beauty. In most cases the pedestrian during the summer finds shade too cool a resting place. The beauty of a street ornamented with trees is most interesting in its length, as we look along the vista and see the swaying boughs meeting in the distance beyond. It matters not whether the trees are fifty or 100 feet apart to give such an effect.

Let us excite a friendly competition between the residents of the different streets on this subject, by the advisory committee selecting good, energetic, active men for each street committee. Then get each resident to dig or have dug holes 4x4 feet square and at least 3 feet deep, and fill them with rich soil, adding very little if any manure. These holes to be prepared without delay, so that the planting may occur simultaneously about December 1. Where persons who have young trees in pots or boxes who desire to plant at once, encourage them to do so.

In many cases each person owning property along a given highway seems to want a different kind of tree, thereby producing inharmonious effects. Wherever a fine avenue has been properly planted it has been controlled by a single person or company. Take as an instance Magnolia avenue in Riverside and Euclid avenue in Ontario. You can have no fine street unless the trees are of uniform variety.

Therefore, let the residents of the different streets act together and plant the same trees as far as practicable, remembering each one has to yield to the majority on his street, or be considered wholly selfish. I have a clipping taken from an interview with Bryant Howard in which he says from his experience in planting and maintaining the 15,000 or more trees on the park charity tract, now known as the "Howard forest," he could recommend the sugar gum, *Grevillea robusta* and the pepper, providing they develop no enemies. The sugar gum is a symmetrical, rapid grower, and naturally assumes a pyramidal shape. It is a large tree and can be trimmed into almost any desired form, so as not to obstruct the view. Another good tree is the "thickhead" eucalyptus, also a rapid grower. The bright, green foliage of the pepper makes it desirable, though it is a slower grower than the sugar gum and will not thrive in as hard soil. The robusta is also behind the sugar gum in rapidity of growth. The Monterey cypress, Mr. Howard considers too gloomy and too much of a view-obstructor; it also catches and holds the dust.

I have been asked how we are to get along without funds. We have not asked for a cent, neither do we intend to. Mr. Marston before leaving for New York, volunteered \$50 for this object. I will give \$20 and I will ask the secretary to take the names of any others who may feel enough interested to volunteer in any sum, large or small, to be paid when called for. I would also ask Bryant Howard if the Citizens' association has not a balance on hand, which could be appropriated to this fund to aid it. Voluntary contributions will be carefully and judiciously expended in planting on lots where resident owners are too poor to do so themselves. No part of this fund will be expended for clerk hire or salaries.

Another important thing before I close is to urge the sub or street committees to insist on cutting down and weeding out the common acacias or other worthless trees. I understand that the University Heights boulevard is the most harmoniously planted street of any in the city and that these trees are about to be sacrificed for the want of water and a little care. Let us ask the city fathers to authorize the watering of these trees once a month and save them to the city. The University company will send a man to dig around them.

Mr. H. C. Orcutt of this city has kindly offered 1,000 trees as a gift to the city. Herbert Richards, too, has come forward with an offer of about 10,000 blackwood acacias, nearly a year old, which are growing on his ranch in El Cajon. This is the tree so highly recommended.

An ordinance should be passed giving the city engineer authority to furnish the street committees the proper grade on graded streets. The city engineer informed me that this would necessitate only the expense attending the employee transportation to and from his office.

The remarks of Capt. Maize were received with much attention. At their conclusion, W. E. Allis moved that a committee of three be appointed to select an advisory committee of seven to take under consideration the best methods of bringing the subject before the people and the city authorities. The chair thereupon appointed W. E. Allis, Dr. Woodward and W. D. Woolwize (?). After consultation the following names were suggested and unanimously approved: W. E. Allis, W. J. Prout, Capt. H. Sweeney, W. R. Maize, T. J. Arnold, Col. R. B. Spileman (?), and W. W. Stewart.

Bryant Howard was called upon to speak about the existing organization, known as the Citizens' Association to Improve and to Beautify San Diego, and, as usual, responded in a forceful and interesting manner as follows:

In regard to the organization there are a number of citizens here who have always had at heart the beautifying of the city. In the fall of 1886, the citizens' organization was effected for that purpose. We did not expect to be able to raise a great deal of money, but hoped by studying the question and posting ourselves thoroughly on the subject to become capable of acting in an advisory capacity. There were a number of reasons why nothing remarkable was accomplished. There was a scarcity of water, many of the streets were not graded, and the residences were so scattered and there were so many non-resident owners that gradually interest in the organization ceased until now there are only three of us left taking any active interest in it. We, of course, did not expect to do a great deal, but hoped to do some good, and I believe we did. I believe also that by now an organization of the citizens, a great deal of good can be accomplished. Now we have an abundance of water, the streets are graded, more houses have been built, and people generally are taking more interest in the matter. Now a good many of the streets are graded, and many trees can be planted on these streets. The trees can be planted at such a distance from the sidewalks that, by setting them deep, there need be no disturbance when those streets at the present time not graded, are cut down. The reasons why trees should be planted now are six times greater than they were then, because there are six times as many people and six times as many houses.

The non-residents should certainly feel great interest in this proposition. Every tree planted here or elsewhere helps the country. By beautifying this city every property owner is benefited and the non-resident should show greater interest in this question.

We must have the matter taken up by the city, that there may be some uniformity. By some municipal regulation, every lot will be treated alike and there will not be an oasis in the desert here and there, but the city as a city will become a garden, such as it should be. Let the citizens of every street agree upon what trees they want, and either by subscription or individual effort make a start in this matter.

I wish to say one or two words with reference to the best tree. I think the sugar gum is the best tree for immediate results. They are very hardy, very rapid growers, and well adapted to this climate and are not bothered by insects. I think that for every quality that we need in our climate, the sugar gum answers every purpose and so far as I know anything about it, the best we can plant. Yet I am very partial to the pepper and think its appearance amply repays the labor necessary to make it symmetrical. The *Grevillea robusta*, the elm, the walnut and the rubber tree would also make a very fine appearance.

Anything I can do personally to promote this good cause, I shall be happy to do, and would like to say that if the trees and shrubs that naturally belong here are set out, San Diego can soon become the most beautiful city in the world.

Capt. Sweeney followed in a few words of approval of Mr. Howard's remarks and said that it was not expected that another meeting would be necessary. That what was wanted was work and not talk, and, as far as he was concerned, he was willing to do his part so that the committee appointed would fill the

requirements, and that the work would be pushed vigorously and in conformity with the ideas and wishes of the people.

W. D. Bloodgood: Referring to the remarks of Capt. Maize regarding the trees on University Heights, I wish to state that we have expended \$600 (?) for the trees and over \$100 for care and water. The trees are suffering for water which we are unable to get on account of the water company having removed its standpipe and the city refusing to allow the fire plugs to be used.

Mr. Bloodgood asked that the committee use its effort in behalf of the University Heights tract in order that a lower rate than 30 cents per 1,000 gallons might be obtained, and promised that if water could be obtained, the company would do its part toward saving the trees.

C. C. Brandt: In this discussion the city council has been several times mentioned, and as a member of the council and the water committee I think I may say that the council and the water committee will do anything possible to further the successful accomplishment of this matter.

On motion of Capt. Maize the question of such trees as are suffering for water was ordered brought up before the next meeting of the council, with the request that immediate steps be taken for their preservation.

Dr. Burnham hoped that when C Street was graded, that those in front of his and other property would not be sacrificed, as had previously been done in street grading.

John Ginty stated that he had talked with Mr. Babcock regarding the cost of caring for and watering trees and that Mr. Babcock had said that from his experience on Coronado Beach, he estimated that for \$5,000 per year trees on 200 blocks could be watered, trimmed and kept in order. He deprecated the idea of planting trees on the hilltops on account of their obstructing the marine view, which was what made that property desirable. He favored the planting of vines and shrubs instead and referred to many places where beautiful effects had been obtained without detracting from the view. Mr. Ginty suggested that a committee be appointed for each street, so that there would be uniformity in planting and in order that property owners could express their preference.

Capt. Maize replied that it was the purpose in appointing the advisory committee to have its members canvass the property owners on each street and ascertain their wishes. He also said that there was no city ordinance regulating the distance at which trees should be planted apart or from the curb line. Ordinance No. 90 (?) regulated the width of streets and sidewalks and was as follows:

The width of sidewalks on all streets less than seventy-five feet shall be ten feet; on seventy-five feet, sidewalks shall be twelve feet; on eighty feet width of streets, sidewalks shall be fourteen feet; on streets between eighty and one-hundred feet in width, sidewalks shall be sixteen feet; on streets exceeding one-hundred feet in width, sidewalks shall be twenty feet.

It had been suggested that the meeting recommend an ordinance providing that permanent shade trees be planted at various distances from the property line, according to the width of the street, as follows:

All trees to be 25 ft. apart; on streets with 10 and 12 ft. pavements, 8 ft. 6 inches; on 14 ft. sidewalks, 12 ft.; on 16 ft. sidewalks, 14-1/2 ft; on 20 ft. sidewalks, 17 ft. The distance from the property line is suggested, as all know where the line is, but few know where the curb line is on unpaved streets.

Several expressions favorable to the preparation of an ordinance similar to the one proposed were made, and on motion of C. C. Brandt, the advisory committee was instructed to prepare and present an ordinance to the next meeting of the city council.

R. H. Young advised that the trees be not planted too close together. He stated that he was glad to see the movement started at this time as there would be a large influx of visitors after the world's fair and the trees would then have a fair start.

Col. E. B. Spileman said this is a step in the right direction and I am glad to see it. I have never owned a lot that I did not improve and I believe in the planting of trees. I hope every citizen will set out trees in front of his property and if there is any man on National Avenue, which is the street upon which my property fronts, that is too poor to pay for his trees, I will buy them for him.

A large banner suspended from the stage contained the names and prices at which the nurserymen of the city would furnish trees. The list is as follows:

Blackwood acacia - acacia meolonxylon, 4 to 6 ft., 50 cents; 1 to 2 ft., 25 cents;
Sugar gum - eucalyptus corynocalyx, 1 to 2 ft. in pots, 20 cents;
Rubber tree - ficus macrophyllum, 3 to 4 ft. in pots, \$2;
Grevillea robusta - 4 to 5 ft., balled, 35 cents, 2 to 5 ft., potted, 25 to 50 cents;
Pepper - 2 to 4 ft., potted, 20 cents;
Dracaena, 4 to 6 ft., 50 cents to \$1;
Fan palm, medium size, balled, 35 to 50 cents; potted, 50 to 75 cents;
Deciduous trees
Cork elm, 6 to 10 ft., 75 cents;
Sycamore, 6 to 10 ft., 75 cents;
Locust, 6 to 10 ft., 50 cents;
Plane tree, 6 to 10 ft., 50 cents.

Signed: Miss K. O. Sessions, Sweetwater Nursery, E. Benard, Jr., Blaisdell & Son, Ford's Tropical Nursery

July 30, 1892, San Diego Union, 4:2. EDITORIAL: The Work Commenced - The energetic manner in which the subject of street and park improvement was handled at the mass meeting last night is full of promise. The large audience and the enthusiasm manifested at the meeting are an earnest of what may be expected from the diligent prosecution of the work. . . . The newspapers all over the state have observed the interest already displayed, and join **The Union** in congratulations to San Diego.

September 28, 1892, San Diego Union, 4:2. EDITORIAL: Will Have Trees . . . Should any of the strangers who visit San Diego this week feel disappointed by the lack of shade trees and the unkempt appearance of some of the residence streets, it may relieve their minds to know that the defect will soon be remedied. . . . donations have been received of 13,000 shade trees of assorted varieties and \$327 in cash to aid in the systematic and general planting of trees along the streets and avenues of San Diego.

1893

"San Diego City Park, 1868-1902," by Gregory Montes . . . Failure of Consolidated Bank in **1893** wiped out fortunes of Bryant Howard, his associates, and the Pierce estate (San Diego Union, January 1, 1899, 1:5; July 5, 1903, 7:1-7).

January 1, 1893, San Diego Union, 16:6. City Parks, Public Grounds Comprising over 1,400 acres.

The public grounds of the city devoted to park purposes comprise one block 200x300 feet in size and known as the New Town Plaza, and a tract of land containing 1,400 acres known as the city park. For the past year or two there has been no funds available for park purposes and the only work that has been done was simply to protect and preserve the improvements already made.

The New Town Plaza is enclosed, laid out in walks and contains about 40,000 square feet of neatly kept sward. In this plaza are 170 tropical and semi-tropical trees and shrubs. The plaza lies between the business portion of the city and the water front and is frequented by many people.

The city park, containing 1,400 acres, lies on the heights in a commanding position and from its more elevated portions a magnificent view of the mountains, city, Coronado, bay and ocean can be had. The topography of the tract presents one of the finest opportunities imaginable for a handsome park, and it seems that nature has exerted itself to aid man in making the spot as attractive as possible. However, the only

improvements of importance thus far made are the construction of two boulevards, one running through the central portion, and the other along the west line of the tract, and the planting of a number of palm trees, which have made good growth for the time planted. During the past year several tracts comprising from five to ten acres each have been leased to several parties for experimental gardens and the growth of ornamental trees and shrubs. In consideration of the leases, the city is to receive a specified number of trees each year to be transplanted in different localities throughout the park. The newly appointed park commissioners, Bryant Howard, Capt. W. R. Maize and Dr. B. Woodward, are now engaged in devising plans for laying out the entire tract, and when completed it will be one of the finest parks on the Pacific coast.

Tree Planting

The noticeable lack of shade trees along the streets of San Diego has been the occasion of no little comment by tourists and strangers and by a majority of the more progressive and public-spirited citizens. This fact is all the more noticeable when the climatic conditions and soil of the city, with an abundance of pure water, rendering the growth of all varieties of trees indigenous to a temperate semi-tropic or tropic zone quick and sure, is taken into consideration.

However, in a short time, there will be no further cause for comment of this sort. During the summer the question of tree planting was agitated through the columns of **The Union**, and the agitation resulted in the call for a mass meeting and the organization of a tree planting society; an ordinance has been adopted by the city council regulating the planting of trees; a fund has been created; thousands of trees have been donated, and ere long what was once said to be dry, barren hills and long, hot, dusty streets will be transformed into beautiful groves and handsome, shady avenues.

The Howard Forest

The Howard forest, which is pushing up vigorously on the southern boundary of the city park reservation, has no parallel in all Southern California. The first tree in its 100 acres was planted the latter part of February, 1889, and now over 15,000 trees are growing on the tract. The beginning of the people's park shows numerous trees already reaching a height of thirty-five feet. In but a few more years the spot will become the leisure and picnic resort for the entire bay region. When the city trustees deeded this tract from their abundance of chaparral-grown mesa to be used for a system of charities projected by Bryant Howard, three provisions suggested by Mr. Howard were included. First, that the 100 acres should never be put under sectarian control; second, that it should forever be kept open as a public park; third, that it should never be used for private purposes.

January 1, 1893, San Diego Union, 16:7. Charitable Institutions, Organizations for the Relief of the Sick and Needy . . . Perhaps the more important of the charitable institutions is that of the "Children's Industrial Home." The late James M. Pierce, E. W. Morse and another large property owner, had associated themselves with Mr. Howard, the mutual agreement being that the greater portion of their several fortunes should be given for the promotion of this system of charities --- to include a children's home, a kindergarten, an industrial school, a school of technology, and an old people's home. These gentlemen thereupon incorporated as the Children's Industrial Home association. Soon after ensued the general depression of realty values, which has thus far rendered the Pierce estate unproductive, and for the same reason but one of the number has been able to render Mr. Howard assistance in the preliminary work, which to date represents a cash outlay of between \$90,000 and \$100,000. This includes no expense for water, as the San Diego Flume Company donates that free forever.

In October, 1890, the Children's home rose upon the sightliest hill of a picturesquely elevated site in the city park, and suitable outbuildings accompanied the handsome structure.

During the short time the Home has been opened, homes have been secured for many orphaned children. A free kindergarten has been opened, and by the employment of busses, the attendance has averaged over 100, necessitating the employment of six teachers.

January 24, 1893, San Diego Union, 5:3. The Delegates: A joint resolution was adopted instructing the board of public works to resurvey the public park.

February 28, 1893, San Diego Union, 5:3. The Delegates: A petition from George M. Dannals, secretary of the county agricultural society, asking for a lease of 7-1/2 acres in the southwest corner of the city park, was referred to the city lands committee. It is proposed to erect buildings thereon for the next county fair.

March, 1893, "San Diego City Park, 1868-1902," by Gregory Montes . . . Delegates approved a lease of 7.4 acres at the southwest corner of City Park to the San Diego Agricultural Society for its annual fair (CCO, B.P.-1, No. and Doc. No. follows Doc. 374).

March 7, 1893, San Diego Union, 2:1. The Ordinance Passed; A Water Bond Election to Be Held April 11th; both branches of the city council act favorably on the proposition.

After several months of work among those favoring the project, the ordinance calling for a bond election was finally passed last night, and the citizens of San Diego will have an opportunity on April 11 of voting for or against the issuance of bonds to the amount of \$865,000 for the construction and acquisition of water works and a water distribution system for the city; the bonds to run forty years from July 1, bearing interest at 4 percent, payable semi-annually. That is the election will be held unless the mayor vetoes the ordinance, which is not expected.

The delegates approved the report of the city lands committee favoring the leasing of 7.44 acres of the city park to the County Agricultural society for its annual fair. The aldermen referred the petition of the society.

A joint resolution was passed by the delegates ordering a special committee to report the responsibility of the error in not order a bridge placed on C Street, between 17th and 19th streets, for the passage of water from Switzer canyon, which is now gathering behind the earthwork of the newly-graded C street, and threatens property and lives below the dam.

March 21, 1893, San Diego Union, 2:1. At the City Hall: meeting of the Board of Delegates last night - The question of appointing a special committee to investigate the Switzer canyon bridge was referred.

March 28, 1893, San Diego Union, 5:1. The boundaries of the city park have been marked by City Engineer Sedgwick by the burial of fourteen granite monuments, one at the corner of each pueblo lot, according to the orders of the council.

May 12, 1893, San Diego Sun. The County Fair; an entire change from first plans; a new site has been chosen; large tract at the north line near the center; improvements there would cost less than grading alone of southwest corner; driveway through the park runs to the east of the proposed fair grounds; date fixed September 20th to 23rd inclusive

May 13, 1893, San Diego Union, 5:4. The board of public works has awarded the contract for building the C street bridge at Switzer's canyon between 17th and 19th streets to E. C. Emery. The contract price is \$850.

May 21, 1893, San Diego Union, 5:4. Grounds must be donated; terms on which San Diego might become a military post; letter from H. Sweeney.

May 23, 1893, San Diego Union, 2:1-3. A Wholesome Cut: Mayor Carlson sends in a surprise to the Board of Delegates . . . A communication from the mayor was read, announcing that sundry superfluous city officials were abolished and their present incumbents relieved from further service.

May 30, 1893, San Diego Union, 5:3. The Hatchet Buried; Mayor Carlson willing to conform to the city charter . . . {Mayor Carlson} is learning that his powers did not extend so far as he previously understood, he desired that his order should be regarded only as a recommendation to the council. . . . [The Council} granted Co. A, N, G, C a target range in the city park.

June, 1893. "San Diego City Park, 1868-1902," by Gregory Montes . . . Pastime and Silver Gate gun clubs obtained approval to use one acre of park near Cabrillo Canyon and the line of Maple Street for a trap-shooting range (CCO, B.P.-1, Doc. 489, filed June 5, 1893). . . . Common Council approved petition of Company "A", National Guard Reserve, to operate a rifle range in city park near the range already occupied by Company "B" (CCO, B.P.-1. Doc. 481, filed June, 1893).

June 1, 1893, San Diego Union, 1:3. World's Fair; De Young's proposition to bring it to California; scheme favored by many local and foreign exhibitors; the Chicago World's Fair's treasury pressed for ready cash; Contractors have trouble in getting their payments.

June 3, 1893, San Diego Union, 4:2. EDITORIAL: Mr. De Young's Proposition . . . to supplement the great Columbian exposition with a commercial world's fair to be held in California has much to recommend it.

June 7, 1893, San Diego Union, 5:3. The Aldermen: Shooting grounds in the city park were granted to Company A, N. G. C, Company A, naval installation, and the Pastime and Silver Gate gun clubs. . . . The city pound ordinance was amended to become effective after three publications instead of ten, and was adopted.

June 21, 1893, San Diego Union, 2:2. The Aldermen: The petition of the county agricultural society for 80 acres in the city park for the fair grounds was granted. . . . The ordinance establishing a public dumping ground in the city park was adopted by a vote of 8 to 2. Aldermen Prout and Nutt opposing the proposition.

June 22, 1893, San Diego Union, 3:1-2. Finance Committee Report to the Common Council; Mayor Carlson's charges of extravagance investigated - Department of Public Works: Your committee after a thorough and searching investigation of this department and the duties of its various officers and employees, find that the best interests of the city will be subserved by retaining it as at present constituted. In regard to the superintendent of sewers, the superintendent of streets, and the superintendent of parks, we find these officers are busily engaged in keeping up their departments, which requires all of their time. . . . The superintendent of parks is simply city gardener, and is continuously employed. . . . Your committee has taken into consideration the matter of a possible consolidation of superintendent of sewers with plumbing inspector, also superintendent of streets with superintendent of parks, and some other changes, but find the same impracticable and not for the best interests of the city.

July 1, 1893, San Diego Union, 4:2. The Midwinter Fair . . . The plan proposed by Commissioner M.H. deYoung for holding in California a midwinter world's fair, as a final climax to the Columbian exposition, was favorably commented upon by **The Union** as soon as it was made public.

July 4, 1893, San Diego Sun, 4:3: At Phoenix Park: a big crowd celebrating the Forth and commencement of construction of the San Diego & Phoenix railway; picnicking and speech making; picnic grounds immediately adjoining Coronado Waukesha pump works and on the line of the extension of the Coronado belt line.

July 17, 1893, San Diego Union, 2:1-2. The White City; Early Days of the Great Columbian Exposition; A correspondent who visited Chicago among the first tells of the disorder which prevailed out of which perfect order had been wrought . . . We went to the California Building only to find a board with "no admittance" across the door; but we went in, and it was a worse jumble than any other place, full of lumber and nothing to be seen. A great deal of complaint has been made about the management, and it seemed the most behind band of all. We afterwards found our San Diego people, Mr. and Mrs. Young, Mr. Allen and Dr. Cogswell in the horticultural building.

July 22, 1893, San Diego Sun, 2:1-2. The Consolidated Bank . . . The local phase of the financial depression about which the people of San Diego just now need have most concern is whether the Consolidated National Bank will be able to resume or not.

July 30, 1893, San Diego Union, 2:3. The Midwinter Fair . . . What Southern California will stand for is present transcontinental rules of travel with the rates reduced. This secured every reasonable effort will be put forth to make the midwinter fair a grand success.

July 30, 1893, San Diego Union, 5:4. At Phoenix Park in Otay Valley . . . Over 500 visitors and pleasure-seekers went to Phoenix park from this city by train yesterday and about 500 more found their way to the park by private conveyance, coming from the surrounding country. The barbecue was a success in every sense. . . . President Reed made a few remarks giving the present status of the road and speaking hopefully of arranging with the Land and Town company whereby the latter will withdraw its injunction and permit grading toward Yuma.

August 10, 1893, San Diego Union, 4:2. The Midwinter Fair . . . The mid-winter fair, if held at all, must be held without special aid from the state. If it is possible to raise funds by the plan originally proposed, all possible encouragement should be given to the project, but otherwise the advantages to be derived from the fair cannot be made to justify the imposing of so considerable an expense upon the taxpayers of the state.

September 16, 1893, San Diego Sun, 4:1. Letter from Clark Alberti: California on top at Jackson Park; great day; frantic rush for fruit; San Diegans who assisted in the great event.

September 16, 1893, San Diego Sun, 4:3. Marston at home; brings cheery news of business outlook; great time at the World's Fair; business is reviving all over the country; will enlarge his own.

September 27, 1893, San Diego Union, 2:1-2. San Diego's initial step for participating in Midwinter Fair taken last night

September 27, 1893, San Diego Union, 4:2. EDITORIAL: The Midwinter Fair

September 28, 1893, San Diego Union, 5:3. The Midwinter Fair

November 24, 1893, San Diego Union, 2:3. California's Fair - she is preparing a surprise for eastern visitors

December, 1893, "San Diego City Park, 1868-1902," by Gregory Montes . . . Delegates moved to let Timothy Ryan "occupy" 200 to 300 acres of city park with his plant nursery for 25 years; opposed by San Diego Union, December 31 1893, 4:1).

December 6, 1893, San Diego Union, 3:2-4. Southern California Building at the Midwinter Fair

December 18, 1893, San Diego Union, 4:1. EDITORIAL (untitled) - opposes leasing 300 acres of city park to private parties for gardening and tree culture: The proposed occupancy by private parties of 300 acres of the city park to be devoted to gardening and tree culture with such improvements as may be made fortunately has not been regarded with much favor by the city council.

December 23, 1893, San Diego Union, 2:1. The Parks of Paris.

December 31, 1893, San Diego Union, 4:1. EDITORIAL: A Park Improvement in opposition to Timothy Ryan's application for a contract for park land: If some arrangement could be made for park improvement without tying up city lands indefinitely to private corporations every sensible person in San Diego would favor it. It would be folly, however, to give Mr. Timothy Ryan or any other applicant such a contract as is asked for at the present time. The city park, if preserved intact, will make a magnificent pleasure ground in future years, when this city has expanded as it must expand in obedience to nature's laws, nor is this development to come in the misty future. San Diego today stand on the threshold of a new era. While extending all reasonable encouragement to legitimate enterprise, the people should guard with jealousy the city park and all other public property against the greedy assaults of land hunters.

January 1, 1894, San Diego Union, 1:1-6. City of San Diego; What Nature Has Given and Man Developed.

The City Water System

Over 100 miles of water mains within city limits

Pursuant to a decision of the superior court declaring the lease void under which the city held the municipal water-distributing system, the system was, on December 1, turned over to its owner, the San Diego Water Company. The city is supplied, without interruption or change in price, by the water company which obtains the water supply from the San Diego Flume Company. To give an adequate idea of the size of the system, it is only necessary to state that there are over 100 miles of water mains in the city, reaching the suburbs of Roseville, Pacific Beach, Golden Hill, Mt. Hope, etc., and affording means of irrigating thousands of acres of land within the city limits.

Besides the supply furnished by the flume company, which was about 3,000,000 gallons daily during the year, the water company owns a supply, obtained from the San Diego river, of a capacity of at least 15,000,000 gallons per day. The company's pumping station is located on the south bank of the river above Old Town, and is equipped with two compound Worthington pumps and two Gaskill compound condensing cut-off engines, high and low pressure, making a capacity of almost 5,000,000 gallons every 24 hours. Four storage reservoirs of nearly 5,000,000 gallons capacity have been provided, and another, of sufficient capacity to contain all the others, is now being constructed on University Heights. The water plant company's plant cost something over \$1,000,000.

Either the flume or the river will furnish the city with an unfailing supply of water in sufficient quantity for immediate years. In addition, however, the Mountain Water Company, a newly organized corporation, is about to begin the construction of the Pamo water system for the Linda Vista irrigation district, involving an expenditure of \$800,000, and the city will be offered another source of water supply, the company being under contract to develop 2,000 inches of water, much more than will be needed by the Linda Vista district for years to come. Other irrigation works are now underway, notably the Mt. Tecarte system, and others whose plans are told in detail elsewhere. Altogether the city is more than amply supplied with water and through competition the cost will doubtless fall to a rate as low as any in California. The present rate paid to the flume company is 5 cents per 1,000 gallons.

An election was held during the year upon the question of municipal ownership of a water distributing system. The common council declared that the vote to issue \$680,000 of bonds for constructing and acquiring such a system had carried. Serious doubts exist, however, as to the legality of the bonds, should they be issued, and the question is now pending in the courts.

The Street Car System

Electricity the Motive Power on Most of the Lines

The electric car system of San Diego is the equal of any in the United States, and no institution in the city shows more energetic or level-headed management. Twelve miles in length in this rather compact city, it reaches all thickly settled portions and gives excellent service.

The system was inaugurated on September 22, 1892. The horse car lines in the city were on the 30th day of the previous January purchased by A. B. Spreckels for \$115,000 cash, and the announcement made that an electric system would be constructed. The San Diego Electric Railway Company was incorporated with the following officers, who are still in authority: A. B. Spreckels, president; E. S. Babcock, vice president; Joseph A. Flint, secretary and general manager. The board of directors is composed of A. B. Spreckels, John D. Spreckels, Capt. Charles T. Hinde, E. S. Babcock, and Joseph A. Flint. The road is owned by A. B. Spreckels, only a sufficient number of shares being held by the directors to constitute a legal board.

Ground was broken for the construction of the track on H street in April, 1892, the contract having been let to F. M. French for \$50,000. An injunction temporarily hindered the work, and work was actually begun on

May 10 following. Several hundred men were employed, and the road pushed to completion in September. The system includes a double track line from the ferry landing out H street to 16th and on 16th to N street; single track on Logan Avenue from N Street to 26th; a double track on Logan from 26th to National Avenue and 26th; and out National Avenue to 31st Street. A double track extends also on 5th Street from L Street to University Avenue, from H to D Streets on Arctic Street, and a double track on D Street from California to 5th, a total trackage of 12 miles. Several miles of horse railway are also operated by the company, connecting with the electric-lines. . . .

A first-class cable street railway, constructed at a cost of \$250,000, extends from L Street up 6th Street to C Street, thence of 4th Street, following along the latter to the northern suburbs and to Mission heights, where a beautiful park of five acres has been laid out, surrounding a handsome pavilion.

January 1, 1894, San Diego Union, 13:6. City Parks - Immense Pleasure Grounds of San Diego: At an early date in the history of San Diego, the people, realizing the importance of public parks to the attractiveness of the city, set aside 1,400 acres for that purpose, and this tract yet remains intact.

It lies on the heights in a commanding position and from the more elevated portions the finest view of bay, ocean, city and mountains can be had. The topography of the tract is such that the expense of converting it into a magnificent pleasure ground will be comparatively slight, diversified as it is by ravines and plateaus, canyons and hills. At present, but little has been done towards beautifying the grounds. Two fractional parts have been leased as flower gardens to parties who agree to plant a certain number of ornamental trees and shrubs each year in such parts of the grounds as the park commissioners may select. These leases are at the option of the city council.

An application has been filed by a Mr. Ryan for a twenty-five year lease on 500 acres of the park, which he will improve something after the manner of the famous Shaw's garden in St. Louis. At the expiration of the lease, he agrees that the ground with all improvements shall revert to the city.

The Howard tract, comprising 100 acres on the southern boundary of the park reservation, is showing remarkable growth, and other 15,980 (?) trees are now growing on the tract, many of the trees having already reached a height of forty feet.

Between the business portion of the city and the water front is New Town plaza, comprising a block of ground 200x300 feet. It is enclosed, laid out in walks, and contains about 40,000 square feet of neatly-kept sward. In this plaza are nearly 200 tropical and semi-tropical trees and shrubs.

January 26, 1894, San Diego Union, 5:1. City Engineer Capps will next week lay out a new road through the park beginning near the mouth of Switzer Canyon and running to the left over the hill and entering the La Mesa road at the northeast corner of the park. The new road will be the best and most picturesque driveway through the park. As soon as laid out, Street Superintendent Prouty will put a gang of his men to work making the road.

January 28, 1894, San Diego Union, 1:1-3. Midwinter Fair; Opened to the Public with Appropriate Ceremonies; An Enthusiastic Crowd in Attendance Yesterday; Mrs. DeYoung Presses the Button; Southern California's Building the Center of Attraction; Other Structures.

January 29, 1894, San Diego Union, 4:2. EDITORIAL: The Midwinter Fair . . . The opening of this Pacific coast exposition in the "dead of winter" is a novel and highly gratifying proof of the climatic excellence to be enjoyed in California at this season of the year.

January 31, 1894, San Diego Union, 1:4. The Midwinter Fair; A California County Commissioners' Club; Hosmer F. McKoon elected president; object of the club; total admissions yesterday.

February 1, 1894, San Diego Union, 5:3. Local Intelligence: A gang of 100 men worked on the streets yesterday. Ninety were kept busy on the new road leading from Switzer canyon through the park, and the

balance were mostly at work on University boulevard. The Switzer canyon road will be completed today in case there is fair weather.

February 1, 1894, San Diego Union, 5:4. Back from the Fair; Messrs. McKoon and Young pleased with the outlook.

February 11, 1894, San Diego Union, 5:2. The San Diego exhibit; how it compares with other counties at the fair.

February 23, 1894, San Diego Union, 5:1. Washington's Birthday; the day's festivities in the city and at Phoenix Park: At 9:30 a parade took place under the management of President Carlson of the San Diego and Phoenix railroad. . . . Most of the people went to Phoenix Park to attend the celebration. Trains were run hourly via Coronado or National City and every train was crowded.

February 24, 1894, San Diego Union, 1:3-4. Fair Awards; official list of Southern California Citrus Fair; San Diego secures fourth place in general county exhibits; the same in lemons and second in budded oranges; also second in one class of cured lemons, but away up in jams, jellies and such.

February 25, 1894, San Diego Union, 4:2. EDITORIAL: Fair Awards . . . The awards of the Southern California citrus fair, while possibly equitable so far as individual exhibits were concerned, must not be regarded as affording a true insight into the fruit-growing industry of the Pacific coast.

April 3, 1894, San Diego Union, 2:1. The Delegates: A joint resolution was adopted instructing the board of public works to take proper steps to preserve the trees in the Howard tract, city park, and on University boulevard.

April 3, 1894, San Diego Union, 2:2. Aldermen: The resolution instructing the board of public works to care for the Howard tract was referred to the city lands committee.

April 10, 1894, San Diego Union, 2:3. The Delegates: Bryant Howard appeared before the board and strongly urged that the council help to maintain the 100-acre charity tract in the park, and the 5 acres of the Woman's Home. He asked that help be given and that some means be taken to secure water from the flume company. Mr. Howard declared that a deed was on record giving free water forever to the charity tract.

On motion of Delegate Olmsted, the board of public works was instructed to place three men at work on the tract, under direction of Mr. Howard, their wages to be paid out of the appropriation provided for employing indigent men. The water committee was invited to aid Mr. Howard in investigating the matter of obtaining water from the flume company.

April 19, 1894, San Diego Union, 5:2. The Howard Tract; Committee considering matter of securing water: A deed is on record from the flume company giving free water perpetually for the tract, but the company repudiates this and has brought suit to recover \$1,300 for water furnished to the tract.

June 30, 1894, San Diego Union, 5:3. The Howard Tract; sensational testimony elicited in court yesterday; Judge Witherby, the actual philanthropist; transfer of stock to cover the costs of the improvements; Bryant Howard scored by Judge McNealy.

During the trial of the case of A. J. O'Connor, receiver of the Consolidated National Bank vs. O. S. Witherby, an action to recover \$10,000 claimed to be due as assessment on bank stock, the arguments of the attorneys yesterday developed some interesting information. On the previous day, Bryant Howard, who as the president of the defunct bank had occupied the witness stand, a good part of the time was the subject of scathing remarks by Judge McNealy, Witherby's attorney. Judge McNealy asserted that the bank stock claimed by Receiver O'Connor as belonging to Witherby was in reality the property of Mrs. Howard, and the lawyer then proceeded to severely score the ex-president all around on general principles. Mr. Howard sat in

the courtroom and quietly heard every word in denunciation of the peculiar methods which were followed by the bank's officials.

Yesterday the wrangling of the attorneys brought out the information that the improvements on the city park tract, which have generally been supposed to represent the charity and public spirit of Bryant Howard were really the work of O. S. Witherby, who, by an agreement with Howard by which Witherby transferred to him certain bank stock, real estate, notes and mortgages of the value of \$250,000, furnished the means with which the "Howard tract" was improved. Witherby, it seems, was to receive credit for his charitable deeds after death. The information brought out by the remarks of the attorneys to introduce in evidence certain documents which the plaintiff's counsel objected to. The jury was excused pending a ruling by Judge Torrance on the objections raised.

October 3, 1894, San Diego Union, 2:1-4. No End in Sight; the Council does nothing decisive in the water question: On motion the report of the city lands committee as amended by the delegates was adopted, allowing A. E. Horton \$100 per month up to \$10,000 for a deed to the plaza.

October 3, 1894, San Diego Union, 2:1. Board of Delegates: The joint city lands committee recommended that the city pay \$10,000 to A. E. Horton for a deed in fee to the plaza. The report was amended to pay \$100 per month to Mr. Horton during his life, limiting the total to \$10,000.

The city attorney has advised the common council that the city cannot lawfully acquire any water system, except for its own legitimate needs, not even, he asserts, for irrigating the lands within the city limits. The Mt. Tecate system, as proposed, is a great system of irrigation for a large territory outside the city, embracing the Jamacha and Otay irrigation districts, National Rancho, etc., and is not the subject of legitimate city ownership.

October 9, 1894, San Diego Union, 2:2. The City Council: The resolution accepting a grant deed to the plaza and providing for paying A. E. Horton \$100 per month therefore up to \$10,000 was laid on the table for a week.

October 23, 1894, San Diego Union, 5:1. City Government: The following joint resolution was adopted by a vote of 11 to 3.

Resolved, That the city of San Diego accept a deed from A. E. Horton and H. L. Titus for all their right, title and interest in and to that certain place of real property known as the plaza, Horton's addition to San Diego; that in consideration of the aforesaid deed the said city of San Diego pay to said A. E. Horton the sum of \$100 on the 1st day of January, 1895, and continuing during the lifetime of said A. E. Horton, providing no greater amount than \$10,000 in the aggregate be paid.

November 20, 1894, San Diego Union, 5:1-2. City Affairs - Board of Delegates' Meeting Last Evening: A house resolution was adopted instructing the chief of police to furnish a list of all parties living within the limits of the city park, with a view to ejecting them. . . . Engineer Capp's reports on Mission Valley Water Proposition: It has been suggested that merely a diverting dam in the river be constructed and the flood flow be diverted into a reservoir constructed in the city park. I wish to say in regard to this that to carry the flood flow of the river would require a very large and expensive aqueduct, while the forming of a large body of water in the city park would be a standing menace to the lives and property of the residents lying in the path of the water in case of the possible destruction of the dam, as the dam would be a high one and built entirely of earth, owing to there being no suitable foundation to construct a masonry dam. It is not beyond the bounds of possibility that an earth dam of this height (about 120 feet) may be destroyed by earthquakes, or by burrowing animals, while the reservoir is filled with water. In case such a disaster should occur, this vast body of water would be disgorged into the very heart of the business portion of the city, the results can be well imagined.

November 30, 1894, San Diego Union, 4:2. EDITORIAL: City Park Squatters . . . While it would be folly to allow squatters on the city park to remain upon it long enough to secure title, or to cloud that of the city, the fact should not be ignored that most of those whose homes are temporarily established there are

poor, and that removal would entail great hardship upon them. Individual cases might be referred to which should deter hasty action on the part of the city council. Families in the depths of poverty, wholly without means of subsistence save the charitable offerings of their neighbors, are housed upon the city lands, nor has there been any disposition on their part to acquire title or otherwise impair the value of the city's property. Ejectment on the even of winter would be a great hardship, as indeed it would at any time. It would be far better to adopt some system of rentals, nominal in amount, by which those in need might be allowed to remain where they are, not as squatters but as tenants of the municipality. In cases where the payment of even a dollar a month would be a hardship, some plan for municipal assistance might be adopted, the payment being remitted altogether. The idea would be merely to make the families upon the city's lands acknowledge the ownership of the municipality in some way, in order that no future complications might arise regarding the actual ownership of the land occupied by them. If removed from the park, some at least of the people there would become a public charge and their maintenance would be more costly than at present while supported largely by private charity. Some plan should be devised whereby they may be allowed to remain in the peaceful possession of their homes, which though humble, have many features of attractiveness and which are certainly not in the way of any contemplated public improvement.

December 9, 1894, San Diego Union, 4:1. EDITORIAL: Municipal Improvement . . . Pursuant to the intention expressed a few days ago, **The Union** this morning presents some facts regarding the workings of municipal improvement societies, such as have been so common in the eastern states and which have been established in some cities of California. There is ample room for such a society in San Diego, where the general indifference of the people is so pronounced as to call for heroic methods for its eradication.

December 11, 1894, San Diego Union, 4:1. EDITORIAL: An Improvement Society . . . The interest with which the suggestion of **The Union** has been received that a municipal improvement society be formed justifies the hope that action to that end may not be long delayed.

December 11, 1894, San Diego Union, 5:3. Board of Delegates: A joint resolution was submitted by Delegate Olmsted instructing the proper committee to investigate the advisability of selling a part of the city park and devoting the proceeds to the purchase of three or four blocks in various parts of the city for park purposes. Adopted.

December 11, 1894, San Diego Union, 5:4. Deed to plaza filed in the county recorder's office yesterday.

December 16, 1894, San Diego Union, 4:2. EDITORIAL: The Vagrant Source . . . Indignation must be felt on account of the persistent dumping of tramps at the county jail by interested constables, whose fees run up into the hundreds of dollars every winter --- money which comes out of the pockets of taxpayers and benefits nobody but the officers making the arrests, the committing magistrates and the transportation companies bring this undesirable freight to San Diego. The unnecessary arrest of vagrants and their support at public expense has been combated by **The Union** times without number, and there is a well-defined feeling of opposition to the continuance of such practices, but the work goes on with increasing volume until it is evident that some remedy must be adopted of a more effectual nature than any yet devised. The establishment of chain-gangs at all outlying towns infested by tramps and their employment on the roads seems to be the most sensible of any plan that has been suggested for ridding the county of vagrants. Such a remedy is needed here in the city, also, for the housing of these lazy fellows and their support at public expense should be paid for in labor by the persons benefited. Men who take to the road are almost always drunken reprobates who might get an independent living if they were to work when they have a chance and look out for the chance as the average citizen is compelled to do in order to keep from becoming a public charge. Illness, disease, misfortune may drive a few discontented and mentally unbalanced men out to the highways, but the hordes of tramps roaming over the country would not exist if the men composing them were disposed to labor and would let liquor alone. They should be cared for when they come to San Diego, but made to earn the money with which they are fed and housed. When this policy becomes firmly established and the "sad" tidings that a chain-gang had been formed in every town should get abroad, there would be few tramps who would turn their steps this way, and the constables who are rolling up enormous bills of costs against the county for the arrest of vagrants would find their opportunities less frequent for leaching (?) the county. Burglaries, highway robberies, incendiary fires and petty misdemeanors would be reduced in number, and the work of the police court considerably lightened. The scattering of the vagrants

would be speedily accomplished if the chain-gang should be established. It is an effectual remedy for the tramp nuisance, and nothing else will answer the requirements of the case.

1895

March 18, 1895, San Diego Union, 2:2. Municipal Business: The city council will meet tomorrow; the first committee has in charge the resolution directing the city attorney to take steps to secure the reservation to the city of the "Charity Tract" in the city park, which has been forfeited by Bryant Howard.

April 1, 1895, San Diego Union, 4:1. EDITORIAL: Tomorrow's Election . . . vote for Republican slate, including Judge Sloane for mayor.

April 1, 1895, San Diego Union, 4:1. EDITORIAL: Park Improvement . . . Los Angeles is moving in the direction of park improvement. Realizing the advantage of having the work that may be done performed with systematic regard for the contour of the land, it is not proposed to place the whole matter in the hands of the distinguished landscape architect, Frederick Law Olmstead [sic] of Brookline, Mass., who laid out Central park, New York, the world's fair grounds, the Boston and Louisville parks, as well as numerous other parks of national reputation in this country. This is a sensible decision on the part of Los Angeles. With competent advice, better results will be secured with the same expenditure of money, and the systematic improvement of the parks of that city will add greatly to its numerous attractions. San Diego would do well to follow the example so auspiciously set by her northern neighbor. The park reserved by the founder of this city exceeds in size all the parks of the United States save one, and if properly improved would be more beautiful than the most of them, the varying contour of the land giving ample scope for artistic gardening. The work should be undertaken now while the city is small, that the trees planted may have some size as the town expands and population increases. Some man who wants to leave a memento of his generosity might well set apart a liberal sum for park improvement and oversee the expenditure of the money, instead of leaving it for his executors to do. But, whether private funds ever become available or not, the people owe it to themselves and to posterity to improve the lands reserved for a pleasure ground and to make the most of the natural beauty of location possessed by them. The present is the time for action, and this truth may be applied to the water question, the railroad issue, and to park improvement. It is time for some radical changes to be made in the appearance of the city. The admirable work done by the citizens under the leadership of the advisory committee on street tree planting, has not been forgotten, but there remains work yet to be done, and the people should lend every encouragement to those who have been so faithful in this matter of beautifying the streets and parks of San Diego.

April 21, 1895, San Diego Union, 4:2. EDITORIAL: The Proper View to Take . . . In the question of public improvements it is not only necessary to consider the actual expense which such matters may entail, but there should be the same conservative view taken of the benefits which may naturally be supposed to follow as the result of any considerable expenditure of public funds. Every dollar spent in practical improvements, such as making better streets and beautifying park sites, will, in the ordinary course of events, come back to the people and then fully repay them for the original outlay.

May 2, 1895, San Diego Union, 4:2. EDITORIAL: Improve the City: The fourteen thousand [sic] broad acres, now by courtesy called a "park" could, little by little, be made "a thing of beauty and a joy forever." Its natural contour is such that when once properly improved it would have no equal in America, and while all this takes time and money, it also calls for public pride and personal interest. When once the work is started, the improvement will be so marked that no one will be willing to discontinue it, but rather will be more eager to help it along, and then in time San Diego will become so famed for its beautiful appearance and surroundings as it is now for its climate.

May 7, 1895, San Diego Union, 2:1-3. New Council Organized - Mayor Carlson's Message, May 6, 1895: I respectfully recommend to your honorable body the following in the interest of the community.

First - That the city acquire a large and ample water supply and pipe system, so as to furnish the community cheap water and plenty of it, and that to acquire the same the question be submitted to the voters at an early date.

Second - That the City Park be improved.

Third - That the city stop paying rent and own its own city hall and fire engine house.

But the principal thing is to acquire a large water supply and pipe system. With its acquisition will follow park improvement, general progress, and better times. With it will come the building of San Diego's much desired direct east line of railroad, as well as the short northeast line.

May 8, 1895, San Diego Union, 4:1. EDITORIAL (untitled): Park Commissioner Maize has asked for an appropriation of \$1,000 with which to make a preliminary survey, with the intention of securing a complete plan for beautifying the park grounds later on. This is a step in the right direction, and the council should not refuse so small an amount for so good an object. What is most wanted in this question of park improvement is a beginning.

May 8, 1895, San Diego Union, 5:4. Park Improvement

To **The Union**: The mayor in his message to the common council of this city has recommended that the City park be improved. This recommendation will meet with the hearty approval of the progressive element of San Diego's best people and newcomers. The people of Los Angeles have just voted \$400,000 in bonds for park and other improvements. An estimate of \$1,000 should be included in the San Diego tax levy for the present fiscal year for park improvement.

The present committee of ways and means have a chance to distinguish themselves by being the pioneers in a movement that will eventually made this the garden city park of the country, if not of the world. We have now a chance to cooperate with Los Angeles in securing the services of the firm of Frederick Law Olmstead [sic] and Co., the celebrated landscape artists, in making the preliminary survey of our park with a view to further recurring their services in making a complete park plan for the 1400 acres. Los Angeles is corresponding with this firm, trying to secure their services in connection with the improvement of their parks, and I have the firm's letter to the effect that provided that San Diego and Los Angeles will cooperate, the firm will make the preliminary survey of both parks for one fee and necessary expenses.

This would effect a saving of about 50 percent in the preliminary survey. I have letters from Gen. Forman of Los Angeles asking me to try and secure cooperation in this matter, and it is to be hoped that the new council will grant this much, as it is believed to be a progressive one. This preliminary survey will have no bearing on the water question, which will be settled long before water is desired for park purposes.

W. H. Maize, Park Commissioner

May 10, 1895, San Diego Union, 5:1. The board of public works met yesterday and instructed City Engineer Capps to survey a road through Switzer canyon, the present road being reported closed over private property.

May 10, 1895, San Diego Union, 5:3. Tax Rate \$1.25 per \$100 . . . After deciding that the rate would be fixed at \$1.25, the ways and means committee set to work to apportion the total amount. . . . The \$750 estimated for park improvement under the plan offered by park commissioner Maize was nowhere in sight and the project had to be abandoned.

May 10, 1895, San Diego Union, 5:4. Park Improvement

To **The Union**: The suggestions of our park commissioner, Capt. Maize, called forth by Mayor Carlson's message, are timely and should be given careful consideration by the city council.

Those of our citizens who have noted the development and improvement of Golden Gate Park in San Francisco with its many beautiful features, where but a few years ago nothing could be seen but an undulating sea of sand, can realize the possibilities of our 1,400 acres, so much suited for park purposes.

The basis of all location work, whether it be for railroad, canal or park purposes, is an accurate contour map, the contours being spaced vertically according to the character of the ground, very rough ground necessitating a less vertical distance between contour lines than another ground having more regular slopes.

I am informed that about four years ago a complete contour survey was made of the city park, the contours being spaced at five feet apart. Several months were spent in securing this data by a force of qualified engineers, careful and thorough work being done. Now, by delineating on this map the character of the soil, whether loam, gravel, etc., the landscape artist will have all the data necessary to an intelligent exercise of his art.

Inasmuch as the city has this information, obtained at a large cost, which could be easily supplemented by a few panoramic photographs showing the topography of the surrounding country, it occurs to me that instead of effecting an immediate contact with some one firm, let the council decide how much it will pay for approved plans, making the offer liberal enough to attract the best talent, then advertise in several large cities for plans to be based on the data to be furnished by the city engineer. By so doing you will bring San Diego's prosperity and enterprise to the front all over the union, and secure many valuable bids for our park commissioners; for, in all probability, the plan that is considered the most desirable and which will be accorded the prize, many not be adopted in full, but improved by the addition of novel and desirable features suggested by some of the less successful landscape artists in their plans.

H. P. Wood

May 10, 1895, San Diego Union, 5:4. Do the Work at Home

To **The Union**: Most certainly our mayor is right, "the city park needs improvement," which means improvement to our city, and our citizens have long felt the want of a promenade. But is the method recommended by our park commissioner suitable to our park funds? San Diego is not a wealthy city --- Olmsted & Co. will not make that preliminary survey for nothing, neither will Los Angeles cooperate with San Diego to beautify here without ulterior motives. If a survey is necessary, surely we have men right among us who will be glad to make it, so circulating our money among our own people. But it is supposed to have been surveyed already once, and for the rest it would seem that further planting and beautifying would make more show than surveyors' stakes. Let us, instead of employing more surveyors, put the money to plants, flowers, lawns and music, and we and our visitors shall then find our park some attraction and enjoyment. With all due respect to our park commissioner, we are

Two Women of San Diego

May 11, 1895, San Diego Union, 4:1. EDITORIAL (untitled): Park improvement in San Diego will have to wait another year since the insignificant appropriation of \$1,300 that has been decided upon will not go far towards beautifying the 1,400 acres which the people are patently waiting to have improved. It would be a good plan for the residents of our city to imitate some of the nearby towns and organize a series of planting bees, road making clubs, lawn and flower societies and similar ideas, and use their spare time in improving the park.

May 11, 1895, San Diego Union, 5:3-4. City Council in Session: Scheme to Improve the Park . . . Delegate Barker made a few vigorous remarks on the amount of money to be raised by the new tax levy that goes to corporations, showing that of the \$111,000 available for city use outside of bond redemption, the corporations get \$42,750, as follows: Fire hydrant rental, water for sprinkling streets and for flushing sewers, \$23,000; electric lights, \$18,530; gas, \$600; telephones, \$300. Mr. Barker proposed that as the corporations received the lion's share of funds in the city treasury, they should be called upon to aid in improving the park, a move that was desired by all citizens and which it was found impossible to aid in the present levy.

"I have prepared two resolutions that will follow," said Delegate Barker. "One is that the Electric Light company, the gas company, the Western Union Telegraph company., the Postal Telegraph company. and the Electric Railway company be charged a grand rental of \$1 per pole per year and that the money so collected shall be turned over to the park improvement fund. The other resolution is that the telephone committee be

requested to recommend a rate to be fixed on telephones in the city. The present rate is about double that of most cities."

The resolutions were read and on motion of Mr. Barker referred to the committees interested.

May 14, 1895, San Diego Union, 1:2. How to improve the park; why not organize the San Diego Improvement Society?

To **The Union**: I am pleased to learn that the suggestions made in my article in **The Union** on park improvement met with such general approval. I have been urged to continue the good work by a large number of the progressive people of this city. H. P. Woods' suggestion as to furnishing a complete contour map or survey of the city park has already been anticipated, as I secured a very complete copy, through the courtesy of Mr. Capps, city engineer, about a year ago when it was forward to Olmsted & Co., who have been figuring on it as the basis on which to estimate the cost of the final plans for a 1,400-acre park. We must not forget that we are planning for a park which will be visited by tourists from the known world, and that it should be planned as the start for a city of 100,000, and not for a city of 25,000 or 50,000 inhabitants.

New York city when it was making Central park had Mr. Olmstead [sic] on the ground to superintend the work. Chicago had him or his aide constantly on the ground while the World's Fair grounds were being prepared. Mr. Wood suggests contour maps, photographs, etc. On the same principle, why do artists go to the trouble and expense of globe trotting to portray in oil and water colors the wonders of the sunrise when panoramic views or photographs could be secured and the artists do the work at home? It is not necessary to get out park plans yet, but it all important to work the non-progressive element up to the idea that we have the finest park site and the largest one, except one, in the United States, and that we do not want it desecrated by any amateur landscape artists or home talent gardeners. The best artist in the landscape line is none too good for San Diego's 1,400-acre park. Professor Sargent of Harvard college, who has the largest and rarest collection of trees and plants in his collection in the world and who has spent a fortune on his collection, traveling all over the habitual universe for this purpose, during a recent visit to this city stated that he had not seen in all his travels such an attractive park site as ours, commanding, as it does, a magnificent view of the entire city, bay, ocean, and a continuous and broken chain of beautiful mountains. He added that the park could be planted with the largest collection of rare plants and trees yet brought together and such as no present arboretum possesses.

Are we then to participate in laying out this park a la San Diego in the days of the pioneers, when alleys were not considered necessary, and blocks 200x300 feet were considered sufficient for business purposes? We want a few more men of the type of Herman Weltsch in this city, who will exert themselves unselfishly in the interests of the public before we can make progress. We can do without a park as New York city and San Francisco did until we are financially able to provide a suitable one. I will be satisfied if we can do better at present than keep off intruders and cranks from farming out the park in job lots to would-be land grabbers, and allowing them to plant it with hollyhocks and dandelions according to their fancy you know.

With regard to the "Two Women of San Diego" who want the work done at home, I have to say that home talent artists of the landscape pattern secured the expenditure of about \$1,500 from the city three or four years ago in the park or just about double the amount that I asked for as park commissioner. That money was expended in planting a few trees and shrubs, laying water pipes, etc., but no one will claim that the park has been improved by such an expenditure, and visitors only ridicule the manner in which the work has been done. I think it is time to move in making park and other ideal improvements, such as grading, paving, street tree planting, etc., and, as the city is not in financial condition to move in this matter, let us as citizens, one and all, join in forming the San Diego Improvement Society for the purposes above mentioned. If all the best element of the city, rich and poor alike, will give this association their financial and moral support, we can raise money in small and large amounts which, in the aggregate, will amount to many thousands of dollars, secure the best park plan, and have the park plan laid out several years in advance of the time that the city can afford the expense and go ahead instead of crying poverty and trying to depreciate the energy and progressiveness of Los Angeles and other prosperous neighbors. For one I am proud of Los Angeles and am pleased to know that it is attracting the attention of the entire country. So will San Diego prosper when we get a move on, but to do with we must stop growling, put our hands in our pockets, and contribute each his

mite in a willing way. The Lord loves and prospers a cheerful giver. Encourage the movement by giving it an energetic and enthusiastic as well as financial support. If such an organization as I refer to can be effected and made a success, it will be through the aid and assistance of women, married and single. I have thought seriously of suggesting to the mayor to call a mass meeting of the citizens, and especially to invite the women to attend, for the purpose of effecting this organization. Shall it be done or shall we sit listlessly by and see Los Angeles get the cream of the wealthy population from among the newcomers because we are too penurious and indolent to exert ourselves in our own behalf? The history of local improvement societies all over the United States shows what can be done to advance a city's or a town's interests rapidly.

The Real Estate association, the owners of real estate, the individual owners, and, in fact, every man, woman and child should become a member of the association to which I refer. It could be incorporated and managed by a board of directors and, in such shape, would no doubt receive bequests, large and small, when its great usefulness was practically demonstrated. Let us hear from the whole community on this subject and especially from the women on whom the success of it alone must depend.

W. R. Maize

May 17, 1895, San Diego Union, 2:2. More Park Improvements - Pasadena Makes Another Move in the Right Direction (from **Pasadena News**): We owe it to ourselves and the people we are inducing to come here. We owe it to posterity to see that Pasadena has a park.

May 17, 1895, San Diego Union, 2:3. Bonds and a Park; Novel Plan for Raising Funds to Improve Parks . . . A public park bought and improved by comic operas would be a distinction for the city [Oakland] in one way at least for it would be the only one in the country created in that manner. . . . **The [Oakland] Enquirer** does not believe the people of this city are anxious to vote a million or two million dollars worth of bonds at this time, but they would vote for \$200,000 or \$250,000 worth, if they were satisfied every dollar were put to where it could do the most good. In a few years at most the city will recover her waterfront and then a considerable issue of bonds will be needed to create commercial facilities. So there is no need to rush into extravagant debt at this time. Bonded debts are not a blessing; they are a pretty heavy burden and only very manifest advantages will justify incurring them.

May 18, 1895, San Diego Union, 4:2. EDITORIAL: To Improve the Park . . . There being but little hope for park improvements from any municipal appropriation at least for this year, the people of San Diego should not be content to let the matter rest if there is any possible plan whereby the good work could be commenced. Up in Oakland, there are seven public parks, some of them extensive but the aggregate area is fairly large. These parks are now attractive, but not as beautiful as the residents of that city desire them to be. In order to beautify them still more private subscriptions have been raised, and the money thus secured is to be expended in the purchase of tropical trees, flowers and shrubbery, the selections to be made by the mayor, and the money instead of passing through several hands, is to be paid directly to the florists who furnish the stock. This is certainly an excellent plan for park improvement, and one that will make its effect felt from the start. It will not be necessary to raise a fund sufficient to beautify the entire 1,400 acres, but make a commencement of some kind. Lay out one central boulevard, plant its entire length with trees, adorn it with flowers and shrubbery, and if the result does not lead to additional improvement either by the city or continued private aid, there still will be something to show for the work. Once started, however, park improvements will always progress.

May 19, 1895, San Diego Union, 4:1. EDITORIAL: Organize a Park Society . . . Among the many extensive park sites which add to the attractive appearance and reputation of cities possessing them, there is not one that could be made more beautiful than the magnificent area which San Diego is now permitting to remain in its wild unkempt condition. It should be so improved that thousands of tourists who come here annually would speak of its beauties wherever they might be, and then add another attraction to the many which the city has to offer intending visitors and residents. The city council either does not appreciate the benefit that San Diego would derive from its park were it improved as it should be, or else it would devise ways and means to have the work done at public expense. This, unfortunately, the public must endure, but if the people of this city would get together and, actuated by one common purpose, organize a park

improvement society, collect every dollar possible from private subscriptions, and then go to work intelligently to gradually improve the park, it could be made the center of attraction and interest on the Pacific coast. What is first necessary is organization, and such a society should have as its members every man, woman and child in the city. Subscription books should be circulated by the proper committees from house to house, and any amount, no matter how small, be asked for so that all could have a share and interest in the work. It is to be believed that many of the wealthy residents here would liberally help such a project, and continue their support once the good work was started. The fact that everyone, however, could and should give something is the most essential requirement to the success of the plan. Every dollar would help to attain the end desired, and the results that have been accomplished in other places by just such societies could be repeated here. The sooner the plan is put into motion by the people the nearer will come the time when actual work on the park can be commenced, and when the council will be more likely to offer financial aid in helping the good work along.

May 22, 1895, San Diego Union, 2:3. Park for Sport; Grand Boulevards and Improved Streets the Result: Oakland is awakening to the importance of park improvements and good streets as the following report from **The Times** of that city will show. . . . People of means who now reside in San Francisco will not be long in choosing between the two cities. San Francisco with its cobbles or Oakland with its magnolia and palm-lined boulevards and its grand climate.

May 25, 1895, San Diego Union, 2:2. Improve the City - How San Diego Can be Made Attractive . . . letter from P. S. Leisenring endorsing efforts to stir up an interest among the city officials and private citizens to improve the appearance of San Diego by planting trees, etc.

May 31, 1895, San Diego Union, 4:2. EDITORIAL: Gradual Park Development . . . In those cities where the importance of public parks is best understood and fully appreciated, the policy is to increase the area whenever opportunity presents. Following out this admirable principle, Boston now has 14,000 acres reserved for park purposes, and the greater portion of this large area is now under the highest state of development. During the last seven years Philadelphia has, in addition to constantly improving Fairmount Park, established twenty-six new parks and squares, all of which are now as beautiful as art and adornment can make them. Here in San Diego there is one park of 1,400 acres which could be made the peer of any site in this country, and all it requires to make it so is improvement. This cannot all be done at once, but if the plan adopted by Philadelphia, for instance, was followed, of doing the work gradually, then the result would be fully as satisfactory.

June 8, 1895, San Diego Union, 5:4. The Day Nursery; Annual Report Showing the Condition of the Institution: Though the only reserve fund which this work has is the hold on the hearts of the people, yet it was reported in prosperous condition but with constant needs. . . . The greatest number of children cared for in the past year was 31 and the present number is 15.

June 23, 1895, San Diego Union, 5:2. Street Matters . . . The joint street committee of the city council voted to recommend that a ground rental of 50 cents per year be charged for all electric light, telephone, telegraph, electric railway and other poles in the city, the revenue to be devoted to the improvement of the city park.

June 23, 1895, San Diego Union, 5:3. Bryant Howard's answer . . . The answer of Bryant Howard, a defendant in the case of the people vs. H. W. Weienke, ex-tax collector, was filed in superior court yesterday. The answer begins with the statement that Howard is not indebted to the plaintiff or in any way liable as a bondsman for Weineke.

June 27, 1895, San Diego Union, 5:3. In Golden Gate Park; the Bloomer Girl out in force and attracting much attention . . . There were not many teams and turnouts, but 10,000 people spent yesterday in the city's breathing space.

August 6, 1895, San Diego Union, 2:1-2. Business of the City; meeting of two branches of the city council last night; Mayor Carlson vetoes ground rental of 50 cents per annum for each pole for the suspension of electric wires erected or used by telegraph, telephone, electric light, or electric railway in the streets, alleys or

public places in the city of San Diego; "I do not think it is time for this city to levy a tax on enterprises which, though built by private capital, are welcomed by the public." . . . The board of public works was instructed to find out by what authority a line of poles was placed through the city park. It was stated that the San Diego Flume Company had strung a telephone wire through the park without permission. . . . A new pound ordinance was adopted. The main change from the old one is in a provision requiring the police to take up horses found at large in the territory bounded by B, 8th, L and 4th streets, to be turned over to the Poundmaster if not claimed within two hours.

August 23, 1895, San Diego Union, 5:3. Public Works: City Attorney Doolittle was asked for information regarding the actual amount done by the holders of the Howard charity tract in the city park, it having been claimed that the contract with the city was not being carried out. Bryant Howard, M. A. Luce and Chas. S. Hamilton will be summoned next Tuesday to give information in the matter.

August 28, 1895, San Diego Union, 5:4. Charity Tract, Bryant Howard defends his trust and asks city aid . . . Bryant Howard, Charles S. Hamilton, and M. A. Luce, trustees of the charity tract of the city park, appeared before the board of public works yesterday morning to furnish information as to the condition of affairs in connection with their trust. Messrs. Hamilton and Luce explained that they were simply advisory trustees and that Mr. Howard had had active charge of the tract and its development.

Mr. Howard reviewed the city's title to the park and the trust deed whereby he was given control of the charity tract for the purpose of erecting an orphan's home, children's home and school for technology. It provided that improvements shall be commenced within one year and that buildings shall be erected and the grounds kept in order, and that the schools shall be maintained. Mr. Howard said that it was impossible for him to keep the tract up as he would like, and he asked that the city continue to pay for two or three men to keep the grounds in condition.

Regarding the maintenance of the schools, he still hoped that he would be able to establish and maintain them. He argued that so long as the work already done had been in good faith, and was in the line of requirements, the trust could not be taken from him. He claimed to have put \$100,000 in improvements on the tract. The city is not called upon to pay for water, the Flume Company having given a deed to supply the tract free of charge.

The board will prepare a report tomorrow to submit to City Attorney Doolittle, and the latter will report the facts to the council, with, perhaps, certain recommendations as to the legal steps necessary to be taken.

September 11, 1895, 2:1. Board of Delegates . . . A communication was received from the city attorney regarding the occupation of a portion of the park by Mrs. Taylor. Referred to the street committee. Olmsted called attention to a report that garbage was still being dropped in Switzer Canyon in the park and this matter will also be investigated by the committee. A communication was received from D. C. Collier to the effect that numbers of men and teams were removing dirt from the location of 6th and 7th streets and the park without authority, and destroying one of the most sightly portions of the park. Referred to the street committee.

November 19, 1895, San Diego Union, 2:1-4. Meeting of City Council Last Night . . . The ordinance instructing the City Engineer Capps to prepare estimates of the cost of the Upper Otay system was read, and Prout moved that the committee of the whole recommend its adoption. The motion carried by a vote of 20 to 4. . . . The ways and means committee recommended that the chain-gang ordinance be revived and put in operation, on account of the many hobos arriving in the city. The matter caused more discussion among the delegates than the water question, and much heat was displayed. It was finally referred to the police committee and city attorney. . . . The city lands committee recommended that the petition of J. H. Crawford to lease a portion of the park be denied. Adopted. A similar petition from Thomas Burbank was also denied. . . . The city lands committee recommended that the Indians in Mission valley be removed. Adopted. . . . The resolution of intent to change the grade of 6th street, about which much feeling was also exhibited among property-holders was also voted down unanimously.

December 21, 1895, San Diego Union, 3:2. Day Nursery, Out of Debt, but there are many needs. . . . The present number of children is 17. Of these three are under 14 months. Ages of the rest from two years to twelve.

1896

January 1, 1896, San Diego Union, 10:2-3. Magnificent Park - Provision Made for One of the Finest in America

There has been good provision for public parks in the city of San Diego, and should the city ever grow to have a population of even a million people there would still be ample park area. Years ago when the present city was first laid out, a tract of 1,400 acres was set aside for this purpose, and it has ever since been kept intact. It is situated conveniently to the business center, and possesses all the natural attributes of a magnificent park.

The park is situated in a commanding position on the heights, and from the more elevated portions of the tract, an unequalled view of mountains, city and sea may be obtained. The topography of the park is such that it can be improved and beautified at a minimum of expense. There is a diversity of hills, canyons, plateaus and ravines, which some day will constitute a splendid park as there is in the United States. No better arrangement of its topographical features could be desired. As yet, however, little has been done toward beautifying the tract. Small portions have been rented to florists who are bound by agreement to plant a certain number of trees and ornamental shrubs each year in such parts of the tract as may be selected by the park commissioners, and these leases are at the option of the city council.

On the southern boundary of the park is the Howard tract of 100 acres, where 15,000 trees were set out some years ago. They have made remarkable growth, some of the trees having reached a height of over fifty feet.

May 5, 1896, San Diego Union, 2:1-5. Mayor Carlson's Annual Message - Park Improvement . . . The city park should be improved more extensively. It is susceptible of being made one of the most beautiful parks on earth. A plan of improvement should be laid out by a competent landscape gardener. Then, once a year, on Arbor day, every child in the city should be asked to plant a tree and look after its care. It would be a child's delight and a fond father's pride to see a tree planted worthy of the child and the city.

The result would be the planting of thousands of choice, beautiful and rare trees annually, and their care also without one dollar's expense to the city further than the original plan by a landscape gardener and for the furnishing of water. It is a wish most noble and one that all people, no doubt, would be pleased to see carried into execution. With a beautiful city park, the stay of tourists in our midst would be prolonged, as well as made more pleasant for them, as well it would be the pleasure ground of the people.

July 7, 1896, San Diego Union, 5:3. Olmsted moved that the city attorney be instructed to investigate whether the city park is included in any ward in the city. He said several voters were challenged and denied a vote at the last bond election because they lived on the park. Assistant City Attorney Lewis said the park was included in the Fourth Ward.

August 3, 1896, San Diego Union, 5:1. Fifteen hundred persons visited Mission Cliff at the end of the new electric line yesterday afternoon and listened to a concert by the City Guard Band.

August 4, 1896, San Diego Union, 2:1. Olmsted introduced a resolution providing for the appointment of a special committee consisting of the city engineer and a member each from the board of delegates and aldermen to confer with the park commissioners to devise ways and means of improving the park.

August 9, 1896, San Diego Union, 2:1-2. Citizens' Traction Co. makes great improvements to Mission Cliff road.

August 23, 1896, San Diego Union, 5:2. The Howard tract reverts to the city; Pythian Home proposed there.

A decision was rendered yesterday by Judge Puterbaugh in the case of the city vs. E. W. Morse, Bryant Howard, Charles S. Hamilton and M. A. Luce, executors of the will of James M. Pierce, deceased, whereby a lien is foreclosed on 100 acres of land embraced in the city park.

The decision, which has been awaited with much interest, recites that the city set apart the land to the defendants in trust for the purpose of establishing and maintaining thereon an orphans' home, boys' and girls' home, kindergarten, industrial school, and school of technology. The defendants planted a number of trees on the land, which is about the finest in the park tract, and prior to October 1, 1891, erected a house and barn and maintained an orphans' home from about October 1, 1891 to June 1, 1892. No other buildings were erected, and the defendants have shown their inability to carry out their part of the contract with the city, hence the land reverts to the city.

It is expected that the grand lodge of the Knights of Pythias in this state will now take steps to establish a home on the tract for aged Pythians, a resolution having been adopted at the last meeting of the grand lodge accepting an offer made by Harry W. Vincent, of the buildings and land, for a long term of years, free of all cost, and with water free for all purposes. The offer of the city was contingent upon the decision rendered yesterday. The Pythians will expend many thousand dollars in fitting up the tract.

August 24, 1896, San Diego Union, 5:2. Will World's Pythian Home be located on the old Howard tract?

December 18, 1896, San Diego Union, 3:1-2. Judge Witherby Dead; Passing Away of San Diego's Best Known Pioneer; A Resident of San Diego since 1849: After the collapse of the Consolidated National Bank and the downfall of Bryant Howard, who up to that time has stood as a pillar of San Diego finances, it was learned that Judge Witherby had been dragged down in the crash. His once considerable wealth was dissipated in many ways, but principally in the expense of maintaining the "Howard park tract," a portion of the city park set apart to Bryant Howard and several associates, including Judge Witherby, where certain public charities were to be instituted at the expense of the grantees. Bryant Howard received the credit for the great charity, but in proceedings involving the Consolidated National Bank business, it was discovered that Judge Witherby had given the bulk of the money, leaving Howard to reap the glory with the understanding that after Witherby's death the truth would be told. But through the bank and Howard's downfall, Witherby's fortune was swept away, and his beneficence in the park could not be continued.

December 20, 1896, San Diego Union, 2:3. Dr. R. M. Bowers opposed to garbage crematory in park or waterfront.

SAN DIEGO COUNTRY CLUB

San Diego Tribune, December 1, 1981, Leisure, 8; April 19, 1982.

Began in **1897**; nine hole, 2,389 yards long with rocky, bare-dirt fairways and sand greens; small wooden clubhouse, 15x20 ft.; bounded by Upas Street on the north, Richmond on the west, Laurel on the south, and Florida Canyon on the east

Mid-City Press, December 1967, 7, Early San Diego duffers roughed it on the "greens," by Jonnie Wilson

. . . The sport of golf, which became popular on the East Coast in the 1880s, did not arrive in San Diego until 1896. It was in that year that Dr. and Mrs. William S. Edwards of University Heights became the first city residents to chase after those little white balls.

The Edwards, transplants from the East, arrived in town with golf bags in tow, but could find no suitable place to indulge their new hobby. Before long, however, they had recruited a small group of intrigued new

friends to help them lay out San Diego County's first golf course, in the northern part of Balboa Park (then City Park).

The city granted them permission to use the area bounded by Upas Street on the north, Laurel Street on the south, Richmond Street on the west, and Florida Street canyon on the east. The primary occupant of this land today is the San Diego Zoo.

The golf pioneers had a big challenge ahead of them. In 1896, their chosen site was one gigantic rough --- a dry, brush-covered, rock-strewn area studded with ravines. But the golf enthusiasts were undaunted, in true gung-ho style, they attacked the brush and undergrowth, with garden tools, and in a few short months, had transformed the wilderness into a satisfactory --- a least by that day's standards --- nine-hole golf course of 2,485 yards.

One oddity must be mentioned --- the course had no grass. Believing that San Diego's dry climate precluded the successful cultivation of turf, the do-it-yourselfers came up with some interesting alternatives. The "greens" were a mixture of crude petroleum and sand; the fairways were bare dirt.

In the fall of 1897, a small clubhouse was erected at Upas Street and Park Boulevard on land donated by the developers of University Heights. By this time, there was sufficient interest in the sport to start a private club, thus the San Diego Country Club came into being. In April, 1898, board members set dues at \$1 a month.

A short time later, the club celebrated its first Fourth of July with a big bang by spending \$35.25 for fireworks. A major improvement in the clubhouse that year was the installation of high technology --- a telephone.

The views from the clubhouse were spectacular. The San Diego skyline was uncluttered at the turn of the century, and one easily could see the Hotel del Coronado, Point Loma and even the Coronado Islands off in the distance.

By 1899, the club had grown to the point that its 15-by-20 foot clubhouse was beginning to bulge at the seams. The structure was moved east to a larger site, and an addition containing two dressing rooms, each with 25 lockers, was built. Also added were two "closets" and a septic tank.

Over the next decade, the club continued to make improvements, adding a weather vane in 1900, electricity in 1902, and a piano and new flag in 1903. A Chinese man named Song soon was employed to supervise the establishment. The live-in attendant also served as chef, janitor and greens keeper, the latter being somewhat of a misnomer.

Soon the club's amenities extended well beyond golf. According to an early newspaper report, additional facilities included "a shooting box with modern traps, double tennis courts and a croquet court for those who fancy ground billiards."

Tournaments --- men's, women's and mixed foursomes --- were held frequently. In January, 1900, it was reported that there was an 18-hole tournament in progress, but because the San Diego Country Club had only a nine-hole course, it would take two successive Sundays to complete. The lucky winners (one gentleman and one lady) each would be awarded a beautiful loving cup.

With its varied terrain, the course was a difficult one. Many of the holes were given names that bore witness to this such as "Hard Luck," (No. 1), "Deception" (No. 4), "The Crater" (No. 7) and every golfer's nemesis -- "Canyon del Diablo" (No. 9), which featured a treacherous ravine.

But not all mishaps could be blamed on the lay of the land. Many a golfer was frustrated by the favorite sport of neighborhood children who delighted in fielding the golfer's shots in their mitts, then disappearing into the brush.

By 1910, membership was 233, and club facilities once again were declared inadequate. More land was purchased, and *Irving Gill* was hired to draw up plans for a new, more spacious clubhouse. Unfortunately, when the eminent San Diego architect submitted his plans, the board found them “unacceptable,” and Gill was eliminated from the club’s expansion plans, after being paid \$200 for his services.

A new architect, E. Layman, was engaged. His plans for a stately, two-story clubhouse, complete with cocktail lounge, grill and ballroom were approved. The building was erected at 1748 Upas Street at a cost of \$8,460.

The new clubhouse was popular and much used for social events. Unfortunately, the golf course for which it existed was threatened with extinction. The city of San Diego wanted its park lands back to begin preparing for the upcoming Panama-California Exposition. In June, 1913, the club was asked to vacate Balboa Park.

Luckily, about this time, the membership had been invited to merge with an 18-hole golf club being built in the western part of the city by A. B. Spaulding of sporting goods fame. Spaulding’s offer to accept all present members into the Point Loma Golf Club without initiation fee and with maximum monthly dues of \$2 was accepted. The clubhouse on Upas Street was sold and all furnishings moved to the new facility on the Point.

The members had a few good years in their beautiful new location before receiving more disturbing news. The Point Loma club was near Chatsworth and Rosecrans, and the land it occupied was needed by the military for expansion plans, which included both Marine and Navy installations.

Faced with a second relocation in seven years, undoubtedly members were beginning to think their links were jinxed. Once again they had to clear out their lockers and start looking for a new home.

But there is a happy ending. In 1920, after eliminating the possibility of relocating to Kearny Mesa because the area lacked a water supply, 160 acres of farmland was purchased in Chula Vista. And when the San Diego Country Club moved to its third and final home, it realized a major improvement over its humble beginnings in Balboa Park. The “greens” were finally green --- a grass course had been planted.

1897

“San Diego City Park, 1868-1902” by Gregory Montes . . . Woman’s Home burned in **1897**, one month after the city had insured it for \$4,000 (Hopkins, p. 327). The city promptly collected the insurance. . . . When the Howard tract was forfeited to the City in 1896, it seemed to some like a vacuum begging to be filled. In January, 1897, a fraternal order, the Knights of Pythias Lodge of California, asked the Common Council to deed it 30 acres of the former Charities Tract for a home for aged and ill Pythians and their dependents. (CCO B.P.-1, Doc. No. 1312, filed January 18, 1897). . . . The City Lands Committee was quite willing to grant the property, merely adding for a note of respectability, that the Pythian grounds be open to the public and designated in accord with “a general plans of improvement for the entire park.” *CCO B.P.-1, Doc. No. 1312, letter of January 21, 1897, attached to Doc. No. 1312) . . . Two days after the Pythian request, on January 20, Alderman Dodson, truly swept by the New Year’s spirit of giving, proposed that the City also deed 70 acres of City Park, near the head of 27th Street, to the State for a normal school (San Diego Union, January 20, 1897, 2:3)

January 1, 1897, San Diego Union, 12:7. Commendable Charity; Woman’s Home and Day Nursery Doing a Good Work . . . Occasionally strangers who have not visited the place have concluded it was an old ladies’ home, but in the usually accepted sense of that term, it is not all such for the obvious reason that as there is no fund or reserve provision for support, no permanent home can be assured. But even with the present limitations, it is the purpose of this department to afford a comfortable temporary home in time of need to self-dependent working women when seeking employment or recuperating from overwork. However, the

place is practically more a children's home and since the association which built on the heights of the Howard tract have failed to use their building as was originally designed --- as a children's home --- this Day Nursery is the only institution in town which specially cares for children. The usual number is from fifteen to twenty, though occasionally for a short time it has been thirty or more.

For several years past, the children have remained by the month instead of the day, as when the work was first established, and to some of them it is the only home which they can remember. The ages vary from a few weeks to 10 to 12 years, though it is not desirable to receive boys over 6 or girls over 10 years. These children are usually motherless or the children of widowed mothers obliged to work away from home. Children who are old enough regularly attend the public schools and Sunday-school. Nearly all are clothed by the institution, which makes the family sewing no small matter. Some mothers find themselves very busy with the sewing for two or three children. The maintenance of this work comes from contributions of the charitably disposed, from the small amount that parents can pay, and from the county, which provides for the support of children sent by supervisors.

January 1, 1897, San Diego Union. The City Parks (same as January 1, 1896 with slight additional comment) . . . The Howard tract is under the supervision of George M. Havice.

January 22, 1897, San Diego Union, 2:1. Council favors granting 30 acres of former Howard tract to Knights of Pythias for establishment of a World's Pythian Home.

January 23, 1897, San Diego Union. EDITORIAL: The Park Question in opposition to grant of park land to Pythians . . . It is very easy to see that if perpetual use of 30 acres were now granted for a Pythian home, it might not be long before some other organization would ask for a slice of the park.

January 23, 1897, San Diego Union, 2:3. Letter from Capt. Maize expressing opposition to farming out city park.

February 11, 1897, San Diego Weekly Union, 3:6. The City Park - The Magnificent Possibilities Noted by a Celebrated Botanist:

To **The Union**: My article which **The Union** published about a week ago against sub-dividing any portion of the city park to the Knights of Pythias or to any other organization, has met with the warmest approbation of a large number of our leading citizens and taxpayers --- old and newcomers --- who have congratulated me upon the stand taken in opposition to the proposed grant. As this subject is still before the board of aldermen, having been referred by that board to its city lands committee, it is quire apropos to refer to a visit to the city park made within four years by Professor Sargent, who is one of the best known authorities on arboriculture living.

Professor Sargent has made several tours around the world in connection with his profession as a collector of rare trees, shrubs and plants. He now occupies the chair of professor in that line at Harvard college, Cambridge, Mass., having charge of the Arnold arboretum, one of the largest and rarest collections in the world.

After seeing the city park, ascertaining its dimensions, and getting a general idea of its contour, he remarked that it was the most magnificent park site that he had seen in all his travels; that the beautiful view of the bay, ocean and mountains could not be surpassed, and that the view could never be cut off, owing to the altitude of the park grounds. Professor Sargent added that "a park of this amplitude with such exceptional opportunities for growing a large and varied collection of trees and plants such as could be grown here, was a botanical necessity in the United States, and one that science would appreciate, endorse and encourage, and it was confidently believed that a liberal donation could be secured to aid this park."

The fact that Professor and Mrs. T. S. Brandegees, so long identified with the best botanical work in California and the Pacific coast, both in independent work at the Academy of Sciences in San Francisco, have located here and established the best herbarium in the state, speaks a great deal for this locality and its

wonderful possibilities. Their private collection of growing plants is a valuable one today, no more labor nor time being spared by them.

It should not be forgotten that our park site is unique; that it is in the very heart of the city and can be enjoyed without a cent of expense for transportation. We have a treasure in this 1,400-acre tract which posterity will value beyond our highest imagination, and we must not allow it to be desecrated. We hope to secure with or without the city's financial help, complete plans for the park and have them placed on file in the city engineer's office in the near future. And when appropriations can be secure, work can be commenced on that portion of it which will be nearest the city where it can be enjoyed as drives, bicycle roads, picnic grounds, etc. by the humblest citizen.

W. R. Maize, Park Commissioner

April 1, 1897, San Diego Weekly Union, 2:5-6. City Park Schemes - Commissioner Maize opposes the tobacco grant of 60 acres.

To **The Union**: It is surprising to learn that the board of aldermen has voted to grant the exclusive use of 60 acres of the city park to private parties for a period of 5 years, to be used as a tobacco plantation, and it more surprising to learn that in Section 2 of the ordinance referred to, a provision is made that "no right of like character shall or will be granted by said city to any person or persons whatever," during this period of 5 years. If the park is to be leased out in 60 acre tracts, why not give every taxpayer an equal show? Tobacco is now being cultivated and developed by parties at El Cajon, and at other points who have not asked for help in their ventures, and who are, therefore, more deserving of assistance, if the city is to aid in this line.

The city has a specimen of this kind of grant or lease already. Miss Sessions now occupies a conspicuous portion of the city park under a lease for which she agrees to pay the city annually 300 trees at a cost to her of probably 5 to 10 cents each, or a rental of from \$15 to \$30 a year. This lease was granted before the park commissioners were appointed. I have no reflections to cast upon Miss Sessions, who has fulfilled her part of the contract honestly and faithfully. But one mistake of this kind is enough.

It is a source of gratification to know that the board of delegates is the deliberative house of the two, else we now would have the Knights of Pythias, the tobacco plantation, and probably, for variety, a slaughter house, garbage crematory, etc. There are plenty of acres contiguous to the city that can be secured for the philanthropic culture of tobacco, at a fair figure, and there is no reason why the present applicants should have a monopoly. If it is to be so good a thing, let the average poor man have a show.

As formerly stated, I have in the near future the offer of substantial aid towards getting out the plans for this park, meaning about \$8,000, providing the land-grabbers, charities, and would-be philanthropists can be kept out. If poor old Ryan is aware of the proceedings in the board of aldermen on the park question, he will rest uneasy in his grave and regret that he did not live under this regime.

W. R. Maize, Park Commissioner

May 6, 1897, San Diego Union, 5:1-2. Mayor Reed's Message . . . I am unalterably opposed to leasing or in any manner whatsoever disposing of any portion of our magnificent city park. This 1,400 acres should for all time remain intact for this people and for their children's children, and be as sacred as Holy Writ; and whenever the financial condition of this city will justify the same should be improved in a moderate manner; transforming her canyons into artificial lakes and serpentine drives, with roses, flowers and trees of all climes dotting her hillsides, making this park the grandest for scenery and beauty in the American continent, if not in the world.

May 10, 1897, San Diego Union, The Children's Industrial Home in the Howard tract of the city park was burned to the ground at noon yesterday. It was in charge of George M. Havice, keeper of the tract, who lived in the house with his family. Havice and one child were the only persons in the building when it caught fire.

May 12, 1897, San Diego Weekly Union, 6:1:2. It Went Up in Smoke; Children's Industrial Home burned to the ground; Cost \$12,000, insured for \$4,000; Owned by the City; Great plan for a charitable institution in the park, why it failed.

(From Monday's Daily) The Children's Industrial Home in the Howard tract of the city park was burned to the ground at noon yesterday. It was in charge of George M. Havice, keeper of the tract, who lived in the house with his family. Havice and one child were the only persons in the building when it caught fire. The Cadet band, composed of young boys, was marching in the park grounds, and after Havice had built a fire in the kitchen stove and otherwise made ready for a quick lunch after his wife's return from church, he went outside and watched the band boys drilling. Five or ten minutes later he saw smoke pouring from the third story, near the chimney.

Havice ran upstairs and fought the fire, or tried to, with a little hose attached to a two-inch pipe. But the pressure was not strong enough to send the stream up to the fire, and Havice soon had to withdraw. Two of the band boys ran down to 14th and D streets and turned in the alarm, while the others, numbering fourteen, went into the house and helped to carry out the furniture. The carpets, pictures, beds, chairs, and other moveables were hustled out in a hurry, both in the first and second stories. Everything in the basement was also gotten out. The boys worked with a will and would have continued, had not Mr. Havice warned them of the danger of one of the big chimneys falling in.

The fire department was unable to do anything in the way of quenching the fire, though the fireman rendered service in removing windows, mantels, etc. The nearest fire hydrant was at 12th and A streets, just a mile away by the road, and it is doubtful, even had a hydrant been handy, whether the water pressure would have been sufficient to do much good. The only water that could be utilized was that running from one and two-inch taps on the premises, but the pressure was next to nothing.

The building was over an hour in burning. The fire had to work downward, and as the building was located on a knoll at the head of a small canyon, the wind blowing up the canyon served to check the flames somewhat. With adequate fire protection the building could have been saved easily. The sight of the big house in full blaze was one of grandeur, heavy black smoke rolling back in the brisk breeze, making a cloud that must have been visible from far out at sea.

The cost of the building was about \$12,000. It had been built in 1889 by Bryant Howard, O. S. Witherby and E. W. Morse, as part of the charity institution designed by them, which included 100 acres of the city park, leased to them for ninety-nine years on condition that they would carry out certain work for the public benefit. The history of the work is told by Bryant Howard himself in a subjoined communication. Since the lapse of the work on the part of Mr. Howard, the city brought suit under the lease for the recovery of the land, and secured it over a year ago. It has since that time been in charge of the board of public works, the caretaker looking after the extensive grounds.

About a month ago, after urgent solicitation on the part of a local insurance firm, the board of public works insured the building for \$4,000 in the Caledonian Insurance Company. The city will thus save something out of the wreck. A strong effort will be made to have this money devoted to the purchase of a chemical engine for Florence Heights, which is entirely unprotected, though having more expensive residences than any other part of the city. It was stated yesterday, however, by a city official connected with the park, that the money would, no doubt, be made a nucleus for further park improvement.

The Howard Charity

The following communication was handed to **The Union** yesterday by Bryant Howard.

The burning of the Children's Home today makes it seem almost necessary that I should now give a brief account of the building and the hundred-acre charity tract in order that the truth concerning them may be better understood than heretofore. A full statement of the facts, circumstances and details would fill a volume.

About the year 1886, the late James M. Pierce, E. W. Morse and myself projected the establishment of an industrial school with several branches in San Diego for the support, education and training of poor children. Not long after that the late O. S. Witherby signified his wish to join us in the undertaking.

During the time of the boom it was believed that each of us could contribute at least a hundred and fifty thousand dollars, and we did not doubt that others would also give to so worthy an enterprise. Afterwards three other parties, whose names I do not have permission to use, made wills in which large bequests were named for the benefit of these charities, and others which might be established, and to secure the improvement of a hundred-acres of the City park, and the great advantages of the location of these charities upon it, our far-sighted and liberal-minded city council set apart for charitable uses the hundred acres of the park now known as the Howard tract. The property was deeded in trust to E. W. Morse, Bryant Howard, and the three trustees of the Pierce estate, Charles S. Hamilton, M. A. Luce and Bryant Howard.

I drew this deed myself, and was very careful to protect the interests of the city. By it no possible advantage could have been gained by the grantees. The land could not be used for any private purpose, and it would revert to the city should the provisions of the trust fail to be fulfilled. The only right that the grantees had was to use the land and spend more money on it --- not the city's money, but their own money --- for charity.

Yet, strangely enough, many people in San Diego opposed the dedication of this tract for charitable purposes, even though a hundred acres of the 1,400 acres of barren waste, which we call a park, was to be improved by it, and the city saved thereby a large amount of taxation.

At the next session of the legislature, Mr. Bowers, our senator, and Mr. Young, our assemblyman, procured the passage of a bill confirming the act of the city council. In this bill, which I drafted, the city's interests were carefully guarded. An examination of the act of the legislature will show that the tract could not be used for any private purpose; it could not be used for any sectarian purpose; and the public should have the full use of it as a public park.

These three provisions show conclusively that the city was not parting with any right whatsoever; that the grantees gained no right whatever save to use it for charitable purposes, and to spend their own money on it for the public goods.

After a while most of the people reached the conclusion that it was good thing to have a hundred acres of the park improved without taxation, and that orphans and other poor children had just a good a right to the use of a portion of the park as those who play baseball, ride on bicycles, or even in carriages. If a park should not be used for charity, and by the poor, how, in God's name, should it be used? I have read in a book a sermon preached long ago, the precepts of which people profess to follow, but don't, that sweet charity is all that wins eternal life, and only those who do not practice it are lost.

Turn over half of the desolate region, which is now inhabited only by horned toads, tarantulas and snakes, to charitable institutions on condition that they adorn and beautify it, and allow it to be used by the public as part of the public park, and you will have set a noble example to the whole world and good people from all lands will come here as a shrine, where charity and brotherly love are shown by such acts as nowhere else on earth.

Before the improvements were made on the hundred-acre tract, a portion of it had been used for years as a dumping ground for most of the debris and filth of the city, the odor of which at times perfumed the air for miles around. But in 1890 the debris and brush were cleared off, the land plowed up, avenues laid out, and trees planted on the whole tract. Iron pipes were laid down and water procured through the kindness of the city water company and the Flume company. Indeed the Flume company deeded water for the whole tract forever. The two buildings were also erected, a superintendent employed and sent east to study the operation of charitable institutions, to buy books and apparatus, and to carry on the work of charity when he returned. A kindergarten school was established, and assistance was rendered to many destitute children, and homes procured for some. An attempt was made to raise oranges and lemons, and many trees were planted, for horticulture and floriculture were to be taught as well as the mechanical trades, to the children who were to be educated and trained at these institutions. But hard times were with us and grew harder as the days went

on, and the burden of carrying on the work fell upon Judge Witherby and myself, with the assistance of my good wife. The amount expended for all purposes in connection with these charities, with interest, amounted to over \$100,000 at the close of 1893, when, on account of the panic, we were obliged to give up the struggle. About half of the amount was expended by Judge Witherby, who enjoined the strictest secrecy about his connection with the matter, and the remainder by myself. Yet, Mr. Morse and Mr. Pierce are entitled to just as much credit as if they had contributed the full amount they had promised. Their noble endeavor should endear them to all who appreciate good deeds. The widow's mite was not measured by its money value, but by the spirit of love and kindness with which it was given.

Bryant Howard, San Diego, May 9, 1897

May 27, 1897, San Diego Weekly Union, 5:1. The City's Business (from Tuesday's Daily) . . . The public building committee reported against the refitting of the barn in the Howard tract for a residence for the caretaker. It recommended that the barn be removed to the west side of the park to serve as a fire engine house.

August 19, 1897, San Diego Weekly Union, 7:4. Bay View Park; Best All-Around Athletic Grounds on the Coast . . . Bay View Park, situated between 25th and 26th streets, and Newton and Pierce avenues, will be a decided addition to the resorts of the city. The stock company that has undertaken the work of preparing the place for bicycle racing, baseball games, and other athletic sports has already expended considerable money at the park, but much more will be used in making this place superior to anything of the kind in this locality. . . . The formal opening will take place next Sunday, when two baseball games will be played.

September 9, 1897, San Diego Union, 2:3-4. Council in Session . . . The resolution to remove the barn in the city park to University Heights to be used for fire purposes was laid over for one month. . . . An ordinance ratifying the action of the Board of Public Works in employing William Gilcher to plow and harrow the Howard tract in the city park was adopted. The ordinance provides for the payment of Gilcher's claim of \$155. . . . The Board of Public Works requested authority to spray trees and shrubbery in the park. Referred to Committee on Parks.

September 13, 1897, San Diego Union, 5:1. Fun at Bay View Park; new bicycle track opened with several good races; bicycle meet, 1500 people on the grounds, including many entire families; baseball games.

September 18, 1897, San Diego Union, 2:3. Street Improvement; joint street committee's recommendations to council: It was recommended that the Board of Public Works be instructed to have the park superintendent investigate and report as to the necessity of spraying trees in the park infested with insect pests and to trim trees and shrubbery and for the Board of Public Works to water trees on upper 5th street, in the Howard tract, and in the ladies' annex park once.

September 21, 1897, San Diego Union, 5:1-2. Board of Delegates, Location of Garbage Crematory starts the old fight: James wanted to know if the city could not order the crematory placed in Switzer canyon. City Attorney Doolittle said the contract could not be changed without the consent of the company.

September 25, 1897, San Diego Union, 3:2. Water Shut Off . . . The Board of Public Works met yesterday and found that the park fund had been exhausted again. As the auditing committee some time ago notified the Board that it would not allow bills against overdrawn funds, the Board has been careful to keep within bounds. The order was therefore given to shut off the water from the parks until the council appropriated more funds.

September 30, 1897, San Diego Union, 5:3. Orchard and Garden; Notes and Comment by Horticultural Commissioner G. P. Hall: The botanical garden, as proposed by H. Stiles, in the Howard park can be made very efficient as well as ornamental by way of a series of experiments that will demonstrate the utility of raising plants that may prove valuable acquisitions when properly treated. We trust the city may be able to place at Mr. Stiles' command the facilities that will be the means of enhancing the valuable practicable experience.

San Diego Union, September 30, 1897, 5:1. The state shoot of the naval reserve will be held today at the range in the city park. The targets will be placed at 200, 300 and 500 yard's range.

October 5, 1897, San Diego Union, 2:1-4. Council in Sessions: A joint resolution was adopted transferring \$155 from the public building to the park improvement fund.

1898

February 19, 1898, San Diego Union, 5:2. Country Club Organized; Will Maintain a Club House and Suitable Grounds: The Country Club filed articles of incorporation in the county clerk's office yesterday. The purpose of the organization is to promote social intercourse among its members and to maintain a club house and grounds suitable for such sports as the members of the club may desire to promote. The incorporators are Oscar A. Trippert, Charles P. Douglass, R. C. Vroom, H. B. Clarke, Sadie P. Ingle, Minnie J. Douglass, W. Dana Kimball, Francis B. Clarke, Leda Gerichten, Ada N. Smith, Bird Hildreth, E. H. Bagby, Heber Ingle, and Gertrude Clarke. The first seven were elected directors to serve for one year.

February 18, 1898, San Diego Union, 5:3. "The Romance of Califia" will be given at the Fisher opera house on February 18 and 19 for the benefit of the Woman's Home and Day Nursery.

February 26, 1898, San Diego Union, 5:1. The executive committee of the "Califia" entertainment announces that the Woman's Home and Day Nursery received \$650 from the proceeds of the combined entertainment and souvenir program.

May 5, 1898, San Diego Union, 5:1. Supervisor C. H. Swallow circulated a petition yesterday to raise funds for purchasing a flag and the necessary pole and tackle for the Children's Home in the city park.

May 15, 1898, San Diego Union, 2:2. The Day Nursery: Much of the success and efficiency of the work of the nursery for the past nine years has been due to the efforts of the retiring president, Mrs. D. F. Davison, and great regret was expressed at her withdrawal from the board on account of the pressure of other duties.

June 3, 1898, San Diego Union, 5:1. The name of the Woman's Home has been changed to Women's and Children's Home so as to correctly identify the purpose of the building. The organization will retain the name of Woman's Home Association.

August 3, 1898, San Diego Union, 5:1. Amended articles of incorporation of the Women's Home Association were filed in the county clerk's office yesterday. . . . There is no capital stock and the association was not formed for pecuniary profit.

October 4, 1898, San Diego Union, 3:1. Charter Amendment; City Council disposes of important business; special election to be held in December. . . . The recommendation of the Board of Public Works that an appropriation of \$100 be made for the care of trees in the Howard tract was granted after an amendment had been made cutting the amount to \$50.

October 14, 1898, San Diego Union, 5:2. Board of Public Works: It was decided to ask the city council for authority to repair the building in the Howard tract of the city park, in order that it may be used as a residence for the park superintendent.

October 14, 1898, San Diego Union, 5:2. Target Practice; Policemen Held Their Drill in the City Park: The weekly target practice of the police department was held yesterday in the park range. . . .

October 15, 1898, San Diego Union, 5:1. Council in Session; Petition for a Code Charter is Denied: The request of the Board of Public Works that the building on the Howard tract be fitted up as a residence for the park superintendent, and that authority be given to the Board to do the work, was referred to the Building Committee.

October 30, 1898, San Diego Union, 3:1-4. Should Plant Trees; Views of Harvey C. Stiles, park superintendent: The following interesting and comprehensive article on "Shade and Ornamental Trees" was read by the author, Harvey C. Stiles, at the meeting of the County Horticultural Association held at Pacific Beach last Wednesday.

In this country, so bare and brown, everyone should plant trees --- some only one or two, some many. The object, however, should be more to add beauty to the landscape and rest to the eye than to obtain shade; for with our constant cooling breezes that we love so well, we learn also to appreciate the sunshine; and we need to be very cautious about growing such huge, dense masses of shade, lest we repent it, and feel compelled to cut down our great, beautiful trees that we have grown with so much pain and learned to love.

The planting of trees for shade or ornament alone, and not for fruit should, in most instances, be confined to the sidewalks, street row, the avenue and the front yard. The back yard, at least, should be devoted to trees which produce fruit, many of which are as beautiful as the simply ornamental ones.

In sidewalk planting in the city, and sometimes in country places as well, the first thing to consider is the amount of cutting or filling that will take place in front of the property when the roadway and sidewalk is graded. In many instances, if the grading is not already done, it is best to postpone tree planting entirely. In some instances where the official grade is or can be established or approximated, certain varieties may be planted by making a small cut or fill for each tree, or in some cases, the change caused by the grading will not be great enough to cause the death or serious mutilation of the trees. As proof of the importance of this question, let us recall the many hundreds of beautiful sidewalk trees ruined in grading the streets and sidewalks of San Diego.

Probably the most important question to decide is the variety of tree to plant. The many beautiful varieties succeeding here may be narrowed down to a very few, by peculiarities of soil and exposure in our particular case. Further, the special object we wish to gain may limit us again to one or two varieties. But unquestionably we can find some trees which will grow and be a thing of beauty and delight for almost every location, however forbidding, bleak or discouraging it may be.

For high land, where there is no frost, we have the greatest number of varieties to select from. For great beauty, freedom from insect attacks, resistance to drought, and absence of bad points the sugar gum (*eucalyptus corynocalyx*) excels all others. Its only fault would be its very robustness or habit. It will grow and thrive where the blue gum (*e. globulus*), so long considered the paragon of desert land, will burn up or starve out. This is amply illustrated in the Howard park in San Diego, where they may be seen growing vigorously with fine color and beautiful feathery tops, right alongside and among the blue gums, which have succumbed by the hundreds to drought and starvation; and the sugar gums, of the same age as the blue, are twice or three times as large.

I believe there is scarcely a location this side of the desert, where with a reasonable depth of soil, the sugar gum will not grow and be ornamental, without any irrigation whatever. However, if it must get along without water, it must have certain treatment. It should have no water at all in the summer, after becoming established. A tree once watered in the summer must be kept watered, or it will suffer. Give it all the water you can in the winter, and good cultivation in summer, if you want your trees to stand drought.

The sugar gum is a much handsomer tree in every way than the blue gum, or than the *E. robusta*, planted on upper 5th street, San Diego. The blue gum (*e. globulus*) should be entirely discarded, except for timber planting in low, moist land. The *E. robusta*, too, though it has been highly recommended for avenue planting, is not very satisfactory. Like the *E. globulus*, it is a moist land native, and must have plenty of moisture to do well. It is also very coarse and straggling in habit and requires regular cutting back to make a presentable top. While the sugar gum requires very little or no cutting to make a fine round top.

The red gum (*e. rostrata*) is also a good dry land tree, though not quite so resistant to drought as *E. corynocalyx*. The foliage is more feathery and of fine texture, the tree is of somewhat slower growth, and it may be more acceptable to many than the other.

The lemon scented, or peppermint gum (*E. atriodora*) is a very fine tree for sidewalk or avenue, being of slower growth than either of those last mentioned, very fine, drooping branches, graceful top, and exquisitely scented foliage. It requires reasonable moisture.

E. ficifolia, the crimson flowered variety, is a splendid tree for either sidewalk or lawn. It is of moderate growth, rich foliage, and bears its huge pinnacles of brilliant flowers after the second or third year, remaining a long time in bloom.

Another variety, *E. cornuto*, has been tested in other parts of the state, and has proven itself well adapted to planting in alkaline or salt lands. All these other varieties of eucalyptus have been thoroughly tested here, and their habits are well known. Owing to its rampant growth, I would not plant *E. corynocalyx* in front of a nice house, or handsome well-kept grounds: *Citriodora* or *ficifolia* being less vigorous and more graceful, would be preferable.

The camphor tree is well suited for planting in front of a nice place, if it will get good care. We may easily manufacture our own camphor gum from the product of a single tree. I have, by a simple contrivance, made good gum camphor from a tree only four years old. It makes a very handsome tree, and instead of becoming shabby in winter, becomes very attractive because of the bright red color the tip of the branches assume in cold weather. The tree is rather liable to scale attacks, and so must be sprayed occasionally. But it is well worth the trouble.

The various members of the fig family all do well, and make good street trees, though the edible fig (*Ficus carica*) in its various varieties is not desirable for that purpose because of its fruit.

The three or four sorts of *Ficus elastica*, sometimes called India rubber trees, all evergreens, make splendid massy tops, but are not desirable where cement sidewalks are to be laid, because their surface roots develop very largely above ground, and are sure to lift and break the concrete. These roots make them somewhat objectionable for lawn planting, also. But I am sure that by cutting the surface roots for a few years, when the tree is small, the habit may be entirely broken.

They have the most rich, glossy, waxy foliage of any tree that does well generally here, and their good color, vigor and massive tops make them very desirable for certain places. A fact not generally known is that they will live and thrive on a very limited water supply. A tree eleven years old, standing in the New Town park, San Diego, is 18 inches in diameter, 40 feet high, and has a spread of 40 feet. So neither should they be planted in restricted space, nor where the outlook or inlook is to be kept open. There is another *Ficus*, three specimens of which I have found growing in San Diego that I have not seen elsewhere. It has foliage much like *elastica*, but is deciduous; the leaves are beautifully veined and tinted.

Several of the acacias are also desirable for our purpose. A *melanoxylon* (blackwood acacia), particularly, make a very handsome, round-top tree, of upright growth, good foliage, and moderate vigor. While not a choice tree, it is one of the best, all things considered, especially for avenue planting. The black wattle (of mournful memory) that we destroyed without mercy some years ago, because of its scale-breeding proclivities, should not be remembered as a relative of this variety; for this had no such associations. Of the perpetually blooming acacias, *floribunda*, or *retinodes*, are, perhaps, the best. Either makes a good sized, rather spreading tree, with good light green, graceful foliage, and for nearly the whole year the tree is a cloud of beautiful yellow blossoms. But these flowers are always dropping, therefore some would not want them over a walk or porch. Some of the dwarf acacias are also fine for certain places.

One of the very best small trees for planting in front of a fine place, or well-kept grounds, or on a lawn, is *Pittisporum undulatum*. It is easily grown, low, into a close, dense bush if desired; but if trained, to a single stem, makes a most beautiful, symmetrical tree, with light green shining leaves that are exquisitely serrated and wavy. The stem and branches are gleaming white and make the tree very attractive. Its growth is rather slow, not reaching more than 25 feet in height, and somewhat less in spread of limbs, in ten years; so it can be planted where less dainty trees would not be desirable.

The magnolia does very well in some sheltered localities, but needs a good depth of soil, which is often hard to secure on high ground. It requires plenty of moisture in order to insure fine blossoms.

The beautiful and well-known pepper tree is oftentimes the best thing to plant. Its constantly dropping leaves, blossoms and berries are a source of annoyance to some if planted where they overhang lawn, building or walk. But for a long shady lane, what can be more beautiful. Their drooping, swaying branches, their fern-like leaves, their bright red berries and dainty flowers are hard to resist.

The Japanese privet is a very fine small-growing tree, suitable for sidewalk or grounds. In appearance, its leaves are somewhat like the rubber, the tree more slender, but with small round top and clean, bright stems and branches. It bears abundantly long clusters of purple berries that gleam rich among the foliage for several months.

For frosty locations, the catalpa speciosa is very good, with its huge leaves, and great clusters of fox-glove flowers in spring. The tree grows quite rapidly here, in deep soil with plenty of moisture. The pepper, too, will endure considerable cold --- as will the acacia melanoxylon before described. Our native sycamore (*Platanus racemosa*) is another very handsome tree for avenue planting, which also endures severe frost, as well as some alkali. While its deciduous habit would be objectionable for some purposes, it would make it very desirable where shade was wanted only in summer. Even when bare of leaves, the tree is picturesque and beautiful. The European plane tree, of which our native sycamore is the California relative, is also highly recommended for ornamental use in Southern California. It is more sensitive to frost than our sycamore. Both varieties need soil of a good depth and an abundance of moisture.

The several pines native to our mountains may all be successfully grown where there is good depth of soil, and some of us can never forget our love for pine trees. One variety is also a native of our own city, *Pinus torreana*, and should be perpetuated, and the variety saved from utter destruction by planting some trees. These are a few of the trees, the only specimens so far as is known in the world (except a few on Clemente island and off our San Diego coast), and, be it known to our shame, no adequate provision for their protection has been made, and it is a question of a few years only till these priceless landmarks of vanished ages will be all destroyed. For this reason, it seems to me some should be willing to plant and protect a few trees. It must be said, however, it is not so handsome a tree as some other evergreens, although not at all ugly.

Very few of the palms are available for sidewalk planting, owing to their spreading habit. Some of the dwarf species are very nice, but are apt to get injured in such a place. But the many beautiful varieties and species must not be neglected for inside use, as so many of them are so much at home here, and their peculiar foliage is of the most appropriate in our semi-tropic land. *Cocos plumosa*, which is the variety the city has planted on Horton plaza, is of upright growth, after getting well started, and will make a most elegant and graceful, small-topped tree, where such is desired. It will endure no frost, does not do its best if whipped by wind, and needs plenty of water. Almost the same may be said of *seaforthia elegans*, but it is rather more robust and a little coarser.

I suppose the stateliest tree we may grow is a towering fan palm, stretching up forty or fifty feet, its trunk a perfect and graceful pillar, crowned with fan-like branches. Such a tree (the largest of the variety in San Diego coast region) is on the grounds of W. W. Stewart, corner E and Union streets, this city. This tree, which is now about 21 years old, is bearing blossoms this year for the second time. It matures no seed, owing to the last year being the first absence of any staminate flowered tree. This is the first tree of this variety blossoming in San Diego or this side of the mountains. Of course, there are plenty of them over on the desert, of which region the variety *Washington sonora* is a native, and also in Lower California, from whence this tree was brought, I am told, by Mr. Stewart.

Both this palm and *Washingtonia filifera*, a close relative, until recently supposed to be identical, are grand trees for avenue work or for single planting or grouping. An example of its fine effect for avenue planting is to be seen in Howard park, San Diego, where is a double row, half a mile long. They have been planted seven years and receive only one or two waterings a year. To do their best, however, and to quickly attain their full stately stature they should have plenty of moisture.

The different varieties of the Phoenix, or date palm, are the most graceful of all, and unexcelled for all purposes of ornamental planting. It is hard to conceive a richer sight than a date palm tree (*Phoenix dactylifera*), full of ripe fruit, eight or ten great golden clusters, weighing twenty-five to forty pounds, each hanging down from among the long, graceful, frondlike branches. Such a tree may be seen on the grounds of J. M. Julian, corner 6th and Cedar streets. I have seen it loaded with fruit, which I think would aggregate 300 pounds, is of fine quality, but not equal to the date of commerce for the probable reason that the blossoms do not receive pollination, which is necessary in the native land of the date. It may be accomplished here and perfect fruit produced, although it is possible that our climate may not furnish the requisite heat.

According to the old Arab saying, "The date tree thrives best with its head in the fire and its feet in the water." Another tree in the city had last year a crop of fruit estimated at 600 pounds. This tree is over thirty feet high. I understand that it is soon to be destroyed by removal. The famous palm at Old Town and at the old mission are of this variety, as was also the noted one which graced our exhibit at the world's fair in Chicago. Another variety, *Phoenix Canariensis*, is of a more handsome growth and is more desirable. It, too, makes a large tree, very spreading for a number of years. *Phoenix Reclinata*, *Phoenix sylvestris* and *Phoenix tenuis* are all more slender and graceful, but smaller sorts, all doing well here.

The three of four varieties of *Arancaria*, or Norfolk island pine, are beautiful, stately and striking trees that give a wonderful touch to the semi-tropic landscape. But there are so spreading when young as not to be available, except for lawns or grounds. They are quite rapid growth, requiring plenty of food and moisture.

The *Grevillea robusta* (silk oak), which has been extensively planted, should be entirely discarded in the future. It has so many bad habits that they scarce need to be enumerated, the worst of which is the constant shedding of unsightly dead leaves and seed pods. Its certainty to split down also makes it unfit for general use.

The *Dracena*, so much used in the past for sidewalk planting, is not long satisfactory for that or any other purpose, as it loses its beauty and becomes almost hideous after a few years. It seems to me to be quite as essential to warn against some trees that have been found objectionable as to tell the desirable ones.

There are many other fine trees suitable for planting here, but most of them have, as yet received no critical test. Those mentioned as satisfactory make an ample list from which to select.

For alkali or salty soils there are a number of suitable trees. *Phoenix dactylifera*, the date palm spoken of above, will endure a remarkable amount of alkali or salt. The statement is made in a report of the department of agriculture that there are in Arizona very fine bearing trees growing in soil, the water of which is so strongly alkaline as to kill animals which drink it. The Carolina Poplar, a species of cottonwood, is another tree good for alkali soils, and endures considerable cold. I have seen trees of this variety in Kern county, sixty feet high and two feet in diameter, growing in soil so strongly alkali that no crops would grow, while the temperature sometimes goes as low as 10 degrees Fahrenheit. But it requires rich, sandy soil and plenty of moisture.

The distance apart to plant is a very important consideration. Frequently the specimens are so crowded now that they have reached the age of 10 years or so, that they are all hopelessly marred; and very frequently they are so distanced they cannot be thinned by any plan that will leave the balance properly distributed. Before planting, the size of the tree at maturity should be ascertained as well as its rate of growth, and distance allowed accordingly. If a quick effect is desired from the planting, plant just twice as thick as they are to remain, then when half of them have been removed, the remainder will be where wanted. Don't try to compromise on distance, as then you can never thin our satisfactorily..

The exact distance that the tree shall stand from the property line, as specified by city or county laws, should also be strictly observed. The oldest and finest trees in the city have had to be sacrificed because this was not observed in the plantings of past years. The trees had precious values, but they had to go.

In planting the sidewalk row of a small lot, the mistake is usually made of planting too many trees. For permanent planting, one tree of the larger growing sorts is ample for a twenty-five foot lot. If the lots each

side are not planted, two may be used, one near each side. Smaller or slower growing trees allow somewhat closer planting. For a fifty-foot lot, two trees are enough to stand permanently, each twelve and one-half feet from the line, or three, where the lots on each side are not planted. Where a full block or more is planted, the distance should not be less than fifty feet.

As suggested before, temporary trees may be planted half way between at these distances, but the danger is that they will not be cut out before they begin to crowd, and mar the symmetry of the others. It cannot be too strongly urged that one or two symmetrical, well-developed trees, which can only be produced by giving them sufficient room and sunshine are worth vastly more than half a dozen crowded, stunted wrecks.

In digging holes for the trees, if a great depth of soil is found, go no more than eighteen inches or two feet deep, and as big around as you like. If hardpan is reached, blast it out and shake it up as far around as possible, provided that you can go through it so to insure drainage.

If large growing trees are selected, and the desire is to grow trees of noble proportions, they should be pruned very sparingly. Constantly, regularly cutting back any tree is the surest way to dwarf it.

November 7, 1898, San Diego Union, 7:1. City Playgrounds: How Chicago has provided for the children of the poor; vacant lots in squalid tenement house districts transformed into places of joy for the little ones; growth of the movement, by Mildred Merriam.

November 11, 1898, San Diego Union, 5:3. The weekly target practice of the police department was held yesterday at the park range. . . .

November 15, 1898, San Diego Union, 3:1. Affairs of the City; Aldermen and Delegates Held Sessions Last Night: A message was received from Mayor Reed transmitting a communication from George P. Hall, county horticultural commissioner, advocating the idea of laying out small parks in this city, Mr. Hall stated in his communication that the beautifying of streets and the setting out of parks was something that should be taken up in earnest by the people of San Diego. He suggested that a block of vacant land in each ward be set aside for park purposes and be placed in care of the citizens of the various wards, an arrangement that would be beneficial to the city at large, since it would engender a spirit of rivalry between the various wards, each striving to have the best park. Or the large park, now unused, could be divided or sold, and the proceeds be devoted to the purchase of small tracts in different parts of the city. Mr. Hall dwelt upon the effect that well-kept parks would have upon visitors, and urged that the council devise ways and means for beautifying the city. The communication was referred to the joint street and park committee. . . . A joint resolution was adopted authorizing the Board of Public Works to increase the height of the protecting guards around the palms on the plaza at a cost not to exceed \$12.50. Referred to the street committee. . . . Pound keeper Davis sent in a communication naming Anton Osuna and J. Martinez as his deputies. Action on confirmation was postponed.

December 3, 1898, San Diego Union, 3:2. Council Committees, City Land Committee: A recommendation will be made that the park superintendent report to the council at his earliest convenience the names of all persons using or occupying lands in the city park.

December 6, 1898, San Diego Union, 7:3. Affairs of the City; Proposition of Delegate Barnes to sell pueblo lands: A joint resolution was introduced by Delegate Barnes and referred to the city lands committee by both boards, proposition to sell one-half of all the pueblo lands of the city, one-half of the proceeds to be devoted to improving the roads leading into the city, and the other half of the proceeds devoted exclusively to the improvement of the city's parks. . . . Both boards of the city council adopted the recommendation that the park superintendent and city engineer furnish the names of all persons using or occupying any part of the parks or public lands.

December 16, 1898, San Diego Union, 2:2. Board of Public Works: Park Superintendent F. E. Belden submitted to the board a report showing the names of persons located on the city park. These include John H. Gay, who is alleged to have fenced in 150 (?) feet of the park on the corner of Juniper Street and planted the same to eucalyptus trees; shows that Martinez Chick had fenced in 20x100 feet of the park at the corner

of 6th and Date streets; that Mr. Morse had fenced in 25 square feet near the corner of 11th street; that Mrs. Boch had about 25 square feet with small house and shop on the park; that Mr. Starbird had about 100 square feet fenced in for a chicken yard at the corner of 11th and Ash streets; that Mrs. Mary Woodward has fenced in 25x100 feet near the head of the B-street flume, which is occupied by a small cottage; Mrs. Holt has a small cottage on the northeast corner of 11th and Ash streets; that John E. Springer occupies 200 feet of the park and has improved the same with a cottage, outhouses, and has planted trees; that Benj. J. McLaren also occupies 200 feet square on which he had a cottage and is preparing to plant about 1,000 olive trees. The report will be sent to the council at the meeting next Monday night.

December 20, 1898, San Diego Union, 2:1. Affairs of the city; meeting of aldermen and delegates: A joint resolution was adopted authorizing the city attorney to remove all squatters from the city park. Referred to the public lands committee. . . . A communication was received from the Board of Public Works submitting the names of squatters on city park lands.

December 22, 1898, San Diego Union, 3:2. Woman's Home Association; an appeal to the charitable for Christmas remembrance . . . There are at present 22 inmates, besides matron, cook and nurse. . . . Mrs. Geo. W. Marston, President, W. H. A.

December 23, 1898, San Diego Union, 2:3-4. Geo. P. Hall's Views; anxious for road and park improvement.

To **The Union**: No beneficial results are accomplished but by frequent reference to them. In fact agitation and candid consideration are the levelers by which public enterprises are forwarded, advanced, accomplished, or defeated. . . . Engineer Capps has a plan for converting some of the great park into lakes, boulevards, parterres, etc., all most commendable, and if nothing else can be done, by all means do that. But the plan is open to the objection that the entire park itself is remote from the population, inaccessible, and non-come-stable by the people who most need the refreshment of a park, namely invalids, who come here to recuperate; children whose parents cannot hire a team to take them a mile or two away, tired parents and nurses that need some place beside the four walls of their own house to find surcease from care and labor. . . . As a merely business proposition, how commendable it presents itself to our consideration, if the city abounded in parks and green spots of beauty, our rivals could not truthfully say to invalids intending to come here, "There was not a public park where they could rest . . ." . . . We wish Mr. Capps' plan could be perfected and that portion of the city made as fair as Hyacinthus, but we must not lose sight of the needs of the majority who could never be benefited by them . . . Oh, the tired feeling it gives one to meet a conveyance driving over the city, and have them stop and ask, "Will you please direct me to a park nearby? I suppose there must be some place where you have masses of color or public gardens." And you look up toward the gum trees that are dying in the Howard tract, you choke and are upon the point of saying, "Madam, I cannot tell a lie!" But you want to save the honor of the city, and put on your blandest smile, and say: "Have you seen our Howard tract on the hill?" . . . Beyond the fact that Mr. Barnes has never been notorious for any dishonest scheme and seems to maintain a pretty level head, what could be the possible advantage he could gain from the proposition to exchange enough of the pueblo lands to make some parks and fix up roads? This is a question the public ought to be interested in.

1899

"San Diego City Park, 1869-1902," by Gregory Montes

January, 1899. J. S. Mannasse asked the Council to let him use part of City Park near Cabrillo Canyon for "gardening purposes." (CCO, Folder 1, Parks - Balboa Park, 1896-1930, Doc. 4240, filed January 21, 1899)

Opposition of Judge M. A. Luce (**San Diego Sun** article pasted on Doc. No. 4240).

January 1, 1899, San Diego Union, 9:7. A Great City Park: 1,400 acres of varied topography . . . The city of San Diego is the possessor, through the wisdom of her founders, of a park of 1,400 acres, lying in the northeastern portion of the city proper, part of it already surrounded by fine homes and beautiful drives. Though almost entirely unimproved, the park is naturally so beautiful that it is an attractive place, and with

the expenditure of money, such as a city can well afford to appropriate, it will become one of the gardens of the world, in a semi-tropic climate capable of producing anything in plant life worth having.

The park is by nature divided into mesas, canyons, gently sloping hillsides, and little glades. The landscape gardener, who undertakes the task of creating a park, will find half or three-fourths of the work done. The culture of the rich soil is all that is needed to transform the place. Owing to its great extent, the park can easily be made a wonderland in which visitors could revel in the visible blessings of the climate.

Some years ago the late Judge O. S. Witherby, in the height of his fortune, secretly set apart \$100,000 for the beautification of the park, and for the erection of buildings designed to afford shelter for aged women and homeless children. The buildings were erected, and much money expended on the grounds through Bryant Howard, who posed as the benefactor of the enterprise. This tract, still called the Howard tract, contains about 15,000 trees and is in a fair state of cultivation. The city is hampered for means for carrying out the work as outlined, and the decay of Judge Witherby's fortune, through the baseness of associates, left the benevolent institutions unprovided for. One of the buildings burned down, and the other is still maintained as a children's home and day nursery, doing much good.

A plan is now before the city council, for the disposal of a portion of the city's 6,000 acres of pueblo lands, the proceeds to be devoted to the improvement of roads and the cultivation of the park. Should the plan be consummated, the first steps may be taken to improve the park on a systematic basis.

January 12, 1899, San Diego Union, 5:2. New military post will not be located on city park lands: The Board of Directors of the Chamber of Commerce held a special meeting yesterday morning where it was decided not to recommend the donation to the government of 600 acres of the city park for a twelve-company military post. Resolutions were adopted to that effect. A special committee was appointed. The members of the committee are G. H. Ballou, S. Levi, R. M. Powers, N. H. Conklin, Philip Morse, C. S. Hamilton and D. F. Garrettson.

January 31, 1899, San Diego Union, 3:1. Affairs of the City: A communication was received from the Board of Public Works, asking for an appropriation of \$300 for cultivation of the Howard tract in the city park during February, and for an additional \$1,000 for street repairs. Referred to the joint street committee.

February 14, 1899, San Diego Union, 3:1. Council in Session: The recommendation of the joint street committee was adopted, denying the request of the Board of Public Works for an appropriation of \$300 for the cultivation of the Howard tract in the city park.

February 14, 1899, San Diego Union, 4:3. The Woman's Home: condition of the institution and its needs; the home is on 17th and Ash; there are at present 22 children in the home whose general health is good.

February 21, 1899, San Diego Union, 3:1. Affairs of the City: Residents of Carruther's addition protest against the erection of a water tank on the hill on 8th street, between A and Ash; W. W. Bowers said the idea of letting a corporation build a tank anywhere near objecting property owners was reprehensible. He thought the city park was the place for the tank. In reply to a question from Attorney Shaw, City Attorney Doolittle said the park could not be used by private persons or corporations for any purpose whatever, without being enjoined.

February 21, 1899, San Diego Union, 4:2. EDITORIAL: Proposed Expositions: . . . as said before, there should be only one exposition at the beginning of the new century. If San Francisco's claims should be recognized and the affair could be made thoroughly successful by the cooperation of the entire coast, every effort should be put forth to carry out the project. But the people certainly do not wish another "mid-winter fair," and unless the present plans promise a vast improvement over that undertaking, the quicker they are dropped the better.

March 5, 1899, San Diego Union, 5:2. Left to the City; Dr. John Allyn bequeaths \$3,000 for park improvement, under the direction of the Board of Public Works; will filed in the county clerk's office yesterday.

March 5, 1899, San Diego Union, 5:4. In General: The Pastime Gun club opens the blue rock session today from 9 a.m. to 12 p.m. at the shooting grounds in the park.

March 7, 1899, San Diego Union, 5:3. Affairs of the City, Aldermen and Delegates Meeting Last Night: A request of the Board of Public Works for \$300 for the cultivation of the Howard tract in the city park and the repair of driveways was allowed, after the amount was cut down to \$150.

March 10, 1899, San Diego Union, 5:2. At a meeting of the Board of Public Works yesterday, the Park Superintendent was instructed to cultivate the Howard tract at an expense not to exceed \$150.

March 17, 1899, San Diego Union, 2:1. Chamber of Commerce Directors' Meeting: Discussion of exhibit at Paris Exposition; Director D. F. Garrettson presented chamber with a contour map of the city park which he obtained from the Board of Public Works.

March 21, 1899, San Diego Union, 2:1-2. City Council Meeting, Mayor Reed sends in his annual message: . . . Because the city had previously contracted a bond issue close to the limit allowed by law . . . we must look forward to another term of municipal government without acquiring our much-needed and much-desired city hall, park improvement, boulevards, and general park drainage system which we so fondly hoped to provide during our term of office, and also without a settlement of the all-important issue of municipal ownership of water. . . . A joint resolution was adopted authorizing the Board of Public Works to expend \$150 in cultivating the Howard tract in the city park.

April 1, 1899, San Diego Union, 5:3-4. Profanity of Capps; Revolting Language of the Candidate for Mayor; Professes friendship for E. S. Babcock, but affidavits of reliable citizens prove he is a rank enemy; foul words from his mouth.

April 4, 1899, San Diego Union, 4:2. EDITORIAL: Re-Elect Mayor Reed: San Diegans will not try dangerous experiments with municipal government. They will not elect for mayor a man absolutely untried in municipal affairs, and whose only claim to office is his rabid hatred of a company that has expended hundreds of thousands of dollars in developing water in this county.

April 4, 1899, San Diego Union, 4:2. EDITORIAL: Must not be Kansas-sized. Capps' election means Flume rule. . . . With that corporation in control of the municipality no other water company can enter San Diego and extensive projects now well advanced toward completion must be in abeyance.

April 5, 1899, San Diego Union, 5:1. Capps is elected; chosen mayor by a small majority; the new council.

May 3, 1899, San Diego Union, 5:1-3. City Council Meets; Aldermen and Delegates elect George B. Watson their president; Mayor Capps hands in his message . . . I earnestly solicit your hearty cooperation in the early settlement of this seemingly interminable water question.

With a liberal supply of water, fine drives lined with shade trees, well-sprinkled streets, beautiful lawns and gardens, and last, but not least, parks, will be in evidence throughout the city. These improvements would not only be a source of pleasure and pride to our citizens, but would rebound to our financial benefit by attracting thousands of tourists and invalids from all parts of the world. Many would remain with us and become permanent and desirable citizens. I know of no public work that this city could to better advantage, and more profitably invest public funds than in the construction of handsome parks, in this land of sunshine and congenial climate, all of the semi-tropical, as well as many of the tropical plants will grow in the open air.

I believe it possible to create in this city the finest botanical parks and gardens in the United States. Our 1,400-acre park is a possession that would be the envy of any city in America. I realize that it is impossible for our young city to attempt to plant out so great an area at the present, but if no more than twenty or thirty acres were planted as an nucleus, we could each year make additions as our finances would admit it.

The message then follows with an exhaustive description of what could be accomplished in this direction by impounding the waters of Switzer, Pound and Powder House Canyons, which are now allowed to run to waste down the B street flume, Then the message continues:

The upper dam would be in Switzer canyon, next lower in Powder House, and the lowest in Pound canyon. Along the lower side of the contour ditch, the excavated earth from the ditch would be leveled off to a handsome boulevard, lined on both sides with shade trees, and irrigated from the flowing water in the ditch. Underneath the lower, or Pound canyon lake and the most accessible for our citizens, there will be some thirty or forty acres of land to be planted to beautiful shrubbery plants and vines, and there could also be constructed artificial waterfalls, fountains, rustic bridges, spanning lakes floating full of aquatic plants such as the Egyptian lotus, and all supplied with water under pressure from the lake above; this lake would be about one mile in length and from 100 to 600 feet in width. The water level would be maintained by drawing the water from the two upper (Powder House and Switzer) lakes, as fast as the water is drawn from this lake to irrigate the park. Completing encircling this lake, a fine drive of over a mile in length would be constructed, and both sides planted in shade trees, irrigating themselves from the water in the lake. The surface of the road would be just high enough above the surface of the water in the lake so as to keep moist by capillary attraction. Thus, in brief, I have outlined a plan which I think is perfectly feasible and the whole of which will be entirely inside the limits of our 1,400-acre park, and a nucleus for future expansion.

May 30, 1899, San Diego Union, 2:2. Affairs of the City, Water Company's Supply to be investigated; meeting of aldermen and delegates last night: The report of the joint street committee prohibiting shooting in the parks was adopted and an ordinance covering the matter was adopted. A joint resolution was adopted granting permission to gun clubs, military organizations and the police to shoot at targets in the park.

June 6, 1899, San Diego Union, 2:1. Affairs of the City, Meeting of aldermen and delegates last night: A message was received from the mayor calling attention to an old well in Pound canyon in the city park which is said to be deep and dangerous to life. The Board of Public Works was instructed to place thick planks over the well.

June 20, 1899, San Diego Union, 2:1-2. Affairs of the City, Meeting of aldermen and delegates last night: [The mayor's] recommendation that the street sweepings be removed to Pound canyon to be available as fertilizer in the park, was referred to the street committee. . . . The report of the city lands committee was adopted recommending that the city attorney be instructed to prepare an ordinance setting apart pueblo lot 1337, containing the Torrey pines, as a park. . . . The Board of Public Works was instructed to have an unused well in the city park covered with planks at a cost of not to exceed \$10.

July 1, 1899, San Diego Union, 3:3. Committee of the Council: A recommendation will be made that the city attorney be instructed to bring Ejectment proceedings against persons occupying lands in the city park without permission. . . . A recommendation was also made to the council that the message from the mayor recommending that street sweepings be dumped in the city park be adopted.

July 4, 1899, San Diego Union, 5:1-3. Council in Session: Mayor Capps' proposition to impound water in Pound Canyon meets with favor.

Improving the Park

The following message was received from Mayor Capps

San Diego, Cal., July 3, 1899

To The Honorable Common Council of the City of San Diego, Cal.

Gentlemen: The question of parks is one of great importance to our city, and of the many subjects in which your honorable body should take a deep interest.

I believe the proposition of impounding the flood water of Pound canyon to be the most practicable, and would serve a three-fold purpose, to wit: It would furnish water for a park of twenty-five acres; it would reduce the expense in the rebuilding of the B-street flume, and last, the connecting of this large lake of water with the distributing system to be turned on during a threatened conflagration, would not only save the city from destruction, but would have a tendency to increase confidence in our fire protection and, consequently, reduce insurance rates.

Now, gentlemen, in order to develop a plan and ascertain the approximate cost of making this improvement, I have a request to make of your honorable body, and that is to grant me the service of the city engineer as his force to make the necessary surveys, maps, etc., and I will take pleasure in taking an active part in such work, and will lend my assistance in every way to make a feasible plan to present to your honorable body.

I am informed that Dr. Allyn bequeathed the sum of \$3,000 to be used for park purposes, provided the city or citizens raised a similar amount.

I do not think there is a doubt that this sum could be raised by our citizens, provided a suitable and feasible plan is developed for their inspection.

Hoping that the request will be granted at once, I am

Yours truly,
EDWIN M. CAPPS
Mayor of the City of San Diego

The request was granted by both the aldermen and the delegates without discussion. President Marston of the chamber of commerce and several members of the horticultural society were present, expecting to address the council in advocacy of Mayor Capps' request, but the aldermen and delegates were both so favorable to the proposition that no addresses were made.

The street committee recommended that the mayor's suggestion of street-sweepings be removed to a dumping place in Switzer's canyon be adopted. On motion of Lambert the report was filed.

July 11, 1899, San Diego Union, 5:1. Council in Session: Mayor recommends that seeds of the Torrey pines be planted in city park . . . A message was received from Mayor Capps in which he stated that he visited the Torrey pines section of the county, north of La Jolla last Saturday and found the trees widely scattered and poorly protected, with intervening stretches of grass that might at any time be set on fire, resulting in destruction of the rare trees. The mayor recommended that a quantity of seeds be procured from the trees and planted in a four or five-acre tract of the city park. An appropriation of \$30 to \$35 for this purpose was recommended. On the motion of Douglas Frevert, the matter was referred to the Ways and Means Committee. The aldermen concurred in this matter. . . . The Board of Health was authorized to expend the sum of \$100 in irrigating and cultivating the Howard tract in the city park.

July 21, 1899, San Diego Union, 5:1. Board of Education: Building on Russ grounds.

July 28, 1899, San Diego Union, 6:1-2. Public Library: discussion of site; letter of acceptance and thanks to Mr. Carnegie for his offer of \$50,000 for a library building; Mrs. Horton is rather inclined to the idea that a site in the city park would be best.

July 29, 1899, San Diego Union, 6:1-3. Public Library: some citizens favor a central site, others city park.

July 30, 1899, San Diego Union, 6:3-5. Public Library: women give their views; W. W. Bowers opposes park site. . . . Mrs. A. E. Horton gave her views as follows: . . . Four years ago when I first began to think of this project, the corner of the park between 6th, 7th and 8th streets seemed to me to be an ideal location, and I think so today. The ground is high enough to afford a magnificent view from the windows. The building would be an ornament seen from all quarters. The quiet of the locality is favorable for study.

When our park improvement is finally begun, cars will run to the entrance of Date street, doing away with the inaccessibility now feared.

In Favor of the Park

To **The Union**: This is the time for some courtesy to be extended to the ladies of this city in connection with the selection of a site for the new library. It is owing entirely to the enthusiastic, persistent labor of Mrs. Horton, endorsed by the faithful cooperation of the "Wednesday Club," of which she was the first president, that this splendid donation has been made.

These ladies should be consulted. The matter has been often canvassed by members of the Wednesday club, who desire to make the spot where the library is located the most attractive in the city.

The many visitors who come here ask, "Where are your parks?" "Where your trees and luxuriant foliage and greenery and flowers, we were prepared to see?" At present one can only explain in an apologetic manner, that the season has been dry, that the one little park that was a spot of beauty ten years ago, has been sacrificed for a public plaza and band stand. Even the fine old trees that were once in the courthouse yard had to give way to some fancied improvement.

It is true we have a park of hundreds of acres, unimproved and uncultivated. It is on such a large scale that we cannot hope to see it the thing of beauty intended in our generation. Why not take the nearest corner of the park, bounded by 6th and Cedar streets, and have one block set off for the library building?

The elevation will make it a sightly spot from all parts of the city and bay. Every person entering this city by steamer or railway can see it. Let us have a one-story mission building with a tower, after the style of the Leland Stanford university. Something picturesque and characteristic of the country. Let us adorn the land with all manner of tropical plants and trees, and vines over the building. Liberal donations of plants from citizens would be gladly made.

Let us have it where there will be quiet and peace and sunshine and view. When San Diego grows to its full size, this will be in the very heart of the city, and near enough for all who need the library, only one block from the cars on 5th street.

San Diego is quite devoid of handsome public buildings, let us make this such a beautiful spot, we can point to it with pride and enjoy it with our friends.

We not only want a handsome library building, but we want it set in a frame of green on an elevation where it can be seen, and in a place where the student can pursue his investigations without being distracted by the noise and bustle of commerce, and the artistic taste can be cultivated by the peaceful atmosphere and beautiful surroundings as well as the brain be nourished by the volumes in the library. Now is the time for the ladies of this city to take the matter in hand and by their advice and influence secure a whole block for this building. Let it represent the taste and culture of San Diego's ladies as well as their perseverance and success.

Mrs. W. H. Bailhache

"Clattered About Parks"

To **The Union**: . . . I am tired about this eternal clatter about parks. There is probably no city, big or little, in the United States so park-cursed as San Diego is with its huge 1,400-acre scab, a miserable unsightly desert, a stricture upon the growth of the city, one of the greatest drawbacks San Diego has, but it is as sacred as a white elephant, and appears to be consecrated to disuse for all time.

I think there is just one thing this city should consider in connection with Mr. Carnegie's offer to build a library, and it should be considered and decided quickly --- the parks can wait. It would be the height of

stupidity to purchase a block of land in the business center of the city, where the library should be located, to make a park, and if such a thing is insisted upon, we will get no library building. . . .

Will this city act in a business way and promptly act in this matter and secure the library, or will its prominent citizens continue to maunder about trees and parks and grass, and let the library drop out of sight.

W. W. Bowers

July 31, 1899, San Diego Union, 6:3-4. Mayor Capps favors plaza as site for library.

August 1, 1899, San Diego Union, 6:1-4. City Park as library site seems impracticable; letter from Mrs. Jojn C. Smith: Undoubtedly a fine library building would add picturesqueness to a somewhat arid landscape, and it might be well for the city to erect a building on the park site for tourists to gaze upon, it could be used for picnic purposes. . . . The library should be in the center of town accessible to all.

August 1, 1899, San Diego Union, 6:4. Letter from H. Sweeney in opposition to a library in the park: During the last six years, while the undersigned had the honor of being a member of the city council, more than one proposition was formulated to donate or use a portion of the city park for public purposes other than strictly park purposes. Twice within my recollection these propositions were worked to a finish --- which was that we cannot use one foot of ground in the city park for any outside purpose without first obtaining an act from the state legislature allowing it. It is some 18 months before the legislature meets again. We surely do not want to wait that long to obtain a site for a public library building in the city park. Ergo exit city park.

August 1, 1899, San Diego Union, 6. Letter from Judge W. T. M'Nealy: . . . I am almost opposed to the city parting with any of the park. There is plenty of room without it for all other purposes, and we hope that we will not only need it all someday, but be able to improve it. . . .

August 1, 1899, San Diego Union, 6. Letter from Joseph Kinder . . . If the park theory is to be adopted why not get a corner 100x100 feet, then put up an artist building 75 x 75 feet, three stories high, with a margin on the two sides next to the streets of 25 feet, where could at all times be seen the beautiful grass, with the accompanying sign, "Keep off." . . .

August 1, 1899, San Diego Union, 6. Letter from E. S. Sutton, M. D., visitor . . . The suggestions of Mrs. Horton and Mrs. Bailhache seem to me exactly to meet these needs [of finding a place where one can go and enjoy himself out of doors]. You have grounds for a city park, running down to within six or seven blocks of the business center, and within one block of the electric railroad. Fortunately, this ground is an elevated spot, furnishing a magnificent view of the bay and harbor and the city, sloping down to the water; the mountains to the east; and to the south the beautiful fruit-growing suburb of Chula Vista, spreading out its orange and lemon groves down to the Mexican line. . . .

August 2, 1899, San Diego Union, 4:1. EDITORIAL: The Library Site: . . . Obviously then, the city must do the best it can with the means that are quickly available.

August 4, 1899, San Diego Union, 4:1. EDITORIAL: A Library Suggestion . . . If a children's reading room in the Milwaukee public library has proved so useful there is no reason why a like arrangement in San Diego's new library should not be equally valuable.

August 5, 1899, San Diego Union, 4:1-2. EDITORIAL: The Practical Plan . . . **The Union** is not advocating any particular site. But this paper believes that with the proceeds of the sale of the city's 5th street property, there should be no trouble in obtaining a library location that shall at least not be unworthy of the building.

August 5, 1899, San Diego Union, 5:2. Chamber of Commerce favors corner of 7th and C as a library site.

August 7, 1899, San Diego Union, 4:1-2. EDITORIAL: A Downtown Location . . . A fine library on the higher ground of the city would certainly be a sightly object, but it would not be patronized so generally as would one situated down closer to the streets, which everybody traverses. . . .

August 7, 1899, San Diego Union, 6:4. Council to discuss library sites tonight

August 8, 1899, San Diego Union, 8:2. Down to one of two sites; south half of Block 47 and the Witherby corner

August 11, 1899, San Diego Union, 5:3. No site yet selected . . . telegram from George W. Marston, in New York: Will give \$2,000 towards whole block on 8th, 9th, D and E, or any block bounded by 5th, 9th, B and E. Nothing for half block, City can handle half block purchase alone.

August 13, 1899, San Diego Union, 5:2. Trustees may secure a block for library site; trustees may yet secure one; one citizen offers to give \$5,000 toward it.

August 16, 1899, San Diego Union, 8:2. Trustees proceeding slowly on choice of library site; the Tower house block bounded by 3rd, 4th, F and G streets considered likely.

August 18, 1899, San Diego Union, 6:1. Proposed sites

August 19, 1899, San Diego Union, 3:3. Library site has not been selected.

August 21, 1899, San Diego Union, 3:1. Switzer's kind offer; library four miles out; advantages of having the building out of town

August 21, 1899, San Diego Union, 5:1. Choice is between Nesmith Block and 4 and A.

August 23, 1899, San Diego Union, 6:2. Southern California Mountain Water Company (E. S. Babcock, president) will ask Council Monday night for authority to construct a reservoir in the city park near the Russ High School Building, near the end of 12th or 13 street.

August 23, 1899, San Diego Union, 6:3-4. More library location comment.

August 25, 1899, San Diego Union, 6:1-2. Views on library site.

August 27, 1899, San Diego Union, 2:2. Russ Annex being painted inside and out; will be ready for use by Saturday of this week; old assembly rooms in main building divided into two classrooms; four new teachers in high school.

August 29, 1899, San Diego Union, 5:1. More discussion on library site; Members of the library trustees are Judge E. W. Hendrick, Philip Morse, Frederick W. Stearns, and James W. Somers; Letter from Lydia Horton: . . . When the corner of the park on 6th and Date streets was suggested as a location the great cry was made that it was so far from the center of the city, conceded to be the corner of 5th and D streets, so far as business is concerned, the voting center between E and F streets. . . . Balancing these two locations against each other, the park location is far preferable for beauty of site. It is one block from the car line, which is better for quiet study. The Nesmith block, on 9th and G streets, requires an outlay of from \$10,000 to \$22,000 (report gives both figures). While the park site is free and can be used by the city for its own buildings. Both sites are equally remote from the business center. ; Letter from G. P. Hall . . . The center of resident population, as it now is, is figured out to be at 6th and F, which brings it down from the hill top and approaches the H street location

August 31, 1899, San Diego Union, 3:1-4. **The Union** says vote on library site.

September 1, 1899, San Diego Union, 3:1-6. Voting on library site.

September 1, 1899, San Diego Union, 6:1-2. Park improvement discussed at monthly open meeting of Chamber of Commerce; large attendance; Kate Sessions reads paper; Mayor Capps outlines plan for storing water; C. S. Hamilton makes remarks.

There was a larger attendance at the meeting held in the Y.M.C.A. auditorium last night under the auspices of the chamber of commerce for the discussion of the park improvement question than at any of the previous meetings of a similar character. It is a pretty good indication that the interest in the meetings is increasing and that they are accomplishing the purpose for which they were planned, namely the arousing of interest in matters of public improvement.

Secretary H. P. Wood of the chamber of commerce presided at last night's meeting in the absence of President Marston and Vice President Bailou. The remarks of C. S. Hamilton, who was the first speaker and who told of the efforts which so far have been made toward park improvement, were very interesting and gave a bit of past history to many who are not now old residents of San Diego. An unusually excellent paper on park improvement was read by Kate Sessions. She told of how the desert could be made to bloom as the rose. Mayor Capps read an interesting paper giving his plan for the improvement of about 35 acres in the city park by building dams across three canyons and making artificial lakes.

C. S. Hamilton, in his remarks, first told of the effort made in 1886 to build a boulevard to Old Town on the bay shore. The moisture from the bay it was thought would keep the road damp and there would therefore be no dust and chuckholes. The plans were not completed before another council took office, and the new body abandoned the project. Mr. Hamilton then spoke of the main roads entering the city. He said that it was his idea that the principal roads leading to the back country should be kept in good condition. The minor roads could be sacrificed, if need be, for the main ones. The speaker then told of the reservation of the park lands over thirty years ago. After a large amount of land had been sold in the section, the city trustees decided to sell no more, and had the legislature pass an act reserving 1,400 acres for a city park. From that time to this, there have been numerous efforts to subdivide the park, but all have failed.

The New Town park was spoken of. This block was formerly the Spanish plaza and was set apart in 1886 for a park. The work of the Woman's Association, which laid out that portion of the park north of 6th street, was touched upon, and also the park charities, on which \$100,000 was spent by the late Judge Witherby and Bryant Howard. The Howard tract was laid out by these parties. Mr. Hamilton praised Mr. and Mrs. Howard for what they had done. Mr. Hamilton then gave his idea as to the manner in which the park should be improved. He said it should be done gradually at the rate of \$5,000 or \$6,000 a year, and in that way the appropriations would not be missed. He was opposed to bonding the city, believing that the money which would be paid for interest would be sufficient to help the work along.

Miss Sessions' paper was listened to with marked attention. She said that San Diego is so unique in her geographical position, so beautifully set on the hill slopes above the sea, and so individual in her climate, that the people need to be educated to the fact and keep it constantly in mind that this park must not be like any other park in the United States.

"We can grow a magnificent collection of palms that shall make one realize the beauty of a tropical growth," she said. "We can arrange bamboo in groves and clumps that cannot be excelled in famous Japan. We can train vines over arbors and hillsides that will cover acres and be a marvel of growth and brilliant coloring. We can grow cacti from the deserts of California, Arizona and Mexico that will flourish and bloom and be of more interest to all travelers than almost any other order of plants. We cannot see these possibilities and results elsewhere for they have not been accomplished for several good reasons.

"Imagine a broad driveway one to two miles long bordered on both sides with a double row of palms, like the largest date palm in the court of Hotel del Coronado. The plant is only 12 years old, yet its spread is 40 feet from tip to tip, and its glorious crown of feathery vigorous greenness is magnificent and superb. Let us turn and admire those two fine cocos plumosas in the court, now 40 to 50 feet high. Along some broad path, rows of this variety of palm would make the landscape a close second to many of the celebrated palm avenues of the tropics.

“Select one of those sun-beaten, rocky south slopes leading down to a canyon, blow out with dynamite half a dozen holes, put in good soil and plant bougainvillea in the month of June. The pelting sun will start every cell into action, the great strong shoots will burst forth and revel in growth and vigor, and in three years they will have spread themselves over the hillsides and to the very top, a solid mass of oriental and extravagant coloring, gorgeous and artistic against the surrounding grayness.

“On the south slope a collection of a variety of eucalyptus trees would flourish. On the mesa a low rambling arbor, covered with palm leaves, would give inviting shelter and resting place. Hedges of pepper trees as a windbreak could give an ideal ferny background for a mass of poinsettias that might be acres in extent. On some gentle eastern slope to receive the first rays of the morning sun, the California poppy would grow to the exclusion of even the weeds. If we had but \$1,000 a year to spend the money would be building a part of the grand whole, and not paying for work that in the future might be changed.”

Mayor Capps then read a paper outlining a plan for the improvement of a tract of about 35 acres of the park. His idea is to confine the flood waters of Switzer, Powder House and Pound canyons, connecting them with ditches in the form of a chain, and allowing the water to flow from the lake in Switzer canyon to that in Powder House canyon and then this water to flow into the lake in Pound canyon, making a park under each one of these lakes. Mr. Capps confined his remarks last night to the proposed work in Pound canyon.

It is proposed to construct a dam 30 feet high across the canyon to catch the winter rains. Several tables were given showing the amount of the rainfall and the amount of water that might be impounded. Mr. Capps said that his idea of the true design for a park is to copy wild nature as nearly as possible, all set designs should be excluded. As the water would be under pressure, waterfalls, fountains, springs and geysers could be made. There could be a running stream between two lakes, with rustic bridges across the stream. Clumps of tropical and semi-tropical trees and plants could be scattered here and there, interspersed with wild flowers and shrubs of this country: fill in the interstices with glades and glens of blue grass neatly trimmed, place in the shady nooks and dells lounging rustic seats and benches, and construct winding, strolling paths and carriage roads.

At the conclusion of Mayor Capps' paper, R. H. Young moved that the chairman appoint a committee of five to prepare a memorial and present the same to the common council, the memorial to embody the plans of park improvement so set forth in the several papers presented to the meeting, also to urge as speedy action as possible. The resolution was adopted, and D. F. Garetson, Miss Kate Sessions, C. S. Hamilton, Capt. Maize, R. H. Young were appointed to the committee.

September 1, 1899, San Diego Union, 6:3. Water Committee discusses reservoir in city park; members favor granting the permission; President Babcock of the Southern California Mountain Water Co. to be invited to meeting with the Committee Tuesday night. . . . City Attorney Doolittle said, “I think it is doubtful we have the right [to allow a reservoir to be constructed in the city park]. If the reservoir was built by the city there would be no question about the right.”

“Have we the right to lease any part of the park?,” asked Delegate Thorp.

“Some time ago,” answered Attorney Doolittle, “the San Diego Water Co. showed a contract granted to it in 1873 or 1874 by the city trustees, giving the company the right to dig a well and erect buildings in the park, in return for a supply of water. That contract is still in force. A contract has also been made with Miss Sessions, giving her a portion of the park for horticultural purposes, but there has always been a question whether the contract was legal.”

“We should go a long way to help build a reservoir in order to get more and cheaper water,” remarked Delegate Ecker.

“Possibly, with the assistance of the legislature, the city could give permission to build a reservoir in the park,” said Attorney Doolittle.

September 2, 1899, San Diego Union, 3:1-6. New site proposed for library; the Gay block at A and B, 7th and 8th is favored; opinions expressed in coupons; Letter from Mrs. H. A. O. Pearson favoring Nesmith Block on H street.

September 3, 1899, San Diego Union, 1:1-2. Library Trustees select site on the Gay block near the B-street schoolhouse

September 4, 1899, San Diego Union, 2:1-2. Friends of Nesmith Block enter protest; will appear before the council tomorrow night; Colonel John Kastle expresses his views on the subject: How the three trustees can undertake to set up their judgment against all of their fellow citizens is something astounding.

September 4, 1899, San Diego Union, 7:1-3. Miss Sessions offers suggestions for beautifying the park (same as San Diego Weekly Union, September 7, 1899).

September 6, 1899, San Diego Union, 5:1-2. City Council in Session: Judge Hendricks reviews action of library trustees in selecting a site for library building; park reservoir idea discussed . . . Delegate Denton introduced a resolution setting aside a portion of the city park at 6th and Date streets, 300 feet square, as a site for a library building. On motion it was referred to the library committee. . . . The joint water committee submitted a report recommending that the Southern California Mountain Water Company be granted permission to construct a reservoir in the city park. The reading of the report was followed by the reading of a communication received by the city clerk yesterday from the Southern California Mountain Water Company stating that as the city attorney had given it as his opinion that if the reservoir were erected in the park any citizen could enjoin the Company from going ahead with its work, the Company desired to withdraw its petition, and ask for permission to construct a reservoir on ground leased to it. The communication asked that prejudice be not allowed to prevent the construction of the reservoir. The letter was filed. . . . The city attorney was instructed to prepare a resolution allowing squatters on the city park until January 1 next to leave the premises.

September 7, 1899, San Diego Weekly Union, 5:1-2. Beautifying the Park, Suggestions from Miss Sessions.

At the public meeting held last Thursday evening under the auspices of the chamber of commerce, the following interesting and highly instructive paper on "Park Improvement" was read by Miss Kate O. Sessions:

San Diego is so unique in her geographical position, so beautifully set on the hill slopes above the sea, and so individual in her climate, that we all need to be educated to the fact and keep it constantly in mind that this park of ours must not be like any other park in the United States. It can be different and individual because it is possible to be so, and it is not possible for others to pattern after it. We can grow a magnificent collection of palms that will make one realize the beauty of a tropical growth; we can arrange bamboo in groves and clumps that cannot be excelled in famous Japan; we can train vines over arbors and hillsides that will cover acres and be a marvel of growth and brilliant coloring; we can group cacti from the deserts of California, Arizona and Mexico that will flourish and bloom and be of more interest to travelers than almost any other order of plants, for the cactus is a native of the Americas only, and it is always full of interest to intelligent and admiring lovers from abroad.

We cannot see these possibilities and results elsewhere, for they have not been accomplished for several good reasons, but we can go about our city and see such specimens of growth of three, five, ten and fifteen years that give ample proof that such a palm or tree or vine can be duplicated by the hundreds and grow well. Go into the court of Hotel del Coronado, stand beneath that large date palm, the ornamental date (the Phoenix Canariensis) now only twelve years of age. You can just reach its lowest leaves, its spread is forty feet from tip to tip, and its glorious crown of feathery, vigorous greenness is magnificent and superb. If there is leisure to all beneath the airy shade, the twirling leaflets will fill your ear with music. Imagine a broad driveway, one to two miles long, bordered on both sides with a double row of just such sized palms and a path beneath.

When ten more years are added to the life of such a stately row of monarchs, their trunks will be taller, they will look more slender, and a veritable colonnade crowned with the same magnificent foliage will each year

grow more beautiful and grander, and during all these years, the interesting line of mountains to the north and south, the indescribable blue of the ocean to the west, the sunny skies and balmy air overhead remain the same. Do you think many travelers would forget such a boulevard? Let us turn and admire two *cocos plumosas* in the court. While the grand *Phoenix Canariensis* has been growing to its present breadth and height, the graceful, plume-crowned *cocos* has grown forty to fifty feet high. Its smooth, hard trunk is only eighteen inches in diameter. Along some broad path, rows of this variety of palm would make the landscape a close second to the celebrated palm avenues of the tropics. One such avenue at Rio de Janeiro is of the *cocos plumosas*, although the royal palm, the *Orodoxa regia*, is the one generally seen in the tropics; it will not grow well here, though there are a few alive about the city.

Select one of those sun-beaten, rocky south slopes of the park leading down to a canyon, apparently worthless for a garden, mark a half dozen spots for planting, blow out with dynamite the surface, and fill with cracks and fissures the bottom of the holes, so the water can percolate; put in good soil and plant *bougainvillea* in the month of June. The pelting sun will start everything into action, the great, strong shoots will burst forth and revel in growth and vigor, and in three years they will have spread themselves over the hillside and to the very top --- a solid mass of oriental and extravagant coloring, gorgeous and artistic against the surround grayness, and harmonious in the absence of any scarlet or pink from other flowers in mass. Such a covered hillside would need so very little care; a watering once a month in the summer at the roots of the vines only, would be sufficient.

On the slope opposite with a north exposure, where the soil is always more fertile, a collection of a variety of eucalyptus trees would flourish, On the mesa, where some little canyon runs out and a fine view is unobstructed, a low, rambling arbor covered with palm leaves would give inviting shelter and resting place. Over this grow the bright orange-covered *Bigonia* that blossoms so freely during the winter months. At one end of the arbor let a few trees be grouped and the vines would fairly revel in festooning themselves from arbor to tree and onto other trees. Hedges of pepper trees as a windbreak would give an ideal ferny background for a mass of sheltered poinsettias that might be acres in extent. On some gentle eastern slope, to receive the first rays of the morning sun, the California poppy would grow to the exclusion of even the weeds, a golden field that the children and the tourists could feast upon through almost the entire year.

The vine that has covered my little building on Fifth and C streets for several years, has a great deal of merit. It is a perennial morning glory from Chili, and it loves to spread itself over the ground and run down a slope. On some projecting mesa near the edge a few plants could be set and then by cultivating just the small area where the roots where, the whole hillside below during the summer months would rapidly be covered with a greenness that would be as effective at a distance as a lawn. During the cooler months of winter the vine would be somewhat shabby, but never wholly devoid of greenness, and when the spring's warm sun fell upon the dormant rope-like stems, fresh foliage would burst forth at every joint. Heat and dryness, and a very little water will accomplish a great deal with this plant.

It is unnecessary to try to picture more possibilities to your imagination. These few suggestions are quite sufficient, I hope, to bring out the idea that we do not need to have all the drives and paths bordered with well-kept lawns or made brilliant with conventional beds of bright foliage plants, as beautiful, more brilliant, interesting and unique can be the planting under the guidance of a skillful landscape architect. The flora of South Africa, Australia, and Mexico offer to use the greatest variety of interesting and new exotica and plants that are but little known in cultivation throughout the United States, except to the intelligent botanist.

Central park of New York was remodeled by America's greatest landscape architect, Frederick Law Olmsted, but at the time that it was done, about fifty years ago, New York was already a large and wealthy city, and had learned to appreciate how to work correctly. Boston has during the past fifteen years completed a grand new park system under the same most careful and experienced architect, but she, too, was a city of culture and wealth, and had a century's experience and wisdom behind her. We see how these older cities have been doing their best park work of late years that is showing itself today and commanding the admiration of the public. It is not necessary for San Diego to begin at the foot of the ladder and experiment and lose time and money as older cities have done in the past. We know how the best work is being done, and we ought to begin our work on the same plane of intelligence that Boston, Detroit, Chicago and other cities are working on today.

The landscape architect is considered by many the greatest of all artists, and yet such an artist is available within our means. With the very best plan adapted to this individual locality in our minds, every clod that is turned, every cobble that is moved, every path that is made, every tree that is planted will be permanently located. If we had but \$1,000 a year to spend, that money would be building a part of the grand whole, and not paying for work that in the future might be changed. It would be to our credit to work in this way and show that we appreciate what a park means, and that we will be glad to see the next generation go on with the good work we have begun. We can work just as fast as our means will allow and know that we are working economically, because safely. Such plans are not at hand, but an opportunity for someone to establish a beautiful memorial by giving such plans, with the privilege of naming the park, is at hand, and the honor of furnishing the plans for this park is certainly enviable.

Professor Sargent of the Arnold Arboretum of Cambridge, Mass., has said that a park here in this remote and exceptional locality is a botanical necessity for the United States. That beautiful memorial, the wonderful collection of glass flowers given to Harvard university, shows that there are those who appreciate such donations to science, and are thankful for the opportunity to give. Such plans would probably cost \$10,000 to \$15,000, depending upon the details of the work. We may not be favored with a gift of plans, but we can provide them ourselves by earnest effort and united action. A meeting can be called in the same spirit of this one, its object to devise the best ways and means to provide the best plan for our park.

A plan by the best landscape architect in the United States in hand before work is begun has been my fondest hope for this park. I have had the best opportunities to cherish this hope, for my bread and butter has been earned on her fertile mesa by hard labor during the past seven years. Daily I have hoed the soil, gathered the cobbles, given water to the dry and thirsty land, and walked miles among the beauty and fragrance that has responded to my care. The northwest corner of the park has been the birthplace and the nursery of a large part of the beauty that now surrounds many a home in this city in the form of climbing vines, waving palms, blossoming shrubs and fragrant roses.

The landscape architect who would undertake a plan for our park, would of necessity be obliged to reside here while he worked; he would need to see and feel the beauty of situation, study the peculiarity of climate, and learn to know the possibilities of growth by comparison with that growing throughout California.

I cannot help but feel sure that every dollar spent in park work by the city or by any individual would be the very best investment of money. In the next ten years we cannot expect to erect buildings to compare with those of the other cities, but we can accomplish most gratifying results in park work.

Being a California, I could not realize what a wealth of floral beauty we commanded in California until I went to Chicago in 1893. The variety of trees in her parks was very small, and the vines about the finest residences were confined to less than six sorts. Not a good rosebush did I see in the miles of driving about the city, and the one date palm in a tub on the lawn of the Potter Palmer residence, was a forlorn specimen indeed. I know, of course, that Chicago has a very severe climate on plants, but it proved to me conclusively that California deserves all the praise that she received for her luxuriant and varied flora, and along this line the municipal improvement should work stronger and more generously.

September 8, 1899, San Diego Union, 5:1-2. Plenty of business for Library Committee.

September 9, 1899, San Diego Union, 8:3. Protests against Gay block; Carnegie's agent heard from

September 11, 1899, San Diego Union, 6:1. Fighting in Stingaree.

September 13, 1899, San Diego Union, 4:2. EDITORIAL: Dreyfus and the Exposition

September 13, 1899, San Diego Union, 5:1. Library Committee will meet tomorrow night.

September 14, 1899, San Diego Union, 6:1. Advocates of Nesmith Block will work in the interest of Banks' Block.

September 15, 1899, San Diego Union, 6:3. Banks' property on 10th street to be offered to city in exchange for a half-lot owned by the city or with proceeds from the sale of the half-lot, which amounts to the same thing.

September 16, 1899, San Diego Union, 8:2. F. S. Banks site, bounded by E and F, 10th and 11th streets, favored; Councilmen give their views; apparent likelihood that Bank's offer will be accepted.

September 17, 1899, San Diego Union, 3:1-3. New site offered; a half block on H street; the offer originates with the former advocates of the Nesmith Block and will be offered free of cost.

September 19, 1899, San Diego Union, 6:4. Hendrick's plain talk; the trustees have done their duty; now let the people, do theirs, he says.

September 19, 1899, San Diego Union, 6:4. Library site question remains unchanged.

September 21, 1899, San Diego Union, 6:2. Library committee will consider proposed sites.

September 24, 1899, San Diego Union. George W. Marston returns from an eastern trip.

September 26, 1899, San Diego Union, 5:2. The City Council - library and other matters: A joint resolution was adopted allowing squatters in the city park until January 1 next to remove and the city attorney was instructed to notify them of the council's action.

October 4, 1899, San Diego Union, 6:1-3. New site selected, the Hazzard half block; library trustees decide to locate the Carnegie building there; can be had for \$11,000 or \$1,000 and the city's half lot; site is bounded by E, 8th and 9th street and has a frontage of 200 feet on E street and 150 feet each on 8th and 9th streets; George W. Marston advocated the purchase of the entire Hazard block by an issuance of bonds by the city.

October 7, 1899, San Diego Union, 5:1. Library matters; special meeting of council; ordinance adopted providing for sale of the south half of lot C in block 35 of Horton's addition; advocates of Nesmith Block appear and offer whole block for the City's half lot.

November 7, 1899, San Diego Union, 6:2-4. City Council in busy session; Ralph Granger's offer of \$8,300 for the city's half lot is rejected; to be sold again; railroad franchise is granted to the Chamber of Commerce committee; D. C. Collier offers \$9,000 for the half lot.

November 22, 1899, San Diego Union, 4:1-2. EDITORIAL: The Mayor's Veto of a common council resolution taking the decision of an inferior tribunal invalidating the water bonds to the supreme court; San Diego must settle this water question sooner or later. Substantial progress has been made in that direction since the city voted the bonds in 1896. All that now remains is to get the ruling of the court of last resort.

December 12, 1899, San Diego Union, 6:1-2. Library site matter settled; aldermen and delegates unanimously approve the selection of the Hazzard half block on E street; communications relating to the other proposed sites returned to the senders. . . . The petition of La Jolla residents to have La Jolla park included in the pound limits was granted.

November 6, 1902, San Diego Union. "A PRACTICAL USE OF A PARK" by Mary B. Coulston: Means of familiarizing the young with a study of botany; A park is not primarily a place for instruction, but rather a tract of natural landscape, improved and beautified, for enjoyment and recreation. A Botanic garden, good as this it in itself, is not a park. But if a park is, first of all, a public pleasure ground, planted with a view to beautiful effects and convenient use, instruction may properly be a feature made to contribute to its greater usefulness.

November 25, 1902, San Diego Union, 4:1. REPORT ON PARK IMPROVEMENT; MR. MARSTON TELLS MORE OF THE TRIP HE MADE TO NEW YORK AND OF MAN HE SECURED TO MAKE THE PLANS.

November 27, 1902, San Diego Union, 5:2 "DEVELOPMENT OF PARK SYSTEMS" by Mary B. Coulston: City parks improved within recent years; the experience of other cities may serve as useful examples in park making at this time. A well-planned park includes besides its own area, well-designed approaches and outlying boulevards. San Diego has natural advantages and possibilities that lose nothing in comparison with any of the cities names.

December 12, 1902, San Diego Union. MR. MARSTON'S VIEW ON THE BOND ISSUE.: It goes without saying that any additions to the safety, convenience, comfort or beauty of the city will be greatly enjoyed by ourselves, and that sensible people should provide all such benefits they can afford to. But there is another phase of the matter. One of the great resources of a Southern California town is its attractiveness. It is the best sort of business investment to make a town wholesome and beautiful. There's literally millions in it.

December 22, 1902, San Diego Sun. (Excerpt). SAMUEL PARSONS, JR., HIS FIRST IMPRESSIONS OF SAN DIEGO'S GREAT PARK.

December 22, 1902, San Diego Union. ARCHITECT PARSONS HAS ARRIVED.

December 23, 1902, San Diego Union, 3:1-2. MR. PARSONS PLEASED WITH PARK SITE: spent entire day upon the ground; tells of difficulties he will have to overcome; the principle, you see, I must follow in my work, is that I must in no way destroy the general harmony of the park.

December 24, 1902, San Diego Union, MR. PARSONS HAS BUCKLED DOWN TO WORK: The lower part of the park is the place for amusements and buildings.

December 24, 1902, San Diego Union. A WORD ABOUT SAMUEL PARSONS, JR. by THOS. COGSWELL, DDS

December 25, 1902, San Diego Union, 6:2. MORE ON SUBJECT OF PARKS by G. P. HALL.

1904

January 1, 1904, San Diego Union, 6:5. Special meeting yesterday of Park Improvement Committee; Cooke present; road and park map of southwestern portion of park modified; work suspended until decision is reached; Sixth Street corner rounded off; roadbed to be established and ready for oiling.

January 1, 1904, San Diego Union, 32:1-5, Laying Out 1400-Acre Park; Much Preliminary Work Accomplished the Past Year; Grading Now Underway; Trees Growing Rapidly:

On account of the establishment of a park of 1400 acres in San Diego in 1868, the park events of succeeding years, and the beginnings of the present plan for development appeared in the **Union** of January 1st, 1902. Throughout the past year hearty interest and steady effort have been maintained in the work in hand, it being the object to formulate the soundest possible plan to be carried out in the best possible manner. The work undertaken by the Park Improvement committee of the chamber of commerce in the development of the park area is, at this stage, necessarily fundamental in character, and quite lacking in ornamental or sensational effects. The year has, however, not been uneventful in the forwarding of practical matters, and the impulse of this preliminary work will be yet more effective in the coming year.

PLANS OUTLINED

During the visit of Landscape Architect Samuel Parsons, Jr., a year ago, the general method of treatment was outlined and decided upon. The need of carrying on the business of the park in a systematic, organized way, was met early in January by fitting up room 7 in the Sefton block for the office of the committee, and engaging Mrs. M. B. Coulston as secretary. Among the records of this office are the minutes of committee meetings and secretary's reports, which give a running account of matters affecting the park work in various ways. From these records it appears that the members of the Park Improvement committee for the current year were appointed by President W. L. Frevert of the chamber of commerce on January 17th and consisted of Messrs. W. L. Frevert, T. S. Brandegee, D. F. Garrettson, Captain W. H. Maize, Miss K. O. Sessions, and Miss Ada Smith. Later in the year, on the return of Julius Wangenheim to San Diego, Mr. Wangenheim resumed his place on the committee by the special request of its members, and in order to have the membership more representative of different sections of the city, L. A. Wright and J. F. Schwartz were selected. A Parks Plans and Construction committee was appointed by President Frevert, this body having executive power, with George W. Marston, chairman, the other members being E. E. White, T. S. Brandegee, and Miss Sessions. The Finance committee consists of W. R. Maize, D. F. Garrettson, Julius Wangenheim and Miss Ada Smith, Mr. Garrettson being treasurer.

SURVEY MADE

A contour map of the park being needed on which to base the road and planting plans, the chamber of commerce authorized Mr. Marston to petition the board of public works for the appointment of city surveyors to make a survey of the park. The board of public works, Mayor F. P. Frary, the council, and the city engineer gave friendly support to this measure, and the survey of the park was begun on January 31st. It soon became evident that the survey of the entire tract would require more time than was at first estimated, and to insure its completion at as early a date as possible, J. B. Lippincott, chief surveyor of the United States geographic survey, was asked to recommend a competent man to complete the work on the plane-table method. Mr. Lippincott's staff was engaged to conduct the survey of about one thousand acres of the entire area at the expense of the Park Improvement committee. Mr. Hyde was assisted by two surveyors provided by the city, and completed his last map on June 11th. The contour lines were run at intervals of five feet on the west side of the park and ten feet on the east side.

As soon as sections of the contour map were finished they were sent to the Landscape Architects, Samuel Parsons & Co., New York. The map of roads and paths for the southwest section of the park, from Date to Juniper streets, west to Pound canyon, was received from the landscape architects by the committee on May 25th. Upon presentation to the Board of Public Works, the road and path plan was accepted, it being provided

that the landscape architects make such changes as seemed desirable to them. A copy was filed in the office of the City Engineer. This map was publicly displayed for a week, arousing a great deal of attention and interest from citizens generally, and being highly commented upon by the local press. Other road maps followed, and on July 24th Mr. George Cooke, of the firm of Samuel Parsons & Co., arrived in San Diego to test the proposed roads on the ground and do practical improvement work. Mr. Cooke brought with him the completed plans for roadways and footpaths, these having been prepared in New York from the contour maps. He at once set to work to fit the plans to the grounds, placing the stakes in accordance with grades, points of view, etc., and making such changes as seemed desirable. The section from Date to Fir street, facing the west boundary of the park, was the first point of attack. In years past many thousand cubic yards of earth had been dug from this corner and used for filling in streets. The hillside and bottom lands were greatly scarred and defaced by unsightly cuts and excavations, a series of steep cliffs and deep holes covering seven acres or more. The top soil had been removed from a large area along the bottom of the slope, leaving a rough surface of hardpan here, as at the other points where soil had been dug and carted away. A heavy road plow with six horses was useful for removing the topsoil from but a small portion of all this corner. Drilling and blasting were necessary to break down the precipitous cliffs and to even up the rough surface generally. One hundred and fifty kegs of powder were used. The dislodged sandstone was then broken with hammers, plowed and brought into easy grades by the use of Fresno scrapers. This grading was carried on during Mr. Cooke's stay of five weeks, and continued nearly two weeks after his return to New York, leaving the tract from Elm street southward in good park slopes.

ENTRANCES DECIDED UPON

The entrance for this part of the park, originally designed by the corner at Sixth and Date, was changed by Mr. Cooke to Eighth and Date streets on account of the better grade at that location, the plan being submitted to Mr. Parsons and approved by him. Other entrances decided upon for the south side were those at Eleventh, Twelfth, Eighteenth and Twenty-fifth streets, and at the southeast corner. On the west side entrances will be provided at Kalmia, Quince and Upas streets. The landscape architects' plan also shows entrances at suitable points on the north and east sides of the park. The roads and paths staked on the west side of the park were cleared of native shrubs preparatory to grading next winter. The roadways proposed for the entire park were carefully staked for future convenience. During Mr. Cooke's stay he saw the native trees at Lakeside, El Monte, and at several notable ranches in El Cajon valley. He also visited Miramar, being greatly interested in the tree experiments of that ranch, Point Loma, Coronado Botanic Garden, the court of the Hotel del Coronado, Coronado parks, La Jolla and conferred with the chief of the water department and members of the Golden Hill club. Mr. Cooke left for New York on the 27th of August, to return the first of the year to finish the grading begun this summer; plant the west side of the park; and grade the principal roads.

In March, a letter was addressed to Professor Gifford Pinchot, forester of the United States bureau of forestry, inviting him to visit San Diego while in California during the summer. Professor Pinchot responded cordially and named September as the time when he would be here. The suggestion of the Park Improvement committee was that the bureau of forestry examine the park tract with a view to establishing a forest on the east side of the park if this should prove practical. On August 17th, Ralph S. Hosmer, field assistant of the United States bureau of forestry, came to San Diego to inspect local trees and forest conditions, preparatory to Professor Pinchot's coming.

A few weeks later, Professor Alfred James McClatchie, of the Arizona experiment station, and an authority on eucalypti, visited San Diego. While here Professor McClatchie made out a list of species of eucalypts he deemed desirable for park use. On August 26, William Shutt, in charge of the Santa Monica forestry station, spend several days here, and gave many interesting and useful facts about the propagation and cultivation of eucalyptus trees. These notes are on file in the office.

VISIT FROM PROFESSOR PINCHOT

Professor Pinchot arrived on the 3rd of September, and in the evening gave a public lecture on Forestry in the rooms of the chamber of commerce, the address being highly appreciated by a large audience. The next

morning Professor Pinchot drove through the park with members of the Park Plans committee. After seeing the lands on the east side of the park, Professor Pinchot explained that the bureau of forestry is primarily engaged in preserving forest conditions on the high slopes of water sheds; that tree planting to have value as a demonstration of forestry should be carried on without irrigation; that the conditions in the park would not add to the experience and knowledge of tree growth already gained in this region; that it would establish a questionable precedent for the bureau of forestry to do any planting on lands not belonging to the United States government. Professor Pinchot said that if some friend of the park would make a gift of the trees and the cost of planting, or if the park authorities wished to establish a commercial forest for a term of fifty years or permanently, the bureau of forestry would be in a position to send an expert to make a plan, recommend species to be planted, etc. Professor Pinchot expressed himself as being much interested in the foresting of a portion of the park, and said the bureau would be glad to give every assistance in its power.

Following Professor Pinchot's visit, J. S. Anderson, W. I. Hutchinson and H. M. Hale, of the bureau of forestry, spent ten days in the vicinity of San Diego studying the planted eucalyptus groves. The six hundred eucalyptus trees planted in Pound Canyon on the Fourth of July were noted and photographed. The eucalypts on the Howard tract were examined and measured in reference to cultivation, soil and age. It was especially desired to find a plantation of *eucalyptus diversicolor* and *eucalyptus sideroxylon* in this region, and learn whether these species endure drought better than *eucalyptus corynocalyx*.

PLANTING BY FRATERNAL ORDERS

A proposition was made by the fraternal orders that they plant a number of trees in the park in connection with their parade on the Fourth of July. The work of clearing the ground, blasting, digging the holes, carting soil and fertilizer, irrigating and planting, was done by the park plans committee, Mr. Parsons having sent a planting sketch for the southern part of Pound canyon. The tree holes were dug a foot and a half to two feet deep and four feet across. After these were filled in, they were thoroughly wet down and allowed to settle, when six hundred trees were planted, irrigated and well mulched with street sweepings.

The trees have been watered twice since at intervals of two months. *Eucalyptus cornuta* and *Eucalyptus corynocalyx* were used, the seedlings being one to two feet high at the time of planting. Between Fourth of July and Christmas they made a growth of from two to four feet, many of the trees now being five to six feet in height, stocky and bushy. An inviting and effective grove is assured within two to three years.

DAMAGE BY GOPHERS

The main damage done has been by gophers. In the large group of four hundred trees, nineteen have died from all causes --- gophers, squirrels, rabbits, etc. In two other plantations of one hundred trees each, out of seventeen dead trees, about half have been killed by chickens scratching the loosened cultivated soil from the roots. Altogether the experiment has been highly interesting and successful.

The fraternal orders contributed one-third and the park improvement committee two-thirds of the cost.

An appropriation of \$1,700 was made by the city for laying water pipes on the west side of the park from Juniper street to the south boundary. Joseph A. Flint, chief of the water department, cooperating with the park plans committee, proceeded with this work promptly and laid a system of piping from Juniper street southward to a point near Fir street. The section south of this point will be piped as soon as the permanent grade is established.

PLANTS SET OUT

A planting list was received from the landscape architects in September, specifying the number and kinds of shrubs and trees to be secured for setting out during the winter. Many of the required plants were started from seeds last spring in the park nursery. Others were received as gifts from Golden Gate Park, the University of California, and Santa Monica Forestry Station of the university. Local nurserymen supplied a portion of the list, and such species as could not be procured otherwise were engaged from nurserymen in Santa Barbara and San Francisco. E. Benard, of Mission Valley, has had the care of the park-grown plants

since last August, and has brought this stock on into good thrifty condition for planting during January and February. All the stock will be delivered on the park at such times as it is needed.

The arrangements for planting have been made with due regard for available water supply in the number and kinds of trees and shrubs to be used. *Ficus citida* and *Ficus australia*, two of the best kinds of rubber trees, are named. Among Acacias listed are the ever-blooming *Acacia floribunda*, a beautiful specimen of which may be seen in the home plantations of E. E. White; the low spreading *Acacia latifolia*, effective for grouping; *Acacia Baileyana*, having leaves of delicately beautiful form and glaucous color, and the bright green *Acacia molissima*. *Arucaria Bidwilli*, a handsome tree clothed to the ground, is called for, and the glossy-leaved *Ceratonja Siliqua*, the pods of which are said to have furnished food for John the Baptist. The tall, slender tree, *Lagunaria Patersoni*, and the round shrubbery, *Hakea pugeniformia*, have been selected.

A rare and choice tree, *Lynoithamnus Floribunda*, is among the desirable trees named, but stock of this species could not be procured. It grows on Santa Cruz island and on a few other Pacific Ocean islands, but did not seed this year. Only two or three of these trees are growing in this locality --- one on the grounds of Mr. Anson P. Stephens of Coronado, and the other in the collection of T. S. Brandegee. Pepper trees will be used freely and some of the best native and cultivated shrubs.

PROTECTING THE PARK

The park lands have for many years been drawn upon for fuel, and the roots of *Rhus* and *Adenostoma* have been persistently carried off on the backs of burros and by wagon loads. For the past four months Webb Tome, a deputy game warden and special policeman, has patrolled the park daily. A number of arrests have been made for digging gravel and roots, and for shooting meadow-larks, mocking birds, robins, and quail; these offenses being covered by city ordinances and state laws. The interests of the park will be protected in these particulars, and violators of the law incur the risk of arrest and penalties provided. An ordinance prohibiting pasturing is now before Council and, in regular course, will doubtless soon become a law. Herds of dairy cattle have recently been withdrawn from the park lands by their owners upon request of the Park Improvement committee, leaving only occasional picketed cows, calves and horses. The park should now be secured from being treated as a common dumping ground and place of deposit for rubbish and nuisances which are not wanted anywhere else. Tons of troublesome wire, tin, glass, etc. will have to be disposed of at considerable outlay, and almost all the money thus far expended for improvements has gone to restore the park to its original condition as well as may be.

The control of the park is vested in the bureau of public works, no park commissioners being provided for by the city charter. The board was empowered by the city council to accept the plans of the landscape architect after their presentation and approval. The board formally appointed George W. Marston, chairman of the park plans committee, as their authorized park representative. The mayor and other city officials have also cooperated in advancing the improvement of the park. T. S. Brandegee, of the parks plans committee, did a notable service in seven weeks of consecutive survey work, assisting Mr. Cooke in laying out the road system, and in mapping the notes. The Amphion Club gave a concert and operetta in the Isis theater in February, under the direction of Mrs. Loleta Leveté-Rowan, for the benefit of the park fund. In April, a successful presentation of scenes from Grand Opera was conducted by Mrs. Rowan, these two musical events netting \$427.25 for park improvement.

WIDELY ADVERTISED

The San Diego newspapers have presented park interests with uniform kindness and besides items of current news, there have been timely editorials relating to the principles of park development and maintenance. "**Park and Cemetery**" of Chicago has published articles about San Diego park, and the **New York Tribune** and the **New York Post** have had interesting descriptions by Samuel Parsons, Jr. A complete file of newspaper articles relating to San Diego park is on record in the office, together with a series of photographs illustrating different phases of the park. The University of California has requested a full set of these photographs for use in a course of lectures on landscape gardening. Photographs of the same tracts after improvements that have been made have also been requested, these being furnished with no expense to the park.

MR. COOKE'S VISIT

Landscape Architect Cooke arrived in San Diego December 20th to resume improvement work on the park. He brought with him a preliminary sketch for the entire tract, to be worked out as a more finished plan during his visit. Since August the street sweepings have been hauled and spread over the graded surface at Sixth and Date streets, and also some of the straw bedding from the stables of the fire department. The small west canyon, from Fir to Juniper street, has been cleaned of weeds and dumping in preparation for planting in January.

Mr. Cooke at once organized his work and after submitting his plans to the Park Plans committee put on a force of men, horses, road plow and scrapers to finish the park slopes from Elm street southward, including the boundary roadways on Sixth and on D streets, and on seventeen feet of park land south of Date street from Sixth street eastward. This strip will be graded with reference to the street and park, and planted with low-growing shrubs.

A border of plants on one hand, and the park proper on the other, will give park character to Date street, and make a beautiful approach to the entrance at Eighth street. An easy footpath will enter at the corner of Sixth and Date streets and lead to the high ground where the brick pillars now are. A grove of pepper trees will be established on this slope during the coming month, a semi-circular plaza space being arranged for at the corner, as an approach to this foot-path entrance.

Mr. Cooke enjoyed and utilized Christmas day by driving over the park with T. S. Brandegee of the Park Plans committee. Special locations were studied with a view to deciding upon suitable and effective plantations in the final plans. Carrying out established principles of landscape architecture, Mr. Cooke determined upon schemes of planting which would intensify the effect of the depth of the canyons. Mr. Cooke and Mr. Brandegee selected a favorable location for a palm grove, this being a canyada leading from the east side of Pound canyon up to the Monterey pines on the Howard tract. This canyada is broad, forming a natural amphitheater, and has deep soil, with favorable conditions for holding moisture. Mr. Brandegee has spent much time in Mexico during botanizing trips and is familiar with the grouping habit of native groves of palms. His exceptional knowledge of plants of semi-tropical countries as well as his practical knowledge of civil engineering has made his services to the park especially valuable.

GRADING THE ROADS

Work is now underway on the site of the proposed entrance at Eighth and Date streets, where a lawn is to be established, and on the new roadway to enter at that point. This road, extending to Sixth and Upas streets, will be graded and brought into condition for oiling as soon as possible. The offer of a citizen through the chamber of commerce to oil park roads, will apply to this road, and to a driveway extending from the south boundary of the park near Twelfth street to the northern limit in the neighborhood of the golf grounds.

During Mr. Cooke's stay of more than two months, it is his purpose to grade the two roads indicated, to complete the grading from Ninth and Date to Sixth and Elm, and to put this area into park condition by establishing plantations as indicated on the planting plan. The entrances at Kalmia, Quince and Upas streets will also be improved and the small canyon on the west boundary below Juniper street. Golden Hill park will be developed in accordance with a plan prepared by Mr. Parsons and Mr. Cooke, thus improving this beautiful site and bringing present and future planting into harmony with the general park plan. One of the features of improvement which is being arranged for this section is a roadway to lead down from Golden Hill park on the west, connecting with the road to Switzer canyon, and providing a way to cross into Pound canyon.

THE FINANCIAL SIDE

The financial side of park development is necessarily of first importance. As will be remembered, the fund which warranted this enterprise amounted to \$11,000 in subscriptions by citizens. Expenditures have been made with strict regard to economy and nearly \$7,000 is still available, including \$3,000 of the Allyn fund

and subscriptions not yet paid. The salary of the secretary, rent of office, office furnishing and part of the surveying have all been met by private contributions, made especially for these purposes. The committee sees its way clear to make the improvements now underway, and to maintain these in good order in 1904. A larger amount of water pipe is necessary than is yet provided by the city, the present planting being arranged to extend along the south side from Tenth street westward, and along the west side of the park from Date to Upas street.

Appreciation of the unique beauty and real value of the park as a civic possession has steadily grown, as shown in the marked increase of visitors, and in the subscriptions which make the improvement work possible. A greater sense of the beauty and value of the park is sure to follow its development and ornamentation. Park improvements have come to be acknowledged the county over as related to civic prosperity in a vital way. The park tract is unique in its natural features and contours, and, in addition, will have peculiar interest in the character of plants which flourish here. As a view point it is unequalled among the parks of the world in the beauty, variety and extent of the outlying landscape and the magnificent atmospheric effects. The hundreds of miles of mountain ranges and illimitable sweep of ocean, with foothills, promontories, bay and islands, are a surprise and delight in their ever varying aspects. Wisely administered with reference to expenditures, San Diego park is one of the best assets of the city, in its attraction for tourists, and its satisfaction and enjoyment for citizens.

January 10, 1904, San Diego Union, 9:1. The Facts As to the Park Drive; Clear Statement of the Controversy Existing in the City Council; Necessity of Getting Together in Some Agreement in Order to Take Advantage of an Excellent Offer:

Editor Union: The meeting of the street committee of the city council on Saturday night developed the existence of a deadlock on a question of great public concern, upon which I am constrained to address you in the hope that a simple statement of the facts may clarify the disturbed atmosphere. I refer to the matter of the preparation of certain streets and thoroughfares of the city for the reception of the oil which the chamber of commerce has volunteered to donate.

On November 20th last the chamber offered to supply the city with enough oil to cover, with two coats, no less than six miles of city streets and park thoroughfares. A condition was annexed to this offer to the effect that, in order to avail itself of it, the city must prepare the roadbeds for the reception of the oil prior to February 15th. It is thus clear that unified and immediate action is demanded if the city is to take advantage of this liberal proposition.

The proposed system of oiled highways is as follows. Beginning at Sixth and Upas streets along Upas to Fifth street; Fifth to Walnut; Walnut to Fourth, Fourth to University avenue; thence to normal school; thence along Park Boulevard to the park at the point of the golf grounds. As to these city streets, there exists a perfect unanimity of opinion.

The remainder of the circuit has, however, furnished the bone of contention. It comprises the route through the park and the question at issue is whether the council shall adopt the thoroughfares outlined and planned by such competent landscape architects as Messrs. Parsons and Cooke of New York, or whether it shall

change those plans to the extent of diverting the route along the west line of the park and incorporating a section of a road laid out by the council as long ago as 1888.

To my mind the reasons for accepting the driveways as planned by the world famous architects are so plain that a mere reference to them should carry conviction to the mind. A glance at the drawings in the office of the park improvement committee of the chamber of commerce will conclusively show that the designers have done their work well. In outlining the system they have ever kept before their minds the fundamental idea of beautifying the city's pleasure grounds. Winding here and there, passing over this undulation and that, the element of contrast would vary the view and furnish additional pleasure to the spectator. It is proposed that the thoroughfares shall be of a width of fifty feet, the same as that adopted in such finished parks as those of New York and all large cities.

These plans, I repeat, are the work of men who are world famous in their profession, and who have spent their lives in the beautification of parks throughout two continents.

Several members of the street committee, however, have seen fit to array their judgments on this question against those of Messrs. Parsons and Cooke, and they propose to disfigure the matured plans by altering the route so as to include a distance of five blocks along the West Park Boulevard as indicated. That is to say, they propose to incorporate as park of the park system, a highway utterly incongruous with the scheme designed, it being 150 feet wide and with an unbroken even surface. One might as consistently propose to introduce a wash tub on a banqueting table.

There cannot be used a single argument in support of such a proposition. No, I am wrong. There is just one. This plan cannot fail to greatly advance the value of the real estate along this 150 feet wide street, and it is quite possible that the individual owners of such property would not object to the city preparing the street and to the chamber of commerce oiling it without cost to them. But then, of course, such an argument would not appeal to the councilmen.

There exists also another reason why the plans which Messrs. Parsons and Cooke, under the direction of the park improvement committee, have prepared cannot properly be interfered with. On April 20, 1903, ordinance 1335, providing for the improvement of the city park was duly signed by the mayor and became in force. This ordinance is so conclusive on the question that I may be pardoned from quoting briefly there from.

"Section 1 . . . said board of public works is hereby authorized and directed to lay out and improve the 1,400 acre city park in the city of San Diego in accordance with plans and specifications provided by the chamber of commerce, provided that said plans and specifications are approved by said board of works and a copy filed in the office of the city engineer."

This ordinance alone determines the question. The plans have been provided by the chamber of commerce and every condition of the ordinance complied with. If we are, therefore, to respect our own laws, we cannot do otherwise than adopt the drawings designed by the architects acting for the chamber.

The situation is indeed urgent; and if the city to derive the great benefits which must follow the oiling of these six miles of roadway, no time must be lost in preparing the thoroughfares.

On December 21, an ordinance introduced by Delegate Sehon, which incorporated the old highway on the west line of the park, was passed by the delegates; but, on January 4, the aldermen amended it by substituting another which contemplated the adoption of the thoroughfares designed by Messrs. Parsons and Cooke. In this latter action, the delegates refused to concur and referred the ordinance to the street committee. The committee, on January 7, recommended its rejection.

It is, therefore, apparent that a condition of affairs exists, which, unless remedied, may result in such delay that the site will lose the inestimable advantages to be derived from this improvement. But a little more than a month remains to satisfy the precedent condition to receiving the liberal gift, and it behooves all good citizens to urge their representatives to take such measures and will accomplish this desired end.

F. C. BYERS
Chairman of the Joint Street Committee

January 19, 1904, San Diego Union, 6:1; CONTROVERSY IS FINALLY SETTLED; Driveways in Park to Be Oiled According to Plans of Park Committee; A Debate in Which There Was Much Interest and Some Feeling Shown - Delegates Concurred in Aldermen's Action:

Last evening the board of delegates, after long debate, voted to concur with the board of aldermen in the matter of the proposed oiled driveway through the city park for which the chamber of commerce has offered to supply the oil to the amount of several thousand dollars worth just for the purpose of getting a fine drive through the park that the people might be proud of. The result of the action is to fix the streets on which the oil shall be put outside of the park, leaving the selection of driveways in the park to be oiled to the park improvement committee, which is carrying on the work there at present.

The subject was one of the first matters to come before the board of delegates. There were many people present, nearly all of whom wanted to see the proposition go through, and most of whom wanted to see it go through on the lines that it finally did follow. Seeing the large number present, Delegate Sehon, who seemed to be the only opponent of the proposition, asked that the rules of order be followed and that outsiders be not allowed to do more than to present their case and not to argue upon it. In his talk against the concurrence, he argued for a driveway at the outer edge of the park. In the course of his remarks he was far from courteous regarding the plans of Mr. Marston, and quite plainly intimated his belief that the park was being planned somewhat in the interests of the property which Mr. Marston owned north of the park. For this he was promptly and properly called own by Delegate Simpson, who declared that the remarks of the delegate from the first ward were severe and uncalled for. Delegate Simpson was applauded and Delegate Sehon was not.

Capt., Sehon also wanted to have the park drives wider than 50 feet.

President Peters of the chamber of commerce said that he was not quite prepared to speak on the subject of what drive should be selected, but he did know that the offer of the chamber of commerce should be accepted. He said that such things were contagious and that the city was quite apt to have offers of similar nature after this one had been accepted. He wanted the city to get all it could in this way.

L. A. Wright, a director of the chamber of commerce, was next to speak. He first hung a map of the park up before the board. Delegate Sehon said that it was a pretty thing with a very pictorial effect, and Mr. Wright said that was exactly why he wanted Mr. Sehon to look at it. He then explained the map with its drives, and told why the outside drive proposed by Mr. Sehon was impractical. He also defended Mr. Marston, and said that the plans were drawn by a landscape architect and that no consideration whatever was taken of the outside property belonging to any one. The plans were those of men who were considered the best to be had in the country. Mr. Parsons was, he said, in charge of Central Park, New York, and there the drives were 50 feet wide, and plenty wide enough. More miles of a 50-foot drive could be maintained than of any wider drive for the same money.

Delegate Sehon was on his feet again. In truth he was the only delegate on his feet at any time during the controversy. He said that the park plans were laid out in accordance with an artistic and not according to a scientific idea.

Melville Klauber, from the audience, was given permission to speak, and he did in defense of Mr. Marston and of the park committee's plans. He was the offer was too generous a one to loses sight of.

The first vote was on the adoption of the report of the committee of the board of delegates fixing the route of the oiled road all the way through the park. It was voted down by 12 to 6. The motion to concur with the action of the board of aldermen then prevailed, and the instruction was to . . . have the streets named put in condition to receive the oil. The park committee has been at work for some days getting the driveways, which it is proposed to oil, in condition to receive the same.

February 4, 1904, 3:1, San Diego Union. THE WORK ON THE CITY PARK; Partial Review of What is Being Done by the Park Improvement Committee; Much Money Has Been Spent in Making the Southwest Corner Presentable - Something of the Controversy:

Editor, Union. I have asked Mrs. M. B. Coulston, the secretary of the park plans committee, to write several articles concerning the work that is to be done on the park so that the public may be well informed on all these matters.

If any defense is made against certain criticisms of the plans, it will be made in no spirit of controversy, but simply to show, as clearly as possible, the reasons for the plans and their importance to the park design. The committee is trying to the best of its ability to lay sound foundations for a great and beautiful park. The opportunity is unique and extraordinary. If wisely used, the results will be of surprising attraction. The work that is now being done is not showy and is carried on under unusual difficulties, but there can be no question as to its absolute necessity and great value for the future. That this may be appreciated more fully and win the public confidence is the object of these letters.

GEORGE W. MARSTON

WORK BEING DONE AT SOUTHWEST CORNER

The southwest section of the park, by reason of nearness to the center of the city, convenience of access and beautiful outlook, has naturally been the first point to be improved in work carried on by the park improvement committee. The rough and despoiled condition of this corner, where the natural hillside had for

many years been dug into to get earth to fill city streets, was no small discouragement on account of the immense amount of labor required to bring it into good condition, and the great expense involved.

The present plan for roads was decided upon and approved by the landscape architects and the park committee after mature study and consideration as being the best for all reasons. Unfortunately, as is the case in so many parts of San Diego, there is a 'jog' at Sixth and Date streets, made by discrepancies in the original surveys thirty years ago. This irregularity carries the southwest corner of the park forty two feet west of the line of Sixth street and seventeen and a half feet south of the line of Date street. It is the adjustment and treatment of the irregularity caused by this 'jog', which has led to the desire on the part of several residents to have the plans of the landscape architects changed to meet their personal preferences.

On the west boundary, the road plans, as shown on the map of Messrs. Parsons & Cooke for the parkway, meet with no opposition from owners of abutting property. The opposition to this roadway has been raised and carried on by a few people to the south of Date street. Sixth street now ends at the south line of Date street. There is no more force in a claim that this street continue on into park land, than that Seventh street, or any other city street, continue into the park. It has been planned to have a parkway around the boundary of the park wherever this is practicable. But deep canyons and such other irregularities in contours and outlines as this at Sixth and Date, make it necessary to fit special plans to special conditions.

The park plans place an eighty feet parkway north of Date street along the west boundary line of the park, and provide a roadway fifty-two feet wide with fourteen foot sidewalks on each side. On account of the canyon north of Fir street, this park road can be built for a length of but two blocks, from Date to Fir streets. As the park extends forty-two feet west of the line of Sixth street, this parkway naturally runs forty-two feet further west. In looking north on Sixth street below Date only a portion of the width of the parkway is seen, the receded, rounded corner of the park coming into view. The petition is for the continuance of Sixth street straight into the park, thus making the monstrosity of a roadway six hundred feet long, having a width of one hundred and twenty-two feet. In the case of the west boundary, the petition is against an existing 'jog' for which the present park workers are wholly irresponsible. In the case of the south boundary, the petition is for the establishment of a new 'jog' and the loss of the beauty and charm of a very effective strip of parking.

The grading work done during July and August at the southwest corner of the park cost \$3,000 (?) and much more will be required to finish grading and planting that section. This the park improvement committee is prepared to expend now, and the committee proposes to make an attractive park of all this corner. The forty-two feet, which the petition asks to have cut from the park and added to the eighty-foot street has been reclaimed from cliffs and holes and put into the present slope at this large cost, so as to produce the best park effects, and not to make a useless street out of all reasonable proportion. No advantage has been claimed for this one-hundred and twenty-two feet wide street except that people south of Date street, looking north, would thus see a street, which they prefer instead of seeing a park, which they seem to think would be offensive and objectionable. The eighty-foot roadway as planned answers every purpose of convenience and harmonious adjustment. And just here it may be said that hard and fast straight lines and angles are not the first requisites of park making. A certain irregularity, the result of curving lines and variety of contours with elements of change, surprise and natural beauty, are at the very basis of park construction.

Other cogent reasons exist for the eighty-foot road on the west boundary as planned by the landscape architects. A roadway extending opposite Sixth street would require heavy cutting into the hillside facing Fir street, and result in the same sort of defilement to the park that it has already cost so much to correct near the corner to southward. The effect of such cutting would be disastrous in spoiling park conditions and possibilities and in enforced outlay of money. There are already too many of this sort of raw banks in the park, as at Tenth street and easterly in succession toward the Russ school. This proposition of running the road into the side of the steep hill near Fir street is really impractical and prohibitory.

There is yet another potent reason for the eighty-foot road to be placed along the west boundary. The elevation of the present site of the brick monuments will for many years to come be the most popular viewpoint in the park. Here thousands of tourists will get their first and lasting impression of the magnificent natural scenery of San Diego, in the sweeping outlook over land and sea. Here too citizens will resort for outing and enjoyment. In general, it is a practice of park construction to shut out views of the nearby city.

At his point in San Diego park, under different conditions, the city is necessarily kept in sight. But, at this vantage point, it is highly desirable that some park affects be afforded before the eye catches the long foreground of buildings in the outlook toward the bay, ocean, islands, Point Loma, Point of Rocks and mountains of Mexico. Every one of the few feet of park land in this direction, is valuable beyond price for its use as a park, and should not be perverted for a mistakenly designed and absolutely needless street.

Another article must serve to explain conditions existing along the north boundary of the park, and the treatment proposed by the landscape architects.

February 5, 1904, San Diego Union, 5:1-2; THE PARK PLANS HAVE BEEN APPROVED; ONLY SLIGHT CHANGES MADE BY BOARD OF PUBLIC WORKS; THE IMPROVEMENT WILL NOW GO FORWARD RAPIDLY:

The only matter that came before the board of works at the meeting yesterday was the matter of the board accepting the plans of the park improvement committee, which they did after much debate and a few alterations. The changes are that from Date to Fir, on the west side of the park will be placed a twenty-foot alley instead of a street, and on the north line of Caruthers' addition from Sixth to Tenth streets, will be placed a ten-foot cement driveway.

These amendments came apparently by inspiration, after long and profitless discussion which bade fair to end in a deadlock.

The chamber of commerce committee and a number of directors were present to see the plans through, including President Homer H. Peters, Secretary Wood, George W. Marston, Akerman, Newkirk, Strahlman, Grove, Kelly and Conard. Of those who have opposed the plans as far as they relate to the southwest corner of the tract, there were present several citizens, including Charles Hardy, M. Chick and E. F. Wells. The resolution as submitted was as follows.

THE RESOLUTION

San Diego, February 2nd, 1904

To the Honorable Board of Public Works

We the undersigned property owners hereby petition your Honorable Body to accept the plans for developing the southwest corner of the park in compliance with the plan of the Landscape Architects Samuel Parsons & Co. All reasonable adaptations to the convenience of citizens have been made in the plans as they now stand, and we desire to express our entire confidence in the plans and work as proposed by the Park Improvement Committee.

H. Meredith Jones, U. S. Grant, Jr., J. E. Mulvey, H. H. Bancroft by Griffing Bancroft, Jr., J. H. Snyder, John H. Gay, Ed Kingston, Mrs. M. J. Wright, Emily F. Overbaugh, Mrs. F. K. Shepherd, James E. Cornell, Maria L. Cornell, Mrs. Will M. Gray, Mrs. E. M. Lutz, Mrs. F. A. Garretson, J. R. Dye, Mrs. D. C. Collier, A. G. Gasson, J. N. Boyd, Henry E. Mills, F. A. Frye, D. F. Garretson, C. A. Scott, agent, Eunice B. Littlefield, James Simpson, Minnie Schaffnet, Henry L. Titus, Samuel G. Ingle, Samuel I. Fox, Ralph Granger, E. S. Duncan, Mrs. S. E. Winn.

The same arguments were made by Mr. Hardy and Mr. Chick which have been advanced by them at previous considerations of the matter, and were answered by Mr. Marston and Mr. Cooke. The rock on which the opposing factions threatened to split was the wish of Mr. Chick, et. al. to have the south boulevard continued across the seventeen-foot strip that it has been proposed to park, clear up to their property lines. The improvement committee stood firm against this, while the board were inclined to side with the objectors. Finally it was suggested and agreed, that the parking scheme be carried out as planned except that entrances ten feet wide be left to each lot through the 17-foot strip.

Another matter in dispute was the prolongation of Sixth street north from Date. Messrs. Hardy and Chick wanted the line continued straight, which would give a width of 125 feet to the street, or they were willing that it should be closed entirely.

It was finally agreed that a drive should be left of 20 feet along the west line of the park, which would suffice to give the property owners from Date to Fir access to and from their lots fronting toward the park. This will amount practically to the closing of the Street as far as the view north is concerned for that will take in only the park foreground as seen from further south. This plan was eminently satisfactory to Messrs. Cooke and Marston, as it gives room for planting. Mr. Marston stated that the improvements to the park will now be pushed rapidly.

FOR THE ROSEVILLE ROAD

At the close of the consideration of the park matter, Secretary Wood notified the board that the \$1000 guarantee by the chamber of commerce toward the oiling of the road to Point Loma had been placed in the hands of the city treasurer.

WILL BEGIN WORK AT ONCE

Mr. Cooke says that now that the matter of plans is settled, he will at once start the work at Sixth and Date. He expects to put as many teams at work there tomorrow as can be spared from the road work, and at the beginning of this week will have men digging holes preparatory to planting. It is expected that all the rough work on the west driveway will be finished this evening when the remainder of the road will be shaped up and rolled. The work on the driveway east of Pound canyon is already begun, and in a few days plows and scrapers will be making headway there.

M. B. COULSTON

February 8, 1904, San Diego Union, 6:1. Nearly a dozen men digging holes for plans on southwest portion of park; footpath staked at 6th and Date Street Entrance.

February 9, 1904, San Diego Union, 6:4. Board of Public Works has to expend Allyn estate bequest of \$3,000; cannot turn it over to private citizens.

February 12, 1904, San Diego Union, , 6:4. Cooke reviews park work; Park Improvement Committee likes suggestion to plant trees on Arbor Day.

February 22, 1904, San Diego Union, 3:4. San Diego Electric Railway plans to make a park for new pleasure resort in University Heights; petitions for closing of certain streets.

March 1, 1904, San Diego Union, 5:3. Board of Public Works received M. D. Goodbody's bid for park work; awards contract to him for \$3,000, the amount of the Allyn fund.

March 1, 1904, San Diego Union, 7:1. Cooke about to leave; path plowed and scraped from a point opposition Hawthorne to the mesa level; 50 men and 20 teams at work in path; footpaths being established.

March 3, 1904, San Diego Union, 5:3. Park architect called East; Mr. Cooke leaves for New York on today's noon train; has been here for two weeks.

March 9, 1904, San Diego Union, 5:3. Plans for Arbor Day celebration on March 17; schoolchildren will have half-day holiday; Cooke has selected two points on the west hillside of Pound Canyon in a line east of Palm Street for tree planting; 3,000 schoolchildren will camp on the park; program in preparation.

March 17, 1904, San Diego Union, 5:1-2. Cordial greetings from President Roosevelt will be read to the children of the public school at Arbor Day observance this morning.

March 18, 1904, San Diego Union, 3:1. President Theodore Roosevelt's greetings read to children of public schools at Arbor Day celebration; points chosen for planting called Pine Point and Cypress Point as these kinds of trees to be planted there.

March 19, 1904, San Diego Union, 3:3. Street Committee takes up ordinance prohibiting trespassing of stock and fowl on city park and matter of cutting work in the park, contrary to law.

March 29, 1904, San Diego Union, 5:2; IMPROVEMENT OF THE CITY PARK; A GREAT SHOWING NOW MADE IN THE SOUTHWESTERN CORNER; Much Planting Going On and the Oiling of Park Ways Commenced:

The southwest corner of the park has taken on a new phase during the past week and is steadily gaining in finished aspect. Neat posts have been set to prevent driving over the semi-circular approach to the winding footpath leading from the corner of South Parkway and West Parkway to the elevation where the brick monuments stand. This footpath entrance is now brought to its final level, and is compact and smooth. The low posts will be painted white, and it is planned to mask their utilitarian purpose and make a beautiful outline by covering them with the single Cherokee rose festooning the intervening space. Free access will be provided to the path for foot travel. It is intended to replace this temporary arrangement with a low granite coping at some future time.

Following the plan arranged by the landscape architects, the entire slope graded since last summer, has been planted with young trees and shrubs. Workmen are now engaged in smoothing the surface of this planted area. The seventeen and a half foot strips of park land south of the line of Date street, or South Parkway, have also been planted, and promise soon to be an attractive feature.

The roadway on the west boundary, north of the line of Date street, is now graded as far as Elm street. The sidewalks on both sides of South Parkway and this roadway east of the line at Sixth street, are among the most desirable and effective improvements yet made on the park. Looking east on Date street, from Fifth, the graded and orderly thoroughfare shows up to splendid advantage, and adds greatly to the attractiveness not only of the park, but also of all this section of the city.

North of Elm street, the rough hillside is being worked down to pleasing lines, preparatory to planting. In the small canyon along the west boundary of the park, extending from Fir to Juniper streets, a force of men was yesterday engaged in planting shrubs on the west slope.

Meanwhile, the important work on the main driveway is being carried on vigorously, and each week of the coming month will mark great advance in permanent results on the park, in planting and in the oiled roads.

April 2, 1904, San Diego Union. Letter from George Cooke complimenting George W. Marston for his work on behalf of the city park.

April 8, 1904, San Diego Union, 9:3. San Diego's Arbor Day celebration has attracted wide attention in national press; Secretary Coulston of Park Improvement Committee has received letters from Gifford Pinchot of U.S. Bureau of Forests.

April 14, 1904, San Diego Union, 3:2. Golden Hill Park one of the prettiest spots in the city; lies at north end of 25th Street; view from knoll west of cactus beds.

April 26, 1904, San Diego Union, 6:3. Oiling east driveway completed yesterday; force transferred to west driveway; eastern driveway will be left to soak for a day or two.

May 1, 1904, San Diego Union, 9:4-7. Tom Kneale's park on University Heights affords magnificent view of Mission Valley; street car company plans to enlarge its grounds.

May 11, 1904, San Diego Union, 6:4. Planting of western side of park below Juniper Street progressing; removal of range of Company B, 7th Regiment from Pound Canyon discussed; oiling of east roadway from golf grounds to Russ School is nearly finished.

May 29, 1904, San Diego Union, 7:3. Dr. Bushrod Washington James of Philadelphia left tracts of land for park sites to cities of Oakland and San Francisco; public administrator has been appointed to administer tract left for San Diego.

June 12, 1904, San Diego Union, 7:2-6. George W. Marston residence to be erected at 7th and Upas Streets.

June 12, 1904, San Diego Union, 7:3. West Park Drive opened in part.

June 16, 1904, San Diego Union, 6:1-2. High School student body members pass resolution in favor of Superintendent Davidson.

June 27, 1904, San Diego Union, 6:4. Hebbard and Gill give improvements plans for Children's Home free.

July 8, 1904, San Diego Union, 5:1. Technically the contract for \$3,000 from the Allyn fund is void as time for completion of work has expired; Board takes into consideration that the contract was with the City.

July 19, 1904, San Diego Union, 6:1. Talented woman summoned by death; Mrs. Mary B. Coulston, Secretary of the Park Committee, died suddenly in Oakland; remains to be cremated today; a useful life.

July 22, 1904, San Diego Union. The death of Mrs. Coulston; a few particulars of the last illness from a letter from Ernest E. White.

August 19, 1904, San Diego Union, 4:3. George W. Marston says development of corners of park at Date Street, Golden Hill, 6th and University, and on golf grounds will continue.

December 2, 1904, San Diego Union, 7:1. Superintendent Flint writes letter about attempt to investigate 1,100 foot hole for well in city park; exploration will require elaborate operations; City laid pipe recently.

December 3, 1904, San Diego Union, 8:2. Samuel Parsons gives lecture.

December 6, 1904, San Diego Union, 6:4. Aldermen grant petition to prevent guardsmen from further use of the range in city park for target practice; citizens on boulevard under wire; protest to Council; exhibit bullets.

December 7, 1904, San Diego Union. E. C. Ayers writes letter about shooting in park; "Why not include golf also?"

December 9, 1904, San Diego Union, 4:3. Samuel Parsons arrived here ahead of time; Cooke to be here soon; work schedule.

December 17, 1904, San Diego Union, 7:1. Samuel Parsons talks on park beauty under auspices of Florence Heights, emphasizes tree planting.

December 26, 1904, San Diego Union, 8:1; MAKING PLANS FOR PARK PLANTING; Messrs. Parsons and Cooke Doing Detail Work for Four Portions of Park; Also Working Out Plans for Beautifying the Campus of State Normal School:

Samuel Parsons, the landscape architect, who is here with his partner George Cooke furthering the plans for beautifying the big San Diego city park expects to leave this week for his home in New York, leaving Mr. Cooke here for six weeks or two months or as long as he can be spared from the duties which press upon him in New York, where the firm has charge of much work for the municipality as well as for private individuals.

The days that both are here are being devoted to working out plans for the planting of certain portions of the city park. Those particular portions are:

The Golden Hill park, which was started near the head of 23rd, 24th and 25th streets by residents of Golden Hill and of which they made a very pretty place about the time that the Park Improvement committee took hold of the work.

The Russ School grounds, on which the board of education is desirous of spending some money. They desire that their work shall conform to the general plan, and, therefore, want the suggestions of those who are working out that plan.

The Children's Home – this is located on the park – and the grounds need beautifying. The managers of the home want the plans ready as soon as the opportunity offers for some systematic planting of their home site.

Date street entrance – where a great deal of work has already been done and where much more can be done with advantage to the park. Considerable planting has been done there and many of the trees are in fine condition for the time they have been in the ground.

The Sessions garden – this is near the Upas street entrance to the park and as the ground there has been worked before, it has been thought that the planting there would be fully as successful as anywhere on the park.

Messrs. Parsons and Cooke have also been running some lines and making some plans for the improvement of the campus of the state normal school and has succeeded in interesting the landscape architects in the movement for its improvement. The legislature will be asked to appropriate money this year for the permanent improvement of the campus and the trustees want to supply the local representative at Sacramento with the plans and specifications for such improvement.

December 28, 1904, San Diego Union, 6:3. City lodges to remember their dead by planting trees in city park.

December 29, 1904, SAN DIEGO UNION, 9:3; MORE WORK ON THE CITY PARK; Extension of the Western Boundary Road Will Be Commenced Today; Tree Planting at Mulvey Canyon --- Mr. Parsons Left Yesterday For the East:

Samuel Parsons, the landscape architect, who has been here for several weeks working on plans for the beautifying of the big city park, left yesterday for his New York home, though he will stop for a day on his way in Los Angeles. George Cooke, who is the junior partner in the firm of Parsons & Co. and who has also been here for a week, will remain for several weeks longer to superintend some of the planting which is being done this winter.

On the West Road

Work will be commenced this morning on the extension of the west boundary road, which is an extension of Sixth street from Elm street to Fir street. At that point this extension will have to stop for it is at that point that the canyada cuts across the western boundary of the park and makes road making there out of the question. This canyada, or little canyon, extends north to about Ivy street. There is no park entrance at Fir street, save by footpath, and the planned extension of Sixth street will turn west on Fir to Fifth street.

Carriages will be able to reach the park at Fir street, but will have to continue down Sixth to Date and go around to the Eighth street entrance.

Mulvey Canyon

The work of rounding out Mulvey's canyon will also be commenced this morning or within a day or two, and several hundred trees are to be set out there in accordance with the tree-planting schedule of Messrs. Parsons and Cooke.

At the Normal School

While Mr. Parsons was here, both he and Mr. Cooke worked on plans for the improvement of the state normal school grounds and, as a result of the work, Senator Ward will introduce a bill in the legislature for an appropriation of \$10,000 for the purpose. The site of the school is ideal. The building itself is almost the best that a normal school was ever put into, and the grounds should be made to correspond.

1905

January 1, 1905, San Diego Union, I, 10:1-3. Parsons is enthusiastic over San Diego's big city park.

January 1, 1905, San Diego Union, I, 10:3-7. Past year's work on the park.

January 3, 1905, San Diego Union, 5:2. Governor Pardee selects old mission type for California Building at Lewis & Clark Exposition in July.

January 7, 1905. ELECTION: Shall the proposed amendment number fourteen to the charter of the city of San Diego relating to and providing for a board of park commissioners be ratified?

Yes 1,466 No. 665

January 15, 1905, San Diego Union, 6:1-2. Trees on the park are flourishing; report of past week's operations and preview of next week's; personnel of Fraternal Memorial committee.

January 25, 1905, San Diego Union, 7:1-2. 51 lodges were represented; Fraternal Memorial Arbor Day warmly endorsed; enthusiastic meeting.

January 27, 1905. CITY CHARTER amended creating Park Board; annual appropriation --- tax levy --- fixed.

February 2, 1905, San Diego Union, 8:1. Oil drives of city park, now one of San Diego's best possessions says Emmor B. Weaver.

February 3, 1905, San Diego Union, 7:1-3. Governor Pardee names the new city council; members recommended by chairman of city and county Republican Central committee.

February 17, 1905, San Diego Union, 5:2. Palm trees will be moved; Golden Hill Improvement Club at first objected, but yielded to the eloquence of Mr. Cooke.

February 20, 1905, San Diego Union, 3:3. Julian Hawthorne, guest of chamber of commerce, takes trip over bay and city park.

February 21, 1905, San Diego Union, 3:4. Hawthorne sees harbor and park; full day of sightseeing by noted writer.

February 28, 1905, San Diego Union, 6:4. Park sentiment at La Jolla.

March 3, 1905, San Diego Union, 7:1-5. Republicans name the next city officials, Dan F. Jones for mayor.

March 3, 1905, San Diego Union, 8:2-6. Democrats put up crazy-patch ticket.

March 5, 1905, San Diego Union, 6:3. Rustic bridges in Mulvey canyon; work being done by Park Improvement committee at present; architect Cooke to leave next week; fertilizer from city streets wanted.

March 10, 1905, San Diego Union, 9:1-3. Julian Hawthorne finds San Diego an ideal spot.

March 10, 1905, San Diego Union, 5:1-4. The season's work on San Diego's park; landscape architect Cooke left yesterday on his return East; much planting has been done and many improvements made.

March 13, 1905, San Diego Union, 4:1-2. EDITORIAL: Progress on the Park.

March 13, 1905, San Diego Union, 7:3. Poppies of Del Mar Hills; proposition to plant them on city park in memory of Mrs. Coulston.

March 21, 1905, San Diego Union, 6:4-5. An ordinance was placed on final passage and adopted by the Council providing for the laying of a 80-ft. boulevard with 45-ft. sidewalks on the south side of the city park from its east side to 10th street, and the city engineer was directed to plat such a boulevard and furnish estimates.

March 29, 1905, San Diego Union, 5:1. Author Henry James a Coronado guest

April 5, 1905, San Diego Union, 2:1-4. John L. Sehon elected mayor of San Diego; Republicans elect entire City Council with the exception of F. J. Goldkamp of the 9th ward.

April 5, 1905. City Council Monday evening adopted an ordinance extending the width of the boulevard along the south side of the city park between 6th and 8th streets so as to make a sidewalk of 20 ft. and a driveway of 62 ft.

April 6, 1905, San Diego Union, 6:4-5. Mayor Frary will name library trustees and park commissioners; slates being made for new mayor.

April 15, 1905, San Diego Union, 5:3. West side city park boulevard; property owners willing to share grading of proposed drive; meeting street committee last evening.

April 16, 1905, San Diego Union, 7:1-3. San Diego's gem exhibit at Portland's Lewis and Clark Exposition will astonish the world.

April 18, 1905, San Diego Union, 3:1-2. First park board named last night: G. W. Marston, E. E. White and A. Moran proposed.

April 18, 1905, San Diego Union, 3:1. Provided for 'Park Avenue'; Board of Works to grade and oil 100 ft. wide boulevard; property owners to pay half; estimates for paving 16th street filed.

April 23, 1905, San Diego Union, 4:2. EDITORIAL: A Los Angeles Exposition.

April 25, 1905, San Diego Union, 7:1-2. Annual message of Mayor Frary.

Minutes of the Board of Park Commissioners:

First meeting of Board, May 1, 1905

Marston, G. W. elected president

White, Ernest E. secretary

Moran, A. elected Superintendent of Parks

Munn, E. A. appointed gardener in charge of city park at a salary of \$75 per month

Webb, S. E. appointed gardener in charge of the Plaza and New Town park at a salary of \$60 per month

Moved by Mr. Marston that the committee at Golden Hill we be allowed to put up tennis courts, croquet grounds and swings near the 25th entrance to the city park.

Mr. Miller employed as gardener in charge of Golden Hill section of city park at a salary to be arranged by Mr. Marston.

May 1, 1905, San Diego Union, 1:3-5. Sehon forced his way into the mayor's office; took possession at about 2 o'clock this morning and declared that his administration has commenced; broken glass carted away.

May 2, 1905, San Diego Union, 3:1-3. Mayor Sehon's first message to Council.

May 2, 1905, San Diego Union, 7:1-2. Park Commission has organized; G. W. Marston elected president and Ernest E. White secretary yesterday.

Minutes of the Board of Park Commissioners: May 9, 1905 . . . Mr. Miller's salary fixed at \$25 per month.

Minutes of the Board of Park Commissioners: May 16, 1905 . . . Mr. Moran reported that the stable on the Howard tract could be repaired and fitted up with rooms to make a suitable residence for the gardener for about \$200; Mr. Moran's salary was fixed at \$80 per month.

May 16, 1905, San Diego Union, 5:1-2. L. J. Wilde takes over National City bank.

May 17, 1905, San Diego Union, 5:3. Meeting of Golden Hill Improvement Club last evening; Golden Hill park commissioners tendered their resignation, their work --- according to the amended city charter --- having been turned over to the City Park Committee.

May 17, 1905, San Diego Union, 6:1. Water system on city park; Commissioner Moran reports good start made on piping tract; house of Howard tract.

Minutes of the Board of Park Commissioners: May 24, 1905 . . . Moved by Mr. Moran, seconded by Mr. Marston, that the secretary make application to have E. A. Munn appointed a special police officer and game warden for service in the park . . . carried;
Mr. Hy Haley appointed a special police officer for service in the park; Moved by Mr. Marston, seconded by Mr. Moran, that the park superintendent notify the owner of the cattle grazing in the city park to remove the cattle.

May 25, 1905, San Diego Union, 3:5. Bridge bids to be opened; board of works may provide construction of Quince street structure today; other bridges.

May 25, 1905, San Diego Union, 7:6. To perfect city park boulevards; Commissioners plan for care of oiled drives during summer; want ordinance no. 1992 rescinded.

May 25, 1905, San Diego Union, 8:1-2. Monday, July 24, set aside as San Diego day at Lewis and Clark Exposition in Portland.

May 26, 1905, San Diego Union, 6:2. Don't mar the city park; proposed change in the width of Date street should not be made; L. A. Wright calls attention to what he terms an unfortunate alteration.

May 27, 1905, San Diego Union, 5:3. Destroying a park entrance; what Commissioners say of the movement regarding the south boulevard; Committee will recommend to Council that proposed changes be made.

May 29, 1905, San Diego Union, 5:2. Speaks with authority; proposed changes at street and park entrance would destroy value; Miss K. O. Sessions hopes they will not be made; plans were carefully thought out.

May 29, 1905, San Diego Union, 7:3. Spirit of change in San Diego; what it has already cost the community in growing trees; Father Horton implores the people to let the present park plans remain.

May 30, 1905, San Diego Union, 6:4. Defacement of the city park; Mrs. E. B. Scott, president of San Diego club, points out the folly of it; bad precedent established; discourtesy to Mr. Parsons; trees scarce anyway.

Minutes of the Board of Park Commissioners: May 31, 1905 . . . Salary of A. E. Webb, gardener in charge of Plaza and New Town Park fixed at \$65 per month.

June 2, 1905, San Diego Union, 1:1-2. President Theodore Roosevelt opens Lewis and Clark Exposition; touches button that starts machinery at the World's Fair in Portland.

June 3, 1905, San Diego Union, 6:1-2. Discussion of South Park Boulevard; councilmen decide to postpone action until they can hear more fully from the people; some arguments last evening.

June 4, 1905, San Diego Union, 4:1. EDITORIAL: The Park Question

June 4, 1905, San Diego Union, 12:1-3. San Diego's newspaper graveyard.

June 5, 1905, San Diego Union, 6:1-2. Fraternal Grove idea is growing.

June 5, 1905, San Diego Union, 7:4-6. H. E. Doolittle makes plain the position of Mr. Chick regarding controversy over Park Boulevard.

June 7, 1905, San Diego Union, 5:2. San Diego at the Lewis and Clark Exposition in Portland

June 7, 1905, San Diego Union, 7:6. Must not throw rubbish in park; warning signs to be placed by commissioners and special officers will enforce; boulevard conference.

June 7, 1905, San Diego Union, 8:1. Mayor Sehon vetoes new ordinance; believes establishment of grade of boulevard on Date street should be deferred; would wait settlement of the dispute as to width which it affects.

June 12, 1905, San Diego Union, 5:3. Property owners state their case; explain why a change in park plan was asked for and why it would be unjust not to grant it.

June 14, 1905, San Diego Union, 6:2. YMCA cadets camped last evening near the north end of Pound canyon after a march through the city park.

Minutes of the Board of Park Commissioners: June 20, 1905 . . . Mr. Moran elected president pro tempore; Mr. Moran reported that he had viewed the road on Switzer canyon and found it in pretty bad shape. One man is now at work clearing away boulders and another man will start work tomorrow. The road opposite Quince street into Pound canyon is being put in shape.

June 20, 1905, San Diego Union, 4:1. EDITORIAL: San Diego at Portland . . . Lewis and Clark Exposition.

July 1, 1905, San Diego Union, 3:1-4. Referendum held to be unconstitutional; far-reaching decision of Judge Torrance in the Boone-Butler writ of mandate case yesterday.

July 4, 1905, San Diego Union, 3:1-3. Crowds expected at Tent City for Fourth of July; literary exercises and picnic at Mission cliffs pavilion; band concerts at Coronado.

Minutes of the Board of Park Commissioners: July 5, 1905 . . . Moved by Mr. White, seconded by Mr. Moran, that the secretary ask the city attorney for his opinion of the legal rights of the Commissioners to grant portions of the city park for other than park purposes, i.e., for city purposes such as the Fire Department or Pound, and for private purposes such as the Powder House, gun clubs, etc. . . . carried; Mr. Moran reported that the Switzer canyon road was in shape for travel, but was far from being in perfect shape.

July 9, 1905, San Diego Union, II, 7:1-3. Father Horton bought San Diego sites at 26 cents an acre; what he found when he arrived.

July 13, 1905, San Diego Union, 6:3. Park Board hears report of work done Tuesday morning; repairs now being made to the road in Switzer canyon running toward the northeast corner of the park; new water main on 16th street with pipes supplying grounds of Children's Home; new toilets and tool house for New Town park completed.

July 22, 1905, San Diego Union, 1:1-7, 3:1-5, 5:1-2. Over 50 lives lost on gunboat Bennington.

July 23, 1905, San Diego Union, 8:1-3. Flags that have flown over California soil.

July 23, 1905, San Diego Union, 8:4-5. Robin Hood's forest in city park; Foresters of America will plant the first sapling there on Thanksgiving day.

July 24, 1905, San Diego Union, 4:1. EDITORIAL: A Noble Object.

Minutes of the Board of Park Commissioners: July 25, 1905 . . . Moved by Mr. Moran, seconded by Mr. White, that the Park Commissioners offer to Dr. David Griffiths of the Department of Agriculture the use of about five acres of land near the southeast corner of city park for a government forage experimental station for a length of time as may be required, not to exceed 15 years.

July 25, 1905, San Diego Union, 8:1-2. How to see the Portland Fair (Lewis and Clark Exposition) by Joseph Jessop.

July 26, 1905, San Diego Union, 5:1. The government experiment station for the growing of spineless cactus was a theme for discussion at the meeting of the Board of Park Commissioners yesterday morning.

A resolution was adopted setting aside or rather offering a section of the city park near the southwest corner of the street; a place which was viewed with much favor by agristologist David Griffith during his recent visit.

July 27, 1905, San Diego Union, 5:3. The Board of Park Commissioners at this week's meeting considered the proposed memorial for the Bennington dead, and it was the sense of the commissioners that a suitable place in city park would be an exceedingly appropriate place to erect the monument.

Minutes of the Board of Park Commissioners: August 2, 1905 . . . Julius Greus employed as gardener at Golden Hill park at \$60 per month.

August 11, 1905, San Diego Union, II, 7:1-2. A Navy shaft for the Bennington dead; Pacific Squadron will erect a shaft at the National Cemetery on Point Loma.

August 13, 1905, San Diego Union, 9:3. YMCA to have a fine new home; arrangements made to secure Burnham property at 8th and C streets.

August 17, 1905, San Diego Union, 6:1-2. Builders are busy throughout the city.

August 17, 1905, San Diego Union, II, 7:3-5. YMCA will soon be located on the Burnham residence; something of future plans.

August 17, 1905, San Diego Union, II, 1:2. Two veto messages of Mayor Sehon; resolution of intention to grade 28th and Ivy street returned to Council without his approval.

Minutes of the Board of Park Commissioners: August 29, 1905 . . . Department of Agriculture declined offer of five acres of land in city park.

September 9, 1905, San Diego Union, 5:1-3. Robin Hood and Sherwood Forest; much local interest at present centers in the old English wood from which a tree is coming to San Diego park, by Joseph Jessop.

Minutes of the Board of Park Commissioners: September 19, 1905 . . . Mr. Marston reported that he had written to Messrs. Parsons and Cooke in regard to the Fraternal Grove plantation plans; also, that he had asked Mr. Munn to plot the pipe plan of the city park as far as laid.

October 2, 1905, San Diego Union, 10:1-2. Cheers for new fence at Russ high school; trustees' action is popular with students; football plans are shaping themselves.

October 4, 1905, San Diego Union, II, 7:4-5. No Sunday games on Russ grounds; some provisions made by Park Commissioners in consenting to fencing of oval.

October 18, 1905, San Diego Union, 6:3. For small city parks; Golden Hill club last evening devoted considerable time to it.

October 24, 1905, San Diego Union, 5:1-2. Appellate court for Mayor Sehon; three judges declare he is rightfully mayor.

October 27, 1905, San Diego Union, 5:5. Fraternal grove is located; Park Commission approves site on line of new Golden Hill boulevard.

Minutes of the Board of Park Commissioners: November 7, 1905 . . . In the matter of the Fraternal Grove planting, it was decided to plant the group of 125 trees near the Children's Home.

November 20, 1905, San Diego Union, 8:1-2. Robin Hood oak in Fraternal Grove; George T. Magly tells some Sherwood Forest traditions that will cluster around sapling.

Minutes of the Board of Park Commissioners: November 28, 1905 . . . Moved by Mr. White, seconded by Mr. Moran, that a concrete sidewalk be placed at the southwest corner of 6th and Date streets from the park line on 6th street to the park line on Date streets, and that a concrete curb be placed on the south side of Date street, from 6th street to the west line of 8th street, and on the north side of Date street, from the east side of the alleyway opposite 6th street to and around the curve at the 8th street entrance as far as the *Lippia* lawn extends; on the south sides of Date street at the crossing of 6th, 7th and 8th streets to place culverts so as to obviate the stepping up and down from the sidewalks. . . . carried.

November 30, 1905, San Diego Union, 5:1-2. This is the day of Fraternal Grove.

December 1, 1905, San Diego Union, 8:1-2. A Fraternal Forest in the city park; Grove of Secret Societies dedicated yesterday with exercises replete with patriotic sentiment.

December 15, 1905, San Diego Union, 6:5. Residents of 9th ward want a new city park to be located on Logan Heights.

Minutes of the Board of Park Commissioners: December 19, 1905 . . . W. G. Barth permitted to erect a Polytechnic School building upon plot of ground appropriated by Russ high school, provided his plan is approved by the Board of Education and the Board of Park Commissioners.

December 29, 1905, San Diego Union, 3:1. Mayor Sehon filed veto message; he withholds his approval from ordinance establishing sidewalk grade near city park.

December 30, 1905, San Diego Union, II, 7:1-3. J. D. Spreckels to extend electric line to La Jolla.

1906

January 8, 1906, San Diego Union, 8:5. Government aid for city park a possibility if plans now being made are successful.

January 9, 1906, San Diego Union, 8:6-7. Park Board rooms ready; Commissioners will meet today in their newly furnished quarters in the city hall; landscape architect Cooke expected here soon; government official coming.

January 11, 1906, San Diego Union, 5:4. Cooke discusses park work with Commissioners.

January 13, 1906, San Diego Union, 3:3-4. Work planned for the City Park; considerable planting will be done along west side; curbing on the Date street entrance.

January 14, 1906, San Diego Union, 6:1-2. A thousand trees for city park; firs, spruce and pines will be furnished by Forestry bureau; Commissioners to do the planting.

Minutes of the Board of Park Commissioners: January 16, 1906 . . . Moved by Mr. Moran, seconded by Mr. White, that Mr. Cooke be authorized to plant about 200 trees on the west margin of the park between Quince and Nutmeg streets . . . carried.

January 16, 1906, San Diego Union, 3:4. Passed over Mayor Sehon's veto; Date street entrance to city park to be widened against his wish.

January 17, 1906, San Diego Union, 8:1-2. Renewed action in park improvement; Board of Park Commissioners receive report of architect Cooke and determine future action.

January 18, 1906, San Diego Union, 6:1-2. Death of Ephraim W. Morse.

January 22, 1906, San Diego Union, II, 7:5-7. The Passing of Ephraim W. Morse, by William E. Smythe.

January 29, 1906, San Diego Union, 8:3. Pacific Ocean Exposition to be held in San Francisco in 1913; federal government to aid financially.

Minutes of the Board of Park Commissioners: January 30, 1906 . . . After a discussion with Mr. Cooke in regard to park plans, it was resolved: that the plan for a lake with palm plantation opposite Laurel and Maple streets, east of the main drive, changing the park entrance from Kalmia street to Juniper street and opening a new entrance at Maple street be adopted and Mr. Cooke be authorized to prepare the drawings accordingly . . . carried.

January 30, 1906, San Diego Union, 3:3. Shrubs must be removed; such is provision of resolution of Council relative to south side of the park; Miss Kate Sessions ably defended the Park Board's plans; 30th street.

January 31, 1906, San Diego Union, 5:3. Beautiful lake for city park; Commissioners decide to have one constructed near Kalmia street entrance; city attorney to be asked his opinion as to powers of Board.

February 3, 1906, San Diego Union, 5:2. One hundred sample trees for city park have arrived; first shipment to be furnished by government came Friday.

February 6, 1906, San Diego Union, 3:2. Death of architect William Quayle.

February 9, 1906, San Diego Union, 5:2. To provide funds for small parks; Logan Heights Club wants money from sale of pueblo lots set aside.

February 9, 1906, San Diego Union, 8:1-2. Common Council exceeded authority says Mayor Sehon in veto of resolution prescribing plan of improvement of south park front; measure signed.

Minutes of the Board of Park Commissioners: February 13, 1906 . . . Report and plans of City Park as prepared by Samuel Parsons & Co. adopted by Park Commissioners as official plan of City Park . . . carried.

Minutes of the Board of Park Commissioners: February 20, 1906 . . . Residents of Golden Hill want boulevard built to connect the Golden Hill section with the 12th street entrance; residents asked to contribute about half of the estimated expense.

City attorney's communication regarding right of Park Commissioners to grant use of park lands for other than park purposes setting forth his reasons why it could not legally be done was ordered filed.

February 23, 1906, San Diego Union, 6:2. Superintendent of Schools Davidson to name a date for celebration of Arbor day here.

February 23, 1906. Ed Fletcher told the Park Commission yesterday the Bartlett Estate Co. will furnish men to plant 500 of the trees recently received from the government for planting in the city park.

San Diego Union, August 14, 1907, 12:4. Use sweepings in city parks.

San Diego Union, August 19, 1907, 5:1. Labor plans big celebration in City Park.

Minutes of the Board of Park Commissioners: August 20, 1907 . . . Voted that the National Bridge Co. be employed to prepare plans and specifications for the two bridges on the Golden Hill road, estimated cost not to exceed \$2,500 for the two bridges; the larger bridge to be a single-span bridge.

San Diego Union, August 22, 1907, 4:2. EDITORIAL: The Fiasco at Jamestown.

San Diego Union, August 22, 1907, 12:3. Fine homes to be erected at Hillcrest.

San Diego Union, August 25, 1907, 8:1. Park Commissioners plan concrete bridges.

San Diego Union, August 26, 1907, 12:4. Line sides of streets with palms.

San Diego Union, August 28, 1907, 1:1-7. San Diego and Arizona Railroad construction begins next week.

San Diego Union, August 28, 1907, 2:4. Henry Seabold, park warden, kills 1,000 rabbits.

San Diego Union, August 28, 1907, III, 18:1-7. New high school being erected at cost of \$200,000; F. S. Allen architect.

Minutes of the Board of Park Commissioners: August 29, 1907 . . . George Cooke tendered resignation as Superintendent of Parks . . . accepted; Cooke was vice president and manager of Southern Construction Co. . . . Voted that the president authorize a thorough fertilization of the palms on the Plaza, in accordance with suggestion of Mr. Cooke.

San Diego Union, August 31, 1907, II, 10:1-7. Chamber of Commerce urges work on 200 miles of boulevards; George Cooke also advocates building of at least 50 miles of system each year.

San Diego Union, August 31, 1907, II, 14:1-2. Labor Unions to enjoy a big celebration; plans include all-day picnic in City Park grove.

San Diego Union, September 1, 1907, II, 11:2-6. Harrison Albright, architect, completes plans for Coronado library.

San Diego Union, September 3, 1907, 1:3. William Randolph Hearst, chief speaker at Jamestown Tercentennial Exposition, expresses views on labor unionism, capitalism and trusts.

San Diego Union, September 3, 1907, 6:1. Huge clam shell to be centerpiece of fountain in the ravine at the entrance to Golden Hill Park; "find" made by architect Gay at Frank Holzner's shell shop on 6th street.

San Diego Union, September 3, 1907, 8:1-2. Labor Day celebration, races, contests, speeches in City Park; about 4,000 people attended.

San Diego Union, September 5, 1907, 5:3. High School is crowded to limit; enrollment of 550 pupils made additional accommodations urgently necessary.

San Diego Union, September 5, 1907, 8:1. John Nolen of Cambridge, Mass. engaged by Civic Committee to draw plans for improvement of San Diego.

San Diego Union, September 5, 1907, II, 9:1. Mayor proclaims Saturday half holiday for celebration of beginning of grading of Atchison Topeka and Santa Fe Railroad system to San Diego.

San Diego Union, September 7, 1907, 4:1. EDITORIAL: A More Attractive San Diego . . . regarding hiring of John Nolen.

San Diego Union, September 7, 1907, 6:1. Board of Education wants Supervisors to raise \$85,000 for new Russ; Commissioners think rate will be too high.

San Diego Union, September 8, 1907, 1:1. Thousands see dirt turned for construction of San Diego and Arizona Railroad.

San Diego Union, September 8, 1907, III, 17:5-6. Construction work on west wing of \$1 million U. S. Grant Hotel completed.

San Diego Union, September 8, 1907, III, 1:7. Board grants \$53,500 for completion of school; Supervisors agree to make special tax levy for new Russ building.

Minutes of the Board of Park Commissioners: September 10, 1907 . . . Henry Seabold reported shooting 1,000 rabbits; Commissioners allowed him \$50.00 in addition to net proceeds of his hunting.

San Diego Union, September 11, 1907, 5:4. Rushing work on Chutes Park; grounds on Normal School being cleared of brush for work.

San Diego Union, September 12, 1907, 12:2. Violators of quail hunting law had better be careful' Henry Seabold, park warden, has been clothed with the necessary authority to make arrests.

San Diego Union, September 15, 1907, 5:2. Get attractions for Chutes Park; W. L. Warner rushing work on new amusement resort on Normal Heights.

San Diego Union, September 17, 1907, 5:1. Board of Education decides on Harrison Albright as architect of new school at 12th and E; structure will cost approximately \$80,000.

San Diego Union, September 17, 1907, 8:4. Canyon Park is name of new amusement place on Normal Heights.

San Diego Union, September 21, 1907, 5:2. 531 students are enrolled at Russ; 262 boys and 269 girls.

Minutes of the Board of Park Commissioners: September 24, 1907 . . . Mr. Gay's design for the Golden Hill drinking fountain was submitted to the meeting and the matter of the design was referred to Mr. Cooke. . . . All the trees on Park Avenue that interfered with the row of palm trees have been cut down; palms will be planted in a few days.

San Diego Union, September 25, 1907, 14:4. Miles of walks completed in Canyon Park.

San Diego Union, September 26, 1907, 14:4. Park Commissioners have appointed attorney L. A. Wright to press the matter of removing the City Pound to the site of the stables at the head of 20th street.

San Diego Union, October 6, 1907, II, 13:2-7. Harrison Albright architect of new plans for Timken Building.

San Diego Union, October 6, 1907, II, 20:3. Property owners around city stables at head of 20th street object to removal of City Pound.

San Diego Union, October 8, 1907, 14:4. Mayor Forward recommends rock pile as means of curtailing annual hobo nuisance.

San Diego Union, October 10, 1907, II, 9:5. Vandals persist in driving over sidewalks along Park Avenue, the fine boulevard which has been completed along the west side of City Park within the past few days; three of the palm trees set out by the Park Commission have been damaged in this manner.

San Diego Union, October 10, 1907, 14:3. Residents win Pound protest; Park Commissioners decided against location near 28th street.

San Diego Union, October 17, 1907, II, 9:3. Site north of Old Town secured for isolation hospital.

San Diego Union, October 18, 1907, II, 9:3-5. Nolen outlines plans for city.

San Diego Union, October 20, 1907, 9:1-2. Nolen says San Diego's hope is in early action.

San Diego Union, October 20, 1907, II, 9:2-6. Mrs. W. S. Waterman plans residence of William Clayton at 6th and Laurel streets.

San Diego Union, October 21, 1907, 4:1. EDITORIAL: Future Depends on the Present regarding article by John Nolen.

San Diego Union, October 22, 1907, 14:3. Strangers pay \$10 each for shooting quail in City Park; office Pringle made arrests Sunday.

Minutes of the Board of Park Commissioners: October 30, 1907 . . . Voted that the Park Engineer locate road for entrance to the park on the east side at Juniper street.

San Diego Union, November 2, 1907, 14:2-5. Nolen delivers lecture on Civic Improvement at San Diego club house; advocates more parks in many sections; San Diego is sure of great future if it acts now.

San Diego Union, November 3, 1907, 5:1. Park Commission has made arrangements for early completion of west boulevard in City Park which runs out from Switzer Canyon and through the Howard Tract, connecting with the boulevard extending north from the street past the Russ School; Bids are to be called for two bridges; After the bridges are installed it will be possible to make the distance between the Howard Tract section of the park and the Golden Hill park within the lines of the park; At present it is necessary to leave the park and travel by either C or D streets.

San Diego Union, November 3, 1907, 5:2. Park Commissioners will undertake to use street sweepings in parks.

San Diego Union, November 6, 1907, 4:1. EDITORIAL: A Rock Pile Is Needed.

It appears to be highly practicable to establish a rock pile. In fact, the plan is generally favored by officials who have to deal with the hobo bands. At present the county jail is swarming with members of the fraternity. It is high time to put them to work.

San Diego Union, November 13, 1907, 5:1. Park Board asked to give land for school; Commissioners meet Brooklyn Heights representative and Education Board members; say no funds left to buy property; Marston says granting of petition would be bad precedent.

San Diego Union, November 14, 1907, 4:2. EDITORIAL: The Brooklyn Heights School

There was sound sense in the remark of one of the commissioners who declared that in a city which has raised nearly half a million for the extension of the school system it looks a little bad to be calling for the donation of a lot from the park board.

San Diego Union, November 14, 1907, 7:2. Work has commenced on the installation of the fountain in the Golden Hill park under the auspices of the Park Commission.

San Diego Union, November 14, 1907, 8:3. Nolen scores city for ignorant plan of up-building.

San Diego Union, November 15, 1907, 5:3. Eucalyptus Plantation Co. purchased a 219-acre ranch near Carlsbad yesterday; ground will be plowed immediately preparatory to the planting of eucalyptus trees.

San Diego Union, November 17, 1907, II, 17:4. Nolen taken on a trip over bay.

San Diego Union, November 18, 1907, 12:1. New Russ school near completion.

San Diego Union, November 22, 1907, II, 9:3. Architects Gill and Meade have drawn plans for additions to Children's Home.

Minutes of the Board of Park Commissioners: November 26, 1907 . . . Voted that piece of land in the canyon east of Boulevard and opposite Maple to Nutmeg streets be designated as a playground . . . Letter sent to Board of Public Works, November 25, 1907, stating Board will allow City Pound and pound keeper's house to remain providing changes suggested be made; present corral to be reduced to one-half its present size; manure piles and rubbish to be moved away; houses and corrals must not be a blemish upon the appearance of that part of the park . . . signed G. W. Marston, president.

San Diego Union, November 30, 1907, 12:2. Campaign against hobo element is being waged.

San Diego Union, November 30, 1907, 12:4. Ed Fletcher named Lieutenant Colonel yesterday.

San Diego Union, December 3, 1907, 8:3. Marston asks Board of Public Works to reduce Pound to half its size and to beautify the grounds with trees and shrubs.

San Diego Union, December 4, 1907, II, 9:2. Park Board decides against school site.

San Diego Union, December 6, 1907, II, 9:3-6. Second squadron, U.S. Pacific Fleet, arrived in harbor yesterday for six week stay.

Minutes of the Board of Park Commissioners: December 9, 1907 . . . Voted that it is the intention of the Board to connect at some future time the road running up Switzer Canyon with the extension of Juniper street on the east side of the park.

San Diego Union, December 10, 1907, II, 9:3. City Pound is ordered repaired.

San Diego Union, December 13, 1907, 5:1. Park Board to use street sweepings in sections of reservation.

San Diego Union, December 13, 1907, II, 9:3. Repairs for City Pound.

San Diego Union, December 22, 1907, 11:2. No more trash will be dumped in City Park; haulers will be told of ordinance covering nuisance.

San Diego Union, December 22, 1907, 12:2. The Park Engineer has suggested to the Board of Park Commissioners that the oiled boulevard that enters the park bear off to the north at an angle similar to that of 12th street instead of skirting the margin of the park for one block in an easterly direction; change would give the new high school building more foreground.

1908

San Diego Union, January 1, 1908, IV, 22:1-7. Fine boulevard and park system would be a credit to larger city; immense 1400-acre park is being made into scene of beauty; coast road from San Diego to Los Angeles will afford enjoyable drive for autoists.

San Diego Union, January 1, 1908, V, 27:1-7. San Diego Company a prize winner at Jamestown Tercentennial Exposition; 14 medals secured in addition to coveted Wiley prize, by James A. Jasper.

San Diego Union, January 1, 1908, V, 42:1-3. Big Naval Coaling depot now under construction.

San Diego Union, January 3, 1908, 14:2-3. Frank and Warren Kimball, pioneers of National City, to be honored.

San Diego Union, January 7, 1908, 12:2-5. Bennington memorial shaft unveiled today.

San Diego Union, January 8, 1908, II, 9:1, 10:1-7, 14:5. 2,500 people see shaft for Bennington heroes unveiled.

San Diego Union, January 24, 1908, 7:1. George Cooke outlines system for beautifying streets of city with trees.

San Diego Union, January 30, 1908, II, 9:4. Driveway from west end of park to 28th street to be opened soon.

Minutes of Board of Park Commissioners: February 1, 1908 . . . Voted that 100 men be employed for "relief work" for one week beginning February 3 at \$1.00 per day per man.

San Diego Union, February 23, 1908, 22:1. New road through park begins at 8th and Elm and runs north third of a mile.

San Diego Union, February 27, 1908, 14:1. Arbor Day will give way to Fleet welcome; Mayor and Superintendent of Schools agree both celebrations not wanted.

Minutes of Board of Park Commissioners: March 2, 1908 . . . Proposition of a rock pile on the park was received favorably.

San Diego Union, March 5, 1908, 3:1, 7:3. War ships will come inside harbor; Navy officials say half Admiral Evans' fleet is certain to anchor in Bay; stay of several days is assured; Committee hard at work on reception plans; D. C. Collier, chairman of finance committee, announces result of canvass for funds; city has set out to raise \$20,000 for entertainment of Fleet; plan to have a water carnival on Bay, small yachts in gala dress, rowing clubs on parade, display of fireworks over the wall, ball for officers and petty officers, free nights at city's three stock theaters for enlisted men, 10,000 bronze medals ordered for occasion.

San Diego Union, March 5, 1908, 8:2-5. Park Commissioners set aside 15 acres for athletic field in City Park on A street between 26th and 27th streets in Golden Hill section; provisional plans by landscape architect George Cooke; half-mile track is part of plan; baseball, tennis and basketball courts to be laid out for public use; there will be no fence surrounding the field and it will be open at all times.

San Diego Union, March 8, 1908, 20:2. Governor James M. Gillett will greet Fleet at San Diego.

San Diego Union, March 8, 1908, 20:4. Golden Hill section of park has a new fountain at the west end, near the 25th street entrance; made of irregular pieces of rock; circular in form with a diameter of about four feet; portion of funds for improvement contributed by people of Golden Hill.

San Diego Union, March 9, 1908, 14:7. City Park is searched for little ones; finally return after a small army of hunters has about given up.

San Diego Union, March 12, 1908, 14:3. \$6,500 price for 75 ft. at northwest corner of Quince and Park Avenue; there is an unprecedented demand for building sites located near the park according to George H. Hazzard, manager of the Cottage Realty Co.; more then \$70,000 worth of residences are either underway or about to be built along the park between Laurel and Upas streets.

San Diego Union, March 15, 1908, 5:4. Chamber of Commerce to send exhibit to Alaska-Yukon-Pacific Exposition in Seattle.

San Diego Union, March 15, 1908, 1:7. Mayor Forward, in wire to William Clayton, director-general of the Fleet celebration, says Fleet will be here April 12 to 15.

Minutes of Board of Park Commissioners: March 24, 1908 . . . Voted that the matter of erecting a grand stand on the park for Evans' Fleet celebration be referred to Mr. Marston . . . Voted that Southern Construction Co. be asked to furnish plan for improvement of Plaza . . . Voted that Park Commissioners cooperate with County Supervisors in the establishment of a rock pile for chain gang in the Pound enclosure.

San Diego Union, March 26, 1908, 5:1. J. W. Sefton, one of city's self-made men, is dead; president of San Diego Savings Bank succumbs to attack of La Grippe; leaves one of the finest aviaries in city, located on Park Avenue in the rear of his residence; owned 900-acre ranch in Jamacha valley.

San Diego Union, March 26, 1908, 5:2. L. A. Wright of Park Commission and engineer Cook have been detailed by Commission to take charge of beautifying that section of City Park between the club house of the Country Club and the Howard Tract, nearly all of which is used by golf enthusiasts; Club has offered to set out trees and shrubbery furnished by Park Commission along sides of east boulevard, extending from the High School past the Howard Tract.

San Diego Union, March 27, 1908, 1:7, 2:1-5. Program for Fleet's stay in San Diego forwarded to Rear Admiral Evans for approval.

San Diego Union, March 27, 1908, 24:1. Marston outlines City Beautiful; urges for consideration civic improvements along far-reaching lines; thinks \$1 million would cover requirements; advocates condemnation of real estate and voting of municipal bonds.

San Diego Union, March 29, 1908, 11:2-6. Ten miles of roads completed; more authorized by bond issue; 14,000 trees recently planted in comprehensive plan of adornment for 1400-acre plot.

San Diego Union, March 29, 1908, II, 13:1. Supreme Court rules bonds are legal; orders released \$790,712 municipal issue that has been tied up for months; way paved for big civic improvements.

San Diego Sun, April 1, 1908, 1:1. Rear Admiral Evans comes ashore very weak.

San Diego Sun, April 2, 1908, 1:1-2. Evans much better, but had rough trip.

San Diego Sun, April 2, 1908, 1:1-2. Fine arches for Fleet celebration parade.

San Diego Sun, April 2, 1908, 5:2-3. Architect C. H. Edmond Blackmann has sketched a design for a memorial monument in honor of the visit of the Evans' Fleet to San Diego; monument to be placed in the City Park on the spot where the welcome to the Fleet will be given.

Minutes of Board of Park Commissioners: April 6, 1908 . . . Voted that Engineer Cooke be instructed to remove seats from Plaza not later than the morning of the arrival of the Fleet.

San Diego Sun, April 8, 1908, 3:3-4. Disbursements to the amount of \$19,271.23 are shown in the Report of the City Park Commission which has been filed with Mayor Forward.

San Diego Union, April 8, 1908, 10:5-7. Annual report outlines year's work in City Park.

Work begun in 1904 under Parsons and Cooke plans

San Diego Union, May 2, 1908, 8:2. George W. Marston will take charge of building of Fort Stockton and Old Town boulevards and the boulevards in City Park.

One of the boulevards in the City Park is to extend the entire length of Pound Canyon, the southern end beginning at 10th street. The other will start at a point near 18th and A streets, running in a northeasterly direction. The two boulevards are to cost \$10,000. [They are] to be constructed from proceeds of bonds described in Ordinance No. 2736 of the Ordinances of the City of San Diego, approved on the 29th day of January 1907. [The] bonds have been sold and money placed in the Treasury of the City of San Diego.

San Diego Union, May 2, 1908, 13:2-5. 9th anniversary of dedication of Normal School observed yesterday.

San Diego Union, May 3, 1908, 7:2, 8:1-2. Businessmen invited to inspect High School.

Minutes of Board of Park Commissioners: May 4, 1908 . . . Bill presented to Fleet Reception Committee for expenditures by Park Board which did not go into permanent improvement; to wit \$314.28. . . . Entrances to park from south side at 25th and 27th streets ordered.

San Diego Union, May 5, 1908, 8:1. Board of Education split on bill for stone for High School; Hercules Cement Stone Co. wants an additional \$837.50.

San Diego Union, May 5, 1908, 8:3. Rock pile waits for offenders; emergency ordinance makes labor compulsory for city prisoners; Park Commissioner Wright said the present operation of the rock pile was costing the Park Commission twice what they were getting from it; objected to providing a noon-day meal for prisoners; the Board could not consent to the taking away of one mil from the eight cents allowed by the Charter for the support of parks.

San Diego Union, May 7, 1908, II, 9:7. Surplus of \$1,752 left from Fleet celebration; subscriptions exceeded amount necessary.

San Diego Union, May 7, 1908, II, 14:3. Russ High School is open to public.

San Diego Union, May 8, 1908, 5:1. Park funds are growing small; enough money for maintenance, but none left for development work; \$12,000 of the money coming to the Park Commission from the annual tax levy has been expended in the first four months of the year; only \$1,000 per month for the maintenance of parks left for the remaining eight months of the year.

It is hardly expected that the Park Commission will be able to put out much money this year on the park system of oiled boulevards.

Ten thousand dollars of the bond boulevard money is to be devoted to boulevard building in city parks which will be completed during the present year.

San Diego Union, May 17, 1908, III, 17:1, 21:2-4. Irving Gill drawing of proposed new Children's Home dormitory.

San Diego Sun, May 20, 1908, 5:3-4. Colonel Collier sees end of boss rule; has returned from Republican state convention in San Francisco.

San Diego Union, May 20, 1908, 11:3. 57 will graduate from High School week of June 21.

San Diego Union, May 22, 1908, 5:1. Fleet Committee is surprised by park bill; demand for \$328.17 for putting park in shape for Fleet exercises which occurred there April 16; itemized account given chiefly for labor and extra police protection; letter from Leroy A. Wright explaining bill; Chairman E. C. Hickman: "The City Park is a public place and there is no reason why this committee should pay for arrangements for the celebration there which was unauthorized by it."

San Diego Sun, May 23, 1908, 8:1. EDITORIAL: False Bay as a Public Park.

San Diego Union, May 23, 1908, 11:5. High School retains Russ insignia; after debate student body decides to keep letter "R" on uniforms; school authorities have decided school should be named "San Diego High School".

San Diego Union, May 25, 1908, II, 9:3. Council may accept offer of citizens to build roads; expected to turn over \$70,000 bond money to the Chamber of Commerce.

San Diego Union, May 26, 1908, II, 9:5. Proposition to turn idle money over to Chamber not carried; lacks one vote of necessary two-thirds; will lay over until next meeting; Councilman McNeill opposed measure because the bonds had been voted with the understanding that the work would be let at public contract; Colonel Collier, president of Chamber of Commerce, addressed Council on behalf of proposal; Contractor John Engebretson opposed.

San Diego Sun, May 27, 1908, 8:2-3. Under the Peppers in the Park.

San Diego Union, May 28, 1908, 11:1. Members of Chamber of Commerce special boulevard committee still hopeful Council will allow them to expend the \$72,000 bond money by private contract under supervision of the committee.

San Diego Sun, May 29, 1908, 2:1. Gill and Meade design \$4,860 fountain for Mount Hope Cemetery.

San Diego Union, June 5, 1908, 11:1. Board of Public Works referred matter of boulevard work to city engineer for report; rights-of-way to be secured and other conditions relating to construction known; contractors expected to fight if the Board does not advertise for bids.

San Diego Union, June 5, 1908, 5:1. Lee F. Hammer, field secretary of the Playground Association of America, addressed members of the Ladies' Civic Committee yesterday on children's playgrounds at Germania Hall; urged playgrounds as preventatives of crime; meeting resolved to ask School Board to reserve space for the purpose.

San Diego Union, June 7, 1908, III, 17:1. Commissioners to oversee road work inside city; to confer with mayor and city officials over plans for boulevards; does not necessarily bar out contractors; intent of appointment is only to see that work is properly done; Board of Public Works has named Messrs. Spreckels, Scripps and Spalding as overseers of the work for constructing boulevards inside city; provision for which was made at the last election; this in addition to their work on County Highway Commission.

San Diego Union, June 8, 1908, 11:3. Contractors unite to prevent Board of Public Works from adopting boulevard plans.

San Diego Sun, June 10, 1908, 8:1-2. Under the Peppers in the Park.

San Diego Union, June 10, 1908, 8:1. Commission takes up highway task; three members qualify for city-county supervision of boulevards; Cooke will assist engineer with plans.

San Diego Union, June 18, 1908, 14:1. Chamber of Commerce selects D. C. Collier to arrange reception for Gifford Pinchot, forestry chief.

San Diego Union, June 19, 1908, 8:1. Boulevard work to begin at La Jolla next week; Commission will not attempt to build any of the other boulevards until the one from San Diego to La Jolla is completed.

San Diego Union, June 19, 1908, II, 9:2. U. S. Grant, Jr. resigned from Park Board yesterday; Mayor Forward will recommend appointment of L. P. Swayne to fill vacancy.

San Diego Union, June 21, 1908, 7:1. Cooke reports on north coast and east to Imperial Valley boulevard routes; highway commission engineer completes inspection of two highways; will proceed with construction estimate.

San Diego Union, June 23, 1908, 8:1. Park Commission will accept the gift of an ornamental fountain to be installed in the city Plaza; only \$10,000 allotted for improving and beautifying city parks this year.

San Diego Union, July 1, 1908, 5:1. Park Commission takes preliminary steps for construction of park boulevard, as provided for in the \$10,000 park boulevard bond issue, at meeting yesterday afternoon; Engineer Cooke instructed to make an estimate of the work to be done; roadway as proposed will begin at 11th street and will extend two miles in length; George W. Marston elected president and Lawrence P. Swayne secretary at meeting.

San Diego Union, July 1, 1908, 8:4. San Diego Electric Railway keeping work train busy on Adams Avenue car line; hauling gravel from Normal Heights quarry of Southern Construction Co. to Mission Cliff Park, where a children's playground is being constructed.

San Diego Union, July 7, 1908, 7:1-2. Revolutionists carry out attack on Mexican border town Mexicali.

San Diego Union, July 9, 1908, 3:3. Captain W. E. Lewis seeks exhibits at Chicago for Alaska-Yukon-Pacific Exposition in Seattle.

San Diego Sun, July 15, 1908, 8:1-2. Under the Peppers in the Park.

San Diego Union, July 25, 1908, II, 9:1-2. Pass route from Boulevard to desert; engineer Cooke makes informal report after return from trip; San Felipe declared to give easiest grades.

San Diego Union, July 16, 1908, 8:1. Plan to create American Venice; Southern California promoters to build extensive system of canal waterways.

San Diego Sun, July 27, 1908, 8:2-3. Under the Peppers in the Park.

Minutes of Board of Park Commissioners: July 30, 1908 . . . Mr. Swayne took place on Board to fill vacancy caused by resignation of U. S. Grant, Jr.

San Diego Sun, August 2, 1908, 8:2-3. Under the Peppers in the Park.

San Diego Sun, August 3, 1908, 8:2-3. Under the Peppers in the Park.

San Diego Union, August 3, 1908, 12:1-2. Engineer George Cooke badly hurt in runaway; thrown down bank on Conejo Mountain Road; sustains fracture of five ribs and dislocates shoulder; two companions escape; harness breaks and fiery team take fright.

San Diego Sun, August 4, 1908, 8:2-3. Under the Peppers in the Park.

San Diego Union, August 4, 1908, II, 9:1. Cooke's doctors fear pneumonia.

San Diego Sun, August 6, 1908, 1:4-5. Engineer Cooke dies.

San Diego Union, August 7, 1908, 8:1. Injuries fatal to architect Cooke; fracturing of ribs causes pneumonia; Lodge of Elks to conduct funeral of fellow member next Saturday morning..

San Diego Sun, August 8, 1908, 1:3-4. Daniel Burnham or Samuel Parsons may succeed Cooke; Highway Commission pays tribute to engineer's memory by considering informally who may be retained to carry on his work.

San Diego Sun, August 8, 1908, 8:1-2. Under the Peppers in the Park.

San Diego Union, August 8, 1908, 14:2-3. Cooke's funeral to be held today; civic bodies pass resolutions of respect for late landscape engineer.

San Diego Union, August 9, 1908, 7:1. To commemorate Cooke's work; fine oak grove near El Cajon may be named in his honor.

San Diego Union, August 9, 1908, 12:4. Obsequies for George Cooke; body of dead architect is buried in Greenwood Cemetery planned by himself.

San Diego Union, August 10, 1908, 4:1. EDITORIAL: Tribute to Mr. Cooke.

Minutes of Board of Park Commissioners: August 14, 1908 . . . Voted to plant a grass parking on the D-street Plaza as a temporary improvement; lack of funds preventing the larger and more elaborate embellishment planned by Mr. Cooke. . . . Application of Messrs. McKee and Ganott (?) for use of D-street Plaza for public meeting September 9 denied. . . . Address of Park Commissioner George W. Marston at the funeral service of Mr. George Cooke, held in Elks Hall, August 8, 1908.

San Diego Union, August 14, 1908, 7:3. Commissioner Spalding in charge of building Point Loma road; Commissioner Scripps supervising the La Jolla boulevard.

San Diego Union, August 22, 1908, 6:1. Highway Commission considers successor to George Cooke; work as outlined by late engineer going ahead under assistants.

Minutes of Board of Park Commissioners: August 27, 1908 . . . Discussion of Powder Magazine now located in park; Mr. McKenzie, president of Western Metal Supply Co., willing to pay for use of powder house; Park Board concerned about liability in case of explosion. . . . Voted that lawn be placed upon entire expanse of the Plaza and the work be done as soon as possible.

San Diego Union, August 28, 1908, 5:3. Highway Commission finding difficulty in securing capable chief to succeed engineer Cooke.

Minutes of Board of Park Commissioners: September 4, 1908 . . . Mrs. J. W. Sefton's gift of birds to City Park accepted.

San Diego Union, September 4, 1908, 6:1. Cooke's will filed in court; estate valued at \$4,000 left by late landscape engineer.

San Diego Union, September 13, 1908, II, 9:1. City-County rock pile may be abandoned; Park Commission runs out of funds to maintain work for prisoners.

San Diego Union, September 13, 1908, III, 22:3. Floral Society to honor Cooke; association to start library on horticulture in his memory.

San Diego Union, September 15, 1908, 5:5. Begin work on Park Boulevard.

San Diego Union, September 16, 1908, 14:3. Water main laid for Park Boulevard.

San Diego Union, September 26, 1908, II, 9:4. Rock pile to be perpetuated; Municipality agrees to purchase stones broken by chain gang.

San Diego Sun, September 29, 1908, 8:1. Under the Peppers in the Park . . . "In your time and mine, Nebraska, I do not think any part of the park will be sold."

San Diego Union, October 9, 1908, 6:1-5. Highway Commission submits report.

San Diego Union, October 9, 1908, 14:5. Mission Valley asks boulevard.

San Diego Sun, October 12, 1908, 8:1. Under the Peppers in the Park.

San Diego Sun, October 13, 1908, 8:1. Under the Peppers in the Park.

San Diego Union, October 18, 1908, 6:3. Park on Olive street, between 2nd and 3rd streets, offered to city.

San Diego Union, October 19, 1908, 7:1. Considerable improvements to stables at opening of Switzer Canyon.

San Diego Sun, October 22, 1908, 1:4-5. Father Horton will be 95 years old Saturday.

San Diego Union, October 25, 1908, 8:2-3. The late Herman Lee Ensign bequeathed fountain to city; National Humane Alliance gift may be placed in City Park.

Minutes of Board of Park Commissioners: November 9, 1908 . . . Commissioners Wright and Swayne took a trip over the new road and inspected the new bridge in Switzer Canyon.

San Diego Union, November 13, 1908, 14:3. Park Commissions have installed the large bird cage containing 500 birds of various species given to park by the Sefton estate at the rear of the John Gay residence in City Park.

Minutes of Board of Park Commissioners: November 18, 1908 . . . Commissioners looked over the boulevard and bridges under construction and conferred with Mr. Gay, the architect, and Mr. Munn, the superintendent of boulevards.

Minutes of Board of Park Commissioners: November 28, 1908 . . . Commissioners went to investigate the matter of making an opening into the Park at 26th street.

Minutes of Board of Park Commissioners, City Park, November 28th, 1908.

Commissioners present, Marston, Wright and Swayne.

The Commissioners went to investigate the matter of making an opening into the Park at 26th street.

After investigating same, it was moved and carried that there be a 20 ft. alley way be left on the south side of the Park between 24th and 28th streets, and that the opening of 26th into the park be left to Commissioner Wright, and if he found the public along 26th street desired the same left open, that they be given an entrance there if possible, after the laying out of the alley way.

After looking over the fountain and some of the walks the meeting adjourned.

L. P. Swayne, Sec.

Commissioner Wright's office, Keating Block, San Diego, Cal., December ?, 1908

Commissioners present, Marston, Wright and Swayne.

The regular payroll was approved and passed to the Auditor for payment as follows:

S. E. Webb (La Jolla)		\$1.00

Minutes of Board of Park Commissioners: December 4, 1908 . . . Colonel D. C. Collier offered to plant the 60 acres owned by the city at Point Loma as a city park . . . Marston to write to Wilber D. Cook as to his employment as landscape architect of City Park.

San Diego Tribune, December 7, 1908, 4:2. Council to consider exchange of lands for Torrey Pines viewpoint on ocean front.

San Diego Tribune, December 7, 1908, 4:2. Charles M. Faye, eastern newspaperman, praises City Park for its hills and ravines.

San Diego Union, December 13, 1908, 5:2. Home for Hugo Klauber on Park Boulevard planned by architect Irving Gill.

San Diego Tribune, December 17, 1908, 5:2-3. War Department plans new buildings for Fort Rosecrans.

San Diego Tribune, December 18, 1908, 6:2. Arthur Putnam completes bronze statue of Father Serra for E. W. Scripps' ranch house at Miramar.

San Diego Tribune, December 23, 1908, 6:2. Louis Wilde plays Santa Claus to newsboys

Minutes of the Board of Park Commissioners: December 28, 1908 . . . Mr. Cook employed for one month as landscape artist of City Park, beginning January 15, 1908, at \$200 per month.

Minutes of the Board of Park Commissioners: December 28, 1908

A letter from Mr. Cook was read. It was moved that the Board employ him for one month, beginning as near Jan. 15, 1909 as possible at \$200 per month, and expenses, as landscape artist for the park. The motion was carried.

It was moved and adopted that a team be employed at La Jolla to work on the Park there, and that Mr. Webb be changed to the Plaza from La. Jolla.

After discussing the laying out of paths in the park, and the planting various sections, the meeting adjourned.

L. P. Swayne, Sec.

.Minutes of Board of Park Commissioners: December 29, 1908 . . . Lawnmower to be purchased for cutting lawn on Plaza. . . . Commissioners discussed plans of the new kiosk and Mr. Gill was asked to draw plans of the Plaza.

Minutes of Board of Park Commissioners: December 30, 1908 . . . The Secretary was authorized to collect rent from Western Metal Supply Co. for Powder House at the rate of \$15.00 per month from September 1, 1908. . . . Work on Pound Canyon road to be prosecuted under joint management of Mr. Munn and Mr. Gabrielson.

Office of L. P. Swayne, 1322 D St., December 30, 1908.

Commissioners present: Marston, Wright and Swayne.

The Secretary was authorized to collect rent from the Western Metal & Supply Co. for Powder House in the Park at the rate of \$15.00 per month from September 1st, 1908.

On motion of Mr. Wright, it was ordered that the work on the Pound Canon road be prosecuted under the joint management of Mr. Munn & Mr. Gabrielson, the latter to have charge of the moving [sic] of all dirt, with his own teams, and the manner in which the same shall be handeled [sic]; that Mr. Munn shall have full charge of the laying out of the Boulevard, the manner in which it shall be finished, and to keep the time of the workmen & teams. It is further ordered that in case of any conflict in authority rising between the two, the same shall be referred to and adjusted by the Board of Park Commissioners. Mr. Gabrielson to receive no further

compensation for his services, but to have the same wage for his teams as he did in the construction of the Switzer Canon Boulevard.

On motion the meeting adjourned.

L. P. Swayne, Sec.

1909

San Diego Union, January 1, 1909, IV, 4:1-7. Outline of John Nolen's beautification plan for San Diego; Civic Center, Paseo and Esplanade.

San Diego Union, January 1, 1909, IV, 1:8, 2:1-4, 3:1-4, 4:1-2. City park and waterfront included in Nolen plan; project would take many years to complete.

San Diego Union, January 1, 1909, IV, 4:2. City has great 1400 acre park; many trees and shrubs planted and boulevards constructed last year.

San Diego is a good place in which to live. This is so trite and universally well known as to scarcely need repeating. It is an attractive, a beautiful city today; but is to be made every more so during the coming year. A boulevard commission, which has gained for itself not only a state but a national reputation, is planning a system of boulevards that will place San Diego County well to the fore in the good roads movement before the year is hot.

The piece de resistance of these plans, however, the one which will doubtless appeal to the greatest number of people is the city's 1400-acre park. The park commission has extensive plans outlined for beautifying this vast tract and, as fast as funds are made available, trees will be planted, sidewalks laid out, and the 1400-acres made a beautiful resting spot for the city's residents.

City Park, situated on a high slope of ground, commands a magnificent view of bay, ocean, mountain and valley.

Already work on boulevards through the park is underway and will be completed early this year. When these contour drives have been completed, with the natural canyons that cut through the park, and the shade trees and shrubs planted, the city's park will be one of the chief show places of Southern California.

In addition to this, there are several other parks of smaller size in the city which will aid in the park scheme planned, among the principal ones being the Pavilion park, commanding a magnificent view of Mission valley, Golden Hill park and the plaza.

During the past year considerable improvements have been made in the big 1400-acre tract, among them being the planting of numerous trees, principally eucalyptus, shrubs and flowers. An immense aviary, containing some 300 rare and beautiful birds, was also erected the past year.

During 1908 nearly \$1,000 was expended on improvements at La Jolla park, and a magnificent drive to Torrey pines was constructed. Much improvement work was accomplished in the other parks.

It is expected that the park lands will be augmented this year by the addition of 100 or more acres at Torrey pines park through an exchange of property, and by the transfer of 65 acres of city land on Point Loma. If the latter arrangement is made, the new tract will be planted at once. D. C. Collier, president of the Point Loma electric line, now building, having agreed to plant the park.

In the early part of the year, heavy planting will be done in the big city park, east of the west boulevard. Several groves of high trees at central points in the park will also enhance the scenic effects.

In the midst of carrying out extensive plans for the beautification of the city park system, George Cooke, the noted landscape engineer, succumbed to injuries received in a runaway, and the work came to a standstill for a time. However, another engineer has been obtained and the work of beautifying the park will be pushed forward with all rapidity this year, a generous proportion of the bond issue having been set apart for this special purpose. When completed, San Diego's parks will rank with those of any other California city.

San Diego Sun, January 4, 1909, 8:1. EDITORIAL: The Playground Movement.

San Diego Sun, January 6, 1909, 3:2. Supervisor Fisher suggested a lake in City Park.

San Diego Sun, January 7, 1909, 1:1-2. Father Horton died.

Minutes, Board of Park Commissioners, January 7, 1909. Mr. Cook's letter of acceptance was read; he is to be here January 15, 1909.

San Diego Union, January 7, 1909, 7:2. Fix assessment for park grade. City engineer outlines district for improvement of city boulevard in report for grading of Park Boulevard from south line of University avenue to north line of park.

San Diego Union, January 26, 1910, 14:1. Exposition fund reaches \$620,000.

San Diego Sun, January 27, 1910, 7:1. Merchants' Association presents Louis J. Wilde with loving cup.

San Diego Union, January 27, 1910, 5:1. Subscriptions to Fair stock are now \$630,000.

San Diego Union, January 27, 1910, 7:3-5. Park Commissioners ask for \$50,000 appropriation for tree plantings in city's pleasure ground and along boulevards; road work proposed.

San Diego Union, January 28, 1910, 5:1. City Attorney W. R. Andrews claims tide lands are not city property; reviews Spanish laws.

Park Commissioners Meeting, February 1, 1910. Marston advised the Board that the services of Samuel Parsons could be obtained for 2 or 3 weeks in February by payment of his expenses and offered to pay one-half of the expense for his services, if Board would pay the other half; accepted.

San Diego Sun, February 5, 1910, 4:1. EDITORIAL: Exposition Progress.

Park Commissioners Meeting, February 8, 1910. Joseph Sefton offered to pay one-half the expense of a deer corral in park; accepted.

San Diego Sun, February 8, 1910, 1:2. Band concerts in park, catch that? In summer maybe. Board isn't sure about funds, but will put stand up.

San Diego Sun, February 10, 1910, 1:8. Stingaree dances halls are wiped out by law.

San Diego Sun, February 11, 1910, 4:1. Under the Peppers in the Park: Has Nolen plan for a city beautiful and for a civic center been forgotten?

San Diego Sun, February 17, 1910, 4:1-2. Under the Peppers in the Park: talk about selling part of park.

San Diego Union, February 20, 1910, 5:1. Letter from Chamber of Commerce, Globe, Arizona, asking how they can assist Exposition; scores "Fair thieves."

San Diego Sun, February 23, 1910, 5:5. Country Club will erect handsome large clubhouse.

San Diego Sun, February 25, 1910, 1:4-5. Exposition fund now swelled up to \$753,000; Gas Company, Spalding, Hardy and others follow up John D. Spreckels' gift of \$100,000, half of which is conditional on prompt action in reaching total.

San Diego Union, February 25, 1910, 1:2. John D. Spreckels subscribes \$100,000 to San Diego Fair.

San Diego Sun, February 28, 1910:4:1-2. Under the Peppers in the Park: beginnings of zoo in city park.

San Diego Sun, March 11, 1910, 4:1-2. Under the Peppers in the Park: Park Commissioners have decided to divide the flock and build an aviary on Golden Hill Park.

San Diego Union, March 14, 1910, 9:1-2-3. Colonel Henry E. Dosch, Director of Seattle Fair; article on San Diego as real place for Exposition; \$100,000 must be raised for Fair in two days.

San Diego Sun, March 16, 1910, 8:1. Exposition books still open for money; million mark reached by guarantee of citizens for fund.

San Diego Union, March 16, 1910, 1:1. \$100,000 Fair fund is subscribed; hands on dial at 5th and D streets complete circuit; moved in a single day from \$861,000 to \$1,000,000.

San Diego Sun, March 17, 1910, 4:1. EDITORIAL: The Exposition.

San Diego Sun, March 18, 1910, 4:1-2. Deer Park is ready for deer.

San Diego Sun, March 19, 1910, 4:1-2. Exposition Progress and Program, by Director General Colonel Collier.

San Diego Union, March 20, 1910, 9:1-2, 9:3-4. How \$1,000,000 was raised for Fair in San Diego; articles by Robert Connolly, publicity director, and Colonel Fred E. Jewell, director, on achievement in raising \$1,000,000 in six months.

San Diego Union, March 20, 1910, 15:1. Rufus Choate, secretary of Chamber of Commerce, writes article on Exposition.

San Diego Sun, March 21, 1910, 4:1-2. Under the Peppers in the Park: viewpoints in park; why not have a picnic and invite everybody?

San Diego Union, March 22, 1910, 5:2-3. Los Angeles to mediate Exposition controversy between San Diego and San Francisco as to which of the two cities shall be officially declared the Exposition city commemorating the opening of the Panama Canal.

San Diego Sun, March 23, 1910, 1:2, 12:2. San Francisco's manipulation of Santa Barbara conference laid bare.

San Diego Union, March 23, 1910, 10:1. Conference in Santa Barbara of over 100 delegates to settle Fair site questions between San Diego and San Francisco; vote to award San Francisco the Panama-Pacific Exposition; San Diego stands by plan to hold Fair.

San Diego Sun, March 24, 1910, 4:1-2. Under the Peppers in the Park: the Santa Barbara conference.

San Diego Union, March 24, 1910, 1:1, 8:1. Fair directors to ask for bond election; Exposition committee instructed to lay out site and prepare building plans.

San Diego Sun, March 26, 1910, 4:1. EDITORIAL: Improve the Park in a Permanent Way.

San Diego Sun, March 26, 1910, 4:1-3. Under the Peppers in the Park: city must adopt a new policy for park.

Park Commissioners Meeting, March 29, 1910. Foreman Christopher asked for timber and instructions for building two bridges in Switzer's Canyon in connection with a new foot path to the Golden Hill Park; granted.

San Diego Union, March 29, 1910, 1:1. Los Angeles votes for two 1915 Expositions; decides to offer compromise to San Diego and San Francisco; would award 50 percent of State appropriations to San Diego if \$2,000,000 is raised.

San Diego Sun, March 30, 1910, 10:6. Who is donating the deer to park, John H. Gay or A. Campbell? Both want the credit, and the Commissioners are waiting for them to compromise.

San Diego Union, March 30, 1910, 10:1. City Council in favor of voting \$1,000,000 municipal bonds for construction of 1915 Fair.

San Diego Sun, March 31, 1910, 7:4. Council is against Exposition abuse; opposes reference to San Francisco as "earthquake city" in petition.

San Diego Sun, April 8, 1910, 1:1-2. Pursell declares he will hurry road.

San Diego Progress, April 9, 1910, "Far-Sighted Men Plan for San Diego," folder 25, box 2, Marston papers, MS 35, SDHS

San Diego Sun, April 12, 1910, 2:2. Hotel men against the park for Exposition; say waterfront is the place to have improvements.

San Diego Union, April 12, 1910, 4:1. EDITORIAL on bond elections.

San Diego Union, April 12, 1910, 8:1. City Council adopted resolutions in favor of \$1,884,500 bond issue; election set for June 1.

San Diego Sun, April 14, 1910, 1:1. Hunters in park nearly hit woman while she was driving on Park Boulevard near the 12th street entrance; has narrow escape; Park Board licensed Nimrods to hunt rabbits in park to exterminate them.

San Diego Sun, April 14, 1910, 4:5-6. W. M. Moore says city should sell 400 to 500 acres of park for building lots.

San Diego Sun, April 15, 1910, 4:1-2. Under the Peppers in the Park: the zoo for the big park is started; we now have an aviary and a peer of deer in a paddock.

San Diego Sun, April 28, 1910, 1:3. Member of Park Board says Huntington is back of Pursell; wants to know when work is to begin.

Park Commissioners Meeting, April 29, 1910. Cost of deer park \$242.54, one half or \$121.27 donated to city by Joseph Sefton . . . the foreman was authorized to begin construction of bird cage at Golden Hill Park.

San Diego Union, May 1, 1910, 17:1. Exposition to get government aid in the plan to exploit a leading feature of the Fair --- the problems of irrigation and conservation.

San Diego Sun, May 4, 1910, 1:2, 3:3. Attorney A. Haines sends open letter to City Hall challenging city administration to defend Exposition bonds.

San Diego Sun, May 4, 1910, 3:4. Hoot, hoot, hoot, but O'Hallaran can't talk Scotch; owls given to Park Board; lynx also offered to city's zoo.

San Diego Sun, May 6, 1910, 1:6. Four deer in park, but alfalfa is scarce.

San Diego Sun, May 7, 1910, 1:7-8. Exposition compromise.

San Diego Union, May 8, 1910, II, 1:1. Exposition stockholders endorse terms of compromise proposed by San Franciscans; compromise arranged at meetings held in Washington, DC, between Director-General Collier and San Francisco delegates; terms of compromise; entire California delegation pledges itself to do all in its power to pass resolutions inviting the Republic of Mexico and the nations of Central and South America to participate in San Diego Exposition; meeting in Lincoln School, held May 7, also supported the voting of \$1,000,000 in bonds to be expended in park improvements for Exposition purposes.

Northern city to boost San Diego Fair project; agrees to assist in securing cession of tidal lands and state appropriations.

That San Diego will hold the Panama-California Exposition in 1915 precisely as outlined at the inception of the local fair project; that San Francisco will not only support San Diego's Exposition, but will use its influence in the election for the passage of state bonds to improve San Diego's harbor and later will back San Diego's petition to the state legislature for the cession of the waterfront to the city, is the substance of the compromise presented at a mass meeting of subscribers to the local Exposition held last night in the auditorium of the Lincoln School.

Resolutions endorsing the work of Director General D. C. Collier in securing the best possible terms for San Diego in the proposed compromise and agreeing to the conditions involved were introduced and carried without a dissenting vote.

The meeting of stockholders and subscribers was called by Acting Director General J. W. Sefton upon the receipt by him of several telegrams from Colonel Collier outlining the terms of the compromise as arranged between the representatives of San Francisco and San Diego, now in Washington, and asking that they be acted upon here.

(Text of telegram and details of discussion given.)

Upon suggestion of Judge Hayes, a resolution endorsing the voting of \$1,000,000 in Exposition bonds was introduced and adopted with only one dissenting vote.

San Diego Sun, May 9, 1910, 1:7-8. Seek later date for vote on Exposition bonds; change made advisable by compromise agreement; action Director-General Sefton tells Council; say people ought to decide whether water celebration would be better than one in park; legislators will ask City Attorney if item can legally be removed from ballot now.

San Diego Union, June 23, 1910, 6:4. Designer of City Park Revisits San Diego; Samuel Parsons Now Living in New York, Makes Inspection Tour of City.

Samuel Parsons, landscape engineer of New York City, arrived yesterday and is stopping at the Brewster. Five years ago Mr. Parsons laid out the improvements in city park. Yesterday, in company with Park Commissioners L. A. Wright and Thomas O'Hallaran and George W. Marston, of the civic committee, he made a tour of the park for the purpose of noting the improvements.

Mr. Parsons was particularly pleased with the growth of trees and shrubbery in the park. He was enthusiastic about the vast amount of work that has been done since he laid out the grounds and particularly commended the road building. He was driven over fifteen miles of excellent highways built by the park commission and the city.

Following the inspection of the park, Mr. Parsons, in company with William Clayton and members of the park commission, was taken to Old Town, where he inspected the restored Ramona's Marriage Place. He also looked over the old plaza. Mr. Parsons will be asked to make plans for improvements to the historic old plaza. In all probability he will recommend its restoration in Spanish style.

Mr. Parsons made his first visit to San Diego in 1903. He is impressed with the growth and progress made in buildings and business institutions.

San Diego Sun, June 25, 1910, 3:5. Getz of the Estudillo place in Old Town has offered to take the collection of relics belonging to the Pioneer Society and give it a suitable exhibition place until the Society can build a home of its own.

San Diego Sun, June 25, 1910, 4:1. EDITORIAL: A Polytechnic School.

San Diego Sun, June 25, 1910, 4:2-4. Park Commissioner Thomas O'Hallaran gives plans for City Park.

San Diego Union, June 26, 1910, 7:1. Plant More Trees is Advice of Noted Artist to Park Commission; Samuel Parsons to Plan Further Improvement of City's Pleasure Ground; Is Preparing a Report; Recommends Setting Out Eucalyptus to Outline Border of Park.

The planting of more trees on the outer edges of the city park, especially trees of height, is suggested to the park commission by Samuel Parsons, Jr., of New York, landscape artist who, with the late George D. Cooke, worked out plans above five years ago for the improvement of the park.

Since arriving here several days ago, Mr. Parsons has made a number of trips of inspection over the park, in company with Senator L. A. Wright of the park commission and with George W. Marston, at whose suggestion Mr. Parsons say he came here to outline the proposed improvements.

Mr. Parsons last night said he was at work on a report --- to be made to the park board next Tuesday night. Mr. Parsons emphasizes particularly the desirability of planting eucalyptus trees, which, on account of the height they may attain, are of value in the outlining of parks. He says that if eucalyptus are planted around the city park, the view from the waterfront or downtown section would be all the more attractive.

Mr. Parsons also is planning several new entrances to the park. One of these will be at Juniper street, where, just inside the enclosure, extending from Kalmia and Maple, will be a children's playground.

Mr. Parsons is an earnest advocate of the propagation of the pepper tree. More of this class of trees, in his opinion, should be grown in the park. He deplores the absence of water in the city park. He thinks some arrangement should be made whereby water could be used in large quantities at a minimum of cost, or, better still, free of charge.

Surprised by Results

"It is surprising to me that the growth of the park is of such magnitude as I find it without water," said Mr. Parsons. "Back east years have ensued before such growth was manifest. There they have an abundance of water. Here the crying need is water. The possibilities of future growth, with water as an incentive, are almost beyond imagination."

San Diego Union, June 26, 1910, 9:1. Southern California Editorial Association Editors at Banquet Table in Hotel del Coronado pledged support to 1915 Exposition last night.

One of the most enjoyable banquets ever held in the spacious dining room of the Hotel del Coronado was served last night in honor of the hundred or more members of the Southern California Editorial Association, their wives and friends, who have been visiting and sightseeing in the city since the arrival of their excursion Friday in the midday train. Covers were also laid for members of the Chamber of Commerce, the San Diego "boosters" and other civilians who were assisting in the entertainment of the guests.

Before the banquet was over the gathering had been converted into one of the most enthusiastic and spontaneous "booster" meetings ever held in San Diego or its environments. Long before the last toast had been proposed and responded to, every editor present, by his hearty applause to the sentiments expressed, had pledged himself and his publication to the cause of the completion of the Panama Canal and the celebration to be held in this city in 1915 in honor of its opening. The editors were made to feel and to realize, through the speeches, that the proposed exposition is not a local affair, as many have been led to believe, but is sufficiently broad in its scope, to include all the southwestern states and the Latin American countries

bordering on the shores of the Pacific Ocean. The fact was impressed upon the editors individually and collectively, that the coming exposition is to be as much an advertisement for their immediate field of efforts, that their section of the state will derive as much ultimate benefit from it as though the buildings were erected in their own city and the crowds were to visit their home town.

Collier Takes 'Em By Storm

During the course of the speech-making, Colonel D. C. Collier took the editors by storm when he announced that through the efforts of the San Diego county chamber of commerce, congress, a few hours before it adjourned, passed an emergency appropriation, whereby \$1,000,000 had been placed in the hands of the President for the control of the Colorado river. The director-general said, in effect, that when word was received in San Diego in the middle of the week that the Colorado river was about to go upon another of its semi-occasional rampages and perhaps might overflow its banks, that the local chamber of commerce conceived the idea of asking Congress, through the President, for financial aid to control the waters. Colonel Collier made the point that in taking the action which it did, the San Diego county commercial body had the interests of its neighboring commonwealths at heart. He added that such a spirit is the prevailing one in San Diego for advancements are not confined to this city and county alone.

(Later in the program Collier outlined the scope of the proposed exposition.)

Park Commissioners Meeting, June 28, 1910. Samuel Parsons made a report as to the plan for further improvement of city park.

San Diego Union, June 28, 1910, 8:2-3. Spalding declines to run for Senate.

San Diego Union, June 28, 1910, 8:4. The San Diego Park Commission is taking advantage of the presence of landscape architect Parsons to arrange for further work in beautifying the 1,400 acre park. . . . Parsons is furnishing the commission details of tree planting in the city park and is said to be working on plans for the improvement of the Old Town plaza, which will be submitted to a meeting of the Board today.

San Diego Union, July 2, 1910, 9:5. To Urge Planting Trees in City Park; Samuel Parsons, Landscape Architect, Will Submit His Report to Board Today.

A feature of the report will be the recommendation for the planting of a grove of live oaks in a little canyon as a memorial to the late George Cooke, who was superintendent of the city parks at the time he was killed in a runaway accident near Escondido a few years ago.

"This is a suggestion of Senator L. A. Wright, president of your park commission," said Mr. Parsons, "and I think it is an excellent idea. The spot that has been designated for this purpose is the little canyon leading up from the city pound to the high school. The trees selected grow to an old age, and they will be a lasting monument. It is not proposed to plant many of the oaks, only 25 or 30.

The report will consist of 15 to 25 pages. . . . Mr. Parsons, who has been the guest of George W. Marston during his stay in the city, will leave tonight for the east.

San Diego Sun, July 4, 1910, 1:4-5. Parsons says name it Cabrillo Park.

San Diego Sun, July 5, 1910, 4:1. EDITORIAL: Mr. Parsons and the Park.

San Diego Sun, July 5, 1910, 4:1-2. Under the Peppers in the Park: Who likes the park?

San Diego Union, July 5, 1910, II, 9:1-3, *MAKE CITY PARK PARADISE OF SOUTH, URGES SCENIC ARTIST; Samuel Parsons Makes Lengthy Report to Civic Commission; Wants More Trees Planted.*

After several days of exhaustive study of the various municipal parks of San Diego, plans for their beautification have been evolved by Samuel Parsons, landscape architect, under whose control is the entire parking system of the city of New York.

The trip from New York to San Diego made recently by Mr. Parsons was his second for the same purpose. His reports and recommendations, while commending the work already accomplished and complimenting the San Diego climate, provides for monster improvements all along the line, and lays out a system of improvement which is admitted by all to look toward perfection in the most minute detail.

The text of the report follows:

San Diego, Ca., June 30, '10

To the Board of Park Commissioners, San Diego, California

Gentlemen: In accordance with your request, I have undertaken a careful examination of the following parks of San Diego, namely: the City park, the park at Old Town and the park at La Jolla, and desire to submit the following report:

In view of the study I have given the City park during the life of George Cooke, with whom I had originally associated myself in preparing plans I returned with much expectancy to a consideration of the work you have done during my absence.

Opportunities Unsurpassed

The opportunities for park making afforded by the unsurpassed climate of San Diego and the wonderful scenic advantage of its parks, led me to expect much. It is now five years since I have seen the City park. Yet, notwithstanding the fact that I had already observed during other visits something of the marvelous rapidity of the growth of vegetation in San Diego, I must confess that I have never seen anything like it. So rapid a transformation of the appearance of a park surface as that along the drive leading from Date street to Upas street, and in the neighborhood of Golden Hill and Twenty-eighth street, is a revelation to me, and I have had unusual opportunities of seeing parks in Europe and America.

But, although you have already accomplished wonders in park making at astonishingly small cost, it is to be hoped that you may be able to do even better in the future, with the assistance of previous experience and a more liberal supply of money. With the hope that they may prove helpful in carrying on future work, I desire to present you, as preliminary to more detailed notes, some general observations which I have been able to make after several days' study of City park.

Adhere to Principles

In all landscape work, no matter how detailed and complete this study has been, new and unexpected conditions may at any time arise, forcing a revision of the original scheme. The wise thing to do in such cases is to adhere to the broad underlying principles of the plan, and modify only the minor features. It is surprising to find after one assumes this attitude, how much of the important part of the design can be retained, and in no place will this apply with more force than in San Diego. There is one good broad scheme of treatment, which can always safely be adhered to in the midst of many modifications of the original plan, and that is to plant the ridges and promontories with as high-growing suitable trees as can be found, and the low sides of the gulches or canyons with comparatively low shrubbery or bushy trees. It is well to keep all trees some little distance from the bottom of the canyons, occupying its lowest parts with vines of very low shrubbery, so as to secure as deep an effect as possible. This effect of deepness will also be increased by leading the tall pines and eucalyptus over the edge of the slope, straggling just a little downwards.

All this makes for picturesqueness and striking park scenery. For instance, all the high places of the San Diego City park should be planted with eucalyptus, pepper trees, acacias and Casuarinas. Or, on the same places could be used pines --- *P. Canariensis*, *P. Pinea*, *P. Muricata*, and cypresses --- *C. Gaudaloupensis*, and the ordinary Italian form, for a certain sense of park fitness prevents one from using the two classes intermixed, just as one avoids employing in the east, deciduous trees with conifers.

To Frame Picture

Another effective scheme of treatment for these as well as other parks, is to frame the picture. That is, emphasize and mark out the boundaries of the park domain with large trees like the sugar gum (*E. Corynocalyx*) and *E. Citriodora* planted not less than 150 feet apart, and in some cases even 300 feet, the distance to be determined by the character of the surrounding scenery. The eucalyptus, like all park trees, have their limitations; in other words, are rapid growing, like our eastern willows, and often exhibit naked stems and more or less ungainly forms, but the lofty grace of such kinds as *E. Citriodora* and sugar gums is unique in its way and especially valuable in the San Diego landscape. To overcome this weakness of the appearance of their stems, it is only necessary to surround the group, or better still, intermingle with the trees such trees as peppers, acacias --- *A. Baileyana*, *A. Floribunda*, and *A. Latifiola*, *Leptospermum*, *Levigatum*, the bushy *E. Cornuta* *Lehmani*, etc.

I would like to say a word about the idea of using blue grass sod for the park. It is doubtless expensive, but it is not altogether the expense that makes me hesitate to advocate its general use. The fact is that it does not seem to produce an effect that really harmonizes with the general appearance of the country in Southern California. Reds and blues and the yellows predominate everywhere and the greens themselves are apt to shade off into other tints. Why not, therefore, use the native vines, the ice plants or *Mesembryanthemums*, in great variety, the *Tecomas*, the *Bougainvillea*, the *lippia*, and a number of other vines and native grasses. If properly planted, most of the ground of the park will be eventually covered with trees and shrubs, and only the borders of the paths and roads and occasional small places will need covering with such creeping plants.

In confirmation of the wisdom of the original scheme of planting a large distance apart, it is interesting to see how, after only four or five years of growth, the trees occupy already a great part of the considerable space of 25 to 30 feet allowed for their development.

Leave Borders Cleared

Care should be taken to avoid planting the borders of drives and walks with high trees so completely as to prevent sufficient outlook down the hollows of the canyons and out to the scenery beyond. Naturally, if any planting of trees is done, a certain amount of shutting off must occur, but the distant views are really more startling and impressive when seen bursting on one after a short period of eclipse. In like manner, the views down the canyons will be more attractive when framed with tall trees rising above and shutting them in, and then suddenly giving an open outlook.

One more general observation should always be borne in mind in all park making and particularly in San Diego, where, after all, the conditions are especially difficult on account of the light rainfall; which is, that a list of trees and shrubs to be successful for park making increases in value almost in the ratio of its smallness. In the east it has been said by good authorities that a park can be better planted with 12 deciduous trees, 12 deciduous shrubs, and 12 conifers, than with a greater number; for myself, it seems that the list would even then be too large. If you will think of it in the light of the experience of the last five years, would not the park have been better off and more economically maintained if there had been used a small number of trees --- at least if some that had been used had been left out? A few of these which seem to me to be both beautiful and hardy are two or three species of eucalyptus and pepper trees, three or four acacias, *Casuarinas*, sumacs, Canary pines, Muricats, pines, Arizona cypress, Guadeloupe cypress, and *Cedrus Deodara*. On the other hand, the following might well be dispensed with in future planting: the Monterey cypress, the tree *Grevilleas*, the Blackwood acacias and similar kinds, which have not been quite satisfactory. The park is not a botanical garden or experimental station, but a spot of great natural beauty, which it is desired to make accessible by roads and paths, and ornament with trees and shrubs in the most economical and effective manner possible.

Suggestion may be shocking

If you would allow me, I would like to make another general recommendation that may at first shock. But you will have to meet the question and solve the problem eventually, and why not now? There are trees in various parts of the park that must be cut down, because either they do not suit the place or they are more or less worthless through decay or other causes. They will go eventually. They will have to be replaced by better and more fitting things. Why not have done with them now, once and for all?

As soon as possible, it will be well to develop more roads in the park with a special view to their scenic effect. Thus far roads and paths have been made largely to lead somewhere; in other words, to serve chiefly a useful purpose in going from a street on one side of the park to another street in a more or less distant region, where the home or place of business lies, or that of some neighbor; or to a golf field or athletic grounds. It is high time, however, to secure an approach to and develop more scenery like that of the Golden Hill section, where winding walks and drives run along the contours out to the extreme ends of the promontories, and one can look far away, down the canyons and over to the mountains and bay. In order to enjoy these views, it is a good idea to leave wide enough spaces between the groups of lofty trees that are planted on these eminences. There are a dozen or more promontories in the park that could be circled by winding contour drives with the result, when the planting has been done, of acquiring some of the finest panoramic effects in Southern California. As one studies the park more and more, one realizes what can be done in the way of development, but I am sure no one as yet has formed any adequate conception of the richness and beauty its scenery will display when once it reaches completion. The most vivid imagination, coupled with the utmost knowledge of parks, would fall far short of gaining a true conception of its full beauty. There is nothing with which to compare it. Nowhere in California, or in other semi-tropical countries, has such a well-organized undertaking absorbed the interest of the people. A world's fair, astonishing and impressive as it may be, with its effective showing of the accomplishments of art and science, could never in the long run satisfy a city with its permanent results as would a fully developed park like that of San Diego.

Plea for Water Pipes

A strong plea for more water pipes on the park, I feel constrained to make. Any larger scheme of planting in the future would require a much larger water supply. At present the supply of water on the park is inadequate for the needs of the trees. Sight should never be lost of the importance of irrigation, for it lies at the bottom of all success in tree planting in this climate. This may seem a somewhat odd and trite remark, but I believe it needs repetition, for I find a tendency, even in San Diego, to think this or that tree will do well without water. This is not true. Some trees will stand better than others, but no tree will thrive well without water, especially when it is young.

And now, having considered some general ideas and experience in connection with the City park, let us take up a more detailed examination of the accompanying maps which I have prepared to explain more in detail the results of my study.

Sheet No. 1. In the neighborhood of Upas street, the plantations are somewhat gloomy and uninteresting in effect. There should be several trees removed at the end of the walk, where it touches Sixth street, and in their place should be planted bright colored peppers. To the rear of these in any opening close by that will permit it, should be set several eucalyptus. The actual removal of trees need not extend back more than 70 feet from the street, but there are several places where there is enough space to set out a pepper tree or a eucalyptus to give a better character to the growth of the region. Along Upas street in several openings, it would be well to plant specimens of *Acacia Baileyana*; and, opposite Seventh street, some more peppers. Following out the general scheme of outlining the boundaries of the park with sugar gums, there are three more trees planted between each street, about fifteen feet inside; a tree in front of each of the cross streets, and one half-way between. This arrangement is intended to extend, with certain variations depending on local condition, all around the park.

Several Promontories

On the east side of the drive as far as Quince street, the several promontories have already been planted to a considerable degree. They are given more character by using, in one case, *E. Citriodora* to lift the plantation higher. On another promontory, the strange forms of the *Casuarina* are used, to give a variety of effect where there are sufficient Eucalyptus to give the desired height. At intervals along the drive it will be seen that peppers are introduced to vary the somewhat somber appearance of that region. Across Pound canyon, nearly opposite Upas street, are arranged a number of Italian cypress to change radically the character of the planting in that region, and further south, opposite Spruce street, on the far side of Pound Canyon, many *E. Citriodora*, and, outside the group, peppers extending to the end of the promontories and somewhat down the steps.

Opposite Quince street, bordering on the winding drive running down into Pound canyon, is a high promontory on which has been placed a group of Guadeloupe cypress. The banks of this promontory, extending down to the drive, are especially raw and steep. It would be well to plant on the surface *Mesembryanthemums*.

Sheet No. 2. Opposite Olive street and just above is located a group of *Pinus Canariensis*, which is intended to extend somewhat down the slope toward the drive passing at that point. A little further down, on a high promontory overlooking a considerable stretch of Pound canyon, is a group of sugar gums surrounded by pepper trees. Somewhat further to the west and directly adjoining the boulevard is another group of sugar gums with a border of camphor trees. This group extends from Maple to Nutmeg streets.

Group of Sugar Gums

On another promontory, looking over Pound canyon, opposite Laurel street, is another group of sugar gums, bordered by a plantation of *E. Cornuta Lehmani*. Going southward to another point, we find still another group of sugar gums, but these are surrounded by *Acacia Baileyana*, with a straggling narrow group of *Acacia Baileyana* leading to the sugar gums bordered with *E. Cornuta Lehmani*.

Near Juniper street, running close to the east slope of the western boulevard, comes an irregular group of peppers. At the west corners of the boulevard, where it joins Juniper streets, are two groups of *E. Cornuta Lehmani*, and here and there bordering Juniper to Sixth street are several pepper trees to thicken and brighten the foliage at this point.

The treatment of Mulvey canyon extending from Juniper to Fir streets requires a good deal of planting along the slopes, leaving the extreme bottom comparatively unchanged, except by encouraging the natural growths of sumac and other wild shrubs. In the neighborhood of Juniper street, it is intended to plant around the steps a considerable mass of *Acacia Baileyana*. Along the borders of the canyon at intervals, the usual practice of planting sugar gums 150 feet apart is employed. Near Fir street several more sugar gums are used in order to shut out unsightly objects.

In front of Hawthorn street, extending across the canyon, are planted pepper trees. About half way up the slope of the west side of the canyon, and on both sides of the canyon in the spaces left open between the other planting, are used a number of *Acacia Baileyana* to correspond with similar acacias on the west side of the boulevard. At intervals among these acacias are located groups of sugar gums, especially near Juniper street. On the promontory extending out opposite Juniper street over the Pound canyon are planted a group of rubber trees, and among these are specimens of sugar gums to life [sic] the appearance of the entire group.

Find Acacia Baileyana

Going southward, we find on a neighboring promontory sugar gums and peppers and along the east side of the adjacent drive are a number of *Acacia Baileyana*. Still further to the south on another promontory are a number of sugar gums with pepper trees, and over the slope on the steep borders of the next canyon, opposite Fir street, are groups of Canary pines, and again on the further side of the same canyon are more of the same species. Nearing the adjacent drive, screening the head of the canyon, are a number of *Acacia Baileyana*. Around the children's playground and across the junction of the two adjacent drives are pepper trees, and on a higher slope between the two drives to the north are sugar gums and a few pepper trees.

Coming up from Pound canyon in the neighborhood of Tenth street and so on around the children's playground are more peppers. On the higher ground to the southeast are Canary pines. On both sides of Date street, three feet from the edge of the curb, are pepper trees, in no case directly opposite each other; and on the park side, among the trees in open spaces in the park and not on the sidewalk, are planted more peppers to increase the general effect of that tree. At intervals on either side of the curving walk, enclosing the space between Seventh and Ninth streets, near the children's playground, are planted at irregular intervals, about sixty feet apart, pepper trees; and in each of the corners near Seventh and Ninth streets are added more peppers to strengthen the effect at these points.

Sheet No. 4. All the territory in the park near the entrance of Eleventh street, and extending to Date street on the north and Twelfth street on the east, having been planted with eucalyptus, peppers are used to make a border in front of them and mask the naked character of their stems.

Groups of Live Oaks

In a small canyon running along the border of the drive leading from the Pound canyon road at Eleventh street to the central boulevard, is to be planted a grove of live oaks, filling the entire hollow of the canyon. At the same time it is proposed to encourage the growth of sumacs and plant more of them. This grove is intended to be a memorial of the late Mr. George Cooke, landscape architect and former superintendent of parks.

The hill to the southwest of the high school is planted with a mass of sugar gums and pepper trees, with a group of *E. Cornuta Lehmani* and nearer still to the high school is a group of Guadalupe cypress. Going down the road toward the Women's home, we find a large part of the territory planted and in the neighborhood of the junction of the central boulevard, sugar gums with peppers along the drive, and a little further, on both sides of the road, are groups of *Acacia Baileyana*. Below the next junction with the Women's home road are groups of peppers and eucalyptus. Along the south boundary between Russ high school and the Women's home is planted an irregular mass of sugar gums and peppers, with the peppers inside looking toward the park. Entering at Eighteenth street, we find soon after passing the first road, that there are large open spaces between the gum trees. In these have been planted a considerable number of sugar gums and peppers.

Sheet No. 5. Starting at the Eighteenth street entrance and following along the road, I have used a lot of pepper trees which should be backed up along the outside boundary of the park adjoining the city with a number of sugar gums. At Twenty-fourth street, along the boundary, are fecting [sic] the mass of Monterey pines continuing along the ridge and perfecting the mass of Monterey pines above. Continuing further up the drive on the entire bare hillsides opposite Twenty-first and Twenty-third streets are planted a large group of sugar gums with peppers around the outskirts. On the level of this territory is a dry course of a winding stream over which has been erected a wooden bridge connecting a path from the Golden Hill section across to the center of the park. This bridge is planted along either side and along a considerable portion of the path nearby with wild sumach (*Rhus-Laurina*).

Keep Out of Certain Tract

It is the idea to keep out of this large level tract presentations (?) of eucalyptus and other lofty growing trees, confining the character of the growth to comparatively low shrubbery like sumachs, wild mahogany, Christmas holly, and Australian salt bushes. If the supply of water were sufficient, it would be good idea to have a large patch of alfalfa planted on these meadows, with outlying masses of sumach and other wild plants. This low wild shrubbery should be continued up the bottoms of all the neighboring canyons; in fact, all the bottoms of the canyons throughout the park should be planted with either vines or low shrubs of this character.

It is especially important to encourage by watering and cultivation all the native growths on the sides and in the hollows of the canyons.

Near the wooden bridge, on the main drive, is a stone bridge made of cement and cobbles. It is the idea to cover this entirely with vines such as the *Ficus ripens* and plant in the neighborhood a mass of *Acacia Baileyana*. Continuing up the grade on the steep banks, should be planted the usual lot of sumachs, and on the top of the promontory the usual mass of eucalyptus and peppers.

Sheet No. 6. The most interesting new feature of road-making and planting suggested on this sheet is a drive extending on either side of the high plateau, winding around the bold promontory and enclosing the large level athletic field. This drive being high, is planted with the usual peppers and sugar gums. This specimen of park treatment is similar in theory to that of Golden Hill section and should be carried out on many other sections of the park, thereby adding to its scenic character.

Plants in Canyon

Between Twenty-seventh and Twenty-eight streets is a shallow canyon and around this are planted in the usual way eucalyptus and peppers. As usual, the boundaries of this territory are marked with tall-growing eucalyptus. The borders of Twenty-eight street, running north from the southerly boundary of the park, are planted with mingled masses of peppers and eucalyptus.

The Golden Hill Territory is already planted with great beauty and picturesqueness, but there are certain points in it that can be improved. On two promontories, one looking north and the other looking west, it would be a good idea to plant on the slopes and the other looking west *E Cornuta Lehmani*. On the point and down the slope are to be planted Arizona cypresses.

Sheet No. 7. This sheet shows the bordering plantations of eucalyptus and peppers extending from Date street to Juniper and a little beyond, so as to mass the planting on both sides of the entrance. The main part of this sheet is occupied by a continuation of the promontory plantation on the other sheet, which includes the athletic grounds and gives an indication of the way in which the high promontories of the park should be encircled by drives and planted with lofty-growing trees.

The importance of adopting a name for the park has impressed me with renewed force during my present visit to San Diego. To call it the "city park" means nothing because all the park reservations are city parks. Some name that is distinctive, euphonious and that suits Southern California is what is wanted. There has been much discussion and many names have been suggested. It is not an unploughed field. Why not meet the question fairly now and settle it? There can be no better time. I would suggest the name of "Cabrillo Park." It is distinctly euphonious and applies distinctly to this country, for was not Cabrillo even more the discoverer of San Diego than Columbus was the discoverer of America?

Fix Up La Jolla Park

La Jolla Park. The park at La Jolla is a bit of brown sand by the sea, comparatively level and about three acres in extent. The original plan has been partly carried out and I would suggest that the development be continued on the same lines, except as to the kinds of trees and shrubs. Experience has taught us much about the planting of this park. Close proximity to the seashore is trying to most trees and shrubs and for that reason many kinds have failed here. The cypresses, however, do well in such exposed places, as proven by the picturesque and vigorous Monterey specimens growing in one or two parts of the park. Even better than the Monterey cypresses, perhaps, are the Guadalupe and Italian forms, and also the Arizona cypress, which is especially hardy wherever it has been tried. These cypresses are intended to be the chief attraction of La Jolla park. A number of the *Halipensis* pines also find acceptable employment. Perhaps the most satisfactory of the plants suited to this park are the lower-sized kinds, such as the Tamarisk, deciduous a very little while, which, everywhere around the world, loves the ocean. Then there is also the Australian salt bush, always vigorous in such places, the *Pittisporums* and the lovely *Coprosomos Brewerii*, with shining leaves. Wherever the trees do not occupy the ground of the park, the various beautiful kinds of *Mesembryanthemums* should be used, for they do particularly well on the seashore. There are other vines, like the *Bougainvillea*, that can also be used with success in such places. Many forms of cacti might be made to do excellent work on these seaside banks.

Along the southern side of the park is a boulevard, from which a wide opening across the lawns to the sea is carefully retained. Here, large beds of brilliant flowers are maintained. One of the best kinds that can be used for this exposure is the *Agapanthus* Lily, the great sky-blue flowers of which bloom a long time and give life and variety to the scenery. A park by the seashore, with cottages around it, welcomes the color of brilliant flowers provided they are properly arranged.

Old Town Plaza

Old Town Plaza. The historic interest and peculiar Mexican atmosphere which pervades Old Town, not only because the Ramona homestead is there, but also because the little group of buildings is largely Mexican in character, makes it difficult to treat the plaza in a sympathetic manner. It is a place where it would be easy to do too much and violate the harmony of the scenery which establishes the real value of the little town. Its fashion is that of the beginning of things in San Diego and it would be well if this atmosphere could be preserved to the end. There ought to be an understanding, of, if possible, a restriction of the character of all buildings hereafter erected in Old Town within a certain radius of the Ramona homestead, so that they could show the Mexican spirit. Adobe or cement walls, and flat roofs with perhaps tiles, or, at least, unpainted shingles should be used. It ought not to be difficult to do this, as the Mexican mission style of architecture is growing in favor all over California. When this idea is once accepted and enforced it ought to be easy to secure the removal of the more modern houses and have them replaced by new buildings designed in the appropriate style. Having designated the old Mexican scheme of architecture, one feels constrained also to insist on a similar restriction in respect to the character of park treatment. It is hardly a park, but a simple

Mexican place or plaza, where people for various reasons gather together. Consequently, I am going to ask you to keep it as simple as possible --- just the old-time space with a large well or pool in the center twenty feet wide, made with three-foot walls of rough coated cement two and one-half feet high, resting on a sandstone base perhaps six inches above the ground. This will give room for people to come together around the well or pool. The boulder with inscription could be lifted a little higher on its base so as to show above the water and be left there, or it could be moved with the flag staff just outside the pavement around the well. Across the square or plaza should run paths ten feet wide, both the long and short way of the plot, paved with the large old-fashioned Mexican brick. These paths should simply end at the extreme confines of the lot. In the four corners should be set sugar gums and peppers and also on either side of the entrance to the brick paths, with four more sugar gums along the boundaries as shown on the accompanying maps. Just enough trees are used to give a little shade, for the Mexicans were not given to trees in their squares. They seemed to want the open space.

Mission Hills Park. This park consists in large part of a deep ravine of a very picturesque character. I would suggest that two roads be led along the contours, on reasonably easy grades, to connect Washington street with Stephens Boone street and Randolph street. The conformation of the sides of this park suggests the use of live oaks on either side of the road, as shown on the accompanying map. Sumach and other wild-looking growths should be encouraged on the slopes below the oaks. Along the borders of the Catholic cemetery should be planted sugar gums with pepper trees in front of them looking toward the park. This treatment should also extend along the east side of the park.

SAMUEL PARSONS,
Landscape Architect

List of trees and shrubs with numbers applying to accompanying sheets.

1. Camphor tree
2. Italian cypress
3. Torrey pine
4. Guadalupe cypress
5. Blackwood acacia
6. Pinus Canariensis
7. Pinus Halipensis
8. Acacia Floribunda
9. Cedar of Lebanon
10. Casuarina Equisetifolia
13. Eucalyptus Polanthema
14. Ficus Nitida
17. Schinus Molle (Pepper tree)
18. Ficus Rubignosa (Rubber)
19. Eucalyptus Corynocalyx (Sugar gum)
21. Pinus Pinea
24. Eucalyptus Citriodora
25. Acacia Mollisaima
26. Cedrus Deodora
28. Eucalyptus Sideroxylon
31. Cupressus Arizonicum
35. Eucalyptus Cornuta Lehmani
36. Cupressus Fastigiata (Italian cypress)
37. Pinus Muricata
38. Tamarix Africana
39. Australian Salt Bush
40. Quercus Agrifolia (Live oak)

- A. Acacia Latifolia
- B. Coprosma Brewerit

- C. *Rhusintegrifolia*
- D. *Pittosporum Tobira*
- E. *Grevillea Thelmani*
- F. *Leptospermum Levigatum*
- G. *Acacia Baileyana*
- N. *Hakes Pugeoformis*
- Q. *Melalenca Lencodendron*
- S. *Rhusiaurina*
- Y. *Acacia Gravillis*
- Z. *Carrisa Arduina*
- C. *Crataegus Lalandil*
- G. *Pittisporum Undulatum*

San Diego Sun, July 6, 1910, 6:2. Cabrillo? No! says Wright and Luce.

SAN DIEGO UNION, JULY 6, 1910, 5:1: WANTED NAME FOR CITY PARK: BOARD DOES NOT LIKE "CABRILLO"

Commissioners Wright and Luce oppose suggestion of architect Parsons, selection is postponed; name proposed by public will be considered at next meeting of Board. O'Hallaran seems to be in favor of Parsons' suggestion. Senator L. A. Wright thinks the name of Marston would be more appropriate; also thinks Sierra, suggesting a high ridge or ravine, would be a good name. Judge Luce thinks Ocean View or Bay View or Spanish name suggestive of the same would be suitable. Wright and Luce finally agreed that the public should be consulted. Parsons' report was ordered filed with the understanding that it shall be taken up for consideration at an early date.

San Diego Sun, July 7, 1910, 3:4. Park afire, O'Hallaran is called.

San Diego Sun, July 7, 1910, 4:1-2. Under the Peppers in the Park: Name for park.

San Diego Sun, July 8, 1910, 2:1-3. Letters offering names for park.

San Diego Sun, July 9, 1910, 3:1-4. Letters offering names for park.

San Diego Sun, July 9, 1910, 4:1-2. Under the Peppers in the Park: Name for park.

SAN DIEGO UNION, JULY 10, 1910, 17:6, ON THE MARGIN by YORICK

Personally, I am in favor of calling it Cabrillo park because he "saw it first." How do we know that Cabrillo did not climb to the summit of Date street to view the bay and ocean? Is it not very probable that Cabrillo was the first man to set foot on the golf links, or to contemplate the Sefton deer pasture as a possible town lot to be sold to the future tourist enraptured of the climate and rich enough to enjoy it without building a factory to work up the raw material of the native products?

San Diego Sun, July 11, 1910, 1:1-2, 2:3-4. "Horton" and "Silver Gate" close in park name race.

San Diego Sun, July 11, 1910, 4:1-2. Under the Peppers in the Park: Name for park.

San Diego Sun, July 12, 1910, 2:1. Naming of park is up to people; Commissioners loath to take quick action on the matter.

San Diego Sun, July 14, 1910, 4:1-2. Under the Peppers in the Park: The Park Commissioners didn't name the park.

San Diego Sun, July 15, 1910, 11:2-3. Citizens much interested in naming park.

San Diego Sun, July 16, 1910, 2:1-2. Names for park submitted by **Sun** readers.

Park Commissioners Meeting, July 19, 1910. Hubbard presented two bear cubs to the park.

San Diego Sun, July 19, 1910, 10:2. Mrs. Hubbard offers cub bears for city park originally intended for resort; now up to Board.

San Diego Sun, July 20, 1910, 2:5. Park Commissioners agree to accept cub bears.

San Diego Sun, July 22, 1910, 1:7-8. Tired, little old lady couldn't find park bears.

San Diego Sun, July 26, 1910, 4:1-2. Under the Peppers in the Park: an Indian Village on this park would be a tourist attraction..

San Diego Sun, July 26, 1910, 5:5. Playgrounds can't use city's money.

San Diego Union, July 26, 1910, 8:1-2. La Jolla citizens pledge unanimous support to one million dollar Fair bonds.

San Diego Union, July 26, 1910, 9:1. Phil A. Stanton, Republican candidate for governor, promises aid to 1915 Fair.

San Diego Sun, July 27, 1910, 4:1-2. Under the Peppers in the Park: "Nothing can head us off now, we are bound to have a zoo in the park."

San Diego Union, July 27, 1910, 9:1. Citizens present strong pleas in support of Fair bonds; park improvement urged as one of the many good reasons for favorable vote; \$10 prize to be given to writer of best letter on behalf of bonds; excerpts from interviews with G. A. Davidson, H. L. Moody and Dr. F. R. Burnham.

San Diego Union, July 27, 1910, 16. Booster's Special over San Diego & Arizona will carry big crowd to present end of track in Mexico.

San Diego Sun, July 28, 1910, 1:6-7. Lady will bring wild cat before Park Board.

San Diego Sun, July 28, 1910, 3:7. Bears in den at park soon.

San Diego Union, July 28, 1910, 7:1. Fair Bond boosters plan grand finale for campaign; big meeting to be held on Brooklyn Heights tonight; final rally on plaza August 8.

San Diego Union, July 29, 1910, 5:1. First passenger train over San Diego & Arizona line leaves today.

San Diego Union, July 29, 1910, 10:1-2. Fair bonds meet approval of improvement clubs; residents in North Park district unanimously in favor of project; would down gas scheme; adopt resolution in favor of state building at Exposition.

Judge Haines expressed opposition to the bonds at a meeting of residents of Brooklyn Heights last night. He said Exposition would turn out to be a "regular midway." Dr. F. R. Burnham denied he endorsed bonds: "I do not care to be quoted and I wish you to state that the interview in which my name was attached was unauthorized."

San Diego Union, July 29, 1910, 18:1. Canvass shows sentiment for Fair bonds is almost unanimous; civic improvement issue is also favored; interviews with W. W. Gunnis, Dr. R. W. Austin, Arthur Marston, C. M. Gifford, Napoleon J. Roy, Walter Moore, Senator Leroy A. Wright.

San Diego Union, July 29, 1910, 18:2-3. What bonds cost taxpayer, by J. W. Sefton, Jr. . . . Bonds were voted in 1903, 1905 and 1907. The tax rate in 1904 was but sixteen cents per thousand dollars greater than the tax rate of 1903. In 1906, the tax rate was \$1.32 per thousand dollars less than in 1905. In 1908, the tax rate was sixteen cents per thousand dollars greater than 1907.

San Diego Sun, July 30, 1910, 4:3-5. D. C. Collier considers Panama Canal celebration from a business standpoint.

San Diego Union, August 2, 1910, 16:1-3. Final rally for park bonds to be enthusiastic round-up campaign; to close with blare of trumpets; speakers will address assemblage from front of U.S. Grant Hotel on August 8, the eve of the election; letters of support from Mayor Grand Conard and L. J. Wilde.

San Diego Union, August 3, 1910, 6:1. Loyal citizens boost for Fair bonds at first dinner given in Grant Hotel; speakers appeal to civic pride.

San Diego Union, August 5, 1910, 10:1. 9th warders at rally urged to vote and boost for Fair bonds.

San Diego Sun, August 6, 1910, 4:1-2. Under the Peppers in the Park: the new baby bears in the park.

San Diego Sun, August 6, 1910, 4:3-5. Judge M. A. Luce, member of Board of Park Commissioners, writes article on "The City Beautiful."

San Diego Sun, August 6, 1910, 4:3-5. Park Improvement With Bonds, by J. W. Sefton, Jr.

San Diego Union, August 6, 1910, 5:1. Test vote results 57 to 0 for park improvement bonds.

San Diego Union, August 8, 1910, 6:1, 2, 3, 4, 5, 6. Some Suggestions for the Exposition Building Committee, by Director-General D. C. Collier.

As the site for the Panama-California Exposition has been chosen, it is evident that the Committee on Buildings and Grounds must soon proceed with permanent plans for improvement. The stockholders, on the occasion of their meeting held May 25, made choice of a site and approved the scope and general purpose of the Exposition submitted for their consideration, and we know of no reason why some of their number may not be allowed to make a few suggestions that may or may not find favor with the public. It is our belief that valuable time and effort may be saved by early action and with this end in view, we present the following brief summary, the result of considerable thought and discussion.

The problem of making permanent improvements in the park that will prove of lasting benefit to the City of San Diego and at the same time furnish a fit setting for such as Exposition as is proposed, is one that requires the highest type of professional ability. One of the earliest questions that is to be determined is the general type of architecture to be employed. In view of the historical character of the Exposition, we believe that the Mission style would be most appropriate, as typical of Southern California and emblematic of the entire southwest. It should produce a pleasing harmony and create in the mind of the visitor an interest in the romance of the Pacific. The style is severely simple and solid, and substantial buildings may be created at an expense much less than would be required by adoption of any of the classic styles.

Having in mind the Nolen plan, we are of the opinion that all permanent buildings should be located near the south side of the City Park, immediately back of, or adjoining the present High School site, more commonly known as the old Howard tract.

We herewith submit a drawing of this part of the City Park with the suggested locations for the various buildings marked thereon.

(See newspaper for drawing)

No. 1 represents a stadium which has been under consideration by our school board for some time, and which, when constructed, will eliminate the unsightly oval now used by the High School and obviate the necessity of taking money from the school fund for this purpose.

No. 2 located on the long, narrow point to the northeast, might be called the Auditorium, to be used as a public assembly building, large enough to house any public gathering, convention or delegation that might in the future visit San Diego.

No. 3, located on the point immediately adjoining to the southeast, to be used as a museum of archaeology and natural history.

No. 4, located in the shallow ravine, represents a Greek theater.

Nos. 5 and 6 might be the possible locations for State and National structures typical of our local history such as, for instance,

- a. A reproduction of the Cliff Dwellers of Arizona
- b. A Pueblo Village from New Mexico
- c. An Aztec village, the gift of Mexico

From the foregoing it will be seen that in this group of buildings the first four only will be built by the City of San Diego, and will represent the practical and the aesthetic. The last two groups we hope to obtain through the generosity of our sister republics as a lasting monument to the early history of this section of the world.

As to temporary structures, they must be largely determined by the character of the exhibits we will receive and would logically be placed upon the plateau immediately north and west of these buildings. Naturally this territory must be beautified and the laying out of paths, walks and vistas. The present boulevard might be widened and given the name of El Camino Real. Other buildings, gates and avenues throughout the Exposition grounds might be given such local names with which we are all familiar --- names that were first used to designate the missions established by the Franciscan fathers up and down our coast.

The location of the Government Agricultural Experiment Station can only be determined after careful study of existing conditions by governmental authority.

The above are simply suggestions entirely devoid of detail, but we believe they will form the basis of one of the most beautiful and educational as well as unique group of buildings for any purpose.

San Diego Union, August 8, 1910, 7:6-7. Leading citizens of Portland and Seattle tell of benefits derived from their Expositions.

San Diego Sun, August 9, 1910, 1:1. Exposition bonds carried by a vote of 10 to 1.

San Diego Sun, August 9, 1910, 1:3. What It Means, by D. C. Collier.

San Diego Sun, August 9, 1910, 1:7-8. Gas bonds lost.

San Diego Union, August 9, 1910, 7:1-4. Thousands pack streets and cheer speakers at final bond rally last night; celebration between the hours of 8 and 10; lights gleaming for first time from front of U. S. Grant Hotel; estimated 10,000 people on D. Street from 3rd to 4th; parade, mounted police, automobiles, city guard band, Spanish matadors; Senora Gertrude Alta, oldest woman in California in a buggy brought round the Horn; Father Junipero Serra; to altar boys; 2 Mexican-style vaqueros mounted on burros; Spanish carreta made by Frank Whaley many years ago and covered with ferns and flowers; float representing first ship passing through Panama Canal designed, built and decorated by Paul Thiene; beauties on ship scattered flowers; old Hinton stage coach; stage operated at one time between Old Town and Los Angeles; cavalcade of cowboys.

Carl Heilbron, chairman of committee for arrangements; speeches by J. W. Sefton, Jr., Mayor Grant Conard, George Burnham, Frank Thomas, G. A. Davidson, D. C. Reed, A. E. Dodson, Judge C. N. Andrews, D. C. Collier, Judge T. J. Hayes.

Collier: "As I was making my way to this platform tonight, I was handed a document headed 'Boost! Boost!' It should have been headed 'Knock! Knock!' I hoped that the knockers were all dead or converted. I would far prefer the latter, but if they will not be converted, well ---

"The knockers remind me of the Irish assessor who charged his friend \$40 for owning a goat. The friend protested and the Irishman showed him the law, which specified a certain taxation for front feet abutting and abounding on streets. When asked the connection, the assessor said, 'An shure, Molke, yer go-o-at is a-butting' an' a-boundin' at people all ar the time.

"That's like the knockers --- they are 'a-buttin and a-boundin' all of the time, but they are producing no results. That's all a knocker can do.

"I can look back at the day when it was suicidal for a man to stand before the people and advocate a bond proposition. Los Angeles people used to say that San Diego was so bad that even a skunk would lose his scent --- time upon a time, they said there was nothing in San Diego but sand and fleas. How different things are now.

"Look across the street and see the signs present on the boarding around the Wilde fountain. When Los Angeles held her aviation meet, a train, absolutely unique in the history of this country, was sent from here. It contained 45 automobiles, the property of individuals, and these were used in parading up and down the streets of Los Angeles displaying those same signs you see across there. Heading the procession was a San Diego band. They showed the people of Los Angeles that San Diego had at last thrown off her swaddling clothes and was finally ready to take her place among the cities of California.

"Many days, weeks and months of incessant labor have followed. Tonight we are at the point of a momentous decision. Tomorrow the United Press and the Associated Press will flash out to the world one of two messages --- the one will predict the greatest of futures for our city --- the other will mean oblivion.

"It's up to you men and the women who tell you how to vote. Maybe the message will say that San Diego has fallen down, but it is my belief that it will blaze forth to the world that the city has already given \$20 (?) per capita in permanent subscription will vote for an equal amount in bond issue and will tell everyone that we have made good. Our faith is pinned to the loyalty and civic pride of San Diegans."

San Diego Sun, August 10, 1910, 1:7-8. Election freakish; Exposition bonds carried by about 6-1/2 to 1; vote was 4,576 to 705; road items and one sewer bonds proposition defeated.

San Diego Union, August 10, 1910, 1:1-2. Exposition bonds carry by 7 to 1 vote; bonds for \$13,000 for Old Mission and Fort Stockton memorial grounds defeated; bonds for \$1,500,000 for municipal gas and electric plant defeated.

San Diego Union, August 10, 1910, 4:1. EDITORIAL: Exposition Is Assured.

San Diego Union, August 13, 1910, 5:4. Director General Collier and party of boosters reach San Francisco.

San Diego Union, August 14, 1910, 15:1. San Diegans speak at big banquet of boosters in north; Collier says, "We are here to suggest and receive suggestions."

San Diego Sun, August 16, 1910, 9:3. Sunbeams: Children visiting the cages feeding candy to two baby bears.

San Diego Union, August 16, 1910, 7:1. Both parties have ratified "Washington agreement" which demarks scope of San Diego and San Francisco expositions, said Collier, who returned from San Francisco yesterday;

San Diego exposition to be a southwestern and Latin-American exposition; San Diego to seek federal appropriation of agricultural and experimental station and state appropriation for a permanent agricultural college and forestry school.

San Diego Union, August 17, 1910, 1. Hiram Johnson elected governor.

San Diego Union, August 18, 1910, 1. Spalding 1,500 votes behind Works for U S. Senate.

San Diego Sun, August 22, 1910, 3:5-6. Councilman Frank Salmons, Monday, declared all the municipal bonds would have carried if the Fair directors and the Chamber of Commerce had kept their word to work for them.

Park Commissioners Meeting, August 23, 1910. Samuel Parsons' bill for professional services was allowed, the amount being \$400.

San Diego Sun, August 23, 1910, 2:5-6. Pursell gets busy at 11th hour; many teams and men at work.

San Diego Sun, August 23, 1910, 3:1-2. Sefton says Exposition not to be blamed in bond matter.

San Diego Sun, August 25, 1910, 3:3. Tropical trees to be planted in city park; Park Board members held a conference with Monrovia nurseryman who had returned from jungles of Africa.

San Diego Sun, August 25, 1910, 4:1. EDITORIAL: The Two Celebrations.

San Diego Union, August 25, 1910, 10:2-4. Directors name Building Committee: G. W. Marston, chairman; A. G. Spalding (highway commissioner); Leroy A. Wright (park commissioner); Thomas O'Hallaran (park commissioner); Judge M. A. Luce (park commissioner); Russel C. Allen (fruit grower); Howard M. Kutchin (capitalist).

San Diego Sun, August 27, 1910, 1:6-7. A plan for a great Pan-American University to occupy the buildings of the Panama-California Exposition at the conclusion of the Fair in 1915 was introduced at a meeting of the Michigan Society, held at Mission Cliff Pavilion, Friday night.

San Diego Sun, August 27, 1910, 3:2-3. Park Board members on Exposition building committee.

San Diego Sun, August 29, 1910, EDITORIAL: "Put This in Your Pipe and Smoke It, Mr. Anti-Labor Man," IWW Folders, Amero Collection.

San Diego Union, August 30, 1910, 14:1. Collier goes to Los Angeles to represent city at bond issue conference; will meet San Francisco and Los Angeles legislators at latter place; discussion will touch on Exposition and harbor projects.

San Diego Union, August 31, 1910, 16:4. Board of Park Commissioners claim G. W. Pursell line has widened roadbed through City Park to 100 feet instead of 60 feet granted by franchise.

San Diego Sun, September 3, 1910, 4:3-5. The Objects and Aims of the Industrial Workers of the World, by Laura Payne Emerson, see also "Views of Workers on Free Speech."

San Diego Sun, September 6, 1910, 4:1-2. Under the Peppers in the Park: Labor Day parade.

San Diego Sun, September 10, 1910, 1:7. Marston made chairman and O'Hallaran secretary of Exposition building committee at get-acquainted meeting.

San Diego Sun, September 15, 1910, 12:4. A mass meeting was held in the open air Friday evening in Golden Hill Park, under the joint auspices of the Golden Hill and Brooklyn Heights Improvement Clubs, the Children's Playground Association, and the Board of Park Commissioners to consider plans for the

improvement of the 40-acres playgrounds and the building of a Field House on the high ground across the canyon east of the Golden Hill park improvements.

Park Commissioners Meeting, September 6, 1910. It was the sense of the Board that all shooting permits for the park be canceled on October 1.

San Diego Sun, September 20, 1910, 1:7-8. Landlords of Red-light are facing prosecution.

San Diego Sun, September 21, 1910, 7:5. Colonel Collier is right there on any topic.

September 22, 1910, Correspondence on Location of Exposition, 1900-1914, Marston File, San Diego Historical Society Research Library . . . Marston's letter to Nolen.

Building and Grounds Committee: A. G. Spalding, G. E. Allen, H. M. Kutchin, Colonel Collier, G. W. Marston
Park Commissioners: Wright, Luce, O'Hallaran.

First choice for landscape architect - Daniel Burnham
Second choice - wavering between Olmsted Brothers and John Nolen

San Diego Union, September 25, 1910, 10:1. First piece of construction work done in preparing for Fair was improving waterfront from E to D Streets at a cost of \$250,000; architect Nolen making plans.

San Diego Union, September 29, 1910, 9:1. Sefton to resign as Fair director; prepares for world tour; takes effect October 1; will also resign as Chairman of Publicity Committee.

San Diego Sun, September 30, 1910, 1:7-8. Wilde buys half of Grant Hotel.

San Diego Union, September 30, 1910, 8:1. Sefton resignation refused; appointed "Director of Exploitation and Publicity."

San Diego Union, October 6, 1910, 7:2. Plan to regrade Park Boulevard from City Park to El Cajon Avenue with a parking strip in center; graded in 1888 by College Hill Land Association; surfaced with oil "several years ago"; meeting of University Heights Improvement Association.

Board of Park Commissioners, October 18, 1910. Commissioners decided to go over the Pursell road and location of the station; the location finally decided upon being at the junction of Grape and 27th Streets.

San Diego Sun, October 19, 1910, 12:2. Grading through park completed; Pursell is busy; shows Park Commissioners work he has done; much money; ornamental station to be located at a point about even with Grape Street.

San Diego Union, October 20, 1910, 11:1. 4th annual exhibition of San Diego Floral Association closed last night; A. D. Robinson: "San Diego needs a botanical garden containing a permanent exhibit which could easily be maintained by the Association, the exhibit to be free to visitors."

San Diego Union, October 23, 1910, IV, 25:6. Yorick's comments about A. D. Robinson's suggestion of a botanical garden.

San Diego Union, October 27, 1910, 5:2. Complete roadbed of Pursell line in City Park; San Diego, El Cajon & Escondido Railway will commence laying rails when more grading is pushed in direction of La Mesa; biggest piece of drainage work being done in the park is a point where the road will cross the boulevard; plans being drawn for a bridge to span boulevard, 40 feet long and 12 feet above highway; a fill 13 feet in height made across canyon.

San Diego Sun, October 28, 1910, 6:2. John C. Olmstead [sic] of Boston and John Galen Howard are coming to San Diego soon to confer with members of Park Commission on plans for laying out the big park for the Exposition.

San Diego Sun, October 28, 1910, 12:1. (see also San Diego Evening Tribune, October 28, 1910, 6:1): Balboa is name for big park: Commission suddenly decides, October 27, that big playground needs a handle; name was chosen from hundreds that were offered at meeting of Building and Grounds Committee with members of City Park Commission yesterday; "Horton," "Silver Gate" and "Cabrillo" considered; "someone suggested" Balboa..

San Diego Union, October 28, 1910, 9:1. Balboa Park chosen as name of city's pleasure ground; selection made by members of Commission; unanimous decision reached after long consideration of question; name chosen October 27 at a meeting of the city Park Commission with members of Building and Grounds Committee of the Panama-California Exposition. . . . City Charter amended in 1905 to provide an annual park appropriation based on assessed valuation of the city now exceeds \$20,000 per year.

Balboa Park Name

Thomas O'Hallaran Scrapbook (California Room, San Diego Public Library)

George W. Marston, H. M. Kutchin and D. C. Collier present at a joint meeting

Daniel Cleveland (San Diego Union, May 30, 1926) gives November 1, 1910 as date
Geo. W. Marston (History of City Parks, p. 11) gives November 1, 1910 as date
Leroy A. Wright (San Diego Union, March 17, 1935) gives November 1, 1910 as date

Leroy A. Wright puts Marston, Kutchin and Collier at meeting

Board of Park Commissioners, November 1, 1910. A resolution was adopted naming the 1400-acre city park "Balboa Park," all present concurring.

San Diego Union, May 27, 1918, 4:2-4. Gives Harriett Phillips as author of name and puts O'Hallaran, Luce and Wright at meeting.

December 29, 1910, Document 38825, filed January 3, 1911 (City Clerk's Office, San Diego): Letter Thomas O'Hallaran, Secretary Board of Park Commissioners to City Council . . . Balboa Park officially named November 1, 1910. Name ratified by State Legislature in 1911 (Statutes 1911, Chapter 286, Section 3).

.

San Diego Sun, October 29, 1910, 4:1-3. Under the Peppers in the Park: comment on name "Balboa" for park.

NOTE; Nancy Carol Carter, "Naming Balboa Park: Correcting the Record," *Jurnal of San Diego History*, Vol. 56, Winter/Spring 2010, Nos. 1 & 2. Account of process through which City Park acquired its new name together with extensive bibliography.

.

San Diego Union, October 29, 1910, 8:1. L. G. Monroe engaged to boom San Diego's Exposition as secretary; was newspaperman and booster of Spokane and eastern Washington.

October 31, 1910, Correspondence on location of Exposition, 1910-1914, Marston File, San Diego Historical Society Research Library.

Letter to Marston from Samuel Parsons & Company: Parsons would like the job of landscape architect for the Exposition but cannot give it full time; wants opportunity to consider the planting scheme to see if it corresponds with his original ideas.

San Diego Union, November 5, 1910, 8:1. Letters from foreign countries show interest in Exposition.

San Diego Union, November 6, 1910, 17:1. John C. Olmsted, eastern landscape artist, comes to San Diego to plan Exposition grounds; John Galen Howard, San Francisco architect, "will construct the buildings to be permanent structures and monuments to the enterprise of the city." . . .

Olmsted: "I am sorry to say I cannot give you my opinion of San Diego as I arrived after dark. I am favorably impressed with your streets, especially with the group of lights which illuminate them. One thing should be eliminated. That is the unsightly billboard nuisance, which I noticed even though it was dark."

San Diego Union, November 7, 1910, 5:2-3. Olmsted impressed with Balboa Park: "It would be interesting for people to see the land in its wild state. Not that improvements and a lot of them will be necessary for the novelty's sake. I don't know how feasible the scheme will be, but my idea is to put in the improvements on the outside of the tract, comprising the larger portion of the acreage, leaving the interiors in their natural manner, save for the installation of grass plots and shade trees here and there."

San Diego Union, November 8, 1910, 9:1. Olmsted confers with Commissioners on plans for Balboa Park; George W. Marston, chairman of city Park Commission.

San Diego Union, November 11, 1910, 16:2-3. John C. Olmsted outlines plans for Exposition buildings and park improvements.

December 7, 1910. Correspondence on location of Exposition, 1910-1914, Marston File, San Diego Historical Society Research Library.

Letter Olmsted Brothers regarding employment of Mr. Blossom from Olmsted firm.

December 9, 1910. Olmsted Brothers approved as landscape architects for Exposition.

San Diego Sun, November 10, 1910, 11:7. The Buildings and Grounds Committee of the Panama-California Exposition Wednesday afternoon decided to employ John C. Olmsted, landscape architect, to lay out the city park for the Exposition.

San Diego Sun, November 12, 1910, 7:1-2. Judge M. A. Luce says Balboa Park is no garbage ground.

San Diego Sun, November 12, 1910, 7:2. D. C. Collier, who has large interests at La Mesa Springs, has generously donated to the people of the town a park that will be known as the "Collier Park"; lies between La Mesa Springs and the Collier Medicine Springs, southeast of the town.

San Diego Sun, November 17, 1910, 1:4-5. Autos in crash on bad curve in Balboa Park; new Tibbals machine strikes small Flanders car, driven by Mr. Darling, both being damaged; came near going off grade.

San Diego Union, November 27, 1910, 9:2-3. Reproduction of first postcard of series of ten Exposition subjects to be used to advertise Exposition by San Diegans mailing to friends, clubs and societies to assist novel plan of advertising.

San Diego Sun, November 29, 1910, 4:5-6. Charles Cristadoro urges botanical garden for the park.

San Diego Sun, November 30, 1910, 1:2-3. Park Commissioners are indulging in christenings; name city park and everything in it without consulting the citizens who are expected to stand for these pet names for all time to come; Commissioners now naming plateaus and canyons.

San Diego Sun, December 1, 1910, 1:3. Lovers Hiding Behind the Benches: "There are all kinds of benches there if the people only knew it," said a Park Commissioner Thursday. "Fellows and girls pull them down out of the open under trees where nobody can see them and where their love-making will be uninterrupted. Consequently, all our benches are hidden by trees and the average visitor to the park thinks that none have been provided."

San Diego Sun, December 2, 1910, 3:2-3. Sunbeams: objects to name "Balboa" for park.

San Diego Sun, December 2, 1910, 4:1-2. Under the Peppers in the Park: the park and the Panama Canal celebration.

San Diego Union, December 4, 1910, 10:1. Arizona plans to make big exhibit at Exposition.

San Diego Sun, December 5, 1910, 4:2-3. When Balboa came west.

San Diego Sun, December 7, 1910, 8:3. Sunbeams: more criticism of "Balboa"; "Silver Gate" favored.

San Diego Union, December 7, 1910, 20:1. Guadalupe, West Indies, to have exhibit at Exposition.

San Diego Sun, December 13, 1910, 3:1. Half million dollars for buildings in park.

San Diego Sun, December 14, 1910, 4:1-2. Under the Peppers in the Park; the Exposition and the Park.

San Diego Sun, December 14, 1910, 9:5. Olmsted talks of park plans for Exposition.

San Diego Sun, December 19, 1910, 16:1. Country Club to have fine home at park's edge.

San Diego Sun, December 23, 1910, 2:4. Rock pile and City Pound must move; Park Commission orders city and county out.

San Diego Sun, December 27, 1910, 1:4. Seek new name for park; Council wants to hear from Commission; wants a popular choice.

December 28, 1910. Bertram Goodhue wrote letter to Elmer Gray inquiring about post of Exposition architect; Goodhue was summoned to San Diego (date unknown), Esther McCoy, "Five California Architects."

San Diego Sun, December 30, 1910, 4:1-2. Under the Peppers in the Park: the rock pile and the pound.

San Diego Sun, December 30, 1910, 4:4-5. No "Balboa Park" for these citizens.

Board of Park Commissioners, December 13, 1910. Mr. Cleveland presented a request from the Anti-Tuberculosis Society for permission to erect an Anti-Tuberculosis Hospital on the grounds of Balboa Park; request was denied, it being beyond the power of the Board to grant such permission. . . . The Board approved the expenditure of \$300 for a bird cage to be built in the Golden Hill Park by Superintendent Christopher.

Board of Park Commissioners, December 27, 1910. Mr. Olmsted and the Board to inspect the park Thursday afternoon.

1911

Exposition Organization, January 1911

Director-General	D. C. Collier
Secretary	L. G. Monroe
Auditor	C. A. Richardson
Director of Publicity	Winfield Hogaboom

January 1911, "Park Commissioners and Landscape Architect Tell Floral Association of Park and Exposition Plans," **California Garden**, pp. 4-6.

January, 1911, "Why New York and Boston? A subscriber wants to know if eastern gardeners are good authority on what should be planted in Southern California," **California Garden**, pp. 6-7.

San Diego Union, January 2, 1911, 2:2, 3, 4. Diagram maps showing commercial relation of San Diego harbor to Latin American countries.

San Diego Union, January 2, 1911, 1:1, 2, 3, 4, 5, 6, 7. Artist's drawing of ground plan of Exposition; John Olmsted outlines plans for grounds.

San Diego Union, January 2, 1911, 3:7, 5:1. Winfield Hogaboom, Director of Publicity, tells country of plans; declares city will profit, cites past experiences; much advertisement for city already obtained from varied sources

San Diego Union, January 2, 1911. San Diego Exposition will educate farmers according to Professor E. J. Wickson, head of the Department of Agriculture in the State University at Berkeley.

San Diego Union, January 2, 1911, 3:6. Latin Americans favor Exposition; Guatemala first country to signify intention of making exhibit.

San Diego Union, January 2, 1911, Exposition Section, 1:1-2, 6:1-3. Exposition Assured of Splendid Success.

San Diego Union, January 2, 1911, Exposition Section, 2:1. Director General confident fair will be big success.

San Diego Union, January 2, 1911, Exposition Section, 4:1-5. Spectacular Panama-California Exposition, San Diego, 1915.

San Diego Union, January 2, 1911, Exposition Section, 3:2-3. Commercial Field of Exposition.

(San Diego) Evening Tribune, January 6, 1911, 10:1. F. P. Allen, Jr., director of works, comes to city well recommended; within 3 months will begin work on buildings.

San Diego Sun, January 6, 1911, 8:5. Allen to boost work on Exposition buildings.

San Diego Union, January 6, 1911, 1:1. Frank P. Allen, Jr. hired as Director of Works on January 5. . . . Olmsteds had prepared plans for world's fair in Chicago, the Lewis and Clark Exposition in Portland, and the Alaska-Yukon Pacific Exposition in Seattle. Allen was Director of Works for the Alaska-Yukon-Pacific Exposition. Under his leadership, the Exposition was completed and ready on opening day.

(San Diego) Evening Tribune, January 9, 1911, 5:5. To be Balboa Park or not to be Balboa Park?, that is the question; City legal department gives intimation that legislative enactment is necessary to legally change name.

January 10, 1911, Board of Park Commissioners: Contract of Olmsted Brothers for services as landscape architects for duration of San Diego Exposition accepted.

January 13, 1911, Board of Park Commissioners: Agreement of Panama-California Exposition offered and accepted; president of Board authorized to execute agreement with Exposition in relation to expenditures with the Division of Works..

January 17, 1911, Board of Park Commissioners: Olmsted and Dawson present; advised engagement of James Cummings as landscape gardener for park; to be paid \$150 per month beginning January 15, 1911.

(San Diego) Evening Tribune, January 19, 1911, 2:3. California not to ask for help for Exposition; resolution introduced at Sacramento will be rushed through and wired to Congress.

(San Diego) Evening Tribune, January 20, 1911, 1. House Committee Favors Fair at New Orleans; Collier says action does not effect San Diego project.

(San Diego) Evening Tribune, January 21, 1911, 7:1. Bertram G. Goodhue comes to study form and motif of architecture.

(San Diego) Evening Tribune, January 21, 1911, 7:2. Will try to bring the Turn Verein to San Diego in 1915.

(San Diego) Evening Tribune, January 21, 1911, 7:4. Exposition postcards being printed by the million.

(San Diego) Evening Tribune, January 23, 1911, 5:4. Seek information relative to 1915 Fair and bond issue; Dillon, Thomson & Clay inadvertently led to believe both are too closely connected.

San Diego Union, January 23, 1911, 6:1. City could better lose Scripps than Spreckels.

U.S. Congress, House Committee on Industrial Arts and Expositions, Hearings on the World's Panama Exposition, Report no. 1989, 61st Cong., 3rd sess., 24 January 1911 (Washington, D.C.: GPO, 1912) 1-16.

San Diego Union, January 24, 1911, 7. Bertram Goodhue, noted designer, visitor in city.

San Diego Sun, January 25, 1911, 8:1. Big aviary is planned; many birds in park.

San Diego Sun, January 28, 1911, 8:1. Engage Goodhue to design Exposition buildings here.

San Diego Union, January 28, 1911, 10:3-4. George W. Marston interview: Bertram Goodhue hired as project architect in an advisory capacity January 27; to give general designs for the buildings and the composite for the whole group. He will have the deciding voice in all questions of design and artistic effect. He will give the complete plans and specifications for the most important buildings. Irving Gill will assist in amplifying plans and making drawings for Exposition buildings; Frederick L. Olmsted, architectural engineer, lauds Goodhue.

January 29, 1911. Mexicali captured by Magonista Liberal Party insurgents.

January 30, 1911. Memorandum of Agreement made and entered into this 30th January 1911 by Bertram Grosvenor Goodhue, Architect of the City of New York, party of the first part, and the Panama-California Exposition, a corporation duly organized and existing under the laws of the State of California:

Goodhue to design either an Auditorium or Art Building; Gill to design one of the above; Other buildings to be designed by Goodhue, Gill or "the division of works" of the Panama-California

Exposition Corporation.

(Panama-California Exposition Papers, San Diego Public Library)

San Diego Union, January 30, 1911, 7:1. Bill introduced in state legislature by Senator Wright and in assembly by Hinkle to give city authority to use any portion of Balboa Park to hold an Exposition in 1915; question of naming pleasure grounds settled by measure introduced in state legislature.

(San Diego) Evening Tribune, January 31, 1911, 1. San Francisco wins in House over New Orleans.

San Diego Union, February 1, 1911, 1:1. Exposition coming to Pacific coast; San Francisco wins recognition from U.S. Government; vote is taken in House January 31; final ballot is 259 to 43; result greeted with wild enthusiasm.

San Diego Union, February 1, 1911, 4:1. EDITORIAL: San Francisco's Success Meanwhile no part of the state will rejoice more heartily over San Francisco's preliminary victory than San Diego. This city's purpose to hold an Exposition in 1915 is closely associated with San Francisco's plans. The latter's success will insure an enormous attendance at the San Diego Exposition. At present the prospects of the success are very bright.

(San Diego) Evening Tribune, February 2, 1911, 9:6-7. Frank P. Allen, Jr. says, "San Diego Exposition will surpass them all."

San Diego Union, February 2, 1911, 2:4. Directors of Fair to meet boosters; Secretary Monroe of Exposition approves citizens' plan for big carnival in connection with groundbreaking ceremonies of Panama-California Exposition.

San Diego Union, February 3, 1911, II, 9:3. Frank P. Allen, Jr., who as a deserter fought in the Spanish-American war, made a unique record.

San Diego Union, February 3, 1911, 16:3. State bill provides for school in park; institution to be used by Exposition and afterward as college.; Assemblyman Hinke putting bill through state legislature.

San Diego Union, February 4, 1911, 4:3. Some notable World's Fairs, by Frederic J. Haskin..

San Diego Union, February 4, 1911, II, 9:2-5, 16:3-4. Great celebration is assured by support of Fair directors; groundbreaking program promises to rival New Orleans famous Mardi Gras; promoters heartily cheered; executive committee to meet early next week and perfect details in connection with preparations.

San Diego Union, February 4, 1911, 2:1-7. War waged over question of site of Panama Canal celebration; field cleared for New Orleans and San Francisco, by Charles N. Lurie.

San Diego Union, February 5, 1911, 18:1. Legislators here to inspect site for proposed state building; 40-acre tract to be donated for agricultural college is viewed by visitors; Normal School also is inspected; information obtained will be embodied in report to state assembly.

(San Diego) Evening Tribune, February 7, 1911, 5:3. Organized bodies working to make groundbreaking celebration an epoch event; Dick Ferris to stage big carnival and pageantry.

(San Diego) Evening Tribune, February 9, 1911, 7:2. Bishop Conaty invited to participate in Exposition groundbreaking event; letter sent by Secretary H. C. Freeman includes all Catholics under prelate's spiritual direction.

San Diego Union, February 9, 1911, II, 11:1. Count de Lesseps to name date for Exposition ceremonies; dedication on July 11.

At a conference yesterday afternoon between representatives from the San Diego celebration committee of the Panama-California Exposition with a view to determining a date on which groundbreaking ceremonies would be held in Balboa Park, it was determined that the question should rest entirely with Count de Lesseps to whom an invitation has been extended by Director-General Collier to turn the first shovel of dirt, the date to be determined by the noted Frenchman to suit his convenience.

A letter has already been sent to Count de Lesseps urging him to name this date specifically in order that all arrangements in connection with the services, including the carnival and pageantry celebration may be completed in ample time.

Count de Lesseps, in accepting the honor extended to him some months ago, stated he would officiate something in the early spring, but beyond that he has not indicated what date he would be here. It is expected that he had already answered the query regarding a more definite date propounded to him by E. Foucher, who first suggested Count de Lesseps' name, and that his answer will be received within the next few days, when the date will be publicly announced.

The exposition directors also decided yesterday afternoon to hold their dedicatory ceremonies on July 11, which date will mark the beginning of actual construction on the exposition buildings.

San Diego Union, February 9, 1911, II, 11:2. Suggest that Park Board be ousted; citizens complain to Council; want tourist accommodations in Plaza.

San Diego Union, February 10, 1911, II, 9:1. Collier's auto rolls down bank and burns; Exposition director and three guests narrowly escape death.

San Diego Union, February 12, 1911, 1:3-4. Short franchise made Point Loma road fail, by D. C. Collier.

(San Diego) Evening Tribune, February 13, 1911, 5:2. 75,000 will attend ground-breaking ceremonies if transportation can be arranged, declares Dick Ferris; urges people to prepare for crowds; suggests that private homes be opened if it is found hotels and boarding houses are inadequate.

San Diego Union, February 13, 1911, II, 9:1. Dick Ferris will manage carnival celebration; well-known promoter has been engaged to take charge of program; is enthused by project.

San Diego Union, February 13, 1911, 9:2. Week's attendance at San Diego Land Auto Electrical and Industrial Fair on D Street up to 15th more than 30,000; Paid admittance according to official figures exceeded 25,000.

San Diego Union, February 13, 1911, 9:2. General Vega ready for decisive battle; federal forces strengthened by outlaws and Indians.

U.S. Congress, Statutes-at-large, resolution no. 5, 61st Cong., 3rd sess., 15 February 1911 (Washington, D.C.: GPO, 1912) 1454.

San Diego Sun, February 16, 1911, 7:1. Colonel Collier says we must work together to boost for city; reads from letter by John P. Harrington, of the School of American Archaeology, Santa Fe, New Mexico.

(San Diego) Evening Tribune, February 17, 1911, II. Floral Association questions justice of eastern importations; would much prefer to have seen California man plants trees and flowers in park for Exposition beautification; a committee was appointed to arrange for the ceremony of planting the memorial grove in the city park to the late George Cooke.

San Diego Union, February 17, 1911, 5:1. Exposition starts wide publicity campaign; systematic advertising will extend to all parts of South America.

San Diego Union, February 17, 1911, 18:1. Bishop Conaty to assist in Fair celebration; offers services freely.

San Diego Union, February 17, 1911, II, 9:2. La Mesa residents prepare to improve park; tract given by Collier will be planted with trees and palms.

San Diego Union, February 17, 1911, III, 13:3. Exposition book has big demand; first lot of 25,000 will be exhausted; more will be ordered printed.

San Diego and the Panama-California Exposition are both to receive more wide publications, the result of the distribution over the United States of one hundred thousand booklets just issued in San Diego by the publicity department of the exposition.

Twenty-five thousand of these descriptive booklets are to be circulated by the various railroads that enter California, but it became apparent yesterday that the twenty-five thousand now coming from the press will be entirely exhausted in filling the calls for the booklet that are coming in to the publicity department of the exposition headquarters from local residents.

The great interest taken by the people of San Diego in the big project is highly gratifying to Director General D. C. Collier and the other directors. In the preparation of the booklet, Director of Publicity, H. Hagaboom and his assistants purposely worked to the end that San Diego should get a big boost out of it, and the exposition officers are pleased to know that the San Diego business men and others are appreciative of their efforts.

"We are somewhat proud of the fact that such a piece of work can be entirely produced in San Diego," said Colonel Collier before he left for the north. "We do not have to go to Los Angeles or San Francisco, or any other city for this class of work. We can get what we want in San Diego, and keep the money here."

San Diego Union, February 18, 1911, 7:3. Former Michiganders propose permanent Exposition building filled with exhibits of the wealth and beauty of the state of Michigan.

San Diego Union, February 18, 1911, 18:3. Large demand for Exposition leaflets; merchants and citizens take kindly to scheme for advertisement of city.

San Diego Union, February 18, 1911, III, 13:3. George W. Marston writes open letter to Colonel Collier.

San Diego Union, February 19, 1911, II, 9:1-3, 10:1-5. San Diego's Mission City destined to be standard of California architecture; Designing and grouping of structures of Panama-California Exposition to tell the story of California's earliest history and to preserve best form of Spanish-Colonial art as basis of distinctive American product; diagram of that part of Balboa Park to be occupied by Panama-California Exposition buildings and grounds.

San Diego Union, February 19, 1911. William Clayton and C. F. Willard reply to statements on recall movement.

February 21, 1911, Board of Park Commissioners: Plans were presented for the planting of the boundary of Balboa Park by the Olmsted Brothers from Maple Street on the east side to 10th Street on the north side, the same was approved and the planting ordered done. . . . Planting ceremony in memory of George Cooke on March 1; trees to be planted at 26th Street entrance to Park; Board to be present.

(San Diego) Evening Tribune, February 21, 1911, 4:1. EDITORIAL: Time for Civic Improvement.

San Diego Sun, February 22, 1911, 6:5. Park Board accept the plans of the Olmstead [sic] brothers for the improvement of Balboa Park.

San Diego Union, February 22, 1911, 5:1. King and Queen of carnival to be elected; Committee wants candidates to fill important positions; beauty and gallantry essential requirements.

San Diego Union, February 22, 1911, II, 10:1-4. George W. Marston writes letter to William Clayton, who replies.

San Diego Union, February 22, 1911, 16:2. Commissioners accept Olmsted Brothers' plans for improvement of Balboa Park.

(San Diego) Evening Tribune, February 23, 1911, 3:1. Model nursery is thriving in park; vines, flowers and trees in tiny stage of development; William Donald, from the East, in charge of beds containing the plants to be used during 1915.

San Diego Sun, February 23, 1911. Work on park and carnival being rushed; Olmsted calls for teams for plowing; candidates for parade.

San Diego Union, February 23, 1911, 5:5. Spring work in park underway; many plants still needed to put Balboa Park in front rank of show places; nearly 100 men are at work.

San Diego Union, February 23, 1911, 8:5. Five candidates named for Queen Ramona and King Cabrillo.

San Diego Union, February 23, 1911, II, 9:1. 70 organizations to participate in groundbreaking celebration.

(San Diego) Evening Tribune, February 25, 1911, 1:2. San Francisco celebrates victory; members of delegation that won fight in Congress for endorsement of coast city for Fair welcomed home.

(San Diego) Evening Tribune, February 25, 1911, 1:4. Louis J. Wilde for mayor; nominating petition being circulated by A. Edward Roberts of Roberts-Yordi Investment Co.

San Diego Union, February 26, 1911, III, 17:2-4. Richard S. Requa's design of brick store and hotel building being erected by Charles Egebretson on north side of D Street between 2nd and 3rd; front to be surfaced with pressed brick of harmonizing shades.

San Diego Union, February 26, 1911, III, 24:1. L. J. Wilde may be candidate for mayor; friends circulating nominating petition.

March, 1911, **California Garden**, pp. 10-11. Large Park Force At Work . . . Nearly 100 men are at work in Balboa Park clearing brush, planting trees and vines, building lath houses, finishing plantation beds, replanting trees and doing general park improvement work both at the nursery and at the north end of the park says the **Union**.

Part of this work that of clearing and tree planting is permanent and will be finished only when the trees are twenty feet in height. These will form a border on the north and east side of the park, where Superintendent Cummings is clearing off the undergrowth, sparing the young oaks and all the hard wood bushes and native flowering plants.

Once clear and the brush burned, it will be plowed, trees will be planted and the whole tract will then be subjected to dry farming methods, raising trees and shrubs.

The idea in this work is to furnish a boundary screen for that portion of the park. The trees are being planted down the slopes to the south and west far enough so that when they are grown they will not be high enough to shut off the view of the mountains, yet will effectually screen the houses and bare hills behind them in that district, at the same time forming a pleasant grove that will be filled with walks and shrubbery in the future. The tract will be planted with trees of thick growth. The oaks and hardwoods now growing will be

encouraged. If possible, a certain amount of irrigation will be used to further the rapid growth until the whole sloping hillside is covered with green.

(San Diego) Evening Tribune, March 1, 1911, 3:2. Tree planting at Balboa Park is being rushed; lath house 200 feet square erected and 2500 palms are now in place under shaded roof; large tract is now fully plowed up; Olmstead [sic] makes arrangements for modern and complete nursery for the Exposition work.

San Diego Union, March 1, 1911, 5:1. Acting on advice of his physician, L. J. Wilde refuses to be candidate for mayor; buys 600-acre ranch about six miles from Ramona.

San Diego Union, March 1, 1911, 7:1. **Union** article on Fair brings flood of replies; story about Exposition leaflets arouses interest in all parts of country; writers want literature.

February 15 the **San Diego Union** published an item at the request of the publicity department of the Panama-California exposition, describing the leaflet just issued by the department entitled "Fore-glance at the Panama-California Exposition,." and stated that requests for the leaflet would be gladly received.

The response from San Diego and San Diego county was prompt and voluminous. The publicity department had ordered 10,000 for the first run and telephone calls during the next two days completely exhausted this edition. The presses were running, however, and the demand was supplied for several days when the supply again ran out. Since that time the press has been running almost continuously. No less than 35,000 have been printed and sent out immediately upon delivery.

Come from All Sections

During this time mail requests began to come in. They were from nearby places for a week. Then they began to come from the mountain states. Now they are coming from the middle west and the east and nearly every letter refers to the **San Diego Union** as the source of information about the leaflets.

All the writers say they are San Diego boosters. Dr. Thomas Roberts, St. Paul, Minn., says: "I wish you would send to my address some of your leaflets on San Diego and the coming Panama-California exposition. I have several friends that are talking of San Diego as a future home and want to let them know about it. 426 Roberts Street, St. Paul, Minn."

S. W. Stillings, Broomfield, West Virginia, says that his wife is in San Diego for the winter, that he saw a mention of the leaflets in the **Union** and wants some of them. He also writes that he wants "what you know and all you know about San Diego and surrounding country."

San Diego Union, March 1, 1911, 7: 2-3. Surprises Promised in Carnival Contest; New features planned are expected to stimulate interest in competition. . . . Many new features are promised in the popular voting contest for Ramona and Cabrillo within the next few days. . . . These plans are being kept secret, but it is reasonable to believe that the winner of either of these contests, and especially of the Ramona class, will be more materially benefited than in the mere achievement of winning the honor of presiding over the four days of carnival and the handsome costumes that will be specially made for the king and the queen.

San Diego Union, March 2, 1911, 5:1. San Diego asks Santa Fe for more direct line East; railway urged to rebuild Temecula-Fallbrook gap; new station also is wanted.

San Diego Union, March 6, 1911, 8:1. Ferris talks with local carnival committee; cost will reach \$30,000; promoters declare concessions can be made to pay entire expense.

(San Diego) Evening Tribune, March 1, 1911, 4:5. Plant trees in memorial in park tomorrow; Floral Association to hold exercises in commemoration of the late George Cooke.

San Diego Union, March 7, 1911, 6:5. Frank P. Allen returns to direct Fair work; consults with engineers; completed plans will be ready about the first of June; seventy men in park propagating and planting..

San Diego Union, March 7, 1911, II, 9:3. Will plant trees in memory of George Cooke.

San Diego Union, March 8, 1911, 16:3. Officials' report lauds Exposition chiefs; congratulates stockholders on having secured competent department heads; no quorum present; report read by General Secretary Monroe..

(San Diego) Evening Tribune, March 10, 1911, 1:7-8. Harbor municipal control bill is assured of passage; now on third reading file in House; be redrafted to suit Governor; Exposition measure safe; Collier and Hinkle wire reassuring news from San Francisco and Sacramento; Los Angeles has helped out cause; Mayor Conard leaves for home today.

March 12, 1911. Magonista rebels capture Tecate.

San Diego Union, March 12, 1911, II, 9:1. State granted San Diego \$250,000 appropriation for permanent building in Balboa Park; also control of San Diego harbor; \$50,000 to be made available July 1, 1912 for plans and specifications; commission of three men will have charge of the construction of the building and the nature of the state exhibit.

(San Diego) Evening Tribune, March 14, 1911, 8:2. Collier returns from triumphs at capitol; Chamber of Commerce arranging luncheon in his honor at Grant Hotel.

March 15, 1911, Board of Park Commissioners: Permission given to Harold Blossom to get samples of flowering plants in Balboa Park.

(San Diego) Evening Tribune, March 15, 1911, 5:3. Views of beautified and equipped playgrounds of many cities to be reproduced by stereopticons; Playground Association's annual meeting tomorrow evening in 12th Street school building to consist of attractive program.

San Diego Union, March 15, 1911, II, 9:2. D. C. Collier brings optimistic report; Chamber of Commerce plans public testimonial for services rendered.

(San Diego) Evening Tribune, March 16, 1911, 8:4. John Galen Howard, California architect, congratulates Building and Grounds Committee on their selection of Bertram Goodhue to be advisory and consulting architect for the exposition.

San Diego Union, March 16, 1911, II, 9:1. Citizens praise Collier as chief of boosters; luncheon given by Chamber of Commerce..

San Diego Union, March 17, 1911, 8:1-2. Secretary reports work of Playground Association.

San Diego Sun, March 18, 1911, 1:6. Promise to tell about Exposition work: Charges that the park commission has been employing out of town labor in preference to home workmen, and that the men have been engaged through an employment agency where they have been forced to pay from \$1 to \$2 for their jobs will be denied before the Wide Awake Club Wednesday night by Commissioners O'Hallaran and Luce, and, it is said, Col. D. C. Collier for the exposition company.

San Diego Union, March 22, 1911, II, 9:1. Theodore Roosevelt praises San Diego for exposition project; unable to visit here.

San Diego Sun, March 23, 1911, 2:2. Wide Awake Club hears both sides on "Exposition." . . . After hearing the Colonel Collier, the club appointed a committee to probe every charge and every rumor to the bottom.

San Diego Union, March 23, 1911, II, 9:1. James Cummings, overseer of Fair work accused of "freezing out" home labor; former timekeeper says outside help hired through employment agency.

San Diego Union, March 23, 1911, II, 9:2-3. Catholic Bishop Conaty endorses pageantry plans; assures committee that his people will aid monster celebration.

(San Diego) Evening Tribune, March 24, 1911, 5:3. Pursell denies rumor he will stop building; declares he has but two miles of grading to finish between La Mesa and San Diego and will have trains running this summer.

(San Diego) Evening Tribune, March 25, 1911, 10:1. March issue of "Scenic America" magazine has article on "The Men Who Will Make the Panama-California Exposition."

San Diego Union, March 27, 1911, II, 9:3. Open bids today for \$1,000,000 Fair bonds.

San Diego Sun, March 28, 1911, 12:4. Exposition directors named; officers submit reports.

San Diego Union, March 28, 1911, 8:1. Local band bids for \$250,000 of park bonds.

San Diego Union, March 28, 1911, 10:1-2. Fair stockholders elect 21 members of the Exposition Co. as a Board of Directors for coming year; plan discussed to raise additional \$500,000 for Exposition purposes.

San Diego Union, March 30, 1911, 8:1. Cummings resigns job with Fair company; accused by Frank Householder, former employee of favoring non-resident workmen; had been in charge of work in Balboa Park for the Olmsted Brothers; Frank P. Allen's department will do landscaping work..

San Diego Union, March 30, 1911, 10:1. Mayor Grant Conard opens fight for office; Sehon machine out of order.

San Diego Union, March 30, 1911, 18:2. Governor will sign San Diego Fair bill with ostrich quill pen.

San Diego Union, March 31, 1911, 13:1. Governor Johnson to sign \$250,000 appropriation bill today. April, 1911, **The California Garden**, pp. 8-11. MAGIC MISSION CITY

One of the largest nursery organizations in Southern California has been established by the San Diego Park Commission in Balboa Park, where are being propagated thousands of plants, vines and trees for the decoration of the park in connection with a comprehensive plan for the beautification of the grounds of the Panama-California Exposition.

The plans for the park improvement were prepared by John Clark [sic] Olmsted, who was brought her to lay out the landscape features of the exposition and to prepare the general plans for the improvement of the park. The work at the nursery and in the park is under the direction of Olmsted's assistant, Blossom, and a complete working force has been organized since the work started this spring.

On the hill opposite Golden Hill and directly above the Russ High School have been built the administration building, a hot house and a lath house, 200 feet square. In the hot house, the nurserymen carry on the work of budding and rooting the thousands of cuttings that have been taken during the last three months. The lath house contains the young trees and plants and this house is to be enlarged as needed until it will cover four or five acres.

Further up the ridge from these houses are the gardens, containing thousands of plants, cacti and other plants that are sturdy enough to stand the outdoors. Acres have been plowed and planted for this purpose and many acres more will be utilized for this branch of the work.

Early in the progress of the work Olmsted declared that he must have huge quantities of each of several varieties of flowering plants and vines. The people of San Diego were asked to allow cuttings to be taken from their rose trees, vines and other plants, and they responded nobly. The nurserymen found that they had all the cuttings they could handle for several weeks and were kept busy making these cuttings, transplanting

and caring for them as fast as they came in. The hot house was filled quickly with cuttings and has been kept filled ever since. As fast as these attain the necessary strength, they are transplanted either to the lath house or to specially prepared beds in the gardens.

One especially interesting experiment was that with *Romneya Coulteri*, or Matilija Poppy. It was found that sufficient quantities of this beautiful flower could not be obtained even in the four years between now and the opening date of the exposition except by propagation and the work was started at once. Florists of the city were asked as to methods and hundreds of root cuttings were made and planted in a glass case, which in turn was set on a bed of seasoned manure. The heat above and below soon caused the cuttings to sprout forth and now the plants are progressing in a most satisfactory manner. One florist advised an expedition to the hills and valleys around Riverside and Redlands for the purpose of getting the native plants in such quantities that the 50,000 plants asked for could be gathered in a comparatively short time.

Another experiment of interest was the propagation of a large number of the *Acacia melanoxylon*, or black acacia. William Donald, a seeds man of reputation in this country and Europe, took this seed and kept it in water of 100 degrees heat for nearly three days. The seed expanded wonderfully and it was but a short time after planting in the hot house until the tiny plants began to appear above the clean moist sand in which they were bedded. The plant is of slow growth and is being most tenderly cared for. The comparative efficiency of the seed was not as great as was hoped for, but the nursery will have nearly 3,000 plants from this experiment and will probably try it again.

Other plants in quantity, which the park nurserymen found they were unable to get from commercial nurseries this spring are 20,000 *leptospermum laevigatum*; 3,000 *prunus intrigifolia*, or Catalina cherry; 3,000 *prunus ilicifolia*, or holly-leafed cherry; 10,000 poinsettias; and the 50,000 Matilija poppies. All these are under cultivation and it is believed that the entire amount will soon be available.

It is planned to present to visitors to the exposition masses of flowers, acres in extent. For this purpose different colorings will be used, of course, and of each color and plant not only thousands, but millions will be used. The work at the park, it can readily be seen, is only in its infancy.

In a recent number of **The California Garden**, the editors asked the flower lovers of San Diego to pay special attention to the propagation of roses, to the end that the city as well as the exposition grounds may in 1915 present a spectacle that has never been equaled in the world. This is a fine idea and one that the exposition officials hope will be carried out. With the money available the exposition nursery cannot hope to do more than beautify the huge hills and slopes of Balboa Park and it will be up to the citizens of San Diego to make their yards and lawns a veritable bower of beauty, a work that will be easy if taken in time and carried forward with a definite object in view.

Touching on the question of the expediency of establishing the nursery in the park, when there are so many fine commercial nurseries in the city, it may be said that the park nursery was an absolute necessity on account of the huge quantities desired. The commercial nurseries have a large trade and are working to capacity. There will be a large savings of park and exposition funds in the operation of the park nursery, and the savings will affect not only the nurserymen themselves in a pecuniary way, but will be a direct saving to every taxpayer in San Diego and to the subscribers to the exposition as well.

Those in charge of the park nursery are anxious to meet interested persons and to consult with nurserymen or others who maybe able to give them practical and valuable advice about the work in hand. Several nurserymen and horticulturists of the city already have been asked to consult with the men in charge in the park and have kindly and most unselfishly proffered and given assistance in several instances.

To the layman, one not conversant with the nurserymen's methods, the work at the park is a revelation and the place is well worthy a visit by any person in San Diego. The result of that work can be seen from now forth in the gradual improvement of the park itself, a work that will make of Balboa Park one of the most famous horticultural features of the world.

April, 1911, **The California Garden**, pp. 10-11. THE PANAMA-CALIFORNIA EXPOSITION AND THE MEN BEHIND IT

San Diego is to have an exposition in 1915. In magnitude it may not be quite the equal of the main show under the big tent at the Golden Gate, but already one can catch a glimpse through his mind's eye of a twelve-month of scenes in a "Magic Mission City" which will no more need to suffer by comparison with our big brother to the north, than the sweet-breathed carnation now need bow its head to the queenly rose.

Upon, perhaps, 300 acres of our big 1,400-acre park, located almost in the heart of the city, will be erected fifty or more buildings, all of the mission style of architecture, having the general outlines and characteristics of the quaint and imposing structures by the old Padres on these very shores more than two hundred years ago.

The organization of an efficient working force has now been practically completed with Colonel D. C. Collier at the head as director-general. Those who know Colonel Collier best, believe he has the necessary positive qualities which go to make the ideal man for the position. Chief among these qualities looms up an enthusiasm which is limitless. He has practically laid aside everything else to give himself unsparingly to the work of the Panama-California Exposition without remuneration.

The very responsible post of secretary is filled by L. G. Monroe of Spokane, through whose hands passes nearly all the correspondence, already assuming vast proportions, pertaining to concessions, exhibits, building contracts, etc. His experience in exposition work has enabled him to perfect a very efficient and systematic organization for the handling of the correspondence and business affairs.

John C. Olmsted, of Boston, who is laying out the grounds, has gained a more than national reputation through his connection with the Chicago's world's fair, and the Portland and Seattle expositions. Mr. Olmsted says he has found a combination of climate, water, soil and beautiful contour, which presents to him the best opportunity of his career.

Bertram G. Goodhue will design the buildings for the "Magic Mission City." He has made a study of this style of architecture in the two Americas, Spain, Africa and Asia, and the result of his investigations has been written into the Baxter history of architecture, universally accepted as a high authority on the art of designing buildings. A number of great buildings stand as monuments to his ability.

To carry out the designs of Goodhue and in harmony with the plans of Olmsted, Frank P. Allen, Jr., of Seattle, was placed at the head of the construction department. This is the man who built the Alaska-Yukon-Pacific exposition at Seattle in nineteen months and had it ready on time.

The publicity department, the last to be named, ranks well up with the others in importance and needs a man who can combine the characteristics of a diplomat, an editor, a publisher, an artist, and all the other qualities which go to make a successful man of the world. Winfield Hogaboom scored on all points mentioned, and is already busily engaged in linking together in the minds of the nations of the world the words already familiar to us, "Panama-California Exposition, San Diego, 1915."

These are the men who are to convert Balboa Park into one of the beauty spots of the world. They cannot rest upon the victories of the past; the possibilities are so truly great that the tasks are not easy of accomplishment. The best wishes and hearty cooperation of every person in San Diego should be with them until the work is ended and the play begins on January 1, 1915.

San Diego Union, April 1, 1911, 5:1. Grant reelected president of Exposition; new Board of Directors hold meeting and perfect organization; Collier given thanks; resolution passed to engage expert accountant to examine books.

The new board of directors of the Panama-California exposition held their first official meeting yesterday afternoon and after the routine of organization elected new officers for the coming year. U. S. Grant, Jr. was re-elected president and the only changes made were the advancement of some of the vice presidents and the

election of George Burnham as fourth vice president. Resolutions commending the efficient work of Director General D. C. Collier and thanking him for his efforts in behalf of the exposition were passed.

The new offices of the exposition as elected are U. S. Grant, Jr., president; J. D. Spreckels, first vice president; G. Aubrey Davidson, advanced from fourth to second vice president; L. S. McLure, third vice president; George Burnham, fourth vice president; L. G. Monroe, secretary; F. W. Jackson, treasurer; C. A. Richardson, auditor; and D. C. Collier, director general. All of these officers were re-elected excepting George Burnham who serves for the first time.

The members of the new executive committee are G. A. Davidson, George Burnham, H.H. Jones, L. S. McLure and Fred Jewell. Mr. Jewell was elected tentatively, until the return of J. W. Sefton, Jr.

There was a discussion of the work of the exposition up to this time and much pleasure was expressed at the showing that has been made and at the prospects for the future. During the meeting President Grant told the members that he would in a day or two reappoint all the old members of the finance, publicity and legal advisory committees for the coming year. It was at this time that the directors commended the work done during the last year by Director General D. C. Collier. Its value to the exposition and to the directors was told informally, and a vote of thanks was passed by the board, thanking him for his splendid efforts.

One of the most important questions discussed was the naming of a committee to begin and to carry on the work of exhibits and privileges for the exposition. Many inquiries already have been made along these lines and it was decided to begin work at once.

The appointment of the committee was placed in the hands of President Grant. He named as a nucleus for the committee V. F. W. Voght, chairman; Director of Works Frank P. Allen, Jr.; L. A. Blochman; and F. A. Schneider. The other five members will be appointed later.

Before adjournment the board passed a resolution for the hiring of an expert accountant to audit the books of the exposition and to report on the business methods now being pursued in carrying on the work under the supervision of a committee consisting of D. F. Garretson, C. L. Williams and Colonel Fred Jewell.

The directors attending the meeting were Lucius R. Barrow, L. A. Blochman, George Burnham, D. C. Collier, G. A. Davidson, John F. Forward, Jr., D. F. Garretson, U. S. Grant, Jr., F. W. Jackson, W. F. Ludington, Arthur H. Marston, Colonel L. S. McLure, H. H. Jones, W. A. Sloane, B. W. McKenzie and C. L. Williams. Those not attending were William Clayton, Fred Jewell, John D. Spreckels and Julius Wangenheim.

San Diego Union, April 1, 1911, II, 9:2. Exposition heads plan conference April 21 with Bertram Goodhue; planting of seventy or eighty acres of acacia and eucalyptus on north border and in the northeast corner of Exposition grounds has been completed.

San Diego Union, April 1, 1911, II, 10:1. Collier, Hogaboom, Choate, etc. leave for East; will not ask for federal appropriations; want official sanction of Congress and President.

(San Diego) Evening Tribune, April 3, 1911, 12:1. Governor Johnson to name three building commissioners; Secretary O'Hallaran says San Diego men will have charge of expenditure of money for state structure for Panama-California Exposition.

San Diego Union, April 4, 1911, 16:2. O'Hallaran brings back pen used by Governor to sign \$250,000 appropriation bill; \$50,000 for preliminary construction.

San Diego Union, April 4, 1911, II, 10:1. Exposition party leaves for East; will urge Congress and President to officially recognize San Diego Fair.

San Diego Union, April 5, 1911, 1:7. Wadham is elected mayor; Adams and Fay for council; Niven measure defeated.

San Diego Union, April 7, 1911, 5:2-4. Greatest parade ever seen on continent is planned; feature of groundbreaking pageant will be its Mission section.

San Diego Union, April 7, 1911, 8:1. 94,000 cuttings planted in park; 70 teams and 80 workmen employed in laying Exposition's foundations; representative from John C. Olmsted asked people of San Diego to donate fronds and ferns; 70 acres already improved in north end of park along east side. . . . The greasewood and sagebrush have been removed and the ground all plowed and planted as needed with trees and bushes. As a picture is framed, so is the park being enclosed with border plantations. Will flowers and trees preserved so far as possible. Little canyon on the east side will not be touched. Park is the only municipal game preserve in the world with many jackrabbits, coyotes and quail.

San Diego Sun, April 8, 1911, 9:1. John Clark [sic] Olmsted leaves for Sacramento; expects to return in time for the first conference of the experts who are building the exposition.

San Diego Union, April 8, 1911, 8:2. 23 associations will enter floats in Fair groundbreaking.

San Diego Union, April 8, 1911, 16:1. Clean-up order readily obeyed by Chinatown residents.

San Diego Union, April 9, 1911, 23:1,2. Pictures of building experts who will construct Exposition; Frank P. Allen, Jr., director of works; Bertram Goodhue, advisory architect; John C. Olmsted, landscape architect; Irving Gill, consulting architect. . . . Olmsted goes north in quest of plants and shrubs. . . . Propagation of vines and cuttings at nursery under charge of William Donald. He has just planted about 2,000 cuttings and rare roses, some of them contributed by local persons.

San Diego Union, April 11, 1911, 5:1. Committee outlines plan for four-day celebration; new kind of groundbreaking of Exposition; Dick Ferris, general manager of carnival; to include laying of cornerstone of Administrative Building..

San Diego Union, April 11, 1911, 5:2-4. Plants in Exposition nursery fed with spoon like babies.

(San Diego) Evening Tribune, April 12, 1911, 8:2. Perfecting plans for the groundbreaking ceremonies.

San Diego Union, April 12, 1911, 10:1. Definite date set for groundbreaking; ground for first building will be broken on July 19.

San Diego Union, April 12, 1911, 10:1. San Diego Floral Association plans for floral show to take place at Mission Cliff pavilion April 20-23; L. A. Blochman endorsed for place on Park Board.

(San Diego) Evening Tribune, April 13, 1911. "Field House" or new athletic field to be first building to go up in park; Buildings Committee of the Panama-California Exposition instructs Frank P. Allen to prepare plans calling for a \$5,000 outlay.

San Diego Sun, April 13, 1911, 4. Poundmaster Davis allows that he would like the city council to move him out of the park before the park commissioners throw him out.

San Diego Union, April 13, 1911, 7:1. Collier to donate five corner lots for park.

San Diego Union, April 13, 1911, II, 9:2. Exposition boosters in Washington, DC, to establish headquarters and begin campaign for government support.

San Diego Union, April 13, 1911, 16:1. President Taft's ambassador and governor to attend Fair ceremonies; new features outlined.

San Diego Union, April 14, 1911, 9:2. 300,000 postal cards to advertise pageant; contest for King and Queen for carnival revived by committee.

(San Diego) Evening Tribune, April 15, 1911, 12:1. Two thousand school children to take part.

San Diego Sun, April 15, 1911, 9:3. Exposition exhibits committee receiving applications.

San Diego Sun, April 15, 1911, 9:5. School children to be feature of Exposition ceremony; two thousand to take part.

San Diego Union, April 15, 1911, 10:1. Play, pyrotechnic reception for King Cabrillo; water pageant feature.

(San Diego) Evening Tribune, April 17, 1911, 8:1. Publicity work for Exposition reaches around the world; thousands of newspapers, periodicals and Chambers of Commerce supplied with articles on San Diego and its 1915 Fair.

April 18, 1911, Board of Park Commissioners: John C. Olmsted disapproves of location of Cricket Grounds; read and adopted.

San Diego Union, April 18, 1911, II, 9:1. 17,000 teachers to come to San Diego for Exposition groundbreaking ceremonies.

San Diego Sun, April 19, 1911, 1:5. Two members of Park Board will resign is rumor; Fearing ax, O'Hallaran and Luce said to have prepared resignations; Senator Wright's term runs out the first of May.

(San Diego) Evening Tribune, April 20, 1911, 10:3. Architect Goodhue will confer with officials at Fair; first of series of conferences arranged; will arrive in San Diego tomorrow.

(San Diego) Evening Tribune, April 20, 1911, 10:2. Supervising architect of Government buildings will open bids in his office in Washington, DC, for the construction of the proposed federal building in San Diego.

San Diego Union, April 20, 1911, 1:1. Secretary of State Knox approves federal aid for Fair; U.S. Government to exhibit.

San Diego Union, April 21, 1911, 18:2. Bertram Goodhue visits San Diego; comes from Colon on Isthmus of Panama; brings with him designs for Exposition buildings; conference arranged..

San Diego Union, April 22, 1911, 17:1. Irving Gill denies importation of Exposition engineers; answers protests of San Diego Society of Civil Engineers and Surveyors; Frank P. Allen, Jr. the only outsider.

(San Diego) Evening Tribune, April 24, 1922, 10:2. Conferences to decide on character of 1915 buildings are begun; some radical changes are being considered; tentative designs will be changed to meet the conditions which the conference will decide upon.

April 25, 1911, Board of Park Commissioners: Luce and O'Hallaran preset; memorandum of agreement with Panama-California Exposition passed; resolution authorizing president of Board to revoke permit granted to G. W. Pursell; passed.

(San Diego) Evening Tribune, April 26, 1911, 3:3. Great water carnival planned by committee.

San Diego Union, April 26, 1911, 3:5. Promoters of Fair given valuable aid; assurances received from members of Congress of loyal support

(San Diego) Evening Tribune, April 27, 1911, 1. Retiring Mayor Conard, in message to Council, urges cutting of all estimates; wants Charter brought up to date.

(San Diego) Evening Tribune, April 27, 1911, 1. Pursell loses franchise for line in park; Park Board decides he cannot complete road and have it in operation by May 1.

(San Diego) Evening Tribune, April 27, 1911, 7:1. Railroads sent out circulars on carnival.

(San Diego) Evening Tribune, April 27, 1911, 7:2. Collier secures big feature for Fair; Government aid from officials of the Smithsonian Institution will be extended to make Indian congress most comprehensive ever assembled.

San Diego Sun, April 27, 1911, 3:1. Indian exhibit at Exposition to be featured; Colonel Collier gets help from Smithsonian Institution.

San Diego Union, April 27, 1911, II, 9:2. Collier arranges for loan of exhibits by National Museum; Indian Village first planned will be extended into an aboriginal show.

San Diego Union, April 27, 1911, II, 9:5. Pursell franchise extended two years; railroad builder convinces Council of his intention to finish line.

(San Diego) Evening Tribune, April 28, 1911, 3:1. "Isthmus" will outdo famous Midway; Forty-niner urges Dick Ferris to let him open old-time California gambling hall and play with real money.

(San Diego) Evening Tribune, April 28, 1911, 7:1. Collier secures aid of Fairs in south.

San Diego Union, April 28, 1911, 8:1. Park Commission revokes Pursell franchise through City Park; railroad cuts and embankments leave permanent scars; failure to comply with terms of grant.

San Diego Union, April 28, 1911, 10:1. Southern support sought for Fair; Collier proposes plan.

San Diego Sun, April 29, 1911, 4. Sunbeams: "City Park is getting to be a great hang-out for bums and tramps," said a Date street woman yesterday.

San Diego Union, April 29, 1911, 6:2-4. G. W. Pursell charges Park Commissioners with "Star Chamber" methods; says O'Hallaran and Luce revoked franchise without warrant.

San Diego Union, April 29, 1911, 9:1. San Diego artists, David Swartz and Athol Ewing, win prize for Exposition poster; groundbreaking ceremonies.

San Diego Union, April 30, 1911, 15:1. Colonel Fletcher says Park Board made a mistake; thinks it should not have revoked Pursell Railway franchise.

San Diego Union, April 30, 1911, 15:3. Miss Eleanor Lee leads in contest to be Queen Ramona.

May - June, 1911. Bertram Goodhue wants site of Exposition changed.

May, 1911, **The California Garden**, pp. 8-9: Millions of Plants to Adorn Balboa Park; San Diego Citizens Aid With Cuttings; Thirty Acres of Park Used for Nursery; Greenhouses Have Now 150,000 cuttings. . . . With the completion of the water system now almost at hand the gigantic task of preparing Balboa Park for the great Panama-California Exposition of 1915 may be said to have notably advanced. In that it has assured the success of the plans for the permanent adornment of the park with more than five million plants, vines, bushes and trees. The scope of this project alone, in connection with the Exposition, is beginning to impress itself, not only on visitors to the park and others interested in plant and tree culture, but on observers of the nature features at other expositions, and especially is this true as to the variety of plants being propagated at the Balboa Park nursery. A mere partial list is amazing and, as an indication of the total, is astounding, though the plans, as stated, have been from the beginning to have more than five million specimens of trees and plants already in place on the Exposition grounds when the time for the Exposition arrives. The partial list includes the following:

- 5,000 *Arundo donax*
- 1,000 *Bougainvillea*
- 3,000 *Bignonia*
- 7,000 *Buddleia Madagascariensis*
- 8,000 *Caprissa grandiflora*
- 4,000 *Coprosma Baueriana*
- 3,000 *Campsidium*
- 13,000 *Cistus albidus* (Rock Rose)
- 200 *Datura*
- 5,000 *Ficus repens* (Climbing Fig)
- 1,500 *Grevillea Thelemanniana*
- 1,500 *Geranium*
- 10,000 *Hedera helix* (English Ivy)
- 3,500 *Hibiscus*
- 400 *Ipomea Mortimi*
- 4,000 *Jasmimum* (Jasmine)
- 150 *Lantana*
- 600 *Lotus peliorhynohus*
- 8,000 *Leptospermum laevigatum*
- 1,000 *Malalenea leveadendron*
- 4,000 *Marguerite*
- 1,000 *Nerium Oleander* (Oleander)
- 100 *Passiflora* (Passion Flower)
- 700 *Polygala floribunda*
- 1,300 *Poinsettia pulcherrima* (Poinsettia)
- 2,000 *Pittosporum tobina*
- 1,000 *Pittosporum undulatum*
- 400 *Roses* (Seven Sisters)
- 1,000 *Roses* (Cherokee)
- 100 *Roses* (Reve d'or)
- 300 *Roses* (Robert S. Lee)
- 200 *Roses* (La Marque)
- 100 *Roses* (Banchen)
- 400 *Streptosolen Jamesonii*
- 1,500 *Solanum Wendlandii*
- 500 *Solanum Jaminoides*
- 400 *Tamarix*
- 1,500 *Tecoma* (Trumpet Vine)

A million ferns and palms to be used in the park will be mostly gifts from citizens, but there is to be no limit to the number of such gifts --- the nurserymen in charge of the work want as many more such donations as they can get. Then there is to be, in addition to the above list, thousands of other plants, five thousand and more palms, from seedlings up to ten feet high, 10,000 various acacias from seeds, *Rapheolepsis*, *Pittosporum*, Pepper trees, *Asparagus*, *Plumosa*, *Myrthle*, *Leptospermum*, *Eucaylptus*, and scores of other varieties in profusion.

The greenhouse, established for propagating the plants and containing now more than 150,000 cuttings in many stages of growth, is 100x22 feet in size; there are 2,000 feet of cold frames and a lath house, 100x24 feet and eight feet high, to be enlarged as becomes necessary. Thirty acres of park land are used in the nursery, and the work is being managed by William Donald with a staff of expert nurserymen and a large number of laborers.

Already about 50,000 trees and shrubs have been planted permanently, mainly along the northern border of the park, 70 acres of land having been used for the purpose; 30,000 of these either have been raised in San Diego or some other section of Southern California.

San Diego Union, May 1, 1911, 14:1. Senator Perkins discusses the Fair at dinner; "Among other things Collier is developing the idea of a permanent commercial exhibit as a legacy of the exposition."

San Diego Sun, May 2, 1911, 4:1. EDITORIAL: Keep It Out of the Park . . . the Pursell railroad.

San Diego Union, May 2, 1911, 16:3. Rest rooms provided for groundbreaking.

(San Diego) Evening Tribune, May 3, 1911, 8:7. Mayor Wadham this morning appointed Clark Braly to succeed Senator L. A. Wright on Park Board.

San Diego Union, May 3, 1911, 14:1. Collier is enthusing New Orleans boosters.

San Diego Union, May 3, 1911, 5:1. Artist Henry Kabierska in charge of designing and building floats used in historical parade at groundbreaking ceremonies.

(San Diego) Evening Tribune, May 4, 1911, 12:1. Colonel Collier says Brazil will exhibit here; Dr. Dahne, Brazil's official representative to the United States, will visit San Diego May 25.

San Diego Union, May 4, 1911, 8:2-4. D Street to be Mission-land for groundbreaking, Balboa Park a lighted jungle.

San Diego Union, May 4, 1911, II, 9:1. Dispatch says Brazil will erect Fair building.

San Diego Union, May 4, 1911, II, 16:2. Braly appointed to Park Board.

(San Diego) Evening Tribune, May 3, 1911, 5:3. Collier strikes popular chord in South.

(San Diego) Evening Tribune, May 3, 1911, 5:3. San Diego workmen to make pageant features; historical and industrial pageant organization of Chicago will establish shops here to fulfill contract.

(San Diego) Evening Tribune, May 3, 1911, 8:4. Women's Board of Directors for 1915 Exposition may be formed.

San Diego Union, May 4, 1911, II, 9:1. Dr. Dahne, special commissioner from Brazil, stops at New Orleans on his way to San Diego; confers with Collier; announces that Brazil will erect buildings at both San Francisco and San Diego.

San Diego Union, May 4, 1911, II, 9:2. Senator John Works expects Senate support of San Diego Fair.

(San Diego) Evening Tribune, May 5, 1911, 3:1. Sefton reaches New York today.

(San Diego) Evening Tribune, May 5, 1911, 3:1. Women to take charge of part of parade.

(San Diego) Evening Tribune, May 5, 1911, 3:3. Southern California counties plan join exhibit at Fair.

San Diego Union, May 5, 1911, 4:2. EDITORIAL: Exposition's Prospects Brightening . . . The announcement that Brazil will erect a fine building and make a grand display is one of the most cheering of the several encouraging reports recently received.

San Diego Union, May 5, 1911, II, 9:1. Collier promised aid of south in diverting travel to San Diego.

(San Diego) Evening Tribune, May 6, 1911, 1:2. Chicago Commission Grain Merchants put seal of Exposition on business letters and bills of lading.

(San Diego) Evening Tribune, May 6, 1911, 4:1. EDITORIAL: San Diegans should aid committeemen in the preparation of the program for the groundbreaking ceremonies next July.

San Diego Union, May 6, 1911, II, 9:2. Collier's work in capitol effective.

May 8, 1911. Attack on Tijuana.

San Diego Union, May 8, 1911, 14:2. Senator Perkins believes Collier will win resolution recognizing Exposition.

(San Diego) Evening Tribune, May 10, 1911, 1:2. Americans take part in looting at Tijuana.

(San Diego) Evening Tribune, May 10, 1911, 5:3. Designs for "The Future of San Diego" and "The First Civilization in America" floats accepted.

San Diego Sun, May 10, 1911, 1:7. Capps may direct park engineering; plan to save thousands of dollars of Exposition money; city engineer says work is simple and that he can do it with help of assistants employed by \$20,000 engineer; Park Board expected to act soon; the mayor isn't saying anything.

(San Diego) Evening Tribune, May 12, 1911, 6:1. Henry Kabierske, float designer, in city to begin work.

San Diego Union, May 13, 1911, 7:3. J. A. Filcher, state official, proposes that counties of state take four years to build up exhibits.

San Diego Union, May 13, 1911, 7:4. Collier in Washington begins campaign for Congressional support.

San Diego Union, May 13, 1911, 9:2. Sefton returns from world tour; yeoman work done in foreign countries for benefit of San Diego Exposition.

(San Diego) Evening Tribune, May 15, 1911, 3:1-2. Carnival ceremonies practically arranged; outline is complete.

(San Diego) Evening Tribune, May 15, 1911, 12:1. Tijuana is wide open town; rebels encourage gambling and derive percentage from games now being conducted by Americans.

(San Diego) Evening Tribune, May 15, 1911, 12:2-3. Pursell charges unfair treatment by Park Board; declares road through park completed and paid for five months ago; wants extension of time; Mayor Wadham this morning would say nothing regarding the matter.

San Diego Union, May 15, 1911, II, 9:2. Mission characters, including Indians, at San Luis Rey and San Juan Capistrano engaged by Ferris for groundbreaking celebration..

San Diego Union, May 15, 1911, II, 9:3. Collier had endorsement bill in side pocket for introduction this week.

(San Diego) Evening Tribune, May 16, 1911, 8:1. Patrick Martin may be made president of Park Board.

May 16, 1911, Board of Park Commissioners: Clark Braly, M. A. Luce, Patrick Martin; Braly elected president of Board; Martin elected secretary.

San Diego Union, May 16, 1911, II, 9:1. Exposition measure introduced in Senate; Secretary of State Knox gives endorsement.

(San Diego) Evening Tribune, May 17, 1911, 3:1. Bids for arches rejected by committee; work on floats begun.

(San Diego) Evening Tribune, May 17, 1911, 3:1. Exposition will offer gold cup to yacht winning three times in succession.

San Diego Union, May 17, 1911, II, 9:3. Ferris says women are right in boosting for Floral Parade.

San Diego Union, May 17, 1911, II, 16:1. Congressman Raker introduces bill in House for city's Exposition.

San Diego Union, May 17, 1911, II, 16:2. Braly, head of Park Commissioners, agrees to allow use of shotguns in the event permission to hunt rabbits is extended to other than park employees; plan presented to extend Upas Street from 6th to 10th.

San Diego Union, May 18, 1911, 11:4-5. Ambassador Irving B. Dudley, San Diegan who landed the Brazil exhibit for Exposition here is a "pioneer ambassador."

San Diego Union, May 21, 1911, II, 9:2. Collier remains on job for Exposition; refuses to leave capitol until San Diego resolution is passed.

May 22, 1911. Appearance of Colonel Collier before the Committee of Industrial Arts and Expositions, House of Representatives, on Joint Resolution No. 99; wants Congress to pass a resolution authorizing the President of the United States to invite Republic of Mexico and other republics of Central and South America to exhibit at the Panama-California Exposition in San Diego in 1915; "Under no circumstances will the San Diego Exposition ask the Government for any appropriation in aid of this exposition."

U.S. Congress, Committee on Industrial Arts and Expositions, Hearings on the Panama-California Exposition, 62nd Cong., 2nd sess., 22 May 1911 (Washington, D.C., GPO, 1912)

(San Diego) Evening Tribune, May 23, 1911, 1:1. Mayor Wadham favors sale of 500 acres out of center of park; declines to discuss the matter at length just now.

(San Diego) Evening Tribune, May 23, 1911, 1:1. Something doing at Park Board session; policy of economy in Exposition work will be adhered to.

(San Diego) Evening Tribune, May 23, 1911, 3:1. Park Board to discuss Exposition contracts; members will inquire into advancement of funds for Fair; employment of Olmstead [sic] and other matters.

(San Diego) Evening Tribune, May 23, 1911, 5:4. Park Board may grant Pursell franchise; petition comes before Board this afternoon.

San Diego Union, May 23, 1911, 9:1. House committee agrees to report Exposition bill favorably; decision reached after public hearing granted to San Diego supporters.

(San Diego) Evening Tribune, May 24, 1911, 1:3. George R. Harrison is appointed on Park Board; to take place made vacant by resignation of Patrick Martin, who gave "business interests" as reason.

(San Diego) Evening Tribune, May 24, 1911, 5:3. Thomas O'Hallaran for state building committee on Exposition structure.

(San Diego) Evening Tribune, May 24, 1911, 5:4. Mayor Wadham thinks city should have several parks as it grows into order to accommodate different districts; declares city council must initiate move to sell part of big park, people must vote on it, and state legislature must approve.

San Diego Union, May 24, 1911, 5:5-6. Patrick Martin quits Park Board; contract with Exposition company to be examined; monthly report to be published of all expenditures of Park Commission; Mayor Wadham said to be in favor of selling 500 acres from center of park; permit for target practice for naval militia withdrawn; bullets glance off stones and fly at random all over park.

May 25, 1911, Board of Park Commissioners: George R. Harrison appointed to Board to replace Patrick Martin who has resigned.

San Diego Union, May 25, 1911, II, 9:5. Harrison appointed Park Commissioner; City Council approves selection.

San Diego Union, May 26, 1911, 5:3. Report Democratic caucus in Washington, DC, agree on Exposition.

San Diego Union, May 26, 1911, 8:1-3. Braly grills Luce on Exposition work; City Attorney declares contract creating Director of Works is not binding; Mayor Wadham considering the appointment of City Engineer E. M. Capps as a successor to Frank P. Allen; also thinks buildings should be placed back on mesa. . . . Braly: "Why is Olmsted planting trees in northeast corner?" Luce: "We have been over to Mr. Scripps' place and he claims trees will grow in the park without much care." Braly: "Eucalyptus will."

"How can Frank P. Allen save the city hundreds of thousands of dollars over any other man, if there are not hundreds of thousands of dollars to spend?"

Clark Braly, president of the new park commission, was standing at the end of the table when he addressed this question to Judge M. A. Luce. Before him lay a pile of unpaid bills which amounted to nearly \$26,000 debts incurred since the first of the year. To one side lay a contract in which the park commissioners had delegated the power to erect all buildings, make all improvements and prepare all architectural and engineering plans of every description to a bureau termed the division of works. With the contract was an opinion from the city attorney that it was not legally binding and in a certain respect unlawful.

Judge Luce had been cross-questioned throughout the meeting. Mr. Braly wanted to know about this bill or that bill. He wanted to know about salaries. He wanted to know about the work which had been done.

It was a different meeting from the ones Judge Luce attended before the commission was dissolved. Then Judge Luce sat the head of the table. Thomas O'Hallaran presented the bills. Judge Luce approved them. A question might be decided about the location of a tree or asked about the condition of certain shrubbery and the commission would adjourn.

Luce Defends Old Policy

Yesterday, however, Judge Luce had been aroused to action. He was defending the policy of the old commission. He was defending the policy of employing the best talent obtainable to lay out the park and erect the exposition building.

"Why this man Allen can save us hundreds of thousands of dollars," he exclaimed feverishly.

"How can Frank P. Allen save the city hundreds of thousands of dollars over any other man, if there are no dollars to spend?" asked Mr. Braly, who was questioning Judge Luce.

The judge had been explaining that Mr. Allen was the general manager in preparing park and buildings for the exposition; he was also the engineer and supervising architect.

Too Much For Commission

"We couldn't undertake this thing ourselves," said Judge Luce in conducting his defense. "We wouldn't take the responsibility for \$10,000 a year; so we employed the best possible men we could get for the work."

"How does the park board get out of the responsibility?" asked Mr. Braly.

"Hire a foreman," answered Judge Luce.

"Would that get you out of the responsibility?" insisted Mr. Braly.

"It would to that extent" answered Judge Luce.

"What would you do if you had to manage a big farm?" asked Mr. Braly. "Hire a foreman?"

"What in heaven's name do we know about it?" exclaimed Judge Luce. "Here is the best man we can get for the money. Mr. Olmsted is the best landscape architect in the country. A million dollars is to be spent for permanent improvements in the park. I believe in having the very best men to do the work. Mr. Olmsted was employed after consultation with the building committee. Mr. Marston is the president. He has the good and the beauty of the city at heart. He has made a study of these things. Mr. Marston's advice has a good deal of influence with me. We investigated Mr. Allen carefully before we employed him."

"Did you investigate what was paid Mr. Allen in Seattle before you agreed to pay him \$20,000 a year here?" asked Mr. Braly.

"I believe we did, but he didn't have quite as much to do there as he has here," was the reply. "The first agreement was to get him here half the time. Next we wanted him here all the time to take charge of the entire work. We wanted a man who could save the city a lot of money."

"Did he have that power at Seattle?" asked Mr. Braly.

"I don't think he held all that power up there," answered Judge Luce. "I think it very unfair that you take this affair up without the building committee."

Harrison Made Secretary

"This man has just taken his oath of office between 11 and 12 o'clock. We are hardly yet acquainted," replied Mr. Braly, pointing to George R. Harrison, who had been appointed the day before to succeed Patrick Martin. Mr. Harrison was elected secretary of the new commission.

"If we wanted to put a building in the city park we would have to do it under Mr. Allen's management," continued Mr. Braly. He picked up the contract which by agreement between the park commission and the Panama-California exposition conferred the power to erect buildings and to lay out the park on the division of works.

"Why, yes," replied Judge Sloane [sic], "I could ask this or that question, but I wouldn't find out much about it. Therefore, my idea is to get a man in whom we have confidence."

Mayor Wadham had entered the room during the discussion. He seated himself to one side and read the opinion of the city attorney which he had brought with him that the division of works contract was not binding. He arose at this part of the discussion and addressing the chair said:

"The city attorney has rendered an opinion which questions the reasonableness of this contract, which creates an independent board known as the division of works.

"The consensus of opinion is that the entering into this contract by the park commission and the exposition company is extravagant and the exposition company is extravagant, and I do hope in such a case you will not undertake to do anything under it.

"One of your hardest duties will be to stand between the people and this million dollars. On the other hand the people feel that they have to spend the money. They prefer that local talent be employed wherever possible. That, however, is a matter left to you."

The opinion was handed to Judge Luce for perusal. He studied it carefully and pronounced it "all right." He said that he could find no objection to Judge Andrews' ruling.

"As far as you are concerned, Judge Luce, I believe that you thought the contract was perfectly proper or you would not have entered into it," said the mayor, addressing the judge.

It developed that the appointment of City Engineer E. M. Capps is under consideration by the mayor as a successor to Frank P. Allen. In this connection, it is possible that the exposition building will be placed farther back on the mesa to obviate exceedingly technical, difficult and expensive engineering work. The buildings when placed farther back would be removed from unsightly stands which are expected to fringe Balboa Park during the exposition.

"We have not a man in San Diego who could do the work as thoroughly and save the city as much money as either Allen or Mr. Olmsted," remarked Judge Luce.

Mayor Questions Luce

"What is there about this work that Capps can't do?" asked the mayor.

"He can do common engineering, general engineering," replied Judge Luce. "But an exposition is entirely different. The location of buildings must be considered. Money matters, expenses must be considered. Mr. Allen saves us money."

"If the buildings were placed back on the mesa, there would not be so much engineering and expense," suggested the mayor.

"That's the reason you should see the exposition board," replied Judge Luce.

"Don't this contract let Mr. Olmsted turn loose on the park and we can't stop him?" asked Mr. Braly. "He is working in the northeast corner of the park now. What is he doing there?"

"The trees must be planted now so that they will get their growth in time for the exposition," answered Mr. Luce. "The people over there never had anything."

"Don't you know that we will have to fall back on one thing --- the maintenance of the park? Couldn't shrubbery be planted as well, instead of trees?" asked Mr. Braly.

"We have been over to Mr. Scripps' place and he claims trees will grow in the park without much care," replied Judge Luce.

"Eucalyptus trees will," suggested Mr. Braly.

"Yes, eucalyptus trees," assented Judge Luce.

"We have reached a point where the people have become greatly dissatisfied, remarked Mr. Braly, changing the subject.

"See Mr. Marston," suggested Judge Luce. "If we don't harmonize, we won't have any exposition."

"Who constitutes the division of works?" interposed Mayor Wadham.

"Why, Allen," answered Judge Luce. "Allen is chief. He and the men who work under him form the division of works."

"How many buildings do you figure he will have?" asked Mr. Braly.

"For the exposition? Why, I don't know, was the judge's reply.

“We want to get to a point where we can decide whether we can go on with this contract,” said Mr. Braly. “The money is not being paid in by subscribers to exposition stock. We want to bring affairs to that state that the people will feel confidence in the management of the exposition and will be satisfied to pay up the rest of the subscriptions. Now, Mr. Luce, what do you recommend?”

“More publicity,” replied Judge Luce. “A monthly account should be published of expenditures and income.”

Salaries Take Breath Away

“Understand me, judge,” continued Mr. Braly. “I don’t want to be an obstructionist. I want this exposition to be a success. But the salaries are big enough to take one’s breath away. If businessmen had been able to figure them before the bond election, you wouldn’t have gotten a decent vote on it.

“I lived in Portland. It is a rich city, and could afford to pay Mr. Allen \$400,000 a year; where we can’t afford to pay him \$20,000 a year.

“Don’t compare this exposition with the one at Portland,” broke in Judge Luce with earnestness. “Our exposition must be altogether different. We are here in a southern climate with the exposition running winter and summer. We must attract people because it is different than other expositions. They must be drawn here by the beauty of the landscape. We have a wonderful park with a view of the sea and the mountains. We can grow all kinds of tree and flowers and plants there.”

“Under this contract,” said Mr. Braly, changing the subject, “the division of works goes ahead with buildings and plans. The money will be gone before they are finished. The division of works had the reins. We have no check.”

“Well, we pass the bills,” replied Mr. Luce. “We have set aside \$500,000, for instance, for permanent buildings.”

“In other words we give Mr. Allen half a million and say go ahead and spend it,” interrupted Mr. Braly.

“As long as he does it well, it’s all right,” replied Judge Luce. “We know what he is doing. The bills come to us. If he doesn’t do it well, we can stop him.”

“Five hundred thousand dollars has been set aside for permanent buildings. Now, what is the rest for?” asked Mr. Braly.

“The first thing to do is to make the park presentable as a whole,” answered Judge Luce. “Boulevards are to be laid out. Trees must be planted and walks adorned. That is to be decided by the park board.”

“I don’t think you can decide that under the contract,” remarked the mayor. “You have turned the thing over to the division of works and you say that is Mr. Allen.

“As far as my personal opinion is concerned, I don’t believe we ought to pay those bills, if they mean a ratification of that contract.”

No Legal Money for Claims

The bills include items for expenses incurred in the Brooklyn [sic] offices of the Olmsted Brothers and for certain traveling expenses and for sustenance. They also contain certain claims incurred last December and October when the money was not legally at hand to pay them. The money for [sic] the bond sale has been legally on hand since the first of the year only.

Wadham Asks Opinion

Mayor Wadham asked the opinion of the city attorney on three points relating to the contract which creates the division of works:

First: Has the board of park commissioners the power to delegate its powers?

Second: Has the board power which should continue for four years?

Third: Is the contract binding on the new board?

The city attorney's opinion is: "Ordinarily a public board has not the authority to delegate the powers which have been entrusted to it."

In another paragraph, the city attorney declares: "I cannot concede that any man or body of men outside of the park commissioners have the right to determine finally what kind of buildings shall be erected, what material shall be used, or what their designs shall be. The division of works would not be responsible. This I believe is the only provision that the agreement provides shall be absolutely out of the hands of the park commissioners. So far as the construction of the buildings, structures and improvements are concerned, the board of park commissioners may or may not let the matter rest with the division of works; but, I repeat, so far as the architectural and engineering plans are concerned, the park commissioners appear to be bound by this unofficial body, and in this respect and to that extent, I conclude this contract is unlawful. However, it is not intended to intimate that the board of park commissioners have not the right to make a contract for the services of architects and engineers in carrying on the work which the charter entrusts to their hands."

The opinion cites a ruling to show that courts look with disfavor upon contracts by municipalities involving the payment of money which extends over a long period of time because they may involve an undue restraint upon the powers of the successors of the board and because such contracts in their nature tend to create a monopoly.

Concluding, the opinion declares that: "if you feel that the contract is not advantageous to the city, that it would be easy to notify the exposition people of your attitude, and that the park commissioners would not any further be bound to the agreement."

McHorney is Clerk of Park Commission

That the new park commission expects to dive into a mass of work was shown yesterday by the appointment of Nathaniel J. McHorney as clerk of the board. The appointment was strongly recommended by Judge M. A. Luce, who stated that the duties of the board were becoming so arduous that a clerk was a necessity.

Mr. McHorney will serve as a general utility man. His duties will require him to serve not only as clerk but will take him into Balboa Park as a representative of the commission.

The appointee, whose salary has been fixed at \$125 a month, is considered well qualified for the place. He has served years as an auditor and accountant for corporations and was employed in that capacity in their Wall street offices. He is expected particularly to look after the disbursements of money and to keep the books of the park commission.

BRALY WOULD MAKE, NOT BREAK FAIR

"I don't want to break the exposition," said Clark Braly after the meeting yesterday. "It is my determination to make it. I am living in San Diego. I love the place. I am educating my children here. With the other members of the commission, Mayor Wadham has entrusted me with a great work. If this exposition is not a success, I won't be able to live in this city. I would have to move. But I don't want to move; therefore, I am going to do all I can to inspire the people with confidence in the exposition management and make it a success. First, however, we will have to get at all the facts. This I am determined to do. Then we can go ahead and go ahead right."

Mr. Braly expects to see personally every contractor or other person who has a bill against the commission. His purpose is to get all interested parties together for the sake of harmony and cooperation.

The meeting of the park commission was adjourned yesterday until Monday morning at 10 o'clock.

San Diego Union, May 26, 1911, 16:1. Representative from Brazil to reach here soon.

May 27, 1911. folder 14:2, Box 1, Box w, Board of Park Commissioners, Correspondence, San Diego Public Library: File, Board of Park Commissioners, 1911. . . . Letter, Building Trade Council to Mayor of the City of San Diego protesting against the employment of Frank P. Allen as supervising architect and engineer for the California-Panama Exposition [sic] of San Diego because of exorbitant compensation; because he will not employ contractors and laboring men of the city, and because local workers were overlooked in the construction of Fair buildings in Portland and Seattle.

(San Diego) Evening Tribune, May 27, 1911, 10:2. State Senator Weight defends Pursell Permit for City Park Line; Park Board to be acquainted with situation at meeting Monday; does not like to offend esthetic sense of Moses A. Luce and Thomas O'Hallaran.

That the new park board will be made fully acquainted with the position of the Interurban Investment Company regarding a franchise for a line through the city park was made evident this morning by State Senator Leroy A. Wright, attorney for the company and for G. W. Pursell. In reference to the statement printed this morning from M. A. Luce, former member of the park board, Senator Wright said:

"We would like to see the whole world a rose garden like Mr. Luce, but if it was people would starve to death. We have to have some of the more material things in life if it does offend the esthetic sense of Moses A. Luce and Thomas O'Hallaran.

The matter will come up Monday before the board of park commissioners at which time a full statement of the attitude of the Interurban Investment company, which has succeeded to all the interests of G. W. Pursell, will be made. This company will carry out to the letter the terms of the permit granted by the old park board with the exception that it will be impossible to complete the road in the time specified in the old permit, which is June 1 of this year.

"All the Interurban Investment company now asks is the extension of that permit on the same terms granted by the council on the 17th of this month. The old permit provided that shrubbery should be planted on the right of way for 100 feet either side of the center line, the plantations to be designated in writing by the park commission. This designation never was made by Commissioners Luce and O'Hallaran, who attempted to cancel the franchise without giving Mr. Pursell any hearing whatever.

"When the attempt was made the company had forty-head of mules at work on the line. It is not the purpose of the Interurban Investment company to mar the park, but to add to its attractiveness. A park is something more than a thing of beauty. It must be a place for recreation where all classes of people can resort. At present there is no means of access to Balboa park except by autos and the park, consequently, is beyond the reach of any except the rich and well-to-do.

"One condition of the permit to Mr. Pursell was that an attractive station be maintained near a picnic ground in the park, which has already been planted to trees in the canyon near the east boundary line. The Pursell line is intended to give service to this picnic ground.

"Inasmuch as considerably over \$50,000 has been spent and the work is being prosecuted more vigorously than ever, it would seem the height of injustice, not only from the standpoint of those interested financially, but to the public which wants better communication with La Mesa, El Cajon and Escondido, to block all chance of its success by refusing to extend the time in which to complete the line.

“The company does not propose to have a controversy through the newspapers or elsewhere about the matter. A full statement will be made to the park board Monday.

“I wish, however, to add that a few days before Mr. Luce and Mr. O’Hallaran made the order canceling the permit, Mr. Pursell made a contract with Mr. Luce for the purchase of rights-of-way through property two miles east of the city limits.”

San Diego Union, May 27, 1911, 18:1. Luce quits Park Board with rap at Pursell; protests against granting of franchise for railway in pleasure ground; Sefton in conferences; calls on mayor, also on commissioners; all refuse to be interviewed.

Judge M. A. Luce, the hold-over member of the park commission, has resigned and Mayor Wadham is looking for a man to fill the vacancy.

Mr. Luce declared at Thursday’s meeting of the commission that he was willing to remain at the post as long as desirable in order to give his newly-appointed colleagues every opportunity to acquaint themselves with their new duties and to direct them into harmonious relations with the exposition officials.

As his resignation has been requested by Mayor Wadham, it is concluded that the judge gave the two new members of the commission all the information necessary to guide them to a policy for the future.

Sefton Has Busy Day

Joseph Sefton, acting director general of the Panama-California exposition, held several conferences with the mayor. He called at the office in the city hall and later again was closeted with him and Commissioners Clark Braly and George R. Harrison. All parties to the conference refused to reveal the nature of their discussions except to say they were arranging for harmonious cooperation.

The dismissal of Frank P. Allen, who with his subordinates constitutes the division of works, is suspected to be the principal point of contention. The mayor and the two commissioners question the value of his services. The exposition chiefs, however, regard him as a valuable man.

Protests Against Franchise

Judge Luce, in announcing his resignation, states:

“As my resignation from the park board has been requested by Mayor Wadham, and I have complied with it by resigning, I will be unable to be present with the board of park commissioners at the time at which, I see by the newspapers, Senator Wright will apply for a renewal of the franchise of the Pursell railway through the park. Nevertheless, I am still a citizen of the city of San Diego and interested in the park, and I hereby ask you to publish my protest as a citizen.”

This franchise was announced in an evening paper to come up for discussion Monday when the commissioners propose to continue the investigation of the duties performed and bills paid by the former body. It can, therefore, be taken that Judge Luce does not expect to be present.

Explains His Objections

I protest against granting a franchise for this railway through the park for the following reasons:

1. On general principles I do not believe in granting a franchise for any railway through the park.
2. Granting, however, that great advantages might accrue to the city of San Diego by the granting of this particular franchise, I protest against this particular one because the applicant has not shown to this board that it has the financial ability to construct this proposed railway.

3. That Mr. Pursell, to whom this franchise was formerly granted and who represents the present applicant, has not fulfilled in good faith the obligations and conditions of the former franchise. And there is nothing to show that he will any more certainly fulfill the requirements and conditions of this one.
4. That he stated before, at two different times, that he had his proposition financed, but in both cases he has proved to have been mistaken.
5. I do not believe in granting any franchise whatever, in the city of San Diego, much more in the public park, to promoters and speculators who use the franchise or permit as assets for the purpose of making money out of these valuable franchises.
6. I believe in conserving all the assets belonging to the people of the city of San Diego for the purpose of benefiting the people at large, and not for the purpose of benefiting some speculator or promoter.
7. I also protest against the renewal of this permit because Mr. Pursell so recklessly disregarded the rights of the city and the public in constructing his embankment through the valley to the park by cutting down the sides of the hills and scarifying its slopes and hauling away the soil from portions of the park over which he had no control or permit. I have no faith in him or his company fulfilling any of the conditions or obligations of the present proposed permit.

M. A. Luce

Carson, Buildings Trade Council of San Diego County to James Wadham, Mayor of San Diego, 27 May, 1911, folder 14:2, box 2, San Diego Park Commission Collection, SDPL

San Diego Union, May 28, 1911, 4:1. EDITORIAL: Sehon's Unfortunate Letter . . . It is Capt. Sehon and not the press that is responsible for any mistakes in the police department. . . . It is sufficient to remark that Capt. Sehon's conduct throughout the affair is merely another proof of the generally recognized fact that he is temperamentally and otherwise unfit for the position he holds.

San Diego Union, May 28, 1911, 5:1. F. William Vogt appointed to succeed Luce, the appointee a Republican has been a resident of San Diego for 23 years.

San Diego Union, May 28, 1911, 5:2-3. Woman's Floral Pageant to typify youth, mirth, jollity.

May 29, 1911, Board of Park Commissioners: F. William Vogt appointed to Board to replace M. A. Luce who has resigned.

San Diego Sun, May 29, 1911, 2:1-2. Sefton demands payment of bills for park work; says he must have answer of Commissioners by tonight; work in the park temporarily stopped; refuses to discuss contract until bills are allowed and declares that he stands ready to put entire proposition in the hands of the stockholders.

San Diego Sun, May 29, 1911, 5:2. Women offer Exposition \$100,000 building. A permanent clubhouse for the women of San Diego to be the most beautiful and costly of all the chapter houses of the American Women's League, costing approximately \$100,000 is offered the Panama-California exposition in a proposition made by E. G. Lewis of St. Louis and University City, Mo. The proposition is to be considered today by the building and grounds committee and it is expected it will be accepted.

San Diego Sun, May 30, 1911, 8:7-8. Up to Park Board now, says Sefton after Star Chamber session closes; Commissioners are said to have decided that Allen must go; will honor old debts, but are going to authorize their own Exposition contracts hereafter.

In "star chamber" session yesterday afternoon, a meeting behind close doors, from which both public and press were barred, the board of park commissioners first allowed the \$29,000 due for work already done in the big City Park and then proceeded to repudiate the contract made by the old park board with the exposition directors.

Joseph W. Sefton of the exposition company, who had appeared before the commissioners yesterday and demanded the settlement of the bills, had won one point and lost another. He left the meeting declaring he had done his best and that it was up to the park commissioners to make the next move.

When the door to the park commissioners' chamber in the mayor's private office in the Granger building was at last opened last evening, this typewritten statement was given out for publication.

First: That we ascertain what we are paying for.

Second: Honor so far as possible the debts created by the old park board.

Third: That we positively refuse to be bound by or recognize or be in any way affected by the contract dated January, 1911, between the park board and the exposition.

Fourth: The park board will pay no bills in future not directly authorized and contracted for by the board.

Sefton Talks

To a **Sun** reporter last night Mr. Sefton announced that work would not be resumed in the park by the exposition company.

"It would never do to have two separate companies or organizations operating there," he said. "I shall do nothing. It is up to them to make the next move. They have practically demanded the discharge of Mr. Allen. There is a penalty clause to that contract which cannot be overlooked. It will not be so easy a matter to get rid of Allen as they may think, and may cost us \$25,000.

Asked if it seemed to be the intention of the board to place City Engineer Capps in charge of the work, Sefton answered that it seemed to him that was their plan.

Auditor C. A. Richards was present at the meeting yesterday afternoon and vouchers for all the bills were produced which were carefully gone over by the park commissioners.

The commission will see that the watering of trees and shrubbery in the park is kept up until work is resumed.

San Diego Union, May 29, 1911, 9:1. American Women's League offers to erect a \$100,000 building if the City will give a 5-acre site in Balboa Park; will employ George Julian Zolnay as director of sculpture for exposition, and will held League secure 1,000 members in San Diego; offer made May 28.

San Diego Union, May 29, 1911, 18:1. Michigan Society plans to build arch at Exposition.

San Diego Sun, May 30, 1911. Public Meeting for Exposition Project . . . E. G. Lewis has requested that a meeting be called for Friday evening of this week to secure the necessary assurance of hearty support by San Diegans of his proposition on behalf of the American Woman's League to erect a \$100,000 building at the Panama-California exposition.

San Diego Sun, May 30, 1911, "The Isthmus," or amusement street of the ground-breaking celebration, to have some shows.

San Diego Union, May 30, 1911. President's flag to be unfurled at San Diego celebration; Executive himself may spread emblem by touching an electric button; soldiers, sailors and marines to take part in groundbreaking ceremony.

San Diego Union, May 30, 1911, II, 9:2-3. Sefton demands payment of \$29,000 due Exposition; Park Board members are reluctant, fearing such action will ratify contract; agree to most of claim.

May 31, 1911, Board of Park Commissioners: Interurban Investment Co. given extension of one year to complete Pursell road.

San Diego Sun, May 31, 1911, 1:1. Park Board going ahead on Exposition job.

Five representatives of the San Diego Builders' exchange this morning called upon the board of park commissioners at a special session held in the regular chambers of the city hall. They called to suggest that San Diego contractors be allowed to bid upon the construction of the exposition buildings in the city park, and that local men, who are able to furnish the materials for the buildings and grounds, be given a chance to bid as well as outside concerns.

San Diego Sun, May 31, 1911, 1:7. Park Franchise is given to Pursell.

San Diego Sun, May 31, 1911, 8. Braly for real zoo; gets owl; menagerie in park will be enlarged by new park commissioners.

San Diego Sun, May 31, 1911, 8. Councilman Adams says sell park lands; declares that 1400-acre resort is much too big.

(San Diego) Evening Tribune, June 1, 1911, 10:1. Lawyers to advise on 1915 Fair tangle; legal advisory committee to consider questions bearing on issue with Park Board; asked by Sefton; charter provisions and state law are involved; City Attorney W. R. Andrews and E. H. Lamme, of the Committee, will have conference tomorrow on legal points.

San Diego Sun, June 1, 1911, 1:5, 8:7. All Exposition Work for Council? Maybe the Park Board has no real power to spend that million. Mayor has doubts. Legal committee of the Exposition company will look into the big question.

San Diego Union, June 1, 1911, 7:1. San Diegans ask chance to bid on Fair work; builders say Park Board to retain control of bond money.

San Diego Union, June 1, 1911, 16:1. Pursell franchise extended for one year.

San Diego Union, June 2, 1911, 5:1. Santa Fe Railway big booster for Exposition.

San Diego Union, June 3, 1911, II, 9:1-2. Benjamin H. Vreeland, public accountant and auditor, reports on Exposition accounts; shows amounts received and disbursed since inception of Fair project; figures are made public. . . . "I am pleased to report that the books have been reasonably well kept and are in the main correct, there being several unimportant differences, however, to which the attention of your auditor has been called, but which occasioned no financial loss to the exposition."

San Diego Sun, June 4, 1911, 8:5. Auditor Vreeland reports Exposition books are okay; praises Collier and Allen.

San Diego Union, June 4, 1911, 17:1. The ordinance which City Attorney Andrews presented yesterday to make the Park Commission the agent for the Common Council and to place the city engineer in charge of improving Balboa Park for the Park Board came as a surprise to the Commissioners and the councilmen.

June 5, 1911, Board of Park Commissioners: Louis Witzer given permit to use a shot gun to kill rabbits in the park.

(San Diego) Evening Tribune, June 5, 1911, 5:2. Electric 1915 sign may be erected on highest point in park.

(San Diego) Evening Tribune, June 5, 1911, 5:3. Financial condition of the 1915 Fair is revealed by accountant; report, taking six weeks to complete, shows all receipts and expenses; Collier pays own expenses.

(San Diego) Evening Tribune, June 5, 1911, 8:2. Council defers action on park work plan to make the Park Commissioners the City Council's agents in the park..

(San Diego) Evening Tribune, June 5, 1911, 12:1. Park Board is urged to help playgrounds; meeting will be held with improvement clubs in near future.

(San Diego) Evening Tribune, June 5, 1911, 12:2. Park ordinance delegating Council's authority to the Board of Park Commissioners will come up Wednesday; Council refers proposed measure to the Committee of the Whole.

San Diego Sun, June 5, 1911, 3:1. Mission parade will have many float captains; over 580 officers and men organize for celebration.

San Diego Sun, June 5, 1911, 8:2-3. Council defers action on park work plan: Mr. Capps, city engineer, willing to take job of overseeing work for the Exposition if called upon.

San Diego Union, June 5, 1911, 8:1. San Diego and San Francisco fight for federal aid; San Diego plans details of Exposition.

June 6, 1911.

NIGHT LETTER,

Brookline, Mass.
6th June, 1911

JULIUS WANGENHEIM

Bank of Commerce & Trust Company, San Diego, Cal.

Col. Collier asked me here yesterday to agree to Goodhue's exposition site middle Balboa Park. Replied that as a park designer impossible to do so. Believe it would be gross violation of duty for Park Commission to ruin park by putting exposition in middle of it. Exposition would be somewhat more grandiose there but that gain would not justify ruining park, would cost more there because of bridge, would not take in nearly as much there for gate money and concessions, especially in evening, would not advertise city and harbor as well as by close and full view, and would leave permanent buildings in remote and unsuitable place, especially for evening entertainments. Any desired area for foreign governments, Indian villages, aeroplane field and such will be made accessible from southern site by Midland Drive and drive on dam placed further down canyon than first planned. Site cannot be prudently changed in middle of park until after detailed estimates have been made both for exposition and electric railway to it. My guess is latter will cost over one hundred fifty thousand dollars if properly sunken to avoid unwarrantable injury to park. Park Commissioners not justifiable if they change site to middle of park hastily without estimates and against urgent recommendation of their professional advisor. Recommend Breaking Ground Ceremonies take place of spur thirteen hundred feet north of High School with grand stand facing view.

JOHN C. OLMSTED

(San Diego) Evening Tribune, June 6, 1911, 1:1. School Board and Park Commissioners plan to rush stadium in park to completion.

(San Diego) Evening Tribune, June 6, 1911, 6:4. Unique plan for lighting streets for carnival is arranged.

San Diego Sun, June 6, 1911, 1:8. Stadium in park to be rushed to completion.

San Diego Sun, June 6, 1911, 5:3. Plans submitted for Polytechnic School; nine bid; \$200,000 in bonds recently voted.

San Diego Union, June 6, 1911, 4:1. EDITORIAL: Control of the Exposition . . . The newly prepared ordinance under which the common council makes the park commission its agent for superintending the expenditure of the proceeds of the so-called exposition bonds, will be considered by the legislative body tomorrow afternoon and doubtless there will be ample opportunity for all to be heard who so desire. In the meantime it is hoped that there will be an earnest effort to reach an amicable understanding among all

citizens who, in one capacity or another, have to do the work of arranging for the exposition of 1915. Without such understanding, there appears to be reason to fear that the project, in whose success all San Diego is so deeply concerned, may sustain a serious setback.

The situation is delicate and calls for broad comity on the part of all who are charged with the exposition work. Legally, the \$1,000,000 of bonds authorized by the people last summer were voted for park improvements. Practically, however, the issue was ordered primarily for exposition purposes. It is true that the contemplated park improvements will be a bona fide, permanent betterment of the park. It is equally true, probably, that the \$1,000,000 in bonds would not have been voted, had it not been for the general understanding that the improvements would serve as a substantial basis for the exposition. It appears, however, from the ordinance under which the bonds were voted, that the proceeds, as in the case of an ordinary issue of municipal bonds, may be expended under the control of the common council, and this is the view expressed by the city attorney.

Then arises a peculiar condition of affairs. San Diego, for the preliminary financing of the exposition, has provided a fund of \$2,000,000 --- one half by popular subscription and the other half by a bond issue. The exposition officials have charge of the expenditure of the \$1,000,000 subscribed --- nobody challenges their right in that matter. Now it is proposed that the common council, or the park commission acting as its agent, shall direct the expenditure of the \$1,000,000 raised by bond issue. Such an arrangement will be an anomaly. It will mean two totally distinct government bodies, each independent of the other and each "bossing" one half of a great undertaking that can properly be carried to success only by dealing with it as a whole. And while there will be two sets of bosses, there will be nobody in charge of the entire work, and responsible for its due performance. A little reflection will probably convince most persons that such an arrangement holds out feeble promises. It certainly is not the method usually followed in carrying large and complex enterprises to entire success.

It will be noted, too, that under the pending plan for the control of the expenditure of the \$1,000,000 raised by bonding, leading citizens who have been tireless in promoting the exposition, who have borne the brunt of the struggle at home and abroad to place the undertaking on a substantial basis, will be without voice in determining matters that may be of vital importance to the success of the great enterprise.

However, if all who have to do with the exposition will make an earnest effort to work in harmony, there is no reason why the difficulties that have now arise may not be overcome. Perhaps it is well here to receive a hint from the expedient of which advantage was taken when it was desired to bond the city for the exposition. Legally it could not have been done directly. But bonds for park improvement could be issued legally. So there was a sort of "gentlemen's agreement" that while there should be compliance with the law, the bond issue should serve almost the same purpose that it would, had it been voted expressly for the exposition. There is no reason why there should not now be another tacit understanding or "gentlemen's agreement" under which the law may be observed and, at the same time, the dangerous anomaly of a great undertaking controlled in sections, and without any responsible head, may be avoided.

It is possible and wholly practicable to have a satisfactory working agreement between the common council, or its agent, the park commission, and the exposition authorities. But if there is to be such an arrangement, it will be the result of a spirit of comity, and of a general desire to promote the interests of San Diego by making the exposition a success.

People will hope that the subject will be approached in a spirit of tolerance and good will by all who are charged with the exposition work. It need not be suggested that the exposition is the last thing on earth with which to attempt to play politics, or by which to seek to punish enemies or reward friends. San Diego has too much at stake. To fail now to carry out this great undertaking, after the time, labor, money and publicity that have been given to it, would be little less than a disaster to this city.

June 14, 1911, George W. Marston Papers, Collection 219, Box 2, File No. 25, Panama-California Exposition - Buildings and Grounds Committee; Letter, June 14, 1911, G. W. Marston to J. C. Olmsted.

My dear Mr. Olmstead:

Your letter of June 3rd has been unanswered for too long but outside work has kept me away so much from my office that it has been almost impossible to keep up with the daily demands. In respect to the subdivision of my land across the canyon, it does not matter very much yet, but I hope that in this coming season, that is, in the winter time, your firm can take up the business and complete it.

Mr. Allen has promised me to accede to your ideas about the location of the exposition and not to agitate further the change. His agreement is not an absolute one, but he acceded to my representations that this divided choice was very harmful and said he would be very glad to be governed by my wishes.

However, all these things are in abeyance pending the settlement of the more important matter. That is, whether the present Park Commissioners carry on their work independently or come into the plan and program of the exposition and its contracts with the Park Board and its contracts with Allen, Goodhue and yourself. I am sending you herewith the newspaper publications of the week. Allen wrote me for the description of the Division of Works. My own written report for the Buildings and Grounds Committee appeared yesterday morning. We shall continue to present reports and letters through the week and expect to arouse public sentiment for our side of the case. It seems as if nothing would move Mr. Clark Braly and if the combined force of the Chamber of Commerce, Merchants' Association, Exposition, improvement clubs, and other supporting elements do not have the effect of making him come in, there will be nothing else to do but to secure his removal. It is a serious condition and threatens the life of the exposition.

Mayor Wadham has been away for several days and I do not know whether he had modified his views or not. We are still uncertain how this will come out but I have hopes that the people will soon see that there is only ruin for the whole enterprise if the Wadham-Braly plans are allowed to be carried out.

I have advised Colonel Collier by telegram that I think he ought to come home. Have not yet heard from him in replay. I will keep you posted by sending you newspapers and will also write again.

I am very glad to have in writing the views you expressed in your letter concerning the location of the exposition and the reasons for opposing the central site and the granting of railroad facilities through the center of the park.

(San Diego) Evening Tribune, June 14, 1911, 10:2. Choate says retention of Olmstead [sic], Allen and Goodhue is essential.

San Diego Union, June 14, 1911, 5:2-4. Architects chosen for skill as shown by achievements; Park Board sought to give San Diego a pleasure ground to compare favorably with any; acted after investigation.

Bokovoy, p. 223. On June 15, 1911, Spreckels and Clayton resigned from the exposition corporation and withdrew the financial support of the Exposition corporations.

San Diego Sun, June 15, 1911, 1:1-2. Ferris arrested; U.S. Marshall takes promoter of a federal warrant accusing him of being a filibuster.

San Diego Sun, June 15, 1911, 1:3. Envoy from Brazil shown about park.

San Diego Sun, June 15, 1911, 7:7-8. Attempt to recall may follow Exposition trouble; rumors of a plan to oust Mayor and Park Board if they do not "show hand." Wadham is in San Francisco and Braly refuses to talk. Sefton demands charges be substantiated.

San Diego Union, June 15, 1911, 4:1. EDITORIAL: The Exposition Controversy . . . The people of San Diego will do well to pay more attention than they have been giving recently to the exposition, and especially to the situation that has developed since the change in the personnel of the park board. For many months past, while there has been no apathy in regard to the great enterprise, the average citizen has seen no reason why he should actively concern himself about the project. The million dollar fund had been subscribed, the bonds had been voted, and the management of the exposition company was one to inspire implicit confidence that the undertaking would be carried to success. In these conditions there appeared no reason why the people should trouble themselves about the affair. The situation that is now presented, however, is very different. It calls for the thoughtful consideration of every public-spirited man and woman in the community.

The truth is unpleasant, but it must be faced. Unless the present controversy can be eliminated, and some sort of a working agreement reached by the park board and the exposition directors, San Diego's plans for 1915 may have to be abandoned. To carry them out under present conditions would be apparently impossible. As matters now are, one set of officials has charge of spending one half of the total fund of \$2,000,000 upon improvements designed to form what might, perhaps, be styled the basis and setting of the exposition. The directors of the latter have charge of spending the other million upon what might be called the superstructure, using the term in a very broad sense. Such an arrangement will involve two sets of employees for work that could be better performed by one set. It will involve, too, other objectionable features that will readily suggest themselves to persons who give thought to the subject. But the worst of those features is the lack of any central authority to direct the undertaking. A more unscientific and impracticable plan of carrying out a great enterprise could hardly be conceived. No great undertaking of like nature was ever brought to success by such methods, and probably none ever will be.

It is not the purpose here to criticize the park board, but it would be interesting to know how the members of that body suppose that a great exposition can be created by the methods contemplated. The board can proceed along the technical lines of the terms of the bond issue, laying out roads, erecting permanent structures, etc. But unless this task is performed in collaboration with the men who have planned the exposition as a whole, the results will be a series of misfits that are likely to be as absurd as deplorable. And unfortunately the attitude of members of the board is not one that encourages the idea that they purpose to act otherwise than in entire independence of the exposition directors who have devoted months to planning every detail of the undertaking --- a project in which, by the way, not one of the park commissioners has heretofore displayed any notable interest.

In a previous article in this paper it was suggested that there ought to be a way in which the directors and park commissioners could get together and arrange to act in harmony. The **Union** sees no reason to change the opinion there expressed. The agreement last January between the exposition company and the former park board appears to have been an admirable agreement for enabling the parties to it to work in perfect unison. While it was in operating, the exposition plans were being carried out in much the same manner as if their execution had been directed by a single body or by even an individual. It would be fortunate if that agreement could be again put in force, and there appears to be no valid reason why it should not be. But whether that plan is adopted again or not, there should be no difficulty in reaching some basis of a satisfactory agreement.

Of course the law should be observed. But there should be no sticking for rigid technicalities. In all save a strict legal sense the bonds voted last year are exposition bonds. The primary object of voting them was to add another \$1,000,000 to the exposition fund, and while that money can be legally applied to park

improvement only, it was the success of the exposition, and not the improvement of the park, desirable though it be, that was in the minds of the voters when they ordered the issue. In these conditions it certainly appears that good faith to the people who voted those bonds for the exposition demands that in the expenditure of the money by the park board there should be regard for the wishes of the men whose labor, courage and self-sacrifice made the exposition possible. And this can be done, legally done, provided there is a genuine desire among all persons concerned, to sink all differences and personal feeling and to work in harmony for the success of the enterprise which promises so much for San Diego.

It is for these reasons that the people of the city should be giving attention to the exposition situation. Their will is very likely to prevail, if they give expression to it. But there is no time to waste. The situation is daily becoming more acute. The people of San Diego will do well to recognize at once the painful truth that the exposition itself, and not merely its success, is menaced by the lack of harmony. They should realize, too, that it is in their power to avert the menace. If they demand that the present controversy be ended, a way will be found to end it in short notice.

The people of this city have done their part to promote the success of the exposition. They have given freely and gone into debt to give more. They have a right to insist that they shall not be deprived of the fruits of their public spirit because of jealousy, animosity, politics or technicalities.

And if it shall come to pass that the grand undertaking which has made San Diego known the length and breadth of this land, shall end in failure and humiliation, the people of this city will place the blame where it belongs.

June 15, 1911, George W. Marston Papers, Collection 219, Box 2, File 25, San Diego Historical Society Research Archives.

Letter, June 15, 1911, George W. Marston to William Clayton . . . Having just heard of the resignations which you and Mr. Spreckels have presented to the Exposition directorate, I infer that you consider it absolutely impossible to continue the effort for an Exposition unless the Park authorities will cooperate with the Exposition directorate, and accept the foundations already laid in their contracts and agreements. I do not think that any compromise is possible. The organization that has been built up and the engagements made with Allen, Goodhue and Olmstead [sic] are so absolute and the work has got on so far that to make any change now would be just about as insane as for Mr. Spreckels to discharge Mr. Albright and Mr. Engstrom and then tell the Federated Trades to finish the job. I shall resign myself from the Buildings and Grounds Committee if the City does not sustain the present plans.

I think that the editorial in this morning's **Union** was not only timely but also sensible and convincing. What has surprised me greatly is the general public indifference to this matter which effects [sic] so vitally the Exposition and also the permanent improvements in the Park. Personally, I think that if expenditures of one million dollars is to be put into the hands of Clark Braly and men of his caliber that the Park will be damaged more than it will be improved.

After giving seven years work to the development of the city park, I have felt exceedingly depressed in thinking of the possible mutilation that ignorance and misdirection may bring upon us.

I hope that the action that you and others have taken and the vigorous steps that the directorate proposes to take at once will be of some avail in brining us out of this difficulty. I was never much in favor of an Exposition, but now that the city is committed to it, I feel we must rally around Collier and keep it up.

San Diego Union, June 15, 1911, 5:1-4. Sefton calls on Mayor Wadham to substantiate charges. Acting Director General defends Publicity Bureau. Total expense \$32,375.

San Diego Union, June 16, 1911, 9:1. Dick Ferris arrested for violating neutrality laws; connection with rebel affairs at Tijuana is basis of accusation.

San Diego Union, June 16, 1911, 10:2. Acting Director General Sefton renders accounts for various departments; specifies work done in park

Board of Directors, Panama-California Exposition

Gentlemen: Following is a report of the work done in the park by the division of works up to and including the month of May, 1911.

Up to June 1, 1911, the division of works expended the following amounts:

Nursery	10,968.99
Nursery	24,050.66
Park Work	23,566.07
Total	58,585.72

Works Office

The amount of \$10,968.99 charged is the net cost of the works office to date and includes \$? of preliminary expenses incurred before the organization of the division of works as well as the cost of topographical surveys of the exposition site.

Nursery

A complete nursery has been installed and equipped. Approximately twenty-five acres have been fenced, piped for water and put under cultivation, and the following buildings have been erected and equipped.

Glass green house	22x100 feet
Lath green house	22x 96 feet
High lath house	96x 96 feet
Low lath house	96x 64 feet (?)

Office, tool house, cutting house, cottage and 1,300 linear feet of hot and cold frames.

To stock the nursery the Normal Heights and Coronado nurseries were bought outright and large quantities of planting materials were purchased from other dealers and nurseries. Material not obtained locally has been secured in other parts of the United States and ordered from abroad. In addition to stock purchased, large quantities of planting materials have been propagated.

At this time the nursery contains more than 225,000 plants of all sorts and of all sizes, up to twenty feet in height. The nursery contains 6,300 palms of different species.

Park Work

The work done for the park board is as follows:

Preliminary surveys	1,346.84
Topographical surveys	713.40
Border plantations	13,343.50
Irrigating systems	6,167.95
Improvement of 18 th Street Entrance	513.16
Miscellaneous park improvements	366.30
Maintenance of completed work	1,114.92
Total	23,566.07

The preliminary surveys were made for the use of Mr. Olmsted in laying out the park improvements. These surveys were made before the division of works was organized, and they are so inaccurate that they are useless. This work was done over by the division of works.

The item for topographical surveys includes the cost of all surveys for the design and location of all park work done to date, and also includes surveys for a much greater amount of future work.

The border plantations are seventy acres in area and extend along the north border of the park and for 3,000 feet along the east border. All plantations were cleared, grubbed, spread with slaked lime at the rate of 1,500 pounds per acre, and with manure at the rate of fifteen cords per acre. After this the ground was plowed twice, thus breaking up the soil to an average depth of fourteen inches. A large part of the plantations are on the sides of the canyons where it is impossible to plow. These places were "pot-holed," most of the "pot-holes" being blasted out of the hardpan. After the ground was prepared, 28,000 trees and shrubs (twenty nine varieties) were set out. The charge for border plantations also includes the work done on the border roads, grading for which was well under way when work was stopped.

The irrigating system was put in to water the plantations and consists of 20,000 feet of iron pipe (principally four-inch, three-inch and two-inch), together with all necessary fittings, valves and stand pipes.

The improvements of the Eighteenth street entrance consisting of cutting down some unsightly banks, filling a low area, and planting trees.

The item of miscellaneous park improvement consists of small jobs in various parts of the park and includes the transplanting of a number of large palms which were secured in various parts of the city and moved to the park.

The item of maintenance includes the labor of upkeep and irrigating of plantations from the time they were set out until work was stopped. This item also included the cost of all tools, hose, etc. needed for this park work.

J. W. Sefton, Jr.
Acting Director General

San Diego Union, June 16, 1911, 10:1-3. Sefton tells Park Board explain, recede or resign; declares present situation is intolerable; says people of San Diego are "absolutely impatient over delay," demands prompt action.

An Open Statement to the City Park Board

It is a well recognized fact that the persons who subscribed with enthusiasm to the capital stock of the exposition are the very same persons who voted in favor of the million dollar bond issue, and that this money was voted with the express understanding that it is to be used in the park for exposition purposes. It was this understanding that led to the formation of the agreement between the park board and the exposition, and the formation by the exposition later of a director of works, under which the above detailed work has been done. This agreement is in exact accord with the law of the city, county and state, and there is no question of its legality, except in the minds of some person who finds the provisions of the agreement inimical to his own interests. The work above detailed is simply preliminary.

It will be necessary, in order to carry out the expressed intentions of the people of San Diego, to create in the park a miniature city. For this purpose a main street system with lines of tributary communication will be necessary.

Such streets necessarily will contain curbs, gutters, pavements and all drainage facilities, such as sewers and open drains, water mains, bridges, buildings, ordinances, rules, regulations and many others.

How does the park board propose to carry out this work?

Does the park board think that two engineers, two architects, two heads, two conceptions, two ideas emanating from two sets of men, who are not working in harmony toward one end, can do it?

The preliminary work of tree, shrub and vine planting has begun. Even should the park board cause the abandonment of the exposition, it must of necessity proceed with the ornamentation of the park by plantation, by construction of rest houses, by creation of places of amusement, stadiums, lawns, lakes and other ordinary park improvements.

Has the park board any plans, or even a general idea of the extent of the work of this character it intends to carry out?

The miniature city will require a water system, both for domestic and fire supply. If this city should not be built, such a system will be required for ordinary park work.

Has the park board any plans by which this water system may be installed in either event?

The miniature city will also require illumination and a certain amount of illumination will be required for ordinary park improvement.

What, if any, plans has the park board for the protection of this miniature city from fire?

Does the park board intend to pursue the expensive general contractor system in park improvement and purchase materials in the open market, or has it some definite plan for the establishment of grading camps by which a large overhead expense will be cut off, and by which a great savings will be effected by the purchase of materials?

What, if any, plans have been made or are in contemplation for the simple maintenance of the park and to continue the propagation of the plans necessary for park improvement?

Is the park board going to abandon the plain intention of the people to hold an exposition?

Has the park board any adequate plan whatever for the creation of the exposition in the park in compliance with the will of the people?

Has the park board any man in its membership who is qualified to create the plans for the exposition and for park improvement?

Does the park board intend to cause the loss of all the funds which have been expended so far in the park?

Has the park board anything better to offer the taxpayers of San Diego than the plans adopted by the board of directors of the exposition and the old park board?

Has the park board any plan by which it can save the city any more money in the improvement of the park than has been shown can be saved through the operation of the division of works under the agreement between the old park board and the exposition?

The board of directors of the exposition and the members of the old park board and the members of the buildings and grounds committee of the exposition have put themselves on record before the people of San Diego and have detailed the plan under which it is proposed to create the exposition and improve the park in accordance with the will of the people expressed by their voluntary subscription to the exposition fund and their adoption of the million dollar bond ordinance.

It is now up to the park board to make the same explanation, to show wherein their procedure will result in greater benefit to the city and to show wherein their method will reduce the estimate of expense for the work.

The people in San Diego are absolutely impatient at the delay in settlement of this controversy. The board of directors of the exposition have done everything in their power to enlighten the people as to their plans.

The park board has done absolutely nothing.

The park board has been placed in such a position that it must either explain to the people what its plans are and how much greater a saving to the city these plans will make, or recede from its position, or resign.

The present situation is intolerable and cannot continue.

The members of the board of directors, which includes such men as U. S. Grant, Jr., William Clayton, G. A. Davidson, C. L. Williams, Fred W. Jackson, Jr., D. F. Garretson, George Burnham, L. A. Blochman, John D. Spreckels, John F. Forward, Jr., W. A. Sloane, Fred Jewell, W. H. Ludington, Colonel McLure, Lucious R. Barrow, D. C. Collier, Arthur Marston, Julius Wangenheim, H. H. Jones and B. V. McKenzie, have given their time and attention to the details of the immense plan for the exposition in the park and it is impossible to select a more representative body of men for any project whatever in San Diego, men in whom the people have more confidence and in whose probity they can trust more absolutely.

Arrayed in opposition to these are Mayor Wadham, Clark Braly, president of the city park commission, and one or two others.

It is for the people to determine whether the exposition shall be carried through by the two dozen gentlemen above named, or abandoned because of the obstinate, obstructive tactic of the city officials mentioned.

(Signed) J. W. Sefton, Jr.
Acting Director General

San Diego Union, June 16, 1911, 10:3. Scripps' editor condemns Fair; R. F. Paine in letter to **Union** declares Exposition plans should be dropped.

San Diego, Calif., June 15, 1911

Editor, **San Diego Union**

Will you kindly permit one who has but recently become a permanent taxpayer in this glorious community to express an opinion based on your editorial: "The Exposition Controversy."

The truth, you will say, is unpleasant, but it must be faced. Until the present controversy can be minimized and some sort of working agreement reached by the park board and the exposition directors, San Diego's plans for 1915 may have to be abandoned.

I am certain that if the whole truth and nothing but the truth were shown, public sentiment already favors abandonment of the exposition plans.

Having had some little experience with expositions, I am of strong conviction that they result in very little of permanent benefit to any place. They are like stuffing the poor with bad turkey to the point of gastric paralysis on Thanksgiving day, and letting them eat grass the rest of the year. And the movement for a San Diego exposition was an unwise thing from its adoption under the circumstances.

We proposes to spend millions upon what the country looks upon as a mere side-show. With the first stake undriven, we are fighting as to who shall have the authority, who shall spend the money. You truthfully say in your editorial that for many months the average citizen has seen no reason why he should actively concern himself with the project.

If you dig into the soul of the average citizen, particularly the merchants who have been bled time and time again for this, that and the other "worthy project," you'll find that a surprising number agree with me that the exposition should be sensibly and courageously abandoned NOW.

Please don't put me down as a knocker. I'm really a live-wire booster for San Diego. What real estate I've got, I'm holding at prices that would make the most optimistic, nervy and courageous real-estate agent in this dear little burg turn chrome yellow in envy at my talent and gall as a booster. I am writing everybody I know back east the truth, the whole truth, and more, too, about the superlative advantages of San Diego. But with all this, I sincerely believe that a great mistake has been made and as one bound to pay his part of interest on those millions of bonds, I vote to knock that exposition on the head NOW, when it can be most decently and economically done.

Very respectfully,

R. F. Paine
2352 Fifth St.

(Mr. Paine is an editorial writer for the Scripps' newspapers of the Pacific coast, including the **San Diego Sun**, **Los Angeles Record**, and papers in Sacramento, Fresno, Berkeley, San Francisco, Portland, Tacoma, Seattle and Spokane. He said last night that his letter to the **Union** simply expressed his view as a citizen and taxpayer of San Diego.)

San Diego Sun, June 17, 1911, 1:3. Mass meeting Tuesday night for Exposition; resignations of the entire board of the exposition directors have been prepared and they will not wait much longer for the mayor.

San Diego Sun, June 17, 1911, 7:6. Dr. Dahne forced to tell Brazil to delay on Exposition; nothing can be done until Exposition tangle ends.

San Diego Sun, June 17, 1911, 7:7. Representatives of various improvement clubs say it's up to Park Board to get off job; Harry Vincent makes threat of a recall; meeting at U. S. Grant Hotel.

San Diego Union, June 17, 1911, 4:1. EDITORIAL: The Exposition Experts . . . Some of the hostile criticism at the exposition authorities because of their employment of experts at expert's salaries is undoubtedly inspired by envy or malice, or both. It is charitable, however, to believe that most of the strictures are the result of thoughtlessness on the part of those who criticize. This view will be strengthened by the fact that most of the criticism hardly rises above the level of ordinary, street-corner gossip, and very little of it appears to be the mature judgment of fair-minded men who have studied the subject in its varied aspects.

The complaint that is made is twofold --- the employment of outsiders instead of "home talent," and the large salaries paid to them. Especially strong is the protest because of the hiring of a director of works at \$20,000 a year. This act of the exposition authorities has been made the target of not a little scolding and of some downright abuse. There is also a loud outcry because of the employment of eminent landscape architects at salaries which the services of such men readily command. The effort of the critics is to create the impression that it was not necessary to go outside San Diego to fill all these positions properly and much more cheaply.

To argue with the persons who are actuated by envy or spite in seeking thus to inflame the public mind against the exposition management, would be a waste of time. It is more to the purpose to address people who many have never given thought to the subject and may, therefore, be misled by the man who are conducting a campaign of "knocking" the exposition. To those who are thus deceived, it may be suggested that cheap men are plentiful, and that when employed upon such tasks as designing and creating a great exposition or other large undertaking, they are likely to prove more costly in the end than experts whose recognized ability enables them to earn larger salaries. In hiring the \$20,000 director of works, the exposition authorities believed that his experience would enable them to cut expenses where an inexperienced man would increase them. That belief has been strengthened to a certainty since the director entered upon his task. And in hiring him at what may appear an unduly large salary, the exposition only took the course that has followed by men of large affairs everywhere. It is cheaper to buy efficiency even at a large price than to accept free inefficiency.

The reasons why the engagement of Frank P. Allen, Jr. was a wise step from the standpoint of economy apply with equal force to the employment of the landscape architects, the Olmsted Brothers and B. G. Goodhue. These men are experts of national reputation. The need of experts was very clearly explained by Mr. Marston in the report which he submitted as chairman of the buildings and grounds committee last week. To quote

"It must be borne in mind that this exposition is not in the hands of an established business corporation, with its staff of experienced trained men. It has to be handled by public committees, composed of men immersed in their private business, men who are willing to give a moderate share of their time, without salary to public causes, but cannot do much more than to give their names, judgment and decisions to the important features of such work. . . . Hence it is plain that businessmen . . . represented on the exposition committee will not lend their time and service to the city unless they can have the details of affairs of such magnitude as the park and exposition business put upon men of established reputation for great work."

But then comes the old complaint --- fat positions given to outsiders. It is no disparagement to San Diego to say that it was necessary to go abroad for experts because those of the kind needed were not here. It was essential that the director of works should have had large experience in exposition problems. If there be any San Diego man who meets that requirement, he appears not to have made the fact known. As to the other experts, the landscape architects, it should be remembered that men who have attained eminence in their profession go where the money is --- to the larger cities. They might all like to come to San Diego to live after they have retired, but while they are in active business, their signs are not seen on the streets of small cities.

Nor did the exposition create the first occasion when it was deemed necessary to go abroad for eminent professional men. Several years ago, when the movement for the systematic improvement of the park was

begun, Mr. Parsons and the late Mr. Cooke were brought here to plan the work, and it went forward subsequently along lines laid down by them. Again, when the Civic Improvement Committee sought to cause the growth of the city to be directed along lines of artistic harmony and good taste, John Nolen, a recognized authority in such matters, was "imported" from Massachusetts, and while it may never be practicable to follow his views in their entirety, there is little doubt that the greater San Diego of the future will be a more beautiful city because of Mr. Nolen's effort. In any event, there is no lack of precedents for the action of the exposition in hiring outside experts.

The exposition authorities may have made mistakes. It would be marvelous if there were none. But the employment of the director of works and the landscape architects was not a mistake. On the contrary, it was one of the wisest steps taken. As it is, the preliminary work of the exposition has been well performed and the entire undertaking will go forward --- unless it is "knocked" to death --- according to plans that promise success. But had not these experts, about whom there is now so much unthinking clamor, been engaged, the exposition work would be in a chaotic condition today, and it would be necessary to take now the very step for taking which in due season the directors are the objects of shallow criticism.

San Diego Union, June 17, 1911, 5:1-4. Fate of Exposition depends on action of Park Board; Sefton closes financial report.

San Diego Union, June 17, 1911, 17:1. Brazil's exposition exhibit to cost \$1,500,000; Eugenio Dahne, special envoy, pleased with advertising prospects.

San Diego Union, June 17, 1911, 11:1. Citizens vote confidence in Fair Board; Park Board should cooperate or resign; meeting of representatives of improvement clubs of San Diego in U. S. Grant Hotel.

San Diego Union, June 18, 1911, 5:1-3. Exposition directors prepare resignations; Park Commission still objects to contract.

San Diego Union, June 18, 1911, 17:1. Three thousand sailors are guests of City at barbecue in park at 6th Street from Ivy to Juniper.

(San Diego) Evening Tribune, June 19, 1911, 12:2. Amicable settlement of Fair row in sight; Mayor and Exposition officials will confer; stockholders of the Exposition company will meet tomorrow night; Building Trades Council to take action.

San Diego Sun, June 19, 1911, 1:8, 2:3-6. Conference to end dispute over Exposition; mayor returns; Park Board will meet directors.

San Diego Sun, June 19, 1911, 7:3-4. Judge Thomas J. Hayes says stop Exposition fight.

San Diego Union, June 19, 1911, 9:1. Judge Bledsoe suggests arbitration to end Fair dispute.

(San Diego) Evening Tribune, June 20, 1911, 2:2. New agreement on 1915 Fair adopted; Exposition directors and Park Commissioners ratify measure this afternoon.

(San Diego) Evening Tribune, June 20, 1911, 8:1. Jack Dodge changes location of "Isthmus."

San Diego Sun, June 20, 1911, 1:1-2. Exposition dispute ends; contract to be signed; everybody's happy and meeting tonight promises to be big love feast; Colonel Collier is expected to speak.

San Diego Sun, June 20, 1911, 9:7-8. Crowds cheer Collier at rally for Exposition.

San Diego Union, June 20, 1911, 1:1. Dispute over Fair ended; factions agree; Collier arrives today; contract to be put in legal form.

(San Diego) Evening Tribune, June 21, 1911, 4:1. EDITORIAL: Nothing to Interfere With Plans for Exposition.

(San Diego) Evening Tribune, June 21, 1911, 9. Crowds cheer Collier at rally for Exposition.

San Diego Union, June 21, 1911, 4:1. EDITORIAL: The Controversy Ended . . . The Exposition controversy is ended --- for all time, it will be hoped. The adjustment of the dispute was generally expected, but is not on that account any less gratifying. There is no occasion to discuss here the terms of the new agreement between the city authorities and the exposition directors. It is sufficient to say that a satisfactory working arrangement has been effected under which the plan for the great enterprise will go forward rapidly and virtually along the lines originally proposed by the directors, the new agreement being essentially the one formerly in force. All doubt as to the success of the project is now dispelled.

The controversy had been a deplorable one, and should be forgotten. Nevertheless, it may have served a useful purpose. It has emphasized anew the fact that to succeed in any public undertaking people must work together. Lack of harmony means failure. Of course, it is not to be supposed that all citizens will have identical views as to the manner in which the exposition plans should be carried out. But differences of opinion need not lead to hostile criticism. The latter, persistently expressed, is a menace to the success of any project.

There has been altogether too much criticism of the exposition plans and the men who framed them and have sought to carry them to success. Some of the criticism was inspired by malice --- from the outset the exposition had been the target of a little bank of trouble makers, commonly called "knockers" who are never so active as when the public-spirited majority is trying to achieve results for San Diego. Other attacks upon the exposition came from well-meaning persons who gave heed to the professional "knockers." And the outcome of the joint effort was to make the fate of the entire project very doubtful for a time.

And now that the dispute is ended, it seems timely to suggest that future controversy can be easily avoided by all who desire that San Diego shall have a canal exposition in 1915 and that it shall be both creditable and beneficial to the city. Those who cherish that wish and hope will do well to bear in mind that the affair is not in the hands of visionary promoters, exploiting the city for what they may gain. From the outset the exposition plan has been in the control of men whom the community would select to manage any great undertaking in whose success the people are deeply concerned. In fact, had not these men taken up the project and given it their names as well as their time and labor, the exposition would never have been undertaken. Mistakes can be made, of course, by every man of body of men. Infallibility is not claimed for the exposition authorities. But in view of the personnel of the board of directors, its judgment is entitled to weight. And that judgment should not be discredited because of the criticism of the street-corner "knocker." It is well to remember, too, that no great public undertaking ever was, or even will be, carried out to the entire satisfaction of everybody as to every detail. No man and no set of men could arrange for the San Diego exposition without going counter to the ideas of some persons as to some matters connected with it. In a work, the exposition is in the strongest and most capable hands, and they should have unqualified support.

Let the recent dispute be forgotten, and let any animosities caused by it be ended. San Diego is now looking to the future, not to the past. It sees the last obstacle removed from the path of a more ambitious project than was ever undertaken by another city of like size. It is a time for congratulations and for a strengthened purpose to work together in harmony for the success of the exposition of 1915.

San Diego Union, June 20, 1911, 5:1. Council sanctions plans for groundbreaking on "Isthmus" from D to F on Union Street and from Front to State Streets on E.

San Diego Union, June 21, 1911, 5:1-4. Collier tells of encouraging outlook in Washington, DC,

San Diego Union, June 21, 1911, 5:3-4. New agreement with Park Board.

June 22, 1911. Magonistas defeated by Federalists at Tijuana.

San Diego Union, June 22, 1911, 5:1. Exposition directors ratify new contract.

San Diego Union, June 22, 1911, 5:2-3. Noted men endorse San Diego Exposition.

June 23, 1911.

Night Letter

Received at Seattle, Washington, June 23 --- 11

Clark Braley,
President - Board of Park Commission,
San Diego

As yet I have not had the honor of your acquaintance But am appealing to you to use your influence in keeping the exposition as the south end of the Park you undoubtedly realize that a park is created for recreation and rest and happiness of the public who are unable to get such elsewhere it is not the purpose of a park to place buildings in it other than for Park purposes and placing exposition with its permanent buildings in the middle of the park the wonderful beauties and the purpose of the park is for all times destroyed it seems unlikely that you as a member of the park board will permit the purposes of your park to be sacrificed by allowing the exposition to be placed other than at the south end . I beg of you to make every effort in this serious matter

James F. Dawson
Olmsted Brothers

328 am

San Diego Sun, June 23, 1911, 1:6. Spreckels takes out permit for an additional \$325,000 to build theater.

San Diego Union, June 23, 1911, 13:1. Collier and Choate leave to resume work at capitol; Collier says resolution in Congress means \$5,000,000 to Exposition here; Brazilian appropriation alone would amount to \$1,500,000.

June 24, 1911, Board of Park Commissioners: Agreement between Board and Exposition Committee, June 20, 1911, confirmed.

June 24, 1911, Marston File, Correspondence on location of Exposition, 1910-1914, San Diego Historical Society Research Library. . . . Letter, Marston to Olmsted: Allen and Olmsted differ on Exposition site.

(San Diego) Evening Tribune, June 24, 1911, 1:1. Members of Park Board Will Resign Office; action taken by Fair Buildings and Grounds Committee the cause; statement being prepared this afternoon explaining position of commissioners; Mayor Wadham refuses to discuss resignation; conference is held.

San Diego Sun, June 24, 1911, 7:8. Frank P. Allen to spend city park bonds on Exposition work; Buildings and Grounds Committee instructs director of works to proceed in the park "as called for by the plans prepared by Olmsted Brothers."

San Diego Union, June 24, 1911, 20:1. Director of Works given charge of park bond million; Buildings and Grounds Committee also directs him to improve park according to plans prepared by the Olmsted Brothers; two big contracts let: Unions to furnish music and Kabierske to build arches for groundbreaking; Bishop Conaty pleased with mission floats. . . .

Director of Works instructed to proceed with the improvement of the park border as called for by the Olmsted Brothers and to proceed with surveying required by the Olmsted Brothers. . . . Louis J. Wilde, member of Buildings and Grounds Committee, refused to vote.

San Diego Union, June 25, 1911, 4:1. EDITORIAL: Resignation of Park Board.

San Diego Union, June 25, 1911, 14:1-3. Clark Braly, George R. Harrison and William Vogt of Park Board resign; blame Fair committee.

San Diego Sun, June 26, 1911, 1:1-2, 3:5-8. Mayor Wadham disgusted; is preparing to quit job; deserted by Park Board; may resign Wednesday; Park Commissioners say they will stand pat; Wadham away again.

San Diego Union, June 26, 1911, 9:1. Mayor Wadham considering resignation to show faith in Park Board; left for Los Angeles last night on legal business to be gone until Wednesday.

(San Diego) Evening Tribune, June 27, 1911, 5:2. Dahne applauds San Diego's pluck; writes letter expressing satisfaction over progress on Fair here.

San Diego Sun, June 27, 1911, 7:1. Sefton replies to Park Board in long letter; use Exposition bond money for Exposition.

(San Diego) Evening Tribune, June 28, 1911, 1:3-6. Mayor Wadham denies he will resign office.

(San Diego) Evening Tribune, June 28, 1911, 1:3-6. Park Board to be named soon; Mayor Wadham says members will be chosen from officials of Exposition company.

(San Diego) Evening Tribune, June 28, 1911, 10:2. Program for carnival practically completed by 1915 Fair officials.

San Diego Sun, June 28, 1911, 1:1-2. Mayor Wadham stays with ship; to appoint new Park Board; Exposition directors will be made members.

San Diego Union, June 28, 1911, 4:1. EDITORIAL: End the Wretched Controversy . . . It is almost with a feeling of dismay that friends of San Diego must regard the revival of the recent controversy over the expenditure of the \$1,000,000 exposition bond issue. Only a few days ago the dispute as supposed to have been adjusted in a manner that was satisfactory and honorable to all. Then came a hitch. The park commissioners objected to certain action taken by the exposition directors, and tendered their resignations. But even then it seemed improbable that there would be a renewal of the deadlock. It was the common belief that new commissioners who would be in harmony with the exposition officials would be named at once, and that the great project would go forward without further friction. But those who took that hopeful view are keenly disappointed. The events of the past few days have caused the controversy again to become acute and the deadlock is renewed.

It appears needless now to repeat what was said in these columns very recently, about the necessity of sinking differences and working together. Nor should there be any occasion for again pointing out the tremendous stake which San Diego has in this affair. Every person who has given even hasty thought to the subject must recognize the fact that to abandon the exposition now would be a disaster without parallel in this city. It is a prospect that nobody who has San Diego's interests at heart can face without consternation. Nevertheless, it must be apparent to all that unless the present dispute can be adjusted and harmony restored, the exposition is not likely to be held, and in that event San Diego will present to the rest of the country the humiliating spectacle of a community making a fiasco of a great enterprise, and that, too, when success was easily obtainable --- the spectacle of a city deliberately stultifying itself and becoming a laughing stock, merely because some of the people had to quarrel over questions of ways and means. Such an outcome could be averted, and there ought to be enough common sense and enough public spirit in San Diego to spare this city as terrible a humiliation.

As when the first controversy arose, the **Union** believes now that an honorable adjustment of the trouble is practicable and not difficult. The first step is to sink personal differences --- to realize that, come what may, they must not be permitted to bring upon San Diego a disaster from which it would not recover for years.

But the settlement, compromise, or whatever it may be termed, should bring harmony. San Diego's friends must work together, if they expect to carry out this exposition project. For this reason, one must regret the talk about making an issue before the people at the polls. Such procedure would be deplorable. It would intensify the present bitterness. It would divide the city into two hostile camps. Whichever side won, harmonious action in future would be out of the question. Years ago San Diego had a bitter controversy over the question of water supply. It gave this city a setback from which it made a very slow recovery. The enmities then engendered survived for years and retarded the city's progress. It would be still more unfortunate should San Diego's plan for 1915, already financed and carried far forward toward success, serve to give to this city, not a great exposition, but a factional controversy.

In a recent issue this paper offered the suggestion that the entire dispute could be quickly and satisfactorily ended by the appointment of park commissioners who are exposition directors. Perhaps some better plan can be devised. But the all important point now is to discover some way by which the dispute may be ended before it does further damage. And it may be bluntly remarked that talk about "standing pat" and forcing the other side to "back down" and "going before the people," is the worst possible way of reaching an honorable adjustment. What is required now is not an issue that will leave a legacy of long controversy, but a settlement that will prevent this wretched dispute from going further.

There are people in the world who can endure adversity and brave hardships, but go to pieces when they gain success. If San Diego permits a squabble over these exposition bonds to defeat its great project for 1915, the verdict of the outside world will be that the people of this city could not stand success. And against that verdict there will be no appeal.

San Diego Union, June 28, 1911, 7:2. Dr. Dahne sends pleasing letter; Brazilian commissioner sure of success of Panama-California Exposition.

(San Diego Union) Evening Tribune, June 29, 1911, 1:5. Council confirms Park Board named by Mayor; Wadham says he has made complete surrender to Exposition committee.

San Diego Sun, June 29, 1911, 1:3-4. Mayor Wadham praises work of Braly, Harrison and Vogt; says they were sincere.

San Diego Sun, June 29, 1911, 1:9. Mayor may get out own recall papers.

San Diego Sun, June 29, 1911, 2:2-3. Wangenheim, Jones and Forward new Park Board dads.

San Diego Union, June 29, 1911, 9:1. Harmony is assured by new Park Board; Mayor appoints J. F. Forward, Jr., Julius Wangenheim and H. H. Jones; Olmsted's plans endorsed.

June 30, 1911, Marston File, Correspondence on location of Exposition, 1910-1914, San Diego Historical Society Research Archives: Letter _____ to Marston: Collier to talk to Olmsted about change of location.

San Diego Union, June 30, 1911, 4:1. EDITORIAL: Mayor Wadham's Public-Spirited Course.

San Diego Union, June 30, 1911, 5:1. Plans for street decorations adopted; beautiful designs by artist Kabierske of Pageant Corporation.

San Diego Union, June 30, 1911, 11:1. Wangenheim is to be head of new Park Board; retiring members thank mayor for support of their policy.

San Diego Union, July 2, 1911, III, 25:1. Playgrounds are open for summer.

July 3, 1911, Board of Park Commissioners: Julius Wangeheim and John F. Forward, Jr., who were appointed by Mayor Wadham, June 28, and confirmed by Common Council, June 29, present; Wangenheim appointed president and Forward secretary.

San Diego Union, July 4, 1911, II, 9:1. H. H. Jones, general manager of San Diego Consolidated Gas & Electric, third member of new Park Board, wants legal opinion; undecided whether he is eligible for office.

San Diego Union, July 4, 1911, II, 16:3. Park Board elected Wangenheim president yesterday afternoon.

July 5 and July 6, 1911, Marston File, Correspondence on Location of Exposition, 1910-1914 . . . Night Letters, Olmsted stressing disagreement with Collier regarding location of Exposition in city park.

San Diego Union, July 6, 1911, 10:1. Labor leaders want man on Park Board; C. W. Holmquist, painter and decorator, suggested if H. H. Jones declines to serve.

July 7, 1911, Marston File, Correspondence on location of Exposition, 1910-1914, San Diego Historical Society Research Archives: Letter Olmsted to Marston: more people live on south and southeast of park than west and north of it; southern site would bring in more receipts by gate admissions and concessions; Collier wants more space because he thinks Brazil and Latin American republics will build; Olmsted's plan does not cross the Spanish Canyon; Frank P. Allen says grading on the south side is too expensive; Olmsted's plan No. 3 leaves out all bridges; choice of middle site means City will have to vote another bond issue for the bridge and other expensive features; question of groundbreaking --- southern site or middle site?

I explained to him [Collier] that Mr. Goodhue's plan for the middle site was to a great extent such a plan as the students at the Ecole des Beaux Arts are accustomed to make on paper, with little or no reference to a rolling picturesque site. That sort of plan is largely the result of working on the drawing board, and while it has advantages from the aesthetic point-of-view, it is not acknowledged to be by all artists the most desirable way of working. Very much more interesting and picturesque results are often attained by working in careful adaptation to a rough, irregular site. I pointed this out to Colonel Collier and explained to him how very much more picturesque from many points of view and from among the buildings the group would be on the southern site.

I also pointed out that the middle site has great advantages in the way of beautiful surroundings, but that it is most assuredly far inferior to the southern site as regards a near and imposing view of the City and harbor. . . . I think no candid person could go to the spur south of the Spanish Canyon and about 1300 feet north of the High School and study the views from there without being impressed by the superiority of this site from the standpoint of advertising San Diego.

The Auditorium: Olmsted thinks it should be a large convention hall, not designed as "a great architectural monument."

Olmsted plans to eliminate expensive masonry, retaining walls, basins, stairways, terraces, balustrades, pergolas, etc. in Spanish Canyon and treat it with ordinary walls (walks?) and planting.

There are, of course, many arguments to be discussed bearing upon the question of site, but it should always be kept in mind that the weighty and conclusive argument against the middle site is solely that it would be the practical ruination of the park and that whatever advantage it may have, it would be in the nature of a breach of trust for the Park Commission to adopt such a site contrary to the carefully informed and absolutely settled opinion of their landscape advisor, and in the face of the fact that a plan has been worked out and carefully estimated for a site in the borders of the park which would result in an entirely successful exposition and one which would have more individuality and picturesque qualities, owing to the configuration of the ground, than is possible on the flat ground in the middle of the park.

San Diego Union, July 7, 1911, 7:1. Plan for large exposition in San Diego; members of new Park Commission met with Buildings and Grounds Committee of the Panama-California Exposition, July 6; J. F.

Dawson, member of firm of Olmsted Brothers was present; Acting Director General Sefton said: "It looks as though we are going to have at least a ten million dollar exposition in San Diego."

July 8, 1911, Board of Park Commissioners: On motion duly carried, the president and secretary were authorized to enter into an agreement between the Park Board and the Exposition Co. for the selection of a site for the Exposition and that all previous acts be rescinded; permits for shooting rabbits rescinded; bills from Panama-California Exposition Co., amounting to \$1,691.60, approved.

San Diego Union, July 8, 1911, 5:1. Famous band from Mexico coming here; 8th Battalion Musicians to take part in Exposition celebration; Governor Vega to speak; Lower California executive gives Exposition officials cordial reception.

San Diego Union, July 8, 1911, 8:1. Santa Fe promises train every hour; all railroads report prospects of enormous crowds coming here, July 19-22.

San Diego Union, July 9, 1911, 23:1. City enthusing as celebration draws near; arches are nearly completed; street decorating to begin this week..

San Diego Sun, July 10, 1911, 11:7-8. Facts support plan to sell part of park; report compiled by the Park Commission of City of Berkeley shows San Diego is burdened with park acres; sale of 400 acres of City Park would reduce taxes, purchase Southern California Water System, improve park.

San Diego Sun, July 10, 1911, 12:3-4. Many shows to hold forth on "Isthmus"; Wild West Show, Days of '49, Plantation Show, Oriental Dancers, Snake Show, "Insurrecto Village."

San Diego Union, July 10, 1911, 9:3. Plan making of City Beautiful; meeting called for tonight to discuss provisions for growth of San Diego.

San Diego Union, July 11, 1911, II, 9:1-3. Official count is thrown out and Miss Helene Richards made queen; vote was six to five; Slayton chose king by nine to two.

San Diego Union, July 11, 1911, II,10:1. San Diego Civic Association organized July 10; A. D. Robinson, president.

San Diego Union, July 11, 1911, II, 16:4. South half of park chosen as official site of Exposition; Buildings and Grounds Committee choose practically former location.

San Diego Sun, July 12, 1911, 1:6. Carnival queen mix up to get worse each day; Miss Georgia Eleanor Lee, defeated army and navy candidate.

San Diego Union, July 12, 1911, II, 9:2. President Taft sends Barrett to groundbreaking celebration here; Pan-American Union director is President's personal representative.

San Diego Union, July 12, 1911, 16:1. Program for queen of celebration arranged; Miss Lee's lawyer absent; Miss Helene Richards' women friends proceed; committee will off losing girl position of chief maid-of-honor.

San Diego Sun, July 13, 1911, 1:5-7, 2:4. Thousands coming for carnival; plan to take good care of them; headquarters information booth will be at Santa Fe Depot; reception committee of 100 men and a large committee of the Women's Auxiliary; eight restrooms among the streets for the women and children; 100 policemen trained in handling crowds; accommodations to be had in dwellings, rooming houses and hotels; physicians on duty; field hospitals in two automobiles; barrels of ice water along streets; estimate of 40,000 plus people to attend.

San Diego Sun, July 13, 1911, 7:1. No decision in fight over carnival queen; factions unable to agree on compromise.

San Diego Union, July 13, 1911, 12:1. Miss Lee's lawyer gets into fight over choice of queen; says it will be settled today or bitter lawsuit will follow.

San Diego Sun, July 14, 1911, 1:2. Wangenheim not anxious to talk of Exposition plans; new commission will not give preference to the stadium.

San Diego Sun, July 14, 1911, 1:8. Aviators to fly at North Island during carnival; Aero Club directors plan meet; northern men to appear.

San Diego Sun, July 14, 1911, 2:4-5. Injunction to make Miss Lee the queen; slander suits talked about.

San Diego Sun, July 14, 1911, 11:1-2. Was Russ school fire the work of an incendiary?

San Diego Union, July 14, 1911, 8:1. Panama-Pacific Exposition directors will attend local celebration.

July 15, 1911, Board of Park Commissioners: Superintendent Christopher estimated average monthly expense of maintaining park during the next six months as \$1,596.00.

San Diego Union, July 15, 1911, II, 11:1. Strollers witness robbery in park close to 7th street boulevard that extends through park; spooners flee in fright; 59 lovemaking pairs routed by police in search of highwayman

San Diego Union, July 15, 1911, 18:1. Origin of school fire is a mystery; Chief Almgren has not yet announced result of inquiry; insurance to amount to \$6,500 was carried on old building.

San Diego Union, July 16, 1911, 5:1-2. Rushing work of preparation for carnival; grandstand in front of new Spreckels theater.

San Diego Union, July 16, 1911, II, 9:5. President Taft arranges to open celebration; will press button installed in East Room of White House.

San Diego Union, July 16, 1911, III, 17:1. Miss Lee ill; has abandoned suit for queen of carnival; fire in Balboa Park causes auxiliary to choose new scene of coronation; site of throne scorched.

San Diego Sun, July 17, 1911, 1:1-2. San Diego ready for her guests.

San Diego Union, July 17, 1911, 16:1-2. Catholics prepare for impressive ceremony at celebration.

San Diego Sun, July 18, 1911, 1:6-8. Southland's great carnival to open in a blaze of glory.

San Diego Union, July 18, 1911, 4:1. EDITORIAL: The Exposition Groundbreaking.

San Diego Union, July 18, 1911, 5:1-2. Ringing of Mission bells will open Exposition carnival.

San Diego Union, July 18, 1911, 6:1. Coronation of queen to be held at court house.

San Diego Sun, July 19, 1911, 1:1. Pontifical mass brilliant spectacle; thousands see big carnival parade; Bishop Conaty's eloquent words heard by crowd; appeals to Californians to unite old missions with fine road; Barrett is guest; thousands gathered on sides of hills, see ceremony in park.

San Diego Sun, July 19, 1911, 1:2-5. Lighter side of big show.

San Diego Sun, July 19, 1911, 1:8. Big parade to be feature of afternoon; President Taft to start groundbreaking.

San Diego Sun, July 19, 1911, 4:1. EDITORIAL: Welcome . . . “Do your level best to send every visitor home wishing he was a San Diegan.”

San Diego Union, July 19, 1911, 1:6-7, 5:1-5, 7:2-3. John Barrett, President’s envoy here; praises San Diego, its celebration and great Exposition project.

San Diego Union, July 19, 1911, 4:1. EDITORIAL: The Exposition Guests.

San Diego Sun, July 20, 1911, 1:1-2. Floral parade best of entire carnival.

San Diego Sun, July 20, 1911, 9:1-2. King Cabrillo rules over all.

San Diego Sun, July 20, 1911, 11:2. Barrett breaks ground for great Exposition.

San Diego Union, July 20, 1911, 1:1-7, 3:2-4, 5:3, 8:1-6. Exposition ground broken amid pomp; many notables from other cities participate in impressive ceremonies.

San Diego Union, July 20, 1911, 3:2-3. Full text of address made by John Barrett at groundbreaking.

San Diego Union, July 20, 1911, 4:1. EDITORIAL: Groundbreaking and Carnival.

San Diego Union, July 20, 1911, 5:2-3. Exposition groundbreaking, July 19; Bishop Conaty conducts ceremonies before groundbreaking; Cabrillo’s caravel lands; full description of day’s exercises and ceremonies.

San Diego Union, July 20, 1911, 8:6. Mass concelebrated by four Franciscan priests from Santa Barbara and Los Angeles and 50 acolytes; Bishop Thomas James Conaty of the Diocese of Monterey and Los Angeles.

Bishop Conaty’s Prayer

God, we pray Thee, by these missions and the sacrifices of these padres, bless our beloved California, which as pioneers and missionaries they sanctified by their lives and make us worthy of our inheritance. Bless our state and bless our nation. Bless this city, the first-born of our cities to Christianity and civilization. Bless its people and all within its walls during these days of feast that all may bless Thee, O God, for all Thou hast done for our state and nation, that we may be true to the noble traditions of the Golden State.

California, beloved of us all, we reverently salute thee. Thy soil has been made sacred by these holy men and the monuments built by them are sacred. The purple haze of thy mother mountains, the gorgeous sunsets in thy sun-kissed sea, the golden harvests of thy fertile fields, the wealth of thy rich orchards, the beauty and fragrance of thy shrubs and flowers, the life-elixir of thy thousand springs --- thou art indeed blessed of God. The people happy and prosperous gladly acclaim thee the Golden State, and pray that God may always bless thee with a manhood and a womanhood worthy of thy gifts.

Around thee, like well-beloved children, the twenty-one missions gather today. They are indeed the precious jewels in thy golden crown. San Diego, the first-born, the child of struggle and pain, has the place of honor. We salute her as decked in her glorious array she welcomes all the nations for her Festal Day. Clothed in her mission robes, she rejoices with her mission daughters who proudly proclaim her queen mother of all the missions. May God bless her unto the fullness of success and prosperity. To her we may say with the royal Psalmist, “With thy comeliness and beauty, prosperously proceed and reign.”

San Diego Union, July 20, 1911, II, 9:1-7, 10:1-4. Thousands of revelers crowd streets; extreme gaiety succeeds dignified ceremonies of Exposition groundbreaking.

San Diego Union, July 20, 1911, II, 9:1-8. Description of water carnival; Morley Slayton was King Cabrillo; Helene Richards was Queen Ramona. . . . Queen was officially crowned in front of the courthouse by John Barrett, who, “in the name of the President of the United States and the officials of the exposition,”

placed the diadem upon the brow of the kneeling queen. . . . The presentation of King Cabrillo was the final event of the ceremony. Cabrillo disembarked at the Custom House Wharf; escorted queen and her retinue to Isthmus.

San Diego Union, July 20, 1911, 11:1. Henry T. Scott, director of Panama-Pacific Exposition, says great future is assured for San Diego.

San Diego Sun, July 21, 1911, 1:1-2. Thousands cheer as industrial pageant passes through streets.

San Diego Sun, July 21, 1911, 2:1-2. Historical pageant is credit to celebration; success of night parade due to Kabierske.

San Diego Union, July 21, 1911, 1:1-8. Floral and historical parades; gorgeous pageants; streets last night seething mass of merry revelers.

San Diego Union, July 21, 1911, 1:2-3, 5:3-4. Historical pageant beautiful spectacle; long line of floats picture history of city from founding down to present time.

Glitteringly beautiful and interest beyond expectation was the first night street pageant of the seven parades on San Diego's celebration program . . . the historical parade which emblematically portrayed a period of centuries from the days of the Aztecs to the present time.

Also, in the smallest detail, the pageant was historically correct and was another triumph for the designer of the floats, Henry Kabierske of Philadelphia, whose efforts have provided San Diego and her thousands of visitors with wonderful spectacles and will have its climax in the most notable work of his career when the Mission pageant is seen Saturday morning.

The history of California and San Diego passed slowly in review through the streets as the historical parade, with its more modern features of brass bands and fife, wended its way over the line of march, and the lover of the history of the red-blooded West was given many thrills as the picture of each succeeding epoch was presented.

History of City Recalled

Balboa, Montezuma, Cabrillo all meant little to the observer as compared with the scene of Father Junipero Serra planting the cross at San Diego and the raising of the flag at Old Town in the days when such sturdy characters as Kit Carson were making the great West. There was a feeling of native pride for these men and for the mighty gigantic Neptune, representing the Panama Canal, and an _____ of civic loyalty for the final picture in the pageant, "The Past and Future of San Diego."

Preceded by Grant Marshall Fey and a platoon of mounted police, the pageant moved up B street and on 12th and out 12th by H street promptly on time. Some weird figures followed the police, marchers wearing gigantic heads of wild animals and forming a bit of oddity and pleasantry, if not an intentionally historical setting for the first float, "The Aztec War God," which itself was of most hideous design, even if historically correct. The war god's sacrificial altar was one subject toward which the crowd did not shudder, as might have been the case had a volunteer victim appeared. Neil Eishenberger was the captain of the float.

Balboa Next On List

"Balboa Taking Possession of the Pacific" was the next float in line. The characters of the period of 1513 were Balboa, two Spanish captains, eight Spanish soldiers, ten Indians, two Spanish soldiers leading horses, in addition to the banner carrier in costume. The scene represented Vasco Nunez de Balboa, attired in leather surcoat and cape, trunks and hose and helmet, in the act of planting the standard of Spain in the surf of the Pacific ocean and proclaiming the sovereignty of the king of Spain. Four soldiers of the period with halberds and guns, and seven Indians in costume of their tribes and carrying lances, were grouped about Balboa in

attitudes of wonder and expectation. Back of the little party arose steep mountains covered with tropical foliage. H. M. Skinner was the float captain.

“The Downfall of Montezuma” presented a scene of the portico of Montezuma’s palace, the monarch of the Aztecs clad in red, white and purple, and crowned with gold and long plumes of brilliant color. Cortes, sword in hand, roughly dressed in the half mail of the Spanish conquistadors, stood by. Five Spanish soldiers and a group of six Indians of Montezuma’s court crowded back, surprised and in terror of the white men. . . . Cortes and his five Spanish soldiers. A dozen Indians and four Spanish soldiers accompanied the float which was captained by N. J. Doyle.

Cabrillo of the Carnival

“Cabrillo Receiving His Orders” may have had different orders or made some of his own, but it was a good Cabrillo float showing the palace of the Viceroy Mendoza, with Mendoza seated on the throne surrounded by courtiers and soldiers and handing the scroll to Cabrillo. The characters were five sailors accompanying Cabrillo, ten Spanish soldiers and two officers. W. E. Ross was captain of the float.

A beautiful and impressive float was the next representing “Planting the Cross at San Diego,” in which Father Junipero Serra appeared in front of the cross he had just placed, surrounded by soldiers, Franciscans and Indians. The scene was that of old San Diego, with Point Loma and a section of the bay in the background, and all around Serra and his followers were scattered the implements of a new camp and guns of the soldiers. The characters were five Spanish soldiers, ten Franciscans, ten Indians, an Indian squaw and papoose, and two monks for the horses. R. W. Nelson captained this float.

San Diego Mission

An indication of what may be expected in the Mission parade Saturday was seen when the San Diego mission float appeared in last night’s pageant. It was accompanied by character Franciscans and followed by marchers costumed as Indians, while Indian grooms attended the float. This float was the first built, following the plan carried out in building all the twenty-one mission floats in the order of the actual founding of the missions. John Hayes captained the float.

“Raising the Flag at Old Town” represented Captain Dupont with the American flag in front of a pole, while the accompanying characters were soldiers and sailors of the American army and navy. Mexican, Spanish and American settlers of that period --- 1844 --- and American scouts and trappers as grooms. Four Franciscans accompanied the float. T. Kutscher was float captain.

Neptune Float Gigantic

An enormous float was that of “Neptune,” representing the Panama canal opened to commerce. The gigantic figure of Neptune and the dainty mermaids on the opposite side of the canal, the fortifications with cannons peeping grimly from the walls, a battleship passing through the canal, and all this scene electrically lighted, presented a pretty picture. Ten sailors and a large number of marchers representing workmen of nearly every race, as are actually at work on the canal, accompanied the float, which was captained by J. I. Grantham.

One of the most beautiful floats in the pageant was that representing “Past and Future of San Diego” placed in the parade by John D. Spreckels. Miniature buildings on the float representing Old Town and other sections, San Diego Union’s building, new Spreckels theater, trolley lines, boats, etc., all brilliantly electrically lighted while high on the float three young women representing Prosperity, Progress and Peace.

The grooms were four boys in knickerbockers, representing the rising generation, and attendants of the float were five Franciscans, five sailors, mechanics, three Spanish soldiers, six Indians and a number of Spanish war veterans.

There was music galore in the pageant, the bands appearing being Moore’s of Los Angeles, the City Guard Band and the Eighth Battalion Mexican band from Ensenada.

A big feature was the YMCA Drum Corps, all of whom came in for loud applause all along the line of march.

San Diego Union, July 21, 1911, 2:2-5. Barrett guest of honor at banquet.

San Diego Union, July 21, 1911, 3:5. Queen Ramona and King Cabrillo to hold reception, greet subjects today.

San Diego Union, July 21, 1911, 10:2-3. Feats of aviators thrill spectators.

San Diego Union, July 21, 1911, II, 12:1. Governor Richard E. Sloan of Arizona delivers interesting address at groundbreaking; says Arizona will be represented at Fair.

San Diego Sun, July 22, 1911, 1:3-5, 3:3-4. Final pageant of great celebration is triumph of art.

San Diego Union, July 22, 1911, 1:1-8. Celebration Ball, notables attending; parade points promise of future.

San Diego Union, July 22, 1911, 5:1. Biplanes race and maneuver in air; fly over bay.

San Diego Union, July 22, 1911, 7:2-4. Eighth Battalion Band of Mexico makes immense hit.

San Diego Union, July 22, 1911, 10:2. Fiesta spirit reigns; city streets aglow with life and color.

San Diego Union, July 23, 1911, 1:1-8, 5:2-6, 6:1-5. Exposition carnival ends; Mission parade.

San Diego Union, July 23, 1911, 4:1. EDITORIAL: A Great Triumph for San Diego.

San Diego Sun, July 24, 1911, 12:3-4. Spreckels not likely to have competition; bids for 41-year street railway franchise will be opened next Monday; Spreckels has agreed to pay a two percent tax on gross earnings.

San Diego Union, July 24, 1911, 7:2-3. Barrett wires exposition endorsement to Champ Clark, speaker of Congress; expresses belief Panama-California Exposition resolution should pass.

San Diego Union, July 24, 1911, II, 9:1. Henry Kabierske says success of celebration is forecast for 1915 Fair.

San Diego Union, July 24, 1911, 14:1. 60,000 saw sights of Isthmus in four days it was open.

San Diego Union, July 25, 1911, 4:1. EDITORIAL: Taft Did Well By San Diego.

July 26, 1911. Marston File, Correspondence on Location of Exposition, 1910-1914 . . . Letter Marston to Olmsted: The Clark Braly regime was doleful and fearful. The fact that in three weeks Mr. Braly had given 23 permits for shooting rabbits in the park shows what he might have done if he kept in office for four years.

San Diego Union, July 26, 1911, 1:1. San Francisco Fair directors agree on locations for international show.

San Diego Union, July 26, 1911, 9:1-2. Members of Congress will recognize San Diego's Exposition.

San Diego Sun, July 27, 1911, 1:6. Mayor Wadham is back; gets back offer; Mayor refuses to tell what corporation wanted him to become attorney.

San Diego Union, July 27, 1911, 4:2. EDITORIAL: Both Expositions Should Be Supported.

San Diego Union, July 27, 1911, 5:4-5. Praise from all sides for great celebration.

San Diego Union, July 27, 1911, 10:3. House speaker Champ Clark will aid Exposition cause.

July 28, 1911, Marston File, Correspondence on Location of Exposition, 1910-1914 . . . Letter Olmsted to Dawson: Two Bridges Contemplated --- I have felt all along the danger to the park landscape of having the tops of these bridges so high as some of our plans have contemplated. It is a great deal better for the park landscape to keep them down, also it shortens the bridges and makes them less costly. The location of the Spanish bridge on the Date street entrance is very good . . . as it comes at the mouth of the Spanish canyon and tends to frame in the east side of Cabrillo canyon.

So far as possible to do so, I am in favor of keeping the plan decidedly informal north of the Spanish garden. The canyon makes an entirely adequate separation in grouping and design and I see no necessity for buildings north of the canyon to follow the formal grouping to the south of it. If they are distributed informally and with curving drives and walks in the main, whatever drives and walks are left after the Exposition are almost certain to be adapted to whatever planting and improvement can appropriately be carried out in this central portion of the park as a matter of park design.

San Diego Union, July 28, 1911, II, 11:2. Mayor Wadham denies he has any intention of resigning office; also refuses to discuss appointment of Park Commissioner.

San Diego Union, July 29, 1911, III, 13:1. Louis J. Wilde charges he was extradited north to face accusers through fear of an Exposition boycott.

San Diego Union, July 30, 1911, 5:3. Mayor Wadham to appoint F. J. Belcher, cashier of First National Bank, to Park Board; H. H. Jones not qualified because San Diego Consolidated Gas & Electric Co. has business relations with city.

San Diego Union, July 30, 1911, 7:2. Santa Fe Railroad gives \$41,666 subscription fund to Exposition.; trip to Chicago by Colonel Collier results in big boost for San Diego Fair.

San Diego Sun, July 31, 1911, 1:7-8. Spreckels pays \$60,000 for 41-year railway franchise.

San Diego Sun, July 31, 1911, 2:1. F. J. Belcher appointed to Park Board to succeed H. H. Jones.

GROUNDBREAKING CEREMONIES

July 19, 1911

10:00 am - Pontifical military mass conducted in Balboa Park

2:00 to 5:00 p.m. - Military and naval parade

3:00 p.m. - Groundbreaking ceremonies

8:30 p.m. - Landing of Cabrillo and march to Isthmus

July 20, 1911

10:00 am - Floral parade under auspices of Ladies Auxiliary Committee; decorated trucks and automobiles; floats representing Women's Christian Temperance Union, Equal Suffrage Movement; American Women's League.

2:00 to 5:00 p.m. - Athletic events, automobile racing, aquatic sports, four-day aviation meet at Coronado Polo Grounds; Lipton Yacht Cup races; sailing boat races in bay; San Diego Rowing Club; rowing, swimming and tub boat races.

8:30 p.m. - Historical pageant (Episodes I, I, etc.)

July 21, 1911

10:00 am - Industrial parade with fire department apparatus, the first horse-drawn cart ever used in San Diego in 1886; floats from Longshoremen's Union, the Moose, and Ladies of the Grand Army of the Republic.

2:00 to 5:00 p.m. - Motorboat races, Lipton Cup Yacht races off Coronado pier.

3:00 to 5:00 p.m. - Queen Ramona reception in Palm Room; receptions for visiting members of all fraternal clubs in their respective headquarters.

9:00 p.m. - Grand Masque Ball at U. S. Grant Hotel

July 22, 1911, Saturday

10:00 am - Mission Pageant

2:00 to 5:00 p.m. - California Yacht Association closed its first regatta in San Diego waters on the Coronado course.

8:00 p.m. - Street ball, night of carnival and revelry.

"Isthmus" was at D and Union Street, open every afternoon and night with 30 shows.

Historical Pageant

10 floats designed by Henry Kabierske

Episode I: Aztec priests sacrificing to their war god.

Episode II: Balboa taking possession of Pacific Ocean in the name of the King of Spain.

Episode III: The downfall of Montezuma and the triumph of Cortes.

Episode IV: Cabrillo receiving his orders from the Viceroy of Spain.

Episode V: Cabrillo's caravel.

Episode VI: Junipero Serra planting the cross at San Diego.

Episode VII: San Diego Mission.

Episode VIII: Raising the American flag at Old Town of San Diego.

Episode IX: The Panama Canal - Neptune at the wedding of the oceans.

Episode X: San Diego - Past, Present and Future

August, 1911, **The California Garden**. p. 6. . . . Is it because San Diego is a large body that it is apt to move slowly? In any event the fact that it does move slowly in some instances is the one here emphasized, and therefore in order to be in time for the fall planting **The California Garden** once more wished to advocate early planting of rose bushes, that is in late November and December. The reason being that the plants have time to get well established before making a top growth. Once again, also, it brings forward the proposition that every owner of a garden in San Diego should plant a dozen rose bushes each year until 1915, San Diego is not only justifying her claim to be a land of flowers and it is of some importance that she should do so by the time of the exposition. Allowing two thousand owners of gardens acting on this suggestion and fifty additional bushes to each, there would only be an increase of one hundred thousand in four years, a perfectly negligible quantity when we consider the area over which the planting would be spread and that one nurseryman near Los Angeles, among whose specialties the rose is only one of many, grows annually half a million bushes. It is not too much to say that the one thousand dollar Panama-California Rose Contest will and already has in a large measure caused the United States to expect a great thing in roses of San Diego.

California Garden begs to insist that the Exposition with its improved park will only emphasize the barrenness of the land unless private gardens keep step in the progress. It is not inferred that San Diego has not fine private gardens and many of them, but it is insisted that they are the exception and not the rule. Therefore, plan to plant more roses and if you have been drying off those you have, prepare to trim them and irrigate at the end of August. Remember to get the growth well started before applying fertilizer.

August, 1911, **The California Garden**, p. 7 . . . An Exposition Dream, by Alfred D. Robinson

And I fell asleep and dreamed, and in my dream I went forward instead of back. It was the year 1915 and I had returned to San Diego after an absence of four years. Much wandering in other lands had filled my

mind's eye with trees and grass as a familiar setting for every scene so that the browns and the grays of the mesas and hills seemed barren and lifeless. In the August evening I sat on the porch and my eyeballs ached with the strain of the hours and steady sunshine and my throat was dry with the dust of a rainless summer land. To my friend at my side, I voiced my disgust and he said, "Oh, you will soon feel all right. Wait till our great open spaces have set your spirit free and you can wallow in the sunshine like a horned toad. Come along with me and I will give you more immediate relief." We went out and boarding a street car quickly reached the gates of the Panama-California Exposition. Entering we headed for a band which seemed to be located at the end of a long avenue of *eucalyptus ficifolia*, whose blood-red blossoms flamed in the electric light. The trees helped to make my mood happier and better calculated to give just appreciation to the scene that opened before me as we passed through a generous portal and found the band surrounded by a vast throng. Where was I? Ten minutes earlier I had thirsted for green meadows and trees in a sun-baked land; now I had entered the garden of Eden. Palms and ferns and flowering plants and vines on all sides, sending out their delicate scents upon the night air to mingle with the odor of moist earth and recent rain, a draught as intoxicating as champagne. I opened my mouth and drew in a long breath with a sigh of supreme satisfaction, then turned to my friend with a look of almost stupid inquiry. He understood and said, "Let's get seats and I will explain."

We were in the largest lath house ever projected as a pleasure resort. Where the band played and we sat was a great central dome, 500 feet in diameter, arched over by a domed roof rising fifty feet in the air. Up its supporting columns ran choice vines, jasmynes of such sweet savor, begonias and tecomas of gaudy hue and the curious Dutchman's pipe. Palms from many lands and of many forms lined the borders and were in beds here and there while begonias and other foliage plants nestled at their feet. In the air hung the orchids with their strangely beautiful blossoms.

From this central court ran out six great arms or aisles and in each were gathered and growing in grateful harmony a great family of plants. There were thousands and thousands of varieties and each was plainly labeled. The lighting had been carefully planned so as not to strike the eye offensively and the whole effect was absolutely entrancing.

Shortly after the groundbreaking ceremony in 1911 it seemed desirable to the directors of the exposition company to at once start a work that would utilize to the most the climatic advantages of San Diego and be a unique feature and advertisement. Very little consideration conclusively showed that the lath house as an effective substitute for a glass house was a peculiarly Southern California institution; that it embodied the maximum of efficiency with the minimum of cost, and furthermore would increase in value year by year. Plants from small pots becoming very handsome and large specimens in four-year's growth under lath.

As a matter of course, opposition to the lath house project arose. Certain folks thought the outside would not look well, others feared the dampness from continually watering and growing vegetation might cause colds, and yet others regarded it as a possible mosquito breeder, but so strong a sentiment in its favor developed that this wonderful tropical garden was begun and was completed, and its building and growth was an abiding interest from its inception till the exposition opened when it easily took first place as an attraction.

When the music stopped for the evening, I wandered round the court and through the aisles. I filled my eyes with their colors and my nose with their odors and the grateful moisture laved my parched skin. I heaved a great sigh of gratitude and said, "Is it not strange there was not a thing like this in San Diego fifty years ago?"

San Diego Union, August 1, 1911, 5:5. Exposition plans to be public soon; two plans slightly different were submitted and approved and submitted to the final approval of the Olmsted Brothers; plans given to James F. Dawson.

San Diego Union, August 1, 1911, II, 9:2. Belcher named as Park Commissioner.

San Diego Union, August 2, 1911, 16:1-3. San Diegan wanted for Congress; Collier is proposed.

(San Diego) Evening Tribune, August 3, 1911, 6:1. Park Board to stop speeding in park; beginning Monday policeman will be stationed on roadways to enforce law regarding speeding autos.

(San Diego) Evening Tribune, August 4, 1911. EDITORIAL: Excellent Decision on Park of the Park Commissioners . . . No speeding of automobiles on the boulevards in Balboa Park in the future.

San Diego Sun, August 4, 1911, 5:4. How city got park: Edwin M. Capps quotes from Book One, Box 26, of records in the office of the city clerk.

Board of Park Commissioners, August 5, 1911. New trash cans; 25 new seats; aluminum tags for trees.

San Diego Union, August 5, 1911, 5:5. Will build storehouse in Balboa Park for Exposition floats.

San Diego Union, August 6, 1911, 17:1. Forward endorses Collier for congress.

San Diego Union, August 6, 1911, 17:2-3. William Clayton plans to restore Mission San Diego de Alcalá and use for teaching of agriculture; also to erect a cross in Presidio in honor of Father Serra.

U.S. Congress, House Committee on Industrial Arts and Expositions, Report no. 131, 62nd Cong., 1st sess., 7 August 1911 (Washington, D.C., GPO, 1912)

San Diego Union, August 7, 1911, 2:2-5. Site selected for Panama-Pacific Exposition in San Francisco admirable for big Fair.

San Diego Sun, August 8, 1911, 8:3. Collier to boost in entire south.

San Diego Union, August 8, 1911, II, 16:3. South enthuses over Collier idea; commercial clubs and boards of trade endorse Congress to be held at Memphis.

San Diego Sun, August 10, 1911, 1:7-8. Cops in city park get John S. Hawley, Jr., former cashier for the Bank of Commerce, for speeding.

Board of Park Commissioners, August 11, 1911. L. C. Masten and Geo. Burnham asked Board to present plans for opening of 6th Street through park; carried.

San Diego Union, August 11, 1911, II, 11:1. William F. Gracey, American consul to China, promises Exposition aid.

(San Diego) Evening Tribune, August 15, 1911, 1:3, 5:5. Art pottery to be made by San Diego plant; Joseph W. Sefton, Jr. erects a factory on University Avenue and A. R. Valentien, noted artist of famous Rockwood pottery, secured.

(San Diego) Evening Tribune, August 19, 1911, 1:3, 3:3. House of Representatives endorses San Diego Exposition; authorizes invitation to Latin nations.

San Diego Sun, August 19, 1911. 1:1-2, 3:2. House for Exposition resolution; passes measure 160 to 51, inviting Central and South America to send exhibits to San Diego; official recognition means much; Collier's success hailed with joy here; **Sun's** extra tells San Diegans good news.

San Diego Union, August 20, 1911, 1:6. House votes recognition to Fair at San Diego; authorizes President to invite southern republics to participate; ballot stands 166 to 66; Collier congratulated by legislators.

San Diego Union, August 20, 1911, 4:1. EDITORIAL: Collier Scores Again.

(San Diego) Evening Tribune, August 21, 1911, 6:1. Expect Collier to return September 1.

(San Diego) Evening Tribune, August 22, 1911, 12:2-3. Civic Association urges buying of playgrounds; public comfort station is to be threshed out before the Council.

San Diego Union, August 22, 1911, 16:1. Senate will not pass Exposition resolution at this session; Collier leaves for New York.

San Diego Union, August 23, 1911, 16:3. Mission floats are stored in Balboa Park.

(San Diego) Evening Tribune, August 24, 1911, 5:2. Collier is due in San Diego on Tuesday.

San Diego Sun, August 24, 1911, 3:3. Collier will be home on Tuesday.

(San Diego) Evening Tribune, August 25, 1911, 7:1. Collier to tour the south for 1915 Fair; will remain 10 days in San Diego before leaving.

San Diego Sun, August 25, 1911, 1:4. Laborer threatens C. A. Richardson, auditor of Exposition; had been employed at the tents at foot of D Street.

San Diego Sun, August 25, 1911, 1:7-8. Collier dinner planned; great crowd expected.

San Diego Sun, August 25, 1911, 4:7 Sunbeams: They have constructed four walls and a roof within which to store the mission floats which were used in the carnival parades.

San Diego Union, August 25, 1911, II, 11:3. Chamber of Commerce plans complimentary banquet in honor of Colonel Collier on his return from Washington, DC, next Tuesday.

(San Diego) Evening Tribune, August 26, 1911, 6:2. To welcome Colonel Collier.

(San Diego) Evening Tribune, August 26, 1911, 10:2. Plans for Exposition placed before Goodhue.

San Diego Union, August 26, 1911, 5:4. Collier reception arranged.

(San Diego) Evening Tribune, August 28, 1911, 5:4. Big crowd to welcome Collier.

(San Diego) Evening Tribune, August 28, 1911, 6:1. Plan to start work on Fair buildings soon.

San Diego Union, August 28, 1911, 16:1. Fortune Lanier of Hotel Lanier unfolds plans to make San Diego garden city of world; would invite nations to install horticultural and floricultural exhibits; San Diego to maintain garden permanently after close of Exposition; assign to each nation a plot of 10 to 50 acres; invite seed dealers to grow flower plots; have U.S. Government give a practical demonstration of its reclamation system; would include building a dam to supply the park with water.

San Diego Union, August 29, 1911, 5:1. Monster reception planned for Colonel Collier.

San Diego Sun, August 30, 1911, 1:1-2. Collier says not candidate; he won't run now; would rather serve city as Director-General of the Exposition.

San Diego Union, August 30, 1911, 8:1. M. R. Tarpey, former Lt. Governor of California, says people of entire state should aid both Fairs.

San Diego Union, August 30, 1911, II, 9:1-3, 16:2. Cheering throngs welcome Collier on triumphant return from capitol; vote 166 to 51 in House of Representatives.

(San Diego) Evening Tribune, August 31, 1911, 5:2-3. Estimates of size of Exposition increasing.

San Diego Union, August 31, 1911, 5:3. Secretary L. G. Monroe urged states to exhibit at Fair while attending convention of Western Association of Commercial Executives.

San Diego Union, August 31, 1911, 10:1. Collier says back Exposition and San Diego will be emblazoned on map.

September, 1911, **The California Garden**, p. 9. That Lath House . . . Shall We Not?

Last month Alfred D. Robinson had a dream about an exposition lath house of unique arrangement and generous proportion which was the chief attraction at the 1915 Panama-California Exposition, which according to this dream was then in the height of its glory.

The man who dreamed is this month communing with nature in the fastnesses of the Yosemite, but the dream seems to have struck such a popular chord that **The Garden** has been importuned on every side to see if this one dream at least cannot be made to "come true."

Some go so far as to say that this feature alone, if entered into with a right spirit by the exposition directors, would make the show worthwhile while, even if the visitors from the four corners of the earth had first paid their entrance fee to the great aggregation under the big tent at Frisco.

Many have painted their mental pictures in such lifelike colors that one could fairly hear the music of the band and smell the plants and flowers, here and there, catching a glimpse of the lath over which had crept the tinges of brown and green, gathered from the dews and the sunshine from without, and the damp earth and growing plants within, until the house and the plants, the music, the birds and the odor seemed to have been there from the beginning of things.

Of course there are objections. All admit the beauty of the conception, but it has never been done, and the idea of combining the lath house feature with the central auditorium hasn't a precedent.

The Eiffel tower and the Ferris Wheel were a little out of the ordinary in their day and some in San Diego say this lath house would be to the Panama-California Exposition what the Ferris Wheel was to the only and original World's Fair.

All other objections might be overcome, however, but what about the matter of getting the money to put it up? It might cost anywhere from \$10,000 to \$20,000, and spots have been picked out for practically all the Exposition's twenties, and then some, so we are told.

The question naturally arises, "Is it a good scheme to warrant cutting off a corner here and there in order to permit of its consummation? Many who haven't the spending of the money seem to think it is.

Naturally **The Garden** is prejudiced in favor of the lath house proposition and sees in it a most attractive exposition feature. At the same time it sees no obstacle in the way of the project too great to overcome.

Here are the opinions of a few of our citizens:

"Why not?" asks Joe Sefton, Jr., Acting Director-General.

"A lath house, that shall be a permanent and beautiful ornament to the park, and one of the great features of the Panama-California Exposition?"

"Why not?"

"It strikes the exposition company in a soft spot, this suggestion of Robinson's. There is no reason why such a lath house cannot be built. There is no reason why once being built, it cannot become one of the most striking and beautiful features of the whole exposition.

"The only objection to your 'dream' is that it is too small. Make the lath house just as large as architects and constructors will dare to build it with the light materials that must be used in its construction. If possible, make it conform to the general architectural appearance of the exposition. Fill it with the rarest plants, vines

and flowers that can be gathered together. Arrange it like our lath house now in the park with overhead pipes so that rain showers can be used when irrigation is needed. Such a house will always be warm enough to grow any species of plant life wanted for interior decoration. Make as many wings as will present a symmetrical whole, and when the exposition opens, light it as beautifully as possible; put, as you say, a band inside, arrange seats for spectators and properly and plainly label every plant in it.

“Such a house would be one of the most beautiful, instructive and enjoyable things at the exposition, and after the exposition, it could remain in the park for the delight of thousands for years to come.

“I am free to say that if the Floral Association wants to go ahead with the beautiful dream of Mr. Robinson, the exposition will cooperate in every possible way. Let it be, however, the exhibit of the San Diego Floral Association. Exposition engineers will prepare the plans for you and will assist you to carry out those plans when once you adopt them. It ought to be easy for the Floral Association to build, with this assistance, the finest lath house in the world. One that will make Henry E. Huntington’s lath house in his country place near Los Angeles look like a play house in comparison, and that is some lath house as Olmsted and Dawson will tell you.

“With all my heart, I am with you in this. Get busy on it and tell us how much ground you want for it, and how you want your plans drawn. You will see that the exposition will be only too glad to cooperate with you in every way, and to do everything possible to secure for this exposition, as you say, a feature that neither San Francisco nor any other city can possibly create.

“Such a lath house as this might cost anywhere from \$10,000 to \$20,000. It would have to be painted and built in a more finished manner than the ordinary lath house. After the exposition it can be dedicated to the city and kept by the park commission.

“I will say for the exposition and for myself that the idea is one that we will be glad to support to the limit, if the Floral Association will organize the project and assume the responsibility and credit for it.”

Mr. Olmsted Considers Necessary Appropriations Only Obstacle

Brookline, Mass., 1st Sept. 1911

I have been much interested in the article in your August number suggesting a large lath house as a feature for the Panama-California Exposition. We have had the matter under contemplation, but as yet have not secured an appropriation.

At present it seems unlikely that a sufficiently large appropriation can be set aside for this purpose to accomplish such a large and elaborate structure as that described in the above mentioned article. If this should prove to be the case, it seems to me it would probably be better to plan a less formal or more picturesque structure. If the lath house could be located at the head of one of the ravines, it would be appropriate to adopt an irregular plan with units of different sizes and shapes and on different levels, in part covering the ravine so as to provide opportunity for rustic stone dams, pools and picturesque rock work, and crooked paths on the side slopes of the ravine in addition to a reasonable amount of comparatively smooth level ground nearby for the sorts of plants which can be more appropriately grown on such ground

It would certainly be most desirable to have as large a lath house as possible, with as complete and interesting a collection of plants suitable for it as the finances of the Exposition and Park will permit.

Yours truly,

John C. Olmsted

Mr. Gill Sees Wonderful Possibilities in Exposition Lath House

Mr. Irving J. Gill, Architect: Not only is the proposition feasible, but it contains wonderful possibilities. A mammoth lath house covering 30,000 square feet, beautifully laid out and worked out on practical lines, would be the grandest thing of its kind in the world. There is nothing like it and it would be wonderfully popular. It would serve to satisfy a longing for the beautiful, the quiet and the refined and at the same time furnish amusement and good clean enjoyment. If San Diego cannot get away from the commonplace and rise above the gaudy and racy midways of the past, it will be a great disappointment. The glory of this lath house will be its atmosphere of refinement, its coloring and its coziness, with clean popular refined amusement, amid beautiful surroundings. It could be made the greatest attraction the fair would have. Mr. Robinson's dream should set others to thinking, until it evolves into something real and tangible.

Mr. Howard of Howard & Smith, Los Angeles: It would made a most attractive feature of the exposition and would demonstrate better than anything else, the possibilities of plant growth in Southern California.

Mr. Marston: The suggestion is both interesting and valuable.

The Union friendly to Exposition Garden, by Fortune Lanier In Monday's issue, August 28th, the **San Diego Union** published an article unfolding plans to make San Diego the Garden City of the World.

Alfred D. Robinson, president of the Floral Association and president of the Civic Improvement League, being absent from the city on an extended tour through the Yosemite Valley and feeling that now was a propitious time to inaugurate this movement of making San Diego the Garden City of the World, before San Francisco or Los Angeles had appropriated Mr. Robinson's ideas, I laid the matter before Mr. McMullen, editor of the **San Diego Union**, who thought so favorable of the plans, he assured the writer that his paper would be more than pleased to exploit the movement before the general public.

In an interview with the reporter, it was suggested that Mr. Robinson's dream, published in the August issue of **California Garden**, be published entire, which, no doubt, will be done at a later day.

The idea of inviting the principal seed dealers of the United States to grow flowers, shrubs, etc., as an advertising feature, was discussed before his departure. The entire membership of the San Diego Floral Association, I feel, is back of this movement and since Mr. McMullen, editor of our leading newspaper, has taken kindly to the idea, we can anticipate success.

Mr. O. W. Howard of Howard & Smith, floriculturists and landscape gardeners of Los Angeles, said that an international world-wide floricultural and horticultural exhibit would be the most unique proposition ever placed before any country. No exposition in any land has ever attempted to hold a world-wide flora and fauna exhibit, because no section is so climatically situated and adapted to do so successfully. San Diego has the climate and the adaptability and the SPOT (Balboa Park) to produce such a panorama. It would attract floriculturists, horticulturists, agriculturists, and all other "Tourists."

Board of Park Commissioners, September 1, 1911. Motion that the action of this Board heretofore locating the Exposition site in the south portion of Balboa Park be changed, and the same is hereby changed to what is known as the Central site thereon; carried; motion that it be the sense of this Board that Palms be planted in the Palm Canyon on each side of the proposed bridge at Laurel Street.

September 1, 1911, George W. Marston Papers, Collection 219, Box 2, File 25 - Panama-California Exposition - Buildings and Grounds. Night Letter, J. C. Olmsted to G. W. Marston, September 1, 1911.

Your telegram date September first stating that the officials of the exposition have changed the site to the central portion of the park received. We regret that our professional responsibility as park designers will not permit us to assist in ruining Balboa Park. We therefore tender our resignation to take place at once. We have wired Blossom to do no more work on the exposition or park plan and for him to leave San Diego at once.

(San Diego) Evening Tribune, September 2, 1911, 4:1. EDITORIAL: San Diego Exposition Ideas Are Finding Favor.

San Diego Union, September 2, 1911, 10:3. Tentative plans for Fair site accepted yesterday at a meeting of the buildings and grounds committee with Director of Works Allen; grounds will be larger than area originally proposed; plans were submitted to the city park commission for approval; they will be forwarded to Bertram Goodhue, official architect of the exposition, for his final commendation.

San Diego Union, September 3 1911, 16:3. Exposition officials change site of Fair at meeting of buildings and grounds committee, August 31; choose higher ground; new site is on central mesa and 165 acres will be devoted to buildings; main approach will be a bridge across Cabrillo Canyon; especially constructed trolley lines will make easy access to grounds; Bertram G. Goodhue, architect from New York, will arrive this week.

September 6, 1911. Marston File, Correspondence on Location of Exposition, 1910-1914, San Diego Historical Society Research Archives. Olmsted to Blossom regarding Sixth Street connection from Juniper to Date Streets.

San Diego Sun, September 6, 1911, 3:3. Exposition men decide on site plans; exhibits to cover 145 acres; total area is 350 acres; botanical garden will cover 600 square feet.

San Diego Sun, September 6, 1911, 3:4. Sunbeams: Charlie Collier wore dress suit while on his eastern trip boosting the 1915 Exposition.

San Diego Union, September 6, 1911, 7:1-7. Magnificent Exposition site laid out; extended to meet requirements; embraces 167 instead of 37 acres; foundations alone to cover are of 147 acres, exclusive of large outdoor exhibits; architect Bertram Goodhue and his assistant, Carleton Winslow, arrived in San Diego yesterday. . . . Collier said he had received promises of participation from southern states and Brazil. . . . All the grading, street and roadwork will be so arranged that there will be a system of roads and streets, with ornamental centers, lined and surrounded with groves of trees and flowering bushes, the erstwhile foundation spaces being sodded with bluegrass.

San Diego Union, September 8, 1911, 4:4-5. Letter, Charles Cristadoro: Our Most Important Exhibit.

San Diego Union, September 11, 1911, II, 9:2. Alan Polok made controller of Fair; former San Diegan places in charge of all employees and disbursements.

San Diego Sun, September 13, 1911, 1:1-2. Plan to wipe out pretty canyon to extend 6th Street from Fir to Juniper for electric line brings protests from property owners and others.

A plan to extend Sixth street from Fir to Juniper, up through one of the prettiest canyons in the city park, has brought forth a strenuous protest from property owners on Fifth street, and many others interested in the welfare of the park.

The plan to extend the street through the canyon is said to be a part of the new exposition program, and is being done in order to run an electric line to the exposition grounds. The property owners object for the reason that the new roadway will completely obliterate one of the prettiest canyon spots anywhere near the business district, and they declare it is unnecessary, as there are two parallel streets, not over 200 feet from the proposed railway.

"The new road will prove an immense expense," said one of the property owners interested today. "It will wipe out years of work in beautifying this spot, and mean cutting down many beautiful trees and shrubs."

It has been suggested that a road connecting Sixth street with the oiled road in the park be constructed at Fir streets as a compromise thus doing away with the proposed canyon road.

President Wangenheim of the park board said this morning that no decision has been reached in regard to the road, but that a public hearing would be given all interested, before any decision is reached.

San Diego Sun, September 13, 1911, 1:7-8. Advocates of Capps' plan say improve the port and then talk about parks and pretty things.

San Diego Union, September 24, 1911, III, 17:1. Alabamans greet Collier and Dawe.

(San Diego) Evening Tribune, September 25, 1911, 5:1-5. Frank P. Allen completes plans for 1915 Exposition.

San Diego Sun, September 25, 1911, 1:1-8. Drawing of new Exposition plans.

San Diego Sun, September 25, 1911, 1:4-5, 10:3. New Exposition Plans Shown in Detail.

Frank P. Allen, Jr., director of works of the Panama-California exposition, has finished plans for the exposition to be built in Balboa Park. The following description is written by one of the exposition officials.

These plans comprehend one of the most beautiful architectural compositions ever devised, a California landscape filled with examples of Spanish-colonial architecture designed by Bertram G. Goodhue, the highest authority in the world of architecture on this style of building.

Vista succeeds vista, and architectural focus succeeds architectural focus throughout the entire plan. There is no one point in all the grounds where every feature of the landscape or architecture will strike the eye to obliterate with one impression all the beauties of detail contained in the composition. Like the scenes along a wooded road or on a canyon path, new beauties unfold with each turning and the progress from one beauty to another is filled with pictures that delight the eye and elevate the mind.

Entrance to the exposition is gained by a high and long bridge. From this bridge the general skyline feature of the grouping is shown. At the end of the bridge is a widened space flanked with the Art and the California Buildings, the space divided from the Prado ahead by a series of arches that define the composition. On the left, the Art building, while dimly in front, screened from a more intimate examination, is the Prado which leads to the Plaza Mayor, or central court of the group.

From the center of this the eye of the visitor will take in the broad facade of the Government building on the left, the Electrical building, the continuation of the Prado, and the Foreign Liberal Arts Building in front, and to the right, a series of fountains, formal gardens, and parked street that leads out to the foreign, state and county group, a vista of trees, running brooks and grass and architecture through trees.

Turning, the Machinery building and the Mining building close up the Prado from which he has just entered and he has his choice of three routes, each one visible and each one promising beauties of its own. If the visitor goes straight ahead, he traverses another Prado, or parked street, until he comes to a street that turns him to the left to the Botanical Building, a lath house such as has never been built before, a lath house without dampness and without visible supports, filled with the rarest plants in the world and surrounded with a garden such as the hanging gardens of Babylon must have been, as beautiful as horticultural art and architectural ingenuity can make it. The approach to this building is through a Persian garden with a small still pond filled with lilies, lotus and flowering water plants, lined with rare trees, shrubs and flowers, a fitting introduction to the wonders of the lath house. Back of this again and surrounding it are the gardens and horticultural displays, all formal and all in a setting of trees, the rarest and most beautiful than can be made to grow in this climate, which is saying a good deal.

On the right of the Prado will be the Domestic and Liberal Arts buildings with the same settings, trees and vines and flowers. Straight ahead on the main axis will be the Plaza de Balboa, with the statue of Balboa, and the east entrance a little farther along. To the left of this is the Isthmus, "El Rodeo," where the shows and concessions will be.

If when in the Plaza Mayor, the visitor shall elect to turn to the right and follow the vista toward the fountains, he will see as he passes down the secondary axis a formal garden or parkway through the trees, of which he will catch glimpses of distance, filled with palms planted in the canyon his right, and the hills and buildings of the city across the deep canyon further away. On the left, he will catch a glimpse of Laguna Alta, or upper lake, which stretches an arm almost to the Peru building, located on the left of this street. Straight ahead will be the cascades and the broad central court of the Plaza de las Republicas, through the trees of which will rise the broad facade of the Brazil building directly in front, a huge fountain and pools on either side of the center in the foreground.

Here will be presented one of the most imposing architectural compositions of the exposition, the huge Brazil building, the beautiful San Diego building on the left, the Argentina building, which he has just passed, on his right, and the foreign state building he has just passed on his left. Between these buildings will be the vistas of water and trees and on the right will be another vista leading further to the state building section, which he cannot see, but which is divined from the formal street and ornamental walks that lead away from the Plaza. Walking down this he comes first to a point where he may look back toward the first group of buildings across the canyon to the right, and as he rounds the curve of the street, he comes into a preliminary court made by the shoulder of the Mexico building, a foreign state building and the New Mexico building. As he passes through this preliminary court, he debauches into a more formal triangular court formed by the Mexico, New Mexico and Arizona buildings, in which he will find a garden typical of the great southwest, flanked by the buildings of the states of that territory, the whole forming a composition of its own, from which the street leads him further to the widened area where the facade of the Texas building strikes him with one architectural blow, as it were. Around this building, the vista leads him, the right side of the curve

filled with county buildings and vistas, all arranged so that he walks from one formal setting to another, until he comes out on the bridge or dam of Laguna Alta, from which he gains another entrancing view of the buildings and gardens which line the shores of this bit of water on either side. Crossing the bridge, he comes to the south entrance to the grounds, though he may continue around the side of the lake through the children's playgrounds and along the forested sides of the promontory to the Balboa statue at the east entrance.

Practically every building in all these groups will contain a central patio. Practically every building will be covered with flowering plants and vines. Every court will be a formal garden modeled after some famous botanical garden and containing not simply plants and flowers grown for ornamentation, but valuable and beautiful plants entered in competition by the great nursery firms of the world.

There will be an absence of the hurly-burly of the main street of the ordinary exposition, the plazas are so screened with trees and the prados so arranged that at no time will it appear that there is a huge crowd on the street.

The site is not isolated from the city, as was that of the Alaska-Yukon, the Louisiana Purchase, or the Columbian expositions. One may walk from the waterfront in San Diego to the center of the exposition without fatigue. It is accessible from all sides and really in the heart of the city of San Diego. Approaching it one gets the impression of entering a medieval town, with its low buildings and general architectural features masked in front, the towers and domes of cathedrals and palaces rising above to tempt a journey of discovery, and the details of architectural beauty satisfying upon closer examination.

San Diego Sun, September 26, 1911, 1:7-8. Harbor election is called for November 14.

San Diego Union, September 26, 1911, 18:2. Collier and Dawe now in Alabama.

San Diego Union, September 27, 1911, II, 2:2-3. Zoo planned for 1915 Exposition; garden to contain specimens of American birds and animals; Sefton and Spalding promoting idea of building a zoological garden and aviary on one of the canyon sites.

San Diego Union, September 27, 1911, 18:3. Arizonans latch out for Exposition boosters.

San Diego Union, September 28, 1911, 8:2. Collier is still making friends; now at New Orleans.

San Diego Union, September 28, 1911, 10:1. Goodhue's arrival means start of Exposition building; Allen's ground plans finished and ready for consulting architect's eye; work begins November 1; California Building, a huge structure of domes with central tower; plans and estimates for Administration and California Buildings "are well under way."

(San Diego) Evening Tribune, September 29, 1911, 7:1. Goodhue plans an artistic triumph.

October, 1911. **The California Garden**, p. 3. The Lath House - the Park - the Show. . . . Some of our readers are asking "Are we going to have that lath house in the park?" The exposition officials all say "it's a fine thing" and the Park Board says "go ahead with it." Then we are asked "Where are the funds going to come from to build it?" **The Garden** suggests cutting out one of the other buildings if necessary. We are told that our "Mission City" is to be something different than anything ever attempted before, but when we read down the list of buildings we are forced to remark "same old thing." Even our mission style of architecture is to be imitated by poor old Frisco --- the city that follows the bellwether. Why not cut out our liberal arts building or some other such chestnut which has not place in an exhibition such as we have planned and build that lath house. Firstly, we can build three lath houses for what one of those temporary buildings will cost, and then it will be a permanent improvement in the park. Build it mission style, if necessary to harmonize with the general scheme, with its arches and towers, its patio and its campanile. And in the patio, by the fountain of our Mission Fathers, not such a version, however, as the former park board had the nerve to perpetrate on the Old Town Plaza, sweet music will be played, and possibly in one of the ells, separated from the onlookers by a wire netting, gay-colored parrots will flit amongst the palms and

banana trees as they were wont to do of old, and monkeys and other denizens of the tropics will chatter and caper amongst tropical plants.

Perhaps if fewer mistakes were made, more money could be saved. When we view the dozens of palms in the park nursery trying to recover from the ordeal of having been removed at the wrong time of the year, we are surprised to read in the newspapers that thousands of palms are to be transplanted at this late date. When we read that Olmsted resigns after spending a year's work and thousands of dollars in laying out and working out the plans for the exposition, a man whom we were told was an eminent authority on landscape art, and to think that he resigns because he did not want to be dictated to by those whom he had a right to consider his inferiors in landscape architecture, it makes us feel as though enough money had been wasted to build two lath houses.

Some of the members of the Floral Association have made excellent suggestions which are to be carried out -- that of the seed farms by prominent seed firms to display the fruit of their product --- that of offering a \$1,000 prize for a rose to be called "San Diego" --- that of having model "Little Landers" farms showing how a living can be made on an acre of ground in San Diego and last but not least the Lath House. By all means let us have them all. **The Garden** also hopes to be able to report another feather for the Association's cap by its next issue. A surprise that seems to be near consummation.

October, 1911, **The California Garden**, p. 9. Once More the Lath House

No apology is made for again taking a modicum of the limited and valuable space of **The Garden** to discuss further the Lath House question for the park, in connection with the exposition, if the exposition so pleases, but for the park anyway. Public sentiment seems overwhelmingly in favor of this idea and, therefore, it should be carried out, for is not the Park, the people's; are not the people paying for the million of park improvement funds, and are not the Park Commissioners the servants of the people? The press has stated that the lath house is to be one of the features of the Exposition but **The Garden** would be glad to see the Park Commission express itself, for it fears that the Exposition might want to put the house on wheels so as to be able to move it around with the changes in site for the Exposition. In any event, this lath house proposition is up to the Park Commission as something for the city of today, tomorrow and twenty years hence. The Exposition is an incident in its lifetime. **The Garden** must also insist upon the combination of a lath house for plants and to serve as an auditorium. In this combination lies the unique feature of the suggestion. Southern California has many more lath houses than glass houses. San Diego builds one almost every day, so that just a lath house full of plants is a mere repetition, even if on a big scale. Then the word has floated around that this lath house is to be occupied only by the rarest specimens. **The Garden** ventures to take issue with this idea. It believes that it should be largely occupied by plants that everyone knows, only grown to their best; a demonstration of the superior conditions pertaining in San Diego, inviting comparison. How is the multitude to draw comparisons with rare exotics to which they are strangers?

Another suggestion has been made that the San Diego Floral Association build this lath house for the Exposition as its exhibit and that after 1915 the Exposition give it to the Park. The Floral Association has always dreamed of owning a lath house and ever sees its dream coming nearer realization so it feels that it has to be a little selfish and conserve its energies for its own use first. Moreover, its members are taxpayers and subscribers to Exposition stock and, as such, they say to both Park and Exposition Boards, "build a lath houses in the park." A certain Park Commissioner encourages the Floral Association to believe that the Lath House idea appeals to his imagination and he is of such a caliber that if he be convinced of its desirability, San Diego will have that lath house in its park.

August, 1911. **The California Garden**. Mr. Olmsted's Resignation and "Next" . . . All true lovers of our Park and well-wishers for its development must join with **California Garden** in its deep regret at the resignation of the Olmsted Brothers as the landscape architects for the park in connection with the exposition for 1915. It would be useless and probably unwise to attempt to do more than express this regret, but we may and must inquire, "What now?" Again, the **Garden** prays, let a suitable man be found to act as superintendent of our park, and having found such a one, keep him. A certain policy of compromise and makeshift has crept into all public work in San Diego and it ought to be getting sick of highways that revert to cow trails and park plans that won't stay fixed overnight. Those who knew the late George Cooke can

now, in a measure, appreciate what was the loss to San Diego when he went on. He knew the park and loved it as no stranger can and therein lies the danger. Where shall a man be found who will make the park his first care in these days of conflicting interests?

San Diego Union, September 30, 1911, 7:1. Florida welcomes Collier and Dawe.

San Diego Union, October 1, 1911, 5:1. Lagoon is planned for Balboa Park fish exhibit; government expert here to investigate possibilities for exhibit of ocean denizens.

San Diego Union, October I, 1911, II, 9:2-3. Polytechnic High School buildings will present handsome appearance (drawing).

San Diego Union, October 1, 1911, 17:3. Architects finish plan for Administration Building; drawing (names of architects not given).

(San Diego) Tribune, October 2, 1911, 3:2. At the annual meeting of the San Diego Architectural Association tonight, Irving Gill expects to be relieved of the secretary-ship. He stated today that the duties take up too much of his time; president W. S. Hebbard, vice-president S. G. Kennedy and treasurer Charles Quayle are expected to be re-elected.

San Diego Union, October 3, 1911, 16:5-7. Little Landers' manager makes suggestion for San Diego Fair.

San Diego Sun, October 6, 1911, 1:4. Work on Administration Building to be started in a few weeks; appeal will be made to subscribers to pay up so work can be carried out as planned. . . . The company announces that the site had been decided upon, many palms planted, and that grading will be started in the near future. An appeal has been made to subscribers to pay up, that the work can be carried out as planned.

San Diego Union, October 6, 1911, 8:2. Collier's tour to end tomorrow; visited 32 southern cities on trip.

San Diego Union, October 7, 1911, 5:1. Dr. Edgar L. Hewett says Exposition should advance science.

San Diego Sun, October 9, 1911, 2:3. Colonel Collier, J. W. Sefton, Jr., S. C. Payson and Victor Wankowski are at Memphis, Tenn. Today at the opening of the All-South conference called by the Southern Commercial Congress and the Panama-California Exposition to divert travel through the south; Collier has just finished a trip of 40 days during which he visited every city of the south between El Paso, Texas, and Raleigh, North Carolina.

San Diego Sun, October 10, 1911, 2:5. With Collier in the Southland.

San Diego Union, October 12, 1911, III, 13:4. Typical Gold Camp feature for Fair.

San Diego Union, October 13, 1911, 5:2. Washington, DC, pleased with Colonel Collier.

San Diego Union, October 13, 1911, 9:4. Colonel Collier now in Chicago.

(San Diego) Evening Tribune, October 14, 1911, 6:4. Counter plans for harbor to be offered; San Diego Civic Association not opposed to municipal ownership but insists on docks south of D Street.

San Diego Union, October 15, 1911, 1:7, 3:4. President Taft breaks ground at San Francisco for Exposition.

San Diego Union, October 15, 1911, 9:1, 10:2-4. John Nolen talks of "City Beautiful."

San Diego Union, October 15, 1911, III, 17:1. Sefton says entire south is for Exposition.

(San Diego) Evening Tribune, October 16, 1911, 9:2-3. J. H. Russell scores Civic Association.

San Diego Union, October 16, 1911, 15:1. Fletcher says San Diego was ignored at San Francisco celebration; only one guest from here got seat at banquet, he bought it; California voted \$5 million to help San Francisco Fair.

San Diego Union, October 18, 1911, 3:4. Davidson returns from trip north; says he was treated well by San Franciscans; cannot speak for others.

San Diego Union, October 18, 1911, 18:1. One-acre farms to be feature of Exposition; Little Landers will show how family can live by cultivating the soil.

San Diego Sun, October 20, 1911, 1:8. Capps says Nolen plan is illegal.

San Diego Sun, October 20, 1911, 11:2. La Jolla to improve its park grounds.

(San Diego) Evening Tribune, October 21, 1911, 5:1. Curtiss school on North Island to be reopened.

(San Diego) Evening Tribune, October 21, 1911, 5:2. Mission Cliff park praised.

San Diego Union, October 22, 1911, 5:2. Chrysanthemums in full bloom at Mission Cliff Park.

(San Diego) Evening Tribune, October 23, 1911, 3:3. Landscape architect Beers of Bar Harbor, Me. And Professor Bernhart of Los Angeles enthuse over work in park; spent forenoon in park nursery.

San Diego Sun, October 25, 1911, 1:3. Capps say substitute plan for harbor is absurd.

(San Diego) Evening Tribune, October 26, 1911, 6:2-3. Work on first Exposition building ordered.

San Diego Sun, October 26, 1911, 11:4. Buildings and Grounds Committee instructed Frank P. Allen to begin work on the Administration Building immediately; Allen says building will be done by April 10.

San Diego Union, October 26, 1911, 7:1. Little Landers to have model acre at Exposition.

San Diego Union, October 26, 1911, 9:1. Buildings and Grounds Committee give Frank P. Allen's ground plans formal endorsement; work on grading for Laurel St. viaduct and Administration Building to commence immediately.

San Diego Union, October 26, 1911, 9:2-4. B. P. Beers, landscape artist from Bangor, Me., declares revised plans for exposition are worthy of any architect in the country.

Board of Park Commissioners, October 27, 1911. Ordered that road by High School be changed as per plans submitted.

(San Diego) Evening Tribune, October 27, 1911, 4:1. EDITORIAL: Civic Association Not Benefiting by Action of Leaders.

San Diego Union, October 27, 1911, 4:1. EDITORIAL: The Specter of the Nolen Plan.

San Diego Union, October 28, 1911, 3:1. Frank P. Allen's plans for exposition site are approved; Board of Directors and City Park Commission met yesterday; calls for an exposition 50 percent larger than first proposed and permits of unlimited expansion.

San Diego Sun, October 30, 1911, 6:4. A colored, bird's-eye view of the city and the Exposition grounds with the proposed buildings, the lake and the bridges, about 20 inches long and 10 inches wide, is being issued by the Exposition company; L.G. Coop is handling the sale.

San Diego Union, October 31, 1911, 7:1. Members of Civic Association may reverse Director's action.

November, 1911, **The California Garden**, pp. 5-6. Exposition Lath House Assured, by Winfield Hogaboom, Publicity Department. . . . The board of directors of the Panama-California Exposition have ordered Director of Works Allen to begin construction of the administration buildings in Balboa Park and actual construction was started Monday, November 6.

At the same time the board approved the general plans for the exposition as prepared by Director of Works Frank P. Allen, Jr. and discarded for all time the inadequate and expensive Olmsted plan that provided for the site in the southern end of Balboa Park.

There were many reasons that brought this action about.

In the first place the activity of Director-General D. C. Collier resulted in an increase in the scope of the exposition by about fifty percent.. The Olmsted plan called for about 35 acres of foundations. When the buildings and grounds committee called for a report on the applications for space, it was found that 145 acres will be required for foundations alone. To build an exposition on the southern site under the Olmsted plans to embrace the features actually offered the management would have been impossible and the board thereupon adopted the more central site where there is plenty of room and where the one item of grading and excavating dropped from a total of 130,000 yards to less than 70,000 yards.

One of the first things that awakened the board to the need for more room was the proposal of the San Diego Floral Association that a lath house be constructed in the park that should be a monumental structure of its kind and one filled with such material that it should be famous the world over. **California Garden** first published the details of this plan and the idea met instant favor from the exposition management. The matter of funds naturally is the most serious side of the whole thing; but plans were prepared for the lath house as if the funds already were provided.

California Garden estimated the lath house would cost maybe on the outside \$10,000. Here is what happened. The lath house idea developed and attracted so much attention that from it grew the determination to make at the Panama-California Exposition a horticultural feature that has never been equaled at any exposition in the world. The lath house, from being the central thing, became part of a big feature. As planned now this lath house is to be no less than 600 feet square. It is to be 100 feet high, if it is possible for the constructors to design and construct a lath house that high. It will be filled, not only with ordinary plants and vines of this state, but with the rarest and most beautiful plans that can be obtained from the seed and nurserymen of the world.

In front and leading to it will be a Persian garden with a shallow lake, warmed and filled with Victoria Regias, lotus, lilies and surrounded by all the rare water plans possible to grow. Around the lath house will be lawn, shrubs and trees. Back of it another plantation, at least ten acres in extent, laid out in formal gardens in which the exhibitors of plants and trees of the world will be invited to show their wares. From the nursery and lath house will be supplied hundreds and thousands of vines and plants for decoration of the buildings of the exposition. In the lath house during the Exposition will be band concerts by the famous musical organizations of the world. After the exposition the lath house will be maintained as a permanent improvement of Balboa Park, a monument for all time to come and a pleasure place that will increase in beauty for half a century. And the cost, about \$30,000.

The money will be forthcoming. No feature of the exposition will be lost because of the lath house. It will not be necessary to abandon the plans for the liberal arts building or any other "chestnut" to provide the lath house.

As a part of the horticultural feature will also be the rose contest; a contest to be carried on under the care of the San Diego Floral Association and **California Garden**. This contest has excited world-wide interest already and will excite more. Another idea of the members of the Association is that of the seed farms. This is not practical in its present shape and it is to be hoped that some member or members of the Floral Association will give it some study and work it out, for it can be a valuable feature.

By far the most important and the latest feature is the Little Landers' model farms. Here is something that will be not only beautiful, but of real economic worth as well, an education and an inspiration, something of real benefit to the race, a thing that will show every visitor to the exposition that he can make a living easily off one acre of land in Southern California.

All these things have grown from the original idea of the lath house.

The lath house and the horticultural section will contain the plans that grow on the mountains and in the valleys of California as well as the rare plans sent to the exposition by the seed men and the collectors.

To criticism of the plans for this feature of the exposition, it can only be said that when the matter is investigated, it will be found that the only reason definite plans have not been announced for this feature is because no members of the Floral Association have taken the trouble to study them out and present them to the management for adoption.

San Diego Union, November 5, 1911, IV. On the Margin by Yorick: Sell 500 acres of Balboa Park to provide a fund for the "City Beautiful."

San Diego Sun, November 6, 1911, 9:3. Actual work on Administration Building begun this morning.

San Diego Union, November 7, 1911, 7:2. Work is begun on first exposition structure November 6; may be retained as permanent improvement; grading for foundation of Administration Building begun; 96 feet by 81 feet, two stories high, with basement.

(San Diego) Evening Tribune, November 8, 1911, 3:5. Who is to pay for new boulevard near the high school? Attorney H. S. Utley to decide whether Board of Education or Park Commission shall stand expense. Present boulevard, near the old building which leads to 12th, will be closed.

San Diego Sun, November 8, 1911, 1:5. New polytechnic high school building will be erected in the center of Park Boulevard; for that reason the Park Board will be forced to construct a new boulevard.

San Diego Sun, November 8, 1911, 9:3. Levi Monroe, secretary of the San Diego Exposition Company, to quit; offered a better job by Chamber of Commerce, Billings, Montana.

San Diego Sun, November 8, 1911, 9:5-6. San Diego booster special arrived in Yuma, Arizona this am after having been the center of attention in Phoenix for two days; Collier explains how the opening of the San Diego Arizona and Eastern Railway will benefit southern states and how tide of travel may be started through southwest.

San Diego Sun, November 9, 1911, 4:4-5. San Diego folks sort of won that Phoenix crowd . . . Under the heading of "Come Again Soon, We Like You Fine," the following article appeared in the **Arizona Republican**, published in Phoenix, soon after the San Diego boosters took that city by storm.

"The biggest and best bunch of busy boosters on the broad earth, that's exactly what they are. The **Republican** ought to know for they came in last night and told us so. Who are we talking about? Well, you are slow! The San Diego folks, of course. Everyone of them blows a San Diego horn individually and in addition the bunch brought along a band to blow a collection of horns. And say, they are the dandy dops, they all blew just as hard for Phoenix as they did for home. Mayor Cristy handed them the keys to the whole she-bang and told them to get busy, they did . . . etc. . . . etc.

San Diego Union, November 9, 1911, 7:2. Can High School Board use money for new boulevard? When construction is begun on new buildings, it will be necessary to do away with present boulevard leading past High School to 12th Street.

(San Diego) Evening Tribune, November 10, 1911, 3:2-3. Poor quality of gas prevents flight of big Toliver airship.

(San Diego) Evening Tribune, November 11, 1911, 1:3. Mission Cliff Gardens now name of park at pavilion.

San Diego Sun, November 11, 1911, 7:3. Enthusiasm of booster dinner breaks records; Collier speaks on work in south; Choate speaks for harbor bonds; 300 citizens at banquet at the Grant Hotel bivouac grill.

San Diego Union, November 12, 1911, V, 33:1. Clyde Power, eastern landscape engineer, says Balboa Park has great prospect; cites Parc des Buttes Chaumont in Paris for converted abandoned stone quarries into park; "We have to follow the French plan and produce a combination which conserves the natural beauty and effect, and, at the same time, supplies sufficient of the artificial to render the parks handsome and convenient for those who use them. . . . Nearly everyone you meet can tell you exactly how a park should be improved; he knows it all, and probably never saw a park. He has his ideas which may seem to him to fit the spot, but while fitting that spot, his ideas would ruin all that lies contiguous, for parks must be studied in their entirety."

San Diego Sun, November 14, 1911, 2:3. District Attorney Utley says school board can legally pay a levy of \$3,500 for a new boulevard through the park; will be paid from the insurance fund from old Russ building which recently burned; Board of Education advertises for bids for excavation of the ground.

San Diego Sun, November 15, 1911, 10:4-5. One million dollar harbor bonds carry almost unanimously, 7,196 for, 182 against.

San Diego Union, November 15, 1911, 1. Harbor bonds for \$1 million carry 7,196 to 182, November 14.

Board of Park Commissioners, November 17, 1911. Retained John G. Morley as Superintendent of Parks at \$200 per month beginning December 1; motion carried that no building sites in Balboa Park be granted for public or semi-public buildings except such as are required for park purposes.

San Diego Union, November 18, 1911, 8:2. Park Commissioners name superintendent November 17; John G. Morley will have charge of all beauty spots in San Diego.

(San Diego) Evening Tribune, November 21, 1911, 10:1. Rushing work on Exposition grounds.

(San Diego) Evening Tribune, November 22, 1911, 8:4. Golden Hill Improvement Club is negotiating with Park Commission for an athletic field and a club house in the park.

San Diego Sun, November 23, 1911, 1:2. Toliver forced to move airship or stand trial; under arrest for maintaining nuisance; case set for December 8.

San Diego Sun, November 23, 1911, 12:2. Collier is elected president of Exposition.

San Diego Union, November 23 1911, II, 11:2-3. Board of Directors meeting, November 22; Grant resigned as president and was elected chairman of the Board of Directors; Collier resigned as Director-General; post to be filled by acting director J. W. Sefton, Jr.; Collier names president of Exposition; B. H. Vreeland named secretary to take place of L. G. Monroe.

San Diego Union, November 25, 1911, 5:1. Directors vote \$250,000 for publicity; of this sum \$13,000 was expended during the last two years; B. H. Vreeland, new secretary, to take change on January 1, 1912.

San Diego Union, November 26, 1911, IV, 25:1. Russell C. Allen takes place of Marston on buildings and grounds committee; Marston resigns because he is too busy to serve.

San Diego Union, November 26, 1911, 32:1. Collier to work for passage of resolution; wants President empowered to invite Latin American republics to Exposition.

San Diego Sun, November 27, 1911, 16:3. Collier on way to Washington, DC, to work for passage of a resolution empowering the President to invite the Latin American republics to participate in the Panama-California Exposition.

(San Diego) Evening Tribune, November 28, 1911, 5:2-3. Applications for Exposition space increasing.

San Diego Sun, November 28, 1911, 16:3. Exposition work is being rushed; buildings started; directors determined to have Fair ready on January 1, 1915.

San Diego Sun, November 29, 1911, 2:1. Hinkle rushes call for aid in new Exposition row; Sefton wires back to legislators that San Diego has real claim; Assemblyman Schmitt of San Francisco attempted to pass a resolution granting the Panama-Pacific exposition an exclusive advertising privilege at the expense of the whole state; Sefton says advertising on state stationery should mention both expositions.

San Diego Sun, November 29, 1911, 2:4-5. Many countries ready to plan exhibits for Exposition; Dr. Eugenio Dahne, commissioner for Brazil, says his country is ready to send an engineer to select site; inquiries coming from all over the world.

San Diego Sun, November 29, 1911, 7:1-2. To celebrate Thanksgiving; early morning prayer in park, near 6th and D Streets, the first of a number of services arranged.

San Diego Union, November 30, 1911, 4:1. EDITORIAL: Advertising the Exposition.

San Diego Union, November 30, 1911, 10:1. San Diego rains telegrams on California legislators; Community extends its active opposition to Schmitt resolution favoring San Francisco world's fair at the expense of San Diego's exposition by providing the Seal of San Francisco be places on all state documents and reports.

(San Diego) Evening Tribune, December 1, 1911, 6:2. Allen placed orders for material; delivery of lumber for Administration Building will begin next Monday.

San Diego Sun, December 1, 1911, 11:2. Director of Works Allen placed orders for lumber and other material needed for Administration Building; building will cost about \$30,000; was designed by Bertram G. Goodhue.

San Diego Union, December 2, 1911, 9:3. Material ordered for Administration Building; about 30 men now employed on grading alone.

(San Diego) Evening Tribune, December 5, 1911, 5:2. Work on first Fair building starts soon; carpenters swarm out to site but are not needed until tomorrow morning.

San Diego Sun, December 5, 1911, 8. Workmen eager to begin Exposition building; wood frame for Administration Building ready to go up; a fill being built on opposite side of canyon for approach to Cabrillo Bridge.

San Diego Union, December 5, 1911, 14. San Diego compels compromise at Sacramento; Seal of San Francisco will not appear on State's stationery.

San Diego Union, December 6, 1911, 12:2-3. Committee composed of Mayor Wadham, Superintendent of Water Fay and City Engineer Capps advise City to sell part of the park and purchase the Southern California

Water system. Wadham proposes selling 500 acres of the city park to buy the water system, build a city hall and improve the rest of the park. "Why it's wicked, yes, wicked, to maintain all that waste land."

San Diego Union, December 6, 1911, 12:2. Material on ground for Administration Building.

San Diego Union, December 8, 1911, 16:1. Senator Root of New York thinks San Diego project is crowding San Francisco off map; Collier not disturbed.

San Diego Sun, December 12, 1911, 10:5. Collier announced appointment of John A. Fox as commissioner-at-large of exposition; will get exhibits from different states and national governments of Latin America; director of National Rivers and Harbors Congress.

BALBOA PARK, 1909-1911: THE RISE AND FALL OF THE OLMSTED PLAN, by Gregory Montes.
February, 1981.

1912

San Diego Union, January 1, 1912. Building record in 1911 was \$5,703,605
as against 4,005,200 in 1910
and 1,632,200 in 1909

San Diego Union, January 1, 1912, Section 7:1-3. Parks Abound in Beauty; Masses of Bloom Please Visitors; City Spares No Expense in Beautifying Playgrounds for Her People.

Playgrounds are a necessity to any city, those beauty spots where men and women and children may go to get away from household or business cares and seek recreation by getting near the heart of Nature. They are doubly a necessity in a place like San Diego where God's sunshine is out of doors and everyone seeks the outside to breathe the pure air and drink in the natural beauty of the surroundings.

The city of San Diego has an abundance of parks. They are beauty spots that are used too, visited every month of the year by thousands and thousands of persons. San Diego's parks, for the half of the year, are not draped in a mantle of snow or put out of commission by blizzards and layers of ice. There is not a week in the year when vegetation, luxurious in its verdure, is not nodding in the breeze from the distant sea. There is not a day when flowers are not blossoming in the open air along the edges of the walks. A San Diego park is a park 365 days in the year, and is used as such.

Balboa Park Beautiful

There is Balboa park, a mere trifle of 1,400 acres, which crowns the crest of the hill at the edge of the downtown district of the city. Acre by acre, it has been and is being reclaimed, set to shrubs and trees and flowers, becoming an earthly paradise. It is entered through any one of a score of entrances. There are winding walks, bordered by flowers and shaded by trees, that lead in a rambling fashion to the crest of the hill. There are rest places every rod or so. And when the crest of the hill is reached, there is a wide, open space where benches are scattered about, and here a person may sit and rest and look out upon the scene before him.

Directly beneath him he will see the business section of the city, its streets black with men and women, thousands of automobiles darting here and there. To one side is one of the residence sections, glimpses of the houses being seen through masses of flowers and palms. Back of him is more residence section, as far as the eye can see, with the broad, well-paved streets, the neat homes, the children romping across the lawns. To the other side are canyons, rough country, and in the distance, in bas-relief against the southern sky, the mountains of the Mexican state of Lower California.

There he can raise his head and look beyond the business section of the city. There is the bay, busy with shipping. There is the channel, with, perhaps, half-a-dozen gigantic cruisers or battleships anchored in it. There is beautiful Point Loma and Fort Rosecrans and the government reservation, the lighthouse, the wireless station, the military and naval cemetery with its huge shaft erected to the memory of those who lost their lives on the gunboat Bennington.

Coronado in Distance

Beyond the bay is the island of Coronado, with its hundreds of pretty homes and its great resort hotel and its tent city and resort and recreation buildings. To the right is North Island where the hangars are, from which the nation's greatest aviators start in flight, working like heroic pioneers to solve one of the greatest mysteries of all time.

And beyond that is the Pacific, sparkling in the glory of the sunshine and Coronado islands, score of miles out, and perhaps a vessel or two rounding Point Loma and entering the waters of the bay. It is a scene that can be enjoyed hour after hour because of its beauty and its unusual environment, and because, to a certain

extent, it is constantly changing. IT never grows monotonous, this view from the crest of the hill in Balboa Park.

(The article goes on to describe briefly the attractions of Mission Cliff Gardens, the New Town park, and the Plaza.)

San Diego Union, January 1, 1912, IV, 8:1-2. Harrison Albright helps build city; designed Union building, Spreckels theater, U. S. Grant Hotel, Timken building, Coronado public library, Spreckels' residence.

San Diego Union, January 1, 1912, V, 1:1-6. Work on San Diego's Big Fair Begun; Laborers Start to Build Magic City thousands will visit in few years; Unique plans followed.

The Building and Grounds committee of the Panama-California International Exposition has adopted the plans and estimates of Director of Works Frank P. Allen and the designs for the administration and California Buildings drawn by Bertram G. Goodhue. Work began on the grading and on the foundations for the administration building November 6, 1911.

These plans comprehend one of the most beautiful architectural compositions that has ever been devised, a California landscape filled with examples of Spanish-Colonial architecture, designed by Bertram G. Goodhue, the highest authority in the world on architecture of this style.

(This article is the same as the article published in The San Diego Sun, September 25, 1911, 1:4-5, 10:3, which see.)

San Diego Union, January 1, 1912, V, 4 & 5. Diagram showing Exposition grounds as they will look when buildings are completed.

San Diego Union, January 1, 1912, V, 4:1-5. Idea of Exposition is instant success.

San Diego Union, January 1, 1912, V, 6-1-2 Unique exhibits to play big part in drawing great crowds.

San Diego Union, January 1, 1912, V, 13-14., VII, 1-3. Prominent citizens help plan for Fair.

San Diego Union, January 1, 1912, V, 6:1-7. San Diego's Fair will be vastly different; Balboa Park to be scene of beauty; Brazil has great plans; Diagram of plan lists Frank P. Allen, Jr. as Director of Works; Bertram Grosvenor Goodhue as consulting architect, and Irving J. Gill as associate.

San Diego Union, January 1, 1912, XVII, 7:1-4. J. Clyde Power, eastern landscape architect, says Balboa Park has great prospects.

That Balboa Park possesses potentialities which, with time and pains, will permit of its being transformed into one of the finest parks in the country, is the opinion of J. Clyde Power of Washington, DC, a distinguished eastern landscape engineer, who visited in San Diego recently. It was the third visit Mr. Powers had made to San Diego in the last five or six years, and it gave him a good opportunity for judging the amount of improvement made in the park in the meantime.

"I went over a part of Balboa park and was greatly surprised to find so much improvement," said Mr. Power, who can speak with authority on such topics, having been landscape engineer for the city of Indianapolis for twelve years, and having also passed several years in the service of the government as an engineer. "It is certainly a beautiful location, and there is no reason it cannot be developed into a most beautiful place. In a few years it will develop into as fine a park as there is in the country."

Parks of Ancient Days

Passing from a discussion of the local grounds to one of parks in general, Mr. Power said:

“In looking over the history of the past we find that public parks are not modern inventions, as had been supposed, but have been objects of interest since the dawn of civilization. Back in the days of Nebuchadnezzar we are told that the hanging gardens of Babylon were most beautiful and certainly they must have been, for they are handed down to us in history as one of the seven wonders of the world. Then the great Solomon tells us that in his wonderful gardens he had all the beauties of the floral world, together with wondrous fountains and flowing rivers. We also go back to the early history of Damascus and learn that Naaman the Leper described the beauties of the Abana and Pitarar rivers and their surroundings. Again, nine hundred years later, Mohammed the Prophet sadly turned away from Damascus with its beautiful parks and gardens, fearing that the paradise of this world might so entrance him that he would denied entrance into the next, and, we are told, that in the descriptions of this hereafter, which he gave to his followers, one of his strong points was that of natural scenery outdoing beautiful old Damascus.

Decline of Parks

“For many years parks were lost in the general turmoil which ensued, during which time highway robbery and war seemed to be the principal pursuits, and people were divided into two classes --- the proprietors of vast tracts of land, holding them by might, and common people, who serve these landed proprietors in any manner necessary.

“In the course of time many of these tracts of land were consolidated, and we next hear of public, and a little later of royal forests. These, however, were generally game preserves for their owners, or served as sources of revenue in furnishing timber for construction purposes. At the same time the common people were allowed pasturage, and were permitted to gather firewood from these forests. After a time the idea occurred and the thought grew that these vast forests, nearly as nature had left them, were of much value to the public at large, and by reason of the waning of property rights, or probably by the demands of the common people, these forests became public parks or public forests. England and France have many such places, some of them being ‘New Forest,’ ‘Epping Forest,’ ‘Hempstead Heath,’ ‘Bois de Boulogne,’ and ‘Bois de Vincennes.’ In England, most of these forests are kept in the natural state, while in France many artificial means are used to combine with the natural.

A Debt to France

“To the French we owe more than to any other people for the great results obtained from their ideas have had much influence on the park of today. They taught us that in and around our cities are lands, that for practical purposes, are nearly valueless, unless great amounts of money are spent on them, and that save as dumping grounds and the abode of squatters, and, as such, are dangerous to public health and morals, which can be transformed into beautiful parks. No matter what the cost in dollars and cents, it is cheap when a city can eliminate her unsightly, unhealthy, filthy and worthless lands and from them produce that which is beneficial to both the health and morals of the community. One place I have in mind, that of the ‘Parc des Buttes Chaumont’ in Paris, which were formerly a number of abandoned stone quarries, containing about sixty acres, was converted into a beautiful pleasure ground, and on account of the transformation and present condition it is noted throughout the world.

“When we look at America in our densely settled parts, much younger in settlement than any of the foreign countries, we do not see vast tracts of forests which may be used for parks, but instead, we have to follow the French plan and produce a combination, which conserves the natural beauty and affect, and, at the same time, supplies sufficient of the artificial to render the parks handsome and convenient for those who use them. Some of the early settlers of this country had ideas, which seemed to lead toward parks, for every little town of the eastern states had its commons, usually one or more squares in the center of the town. On these commons the people had the right of pasturage, or cutting hay, firewood or building timber. As long as they remained common property good care was taken of them and the officers of the town often took action regarding their usage. For instance, about 1650 an order was passed by the selectmen in several New England towns that ‘No one shall fell any tree upon the commons without the consent of the selectmen.’

Early Conservationists

“In 1673 the town of Stoneham, Massachusetts, appointed an officer to inspect the number and bigness of the trees cut down in Cewar swamp, for shingles and posts were in demand. The early settlers were keen to observe that the destruction of the forests would not do, as in shown by the fact that in 1639 the provisional government was petitioned to order ‘that whosoever shall kindle a fire in other men’s grounds, or in any common ground, shall be fined forty shillings.’ Similar care and forethought would have been beneficial to all the country. After a time we find these commons disappearing, and in 1694 one of the New England towns appointed a commission to divide the common land among the citizens, and so this went on until Boston Commons is the largest and only important tract which has always been common land. Still these older settlers possessed an eye for the beautiful, for just after the revolution it was ordered: ‘Whereas a number of people have manifested a desire to set out trees for shade near the meeting house and elsewhere about the town, and the town being desirous of encouraging such a measure, voted that any person that shall injure or destroy such trees shall pay a fine of not exceeding twenty shillings for each offense.’ These were wise precautions, and who can go to any of the New England towns today and enjoy the shade of the majestic elms and maples without thinking of the wisdom of a hundred years ago in this particular, and endorsing the old adage that ‘he who plants a tree works for posterity.’

Our First Park

“It took a long time in this country to imbibe the park idea, and it was not until the establishment of Central Park in New York in 1856 that the ‘first step’ was taken to secure a good-sized park. Other cities gradually followed the example, and now there is scarcely a city of any size but has secured or is endeavoring to secure land for a rural park; for it has become a recognized fact that no matter how much a system of small parks and the connecting highways may benefit a city, still, in the bustle of our nerve-exhausting city life, there is a necessity for parks of such extent that the tired mind, as well as the body, may with nature seek rest and refreshment. The improvement of parks for the use of the people is an important thing. Too many hands and too many ideas will spoil anything,, and it requires no mean mind to grasp an entire park proposition and produce results which in after years will show proper handling. It takes years for parks to grow, and, if handled intelligently, they are things of beauty; but, if not, they are abominations.”

San Diego Sun, January 2, 1912, 8:2. Sunbeams: City Park has its attractions.

San Diego Union, January 3, 1912, 3:5. Order of Panama to be organized; Charter members will hold dinner and meeting on Friday; E. O. Tilburne, organizer.

San Diego Union, January 3, 1912, 12:1. Exposition may include agriculture as part of show; letter from Belgian indicates widespread interest in 1915 Exposition; mimic Panama Canal surrounded by native flora suggested.

Monsieur Pulickx Eeman of 258 Chaussees des Bruges Gand, Belgium, writes the Panama-California Exposition:

“Will you I pray make known to me if there will be at your exposition a section for aviculture and horticulture and temporary exhibits of these two branches and at what date? Thanking you very kindly. Signed: Pulickx Eeman.”

The gentleman encloses a postcard of Belgium which carries the advertisement of the exposition held in that city last November, an annual affair in that country.

There is nothing to prevent one of the finest exhibits of aviculture ever assembled. The climate of this city is such that the whole exhibit can be kept here the entire year and in the open air. There will be no necessity for expensive buildings such as have been required at other expositions and European faciers can ship their exhibits here with the knowledge that Jack Frost will not damage them and that hot weather will not interfere with keeping the exhibits right up to standard.

The exposition already has an interest in the science of aviculture and has offered a handsome trophy I competition that will not be won outright until 1915. It will be contested for at the coming poultry show of the San Diego Fanciers' association.

As to horticulture, the Panama-California Exposition will in itself be the most complete exhibition of horticulture ever held in the United States. Here again the climate affords an advantage and plans already laid out are for the most complete and beautiful display of scientific horticulture ever shown. On whole section of the exposition is to be given over to lath and green houses, hot houses and propagating gardens, and it has been proposed by the U.S. agricultural department to construct a miniature Panama Canal and line it with the very flora and vegetation that surrounds the construction camps of the canal engineers.

Another foreigner who is expected here shortly is Dr. Eugenio Dahne who, if his present plans do not fail, will bring with him an engineer of the Brazilian government to investigate and survey the site of the Brazilian building. As Brazil was one of the first countries of Latin America to signify an intention and desire to exhibit here, she has been given the choicest site, a move proved to have been a wise one from the fact that Brazil, complimented by the action, has signified her intention to spend more on her building and exhibit than all the other South American countries put together, with the possible exception of Argentina.

A reply has been sent to Monsieur Eeeman and an effort will be made to secure his cooperation at the exposition.

San Diego Union, January 3, 1912, 12:2. School of American Archaeology to meet here next September; Collier and Goodwin make arrangements during trip to Pittsburgh. . . . Washington, Jan. 2 - Col. D. C. Collier and Director Goodwin of the exposition company, one just back from New York and Pittsburgh, in the latter place attending sessions of the Archaeological Institute of America, of which they were elected life members. It was arranged that the School of American Archaeology shall meet in San Diego next September, when delegates from all parts of the world will attend.

Col. Collier is highly pleased with this achievement, which is only one of the many things he did in the interest of the exposition and San Diego regarding details connected with exposition plans, and got many valuable ideas.

Collier and Goodwin have been conferring today with John A. Fox, newly appointed commissioner at large for the exposition, regarding plans for promotion and exploitation.

Park Commissioners - Minutes, January 5, 1912. Board has not given up jurisdiction of that section of the park turned over to Exposition management . . . Board requested Mr. Masten to have specifications drawn up in regard to 6th Street opening.

San Diego Sun, January 5, 1912, 2:1-2. Order of Panama will be formed here tonight.

San Diego Sun, January 6, 1912, 8:2. Order of Panama officers elected.

San Diego Union, January 6, 1912, 20:1. Order of Panama is formed; members are all boosters.

San Diego Sun, January 8, 1912, 1:7-8. Council comes to assistance of unemployed; penniless men put to work on pueblo lands; Park Board also asked to aid with that million in bonds; Supervisors scored for failing to cooperate.

San Diego Sun, January 8, 1912, 8:1. Collier to fight for Exposition support; Senate committee will meet Monday, January 15.

San Diego Union, January 9, 1912, 15:1. Finished plans for new Polytechnic School accepted; Board of Education passes on drawings of Quayle Brothers & Cressey.

San Diego Union, January 10, 1912, 8:1. Playgrounds show marked advance during year.

San Diego Sun, January 11, 1912, 7:4. Submit report of playgrounds for past year.

San Diego Union, January 11, 1912, 7:3. Exploring ruins of ancient tribes; Panama-California Exposition will be enriched by Dr. Bandelier's research.

San Diego Union, January 11, 1912, II, 11:1-4, 14:2-3. Exposition stockholders elect directors for coming year; officers present detailed reports of activities; 53,778 shares represented at meeting, either in person or by proxy.

San Diego Union, January 13, 1912, 1:1, 6:2-3. San Diegans win support in fight for Fair; Sefton presents plan for separate exhibits by counties of south; stirs up opposition; visit to city and conference to decide question is proposed.

San Diego Union, January 14, 1912, 1:1, 2:3. Delegates to Counties' Committee meeting due in San Diego today.

San Diego Union, January 15, 1912, 9:1. Choate to explain San Diego wants to Congress; leaves for Washington, DC.

San Diego Union, January 15, 1912, II, 11:2. Collier will present claims of San Diego to Senate committee today; asks only that San Francisco keep agreement.

San Diego Union, January 15, 1912, II, 11:2. Call meeting to discuss Stadium; proposal to construct immense athletic field in Balboa Park.

San Diego Sun, January 16, 1912, 6:4. Sunbeams: What San Diego needs is more of a zoo in that city park.

San Diego Union, January 16, 1912, 7:1. Visitors prolong stay; charmed by environs; officials of northern counties more surprised the longer they stay here; site in Balboa Park for Exposition endorsed at mass meeting; Sefton wants separate county building for Southern California and sectional exhibits for counties north of Tehachapi.

San Diego Union, January 16, 1912, II, 11:2. Congressional committee postpones action of Exposition claims.

San Diego Union, January 17, 1912, 8:4. Native Sons favor stadium in park.

San Diego Union, January 17, 1912, 12:3. Old Town reservoir breaks with pressure; superintendent says he will recommend building new one in park.

San Diego Union, January 17, 1912, 14:1. San Diego to have carnival in July next; Board of Directors, Order of Panama, take preliminary steps for display.

January 18, 1912, Board of Park Commissioners Correspondence, Box 1, San Diego Public Library. Letter, Samuel Parsons to Julius Wangenheim, president Park Commissioners, January 18, 1912, expressing appreciation for interest taken during his visit to San Diego; hopes Wangenheim will be able to carry out a comprehensive plan with buildings and general arrangement of the park, "associated each with the other in the most artistic and practical manner."

San Diego Union, January 18, 1912, 8:2. Brazil agent to visit here again; expected that South American commissioner will complete Exposition arrangements.

San Diego Sun, January 19, 1912, 1:4. Wide Awake Club urges sale of park for water funds; favor Mayor Wadham's scheme; do not want bond issue.

San Diego Union, January 19, 1912, 6:5. Country Club may establish new golf links on Point Loma.

San Diego Union, January 19, 1912, II, 9:1. Exposition heads agree on action to be asked by U.S. Senate; amicable arrangement made by representatives of two 1915 Fairs; Collier is satisfied.

San Diego Union, January 20, 1912, II, 9:2. Latin American states anxious to exhibit their historical relics.
San Diego Union, January 22, 1912, 5:4. Senate committee to give hearing today on Exposition requests.

U.S. Congress, Senate Committee on Industrial Expositions, Hearings on the Panama-Pacific and the Panama-California Expositions, 62nd Cong., 2nd sess., 22 January 1912 (Washington,, D.C, GPO 1913)

San Diego Union, January 23, 1912, 13:1-2. Senators suggest federal aid for expositions; Government should lend support if it invites foreign exhibits; "I'm satisfied," says Collier; northerners complain about extensive scope of San Diego's plans.

San Diego Union, January 23, 1912, 16:1. Chief Wilson asserts rock pile will be revived; blames street speakers; convinced that their meetings have attracted men of undesirable class.

San Diego Union, January 24, 1912, 8:1. Plan for carnival of July, 1912, approved.

San Diego Union, January 25, 1912, 6:1. Curtiss is after Exposition aviation privileges; applies for one of the most valuable concessions of the year 1915; would have ten acres.

San Diego Sun, January 26, 1912, 4:2-3. San Diegans on Exposition work.

San Diego Union, January 28, 1912, 16:1. Exposition fiesta arranged for next June; pageants and sports outlined under direction of Order of Panama.

San Diego Sun, January 30, 1912, 15:3-4. Sunbeams: Lovemaking on a park bench; the pheasant in the bird cage in the city park.

San Diego Sun, January 30, 1912, 16:1. Plan to replace beauty spot in park with road; pretty canyon to give way to boulevard; property owners protest in vain.

San Diego Union, January 30, 1912, 8:4. Grants for 6th Street extension; Commission authorizes building of boulevard through Balboa Park; work is to cost \$50,000; owners of business property on 6th Street and north of park to pay; thoroughfare will be opened to University Avenue; 110 feet in width with a 12 foot parking strip in the center flanked by a 24 foot driveway on either side and a 20 foot parking strip along either edge of boulevard.

San Diego Sun, January 31, 1912, 4:1. EDITORIAL: Putting A Street Into The Park. . . . It is announced that the park board has decided to wipe out one of the most beautiful canyons in the park, so as to continue Sixth Street through to the north from Date Street. **The Sun** can understand the desire of some businessmen and property owners to have an outlet for Sixth Street to the north, but that this was of such an urgency as to compel the filling of a beautiful canyon hardly seems likely. And this, even though the new boulevard will be sightly.

There are a good many San Diegans who will view this action as giving a possible opportunity for the street car company to run a line into the park, which **The Sun** believes would be mighty band for business.

San Diego Union, January 31, 1912, 5:1. Boosters' steamer to Panama has been secured.

San Diego Union, February 4, 1912, 42:1. Golf clubs invite plan to build links equal to best; Point Loma will become popular playground.

San Diego Sun, February 5, 1912, 1:4. Happy pair cut initials in park bench; arrested; pretty girl and devoted escort released at police station.

San Diego Sun, February 5, 1912, 6:4. Sunbeams: The latest thing Charlie Collier has 'grabbed' for the Exposition is the frieze that surrounds the main assembly room of the palace Andrew Carnegie built for the Pan-American Union, in Washington, DC.

San Diego Union, February 5, 1912, 6:5. Exposition fight given new phase; President Taft's invitation to foreign countries to exhibit in San Francisco came as a surprise; it was understood he would not do so until a commission has been appointed to assure just treatment for foreign exhibitors.

Park Commissioners - Minutes, February 8, 1912. Motion made and carried that Superintendent construct new road at High School connecting Midland Drive and 12th Street.

San Diego Sun, February 8, 1912, 8:1-3. Has Taft traded Exposition for Frisco's Support? Local show may not have official government endorsement. Collier has made a great fight, however, resolution may still come through. W. E. Smythe, writing from capitol, says Frisco's action is very suspicious.

San Diego Sun, February 9, 1912, 1:7-8. Exposition bill is voted down; not a defeat: "We will have an exposition that will surprise the world," Colonel Collier telegraphs; can get private exhibits now that agreement with San Francisco is broken; says Taft traded support of California delegation.

San Diego Sun, February 9, 1912, 14:3. Supervisors are enthusiastic in regard to Exposition; Southern California Counties are to be represented at 1915 Fair; business meeting of visiting supervisors of Southern California Counties held in partially completed Administration Building.

San Diego Union, February 9, 1912, 1:2-4, 7:2-5. Southern Counties to join in Exposition plan; central building will occupy commanding site in large area of Balboa Park.

San Diego Union, February 9, 1912, 6:1-4 (may be February 10). Senate Committee on Expositions acted adversely on resolution requiring President to invite Latin American countries to participate in Panama-California Exposition; Collier: "The war is on. San Diego accepts the challenge. They have long sought to destroy the San Diego Exposition. . . . They have deprived us of an official invitation to Latin America; but they have thereby given us the wide world as a field. We are relieved of all obligation and the way is now clear to us to assemble from every country on the globe such exhibits as will be essential to an exposition absolutely unique in history."

San Diego Sun, February 10, 1912, 10:1-2. Boosters undaunted; predict great Exposition.

San Diego Union, February 10, 1912, 4:1. EDITORIAL: No Cause for Concern . . . refusal of Senate Committee to report favorably the resolution asking the President to invite Latin America to participate in San Diego Exposition "may prove a positive benefit to the exposition."

San Diego Union, February 10, 1912, 6:1-4. San Francisco breaks faith; Collier says "War is on."

San Diego Sun, February 13, 1912, 1:1-2. Collier to support Theodore Roosevelt for presidency; confers with Roosevelt in New York.

San Diego Sun, February 21, 1912, 9:1-2. Big booster banquet Wednesday evening, February 28, to welcome Colonel Collier back to city.

San Diego Union, February 22, 1912, II, 13:1. Capitalization of Exposition increased to two million dollars.

San Diego Sun, February 23, 1912, 1:6. Artesian water flow is struck in Powder House Canyon; sewer department makes find; may be further developed.

Artesian water has been struck in city park.

The flow is heavy enough, say those who have investigated, to keep a three-inch pipe working overtime. The strike was made in "powder-house" canyon by employees of the sewer department. It is flowing continuously and will probably be developed on a larger scale. One plan is to erect an ornamental pagoda over the spring and improve the ground around it.

Powder-house canyon is one of the prettiest canyons in the park. At a point where the well was struck, the grass is always green. Even when all the surrounding country is dry and parched, this little oasis retains its freshness, which has always been considered remarkable. It is now known that this was caused by the water being so close to the surface of the ground.

Just what the medicinal properties of the spring are remains to be seen. An analysis of the fluid will probably be made soon. Walter Moore, assistant superintendent of streets, is much interested in the strike. He declared today that a natural spring was a big asset for the park. He believes that it should be developed at once.

The flow was struck at a depth of only a few feet, and the water is emerging with considerable force. It is not a hot spring, but the water is cool and refreshing. Similar excavations were made for a considerable distance, but at no other point was water found.

San Diego Sun, February 26, 1912, 4:5-6. Lummis says San Diego's Exposition will be "glorious."

San Diego Union, February 26, 1912, 4:1. EDITORIAL: Waiting For An Accounting.

San Diego Union, February 27, 1912, 8:2-3. Park Commission reports to Mayor; out of \$1,000,000 fund, only about \$66,000 has been spent; 80 acres planted in trees (mostly eucalyptus, acacias, cypress and pine) along north, east and south borders; remodeled oil boulevard on west side; put in water system for west side; planted eastern side of new boulevard to correspond with planting already made on west; 5 or 6 acres of lawn planted from Juniper to Maple Streets and from 6th Street to new boulevard; gave permission to citizens to construct a boulevard along west boundary from Date to Juniper Streets.

San Diego Sun, February 28, 1912, 1:2-3. Collier coming tonight; to speak at big dinner.

San Diego Sun, February 29, 1912, 3:1-2. Collier raps Taft in speech to 450 boosters in the Grant Hotel grill last night.

San Diego Sun, February 29, 1912, 4:3-4. Fire Limits and Exposition, letter from O. K. Bullard . . . Editor, **Sun**: "Fire Limits Extended to Protect Exposition." The above headlines appeared in the morning **Union**, and it seems to me to be a poor excuse, or reason, for extending the fire limits. Had the exposition site been allowed to remain where it was at first located by the park board, in conjunction with Olmsted Bros., where it should have remained, the argument might be of some weight, but when the present park board saw fit to throw away \$15,000 already expended on the first site, favored by the Olmsted Bros. and removed the same to the Laurel street entrance, tell me where the fire limits as now proposed will be any protection to the Exposition buildings. Why discriminate against localities?

San Diego Union, February 29, 1912, 4:1. EDITORIAL: Crediting Collier's Account.

San Diego Union, February 29, 1912, 10:1-7, 12:2. City must fight says Collier; booster chief given ovation; reiterates charge of betrayal by legislators, after part they took, northerners may ask for help to retain Mint; work to go on as usual, by Irwin Graham Lewis.

"San Diego has had to fight for everything she ever got and she has to fight for everything she hopes to get," roared Charles Collier last night at a booster dinner in his honor at the U. S. Grant Hotel, held in celebration of his return to San Diego after an absence of three months in Washington, DC.

For a week friends of Collier have been preparing for his return. A dinner was planned for him that called out 500 of the best citizens of the city and county. Seated side by side were descendants of Robert E. Lee, President Jefferson Davis of the Southern Confederacy, and of General-President Grant, the greatest soldier of the reunited republic.

It was a notable gathering.

Harmony in Evidence

It was notable, not only from the fact that so many of San Diego's representatives were present, but for the harmony exhibited on every side.

All creeds and all cliques, all classes and all interests, were present.

Side by side with Clark and Wilson Democrats were Taft and Roosevelt Republicans. The chief support of the free speech element and the man responsible for the enforcement of the city ordinance restricting free speech in certain locations in the city were at the same table.

Business and social organizations were represented and all were there for one purpose, to do honor to one man whose long, hard fight for San Diego and her greatness is appreciated; whose sacrifice of home, business and friends, as President Spalding said, has been for the benefit of San Diego.

Dining Hall Crowded

Monday it became evident that the dining hall would not hold those who desired to do honor to the president of San Diego's Panama-California exposition on his return from a campaign in Washington that ended in bitter disappointment for many in San Diego.

The capacity of the dining hall is limited. Tickets were issued for every available seat. These tickets were oversold. No matter. Seats were found for those who crowded in at the last moment to pay tribute to the man who fought in season and out of season for the San Diego idea.

Yesterday morning one of the most prominent bankers in the city phoned the banquet committee for a seat. Seats, he was told, were all gone. The banker became indignant. A confirmed booster, who would "go" for Charlie Collier and the exposition whether or no, gave up his seat that the banker might sit in a place of honor.

Spirit of San Diego

A subscriber to the stock of the exposition sat in his seat and listened while Collier told of the necessity for everyone now to stand to the yoke, and excused himself while he wrote out a check for his total subscription which he handed to an exposition official.

Such is the spirit of San Diego.

Undaunted in the face of discouragement and with charity for all, the chamber of commerce yesterday held a meeting to deliberate on the action to be taken on San Francisco's plea for aid in retaining her mint. The directors left it to Charlie Collier to act.

Collier announced last night that he will bombard every member of congress with a telegram demanding that the mint at San Francisco be continued in full force and operation.

Such is the spirit of San Diego.

Collier arrived Monday evening at Los Angeles. Private business delayed him there until Wednesday noon. In company with Director-General Sefton, Director of Works Allen, and Director of Publicity Hogaboom, he left Los Angeles yesterday noon for San Diego.

Met at Oceanside

A committee composed of Percy H. Goodwin, Charlie Fox and Carl Heilbron have been at work for a whole week arranging for the biggest booster dinner ever given under the auspices of the chamber of commerce to signalize his return. A committee of the chamber of commerce, composed of President Spalding, Acting Secretary Reynolds, Auditor Vreeland of the exposition, and Assistant Director of Publicity Lewis, went to Oceanside to meet Collier's party. This committee was joined at Oceanside by members of the Oceanside chamber of commerce and the party was met at San Diego by another committee of the San Diego chamber of commerce, headed by John Forward, Jr., who left the hospital where his wife is critically ill long enough to greet his confrere and friend Collier at the depot.

A March of Triumph

At the U. S. Grant Hotel hundreds of San Diegans were waiting to greet the returning president of the exposition. His progress through the lobby, with Mrs. Collier on his arm, was a veritable march of triumph. San Diegans showed him he is as dear in apparent defeat as in victory, and his welcome was warmer, if possible, coming as he did from the hostile meeting of the United States senate committee in Washington than that given him last spring when he "came home with the bacon" from the House of Representatives with the Raker resolution under his belt.

The dinner was scheduled for 7:30 but it was nearly an hour later before the waiters began to serve the food.

Seated on one side of the guest of honor was U. S. Grant, Jr., Jefferson Davis, Jr., who accompanied Collier from Washington and was welcomed by Mr. Grant as a family friend, and friend of Collier. On the other side were President Spalding of the chamber of commerce, who presided at the dinner, Collier's right-hand man and lieutenant, Joe Sefton, Commodore Richardson and others.

Song Prevailed

Long before the time for speaking came, the assembled boosters, joyous and happy, began singing that good old song, "Mary Ann MacCarty," led by Garretson, Simon Levi, Louis Blockman, and a half-dozen others. Then came "What's the Matter with Collier," and then the Companeros of the Order of Panama broken out into the song of the "Gallant Admiral."

When President Spalding rose to introduce the guest of honor, he could not make himself heard. He made his whole speech, and was ready to introduce Collier when cries of "louder, louder," started him all over again. Silence being gained, he made his speech and turning to Collier introduced him to those who are newcomers to the city as "San Diego's biggest and best booster."

Ovation to Collier

There was an uproar.

Five hundred men rose to their feet and cheered, yelled, waved napkins and indulged in all the usual, and some unusual, expressions of enthusiasm and joy.

The big-hearted giant at the head of the table stood with bent head, his hand in a napkin, and big tears stole down his cheeks, as he listened to the yells and cries of approval and affection. His lips trembled as he started to speak, and his hands, lifting a glass of water to his lips, shook with the emotion that a strong man tries to quell, emotion felt during one of the supreme moments of his life.

For it was one of Collier's supreme moments.

He was on trial and knew it.

For the first time since the exposition started, he came home unborne on the wings of victory.

His first words were simple and unaffected.

He said:

"I want to express my appreciation of the reception I have received here this evening. For any loss of time, any expenditure of energy and trials or troubles undergone for San Diego, in this tribute I feel that I have been amply repaid. It was something I did not expect. I did not come back with which I expected to get when I left here in the fall, but I want to tell you that if I did not bring home the bacon, I have come back with my fighting clothes on.

"When I went to Washington last April, my companions and myself were told that we might as well pack our trunks and go home. That the matter of securing governmental recognition would be comparatively easy in the senate, but that we stood not chance in the house of representatives. Notwithstanding that discouraging assurance, I stayed on and made the fight and notwithstanding the lukewarm members of the California delegation, who came from around San Francisco bay, we succeeded in having passed on the nineteenth day of August, the resolution we wanted.

Impregnable Showing

"When we returned to Washington at the opening of the session in December, we found that our work was with those members of the senate industrial committee who were supposed to represent the administration. But the showing made was such that when the San Francisco delegation arrived they learned that San Diego's hold on the house of representatives and the senate members was such that they should have to be honest and square for once in their lives.

"C. C. Moore, president of the San Francisco exposition, in conversation with a friend of San Diego, said, 'You don't mean to tell me that that little town is serious in its demand for recognition for an exposition? What does Charlie Collier want? Why San Diego has already received one million dollars worth of advertising through that exposition business?'

San Francisco Quiet

"But so strong was our position that when Messrs. Moore, McNab and Lindley, appearing for San Francisco before the senate industrial committee --- Lindley as spokesman --- stated that San Francisco was reluctantly compelled to withdraw its opposition to the resolution according recognition to the San Diego exposition.

"I had the assurances of Senators Root and Crane, and similar intimations were conveyed in talks with Newlands, Taylor, and in fact every member of that committee except Gronna, that under the terms of the agreement made by San Francisco there was but one thing to do --- pass the resolution.

"It came like a thunderbolt when I learned that at a secret conference an agreement was reached by President Taft and the San Francisco delegation, the ultimate effect of which, as regarding the Panama-California exposition, was that we should die. Or to put it in the presidential phrase, 'no sideshow shall be permitted to interfere with the Panama-Pacific exposition.'

Denounces President

"I have been criticized for utterances I have made with regard to Taft, but I want to say to you, speaking not only as an officer of the exposition, but as an American and a San Diegan, that no man who holds the exalted office of President of the United States should grovel down as he did to get delegates, and when one does

such an act to the injury of San Diego, I don't apologize, I don't equivocate --- I fight. I say that the time has gone by when a man can stick a knife into our dearest hopes and San Diego will get down and grovel at his feet."

There were a few hisses and some scattered applause at the outset of the speaker's allusion to Taft, but by the time he reached the conclusion of his remarks, a hush had fallen over the gathering. The speaker relieved the tension by telling a funny story and was off in a moment again in the full tide of his message.

Always Prepared

"We have always been prepared for what has happened. We never for a moment depended on congressional action. The work will go on just as if the action at Washington had been the reverse of what it has been, and when the first day of January 1915 arrives, you will find nestling on the hilltops that overlooks the shores of San Diego bay, a group of exposition buildings that will fill your heart with pride.

"Our exposition has a deeper meaning than the ordinary project of this sort. You will find behind the San Francisco exposition a force of men whose every effort is concentrated, every nerve is strained to make of the project a great exposition. But more than that, our exposition shall be utilized wisely as an instrument for the building of a great city on the shores of San Diego bay.

The Publicity Boon

"During two years of quiet and dullness throughout the rest of the country, isn't it singular that a community away down in the southwestern corner of the United States should have grown from a city of 37,000 to one of 60,000 inhabitants? That its bank clearings should have increased from \$52,000,000 in 1909 to \$86,700,000 in 1911. That its building permits from a value of \$2,632,100 in 1909 should rise to one of \$4,005,200 in 1910 and to \$5,700,000 in 1911? (And, please God, shall rise to \$10,000,000 in 1912.) That there should come within our borders in two years more than \$28,000,000 to be invested in San Diego? Isn't it all rather singular? If it is due to the growth, the natural tribute of other climes to the climate and possibilities of Southern California, why have not the other communities of this section of the state advanced with similar stride? How is it that the valuation per capita of the building permits granted in San Diego is \$79, while the next highest community in the United States has a per capital of but \$49 and the next of but \$39?

"I do not claim that all the advance made by San Diego in the past two and one-half years is due to the exposition project, but I do honestly and sincerely believe that of this growth more than ninety percent is due to the work that has been done by the exposition people, and the publicity given the city through that work. In the last two years no city of equal size anywhere has received a tithe of the publicity achieved by San Diego.

Pledged to Exposition

"And while we have received benefits through the publicity vastly in excess of the money contributed to bring it about, the matter does not end here. We stand pledged to build this exposition, and it must be done or we stand disgraced before the world. And we cannot do it unless every man, woman and child interested in the welfare of the city stands in and does all in his or her power toward its successful completion.

"If there be any men in this city who have benefited through the exposition project --- men like Colonel A. G. Gassen, who has benefited to the extent of \$50,000 --- and yet refuse to support it, they ought to get out of town."

The speaker here diverted a moment from his theme to say that for his own part, for all his expenses incurred in travel and otherwise, for the benefit of the exposition, he had never received out of the exposition funds, the equivalent of a five-cent cigar.

San Diego On Trial

“San Diego is on trail before the world,” he continued. “Let those of you who have subscribed, with an agreement to pay when the gates are opened, look into your hearts and ask yourselves if you are doing all that loyal citizens of the town and supporters of its exposition should, and are not hanging onto the coattails of those who are bearing the heat and burden of the day --- who are doing the work and putting up the money now.

“In order to make the exposition a success those who have subscribed to the \$1,000,000 fund, and have the money in the bank, ought to put it up now. Every man who had a piece of property two and one-half years ago in San Diego and who has it yet and has seen it advance fifty percent in that time owes thirty percent to the exposition and surely some return is due.”

Colonel Collier went on to state that he had received a telegram today asking the aid of San Diego to prevent the mint being taken from San Francisco, and said he would wire every member of the California delegation at Washington to fight any such attempt. He counseled harmony between the different communities of California, except where vital interests conflicted, and speaking of the attempt of Los Angeles to prevent the national highway coming to San Diego said in characteristic tone and manner, “When she gets done, she’ll know she’s been in a fight.”

“I believe in fighting when the interests of my city are threatened, and yet in being friends when our interests lie in common,” he continued. He again expressed his appreciation of the reception given and closed by repeating Henley’s “Invictus.”

He was again greeted with tremendous applause and after the conclusion of his remarks was kept busy in the banqueting room and in the hotel lobby, shaking hands with a great number of persons who tendered their congratulations on his effort.

March, 1912, Sunset Magazine, Vol. 28, No. 3. “A Palace of Lath” by A. D. Robinson, pp. 283-284. Claims authorship of lath house idea; should be gigantic in size; would have concerts inside: “After the exposition is over and forgotten, there should be a reminder in San Diego, a botanical garden that in years to come shall rank with the Boston Arboretum and Kew gardens.”

March, 1912, Overland Monthly, San Francisco, Vol. 59, No. 3. “Panama-California Exposition, 1915,” by Major John B. Jeffrey, pp. 239-244. . . . Refers to Plaza de Panama as a “Court of Honor” . . . A rectangular plaza to the south would be called “Plaza de las Republicas Americas” . . . Lath House will be 600 feet square and 100 feet high with a central court for band concerts . . . A dam in Spanish Canyon will contain 50 million gallons of water . . . directors want all buildings finished by January 1, 1914 . . . the architecture is to be Spanish-Colonial or Mission in style . . . Nearly every country in Latin America have been invited . . . the exhibits will emphasize process rather than mere display . . . All grading and street work are so arranged that when the buildings are removed there will be a system of roads and streets with ornamental centers, lined and surrounded with groves of trees and flowering bushes, the erstwhile foundation spaces being sodded with bluegrass irrigated from a 14-inch pipeline that enters the park in the north and leads to the south end of the park, where it connects with the city water mains.

San Diego Union, March 1, 1912, 9:1. Commissioner-at-large John A. Fox, former director of National Rivers and Harbors congress, says San Diego will be best advertised; praises Collier but says one man cannot do Exposition work alone; millions coming here; 80 percent will visit San Diego

San Diego Union, March 1, 1912, 10:1. San Diego Federated State Societies plan to erect 4-story building with 2,000 to 5,000-seat auditorium; meeting at Savoy Theater Thursday afternoon; Colonel Collier and John Fox, principal speakers; Collier had the ‘soft pedal’ on; he did not roar, did not once refer to politics, made only a slight reference to the northern metropolis, and then plunged into a regulation Collier booster address; discussed proposed ticket arrangement of Salt Lake, Southern Pacific and Santa Fe railroads which would make it possible for people to visit San Francisco and San Diego at the same low fare.

San Diego Sun, March 2, 1912, Sunbeams: 8:4. To a San Diego booster who has studied in the D. C. Collier School, the sight of a broad expanse of starched dress shirt is as aggravating as a red flag to a black bull.

San Diego Union, March 2, 1912, 13:1. Gallant rank conferred on Collier; Order of Panama bestows highest degree for distinguished services; 25 members admitted; song, speech and story, fun and feasting enliven session of companeros.

San Diego Union, March 3, 1912, 12:2-3. San Diego attracts national attention; newspapers throughout country comment on enterprise and commend plans for 1915 Exposition; publicity work of directors praised.

San Diego Union, March 4, 1912, II, 9:1. Burr M'Intosh, noted artist and writer here on his first visit, praises originality of Exposition.

San Diego Union, March 5, 1912, II, 13:2. Collier reports to Fair Directors who endorse past actions and future program; three million copies of folder "The Lure of the Land of Romance and Roses" will be distributed along line of railways from Washington, DC to San Diego.

San Diego Union, March 5, 1912, 20:4. San Diego Advertising Men's Club formed yesterday; Collier enrolled himself as member..

San Diego Union, March 9, 1912, 9:1. Collier and Fox to campaign in New Mexico; Collier: "The exposition was never in better shape. . . . We have changed plans somewhat as to the form and size of buildings; but not as related to the appearance of the buildings themselves."

San Diego Union, March 9, 1912, 13:1. San Diego Riverside and Los Angeles Railway Co. filed articles with County Clerk; to take over Pursell road; \$250,000 stock subscribed.

San Diego Union, March 11, 1912, 15:5-6. San Diego's Exposition is treated as big news feature; Exposition first to be presented with appearance of permanence instead of usual mushroom construction; article in **California Advocate** states Collier has given the Little Landers authority to put in two model farms in the exposition so that these little farms may be in full bearing by 1915.

San Diego Union, March 13, 1912, 18:1. Federation State Societies endorse stadium idea; urge Park Commissioners and exposition officials to take steps.

San Diego Union, March 14, 1912, 11:1. Architect William Templeton Johnson advises limiting the height of buildings.

San Diego Union, March 16, 1912, II, 13:1. Order of Panama elects new officers; Carl Heilbron placed in supreme position of boosters' organization.

San Diego Union, March 17, 1912, IV, 26:1-2. What newspapers have to say of San Diego Exposition.

San Diego Sun, March 18, 1912, 15:6. Dr. Dahne declares Brazil plans to exhibit at Fair; Local Exposition men entertain distinguished visitor; he leaves for New Orleans.

San Diego Union, March 19, 1912, 8:1. Forest Service trying to start botanical garden in San Diego in conjunction with lath house; will include a chemical laboratory for experimentation; "everything that grows on the face of the earth, of known use to mankind and those of economic use which has not been determined will be included in the specimens to be placed in the botanical garden."

Active work has begun to secure for San Diego the first and only botanical garden maintained by the government of the United States, a garden which will rival that at Kew, England, and be the greatest of its kind in America.

The forest service has been trying for years to have such a botanical garden started. There has up to this time been no suitable location for and no occasion for starting it, other than the desire of the service to have such a garden somewhere in the country.

The plans of the San Diego exposition, embracing as they do a complete horticultural exhibit, attracted the attention of the forestry bureau and the botanical garden is now proposed in connection with it. The exposition lath house showed the service the possibilities of not only the lath house but of a botanical garden such as they desire to start immediately.

This garden would contain under suitable glass and lath houses specimens of every known plant in the world. Those of known economic use would be utilized in experiments by chemists, who seek new uses for woods and fibers and new places for the wastes and byproducts of trees and shrubs of every kind. This garden will if established here, and every effort is being made to get it for San Diego, employ many men, both workmen and scientists. It will cover a good many acres of ground and be supported by the government forest service for experimentation work, really a huge horticultural farm operated by the government. . . .

San Diego Union, March 19, 1912, 8:5. Dr. Eugenio Dahne, envoy from Brazil, visits San Diego; inspects Exposition site in company of G. A. Davidson, J. W. Sefton and F. P. Allen

San Diego Union, March 21, 1912, 12:1. Charles F. Mills, secretary of National Dairy Herd Association, here to consult with exposition officials about a live stock exhibit at Fair; "Your Little Lander movement and your climate are your greatest assets. . . . The fact that a man can make a good living off one acre of land in this country is one of the finest things you have to advertise."

Mr. Mills was one of the officials at the Chicago world's fair and also at the St. Louis exposition, where he had charge of the live stock section. He was called to San Francisco by Commissioner Skiff to take a similar part there. . . . "Your exposition will not interfere with us at all and will help us."

San Diego Sun, March 22, 1912, 13:5. Administration Building ready for offices.

San Diego Union, March 24, 1912, IV, 26:2-3. What newspapers say of San Diego Fair.

San Diego Union, March 25, 1912, 18:2-3. David R. Francis, president of World's Fair at St. Louis, here on visit.

San Diego Union March 26, 1912, 10:1. Collier invited to address New Mexico legislature; will leave Santa Fe, New Mexico, Sunday for Pacific coast.

San Diego Union, March 27, 1912, 20:1. **Arizona Republican** has article about former Arizonian Lucius R. Barrow, exposition director, who went to Phoenix to prepare way for Collier's and Fox's appearance at the first session of the Arizona state legislature.

San Diego Union, March 27, 1912, 20:2. New Mexico solons listen to Collier; Governor McDonald thanked Collier and said New Mexico would respond to the invitation to exhibit to the limit of her ability.

Park Commissioners - Minutes, March 29, 1912. Petition presented to Board in regard to opening of 6th Street from Date to Juniper Streets and the amount of subscription for the work set opposite the names of each subscriber thereto; petition granted. . . . Frank P. Allen presented revised plans for the opening of 6th Street. . . . Allen presented a sketch of the proposed bridge across Palm canyon, connecting Laurel Street with the Exposition grounds; sketch accepted; Forward and Belcher, yes; Wangenheim, no; Wangenheim said sketch should have Bertram Goodhue's approval.

San Diego Union, March 30, 1912, 1:8. Sehon demands clean-up; Women's Christian Temperance Union tells him he must wipe out vice district of city.

San Diego Union, March 30, 1912, 11:1 Civic Association discusses public improvements.

San Diego Union, March 31, 1912, 4:2-3. EDITORIAL: Exposition Work Is Making Great Progress: "The success of the Panama-California Exposition of 1915 is assured. The more loyally the people of San Diego support the project, the greater will be that success."

San Diego Union, March 31, 1912, II, 9:1-4, 10:1-3. Exposition staff moves to new quarters in Administration Building, Balboa Park, March 30; moved from Union Building where they had been for two years; history of the first two years of the exposition: "Thousands upon thousands of plants were set out on the northeast border of the park, a plantation more than 100 acres in extent. Canyons were planted with baby palms to furnish a green landscape visible from the mesa and high ground around them. Trees by the thousands have been set out in various parts of the park and now are many feet high in every section"; roof of Administration Building arranged so visitors can see county, city and harbor; practically entire acreage between West Park Boulevard or 6th Street side and the bottom of Cabrillo Canyon has been cleared for lawn; grading and preparation for lawn made along Park Boulevard and 6th Street; activities of Publicity Committee described; total cost of improvements to date \$150,000.

President Collier has been at home less than three weeks during the entire year just passed. It was a year ago this week when he left for Washington to secure passage of the Raker resolution through the House of Representatives, which he did during the last days of the special session. While in Washington, he took occasion to visit the different government bureaus and departments and to connect with the American Archaeological Society, the Smithsonian Institution, and the Pan-American Union.

San Diego has grown over 200 percent in population, bank clearings and building permits, and is just beginning. The city expected to have 100,000 people on January 1, 1914 and 150,000 on January 1, 1916.

April, 1912, **Sunset Magazine**: "The Panama-California Administration Building," by Winfield Hogaboom.

San Diego Sun, April 1, 1912, 1:1-2. Arizona and New Mexico to aid Exposition.

San Diego Sun, April 2, 1912, 1:4. Beat plan to cripple local Exposition; plan proposed by San Francisco director of exhibits to have counties of state contribute to fund for erection of a counties' building at San Francisco exposition.

San Diego Sun, April 2, 1912, 11:5-6. Dr. Hewett, managing director of American Institute of Archaeology, promises exhibit at Exposition showing progress of man.

San Diego Sun, April 5, 1912, 3:3. Collier leaves to speak at Southern Convention Congress at Nashville, Tenn.; following Congress he will go to Chicago for conference with railroad officials.

San Diego Union, April 7, 1912, 21:1. Lower branch of Arizona legislature voted to select site at Exposition for exhibit.

San Diego Sun, April 10, 1912, 2:1. Exposition stock is increased; stockholders and deputies approved proposal to increase stock from \$1.0 million to \$3.0 million; Colonel Fred Jewell pointed out scope of Exposition had enlarged since original plan.

San Diego Sun, April 16, 1912, 1:6. More money is needed to keep up city's parks; park fathers want full share; offer to build comfort stations.

San Diego Union, April 16, 1912, 18:1-4. Bird's eye view of Exposition and Architecture (similar to drawing on cover of **West Coast Magazine**, June, 1913); main entrance on Juniper Street; all buildings to be completed by January 1, 1914.

San Diego Union, April 16, 1912. Exposition Results: harbor improvements costing \$6.0 million; transcontinental railway; street improvements and roads in suburbs at about \$2.2 million; buildings going up in the city at the rate of about \$500,000 a month.

San Diego Union, April 17, 1912, 11:2. Artist's sketch of California Building; Exposition officials hold open house.

San Diego Union, April 18, 1912, 9:2-3. Drawing showing Exposition grounds in relation to the city and harbor; portraits of representatives who will go to Bolivia, Central America and southern states; in April, 1912, H. H. Clarke visited Bolivia and other Pacific countries seeking their participation in the Exposition.

San Diego Union, April 20, 1912, 12:3-4. Architect submits Exposition drawings; second bridge plan, Frank P. Allen design, for 9 arches, 750 feet long, 125 feet high, 100 feet wide. . . . Lagoon planned in Myers or Spanish Canyon impounding 50 million gallons of water behind Foreign Liberal Arts and Domestic Liberal Arts Buildings, east of Plaza International and Brazil Building, and west of hospital and Pepper Grove; cut off in the south by a bridge dam.

San Diego Sun, April 23, 1912, 3:3. Park Commissioners want more park improvement bonds placed on market.

San Diego Union, May 1, 1912, 4:1. EDITORIAL: Politics and the Exposition: So far as sentiment in favor of San Diego's exposition is concerned, Colonel Roosevelt is evidently less friendly to the city than is President Taft.

San Diego Union, May 1, 1912, II, 11:5-6. Governor Johnson will support Exposition; state legislature appropriation of \$50,000 will be available in July.

May 3, 1912, Letter John Morley, Superintendent, to Board of Park Commissioners.

Gentlemen:

The following is a synopsis of the new work accomplished from December 1st, 1911 to May 1st, 1912.

The whole of the area east of the West Boulevard to the Palm Canyon slopes was plowed and harrowed from Quince to Elm streets, excepting that portion between Juniper street and the south side of Maple street; the slope and canyon south of Quince street to the Palm Canyon road, and also the slopes and canyon adjacent to the road leading to the City Pound; also along Sixth street from Juniper to Maple streets were plowed and harrowed, an estimated area of about 100 acres.

The conditions met were very good as to depth of soil if half of the area plowed; the balance was very shallow, with hardpan close to the surface, especially between Juniper and Fir streets on the knoll between the West Boulevard and the lower road leading to Palm Canyon.

A large amount of planting has been done, the following varieties of trees and shrubs having been used: 225 Monterey Cypress, 750 Arizona Cypress, 50 Pittosporum Rhombifolium, 50 Tecoma Capensis, 75 Heteromeles Arbutifolia, 100 Oleanders, 50 St. John's Bread Trees, 10 Live Oak, 50 Acacia Latifolia, 300 Carolina Cherry, 1000 Cedrus Deodora, 750 Pinus Maritima, 250 Pinus Muricata, 200 Rhus Integrifolia, 20 Mellalucca Hypericaefolia, 120 Metrosideros Micromeria and a few Pepper trees.

The planting was expensive on half of the ground, as it had to be blasted owing to hardpan and shale, and in a number of places good soil has to be hauled to fill the holes so that the trees and shrubs could grow. The cost of the trees and shrubs planted was \$667.00. This does not include the Rhus Integrifolia, which were grown at the park and are valued at \$45.00.

There has also been planted 300 Eucalyptus Rostrata and 960 Pinus Torreyana on the slopes between Quince street and the north end of Park. The ground for the Pines was plowed, but not for the Eucalyptus. These trees were grown at the nursery, their valuation being - Pines \$239.00 and Eucalyptus \$15.00.

750 Live Oaks (*Quercus Agrifolia*) were planted on the west slopes of Golden Hill, and 156 *Pinus Torreyana* of the North slope. The Oaks were purchased for \$75.00 and the value of the Pines is \$35.00. The majority of the holes had to be blasted, owing to the hardpan.

75 *Magnolia Grandiflora* were planted in the triangle on Midland Drive, adjacent to the High School Athletic Field. These trees cost, including freight, \$135.00. The triangle was plowed and two-thirds of the tree-holes blasted.

Total number of trees and shrubs planted - 6241.

A new road past the High School was made for a distance of 4140 feet, and 40 feet wide. 1162 loads of dirt were used to make the fill in front of the High School, at a cost of \$232.40; hired teams \$1809.50. The road is now completed, on a good easy grade, at a total cost of \$3,876.00, which includes laborers, teams and all materials furnished by the Park Department.

The road from the West Boulevard to Palm Canyon at Quince street was regraded and contours changed to make a better and more uniform grade, at a cost of about \$700.00. This road has to be surfaced before it is completed; material from the hill between Juniper and Fir streets is available for this work.

The new water system is well under way. The 6-inch main has been completed, 6000 feet. Over 4000 feet of the 4-inch pipe is laid, and several thousand feet of laterals. The laying of this pipe is more expensive than I figured on, and it will probably run over the 10 per cent of my estimate.

The total expense for labor to date on all work included in the above report, since December 1st, 1911 is \$10,467.67. The maintenance labor account to date is \$3,066.00.

The total expended for Powder, Fuse and Caps is \$649.00. Two-thirds was used for tree planting and the balance on road work and blasting pipe line.

These totals do not include horse feed, tools and other incidentals.

The continuation of improvements on the West side will be the grading and seeding of the lawn along Sixth street from Juniper to Maple, 275,000 square feet. The cost of grading complete will be about \$2,250.00; grass seed, 850 lbs., at 35 cents per lb., \$297.50; 250 lbs. white clover seed, at 35 cents per lb., \$77.50; Mulching \$250.00; Laying water pipe laterals \$150.00; Installing sprinkler system 15 250-foot 2-inch pipe, 2500 feet 4-inch pipe, 1100 feet ½ inch pipe, 854 2 x ½ inch Tees; 122 2-inch Gates if the Redlands System is used, single line, three-line system, 42 Gates, 122 2-inch unions, 854 Sprinklers, estimated cost complete \$2,787.10. If the Hadden System is used money will be saved on pipe fittings, but cost of sprinklers will bring it as high or higher than the Redlands System.

Grading and preparing the ground for planting along the West Boulevard will be expensive, as there is so much that will have to be blasted, excavated and hauled away and replaced with good loam and fertilizer. The total lineal feet of the planting strip, including both sides of the Drive from Elm to Quince streets, is 16,000 feet, varying in width from 6 feet to 25 or 30 feet, so as to allow for the walk to lead away from the road and back again, according to the topography of the ground, and give change of scene. This will be better appreciated after it is planted and the trees and shrubs have attained good size. There are 1800 lineal feet between Juniper and Fir streets, 90 per cent of which will have to be removed to a depth of at least 2 feet, and replaced with good loam and fertilizer. This strip has been blasted its entire length on the East side of the road. On the West nothing has been done as yet. I believe the strip will cost fully \$1.00 per lineal foot from Fir to Quince streets, at an average of 12 feet wide for the planting strip; including the walk \$1.25 per foot.

The planting of trees and shrubs, *Mysembryanthemum*, and the cost of same, will be about \$4,000.00; tool cost about \$14,000.00. This will include all team work, labor, powder, etc., and from Elm to Quince streets.

The main body of the land beyond the strip will not figure nearly so high, as I believe that should be carried out later, excepting in a few instances. However, walks shirting the hillsides above Palm Canyon should be laid out and temporarily graded; also walks leading from the road connecting with the walks along the hillsides, and at various places leading down into the canyons.

Estimated cost of completion of the Water System from Upas to Date streets - \$650.00; cost to date - \$1100.00.

On the north and east boundaries of the Park there will have to be a large quantity of water pipe put in, as there are places where it requires 400 feet of hose to do the work. This will have to be temporarily laid on top of the ground, as it will be subject to change after the trees grow up. The old pipe taken from the West side can be used for this work.

In regard to the Park Roads: There are 435,600 square feet on the West side, and near the High School additional, that will have to be sprinkled; and another sprinkling wagon should be added to the equipment. This will keep two teams busy all the season, and sometimes we will have to use a night force to keep the roads in shape.

The above estimates are very conservative and may probably exceed the amounts given.

There will no doubt be other conditions come up as we proceed with the work, which will be called to your attention as occasion demands.

Respectfully submitted,

Signed: J. G. Morley,
Superintendent

San Diego Union, May 4, 1912, 2:1. Crowd expected at Labor picnic in park tomorrow in the 6th Street canyon between Date and Kalmia Streets.

San Diego Union, May 5, 1912, 25:4. Director Edgar L. Hewett, of the School of American Archaeology and director of exhibits of the Panama-California Exposition arrived in Guatemala, May 4, accompanied by W. Jefferson Davis, of the Exposition's Publicity Department.

San Diego Union, May 7, 1912. Bond Election: Sewer extension through city park west of Park Boulevard - carried; \$10,000 for playground equipment in Balboa Park - carried.

San Diego Sun, May 8, 1912, 16:1-2. All the bonds carry; light vote; close for playgrounds; few women at polls.

Sewer system	3742 yes	639 no
Playgrounds	3357 yes	1006 no

San Diego Union, May 12, 1912, 8:4-5. What newspapers say of San Diego Exposition.

San Diego Sun, May 15, 1912, 1:2. Plan model groves for 1915 Fair; C. L. Wilson, representing Southern California Commission, conferred with Frank P. Allen today; plans model orchards and model bungalow.

San Diego Sun, May 15, 1912, 1:8. Theodore Roosevelt winner in State Primary.

San Diego Union, May 15, 1912, 13:2. Plans for Southern California Counties Exposition building ready; structure to be of Moorish and Mission design; designed by C. L. Wilson.

San Diego Union, May 16, 1912, 13:1. C. L. Wilson in town to confer with Frank P. Allen concerning plans for Southern California Counties building.

San Diego Sun, May 17, 1912, 6:3-4. Balboa Park to be Most Remarkable in America; horticultural features of Exposition greatest appeal; architect Bertram Goodhue praises work already done on grounds; arrived yesterday from New York office; conferred with Frank P. Allen.

"Of course, I am interested in the success of the building features of the exposition," said the architect, "and all of the structures are being designed with the greatest care to fit the landscape, the surroundings and the traditions.

"But there is another side to this exposition which I think will make even a greater appeal. At least to eastern people - I refer to the horticultural features. The man or woman who gazes at skyscrapers and immense blocks of brick and steel seven days a week yearns for the sight of the graceful palm. The palm suggests the quiet and restfulness of the 'manana' lands, where the fierce strife of the twentieth century, with the overcrowded conditions of metropolitan life, does not enter.

"San Diego knows as well as I do that the exposition at San Francisco cannot have growing palms because they haven't the climate for palms. I might add that the Italian cypresses in Southern California, thanks to the mild, all-year climate, do twice as well as in their native land.

"The easterners will wish to see also the bougainvillea, rare tapestry of your walls, and the gorgeous purple carpets of mesembryanthemum covering your lawns."

Mr. Goodhue stated that one feature of the exposition impressed him more than any other, and that is "permanence."

"When the gates are closed, December 31, 1915, San Diego will have something left - a permanent park without a rival in North America. This park will stand with the great triumphs of foreign lands, the Villa Borghese of Rome, the Boboli Gardens of Florence; the wonderfully beautiful public gardens of India, known as the place garden at Jeypore; and the garden at Agra, which forms a setting to the priceless jewel, Taj Mahal. I am quite familiar with these, and I do not hesitate to say that San Diego will be able to offer tourists from any part of the world something that will appeal to the most highly cultivated tastes."

San Diego Sun, May 17, 1912, 12:4. Abolishment of Stingaree still being agitated.

Park Commissioners - Minutes. May 24, 1912. On motion of. Wangenheim, seconded by Forward, the seats recently placed in Plaza park were ordered removed at once. . . . Marston and Allen appeared before the Board in regard to the Laurel Street bridge plans; they stated the Exposition Buildings and Grounds Committee had recommended a 3-arch bridge in preference to the design recently approved for a 9-arch bridge.

San Diego Union, May 25, 1912, 9:3-4. Plan for building to house exhibit of Southern California Counties at Panama-California Exposition; Director of Works Frank P. Allen completed plans of Spanish-Colonial design in harmony with the architecture of other buildings; plans practically the same as those brought here by C. L. Wilson, representative of the Commission; Bertram G. Goodhue, who arrived here a few days ago from New York, added arcade.

San Diego Union, May 26, 1912, 4:4-5. What newspapers say of San Diego Exposition.

San Diego Union, May 26, 1912, 7:1. Southern California Counties approve plan for Exposition building, May 25; Commissioners indorse design as altered by Exposition architects; 44,000 feet for exhibits.

San Diego Union, May 28, 1912, 13:5. Track layers now at work in Balboa Park on right of way of San Diego, Riverside and Los Angeles Railway; Pursell says he will endeavor to have track completed by June 1 in order to fulfill the company's agreement with the Park Commission.

San Diego Sun, May 29, 1912, 4:6. Exposition Architect and His Ideas . . . First appearances are like the initial bite of an apple --- you can tell pretty well from that simple mouthful whether or not you're going to like the rest of it.

The world's first look at the Panama-California exposition on opening day, January 1, 1915, is going to be rewarded with such artistic and interesting composition that only the whole apple will satisfy, according to the plans of B. G. Goodhue, consulting architect to the exposition company.

It is "Bertram Grosvenor Goodhue," in "Who's Who," and the list of accomplishments that follows occupies twenty-three and one-half lines. Mr. Goodhue is a member of the firm of Cram, Goodhue and Ferguson, New York architects, and one of the largest firms in the country. He has traveled all over the world, taken a horseback ride through Persia, knows Mexico from grandees to brigands almost as well as he knows New York, has written books and scores of magazine articles, has drawn plans for more church edifices than probably any other man in the country, and is considered one of the greatest living authorities on Spanish-Colonial architecture.

The combination of all these things might easily have spelled arrogance, but in Goodhue it has resulted in making the man one of the most companionable mortals alive. He is armed with a thoroughly American sense of humor, the typical New York habit of being continually "on the job," a wide knowledge of men, matters and materials, and the sometimes unusual quality of being willing to consider other people's opinions.

To this man is entrusted full authority to accept or reject the plans offered by any country, state or society, for the buildings within the exposition grounds. He personally supervises the drawings of all the buildings belonging to the company, and has the power to deny entrance to anything that will spoil the general effect. It is directly up to Goodhue to make this exposition unique, in that every building will be carried out in the same style of architecture, the Spanish Colonial, and will bear a definite relation to every other building, thus offering a harmonious whole, impossible to obtain under any other system.

Uniformity is Keynote

"It is this way," and the architect swept the dishes on the café table out of the way, drew a pencil from his pocket, and began to sketch a plan of the exposition grounds on the tablecloth. "Here is the main entrance and the bridge across the canyon at Laurel street. Whether the visitor looks at the exposition grounds from this entrance or from any other point, uniformity is to be the keynote and nothing is to disturb the general harmonious outline.

"The group of permanent buildings at the east end of the bridge is naturally my pet work, and the structures are going to be the very best I can make them. The walls of the tower, for instance," and he indicated with his pencil a point on tablecloth drawing, "these walls are to be nine feet thick, built to last indefinitely. This tower and the big dome of the auditorium, also one of the permanent group, will be large enough to be seen for forty miles.

"The architectural idea of the exposition is Spanish Colonial. That is the very best of the Mexican buildings, better in some instances than the original Spanish itself. The mission architecture, so well known here, is much the same, having been derived by the old monks from the real Spanish Colonial and carried out as well as indifferent tools and uneducated Indians could do.

The Concessions

"Even the concessions must conform in a general way to the whole scheme. Such things as scenic railways must be built in canyons. In other words, go down as far as they like, but not up, for the perspective must be kept in harmony."

"We can't have the biggest fair naturally, but we're going to have the most distinctive architecturally and horticulturally that was ever built."

San Diego Union, May 30, 1912, 11:2. Commissioner Fox expected here soon; has been touring south and will now visit western states; attended Ad Men's convention at Dallas, Texas.

San Diego Sun, May 31, 1912, 3:1-2. Southern California Counties start Exposition building; architect C. L. Wilson of Los Angeles going over plans that include a 5-acre citrus orchard and a building to house exhibits.

San Diego Sun, June 1, 1912, 3:1. Pennsylvania Society will ask Exposition building.

San Diego Union, June 1, 1912, 10:3. G. W. Pursell will be granted time extension; Council to allow Company five months to complete road to La Mesa; acted on question today; promoter stated road was financed to Escondido; work to be rushed; if the extension were not granted, the franchise would expire tonight because one of the provisions is that the road must be completed to El Cajon by June.

San Diego Union, June 2, 1912. W. W. Wilson, member Southern California Counties Exposition Commission, met with C. L. Wilson, architect of Southern California Counties building, and Frank P. Allen.

San Diego Union, June 2, 1912, 4:4-5. What newspapers say of San Diego Exposition.

San Diego Union, June 2, 1912, 5:1. Pennsylvania will be represented at San Diego Exposition; local state society unanimously adopts resolution asking for building and exhibits.

San Diego Union, June 2, 1912, II, 10:1. Fox says south is boosting San Diego Fair; Commissioner-at-large returns from trip of 10,000 miles.

San Diego Union, June 2, 1912, V, 40:1. Council scores Pursell; grants extension of franchise until November 1 to complete road from 22nd Street and Balboa Park to La Mesa; he escapes forfeiture.

San Diego Union, June 4, 1912, 9:1. Supervisors refuse money for California Building at Panama-Pacific Exposition; claim San Diego County has done enough and State should erect own building.

San Diego Union, June 5, 1912, 20:1. Reservoir for 5 million gallon tank in city park at the intersection of Ivy and 15th Streets if these streets were continued through the park is selected; Councilman Fay and Frank P. Allen selected site..

San Diego Union, June 6, 1912, II, 13:2. Sewer trunk line is built through park to University Heights.

Park Commissioners - Minutes, June 7, 1912. Samuel T. Black, new member of Board; Frank J. Belcher, Jr., term expired. . . . Franchise with San Diego Interurban Railroad discussed. . . . Board authorized construction of bridge across Pound Canyon along the lines to be approved by Frank P. Allen, Exposition engineer, and, if possible, by Bertram G. Goodhue; cost not to exceed \$150,000.

Present: Commissioners Wangenheim Black and Forward. Absent: None.

The minutes of the previous meeting were read and approved.

The question of the San Diego Interurban R. R. franchise was brought up and discussed by the Commissioners and Mr. Pursell, as to the putting up of a sufficient bond by the R. R. Co. to guarantee the parking of the right of way of said R. R. Company.

Mr. Black then moved the adoption of the following resolution:

“RESOLVED, that the franchise granted to the Interurban Investment Company on or about May 31st, 1911, having expired by limitation, the conditions not having been complied with, said franchise and all rights are hereby annulled, revoked and expired; and, RESOLVED, that it is on Park property without any rights, franchise or privileges, and all work now in progress should be immediately stopped.”

Mr. Wangenheim seconded the above resolution; and, on call of the roll, Commissioners Wangenheim and Black voted AYE, Mr. Forward voting NO, stating that the R. R. should have every encouragement to proceed with construction and giving them a franchise without bond.

Mr. Purcell defended the course of the R. R. Company and protested against the adopted resolution. After considerable discussion, it was agreed that Mr. Purcell should meet with the Board on Saturday a.m., June 8th at 9 o'clock to draw up a franchise that would be suitable to the R. R. Co. and the Board of Park Commissioners.

The question of the Laurel Street Bridge was brought up, and after a general discussion by the Commissioners, Mr. Marston, Mr. Sefton, Mr. Belcher, Mr. Davidson and Mr. Allen, Mr. Wangenheim presented the following resolution:

“RESOLVED, that the Park Board authorize the construction of a reinforced concrete bridge across Pound Canyon at the extension of Laurel Street, to be constructed along the lines to be approved by Frank P. Allen, Exposition Engineer, and if possible by B. G. Goodhue, Exposition Architect; the bridge to be constructed by the Exposition Management under the contract entered into between them and the Park Board, but to cost not to exceed One Hundred and Fifty Thousand Dollars (\$150,000.00) for the bridge and all its appurtenances.”

Commissioner Forward moved, and Commissioner Black seconded, the adoption of the resolution, the vote on call of the roll: Ayes - All, Noes - None.

San Diego Union, June 7, 1912, 1:4-6. Envoy from New Mexico says Balboa Park is ideal place for Exposition.

San Diego Union, June 8, 1912, 10:1. New Mexico may duplicate old pueblo at San Diego Exposition.

San Diego Union, June 10, 1912, 15:4-5. What newspapers say about the Exposition.

San Diego Union, June 12, 1912, 6:4. Spreckels Theater to open August 23.

San Diego Union, June 12, 1912, 8:1. Order of Panama requested to initiate movement to raise funds for stadium project.

San Diego Sun, June 14, 1912. G. W. Pursell, promoter of line between San Diego, Los Angeles and Riverside by way of La Mesa, El Cajon and Escondido; rails laid in city park except where bridges are necessary; road enters park near city stables and emerges near City Heights.

San Diego Union, June 15, 1912, 8:1. Material ordered for Pursell line; track has been laid in Balboa Park almost to 30th Street bridge under which right-of-way passes.

San Diego Union, June 16, 1912, 9:1. Nevadans organize to boost San Diego during banquet for former governor of Nevada in the grill of U. S. Grant Hotel.

San Diego Union, June 16, 1912, 11:1-4, 15:2. What newspapers say about the Exposition.

San Diego Union, June 16, 1912, III, 17:1-2. On the Margin, by Yorick . . . Scientific exhibit at Panama-California Exposition: Archaeological, Ethnological and Anthropological Department will take the rag off the bush in competition with San Francisco's all-round, up-to-date, ultra-modern, superficial, curio-encumbered, machinery-infested showcase-littered, something-doing-every-minute exposition.

San Diego Union, June 21, 1912, 22:1. Arizona delegation enthuses over San Diego's big show.

San Diego Union, June 22, 1912, 6. Arizona may spend \$250,000 for exhibit.

San Diego Union, June 23, 1912, 5:1. Arizona's pennant is planted on site of exposition building.

San Diego Sun, June 25, 1912. Can't Build Schools on Park Land: Julius Wangenheim, president of Park Board, says, "Not my policy"; Board of Education wants block near northeast corner of Balboa Park, 500x500; 120 residents of neighboring districts petitioned Board of Park Commissioners "sometime ago"; Trustee George Magly: "I do not see why we should spend any part of this school money for land when the people already own land enough. Out there in the park we have 1400 acres which it will be impossible for the Park Commissioners to improve in 20 or 25 years."; Julius Wangenheim: "It is my plan and policy to keep the public park intact."

San Diego Union, June 25, 1912, 8:4. Plan to beautify Balboa Park is proposed.

San Diego Union, June 25, 1912, II, 13:1-2. Southern California Counties break ground on site allotted for exhibit.

San Diego Sun, June 27, 1912, 11. Dr. L. G. Jones, president of Board of Education, wants park lands for city schools; suggests an election.

San Diego Sun, June 27, 1912, 20:2. General plan to create interest for stadium outlined; \$125,000 necessary; Order of Panama to raise \$25,000; State Societies will contribute \$25,000.

San Diego Union, June 27, 1912, 6:4. Southern California Counties plan for action; grading of site for join exhibit begins next week.

San Diego Union, June 27, 1912, 6:5. Secretary Knox to send out international invitations to participate in San Diego exposition.

San Diego Union, June 27, 1912, 12:1. Park Board favors accepted site for stadium.

San Diego Sun, June 28, 1912, 15:4. Pickpockets in city park working people on park benches near Upas Street.

San Diego Union, July 2, 1912, 5:4. Federation of State Societies supported stadium project at meeting last night.

San Diego Union, July 5, 1912, 9:5. Stadium project makes progress; preliminary sketches and estimates to be ready within week; meeting of Order of Panama.

San Diego Sun, July 6, 1912, 1:7. Pursell loses extension of franchise; time was up July 2 for filing bond with city clerk.

San Diego Union, July 7, 1912, II, 10:2. Businessmen lend support to stadium.

San Diego Union, July 9, 1912, 8:4. Pursell Railway \$15,000 Bond Rejection. . . . Council demands financial reliability of construction company be established; Pursell promised sufficient funds would be available July 12 from London bankers to complete road.

San Diego Union, July 10, 1912, 9:3. Committee sends invitation to architects and engineers of City to offer suggestions for proposed stadium

San Diego Union, July 11, 1912, 8:1. Collier reports that South American republics are highly favorable to San Diego; has finished the work that took him to South America and has sailed for Europe en route to the United States.

San Diego Union, July 12, 1912, 5:4. Material Men's Association of San Diego cancel stock subscription and make straight cash donation to Fair of \$10,000; \$2,500 to be paid at once; statement by Director F. J.

Belcher: "We would urge upon your managing body the advisability and necessity of restricting the scope of the exposition well within limits, insuring the quality rather than the quantity of the exhibits."

San Diego Sun, July 13, 1912, 1:1-2. Plan to cede part of park for schools; Wangenheim proposes to cut off park at south end generally between Date and A Streets so that instead of forming an irregularly-shaped figure, it will be a quadrangle.

San Diego Union, July 14, 1912, II, 9:1-4. Citizens of every class indorse stadium.

San Diego Union, July 14, 1912, II, 24:1. Wangenheim would cede part of park. . . . In answer to the request of the Board of Education for the use of lands in the city park for school purposes, President Julius Wangenheim has replied with a counter proposition, to give the school authorities part of the park outright.

The part he would cede is an irregularly shaped tract at the south end of the park, between A and Date streets. The cession of this land would leave the park in the form of a quadrangle, and would surrender the site of the high school, the proposed stadium and the children's home.

The plan, which has not yet been considered by the School Board, would have to be ratified by the voters and the legislature.

Chairman George Magly of the School Board has contended that the Park Board ought to give one or more school sites without any preliminary elections.

San Diego Union, July 16, 1912, 10:1. City Attorney ordered to probe Pursell bond; Councilman Sehon not satisfied with surety given by Railway Company.

San Diego Union, July 17, 1912, 10:1. Robert Newton Lynch, president of California Development Board, visits Exposition grounds and expresses surprise at progress made.

San Diego Sun, July 18, 1912, 1:8. Exposition stockholders vote to raise stock from \$1,000,000 to \$3,500,000; vice president Davidson and Director-General Sefton go over accomplishments; vice president George Burnham defends Collier: "If he is given a little incidental publicity in connection with his work, he is entitled to it."

San Diego Union, July 18, 1912, 18:1. Council rejected Pursell railroad bond yesterday on advice of City Attorney W. R. Andrews.

San Diego Sun, July 19, 1912, 1:4-6. How San Diego's Exposition will look in 1915; drawing.

San Diego Union, July 19, 1912, 5:1. Exposition stock is increased to \$3,500,000; growing prosperity of city and enlarged scope of Fair lead to action; former capital was \$1,000,000; 68,731 shares of stock represented; no dissenting votes cast; meeting held yesterday in Administration Building on Exposition grounds; vice president George D. Burnham said, "Certain persons have claimed Charlie Collier is getting too much publicity." Burnham explained Collier serves without salary and does not have an expense account.

San Diego Union, July 21, 1912, V, 40:1-2. What newspapers say about Exposition.

San Diego Union, July 23, 1912, 10:4. Governor of Colorado and others promise big exhibit at Fair; R. O. Willison, architect, preparing plans for Colorado building.

San Diego Union, July 23, 1912, 13:2. Pursell fails to file surety bond.

San Diego Union, July 24, 1912, II, 11:2. Hogaboom assured Wyoming will exhibit at San Diego Fair.

San Diego Sun, July 15, 1912, 3:5. Sefton goes east to meet Collier in Chicago; Collier arrived in New York yesterday from South America.

San Diego Union, July 25, 1912, 11:3. Sefton goes to meet Collier in New York; telegram announces arrival of Exposition president in that city.

San Diego Sun, July 26, 1912, 2:6. Mulveys appeal 6th Street case; filed an appeal bond in Superior Court this morning to restrain Park Commissioners from grading 6th Street until case has been reviewed by Appellate Court of state; claim it will leave their property high above the grade.

San Diego Union, July 27, 1912, 6:3. The R. M. McInnis Co., 8th and I Streets, has just completed a fifteen-ton, horse-drawn truck for the Panama-California Exposition Co.; built for hauling palms and heavy machinery to exposition grounds; picture.

San Diego Union, July 31, 1912, 9:3. Forward favors stadium project; Park Board member says his associates also favor idea.

San Diego Union, August 1, 1912, 9:3. Four sets of plans for stadium are submitted; Stadium Committee listens for two hours to explanations by architects; no decision is reached.

San Diego Sun, August 2, 1912, 8:2. Order of Panama has approved Quayle Bros. and Cressey's plans for stadium.

San Diego Union, August 2, 1912, 3:2-5. Committee of Order of Panama selects stadium plans; design adapted to site; open-air auditorium to be one of adjuncts of structure; plans of Quayle Brothers and Cressey approved yesterday.

San Diego Sun, August 3, 1912, 11:1-2. Collier fell in with a delegation of the National Association of Coffee Importers of the United States during his tour of Brazil; was wined and dined and his picture was published in local periodicals.

San Diego Union, August 4, 1912, 5:1. Propose whirlwind campaign for stadium fund.

San Diego Union, August 4, 1912, 14:1. Mulveys file bond in sum of \$5,000; John H. Gay also in fight to prevent extension of 6th Street.

San Diego Union, August 5, 1912. Park Commission has proposed a new ordinance for city park to submit to Council:

- Unlawful to drive any vehicle faster than 8 mph
- to ride bicycles on pathways
- to conduct a parade without a permit
- to play games except in places specified
- to peddle articles
- to camp or tarry overnight
- to use bad language
- to conduct an entertainment or game of chance
- to deposit rubbish or garbage
- to kill birds or animals
- to deface property
- to distribute handbills or post advertising matter

San Diego Sun, August 6, 1912, 1:6. Collier happy to be back.

San Diego Sun, August 6, 1912, 1:8. Firebug ignites entrance arch of Exposition.

San Diego Union, August 6, 1912, II, 9:2. Ringling to return today to conclude deal for zoo grounds; circus magnate expected to close negotiations for Balboa Park quarters.

San Diego Union, August 6, 1912, II, 9:2. Shortly before 12 o'clock last night the archway leading to the Exposition from the end of Laurel Street was practically destroyed by fire of unknown origin.

San Diego Union, August 7, 1912, 10:1. Collier brings good news from Brazil; that nation will participate in 1915 show; plunges into Exposition work.

San Diego Union, August 8, 1912, 14:1. Collier tells of visit to Brazil . . . Dressed in the full costume of the Brazilian equivalent of the American cowpuncher, booted and spurred, as the Brazilians are, with striped poncho of the hair of the alpaca and breeches of balloon shape, with wide belt, a wide sombrero shading his face, bronzed by exposure to the sunshine of the South American republic, Colonel D. C. Collier, "the gallant admiral," strode into the assembly hall of the Cortes Order of Panama at the beginning of the meeting Tuesday night. He was enthusiastically welcomed by the large gathering. As the founder of the order, he was accorded the reception due him, but as San Diego's booster king returned to his throne, he was given an evidence that his efforts in behalf of the city he loves were appreciated by those who make up the hustling booster organization.

San Diego Union, August 9, 1912, 9:1. Committee formed to look after Arizonans; Exposition officials, Chamber of Commerce and others unite their forces; arrange program Sunday.

San Diego Union, August 10, 1912, 8:1. W. L. Ellerbeck, Salt Lake man, writes letter urging Governor of Utah to install exhibit here.

San Diego Union, August 10, 1912, 10:1. Committee headed by Winfield Hogaboom to entertain delegates from Arizona increased.

San Diego Union, August 10, 1912, 10:4. Under the direction of Colonel D. C. Collier a party of archaeologists will leave San Diego Sunday morning for Palomar mountain to search for a buried city, or at least relics of a forgotten race. Professor Hewett of the University of New Mexico will be in charge of the party.

San Diego Union, August 10, 1912, 12:1. Commissioner-at-large John A. Fox returns from trip to Idaho and Utah; left here in July to attend Western governors' meeting at Boise City, Idaho, August 1 to 4; ample appropriations will be asked for participation in San Diego's Fair.

San Diego Union, August 11, 1912, 8:1. Mass meeting will inaugurate campaign for stadium; "Pennant Day" is set.

San Diego Union, August 11, 1912, 24:1-3. What newspapers say about San Diego's Exposition.

San Diego Union, August 11, 1912, 29:1. Gigantic British exhibition will be held in 1915 to exploit dominions.

August 12, 1912, Marston File, San Diego Historical Society Research Archives. . . . Letter, Wangenheim to Marston: Proposal to sell 150 acres south of Date Street from 11th to 28th, Golden Hill excluded; encroachments on south side: High School, Polytechnic School, Children's Home, Stadium, playground on 26th Street; adequate amount of land could be given to each of these institutions and the rest sold or leased with approval of Park Board; move requires approval of State Legislature.

San Diego Union, August 13, 1912, 10:3. First actual work on bulkheads for harbor; million dollar improvement begun under the supervision of Engineer Capps.

San Diego Sun, August 15, 1912, 9:1. Panama-California Exposition has decided to back stadium financially; over \$1,500 is realized by the sale of pennants; Stadium Committee will get 10 percent of all new subscriptions to Exposition.

San Diego Union, August 15, 1912, 11:1. \$2,167.70 raised from sale of pennants; Collier says Exposition will support stadium project.

Park Commissioners - Minutes, August 16, 1912. Frank P. Allen, Jr. submitted plans for the Botanical Building for the Exposition to be erected in Balboa Park; plans approved.

San Diego Union, August 16, 1912, 1:7. Water bonds win by a vote of five to one.

San Diego Union, August 16, 1912, 6:1. A summer school of archaeology is to be held in San Diego from August 24 to September 2 of this year. . . . It was through the work of D. C. Collier and Dr. Edgar L. Hewett that the school was established here and a notable faculty induced to come here and deliver a series of lectures.

San Diego Union, August 16, 1912, 10:1. New Mexico plans fine exhibit for Fair; Commissioners will present outlines to Legislature at a meeting in January; details.

San Diego Union, August 17, 1912, II, 11:2. Joseph W. Sefton, Jr. resigns as Director-General; Frank P. Allen is successor; Allen will remain as Director of Works and will assume the duties of Director General without increase of salary.

San Diego Union, August 18, 1912, 5:1. Arizona girls conclude visit.

San Diego Union, August 18, 1912, 8:1. Summer school of archaeology to begin August 25; institution brought to San Diego through efforts of D. C. Collier; 30 lectures to be given.

San Diego Union, August 21, 1912, II,13:1. Dr. Edgar L. Hewett is now at work digging an ancient palace out of a forest near Quirigua, Guatemala; Panama-California Exposition is one of backers of expedition.

San Diego Union, August 22, 1912, II, 9:2. Elephants from projected zoo at Ocean Beach to be used on work of local Exposition.

August 23, 1912, Board of Park Commissioners, Correspondence, Box 1, San Diego Public Library, File Board of Park Commissioners - 1912: Letter, Frank P. Allen, Jr. to Julius Wangeheim . . . Received plans for Goodhue bridge . . . If it runs too high and it is decided to build small arch bridge, will probably commence construction in September . . . Plans for Botanical Building will probably be finished by last of September.

San Diego Union, August 23, 1912, 9 (whole page). Spreckels Theater opens tonight.

San Diego Sun, August 24, 1912, 4:2-4. "Who's Who --- G. Aubrey Davidson".

San Diego Union, August 25, 1912, 10:1. Inyo County will have exhibit at Fair.

San Diego Union, August 25, 1912, 16:1-2. What Newspapers Say About the Exposition.

San Diego Union, August 29, 1912, 6:3-5. New Mexico commissioners plant pennant on Exposition site this morning; across main drive from Arizona site, opposite Juniper Street and in front of Administration Building; New Mexico state legislature has yet to make appropriation.

San Diego Sun, August 30, 1912, 1:8. George W. Pursell's permit to run an electric railway through the park has been declared expired by the Park Commissioners, according to announcement made to the City Council today by Mayor Wadham.

San Diego Sun, August 30, 1912, 10:1. Drivers charge city park roads are in bad shape; sign at 12th Street entrance to park warns people not to take Park Boulevard road as it is dangerous; another sign advises people to take the Canyon road.

San Diego Union, August 30, 1912, 1:8. Trans-Mississippi Commercial Conference, meeting in Salt Lake City, Utah, recommends federal funds for both San Francisco (\$5 million) and San Diego (\$1 million) Fairs.

San Diego Sun, August 31, 1912, 4:2-4. "Who's Who --- Colonel Ed Fletcher".

San Diego Union, August 31, 1912, 9:1. Dr. John Harrington illustrates talk on Indians with weapons and utensils.

San Diego Union, August 31, 1912, 12:1. Vreeland resigns as secretary of Exposition; said he could no longer spare time from his private business; Hogaboom takes his place; J. W. Sefton and R. C. Allen added to executive committee. . . . Collier left yesterday afternoon for Santa Fe, New Mexico, and Hogaboom for San Francisco . . . Commissioners of Sacramento Valley and north of Bay counties to visit San Diego, September 6 and 7.

San Diego Union, August 31, 1912, II, 13:1. Park Board cancels Pursell's line franchise.

San Diego Union, September 1, 1912, 7:1. "Holy Cities of the Maya," subject of Dr. E. L. Hewett's address tonight; plan for permanent museum.

San Diego Union, September 1, 1912, 13:1. Northern delegation to view Exposition site; will arrive on steamer **Harvard** Thursday night.

San Diego Union, September 2, 1912, 16:2. Dr. Hewett lectures on Maya.

San Diego Union, September 2, 1912, 16:3. Arizona writer here to work for annexation.

San Diego Sun, September 4, 1912, 3:3-4. McFadden and Buxton want to buy 240 acres of the east side of the park; would net the city \$2,240,000.

San Diego Union, September 4, 1912, 8:3-4. What newspapers say about Exposition.

San Diego Union, September 5, 1912, II, 1:3. McFadden and Buxton, real estate men, offer \$600,000 for 240 acres along east side of park; would convert strip into a high-class subdivision; John Forward, Park Commissioner: "I am in favor of selling part of the land and always have been." Julius Wangenheim: "I would suggest selling the tract along Date Street in preference to that on the east end. I am not in favor of the present tract as specified. I believe in the sale of some of the land, however."

Park Commissioners - Minutes, September 6, 1912. McFadden and Buxton offered to purchase 240 acres of Balboa Park.

RESOLVED, That the Board of Park Commissioners, in regular meeting assembled, hereby express themselves as opposed to any sale of park lands or any subdivision along lines contemplated by recent offer received, and, as trustees of the Park, they believe in maintaining its absolute integrity, and that while the Park may seem too large for the present population of San Diego, it will be in nowise too large for the City that in a few years we expect to have on these shores.

That the Park Commissioners consider themselves as trustees not only for the present generation, but for the generations to come, and their actions must be dictated by such responsibility.

Believing in the absolute integrity of the Park for park purposes, and for that reason, they favor the cutting off of that Southern section South of Date Street, along lines, however, not yet determined. This section of the Park has been encroached upon by the High School, the Children's Home, and other buildings, and it is because we favor keeping the Park absolutely free and clear for park purposes, that we would favor cutting off this section. Portions of it should be deeded to the School Department, the part occupied by it, to the Children's Home, and it might be advisable to give long leases to other semi-public institutions.

Out of this strip, of course, Golden Hill, the gem of the Park, must be excepted, to be maintained forever in conjunction with Balboa Park.

Legislative action will be necessary, but there will probably be no difficulty about this, as the plan must appeal to the lovers of the Park and to those who believe in getting rid of a portion of it.

San Diego Examiner, September 6, 1912, EDITORIAL: Ousting of Pursell . . . The expected has happened. The Pursell road has been ousted from the city park, which means that Mr. Pursell will not be permitted to finish his electric road, which he has been working on so faithfully for two years.

Mr. Pursell has been bucking a hard proposition ever since he started to build the road, as certain persons in San Diego have been placing every obstacle possible in his path.

It is a fact that Mr. Pursell is not a wealthy man, consequently he had the enmity of some persons the moment he launched the electric road to the back country.

In all fairness to Mr. Pursell, the city at large should allow him every courtesy possible and assist him to get his road in operation.

Railroads and interurban trolleys are what San Diego needs, and yet certain officials are blocking the progress of our city by refusing to extend the time and finally ousting Mr. Pursell from the city park, though which the road was to run.

Why not build a Chinese wall around our city and inform all outsiders they are not wanted here at present? This is the attitude of certain city officials. Mr. Pursell has the promise of financial assistance from outsiders if he could get his time extended.

San Diego Examiner, September 6, 1912, 7:1-6. Panama-California Exposition will be mammoth and unique.

San Diego Sun, September 6, 1912, 9:1. Northern commissioners promise to support Fair.

San Diego Union, September 6, 1912, II, 7:1. Forty commissioners to Exposition will pass two days conferring with Fair committee about sites; North of Bay, Inyo and Alameda Counties, and Sacramento Valley represented.

San Diego Union, September 7, 1912, 1:4-5. Fair is assured recognition in north; Commissioners will recommend exhibits at San Diego.

San Diego Union, September 7, 1912, 9:1. Board refused, September 6, to sell any part of the park; McFadden and Buxton offered \$600,000 for 240 acres and William Humphries offered \$2,240,000 for 160 acres in center of the park.

San Diego Union, September 7, 1912, II, 13:1. Southern California Counties plans to spend \$350,000 at Exposition.

San Diego Union, September 8, 1912, 15:1. Commissioners from north banqueted.

San Diego Union, September 12, 1912, II, 13:1. Commissioners of Orange and San Bernardino Counties inspect operations; pleased with progress.

San Diego Sun, September 13, 1912, 1:7-8. City Park Board would bar small picnic parties of less than 25 people; would also prohibit anything heavier than 2,000 pound load traveling on any park road except the one from 18th Street across to the northeast.

San Diego Union, September 13, 1912, 12:6. Collier returns from trip to New Mexico; plans made for San Bernardino and Orange Counties exhibits at Fair.

Park Commissioners - Minutes, September 14, 1912. Percy J. Benbough wants to improve portion of Balboa Park between 7th and 8th Streets with lawns and to maintain for five years at his own expense.

San Diego Union, September 14, 1912, 8:1. Placer County may send Exposition exhibit; commissioners here to inspect park.

San Diego Union, September 14, 1912, 10:3. Buildings and Grounds Committee accepts two Fair Building designs: Designs and plans for the Electricity Building, as drawn by architect Bertram G. Goodhue, were presented and approved; the monster Botanical Building, which will consist of a lath house 600 feet square and 58 feet high, was shown in detailed design and approved. This is also the work of Architect Goodhue..

San Diego Union, September 15, 1912, 1:5. Electric edifice at Fair will sparkle with beauty and rival famous tower at Buffalo; modeled after the Palace of the Count of Heras in Mexico City; construction to begin about October 15; Botanical Building to begin in a few weeks; work on bridge set for near future.

San Diego Union, September 15, 1912, II, 16:1. Japan's Exposition Commissioner here to select Fair site; M.Yaranawkai, representative of Associated Trade Organizations of Japan, said, September 14, Japan would probably need 12,000 feet of floor space and a large ground area for a tea house and garden.

San Diego Union, September 15, 1912, VI, 41:1-5. What newspapers say about the Exposition.

San Diego Sun, September 16, 1912, 9:7-8. Construction work on Fair will be rushed; Buildings and Grounds Committee instructs Frank P. Allen to begin work on a 7-arch bridge; bids for 3-arch bridge designed by B. Goodhue were rejected as they did not come within the \$150,000 limit nor conform to design; designs for Electricity Building and Botanical Building approved; Botanical Building to be largest lath house ever constructed, 600 feet square and 53 feet high.

San Diego Union, September 17, 1912, 1:4-5. Japanese officials and cadets marvel at work accomplished and planned by Exposition; workmen engaged in grading and excavating the abutments of the bridge.

Park Commissioners - Minutes, September 21, 1912. 60 acres set aside at Point Loma for a city park named Collier Park.

San Diego Union, September 22, 1912, 48:1-2. What newspapers say about the Exposition.

San Diego Union, September 23, 1912, 18:1. University of California professor considering a busy bee exhibit at Fair.

San Diego Union, September 24, 1912, II, 11:4. Citizens of Arkansas favor building for Fair.

San Diego Union, September 25, 1912, 8:4. Frank P. Allen to confer with directors; leaves to attend meetings in northern part of state.

San Diego Union, September 26, 1912, II, 11:2. Commission formed by northern counties to exhibit at Fair; building plans will be outlined at meeting within week.

San Diego Union, September 27, 1912, 8:1. Railroad men say Fair site is fine.

San Diego Union, September 27, 1912, II, 13:3. Collier addresses Conference of Southern California Alliance in session here; 18 million adherents.

San Diego Sun, September 28, 1912, 1:6. Collier free; cop dismissed; Exposition head ran car on Santa Fe platform; patrolman J. M. Campbell made arrest; Chief Wilson say his discharge of Campbell had nothing to do with Collier's arrest.

San Diego Union, September 29, 1912, II, 9:2. Twelve northern counties pledge joint exhibit at Fair; plans for building to be made at once.

San Diego Union, September 29, 1912, 24:1-2. What newspapers say about the Exposition.

San Diego Sun, September 30, 1912. Appeal to the People . . . Protesting 6th Street Extension and advocating contour boulevard on rim of canyon to the east instead; letters signed by Willard Brown Thorp, Mrs. Mulvey, Mrs. Frary, John H. Gay, D. C. Reed, and C. S. Alverson, City Engineer.

October, 1912, **The California Garden**, pp. 3-4. The Sixth Street Extension . . . In the lively discussion as to the advisability of extending Sixth street through, or rather over, the little canyon park that blocks its straight and narrow path, there is quite a ray of hope for the future and that lies in the fact that reputable citizens entirely uninterested financially in the matter have been found to protest publicly against this improvement (?). Our gridiron form of street plan has pushed its devastating way through slightly hills and over pleasant canyons, tearing down one to fill up the other, so long, not only unopposed, but even uncriticized, that it was but natural to regard it as inevitable, like the doctrine of original sin. The present protest may not save the little canyon, but it surely will encourage the growth of a saving heresy in the orthodoxy of our level and square progress. Eye specialists classify a disease that restricts the vision to a straight line, the victim sees neither up nor down, nor to the right, nor to the left. We are suffering from the same trouble in our mind's eye. There is a pesky ant called the army ant, or maybe it's a land crab, anyway that does not matter, that on march keeps straight ahead. If it comes to a tree, it climbs up one side and goes down the other and so with every obstruction, it has no niche in its brain for the doctrine of least resistance. San Diego probably would vote that ant a fool, yet its methods in street building have a similarity to the ant in marching. It is admitted that the persistency of both is admirable.

We are in an age of cement, a hard, unyielding, soulless stuff, that hates a curve. It has invaded our offices, our houses, our streets and our gardens even. Today there are cement flowerpots, seats, fountains, even fence posts, and it is encasing our souls in a four-square little box. Perhaps a natural reaction from the "gingerbread" everything of boom days. There are still some specimens of architecture of the 80's that would look funny beside the Grant Hotel, but the Grant Hotel would have looked funny in the 80's. To state that we have not progressed since boom times would be not simply untrue, but silly, but it is true and well to remember that mere multiplication is not necessarily growth.

May the Sixth Street Canyon weather the march of "cementation" that threatens its existence, and long remain a monument to the beginning of a new era, a beautiful, a sane era in the building of San Diego --- and may those that have fought for its preservation escape part of the usual fate of the righteous whose reward in heaven is preceded by damnation on earth.

San Diego Union, October 2, 1912, 5:2. Northern counties to have exhibits at Fair; Commissioner W. Jefferson Davis assured that generous fund will be provided.

San Diego Union, October 2, 1912, 6:1. Order of Panama will extend to other states; articles of incorporation adopted at the regular meeting of Cortez.

San Diego Union, October 2, 1912, II, 13:2. Democrats put San Diego Exposition in State platform; party in Colorado will recommend liberal appropriation for exhibit.

San Diego Union, October 3, 1912, 12:4. Former policeman who arrested Collier locked up; will answer charge today.

San Diego Union, October 4, 1912, 6:4. Collier goes east on Fair business; practically all the counties of the state will participate in the Exposition.

San Diego Union, October 6, 1912, II, 11:2. Senator Newlands of Nevada lends aid to San Diego Fair; promoted favorable action of International Irrigation Congress; to assist in preparation of irrigation exhibit.

San Diego Union, October 6, 1912, 38:1-2. What newspapers say about the Exposition.

San Diego Union, October 6, 1912, 49 (whole page). Views of the trees and shrubbery in Mulvey Canyon which are in danger of being destroyed.

Chapter 64, pp. 351-363: San Diego - Panama Exposition (Note: the following article should be read with caution as it contains numerous errors.)

On July 19, 1911, ground was broken for the exposition to be held in San Diego, commemorative of the opening of the Panama canal. The pageantry exercises at the exposition grounds and noted men and women taking part therein, were all described in a felicitous manner by John S. McGroarty, editor of the **West Coast Magazine**. His article is given below:

“On July 19th last ground was broken for the Panama-California Exposition at San Diego. On the day of the groundbreaking and for three days following, the event was fittingly celebrated in a most unique, unusual and impressive manner by the people of San Diego and many thousands of visitors from other parts of California and the world. Pageantry by day and by night, carnival that revived the old Spanish spirit of care-free and pleasure-loving California, music, color and gaiety held sway.

“Historically, epoch-making, and from a serious point of view the celebration was distinctly important. The success of it all, which was very notable, indeed, is regarded as a certain indication that San Diego’s Exposition in 1915 will prove the most attractive as well as the most unique show ever given on the American continent.

“The San Diego Exposition will be entirely different from the world’s fair to be held in San Francisco in 1915. The San Diego show will be a Pan-American affair. Congress has recently authorized the president to request the republics of South and Central America to participate in the Exposition at San Diego. As a consequence, these nations will make great efforts to be splendidly represented. In addition to all this, our own southwest will be exploited in a fascinating manner, its ancient life and history will be shown - antedating as it does, the civilization of any other portion of the United States --- and its progress in mineral, agricultural and commercial lines will be brought out in an original and vivid manner. Irrigation will be particularly exploited with all the miracles that have been wrought in its name.

“The San Diego Exposition will be a floral and a horticultural wonder. It will be an archaeological and ethnological marvel. Every flower that grows, every tree than man has known, the prehistoric races of man, the ancient temples in which they worshipped, the sacrificial altars, the pueblos, the cliff dwellings and the teepees of the nomads --- all these will appear. No exposition of such fascinating possibilities has ever been planned or dreamed of before anywhere in the world.

“The groundbreaking for the Exposition was fixed to place practically on the anniversary of the foundation of San Diego, which is also the date that marks the beginning of California as an integral part of the civilized world. California was discovered in the year 1542, only fifty years after Columbus had discovered the New World, but it was not until July 1, 1769, that the Franciscan padres came to San Diego bearing with them the Cross of Christianity and the stakes of the white man’s civilization. On July 16, 1769, the Mission of San Diego was founded --- the first of that marvelous line of Mission Hospices that were builded along El Camino Real, the “King’s Highway” between San Diego and Sonoma, a distance of 700 miles, the remains of which now constitute the only historical ruins of any extent existing within the borders of the United States.

“It was fitting and entirely consistent, therefore, that the groundbreaking for San Diego’s Exposition which is to celebrate the completion of the Panama Canal, should be held in the month of July, the month of the first

miracle performed one hundred and forty-two years ago before on the same spot, under the same blue sky, and on the shores of the same bright Harbor of the Sun. And it is no wonder that the people gathered from far and near by the thousands and hundreds of thousands to witness an event at once so stirring and fascinating, appealing as it did to the imagination of even the dullest beholder.

“The first act which the first white men who settled in California performed was the celebration of a military mass on the shores of San Diego bay. It was done by the Franciscan Fathers, assisted by the Spanish military forces which accompanied the expedition from Old Mexico.

“In order, then, to preserve the atmosphere of history, the Exposition groundbreaking began also with the celebration of a military mass celebrated by Franciscan Fathers on the same historic spot. Thus was the pendulum of history swung backward across the dusty pathways of nearly a century and a half of time on the morning of July 19, 1911, in San Diego.

“On the shores of the Harbor of the Sun the same Te Deum was sung that Junipero Serra chanted when he came up from La Paz with Don Gaspar de Portola, footsore and weary, but with a heart bursting with joy as he plucked a wild rose from its stem and said: ‘The is a beautiful land. The roses are like the roses of Castile.’

“From far away Santa Barbara, San Luis Rey, and the still more distant missions of the Sierra came, cowed and sandaled, the brown priests of St. Francis. In the heart of the hills that overlook the Sunset Sea and the purpled isles of the Coronados they reared an altar hard by the old Presidio Hill on which Father Serra had builded the first Christian shrine ever erected on these western shores. Not far away they could see the ruined towers and crumbled walls of the ancient Mission of San Diego de Alcala which signalized the first victory of civilization over heathenism in California. Almost at their feet tricked the waters of the first irrigation ditch ever made by white men within the borders of the United States, as at present constituted. Down in the quiet, peaceful Mission Valley stretched the sacred fields where was shed the blood of California’s first martyr,

“The celebration of the Solemn Pontifical Military Field Mass was a most entrancing and colorful spectacle. It was carried out with not only all the precision of military discipline, but also with the perfect organization of the Roman liturgy. The swing of the centuries was behind it.

“The magnificent altar, set in a natural amphitheater with the blue sky for its dome was an exact replica of an old altar of Loreto. An immense painting of Our Lady of Carmel formed the background. The floors were of spotless white and the enclosures were of Roman pillars adorned with gorgeous wild flowers and cut roses from the magic gardens of San Diego.

“Twenty-five thousand people were gathered on the open hillsides as the procession of acolytes, friars, secular clergy, distinguished guests, the Bishop and the military filed across the new made trails down to the altar. A hush fell upon the multitudes for a moment; they then broke into a deep murmur of admiration that sounded like the tones of some mighty organ.

“Franciscan priests were in full charge of the mass, the celebrant being Father Benedict, Provincial of the Order, who came from St. Louis for the occasion. Rt. Rev. Thomas James Conaty, Bishop of Monterey and Los Angeles, occupied a purple throne. Fully one hundred clergymen attended him. Within the sanctuary were seated Hon. John Barrett, representing the president of the United States, and Joseph W. Sefton, representing the director-general of the Exposition, recipients of the most unusual honor to non-Catholics.

“After the bugles of the troopers ceased to ring their wild music across the sun swept hills, the band played ‘Nearer My God To Thee,’ and then the stately bishop in his resplendent vestments arose in Cappa Magna and delivered the historical address of the day. It was a notable oratorical effort and was received with cheer after cheer by the people present, who represented all shades of religious belief.

“The actual groundbreaking ceremonies took place on the same spot where the Military Field Mass had been celebrated. The program began in the early afternoon in the presence of another monster throng of people.

“When the procession arrived at the site selected for the future exposition buildings, U. S. Grant, Jr. introduced Rev. Edward F. Hallenbeck, pastor of the First Presbyterian church, who delivered an invocation. This was followed by the exposition ode, ‘1915,’ sung by a triple quartet. Mr. Grant then presented Joseph W. Sefton, Jr., acting director-general, as master of ceremonies. Mr. Sefton made a short welcoming speech and introduced Acting Mayor P. E. Woods. The latter in turn presented Lee C. Gates, the representative of Governor Johnson. Mr. Gates spoke eloquently of the glories of California. Hon. John Barrett, as the representative of President Taft, made a brief address.

“Then came the actual groundbreaking. Mr. Sefton loosened the earth with a silver pick. He then handed a silver spade to Mr. Barrett and the latter turned the first sod. The spade was then passed in succession to Mr. Grant, Acting Mayor Wood, Mr. Gates, President Charles Moore of the Panama-Pacific Exposition, John D. Spreckels, Governor Richard E. Sloan of Arizona, Will H. Parry, representing the governor of Washington, and to several prominent San Diego citizens. Each turned a spadeful of earth, the implement being finally passed back to Mr. Sefton, who turned the last sod.

“Mr. Barrett again addressed the gathering, this time in behalf of the Pan-American republics. Then followed the unfurling of the American flag to the strains of the ‘Star Spangled Banner.’ Next the President’s flag was broken out amid a great cheering, the release being effected by President Taft touching an electric button at the White House. The band greeted the President’s flag with ‘Hail Columbia.’

“Flags of the southern republics were next thrown to the breeze as the band played a medley of the airs of all nations.

“G. Aubrey Davidson spoke on ‘The Inauguration of the Panama-California Exposition.’ He was followed by Charles C. Moore, whose theme was ‘San Francisco and Her Great World’s Fair.’

“Several San Diego gentlemen followed with remarks. The band played a medley of national airs and the groundbreaking ceremonies were ended.

During his address Mr. Barrett read the following letter from the president of the United States:

‘The White House, Washington,

July 11, 1911

‘My Dear Mr. Barrett: I have yours of July 11, in which you advise me that in response to an invitation to you as director-general of the Pan-American Union you are going to the groundbreaking of the Panama-California Exposition, to be held in San Diego from January 1 to December 31, 1915. This ceremony, I believe, is to take place from the 19th to the 22nd of the present month.

‘I beg that you will acknowledge for me the courtesy of the management in having extended an invitation to me to attend this ceremony. I cannot myself be present, but I should be very glad to have you represent me there and make appropriate remarks on the occasion.

‘San Diego is so situated that she is necessarily very much interested in the opening of the Panama Canal, and the fact that this exposition is to give particular attention to the relations between this country and Central and South American countries is sufficient reason why the American public should be especially interested in its success.

‘You will convey my compliments to the managers and to the people of San Diego and say to them what you know of my interest in our Central and South American relations and in the usefulness and successful issue of the exposition.

‘Sincerely yours,

‘William H. Taft

‘Hon. John Barrett, Director-General, Pan-American Union.

‘PS - I know San Diego because I have been there twice, my father and mother and sister lived there for years, and my father died there. I appreciate the singular beauty of its situation and the wonderful character of its climate. And all these circumstances give me a personal interest in promoting its welfare and in helping to assure the success of an enterprise like this. W. H. T.’

“On the evening of the first day of the celebration the long looked for arrival of ‘King Cabrillo’ and the crowning of ‘Queen Ramona’ nearly approached the dignity of pageantry although conceived wholly in a spirit of pleasantry. The light on the waters of the bay and the costumes of the queen and her ladies in waiting were quite gorgeous.

“The affair was handled with admirable care and success. A Spanish caravel was seen to come from across the waters of the harbor just as sunset. As the ancient vessel slowly crept from North Island toward the pier in San Diego the tremendous throngs on shore seemed to grow excited. Lights flashed from all kinds of craft in the harbor --- here, there and everywhere. The caravel sailed on and on and at length reached the shore.

“In the prow of the ship a strange figure appeared who announced that he was Juan Rodriguez Cabrillo, the discoverer of California, and that he had returned to revisit the scene of his exploits in the year 1542, when he first came to San Diego. Cabrillo seemed to doubt that the magnificent city he saw before him could possibly be the San Diego of old. He was assured that it was the identical spot and he was urged to come ashore and accept the freedom of the city which he had put on the map nearly four hundred years ago. A golden key to the city’s gates was placed in the old sailor’s hands and he was told that the people were eager to declare him king in preference to Colonel Collier or anybody else.

“His welcome seemed so genuine that Cabrillo was delighted, and he stepped ashore, whereupon he was placed in a sedan chair and borne by a band of Indian carriers up the main street of the town until the courthouse was reached. There at the doorway of the temple of justice, he found Queen Ramona sitting on a golden throne. The mob wildly demanded that Cabrillo should crown the queen. The immortal navigator gladly complied, performing the ceremony with all the traditional chivalry of his nation.

“Ten thousand people then swept both Cabrillo and Ramona before them to ‘The Isthmus,’ which was a wonderful place similar to the Pike at St. Louis or the Midway at Chicago. There were endless noises from countless horns and a din that would raise the padres from their graves in the Old Mission churchyard.

“The Queen, who in private life is Miss Helene Richards of Point Loma, was chosen for her exalted position by a vote of the people, her popularity outrunning all rivals. Tall, and possessed of a brunette beauty, she graced her position and became the most acclaimed personage of the carnival. Wherever she went she was greeted with salvos of cheers. Prominent ladies and gentlemen of San Diego formed Her Majesty’s court and did much to make it the striking success that it was.

“On the morning of the second day there was a most beautiful floral parade. At night came the Historical Pageant, the object of which was to impress upon the people, the march of time in the magnificent southwest, the land of sunshine, of wastes redeemed by living waters from immemorial deserts; and to pay tribute to the ancient art and skill in engineering which not only the Franciscan fathers displayed nearly a century and a half ago, but also to acknowledge the greatness of the old Aztecs, who made the southwest their place of dwelling longer ago than the memory of man.

“The idea of the poet who conceived the pageant was to carry the people in imagination out of the mists of forgotten times, along the fateful pathway of the centuries, down to yesterday, with a glimpse of the vistas of tomorrow.

“What the poet dreamed, the consummate skill of the artist carried out. To Edwin H. Cough, the poet, and to Henry Kabierske, the artist, let the praise be given.

“The first float in the pageant represented a group of ancient Aztec priests sacrificing to the god of war. To make this representation faithful Mr. Cough drew upon all his vast knowledge of Aztec history and tradition as well as the mind of man can conceive it. We saw the priests of that wonderful civilization which was as old as Egypt. As the picture went slowly through the streets, the dullest imagination could not but feel the glamour of another day that faded long before the Atlantic shores knew the white man’s footsteps.

“Next came Balboa taking possession of the Pacific for the King of Spain. It was all as innumerable American boys have seen it in history and geography from the childhood of Benjamin Franklin to the present hour. There stood the great conquistador in helmet and coat of mail, knee deep in the waters of the mother of all oceans, the banner of Castile in one hand and his sword in the other, as he shouted to wind and wave that all the vast expanse of billows before him was then and should forever be vassal to the monarch whose golden throne bore the arms of Castilian power.

“Then came the next step in the tragedy of the years that saw the fall of Aztec dynasties and the rise of Christian rule. The tableau showed Montezuma in the dust and Cortez, the grim Spanish conqueror, standing triumphantly over him. About the fallen king were his dead warriors, who had once beaten Spain back and whose prowess and valor had sent Cortez weeping under the yew tree on that black night of his bitter defeat. But the Aztecs were doomed to go down at last. Spain was not long to be balked. The picture brought out very vividly the terrible page in history which it was designed to delineate. Following the conquest of Mexico history tells the thrilling story of the search for the famed seven cities of Cibola. Cortez was the most eager man of his time to find those cities which were said to be built of gold.

“Faithful to the chronicle, the fourth float in the pageant portrayed Cortez directing Juan Rodriguez Cabrillo to sail northward upon the unknown seas in search of Cibola. The portrayal was one of the most striking in the procession, with the conqueror pointing to the vague distance and Cabrillo, the intrepid mariner, eagerly expressing his desire to go on that immortal voyage which resulted, not in the finding of the seven golden cities, but in the discovery of the golden land of California.

“The fifth float was the Caravel of Cabrillo. It was very beautiful, the little ship with its joyous sails that came up the coast of glory so long ago, passing into San Diego’s harbor of the sun, then on to San Pedro, to Santa Barbara and as far as the windy headland of Mendocino, whence it doubled back to leave the great admiral in his last sleep in the warm heart of the land he found.

“Now appeared the splendid pageantry of the Brown Padres who built the old California missions along the sunny stretches of El Camino Real from San Diego to Sonoma, in the Valley of the Seven Moons. The tableau showed Junipero Serra planting the cross on the shores of San Diego Bay, Surrounding the heroic figure of the old Franciscan were wondering, half-naked savages, Catalanian soldiers, the Gobernador, Don Gaspar de Portola, the neophytes from Mexico, the muleteers, and other actors in that fateful drama of July 1, 1769.

“The ninth float was one that sent the greatest thrill through the miles of spectators who lined the streets of the city. It was the tableau of the raising of the first American flag in San Diego, which was, as some authorities contend, the first American flag to be raised on the Pacific coast. There is a tradition that a man in San Diego was in advance of Sloat at Monterey in planting Old Glory on California soil, although his flag was a necessarily crude production, seeing that he manufactured it out of his own red and white underwear. The pageant ignored this prosaic legend and showed a much more poetic transaction, which was greeted with tremendous outbursts of cheers all along the line.

“A very beautiful tableau was presented by the float which had an allegorical representation of Neptune presiding at the wedding of the Atlantic and Pacific oceans, thus typifying the completion of the Panama Canal.

“The last and most elaborate float in the pageant told the story of San Diego from its first discovery by Cabrillo down to the present day, including of course, the intermediate epoch of the founding of the first mission by the Franciscans. This float, in its fascinating beauty of light and color, can be called nothing less

than a masterpiece of stage ingenuity. Here the poet and the artist reached a climax. No indoor stage could have possibly done this conception justice. It needed the open highway and that was what it had. David Belasco would have gained something in craftsmanship had he been in San Diego.

“The third day was given over to a fine industrial parade which was greatly enjoyed by the crowds. Then on the morning of the forth and last day of the celebration came the event for which the people had so eagerly looked forward. It was the Pageant of the Missions.

“There is no appeal to equal the appeal that the old Franciscan Missions make to the people of California, the whole southwest, and, indeed, the whole country. The ruins of the ancient establishments are strewn along the old King’s Highway, which was the celebrated ‘El Camino Real,’ or Royal Road of the glorious days of the Spanish era.

“The spectacle presented was without doubt the most successful attempt at pageantry ever made in America. There were twenty-one floats, each representing a mission, beginning with Mission San Diego de Alcalá, which was the first mission, and ending with the Mission San Francisco de Solano, which was the last.

“The pageant represented a stretch of more than a half century of time as to the life of the missions; that is to say, from the building of the hospice at San Diego in 1769 to the building of the Sonoma Mission in 1822. It also represented the entire length of the King’s Highway, seven hundred miles, from San Diego’s Harbor of the Sun to Sonoma’s Valley of the Seven Moons.

“There were nearly one thousand living characters in the procession, who represented monks, soldiers, knights, Indians and all the historical associations that surround not only the legends of the founding of the missions, but their actual establishment as well.

“For instance, the float representing San Juan Capistrano showed the warrior priest as he was in the distant centuries in which he lived. Characters to represent that era were brought forth. In addition to these there were characters to represent the time the mission was actually founded in California. There were hundreds of monks, trudging along on foot, hundreds of outriders, and hundreds more of Indians, soldiers and attendants.

“As the long, glorious procession came up the sunny street a deep hush fell upon the people who numbered a hundred thousand and made the biggest crowd that San Diego had ever entertained at any one time in her history. The pageant’s slow and solemn movement created the right atmosphere. It seemed as though the people were in attendance upon a religious ceremony, which it really was. Not a carnival horn was blown, not a noisy bell jangled.

“Back again from the mists and memories of the well-loved past came the brown-robed padres, so dear to the soul of California. Back came the days when a man could travel from San Diego to Sonoma and stop every night at a mission whose doors swung open to him without price.

“The replicas of the old ruins were faithfully portrayed by Mr. Kabierske, who had charge of the pageant under the direction of the Historical and Industrial Pageant Corporation of Philadelphia. This master artist here accomplished the crowning achievement of his career. He walked at the end of the procession and was greeted with hearty cheers by the assembled multitudes.

“All in all, the groundbreaking celebration here described was a splendid augury of the success with which San Diego will carry out the California-Panama Exposition of 1915. The pageantry and the carnival gave us a foretaste of which we shall see and hear when the trails of all the world lead to the Harbor of the Sun, less than four years hence, and the show shall be in full swing on these bright and luring shores.”

Steadily forward has been the movement of the forces engaged in preparing for the record that is to be written in San Diego in 1915 in celebration of the formal opening of the Panama canal. There has been no cessation of activities, nor even a slacking of the steady forward movement with which the preparatory work of the exposition has been prosecuted. The work of the year has been that of laying the foundation of the

great project, making smooth the rough spots and paving the way for the greater building work that is to mark the year 1913.

To plan and execute a mammoth project requires time and care and the constant vigilance and earnest application of a force working in harmony throughout every department. So much of the ultimate success of an enterprise depends upon the care with which the ground work is constructed that the year just closed has been one of unusual importance to the exposition management, and yet there has been in the year such a condition of harmony and such hearty cooperation throughout the construction forces that the exposition officials feel that the work of the year has been well done and that a substantial basis has been established for the work yet to be done.

It has been written that "All roads lead to Rome." The simile may be found in that the roads traveled by all departments of the exposition work have had a common center and now, at the end of the year, it is found that all have served to work to a common purpose. As in the weaving of a blanket the warp and woof cross and recross, in the end producing one great whole, so have the diversified threads of effort at the exposition ground, interlaced, been vitalized and now, at the beginning of the year of greater construction, give assured promise of the fulfillment of the magnificent plans of ultimate decoration and arrangement.

The progress of the year at the exposition is written in letters large. The first notable work was the completion of the administration building at the eastern approach to the Canyon de Cabrillo, where are housed the departments and from which are directed all the works on the grounds. As the scope of these works widened the departmental forces were enlarged until now the administration building is a hive of humanity. Each department has found multiplied details of labor to accomplish, but these have been met with vigor and the departments are well organized as a result of the year's activities.

Other buildings that will have permanent place during the exposition have been erected during the year. The first of these to be constructed was the service building, where are housed the horses and wagons used in exposition construction work, and where are stored all the construction supplies purchased in large quantities. This building, while serving a utilitarian purpose only, is of mission style of architecture. This building is the distributing point for all jobs on the grounds. When its present use is terminated the structure will become the headquarters of the exposition street cleaning department and an emergency repair station, this continuing throughout the exposition year.

The new years will bring thriving activities in building construction at the exposition, and this work is certain to be attended by accidents. Little of the work done in 1912 has involved workmen in danger, but meeting the demand that must arise later, the exposition management prepared and opened on December 15 an emergency hospital. This building carries, of course, the mission style of architecture. It is in charge of Dr. C. L. Caven as medical director.

Of more than passing interest is the exposition hospital. It will serve in all cases of accidents to employees of the exposition company from the date of its opening to the close of the exposition and also all emergency cases requiring surgical or medical treatment arising on the exposition grounds during the exposition period. The operating room is equipped as completely as that of any other hospital on the Pacific coast, and every article installed is of the latest design and finest construction. Nowhere can be found better apparatus. Furniture, chairs, sterilizers, operating tables, etc. represent the most advanced ideas in such equipment for hospital service. Dr. Caven has at his command a corps of highly trained and competent nurses. A great manufacturing company has contributed the entire equipment of the hospital to the exposition free of charge, even paying the freight on the shipment to the exposition site. This equipment is loaned to the exposition and is to be returned to the manufacturing company at the close of the exhibition at the contributor's expense. The hospital is equipped to care for twenty-six patients.

Extreme good fortune has attended the work on the exposition grounds during the year. Many tons of dynamite have been used for blasting for drives and in grading building sites, and yet there has not been one instance of injury to any employee necessitating surgical attention.

There will be no unsightly fences about the exposition grounds. These, embracing six hundred and fifteen acres in the center of Balboa park, will be enclosed by a fence, strong and durable, but this will be a solid wall of green. One-half of this fence has been erected during the year and it will be completed early in 1913. Immediately after its completion, vines will be planted at the base and these will have two years of growth prior to the opening of the exposition. This work was given attention early in the construction period that the overgrowing vines might be planted at a time to insure development by the opening date. This fence skirts Canyon de Cabrillo.

Horticultural activities have progressed splendidly at the exposition nurseries during the year. An addition was made to the smaller lath house where thousands of specimens of hundreds of varieties of trees and shrubs are being developed for transplanting, and another lath house, much larger, has been erected to shelter a larger stock of these growths. At this time the nurseries at the exposition contain about one and one-half million specimens of horticultural production, and while fifty thousand of trees have been planted during the year, many other thousands will be placed during 1913, while the exposition display stock will be nurtured and brought to full stature in endless variety well in advance of the opening.

Grading work on the streets and boulevards is eighty-five percent completed at this time. Following a well-defined plan of progression in building the exposition, the management has cared for this essential feature before beginning the construction of exposition structures. All the grading around the building sites, the platting of walks, etc. has been finished. Much of this work has been difficult, requiring the use of dynamite in blasting away the hardpan of red disseminated limestone found beneath the soil, and forming a building foundation endurable through the ages. This stone, also, when broken, constitutes a natural base for the asphalt surfaces of the walks and drives and eliminates the cost of constructing the ordinary macadam foundation. This favorable condition will be of vast importance in expense saving and time when the work of surfacing the drives is reached after the buildings are completed.

In addition to these things, the foundation has been placed for the southern counties building, this being located near the eastern entrance to the grounds at the terminal of Midland drive, and due east of the administration building. This building will be finished early in 1913. Three separate plantations are provided for the displays of the southern counties and two of these have been planted and these ought to be bearing by September, 1913. These plantations include oranges, lemons and grapefruit.

Substantial progress has been made on the construction of the great bridge that is to span Cabrillo canyon, with its western end at the Laurel street entrance on West Park boulevard, its eastern end at the administration building and squarely in the acreage devoted to sites for exposition buildings. This massive bridge, 900 feet long, 120 feet high and 40 feet wide, a reproduction in design of a famous bridge in Spain, and spanning a lake, is taking shape rapidly. The eastern approach is nearly completed, the foundations for the arches have been placed in the lake and on the eastern and western slopes of the canyon, and concrete is being poured into the forms of the eastern arch of the structure.

The Laguna de Cabrillo is completed. An earth dam has been constructed with a concrete spillway, and a concrete outlet and this reservoir is ready for the water which will not be turned in until the big bridge is completed.

Road work outside the exposition grounds and in the park has been advanced greatly during the year. While the rough grading inside the grounds is eighty-five percent completed, including the Plaza de California, the Prado, the Plaza de Panama, the Water Cascade, the Terrace, the Plaza Internationale, the Avenidas Internationale, the Calle Cristobal, the Calle Colon and the Isthmus thoroughfares outside the grounds have been brought to a high state of perfection. The West Park boulevard has been relocated and resurfaced and a complete fill made from the western entrance at Laurel street to the western approach to the bridge. Midland drive from the western entrance to the grounds at Russ high school has been relocated and resurfaced. The drive through the Canyon de Cabrillo, beneath the great bridge and crossing the lagoon, with its branching paths leading to different parts of the park, has been regraded and its steeper ascents eliminated. Along this drive hundreds of quail rise from the road with roar of wings to fly a few years and again settle to watch the passerby. Here, too, rabbits scurry aside and turn to watch with sober eyes the noisy truck or silent car, and

here hundreds of song birds flit from tree to tree and send forth their cheering notes of welcome to the visitors, secure in the long protection that has been afforded them within the park confines.

One of the busy structures on the exposition grounds is the mill. This was erected in conjunction with the erection of the great bridge spanning the canyon. While a rule of the exposition management is that no needed expense shall be spared in prosecuting the work, economy consistent with this rule is practiced and the erection and operation of the mill has proved economical of time and money.

In the construction of the bridge, hundreds of forms are used as molds for concrete, and to have these made elsewhere on specifications would have entailed delays in construction that would be costly in the extreme. The problem presented was solved quickly by the commissioners of buildings, who established the exposition mill, thoroughly equipped with the most modern high-speed machinery for wood-working. This mill is provided with one machine for running shiplap, flooring, sizing timbers, beams, etc., having a capacity of 6,500 feet board measure daily. In addition there are humming crosscut and rip saws that turn out with rapidity the lumber demanded by the workmen in construction work, and a big band saw that is kept singing almost constantly, turning out scroll patterns for ornamental decorations as the designs are prepared by the men with the drafting board. Another machine quickly bores timbers for joints, and the plant is made complete by a saw filing and grinding equipment. Emery wheels, grindstones and forges, power-driven, are utilized to keep the tools of the workmen in the best of condition, axes, chisels, drills, shovels and all other individual equipment of the workingman being maintained in the highest state of usefulness at all times, and thereby increasing the effectiveness of the individual unit, which has proven during the year to be a mighty factor in the exceptional advancement of the work of building.

During 1912 the record of tree and shrub planting on the exposition grounds has kept place with that made by the men with the teams, the pick and shovel, and the annual report from the landscape gardeners shows that over fifty thousand trees and shrubs have been placed. It may appear that this is a large number, but this work has only begun and the record for the year constitutes only a small part of that outlined, and which must be done to realize the plan of the exposition.

The fast-growing eucalyptus has been utilized for decorative purposes and out of this planting has come a better knowledge of the tree. On the exposition grounds today are trees of this variety that are showing sturdy growth and vigor that were transplanted when sixteen months of age, and their stamina and development has exploded an old and firmly grounded idea that a eucalyptus could not be transplanted successfully after one year.

The visitors to the exposition now probably would doubt that the little sprouts of trees clustered on the sides of the ravines and canyons would be aught than shrubs by 1915, but startling promise of what these will be in two years is found in a number of trees near the administration building that were little bushes a few months ago, and which now lift their leafy tops high in the air. Trees will make the exposition grounds a bower of green beauty by 1915, and in the record of fifty thousand trees and shrubs planted in 1912 and the million and a half specimens of all kinds in the nurseries yet to be placed about the grounds or used for display purposes during the exposition is found the glowing promise that the Panama-California exposition will be resplendent in a swathing of emerald everywhere, and high and low.

The mill on the grounds has been used to splendid advantage in connection with the nurseries. At the beginning of 1912 the nursery stock was a few hundred thousand. Now these wonderful houses of lath contain over a million and a half plants in pots and boxes, ranging size from a pot two inches in diameter to a box four feet square. The mill during the year turned out thirty-five thousand of these boxes, with a range of size from one foot to four feet square. Nursing the stock in these boxes secures the greatest possible growth and every expedient is being used, even before the beginning of building construction, to insure the entire success of the horticultural features of the exposition.

Not the least of the accomplishments of the year by the exposition management is the provision made for the employees on the grounds. A large restaurant has been constructed, with neat bunk houses, where employees may obtain meals and lodging at extremely reasonable rates. The exposition management desired first of all to secure a force of workingmen who would remain "on the job." A shifting force means loss of efficiency in

the organization and loss of efficiency means increased cost. To gather and retain a large staff of workingmen, weld them into an organization capable of the greatest accomplishment, and yet to make conditions such that they would be contented, was a problem to which the department of works devoted attention early in the year --- and the problem was solved.

Provision was made for the housing of four hundred workingmen. In the plan adopted is a radical departure from the ordinary bunk house, with hundreds of bunks in tiers, sheltering a heterogeneous company of all sorts and conditions, temperaments and inclinations, and indifferent cleanliness. The exposition company constructed small bunk houses, each containing four bunks only, light, airy, comfortable and clean. This plan is capable of quick expansion and as the working force is increased as the exposition progresses, provision will be made for others as the demand arises.

Then the exposition provided a large restaurant, as light and airy and as clean as the little bunk houses. Here the large body of workmen employed on the grounds take their meals, and for this service and the use of the bunk houses, the rates are made barely sufficient to maintain these appreciated adjuncts. There was no desire to convert this service into a profit, and the rates have been extremely satisfactory to the workingmen. The result has been the securing and retention of a crew of workingmen who might find it convenient to move on to other work were conditions not entirely to their liking. To the retention of this contented force, individually acquainted with the work, is attributed much of the success that has attended the preliminary construction work of 1912.

G. A. Davidson, "A Few Statistics on San Diego," Out West 5, no. 1 (January 1913) 65.

San Diego Union, January 1, 1913, I

1. San Diego, the Exposition of the How and the Now; Why San Diego embarked upon great enterprise?; What is an Exposition?; History of Expositions. . . . it should also be understood why California is making ready for two expositions in 1915. First, to celebrate the opening of the Panama canal; second, to tell another story, or read the latest chapter of the great serial of human progress; and, in the third place, to reveal to the entire civilized world for the first time in a thoroughly comprehensive manner the wonderful resources of the great west and the possibilities of the homeseeker or investor in the states lying west of the one-hundredth meridian. . . . It is the concrete idea of the San Diego exposition projectors to go farther than men have gone in time past, and while illustrating in a thoroughly complete and sequential form the evolution of man and in the fashioning of his environments, to also show from the doorway of the present, the vista of opportunity laying just beyond the threshold. . . . In this respect the San Diego exposition will be unique. While the San Francisco fair will dazzle the world with an exhibition of the world's wonders, the San Diego exposition will instruct and educate the world concerning the advantages offered in the great undeveloped sections of the Pacific coast and adjoining states. . . . It has been pointed out from time to time that San Diego is the first American port of call on the Pacific coast, north of Panama. It has been shown that San Diego is destined to become the gateway to the southwest, and with a transcontinental railway connecting the Imperial valley and Arizona and all of the east with the south Pacific coast, will open up the way for the population of those states and sections to the thousands of desirable immigrants who will come to the United States via the Panama canal and the west coast instead of by way of New York and eastern ports.

p. 2. Plants gathered from all quarters of globe.

p. 3. Exposition building accomplishments of the year 1912: Administration Building; Emergency Hospital; Foundation of Southern California Counties Building; Work on bridge; No unsightly fences; Grading 85 percent complete; Laguna de Cabrillo; Relocation of West Park Boulevard; Relocation of Midland Drive; Regrading of Cabrillo Canyon Drive.

Mill kept busy: used to make nursery boxes; 50,000 trees and shrubs planted in 1912.

Restaurant for employees; bunk houses for 400 workmen - each bunkhouse containing 4 bunks.

San Diego Union, January 1, 1913, 3:1-9, 9:3. Exposition building accomplishments of year 1912: laying foundations, making smooth the rough spots, paving the way . . . completion of Administration Building . . . completion of service building in Mission style housing horses and wagons --- to be used later as headquarters of exposition street cleaning department and as an emergency repair station . . . emergency hospital opened December 15, 1912 --- equipped to care for 26 patients, manufacturing company donated equipment and paid freight . . . many tons of dynamite used in blasting and in grading building sites . . . 615 acres enclosed by a fence - one half completed in 1912, vines to be planted at base of fence to provide wall of green . . . 50,000 trees planted in 1912 . . . grading on streets and boulevards, 85 percent complete . . . grading around building sites and planting of walks finished . . . foundations placed for Southern California Counties Building . . . plantations of oranges, lemons and grapefruit . . . progress made on construction of bridge - reproduction of a famous bridge in Spain, 900 feet long, 129 feet high, 40 feet wide; spans a lake . . . eastern approach nearly completed; foundation for arches placed in lake and on eastern and western slopes of canyon - concrete is being poured into forms of the eastern arches of the structure . . . Laguna de Cabrillo completed . . . rough grading of road inside park 85 percent complete . . . West Park Boulevard relocated and resurfaced and a complete fill made from the western entrance at Laurel Street to the western approach to the bridge . . . Midland Drive from western entrance to grounds of Russ High School relocated and resurfaced . . . drive through Cabrillo Canyon regraded . . . mill erected in conjunction with building of bridge . . . fast-growing eucalyptus used for decorative purposes . . . restaurant and bunk houses for employees on grounds - housing for 400 workmen to keep a workforce that would stay on the job; small bunk house consisting of 4 bunks each.

Paul G. Thiene, chief nurseryman; owner of Ramona Nursery, North San Diego; appointed Superintendent of Nursery in 1912 and later Superintendent of Landscape.

San Diego Sun, January 3, 1913, 1:3-4. Work on State Exposition Building Is Ordered; Commissioners (G. W. Marston, Thomas O'Hallaran and R. C. Allen) decided further delay is unnecessary; Frank P. Allen to go ahead with work providing it does not cost more than \$250,000; plans reported to be on the way from the east.

San Diego Union, January 3, 1913, 1:3, 6:3. Rosarians plant roses on Exposition grounds; child leads visitors in pretty ceremony in Balboa Park.

San Diego Union, January 3, 1913, II, 13:4. Charles Bowers of Montana suggests elk in Balboa Park; says they may be secured from Yellowstone.

San Diego Union, January 4, 1913, 6:1. Spain will enter exhibit at San Diego Fair.

San Diego Union, January 5, 1913, II, 13:2-4. Salt Lake capitalists obtain lease on new Spreckels hotel on south side of D street, between Union and State.

San Diego Sun, January 7, 1913, 2:1. New directors for Exposition to be elected Friday; President Collier left for conference with representatives of Exposition Commissioners in Watsonville, Calif.

Park Commissioners Minutes, January 10, 1913. Frank P. Allen, Jr. authorized to construct Electricity, Manufacturing and Mining buildings according to present plans.

San Diego Sun, January 10, 1913, 1:6-7. Colonel Collier reelected head of Exposition; Collier presided over meeting.

San Diego Union, January 10, 1913, 5:2. Park flowers survive freezing.

San Diego Union, January 10, 1913, 9:1. State of Washington will probably be represented at Fair.

San Diego Union, January 10, 1913, II, 13:1. Marston is candidate for mayor.

San Diego Union, January 11, 1913, 4:1. EDITORIAL: Exposition Appropriation Bills . . . As will be seen by a special dispatch from Sacramento to the **Union** this morning, San Diego's representatives in the legislature are losing no time in preparing to obtain appropriations for the Panama-California Exposition. Several bills, carrying a total of \$900,000 to enable the state to be worthily represented at Balboa Park in 1915 have been framed. After their presentation and reference, they will stand over, in common with other measures introduced during the first thirty days of the session, until the legislature shall reconvene after the months' recess which will be taken in accordance with the new provision of the constitution, which aims to allow time for legislators to study bills and hear from their constituents before passing upon measures proposed for enactment. The recess will presumably occupy the month of February. The exposition bills, then should come up for action in March.

. . . Since the legislature made a small appropriation two years ago for the Panama-California exposition, that undertaking has shown a progress that causes the admiration of all who have noted it. San Diego has given proof that it is thoroughly in earnest in its great project. For the state to stand aloof, or participate merely to the extent of the small appropriation already voted, would be very ungracious.

San Diego Union, January 11, 1913, 5:3. Vacancy of Board of Directors is filled; Stockholders elect John A. Boal to succeed Colonel Fred A. Jewell.

San Diego Union, January 11, 1913, 7:1. Panama decides to exhibit at Exposition.

San Diego Union, January 12, 1913, 1:4-5. Work on Fair buildings soon to begin; plans are approved for three permanent structures as part of group; Spanish-Colonial style of architecture to prevail throughout.

San Diego Union, January 12, 1913, 43:1-3. What prominent men say about the Exposition.

San Diego Sun, January 14, 1913, 8:1-2. Sacramento Valley folks vote \$150,000 for Exposition; delegation from north impressed by Fair work; will urge county supervisors to place adequate exhibition here.

San Diego Union, January 14, 1913, 4:1. EDITORIAL: Bright Prospects for the Exposition . . . The first fortnight of 1913 brings wonderfully bright prospects for the great exposition to be opened in this city two years later. Hardly a day now passes without new evidence of substantial support from the outside world.

San Diego Union, January 14, 1913, 12:3-4. Sacramento Valley section will be installed at Exposition.

San Diego Union, January 15, 1913, 4:1. EDITORIAL: Generous Support for the Exposition.

San Diego Union, January 16, 1913, 4:6-7. The Zoo and Its Inhabitants, by Frederick J. Haskin.

San Diego Union, January 17, 1913, 11:1. Guatemala to have exhibit at Exposition.

San Diego Union, January 18, 1913, 7:2. Park Board fights injunction suit; effort to enjoin 6th Street extension meets opposition . . . To enjoin or not to enjoin the park board from permitting the extension of Sixth street through the west part of Balboa park was the subject of a hearing before Judge Sloane yesterday in the case of C. S. Alverson and Maud T. Frary against Julius Wangenheim and others.

Crouch and Harris, attorneys for the petitioners are attempting to show that the park board may be legally enjoined from permitting the construction of a roadway through the park. City Attorney Andrews, for the park board, and A. H. Sweet for the thirty-five or forty defendants, contend that the court has no legal right to enjoin the park board in the performance of a duty lying within its jurisdiction.

The case is being contested every step and long legal debates over points of law relating to the introduction of evidence took up the greater part of the day.

It is expected that several days will be consumed before the hearing is finished.

San Diego Union, January 18, 1913, 6:2. 6th Street extension suit is nearing finish; contention made that Park Board has no authority to divert property.

San Diego Union, January 19, 1913, 7:1-3. Hospital at Fair answers its first call.

San Diego Union, January 19, 1913, 13:1-2. What prominent man say about Exposition.

San Diego Union, January 21, 1913, 9:1. Dr. Edgar L. Hewett finds much encouragement for Fair on trip to East.

San Diego Union, January 21, 1913, 11:1. Governor Hanna of North Dakota favors appropriation for Fair.

San Diego Union, January 22, 1913, 9:3. Montana Exposition Commissioners become boosters on short notice.

San Diego Union, January 23, 1913, 10:2. Real reason why Montana should have exhibit; Fair Commissioners say state needs farmers.

San Diego Union, January 24, 1913, 6:1. Ohioans herald home Fair work; write letters urging home state representation.

San Diego Union, January 24, 1913, 6:5. D. C. Collier to start on education campaign; president of Exposition will address joint session of Colorado legislature.

San Diego Union, January 24, 1913, 14:1. Montanans enthusiastic over Exposition; select site.

San Diego Union, January 25, 1913, 5:2. Hearing on 6th Street suit closed; Judge Sloane intimates Park Board acted within its jurisdiction . . . After nearly a week of night hearings before Judge Sloane in superior court, the evidence in the case of C. S. Alverson and Mrs. Maud Thayer Frary against Julius Wangenheim, John Forward, Sr., Frank J. Belcher, Jr., and many other property owners in favor of extending Sixth street through the park, was concluded Thursday night.

Before the adjournment, Judge Sloane intimated, after a brief summary of the evidence, that he was perfectly satisfied as to the good faith of the commissioners in making the order for the opening of the driveway

through what is known as Mulvey canyon, adding that he was largely interested in hearing argument as to the law. Arguments will begin Thursday evening at 7:30 o'clock.

The case was heard last week during the regular court hours, but was interrupted by the criminal calendar. It has since been heard in evening sessions.

The plaintiffs claim that the motives of the park board in extending Sixth street were commercial, and that the work required would impair the natural beauty of the park.

Attorneys Crouch and Harris appeared for the plaintiffs, and A. H. Sweet and City Attorney Andrews for the defendants.

San Diego Union, January 26, 1913, 7:1. Expenses of Exposition shown in report; annual statement filed gives total of \$624,424.18 expended during 1912.

San Diego Union, January 28, 1913, 7:4. Exposition finds favor in Dakotas . . . Secretary Hogaboom of the San Diego exposition has received a letter from Thomas Hall, secretary of state of North Dakota, which says there is a well-defined sentiment among the legislators as well as all over the state favoring an exhibit at San Diego. The North Dakotans realize the chance that is offered to advertise their resources and opportunities by means of an exhibit at San Diego.

In a communication from a prominent South Dakotan the exposition officials are notified that the bill providing for an appropriation for an exhibit here in 1915 has already gone to the legislature and will be passed upon in the near future.

These sister states are beginning to understand the ultimate aim of the San Diego exposition to aid the west in the development of its resources. They are learning that the San Diego celebration will be more than a mere collection of amusements and amazelements: that it is a great signboard calling the world's attention to the opportunities offered for settlement and investment of capital throughout the great west.

The North and South Dakota societies here are credited with aiding largely in creating this favorable sentiment among the residents of the two states towards the San Diego exposition.

The members of these two societies, all natives or former residents of North or South Dakota, and many with a wide acquaintance in the two states, wrote hundreds of letters to old friends still living there.

The legislatures were memorialized by the two state societies. Signed by hundreds of former North and South Dakotans these memorials were forwarded to the governing bodies of the two states sometime ago.

Not only in this way, but by writing letters to the newspapers of the two Dakotas, did the members of the societies here aid the exposition in putting the idea of an exhibit here in 1915 strongly before the people of North and South Dakota.

San Diego Union, January 28, 1913, 11:1. Exposition asks \$753,100 of State Legislature; Exposition appropriation bills total \$535,000; California Building total is \$200,000.

San Diego Union, January 28, 1913, 11:1. Denverites give great reception to Colonel Collier.

San Diego Union, January 29, 1913, 12:1. Virginian commends local Fair; urges a state exhibit.

San Diego Union, January 31, 1913, 22:1. Commissioner of Portland Fair makes unsolicited plea to Oregon legislature urging support for San Diego Exposition.

Park Commissioners Minutes, January 31, 1913. No further permits for house moving through park to be allowed; salary of Superintendent of Parks increased to \$225.00 per month; Superintendent instructed to erect

enclosures for 3 elk and 3 buffalo donated to local Park Department by the Board of Park Commissioners, San Francisco.

San Diego Sun, February 1, 1913, 17:1-3. Alameda, Santa Clara, Santa Cruz, Monterey, San Benito and San Luis Obispo have divided to combine on an exhibit at the San Diego Exposition.

San Diego Union, February 1, 1913, 3:2. Montana counties to exhibit at Exposition.

San Diego Union, February 1, 1913, 12:1. Collier's campaign awakens Denver to Exposition; Coloradans display great interest in San Diego and Southern California; Collier says great event will be advertised in local literature.

San Diego Union, February 2, 1913, 8:1. Permit is taken out for Electrical Building; fair structure will cost \$40,000; two stories with auditorium, 116x175 feet; of Spanish design with plastered exterior; arcade along south and west sides, tower three stories high at southwest corner.

San Diego Sun, February 3, 1913, 3:1. Colonel Jewell off on an Exposition tour.

San Diego Union, February 3, 1913, 1:1-2. Marston committee opens campaign.

San Diego Union, February 4, 1913, 6:1. Colorado solons consider bill for Fair; measure seeking appropriation of \$100,000 for San Diego Exposition introduced.

San Diego Union, February 9, 1913, 10:1. Assemblyman E. C. Hinkle says Legislature sure to pass appropriation bills for \$525,000; \$200,000 for state building; \$25,000 for state exhibits, furnishings, equipment and improvement of grounds.

San Diego Union, February 9, 1913, 27:1. Mayor Holleman of East San Diego says Colorado alive to San Diego spirit.

San Diego Union, February 9, 1913, 31:1. Montana commissioners estimate that state will appropriate \$104,200 for building for San Diego Exposition.

San Diego Union, February 11, 1913, 11:1. Utah legislature goes on record for San Diego; bill introduced provides for expenditure of \$75,000 for state exhibit at Exposition.

San Diego Union, February 11, 1913, 12:1. Marston outlines ideas of municipal government.

San Diego Union, February 15, 1913, 10:1. New Mexico's lower House passes Fair bill; calls for expenditure of \$75,000 for state exhibit at Exposition.

San Diego Union, February 23, 1913, 13:1. Princely home and courtly grace not qualifications for mayor, say Women for O'Neill.

San Diego Union, February 24, 1913, 7:1. Marston says drydock is an absolute necessity.

San Diego Sun, February 25, 1913, 7:4. Judge Sloane denies 6th Street Extension injunction against Park Board.

San Diego Union, February 25, 1913, II, 13:1. Arizona lawmakers invite President Collier to address them.

San Diego Union, February 26, 1913, 9:4. Judge Sloane's decision upholding Park Board's action in proposed 6th Street extension to be appealed.

San Diego Union, February 26, 1913, 10:2. C. Stowell Smith, assistant district forester now in San Diego, experiments in timbers; tests all commercial kinds of California woods and announces results; three kinds of borers; all teredos dead at Santa Fe pier, but thriving west of Coronado ferry slip.

San Diego Union, February 26, 1913, 11:3. Exposition lagoon fills with water; heavy rainfall fills impounding basin in Cabrillo Canyon but does not damage.

Park Commissioners Minutes, February 28, 1913. Frank P. Allen presented plans of Art Building to be erected on Exposition grounds.

San Diego Sun, March 1, 1913, 1:3. Judge Sloane denied motion of counsel for Maud Thayer Frary for a continuance of temporary restraining order in 6th Street extension case.

San Diego Union, March 1, 1913, 15:1. Report praises Superintendent of Parks; annual statement shows expenditures for 1912; \$700,000 remains; 10,612 trees planted . . . More than \$700,000 of the \$1,000,000 bond issue voted for the improvements of Balboa park remains unexpended, according to the report of the board of park commissioners for 1912, made to the mayor by Julius Wangenheim, president.

Of the \$276,594.96 used on the park, about \$172,000 was spent under contract by the director of works of the exposition and \$106,500 was spent by the park commissioners on other portions of the park. Included in the latter expenditure was the laying out and planning of an extensive road system, and the increasing of irrigation facilities adequately to care for the added area planted to trees and shrubs.

Many trees planted

J. G. Morley, superintendent of parks, reports that 10,612 trees, including thirty-five varieties, were planted in Balboa Park the last year, and 5,868 shrubs of sixty-three varieties.

In addition to the tree planting, Morley reports that 220,600 square feet of roads have been re-graded and surfaced; culverts and drains put in where necessary; nearly six acres of lawn seeded, and a sprinkler system has been installed. On the west side of Balboa park, between West boulevard and Cabrillo canyon, eighty-five acres were plowed and graded, and prepared for planting, two-thirds of which has been planted to trees and shrubs.

In the nursery are 44,500 trees and shrubs, raised by the park board, and 5,551 of purchased stock.

Financial condition good

That the finances of the park board are in a healthy condition is shown by the report, \$15,000 of the \$33,000 (?) maintenance fund provided for 1912 being still left in the treasury.

Superintendent Morley is highly commended in the report for the general excellence of his work.

Of the small parks, the superintendent calls attention to the general excellence of maintenance of La Jolla, the plaza and New Town parks. In La Jolla park 863 shrubs and trees are reported to be growing well. The superintendent recommends that some of the walks in New Town park be done away with and the space converted into lawns.

Regarding the Old Town and Mission Hills parks, the superintendent recommends the purchase of the whole square up to Fort Stockton drive and the development of the park.

San Diego Union, March 2, 1913, 31:1. Court ruling for 6th Street Extension; Judge Sloane refuses to enjoin Park Board from proceeding with work . . . Judge W. A. Sloane yesterday refused to grant an injunction, pending a decision of the supreme court on the petition of C. S. Alverson and Maud Frary Thayer against the extension of Sixth street through the west side of Balboa Park.

Crouch and Harris, attorneys for the petitioners, asked for an injunction until such time as the supreme court could be petitioned to enjoin the park board from proceeding with the work of constructing the road. Judge Sloane took this request under advisement.

W. R. Andrews, city attorney, in his argument against continuing the injunction, insisted that the action was not brought in good faith and that John H. Gay and not the petitioners was the real party to the action and was furnishing the sinews of war.

Crouch and Harris claimed the action was brought in good faith and that regardless of Judge Sloane's ruling, it would be appealed to the supreme court. Attorneys for the petitioners also insisted that, notwithstanding the court's decision, they had not abandoned their contention that the transaction was tainted with fraud.

Judge Sloane held that the question of fact would not be reviewed by the appellate court and that with that question obliterated, there was nothing for the supreme court to consider.

San Diego Sun, March 3, 1913. Temporary restraining order dissolved; 6th Street case brought to close by Department 3 of Superior Court today.

San Diego Union, March 9, 1913, 25:2. Joseph Jessop urges more streetcars for Balboa Park; wants line to pass through grounds.

Editor, **San Diego Union**: Since the series of articles which appeared recently in your paper relative to street car development of the near future, the writer has given some thought to the question and especially to the suggestion that a line be run through Balboa park.

One phase of the matter especially appeals to me --- that of making the interior of the park accessible by street car to those of our population who need the park most. I refer to the old people, the women and children.

Those who are not so fortunate as to possess automobiles can scarcely see more than the fringes of the park, for they are not able to take such an exhausting walk. With a street car line properly placed and ornamented or concealed, the most picturesque canyons and unfrequented spots would become accessible to a vastly increased number of citizens.

I hope that the sentiment of San Diegans and the plans of the railway company will favor the proposed route through the park at the proper time.

The advantages of furnishing transportation to exposition visitors and of relieving the congestion on the No. 1 and No. 2 lines is, of course, obvious to all. The rapidly increasing population north and east of Balboa park deserves good transportation facilities and this is the most practicable route, being shortest and most direct.

Another thing that has occurred to me with relation to getting the most use of our great Balboa park is the excellent adaptability for circus grounds and baseball grounds. Why should not the city reap the benefit of the large lease moneys paid by the frequent circuses that come to town? The park grounds are closer than those now in use and should be more acceptable.

I wish to see this community take advantage of every possible attraction offered by this great park, and, therefore, I feel that it should be made accessible by street car so that the masses may be able to get over it without unnecessary inconvenience.

Joseph Jessop, San Diego, 952 Fifth street.

San Diego Union, March 11, 1913, 11:2. President E. P. Ripley of Santa Fe taken on a trip over city and to Exposition site by Colonel Collier and G. A. Davidson; promises Santa Fe will keep pace with San Diego.

San Diego Union, March 13, 1913, 15:1. S. H. Moore, Oregon bird expert, seeks 5-acres concession at San Diego Fair for pheasant farm.

San Diego Union, March 14, 1913, 9:1, 10:2. Rival candidates O'Neill and Marston re-avow their friendship at Rotary Club luncheon.

San Diego Union, March 15, 1913, 12:4. Burbank thornless cactus farm may be seen on 5-acre concession at San Diego Fair.

San Diego Union, March 15, 1913, 24:1. Southern California Counties first to erect building; to cost \$62,252; exhibit to cover 15 acres; building described . . . The first building to be erected in the San Diego exposition by an exhibitor will be the Southern California counties building, for which the contract has been let and work upon which will commence within the next few days. The John Simpson Construction company has the contract, the bid being \$45,252 (?).

The Southern California counties include the eight south of the Tehachapi and the cost of the building and splendid exhibit to be installed will be divided among the counties pro rata to the assessed valuation of each.

To occupy fifteen acres

The southern counties exhibit will cover about fifteen acres. Besides the building there will be a large tract of formal gardens and a model citrus orchard.

The site of the building has been in readiness for some time, all necessary retaining walls and fills having been made. The site is at the northeast corner of the intersection of the Prado, or main street, and the Calle Cristobal, not far from the east entrance.

The building will be 195 feet wide and 225 feet long. The main entrance on the Prado is through an arcade which leads into a large patio. This patio will be filled with lawn and flowers and deep cloisters will run north, east and west. On the left will be the administration department, including reception room and offices.

Room for entertainments

The small lecture room, 33x55 (?) feet, seating 250 people is at the right of the patio. Here will be held the smaller public entertainments and the display of motion pictures showing all the beauties and development of Southern California.

The central portion of the building will be occupied by the main exhibit hall, around which will run a gallery. The west entrance will include broad cement steps and a platform on which will play a small fountain. The men's smoking room and lavatory, and the women's sitting room and lavatory, as well as the quarters for the caretakers, will also be on the west side.

The gardens at the north of the building will be of a formal nature. Smooth paths will wander here and there between masses of shrubbery and drooping trees. Tiny shelters, belvederes and vine-hung pergolas will be flanked by masses of color from the flowers for which Southern California is rightfully famous.

Five-acres orchard

Recalling old gardens of England and Colonial days, or those early periods in California's own history when time was counted by light and darkness, there will be a quaint sundial in one corner. At the northwest end of the formal garden will be a gate, admitting the visitor into the five-acre orchard, which will be the chief exhibit of the southern counties. There will be found 800 trees in full leaf of their sturdy four years of life, demonstrating to the world the possibilities of the ideal citrus orchard. Spraying, cultivation and irrigation will be carried on during the exposition year in the same manner which would be employed on an actual ranch.

San Diego Union, March 15, 1913, 12:4. Thornless cactus farm concession at Exposition will occupy 5 acres.

San Diego Union, March 16, 1913, 4:4. EDITORIAL - on San Diego and San Francisco Expositions.

San Diego Union, March 16, 1913, 4:4. Panama Expositions, by Frederick J. Haskin . . . The San Diego exposition easily will rank with the Pan-American, the Lewis and Clark, and the Yukon fairs. Enthusiasts claim it will far surpass them. Certainly it will be more unique, and will have a richer setting. The fair will cause an outlay of fully \$20,000,000. The citizens of San Diego, a city of less than 75,000 people, raised the sum of \$2,000,000 to start the project. Nearly \$6,000,000 is being spent on a magnificent sea wall. John D. Spreckels is building the San Diego and Arizona railroad a distance of 220 miles on a new and lower grade. Nearly \$5,000,000 will be spent in Balboa Park the magnificent domain of 1400 acres, in whose lap the exposition will be held. Over eleven miles of dock and 1000 acres of reclaimed land for warehouses will be ready to astonish visitors when the fair opens, January 1, 1915.

San Diego Union, March 16, 1913, 24:1. D. C. Reed, former mayor of San Diego, declares for O'Neill; calls Marston an obstructionist.

San Diego Union, March 16, 1913, 20:1. Nevada decides to spend \$40,000 on Exposition buildings and exhibits.

San Diego Union, March 16, 1913, 30:2-3. View of Administration Building and work being done on bridge over canyon to Exposition grounds; frame work on bridge carrying beam and girder section shown.

San Diego Union, March 19, 1913, 24:1. New Mexico plans monster exhibits at Exposition; \$30,000 for building.

San Diego Union, March 20, 1913, 9:1. Visitors from Alameda and Santa Clara Counties are guests of city; ask to see site of Exposition.

San Diego Union, March 20, 1913, 15:2-3. M. A. Luce tells part taken by Marston in Temecula cut-off.

San Diego Union, March 20, 1913, 15:2. Louis J. Wilde prefers O'Neill.

San Diego Union, March 20, 1913, 24:1. New Mexico building to cost \$30,000; plan big exhibit.

San Diego Union, March 21, 1913, II, 13:2-3. Wilde tells charity ball promoters to "Go plumb to hell."

San Diego Union, March 21, 1913, 14:1. Alameda and Santa Clara Counties united for Exposition exhibit . . . The Alameda and Santa Clara county supervisors and exposition commissioners concluded their visit to San Diego last night with a business meeting in the green room of Hotel del Coronado, which resulted practically in a decision to participate on an extensive scale in the San Diego exposition.

The delegation from Alameda, being the largest, led in the decision. Santa Clara country concurring heartily. Members of both parties favored a strong representation.

Plan joint exhibit

The plan proposed for participation contemplates a joint exhibit by the counties of Alameda, Santa Clara, Santa Cruz, Monterey, San Luis Obispo and San Benito, and it is believed this ultimately will be adhered to.

(The names of representatives from Alameda and Santa Clara counties follow.)

The party returned north this morning in a special car attached to the owl.

Park Commissioners, Minutes, March 21, 1912. Superintendent reported arrival of 2 elk donated by San Francisco Board of Park Commissioners.

San Diego Union, March 22, 1913, 8:1. Diamonds wanted for Balboa Park . . . It is the intention of the park commission, as expressed by one of the commissioners last night, not only to have ball fields, but tennis courts and various fields for sports in the big park, and that if the demand were sufficient it might not be inopportune to begin plans at once.

San Diego Union, March 23, 1913, 6:2-3. What prominent men say about Exposition.

San Diego Union, March 23, 1913, 9:1. Tractors at work at Exposition; practical exhibit of great interest to farmers is planned; time-saving machines to be compared with those of old-style agriculturists..

San Diego Union, March 23, 1913, 26:1-2. Mrs. Horton says Marston is "tried and true."

San Diego Union, March 24, 1913, 10:1. San Diego native M. D. Sherman scores Marston's record.

San Diego Union, March 25, 1913, II, 13:3. Lumber arrives for Exposition . . . Three steamers, two of them new and making their maiden voyages, arrived at San Diego docks within the last week, with lumber and shingles, the greater part of which is for exposition construction work. The cargoes made a total of 910,000 feet of lumber and 5,000,000 shingles.

Workmen are busy pushing the bridge to the exposition grounds far out into the canyon. The electrical building and mill beyond the administration building are fast reaching a point where the walls will rise far

more rapidly than do those of an ordinary constructed building because this building is to be put up in sections.

A crane of heavy timbers has been put in place over the foundations and floor timbers of the building, and a large amount of lumber cut to measurement is ready for putting together.

A huge 500-ton motor truck honks back and forth constantly between the work and the stone crusher, bringing a each trip an immense load of crushed stone, which is dumped automatically to the floor of the bridge, where it is mixed with cement and disappears, as if by magic, into the cavernous maw of the frame-structure, whose appetite for concrete seems never to be satisfied.

San Diego Union, March 26, 1913, 10:3-4. Article in recent issue of **Philadelphia Star** gives San Diego Fair valuable publicity.

San Diego Union, March 26, 1913, 12:3. Committee considers favorably appropriation of \$200,000 for California State Building at San Diego Fair; State may spend \$250,000 in all.

San Diego Union, March 26, 1913, 12:2. Residents to decide Park Boulevard paving . . . All previous proceedings having been repealed, the question of parking and grading Park boulevard has been again left open by the council.

Park Boulevard property owners, who live north of University Avenue, want their street paved with asphalt. Residents living south of University Avenue want Park Boulevard surfaced with decomposed granite. Property owners, both north and south of the boulevard, are divided on the question of parking. Some of them want no parking, some want the parking in the middle of the street, and some again want it on each side along the walks.

San Diego Union, March 27, 1913, 11:1. Utah votes \$75,000 for two Fairs; San Diego portion will be at least \$37,500.

San Diego Union, March 28, 1913, 22:1. 50,000 postcards mailed advertising city; decision to make it a semi-annual affair.

San Diego Union, April 7, 1913, 9:3. Colonel Collier makes public letter accepting Marston's resignation and praising his mayoral candidacy.

San Diego Union, April 8, 1913, 1:3, 2:3. Great canyon road linking San Diego with Imperial Valley to be opened tomorrow.

San Diego Union, April 8, 1913, 9:2. Montana to take part in 1915 Fair; Governor Stewart to name commission to investigate both expositions.

San Diego Sun, April 9, 1913, 1:8. O'Neill elected mayor over Marston by a narrow margin of 657 votes -- 7,291 to 7,948; Captain John Sehon defeated for Council.

San Diego Union, April 9, 1913, 1:7-8. O'Neill is mayor by 668 majority; Manney, Benbough and Schmidt are elected councilman; Sehon is defeated.

San Diego Union, April 9, 1913, 9:4. Governor Johnson says \$200,000 for San Diego Fair is all; Panama-California Exposition to have a state building with nothing in it; says State is in no position to spend money "Nothing for the San Diego exposition except \$200,000 for a state building to fulfill the pledge of the 1911 legislature and administration," was the statement of Governor Hiram Johnson to President Collier of the exposition.

The governor, in declaring he would not sign any appropriation bill for the San Diego fair, pleaded economy, as he did recently to Panama-Pacific fair officials who endeavored to secure his approval of a \$1,000,000 state building at the San Francisco exposition.

"But if you refuse to sign any bills carrying appropriations for exhibits, heating plants and ground improvements, the building won't be worth much," President Collier told Governor Johnson. "We have a state building with nothing in it."

"I am sorry," said the governor, "but I feel as though the state is in no position to spend money in such a manner."

Bills totaling \$353,000, exclusive of the \$200,000 appropriation bill already passed by the lower house, have been introduced by Assemblyman J. Hinkle and Senator Wright in behalf of the exposition.

Senator Wright, since the legislature convened for the last session, has endeavored to get an audience with the governor as to his position on the matter. Wright, who is not in sympathy with the Bull Moose crowd, was denied admittance to the executive chamber.

The senator telegraphed Collier to sound the governor as to his attitude with reference to a building at the San Francisco exposition.

President Collier had very little to say tonight, but will ask the Southern California delegation to urge the passage of the exposition bills through both house and pass the responsibility to the governor.

"It looks as though we are to lose out," said Senator Wright.

"If the act of 1911 appropriating \$50,000 for the fair, and promising to increase this donation \$200,000 more had not passed, it is doubtful if the governor would have permitted the exposition to get any money this year."

San Diego Union, April 13, 1913, 5:1. Canadian participation in Fair is assured; only question is to extend invitation; northern government favors liberal appropriations.

San Diego Union, April 13, 1913, II, 17:2. Framing of Electricity Building at Fair grounds is practically finished . . . Work on the Electricity building at the exposition grounds is progressing so rapidly that its exterior will be completed within a very short time. Already its framework has been practically finished, there being but a slight amount of work to be done before the structure will be ready for the next and last stage --- its outside coat. Already it looms above the administration building from the city side of the canyon, and, within a week, it will take on the appearance of the finished building.

The ground to be occupied by the Machinery Building has been brought to grade, and the first of the week will find workmen laying the foundation timbers for this building.

A large amount of lumber is already on the ground for this building, and with the new construction method for erecting large buildings adopted by the board of works, building frames go up very quickly. The Machinery Building will be the second building to go up, and with its completion and the work to be started soon by the John Simpson Construction Company next week on the Southern California Counties Building, the exposition will commence assuming a much more definite form.

San Diego Union, April 13, 1913, 52:1-2. Arizona's snub of Exposition causes wide wail of protest; conflict between Governor and Legislature given as reason.

San Diego Union, April 15, 1913, II, 13:1. Appropriation from Japan will not be reduced . . . Larz Anderson, American ambassador to Japan, who recently returned to America from the Orient and who was at the Hotel del Coronado last week, says that anti-Japanese legislation threatened by California will not cause Japan to reduce its appropriation for the Panama-California exposition.

Anderson scouts the idea of friction between the United States and Japan. He says conditions were never better for a continuance of good feeling.

If Japan reduces its appropriation, it will be because economy is necessary. California should bear in mind, however, that Japan is very sensitive and would undoubtedly resent deliberate attempts to discriminate against its people. The changes of reduction of the appropriation are remote, though, he said.

Anderson has presented his resignation to President Wilson. He has been connected with the diplomatic service for twenty years and wants to retire, explaining that private business requires all his time.

San Diego Union, April 17, 1913, 24:1. Roof contracts are let at Fair; 200 trees set out . . . The Russ Lumber company and John Dee were yesterday awarded the contracts for roofing the 1915 exposition buildings being erected by the exposition company. The Russ Lumber company received the contract for material and the contract for putting it on the buildings went to Dee.

This is the same contract which two weeks ago was said to have been let to a Knoxville, Tenn. roofing contractor and supply man. The story printed at that time emanated from a Knoxville paper, which printed an alleged interview with the successful bidder, which, so far as anyone in San Diego was aware, was manufactured out of whole cloth.

In about ten days, the electricity building, now in course of erection, will be ready for its roof and, by the time that work is complete, it is believed the machinery building, the foundation of which is being laid, will be ready for the work of the roofing contractor.

The exhibition buildings, being erected by the exposition company, although large buildings, will all be constructed very rapidly, owing to the splendid organization of the department of works and the care with which preliminary details are worked out. Every load of lumber to go into the construction of each building is laid down at a designated spot and it is always found that when this material is wanted, it is at the most convenient point for the workmen.

A great many thousand feet of lumber and heavy frame timbers for the machinery building are not only on the ground, but a large part of the frame timber has already been cut and fitted, so that, by the time the foundation and floor is done, the electric crane will find its work ready for it.

Two hundred trees lining the Prado from the administration building to the east entrance were set out yesterday, materially altering the appearance of that thoroughfare, which is now clearly defined and separated from the ground prepared on either side for building.

Trees also have been transplanted in great numbers close under the west and north walls of the administration building, and, as these are nearly a third grown and of that variety, for the most part, of eucalyptus, making the most rapid growth in a very short time, they will assume height enough to soften greatly the rather severe lines of the building.

San Diego Union, April 20, 1913, 11:1-3. Rapid progress being made at Fair grounds; Electricity Building is nearing completion and framing to be started on Machinery Building this week.

San Diego Union, April 20, 1913, 12:1-2. Envelope used to boost San Diego Fair showing Exposition designs on front and back.

San Diego Union, April 20, 1913, 37:1-2. What newspapers say about Exposition.

San Diego Sun, April 21, 1912, 1:1. State Senate unanimously passed Senator Hinkle's bill providing for an appropriation of \$200,000 for a state building at the Panama-California Exposition.

San Diego Union, April 22, 1913, 22:3. Four New Mexico counties plans separate exhibits; Coalfax Mining Company plans outlay of \$25,000 on exhibits.

San Diego Union, April 23, 1913, 22:1. Making of movies to be shown at Exposition; Fair officials grant P. L. Holland novel studio concession; other concessions granted bring total to approximately \$450,000.

San Diego Union, April 25, 1913, 4:1. EDITORIAL: Colonel Collier's Washington Mission . . . Colonel Collier's mission to Washington may not prove a success; nobody can predict what the new congress may or may not do. But it will be a mistake to regard that mission as a forlorn hope. It has more than a fighting chance if the people of San Diego will stand solidly behind the exposition president and back him in his courageous effort.

San Diego Union, April 25, 1913, II, 11:1. Colonel Collier's aim is to secure \$1.0 million for Fair.

San Diego Union, April 25 1923, II, 11:2. E. B. Yerington, wealthy Nevadan, is to boost Fair.

San Diego Union, April 25, 1913, 11:3. Description of Southern California Counties building at Exposition; cost \$100,000.

San Diego Sun, April 26, 1913, II, 13:1. Board of Directors votes to ask city for bond election for another one million dollars.

San Diego Union, April 26, 1913, 1:5. Board of Directors ask for new million dollar bond issue for Fair; money needed for construction of eight buildings and permanent improvements.

San Diego Union, April 26, 1913, 4:1. EDITORIAL: Make the Exposition a Success . . . Should the tentative plans for calling the bond issue be carried out, as now appears certain, the entire subject will have exhaustive discussion. Every point as to which there may be doubt will be fully explained. It will be hoped, however, that the discussion will be amicable and that the people of San Diego will manifest the same public spirit and show the same united front that have already carried the exposition project so far on the road to success.

San Diego Union, April 27, 1913, 1:5, 5:1. BABIES PUZZLE EXPOSITION BOARD; San Diego Women Discuss Infant Problem of Big Fair; Is Ingenious Suggestion of Nursery/Kindergarten Practical and Would Parents Visiting Exposition Allow Their Children to Be Cared or in Public Gaze of Throngs? Should Youngsters Work or Play? These Questions Call Forth Various Answers by Interested Women

“How about those babies? There’s something I haven’t thought of.”

President D. C. Collier looked up from a paper he had been fingering meditatively and called in a number of his assistants who were at work in the same room. As nobody appeared to hear him the colonel made his inquiry more direct.

“Hogaboom, how about these babies?”

Hogaboom slanted a suspicious eye at his superior and then replied resignedly,

“I’ll bite. What babies? I’m really very busy Colonel.”

The colonel frowned majestically.

“This is no kid, Hogaboom. I’m talking about babies . . . the real live, kicking, crying, cooing article. Here is an application from a woman in Los Angeles who wants to take care of the babies at the exposition.”

“What babies?” repeated Hogaboom.

“Any babies, all the babies, everybody’s babies, regardless of race, creed or color. She specifies no conditions and names no limit.”

The able assistants looked up from their desks and gasped in unison. Hogaboom retained his self-possession.

“What the deuce does she want to do that for?” he asked calmly.

Then Collier explained.

The woman who is courting the job, the mere consideration of which temporarily staggered the redoubtable colonel, is Mrs. C. Aber of Los Angeles. Mrs. Aber is at present conducting in a department store of that city such a retreat for the offspring of temporarily preoccupied parents as she wishes to introduce here on a much large scale in 1915. Her plan is unique, comprehensive and idealistic as described by the exposition men, though some doubt has been expressed as to its practicality. Collier, Hogaboom and Herbert Lewis, after giving the subject considerable thought and discussion last week, arrived at the conclusion there were too many angles and subtleties foreign to their checked experience.

“It impresses me,” remarked Collier, “that it requires a feminine intelligence to cope with a proposition of this sort and with any degree of success. A baby is a -er -er-“

“A baby,” suggested Lewis mildly.

“That’s it,” continued the colonel, breathing deeply. “A baby, being a baby, is an essentially feminine produce.”

“There’s no denying that,” murmured Hogaboom.

“Well then, let’s put it to the women.”

And so it was definitely decided and it is for the purpose of guiding the exposition authorities to wise and beneficent action on Mrs. Aber’s application that the **Union** has obtained opinions of twelve prominent women in this city, including mothers, physicians, club women and those active in organizations and

philanthropic work. All agreed that the subject not only merited discussion, but should be given the most careful consideration before any definite decision was made and the details of Mrs. Aber's plans were frankly commended and criticized.

Mrs. Aber's idea, as outlined by the exposition men, is to have a large room set aside as a public nursery in which she, with a trained corps of assistants, would receive and check babies and young children, allowing their unencumbered parents to go upon their way, carefree and rejoicing. The unsuspecting infant, after being detached by fair promises from the maternal apron strings, is meanwhile enveloped in a maze of the most delightful deception. On the theory that a child is never so happy as when engaged in constructive work, occupations will be provided of such a beguiling character that, while the ideal is schooling, the deluded infant is unconscious of being engaged in anything but the most profitless enjoyment.

The chief attraction would be a miniature factory, in which baby hands would fashion paper furniture and flowers. The handiwork of the little ones might be sold to anyone sufficiently enraptured to buy. In addition to this possible revenue and the trifling sum changed parents for the double service to them and their children, Mrs. Aber believes that the instruction and amusement of children could be made an interesting exhibit in itself --- one worth a price of admission.

The women who have given opinions are practically united in believing that a nursery where babies and children may be checked and properly cared for will be needed at the exposition. They advocate, however, great caution in selecting the person to whom the concession is granted and a careful examination of the qualifications of all applicants.

"I am glad the **Union** has taken up this discussion," said Dr. Louis Heilbron, a member of the San Diego Club. "Such a concession would have to be conducted on a most practical and scientific basis and anyone undertaking it must possess great executive ability. All applicants should be carefully examined as to their experience and efficiency. I do not know Mrs. Aber and she may be a woman splendidly equipped for the work. Personally, I should like to see it given to a San Diego woman, if there is anyone here willing and competent to undertake it."

Dr. Heilbron, in common with a number of others, does not consider the kindergarten idea or any effort aimed at systematic instruction practical, without a definite arrangement for daily or almost continuous attendance on the part of the children. She is also opposed to making the nursery an exhibit.

"I do not approve of having an admission charge," she continued. "Of course, an exhibition showing the systematic and scientific care of children would be instructive. But the parents and children are entitled to first consideration, and I think both would feel more at ease if the public were kept out entirely. Children receiving too much attention or even observation become distracted, if not self-conscious and spoiled."

Mrs. G. B. Miles, superintendent of the Children's Home, while recognizing the necessity for a place along the general lines of the one suggested, considered a number of Mrs. Aber's ideas visionary.

"I'd like to talk to that good lady," said Mrs. Miles, laughing good-naturedly. "I don't know it all, but I should not care to undertake the job as she has outlined it. I have all that I can manage here. We average between ninety and a hundred children all the time. The middle of last February we opened a baby's cottage where we have twenty-five children between two months and five years old. In the cottage along we have three day nurses, two young assistants, and one night nurse.

"I do not approve of exhibiting the children. Then I have been wondering how the nursery could be conducted along sanitary lines. With so many strange children coming and going daily it would seem well nigh impossible to eliminate the danger of disease and contagion. Then I think there is apt to be difficulty with the parents. I doubt if particular parents would be willing to leave their children in such a place anyway. Children vary so, not only in health and cleanliness, but in race and color. There would, it seems to me, to satisfy all, have to be a good many divisions made. The undertaking undoubtedly would require a large building and a great many attendants."

Most of the women consulted said that after considering a few of the more obvious possibilities of the idea they could not imagine leaving their own children in an exposition nursery, however well it might be conducted. One suggested as a primary color division, "a dark room, a light room and a medium room," another a corps of chemically-pure wet nurses for the proper nourishment of nursing infants, and a third an automatic sterilizer and all-around regenerator; a painless machine to be invented by some local wizard for the occasion, by means of which the grubby, ragged or sickly infant may be converted, for the nonce, into a radiant and spotless creature. But such frivolous and satirical sallies were always followed by dark threats of summary vengeance on anyone daring to publish them in connection with their names.

Mrs. Oscar J. Kendall of the Wednesday Club and the Talent Workers thinks the idea a splendid one for people who could not afford to make other provision for their children. She doubts, however, the advisability of trying to sell the articles made by the children as it might lead some parents to imagine that their children were being exploited or urged to work too hard.

"Such a nursery would be a god-send to the poor and I think it should be conducted as nearly as possible along charity lines. To make it as sanitary as possible, I think every child should be bathed and given a little play dress.," said Mrs. Kendall.

"To try to carry out the educational idea does seem too impractical. You never can tell what a child will go or not do, and the right sort of woman can accomplish wonders with them. A great deal can be done by suggestion and when started in a simple, amusing, constructive undertaking, a child is very apt to remain absorbed for a long time."

Mrs. E. M. Capps, president of the San Diego Club, said that Mrs. Aber's plan had impressed her as a "very visionary thing," beautiful in theory, but not likely to be carried out successfully.

"I am afraid it would be very difficult to persuade the younger children to leave their mothers at all," she said. "Babies two and three and four years old are very adverse to going to strangers and I am afraid many of them would spend a good part of their time crying. Then, personally, I would have fear of disease."

Mrs. J. E. Jennison, president of the Daughters of American Revolution in San Diego, expressed herself as having at the head of the enterprise a well-known San Diego woman, experienced in such affairs, who would receive the endorsement and assistance of woman's organizations. She would approve having the nursery open to inspection. In the world's fair at Chicago, she said, there was a children's building with a model nursery and a department with incubator babies, both of which were interesting exhibits.

Mrs. Grant Conard, wife of ex-mayor Conard, said:

"I think the idea is an excellent one, but I doubt if there would be sufficient demand to justify a nursery on a very large scale. Nearly everyone who has a place to live has a place to leave their children, and most parents do everything to avoid the necessity of leaving them in a public nursery. Splendid use could be made of the playgrounds in caring for the children.

"As for teaching the children anything, I have my doubts. Little could be done along that line without regular attendance."

Mrs. Julius Wangenheim was another who did not take the thought of instruction very seriously.

"If the nurses or attendants succeeded in entertaining the children and making them forget they were in the hands of strangers, they would be doing very well indeed, I believe," said Mrs. Wangenheim. "I do not imagine though that the children will cry or be so upset on leaving their parents that they cannot be made happy for a time at least. The class of women who will profit most by the nursery will be those who have been compelled to leave their children alone or in the hands of others anyway."

The frequency with which children are hurt or lost in crowds was given by Mrs. Carl Owens of National City, president of the San Diego County Federation of Women's clubs, as one of the chief reasons for having such a nursery.

"The children would not become worn out and irritable and the parents would be free to enjoy unhampered the things that the little ones could not enjoy," said Mrs. Owens. "I would be in favor of having a school for the children who could come everyday for a time and of exhibiting their handiwork. I hardly think it would be wise to sell anything."

"No ailing children or those with infectious diseases should be taken. Unless great caution were exercised, there would be danger of spreading disease.

Dr. Charlotte Baker is of the opinion that the dangers of infection and a number of other unpleasantnesses suggested would be reduced to a minimum by keeping the children in the open as much as possible.

"There would really be less danger of a lot of children together, under proper care and supervision, contracting diseases than there would be out among the crowds and in the buildings," she said.

"I do not like the idea of making the nursery an exhibition and would not allow incubator babies to be shown at all. The nursery should be kept up by the exposition and not run for profit for anyone. An adequate charge should be made for each infant and the superintendent should be paid a salary like any other employee. It would be a splendid thing if there were an emergency hospital in connection with the exposition. I think there will be plenty of use for it."

Mrs. Ivor M. Lawson and Miss Elizabeth Freese, both members of the Wednesday Club, considered Mrs. Aber's ideas ingenious but not practical.

Mrs. Aber's application will be held under advisement by Colonel Collier.

San Diego Union, April 27, 1913, 12:2-3. What newspapers say about Exposition.

San Diego Union, April 28, 1913, 4:1. EDITORIAL: Oregon at the San Diego Exposition.

San Diego Sun, April 29, 1913, 1:1. Collier leaves tomorrow for Washington, DC to work for government recognition and a one million dollar appropriation.

San Diego Union, April 29, 1913, 22:2. Exposition grants concession to scenic road; L. A. Thompson given contract to operate railway at grounds, four miles in length.

San Diego Sun, April 30, 1913, 1:1. California Building plans complete; \$250,000 structure is to be permanent; architect Goodhue is coming; groundbreaking to be held soon. . . . The dome of the building will be 573 feet above sea level. The dome is designed after the Cathedral of Guadalajara and the Mirand tower in Spain.

San Diego Union, May 1, 1913, II, 13:4. Fraternity men to have building at Exposition; 2-story structure being designed after Green Pantheon with a glass roof; site not selected; plans being prepared by S. L. Holopeter, a draftsman in the office of Bristow and Layman, architects.

San Diego Examiner, May 2, 1913, 1:6-7. Let us vote the Fair bonds, but demand to know where the money goes.

San Diego Sun, May 3, 1913, 1:8. Work to be started soon on Domestic Liberal Arts Building and Foreign Liberal Arts Building; work on \$200,000 State of California Building to start within the next 10 days. . . . The Domestic Liberal Arts Building will face El Prado on the south side, standing on the shores of Laguna Alta. The Foreign Arts Building will be next to it, at the southeast corner of the Plaza de Panama and El Prado. Also on Laguna Alta, opposite, are an emergency hospital and a service building.

San Diego Union, May 4, 1913, 3:1-4. Visitors surprised at marvelous progress made at Exposition.

San Diego Union, May 5, 1913, II, 11:2. Congressman Kettner introduces bill to allow exhibits for Fair to be admitted into the United States free.

San Diego Sun, May 6, 1913, 1:7-8. Mayor O'Neill says city park lands are fine places for schools. "I don't think any sentimental reasons should lead us to exclude schools from the park."

San Diego Sun, May 6, 1913, 1:7-8. Rustic canyon – once beauty spot – is now no more. Flowers and trees fall before the grader. Opening of 6th Street tremendous task. Property owners charge that Park Commissioners did not make good their promise to transplant uprooted trees elsewhere in park.

San Diego Sun, May 7, 1913, 16:5. Board of Directors change name of Electricity Building to Home Science Building; Machinery Building to Arts and Crafts Building; Domestic Liberal Arts Building to Commerce and Industries Building, and Foreign Liberal Arts Building to Foreign Arts Building.

San Diego Union, May 7, 1913, 1:4-6. Editors of California Press Association amazed by Fair work; praise San Diego's boost spirit.

San Diego Union, May 7, 1913, 1:7, 12:1-4. Businessmen here aim for one million dollar bonds for Fair.

San Diego Union, May 7, 1913, 7:1. Wangenheim resigns from Park Board; praises work by John Morley,

San Diego Union, May 7, 1913, 12:1. Collier making friends for Fair in the East.

San Diego Sun, May 8, 1913, 1:7-8. Park Commissioner John F. Forward urges park appropriations for the coming year of seven percent; current appropriation was five percent; Council agreed to increase rate, but specified Park Commission would have to pay city for water used in the park. Forward: "The park with its boulevards is fine for the wealthy man with his automobile. What we are trying to do is to make the park a resort where the poor man can enjoy himself. They should have grass to roll on, and other things should be provided for their comfort."

San Diego Union, May 8, 1913, 4:1. EDITORIAL: Arizona's Surprising Course . . . San Diego will hope that the neighbor state's legislature will reopen this exposition question and determine it from a viewpoint of business interest, if not from that of sentiment.

San Diego Union, May 8, 1913, 10:1. Exposition buildings are given new names.

Park Commissioners Minutes, May 9, 1913. Commissioners Forward, Ferris and Chandler; Forward elected president. . . . Superintendent instructed to notify Mr. Davis, pound master, to remove dog pound from park . . . Board agreed to recommend bond issue of \$850,000 for permanent park improvements . . . Mr. Adams, president of City Council, requested removal of Park Department office from City Hall; Superintendent instructed to vacate the office and to erect an office at the headquarters in Balboa Park.

San Diego Union, May 9, 1913, 7:1. State building plans forwarded.

San Diego Union, May 9, 1913, 12:3. San Diegans aboard **Cleveland** received great encouragement in the orient; think displays from Java for Fair are likely.

San Diego Sun, May 10, 1913, 1:4. The House passed, May 10, a bill authorizing free admission under bond of foreign exhibits for San Diego Exposition.

San Diego Union, May 10, 1913, 3:1. Chamber of Commerce endorses bond issue for park work; calls on Council to fix date for election.

San Diego Union, May 10, 1913, 4:1. EDITORIAL: The Exposition Bond Issue . . . No very strenuous campaign should be necessary to carry this proposed bond issue. The people of San Diego have stood by the exposition in the past. There is no reason to doubt that they will continue to give it their hearty support.

San Diego Union, May 11, 1913, 1:1. Exposition bill providing for free entry of goods for exhibition passes House by unanimous vote, May 10; Kettner stifles opposition to San Diego measure; Senators pledged to support; equals U.S. recognition; Collier pleased by victory. . . . Bill provides for acceptance of cash or a bond by the Secretary of the Treasury to guarantee that all awards and other obligations to exhibitors shall be met by the Exposition Company.

San Diego Union, May 11, 1913, 10:1. Progress on Fair work amazing; water pipes are laid.

San Diego Sun, May 12, 1913, 2:1. John Simpson Construction Co. at work on Southern California Counties Building today; foundations laid some months ago; preliminary work of raising frames has been done.

San Diego Union, May 12, 1913, 20:1. Park Commissioner Schmidt wants to lease city park land to get more revenue.

San Diego Union, May 13, 1913, 20:7. Cracker and Preserve concern propose to build plant at Fair grounds.

San Diego Sun, May 14, 1913, 8:1. Workmen are building pergolas around citrus grove and Southern California model farms exhibit.

While the John Simpson Construction Company is busy building the Southern California Counties' Building at the eastern gateway of the Exposition, workmen are building the pergolas around the citrus groves and the Southern California model farms exhibit.

Three pergolas will act as a sort of frame for the settings of the win exhibits to be made by the seven southern counties, setting them off to the best possible advantage, beautifying them greatly, and at the same time adding to the comfort and pleasure of the visitor.

The pergolas are eight feet high and ample in width to cover a broad walk, and they will be thickly covered by creeping rose vines, as near a perpetual booming variety as possible, so that the flowers will be in constant evidence, reminding the visitor who walks beneath or occupies the rustic benches to be placed there, that he is in Sunny Southern California, where such things are not only possible, but natural the year around.

Outside the pergolas will be planted a row of handsome acacia trees.

San Diego Union, May 14, 1913, 22:4. Plan for real tea garden at Exposition; Sir Thomas Lipton sends agent to San Diego to arrange for exhibit.

San Diego Union, May 14, 1913, 14:1. City and County Building in park is favored.

San Diego Union, May 15, 1913, 3:2. Council endorses park bond issue; passes resolution favoring election on funds for park improvement.

San Diego Union, May 18, 1913, 1:1. Construction at Fair amazes one and all.

San Diego Union, May 18, 1913, 12:2. Wangenheim's park work appreciated; Board adopts resolution praising retiring commissioner for services.

San Diego Union, May 18, 1913, 13:1-3. Exposition's scope, loyalty of city is amazing

San Diego Union, May 19, 1913, 1:7, 5:2. Peaceful end comes to Captain Sehon.

San Diego Union, May 20, 1913, II, 11:1. Bids for California Building called for June 14.

San Diego Sun, May 21, 1913, 8:1. Kettner Bill giving local exposition international recognition passed by Senate on Monday and signed by President Wilson permits bonded warehouse at San Diego Exposition; suspends immigration laws to admit exhibitors, their workmen and assistants.

Following the signature of President Wilson to the Kettner bill, which passed the Senate Monday, it is possible the San Diego Exposition will be called upon to make room for some more foreign exhibits as the passage of the bill is recognition and authorization of the exposition by the government under the meaning of the act approved April 29, 1902.

The Kettner bill provides that both the Secretary of the Treasury and the Secretary of Commerce may extend to the San Diego Exposition all rules and regulations necessary to suspend customs laws and create a bonded warehouse of the Exposition grounds, and the Commerce Department to suspend the alien labor and immigration laws for the same purpose and in the same district. The usual bond and safeguard is required and the notice will be sent by Department heads to all foreign governments through the American diplomatic service.

The passage of this bill puts the San Diego Exposition on an equal footing in foreign countries with than in San Francisco, with the difference that San Diego makes a more direct appeal to exhibitors, through its unique and favorable plan of operation, its scope and character.

Colonel Collier is in Washington and has wired his complete satisfaction at the end of two year's struggle for recognition, a struggle that was won in spite of opposition from sources from which there should have been no opposition.

The division of exhibits may now approach any foreign government or organization, exhibitor or art gallery, scientific society or college and do so on any equal footing with any exposition ever held. Exposition officials expect a big increase in the number and volume of exhibits following the approval of the bill, just passed by President Wilson.

San Diego Union, May 22, 1913, 2:1. Wild Animal Farm may add fame to San Diego.

San Diego Union, May 22, 1913, 2:4. Council sets July 1 as date for \$850,000 bond election to make better Fair.

San Diego Union, May 22, 1913, II, 14:1. Visitors flocking to Exposition building.

San Diego Union, May 23, 1913, 4:1. EDITORIAL: On Exposition Bonds . . . As matters stand, the success of the exposition and the stupendous advantages that it will cause the city are fully assured, provided the people give to the undertaking the additional support which is now found to be required.

San Diego Union, May 23, 1913, 12:4. Automobile makers plan exhibition of motor-propelled vehicles; plans for building \$200,000 structure; story of wheel will be told.

San Diego Union, May 24, 1913, 9:1. President Wilson signed Kettner's bill for a bonded warehouse, May 23, which all departments in Washington, DC, construe to mean recognition of the Exposition, making it in fact as well as in name an International Exposition.

San Diego Union, May 24, 1913, 9:1. Moore, president of Panama-Pacific Exposition, raps San Diego Fair; enrages Collier.

St. Louis, May 23. Col. D. C. Collier registered at the Jefferson hotel on his way back to San Diego from Washington, where he has been in the interest of the Panama-California exposition. The colonel was in fine fettle. He had just received a telegram from Congressman Kettner that the president has signed Kettner's bill for a bonded warehouse at the exposition, which all of the departments in Washington construe to be full recognition of the exposition, making it in fact as well as in name an international exposition.

He was particularly pleased at the action of the president because of the action of C. C. Moore, president of the San Francisco exposition, who, after the bill had passed both houses of congress, went out of his way to wire an dozen or more senators urging that the bill be reconsidered.

The colonel, upon learning of this, sent the following telegram to Moore: "Have seen most of your telegrams to senators. They are deeply resented in many quarters and I desire to formally notify you that unless you discontinue your entirely unwarranted interference with legislation in favor of San Diego, there will surely be reprisals, and you will encounter unexpected opposition to legislation essential to your exposition. (Signed) D. C. Collier."

He addressed himself as being utterly disgusted with the narrow and bigoted attitude of Moore and suggested that his time would be better passed in building rather than tearing down.

San Diego Union, May 25, 1913, 2:1-4. Priceless flora bedeck grounds.

San Diego Union, May 25, 1913, 12:1. Act authorizes governmental departments to make special rules and regulations for the free admission of exhibits and persons accompanying the same; places San Diego on same footing as previous expositions; makes it possible for San Diego to ask for a fair share of any appropriations for Exposition purposes in 1915; jubilee announced over success of bill; Collier to be guest of honor at banquet when he returns Friday.

San Diego Union, May 26, 1913, 3:2. Bridge work is rushed, spans chasm.

San Diego Union, May 26, 1913, 5:7. Strictest economy is Exposition watchword.

San Diego Union, May 26, 1913, 10:1-2. Fair bill's friends have hard fight to prevent mutilation; last clause attacked by Smoot and Penrose.

San Diego Union, May 26, 1913, 20:2-4. Fair structures arise, canyon bridge work spectacular.

San Diego Union, May 27, 1913, II, 11:3. Tickets for affair at Grant Gill Friday to honor Collier are now on sale.

San Diego Sun, May 28, 1913, 1:1. Tulare County to exhibit here . . . Exposition officials were very much interested today in a report that Tulare county was likely to cut out the San Francisco expo and use San Diego as her place to exhibit.

According to news dispatches, T. B. Twaddle, chairman of the Tulare supervisors, said that San Francisco's charge of \$2.50 a square foot for exhibits was more than Tulare county would pay. It would cost \$8,000 for the county to put an exhibit there.

"We have voted \$5,000,000 for San Francisco," he said, "and that is enough." The other supervisors agreed with him and are said to be ready to vote on Monday to come here, Twaddle said.

"If San Francisco does not come down in her demands, it is likely we will show a county exhibit only at San Diego." "We kept asking them at Santa Cruz what they would do with the \$5,000,000 voted They said it was for entertaining purposes. That was all the satisfaction we got."

San Diego Union, May 28, 1913, 11:1. Ohio man signs contract for Exposition space; plans to build bungalow.

San Diego Sun, May 29, 1913, 2:3. Collier back says passage of Kettner bill means much to San Diego.

San Diego Union, May 29, 1913, 12:1. Bombay Indian Company makes appropriation for space for exhibit of Indian silks and curios; rare wares and jewelry to be made before crowds.

San Diego Examiner, May 30, 1913, 1:3-5. Wilde's new bank building symbolizes strength and solidity.

San Diego Union, May 30, 1913, II, 13:1. Throngs scramble for tickets to Collier fete . . . With over 350 tickets out and people clamoring for more, it looks as if there will be a large crowd at the booster dinner tonight at the Grant grill, to be given in honor of Colonel Collier,

Nearly every man who took tickets to see had been back for more and the limitation were it not for the fact that the dining room will not any more could easily be raised to 600.

Most of the business houses will be closed today. That will make it easy for all the boosters to get to the dinner, which begins promptly at 7:30. Carl Heilbron will be toastmaster. Mayor O'Neill will speak on behalf of the city. J. Fred Lee will speak for the chamber of commerce. C. A. A. McGee will talk for the "newcomers." E. O. Tilburne will speak for the Order of Panama. Vice President George D. Burnham will answer for the exposition organization, and Colonel Collier will talk for himself.

From what he has said in personal conversations since his return home, his talk will be a red hot one, right from the shoulder, too. There will be several guests of honor, among them John D. Spreckels and Colonel J. Wellington Boyle of New York, who attended the dinner to Collier about a year ago when he roasted President Taft for interfering with San Diego's fight for recognition and predicted his political defeat.

Music, new booster songs, and all sorts of stunts will fill the evening.

San Diego Sun, May 31, 1913, 13:1-2. Collier given royal welcome by 500 men in Grant Grill; Spreckels confirms report that railroad will be completed by the time Exposition opens; Collier repeated the statement long known by business interests of the city that every cent for carfare for himself and his wife, every Pullman sleeper, every hotel bill and over personal Exposition expenses have been paid for out of his own pocket.

San Diego Union, May 31, 1913, 1:1-8. Flashlight banquet giving welcome to Collier, Exposition president, on his return from Washington, DC, where he obtained recognition of the 1915 Fair; Collier, who was unsalaried, calculated he had spent \$100,000 out of his own pocket for traveling and other Exposition expenses; Spreckels promises railroad will be completed by the Exposition opening.

San Diego Union, May 31, 1913, 24:1. Order of Panama to be national fraternity; Brazilians want charter; details of Exposition are to be laid before Committee Tuesday night.

San Diego Union, June 1, 1913, 2:1. Thousands of rare pines and ornamental cedars, magnolias and live oaks, pepper trees and eucalyptus, acacias and grevilleas, Monterey and Italian cypress, and palms in infinite variety are being cultivated at Fair; Exposition grounds beginning to give some idea of paradise of verdure; paid for out of original \$1,000,000 bond issue expended under the direction of the Park Board; palms in lower parts of canyons with smaller shrubs and vines and flowering plants extending up sides; derrick and machinery used in construction of bridge also used to lower and place heavier trees in the canyon; wire fences running along boulevards draped with free-growing rose bushes, ramblers and honeysuckle; 23-acre nursery; 600 acres to be treated..

San Diego Union, June 1, 1913, 11:1-2. Isthmus at Fair to be 25-acre fun tract; 8,000 feet frontage of freak amusements to include every sensation known; visitors can be frightened, shocked and pleased for a time.

When parting lovers, cheek to cheek here or anywhere are heard to sob out a long farewell and murmur brokenly, "Thismush, thismush," as they undoubtedly will begin to do within the next few months, let it not be supposed that they are merely exchanging cabalistic love stuff. No, no! For a while "thismush" can be used as a love word under stress of great emotion, when almost anything goes, it really has a more general significance. It means "The Isthmus" and when lover sob it brokenly on parting they are comforting each other with the thought of where they'll surely meet again, namely on "The Isthmus," not of Panama, but of the Panama-California Exposition in 1915.

What is The Isthmus? It isn't --- yet. But it will be very much so. So many have asked that the exposition people have been put to it to give an answer. Some have said that it sounds "spicy"; others "unique and lively." It will be all of these. Colonel Collier says it will be twenty-five acres of amusements, with an 8,000 foot frontage of fun, a sort of Broadway with tropical embellishments. Winfield Hogaboom says that it will be the Midway Pleasance with chili sauce. I. G. Lewis that it will be something "east of Suez" with all the refinements of civilization.

The Isthmus will be the amusement center of the exposition, the thoroughfare of thrills, as the inspired barker might put it; a journey of joy, extending from the north gate nearly to the east entrance, in the course of which every new sensation known to man and approved by the exposition censor may be experienced for the price of a dime, ten cents there or thereabouts.

To stroll calmly through the Cannibal Village, where tenderness is the only Christian asset, and enjoy the experience of being regarded as animated stew with one of its usual disadvantages; to wander at will in the Wilds of the Amazon; to sail down the Orinoco; to penetrate the fastness of the jungle; to mount to the topmost pinnacle of the Andes, and the next moment to plunge twenty thousand leagues under the sea; to negotiate all these terrifying and breath-taking adventures in a pair of pumps or a hobble skirt, with the comforting assurance that one is never more than 100 yards from a soda water fountain --- such will be the joys of The Isthmus.

It would be staggering to the most Herculean and resourceful mind to endeavor to describe all at once the multitudinous wonders and distracting diversion of The Isthmus. There will be subtle attractions to stimulate the most jaded and world-weary souls, as well as those of a more obvious and mirth-provoking character for the children. As planned, the concessions will be the most novel in the history of expositions, and The Isthmus will become famous, even as the Midway in the Chicago World's fair became famous.

Many who, owing to youth or other handicap, missed the Midway, will see The Isthmus and revel in its wonders. Perhaps even the "poor little Irish maid" in the song, who, it will be remembered, had never been on the Midway or danced the "hoochy-koochy," will come to San Diego, if she is still alive, clothed in years and sophistication, and dance the Tango on the Isthmus. Wouldn't it be bully if she should?

San Diego Union, June 9, 1913, 5:1. Excursion parties will be regally entertained; first is from Montana; Exposition officials make preparations for proper reception.

San Diego Union, June 1, 1913, 11:1-2. Mining Building as it will look when gates are opened (illustration).

San Diego Union, June 2, 1913, II, 1:2-3. Workingmen's Hotel (Golden West) is Spreckel's plan; plans being drawn by Harrison Albright; Wurster Construction Co. of San Diego awarded contract.

San Diego Union, June 2, 1913, II, 13:1. Plan big Burbank exhibition for Exposition; thousand of plants created by California wizard to be shown; Rollo Hough, vice president of Luther Burbank Company, in San Diego yesterday; "A great deal of interest has been evidenced by residents of San Diego county in spineless cactus," said Mr. Hough. "This plant will revolutionize live stock conditions in the southwest, of which San Diego is the outlet. The public has been imposed on by persons selling false spineless cactus and using Burbank's name."

San Diego Union, June 3, 1913, II, 14:1. Order of Panama meeting tonight; first step in campaign for extension of body will be taken then.

San Diego Union, June 3, 1913, II, 15:1. Texas after fund for big Fair building.

San Diego Union, June 4, 1913, II, 13:2. Honolulu sending representative to Collier; A. L. MacKaye, Hawaiian newspaper man, coming here soon; may plan big exhibit.

San Diego Union, June 5, 1913, 2:2-3. Wide Awake Club endorses Exposition bonds without a dissenting vote.

San Diego Union, June 5, 1913, 9:1. "D" Street to be "Old Broadway" in future.

San Diego Union, June 5, 1913, II, 13:3. Utah and Nevada plan unique exhibits; Mormon church will send archaeological collection to San Diego Fair; replica of mines of Comstock lode to be on view at Exposition in 1915.

G. A. Smith of Salt Lake and Senator W. G. Hunter of Nevada visited the exposition grounds yesterday and talked with officials about the part their respective states will play at the San Diego fair.

The Mormon church has offered the use of its historical material and nearly every commercial organization in the vast system of business affairs operated by the church will be represented. The church also has one of the greatest archaeological collections in all the west, a collection that covers the entire Great Basin country from the Rio Grande and Colorado river regions to the valley of the Great Snake and Columbia rivers, between the Rocky mountains and the Sierra Nevada.

. . . Senator Hunter was also enthusiastic over the opportunity for Nevada offered at this exposition, and especially to Southern Nevada, in which portion Esmeralda county and Goldfield, from which he comes, are situated. Nevada, like Utah, has a great deal to expect from her exhibit. She has more vacant land than any other state in the union, being third largest in the union in point of public lands available. Her historical material is varied and attractive and her huge dry farming areas all are looking for more men and women to bring them into industrious utility.

One of the most attractive exhibits she ever made was an exact duplicate of the enormous underground workings of the famous Comstock lode, from which in less than twenty years, was taken nearly a billion dollars worth of gold and silver. These workings contain more than 50,000,000 feet of timbers and extend five and a half miles in one direction and three in another. The deepest workings are 4,000 feet below the surface and at present high grade ore is being taken from one mine at a point two and a half miles from the shaft on the 2,500 foot level. The great Sutro tunnel is a part of this system and will be carried out in miniature with wires and tubing, with all the numerous shafts working the different colored strata and the replica of Virginia City on the surface. Added to this will be the miniature of the great copper mines at Ely, where the ore is scooped up with gigantic steam shovels and the wonderful mines at Goldfield, where on mill turns an average of \$1,300,000 a month in gold bullion.

San Diego Union, June 5, 1913, II, 22:1. Colonel Jewell and E. J. Swayne say Italian art dealers are interested in placing exhibits at Fair; local officials declare they will welcome exhibits from all over the world.

Park Commissioners Minutes, June 6, 1913. On motion of Commissioner Ferris and duly seconded and carried, it was resolved that the Board of Park Commissioners are unalterably opposed to the erection of the City Hall and Court House, or any public building in Balboa Park.

San Diego Union, June 6, 1913, 1:3. Collier wants every visitor to become a booster; tells what Fair will do for San Diego; endorses bonds; California Society gives unanimous approval.

San Diego Union, June 6, 1913, II, 11:2. Park Commissioners Forward, Ferris and Chandler tell Mayor O'Neill their objections to County-City buildings in park; County Supervisors in favor of locating courthouse in park.

According to Mayor O'Neill the principal reason given by the commissioners was that they did not want the building in the park. They also considered that the park would be an inconvenient location, especially from the county's viewpoint, as the jail must remain in its present location, and if the courts are located to the park it would be inconvenient to transport prisoners between prison and court. The mayor said he agreed with the commissioners on the latter point.

"I am in favor of having the county go ahead and build a new courthouse on the present site, such quarters as the city may occupy to be leased to it at a yearly rental of 4 percent of the cost of construction and sinking funds for the bonds. They city can sell its present property."

San Diego Union, June 8, 1913, 1:3-5. Governor Johnson signed bill giving \$200,000 to Fair yesterday.

San Diego Union, June 8, 1913, 7:1. Ask anything you want to know about Exposition at Broadway headquarters tomorrow and have the matter explained; bond issue is needed; different man will be on duty each hour from 8 a.m. until 5 p.m.

San Diego Union, June 8, 1913, 10:1-2, 15:1-4. Exposition is greatest factor in making San Diego miracle city of Pacific coast, verdict of boosters.

San Diego Union, June 8, 1913, 12:1. Fourth Exposition building, on south side of El Prado opposite Arts and Crafts, begun; fifth, soon; Science Building foundation and part of first floor completed; work is rushed; Mission design is used; will be one of the smallest of the large group; will open on El Prado and Plaza de Panama with two large and ornamented doorways; will have two bell towers, resembling in this the Santa Barbara mission, though the towers themselves include a suggestion of the well-known belfry at San Gabriel mission; construction of bridge arches progresses rapidly; automatic mixer is utilized; cribbing for first pier on the city end of bridge put in place; lumber used for forms to support hundreds of tons of concrete to be used for foundations and bracing of buildings to be erected later.

San Diego Union, June 8, 1913, II, 13:1. George W. Marston urged to stay for mayor.

San Diego Union, June 8, 1913, 13:1-3. City Feverishly Active Preparing for its Mammoth 1915 Exposition; Marvelous Progress Made in All Departments; Great Bridge to Span Canyon Stretching Itself Across Space Rapidly; Success Indicated by Daily Achievements.

The one thing at which visitors to San Diego never cease to marvel is the feverish activity and the vast preparations being made for the year-round exposition the city will hold in 1915.

Probably not one in a dozen people realizes the scope and extent of these preparations and the sight of the huge frames and concrete structures under construction, men laying foundations for more buildings going up in every portion of the city, municipal and private wharves under construction, the myriad activities of a hustling, bustling city surprises these visitors.

At the administration building on the exposition grounds, where are housed the offices of the exposition, is found a complete organization, departmented and correlated in such a manner that every part of the work that has proceeded steadily for over three years goes along like clockwork.

G. A. Davidson launched the exposition idea in August, 1909, and San Diego grasped it with an enthusiasm and energy never equaled in this country. The work has never flagged for a moment since then and today hundreds of men are on the grounds, in the offices and far afield, toiling night and day to have every portion of the project ready for the opening day. The work of preparation has been carefully and completely done. The physical side has been as carefully done.

San Diego is creating one of the most beautiful parks in the world and building simultaneously its exposition. After the men who are doing this work are dead, there will remain a monument to their sagacity and industry second to none in the world. The question as to what permanent mark or improvement is left by an exposition is answered by San Diego: it will leave a world-famous park and a world-famous gathering place, with courts and buildings of enduring material --- reinforced concrete --- and great halls for museums, art galleries and meeting places set in a system of parkways as beautiful as could be devised, on a site that is conceded to be one of the most commanding and inspiring in the world.

Ground was broken for work July 19, 1911, and the grading has been finished in nearly a year. A great plant propagating yard was established in 1911 and now contains millions of trees, ferns and vines for decorating the grounds, parkways and buildings. Visitors see great trees being hoisted over the sides of the huge viaduct to the slopes below for planting in holes already prepared; trees that will never be moved again.

Surrounding the administration building is the steel and lumber yard, where is stored the great quantity of steel rods for use in the concrete bridge across Cabrillo canyon, and the lumber for the buildings. The bridge is 900 feet long, 130 feet high, now about 20 percent complete, a structure in the building of which no human hand touches either sand, cement or stone --- all being done automatically by electric power from one central point.

Of buildings, there are four now under construction --- that known as the Home Science building being most advanced. The Arts and Crafts building is being rushed, as are the Science building and the Counties of Southern California Building. These four are in various stages from foundation to roof covering. The most advanced building methods to save labor and time are being used on all of them and they seem to grow overnight almost, so fast does modern construction methods accomplish the desired result. Bids will be opened, June 14, for the \$250,000 California state building.

The great bridge is probably the most spectacular piece of construction going forward in California today. It seems to swing out from the abutments to a dizzy height, and will, when completed, last for all time. Thousands of tons of steel, cement, stone and sand are being placed in it as fast as modern methods can place them. The bridge connects the very heart of the city with the heart of the exposition and city park grounds, and is a monumental structure.

When the California state building is finished, it will be connected with the bridge, and the two will form one architectural piece of work, nearly 1200 feet long and over 375 feet high, the top of the tower of the state building lifting its dome more than 500 feet above the sea and radiating a light visible to mariners more than 100 miles over the ocean, north, south and west.

Director of Works Frank P. Allen, Jr. has adopted to the construction of frame buildings the methods used for steel construction and the result is little short of marvelous in results and economy. The construction of large exhibit buildings is naturally of the truss order, as large unobstructed floor space is required. Steel construction methods are easily adaptable to this style of building. The process is exactly the same with timber for framework, as it is for steel. The frames are built on the ground, cut, fitted and bolted together, and a large electric crane swings them into place above, where they are easily and quickly bolted home.

President D. C. Collier, who works, has never taken a salary not an expense account, and he has done nothing but work for the exposition since 1909, his expenses since that time being variously estimated as low as \$100,000. He had traveled thousand of miles, voyaged thousand more and has appeared before practically every element in the world that he thought would make for the success of the project.

President Collier believes that the world has tired of the antiquated and obsolete methods of exhibiting "products" as such. He believes these teach the beholder practically nothing beyond the fact that man's transportation facilities are adequate to the task of collecting them, and his means ample to defray the expense; otherwise, there is nothing to be learned from such exhibits.

In searching for a theme for the San Diego exposition which would teach the visitor something worth knowing, and, therefore, leave a lasting and useful impression, President Collier hit upon the plan of presenting a synopsis of man's evolution through a demonstration of the myriad processes marking the present acme of civilization and embodying the history of man. It was a brilliant conception and its great merits have been recognized by the countries of the world, in that a great many more than were expected to do so have arranged to become participators in the San Diego celebration of the opening of the Panama canal. Under the plan of President Collier, products will be seen as adjuncts to the exhibition of processes which call them into being.

After San Diego had sent its invitations to the various states and to foreign countries and these had responded in so much greater number than was at first deemed possible, it was found necessary to greatly enlarge the scope of the exposition. To this end the city now is about to vote an \$850,000 bond issue.

As President Collier has stated the need for the additional funds has been felt for over a year for many reasons. Chief among these is the added responsibilities that have come to the exposition through the determination of nine states to exhibit here and their appropriations of funds for the purpose, and the desire of five others that are taking active steps to be ready on time.

Added to these are the state and counties of California itself, which were quick to grasp the opportunity, the seven southern counties being the first to start actual work on the grounds.

There are seven countries of Latin American that have accepted the invitation to participate here and negotiations are pending in five others.

As to exhibits from the United States, some of the biggest industrial concerns in the country are coming in and the railroads will have either a joint exhibit building of their own or a series of separate buildings, plans for some of them being underway in the division of works. Commissioners are working now in the east with the automobile trade, with every prospect of securing a large joint exhibit in a separate building.

The Smithsonian institution and the National museum are cooperating with the division of exhibits to secure exhibits of ethnology and archaeology from all over the world, and Congressman Kettner will soon introduce a bill authorizing the departments of the government to place their exhibits here as well as at San Francisco.

Enough exhibits already have been secured to make good on all promises of the exposition, but there will be no rest until every conceivable exhibit that will go to make a complete exposition of the history and achievement of the human race in America are secured, including the great government department exhibits.

It has been demonstrated that the unique plan for exhibits and concessions and special attractions devised by the exposition officials and now being carried out, is one that meets with favor with the people who are desirous of exhibiting and of placing concessions, and the exposition has strong evidence that it will be able to get all of the exhibits and attractions that it desires by 1915.

In the matter of attendance, the conservative estimates made by the railroad officials, basing these upon the wide campaign of publicity that has been put out by the exposition, shows that the attendance will be more than sufficient to maintain the exposition during 1915, and that it will bring to San Diego hundreds of thousands of visitors, not only from all the eastern states but from foreign countries. Estimates made by railroad officials and others give evidence of a daily attendance here of upwards of 25,000 people throughout the entire year of 1915.

A series of events calculated to draw large crowds of people to San Diego at various times throughout the exposition is being planned now and there can be no doubt that the plans may be carried out.

All these things are made possible by the united action of San Diego in supplying the funds and supporting by every other means possible the work of the men in charge of the creation of the exposition. When it shall have closed, San Diego will have so advertised its resources of every kind that with its 100,000 people as a nucleus, its growth cannot fail to be rapid, for it will have brought to its doors every element in the United States and Latin America that might contribute in even the smallest degree to its rise to a place as one of the great seaports of the world.

San Diego Union, June 8, 1913, 15:1. Michigan State Society endorses bonds.

San Diego Union, June 8, 1913, II, 1:1. Enterprise of big Fair astonishes Washington; national legislators enthusiastic over plans of San Diego Exposition; Smithsonian to assist; educational value of unique displays expected to create profound interest.

San Diego Union, June 9, 1913, 5:1. Excursion parties will be regally entertained; first is from Montana; Exposition officials make preparations for proper reception.

San Diego Union, June 9, 1913, 5:7, 7:4. Secretary of State Lucero of New Mexico impressed by prospects of Fair.

San Diego Sun, June 9, 1913, 8:1. Governor Johnson signed State of California Building bill yesterday; \$200,000 appropriation is in addition to \$50,000 appropriation bill signed two years ago.

San Diego Union, June 10, 1913, 24:1. Businessmen give reasons for voting bonds.

Park Commissioners Minutes, June 11, 1913. Committee of residents living east of Balboa Park want a drive from east boundary of park near Ivy Street to connect to the Exposition grounds . . . John Nolen wants a road on the north side of the park connecting with Switzer Canyon road.

San Diego Union, June 11, 1913, 1:3. Captain A. T. Belantine, USA retired, returned from a trip around the world says San Diego's Fair is being heralded abroad.

San Diego Union, June 11, 1913, 3:2-3. City Pound must be moved from its old-time location.

San Diego Union, June 11, 1913, 12:1. Realty Board endorses bond issue.

San Diego Union, June 11, 1913, 22:1. Auditor's figures prove boost for bonds; Moody shows that only \$403,000 of million-dollar issue expended to date.

San Diego Union, June 11, 1913, 26:1. Edward S. Stephenson of Tokyo to publicize San Diego Fair in Japan and China.

San Diego Union, June 12, 1913, 26:1. Japanese to hear advantage of Exposition; Hogaboom makes arrangements for representative with Nipponese papers.

San Diego Sun, June 14, 1913, 1:1. Belcher explains finances and plans of local Exposition in full.

San Diego Union, June 14, 1913, 1:1. Louis J. Wilde say we will all leave if bond issue fails; banker back home and full of hope for San Diego.

San Diego Union, June 14, 1913, 7:1. Bonds will be discussed at general meeting of New York State Society.

San Diego Union, June 14, 1913, 7:2. Modeling decorations for buildings (illustration)

San Diego Union, June 14, 1913, 7:2. Tulare County to do its share toward Fair; A. E. Miot, secretary of Tulare Chamber of Commerce, in San Diego to consult with Exposition officials..

San Diego Union, June 14, 1913, 7:4. N. S. Stevens, shoe polisher, gives five dollars to fund.

San Diego Union, June 15, 1913, 2:4. New York Society pledges support of bonds.

San Diego Union, June 15, 1913, 2:5. Bids received for California State building; Wurster concern of San Diego, \$272,700, lowest; plans to be revised.

San Diego Union, June 15, 1913, 6:2-4. Miles of frieze border modeled at Exposition; wet clay, plaster used in carloads.

San Diego Union, June 15, 1913, 10:1-2. Financial statement of Exposition Company issued; books opened to public.

San Diego Union, June 15, 1913, 13:2-3. Putting up bents for Cabrillo Canyon span; each arch supports itself and braces its neighbors; made of reinforced concrete; when filled with concrete each pier will carry 1,100,000 pounds.

San Diego Union, June 15, 1913, 30:2-3. Stroll along the Isthmus.

San Diego Union, June 16, 1913, 1. William Kettner says "bonds must carry."

San Diego Union, June 16, 1913, 18:1. Buildings rising like mushrooms on Fair site; builders make use of new scientific methods of construction and speed work.

San Diego Union, June 17, 1913, 1:2. Painters, paper hangers, and decorator unions endorse bonds.

San Diego Union, June 17, 1913, 7:1. Colonel Collier says San Francisco agents are fighting bonds; manufacturing association endorses bonds.

San Diego Union, June 17, 1913, II, 2:3. Alexander Neilson, president, says San Diego and San Francisco Exposition Club for bonds.

San Diego Union, June 17, 1913, II, 2:3. Bolo Club endorses bonds.

San Diego Union, June 17, 1913, II, 13:2. **West Coast Magazine** boost Fair.

San Diego Union, June 18, 1913, 2:1. Pan Builders' Association, Printers' Board, and others endorse bonds.

San Diego Union, June 18, 1913, 5:1. Logan Heights Improvement Association endorses bonds.

San Diego Union, June 18, 1913, II, 1:2. Walter Wagner, member of Southern California Exposition Commission, says "vote for bonds."

San Diego Union, June 19, 1913, II, 1:2. L. G. Jones, in letter to **Union**, gives reasons for bonds.

San Diego Union, June 19, 1913, II, 13:1. San Diego teachers endorse bonds.

San Diego Union, June 19, 1913, II, 20:1. Autos needed to bring voters to polls, July 1.

San Diego Sun, June 20, 1913, 1:7. Spreckels will give Exposition organ; announcement made at meeting of Brooklyn Heights Improvement Club last night; gift to be permanent.

San Diego Union, June 20, 1913, 1:2. Carpenters' Union determined to put Exposition on unfair list; workmen refuse to cease jobs.

San Diego Union, June 20, 1913, 5:1, 5:3. Brooklyn Heights Club and P. J. Benbough endorse bonds.

San Diego Union, June 21, 1913, 1:5. Supervising architect Bertram Goodhue here from New York office; will visit Fair grounds with Carleton M. Winslow, his assistant; is pleased with progress made.; some lemons at northern fair, but real beauty here, promise; wonderland of flowers to grace San Diego exposition in 1915, says architect; San Franciscans far behind in construction work.

"While the people of the East will go to San Francisco to see piles of machinery, lemons, oranges or grapes, when they visit San Diego's fair, they will see a wonderland of beauty and flowers and trees. And, believe me, the construction work on the buildings is far ahead of what has been accomplished to the present in San Francisco."

This remark was made by Bertram G. Goodhue, supervising architect of the fair buildings, who is at the U. S. Grant Hotel on one of his flying trips to the west coast from his office in New York.

“How are things going at the fair grounds?,” he was asked.

“Surprised and delighted,” came back the answer like a flash. “Everything will be ready for the opening, I think there is no doubt about that. Of course, I am only the architect and of the question of finances I have nothing to say. But I and my assistant, C. M. Winslow, who is on the job all the time, dreamed a dream of beauty here that will last even if the stucco on the buildings in Balboa Park, where some of the exposition buildings are now half-completed, are torn down and forgotten.”

Goodhue and Winslow will pay a visit to the exposition grounds today.

San Diego Union, June 21, 1913, 7:1. Hawaii is anxious for big exhibit at Fair here; H. P. Wood, former San Diegoan, now head of Exposition committee, visits Balboa Park.

San Diego Union, June 21, 1913, 11:1. Nebraska State Society endorses bonds.

San Diego Union, June 22, 1913, 1:1. Trolley Company not to ask permit for park line until after bond vote; San Diego Electric to delay petition for franchise and await election.

San Diego Union, June 22, 1913, 3:1. San Diego women working for bonds.

San Diego Union, June 22, 1913, 3:1. Louis J. Wilde says, “Defeat of bonds will kill town.”

San Diego Union, June 22, 1913, 9:2. Wadham, San Diego’s former mayor, boosts Exposition bonds; declares Fair’s management is most economical.

San Diego Union, June 22, 1913, 11:1. Edward Sullivan supports bonds: “Money raised for such purposes as that contemplated by the bonds means greater prosperity, increased population and bigger, enhancing values to every real estate holder in this city. It is not sentimental, it is hardheaded business sense. . . . The future problem of cheap transportation is water rates. San Diego’s harbor offers the best facilities to ship owners. Its harbor is its greatest asset and the Exposition will be the means of calling attention to it.”

San Diego Union, June 22, 1913, 13:1-3. Fair work done so far astonishes all observers; pipe underground, shrubbery on surface, building in air; two lawns built: On the west side of Cabrillo Canyon are great cleared spaces where grass is to be grown. Along the west Park Boulevard are two great lawns, among the largest in Southern California, their green expanse shaded by beautiful trees indicates what the finished park will be. In the center of the park are new roads and boulevards. In Cabrillo Canyon is the most spectacular piece of construction in California, the great concrete bridge. On the old golf links are two graded boulevards. Above the Russ High School is a new graded boulevard to the very center of the park. In the canyons on the east side are two new roads, with numerous by-roads.

San Diego Union, June 22, 1913, 22:1. Bond campaign causing activity in real estate.

San Diego Union, June 22, 1913, 25:1. “Barker” describes Isthmus.

San Diego Union, June 22, 1913, 36:1. San Diego has big start on San Francisco’s Fair.

San Diego Union, June 23, 1913, 1:3. Rev. Willard B. Thorp, pastor First Congregation Church, argues for bonds.

San Diego Union, June 23, 1913, 5:3. Theater audiences cheer for bonds.

San Diego Union, June 23, 1913, 18:2. California Building plans are changed; bids all above appropriations; no further delays are expected.

Plans for the California Building are being changed by architect Bertram G. Goodhue, so that the contract work can be awarded to the lowest bidder and the work rushed. The bids submitted some time ago were all above the amount of the appropriations made by the park board for the building, \$250,000. The lowest bid, which was submitted by the Wurster Construction Company, \$272,000.

Every effort is being made by those in charge of the business affairs to open the doors promptly at midnight, January 1, 1915.

It is believed that if there are no further delays, the big fair will be opened on time.

San Diego Sun, June 25, 1913, 10:5 and June 27, 1913, 9:3. Residents east of park want entrance to Exposition grounds, preferably on Juniper Street.

San Diego Union, June 25, 1913, 10:3. Colonel Collier elected head of El Consejo General of the Order of Panama.

San Diego Union, June 25, 1913, II, 1:3. Al Herman, vaudeville actor, boosts bonds.

San Diego Sun, June 26, 1913, 8:1. Ocean Beach Wonderland Park to be informally opened next week; \$300,000 playground.

San Diego Union, June 26, 1913, 6:1. San Diego Society of Archaeological Institute of America endorses bonds.

San Diego Union, June 29, 1913, 1:3-4, 2:2. Schumann-Heink will aid fight for Fair bonds.

San Diego Union, June 29, 1913, 14:1-2. Building of park here to cost less by half than elsewhere; advantages of topography and climate.

San Diego Union, June 29, 1913, II, 17:1-4. Proposed stadium is largest in America; Quayle Brothers & Cressey, architects; endorsement of Fair bonds means expenditure of \$150,000 in open-air theater.

San Diego Sun, June 30, 1913, 1:7. Spreckels Will Give Expo Organ, Announcement at Meeting of Club; Gift to be Permanent.

John D. Spreckels is planning to erect in city park on the exposition grounds a permanent concrete building costing in the neighborhood of \$50,000 in which he will install one of the largest pipe organs manufactured. This instrument, it is said, will cost in the vicinity of \$40,000 and will be used for concert purposes not only during the exposition, but for years after.

Just what the building will be called and what else it will contain is not yet stated. No details have been carried out, but it is said that the structure will be a unique feature of the exposition and that it will be so substantially constructed that it will stand for years.

This announcement was made, according to officials of the Brooklyn Heights Improvement Club, at a meeting of that club last night by President D. C. Collier of the exposition company, who was there to boost the bonds. He only touched upon the plans and members of the club were curious to know just exactly what the building will be like and for just what purpose it is intended.

"It is a temple of mystery," said one today. "All we know about it is that it will be built of concrete, to last for centuries, and that it will contain a big pipe organ."

San Diego Union, June 30, 1913, 4:1. EDITORIAL: Tomorrow's Bond Election.

D. C. Collier, "What an Exposition is For," Sunset Magazine 31, no. 1 (July 1913), 146, 147.

San Diego Union, July 1, 1913, 1:6. Bonds to be voted today; voters urged to get out; two-thirds required to carry the \$850,000 bond issue, the proposed stadium and open-air theater to be financed with \$150,000 from bond issue.

San Diego Sun, July 2, 1913, 1:6. Greater building activity is assured by bond victory; vote for bonds was 16 to 1 (9,843 to 613); Frank G. Belcher, manager of campaign for bonds.

San Diego Union, July 2, 1913, 1:6-7, 2:2-3. San Diego weeps Exposition bonds to victory.

San Diego Union, July 2, 1913, 4:1. EDITORIAL: The Bond Election.

San Diego Union, July 3, 1913, 9:1. Mayor O'Neill christens Wonderland resort at Ocean Beach.

San Diego Union, July 4, 1913, 18:4. Science and Education, Arts and Crafts, Home Industries buildings being erected; others to start soon; trees and vines planted daily.

San Diego Union, July 9, 1913, II, 1:1. C. H. Akers, owner of **Arizona Gazette**, appointed chairman of commission for San Diego Exposition by Governor Hunt; is here with others from Arizona.

San Diego Union, July 9, 1913, II, 11:2. Balboa Park will have 10 new fire hydrants; Exposition officials to pay for them; insurance rates to be lowered.

San Diego Sun, July 10, 1913, 13:2-3. Monument of Balboa planned for park; will cost about \$15,000 and will be procured by a world-wide sculptor's competition and unveiled late this fall.

Regular Meeting of the Board of Park Commissioners, July 11, 1913, was held at the office of the Board.

Present --- Commissioners Forward, Ferris and Chandler. Absent --- None.

The minutes of the meeting of June 20th were read and approved.

A committee of residents living East of Balboa Park appeared before the Board, and presented a petition for the opening of a Park Drive, from the east boundary of the Park near Ivy Street running westerly to connect with the Exposition Grounds. A sketch of the proposed route was submitted to the Board, and after a general discussion it was decided to lay the matter over for a time, as there were no funds available for the work, unless the City Council would allow an appropriation of \$10,000.00. The Superintendent was instructed to meet with the Committee, in regard to plans for the road, and give an estimate as to the cost of the work.

Mr. Nolen appeared before the Board in regard to a road on the north side of the park, connecting with Switzer Canyon Road, and also in regard to using a round through the Exposition Grounds. The Superintendent was instructed to take the matter up with Mr. F. P. Allen, Chief of the Division of Works of the Panama-California Exposition.

Mr. MacKinnon, Superintendent of the Public Schools, appeared before the Board, in regard to the proposed Stadium, for which Bonds were voted at the recent Bond Election. After discussion of the subject, Mr. MacKinnon was requested to be present at the meeting Friday, July 18th, and have Mr. Cressy, the Architect, submit plans of the Stadium to the Board.

The Superintendent reported on the bad condition of the Park Roads, and submitted a report of the South Park Commissioners of Chicago, on the successful use of light oil on the Park Roads. On motion, duly carried, the Superintendent was instructed to experiment on one of the Park Roads with oil of like character.

The Superintendent was instructed to ascertain the cost of putting in a salt water service for a proposed aquarium, and also take up the matter of a water supply from Mission Valley, with Councilman Fay, Superintendent of the Water Department, and report at next meeting of the Board.

On motion, duly made and carried, Mr. Andrew J. Suffern was elected acting secretary of the Park Department, at a salary of \$100.00 per month.

The Payroll for the month of June, amounting to \$3,115.00 and the following bills, amounting to \$2,068.00 were approved.

(See original copy of minutes in the San Diego City Clerk's Office for a list of the bills.)

Signed - A. J. Suffern, Secretary.

San Diego, California, July 25, 1913.

To The Honorable, Board of Park Commissioners of the City of San Diego, California.

Gentlemen:

The question of the opening of 28th Street, from Nutmeg Street to Upas Street, which was presented by Mr. Griffith and referred to me by President Forward for a report:

From what I understand of the road or boulevard question surrounding Balboa Park, it was planned in the Olmsted survey that there should be a boundary boulevard, 100 feet wide surrounding the Park, which, I believe, is a good idea, as it would tend to give the Park a separate individuality from the surrounding property.

In regard to 28th Street, I find that for four blocks at the south end, the street has been graded, curbed, and Washingtonia Filiferea Palms planted in the parking strip. The street is eighty feet wide, forty feet for a roadway, and twenty feet on either side for a parking strip and sidewalks.

It seems to me that under existing conditions it would be advisable to establish the Boulevard at eighty feet wide on the east side of the Park, for the following reasons:

First: It will make a continuous, unbroken line from the north end of the park to B Street, whereas if it should be made one hundred feet wide, there would be a jog in the Boulevard of twenty feet at the south end of the Park, for a distance of one hundred feet, and also the block between A and B Streets which would necessitate the purchase of twenty feet to make the Boulevard one hundred feet wide for its entire length, from B Street to Upas Street.

Second: If the Boulevard is made one hundred feet wide, it would necessitate some heavy cuts and fills to make grade, as the hills slope down into the Park on a sharp grade in a number of places; consequently there would be a high embankment along a considerable distance of the park, making it very unsightly when viewed from the inside, although giving a fine view when traversing the Boulevard.

Third: If 28th Street is opened the entire length of the Park frontage, most of the road will be built on Park property, and should be set aside as a Boulevard, and come under the Park ordinances in regard to control of traffic, etc.

Fourth: The grading, curbing and all improvements on the Boulevard should be paid for by the abutting property owners, as the enhancement of value on the abutting lots would be much greater than the cost of improvement of the Boulevard.

Fifth: If 28th Street cannot be opened its entire length at the present time, that the section between Upas and Nutmeg Streets be opened and improved by the property owners abutting the Park, and that the work be carried out under plans and specifications approved by the Board of Park Commissioners, and the work be done under their supervision.

Respectfully submitted,

Superintendent.

San Diego Examiner, July 25, 1913, 2:3-6. How Julius the Judicious changed his mind/also how the just judge that owned property on lower Sixth street was induced to modify his injunction.

Few things have so stirred the gaiety of San Diego as Austin Adams' "The Crime of the Canyon." The story of the crime; that one Tim the Terrible, spurred by greed, has determined to have a beautiful canyon in the

“People’s Pleasance” cut down, destroying the last bid of forest wildwood in that tract, in order that a street may be cut through to enhance the value of property in the business part of that street.

Here is an extract from “The Crime of the Canyon,” which is more appreciated by some than others.

“You remember, don’t you,” argued Tim the Terrible, “how Julius kicked against the harbor improvements at the foot of D Street, I mean Broadway, because he wanted to save the waterfront for some sort of people’s promenade, and let our shipping go to San Pedro? No, I’m leery of Julius; he poses as an advocate of Civic Estheticism.”

“Well, he may be crazy, but he ain’t no fool,” answered Louis the Mastodon positively, as though he knew what he was talking about.

Just then another of the conspirators, who had heard the conversation, stepped up and whispered something to Tim the Terrible, which made him jump and burst out laughing.

“Do you mean it?,” asked Tim the Terrible.

“Sure,” replied the man who had whispered to him. “Julius the Judicious owns property on Sixth Street, or rather his firm does.”

“That’s enough,” remarked Tim the Terrible, “Julius is ours.”

Scene 2

“How about you Julius?,” asked the Committee, noticing that the judicious one remained silent and seemed to be swallowing something. “What are you trying to swallow, Julius?”

“I am trying to swallow my own words --- all that I have said about the City Beautiful. You known that we must never sacrifice Art!”

“Can’t you manage it?,” inquired the Committee. “Try. Tim the Terrible has enormous possibilities as a Depositor, remember, and most of the Big Ones are with us. Yes, and your own firm owns property down on Sixth Street. Do try to swallow your words, old man.”

“All right, I’ll try,” answered Julius the Judicious.

Another Scene

A just judge was approached. He promptly issued the desired injunction, and the scrapers ceased from scraping, the hatches from chopping, and the mules from hauling the dump carts --- pending the hearing. . . . Was Tim the Terrible discouraged by this? Not so’s you could notice it.

“Get busy now,” he said to his attorneys, “and dig up some way for use to get around this blooming injunction, if we can’t knock it out. What the deuce do you lawyer guys think I pay you for anyhow?”

“We can induce the Just Judge to modify the injunction, I think,” replied Attorney Saccharine, “so that it will restrain us from wrecking the canyon only on Lady Malvina’s block, thus leaving us free to ruin everything above and below. How does that strike you, King Tim?”

“Go after it,” ordered Tim the Terrible.

He went after it, and after he was going after it one of his trustees met him and whispered to him that the Just Judge himself owns property on lower Sixth Street. La! La!

“Here! None of that rough stuff,” cautioned Attorney Saccarine, trying not to betray his joy, “no contempt of court for mine.”

“Contempt nothing!,” retorted the trustee. “All I mean by telling you that His Honor owns a fine lot down on Sixth Street was that, if he does his painful duty and gives us what we want, the pain won’t be very bad. Get me?”

The various proceedings in court proved far more entertaining than any vaudeville show that has come to town in many moons. The witnesses (most unwilling ones) did “turns” which were alone worth the whole cost by both parties to the litigation. There, for example, was Gentle George. By reason of the fact that he was formerly a Custodian of the People’s Pleasance and a life-long champion of the City Beautiful, a lover of trees, and an outspoken foe of “brutal commercialism,” the friends of the Canyon subpoenaed Gentle George to bear witness against the proposed desecration of the part of the park. He came, and he wore on the witness stand his smile that won’t wear off.

“Kindly state, Gentle George, the substance of a conversation you had some time ago with the world-famous landscape artist from Boston, with regard to this canyon,” said one of Joyous John’s lawyers, with the air of a man about to set off the spark to ten tons of dynamite.

Gentle George smiled his blandest smile and cleared his throat so ominously that many of the Sixth Street saints grew nervous and cast anxious glances at Attorney Saccarine, who sat pat and serene and didn’t turn a hair, as if he had something up his sleeve. And he had, too. He knew Gentle George. Also, he remembered that since that conversation with the world-famous landscape artist from Boston had taken place, Gentle George had moved from his old store on Fifth Street to his new store, which has a hundred-foot frontage on Sixth Street. Moreover, Attorney Saccarine did not overlook the fact that the hot campaign was at its hottest height, and that Gentle George, who was running for Mayor, would not let his love for trees nor his love for the City Beautiful cause him to say anything likely to cost him the votes and the powerful support of the Big Ones. So, when Gentle George smiled and cleared his throat, Attorney Saccarine smiled and winked at the anxious saints to reassure them.

Then Gentle George repeated the substance of his talk with the Boston expert on the Beautiful Outdoors. He said that renowned authority has declared that the Canyon was one of the most beautiful, if not the most beautiful in San Diego, and that, as such, it would be a great pity ever to destroy it by running Sixth Street through it.

The Saints jumped.

But Attorney Saccarine sat pat and patted his sleeve to make sure that it still had something up it. And it had, for Gentle George was not quite through. He had something to say, and he said it.

He said that although the great landscape artist had expressed his hope that the lovely canyon might never have to be destroyed, he also expressed the opinion that, as San Diego was destined to become an enormous city, the day might come when Sixth Street would have to be run through the canyon. Again Gentle George smiled. He had tactfully testified for both sides. The saints grinned, and the other side didn’t.

Gentle George came forward with a contribution of \$1,000 to Tim the Terrible’s \$40,000 fund --- but for some reason or other, he was not elected Mayor. Cities, no less than republics, seem to be ungrateful.

In the dizzy criss-cross of all these legal proceedings, Joyous John’s lawyers appeared before another Just Judge of San Diego; and it was during the proceedings in this court that much happened which added to the gaiety of nations --- and to our stock of knowledge of Human Nature. Julius the Judicious and Allen the All Wise furnished the star acts. Being such modest and shrinking souls, the sufferings of these two witnesses were painful and deliciously funny.

“You are president of the Park Commissioners, are you not Julius?,” asked Joyous John’s lawyer.

“Yes,” replied Julius the Judicious modestly.

“At first you did not approve of the destruction of the Canyon, I understand,” went on the lawyer carressingly.

“Well - I - I - that is, I -,” stammered Julius blushing.

“I understand, Julius,” broke in the lawyer, “as a property owner of Sixth Street, you naturally had to think of yourself. You still own property on Sixth Street, do you not?”

“Need I answer that question?,” asked Julius, appealing to the court.

“Certainly,” answered the Court, “you must answer the question.”

“Well then,” said Julius, suffering tortures as an Esthete and Art Lover, “my firm does own some Sixth Street property, but - but.”

Further questioning brought out that Julius the Judicious owns so much of the capital stock of his firm that if the ruin of the Canyon adds value to Sixth Street property, he (the judicious park commissioner) will suffer only from the injury done to his artistic appreciation of the Beauties of Nature. His fortune will not hurt very much. Julius the Judicious was then excused, and Allen the All Wise was sworn to testify --- as the greatest living expert on Parks, and the highest paid job-boss on earth, that the very best way to improve the park is to chop down the oldest trees, burn shrubbery and flowers, and run a street straight through an exquisite natural ravine by gashing the banks with cuts and fills.

“Lets see, Mr. Allen the All Wise,” began the Canyon lawyer, “you’re quite an authority on Parks, are you not?”

“I ought to be,” answered Mr. Allen the All Wise. “I’ve read every book ever written on the subject of Parks.”

“Would you mind giving me the name of one book on the subject?,” asked the Canyon lawyer --- and Allen the All Wise reddened and grew thoughtful.

“You need not give me a whole list of books,” remarked the lawyer, pitying the look of total ignorance on the handsome face of the All Wise, “just give the tile of one --- just one single book --- on your own specialty.”

The highest paid Expert on Parks winced. He turned red. He sat as if in a trance. He looked as if he would gladly given a whole week’s salary --- yes, even such an enormous sum as that --- to be able to think of one book on the subject of Parks. But he couldn’t, poor devil!

“What salary do you get?,” went on the Canyon lawyer unmercifully, after the crowd had chortled and every the Judge himself had laughed.

“Do I have to answer that question?,” once more begged poor All Wise Allen, turning appealingly to the Court.

“Well,” replied the Judge, laughing aloud, “as your salary is a joke all over San Diego, you might as well tell it here.”

“I get \$20,000 a year,” replied Allen the All Wise, not at all as if he felt proud of it at that moment.

“Ask him if he really gets all that \$20,000 annually himself,” whispered a Cynic to the Canyon lawyer.

“Sh-h,” cautioned the Canyon lawyer, “do you want to have me pinched for **lese majeste**?”

San Diego Union, July 27, 1913, 7:1 Counties have 16 acres under cultivation; International Harvester has 3 acres.

San Diego Union, July 31, 1913, 1:3, 2:4. San Diego Electric Railway files application with Council and Park Board for a franchise to construct and operate a 10-track trolley line from F and 12th Streets to El Cajon Avenue.

*NOTE: H. O. Davis was made Director-General sometime in July, 1913. He was a rancher from Yuba City, whom Collier made his assistant before he went abroad. Within a few months the Board of Directors appointed him Director-General. His job was to attract exhibits showing how the virgin southwest could be developed.

August, 1913, **The California Garden**, pp. 7-10. Visit to Exposition Nurseries . . . A number of members of San Diego Floral Association made a pilgrimage to the Panama-California Exposition nurseries in Balboa Park, Saturday afternoon, August 2, and were shown through the various departments by Superintendent Paul Thiene, assisted by Mr. Ralph Sumner.

To say that the visit was interesting is putting it very mildly, but when it comes to giving a description of what is there to be seen, the task is great, and the space required would take a book.

The first thought that impresses one is the unlimited variety of plant life, and the second is the clean, healthy condition generally of the plants themselves. We who have trouble in taking care of a wee bit of garden can't help wondering how it is possible to look after a million plants, more or less, and keep them happy and contented.

Mr. Thiene seems to have the task well in hand, and thoroughly systematized. Every plant is accounted for on his books, and he can tell you just what it costs to propagate, fertilize, water, and carry the plant through to maturity when it is planted in its permanent location on the exposition grounds, or in one of the buildings.

Some of the tropical plants require artificial heat, even in our mild climate, and he has them under glass in his hot houses. Others need the damp, cool, shaded protection of the lath houses, and many others are able to withstand the weather as it comes by day and night, and are growing out in the open.

In size they range all the way from the tiniest cuttings and seedlings, to mighty trees sixty feet high, and the variety seems absolutely unlimited. There are all of our old plant friends, faithful and true, and an endless number of others which we never saw before. Some might be considered freaks of nature, from peculiarities of form or habits, but nevertheless they are making themselves right at home, and appear satisfied with their new surroundings.

An interesting feature of the whole proposition is the fact that they are being trained so as to be at their best at a fixed time, and that their present quarters are only temporary. With that fact in view, a great many of the trees, shrubs and plants, even to the vines, are in huge boxes, so that when the time comes they can be transplanted with the rich earth around their roots, and will go right on growing without a setback. The vines are being trained up ten-foot poles so that they will have a fine start when placed alongside columns or walls up which they are to climb.

Many avenue trees are already being placed, the hillsides are being thickly planted with all manner of growth, and their places in the nursery taken by others. It is necessary to keep a reserve supply, as some are bound to die, no matter how well cared for.

The stock of palms is large and varied, ranging from the dwarfs to the tall and wide-spreading one. Besides the little and medium-sized ones being grown in the nurseries, many large ones have been gathered in from all parts of the city. On account of the great building activity during the past two years, many trees had to be removed to make room for buildings. Whenever the park or exposition people learned of trees to be removed, they sent their expert tree-mover, Frank Sessions, to gather them in. It is no small task to take up a huge tree with many tons of earth attached to its roots, box it up, and carry it, perhaps, several miles and replant it. None have been refused, however, on account of their size.

Standing at the Laurel Street entrance to the park are three tall palms recently transplanted. Two of them have sent out new leaves, showing that the critical period has passed, and Mr. Sessions is confident that the third and tallest of them all, will soon do likewise.

Mr. Thiene's particular pet is an *Auracaria*, recently brought to the nursery from Fifth and Robinson. It stands over sixty feet high and it was necessary to raise the roof of the biggest lath house to accommodate it.

Trips have been made up the coast to Los Angeles, Santa Barbara and even to San Francisco, and rare and beautiful plants gathered in for the Panama-California Exposition. Some of these have been plucked from under the noses of the San Francisco Exposition people, who took a long time preparing to get ready to start.

The association members were also shown the site of the big exposition auditorium/lath house, near the Southern California Counties building, and the ten-acre demonstration farm. Work has just started on the lath house excavations. Though time is an important consideration in plant growth, with the fine start given the plants in the nursery, there is no reason why the huge lath house should not be one of the greatest attractions of the exposition when its doors are open on January 1, 1915.

That little farm promises to be the best ever. Already over 700 citrus fruit trees are growing and many of them would be bearing fruit if allowed so to do. The farm has a bungalow, a la California, a barn and garage, chicken-runs, and all the other necessary adjuncts to a well-regulated ranch. Around the farm is a pergola fence, which will be vine and flower-covered its entire length. This little farm will demonstrate the possibilities of changing a piece of virgin soil into an improved, attractive and productive ranch home with the short space of three years.

A number of big buildings at the exposition are nearing completion, the great bridge to span the canyon and to form the main entrance is progressing nicely, and, taking it as a whole, the undertaking seems to be well controlled.

Of course, the Association members are particularly interested in the floral side of the exposition and after Saturday's visit, they are satisfied that the work is in good hands.

August, 1913, **The California Garden**, p. 11. Some Water Suggestions, by A. D. Robinson . . . Let us have a water commission and let it employ an expert, and among other things have experimental wells bored all around. Why should not some of the Park Improvement Bond money go into experimental holes in the park. A right good well or wells would make a mighty convincing exhibit at the exposition. The park should develop its own water system. Have experimental wells been bored therein? Rumor has it that a couple of years ago a water expert stated that he would undertake to develop a water system in the park, with no pay unless he did. Let that be as it may, the advantages of such a course, if it be feasible, are too obvious to need expanding. Now, with practically two millions to be put into the park on permanent improvement, is the time to do something, for it is problematical, if more than enough to keep up these improvements will be appropriated for a long time, and the call for water in the park as elsewhere will be ever on the increase. A makeshift policy on this water question is a crime, besides being very foolish. Let us know where we are and what we are doing and are going to do.

San Diego Sun, August 1, 1913, 1:7-8. Mrs. Mulvey wins writ in 6th Street case; Attorneys Ward and Crouch and Harris today obtained a permanent writ of prohibition against Judge T. L. Lewis, prohibiting him from modifying the injunction granted Mrs. Mulvey against Julius Wangenheim et al, as park commissioners, preventing the opening of 6th Street in front of her property. This means that the block from Hawthorne to Ivy on 6th Street cannot be opened until the Supreme Court finally decides the case of Mulvey vs. the Park Board, which will probably be a year or more.

San Diego Union, August 1, 1913, 3:2. Arizona girls are leaving as boosters for San Diego; take in sensations of Wonderland Park.

San Diego Union, August 1, 1913, 20:1. President Collier offers prize for Fair flag; annual pass to the Exposition will be given for the design accepted.

San Diego Union, August 3, 1913, 1:3. State Convention of Arizona Supervisors starts movement for exhibits at San Diego.

San Diego Union, August 3, 1913, II, 17:1-4. Walls of Exposition Buildings Are Swiftly Putting on Final Coverings of Rare Beauty; H. R. Schmohl, contractor, directing a crew of 26 workmen; staff --- the fairy shell that transforms the ugliness of bare timbers into the beauties of decorative art; studio inside Home Economy Building; model maker, molder; plans and measurements; Schmohl had done staff work for expositions at Chicago, Atlanta, Nashville, Omaha, Buffalo, Charleston, St. Louis, Portland, Jamestown and Seattle; comes from a family of potters going back four generations.

San Diego Union, August 4, 1913, 1:4. Sam Davis, visitor, says Nevada will send exhibit; state has appropriated \$40,000.

Park Commissioners Minutes, August 8, 1913. San Diego Electric Railway granted right to construct electric railway and to operate it until September 1, 1952. . . . Salary of park foreman A. P. Christopher increased from \$115.00 to \$125.00 per month.

San Diego Sun, August 8, 1913, 13:1. Frederico Pezet, minister from Peru, is in San Diego and is being entertained by the exposition management; he was met last night by Colonel Collier, exposition officials and members of the Order of Panama.

San Diego Union, August 8, 1913, 1:3. Peruvian envoy, Signor Pezet, and party here to select Exposition site.

San Diego Union, August 9, 1913. Autoists to boost Exposition and national road: At exactly 10 o'clock this morning, W. E. McCarton, Lawrence Jasmin, R. P. Cooper, and L. R. Haight will start from the front of the Union building in their big Spauling "50" car on a trip from San Diego to New York, along the ocean-to-ocean highway. A flag containing the Exposition colors --- red, green, yellow and white --- will be carried on the car as well as a number of pennants boosting San Diego and its Exposition.

San Diego Union, August 9, 1913, 1:1-2. Colonel Collier resigns all business except Exposition's.

San Diego Union, August 9, 1913, 1:2, 2;2-3. Peruvian minister honored at banquet at Hotel del Coronado; drinks toast to success of Exposition.

San Diego Union, August 10, 1913, 1:2, 3:4. Order of Panama bids Colonel Collier good speed; he is to travel in the interest of the San Diego Exposition; farewell party for Senor Pezet and Collier at Wonderland Park, August 9.

San Diego Union, August 14, 1913, 18:1. Fight for change in park railway grant fails.

San Diego Union, August 15, 1913, 1:7, 5:1-4. South to ignore San Francisco Fair if tactics are kept up; representatives of seven Southern California counties denounce C. P. Moore's policies; an impression has been spread that only the lower end of the state objects to the cost of exhibit space.

San Diego Union, August 15, 1913, 4:6-7. Federated State Societies in row over Panama-California Exposition publicity plans.

San Diego Sun, August 16, 1913, 1:6-7. Plans for California State exposition building filed with John L. Bacon, city building inspector; interior to be furnished in mosaic; will be of a type not found anywhere in Southern California and is similar to that of the Chicago Public Library; towering dome 200 feet in height on which will be a 15-ton lantern or pinnacle that will contain a powerful light; observation tower will be 150 feet above ground; Wurster Construction Co. to be the builder.

San Diego Union, August 17, 1913, 11:1. Special commissioner E. J. Swayne reports on return that he visited 16 countries of behalf of the San Diego Exposition with good success.

San Diego Union, August 18, 1913, 5:3-4. Agricultural Building will be biggest on Exposition grounds; built in the form of a right angle, one wing extending back toward the Southern California Counties' plantation; work to be started soon on lath and glass house..

San Diego Union, August 21, 1913, 1:4-5, 7:6. Indian tribes will be brought to Exposition to live and work in replicas of their real homes. . . . Unique in the true sense of that much-abused word will be the exhibit of the Santa Fe Railroad at San Diego's World's Exposition in 1915. Colonel D. C. Collier, president of the Exposition company, has succeeded in the first of his many projects for the good of the fair, which carried him on his present trip East, and last night dispatches from his hotel in Chicago reported that President Ripley, head of the great railroad system, has definitely decided to expend more than a quarter of a million dollars in bringing to the Exposition in Balboa Park the Indians of the fifteen or more tribes living along the line of the railroad, and housing them in a great community house, a veritable city of mud, in which seven or eight hundred of the redmen, their squaws and papooses will live and work during the year the fair lasts.

The plans of Mr. Ripley and the road over which he exercises control, call for the most elaborate exhibit ever planned by any railroad or any other institution in this country. When the exhibit – if such it may be called – is in full swing, the visitors to the fair will have presented to them the whole life story of the native tribes of the great southwest, and no expense will be spared to make every detail perfect.

While, of course, the scheme is more or less indefinite as yet, Colonel Collier, in his dispatches last night, stated that there will be several hundred of the redmen's houses on the grounds, grouped in their separate tribes, and with each tribe their art, baskets, pottery, blankets, and beaten silverware that has won fame for the makers all over the world. Indeed the history of Indians between the Missouri and the Pacific coast will be bared for the inspection of tourists and other visitors to the great Exposition.

Incidentally, the cultural features of such an exhibition will not be overlooked. There will be lecturers on hand to explain to the crowds what the symbols on the pottery, the queer markings on the blankets, the hieroglyphics on the houses mean. The exhibit will also be a course in the history of the development of the Indian from the savage past to the native of today, highly skilled in many of the arts and crafts.

Replica of Real Houses

The house in which the aborigines will live at the fair will be a replica of the famous community houses of the Southwest. It will face on the canyon, and, looked at from the front, will be six towering stories high. The entrance will be in the rear, on the level with the other buildings of the Exposition, and the visitor will pass downward to the living quarters of the inmates.

It will be built of adobe, just as the real houses are, and will look something like a squared beehive, story rising above story, like a huge pyramid.

Colonel Collier has not let any grass grow under his feet since he left home. In a wire sent to friends here he announced that New Mexico intends to reproduce one of the coal mines for which the state is growing famous.

Model Coal Mine Planned

J. Van Houten of the St. Louis, Rocky Mountain and Pacific Railway, yesterday conferred with Collier in Chicago in reference to the coal mine exhibit. He stated that his company has sold its railroad to the Santa Fe and had retained land holdings and coal mines and would make an exhibit at the Panama-California Exposition.

Van Houten is on his way to Europe, where he will inspect a model coal mine in the Munich museum which may afford ideas for a better exhibit here.

It is proposed to tunnel from the sides of one of the canyons of the Exposition grounds and open a shaft into the New Mexico Building. Visitors at the New Mexico Building can do down into the mine from that building. All machinery will be of the latest modern kind, operated by electricity.

Coal will be shipped here from the mines in New Mexico and planting in the model mine for the demonstration of mining. The exhibit is expected to prove one of especial interest because of its novelty.

San Diego Union, August 21, 1913, 5:2. Cabinet members praise San Diego Fair.

San Diego Union, August 21, 1913, 20:1. New Mexico Fair Commission is chosen; drawings for buildings submitted.

San Diego Union, August 22, 1913, 9:1. Protective Society of Colored People to exhibit their work at Exposition.

San Diego Union, August 23, 1913, 4:1. EDITORIAL: The Exposition Space Question.

San Diego Sun, August 25, 1913, 1:4-5. San Joaquin Valley Committee wishes to erect exhibit building.

San Diego Union, August 25, 1913, 1:3, 3:3-4. San Joaquin Valley boosters here; Commissioners come to learn of San Diego Fair

San Diego Union, August 25, 1913, 5:1. \$350,000 worth of Exposition bonds sold in East.

San Diego Union, August 26, 1913, 4:1. San Joaquin Valley at San Diego.

San Diego Union, August 26, 1913, 18:1. San Joaquin Valley commissioner says no hot air in this Exposition.

San Diego Union, August 26, 1913, II, 1:2. Washington fair commission coming to San Diego; expected they will choose site for Washington State Building.

San Diego Sun, August 27, 1913, 1:6. State of Washington Commissioners here asked Fair directors to reserve a space for them to the right of the entrance to the state group division on the grounds; Elmer E. Johnson of Everett, Washington advised to make plans for a \$10,000 building.

San Diego Union, August 27, 1913, 10:1. Faith in Exposition growing; Realty men of state friendly toward Panama-California Exposition; losing confidence in San Francisco's exposition project.

San Diego Union, August 28, 1913, 1:1, 3:2-5. Harbor Affairs Admiral Nanney, in report to the City Council, scores Edwin Capps, San Diego's harbor engineer.

San Diego Union, August 28, 1913, 20:1. Washington State Commission recommends an exhibit at San Diego Fair in 1915; will expend \$25,000.

San Diego Union, August 31, 1913, 1:6. Harris Trust Company of Chicago agrees to purchase \$850,000 park bond issue.

San Diego Union, August 31, 1913, 18:1. Nearly one million feet of lumber placed in Agricultural Building; foundation staked and blocks made for Foreign Arts Building. . . . The outside of the Home Economy Building, including the tower, has been treated to a tint --- a rich-looking gray that lends an appearance of antiquity. . . . James Milburn, superintendent of construction.

San Diego Union, September 1, 1913, 1:5-6. Park bond sale will accelerate Exposition plans; construction of buildings and permanent park improvements to go forward as fast as human hands can do work.

San Diego Union, September 3, 1913, 1:3, 5:1. Order of Panama plans four days of pageantry and fun; carnivals, dedication of monument sites and unveiling of statue at Presidio Hill to be carried out with ceremony; Colonel Collier, in Washington, DC, has invited Spanish minister here.

San Diego Union, September 4, 1913, 11:4. Governor to lay cornerstone of California State Building, September 12.

San Diego Union, September 5, 1913, II, 11:3. Many designs submitted for Exposition flag.

San Diego Union, September 6, 1913, 3:4. Movie men to assist in laying cornerstone.

San Diego Union, September 6, 1913, 7:3. USS Maryland band to give concert; fine program is arranged for tomorrow afternoon in Balboa Park.

San Diego Union, September 7, 1913, 10:1. Lieutenant Governor to lay cornerstone.

San Diego Union, September 8, 1913, 1:4. 5,000 greet crack band; Cruiser USS Maryland may repeat successful concert at Balboa Park.

San Diego Union, September 9, 1913, 10:2-3. Work to begin soon on \$125,000 Fine Arts Building; five bids for construction have been opened.

Park Commissioners Minutes, September 10, 1913. Contract for construction of the Fine Arts Building awarded to Brown and DeCew Construction Co. for \$91,330.

San Diego Sun, September 10, 1913, 2:4. Great Progress Made on Local Exposition; huge Agricultural Building almost ready for metal lath; Foreign Liberal Arts Building will start week of September 6; fourth arch mold for bridge is being placed and pouring of concrete continues on arches one, two and three; Home Economy Building is almost complete; ornaments and stucco work in place; Southern California Counties' section is laid out; water service is new 30-inch mains opened and fire plugs are being installed throughout grounds; Director-General H. O. Davis told by directors to have all main buildings under construction by October 1913.

San Diego Union, September 11, 1913, II, 11:1. Grand ceremony to mark laying of cornerstone.

San Diego Sun, September 12, 1913, 1:1-2, 2:1. Lieutenant Governor Wallace lays cornerstone for California Building today. . . . The cornerstone contained an iron box in which was the following as announced by Thomas O'Hallaran: architectural sketches of building; legislative manual for 1912-1913;

booklets of Exposition; history of Exposition; copies of San Diego daily papers; list of Exposition officers and directors; copy of the official seal of the Exposition, and copy of the Seal of the State of California.

San Diego Union, September 12, 1913, 2:1-3. Lieutenant Governor to lay cornerstone amid pomp and ceremony.

San Diego Union, September 13, 1913, 1:4-5, 2:3. Lieutenant Governor Wallace lays cornerstone of California Building; pays tribute to spirit of San Diego's citizens.

San Diego Union, September 13, 1913, 12:2. Standard Oil to exhibit at Fair; big building to be erected to house every process of manufacture; will cost close to \$50,000.

September, 1913, Correspondence, Board of Park Commissioners: THE BOARD OF PARK COMMISSIONERS, of the city of San Diego, State of California, acting under the authority conferred upon said Board by the Legislature of the State of California in an Act entitled

“An act giving and granting to the board of park commissioners of the city of San Diego the right to use and the right to authorize the use of Balboa Park in said city for exposition purposes.”
(Approved March 24, 1911.)

hereby authorize and empower the Panama-California Exposition, a corporation duly organized under the laws of California, to use that part and portion of Balboa Park enclosed within the boundary lines on the attached map for the purpose of holding an exposition during the year 1915 in the manner hereinafter set forth.

Said PANAMA-CALIFORNIA EXPOSITION is authorized to enclose any or all that portion of said park within the boundary line shown on the attached map and to charge such entrance or admission fee as may be deemed advisable by said Exposition.

Said Exposition is further authorized and empowered to erect or cause to be erected such buildings, structures, paths or roadways as may be necessary for the use of the Exposition, its exhibitors or concessionaires, and to sell, give or grant to any person or persons, association or associations, corporation or corporations, such rights, privileges and concessions as are usually granted by Expositions, or such rights, privileges and concessions as may be expedient or necessary to the success of said Exposition, and collect compensation therefor.

Dated September 19, 1913 . . . (Copy of above document is in the San Diego Public Library.)

San Diego Union, September 22, 1913, 1:1-2, 3:2-3. Chief Iodine, famous Indian scout, to head big carnival pageant.

San Diego Union, September 22, 1913, 5:2. North Dakota to have exhibit.

San Diego Union, September 24, 1913, 10:1. Commissioners from Washington State delighted with San Diego.

San Diego Examiner, September 26, 1913, 2:2-3. San Diego Exposition to have unique features.

San Diego Sun, September 26, 1913, 1:1-2. Ground reserved for statue of Balboa at Exposition site dedicated; about 10,000 people there; opening remarks by G. Aubrey Davidson; address by Congressman Henry J. Sloane; remarks by Spanish Minister Don Juan Riano y Gayangos; Congressman Henry poured Pacific water on soil; statue to cost \$15,000.

San Diego Union, September 26, 1913, 1:5-6, 3:3-4. Spot where towering monument to Cabrillo to stand solemnly dedicated to high uses; first great event of carnival passes into history with the roar of guns booming a salute to Spain's special envoy to San Diego.

San Diego Sun, September 27, 1913, 1. Serra Cross unveiled on Presidio Hill on final day of Carnival Cabrillo.

San Diego Union, September 27, 1913, 1:6-7, 3:3-6. Modern men pay homage to Balboa, hero of the undying person.

San Diego Union, September 28, 1913, 1:7, 3:3-4. Tile-studded cross is unveiled as tribute to past; padre memorial will stand for all time.

San Diego Union, September 28, 1913, 4:1. EDITORIAL: The Civic Center Question.

San Diego Union, September 28, 1913, II, 5:1. Council to consider Civic Center plan; Mayor O'Neill favors arrangement; larger buildings wanted.

San Diego Sun, September 30, 1913. Mayor O'Neill favors a 99-year lease on 500 acres of Balboa Park on boulevard above High School with privilege of renewal; says it could bring 5 percent on \$10 million valuation if properly handled; believes income from park lands, pueblo lands and waterfront would make San Diego a taxless city; people would have to vote on the proposal and the State Legislature would have to ratify it.

San Diego Union, September 30, 1913, 2:4. Law stands in way of park sale; Balboa Park lands cannot be sold until Legislature grants permission; area is worth \$5 million.

(San Diego) Daily Transcript, October 1, 1913, 4:1. The members of the city council do not favor the sale of any of the land included in the city park, but would be favorable to long-term leases, 99 years, for such portions as may be desirable for residence purposes. They believe an annual revenue of \$500,000 could thus be secured for the city.

San Diego Sun, October 1, 1913, 6:1-2. Judge C. H. Lamme says sell 600 acres of park and use the money for a sea wall from the foot of Broadway to the military reservation; if placed on market, the land would bring nearly \$15 million; sea wall would reclaim 1200 acres; a couple of million would be left to buy and improve small parks.

San Diego Union, October 1, 1913, 1:4. San Diego citizens reach agreement regarding civic center site.

San Diego Union, October 1, 1913, 20:2. Permits issued for Agricultural Building, Machinery Building and Mining Building at Exposition.

(San Diego) Daily Transcript, October 2, 1913, 4:1. It is probable that, at the meeting of the park commissioners tomorrow, a full discussion will be had as to the advisability of selling or leasing 500 to 600 acres in the city park. Whatever is done, the voters must first pass on the matter and the state legislature must ratify their verdict.

San Diego Union, October 2, 1913, II, 11:1. Plan would sell or lease part of the park.

(San Diego) Daily Transcript, October 3, 1913, 4:1. At a meeting last night of the Washington State Society, the plan was endorsed by Judge Lamme to sell about 600 acres of the park and with part of the proceeds to build a sea wall.

San Diego Union, October 3, 1913, II, 11:2. Freight rates for exhibits to Exposition determined.

(San Diego) Daily Transcript, October 7, 1913, 4:1. President C. C. Moore of the San Francisco Exposition, his wife and party, were interested visitors at the San Diego Fair grounds yesterday.

San Diego Union, October 7, 1913, 18:1. Director-General Davis, home from Chicago, says Exposition is widely advertised.

(San Diego) Daily Transcript, October 8, 1913, 4:1. Superintendent Morley is strongly in favor of barring auto trucks and dogs from the city park. The trucks do great damage to the boulevards, and the dogs destroy the shrubbery and grass.

San Diego Union, October 8, 1913, 18:2. Superintendent Morley would bar auto trucks and dogs from park; says former damage boulevards and the latter destroy grass.

Park Commissioners Minutes, October 10, 1913. Miss Ryan given permission to erect and operate a refreshment stand near Bird Cage on west side of park. . . . Board of Playground Commissioners ready to begin work on playground on Golden Hill in Balboa Park.

San Diego Union, October 11, 1913, 2:2. San Diego Exposition spoons placed on sale; picture and description.

San Diego Sun, October 14, 1913, 6:3. City Council today passed three ordinances granting builders of the Expositions concessions; one exempts builders from the Plumbing Board of Health, electrical, building and theater licensing ordinances; others forbid establishment of carnival-type attractions within 1200 feet of any entrances and auto stands within 300 feet of any entrances.

San Diego Union, October 14, 1913, 1:4. Utah State Exposition Committee visits grounds and decides to double original appropriation of \$25,000 for building.

San Diego Union, October 15, 1913, 3:2-3. Monastery will be reproduced at Fair; calls for something different leads to adoption of novel plan for building and exhibit by the New Mexico Commission.

San Diego Union, October 15, 1913, 10:3. Ordinances aiding Fair work passed; building and other ordinances made inoperative as far as Fair is concerned.

San Diego Examiner, October 17, 1913, 1:1-7. The Builders of the Fair.

San Diego Examiner, October 17, 1913, 4:1. Exposition features unique.

San Diego Examiner, October 17, 1913, 4:2-6. Construction of Fair buildings to be expedited with titanic energy.

San Diego Examiner, October 17, 1913, 4:2. Fair will assist in making park.

San Diego Examiner, October 17, 1913, 4:6. Many picturesque features of Fair.

San Diego Examiner, October 17, 1913, 4:7. Irrigation a big Exposition feature

San Diego Sun, October 16, 1913, 1:1-8. Wonderful Exposition springing up as a monument to the opening of the Panama Canal; the dreams of "San Diego, the Beautiful" and "San Diego, the Land of Heart's Desire" are being realized.

San Diego Sun, October 16, 1913, 2:1-3. Process to be featured at Exposition.

San Diego Sun, October 16, 1913, 2:3-5. The Men Who Are Making the Exposition A Success: D. C. Collier, president; Frank J. Belcher, chairman of finance committee; Frank P. Allen, director of works; H. O. Davis, Director-General in charge of exhibits and concessions; G. A. Davidson, president of the executive committee; H. J. Penfold, secretary; Winfield Hogaboom, director of publicity.

San Diego Sun, October 16, 1913, 2:6. Beautiful City Park is Aim: permanent buildings to be lasting monuments --- art galleries, museums and auditoriums. . . . The light on the great dome of the California State Building, 500 feet above water level, will be visible to mariners 150 miles at sea. Of reinforced concrete, this building will be a depository for historical material and other objects necessary to preserve.

San Diego Sun, October 16, 1913, 3:1-4. Exposition Buildings Are Rushed: Fine Arts Building, opposite California State Building, to cost \$200,000; work to begin in September; management wants all the buildings completed by July 1, 1914; each pier of Cabrillo bridge will carry a load of one million pounds when the bridge is finished.

San Diego Sun, October 16, 1913, 6:1. Exposition by featuring reclamation projects will point the way back to the land for thousands.

San Diego Sun, October 16, 1913, 13:2-4. Business organizations working to emphasize Exposition; lagoons, trees, flowers and palms to form background for buildings.

San Diego Sun, October 16, 1913, 15:4-5. National Irrigation Congress will make great exhibit here; want federal government to appropriate one million dollars to defray expense of exhibit. . . . The exposition grounds --- the whole area --- will be one great exhibit of the science and result of irrigation. From small ornamental flower gardens to plains bearing native plants, orchards, deciduous and citrus farms in miniature -- every conceivable variation of agriculture is to be shown at this exposition, both indoors and out, though most of it will be outdoors and cover an area of approximately 250 acres.

San Diego Sun, October 16, 1913, 21:2-3. Seven million plants for horticultural side of Exposition: The most extensive piece of planting is that of the Counties of Southern California; huge glass and lath house will be a gathering place where band concerts may be given; about 600 feet square and 100 feet high; to be completed next spring..

1:1-7, 2:1-2. San Diego Exposition.

2:3-5. Exhibit buildings rising like magic city.

2:7 Nerve and daring give San Diego big boost

17:7. Eyes of railroad turning toward San Diego Exposition.

San Diego Union, October 17, 1913, II, 1:1-5. Building Progress Made . . . The San Diego Exposition is a means to an end. Its buildings will stand for years, even centuries, in a beautiful park that will be enjoyed by our children and children's children for generations to come.

The city and county are united in one idea, to make of this corner of the United States, the playground of the world where, unvexed with winter snow and cold, with summer heats and droughts, men and women may cultivate the highest ideals in surroundings of natural beauty, in fields and orchards and vineyards that make of the country a veritable land flowing with milk and honey.

San Diego, the beautiful, the Land of Heart's Desire

The buildings are of enduring material and construction --- so designed that they can be utilized later as museums, art galleries and auditoriums.

Lagoon planned opposite Agricultural Building for display of aquatic equipment and exhibition of flying boats.

Ground broken for some of the state buildings, all to be completed by the middle of 1914.

Work on the Southern California horticultural exhibit started in 1912, citrus trees are two years old.

(San Diego) Daily Transcript, October 18, 1913, 4:1. President Collier of the Exposition left today for New York on his way to Europe in the interest of the Exposition.

(San Diego) Daily Transcript, October 18, 1913, 4:1. One of the notable features of the San Diego Exposition will be the Ceylon tea garden which is to be built by Sir Thomas Lytton, who yesterday gave orders for the work to begin.

San Diego Union, October 18, 1913, 5:1. President Collier going to Europe on Exposition business.

San Diego Union, October 18, 1913, 7:1. Judge Lewis stops completion of 6th Street in Balboa Park.

San Diego Union, October 18, 1913, 10:1. Ceylon tea garden to be Exposition feature.

San Diego Union, October 19, 1913, 6:2. Santa Fe issues San Diego booster booklet.

San Diego Union, October 22, 1913, II, 1:2. Los Angeles to Phoenix Exposition race course underway.

San Diego Union, October 23, 1913, 7:3. Exposition inspection by Board of Health cannot be waived; City Attorney declares City Council cannot pass an ordinance waiving plumbing inspection.

Park Commissioners Minutes, October 24, 1913. L. S. Masten granted at 6-months extension of time in which to complete the work of 6th Street boulevard extension. . . . Mrs. Jessie C. Knox refused permission to keep a 5-acre rose garden and potpourri in Balboa Park after the Exposition closed.

San Diego Union, October 24, 1913, II, 11:2. Kansas Commissioner here to pick 1915 site.

San Diego Union, October 25, 1913, 3:1. Kansas will have building at Exposition.

San Diego Union, October 26, 1913, 3:1-5. Great pipe organ and music pavilion to be presented to city by John D. and Adolph B. Spreckels; designed by Harrison Albright minus embellishments; electric-pneumatic organ by Austin Organ Co. of Hartford, Conn.; crescent-shaped structure with great arch in center supported by clusters of columns and flanking this on the side an arcade; to be north of California Building facing south.

San Diego Union, October 26, 1913, II, 5:2. New Marine band to play in park today; its first concert will commence at two-thirty this afternoon at Kalmia Street entrance.

(San Diego) Daily Transcript, October 27, 1913, 4:1. The first of a series of concerts in the park took place yesterday at the Kalmia Street entrance to the park.

San Diego Union, October 27, 1913, 4:1. EDITORIAL; Oregon and the Exposition.

San Diego Union, October 27, 1913, 5:4. Marine band has splendid crowd.

Park Commissioners Minutes, October 28, 1913. Ordinance No. 5312 granted to San Diego Electric Railway to build and operate railway upon and through Balboa Park.

(San Diego) Daily Transcript, October 28, 1913, 4:1. The City Council has denied the petition of the Park Commissioners that the rate for water used in the park be reduced from eight to five cents per hundred cubic feet.

San Diego Sun, October 29, 1913, 1:1-3. Federation of Labor took Panama-California Exposition off "unfair list"; carpenters decide to allow Exposition to be counted as "fair" for the good of the city; Exposition buildings and California State Building are now "open shop."

San Diego Union, October 30, 1913, 5:3. Imperial Valley plans exhibit.

San Diego Union, November 2, 1913, 8:2. Model is coming for Panama Canal extravaganza; site for unique attraction at Exposition grounds has been assigned; ground space of 200x300 feet; faces west.

San Diego Sun, November 3, 1913, 1:1-2. Thousands cheer at Exposition grounds; first car in the Los Angeles, San Diego-Phoenix Exposition Automobile Race arrives in San Diego; Barney Oldfield made time of 2 hours 30 minutes for the 130.4 miles between San Diego and Los Angeles.

San Diego Sun, November 4, 1913, 1:1. Olin Davis, San Diego boy, winner of auto race to Phoenix over Oldfield; unofficial time 13 hours and 15 minutes.

San Diego Union, November 4, 1913, 9:1. H. L. Ducommun and Bert Carlson wrote Exposition song, entitled "San Diego."

San Diego Union, November 4, 1913, 10:1. German-American Alliance for Southern California and California arrive in San Diego to visit Exposition grounds.

San Diego Union, November 6, 1913, 1:1. Welcome planned Monday for Olin Davis, winner of Los Angeles to Phoenix auto race.

San Diego Union, November 6, 1913, II, 1:3. Concessionaires have begun the erection of their buildings on the Isthmus; work six weeks ahead of schedule.

San Diego Union, November 6, 1913, II, 11:3. Exposition work is six weeks ahead of schedule; officials promise that buildings will be complete by July; millions will be spent in amusement enterprises along Midway.

San Diego Sun, November 7, 1913, 3:1-2. Making wonderful progress on Exposition grounds and buildings; great scenic railway assuming proportions of Isthmus.

San Diego Union, November 7, 1913, 8:1. Park Commissioner C. I. Ferris asks Council to reduce park water rate.

San Diego Union, November 7, 1913, 8:2. "Host House" to be Exposition feature; plans are laid for San Diego County building at Fair; estimated cost \$75,000.

San Diego Union, November 9, 1913, II, 7:1-3. New Mexico building, modeled after Mission Church on the Rock at Acoma with verandah and balustrade effect from Mission at Cochiti.

San Diego Sun, November 11, 1913, 14:1. Work rushed on Exposition buildings; preparations to be completed by August, 1914.

San Diego Union, November 11, 1913, 1:7. Olin Davis, winner of Exposition auto race, welcomed home.

San Diego Union, November 12, 1913, II, 1:1. George L. Hutchin, Portland, praises Exposition grounds.

San Diego Union, November 12, 1913, II, 1:2. Exposition work ahead of promises; six weeks leeway

San Diego Union, November 13, 1913, 7:5. Council considers public parks ordinance; so many changes favored that redrafted document will be considered; no speaking on streets..

Park Commissioners Minutes, November 14, 1913. The Superintendent was instructed to take immediate charge of the grounds on either side of Laurel Street from 6th Street boulevard to West boulevard and to proceed with planting of same. . . . The Superintendent was instructed to build a new Bear Den at once in Balboa Park. . . . The Superintendent submitted plans for a new bridge across the ravine at the intersection of Cabrillo and Pine Hill roads in Balboa Park; plans approved.

San Diego Union, November 15, 1913, 7:2. Great playground work to begin December 1; tract of 50 acres in Balboa Park set aside and plans perfected; feature for children, athletic field, ball grounds, gridiron, swimming pool, and gymnasium.

San Diego Union, November 16, 1913, II, 6:1-4. Panama Canal Extravaganza big feature; "Battle of Canal: is to be rare illusion; famous ditch will be shown within immense theatorium at the Exposition.

San Diego Union, November 21, 1913, 9:1. Polo will be big feature in 1915 Exposition.

San Diego Sun, November 22, 1913, 6:1-2. Park Board and Goodbody stalled by 6th Street case; Goodbody claimed \$7,000 for grading, surfacing and rolling of 6th Street; can't get paid by 6th Street property owners until he completes work and can't continue work without being in contempt of court; Park Commissioners claim they have nothing to do with the matter.

San Diego Sun, November 22, 1913, 11:1. San Diego Marine Band will give weekly concert in Balboa Park at the Kalmia Street entrance at 2:30 Sunday afternoon.

San Diego Union, November 25, 1913, 6:3. Pacific Mail follows railways in slashing freight charges for Exposition in half.

San Diego Union, November 26, 1913, II, 11:1. Robert R. Ritchie, general western agent of the Chicago and Northwest Railway, says city's future is assured; believes possibilities of Fair exceed those in San Francisco.

Park Commissioners Minutes, November 28, 1913. Panama-California Exposition authorized to use portion of Balboa Park within specified boundary lines for the holding of an Exposition in 1915.

San Diego Sun, November 28, 1913. Great Progress on Exposition; Steel is being hauled for last of the large exhibit buildings. . . . That the San Diego exposition will be entirely completed several months before the crowds begin to pour in early in 1915, was assured today when it was announced by the exposition officials that steel is being unloaded for the Botanical Building at the exposition grounds, the last of the main structures of the exposition.

Four of the exhibit buildings are already assigned with applications for space pouring in from all directions. The second story of the California State Building is beginning to rise. The landscape gardening of Balboa Park is proceeding nicely as a result of the recent rains. It is expected that the Cabrillo Bridge will be opened to traffic, February 1.

San Diego Sun, November 29, 1913, 1:3. Christmas services planned for city park; United Church Choirs to sing.

San Diego Union, November 29, 1913, 7:1. John D. and Adolph B. Spreckels' gift of big organ to San Diego described in leading eastern newspapers.

San Diego Union, November 29, 1913, 8:1. Revised plans for stadium with capacity of 50,000 submitted to Park Board yesterday.

San Diego Union, November 30, 1913, 8:1. Marine band will play in the park this afternoon.

San Diego Union, December 1, 1913, 6:1. John Nolen to visit San Diego.

Park Commissioners, Correspondence, December 2, 1913.

December Second,
Nineteen Thirteen.

Hon. T. B. Cosgrove,
City Attorney,
San Diego, California.

Dear Sir:-

At the regular meeting of the Board of Park Commissioners of the City of San Diego, held Friday, November 21st, a motion was duly made and carried that a petition be presented to the Common Council of the City of San Diego, asking that the name "BALBOA PARK" be given to the 1400 acre city park. Said petition is attached hereto.

The writer was instructed to ask that you draft a suitable ordinance covering this question of name. The Board seems to have been under the impression that "BALBOA PARK" was the legal name adopted sometime in the past, but the City Clerk has advised the Board to the contrary.

Thanking you for your attention to this matter, I am,

Yours respectfully,

Secretary.

San Diego Sun, December 3, 1913, 6:1-2. Pastors unanimous in favor of Christmas day ceremony in park.

Park Commissioners, Correspondence, December 5, 1913.

December 5, 1913

J. B. Pendleton, Secretary,
Board of Park Commissioners
San Diego, California

My dear sir:

Replying to your esteemed favor of the 2nd inst., asking that I draw an ordinance giving the name "Balboa Park" to the 1400 acre city park, beg leave to call your attention to Chapter 286 of the Statutes and Amendments to the Codes of California of 1911. This is an act granting to the Board of Park Commissioners of the City the right to authorize the use of the city park for exposition purposes and Section 3 is as follows:

"Section 3. This Act shall not apply to any park lands owned by the City of San Diego other than Pueblo Lots 1129, 1130, 1131, 1135, 1136, 1137, 1142 and a portion of Lot 1144, according to the official survey of the City of San Diego by Charles H. Poole, made in 1856, which Pueblo Lots are now and shall hereafter be known and designated as 'Balboa Park'."

It will be seen that any action by the City Council in regard to this matter would be unnecessary.

Very truly yours,

Signed: T. B. Cosgrove
City Attorney.

San Diego Union, December 5, 1913, 1:4, 5:2-3. County and City approve Broadway site for Civic Center.

San Diego Union, December 7, 1913, 8:1. Collier retired till after Fair.

San Diego Union, December 8, 1913, 1:2. Cook and Sons New York representative, D. J. Healy, here to study Exposition in the interests of his company.

San Diego Union, December 8, 1913, 5:2. Pastors oppose liquor sales on Exposition grounds.

San Diego Sun, December 9, 1913, 1:2. Winfield Hogaboom conceived the idea of a 100-foot pickle for the exposition grounds; it would tower above air on one of the highest spots on the grounds; an elevator would be inside; will be the exposition display of Heinz, the pickle maker.

San Diego Union, December 10, 1913, 1:7, 3:2. John Nolen says Civic Center would pay for itself.

San Diego Union, December 14, 1913, 11:1-3. Thousands hear San Diego Marine Band Sunday concerts in Balboa Park.

San Diego Sun, December 16, 1913, 14:3. Colonel Ed Fletcher thinks ban on sale of liquor on exposition grounds would be a square deal for licensed saloon men of the city.

San Diego Union, December 16, 1913, 20:1. Businessmen protest to Council over issuance of liquor licenses at Exposition.

San Diego Sun, December 17, 1913, 1:2. Exposition water bill causes debate; Exposition uses half of the water used in the park; the transfer of money from the general fund means that the city every six months would be paying about \$1,200 of the Exposition water bill, or three-eighths of the water bill of the Panama-California Exposition.

San Diego Union, December 18, 1913, 2:4. Director-General Davis tells what he learned on reason trip to East; railroads will advertise Exposition.

San Diego Union, December 18, 1913, 5:1. More objections to the sale of liquor from E. J. Swayne, Ed Fletcher and George W. Marston.

Park Commissioners, Minutes, December 19, 1913. A letter was read from Carleton M. Winslow stating that the architects for the Fine Arts Building advised the immediate appropriation of \$8,000 additional on the building; \$3,000 to be spent on decorating the ceiling stairway, etc. and \$5,000 to be added to the furnishing of the chapel.

San Diego Union, December 19, 1913, 20:2. Council asked for permission to close part of Upas Street from Park Boulevard to Vermont Street; needed for Standard Oil concession at Fair.

San Diego Sun, December 20, 1913, 2:4. Anthony Caro, former Exposition worker, filed suit against H. R. Schmohl, plastering contractor; while engaged as a woman on the Southern California Counties Building, on November 5, he fell from a defective ladder and sustained serious injuries.

San Diego Union, December 20, 1913, II, 1:1. New Mexico appropriated \$30,000 for building; mural paintings by Frank Springer depicting life of St. Francis to be hung in auditorium; building will cover 15,000 square feet; one wing to contain an auditorium showing movies; other wing, an exhibition hall displaying resources of state.

San Diego Union, December 21, 1913, 2:2-5. Prince Hadji tells of wonders to be shown in Oriental City; to be built at a cost of one million dollars; pictures of Prince Hadji and son.

San Diego Sun, December 22, 1913, 2:1. Colonel Collier, president of the San Diego Exposition, is thought to be in Brazil, closing arrangements for the Brazilian exhibit at the local show. He was to have gone from Brazil to Berlin, Germany, but according to Winfield Hogaboom, head of the publicity department, will probably go from Brazil to Peru to perfect arrangements for exhibits from that country.

According to Hogaboom, Collier will probably not return to San Diego until April or May, as this will be the last trip to foreign countries that have signified their intention of exhibiting at San Diego.

San Diego Sun, December 22, 1913, 2:3. New Mexicans of San Diego organize New Mexico Society at U. S. Grant Hotel, Saturday; New Mexico building to cost \$100,000.

Park Commissioners. Minutes, December 31, 1913. Park Board notifies Frank J. Belcher, Chairman of the Executive Board of the Exposition, that gardening and planting within the Exposition grounds will be done by the Park Board after January 1, 1914.

Park Commissioners, Correspondence, December 31, 1913.

December
Thirty-first
Nineteen Thirteen.

Mr. F. J. Belcher
Chairman Executive Board
Panama-California Exposition
San Diego, California.

Dear Sir:-

The Board of Park Commissioners of the City of San Diego has instructed the writer to notify you that on and after January first, 1914, that no bills incurred by the Panama-Cal. Exposition for Gardening & Planting, with the Exposition Grounds, will be paid by said Park Board.

The Park Board believes that a large sum of money can be saved on the Gardening and Planting within the said Exposition grounds, if same is done by the Park Board. And said Park Board stands willing and ready to take over the Gardening & Planting within said grounds and insists upon doing same. Said Gardening & Planting to be done in accordance with the Gardening & Planting plans to be worked out in joint conference with your Executive Board and the Park Board.

In behalf of the Park Board, the writer has also been instructed to request an immediate conference with your Executive Board in reference to the financial status of what is known as the "Bond Fund."

The Park Board believes that the gross extravagance of the Director of Works of the Panama-California Exposition is largely responsible for the poor condition of said "Bond Fund" at this time.

The large amount of uncompleted work remaining to be paid for out of said "Bond Fund" causes the Park Board to believe that the balance available in said fund is insufficient to carry to completion the work planned to be done within the Exposition grounds.

The writer trusts that you will favor us by taking this matter up at as early date as possible, notifying us that the conference has been called, whereby the Park Board will be assured that the money now available will be sufficient to complete the work on hand in the Director of Work's office.

An early reply will be appreciated,
Yours very truly,

Secretary

JBP.

Copy to Mr. H. O. Davis, Director-General, Panama-California Exposition.

3. Progress as shown at the Exposition site - pictures

4. Most monumental of structures in Balboa Park

20 miles of iron pipe for water, 10 miles of storm drain, nearly as many miles of sewer connections and about the same amount of electric conduit.

4:2 All buildings so put up that they will stand for half a century without necessity of repair to the frame on which they are built. The method employed has been to make all frames and columns on the ground and hoist them into place with cranes and derricks.

Plaster and stucco work is done in the buildings themselves, the contractor moving his molders and men into the buildings as fast as the carpenters make it ready for the plaster and decorations. The contractor produces every portion of the decoration on the grounds from blueprints, the plaster, which comes from Utah, and the material at hand in local markets.

The Division of Works furnishes the blueprints of the figures and ornaments wanted.

- 4:3. State building to be used as a depository for state historical material.

- 4:4. \$3,500,000 raised for Exposition.

- 4:5. Service stations to be maintained.

- 4:5. Permanent park provided for city.

4:6. Canadian Northern to send steamers here.

4:7. Construction of bridge.

5:1-2. California counties show what can be done.

5:3-5. Ground plan showing Organ Pavilion north of California Building; Motor Transportation Building at head of Plaza de Panama.

New pipe organ from Austin Company of Hartford, Conn.; electric pneumatic --- operated by a low-voltage generator drive by organ motor; movable console to organ with power cable; offer to donate organ made in 1913.

5:6. Irrigation expert appeals to east and west.

6:1-7. Visitors marvel at vast preparations.

6:3-4. Directors for 1913.

6:7. Panorama of Exposition showing buildings on El Prado on which work began March, 1913.

7:1-3. San Diego's Fair finds favor with citizens of the great West.

7:4-7. State Societies aid in community development.

8:1-2. San Diego Exposition to have foreign exhibits.

8:3-4. Plants grown by the million.

8:5-6. San Diego Marine Band draws big crowds; free concerts given every Sunday afternoon at 2:30 near Kalmia Street entrance.

8:7. State participation

Legislative appropriations:	Nevada . . .	\$40,000
	New Mexico .	20,000
	Utah	25,000
	Washington .	25,000
	Kansas . . .	10,000

9:1-3. Attractions of Isthmus will be unique: Scenic roller coaster and carousel; "A Street in China," Ostrich Farm.

9:1-3. Exploitation not to lag at San Diego Exposition.

9:1-7. Special rates by rail and water granted Fair exhibitors.

10. The men who made the Exposition - pictures

11:1. Amusements to be big part of show.

11:7. Open-air exhibits: International Harvester, Lipton Tea, etc.

ANNUAL EDITION

2:3-4. San Diego's Building Record in Exceptional Considering Depression.

Building permits in 1913 totaled approximately 7 million dollars.

Building permits in 1912 totaled approximately 10 million dollars.

1912 --- bulkhead construction of San Diego harbor, 1 million dollars

City affected by prevailing business depression less than almost any community in the United States.

Watts Building - 5th and E

Meyer Davidson - between E and F

Spreckels' Workingmen's Hotel - between 3rd and 4th

Union Building - between Broadway and E.

January 2, 1914, Letter, Carleton Monroe Winslow to Board of Park Commissioners . . . Goodhue to procure reredos and other furniture for the [St. Francis] chapel in Mexico.

Gentlemen:- Under date of the 27th of December 1913, I have received a letter from Messrs. Cram, Goodhue & Ferguson, from which I quote as follows:-

"We are pleased to learn that a portion of the money saved on the Fine Arts Building is to be expended in extra decoration. Mr. Goodhue has already started to make arrangements to procure the reredos and other furniture for the Chapel in Mexico. The \$3,000 should be expended as follows:

The floors of the two stair halls should be tiled in same manner as the Chapel. A dado in colored glazed tile, about three feet, should be run around the ground floor of the West staircase and the ceiling should be decorated with a rich wooden ceiling. For this we have started already to make sketches. If any money remains, it should be used in placing a wall fountain in the East staircase hall on the axis of the doorway to the main exhibition hall, ground floor."

In this connection, I have requested Messrs. Brown & DeCew Construction Company, Contractors, to submit an estimate for the extra floor tile work called for. I assume that the tile-dado work mentioned will be figured upon here in San Diego.

Quoting again: "Also please let us know whether our acceptance of the bid on lighting fixtures has been confirmed." In the firm's night letter of 18th of December, Mr. Goodhue writes, "As Caldwell's lighting fixtures for both buildings come within allowance, have accepted same. Please have this confirmed."

If your board has not already done so, will you kindly have communicated to either Messrs. Cram, Goodhue & Ferguson or myself the confirmation requested.

Very faithfully yours,

(Signed) Carleton M. Winslow
Superintendent

San Diego Sun, January 3, 1914, 1:7. Exposition building permits issued for Commerce and Industries, Foreign Arts Building and Fire Station, valued respectively at \$27,000, \$72,000 and \$10,000.

San Diego Sun, January 5, 1914, 11:1-2. Park Board and Stadium Committee debated putting stadium at 15th or 18th streets; question of excavating costs.

Board of Park Commissioners Minutes, January 9, 1914. Mr. Winslow instructed to notify Mr. Goodhue that the \$2,000 appropriation for hardware for the Fine Arts Building included the cost of the bell. . . . \$500 appropriated to improve grounds around Children's Home in Balboa Park. . . . Western Metals Supply Co. given an extension of 30 days to remove their powder magazine in Balboa Park.

San Diego Sun, January 9, 1914, 1:2-3. Stadium funds will only start project; Davidson willing to wait until people vote more money; there can be no Greek Theater, no elaborate sections of seats, and no concrete banks along cup.

San Diego Union, January 11, 1914, 3:2-3. Article mentioning Tracy Brick & Art Stone Company of Chula Vista.

San Diego Sun, January 12, 1914, 11:1. Park Board lights for Balboa Park on upper 6th Street, the western boundary of the park, and on the boulevards on the western part; President Forward does not know where the money is coming from.

San Diego Sun, January 14, 1914, 1:6. Director-General H. O. Davis says main group of exposition buildings will be finished soon.

San Diego Union, January 15, 1914, II, 11:1. Hagenbeck animals feature of 1915 Exposition.

Board of Park Commissioners Minutes, January 16, 1914. Salary of Superintendent increased to \$250 per month.

San Diego Sun, January 16, 1914, 1:3. Park Commissioners to consider a Convention Hall instead of a Greek Theater in park; also can save money on grading for stadium by day labor under supervision of Park Board instead of contracting with grading concerns; "Those opposed to a Greek Theater said it might be a thing of beauty, but that its value to the city would stop there."

San Diego Union, January 17, 1914, 18:1. Southern Highway exhibit planned for Fair; headquarters of association are in Clifton, Arizona, San Diego is western terminus.

San Diego Sun, January 19, 1914, 1:5-7. Capacity of stadium reduced from approximately 50,000 to 30,000; 15th Street site chosen; day labor to be used; level to be raised 5 feet; space will be left for a Greek Theater or Convention Hall.

San Diego Sun, January 21, 1914, 9:1-2. H. O. Davis said at Chamber of Commerce meeting last night that 8.0 million expected at Exposition next year; San Diego Exposition will be first of its kind . . . an exposition that will be the means of developing the west and of upbuilding San Diego . . . "We have but one single scale on which we weigh the acceptance or rejection of space to an exhibitor. If we can see a future market for the products of that exhibitor within the sphere of influence of this exposition, he is allotted space; if not, we have no space for him at any price."

San Diego Union, January 23, 1914, 3:1. Architect of Utah Building was John Fetzer; structure will cost \$30,000.

San Diego Union, January 23, 1914, 5:1. Park Board approves of annual Poppy Day.

San Diego Union, January 24, 1914, 8:1. Big attendance at Fair is assured.

San Diego Union, January 25, 1914, 2:4. Utah to consider state building at Exposition.

San Diego Union, January 25, 1914, 15:1. Counties to rush work at Exposition.

San Diego Union, January 29, 1914, 15:1. Kern and Tulare Counties plan for building and exhibits.

San Diego Sun, January 29, 1914, 2:3. Ten counties of the Sacramento Valley had representatives on the exhibition grounds in Balboa Park today to select a site for the Sacramento Valley Building.

Board of Park Commissioners Minutes, January 30, 1914. General foreman Christopher resigned effective February 14. . . . Board appropriated \$7,500 to plaster inside of California State Building, the amount to be deducted from the Fine Arts Building budget.

January 30, 1914, Letter, Bertram Goodhue to J. P. Pendleton, Secretary, Board of Park Commissioners, Panama-California Exposition Papers, San Diego Public Library. Wants to find genuine old bell for Fine Arts Building; Brown & DeCew Construction Co. have contract for tile work, flooring and decoration of Fine Arts Building.

San Diego Union, January 30, 1914, 11:1. Sacramento Valley spends \$75,000 on Exposition; plans and building site.

San Diego Union, January 30, 1914, 20:2. Colorado Counties plan exhibit.

San Diego Sun, January 31, 1914, 11:4. Flag unfurled on top of huge scaffold tower of California Building; 485 feet above sea; engineering work on California Building carried out under the supervision of Samuel Evans, a structural engineer.

San Diego Union, February 1, 1914, 3:2-3. Montana counties raise exhibit fund; commissioners will reach San Diego early this month.

San Diego Union, February 2, 1914, 2:2-5. Hum of industry on Fair grounds; stately buildings and great bridge nearing completion.

San Diego Union, February 2, 1914, 6:3. Park Board says grading will save big sum; propose filling of 15th Street with earth from new stadium.

San Diego Union, February 5, 1914, 5:1. Property owners want new park named "Fay."

San Diego Union, February 6, 1914, 8:1. W. W. Bowers defends Edwin M. Capps.

San Diego Union, February 6, 1914, II, 11:3. Rousing reception will surprise Colonel Collier; expected home from abroad early next month.

San Diego Union, February 6, 1914, 18:1-2. San Diego real estate bounds as 1915 approaches.

San Diego Union, February 7, 1914, 3:3. California Counties exhibit to be completed by summer; display will represent seven counties of state.

San Diego Union, February 7, 1914, 13:1. San Joaquin Building will be started soon; manager of valley exhibit consults with local Exposition officials; plans now being drawn; will cost about \$30,000.

San Diego Union, February 8, 1914, 15:5-6. Cardiff giant --- greatest hoax in history --- offered San Diego Exposition.

San Diego Sun, February 10, 1914, 1:1. Sacramento Valley Committee wants same site John D. Spreckels wants for Organ Pavilion; space in rear of California State Building; threatens not to exhibit.

San Diego Union, February 10, 1914, II, 11:2. Cup for Collier on return home; movement started by Louis J. Wilde to present Exposition worker with token of appreciation.

San Diego Sun, February 12, 1914, 1:5, 7:2. Exposition site is marvel of beauty.

San Diego Union, February 12, 1914, II, 11:1. Collier arrives in New York City.

San Diego Union, February 12, 1914, II, 11:2. Montana commission coming to Exposition.

San Diego Sun, February 14, 1914, 2:1. Funds pouring in for Collier loving cup; idea originated by banker Louis J. Wilde.

San Diego Union, February 14, 1914, 7:1. Park Board transfers \$7,500 to California State Building for completion of structure.

San Diego Union, February 15, 1914, 6:1-2. One barren waste now alive with color; Exposition garden spots to be perpetuated.

San Diego Union, February 15, 1914, 13:4. San Diego Marine Band to play in park today.

San Diego Union, February 15, 1914, 16:1. Marston endorses principles of Bull Moose.

San Diego Union, February 16, 1914, 12:3-4. What newspapers say about Exposition.

San Diego Union, February 17, 1914, 5:1. Magnificent cup ordered for Collier.

San Diego Union, February 17, 1914, 5:2-3. What newspapers say about Exposition.

San Diego Union, February 18, 1914, 5:2-3. Realty men view growing wonders of Exposition.

San Diego Union, February 19, 1914, 8:3. Playgrounds opened to general public. . . . Frank P. Marsh, superintendent of the San Diego playgrounds, makes an announcement that is of interest to those who are fond of indoor baseball.

An invitation is extended to all young men in the city who have their evenings free to participate in the games and other athletics and gymnastics at the Rose Park playgrounds, corner of 11th and I Streets, which are thrown open to general public use on Monday and Saturday evenings from 7 to 9:30 o'clock at no expense to participants.

The playgrounds have well-lighted ball diamonds and gymnasiums. Any wishing games there should communicate with the director of the playgrounds.

Park Commissioners Minutes, February 20, 1914. Carleton M. Winslow instructed to prepare plans for decorative wood ceiling for the hall stairway of the Fine Arts Building at a cost not to exceed \$1,200 allowance for same.

San Diego Sun, February 21, 1914, 11:2. Collier expected here March 21; is now in New York.

San Diego Union, February 22, 1914, 11:3-4. Great Exposition bridge will be opened in March.

San Diego Union, February 23, 1914, 15:1. Pinkerton sleuths to watch over Exposition; head of detective bureau arrives in San Diego seeking contract; assures full protection.

San Diego Sun, February 24, 1914, 1:4. Assemblyman Hinkle suggests a government aviation school for Balboa Park during 1915 Exposition: "With a government camp --- perhaps a permanent camp --- in Balboa Park on the Exposition grounds, the government would profit as well as San Diego and the Exposition crowds. The park is considered a splendid site for a camp of this character."

San Diego Sun, February 25, 1914, 1:7. Colonel Collier will probably not return to San Diego until September 1; will spend summer in Washington, DC, and New York, partially on Exposition business and partially on his own business.

San Diego Union, February 27, 1914, 14:1-4. What newspapers say about Exposition.

San Diego Union, March 1, 1914, 1:7. D. C. Collier, guest of Representative Kettner at Army and Navy Club; distinguished officials at capitol gather at dinner to Exposition president.

San Diego Union, March 4, 1914, II, 9:2-5. San Diego scenery vividly portrayed; Lawrence Bowman Clapp's water-color pictures of Exposition grounds riots of delicate color.

San Diego Union, March 5, 1914, 1:1. Council vote is unanimous to dismiss engineer Capps.

San Diego Union, March 5, 1914, 3:4. Realty Board and Exposition directors seek protection of visitors; want hotel rates to be fixed.

San Diego Union, March 5, 1914, 3:6. Montana officials inspect Exposition grounds; report to governor.

San Diego Union, March 8, 1914, 6:1-2. Menageries and strange birds in Balboa Park delight children.

San Diego Union, March 9, 1914, 1:8. Collier retired from Fair work; need of rest reason for leaving office; Exposition president whose wealth and energy helped undertaking will look after business interests; co-workers surprised at announcement; stockholders meeting today for election of Board of Directors.

San Diego Union, March 9, 1914, 16:3. Colonel D. C. Collier, president of the Panama-California Exposition, has resigned from that office in a letter written from Washington, DC, to G. Aubrey Davidson, acting head of the exposition, here today.

Colonel Collier, who has devoted several years to Exposition work, says he needs a rest and that he has not the personal funds to continue the work.

The resignation of Colonel Collier was expected. The Exposition stockholders meet tomorrow in the Administration Building to elect a new Board of Directors. On Friday, the newly elected Board will meet and it is probably that Collier's place will be filled at that time.

(December 5, 1914, "San Diego's Evolutionary Exposition," by Jerre C. Murphy, pp. 20-22. . . . Collier quit only when he could no longer live and work without pay. When he returned to his home city after his retirement from fair work, he was welcomed with a reception by thousands of people and given a loving cup big enough for a water cooler. He returned the compliments with the announcement that he had accepted the presidency of a railroad company organized to build a short route from Denver to San Diego through new territory.)

San Diego Union, March 10, 1914, 1:4. Hot fight over Exposition president; bankers Belcher and Davidson seek office in good-natured contest.

San Diego Union, March 11, 1914, 1:7-8. City to brighten up for Fair; improvements planned; Councilmen outline plans for year; streets to be paved; harbor work to be rushed.

San Diego Union, March 11, 1914, 1:8. Exposition stockholders elect two new members on Board of Directors; Belcher leads in race for presidency of Fair; no action taken on Collier's successor.

San Diego Union, March 11, 1914, 3:1. Belcher expected to get Exposition place; elections of M. F. Heller and Julius Wangenheim to succeed L. S. McLure and I. I. Irving on Board of Directors give Belcher required number of votes.

San Diego Union, March 11, 1914. 7:3-5. Taxpayers oppose big Exposition sign.

Park Commissioners Minutes, March 13, 1914. The Superintendent reported the Mr. John D. Spreckels has selected the "Old Howard site" in Balboa Park as the location for the Organ Music Pavilion and that he was ready to proceed with the work; Superintendent instructed to permit said Pavilion to be erected upon the "Old Howard site," provided that Mr. Spreckels could not be persuaded to place it in a better location; this Board to do the excavating and grading at the expense of Mr. Spreckels.

San Diego Examiner, March 13, 1914, 1:3-5. Hot row in Exposition camp; Davidson attributes loss of presidency to hostility of liquor-selling interests.

San Diego Union, March 13, 1914, 1:5. Rivals for Exposition place in last lap; question of "wet" or "dry" may hang over today's election, but this was not admitted by the backers of either candidate.

San Diego Union, March 13, 1914, 1:7. Federation of State Societies plans to conduct flower-planting campaign.

San Diego Union, March 13, 1914, 8:1. Collier's plans are uncertain; C. A. Richardson, former business manager, saw him in Chicago . . . In a letter to Exposition Board, Collier said his finances became in such a shape that last July he was forced to accept an allowance to carry on his work.

San Diego Union, March 13, 1914, II, 9:4. Collier predicts big success for Fair; Board meeting today.

San Diego Union, March 14, 1914, 1:1. Stockholders to elect Fair head by vote; election set for April 10; friction eliminated at harmonious meeting.

San Diego Union, March 15, 1914, 1:2-6. San Diego railroad station assured; Company adopts final plans.

San Diego Union, March 15, 1914, III, 1:2-4. Mission Theater to show story of early fathers at Fair.

San Diego Union, March 16, 1914, 1:1. Belcher withdraws name on account of fear that contest may develop bitterness.

San Diego Union, March 16, 1914, 7:1. Princess Tsianina, Indian soprano, scorns modern fashions; gives concert at Spreckels today.

San Diego Union, March 16, 1914, 7:1. Great bridge across Cabrillo Canyon is ready for use today; within 30 days main group of Exposition buildings will be completed and ready for installation of exhibits.

San Diego Union, March 17, 1914, 4:1. EDITORIAL: A Public-Spirited Act.

San Diego Union, March 17, 1914, 8:5. Work on Organ Pavilion begun.

San Diego Union, March 18, 1914, 3:5. City treasurer denies rumor of Exposition funds being exhausted; Stewart says that \$698,000 remains in cash surplus and bonds.

San Diego Union, March 21, 1914, 1:2-4, 18:4. Davidson unanimously elected Exposition president today at meeting of Board of Directors on nomination of Frank J. Belcher.

San Diego Union, March 21, 1914, 4:1. EDITORIAL: Beautifying for Exposition Year.

San Diego Union, March 21, 1914, 5:4. H. R. Schmohl, Exposition artist, talks to teachers on clay modeling.

San Diego Union, March 21, 1914, II, 9:1. Large Exposition crowd predicted.

San Diego Sun, March 24, 1914, 1:1-2. Exposition buildings rapidly filling with exhibits; every large structure on grounds to be completed next week; parking to be done September 1; thousands of trees and shrubs growing; how millions of visitors will reach grounds; General Traffic Managers of transcontinental

railways say San Diego must be prepared to handle a minimum of 6 million visitors, including those who will come from the east, from California, from states nearby and through the Panama Canal.

San Diego Union, March 24, 1914, 1:4-6. Santa Fe exhibit shows model of Indian pueblo.

San Diego Union, March 24, 1914, II, 9:1. Old mission bells at Fair true to original.

San Diego Sun, March 25, 1914, 12:3. Federation Trade Council voted to send letters to every labor union in Arizona urging them to push the initiative for a state building and exhibit here during 1915.

San Diego Union, March 25, 1914, 5:2. Fair hotel rates assured 1915 visitors; local organizations adopt resolution to keep prices reasonable.

San Diego Union, March 25, 1914, 14:2. Utah building plans received by Fair men. . . . Designs for the Utah Building at the San Diego Exposition arrived today from the offices of Canson and Fetzer, architects of Salt Lake City. When approved by the Buildings and Grounds Committee of the Exposition and Director General Davis, work will be begun on this structure, which will be one of the most pleasing of the buildings in the states' section of the Exposition.

Members of the Southern California Counties Commission came to San Diego yesterday to inspect the building of the southern counties, which has just been completed and is now ready to be turned over by the contractor to the commission. Manager Wilson of the commission accompanied the commissioners and reported to Exposition officials that he is preparing to begin the installation of exhibits in the building at an early date.

Work will be begun in a few days on the ranch bungalow to be built on the model ranch of the Southern California Counties. The groves of citrus and deciduous trees are thriving wonderfully and a most remarkable growth will be shown by these trees in 1915.

San Diego Sun, March 26, 1914, 12:4. Railways make rates for Exposition; one-way fare will be changed from mid-continental points; this would mean a \$50 round trip fare from Omaha, Kansas City, St. Joseph or Atchison to San Francisco, Oakland, Los Angeles or San Diego; \$57.50 from St. Louis; \$59.25 from Peoria; \$62.50 from Chicago.

San Diego Herald, March 26, 1914, 5:5. Exposition Notes.

San Diego Union, March 26, 1914, 16:1. Fire Department to boost Exposition; members will send 50,000 picture cards showing station on grounds; building work is rushed.

Park Commissioners Minutes, March 27, 1914. Oregon State Building Committee asked Board for permission to erect a permanent building on the Exposition grounds in Balboa Park; Board advised Committee they did not have the power to grant their request. . . . Mr. A. B. Christopher returned to position of General Foreman of Balboa Park.

San Diego Sun, March 27, 1914, 2:1. Great Exposition will typify man's work; accomplishments of man since world began will be featured here; work of cavemen, aborigine, 20th century inventor and an outline of future developments on the Pacific Coast and in the California Southland.

San Diego Union, March 28, 1914, EXPOSITION SECTION

- 3:1. Temple of Music [Organ Pavilion] to be beautiful structure
- 3:2-4. School children enlisted in local booster's ranks
- 3:5-7 Mirth to hold sway on Isthmus at Exposition
- 4:1. Seven Latin American countries to exhibit at Exposition

San Diego Union, March 28, 1914, 1:6-7, 3:1-3. San Diegans ready to celebrate Harbor Day.

San Diego Union, March 28, 1914, 4:1. EDITORIAL: Why Harbor Day Is Observed.

San Diego Union, March 28, 1914, 11:2-5, 12:1. Panama-California Fair is magnificent triumph of art and enthusiasm; 3,000 palms transplanted. . . . In bringing the friends of San Diego in other cities abreast of the vast work in progress on the grounds of the Panama-California Exposition, it is of first importance to tell them that the great reinforced bridge across Cabrillo Canyon, that most spectacular piece of construction, on which scores of men have been so busy for so many months, is at last completed. What this means can only begin to be realized by those who have followed to some extent the course of building, who have seen first the great skeleton of lumber creeping day by day and foot by foot across the canyon, then the solid concrete, as it were, creeping after.

Spanning a canyon 136 (?) feet and 1010 feet wide at the brink, this monumental structure consists of seven concrete arches, supported on fourteen huge concrete pillars carried by caissons down to bedrock beneath the soil. Each pier carried a load of 1,000,000 pounds and 1,000,000 board feet of lumber were required for the forms alone.

The west entrance to the grounds will be at this bridge, and it is certain that no traveler crossing there in 1915, with the magnificent buildings of the Exposition before him, the incomparable sweep of the city and sea and harbor in the offing, the green canyon beneath him and the California sky above, can fail to feel that he is reaping a beautiful and inspiring reward for his journey.

The central architectural feature of the Exposition will be the California Building, at the east end of the Cabrillo Bridge. In this building, the appropriation for which is \$250,000, the state will have a structure second only to the state capitol at Sacramento in architectural beauty. The structure will be permanent and will be used for all time as an institution for the preservation of historical records and objects.

Like practically all the buildings of the San Diego Exposition, the state building will be designed on the Spanish Colonial type. A great dome, decorated with ornate colored tile, will surmount the main portion, and a tower at one corner and wings and arcades around it will further enhance the beauty and balance of its proportions.

The buildings of the main group, on several of which the elaborate staff work of the exterior is entirely finished, in the order of their beginning are the Home Science Building, on the north side of the Prado and cornering on the Plaza to the east; the Arts and Crafts Building; the Science and Education Building; the Agricultural Buildings; the Southern California Counties Building; and the sixth is the state building. Opposite this will be the Arts Building, also of concrete, the cost of which will be \$200,000.

Many structures for exhibitors and concessionaires are underway, and seven state buildings are expected to be completed by the middle of 1914.

The Exposition site, with its rolling hills and canyons, lends itself peculiarly to road effects and artistic grading. A vast amount of this work has already been done. Prados and avenues and walks, completed many months ago, have been gradually lined and hidden in trees and bushes and all manner of green things.

One of the greatest triumphs of the Exposition is its nursery and horticultural work. In 1911, at the very outset of this great enterprise, the nursery was started, under Paul G. Thiene, and in it all the plant life, exotic growths from the tropics for the great conservatory, native trees and shrubs for landscape effects and the grounds about the buildings and wild flowering vines and creepers to deck the canyons have been grown and cared for.

In horticulture and landscaping, the Panama-California Exposition has an unparalleled advantage over previous Expositions, owing to the mildness of the climate and the prevailing freedom from frost. Thiene and his assistants have made the best of this advantage and the landscape effects, formal as well as wild and free, even now are of surpassing beauty and the wonder of eastern visitors.

In the nursery, which covers thirty-five acres of propagation beds and over one-hundred acres of growing beds, millions of plants have been propagated. Seven millions was the last figure shown by the books of the department.

In the enormous task of planting trees and older palms along the streets and avenues, the heaviest machinery has been employed. More than 3,000 palms, several of them with the earth around the roots seventy tons, have already been transplanted long distances and replanted.

In the transplanting of trees and the setting out of shrubs and vines from the nursery beds, every acres is treated with a full sense of its artistic possibilities. On the picnic grounds, for instance, overlooking Spanish Canyon, where one of the finest views of the buildings is afforded, the pepper trees are so distributed that every few rods as one walks along the paths, an opening is left and in it is framed one of the magnificent buildings on the Prado.

One section of the pepper grove is planted in Scotch heather, another in lippia grass, another in delicate vines, another in lawn. These plants are still young, but the ultimate beauty and variety of the effect, as it will appear a year from now, is very apparent.

Some of the more formal work surrounding the buildings which are completed or nearly so, has already been begun, and walking down the Prado, the visitor gets touches here and there suggestive of what a triumph, both architectural and horticultural, that delightful little treat is going to be. Slender Italian cypress stand like sentinels on either side of the entrances of the Home Economy Building, tender young vines are creeping up the walls, and brilliant shrubs find a striking background in the gray plaster.

The most extensive piece of planting for exhibition purposes is in the groves and gardens of the counties of Southern California. In one section are 700 of the finest two-year old citrus trees that could be gathered in the citrus belt, and it is more than probable that these trees are the finest in the world today. There is also a deciduous grove, and next to it formal gardens surrounded by berry vines, the whole making a Southern California scene complete it is beauty.

This exhibit and smaller ones of its kind will combine to show the results of irrigation and intensive farming at their best, as they have never been shown before. The entire tract is surrounded by a pergola, upon which climb roses and many other kinds of blooming vines. In the heart of the whole are being erected several typical California bungalows, as the crowning touches to complete the effect of a California rancher's domain.

In addition to all the other horticultural features, there is the Horticultural Building, a huge structure of glass and lath, in which will be shown the more delicate and valuable tropical specimens, of which a great number and variety are growing and being cared for in the nursery.

This house, which is now well on toward completion, is 600 feet square and 100 feet high. It is so planned that it will be regarded and sought out as one of the most delightful of public gathering places, where, if desired, band concerts may be given in the afternoon.

Wherever necessary to the completion of landscape effects, there will be lagoons in which water lilies and aquatic life of every description will be allowed to grow wild. In the canyon beneath the Cabrillo Bridge has been built a dam that will impound enough water to strengthen the effect of the bridge. On the opposite side of the grounds, there will be a deeper and much more extensive lagoon, winding its way through the center of the grounds up to a bulkhead on the Prado.

This extensive body of water will be utilized for the demonstration of aquatic materials, and an exhibition of flying boats that will operate between the grounds and San Diego harbor.

In a project of the magnitude of the San Diego Exposition, there are so many departments, so many features, so many angles from which to view it that no brief description can begin to give an adequate idea of what is

being done and what is yet to be done there. After all is said and done, only a visit in 1915 will tell the whole story.

San Diego Union, March 29, 1914, 1:8, 2:1-2. Thousands join in city's first Harbor Day.

San Diego Union, March 29, 1914, 1:6-7. Assistant Secretary of the Navy to visit San Diego, April 11.

San Diego Sun, March 30, 1914, 1:5-7, 2. Charlie Collier's Coming Back Stories have been printed in the northern papers alluding to Collier as "broke" and "stranded" among strangers in New York -- - all more or less true.

Collier isn't exactly broke --- he may save something out of the wreck when things are finally adjusted.

"Was the toboggan greased for Collier?," is a question you hear asked a lot.

"Yes and no," was the answer of a "loyal" San Diegan. "They didn't plot to get Charlie down and then stamp on him, but they let him drift into financial trouble, and when he got there, there were certain folks here who would have liked to be crowned king in his place."

Close friends of Collier deny the toboggan was greased for him. They say he was merely "spoiled," that he was cheered on, that he went ahead on work for the exposition, and just neglected his personal affairs until hard times came.

At present Collier is not suffering. He has enough to live on modestly and is at work in the east, keeping his head above water.

Collier hasn't touched a drop of liquor since October.

Several big eastern concerns, realizing Collier's worth as a promoter, are said to have offered him good positions which he has refused because he is coming back to San Diego to start anew.

Whatever it is, he'll do it with the same energetic, buoyant spirit that made the exposition possible.

Weeks ago Collier's many friends chipped in to buy him a loving cup. The cup was bought --- it awaits his coming. Those who are Collier's friends are waiting to say "Good boy, Charlie. We know how you tried. And we know what you've done. And we want to thank you for it and help you in every way we can."

For Collier, a giant in physique and a man of resolute will and volcanic of disposition, had beneath the rougher surface the soul of a poet and in his moments of repose the soft, gentle heart of a child.

From a struggling young lawyer, a product of the west, he arose by sheer pluck to be the most talked of man in Southern California --- had he loved San Diego less --- had he watched his own affairs, as he could easily have done, he might have been one of California's wealthiest men.

But --- well anyway he didn't do that.

It will take a long time for San Diego to forget Collier.

San Diego Union, March 31, 1914, 7:1. Lantern slides to advertise Fair.

San Diego Union, April 1, 1914, 3:2-3. City Seal, designed by Carleton M. Winslow, accepted by city.

San Diego Union, April 1, 1914, 8. Douglas MacKinnon, Superintendent of Schools, recommended that one of the Exposition buildings be moved to north end of park and used as a high school after the Exposition.

San Diego Union, April 1, 1914, 9:2. Oil painting to D. C. Collier painted by Charles A. De Lisle-Holland; tribute to Collier published in **Real Estate and Building News** of Los Angeles.

San Diego Union, April 1, 1914, II, 1:1. 600 passenger agents to visit Fair site in November; Bertram G. Goodhue arrived from New York yesterday; is pleased with progress made on buildings and their appearance.

San Diego Sun, April 2, 1914, 11:1. Assemblyman Hinkle wants great university on Exposition site; plan endorsed by G. A. Davidson and F. J. Belcher. . . . Belcher: "It would be a shame to wreck a single one of these exposition buildings. I am heartily in accord with the movement and believe it would be one of the best things that ever happened to San Diego." . . . Davidson: "We should have a Southwestern Agricultural College."

San Diego Union, April 2, 1914, II, 1:5. Collier will be home this month; big reception planned.

April 3, 1914, Letter, Bertram G. Goodhue, U. S. Grant Hotel, San Diego, Cal., to John Forward, Jr., Union Tile & Trust Company, San Diego, Cal. . . . Panama-California Exposition, Box 3, Folder 1, San Diego Public Library.

My dear Mr. Forward:

You will remember I spoke to you the other day regarding what seems, to me at least, a matter of considerable importance.

The original allowance for the Fine Arts Building was \$150,000, this to include, of course, the architect's commissions. This sum was afterwards reduced, and though the haziness involved led me astray, I thought that the building, as finally worked out in its original form, could be built for very nearly, if not quite, the allowance definitely fixed upon, of \$125,000. Coming here last June, I found that, in the opinion of the Director of Works, an opinion based no doubt upon careful calculation, the building could be expected to cost, with the architect's commissions, well over \$140,000. At a meeting held immediately before my starting East, Col. Collier proposed that I make a complete new set of working drawings and specifications for a building to cost, including the architect's commissions, \$125,000; --- that he personally was in favor of ruling that in case I failed to have such a set of plans and specifications back here within six weeks from the date of the meeting, the project be abandoned and I think no payment to be made me therefor.

After considerable natural hesitation and resentment, I finally acceded to this scheme, --- performed my part of the agreement faithfully and well, so faithfully and well as it transpired that the new set of plans and specifications were let to a general contractor of \$91,500, or thereabouts. To this sum has been added \$3,000 for what both I and, I believe, the Park Board hold necessary to make the building what it should be as to its interior. There has also been made an allowance, not yet expended, of \$5,000 for the interior furnishing of the little Mission chapel, strictly speaking no chargeable against the building. These two items, with the contract price, making a total of --- say --- \$100,00 [sic]. In other words, I have saved the Park Board in the actual cost of the building, or rather the Park Board and the Exhibition itself, since my commissions are paid by the latter, \$25,000.

But to do this necessitated a very considerable expense on my part, and the time allowed, six weeks, was all too short in which to do the work, so that a large force of men worked overtime.

The cost to me of making this second set of drawings was \$3,811.95. My purpose in writing this letter is to ask you and your fellow members of the Park Board if, in your opinion, this amount should not be allowed me, for it is now evident that the estimates prepared on the first set of drawings were quite incorrect, and that the original building could have been built, including the architect's commissions, for the \$125,000 originally allowed, and that the responsibility involved cannot by any manner of reason be laid at my door.

Trusting, sir, that you and the other members of the Park Board, and those in authority of the Exhibition Executive Board, will see the matter in the same light as I --- indeed believing that it cannot be viewed in no other light, I remain

Very faithfully yours,

(Signed) Bertram G. Goodhue.

April 4, 1914, Letter, Bertram Goodhue to John Forward, Jr., The California Limited: Santa Fe, En Route.
. . . handwritten

My dear Mr. Forward

In my letter to you of yesterday -- written directly on the typewriter from hasty dictation -- I made a misstatement which I wish to correct.

The figure that terminates the first paragraph on the second page includes my assumed commission of approximately \$7000.00, which, of course, it should not.

Will you be good enough, therefore, to cross out the \$25,000.00 and put, in its place, \$18,000.00.

Regretting the error, which arose from the fact that I was dictating hastily before leaving for my train --- and the necessity of imposing upon you the task of puzzling out my own handwriting --- always illegible enough but doubly so on a moving train, I remain,

Very faithfully yours,

(Signed) Bertram G. Goodhue
(2 West 47 St., New York, NY)

San Diego Sun, April 4, 1914, 1:1. Gordon Decker and George L. Barney, members of a committee appointed by a San Diego Realty Board, want a plot of ground in the city park for the propagation of trees, flowers and shrubs; Forward, chairman of the Park Board, is in favor.

San Diego Union, April 4, 1914, 5:5. Marston resigns from Water Commission; trip lasting from May until November abroad given as reason.

San Diego Union, April 4, 1914, II, 9:1-2. Frank P. Allen evolves plan to assist campaign for beautiful San Diego in 1915; prepares list of things for year ornamentation which he will present at floral mass meeting Tuesday.

April 6, 1914, Letter, John F. Forward, Jr., San Diego, Calif., to Bertram G. Goodhue, New York City.

Dear Mr. Goodhue:-

I acknowledge receipt of yours of April 3rd and April 4th, 1914, relating to the Architect's fee on the Fine Arts Building in Balboa Park. I believe all of the matters you mention were conducted by the Board of Directors of the Panama-California Exposition and not by the Park Board, hence I do not feel that I am well enough acquainted with the situation at this time to commit myself. I will take the matter up within the next few days with Mr. F. J. Belcher, Chairman of the Executive Board of our Exposition, in order that I may get their side of the story. I do not see how anything can be done in the matter at this time. It seems to me it should go over to the end of the year and then be taken up along with the other questions pertaining to extra allowances. As stated, I will consult with Mr. Belcher and advise you further during the week.

Yours very truly,

President,
BOARD OF PARK COMMISSIONERS.

San Diego Union, April 6, 1914, 14:1. Splendid exhibit by Southern California Counties; buildings near finish.

San Diego Sun, April 8, 1914, 1:4. Collier coming home on April 17; great reception planned; writes from Lake Charles, La., where he is representing San Diego at a good roads convention, from there he goes to Chicago.

San Diego Union, April 8, 1914, 5:3. Russian Village at Fair planned.

San Diego Union, April 8, 1914, 6:5. Turnstiles ready for Exposition; admission will be charged soon; recording machines secured for employees.

San Diego Union, April 8, 1914, 7:1. Nevada Building will be started at once.

San Diego Herald, April 9, 1914, 4:2. When Charlie Collier comes home.

San Diego Sun, April 9, 1914, 2:4. Supervisors and commissioners of seven Southern California Counties arrive to inspect completed building today; cost approximately \$45,000.

San Diego Union, April 9, 1914, 3:2-3. Fred de Lonchamp, Nevada state architect, to draw up plans for building.

San Diego Union, April 9, 1914, 6:4. Fay again requests that park buy water; Council denies petition previously defeated; Department demands return.

Park Commissioners Minutes, April 10, 1914. Messrs. Masten, Harris and Williams, representing the 6th Street property owners, appeared before the Board and presented agreements for the completion of the 6th Street Boulevard from Juniper to Hawthorne Streets; said agreements, have been corrected, were approved by the Board. . . . "Second Revised Plans and Specifications for the Completion of 6th Street Boulevard between Juniper Street and Date Street," accepted.

San Diego Sun, April 10, 1914, 1:3-6. Citizens oppose charge at Exposition; declare Fair officials are making a serious mistake.

San Diego Union, April 10, 1914, 3:2. Supervisors of seven Southern California Counties lunch at Exposition; gathering held in newly completed building.

San Diego Union, April 10, 1914, 4:10. Rotary Club to advertise Exposition by big Golden Wheel, costing \$10,000; to be sent to 115 cities in United States and England.

San Diego Sun, April 11, 1914, 2:1. Park Board agreed last night to leave 20 feet of ground on west side of 6th Street between the south line of Juniper and the north line of Hawthorn, which is in front of the Gay, Frary and Mulvey places, and also agreed to erect a cobblestone retaining wall along the east side of the cut between Hawthorn and Ivy streets; four law suits pending in Supreme Court and Superior Court to be dismissed; road will be completed immediately.

San Diego Sun, April 11, 1914, 11:4-5. Director of Works Allen not charging to make money; irresponsible people are hindering workmen and destroying flowers; if admission remained free, a watchman would be needed.

San Diego Union, April 12, 1914, 3:1. San Diego ready to receive Franklin D. Roosevelt, Assistant Secretary of the Navy.

San Diego Union, April 12, 1914, 3:2. Picture of symbolic seal for Exposition and its originator, Charles A. de Lisle-Holland; Miss Vance Burnett-Tabor, granddaughter of California's first governor, posed for central figure of seal

San Diego Union, April 12, 1914, 3:6. G. A. Davidson, "father of Exposition."

San Diego Sun, April 13, 1914, 1:7-8. Exposition directors will weigh matter of charging admission before taking action.

San Diego Sun, April 13, 1914, 9:1-2. Assistant Secretary of the Navy, Franklin D. Roosevelt, promises great naval pageant here in 1915; Navy Department is planning to establish two new regiments of the Marine Corps on the Pacific coast and San Diego stands an excellent chance of being made the base of operations; Roosevelt arrived yesterday and will leave tonight; took automobile tour of the city with Colonel Fred Jewell.

San Diego Union, April 13, 1914, 1:1, 2:5-6. Franklin D. Roosevelt. Assistant Secretary of the Navy, visits Exposition; his automobile was first to cross Cabrillo Bridge on April 12; Mayor Charles F. O'Neill, G. Aubrey Davidson, Colonel Fred Jewell and Lieutenant Commander G. C. Sweet were passengers; Roosevelt says San Diego will become great naval base

San Diego Union, April 13, 1914, 5:2-3. Gold Wheel ready to roll; Fairs will be advertised; Rotarian ready for international journey starting from San Diego

San Diego Union, April 14, 1914, 1:4-5, 3:5-6. Democrats laud memory of party's founder at Jefferson Day banquet; Assistant Secretary of Navy calls San Diego third Pacific naval base; promises fleet; President Wilson coming to San Diego Fair.

San Diego Union, April 14, 1914, II, 9:2. Demonstration of loving citizens to greet Colonel Collier.

San Diego Union, April 15, 1914, 7:1. Superintendent MacKinnon working for full university course at High School; Board of Education wants to use Fair building for a municipal college.

San Diego Union, April 15, 1914, II, 9:3. Kate Sessions scores assessor, city officials.

April 16, 1914, Letter, Bertram Goodhue, New York, to John F. Forward, San Diego.

Dear Mr. Forward:

Of course the whole question of an architect's compensation for abandoned plans and specifications is unusual and one demanding special consideration.

In the case of the Fine Arts Building, however, it is not distinctly proved that had the abandoned plans been figured upon by contractors, the cost of the building would have proved sufficiently below the allotted cost for the building to have been begun forthwith, thus saving at least two months time, perhaps more, as well as, naturally, providing San Diego with a larger and better building than the one now being erected from the second set of plans.

The original motion to abandon the first set and to direct me to prepare a second set in a given space of time came from Col. Collier. If he is now in San Diego, I trust you will bring this letter to his attention, for I am quite sure I can count upon his support.

You are quite right in supposing that this motion of Col. Collier's was made at a meeting of the Exposition Directors, though, as I remember it, members of both the Park Board and the State Commission were present.

You will forgive me for differing with you in thinking that something can be done at this time, for the fact remains that between the sum authorized and the sum now being expended, there is a difference of about \$18,000, so that to pay me the \$3811.95 I ask for entails no hardship to anybody in San Diego, while the withholding of this sum from me seems at least from my point of view to be a serious injustice, as well as hardship, to your architect.

There is at present owing me on various accounts in connection with my work on the Fair about \$15,000 and I am beginning very distinctly to feel pinched in consequence.

Trusting that Mr. Belcher and Col. Collier will confirm my view, and that you will see it in the same light, I remain,

Very faithfully yours,

(Signed) Bertram G. Goodhue.

San Diego Union, April 16, 1914, II, 9:1. President Wilson invited to San Diego by Ad Club for inspection of 1915 armada.

San Diego Sun, April 17, 1914, 9:1. Directors decide to bar those who haven't 25 cents after May 1.

San Diego Union, April 17, 1914, 3:4. Kettner demands \$100,000 for San Diego Fair. . . . Washington, April 16. Congressman Kettner of San Diego has threatened the passage of the bill to appropriate \$500,000 for a government building at the San Francisco Exposition by planning to introduce an amendment to appropriate \$100,000 for a government building at the San Diego Exposition.

This was not contemplated in the president's recommendation to congress and if the amendment is offered a fight will be precipitated on the bill, which will jeopardize its passage through the house.

Congressman Sherley of Kentucky, who opposed an appropriation for San Francisco at the last session of congress, served notice on Congressman Kahn that he intended to oppose the pending bill.

A subcommittee on the house committee on Expositions has been working to perfect a bill under which the San Francisco government Exposition building will be a permanent edifice, to be turned over to the war department for the Presidio administration officers after the Exposition.

The complication interjected by Congressman Kettner has halted their work and the bill probably will stand in abeyance until the matter is fought out in committee.

San Diego Union, April 17, 1914, 7:1. Exposition to ask for \$250,000 for U. S. exhibit.

San Diego Sun, April 18, 1914, 6:1-2. Davidson explains why Exposition gates will close; need for protection not only to the Exposition building and grounds but for the exhibitors and concessionaires.

San Diego Union, April 18, 1914, 3:1. Colonel Collier to get giant reception; plan presentation ceremonies at Spreckels theater; loving cup ready.

San Diego Union, April 18, 1914, 3:5. Closing of gates at Exposition justified; 25 cents admission to be charged.

San Diego Union, April 18, 1914, 3:5. Santa Fe exhibit work commenced.

San Diego Union, April 18, 1914, 7:4. Montana exhibit assured by donation.

San Diego Sun, April 21, 1914, 1 (whole page). U. S. force put ashore at Vera Cruz; on to Mexico City if necessary.

San Diego Union, April 21, 1913, 3:2. Collier reception stirs interest of throngs; civic, commercial and fraternal organizations to join in greeting.

San Diego Sun, April 22, 1914, 1:3-4. Colonel Collier comes today; great welcome is planned; Mayor O'Neill, Rufus Choate, F. J. Lea, G. Aubrey Davidson, C. A. Richardson, Louis J. Wilde and Carl Heilbron went to Los Angeles to greet Collier today.

San Diego Union, April 22, 1914, 1:5-6, 4:6-7. Record-smashing welcome awaits Colonel Collier.

San Diego Herald, April 23, 1914, 1:3-4. D. C. Collier, president Southwest Pacific Railway; announcement made at his reception.

San Diego Sun, April 23, 1914, 8:1-2. Hundreds Greet Collier, He Heads New Railroad . . . Colonel Collier's homecoming was spectacular. Never before has such a reception been accorded to a citizen of San Diego upon his return to the city. When Collier reached the Grant Hotel, escorted by the Conquistadors of the Order of Panama, so many packed into the lobby to shake his hand that the colonel could hardly make his way to the elevator.

It was the same way at the Spreckels Theater. Hundreds flocked there to hear the colonel's address and see the loving cup presented.

Mrs. Collier sat in John D. Spreckels' box with her two young sons and O.J. Slough and wife.

Collier's announcement was that he had been made president of the new Southwest Pacific Railway, which will run from Denver to San Diego through the Colorado River basin. The railroad will be incorporated in about three weeks and will connect at Seeley with the San Diego and Arizona. Louis J. Wilde presented the cup.

San Diego Sun, April 23, 1914, 9:5-6. Davidson declares war with Mexico will not hamper the Exposition.

San Diego Union, April 23, 1914, 1:4, 8:2-5. Collier will bring railroad from Denver to coal world's ships in Harbor of the Sun for shipment abroad and for development of a steel mill in San Diego; devoted host greets glad tidings with acclaim at monster reception; Collier absent nearly ten months; Directors accepted his resignation as Director, March 13, 1914; has accepted presidency of Southwest Pacific Railway.

Park Commissioners Minutes, April 24, 1914. Secretary instructed to order 12 elk, 10 does and 2 bucks, from California Academy of Sciences at \$3.00 per head to cover incidental expenses.

San Diego Examiner, April 24, 1914, 1:1-2. Collier is given greatest ovation in history of city.

San Diego Union, April 24, 1914, 8:1. Collier's dream of Exposition fulfilled; hurries to view progress made during absence.

San Diego Union, April 25, 1914, 1:1, 5:2-3. Enthusiasm keynote of Order of Panama session; tributes pour upon Colonel Collier from admirers.

San Diego Union, April 26, 1914, 16:1. Montana Building at Exposition assured; former Senator W. A. Clark of that State donated \$10,000 toward fund for suitable building.

April 27, 1914, Letter Carleton M. Winslow to Board of Park Commissioners, Panama-California Exposition Papers, San Diego Public Library: Winslow has picked up two altar candlesticks and a cross at an auction which he is having re-gilt and re-antiqued for Chapel; has ordered old Spanish bell from S. E. Benoliel & Co. in Gibraltar for turret at cost of \$75.00; light reflectors for Fine Arts Building, cost \$234.00.

San Diego Union, April 27, 1914, II, 9:1. Collier's heart is touched by tributes.

San Diego Union, April 29, 1914, 8:5-6. Moreland firm arranges for motor truck exhibit.

San Diego Union, April 29, 1914, 9:4. T. H. Shore, president of Ad Club of San Diego; article on plan to boost San Diego and Exposition throughout country.

San Diego Union, April 30, 1914, 5:6. Fire apparatus coming for Fair; City and Exposition will cooperate to purchase equipment.

San Diego Sun, May 2, 1914, 11:7-8. Alice Klauber: Spirit of people here must make Exposition have a lasting influence. Just what in artistic matters can be hoped from our own Fair? Cites mural decorators employed on the fair grounds at San Francisco --- Frank Brangwyn, Edward Symons, Robert Reid, Child Hassam, Jules Guerin, Dodge, and Brothers Du Mond. Wants an exhibition of artists of the Southwest in San Diego.

San Diego Union, May 2, 1914, 12:1. Plea for western art at Fair entered; San Diego Exposition site should prove more inspiring than San Francisco; lasting effect great; if advertising alone were sought, futurist exhibit would do the trick, by Alice Klauber.

San Diego Union, May 3, 1914, 7:3-4. Exposition builders exchange signs concession contracts.

San Diego Union, May 4, 1914, 5:4-5. Children's Home rich blessing for unfortunate "little ones"; history traced.

San Diego Sun, May 6, 1914, 12:1. City votes \$1.5 million in water bonds to buy dam at Morena; harbor bonds for \$400,000 also insured by overwhelming vote.

San Diego Union, May 6, 1914, 1:8. Harbor and water bonds sweep city 6-1/2 to 1.

San Diego Union, May 7, 1914, 1:3. Committee on Industrial Arts and Expositions of the House of Representatives reported a bill setting aside a \$100,000 governmental appropriation for U.S. exhibit at the Panama-California Exposition; exhibit will showcase development, irrigation and other subjects interesting to the west and southwest.

San Diego Union, May 7, 1914, 9:1. E. P. Ripley, president of Santa Fe Railroad, speaks on how Santa Fe will handle crowds at Exposition.

E. P. Ripley, president of the Santa Fe Railway, and William Woodhead, president of the Association Advertising Clubs of America and owner of **Sunset Magazine**, were the guests of honor at the Ad Club meeting in the Panorama Roof Garden yesterday noon. A large number of representative businessmen were present as guests of the club and the attendance was probably the biggest the local men have ever had at a regular meeting.

Woodhead, in his talk, showed the growth of the Ad Club movement and explained what was being done by the various clubs in cities throughout the United States. He told of the work for honest, believable advertising that is being accomplished by the Associated Clubs, not so much from a moral standpoint, but from a standpoint of good business.

"The Associated Advertising Clubs," said Woodhead, "have a membership of over 11,000, and there is a club in practically every large city in the United States. The work done by these organizations, too, is along constructive lines, because the time for preaching has passed.

"A few weeks ago I was in Toronto and was astounded at the preparations that have been made by the Toronto Ad Club for taking care of the convention which is to be held in that city next month. When the time comes for opening, everything will be in readiness for what I believe will be one of the best conventions that we have ever had for this purpose. The Pacific coast expects to be well represented and I believe can accomplish a great deal. I am glad to know that the Ad Club of San Diego will send a representative

delegation and can assure you that great benefits will result from their meeting with the delegates of other clubs at Toronto.

“Besides delegates from the principal cities in the United States, there will be present at the convention twenty-five delegates from the Hawaiian Islands. There will also be forty delegates from England, as well as delegates from Australian, South America and South Africa. By your delegates meeting these men, as well as the other delegates from the United States and Canada, much good can be accomplished for San Diego and your Exposition. The publicity that can be got will be invaluable.”

Ripley made a decided hit with his talk, which was entirely impromptu. He told how he had been playing golf all morning and expected to leave in the afternoon and had been invited to the meeting with the understanding he was not to talk.

“I believe you will have a great many people here during Exposition year,” said Ripley. “Probably not so many as some have estimated. This morning a man asked me if we could handle 40,000 people a day and I asked him whether he thought you could take care of them. I believe we will be able to handle the crowds all right.”

Ripley emphasized the importance of advertising our Exposition, letting people in the east know what we had here. His talk was interspersed with several stories.

(The balance of the article discusses the Ad Club Joy Festival to be held at Wonderland, the Pacific Coast Division annual meetings, and routine business.)

San Diego Union, May 8, 1914, 8:5-6. Educated Indian embarrasses interviewer; six braves from San Ildefonso Pueblo arrive at Exposition grounds.

The first installment of “exhibits” for the Panama-California Exposition arrived yesterday in the form of six stalwart braves from the Ildefonso Pueblo, twenty-five miles north of Santa Fe on the Rio Grande. They are the advance guard of the Santa Fe Railway’s tribes that will inhabit the “Painted Desert” near the north entrance to the grounds.

The Indians are not here entirely as exhibits. They have work ahead of them. For the last ten days the preliminary work on the reservation has been in progress, and now it devolves on the redmen to mix the adobe and plaster it over the frameworks of their dwellings and the long adobe wall which will surround the “desert.”

The Indians are headed by a peaceful looking brave who wears among other garments a gorgeous beaded vest. His hair is worn in two long braids on the tips of which are fastened strips of fur. He is an exhibit in himself. His name is Julian Martinez, according to the spokesman, Florentino Martinez, who identified the others as Crescentio Martinez, Juan Cruz Rival, Alfonso Rival, and Donetius Sanchez.

An interviewer approached Florentino and began his conversation in his best Indian.

“What ‘em name?,” he queried.

Florentino answered with grunts, and the interviewer set down the names in order. The last name he misspelled. Florentino looked at the slip of paper impatiently.

“Oh, no,” he said, “that name is spelled S-A-N-C-H-E-Z.”

It developed that Florentino had been in school for many years and had an education considerably above the average.

The Indians will live in the tents erected just inside the reservation, but will be kept at work most of the time, according to Jesse Nusbaum, the Santa Fe agent in charge of them. Nusbaum started the entertainment by

taking Sanchez for a ride on the rumble sea of his motorcycle. Sanchez was duly impressed and talked so much about it that all the other braves want to ride instead of working on the "desert." Another detachment of Indians will be brought in a short time and in the autumn the women and children will join their lords and masters.

Park Commissioners Minutes, May 9, 1914. 28th Street to be graded between Palm and Redwood Streets under supervision of Park Superintendent.

San Diego Sun, May 9, 1914, 9:8. Collier has again assumed leadership of the firm of D. C. Collier & Company; has begun a campaign to put on market large holdings in Imperial Valley; offering for sale at low prices property in Point Loma and Alta Terrace subdivisions.

May 13, 1914. Panama-California Exposition Papers, San Diego Public Library.

To The Board of Park Commissioners of the City of San Diego

Claim of Piccirilli Brothers (Ferruccio, Attilio, Furio, Thomas, Horace and Getulio) for principal and interest and price of materials used in erection and construction of Fine Arts Building.

Claimants employed by Tracy Brick and Art Stone Company, Incorporated of San Diego.

Amount claimed \$3,250/ became due March 11, 1914 for

all models on east and west gates and 2 interior balconies for the Fine Arts Building

materials furnished and delivered between February 18 and March 11, 1914

Work prosecuted under the jurisdiction and supervision of Commission for Fine Arts Building under a contract awarded by said Park Board to Brown & DeCew Construction Company.

That the materials furnished and supplied as aforesaid by these claimants were part of the materials required to be furnished by a contract entered into between Brown & DeCew and said Tracy Brick and Art Stone Company, and that said materials were part of the materials required to be furnished by the contract awarded the Park Board for the Fine Arts Building to Wurster Construction Company

Sworn to by Getulio Piccirilli, 13th day May, 1914.

San Diego Sun, May 13, 1914, 8:1. Park Commission prepares to go ahead to build stadium for \$140,000; plans revised; will seat 27,000 instead of 50,000.

San Diego Union, May 14, 1914, 5:1. New Mexico plans to dedicate building; commissioners and boosters will celebrate structure's completion in July; first of state group; counties throughout rich mineral state raise money for exhibits.

Park Commissioners Minutes, May 15, 1914. Plans of Quayle Brothers & Cressey, architects, and Rhodes, engineer, to excavate, grade and build the Stadium accepted.

San Diego Union, May 15, 1914, 3:5. Exposition offers vote of thanks; Montanans appreciate proposed \$50,000 donation from former Senator W. A. Clark.

U.S. Congress, Committee on Industrial Arts and Expositions, An Outdoor Exhibit Pertaining to Irrigation and Reclamation at the Panama-California Exposition in San Diego, Cal., Report no. 691, 63rd Cong., 2nd sess., 20 May 1914 (Washington, D.C.: GPO, 1915), 1-2.

San Diego Sun, May 21, 1914, 2:4. City Council unanimous in favor of granting restaurant liquor license to the Exposition Company.

San Diego Union, May 21, 1914, 1:1. Council voted unanimously to allow sale of liquor in Exposition restaurant; Company will be held responsible to see that concessionaires observe City ordinance.

San Diego Union, May 21, 1914, II, 10:5. Exhibits for fair can enter United States free of duty; attaches will be admitted under bond per Immigration Department; Russian and Japanese products to appear in Foreign Arts Building.

San Diego Union, May 22, 1914, 8:3. Three-day choral festival in May, 1915 in Greek Theater donated by J. D. Spreckels is plan.

San Diego Sun, May 25, 1914, 1:5-6. Exposition expected to be finished November 11; at that time 600 passenger agents will be here to inspect.

San Diego Sun, May 25, 1914, 3:1-3. Work begun on Panama-Canal Extravaganza; created by Charles A. de Lisle-Holland; after Exposition the extravaganza will be taken apart and sent by way of the Panama Canal to Coney Island.

San Diego Union, May 26, 1914, 8:2-3. Order of Panama plans patriotic celebration July 2 - 4.

San Diego Union, May 26, 1914, II, 9:1. Playground Board reports shows results.

San Diego Union, May 26, 1914, II, 9:2-3. Collier tells Chicagoans glories of Fair and railway plans.

May 27, 1914, Letter, Carleton M. Winslow to Board of Park Commissioners.

Gentlemen:

Under date of May 20th I have received a letter from Mr. Goodhue in which he says as follows:

“On December 20th of last year we received a telegram from you as follows:

‘Answering your night letter of the 18th, we have obtained approval of Park and Board for you application for \$5,000 for chapel and \$3,000 for stairway decorations. Confirmation in writing will follow.’

No such confirmation has ever been received so won't you please have an official confirmation signed and sent to me.

I ask this because I have already begun buying certain items and have lines out for many more. The other day I succeeded in picking up at auction there two altar candlesticks and a cross, absolutely genuine antiques, and very beautiful in the Spanish sort of fashion. These I am having re-gilt and re-antiqued, and they will be sent out either when finished or when wanted.

I have also ordered from Benoliel in Gibraltar an old Spanish bell big enough for the turret at a cost of \$75.00, not including freight, which will add, of course, quite a little bit more, but which is certainly better than the cracked mission bell I saw at Albuquerque, for which they wanted something like \$600.”

Your letter to me, dated 14th March, 1914 is practically a confirmation of this appropriation of \$8,000, but may I request you to confirm the telegram of 20th December, 1913, either to Mr. Goodhue or myself?

Yours very truly,

(Signed) Carleton M. Winslow.

Park Commissioners Minutes, May 29, 1914. C. L. Hyde awarded contract for excavating and F. O. Engstrum Co. contract for general construction of Stadium. . . . Secretary instructed to send Mr. Winslow a confirmation of action of the Board, December 19, 1913, whereby an additional \$8,000 was appropriated for the Fine Arts Building.

San Diego Sun, May 29, 1914, 7:4. Collier has invaded the Windy City to let railway circles know something about the Southwestern Pacific Railway of which he is president; issue of **Chicago Tribune** contains an interview with the colonel, tell what he intends to do; Chicago railroad officials are skeptical.

San Diego Union, May 29, 1914, II, 9:2-3. Former Senator Clark will greet Montanans at San Diego Fair; expected here when state building dedication takes place; letter received.

San Diego Sun, May 30, 1914, 9:5. Fight for park edge property: When the employees of the Park Commission started work on the property at 12th Street and the park early today, they were met with armed resistance from two watchmen and a Mrs. Curow, daughter of Mrs. S. A. Blanchard. Both the park and Mrs. Blanchard claim the property on which the men went to work.

San Diego Union, May 30, 1914, 8:2. Kettner's measure for irrigation display at San Diego meets approval.

San Diego Union, May 30, 1914, 16:2. Stadium contract awarded two bidders; improvement to Balboa Park to cost San Diego, \$102,594.00.

San Diego Union, May 31, 1914, 2:1. Exposition buildings nearing completion; pictures of Southern California Counties Building and patio of Arts and Crafts Building.

San Diego Union, May 31, 1914, 8:2-4. Balboa Park stadium plans complete.

San Diego Union, May 31, 1914, V, 2:1-3. Dream City assuming reality at Exposition grounds.

San Diego Sun, June 2, 1914, 6:1-2. Women's Headquarters at Exposition Urged: A committee composed of Miss Gertrude Gilbert, president of the Amphion Club, Miss Alice Klauber, Mrs. R. C. Allen, Mrs. Frost, president of the San Diego Club, Miss Longenecker, Mrs. Carl Owen, president of the County Federation of Women's Clubs, and Miss Lawson of the Wednesday Club met yesterday with the Board of Supervisors to discuss the creation of headquarters for women at the Exposition grounds; telegram sent to Collier asking him to present subject of San Diego Exposition at the biennial convention of club women in Chicago in June.

San Diego Union, June 2, 1914, II, 9:1. Growth of pueblo wins approval of bucks; six full-blooded Indians from San Ildefonso watch Exposition construction; females will follow.

San Diego Sun, June 3, 1914, 2:7. Collier telegraphed Board of Supervisors that his plans probably will take him out of Chicago before June 9 when the convention of women's clubs starts.

San Diego Sun, June 4, 1914, 10:1. Board of Supervisors postpone decision on plan to establish headquarters for women on Exposition grounds; idea of a separate building for use of women not popular with all at the meeting.

San Diego Sun, June 6, 1914, 1:1. Beauty of Fair Evident: finishing touches being put upon Panama-California Exposition, almost fairyland; merchants of Japan and Russia are among the largest making reservations in the Foreign Arts Building; Japanese exhibits will show weaving and embroidery of rare silk costumes, the hammering of bronzes, and the carving of wood and ivory; Madame Vera de Blumenthal will show what peasant women of Russia do.

San Diego Union, June 6, 1914, II, 9:1. Council ratifies stadium contract; protests filed against accepting bid of Los Angeles firm.

San Diego Union, June 7, 1914, II, 1:2-4. Lestor Comedy Company of Universal Motion Picture Corporation took movie comedy on Exposition grounds entitled "Maggie's Honest Lover."

San Diego Herald, June 11, 1914, 8:1. Exposition Notes.

San Diego Union, June 11, 1914, 2:1. Aztec sculptures duplicated for Exposition.

Park Commissioners Minutes, June 12, 1914. Mr. Carleton M. Winslow presented preliminary plans for the improvement of the Plaza at the southwest section of Balboa Park.

San Diego Union, June 12, 1914, 1:3-4, 2:3-4. Colonel Collier's railway files incorporation papers; new president declares actual construction will begin within year.

San Diego Union, June 13, 1914, 3:2-3. Traffic men of Gould railway turn ardent boosters of San Diego Fair.

San Diego Union, June 14, 1914, 8:2-3. Romance and tragedy of Mormon history to be shown on Isthmus at San Diego Exposition.

San Diego Union, June 14, 1914, II, 1:2-5, 2:1. Landscape gardening in park wonderful; barren land now blossoms like rose of Sharon.

Because the landscape gardening of the Exposition grounds has been so widely advertised, many San Diegans lose sight that this wonderful work, in point of area, is but a small part of the vast system of improvements gradually being brought to completion in Balboa Park. The Exposition grounds cover 450 acres. Balboa Park covers 1400 acres. It is the largest park in the country in the heart of a city, and under the master hand of Superintendent J. P. Morley it is rapidly becoming one of the most beautiful.

In considering the development of San Diego's great park, which, with the growth and commercialization of the city, will be far more appreciated as a haven of rest and fragrance than it is now, it is impossible not to begin with Morley. Anyone who knows what the park was two and a half years ago, and what it is today, will appreciate this. The present park commissioners certainly do so, and it is to their broad-minded sympathy and cooperation that Morley modestly attributes the brilliant results of his service.

Morley is the son of an English landscape expert, and has been in the same line of work all his life. Before coming to San Diego he was superintendent of parks at Los Angeles, where some of the finest landscape work that city boasts was accomplished during his incumbency.

When he came to San Diego there was not a lawn in Balboa Park. There are now thirty acres completed, all just as uniformly green and beautiful as those seen from Sixth Street, and equipped with the Hadden system of sprinklers, the finest that can be obtained.

One of the most recent and striking additions to the park is a rose garden which when completed will contain 6,300 rose bushes and fifty different varieties. Situated between the West Boulevard and Cabrillo Canyon, this garden, already one of the beauty spots of the park, viewed from the Exposition grounds and the mighty bridge over which the approach is made, will loom up like a cluster of gems. At the east end, as a background, a pergola 300 feet long will be built and draped in vines.

The efforts of the park workers are being concentrated at present on the improvement of the west side so as to enhance the view from the Exposition grounds. Contending with soil conditions so bad that every little hole has to be blasted and new soil and fertilizer put in, before shrubs can be placed, Morley is hurrying the main planting as fast as possible. The finer details, such as little gardens and perpetually flowering beds, will be put in later as soon as the background has progressed far enough to be seen in perspective.

Another big alteration that has been made with a view to the Exposition grounds is the clearing of all but a few small trees off a stretch of lawn opposite Olive and Palm Streets, that leaves a magnificent sweep from

Sixth Street of the fair buildings and Cabrillo Bridge. The trees, mostly large pines, were moved without a single loss and replanted with others of their kind, a fine forest effect being thus created.

Ground has been prepared for a whole mile of lawn, parking of Sixth Street, and the extension of lawns opposite that thoroughfare is going forward rapidly. In accord with this general scheme, the entrance at Sixth and Upas Streets will be gradually improved and made one of the most impressive entrances in the park.

Countless shrubs have been planted and many varieties of trees, and many thousands of feet of cobblestone drains have been installed.

One of the striking and costly improvements contemplated is a plaza to be situated on the knoll west of Fir Street and north of Date Street, which commands a magnificent view of the harbor, Point Loma and the ocean. Between \$30,000 and \$40,000, according to Morley, will be put into the construction, planting and general improvement of this site, which will become more than ever the favorite of nurses and mothers with their children.

Another big feature, appealing to the city's little one, will be the new aviary, to be started in August. It will be back of the present bird cage and will cover a space 50 feet by 110. In the canyon below will be a two-acre duck pond, in which a large assortment of water fowl will be kept.

Besides Balboa Park, Superintendent Morley has charge of the La Jolla, Mission Hill and Old Town parks, the plaza opposite the U. S. Grant Hotel, and sixty-five acres on Point Loma, where work has not yet begun.

A great deal of road improvement work has been completed, and the upkeep of the roads in their present fine condition is a large item of expense. Here are some of the items mentioned in Superintendent Morley's last report.

"During the last year the Pine Hill Road has been regraded and widened to a uniform width of 25 feet, with a planting strip and a walk along the easterly side. Culverts and drains have been placed at proper intervals and the grade of the road pitched toward the hill for the better safety of traffic.

"A cobblestone bridge has been built in Cabrillo Canyon at the foot of Pine Hill Road. In the canyon south of Pine Hill and the one north of Laurel Street, cobblestone gutters for the care of storm water have been built. The stone for the above work was taken from the park, which made the cost about one-half what it would have been if we had to purchase the stone.

"The installing of the water system in the park is one of the main items of expense. A large quantity of old leaky pipe has been taken out and new pipe laid, according to plans adopted two years ago.

"During the year 4,144 (?) trees of various kinds, 3, 519 (?) shrubs and 1500 (?) flowering plants and bulbs were planted. A large number of these were planted where others had been killed by the frost during the winter."

The present park commissioners are John F. Forward, Jr.; president, J. B. Pendleton, secretary; Carl J. Ferris and Charles T. Chandler.

San Diego Sun, June 15, 1914, 1:7-8. Davidson declares Exposition marks beginning of new era in city; is sure community will not suffer after Fair gates are closed.

San Diego Union, June 16, 1914, 2:3-4. Ground broken for Mormon panorama; series of paintings to depict history.

San Diego Sun, June 18, 1914, 1:1. Collier arrives in Los Angeles today; is enthusiastic about new railway.

San Diego Union, June 18, 1914, 9:2. Rotarian's Golden Wheel emblem costing \$1500 made to advertise San Diego's Exposition went to Houston, Texas convention; picture and names of men representing San Diego.

San Diego Union, June 19, 1914, 16:2-3. Women seek recognition at Exposition; promise big fight if denied recognition; building asked, rest rooms sought.

San Diego Sun, June 20, 1914, 3:7-8. Collier, president of Southwest Pacific Railway, offers to take lease of reclaimed lands from State Harbor Board; wants that part of harbor at National City as terminal point for railroad; Company agrees to pay interest and sinking funds on \$1.5 million bonds voted by people of California in 1909 for improvement of San Diego harbor; would come to about \$80,000 a year. . . . The bonds voted in 1909 are 15-year bonds. When they were not issued, the City of San Diego took over its part of the waterfront by an act of the Legislature and improved it with municipal bond money. The State Board is still in charge of the waterfront from National City line south.

San Diego Union, June 20, 1914, 3:2-3. Exposition teapot tempest subsides after explanation.

San Diego Union, June 20, 1914, 7:2. Park land fuss nears conclusion; Judge intimates he will decide against Mrs. Blanchard. . . . Although withholding his decision for several days, Judge Sloane yesterday intimated that he would rule in favor of the city and against Mrs. S. A. Blanchard in the contest over the ownership of a 15-foot strip of land on the north end of Mrs. Blanchard's lot at Twelfth and A Streets.

When contractors started grading this strip on Memorial Day, they were met by a determined woman with guns, and were held off until the arrival of the police. Immediately Mrs. Blanchard's attorneys obtained a temporary injunction.

City Attorney Cosgrove yesterday submitted numerous affidavits from engineers now and formerly in the employ of the city upholding the contention of the city that the 15-foot strip belongs in the park. Attorneys Andrews and Lee for the Blanchards raised the point that the park had never been formally dedicated for park purposes, but this contention was not considered seriously by the court.

Cosgrove also submitted copies of the deed under which Mrs. Blanchard acquired title to the land in 1881, showing that she was deeded a lot only 58 feet wide, instead of 74 feet wide, as claimed. He admitted that the Blanchards had fenced in the 74 feet and had used it for thirty-three years. Judge Sloane declared that he saw no merit in the application of the Blanchards for an injunction, but he allowed her attorneys three days in which to file authorities supporting their contention that the city is estopped from claiming the strip because of the length of time it has been occupied by the Blanchards.

San Diego Union, June 21, 1914, II, 1:1. Santa Fe railroad officials declare San Diego Fair peerless.

San Diego Union, June 21, 1914, II, 7:1-3. Glad-hand boosters praise San Diego and 1915 Exposition.

San Diego Union, June 21, 1914, II, 8:1-2. U.S. Marine Camp probably exhibit for San Diego Exposition.

San Diego Union, June 23, 1914, 3:1. Chief Martinez, first auto whirl; Santa Fe agent finds pueblo head apt pupil.

San Diego Union, June 23, 1914, 3:6. Ayr Ivy to cover Burns' cottage in park.

San Diego Sun, June 24, 1914, 1:2. Senator Works introduced a bill in the Senate today appropriating \$100,000 for a reclamation and irrigation exhibit at the Panama-California Exposition.

San Diego Union, June 25, 1914, 8:4. Ferris declares Exposition is wasting water and should do sprinkling at night.

San Diego Sun, June 26, 1914, 1:7. Collier files written offer; Harbor Board considers leasing proposition; to propose revaluation.

San Diego Union, June 28, 1914, 6:2-5. National Cash Register to build at 1915 Exposition.

San Diego Union, June 29, 1914, 1:7-8. Student assassinates Austrian heir; Archduke and duchess shot dead in street at Sarajevo after escaping bomb.

San Diego Union, July 1, 1914, 1:4, 3:1-3. Monster three-day festival to show San Diego's patriotism; celebration will begin Thursday a.m. with big historical pageant.

San Diego Herald, July 2, 1914, 4:2. EDITORIAL: Who Owns the Park? . . . The people residing east of the park are but a short distance from the exposition grounds, but will, unless there be a road through the park, have to travel miles to get to the grounds. So far the Park Commission has turned a deaf ear to the petitions for an outlet from the exposition to the east side of the park.

Park Commissioners Minutes, July 2, 1914. Superintendent instructed to have Engineer Rhodes survey and establish south line of Balboa Park. . . . Engineer Rhodes reported approximate cost of improving the Plaza in Balboa Park would be \$37,900 if done by contract or \$27,000 if done by Superintendent; report ordered filed.

San Diego Sun, July 2, 1914, 1:7-8. It was said that Colonel Collier has the matter of running for the House of Representatives in the Republican primary under consideration. What Kettner and Needham will do it Collier throws his large western hat into the ring was not known today.

San Diego Sun, July 3, 1914, 6:1-2. Buildings Nearing Completion Long Before Opening . . . To the north of the Prado is a large glass-roofed structure that will house some of the most wonderful plants in the world. The building is complete. Work on Santa Clara and Alameda Counties Building will start July 10. Montana, Utah and Washington State Buildings will start on or about July 20. Salt Lake Railroad Building will soon be underway. . . . A visitor observed, "Of all the spots in the world to hold an exposition, this is the greatest."

San Diego Union, July 3, 1914, 2:5. \$15,000 judgment given against Exposition; jury renders verdict in favor of injured laborer; case to be appealed.

San Diego Sun, July 4, 1914, 9:1-2. Clifford A. Williams, eastern manager of the Panama-California Exposition, on June 29, 1914, invited Federated Club Women, meeting in Chicago, to the San Diego Exposition.

San Diego Union, July 6, 1914, 7:1-2. Exposition work indicates early opening; Montana and Kansas buildings to be begun within few weeks.

San Diego Union, July 7, 1914, 3:2-4. Salt Lake Railroad to exhibit at Fair; building by Quayle Brothers and Cressey costing \$10,000; sketch of building.

San Diego Union, July 9, 1914, 3:4. New playground southeast corner of Balboa Park to be opened Saturday.

San Diego Union, July 9, 1914, 7:3. Marine Corps exhibit at Fair considered.

San Diego Union, July 11, 1914, 7:3. Exercises to open playground on Golden Hill.

San Diego Union, July 11, 1914, 7:6. Fine art exhibit received for Exposition; description of panels showing early history.

San Diego Evening Tribune, July 12, 1914, 4:2. Twelve panels, replicas of the Farnum group of bronzes in the Pan-American Union Building, will arrive for installation in the vestibule of the California Building next week; artifacts from Central and South America will arrive in a few weeks.

San Diego Union, July 12, 1914, 1:4. 2,000 boys and girls gambol and sing to dedicated new Golden Hill playground.

San Diego Union, July 12, 1914, II, 7:1. Auto race track considered for Exposition.

San Diego Union, July 13, 1914, 5:1. Fair invitations to be issued today; handsome four-color document will bid world welcome; half million printed.

San Diego Union, July 16, 1914, 1:5. Old Mission San Diego de Alcala to be restored to commemorate 145th anniversary of the raising of the cross in San Diego by Father Junipero Serra.

San Diego Union, July 16, 1914, 9:5. Steamships "Kroonland" and "Finland" to ply between New York and San Diego during Exposition; "Kroonland" started service through the canal on May 1; accommodations and rates of same.

Park Commissioners Minutes, July 17, 1914. Secretary instructed to advise Mr. Belcher that West Boulevard would not be closed at the intersection of Laurel Street during the Exposition year.

July 18, 1914, Letter, Carleton M. Winslow, San Diego, Calif., to Bertram G. Goodhue, New York City.

Dear Mr. Goodhue:

Concerning your fee for work upon the Fine Arts building, Panama-California Exposition, I brought up the subject as yesterday's regular meeting of the Park Board who put the matter in the hands of the Secretary, Mr. Pendleton, with directions for him to confer with me today, and report the matter back to the Board. We find conditions as follows:-

On November 10th of last year the Board paid over to the Exposition \$3,000.00, which presumably was paid over to you on the 12th of the same month, under claim #11,940.

Presumably this has not been paid as you sent in a bill on March 20th, 1914, to the Exposition for \$4,109.85 --- 4-1/2 percent on the contract price, \$91,330.00 on account.

Messrs. Brown and DeCew Construction Company at this time are being paid their bill in full. Including their extras, it amounts to \$97,184.33. This includes \$4,745.10 for work under the special appropriation to you of \$8,000.00 for Chapel fittings, etc., leaving a balance yet to be spent of \$3,254.90. Upon this basis the final cost of the building will be \$100,439.23, and your fee at the rate of 6 percent amounts to \$6,026.35 (Six Thousand Twenty Six Dollars and Thirty Five Cents.)

I would recommend that you make out this bill to the Exposition, mentioning the item of \$3,000.00, and that you send a copy of the bill and communication to the Park Board.

Very faithfully yours,

(Signed) Carleton M. Winslow.

San Diego Evening Tribune, July 23, 1914, 8:3. Colonel Collier instituted a suit for divorce in the Superior Court yesterday afternoon against Ella Copley Collier. On the preceding day, Mrs. Collier began an action for separate maintenance alleging desertion. In his suit Colonel Collier charges extreme mental cruelty against his wife. He alleges that during 14 of the 18 years of their union, Mrs. Collier made married life unbearable for him because of her alleged uncontrollable temper. In the divorce complaint, Mrs. Collier is accused of influencing the mind of their eldest son, David, aged 16, against his father. She is also accused of

charging her husband, before prominent citizens, with misuse of her money, thereby impairing her credit and injuring her financially. Mrs. Collier is accused of having threatened suicide with the use of chloroform. The following citizens to whom Mrs. Collier is alleged to have made derogatory statements against her husband are named in the complaint: Ralph Granger, Sam Ferry Smith, C. A. Richardson, George D. Easton, John F. Forward, Jr., William D. Rogers, G. Aubrey Davidson, and M. A. Graham.

San Diego Union, July 23, 1914, 1:3, 3:4. Exhibit spaces at Exposition grounds all taken.

Park Commissioners Minutes, July 24, 1914. Board given an additional \$7,500 by Exposition to spend on park improvement; plaza and slopes on 6th Street to be improved with funds. . . . Secretary reported that, according to bills already paid, the architect's fee due Mr. Goodhue was \$6,026.35.

San Diego Union, July 24, 1914, 2:2. New Mexico has 1915 flag ensign designed for Exposition; picture and description of same.

San Diego Evening Tribune, July 26, 1914, 1:1-2. Park Board upheld by court decision; right of Mrs. M. E. Blanchard to 14 feet of property in Balboa Park is denied; 12th Street is opened up to high school buildings; City Attorney Cosgrove wins victory.

San Diego Union, July 26, 1914, 6:1. Judge Sloane sustains Park Commission; denies Mrs. Blanchard's right to 14 feet of property; Cosgrove wins case.

San Diego Evening Tribune, July 27, 1914, 1:5-6. Judge W. R. Guy throws Collier's suit for divorce out in Superior Court; sustains demurrer to complaint interposed by Mrs. Collier and gives plaintiff ten days in which to file amended complaint; every count in first suit is overruled; no answer yet in suit for separate maintenance; Collier's charges are too vague.

San Diego Evening Tribune, July 29, 1914, 5:6. 300 three-year old saplings from Colombo arrive for Lipton Tea plantation.

Park Commissioners Minutes, July 31, 1914. Secretary instructed to draw a voucher for \$3,026.53 (?) in favor of Panama-California Exposition as balance in full to Bertram G. Goodhue for architectural fees on the Fine Arts Building.

San Diego Union, August 14, 1914, 6:1-2. Commissioners praise unusual features of San Diego Fair.

San Diego Union, August 16, 1914, II, 1:2-3. Model Farm visualizes soil tillers' dreams.

San Diego Evening Tribune, August 17, 1914, 2:1. The Father Horton committee of the Order of Panama selected Richard Zeitner to design a portrait bust of Alonzo Horton to be erected at a site in Balboa Park; to be paid for by popular subscription and to cost approximately \$6,000.

August 18, 1914, Report on the Panama-Canal [sic] Rose Contest

San Diego, Cal., August 8, 1914

To The Directors of the Panama-California Exposition, San Diego

Gentlemen: In April, 1911, your Company through its Mr. Herrick, then of the Publicity Department, asked the San Diego Floral Association to give its help in preparing rules and other details for a proposed contest for a new rose to be called "San Diego." Such contest to be known as "The Panama-California Exposition Rose Contest" and the prize offered by the Exposition Company to be One Thousand Dollars (\$1,000.00).

The Floral Association agreed to give assistance and it was arranged that the Exposition Company should do all the work of caring for the roses and pay all expenses incident to the Contest, and the Floral Association should formulate rules of contest, give publicity thereto as far as possible through its magazine, **California Garden**, and appoint judges.

In the May, 1911 issue of **California Garden** rules for the contest were published after they had been submitted to the Exposition Company and approved, and the following paragraphs were included:

"That it (the rose) be quite distinct from any existing variety." . . . "It must be distinctly understood that the Panama-California Exposition Directors reserve the right to withhold any reward if no entry shows pronounced merit and distinct individuality."

Several contestants entered (the list of names and other details are of record in the Exposition Nursery office) and from February to March the bushes arrived and were planted in a special fenced enclosure in the Exposition nursery grounds in Balboa Park.

The showing made in blooms in 1912-13 was disappointing and the contest was continued for a year. 1913-14 the results were even more discouraging and the judges through the Floral Association desire to report that nothing worthy of an award under the conditions of the contest has appeared.

The Floral Association, therefore, seeing no hope of any change, desires to acquaint the Exposition Company of this finding and to further state that in so doing it considers that its connection with the Panama-California Rose Contest comes to a close.

Respectfully,

A. D. Robinson, Pres.
G. T. Keene, Secr.

San Diego Union, August 19, 1914, II, 9:2-3. Exhibits to show wonders of industrial invention at San Diego Exposition.

San Diego Union, August 20, 1914, II, 9:2. Foreigners demand space at Exposition.

San Diego Union, August 23, 1914, 10:2. Apiary exhibit to be on view at Exposition.

San Diego Union, August 25, 1914, 8:3. "Climbing the Yelps" to offer queer sensations.

San Diego Union, August 27, 1914, 7:1. Dr. William Radar, editorial writer for the **Philadelphia Ledger**, comes to San Diego to write Exposition article.

Park Commissioners Minutes, August 28, 1914. Mrs. A. C. Griffith presented a personal bond for \$2,500 for the grading of 28th Street from Palm to Redwood Streets.

San Diego Union, August 30, 1914, 12:1. Foreign grains grown in Utah for 1915 Fair exhibit.

San Diego Union, September 1, 1914, II, 9:1. Charmed crowds view growth of San Diego Fair.

San Diego Union, September 2, 1914, 5:4. Interior of San Joaquin Valley Building will be decorated in grain; description.

San Diego Union, September 3, 1914, 7:1. Plans for Horton monument. . . . A committee of five members of the Order of Panama has undertaken to raise sufficient funds by popular subscription to erect a suitable monument to "Father" Horton, founder of the newer San Diego. The widow of "Father" Horton still lives in San Diego and is well pleased with the plan.

At the last meeting of the Order, the chairman of the Horton monument committee presented a report of progress.

"We already have some subscriptions to the fund," he said, "and our solicitations are bringing in more every day. We expect to raise at least six thousand dollars.

"We will ask the board of park commissioners to give us a suitable place in Balboa Park. We want a place that is high, overlooking San Diego Bay. Mrs. Horton has told us of one spot just beyond where Seventh Street runs into the park, where "Father" Horton used to climb in the old days at sunset to watch the sun go down beyond Point Loma. It would be the ideal site for the monument."

The committee has had certificates printed to exchange for subscriptions to the monument fund, and members are now placing books of the blank certificates in several downtown business houses where subscriptions will be received.

San Diego Union, September 4, 1914, 4:5. Wells-Fargo exhibit to depict development of the West.

San Diego Union, September 4, 1914, 4:6. Plans given for Hawaiian Village.

San Diego Union, September 6, 1914, 8:1. Harry Stewart walks 26,000 miles for four and one-half years in Africa, Europe and America advertising Exposition.

San Diego Union, September 7, 1914, 8:1-4. Exposition attendance smashes all records.

San Diego Union, September 7, 1914, II, 9:2-4. Miss Scripps spending \$50,000 to give La Jolla unique playground.

San Diego Union, September 8, 1914, 5:2. California bird life to be seen at Exposition.

San Diego Herald, September 10, 1914, 1:4. Oppose the machine; keep Boss Hardy out.

San Diego Union, September 10, 1914, 3:4-5. Workshops of world to open for San Diego Fair visitors.

San Diego Union, September 11, 1914, 7:1-2. Wells Fargo periodical gives Exposition publicity.

San Diego Union, September 12, 1914, 2:6. Last art stone placed on State Building at Fair.

San Diego Union, September 13, 1914, 8:1. Exposition Board favors plan to beautify city.

San Diego Union, September 13, 1914, 8:2-4. Panama Canal concession changes name.

San Diego Union, September 15, 1914, 3:4. Japanese secure third concession at Exposition.

San Diego Sun, September 16, 1914, 3:1. All declare that Exposition is a real beauty spot; pre-opening attendance increases daily; 697 paid admissions on Sunday, September 13.

San Diego Union, September 16, 1914, 14:2. Archaeological displays collected from Central and South America for Exposition.

San Diego Herald, September 17, 1914, 1:1-2. The people must act to recover their lands.

San Diego Evening Tribune, September 17, 1914, 7:1. Nevada will erect a state building at Exposition.

San Diego Union, September 17, 1914, 6:1. Exposition rounds into wonderful beauty.

Park Commissioners Minutes, September 18, 1914. Ten-acre park in southeast portion of the City named "Mountain View Park" . . . Carleton M. Winslow instructed to prepare plans for an aviary to cost \$1,500.

San Diego Sun, September 18, 1914, 9:1-2. Collier favors government railroad, but is against route: Col. D. C. Collier, president of the projected Southwestern Pacific Railway, was today shown a dispatch from the **Sun** correspondent, Gilson Gardner, in which the bill presented by Representative Bryan for the construction

by the government in Arizona and Utah of a railroad into the timber and coal lines to be tapped by Collier's projected road is discussed.

"We want to get that road into San Diego," Collier said, "and it doesn't matter who builds it. We are willing to present the government with our surveys and other assets costing nearly \$300,000, if Uncle Sam will build the system. The war in Europe has naturally interfered with our plans as we were arranging for foreign capital.

"The route suggested in the Bryan bill, however, from the Kaibab National Forest of Arizona to Marysville, Utah is impracticable and would not benefit the southwest. The government line should be built to connect with the Salt Lake at St. Thomas on the Santa Fe at Chloride. From there the line could be extended to San Diego, which is the logical point for it to run to."

San Diego Union, September 18, 1914, 5:1. Historic exhibits soon to reach Exposition.

San Diego Union, September 18, 1914, 5:4. Nevada Building at Exposition assured.

San Diego Union, September 20, 1914, 8:2. Uniforms chosen for Exposition bands. . . . The two uniforms which will be most in evidence at the Exposition and which will contribute largely to the prevailing color and atmosphere of Mission and Old Spain --- the guard uniform and the band uniform --- have both been officially accepted.

Each is a triumph of the costumers' art. The uniform of the musicians is of black velvet with gold trimmings, a yellow sash, and a broad sombrero, trimmed with silver. The uniform of the guards, which is copied from a Spanish court uniform, is a brilliant affair --- sky blue coat and trousers with gold buttons and yellow and crimson trimmings.

Costumes as shown will be worn by members of the Panama-California band, which will give concerts every day during the Fair. It will be directed by Peter J. Frank and under the management of J. M. Dodge.

A series of concerts has been arranged by which members of the musical organizations hope to pay for their uniforms. The first concert will be given Friday afternoon at the Spreckels Theater.

San Diego Union, September 20, 1914, II, 9:1. Open-air school planned at Exposition during 1915.

San Diego Union, September 20, 1914, Women's Section, 5:1. Publicity plans for Exposition.

San Diego Union, September 22, 1914. Three concessions to open Sunday at Exposition.

San Diego Union, September 23, 1914, 3:4. YMCA awarded space in the south balcony of the Varied Industries Building; to be used as a combination rest room, restaurant and writing room during 1915 . . . The Y.W.C.A also was granted space in the Science and Education Building for a rest room for the girls and women employed at the Fair. The YWCA will equip the room and furnish an attendant and the girls of the Exposition will be invited to make it their headquarters.

San Diego Union, September 23, 1914, 9:1. Exposition band made first appearance; musical program at Spreckels Theater; uniforms patterned after Spanish lieutenants' costume; pictures.

San Diego Union, September 24, 1914, 6:1. Concession space at the Exposition is all engaged.

Park Commissioners Minutes, September 25, 1914. Secretary instructed to notify Mr. Belcher that the Fine Arts Building was ready to be turned over to the Exposition.

San Diego Union, September 25, 1914, 2:3. Alameda County pleased with Exposition; will install \$25,000 exhibit.

San Diego Union, September 25, 1914, 14:1. Benches ordered from San Diego firm for Exposition.

San Diego Union, September 27, 1914, 1:2. Santa Fe says railroad is preparing for heavy traffic; 400,000 visitors predicted for Exposition.

San Diego Union, September 27, 1914, 5:2-5. Street car line opened to east Exposition entrance.

San Diego Union, September 27, 1914, Women's Section, 4:2-4. Hawaiian Village an Exposition feature.

San Diego Union, September 28, 1914, 8:2-5. Street car line opens to gate of Exposition.

San Diego Sun, September 29, 1914, 12:1. Governor Hiram Johnson to be guest of honor at a banquet in the rotunda of the California Building, October 2.

San Diego Union, September 29, 1914, 8:5-6. Ethnology exhibit for Exposition on way from Washington, DC.

San Diego Evening Tribune, September 30, 1914, 10:2, 16:3. Designed For Real Purpose; Exposition Aimed to Exploit Pacific Coast, Back Country and Boost Trade.

Those who have attended other expositions know full well that the prime purpose has been the booming of a small community, a single city. The purpose at San Diego is different and finer --- a purpose not of building up the community of San Diego, but of helping all California, all the southwest, all the west; indeed all the nation in its agricultural and industrial features. San Diego is the first port-of-call on the Pacific coast. Naturally, then, it should benefit tremendously from the operation of the Panama canal, whose opening this exposition celebrates. But more important than this is the result which the canal will have on the back country of the Pacific slope.

Today that country is barely tapped. The exposition has prepared exhaustive figures based on government and state reports and has found, for example, that in which might be called the country back of Southern California there are some 8,000,000 acres under cultivation today. Round about these 8,000,000 acres is a great deal of desert country, whose development it is very difficult to see, but there are also millions and millions of acres of country which is not particularly desert country but exactly like the 8,000,000 acres which have been reclaimed thus far, with similar soil and similar climate, and with water supply close at hand. It needs only the hand of man to make this section bloom as do the 8,000,000 acres. The government reports give the undeveloped and potentially arable farm land an area of 44,000,000 acres in this section of the southwest.

Now the 8,000,000 acres, also by government report, produce in a single year a revenue of \$148,000,000 from farm products along; there is nearly as much more in mineral products, but, excluding that possibility, just think of the agricultural future. There is no reason why the 44,000,000 acres should not produce as much proportionately as the 8,000,000 acres are producing today. In other words, there is an annual revenue of \$400,000,000 more which must be added to the present revenue of the southwest. Here at San Diego's back door is an empire in the making, today partly a promise, tomorrow a sure and complete reality!

When San Francisco followed San Diego by six months and chartered an exposition for 1915 and started plans for a great world's fair, such as those which had been built in Chicago and St. Louis, it became apparent that San Diego must create something new, something different, or else there would be a duplicated effort, wasted energy, and a certainty of bad feeling between the north and south of California. None of these results was desirable and it became necessary for San Diego to avoid them all. Hence there was created a new type of exposition, entirely different from that at San Francisco and, from the standpoint of the southern city, much more impressive in its permanent results. It aimed at the quick and sure development of the west. The west needs settlers more than anything else, and the question is how these settlers are to be brought here. Certain it is that the army in back of the land movement must be made up largely of city men, of tradesmen, of artisans, perhaps of small professional men. Now these people have the desire to go back to the land already. There is scarcely a man who has lived in the city for five years and become disgusted with soot and

deafened with noise and unnerved by the tension of the busy metropolis who does not feel the keen desire to get out of the smoke and bustle and get back to nature.

San Diego Evening Tribune, September 30, 1914. Greatest Novelty World Offers to Be Found Here January 1, 1915

The most novel, picturesque and education exposition ever erected, the Panama-California exposition at San Diego, will be opened to the world just three months hence, January 1, 1915. On this day occurs the formal opening of the Panama Canal, the completion of which is to be celebrated by the two expositions at San Francisco and San Diego. No other event has been marked by two celebrations of this sort, and no other event has been of such prime importance to the country which is celebrating. The striking feature of the expositions is that they are celebrations not alone of something which is completed and gone on, but rather of something which is ahead: they might be considered as heralding the mightier growth of the west through presenting to the world the opportunities the west offers.

Europe today is plunged in the greatest war of all time, and in 1915 will not receive the 500,000 American tourists who have gone there each year. Since these tourists cannot go to Europe, they are coming, beyond a doubt, to the west coast, and here they will see sights besides which those of Europe, and Asia, and Africa amount to little. No other country in the world has the majestic harmony of sea and canyons and mountains and forests and valleys beneath the clear blue sky of the American west.

It is more than a scenic tour. It is a voyage of discovery for the men of the east who know nothing of the opportunity that is awaiting them on the coast. They know vaguely that the canal will bring the west coast much nearer the older cities of the east and across the Atlantic. They do not realize that the hinterland of the west coast is going to be opened up to industry and commerce for the reason that the railroads from the coast will carry traffic from the east over the mountains, and from the back country out to the coast and back to the east again.

The great service of the expositions will be to bring people through the west country. It will be to show them what the west country offers in the way of agricultural development. That is the prime reason for the emphasis which the San Diego exposition is laying upon the agricultural features --- the most important agricultural exhibit which has ever been held. Visitors to the world's fairs of former years saw farming machinery standing idle in a great hall of machinery, and paid little attention to it because they could not understand it fully. At San Diego they will see this machinery, but it will be at work in a tract sown to various grains, moving up and down the rows, performing just the same services it is supposed to perform on the great farms of the west. Of such an exhibit they will have an understanding. They will look long and they will remain long. And these visitors to whom the operating of an 80 or 160-acre farm can mean little, will also see the model intensive farm down the Alameda, where on five acres of land is grown as much as on four or five times as much space under old conditions. The effort is to show that new ideas have come about, and that today, by scientific methods, the farmer can support himself and his family easily, and lay aside a considerable surplus annually from one of these small tracts.

It is a lesson of tremendous importance to the city man who has had little success and wants to leave the city, but does not know how to get back to the land. Mighty things have been done in the west in recent years, but there are still mightier things to be done, because the resources of the great west are hardly tapped as yet.

Similar in spirit as showing old things in new form is the display of the southern counties, whose citrus orchard lies along the Alameda, directly across from the model intensive farm. Instead of seeing a great stack of oranges and lemons and grapefruit, the visitor will see the citrus fruit growing on the trees. He will be able to smell the fragrance of the blooms. He will discover that the orange really grows on a tree instead of growing in the crate in which he has always seen it in the fruit displays back east.

Adjoining this citrus orchard is the tea plantation, which has been brought to San Diego from Ceylon.. The 200 tea plants are in charge of a Singalese nurserymen, and throughout 1915 the natives will cultivate the trees and strip from them the commercial tea leaves, turning them over to the girls who will cure them and prepare them for serving to visitors in the pavilion at the center of the plantation. The progress made in two months during which they have been growing in San Diego, indicates that Sir Thomas Lipton's experiment

has been successful and that tea of good commercial value can be grown in the southwest. There are distinct possibilities for a great American industry in the future.

San Diego Evening Tribune, September 30, 1914. Atmosphere of Old Spain Envelops Visitors in Grounds of 1915 Fair.

The Spanish atmosphere at the Panama-California exposition is so striking that it cannot possibly be missed. Every building on the grounds is Spanish-Colonial, even the great Puente Cabrillo, which forms the west entrance, looks as though it has been transported from some ancient Spanish city. Even the large gardens and quiet patios are Spanish. The gardeners (?) and attendants are caballeros and conquistadors, the dancing girls are Spanish, the carnivals and other special events of 1915 are made up from the carnivals of Spanish-America of the old days. It needs little imagination to think that in walking through the gates of the exposition one has left behind him the turmoil and rush of a modern American city, and has stepped back three or four centuries into a city of Old Spain.

There is a wealth of romance in history of that sort and once we study the history of Southern California, we see that the finest traditions, the rarest poetry and beauty are in recollections of the old Spanish civilization. It was the realization of that beauty, almost forgotten, which impelled the San Diego Exposition to choose a certain beautiful and harmonious type for its buildings, not the old conventional Greek and Roman temples such as expositions of the past had built, but quaint Spanish missions and cathedrals and palaces in perfect accord with the gorgeous beauty of the mighty landscape one sees from the mesa where the Exposition Beautiful stands. There are no forbidding walls, nor entrances so vast as to overwhelm the visitor, but a calm sweet beauty which spreads over all, everything purely Spanish and purely delightful.

You walk or ride up the slope from the waterfront, burst through the border of trees along Balboa park, and come out at the end of a quarter-mile bridge whose seven white arches rise from a pool 135-feet below in the canyon. High up among the piers rises the slim Italian cypresses, so tall and graceful that they accentuate the height of the great Puente Cabrillo. A little distance from the bridge begins the jungle of palm and eucalyptus and acacia, a gorgeous color scheme of green with occasional flashes of brilliant crimson and the gold of the Spanish broom and the California poppy. You walk the length of the bridge, passing a trellis of roses and come to a somber memorial arch, whose cartouche has been chipped and worn so that it looks as though it might have stood there for centuries. You pass through the arch and, as though some magic wand had been waved, you leave behind the hum and rush and roar of a twentieth-century tidewater city and find yourself back in a city of Old Spain of two or three or four hundred years ago.

At one side, rising from a succession of broad stone steps stands a gorgeous old Spanish cathedral, with a wondrously intricate frontispiece, with a great tiled dome of curious design, and a lofty tower. Across the little plaza, connected on both sides by a tiled cloister, is a quiet mission of the California type with plain Spanish arches, with rough-hewn beams forming its ceiling, and projecting from the adobe walls, within it a little shrine, such as those in all the old missions along El Camino Real. You pass slowly from the Plaza and swing into the Prado, lined with acacia, with verdant lawn, and with a low ledge of poinsettia, gladiolas, and other blooming flowers, and then within the long cloister which on both sides of the Prado runs from the west gate through to the east. There are portals opening from the cloister and leading into cool patios which are in strong contrast to the bright sun of the Prado. The patios are filled with a gorgeous collection of California's finest trees and shrubs and blooming plants, with bright flowering vines clambering up the sides of the white walls, up to the belfries whose mission bells swing, up to the high domes and the quaint towers which look down into the shadows. Almost hidden by drooping shrubs is an occasional softly-murmuring fountain.

About the walls of the buildings nests a horde of pigeons, swooping down occasionally after grain tossed out to them by the gardeners. Broad lawns with vine-covered pergolas stretch down beyond the patios and out to the edge of the canyon, looking down to the sea a mile away, down to the strand of Coronado and Fort Rosecrans and out to the distant lands, half-hidden in the mist. Or one can look up the valleys across orchards of olive, orange and grape, or to the foothills of the snow-capped Sierras, or to the lower hills of old Mexico, scarcely twenty miles away.

This is the situation as it is. The atmosphere of an old Spanish city, such a city perhaps as Cabrillo and his bearded sailors dreamed of as they stood on the same site nearly 400 years ago and looked off toward the sea and looked forward many years to the futile hope of New Spain's glories.

The Spanish atmosphere has been carried out to the finest detail. The guards and attendants of the Exposition will be garbed as caballeros and conquistadors, and the dancing girls, who will move to the hum of the guitar and the click of the castanets, will be Spanish dancing girls in the bright costumes of Old Spain, in the dances which have been performed for hundreds of years in the plazas of Castile. It is all very quaint and very romantic and very beautiful. Down the Prado stretch the buildings, some of cathedral design, some of the old mission, some of the palace, and one or two bear a particularly strong touch of Moorish influence, but all are uniformly and quaintly Spanish.

Here then is the new type of exposition architecture, not altogether new, for it is rather a renaissance of the beautiful architecture which received such a glorious start in Mexico and Southern California, but new rather as used in exposition work. And just as novelty has been introduced in that, so has it been introduced in the style of exhibits and in the general purpose of the Exposition.

San Diego Evening Tribune, September 30, 1914. Santa Fe Holds Indian Exhibit; Great Concession Costing \$100,000 Head List of Entertainment Features.

No exposition is complete without its amusement concessions. At San Diego there is a great street 2500 feet long, having a frontage, consequently of nearly one mile, which today is practically entirely allotted. Applications from several hundred feet of space have been rejected because the managers of the exposition felt the attractions offered were old and were not worthy of an exposition which claims to have created new types in every department. The result is a street which San Diego fully believes to be the best amusement street which has been built. Several concessions are already operating.

Just within the north gate at San Diego at the head of the Isthmus lies the "Painted Desert" of the Santa Fe Railway, the most important Indian exhibit which has ever been staged. Starting out with an estimated cost of \$100,000, it is now likely the expenditure by the Santa Fe will considerably exceed that amount. The "Desert" is divided by a mesa running north and south. High in the rock, which covers this mesa, on the west slope are the habitations of the cliff dwellers. In the cactus-filled sands below them rise the habitations of the Navajos and other wandering tribes, with here and there a "hogan" or log house of the Navajos, set up and housing its red inhabitants. A shallow arroyo runs through this little village. On the east slope of the mesa is a great pueblo modeled after the ancient one at Taos. In that same section is a Zuni pueblo, and nearby lies a Hopi pueblo, with a row of small adobe houses of the Rio Grande tribesmen filling in the far side. The interior of the adobe houses is like that of the Governor's Palace at Santa Fe. There are trading posts, and corrals for horses and for sheep and goats and cattle. Almost in the center are two "kivas," one of the ancient variety entirely underground; the other of later date, in which the roof of the "kiva" is a few feet above the ground surface. There are outcroppings of rock through the sand and the rock is uniformly a close copy of the red sandstone with the occasional lurid colors which appear in the real Painted Desert of Arizona. The cactus and much of the rock and the cedar posts have been brought from New Mexico and Arizona.

A dozen or two of the red men have been at San Diego for two or three months building the pueblos and the adobe houses, and making sure that in the smallest details the vivid resemblance to real southwest Indian life is carried out.

On the desert all through the year, the red men will be weaving their rugs and blankets, shaping their pottery, and pounding out metal ornaments as they and their ancestors have done for centuries. Each night in the kivas will be performed the ceremonial rites of the various tribes represented on the desert.

Around the entire Painted Desert runs an adobe wall with an occasional gap which is filled with a stockade of cedar posts. The desert has already proved, even in its uncompleted condition, one of the most striking attractions on the grounds.

San Diego Evening Tribune, September 30, 1914, 10:8, 16:3. All Buildings Are Complete

For some time the main buildings of the exposition have been entirely complete, the taking down of the scaffolding from the lofty tower of the California state building marking the finishing touch on that structure. As one passes across Puente Cabrillo, he comes successively to the administration building, the California Building and the ethnology building, the last two forming a permanent group for a California museum; then the science and education, and arts and crafts buildings. Here the Prado widens into the Plaza de Panama, at the north end of which lies the imposing structure of the Sacramento building. At the lower end of the Plaza are grouped the structures of Kern and Tulare, Santa Clara and Alameda counties, that of the San Joaquin Valley, and the great \$100,000 music (organ) pavilion donated by John D. Spreckels. The Prado picks up again at the foreign and domestic arts and the home economy buildings, continuing on to the east, past the Botanical Building and the surrounding gardens, the foreign industries and commerce and industries buildings.

Almost at the east gate lies the Southern California counties building, beyond which is assembled the highly important agricultural exhibit, notably the citrus orchard and the model intensive farm. Across the way is a quiet path leading past the service buildings and the hospital, down along the Canyon Espagnol into the pepper grove. All of these buildings are complete. One passes up the Alameda and finds the fire station, the buildings of the International Harvester company, and the Standard Oil company completed; the tea plantation and the small pavilion of Sir Thomas Lipton complete, and work just started on other important outdoor exhibits. Going across the Calle Colon to the Isthmus, just skirting the Painted Desert, one walks along the amusement street and finds fifteen of the concessions all ready to open, and others in various stages of construction, most of them requiring only a few weeks work. On the lower plateau, the New Mexico building is complete, and those of Montana and Utah are practically ready to open, with work started on the Nevada and Kansas pavilions.

In view of the fact that the buildings still to be erected are mainly of a temporary character, the exposition might be considered as 90 percent ready to open, and this three months in advance of the opening New Year's Eve date.

The ground occupies a total space of 614 acres, although the exposition has also improved the grounds across the canyon, which more properly are considered as a section of the 1400-acre Balboa Park. In reality, a considerable part of this extra acreage can be considered as exposition property.

The exposition will open not only on time, but also without owing one cent. When it is considered that the City of San Diego had 35,000 people when the exposition was chartered, the feat becomes the more extraordinary. The population has nearly trebled since that time. It was San Diego that first chartered its 1915 exposition, but instead of building a world's fair which should compete with that at the northern city San Diego set about to create new ideas and to show features which San Francisco could not have by reason of the climate. To furnish additional variety, such foreign exhibits as were sought by San Diego were industrial rather than governmental. The Japanese exhibit, for example, divided between the foreign arts building, the Kyosen Kai and the small Japanese theater, is of a type different from any Japanese exhibition which has been made before. In the foreign arts building, instead of simply showing the products of Japanese craftsmen, the craftsmen themselves will be present embroidering the silken garments, carving their woods and ivories, weaving hemp, and thus demonstrating graphically exactly how the best products of Japan are made. The Russian and Italian exhibits are along similar lines.

San Diego Sun, September 30, 1914, 1:1, 12:2. San Diego invites the world to Exposition (feature for "California Newspaper Day").

San Diego Sun, September 30, 1914, 11:1-8, 12:3. San Diego's Exposition was built to charm and educate folks (feature article).

San Diego Union, September 30, 1914, 2:4. Story of Missions will be told at Exposition.

San Diego Union, October 1, 1914. Newspaper Day Edition

2:1-8. San Diego's Exposition Dream Realized.

5:5-8. Fair prophetic of wondrous Southland's future.

San Diego Union, October 1, 1914, II, 9:1-3, 11:1-3. Mrs. Jesse C. Knox built rose garden on lower plateau.

Park Commissioners Minutes, October 2, 1914. Secretary instructed to put knoll on West Boulevard opposite the plaza in flowers instead of lawn, and to proceed with temporary improvements at the plaza in order that the same might have a finished appearance during 1915.

San Diego Examiner, October 2, 1914, 1:4. Plans made to restore old mission.

San Diego Examiner, October 2, 1914, 6:3. State accepts Fair Building.

San Diego Sun, October 2, 1914, 1:6-7, 2. Governor Johnson Accepts Fine State Structure: beautiful building praised at lunch given by Wurster Construction Co. . . . While the auditorium will be used for exhibits during the fair, the space can be cleared at the conclusion of the exposition and the spacious enclosure used as a convention hall with a seating capacity of 3,500. There are three balconies and, in addition to the auditorium, there are a number of other large rooms in the building. The doors to the edifice, which were swung open yesterday, are all hand-carved mahogany and were the work of months. They cost in the neighborhood of \$800.

Gov. Hiram Johnson, in the presence of about 70 exposition directors, citizens, contractors and skilled workmen, today at noon formally accepted on behalf of the people of the state the magnificent California state building, on the exposition grounds in Balboa park.

The acceptance of the handsome permanent structure by the executive occurred at the conclusion of an informal luncheon tendered by the Wurster Construction Co., the builders, and the building commission, composed of G. W. Marston, Thomas O'Hallaran and R. C. Allen, in the spacious auditorium of the office. Mr. Marston is absent in Europe, but Messrs. Wurster, O'Hallaran and Allen were hospitable hosts and looked well to the entertainment of the guests.

In the party were numerous newspapermen from San Francisco, Sacramento, Los Angeles and San Diego.

All Pleased

All present went into ecstasies over the architectural beauty of the building, which stands just across the Cabrillo bridge at the Laurel street entrance to the exposition grounds. Two hundred and fifty thousand dollars was invested in the structure, through state appropriation, and many compliments were paid the Wurster Construction Company for the masterly manner in which the plans have been carried to completion.

Work of Art

The exterior of the building, with its magnificent decorations, is a genuine work of art and the interior arrangements and decorations are fully as fine.

The tower, which can be ascended by a spiral staircase, is the highest point in the city of San Diego and can be seen for miles. The view from this tower is second to none in San Diego county and will be enjoyed by thousands of exposition visitors in 1915. The dome of the building is one of the most beautiful ever erected in the state.

For Conventions

While the auditorium will be used for exhibits during the fair, the space can be cleared at the conclusion of the exposition and the spacious enclosure used for a convention hall with a seating capacity of 2500. There are three balconies and in addition to this auditorium there are a number of other large rooms in this building.

The doors of the edifice, which were swung open yesterday, are all hand-carved mahogany and were the work of moths. They cost in the neighborhood of \$800.

The state also gave liberally to the San Francisco exposition, but the state buildings in the northern city are not of a permanent character, and the permanency of the San Diego structure has been a source of much gratification to Gov. Johnson.

Davidson Presides

President Davidson of the exposition company presided at the day's luncheon. Beside Gov. Johnson sat U.S. Senator John D. Works.

The governor and all the guests were greatly pleased by the California Building, but were loud in their praise of the entire exposition.

San Diego Union, October 2, 1914, 6:1. Travel expert predicts overflow crowds at Exposition.

San Diego Union, October 2, 1914, 14:1. Exhibits arriving for San Diego Exposition.

San Diego Union, October 3, 1914, 3:2-4. California Building completed and turned over to Exposition, October 2.

San Diego Union, October 4, 1914, 8:1. Archaeologists prepare display for Exposition.

San Diego Union, October 6, 1914, 7:1. Santa Fe brought six Navajo Indians from Gallup, New Mexico, to work on "Painted Desert."

Six Navajo Indians arrived in San Diego yesterday from Gallup, New Mexico. Chief Nuntah Viah heads the little band, which will help in the construction of the Navajo portion of the Painted Desert, the exhibit of the Santa Fe Railroad, which is now well underway at the grounds of the Panama-California Exposition.

Within a short time after their arrival, the Indians were busy building their "hogan." There are two varieties of these dwelling places. One is for summer use, while the other variety is for winter. The summer houses will be built of cottonwood and leaves and plenty of air spaces will be left for ventilation. The winter houses are more substantial as well as being more carefully built. They are of cedar and earth.

Supplies for the Indian houses were received several days ago. With the supplies also arrived old timbers, which have been used for years as water troughs in villages in New Mexico, Indian plows, old cartwheels and other articles which will be spread over the village to give it the proper atmosphere. The white plastered walls are being painted a mud color, which also helps to carry out the idea of a typical New Mexican village.

Work is being rushed, for it is hoped to have the village built and inhabited before the opening of the Fair. When completed there will be nearly fifty Indians in the village.

The Indians who arrived yesterday were clad in the picturesque Navajo costumes of many colors.

.

Another attendance record was broken at the Exposition Sunday, when, despite the threatening weather conditions, 1,030 persons paid their way through the gates.

Several of the completed concessions on the Isthmus were open for business. Work has commenced on many of the concessions and the street already has taken on the gaudy air of an exposition midway.

.

The "shachi," a mythological Japanese fish, which is considered the king of the sea and who fights devils and disease and affords protection when placed over doorways or on the roof of a building, arrived yesterday and will be placed over the tea garden.

This is a most important act, according to Japanese workmen. They say it would be impossible to induce Japanese maids to serve tea in the garden unless there posed one of the mystic shachi over the building.

One of the fish, which are made of plaster, will be placed over each corner of the structure, which is being erected close to the Botanical Building.

.

Gus Simon, a midget, who is considering a proposition to become a part of George M. Teall's "Midget City" at the Exposition was a visitor yesterday. Simon left for San Francisco, where he will confer with other midgets regarding accepting an engagement at the Exposition here.

Simon is three and one-half feet tall and is, because of his extreme height, considered almost out of the midget class. He was at the Boer Village at the St. Louis Exposition.

.

Sixty of the finest paintings of the late Donald Beauregard have just been suitably framed by a Chicago art firm and will be loaned to the New Mexico Exposition commission by Hon. Frank Springer for display in the great auditorium of the New Mexico building at the San Diego Exposition. It is to be doubted whether any state at any exposition ever made so fine a showing in the art work as will New Mexico, the newest of the states of the union.

Springer had arranged for the mural decorations of the auditorium and had commissioned Beauregard to depict the life and work of St. Francis, the New Mexico patron saint, in these mural paintings. Beauregard was stricken with fatal illness while engaged upon that work and died after he had partly completed two of the six great panels. These partly completed panels will also be placed in the auditorium as they illustrate the spirit with which the work had been undertaken.

It is likely that no other portion of the exhibit will be so much featured in magazines and newspapers as this evidence of New Mexico's art spirit, as manifested in the work of this lamented artist and the generosity of Springer.

San Diego Union, October 7, 1914, 3:1. Exposition takes steps to assist visitors in 1915. . . . Under direction of E. J. Chapin, head of the Panama-California Exposition traffic department, a general information bureau will be established at some point in the business district about December 15. The bureau will be free to visitors, but rooming houses will be charged a small fee.

A score of solicitors were sent through the city yesterday on a canvass of rooming and lodging houses. Proprietors of these places will be asked to name the prices of rooms, tell of the conveniences and location. Only those who agree not to raise the prices of their rooms during 1915 will receive the cooperation of the bureau.

The information bureau could have been let by the Exposition as a concession it was explained yesterday, but it was considered preferable to operate the bureau in connection with the Exposition. The bureau will not be conducted for profit but to cover the expenses of operation which will be about \$300 per month.

A map of the city showing lodging and rooming houses will be made for the benefit of tourists.

.

The Kansas building, work on which started a few days ago, has sprung up like a mushroom. The framework was almost completed yesterday. The building will be completed in twenty-one days, according to the contractor. It is located between the Nevada and the Alameda and Santa Clara structures.

The first shipment of benches recently ordered from the McCormick Lumber Company will be delivered today. Set side by side they would measure 8000 feet in length.

Paving has been discontinued for the present. The rain of Saturday interfered greatly with the plans of the contractor, who estimates that with good weather conditions, the paving inside the gates will be completed in thirty days..

Installation of ornamental lamp posts at the Laurel street entrance to the park was begun yesterday. These lights will extend from Laurel street over Cabrillo bridge and along the Prado. The standards are to be stained a bronze-green and will support pear-shaped globes. The globes are in transit and are expected within ten days.

San Diego Union, October 8, 1914, 3:5. Navajo women weaving rugs at Exposition.

Park Commissioners Minutes, October 9, 1914. Motion carried authorizing Superintendent to proceed with the proposed aviary, allowing \$2,500 for same. . . . Buffalo calf named Carlotta in honor of Commissioner Carl I. Ferris.

San Diego Examiner, October 9, 1914, 6:1-3. California Building is a notable achievement. . . . San Diego with its representatives, Thomas O'Hallaran, R. C. Allen and George W. Marston, commissioners for the great state of California, did not have to go outside San Diego to find a contractor to erect and bring to completion the magnificent California state building, the permanent structure which is forever to identify the spot of the Panama-California Exposition in this city.

The man and organization for the occasion were found in F. H. Wurster and the corporation of which he is the leading factor, the Wurster Construction Company of this city, which also comprises H. L. Mebius and John W. Gates.

Wurster and his company are not the only marvels in the matter of constructing buildings with expedition, solidity, according to specifications, and within the time-limit, but they are no less pronounced as important builders of the city of San Diego itself.

Contractor Wurster and his company have brought with them, as residents of this city, twenty-eight families of artisans of all kinds, all of whom are in the employ of the company, receiving the highest standard of wages and each, in its own way, contributing to the wealth and development of San Diego, under the exemplary leadership of their employers and friends.

Most of these artisans have been continuously in the employ of the Wurster Construction Company for eighteen years. They have continuously found employment on the structures on which the Wurster Construction Company has been engaged, the scene of the latest activity of a number of them being upon the California state building on the exposition grounds. The successful completion of this building and the whole-hearted manner in which it was accepted by the governor of the state of California caused Mr. Wurster to realize that this was the master accomplishment of a building record of marvelous achievements.

Friday last, when the building in question was being turned over, in behalf of the Wurster Construction Company to the state of California, there was not an auditor who did not interiorly admire the simplicity of the tender by the president of the company, the master-builder, and the modesty in the tremulousness of his voice as he exclaimed:

“I have turned over, completed, many private and public buildings, but in this instance I am particularly proud, for where is there a building that will stand the test of time and remain a permanent monument to the great state of California? Would not any man be proud to erect such a monument?”

Governor Johnson did justice to the structure and the builders. He proclaimed the pile a triumph of the architect Bertram G. Goodhue of New York, and the artisans, and that it was with a feeling of pride that he took part in its acceptance. Contractor Wurster was congratulated by builders everywhere because the latter knew his name would be inseparable from the fame of the structure in the memory of the thousands who are to make pilgrimages to it during the coming exposition.

The site of the California state building is an eminence overlooking the city of San Diego. The building is of stone and reinforced concrete throughout. It is indestructible by any of the elementary forces of nature. It has fronts 250 and 150 feet respectively, is two massive stories in height, with an imposing dome and a cloud-piercing spire, surmounted by a weather-vane, a representation in steel of Cabrillo's ship, seven feet in width and five feet high. This vane swings at a height of 250 feet above the earth. It commands not only an entrancing prospect of San Diego and adjoining counties, but also views of the distant main.

Exteriorly, the structure is imposingly ecclesiastical in treatment, due mainly to the Byzantine dome and cathedral belfry and spire. The walls are severely plain, though the entrance and belfry are indescribably rich and involved in tracery, in ornamented and concrete stone, by way of representing the carving and sculpture of Spanish structures centuries ago.

The dome, to a degree, also shares this richly ornate adornment and is, at the same time, emblazoned in tiles of white, blue, black and gold, as a foil to the somber tones of other parts of the structure. The facade is divided into shields, arches, niches, ovals and other architectural designs, in which there are either medallions, busts, or life-size representations of Cabrillo, Viscaino, Serra, Portola, Charles V, and Philip III of Spain, Ascencion and others involved in the early history of this country with Spaniards.

In the interior, there is a noble auditorium with galleries, as also a number of large rooms. These are to be used for public gatherings and the display of early historic treasures of Hispano-American history.

Contractor Wurster is known all over the country as well as in San Diego and California, for the reason that for twenty-five years he has been engaged in many states and on the heaviest kinds of undertakings. There is no line of structural work on which he has not operated. There is no contract so large as to deter him from undertaking it, neither is there any condition which will prevent him from bringing it to a successful conclusion.

His first big operations were in Buffalo, New York, where he started in business in 1889, and where later he constructed the entrance to the Midway, the Stadium, and the New England states building at the Pan-American exposition.

At the same time and place, there were a number of other structures under his direction, which represented a valuation of \$1,500,000.

In Wichita, Kas., Contractor Wurster later found a field for his active brain, experience and energy, and there also left the impress of his genius upon the structural achievements of that section.

The St. Louis exposition also testified to his skill and remarkable energy for the reason that he was credited with the construction of the Machinery hall, the Galveston Flood building, the North Pole concession and the Inside Inn. The importance of these structures made an impression on all who saw them and the size of the last mentioned may be imagined when it is stated that it contained 2,387 rooms.

Five hundred thousand dollars worth of work was done by the Wurster Construction company at the Lewis and Clark exposition at Portland, among which was the American inn, one of the greatest memories of the exposition.

The phenomenal activity of San Diego two years ago in the building line called for such men as the Wurster Construction company. Quarters were taken in the Spreckels building. The first achievement was the Coronado school building, a gem of its kind. Then followed a block of stores on Fifth between Elm and Fir streets. Then the Golden West Hotel was undertaken. It occupies a half block of reinforced concrete. Then came the Mission garage, one of the finest structures of the kind in the state. Then follows a procession of structures, among them the Hagan residence, the J. W. Sefton residence at Point Loma, the Post-Baily building at Seventh and Broadway, the Emporium block, the E. D. Rood and other buildings. The contracts handled here up to the present time aggregate more than a million dollars. This does not include the massive music pavilion on the exposition grounds to contain a great organ, both building and organ to be the gift of John D. Spreckels.

Mr. Wurster is remarkable for his mental acumen and physical activity and energy. He is a master of every feature of his business. His company employs the best mechanics and pays them the best of living wages. They are treated well and in return give the best that is in them. There is more work here for the Wurster Construction company and Contractor Wurster says his organization is ready for everything that may come along.

In the construction of the California Building, C. M. Winslow said that all the ideas of architect Goodhue were carried out to the letter and P. Tritch represented the state commission in seeing that all structural parts of the building were properly assembled.

San Diego Union, October 9, 1914, 3:2-3. Rose woman plans contest.

San Diego Union, October 10, 1914, 8:1. Confusion reigns as songs swamp Exposition.

San Diego Union, October 10, 1914, II, 9:2-3. Navy Department to maintain miniature Marine camp at Exposition.

San Diego Union, October 11, 1914, 9:1-2. "War of the Worlds" to be shown during San Diego Exposition; unique electrical exhibit.

San Diego Evening Tribune, October 12, 1914, 3:2-3. Landlords prepare for Fair visitors; Board of Health shows that city has over 23,000 rooms for lodging and housekeeping purposes, exclusive of family dwellings.

San Diego Union, October 12, 1914, 3:1. Admission record broken at Exposition.

San Diego Union, October 13, 1914, II, 9:1. Exposition points of interest to be renamed.

San Diego Union, October 16, 1914, II, 9:4. Society organized to protect Fair visitors. . . . Delegates from various San Diego welfare organizations, including religious, fraternal and club bodies, met last night at the San Diego Hotel to organize a local branch of the Travelers' Aid Society for the protection of young women, boys and girls who will visit San Diego during the Panama-California Exposition in 1915.

Orin C. Baker, general secretary of the national association, explained the conditions in the East and indicated what should be done in San Diego for the protection of the unwary against vicious persons who frequent national expositions. A resolution was unanimously adopted appointing a committee to organize the work in San Diego.

Dr. F. R. Burnham acted as temporary chairman and appointed the following persons who agreed to serve: George W. Marston, Dr. F. R. Burnham, G. Aubrey Davidson, Miss Ellen B. Scripps, Ernest White, Dr. Homer Oatman, Mrs. Philip Morse, Mrs. M. German, Judge W. R. Gay, Mrs. E. Verlacque, Dr. E. F. Hallenbeck, John Akerman, Mrs. D. C. Glidden, Rev. Lora Townsend, W. E. Greistwelt, Mrs. Thomas O'Hallaran, Mrs. Henry Foote, Dr. Charles Barnes, Milton MacRae, Patrick Martin, Mrs. E. S. Van Wagenen, Rabbi Montague Cohen, Mrs. M. Cohen, John Bacon, Mrs. Eva Bird Bosworth, Rev. H. B. Bard, G. N. Koeppel, J. P. Smith, Carl A. Johnson, John W. Snyder, I. Lezensky, C. I. Kirkland, S. C. Payson, Dr.

Louis Heilbron, Rev. Father Hefferman, E. I Hardy, Mrs. Florence McCoy, Mrs. Shelton Bissell, Mrs. Charles Spalding, J. P. Penfold, Mrs. E. H. Wallace, and J. R. Langleis.

J. P. Penfold read a communication from G. A. Davidson, president of the Panama-California Exposition, in which he pledged the support of the Exposition board to cooperate with the local branch of the Travelers' Aid Society in every way to protect the unattended visitors to San Diego during the Exposition year. The Y.W. C. A., which has taken care of this work in the past, will turn this portion of its activities over to the local branch.

The committee will meet in the blue room of the U. S. Grant Hotel this afternoon at 3 o'clock, when the details of the work will be planned.

San Diego Sun, October 17, 1914, 2:1. The Exposition band will give its first concert in full uniform tomorrow.

San Diego Union, October 27, 1914, 16:5. National Cash Register's \$10,000 Fair exhibit will include a movie theater.

San Diego Evening Tribune, October 28, 1914, 5:2. Auditor H. L. Moody wants 1915 Fair to pay for water; claims \$50,000 is due City.

San Diego Union, October 29, 1914, 3:2-5. President Davidson predicts two million visitors in 1915; Southland Ad Club adopts as slogan "See Your Exposition Now."

San Diego Evening Tribune, October 30, 1914, 1:6. Collier would meet Needham in debate . . . The **Evening Tribune** today is in receipt of the following telegram:

Santa Ana, Cal., October 30 --- The **Evening Tribune**, San Diego, Cal.

"I have denounced J. C. Needham in every county in this district as a carpet-bagger and a traitor to San Diego and its Exposition. His shifty and evasive statement in Monday morning's **Union** does not answer my charges. I hereby challenge him to meet me in joint debate next Monday evening in San Diego. I authorize L. J. Wilde to represent me and will consent to almost any conditions for the privilege of meeting him face to face before a San Diego audience. --- D. C. Collier."

Mr. Needham, when shown the above, stated: "I have received nothing from Col. Collier. When I do, it will have my prompt consideration. The issue between Col. Collier and myself is purely personal, largely a question of veracity, and I am not sure the people are particularly interested in personal issues in a congressional campaign. I would say, however, that I would be delighted to meet my opponent, Mr. Kettner, and discuss with him the issues of the campaign on Monday night, or at any other time, and our respective records in congress.

"I will say, however, that should I hear from Col. Collier, the contents of any communication will receive due and prompt attention."

San Diego Evening Tribune, October 30, 1914, 12:1. Merchants, bankers and other influential citizens have begun a campaign to induce the Union Pacific & Salt Lake Railways to "come in" with all the other roads and attach San Diego coupons to their 1915 California tickets.

San Diego Examiner, October 30, 1914, 1, 8. Congressman Kettner's Homecoming; Greeted at Oceanside and at San Diego; Parade up Broadway to Fifth Street; Order of Panama Part of Reception; Speeches in Majestic Theater at Third and C; Louis J. Wilde Presided. . . . The bombshell of the evening, and, indeed, of the campaign was exploded by Colonel Collier, who was never closer to his best. Collier, champion booster of San Diego, is not accustomed to the language of denunciation, but in roasting Needham he evidently found a congenial topic. Evidently he was stirred to the quick by a deep sense of indignation because, as he said, of the monumental gall of the main in coming from a district where he had just been repudiated to run for congress in this district, the chief city of which he had, as a member of congress, betrayed.

Collier briefly sketched the history of Needham's defection at the time when San Diego needed him most. Collier, as director-general of the Panama-California exposition, had gone to Washington in April, 1910, to secure federal recognition for the San Diego fair. After working for several days, he found that the fight between San Francisco and New Orleans was so close that unless San Diego gave her consent to a temporary truce, San Francisco's cause was lost.

Collier agreed that Senator Frank Flint and Congressman Sylvester Smith should cease their fight for San Diego and join hands with San Francisco in the fight against New Orleans, provided that when San Francisco had won its fight, the delegation supporting that city (of which Needham was a member) should rally to the support of San Diego.

This agreement was made on May 5, 1910, and Needham was a party to it. But when San Francisco has secured what it was after, the pledge given San Diego was repudiated. Collier then had to begin his fight anew. Congressman Smith had been stricken with a mortal illness and the only support Collier could secure in the house from this state was from Congressman John Raker of the First district and Congressman William Kent of the Second, one a Democrat and the other a Progressive, and each of them serving his first term in the house. From the rest of the California delegation, he received nothing but bitter hostility, and Needham, who had agreed to support the claims of San Diego, was one of the group that resisted the claims of San Diego.

Prior to joining in this hostile movement, Needham had told Collier that there was no use in trying to do anything for the San Diego fair; that he might as well pack his grip and go home.

In spite of all discouragement, Collier persevered, and finally, with the assistance of Raker and Kent, secured the approval of Oscar Underwood, leader of the majority in the lower house. Thus the house passed the bill granting San Diego federal recognition.

And when it came up for final passage, Needham voted for it!

"He had worked against it when San Diego needed help; but when San Diego no longer needed or desired his vote or influence, he had not the courage of his convictions, but voted for the bill," was the way Collier put it.

And then the bill went to the senate, and there was defeated mainly through the influence of Senator Elihu Root, guided and inspired by Julius Kahn, leader of the group of congressman in the lower house, of which Needham was a member; the group had already made Collier's path in Washington such a thorny one.

But this did not end Needham's antagonism to the bill, when, through the energy of Collier, it was again revived in the session of 1913. Needham had been defeated for reelection, "but," said Collier, "he was there with a lot of other lame ducks, trying to influence this or that bit of legislation this or that way. And I found him again, high in the counsels of the enemies of the bill to grant the San Diego exposition recognition.

"He was turned out by the voters of his own district, and then this hypocritical, double-faced, straddle-bug came down into San Diego county, into the city he had striven his best to injure, and asked for the Republican nomination

"And let it not be said when this expose of Needham's treachery to San Diego becomes public that it was any eleventh-hour drawback, put forth at the last moment, without due warning. I was in Washington last May when I heard that Needham was coming here for the express purpose of running for congress, and I wrote to Dr. Gochenauer, James McMullen and others prominent in the counsels of the Republican party, warning them that if Needham was to become a candidate I would tell everything of what he had done or tried to do against San Diego and the San Diego exposition. He became a candidate, and I kept my word.

"He seems to be of a migratory disposition. Let us give him a chance to move on --- but not to Washington. Let us give him a hint to betake himself to some other district where he can repeat the performance of running for congress two years from now."

Congressman Kettner's address was modest. He merely told of what he had done and what he believed he can still do for San Diego and his district. He told how he came to San Diego nearly thirty years ago; how he used to drive a mule team and how he once drove a street car on San Diego streets. He declared that his usefulness at Washington has just begun, and praised his wife for the assistance she had given him here and at Washington

San Diego Sun, October 30, 1914, 1:8. Collier challenges Needham to debate.

San Diego Union, October 30, 1914, 3:1. Exhibits pouring in for 1915 Exposition. . . . E. J. Chapin, traffic-manager for the Panama-California Exposition, was notified yesterday by the National Cash Register Company of Dayton, Ohio, that two carloads of cash registers will be shipped from New York, November 5, on the steamer J. L. Luckenbach to San Diego.

The Luckenbach will arrive in San Diego about November 27. She will come into the port for the first time and probably will make this port regularly thereafter.

The National Cash Register Company thus routed its goods that they might be delivered in San Diego by the first boat to be placed on the run by the Luckenbach Steamship Company.

The traffic department also announces that inquiries asking information as to San Diego's accommodations and prices are now coming regularly from all parts of the country.

Under the direction of this department, solicitors are working throughout the city, listing rooms and prices. It is thought that when special celebrations are held during the fair year that the downtown hotels and lodging houses will be taxed to the utmost and it is deemed advisable to arrange for all the rooms possible in the residential district.

The information bureau, to be opened between December 1 and December 15, will have a full list of the rooms of the city and the prices to be asked for them. The location of the bureau has not been decided as yet, but plans are progressing towards its establishment.

November will be the busiest month in the history of the construction of the Exposition, according to manager Chapin of the traffic department. Notices of exhibits on their way to San Diego are being received every day. During November tons of exhibits will be received and hundreds of workmen will be busy setting them up.

At other Expositions exhibits have been straggling in thirty days after the opening. It is believed that at the Panama-California Exposition, they will be here thirty days in advance.

A carload of tractor engines has been shipped from the Chicago factory of the International Harvester Company. As is now well known, the International Harvester Company will have the biggest single exhibit at the Exposition.

The tractor building was recently completed. Other shipments of agricultural implements will follow the shipment of engines it was announced.

San Diego Union, October 30, 1914, 7:2-4. Electric chairs, a Fair novelty.

San Diego Evening Tribune, October 31, 1914, 5:6. Union Pacific is ready to help Exposition; traffic manager declares system long ago decided to issue coupons for trip to San Diego next year.

San Diego Sun, October 31, 1914, 1:8. Collier rushes home to flay Needham, who refused to meet him. . . . "I am the man who is charging you with being a traitor to San Diego. I was the head of the exposition which you betrayed." . . . Needham replied to Collier's challenge that Collier was not a candidate for congress and that he would not meet him.

San Diego Union, October 31, 1914, 8:3. Army of employees rushing work at Fair grounds; Several buildings on Isthmus completed; new ones under construction; motordrome takes form; two hundred rare plants from Japan for tea room. . . . Workmen rushing to completion the different concessions, the Isthmus, the amusement street at the Panama-California Exposition, is one of the busiest places on the grounds.

Several structures have been completed and a number of one ones have been begun.

The plastering of three walls of the Panama Canal concession has been completed and the great building looms up as the largest underway on the avenue of fun. That it will be completed in thirty days is the prediction of the contractor.

Work was begun yesterday on "A Street in Panama," which will be located close to the Panama canal concession. This show will have a frontage of 100 feet. It will have overhanging balconies, street tables where food may be obtained and, in fact, all the atmosphere of a street in Panama.

The motion picture film factory and theater is under construction. At this place motion pictures will be made for the benefit of the public. The finished product will be shown on the screen.

"The Story of the Missions," the concession owned by T. B. Getz, was started several days ago. This show consists of a lecture room, and old-fashioned Spanish patio, and a theater where the story of the missions will be told by means of electrical effects.

The motordrome, on which construction was begun a few days ago, is rapidly assuming form. This concession is owned by Farmer Burns, well-known throughout the world of sport as a wrestler.

During 1915, Burns proposes to furnish thrills for the thousands of amusement seekers. A balcony, protected by a steel beam, is being constructed on top of the motordrome for the benefit of spectators.

The aquarium is practically completed. Yesterday salt water was brought from La Jolla for the tanks. It is expected that the fish will be placed soon and that the show will open for public inspection sometime before the opening of the fair.

Close to the Prado and near the Japanese Tea Gardens workmen are busy with the framework of the restaurant. Plastering will begin within two weeks.

Two hundred rare plants from Japan arrived yesterday. They will be placed about the Japanese tea room, the exterior of which is practically completed. The folo bridge was completed yesterday. The bring exercises a strange superstition in the lives of the Japanese. They believe that those who are able to negotiate its steep sides without falling are destined to have a long happy life. One workman remarked yesterday that anyone who crossed it safely was entitled to a long life.

The flowers and shrubs in the Japanese garden are growing nicely. Water was let into the tiny stream yesterday for the first time.

R. A. Denison of Oakland, for years Secretary of the Oakland Chamber of Commerce, was a visitor to the Exposition grounds yesterday.

Denison was highly pleased with all he saw and paid the publicity man some compliments for the way he is advertising not only San Diego and the Exposition, but all of California.

(The program for the Sunday afternoon concert of the Exposition Band in the Plaza de Panama follows.)

San Diego Evening Tribune, November 2, 1914, 1:2-3. Dan V. Nolan, chairman of the Republican County Committee sent a telegraph from El Centro, October 31, stating, "Collier's speeches hurt Kettner here more than Kettner's visit helped."

San Diego Evening Tribune, November 4, 1914, 1:8. William Kettner is reelected by a big majority.

San Diego Sun, November 4, 1914, 1:1-2. Kettner elected; state wet.

San Diego Sun, November 4, 1914, 6:3. Model Kitchen exhibit by Miss I. S. Pratt in Home Economy Building. . . . Exposition officials were pointing with pride today to the model kitchen exhibit being entered by Miss I. S. Pratt in the Home Economy building. Adjoining the kitchen, a model laundry will teach housewives just how clothes should be handled from washboard to clothesline.

Miss Pratt's wonderful exhibit throughout will show by practical example, just how hundreds of economies may be put into use in small households where the income is none too large to meet expenses.

The Home Economy building contains numerous exhibits of interest to women and will probably be the one building on the grounds where the attendance will be largely feminine.

Park Commissioners, Minutes, November 6, 1914. Golden Hill playground to be opened on Sunday mornings.

San Diego Evening Tribune, November 6, 1914, 9:1. Roland W. Reed's collection of photographs of North American Indians has been installed in the Arts and Crafts Building at the San Diego Exposition.

San Diego Sun, November 7, 1914, 7:2. Colonel Collier, who spent five years and a fortune making the San Diego Exposition what it is today, expects to leave for Washington, DC, soon on business connected with the Southwestern Pacific Railroad, but he declares he will return to San Diego in time for the Exposition opening on New Year's Day; Exposition officials will close gates to public, December 1.

San Diego Union, November 9, 1914, 9:1. Wonders of Fair Viewed by Film Starts; Hawaiian Troupe Charms Visitors to Magic City With Native Songs; Studio Near Completion; Construction Work Progressing Rapidly; Attendance Almost Reaches Record. . . . Attendance at the Exposition yesterday fell just short of the high record, paid admissions reaching 1952, or 26 less than the number reached three weeks before, when the Sunday band concerts were inaugurated. The west gate continues to break records, but there was a falling off at the south entrance.

The Exposition band gave a longer concert than usual, adding several selections after an intermission, but a special feature of the day was a brief program given by the Hawaiian troupe from "The Bird of Paradise," loaned for the occasion by Ben Giroux, manager of the company. The singers gave their selections just before the band concert, and brought the crowd galloping down the arcades to the cool corner of the Plaza de Panama in the shade of the Science and Education building, where the weekly concerts are given.

Once assembled the crowd remained about the Plaza until the close of the concert, then watched the feeding of the great flock of pigeons, and finally wandered about the lower plateau, along the Prado, and up the Isthmus, where there was more rapid construction work in progress.

Interested visitors during the day were several of the Keystone Film Company's stars, including Charlie Chaplin, "Fatty" Arbuckle and Miss Mabel Normand. They had joined Walter Brookins, the aviator, and Thomas Ince of Los Angeles, who came to the exposition to examine progress on the motion-picture studio half-way up the Isthmus, erected by the concession company Ince-Sennett-Brookins.

The studio is now about half completed, the work being done by H. P. Hoyt, the contractor who built several of the other important buildings. The preliminary inspection brought satisfactory remarks from the concessionaires as well as the actors, who are looking forward to spending a large part of 1915 at the Exposition.

The studio will be used for a good deal of the detail work in the films to be made next year, the audience having an opportunity to see movies in the making. In addition, some of the dramas will be staged on the grounds.

The intent is to use the regular motion picture actors from some of the Aztec and Toltec ceremonials, which will form an important part of the special events program through the year. It is thought the two enterprises may be worked together for the benefit of both. Brookins and Ince probably will be regular visitors to the Exposition as soon as the studio building is sufficiently far advanced to allow the installation work to proceed.

San Diego Union, November 9, 1914, 12:1. Marston family returns to San Diego; merchant relates experiences during four month's trip in Old World.

San Diego Sun, November 10, 1914, 7:3-4. George W. Marston given "Welcome Home" dinner at YMCA last evening.

San Diego Union, November 10, 1914, 2:4-5. Rain Brightens Floral Display at Exposition; Poinsettias of Unusual Size Spring into Bloom After Welcome Showers; Exhibits Being Installed; Tractor Engines for Harvester Company Demonstration Reach Grounds. . . . The rain of Sunday night and yesterday worked wonders on the vegetation of Balboa Park. Poinsettias in the canyon directly beneath the Administration Building were in bloom for the first time this season.

Because of the rains the poinsettias are much earlier in blooming than usual. The flowers are a beautiful red and much larger than in other seasons, according to gardeners.

Besides the marked good to the grounds, rain saved actual money in that artificial sprinkling will not be necessary for several days.

Notice of shipment of the Walter Baker Cocoa and Chocolate Company's exhibit was received yesterday. The exhibit left Boston a few days ago. It will be placed in the food products portion of the Varied Industries Building.

The Titan tractor engines, a part of the exhibit of the International Harvester Company, one 25 and the other 40 horsepower, were delivered at the grounds yesterday. The engines are being set up for field demonstration purposes in connection with the company's exhibit.

A portion of the Burroughs Adding Machine Company's exhibit also was received yesterday. This exhibit will be in the Commerce and Industries Building. The company will have a large space where workmen will be found setting up the machines during the life of the Exposition.

E. C. Phillips, of the Chicago Kenosha Hosiery Company, arrived yesterday to set up the machines which will manufacture hosiery in the Commerce and Industries Building.

San Diego Evening Tribune, November 11, 1914, 5:4. The Pacific Steamship Company will operate seven steamers between Seattle and California ports during the Exposition rush season next year.

San Diego Sun, November 11, 1914, 1:7-8. Divorce to Mrs. Collier; no opposition is made; interlocutory degrees granted on ground of desertion; agreement ends in filing of new complaint and hearing on this is soon over; Mrs. Collier and Mrs. Raum testify; Colonel Collier represented by counsel.

Collier to pay \$100 a month for the education of two sons, David Copley Collier, 16, and Ira Collier, 14; married on January 5, 1896; Mrs. Collier said Collier left her on August 10, 1913; She is sister of Congressman Copley of Illinois and a member of the Copley family of this city.

San Diego Evening Tribune, November 12, 1914, 2:4. The Washington State Building cost \$8,000. The exterior takes the form of an old California mission, but upon entering the observer will find the natural beauty of the state of Washington reproduced in detail. Decorations will be of native trees and foliage, interspersed with the bright fruits of the northland.

San Diego Herald, November 12, 1914, 1:1-2. Why the proposed charter should be defeated, by C. R. Miller.

San Diego Sun, November 13, 1914, 1:1-8. Details of plans for Exposition opening.

San Diego Evening Tribune, November 18, 1914, 12:1. Tulare County exhibit is here; citrus fruits, raisins, grapes, prunes; building cost Tulare and Kern Counties \$18,000.

San Diego Herald, November 19, 1914, 1:3-4. Exposition in readiness. . . . The cost of the Japanese exhibits at the Exposition is now estimated by S. Watanabe, who is in complete charge, at \$250,000; exhibits in Foreign and Domestic Arts Building, Tea Pavilion and on Isthmus where Japanese games and a small theater will be introduced.

San Diego Sun, November 19, 1914, 1:7. Horton fund in muddle; Hugo S. Grosser, who originated the idea of a Horton monument, left the city a few days ago and may have taken the funds; the Order of Panama may abandon project.

San Diego Sun, November 24, 1914, 7:7. U.S. Marines to move to Exposition grounds; officers inspect site today. . . . Despite the strenuous opposition of San Francisco, San Diego has won the honor of having regimental headquarters and four companies of marines at the grounds of the Panama-California Exposition.

It is probable that the orders received yesterday by Col. J. H. Pendleton will be made permanent and that a camp of marines will be stationed and headquarters made here permanently.

The many friend of Colonel Pendleton and his officers, as well as of the men of Camp Howard, will be glad to learn that the camp probably will become a fixture here. The orders which came yesterday are said to have been due to the tireless efforts of G. Aubrey Davidson, president of the Exposition.

During 1915 the men will be stationed at the Panama-California Exposition, although they will not do public duty as was announced some weeks ago. A camp is now being made ready for them on the brow of a hill just south of the state buildings. The site is almost ideal, according to the marines who are well pleased with their 1915 residence site.

Colonel Pendleton will soon announce the date of the removal of Camp Howard from North Island to the Exposition grounds. Officers and men of the marine camp seemed well pleased when it was announced that they were to remain in San Diego.

"We are looking forward to 1915 with anticipation of an enjoyable year, and possibly a much longer stay," remarked Colonel Pendleton.

San Diego Sun, November 26, 1914, 1:1-2, 2:4. Exposition will close its gates to public; all of December will be devoted to installing exhibits. . . . Colonel D. C. Collier, whose work for the Exposition will never be forgotten, will go east December 1, but has promised to return for the opening. His plan to leave the buildings intact for a university or for a Southern California fair each year, is becoming a popular one.

San Diego Sun, November 26, 1914, 1:1-2. El Centro-Yuma highway assured; Board of Control recommends appropriation of \$200,000 for state road.

San Diego Sun, November 26, 1914, 2:5. Article in this week's **Harper's Weekly** entitled "A Fair and A Big Idea"; purpose of agricultural features is to show what can be done by a scientific utilization of resources.

San Diego Union, November 26, 1914, 5:5. Utah Edifice Accepted Officially by State. . . . Lewis Telle Cannon of the firm of Cannon and Fetzer, architects for the Utah building at the Panama-California Exposition, yesterday accepted the building from contractor Hiram Hoyt, on behalf of the Utah state commission. Cannon is at the San Diego Hotel.

Cannon, who is on his first trip to Southern California, evidenced his pleasure in the excellence of the structure and predicts that Utah will have one of the best state exhibits at the Exposition.

“To a stranger who knows but little of Southern California, the Panama-California Exposition is simply beyond all expression. I wandered around the grounds yesterday as if in a dream. It is indeed a fairyland of flowers. The architecture breathes of the atmosphere of Old Spain. It is the most romantic environment in the country, I think.”

Cannon says he has definitely decided that San Diego is the proper winter residence and promises to pass at least a part of each winter here.

San Diego Union, November 26, 1914, 12:2. Scholars Pennies Buy Seeds; Balboa Park Poppyland Is Children’s Aim; San Diego Youngsters Contribute to Beautification Plans for Exposition Year. . . . Boys and girls of the San Diego schools will . . . have sown 140 pounds of poppy seeds in the park. The work was finished near the High school group of buildings yesterday when the last 40 pounds were sown.

Money for the purchase of the seeds was donated by the school children.

San Diego Union, November 26, 1914, 12:3-4. Exposition Task Completed Wizard Builder Tells Chief; Director of Works Frank P. Allen, Jr. Notifies Director-General H. O. Davis Construction Work Will Be Finished Next Saturday. . . . Frank P. Allen, Jr., director of works at the Panama-California Exposition, notified Director-General H. O. Davis yesterday that his work will be completed Saturday.

Contemplating the tremendous amount of work accomplished by Allen and his staff since the beginning of the Administration building in December, 1909 [sic], one’s amazement at the result is likely to give way to skepticism, finding expression in the one word “impossible.”

With an average working force of 700 men, Allen has erected the Fine Arts building, the Arts and Crafts, the Science and Education, Home Economy, Foreign and Domestic Arts, Botanical, Commerce and Industries and Administration buildings, the hospital and fire hall, besides an enormous amount of piping, planting and extra work he had been called upon to do.

The extra work includes the erection of the Sacramento building, the Café Cristobal, Alameda and Santa Clara buildings, International Harvester building, Lipton building, Kern and Tulare Counties building, police station, electric sub-station, entrances and the large area of paving which was a part of the original work outlined to him.

“Not a bare wall on the grounds and not a square foot of exposed ground which has not been planted,” is the way Allen told of his work on the 614 acres. In addition, he placed the network of pipes for purposes of irrigation which lie under the 614 acres.

The building of the Cabrillo bridge was one of the greatest tasks of this young Exposition builder. Its construction took many months, thousands of tons of cement, and \$150,000. It will stand for an indefinite time as a tribute to Allen’s skill as a builder.

Other extra work now under construction on the Isthmus, which was turned over to Allen as a last-minute rush job, are the Panama canal, Streets of Panama, Hawaiian Village and other smaller concessions. Buildings for the marine camp were erected under the supervision of Allen and have been completed.

“Finish your work by January 1, 1915.” This was practically the only order given Allen when he was made director of works in 1911. He has delivered fully a month ahead.

Just how he accomplished such a great deal in a short space of time is Allen’s own secret. When asked about it, he merely answers, “Organization, that’s all,” and seems to consider the conversation ended. He never seems to be in a hurry. In fact, he walks about the grounds much after the fashion of a tourist who has a week or a month to look about him. An order here and there, a motion of his hand, a few pointed instructions over the telephone and things begin to happen as if by magic. When a task looks too big for others, or the time for completion is drawing near, it is handed to Allen. He finishes it and seems ready for more. He erected the Sacramento building with a rush, suggesting that the higher the pressure, the calmer are his nerves and the more time he seems to have.

Allen’s work at the Exposition has been pronounced as “little short of wonderful” and that seems to express it to those no familiar with builders, men or materials.

The awnings or “marquesitas,” have been placed over the entrances to the Exposition. Those at the Laurel street entrance are particularly effective. They are red in color and lend a Spanish atmosphere to the entrance as soon as sighted. The Laurel street entrance is now practically complete.

San Diego Evening Tribune, November 27, 1914, 3:2. The carrying capacity of street cars, automobiles and other vehicles of San Diego County was severely taxed yesterday to accommodate the great throngs that gathered on the Panama-California exposition grounds to witness the wonderful Thanksgiving Day exhibition of Lincoln Beachey, the renowned aviator, for the benefit of the Belgians.

The paid admissions to the exposition grounds yesterday numbered 4,282 adults and 265 children. Thousands of people occupied vantage points outside the grounds.

During the performance, including graceful flying upside down, Beachey looped-the-loop no less than seven times. In bomb throwing from mid-air his aim was accurate and the good ship **Globe** was soon a mass of wreckage from the explosion of bombs manufactured at the flouring mills of that name.

Beachey announced that he will make flying in San Diego an annual Thanksgiving Day event.

San Diego Evening Tribune, November 28, 1914, 2:5. Last Exposition band concert takes place tomorrow afternoon. Directly after the concert the gates of the Exposition will be locked and the public will not be allowed in until the formal opening a month hence.

San Diego Union, November 29, 1914, 2:3. When the flash from the White House is registered in the Fair grounds, it will be the harbinger of a new era in San Diego. After that, pandemonium will be loose and echo itself amid the colonnades that Father Serra and Cabrillo dreamed of and that have since become an actuality on what only a few years since was an arid mesa crowning the city that grew around it.

San Diego Union, November 29, 1914, 4:4. City Clerk Allen H. Wright suggested using the California Building for a City Hall after the Exposition.

San Diego Union, November 29, 1914, 15:2. Article about Frank P. Allen, Jr., the man of built the Panama-California Exposition.

San Diego Evening Tribune, November 30, 1914, 6:1. Colonel Collier will be master-of-ceremonies for the opening of the Exposition; invites suggestions from all.

San Diego Union, November 30, 1914, 3:3. Crowds visit Fair for last peep before opening.

December, 1914, **The California Garden**, pp. 4-5. The Early Bird at the Exposition . . . I have been to the Exposition grounds in Balboa Park. My visit was official and my detail thus worded: "Go up there and give us a birds eye view of the planting." Of course, I realized that no other of the staff had the requisite optic; nevertheless, I had the support of other important officers.

An interested friend had pleaded, "Do go by the main entrance and note the effect of the red awnings on the administration building." This advice was followed and the red blinds were approved.

Perhaps, there had already been too much written about the Exposition, as there has been of everything else of a public nature, and now the opening is so close, folks ought not to waste time reading, but should go to the place and see for themselves.

Before I went I had read in a northern paper that the grounds were abloom with foliage and laughed, but it is true in a sense for the real effect of the planting is a picture in greens, and the actual flowers count for little where they are not almost intrusive.

That Cabrillo bridge is worth while whatever it cost and however it was built. The view from it both ways is disappointing. To the south the gas works and an awful straight line of a grade crossing somewhere this side of it are very dominating, and the canyon is too wide and too straight for the picturesque. On the other side, it is almost as uninteresting, but fortunately lacks the glaring offenses enumerated across the way. Here the whole scheme is so big that nothing but mass planting will have any effect, and it is certainly open to doubt whether any planting will be much more effective than the wild brush which gives at a distance a velvet appearance without hiding outlines. Of course, this refers to the aspect from the bridge. The view from the bottom of the bridge will be vastly superior.

These pre-exposition remarks, so to speak, I imagine are a reflection of the timidity felt at approaching the building with the red blinds, Never before had I used my reportorial office to run past a turnstile, and yet I was determined on principle not to pay that quarter. As it turned out there was no cause for alarm. An affable gentlemen with a sufficiently strong individuality to allow him to wear a thick beard I these strenuous safety razor days turned us over to a Mr. Gorton who proved to be a friend of an old friend, Mr. Sumner, and from that moment we were not only comfortable but having a good time. In fact, the trip through the grounds was an unadulterated pleasure, though there was an anxious moment when at a sudden turn we ran almost upon the donor of the great organ, but a hurried glance showed that he wore neither halo, horn, nor tail, but was respectfully listening to a lady who was opining that the race would lose the use of feet because of the automobile --- or was it the street car?

I knew more than I ever did and care less about the names of the shrubs and trees planted in the Exposition grounds, though I am assured that a system of plain labeling is being evolved, for the general effect and not the individual specimen is so distinctly the charm, and the informality or irregularity of the planting its main merit. The formal touches are the least artistic. The winding paths round velvet lawns, under pergolas covered with vines; the narrow deep trails in the cool of the buildings' walls; the unexpected everywhere; these are the things that count. Let the average citizen of San Diego take notice of the true effect of the irregular plantings, the trees that grow in the lawns as if birds had dropped the seed; a batch of our native *Rhus integrifolia* here, and some other unconsidered growth there; and then go home to his four-square cemented, standardized garden and ponder.

Plainly the guide has a special affection for Palm Canyon. He apologized for everything in it that was not a palm. Everyone to his taste, and doubtless many will share his enthusiasm, but frankly I was unimpressed. It is not to be mentioned in the same breath as Spanish Canyon, far the best of them all, because of its planting, the glaucous foliage of acacia and eucalyptus showing to great advantage, and because it has some mystery. It does not lay open to the eye at first glance; it turns corners, has a blessed irregularity; it is charming.

Another pet of our guide was the little patios set in the Science and Education building and here his preference was fully justified. They should be observed on a hot day when the eye seeks a cool, quiet spot to rest upon/

Another pleasing feature is the *cryptomeria* walk at the northeast corner of the lath house. Enter it from the north and see how it leads to the lawn and planting above it is right and that is a high compliment.

I have nothing to say about flowers. In fact, I only noticed the Baby Rambler roses in the garden of the Southern Counties building, and then to deplore their livid presence. The Exposition does not need flowers. Of itself it is bright and light, the sky is blue, but it wanted the greens of trees and shrubs and grass and it has them in the right places. I emphatically endorse the planting at the Exposition in San Diego. Of course, it is obviously done for Exposition purposes, being several times too thick for permanent work, but that was surely the thing to do. Whatever may be the attendance and the judgment of the stranger, San Diego should get much pleasure and profit from this undertaking so well carried out by a not over large community.

San Diego Evening Tribune, December 1, 1914, 1:5, 7:5-6. Final rush to install at Exposition is on.

San Diego Evening Tribune, December 1, 1914, 10:2. Thirteen elk are quartered now in the paddock at Balboa Park according to the Park Commission; the original two on the paddock were augmented by a consignment from the Button-Willow Ranch at Bakersfield.

San Diego Sun, December 1, 1914, 2:5. Article, "San Diego's Evolutionary Exposition, A Twelve-Month Summer School of Efficiency," by Jerre C. Murphy in **Colliers** describes pluck fight to build the exposition.

San Diego Union, December 1, 1914, 3:2. Elk for Balboa Park arrive; herd makes splendid addition to zoo; 20-acre enclosure at south end of park provided by Park Board in canyon running through the Howard Tract; herd now numbers 13.

San Diego Union, December 1, 1914, 7:5-6. Globe Milling Co. plans model bakery covering 2600 square feet in Varied Industries Building.

San Diego Union, December 2, 1914, 8:4. Japanese Tea House at Exposition Completed; description.

San Diego Herald, December 3, 1914, 1:4. All good government clubs are opposed to the proposed Hardy charter.

San Diego Sun, December 3, 1914, 1:4. Four more companies of troops and a band to be at Fort Rosecrans all of 1915.

Park Commissioners, Minutes, December 4, 1914. Superintendent reported receipt of 12 California elk donated by Messrs. Miller and Lux and distributed by the California Academy of Sciences, on died; paddock provided by fencing an 18-acre plot south of Exposition grounds and west of Midland Drive.

San Diego Examiner, December 4, 1914, 2:1. Plan to ask building of state scored. . . . "I was distressed today," said one of the most unobtrusive and devoted citizens of San Diego to a representative of the **Examiner**, "by a flippant remark of somebody who managed to get into a local paper that the California Building on the exposition grounds ought to be turned into a city hall for San Diego after the exposition."

"The idea is to be condemned for many reasons," said the speaker. "It is one of which a public-spirited citizen would be ashamed, it puts San Diego in the position of a pauper, a beggar. It proclaim her as incapable of building a municipal structure for herself and as asking the people of the state to build one for her. Imagine the degradation. On the one hand, high-minded citizens of San Diego charming and edifying the world by the building of an exposition, on the other, the groveling spirit, that maintains itself on tips."

The speaker went on to say that the proposition was an insult to the people of the state. The people stood for the appropriation of \$250,000 for a building at the exposition, first as a means of treating San Diego in the same spirit as they treated the San Francisco exposition; next, in order that the California exhibit might be displayed here in a structure worthy of the state, next as an enduring monument in this commercial town to the world-inspiring event, the completion of the Panama canal, and finally, a souvenir of the Spanish renaissance, which is the dominating idea in the architecture of the exposition.

The state building was designed exteriorly as a memento of the past. Interiorly, it was conceived, says one critic, for a museum of facts and features of this section of the country, a purpose which will be a credit to the state and a drawing force to San Diego.

"Uncle Sam has plenty of money," concluded the critic; "will some person ask him to turn over the new post office to San Diego for a police court and city jail? Chief Wilson says, I believe, we are badly in need of both."

San Diego Union, December 6, 1914, II, 1:2. Tom P. Getz prepares "The Story of the Missions" feature for Exposition.

San Diego Evening Tribune, December 7, 1914, 3:3. Kern County exhibit here; display will cost \$40,000.

San Diego Evening Tribune, December 8, 1914, 3:1. Ten Sacramento Valley Counties have a \$50,000 composite exhibit on resources.

San Diego Union, December 9, 1914, 9:2. Humphrey J. Stewart, composer and musician, engaged by John D. Spreckels to play the Spreckels Organ at the Exposition.

San Diego Sun, December 10, 1914, 1:5-8. Exposition is busy place; construction of Alhambra Cafeteria started, one of the big institutions of the Isthmus; will handle 700 diners at one seating; motion picture actors enact "Secrets of the Dead" on the grounds this morning.

San Diego Union, December 10, 1914, 2:4. Exposition Site Selected For Movie Play; Architectural Beauty of Magic City Attracts Gotham Motion Picture Makers; Japan's Exhibit Arrives; Indians Coming for Santa Fe's Show; Restaurants Nearing Completion. . . . Walter Edwards of New York city, a director for the New York Picture Co., arrived in San Diego yesterday with members of this company for the purpose of making a Spanish picture plan on the grounds of the Panama-California Exposition grounds.

Miss Clara Williams, well known to movie fans, Diana Carillo, Frank Burke and Thomas Chatterton are among the better known players in the company of twenty.

The company will work for the first time today. Early life of the Spanish settlers will be depicted in the play. Edwards found a background for his picture, after a short tour of the grounds yesterday. "The spot is ideal and the conditions here are perfect for picture making," he said.

A studio is maintained at Santa Ynez canyon, near Santa Monica by the concern. As an exclusive right has been obtained to produce dramas on the grounds, it is probable the movie folk will pass much of their time in San Diego during 1915.

Two special Santa Fe trains will be required to bring 300 Indians, ponies, mules, goats, dogs, also raw materials for demonstration work, consisting of wood, clay, copper and silver to San Diego. The Indians and their paraphernalia are being selected from the various reservations in New Mexico and will arrive in San Diego, it is thought, about December 15.

Director Jess Nusbaum of the Painted Desert, the Santa Fe exhibit at the Exposition, was notified yesterday of the probable arrival of the Indians on that day. They are from the following tribes: Hopi, Zuni, Rio Grande, Apache, Navajo and Supai.

Some of the Indians engaged in the building of the hogans at the Painted Desert left some days ago to bring their families here. Stories they told of San Diego seemed so wonderful and spread so rapidly, that the Santa Fe has more applications for places in the exhibit than can be used.

Three hundred cases of exhibits for the Panama-California Exposition from Japan were unloaded at San Francisco yesterday from the steamer Tenyo Maru of the Toyo Kisen Kaisha line. The exhibits will be sent

to San Diego by rail and are expected by the first of the coming week. Most of the goods are intended for the Foreign and Domestic Arts Building. Shiro Watanabe is in charge of all the Japanese exhibits here.

The cafeteria, on which construction was begun but a few days ago, is rapidly assuming form. It is located at the extreme south end of the Isthmus and the contractor says it will be ready for business on the opening night of the Fair. The Cristobal café, the largest of the kind on the grounds, located north of the California Counties building is practically finished, the workmen now being engaged in finishing the interior.

Gardening at the rear of the California Building is almost completed. This location will be one of the beauty spots of the Exposition grounds.

San Diego Examiner, December 11, 1914, 4:7. Offices of Exposition president in harmony with spirit of great Fair. . . . One of the features of the Panama-California Exposition which is to become permanent is the headquarters of the president of the Exposition Association, G. Aubrey Davidson. The suite of rooms opens upon the quadrangle adjoining the California Building. The main apartment, which is of commanding proportions, will be used as a reception room in which President Davidson may have the honor of welcoming and entertaining Woodrow Wilson as President of the United States and patron of the Panama-California Exposition. Here, too, will be received the governors of the various states, distinguished men and women of the country, and representatives of foreign powers interested in the enterprise.

The chamber will be furnished and decorated in a manner worthy of the distinguished guests. A subdued natural light will be admitted through mullion windows on one side, and, when artificial illumination is allowed to radiate, the interior will glow with elegance and beauty. During the day there will be a charming vista of lordly boughs, Spanish columns, broad halls and stately arches of neighboring structures, as if transplanted from the Alhambra in Spain to the sunny heights of San Diego.

Loaned works of art are to grace the walls, notable samples of which have already arrived, among them pictures of life in the California redwoods, gems of water by Carleton T. Chapman, the distinguished marine artist, the Discovery of the Bay of San Diego by Cabrillo, the vessels of the hardy navigator riding the waters with the exultation of almost animate, sentient creatures, and Delimon's "Thirty Pieces of Silver."

The last mentioned has just been received by President Davidson from Arthur Mosely in London. The loan of the work will be highly appreciated for the reason that it is one more proof of the warm place which the owner has in his heart for San Diego, her enterprise, her exposition, her climate and her people. Sir Arthur is a Knight of the Order of St. John of Jerusalem, a prominent Conservative, and a member of the British tariff commission. He inspired a tour of the country by English teachers for the purpose of introducing American educational methods in Britain. He has presented a valuable oil painting to this city and is interested, with his son-in-law, in Imperial Valley lands. He has spent the last four summers here. He is a man of liberal fortune, acquired in South Africa, a lover of art, and, out of his munificence and humanity, has given to the English government a hospital on the coast of Scotland for the relief of wounded soldiers of the war.

There are still other canvasses of high artistic excellence.

No less interesting to the general public and worthy the study of artists are four panels reproduced from the frieze for the room of the governor of the Pan-American Union in Washington, which were secured by Colonel D. C. Collier of this city for their present use, the sculptor being Mrs. Sally James Farnham of New York.

One of the panels represents Bolivar, the Liberator of South America, leading his dismounted cavalry through a rugged mountain pass. Another shows a meeting between San Martin and Bernardo O'Higgins, who defeated the Spaniards in the decisive battle of Santiago in 1817.

A third delineates the landing of King John of Portugal who, driven from his ancestral possessions by Napoleon, sought relief in his colony in the New World and transferred the seat of government to Rio de Janeiro where he landed in 1808. The man-oared barge to which he was conveyed from his warship is still preserved and was used to disembark Secretary Root on his visit to Brazil in 1906.

A fourth shows a meeting of Champlain with the Huron and Algonquin Indian chiefs near Quebec, Canada, to organize an expedition against the Iroquois, an alliance which led to the French and English wars and had a direct effect upon the development of the northwestern section of the United States and of all North America.

These sculptures are really masterpieces. They are historically and ethnologically correct. There is a wealth of detail that is rarely to be found, and, at the same time, the eye is able to command on the instant, forming a picture in every respect true to nature.

San Diego Examiner, December 11, 1914, 7:4. New Santa Fe station about ready.

Park Commissioners, Minutes, December 12, 1914. Mr. Belcher was authorized to place posts at the intersection of Laurel Street and the east line of Park Drive and close the Laurel roadway to traffic during the Exposition.

San Diego Sun, December 12, 1914, 2:3. Firefighters at Exposition are ready; motor chairs ordered.

San Diego Sun, December 12, 1914, 7:4. Stephen J. Bennett, carpenter, killed in Exposition accident; fell when scaffold of War of Worlds Building collapsed; second fatal injury, the other occurred when Jose Marron, a laborer, was struck by a falling derrick; he died October 30.

San Diego Examiner, December 14, 1914, 8:2. To commence restoration of mission.

San Diego Sun, December 14, 1914, 2:1. Exposition post office to open tomorrow in Commerce and Industries Building; aviary in city park opposite Exposition grounds nearly finished; animals, birds and horticultural displays in that part of park south of the Exposition will be a free sideshow to the big show.

San Diego Sun, December 14, 1914, 7:2. Policing system for Exposition grounds; provisions made for 225 guards and watchmen and 75 gate men; John C. Frazer, manager of the Pacific division of the Pinkertons, in charge; Captain Wright to be assisted by three lieutenants and seven sergeants; station to be at the head of the Isthmus.

San Diego Sun, December 16, 1914, 2:5. Marines camp at Exposition site; force includes 500 men and officers in four companies; Laurel Street from entrance to Fifth Street paved.

San Diego Union, December 16, 1914, 3:2-4. Indians to Show Strange Tribal Dance; Exhibition Will Be Charity Ball Feature; Flights of Eagle Represented in Tewa's Weird Ceremonial. . . . The Indians who are to appear in the eagle dance at the Shriners' Christmas ball Saturday night, under the direction of Noble Jesse L. Nusbaum, are all members of the Pueblo of San Ildefonso, one of the seven Tewa villages north of Santa Fe, New Mexico. The eagle dance is one of the most interesting parts of the elaborate rain dance of the Pueblo Indians. This dance is given only after the crops have been planted, and, on the days set aside for it, the Indians gather from all the villages to join in the ceremonies. The eagle is the only bird these Indians recognize in their ceremonials and is looked upon as a "go-between" twixt heaven and earth, and they believe he can propitiate the rain god and bring an abundance of moisture to nourish the crops on which the Tewa Indians of the Pueblos depend for sustenance.

Among the Indians who will appear here in the eagle dance are Julian Martinez and Florentine Martinez, who will be assisted in the ceremonials by Jose Miguel Martinez, Juan Cruz and Roibal Maria Martinez. Elaborate Indian dresses trimmed with eagle feathers are worn in this dance. In the actions and steps of the dancers is represented the eagle's flight. After a short interval these Indians will appear in a war dance of the Sioux. This is one of the liveliest of the Indian dances and many intricate steps are shown.

Another Indian dance that is sure to please the patrons of the Shriners' ball is known as the danzone de Yucatan, in which Mr. L. Nusbaum and Mrs. Dorothy Canterbury will appear. This will be the first time the

dance has ever been given in public in this country. While it is said to be a simple dance, it has many attractive features and is sure to become popular. In Spanish this dance is known as El Huesito.

Jay Sofer will furnish the music for the ball. He is now busy arranging the dance program. George F. Otto has volunteered to take care of the donations.

December 17, 1914, Letter, Carleton Monroe Winslow, Architect, 422 U. S. Grant Hotel Building, San Diego, Calif. to the Honorable Board of Park Commissioners, San Diego, Calif.

Enclosed please find a bill for a portion of the Chapel fittings, Fine Arts Building, received from Mr. Goodhue to be forwarded to you.

With this bill is a most interesting letter from Mr. Goodhue concerning these articles purchased and the decorating of the Chapel in general. I quote as follows:-

“The other day I succeeded in buying absolutely the most perfect thing in the way of oil paintings to hang up in the chapel that could be imagined, namely, a picture of Our Lady of Guadeloupe, with little scenes around the central figure relating to the legend; --- painted in Mexico in 1771. Pictures of just this sort while familiar enough are by no means so common, and I have never seen such a better one than this. I got it at a private sale at the Anderson Galleries, and since the Park Board seems interested to know just how the allowance is being spent, I enclose my catalogue, the number of the picture being #21. With the altar, pulpit and communicants rail in your hands, I think there is nothing more I need to pick up here, so I am enclosing receipted bills bought for everything with the feeling that after all I have done about as well --- here in New York as I could have in Mexico.

“There is just one more item I have not been able to find, namely a little holy water stoop. Couldn’t you get something of the sort out there” Failing any other way, why not get an Indian to make one out of onyx, --- not a big thing with a pedestal, but a little one set in the wall. The set of stations is, of course, imperative, so if you despair of getting anything, let me know and I will get a set of engraved ones from Neziger, dip it in coffee, and put on mildew stain with blue paint.”

When we are through with this chapel, it will, undoubtedly, be one of the most interesting and quaint places in the Exposition.

Very sincerely yours,

(Signed) Carleton M. Winslow

Enc.

San Diego Evening Tribune, December 17, 1914, 6:1-2. DAR tea room in the Arts and Crafts Building is a marvel.

San Diego Evening Tribune, December 17, 1914, 14:6. Merchants’ Association adopted poinsettia adopted today as the Exposition flower; will give prizes for best-decorated residences in city.

San Diego Herald, December 17, 1914, 3:2-3. Casting of statuary to be placed on east front of big Agricultural Building begun; will be placed in a few days; principal group representing the State shows California standing protecting the Indian and encouraging the white man in his labors; on one side is a symbolic statue of the influence of Latin American civilization and on the other a statue depicting the influence of the Anglo-Saxon and other northern peoples; memorial to Father Junipero Serra has been placed on the west wing of the Agriculture Building; placing of uniform fountain statuary underway.

San Diego Herald, December 17, 1914, 7:6. Exposition a triumph, unique in conception. . . . There is food for study, reflection and investigation to occupy the attention of the students for a week’s time before a building is entered. If one approaches the grounds by the electric line, B or F Streets, he will note at the right hand the brush and shrub covering the hillsides of a deep canyon, a sample of the thousands of mesas and

foothills of the California mountains, just as nature had left them, untouched by the art of man. At the left is a duplicate of contour and outline, redeemed by the landscape architect and converted into an ornate park of rare loveliness --- all attained in two or three years, possible of reproduction in hundreds of similar sites in San Diego County. . . . why should this great picture be destroyed? Why should it not be made permanent, this world's garden feature? In no other part of California can conditions be equalled for a state botanical and horticultural exhibit, the experimental station where semi-tropical vegetation shall be exploited and developed to its utmost perfection.

San Diego Sun, December 17, 1914, 2:5-6. Article on Exposition hospital; has housed 700 patients already; Sun Drug Company and the American Sterilizer Company of Erie, Pa. and the Scanlan-Morris Company of Madison, Wis. Furnished equipment free.

San Diego Sun, December 17, 1914, 9:2. Railroad men doing yeoman service in notifying everybody of San Diego Exposition.

San Diego Sun, December 17, 1914, 9:3. Women Active in Exposition Plans; Colonel Collier and his assistants were busy today with details of Exposition opening celebration; Women's Entertainment Committee met today.

San Diego Sun, December 18, 1914, 1:2, 2:4. Program of Exposition opening.

San Diego Sun, December 21, 1914, 2:3. Dr. M. A. Curtis, professor of philosophy in the Western Reserve University of Cleveland, Ohio praised archaeological display at Exposition; Japanese fan fish placed in pools and near horticultural building.

San Diego Sun, December 21, 1914, 12:1. Colonel Collier selected "Song of Exposition Opening" today; composed by Richard Kennedy of San Diego.

December 22, 1914, Letter, Carleton Monroe Winslow, 422 U. S. Grant Building, San Diego, Calif. to the Board of Park Commissioners of San Diego, Calif.

Gentlemen:

I beg to present the following report concerning the extra furnishings for the Chapel, Fine Arts Building, Panama-California Exposition.

Today I have been carefully over the matter with Mr. Pendleton and it is partly at his insistence that I make an official report at this time. It is as follows:

	Original appropriation	\$8,000.00
18 Jul. '14	Amount available	3,254.90
19 Oct.	Misc. bills paid	<u>575.31</u>
"	Balance available	2,679.59
	Plus allowance saved on hardware	<u>55.11</u>
	Total balance available	2,734.70

Bills paid to date are as follows:

1 Bell, Benoliel	\$75.00
Howell El. Co.	28.50
H. W. Jones-Manville Co.	234.00
Piccirilli, fountain	142.48
Drayage	.75
Customs, etc.	44.83
Drayage, etc., El. Fix.	<u>50.50</u>
	576.06

Bills to be paid are as follows:

Candlesticks, etc.	75.52
Metal work, fountain	90.64
Misc. painting, statuary	139.50
Altar and pulpit	<u>220.50</u>
	535.16
 Total	 <u>1111.22</u>
Balance	1623.48

I regret to report that this balance is not sufficient to meet the needs yet to be done. According to a letter from Mr. Goodhue, dated 24th November, 1914, the reredos for the altar, which he is assembling from Mexican antiques, will cost \$2,000. This he has already contracted for some time ago, not realizing, like myself, that the incidentals were seriously eating into the available funds.

Reredos	\$2000.00
Other necessities and possible expenses	
Possible freight, etc.	150.00
Four benches	75.00
Painting of altar, pulpit	<u>200.00</u>
Total	2425.00

Subtracted from the balance of \$1,623.48 this leaves a possible deficit of
801.52

which for the proper completion of this Chapel I feel to be most necessary. I would respectfully request that \$1,000.00 be reserved for this purpose, out of which, undoubtedly, \$200.00 can be saved. I beg to call attention to the fact that some of the items paid for out of the fund were not directly in the line of furnishings for the Chapel and Halls, items amounting to over \$300.00. Mr. Goodhue and myself have given much extra and especial time to this thing, trying to make it the most unique and wholly successful incident in the Exposition. Mr. Goodhue, to help along the success of the Chapel, has presented to the Park Board a painting, an "Ecce Homo," which he bought in Mexico in 1900, which will be received with the other furnishings.

Very faithfully yours,

(Signed) Carleton M. Winslow

San Diego Sun, December 23, 1914, 3:1. Exposition workers go like Trojans; C. E. McStay, pathfinder of the Automobile Club of Southern California, says 23 miles of coast route between San Diego and Los Angeles will be improved by dragging.

San Diego Sun, December 23, 1914, 9:1-2. Chimmie McFadden writes article describing Exposition buildings and grounds. . . . "The Panama-California Exposition, in my opinion, is one of the most quaint, artistic and beautiful expositions I have ever had the pleasure of seeing, and I have seen a goodly number."

San Diego Sun, December 24, 1914, 6:1-2. Chicago & Northwestern Railroad ticket agent says thousands coming early to Exposition.

San Diego Examiner, December 25, 1914, 2:1. Crowds will come to the Fair.

San Diego Examiner, December 25, 1914, 2:2-3. Newspapermen view San Diego Fair exhibits.

San Diego Sun, December 26, 1914, 5:1-2. Order of Panama sponsors ride so shut-ins can see Exposition tomorrow.

San Diego Union, December 27, 1914, 4:3-5. Gleaned on Prado and Isthmus. . . . Construction on the building which will house the skee-ball concession began yesterday. It will be completed in a few days. Skee-ball is a new kind of bowling game. . . . Louis Rothe, a Coronado man, is completing an unusual exhibit in the Varied Industries Building. When completed visitors will have a submarine view spread before them, showing divers at work gathering abalone shells. The booth is for the advertisement of a firm which deals in abalone novelties. Another of the Rothe booths attracting much attention is in the Home Economy Building. In it will be a model kitchen. Overhead is a huge steak which looks enough like the real thing to make one order it at the first restaurant. Adjoining the model kitchen is a model laundry, the design for which was drawn by Rothe. The decorations are clothespins, cleverly made into attractive designs. Rothe had made many booths at the fair, many of them arousing favorable comment. . . . The Exposition automobile park concession is ready for business; provision for 4,000 automobiles at the north gate and 800 at the south gate; charge of 25 cents will be made for an entire night; gasoline and automobile supplies will be available. . . . Chief Yeoman C. P. Pitkin announced yesterday that the U.S. Government will mount an exhibit of guns, relics and curios in the Commerce and Industries building. . . . Several large boxes of lantern slides received at the New Mexico building yesterday. . . . "Old Darby," Rosa Bonheur's famous \$65,000 masterpiece on the way to the Exposition from South Pasadena. . . . Los Angeles County Day, January 9. . . . Huge relief map of Utah received yesterday. . . . First regiment band of Arizona will come to San Diego for a lengthy visit. With the official Panama-California Exposition band, the Thirteenth regiment band from Fort Rosecrans, the Marine barracks band, and the Arizona band there should be enough music next year to suit the most enthusiastic. . . . Dr. Humphrey J. Stewart has invited organist J. J. McClellan of Salt Lake City, Utah to give organ recitals, probably in March.

Park Commissioners, Minutes, December 28, 1914. Secretary instructed to cut the Park force to meet the budget for 1915.

San Diego Sun, December 28, 1914, 1:8, 2. Putting final touches on Exposition; number of employees at Exposition during 1915 will exceed 4,000; 450 marines will be encamped on grounds and 500 cavalymen east of the grounds; 300 guards.

San Diego Union, December 28, 1914, 1:3. USS San Diego Due In Home Port Wednesday Morning; Pacific Fleet's Flagship Will Cast Starboard Anchor at Dawn in Man-o'-War Row For Exposition Opening; Crew Anxiously Awaits Inaugural Ceremonies; Thirteen warships ordered by Washington to participate in maneuvers during 1915, will feature festivities.

The United States armored cruiser San Diego, flagship of Rear Admiral Thomas Benton Howard, commander-in-chief, United States Pacific Fleet, will steam into the Harbor of the Sun from Mazatlan, Wednesday morning about breakfast time. Word to this effect was radioed from the big warship yesterday.

When the port or starboard anchor of the San Diego finds its resting place at the bottom of the harbor and the vessel begins riding easily at the end of her cable in man-o'-war row, it will mark the first time in the history of the navy on the Pacific coast where a flagship of one of Uncle Sam's powerful fleets has anchored in the port from whence she derived her name.

Officers and crew of the Pride of the Pacific Fleet are said to be looking forward with the keenest anticipation for the opening of the Exposition and from reports received from the flagship, all hands, from Admiral Howard and Captain Robertson to the ship's cook, are anxious to do their bit in making a success of the opening festivities.

Two powerful submarines, the K-7 and the K-8, convoyed by the naval tug Iroquois will arrive from San Francisco at noon today. Both submarines are equipped with radio apparatus and are the first craft of their kind so fitted to ever enter the Harbor of the Sun. They are to be stationed here until July, 1915.

The fleet, which will ride anchor on man-o'-war-row on New Year's Eve, is now officially known. It will consist of the flagship San Diego, submarines K-7 and K-8, torpedo boat destroyers Whipple, Paul Jones, Bruxton, Perry, Preble, Lawrence, Hall, Hopkins and Stewart, and repair ship Iris, thirteen ships in all. All the war craft will be decorated during the day, from stem to stern, with international signal flags and the sight will be an animated one on New Year's Eve. It is planned to have the entire battery of search lights aboard the San Diego focused on the tower of the California Building at the Exposition grounds for several minutes before President Wilson presses a button at the White House opening the Exposition.

At 8 bells, or 8 o'clock, New Year's Eve, all ships of the navy in the harbor will be brilliantly illuminated for about two hours and it is expected that this inspiring sight will draw thousands of visitors to the waterfront.

San Diego Sun, December 29, 1914, 1:1. Exposition program ready.

San Diego Sun, December 29, 1914, 1:1. Cruiser **San Diego** in; gets a royal welcome.

San Diego Sun, December 29, 1914, 1:2. Bonfires to light skies.

San Diego Sun, December 29, 1914, 2:3. Exposition officials disgusted at City's failure to put Park Boulevard in shape for traffic from University Avenue to north entrance.

San Diego Union, December 29, 1914, 1:7. Confetti Banned on Fair Grounds; Sale Permits Revoked; Reimbursement Suggested When Merchants Complain Frank J. Belcher, Jr., representing the Exposition, appeared before the Council yesterday morning and requested that the permits for the handling of confetti be revoked. He explained that the Exposition does not intend to sell confetti, its only object being to stop the use of confetti within the grounds of the Exposition. He explained the great cost and inconvenience that the officials would be put to in protecting the plants, foliage and the flushing of the avenues. The motion to revoke all permits to sell confetti was adopted.

Several dealers who have laid in supplies appeared before the Council at its adjourned session yesterday afternoon and said that the revoking of permits after stocks had been purchased would work a hardship on them. Councilman Benbough thought the dealers might be reimbursed to the extent of their outlay and Admiral Manney suggested confetti limits, excluding the Exposition grounds. A question arose as to the legality of such proceedings and the merchants were requested to confer with the Exposition officials.

San Diego Union, December 29, 1914, 3:1. Thousands Coming This Week for Fair Opening; Fifteen hundred due Thursday on liners Harvard and Yale; 40-piece band promised; Special rate from San Francisco extended to January 31.

Four coastwise liners, carrying approximately 2,158 passengers are scheduled to arrive from north coast points today, tomorrow and Thursday. Shipping men declare that this is the heaviest traffic for any consecutive three days in the history of Pacific coast shipping.

Fifteen hundred and ninety-eight passengers will arrive Thursday afternoon on the Pacific Navigation Company's liners Harvard and Yale. The Yale will make two special trips this week from San Pedro, arriving here Thursday afternoon at 4 o'clock and again Saturday afternoon at the same time. On the Thursday trip the speedy turbiner will bring in addition to her other passengers, the Long Beach band of forty pieces. She will sail Friday afternoon and return the following day, steaming for San Francisco at 8 a.m. Sunday.

The Yucatan of the North Pacific Steamship Company is due this morning from Portland and way ports with about sixty passengers, and will be followed tomorrow by the Pacific Coast Steamship Company's liner President from Vancouver, Victoria, Seattle, San Francisco and San Pedro with a passenger list of 500.

J. Don Dunann, city passenger agent of the Pacific Coast Steamship Company announced yesterday that the rate of \$16, including berth and meals between San Diego and San Francisco on the steamers, President,

Governor, Queen and Congress, has been extended to January 31, 1915. A \$46 round-trip rate, including berth and meals from date of sale of ticket and effective for thirty days, went into effect yesterday.

One or more McCormick boats are due in port before New Year's day from Columbia river and way points and it is possible that the list of arriving passengers will be augmented until the total for the next three days will reach the 2,200 mark.

San Diego Union, December 29, 1914, 3:5. 5,000 Automobiles Expected to Join in Parade; Largest turnout of machines on record predicted for New Year's'; Racers will head line; Three thousand cars from other cities included in estimate.

San Diego Union, December 29, 1914, ?. Usher in 1915 With Straw Hat; light headgear boost for San Diego.

San Diego Union, December 29, 1914, ?. Gleaned on Prado and Isthmus. . . . President Charles C. Moore, of the Panama-Pacific Exposition at San Francisco will not attend the opening of the Panama-California Exposition at San Diego; urgent business prevents him from getting away; San Francisco delegation will be headed by the vice president of the Exposition and Mayor Rolph of San Francisco. . . . C. A. Matthews, assistant general manager for the Northern Pacific Railway, says it will be largely farmers of the country who will come to San Diego this winter; at present the farmers are the most prosperous fellows in the country. . . . Cadets of the Salt Lake City High School will visit San Diego after the close of the school year in June. . . . The Ogden Utah Tabernacle Choir will be in San Diego July 16, 17 and 18. . . . Gates to the Exposition will be closed to everyone at 12 o'clock noon, Thursday for cleaning work to begin. . . . Scaffolding removed from the Spreckels music pavilion yesterday. . . . Gwen Hick, in charge of the Washington building will hold open house on New Year's Eve with dancing, guests to be served fresh cider. . . . All state buildings are being made ready for receptions on the opening evening of the Fair. . . . Special events being planned every day except Sunday. . . . Drivers in the Point Loma auto race will go to the Exposition directly after the finish, winner to receive award in Plaza de Panama if arrangements can be made.

San Diego Evening Tribune, December 30, 1914, 1:1-2, 5:2-3. Exposition ready to open tomorrow night: Official Program Exposition Opening Celebration --- December 31, 1914

- 7:00 p.m. - Public admitted to grounds
- 7:00 p.m. - Dinner to press representatives at downtown Panorama Roof Garden
- 9:00 p.m. - Dedication of Spreckels Organ
- 11:00 p.m. - Opening Ceremony at Plaza de Panama, ending at midnight with flash from President Wilson that will formally open Exposition.

January 1, 1915

- 9:00 a.m. - Automobile tour of city for press representatives
- 11:00 a.m. - Official Dedication ceremonies
- 12:00 p.m. - Dedication of Women's Board Headquarters
- 2:30 p.m. - Great automobile procession starting at Broadway and Arctic Streets
- 7:30 p.m. - Reception and banquet Women's Board at U. S. Grant Hotel
- 8:00 p.m. - President's official banquet at Café Cristobal

January 2, 1915

- 10:30 a.m. - Grand military and naval parade starting at Broadway and Arctic Streets
- 11:00 a.m. - Automobile ride by Women's Board (not officially announced)
- 8:00 p.m. - Grand carnival on Isthmus

The speakers announced to take part at the official dedicatory exercises, beginning at 11 o'clock in the morning of New Year's day, follow:

Hon. Lyman J. Gage, presiding
 Hon. G. A. Davidson, president of the Panama-California Exposition
 Hon. William G. McAdoo, secretary of the U.S. Treasury, personal representative of President Wilson.
 Count Del Valle de Salazar, personal representative of Alfonso XIII of Spain
 Hon. J. Barrett, director-general of the Pan-American Union, representing the American republics
 Hon. Charles Moore, president of the Panama-Pacific International Exposition
 Hon. Hiram W. Johnson, governor of California
 Hon. Oswald West, governor of Oregon
 Hon. George H. Hodges, governor of Kansas
 Hon. Tasker L. Oddie, governor of Nevada
 Hon. Ernest Lister, governor of Washington
 Hon. S. W. Stewart, governor of Montana
 Hon. William Spry, governor of Utah
 Hon. William G. McDonald, governor of New Mexico
 Hon. George W. P. Hunt, governor of Arizona
 Hon. William Alden Smith, U.S. Senator from the State of Michigan.
 Hon. James Rolph, Jr., mayor of the City of San Francisco
 Hon. H. H. Rose, mayor of the City of Los Angeles
 Hon. Frank K. Mott, mayor of the City of Oakland
 Hon. Charles F. O'Neill, mayor of the City of San Diego
 Hon. R. W. Fridham, chairman of the Southern California Counties Exposition Commission
 Chairman of the Sacramento Valley Exposition Commission
 Chairman of the San Joaquin Valley Exposition Commission
 Chairman of the Alameda and Santa Clara Counties Exposition Commission
 Chairman of the Kern and Tulare Counties Exposition Commission

While the speakers for the president's banquet, New Year's night at 8 o'clock at the Café Cristobal, are not officially announced, it is said welcome will be extended by President G. Aubrey Davidson, Mayor Charles F. O'Neill and Governor Hiram Johnson, representing the Exposition, the city and the state.

Responses are expected from Secretary William G. McAdoo, Count del Valle de Salazar, the governors of Utah, Nevada, New Mexico and Oregon and the mayors of fifteen California cities.

The routes of the great military and naval parade and of the automobile procession were announced in **The Evening Tribune** yesterday together with the list of participants.

In connection with the distinguished guests, it was announced today by the Order of Panama that the order is perfecting plans to initiate them all into the order. The chapel of the New Mexico building has been secured for the purpose Saturday night, January 2, at 8:30 o'clock.

This order, preserving the history and romance of the Spanish conquests in America and the bringing of Christianity to California, expects to make members of Secretary McAdoo, personal representative of President Wilson; Count de Salazar, personal representative of King Alfonso of Spain; John Barrett, director-general of the Pan-American Union; Governor Johnson of California; Governor Spry of Utah; Governor McDonald of New Mexico, Governor Oddie of Nevada; Governor West of Oregon and other distinguished guests of the Exposition.

San Diego Union, December 30, 1914, 1:2, 2:3. Din Heralds Flagship's Arrival in Port; Whistles Shriek, Guns Roar as Cruiser San Diego Returns from Mexican Waters for Fair Opening.

With every shop whistle in the city shrieking a welcome, the cruiser San Diego, flagship and pride of the Pacific fleet, steamed into the harbor yesterday afternoon and dropped anchor at 2 o'clock. Coming from Mazatlan to participate officially in the opening celebrations of the Panama-California Exposition, the big cruiser made fast time, less than 72 hours being required for the trip from the West Mexican port.

The guns at Fort Rosecrans boomed out the customary salute as the San Diego entered the channel, and as the big ship poked its nose into the bay the whistle at the electric power plant blew the first blast of welcome. Other whistles took up the signal and for fifteen minutes the din continued. Distinctly heard in the tumult was the big calliope on the roof of the U. S. Grant Hotel, which broke into the aid, "Home Sweet Home."

Rear Admiral Thomas B. Howard, commander-in-chief of the Pacific fleet and senior ranking officer of the navy, caught his first glimpse of San Diego in more than ten months, when the cruiser ended its voyage from Mexican waters. During that time he has been in continuous service along the lower coast, and his long absence lent enthusiasm to the greeting extended to him by naval and military officers and representative men of the city.

G. Aubrey Davidson, president of the Exposition, and Rufus Choate, president of the Chamber of Commerce, were among the first to greet Rear Admiral Howard, Capt. Ashley Robertson and officers of the cruiser. President Davidson officially welcomed the Admiral on behalf of the Exposition and President Choate extended a similar welcome from the Chamber of Commerce.

Rear Admiral Howard was jubilant on the prospects of even a brief "holiday" in his ship's home port, and enthusiastic over the participation by the cruiser and its men in the festivities attending the opening of the Panama-California Exposition.

"I appreciate the welcome we have received," he said. "The officers and crew of the San Diego will gladly do their share toward making the opening of the Exposition as auspicious as possible."

The Admiral smilingly posed for a Union photographer. In the group with him were Capt. Robertson, President Davidson, President Choate, Commander Cleland Davis, naval aide to the Exposition head, and Capt. R. P. Rifenberick, military aide.

Plans for the celebration tomorrow night, Friday and Saturday were explained to Rear Admiral Howard and Captain Robertson by President Davidson. The naval officers entered into the spirit of the occasion and assured President Davidson that they would gladly assist in the program.

Electricians on the San Diego will be busy today stringing hundreds of lights from the masts and other parts of the ship. On the stroke of midnight, tomorrow night, at the same time that President Wilson presses the button in the White House and officially opens the Exposition, the ship will be illuminated from bow to stern. Every search light then will be flashed upon the tower of the California Building, and the San Diego's initial part in the celebration will have been done.

In the big parade Saturday it is expected that 600 sailors from the San Diego will be in line, also the ship's band.

Other distinguished persons who greeted Rear Admiral Howard were Col. J. B. Pendleton, U.S.M.C., chief yeoman George P. Pitkin of the navy recruiting station, commanders of the torpedo boats stationed here, and civilian friends.

Floating in the breeze from the after mast was the admiral's flag --- an emblem of blue upon which were two stars.

The ship's band played, "I Love You California," and other popular airs as the ship steamed into the bay. The rails were jammed with sailors who waved their white hats and cheered in response to the waving of handkerchiefs by hundreds of persons who lined the wharves.

Railroad agents were on the ship early in an effort to sign up a big party of sailors for trips to Los Angeles and other nearby points, but they met with nothing like their usual success. While a few men engaged tickets for out of town, the majority preferred to remain in San Diego for the Exposition opening.

“Nothing doing this time,” remarked one sailor to an agent. “There’s nothing big enough that you can offer in Los Angeles to pull us away from San Diego.”

The situation at Mazatlan and to the southern part of the peninsula was unchanged when the San Diego left, according to officers, although trouble was expected at Tepic, where several thousand Carranza troops were reported to have cast their lot with Villa. This news was wirelessly to the San Diego, with the added information that foreigners at Tepic and San Blas had been given refuge aboard the United States supply ship --- Glacier. Rear Admiral Howard, on learning this, ordered the gunboat Annapolis to San Blas.

People of Mazatlan and vicinity were declared to be on friendly terms with the men of the Pacific fleet.

San Diego Union, December 30, 1914, 1:7-8, 3:4-5. Fair Work Closes In Feverish Rush As Crowds Arrive; Hundreds engaged night and day finishing details of great Exposition task while committees conclude arrangements for opening celebration; Exhibits being installed with all possible haste; Decorators Dress City In Gorgeous Attire For Welcome To Throng She Will Entertain; Business houses, residences, thoroughfares gay with light and color; Messages from many quarters congratulate San Diego on magnificent achievement; Other telegrams announce coming of delegations.

While countless thousands are traveling through wintry scenes to reach San Diego for the opening of the Panama-California Exposition, members of the celebration committee are arranging the final details, and hundreds of workmen, divided into two shifts of eight hours each, are putting forth almost superhuman efforts to complete the last of the work, which is destined to spread the fame of Southern California to the most obscure villages of the country.

Flashing lights and the continuous clatter of steel hammers at the Exposition grounds last night told of the feverish rush to have everything ready for the entertainment of the throng that will attend the opening ceremonies.

With the exception of the rush work on the Isthmus, the Exposition is perhaps nearer completion forty-eight hours before the opening than any other fair of the kind ever held. Exhibits are being rushed into the buildings and new amusements are springing up on the Isthmus like mushrooms in the night. When the gates are opened at 7 o’clock tomorrow evening even residents of San Diego who have been closely identified with the progress of the work will be surprised.

Grounds and Principal Buildings Completed

Grounds and the main exhibit buildings were completed some weeks ago. The decorating of the interiors, the building of booths, the placing of exhibits, all of which is painstaking work, have taken longer than was originally expected. That does not mean that the Exposition is not ready; it means that a few scattered exhibits will have to be placed after the opening. There will be plenty to see and plenty of amusement to occupy anyone during the three days of festivities planned by the celebration committee.

Last Meeting Held

The last meeting of the general celebration committee was held last night at headquarters in the Union building. Final details of the celebration were arranged, and today every member of the committee is busy whipping into last-minute shape that for which he will be responsible New Year’s Eve.

Rather than be late at an event which in years to come will be used to mark time, hundreds already have arrived in the city. They come from near and far. San Diego hotel registers show that visitors from practically every city in the country are here to help San Diegans celebrate the opening of the Exposition and the completion of the Panama Canal.

Hundreds will come to the city today by boat and by train. Tomorrow special trains will roll in, bringing hundreds of boosters from every part of California, Utah, Nevada, New Mexico, Arizona, Washington, Oregon and other western states.

Five years ago San Diego told the world she would hold and Exposition in 1915 to celebrate the completion of the Panama Canal and invited all nations to help in celebrating the completion of the greatest engineering achievement of modern times. The Exposition is now practically complete, and San Diego has kept her promise.

City in Holiday Attire

Today San Diego is in holiday attire. For miles her streets are decorated in Exhibition colors and when the electric switch is turned on early tomorrow evening, her streets will blaze with color. Business houses have been decorated and residents throughout the city generally have helped the committee by decorating their houses.

Last night telegrams of congratulation on the completion of the Exposition poured in at celebration headquarters. Mayors of many of the largest cities in the country paid tribute to the city which, with only 40,000 residents a few years ago, had the courage to undertake a task of such magnitude. Telegrams announcing delegations from points in California and western states continue to be received.

(There follows a description of telegrams from Long Beach, Calif. and Imperial Valley.)

Gates to Open at 7

Gates at the Exposition will open at 7 o'clock tomorrow evening. The crowd will be expected to amuse itself on the Isthmus until the band concert by the Panama-California Exposition band, which will begin at the Plaza de Panama at 11 o'clock.

The ceremony of the raising of the American flag to the top of the tall mast on the Plaza de Panama, in which sailors and marines will participate, will take place after the band concert and a few minutes before the speaking.

Col. D. C. Collier will preside. After his opening remarks, Carl I. Ferris will speak on behalf of the San Diego Board of Park Commissioners, Mayor Charles F. O'Neill will speak for residents of the city, George W. Marston will speak as a representative of the Exposition commission of California, Gov. Hiram Johnson will speak on behalf of the state. President G. Aubrey Davidson will declare the Exposition open after President Woodrow Wilson presses the button which will illuminate the grounds. The fireworks display will follow and immediately after this the crowd will dance to the tune of band music as long as it cares to enjoy that pastime. Many will go back to the Exposition cafes, where they will celebrate the dawn of 1915.

Decorate Residences, Don Straw Hats Urges Celebration Committee

The Exposition decoration and celebrating committee again urges all residents of San Diego to decorate their homes with the official colors, red and yellow, American flags, and red, white and blue bunting and pennants. The business district presents a gala appearance, but there are many residences which should be decorated.

Poinsettias for decoration purposes may be obtained from the celebration opening committee's offices in the Union building for \$3 a dozen, a price far below that usually asked for these beautiful blossoms.

Not the least important decoration is the straw hat. It is particularly requested by members of the various committees that every San Diegan decorate his head during the celebration with a straw hat. A red and yellow ribbon band will also add to the appropriateness of the hat, and this is one way that everyone can help. It is just as easy to wear a straw hat as any other. If each individual will do his own part during the celebration a felt or cloth hat or cap will be a rare sight, and, with the cooperation of San Diego's peerless climate, the word winter will become nothing but a faint memory in the city where straw hats and summer clothing can be worn with comfort the year round.

California's Governor Will Lend Presence at Exposition Opening

Gov. Hiram Johnson will arrive in Los Angeles on his way to San Diego this afternoon or early tomorrow morning. In the Angel City, he will meet Lieut. Gov. A. G. Wallace and the two state officials will arrive in this city on a special car attached to the 1:10 p.m. train tomorrow. They will be met at the station by a delegation of prominent citizens and Exposition officials.

Army of Pinkerton Men to Police Grounds During Inaugural Celebration

Two hundred and forty of the cleverest men in the employ of the Pinkerton national detective agency will police the Exposition grounds during the opening celebration. With a thorough knowledge of crooks and their ways and a mental picture of the leading pickpockets and confidence men, the Pinkerton force will be equal to the task of handling the undesirables who, no doubt, will choose the Exposition grounds as a field for operations. Some of the men will be dressed in the uniform of the Spanish conquistadors and many others will be plain clothes men who will mingle with the crowds and keep watch for suspicious characters.

The local police force, the Pinkerton force, and all local patrol and detective organizations will work together during the entire year, forming an alliance for the prevention and detection of crime.

Day and Night Crews Work to Move Exhibits from Incoming Trains

The controversy between the City and the Santa Fe Railway over the proposed closing of B Street is working a hardship on E. J. Chapin, traffic manager of the Exposition. In order to handle the freight for the Exposition under existing conditions it has been necessary for A. F. Hunt of the Santa Fe to put on an extra night crew.

Monster Auto Parade Assured for New Year; Parking Space Sought

The committee wishes every person owning an automobile in this city will arrange so as to be in line. No decorations are required. The parade will be formed on the side streets, adjacent to Broadway and India Street.

San Diego Union, December 30, 1914, 1:4-6. Plans Completed for Dedication of \$100,000 Organ; Symphony Orchestra and People's Chorus to Assist. Plans for the dedication exercises New Year's eve of the \$100,000 organ, the gift to the Exposition from John D. Spreckels, were completed yesterday by

the music committee. Dr. Humphrey J. Stewart, the noted organist of San Francisco, who has been engaged for two years by Mr. Spreckels, will be assisted in the dedication program by the Popular Symphony orchestra, conducted by Chesley Mills, and the People's Chorus, directed by Willibald Lehmann. After a conference the music committee decided that the excellent musical abilities of these organizations should receive recognition by being given a prominent part in the dedication exercises and an invitation was extended to the two directors to assist Dr. Stewart by furnishing several orchestral and choral numbers on the program. The selections chosen by Mr. Mills for the Popular Symphony orchestra are at the request of prominent musicians of the city. The dedication program which follows will begin at 9 o'clock, New Year's eve.

Part one. Organ solos by Dr. H. J. Stewart.

Processional March from the music drama "Montezuma" (Stewart)

Fantasia on Christmas melodies (Stewart) . . . This number was composed specially for the dedication of the organ.

Overture, Guillaume Tell (Rossini).

Part two. Concert by People's Chorus, Willibald Lehmann, conductor, and Popular Symphony Orchestra, Chesley Mills, conductor.

March. "Pomp and Circumstance" (Elgar)

"The Heavens are Telling" from The Creation (Haydn). Mrs. Helen Ruggles White (soprano),

C. F. Kelly (tenor), H. V. Mather (bass).

Overture. "Orpheus in the Underworld" (Offenbach)

"The Marvelous Work" from The Creation (Haydn). Mrs. Helen Ruggles White (soprano)

"Unfold Ye Portals" from The Redemption (Gounod). For chorus, solo chorus, orchestra and organ.

San Diego Union, December 30, 1914, 4. Gleaned on Prado and Isthmus. . . . Under the direction of Ernest Kaai, famous Hawaiian musician and composer, natives of Hawaii, who arrived in San Diego Sunday for a year's residence in the Hawaiian village, Kenneth Croft's interesting concession on the Isthmus at the Panama-California Exposition held a rehearsal yesterday morning.

Clad in their native costumes, the young women gave an exhibition of hula-hula dancing to the music of Hawaiian instruments and the singing of the Hawaiian quintet. The rehearsal was most interesting and was witnessed by only a few of the invited guests. A movie man was present, getting some pictures which he took for a motion picture syndicate.

The hula dance, a dance which is given only before royalty, was given for, perhaps, the first time in this country. The hula kui, a dance which is general among Hawaiians, was also given. Comely young women did the dancing and those present admitted they have never seen the equal of the dancers brought across the water for the entertainment of San Diego's 1915 visitors.

One of the most interesting of the group of thirty-two Hawaiians is Princess Niau, who is 72 years old, and who for years enjoyed the reputation of being the Sarah Bernhardt of the Hawaiian Islands. She was the leading actress of her time, playing the leading roles in dramas which told of Hawaiian life and writing many plays which were popular with the people of the islands. In San Diego she will tell fortunes and instruct the younger girls in dancing.

Princess Kauilani, known as the most beautiful girl on the Hawaiian Islands, took a prominent part in yesterday's rehearsal. With her dainty fingers she will serve poi to visitors at the village, taking her turn at dancing on the open-air stage which faces the open-air café. Princess Kauilani is noted for her grace in the water.

Another conspicuous in the rehearsal was Princess Akauilani, who is said to ride horseback better than any woman in Honolulu. She is also famous for her interpretations of many native dances.

The Hawaiian Village was completed yesterday. It shows old as well as new Hawaii and is attractively decorated with plants and foliage of Hawaii. Manager Croft, who was for a time worried as to finishing in time for the opening night, was ready yesterday and could have opened his show to the public had occasion demanded.

Max E. Parker, who has made the plans for twenty-one of the concessions on the Isthmus, drew a breath of relief yesterday for work on his last building began. Parker drew plans for the Hawaiian Bilalge, Alhambra Cafeteria, Neptune's Wonderland, dance hall, doll house, shooting gallery, front for Ferris wheel, ice cream pavilion, bowling and skee-ball concession, Frank Salmons' gem mine, the National Views' Company arcade, circling wave, Farmer Burns' motordrome, and many others. Parker has been one of the busiest men in San Diego during the past few months and, with the completion of his work, he feels ready for a vacation.

Mrs. L. E. Van Zandt, known as the only woman advertising manager of a big city newspaper, was a visitor at the Exposition grounds yesterday.

Many newspapers of the East and Middle West are offering trips to the Panama-California Exposition as premiums in beauty contests and contests of various kinds.

"The Story of the Missions," the concession on the Isthmus by T. P. Getz, is practically finished. Last of the gardening work was finished yesterday.

The motordrome, owned by Farmer Burns, once champion wrestler of the world, is complete. Riders are practicing on the bowl-shaped track every day and Burns promises an entertainment with more thrills than an old-fashioned melodrama.

What is expected to prove one of the most attractive concessions at the Exposition is the Doll House, which is being installed by Vincent Payne. Dolls of various sizes from the smallest kewpie to those measuring twenty-two inches, all attractively dressed, will be displayed.

These will be awarded as prizes on a wheel of fortune or will be sold at the retail price. The inhabitants of the doll house will vie with each other for attention, for they will be dressed in the latest fashion fads. One style of kewpie will, however, be able to trace his ancestry back to Adam through lack of clothing, for this time will wear only a belt, hoister and six-shooter.

The largest dolls will be Indian mothers with papooses on their back and the Golden West girls. Miss San Diego will be shown as well as male dolls dressed in sailors' uniforms. They will further advertise the city for the reason that the sailor dolls will wear caps with U. S. S. San Diego on the ribbon.

A novel feature of the doll house will be the display of some of the smallest dolls on a miniature stage. The stage is complete even to drop wings and lights. On this the dolls will be arranged like a chorus in a big musical comedy production.

San Diego Union, December 30, 1914, 4. Salt Lake Route officials and other railroad men of California will be banqueted at the San Diego Grill tomorrow evening at 7:30 o'clock.

San Diego Union, December 30, 1914, 8:1. Thriving Industry Shown by Valley at Exposition; Coachella's Resources Are Demonstrated in Unique Exhibit of Dates; Product Unexcelled; Growers Awarded First Prizes For Fruit Against All Competitors.

Little is known of this valley by other counties of California and for this reason the date growers organized an association and elected W. I. Paul as their president. To convince visitors all over the United States that California is producing a fruit that grows only in a certain kind of climate, the Date Growers' Association decided to install an exhibit at the Exposition.

The exhibit shows stages of growth of the date from the time the tree blooms until the product is packed in boxes. Dates of all varieties, from dates imported from Arabia and Egypt, will be on display.

San Diego Evening Tribune, December 31, 1914, 1:1-2, 5:3-5, 7:2. Notables of Nation Gather Here to Aid in First Ceremony, by George H. White . . . Expects . . . San Diego is offering the world a new idea in world's fairs from many points of view. The first is its simple beauty of Spanish-Colonial and the harmonious Moorish architecture and the grandeur of its setting in semi-tropical flora and marvelous views. Within, the Spanish atmosphere. Quiet nooks and patios and balconies, flowers, vines and plants, Spanish cavaliers and señoritas, dancing, serenading, cannot fail to captivate and transport the modern minded to forgotten romantic days. Second, perhaps, the greater appeal will be found in the plan of exhibits, demonstrating processes of manufacture, handicraft peculiar to various peoples, agriculture, horticulture, mining, irrigation.

Special trains and hundreds of automobiles brought thousands of visitors today for the opening celebration. For days trains and steamers have carried capacity lists and a conservative estimate is said to be that 40,000 out-of-town visitors will participate in the great celebration which will continue tomorrow and Saturday.

The speaker's platform on the Plaza de Panama is arranged to accommodate 500 persons who have been invited to occupy the chairs.

In the grand automobile procession of tomorrow afternoon, Chairman George Walker, of the committee, states that 3,000 machines are expected. Imperial Valley promises to have the greatest out-of-town entry. A hundred Imperial machines arrived yesterday and nearly 150 more today. Escondido, Riverside and points throughout Southern California have numerous machines here or on the way. A special request is made by Chairman Walker that as many San Diegans as possible turn out. The procession will form on the side streets of Lower Broadway and start at 2 o'clock. It will be led by the Mexican regimental band, and the racing cars entered for the Point Loma road race will be the first of the cars.

The Mexican band consists of forty pieces, and was sent to San Diego as a compliment to the exposition city and exposition officials by Esteban Cantu of Lower California. It is conducted by Lieutenant Isaac Romero, of the Twenty-fifth battalion of infantry, formerly of the world-famous police band of Mexico City, organized by General Felix Diaz, when he was chief inspector of police. Director Romero is generously offering the band's services upon every occasion requested. A. T. Pecina, an interpreter, is serving as the medium of communication between Romero and officials.

More than 600 invitations were extended for the president's banquet to be held at the Café Cristobal beginning at 8 o'clock tomorrow night.

The celebration of January 2 will be featured mainly by the grand naval and military parade to start from the foot of Broadway at 10:30 o'clock. This is anticipated as the greatest of its kind ever accorded San Diego. With the officers and crew of the U.S.S. San Diego, Admiral Howard's flagship, and the destroyer and submarine flotillas, the coast artillery, marine corps, and First cavalry and San Diego military organizations represented, accompanied by six or eight naval and military and other bands, the parade is destined to be of special magnificence.

Tomorrow night the grand carnival on the Isthmus will begin at 8 o'clock and the great frolic will continue as long as it may please the fun makers. Special features for this carnival have been arranged in abundance.

San Diego Herald, December 31, 1914, 2:2. Exposition Now Open. . . . Everyone in any way connected with the construction of this gigantic work is entitled to praise and credit for every detail has been finished on time and exactly as was contemplated in the minds of those who designed it. It is a splendid monument to the patriotism and enterprise of the people of San Diego and will bring lasting benefits to the city; it is also a tribute to the men who managed it as never before did a city get so much for its money.

The work is great, the result is grand, and in it all there is not a whisper or suspicion of graft.

San Diego Sun, December 31, 1914, 1:3. Parking places will be provided at both the north and south entrances; about 4,000 machines can be cared for at the north entrance and 500 at the south gate.

San Diego Sun, December 31, 1914, 4:1. EDITORIAL: The Exposition Makers: Literally thousands have given of their best to make it a great success and all San Diego has joined in the work --- whose result may well be cause of honest pride.

San Diego Union, December 31, 1914, 1:6-8. Exposition Will Throw Open Gates to World at Midnight; Spanish City's Dedication Will Commemorate Completion of Panama Canal Linking Atlantic With Pacific, Marking Nation's Greatest Engineering Feat, Making San Diego First Port-of-Call on Coast; President Wilson Will Touch Button at Midnight Throwing on A Sea of Light, Which Will Inaugurate All-Year Fair; Many Celebrities Coming; McAdoo party and King Alfonso's representative due to arrive today.

Tonight's Program

7 p.m. - Gates of all entrances to be thrown open. Also opening to the public of Isthmus amusements.

7 to 9 p.m. - Dinner for newspaper men at Panorama Roof Garden.

9 p.m. - Dedication of Spreckels' organ pavilion.

11 p.m. - Ceremony of opening Exposition on Plaza de Panama; President Wilson to press button in Washington which will flash on all lights and explode fireworks.

Beginning of midnight carnival and dancing on Plaza de Panama.

Amusements on the Isthmus and in cafes; carnival to continue as long as crowd desires to remain.

San Diego Union, December 31, 1914, 1, 2:2-4. President Will Touch Button Opening San Diego Exposition. . . . With many hotels already crowded to capacity, the city in holiday attire, the Panama-California Exposition ready for the opening tonight, and fair weather promised by the weather man, thousands of San Diegans will awake this morning to pass another day, and greet the dawn of 1915 --- that magic number which has been held before them since it was decided to celebrate the completion of the Panama canal and place San Diego before the world as the first port of call.

All day yesterday trains rolled into San Diego with throngs of passengers, a greater part of them coming to help celebrate a function never before attained by a city of this size. Today hotel reservations will be at a premium and visitors will be sent to rooming houses and private residences throughout the city.

Extra coaches were necessary on nearly all the regular trains and today several specials loaded with boosters and men whose names are known the length and breadth of the land will bring many hundreds more. That San Diego will entertain during the opening festivities of the Exposition at least 15,000 guests was the general prediction last night.

William G. McAdoo, secretary of the United States treasury, with Mrs. McAdoo, will arrive at 5:20 p.m. Count Del Valle de Salazar, representative of the king of Spain, will arrive at 1:30 p.m., and Governor Hiram W. Johnson will arrive on a noon special. Others who will arrive during the day are: Governor Oswald West of Oregon, Governor William Spry of Utah, Governor William G. McDonald on New Mexico, Mayor James Rolph of San Francisco, and the chairmen of many state and county Exposition commissions.

As the hour strikes seven this evening, the first formality in the opening of the Exposition will take place. Turnstiles will be unlocked and the public will surge through the different entrances, anxious to see the completed Spanish city.

At the same hour, nearly 150 newspapermen, from near and far, will be the guests of the general celebration committee at a banquet given at the Roof Garden café. After the dinner they will be taken to the Exposition grounds, where they will make a tour of the grounds, guided by Winfield Hogaboom, chairman of the committee.

The dedication of the Spreckels music pavilion will be a 9 o'clock, and after that ceremony the crowds will visit the amusement places on the Isthmus, returning at 11 o'clock for the formal ceremony of opening to the world the Panama-California Exposition.

Immediately after this ceremony, the Panama-California Exposition band will play for the carnival of dancing which will take place on the Plaza de Panama. Those on the grounds may stay as long as they please and continue the merrymaking until the dawn of 1915 chases the shadows of night.

Cafes will be open all night, both the Cristobal and the Alhambra. Reservations at these cafes have been beyond expectations. Both have made allowances for extra seating capacity, and it is probable that at least 2,200 people will be accommodated.

Tomorrow at 9 a.m., an automobile tour of the city will be given visiting newspapermen and at 11 a.m. the official dedicatory ceremonies will be held at the Exposition. At 2:30 p.m. the automobile parade will start from Broadway and Arctic streets. It will be viewed by representative visitors from a grandstand erected as Sixth and Kalmia streets.

Two Hostesses Name for Women's Headquarters Panama-California Fair

Mrs. A. E. Frost, chairman of the hostess committee of the Panama-California Exposition, the duty of which is to select women from each of the clubs of the city, the federation and county societies, to act as hostesses for each day of the year at women's headquarters in the California Building, last night announced that Mrs. J. G. Burne and Mrs. Eunice James would be hostesses for New Year's Day. Names are to be printed each week for the following week.

People's Chorus Urged to Assemble Early for Exposition Opening

.

Liners Bear Thousands Coming to Exposition Opening Festivities

Pacific Coast Steamship Company's liner President from Puget Sound; Harvard and Yale from San Francisco and Los Angeles.

Portland Rotarians Coming on Two Special Trains for Exposition

The Rotarians will pass New Year's Day in Pasadena for the rose festival there and will then make the San Diego trip for the real fun of their long jaunt from Portland.

Utah's Governor Coming with State Delegation to Exposition Opening

Many of those coming on the special train will remain in San Diego for the Point Loma auto races on the 9th, taking the opportunity, after the opening, to make side trips and to otherwise enjoy the beauties of the city.

Fair Opening Ceremonies to be Shown by Movies in Theaters of World

I. K. Dowein, camera man for the Hearst-Selig Pictorial, who made the pictures of the San Diego Exposition recently shown at the Plaza Theater, arrived in San Diego last night to cover the opening ceremonies of the Fair.

Before leaving, Dowein will take pictures of scenes showing the lights turned on at the Exposition and the city of San Diego. These will be exhibited in movie theaters throughout the United States and in foreign countries.

Dowein has covered in a movie way practically everything of interest that has occurred in San Diego and surrounding country within the last year.

Nevada's Representative to Exposition Praises San Diego's Undertaking

State Senator George T. Mills said last night, "Nevada, like Arizona and the other Western states, has a great deal to gain through your Exposition. Trade relations between the different Western states are only in the embryo. When better train facilities are established, increased commercial transactions, undoubtedly, will be the result."

Angelotti Delighted to Be In San Diego, Expresses Appreciation

Chief Justice elect of the Supreme Court of California, F. M. Angelotti is not any more delighted to come to San Diego than San Diego is delighted to have him as a guest.

San Diego Union, December 31, 1914. Noise-Making Devices To Sound Glad Tidings of Exposition Opening; Innocent Disturbance Will Be Tolerated by Authorities at New Year's Birth. . . . Noise is wanted from every San Diegan at midnight tonight, when the gates of the Panama-California Exposition will swing open, while sirens blow, bells ring, klaxons cut loose, deep-throated steam whistles warble their prettiest, and pipe soprano and vapor-operated pipes have their piercing shrieks punctuated by the booming detonations of aerial bombs.

Vessels in the harbor are preparing to tie sounding leads on their whistle-cords, and then throw the leads overboard. Whistle-cords on all factories will be tied down. The gentle pedestrian who owns not even an automobile horn, will fall back upon the melodious tin horn, cow-bell, and crickety-crackerty revolving rattle.

On the mountains bonfires will burn and illuminate the landscape.

A telegram, purporting to come from the Anti-Noise Society of New York City, was received last night. It reads as follows:

"G. Aubrey Davidson, Sir: We address you as the Big Noise of the Panama-California Exposition. Ordinarily we are opposed to noise, but approve thoroughly of you and the Exposition. We regard blowing of whistles, etc. on the night of the opening as necessary to express the proper enthusiasm of San Diegans, which, if suppressed, might cause spontaneous combustion, and, therefore, heartily endorse all such plans."

San Diego Union, December 31, 1914, 2:5. Arizona Editor Predicts Heavy Travel to Fair; Charles H. Akers, Official Representative of Governor Hunt, Voices Optimism; Visitors Enthusiastic; Letters Praising Peerless Climate Best Advertising Medium.

(San Diego Union, April 4, 1965, 3:2-5. The Lethal Hook-and-Ladder, by Jerry MacMullen.)

(San Diego Union, August 20, 1989, G-10. San Diego Showed Itself Off to The World at Exposition I, by Arthur Ribbel.)

January 1, 1915 . . . Official Address of G. A. Davidson, President Panama-California Exposition

Many of us, who five years ago stood on the sunbaked mesa in the park, arid then and unattractive, and watched our esteemed friend, the Honorable John Barrett, representing the President of the United States, turn the first spadeful of earth, saw in that practical act the promise of a day when our fondest dreams would come true. That day has now dawned. The Exposition is completed and the finished product is even more beautiful than our dreams.

In throwing open our gates, which is equivalent to announcing that San Diego has become the host of the nation and of the world, the officers and directors of the Panama-California Exposition and the people of this community extend a hearty welcome not only to the people of the states which make up this Union, but to the people of the entire world. And it is to the thousands who will come to San Diego from all parts of the world that the exposition will look for support in this great undertaking. For the kind interest already displayed by different sections of the country and a debt of thanks is due, and this debt we hope to pay by a liberal hospitality in dealing with the vast armies of visitors who will come to our gates.

Our thanks also are due to the officials and commissioners of the various groups of California counties and the several Western states for the beautiful buildings that have been erected on these grounds and for the splendid exhibits that have been arranged. These buildings and these exhibits will go far in making the Exposition representative in its scope and will bring to the minds of visitors from the East the varied opportunities and possibilities of the vast empire that lies west of the Missouri river.

The presence of so many distinguished persons on this occasion, the personal representative of the President of the United States, the personal representative of the King of Spain, the several Senators, the Governors of many states or their personal representatives, and the Mayors of many Western cities, indicate the wide interest manifested in this Exposition, which expresses the ideals of modern America and the great West. To these distinguished guests and the thousands of persons they represent, we extend a most cordial welcome. At the same time expressing our sincere thanks for the aid given us by the sovereign states of Washington, Utah, New Mexico, Montana, Nevada and Kansas, whose buildings and exhibits go far toward making the Exposition complete.

On this auspicious day, which sees the fulfillment of many high hopes, we must be excused if we felicitate ourselves on what has been wrought in what was, less than a decade ago, one of the less important cities in the United States. No more fitting occasion than this could be found to congratulate the city itself and the band of loyal San Diegans through whose unselfish and untiring efforts the Exposition has become a splendid reality. It is not necessary to mention these individuals by name. The list would be too long, for practically every citizen has felt a personal interest in the success of the undertaking, and men and women from all walks of life have not hesitated to give of their time and money in the supreme effort San Diego has made to fulfill a tremendous responsibility.

The work is finished. Far-seeing men planned a big project; other far-seeing men with wide experience have executed those plans, changing, elaborating and meeting obstinate conditions that could not have been contemplated in the original designs. In the meantime, the people of this community stood by with rare patience, encouraging by their moral and financial support the builders of the Panama-California Exposition. And to this municipality, the average men and women of San Diego, who, after all, are the real builders of the Exposition, too much praise cannot be given, and to them the officials of the Exposition extend their deepest thanks. The absence of adverse criticism has made the task a pleasure, so much so that what might

have been a irksome duty became a happy obligation. And it might be safe to say that the men who built this Exposition, from the highest official to the humblest workman, took joy in the work.

And what does it all mean? What does it mean to San Diego city and county? What does it mean to Southern California? What does it mean to the entire Southwest? It means that a vast new era has dawned upon this privileged land, this vast territory lying west of the Rockies and south of the Canadian Line, for the purpose of this Exposition was not selfish in that it desired only the development of San Diego. Indeed, the purpose was bigger and finer, being nothing less than the helping of all California, all the southwest, and indeed all of the west to realize itself. It was meant to call the attention of the world to the possibility of millions of acres of land that have been peculiarly blessed by nature and that have awaited through the centuries the touch that will transform them into the paradises of the Western hemisphere.

The Panama-California exposition was conceived as a fitting method of celebrating the opening of the Panama Canal, an undertaking which has astonished the world, an achievement which has been the dream of adventurers, travelers, pioneers and scientists for nearly four hundred years. This gigantic task has been accomplished, a waterway has been carved through the backbone of the hemisphere and the far points of the earth have been brought closer together because the continent has been separated and the earth's two vast oceans made one. The heritage of the ages has fallen to this favored coast and the dwellers on the Pacific slope suddenly find themselves the custodians of commercial possibilities never dreamed of by any people.

In order fully to grasp these opportunities the San Diego exposition was conceived and carried to completion. It was deemed wise to call the attention of the entire United States in a striking manner to the tremendous latent possibilities in the millions of acres of undeveloped territory which is rightly called the back country of the Pacific slope. Today that country is barely tapped and a careful analysis of government figures show that there is approximately 44,000,000 acres of arable land in the southwest that can be converted into rich farm lands. Some 8,000,000 acres are under partial cultivation, the revenue from which in farm products alone is \$143,000,000 a year. With the cultivation of the present undeveloped land this revenue can be increased from farm products alone to the astonishing figure of \$743,000,000 yearly. This has been the inspiration of the makers of this Exposition, the building of an empire where millions of human beings can be prosperous and happy in the new era which is dawning for the West.

Has any city ever been confronted with a more stupendous project? Has any city every more nobly responded to the task than has San Diego? Is it too much to hope that this official opening of the Exposition is but the harbinger of greater activities when this city shall become the center of vast activities, activities that mean the creating of conditions for the growth of the human family along wiser and more liberal lines? Is it too much to hope that settlers will come from all parts of the United States and Europe to make a teeming garden of the now waste places of the southwest?

The back-to-the-land movement is now more than a phrase. Experiments are being made in all parts of the country for the best means of wresting the maximum of results from the soil with the minimum of effort. These experiments are proving of wonderful value. The science of agriculture, as taught in colleges and universities, has revolutionized the methods of developing the land. The southwest will profit by all these efforts and when men turn their eyes to the place where land is still available, they will look toward the west for agricultural comfort and fortune as the pioneers turned to California in the '40's in the mad romantic quest for gold. Greater value than gold will be taken from the soil by the better trained and more systematic pioneers who will till the teeming acres of California, Arizona, Nevada, Utah, Oregon, Washington, Colorado, New Mexico and Montana.

And so a new kind of exposition has been builded. Not an exposition of results so much as an exposition of promise. We have attempted to show the visitor to this Exposition, not the products of industry but the processes by which the products are made. There is no haphazard piling up of exhibits, but you will find the fruits and flowers and vegetables of California actually growing, as on the thousands of ranches throughout the state. You will see a model orange grove with the trees full of the golden fruit. You will see tractors, plows and harvesters at work on the land. You will see cereals and grasses sown and grown in the field. You will see not only the actual work in a citrus orchard but the operations of farming on a large scale.

And these things will constitute the appeal to the man with sufficient brawn and brain who will be inspired to work the virgin miles of the land of the great Southwest. It will be these things that will cause men to invest their money in growing of grapes, of fruits, of timber forests, of nuts of all kinds, of pasture lands for the nourishment of large herds of sheep and beef, of the creating of large poultry farms and dairy projects. This is our boast, that we have arranged an exhibition of living and working enterprises which must become the inspiration of all who are tired of the futile grind of city life and who will turn to the west to work out the realization of their hopes and aspirations. From these new pioneers of the future will the great southwest be built and made of San Diego, California, and the great West, a new and better center of civilization.

Not only is the opening of the Panama Canal commemorated by the cross to this coast, which in those early days meant the coming of civilization. Although apparently slow in coming to its own, striking deep roots and rearing wide branches, with the substantial growth of a vast oak, the history of the Pacific coast is coincident, synchronous with the history of the Atlantic seaboard and, except for ineffectual raids of the Norsemen in the eleventh century, the history of development along the Pacific is earlier than that of the Atlantic.

Over 400 years ago, Balboa crossed the Isthmus of Panama and "stared at the Pacific." In 1542 an expedition under Juan Cabrillo sailed north in search of new lands and eventually anchored in the Harbor of the Sun. Later came Viscaino, whose party explored the west coast before Champlain navigated the St. Lawrence, before Hudson entered what is now New York harbor, and before the Pilgrims had established their English colony at Plymouth.

But these men, although bringing with them some elements of the culture of Europe, were, for the most part, daring spirits of adventure, whose mission was not so much to build as to discover. But with one of them, with Portola, came a humble but gallant priest, and with him came the seed out of which has grown California and practically all of the Pacific coast civilization. This priest, whose labors at the time seemed so futile, has since become the most prominent figure in the history of the state.

The name of Fray Junipero Serra is one to stir men's hearts to nobler efforts in all parts of the civilized world. He has a part in the glory of the coast and is especially cherished in San Diego where his little band began to make headway among savage conditions and where his first mission was erected.

It was here that the first mission was finished, which became the starting point for the series of missions that stretch the length of the state along El Camino Real. From that expedition the famous friar never returned, but his spirit remained and today the kind of Christianity he represented, the Christianity of labor and self-sacrifice, is symbolized in the noble group of buildings which have been erected on this site.

These buildings of this Exposition have not been thrown up with the careless unconcern that characterizes a transient pleasure resort. They are a part of the surroundings, with the aspect of permanence and far-seeing design. They might endure for a century and still appear the things of beauty which they are. Time will hallow them with its gentle touch. Here is pictured in this happy combination of splendid temples, the story of the friars, the thrilling tale of the pioneers, the orderly conquest of commerce, coupled with the hopes of an El Dorado where life can expand in this fragrant land of opportunity. It is indeed a permanent city and every building fits into the picture.

The idea of the exposition came to the people of San Diego like an inspiration, and with what seemed the power of a magic wand, not only the spirit, but the entire outward aspect of our city underwent a change. By that inspiration we have increased our population nearly threefold. We have transformed what was a town into a city. Hundreds of homes have been erected in new residential sections. The occupied area of the city has spread in all directions. Waste places have been made beautiful habitations where thousands of people live under pleasant conditions. Modern schools have grown up, as if by magic, with educational facilities that compare with the best in the world.

What was some 650 acres of arid and unsightly mesa and canyon land has been made over into one of the most beautiful parks in the country. Scores of new streets have been laid out, graded and paved. New systems of lighting and sewage have been completed. And what is of more importance than all else is the

work commenced to develop our harbor and waterfront, to make of it a port which must some day be the city's greatest single asset when the commerce of a peaceful world will come to the shores of the Pacific.

What are the lessons to be learned from an exposition of this nature? The chief lesson is in beholding what can be accomplished by any community which will work in harmony toward a common ideal. The ideal, in this case, was the creation of an exposition totally different from any hitherto held. This achievement has been brought about in the face of unbelievable difficulties. At first there was nothing more than the intention of building a fair. There was but little money in sight and it seemed impossible that the vast sum necessary for its realization could be obtained. But the splendid optimism of San Diego has triumphed and what only a few years ago seemed an impossibility is now a living reality. This is the principal lesson of the exposition, that with a good working organization anything can be accomplished. The San Diego exposition will remain a type of what can be accomplished as well as an inspiration for future endeavors.

The Exposition might also be pointed out as a pattern for the development of future Southern California counties. Here the desire for beauty and the practical working out of such a community went hand in hand, with the result that the aesthetic results obtained are practical results, results possible of repetition by any community that will set before itself an ideal and will work willingly for its realization. It is not too much to predict that Southern California communities will take this lesson to heart and build in the future with the idea of obtaining practical beauty values.

Many of the buildings of the fair will be permanent and remain an asset of great value to the future of San Diego. They will exist in the years to come not only as a memory of San Diego's great fair but as distinct ornaments of the city. This will be especially true of the noble quadrangle of buildings of which the California state is the dominant feature. With the establishment of the museum of ethnology and archaeology San Diego has the beginning of one of the most important museums in America. Future explorations will fill these halls with rare specimens of prehistoric man, and ultimately the city by the Harbor of the Sun will become the Mecca for scientists from all parts of the world.

From day to day American archaeology and ethnology are assuming more importance in the comprehensive science of man, and the aborigines who lived millenniums ago west of the Rocky Mountains are assuming larger significance in the speculations of investigators. With the nucleus already established, said to be the best in the west, our museum must sooner or later be of national, if not of international importance.

In the collection of specimens now installed the entire history of man as far as at present learned, is displayed. The various races and tribes whose history and traditions run back before the beginning of the Christian era, are shown by actual specimens that have been exhumed after centuries from the soil of Arizona, Utah, New Mexico, Central and South America.

We have sought, and, I believe, we have succeeded, through this exposition to create an effect, an atmosphere, if you please, that will come as a revelation to the visitor. He will see here the life of California epitomized. He will see home life as it is lived nowhere else under such pleasant conditions. He will see the flowers and the fruits of the west as well as a bewildering variety of unusual trees. He will glimpse in a short sojourn the result of a half century of struggle with stubborn conditions. He will realize that Californians have not been working in vain, and that they have made no exaggerated claims for the land they love. And above all he will carry back to the east the glorious message of promise that is the heritage of California and the West.

The gates of the exposition are open. San Diego invites the world to the Panama-California exposition.

ARMY AND NAVY REVIEW, 1915 --- PANAMA-CALIFORNIA EXPOSITION EDITION, Arthur Aronson, Managing Editor.

Calendar of Army and Navy Events for Year 1915

January

1. Opening of Exposition. Salutes from guns aboard all naval craft in the Harbor of the Sun, also from guns at Fort Rosecrans. Hundreds visit harbor to view big warships. U. S. S. San Diego and nine torpedo boat destroyers.
6. Lieutenant Joseph Carberry, pilot, carried Lieutenant Walter Christie, as passenger, breaking American altitude record for pilot and passenger by ascending 11,690 feet. He descended at the rate of 1,000 feet a minute, the fastest rate every recorded in this country.
8. U. S. S. Maryland arrives from Mare Island.
10. Los Angeles Chamber of Commerce parade. Army, Navy and Marine Corps participate.
11. Two new tractors arrive at North Island for use of army aviators.
14. Battleship Oregon complement cut for canal voyage.
17. San Francisco guests escorted through Fair by Military and Naval arms of the service.
19. Gunboat Yorktown arrives for lengthy stay.
20. Marines reviewed by President Davidson, H. H. Timkins, Rear Admiral Sebree and Major McKelvy.
30. Seventy men enlisted in the Navy during the month of January in San Diego.

February

1. Flotilla consisting of destroyers: Whipple, Paul Jones, Truxton, Perry and Preble are scheduled for practice in San Diego harbor.
2. Major Fay issues final lineup for big parade, ending with celebration at the Fair.
6. U. S. S. Colorado was selected to succeed U. S. S. San Diego as flagship of the Pacific Fleet.
6. Marines reach port after wild voyage. Cruiser Chattanooga brings thirty-three men for flagship in San Diego.
13. San Diego given an unusual treat when the first squadron of U.S. Cavalry passes in review before President Davidson of the Exposition.
14. First U.S. Cavalry Band departs for Monterey Station.
27. Sergeant P. Ocker of the First Aero Squadron ascends 10,000 feet in the air. Spectators are thrilled by sight.

March

5. Rear Admiral Howard becomes a full-fledged Admiral.
13. Lieutenant B. Q. Jones establishes American sustained flight for two passengers: 7 hours, 5 minutes.
16. Members of Congressional party take cruise about harbor and inspect fortifications at Fort. Rosecrans.
27. Hope is abandoned for F-4, as rescue ships fail to lift helpless craft from bottom, near Honolulu.

28. Franklin D. Roosevelt, Assistant Secretary of the Navy, enters harbor on torpedo boat destroyer Paul Jones. He said that the full Atlantic fleet was coming to San Diego.
30. Vice President Marshall and Franklin D. Roosevelt, Assistant Secretary of the Navy, visit the Fair escorted by Mayor O'Neill, Captain Rifenberick, aide to President Davidson, Lieutenant Commander Bartholf, aide to Vice President Marshall, Captain Lyman, President Davidson, Admiral Howard, H. O. Davis, Colonel Pendleton, Lieutenant Colonel Davis and Honorable Seth Lowe of New York.

April

7. Sham battle held on the Fair Grounds by Cavalry and Marines for Lubin Movies.
13. Aviators Lieutenant Byron Q. Jones and Lieutenant Thomas De Witt Milling leave for Mexican line.
14. Cavalry pay tribute to Congressman Kettner. Spirited review of four troops honor Congressman on his arrival at the Cavalry Camp.
15. Rear Admiral Pond arrives and ridicules "Mined Bay" story.
17. Senator Week of Massachusetts inspects Marines.
18. U.S. Cruiser New Orleans ordered to Turtle Bay for inquiry.
18. Rear Admiral Charles F. Pond flies with Raymund Morris in hydroplane at North Island.
24. Cavalry Review at Tractor Field, Exposition Grounds.

May

3. Commander H. J. Zeigmeier relieves Lieutenant Commander Edward H. Dodd as Commander of the First Pacific Destroyer and Submarine Flotillas.
8. Military men hold field meet at Fair.
17. "Admiral's Sweep" made by U. S. S. Colorado in channel off Santa Fe wharf. Captain Ashley H. Robertson turns his 13,000-ton cruiser without changing speed.
18. U. S. S. Colorado brings Marines back to San Diego.
22. Parade led by Colonel J. H. Pendleton as Grant Marshall for Ad Club of San Diego. Cavalry, Artillery and Marines participate.

June

8. Marine rifle march on North Island --- winning team in doubt.
9. Fair pays tribute to Admiral Howard. "Admiral Howard Day" celebrated by all branches of service at Exposition.
15. Lieutenant Arthur Christy executes triangular flight 3,000 feet in the air over North Island.
16. Naval Recruiting Record smashed in San Diego.

17. 1,400 men sail on board U. S. S. Colorado for Tobari Bay, including three companies of marines.
18. U. S. S. Chattanooga ordered by radio from U. S. S. Colorado to proceed to mouth of the Yaqui River.
20. United States assembles war supplies. Haste marks bow at Yaquis. Auto trucks ordered south.
21. U.S. Marines arrive at Guaymas aboard U. S. S. Colorado.
24. Marine landing considered unnecessary.

July

3. Army Aviator Lieutenant B. Q. Jones loops the loop four times in succession.
10. Cavalry boys guests of Virginia Brissac and Johnny Wray at Spreckels Theater.
16. First American Aero Squadron formed. Richmond Blues visit San Diego's Exposition.
26. Army fliers leave for Fort Sill, Oklahoma. Fifteen officers, ninety enlisted men.
27. Different branches of the service escort "Teddy" to U. S. Grant Hotel.
31. Target practice at Fort Rosecrans by 30th and 115th Companies witnessed by many San Diegans.

August

1. Rear Admiral Fullam thanks San Diego for kindness to Middle by radio from battleship Missouri.
5. Captain C. M. Condon leaves Fort Rosecrans for duty with military staff college at Fort Leavenworth, Kansas.
14. Veterans of Spanish-American War, Coast Artillery Corps, Cavalry, sailors from U. S. S. Colorado, Marines and National Guard of California, parade.
15. Ball at Hotel del Coronado for Admiral Thomas Benton Howard.
20. Two Companies, National Guard of California, 5th and 8th fire at Fort Rosecrans, making good scores.

First Cavalry Troops, B and M, under Captain George V. H. Moseley leave for Calexico.
21. Cruiser Raleigh arrives at San Diego on way to Mexican waters to relieve Cruiser Cleveland.
22. Thousands of children visit U. S. S. Colorado.

Fifth and Eighth Companies, Coast Artillery Reserves, return from Fort Rosecrans.
24. Rear Admiral Cameron McRae Winslow to relieve Admiral Howard about September 1, 1915.

September

4. Mexicans attack U.S. aviators, Lieutenants Morrow and Jones and troops at Brownsville, Texas.
5. Torpedo boat destroyers, cruisers and gunboats to hold target practice from October, 1915 to,

April, 1916 off San Diego.

6. Oscar A. Brindley, military aviator school instructor at North Island, saves Tiny Broadwick and himself by exception skill during fight with the elements at the Exposition.
9. Captain Townsend F. Dodd, U.S.A., ordered to Brownsville, Texas. He holds American record for flying with passenger.

Army, Navy and Marine parade for Admission Day, Colonel Pendleton, Grand Marshall.

13. Admiral Cameron McRae Winslow relieves Admiral T. B. Howard as commander-in-chief of the United States Pacific Fleet. Ceremonies conducted aboard U. S. S. Colorado. U. S. S. San Diego becomes flagship of Pacific Fleet.

Major General George W. Goethals, builder of the Panama Canal, visits Panama-California Exposition. Reception by President Davidson and Officers of Army, Navy and Marine Corps. General Goethals reviewed the Marines at 4:00 p.m. and at 5:00 p.m. delivered an address on the Panama Canal at the Spreckels Organ.

16. Ex-President William Howard Taft visits Exposition. Escorted from train to Exposition by one of the largest Military and Naval parades of the year. Reviewed troops from steps of Sacramento Building.
17. Lieutenant Walter Taliaferro establishes a new American sustained flight record, remains aloft 9 hours and 48 minutes.
18. "Marine Day" at the Exposition. Dancing in the evening at Organ Pavilion. Music by Marine and Coast Artillery Bands.

Los Angeles Times, January 1, 1915, 1:1-6, 9:1-4. Gates of Magic City of White Thrown Open to The World; A Million Shouts Break Against Fair and Stately Buildings in a Paeon of Wonder and Delight; Press of a button in Washington by President Wilson draws the bolts from the doors through which the throngs are pouring in ecstasies of the occasion and the New Year --- twelve months of jubilee begun, by John Lloyd.

Los Angeles Times, January 1, 1915, 1:3. Women Guests Are Honored; Dinners and Entertainments Galore Prepared.

Los Angeles Times, January 1, 1915, 2:1-2. Big Fair of Southland Mecca for The West; Host of Celebrities Royally Entertained by the Exposition Officials; Launching of Great Educational Display is Witnessed by Governors, Washington Guests, and Representatives of the Army and Navy, Who Join in Congratulating the Promoters on Magnificent Enterprise, by Harry C. Carr.

Los Angeles Times, January 1, 1915, 2:5-6, 4:5-6. Amazing Beauty of Exposition; Spanish Architecture Rivals that of Old Masters; Evolution of Industry is Vividly Portrayed; Picture Worthy of the Gods Presented to Visitor, by John Lloyd.

San Diego Union, January 1, 1915, 2:3. Exposition Officials: In the hour of the Exposition's triumph, it is fitting to mention briefly the names of those who started the great enterprise and took the preliminary steps, so fraught with uncertainty and striving, that marked its earlier years. Some of these are no longer connected with the Exposition officially, but all have supported it with heart and purse from the beginning until today. On September 4, 1909, at a meeting of the Panama-California Exposition Company, the following men were chosen directors:

Simon Levi, U. S. Grant, Jr., A. G. Spalding, L. S. McLure, Ralph Granger, Fred Jewell, John H. Gay, William Clayton, John D. Spreckels, C. L. Williams, Arthur H. Marston, Julius Wangenheim, Lyman J. Gage, J. W. Sefton, Jr., L. A. Blochman, D. F. Garrettson, F. W. Jackson, C. E. Grosbeck and George Burnham. These were the men who started the Exposition on its way.

On September 10 of the same year, the directors met and elected the following officers: President U. S. Grant, Jr., first vice president; John D. Spreckels; second vice president, A. G. Spalding; third vice president, L. S. McLure; fourth vice president, G. Aubrey Davidson; temporary secretary, F. G. Spaulding; and director-general, D. C. Collier. Later L. G. Monroe was chosen secretary. On January 10, 1910, at the first annual meeting, these officers were reelected and F. W. Jackson was made treasurer.

To fill vacancies caused by resignations, the following men who are not now on the board of directors were chosen during the four years of the Exposition's history: January 10, 1910, L. R. Armstrong, W. R. Rogers; March 27, 1911, E. W. McKenzie, John F. Forward, Jr.; January 10, 1912, H. L. Miller; January 10, 1913, John E. Beal.

After taking the presidency on November 23, 1911, upon the resignation of U. S. Grant, Jr., D. C. Collier resigned on January 10, 1914; and G. Aubrey Davidson was selected to succeed him. The other officers elected with President Davidson and who are in office now that the Exposition is open are: First vice-president, John D. Spreckels; second vice-president, F. J. Belcher, Jr.; third vice president, H. H. Jones; fourth vice-president, George Burnham; secretary, H. J. Penfold; treasurer, F. W. Jackson.

The present directors of the Exposition are as follows:

R. C. Allen, Lucius R. Barrow, F. J. Belcher, Jr., L. A. Blochman, George Burnham, William Clayton, D. C. Collier, G. Aubrey Davidson, C. W. Fox, D. F. Garrettson, Percy Goodwin, F. W. Jackson, H. H. Jones, M. F. Heller, W. F. Ludington, Arthur H. Marston, J. W. Sefton, Jr., W. A. Sloane, John D. Spreckels; C. L. Williams and Julius Wangenheim.

San Diego Union, January 1, 1915, II, 4:1. Editorial: The Exposition Auspiciously Opened . . . The New Year's gift to San Diego is the triumph of the most ambitious enterprise ever undertaken by any city of Southern California. With the advent of 1915 the great Panama-California Exposition became an accomplished fact, under auspices that proclaim it an affair of the nation as well as the state. The President of the United States, personally represented here by a member of his cabinet, gave at Washington the signal for the formal opening. The Governor of California, the executives of other commonwealths, and distinguished citizens of foreign countries, took part in the ceremonies, and thousands of residents of San Diego and other cities acclaimed the successful beginning of an unique celebration of the completion of the waterway that connects the Atlantic and Pacific oceans and revolutionizes the commerce of the world to the advantage of mankind. Never before was an exposition more auspiciously launched.

Four years ago, when assurance was given that the dream of centuries was to become true --- that the Isthmus of Panama would be pierced by a waterway that would be completed in 1915 --- the very proper suggestion was made by a public-spirited resident of San Diego that this city, as the nearest port to the new avenue of commerce, and the one that would chiefly profit from it, should celebrate that world event by a great Exposition. The plan found favor at once. It has been forwarded by the tireless labor of San Diego's citizens in all walks of life, by liberal subscriptions from the people of this and other communities, and by substantial pecuniary aid voted by the residents of this city. At the outset it was agreed that there should be no attempt to hold what is usually termed a "World's Fair." It was realized that if the San Diego celebration of the canal opening was to be made an unqualified success, there must be a radical departure from the "World's Fair" idea. The latter has been so often borrowed from the Centennial Exposition at Philadelphia in 1876 that the very terms had become hackneyed. In a word, the original "World's Fair" idea had been overworked and people were tired of it. Hence, San Diego's decision to arrange a display that should be totally different from any previous ones and as attractive as it was different.

The Exposition that is open today is the result of strict adherence to that plan. While no effort has been spared to show materially the development, resources and prospects of the great Southwest, there has been intelligent endeavor to paint the picture with harmonious coloring. The artistic treasures of even the desert have been reproduced, and the wealth of nature's gifts in his unrivaled climate have been lavishly displayed. Nor have the material adjuncts that will appeal most strongly to the homeseeker been omitted. The California and the great Southwest of this generation are portrayed at this Exposition as never before. And the visitor, coming, perhaps, from outside this state, will hardly know which to admire most --- the evidences of potential wealth for all who will seek it, or the beautiful environment in which they are displayed at Balboa Park.

But it is not the design here to enter into a description of the Panama-California Exposition. It is described in detail very graphically elsewhere in these columns this morning. It is the purpose rather to congratulate San Diego upon the triumphant success of the great endeavor on which the people of this city have devoted time and money during the past four years. And it may not be amiss to suggest to them that their success is the more notable because it has been achieved in the face of obstacles that would have deterred a less resolute community from going forward with its plan. Thanks too are due to the outside communities that have contributed so materially toward making the Exposition the attraction that it is. San Diego owes much to them, and although the debt may not now be paid, it will certainly not be forgotten.

And to all who have labored to make the Panama-California Exposition a success --- San Diego's people and those of other communities --- **The Union** extends felicitations on the splendid results, and hearty New Year's greetings.

San Diego Union, January 1, Special Section, II, 2:1-4. Exposition Beautiful Opens Gates to World, by D. C. Collier. . . . Pluck and perseverance have triumphed. The Panama-California Exposition in San Diego is a reality --- a grand and glorious reality. Our dream of five years ago has come true, and the time is here for congratulations. Let us congratulate ourselves at the eve of pregnant years to come.

San Diego now presents to the world such an Exposition as never before was built. The claim of those who originated it, that it would be unique and that it would have a charm and present an atmosphere never before attained by any exposition has been fully carried out. Such an Exposition has been built in San Diego that no thought of comparisons can come into the minds of its visitors; no thought of anything except how beautiful and delightful it is.

From the very moment of its conception there has been no doubt in the minds of those most intimately concerned with its progress regarding the success of this Exposition. It was founded on a rock. It was an Exposition with a clearly defined purposes; that purpose being to demonstrate to the world the great possibilities in the development of the Pacific states, the great region lying between the Rockies and the ocean to the west, and to show that San Diego, because of her geographic situation, her climate, her harbor, her soil, and her people, was destined to play a most important part in that development.

States Respond Bravely

The states lying west of the Rockies, the peoples of the various countries that will have closer social and commercial relations with these states because of the opening of the Panama canal, and manufacturers and dealers in such wares and commodities as will find a market in these states were all asked to participate in San Diego's Exposition and their response has been generous and hearty. Exhibits have not been made at San Diego by governments, purposeless exhibits like those seen at other expositions, where the holding of lavish entertainments was the sole object, but the state of California has provided for this Exposition, the most beautiful and substantial exposition building ever built on any exposition grounds, and the counties of California have provided other buildings and exhibits of the products of the soil of California presented in a way that has never before been attempted. The states of Washington, Montana, Utah, Nevada and New Mexico all have built elaborate exhibit palaces and placed in them exhibits of their products, their commerce and their social life.

The San Diego Exposition has collected and presents an exhibit of the early life of the two Americas, the like of which has never before been seen in the world. It is an exhibit worth going half way round the world to see.

Amusement features have been secured for the San Diego Exposition more elaborate and more interesting than every seen at any of the expositions of the past.

Above and beyond all is the horticultural display presented by the Exposition itself, nothing more nor less than a perfect demonstration of what California is and what California can do. Its architecture, its setting, and its adornment will entrance the visitors to this Exposition, will grip them in their first vision of it, and hold them enthralled forever. They will never forget it; never will the picture be effaced from their minds; and when they must go away from San Diego, they will take away with them a longing for all the things that the San Diego Exposition means to him who would really live, that sometime will bring them back to San Diego, just to live.

World Invited to See

And so the really big thing is that San Diego has builded this Exposition. There is the wonder of it, and there is the thing that will bring back to San Diego payment many times over for all of the money and the energy, the trails and the tribulations that have been expended upon it. First, the visitor will marvel at its beauty and its magnificence; its quality and its real worth, and then will come the thought that a little city, way off in one corner, has done this, and the visitor will ask himself: What sort of people are those of San Diego who can conceive of such a thing and build it?

But because the Exposition is builded, we of San Diego must not sit back in calm content and say, "There it is, come and see it." We have yet a great work to do, all through the year 1915. We have invited the world to come and see what we have done; now we must see that those who come are properly and well entertained. It is not enough to point the way to the Exposition gates, when the visitor comes to San Diego. San Diego, herself, is on display. In many and various ways, and in fitting and appropriate ways, San Diego must say to all the visitors in 1915, "You are welcome here, we are glad to have you come" --- and prove it.

Looking on while San Diego has been building her Exposition, the people of the world have said, What a splendid spirit of cooperation and steadfastness the San Diego spirit is! Soon these people will be among us, and it is for us to show them that this spirit has not been broken with the completing of the Exposition, but that it has been strengthened and that it embraces also hospitality and the open heart.

San Diego Union, January 1, 1915, Special Section, II, 3:1-7. Director-General H. O. Davis writes article about the Panama-California Exposition as the first purely constructive Exposition.

San Diego Union, January 1, 1915, Special Section, 3:2. Inspired Pen Has Revitalized Old Spanish Story.

San Diego Union, January 1, 1915, Special Section, 3:7. Most Perfect Rose to Be Chosen at Potpourri Gardens. . . . Just each of the marine camp on the lower plateau is the potpourri rose garden, of which Mrs. Jessie C. Knox is in charge. Mrs. Knox is attempting to show what can be done in the development of an entirely new industry in California, supplying this country with a potpourri which at present is made largely in Europe.

A contest, which Mrs. Knox intends to hold during the year, to determine which is the most perfect rose, promises to do a great deal for rose culture in the United States. Other contests she is conducting include on in ceramics for the jars to contain the potpourri. There are numerous entries from different parts of the country.

San Diego Union, January 1, 1915, Special Section, 3:8. History of Exposition. . . . The birthday of the San Diego Exposition can be considered as September 9, 1909, when, at a meeting of the Chamber of Commerce, G. Aubrey Davidson proposed that the first port of call should hold the official celebration of the opening of the greatest waterway in history. The suggestion was taken up immediately, and so rapidly did the plans get underway that, in July of the following year, the groundbreaking ceremony was held.

The first official spadeful of earth was turned four and one-half years before the dawn of 1915. Construction work, however, did not begin on a considerable scale for more than a year afterward, when the Administration building was erected, and gradually the arms of the engineers began reaching down what is now known as El Prado. The difficulties with which the builders of the Exposition had to cope are too well known to need reviewing for the people of Southern California.

Several months after the Exposition was chartered, and actually underway, San Francisco decided in favor of the Panama-Pacific International Exposition and went to Washington in search of government recognition. Immediately there was a disagreement between the two California cities. New Orleans sought to take advantage of that Western division by stepping in and rallying about itself the support of the North and East, in order that New Orleans might have the 1915 world's fair. In order to keep the great event on the Pacific coast, San Diego withdrew voluntarily and gave cordial support to San Francisco. The result was the starting of a world's fair at San Francisco, based on ideas which had prevailed to a greater or lesser degree at world's fairs of the past.

Expositions Differ

It remained for San Diego to originate something and, although the two cities are 500 miles apart, it was recognized as certain that two events of identical type could not draw as well as two of different types. Hence, San Diego set about to create something new and something different. The result of that determination is seen and heard and actually felt throughout the grounds of Balboa park. The architecture, of

course, is entirely different. The gardening treatment is quite as different from fairs of the past. In all likelihood there never will be again any finer, handsomer architecture than is visible in San Diego.

The scope of the Exposition is different. The form of its exhibits and concessions is different; even the series of special events are different from special events at previous fairs. The effort has been to show the Eastern tourist that the American West has such an infinite variety that two great expositions can be held at the same time without clashing with each other, and without duplication of each other's efforts.

At the outset, of course, it was expected that there would be extensive foreign participation. Colonel D. C. Collier, the first president of the Exposition, and perhaps the one man in San Diego without whom the Exposition could never have been held, devoted his entire time to the cause of getting state participation, and later, foreign participation. His travels through Central and South America are recalled, as well as those in Europe. For a time his labors seemed to be attended by considerable success, but eventually it became obvious that the foreign participation of San Diego would be the participation of foreign industrial leaders, rather than of governments. The largest of these exhibits was the Japanese, which, in fact, is looked upon today as the most important industrial exhibit Japan has ever made.

Placing of Buildings

In the latter half of 1914 people began to see that the lack of extensive government participation was not an unmixed evil, for San Diego had learned not to expect it. If there had been any such expectation, there would have been disappointment, for the war had changed everything. The foreign industrial exhibits persist without any disturbance.

With the decision to build the Exposition in the 1400-acre Balboa park came on the discussion as to exactly where the buildings would stand and what should be the treatment of the grounds. The landscape architecture firm of Olmstead [sic] Bros. made a considerable start. Bertram Goodhue, the architect of the west group of buildings, comprising the California and Fine Arts buildings, made his plans for the entire colony. And then came Frank P. Allen, Jr., director of works, and changed the Exposition in many important details.

Probably there is none of the many unique features of the Exposition more unique than the success in opening it not only on time, as announced five years ago, but also opening it free of debt --- a feat which is almost without parallel in exposition history, and in itself a rare tribute to the financing and managing ability of the people of San Diego and those whom they selected to build and operate the Exposition.

Representative Exhibits

In the same way, under great discouragement due in great part to the war, and the fears the was inspired in the minds of industrial leaders, the Exposition went ahead and secured probably as fine an array of American exhibits as have been gathered together --- not the largest array, to be sure, but quite as representative as could be found. The competitive ideas in the exhibits were abandoned years ago in San Diego, and, instead of competition, the exhibitors were furnished with real service. The entire field of industry was gone over carefully by experts, leaders in that industry selected, and then these leaders were given the opportunity to get an exhibit. The individual exhibitor recognized in this policy the genuine service to himself, because he would be able to show his manufactures without having the visitor distracted and wearied by a similar display made by several other industrial leaders in the realm of business. The attention of the visitors is kept keen and the benefit to the exhibitor is consequently at a maximum.

Working with a limited amount of money, and with the firm intention to open free from debt, the Exposition's outlay in every department was not nearly as great as it might have been. More money could have been used to good advantage, but the limited money on hand was made, simply because it was limited, to do twice as much work as it would ordinarily have done. The operating force has been kept at a minimum, and salaries generally have been at a minimum. Many of the officials who have done most gallant work have done so without any reward or hope of reward, but purely out of zeal to do their best for San Diego and the

American West. That is another impressive feature of the Exposition --- the devotion to a cause bigger than was the cause of any previous world's fair.

City to Benefit

San Diego as the first port of call should benefit materially from the Panama canal. That was one idea in many the Exposition had, and from the celebration itself San Diego should benefit materially, but that is not the prime purpose. The bigger, broader and better purpose is to assist materially in the development of the whole West --- San Diego's back country, if that expression may be used. The benefit to San Diego is indirect. The benefit to the Western states is certain, for the great aim has been to show the tourist from other parts of the country and from other parts of the world, what there is in the new country on each slope of the Rockies, that holds definite opportunity for the settler. That settler may be a farmer, or a merchant, or a manufacturer, or an artisan. Whatever he may be, he can find in the Western empire work for him to do, if he has the heart and the brains and the hand to do it.

The great effort is, perhaps, to build up the agriculture in the West; to cultivate the 44,000,000 acres of undeveloped land, potentially just as good as that now being developed and cultivated, just as the present 8,000,000 acres are being cultivated, to turn the desert into a garden and mere resources into revenue producing investment. In seeking to help itself, San Diego seeks to help the West more.

This today is generally realized, and the support which the exhibiting states are giving San Diego establishes another record in exposition history. It is an Exposition of a new type, and the best type the world has ever seen. And this has been done by the smallest city which ever held a Fair of such dimensions --- a city which started the building with only 35,000 inhabitants --- a city which was told the plan was hopeless and could not be carried out, a city of boundless energy and boundless future.

San Diego Union, January 1, 1915, Special Section, 4:1-3. Architectural Gems of Old Spain Revived. . . . Probably no single feature of California, outside the majestic natural wonders of the state, has attracted more interest than the old Spanish missions, which extend from San Diego de Alcalá to San Francisco de Solano. Probably no other spirit of architecture is so completely in harmony with the California landscape. Certainly none is associated more definitely with the rare old Spanish traditions which still live in California's life of the present day, and yet there has been a singular neglect of the Spanish-Colonial type of building in the construction of new buildings along the coast. This circumstance was fully realized by the management of the San Diego Exposition five years ago, when plans were being made for the buildings which should stand on top of the lofty mesa which looks down over the sea and back over the canyons to the mountains.

The Exposition might have gone ahead and erected buildings of Greek or Roman type, or other conventional types which have appeared at all world's fairs of the past. Beyond a doubt the results would have been beautiful for all buildings are beautiful when they are set in the gorgeous landscape which is possible in California as a whole, and in Southern California in particular. Beautiful the result might have been, but nothing would have been created. Consequently, the Exposition adopted a different plan, and now offers to the world something which is not only wondrously beautiful, but also is creative in that it has brought about a genuine renaissance of the glories of Spanish art and architecture, and something which is productive of a very great appeal to the romantic tendencies which linger in the most prosaic.

Plunge Into Past

The impression of the architects who have seen the Exposition in the city at the far southwest, is that there has been revived an art which should have been revived decades ago, but which now re-created, is destined to take on new life and strength and to last for many years to come.

The visitor comes up to the edge of Balboa Park from the wharves or railway station, passing en route buildings typical of a twentieth-century city, the rattle of street cars and the hum of modern industry fills the way. He bursts through a grove of palms and finds himself at the end of the quarter-mile Puente de Cabrillo. He crosses this impressive viaduct and comes to the great stone gateway, not spick and span as though it had been built especially for this occasion, but softened by the sandblast and chipped here and there to bring

about the appearance of antiquity; it is just such a gate as might have stood at the portal of a city in old Spain of two or three or four centuries ago.

He passes through the gateway and immediately the hum and bustle of the twentieth century die away. At one side is an impressive cathedral, copied in many essential details from the magnificent cathedral at Oaxaca, Mexico. At the other side is a plain old mission of the California type, and right away is noticed one of the extraordinary features of this Spanish-Colonial architecture, for the ornate cathedral faces squarely into the somber old mission and yet there is no clashing and no discord. This probably is not true of any other school of architecture. Down El Prado the visitor walks between rows of black acacias, set in verdant lawns, on each side beyond the lawns is a thick hedge of poinsettia, its crimson flashing brilliantly against the green of the coprosma and the other shrubs. Just beyond this hedge rises the long Spanish arches which line the arcade, stretching from La Puerta del Oeste clear along El Prado.

Here is another old mission of the California type, and over across the canyon a mission of the older New Mexico type, quite as much Indian as Spanish. Down this way is a building of the pure municipal type seen today in all Spanish-American cities. Here is a rustic residence, and there an urban palace. A great building with colored cornice introduces its interesting Moorish feature. Another building at the end of the Isthmus introduces the Moorish arabesque and minaret and other features which have been adopted in some measure by Spanish-America itself.

Variety at Every Turn

Everything is Spanish-Colonial, and yet there is variety sufficient to lend fresh charm to the view. There are openings in the long arcades which lead into quiet patios whose calm is broken only by the plashing of a fountain of Pan. There are rose-covered gateways leading into pergolas which dot the broad lawns adjoining the buildings and stretching back to the brink of the canyons. There are curious exedras in the botanical gardens, there are stone balconies looking over the gulches which have been planted with a might variety of semi-tropical plants. These canyons furnish a most important feature of the general landscape. One reason for the extraordinary results which San Diego has brought about with a limited amount of money is that Balboa Park, as it was when the Exposition started, supplied a site which is quite incomparable in exposition work. The great mesa occupying the center of the 1,400 acre park is cut by deep ravines whose contour furnishes admirable opportunity for the development of most appealing treatments. The canyons, to be sure, like the mesa, a matter of four years ago, were of hard-baked adobe in which grew nothing except cactus and sage and chaparral. By the liberal use of dynamite, by plowing and harrowing and incessant watering, these canyons have been made to bloom into a succession of great gardens which probably have no peer anywhere in the country.

The height of the bridge has been accented by the use of Italian and Monterey cypress. Beyond the zone where these trees are used is a wealth of eucalyptus and acacia. Some of the trees are the varieties which bear the brilliant crimson and golden blooms. The end of the canyon has been devoted entirely to a variety of palms, also there are palms used extensively elsewhere in the canyon treatment. The brilliant cannas and the soft gray of the *acacia baileyana* and some of the rarer grasses have been used to add further color

Rare Flowers Soften Lines

Not only was San Diego endowed at the outset with this admirable site for the Exposition, which could not have been bought for millions, but also it was endowed with the quite invaluable gift of climate, a climate which is the same the year around, it knows no frost, nor torrid heat, and it allows the most amazing riot of hundreds of varieties of trees and shrubs and clambering vines and small blooming plants. Over all the arcades sweeps this display of vines, with the purple bougainvillea used dominantly along El Prado, with roses used in this patio, clematis in that, and jasmine and honeysuckle elsewhere. The effect of this floral display is of great importance. Probably no other single feature at the Exposition is of more importance. It must be remembered that the majority of visitors to San Diego in 1915 will be Northerners and Easterners who have no conception of the glories of Southern California's climate and the amazing heights of beauty to which the California flora mount.

There is another point which impresses mightily the architect and engineer who likes to see full value received. There has been little of previous world's fairs more genuinely depressing than the sight on the day after the fair closed, when the tearing down of the buildings began. The structures at San Diego have been built to stay --- that is, those structures which are entitled to permanency. The smaller structures along the Isthmus, being erected purely for amusement, will be torn down immediately, but all the other buildings will stand for many years to come. The great west quadrangle, for example, dominated by the California State building, is built entirely of steel and concrete and will be used in years to come to house the museum exhibits which have been donated to the Exposition with the definite understanding that they would remain as long as the building itself stands.

Building Reverts to City

The wealth of rare flowers in the Botanical Building is assembled for permanent use, as that building, too, is of steel and concrete. The administration building, the fire station, the hospital, and the other service buildings are for permanent park uses. The great music pavilion, which stands at the lower end of the Plaza de Panama, is of the same steel and concrete construction, and becomes the property of the city immediately after the Exposition is terminated. All of the other buildings are of staff and plaster, but these perishable materials are placed on a firm backing of metal lath. Furthermore, the entire absence of frost and sudden changes of temperature and gales and drenching rains from this particular section of the San Diego valley makes certain a much greater degree of permanency than would be possible anywhere else. The life of these buildings is figured at from twenty to thirty years with proper treatment of the staff each year. The great Puente de Cabrillo, which cost approximately \$150,000, is also, of course, of permanent construction, and is of genuine interest from a purely engineering standpoint as the first example of reinforced concrete construction of the cantilever unit type on so large a scale.

The supplementary features which have been introduced by the Exposition management to carry out the Spanish ideas are in a rare spirit of harmony. For example, not only are the buildings purely Spanish, but the guards and attendants at the Exposition throughout 1915 are attired as conquistadors and caballeros, the bandmen are dressed in Spanish uniform, the dancing girls who appear in the Plaza de Panama and at different points along El Prado are Spanish dancing girls, in the bright costumes of old Spain, presenting the dances of the Spanish capital of four centuries ago. Some of the fiestas, which will rank as special events, are the fiestas of the Spanish-American countries. Thus in the field of special events are the religious ceremonies of the Aztecs and Toltecs, and the other ancient red races. These displays then figure as more than special events because they are inseparably associated with the architecture itself. Very little is left to the imagination of the visitor save the feat of transporting himself backward three or four centuries and recalling that this magic city on the mesa is the city that was dreamed of by Cabrillo four centuries ago and by the succession of conquistadors and padres who followed after. It is an Exposition beautiful in appearance and in spirit alike.

San Diego Union, January 1, 1915, Special Section, 4:2-3. Tourists protected by uniform scale.

San Diego Union, January 1, 1915, Special Section, 4:6-7. Counties and Western States Housed in Noble Structures. . . . With the main exhibits of the Exposition designed to show to the visitor the opportunities of the American West, the leading states of the West have erected imposing buildings to carry on the lessons taught in its general features. It is their task to show what each state has to offer. Most of the buildings are located on the lower plateau and are almost the first to strike the eye of the visitor, whether he comes from El Puente Cabrillo or along El Paseo to the south gate. Two of the states have placed their exhibits elsewhere --- Nevada, whose exhibit is placed in the heart of the outdoor display along the Alameda, and California, whose imposing \$250,000 building stands close to the west approach, its great tower and dome dominating the architectural scheme of the whole grounds and visible for many miles.

The California Building, however, is not devoted to a display of the state's resources, as this has been left to the buildings erected by the individual groups of counties, of which there are five.

The Sacramento Valley and the mountain counties display their varied resources in a building at the north end of the Plaza de Panama. The building is one of the finest on the grounds, palatial in character. Along the

front is a line of imposing pillars, back of which is a deep alcove, which forms an entrance to the building itself. Within the great hall, the woodwork of which is entirely of burned pine, are gathered the wonderful resources of the valley and mountain districts of the north part of the state. There are some unusual features, such as the jars which apparently support the weight of the central exhibit. Around the walls and in the alcoves are broad benches and a thick growth of permanent plants.

Counties Represented in Fine Buildings

The middle portion of the state is represented by the San Joaquin Valley Association, whose building in the east side of the lower end of the plaza is probably the best on the grounds of the municipal type, familiar in Spanish America. Here has been devised an extraordinary mural decoration scheme. The workers, men and girls from the valley, having arranged unique designs in grains and grasses to cover the panels and ceiling of the building. Colored photographs set forth the various industries of the San Joaquin Valley.

The third large group of counties, comprising the southern section of the state, have erected an imposing building near the south gate, and back of that building they have laid out one of the most important displays on the grounds. The building itself opens into the formal garden through which one walks to get to the citrus orchard on the other side of the Calle Colon. Here in this orchard are the many varieties of citrus fruit: the orange, lemon, grapefruit, kumquat, tangerine, and a row of astonishing trees, in the trunks of which have been grafted numerous varieties of citrus fruits. These varieties are seen growing well under conditions which are almost incomprehensible to the visitor from northern climes.

Across the Alameda from the citrus orchard is the model intensive farm, which demonstrates what can be done in a small tract of five acres or even less, and how a man can make a good living for himself and family, and save money besides. In the center of the model farm are shown many of the fruits of California, including the peach, apricot, fig, olive, apple, cherry, alligator pear and a few walnut trees. Here, too, is shown the full-bearing vineyard.

Smaller Groups Participate

Two smaller groups of counties are also represented, Kern and Tulare, whose graceful building lies across the Esplanade from the San Joaquin Valley building, close by the entrance to La Via de Los Estados and Alameda and Santa Clara, whose building is directly across the highway leading down into the state plateau. Here, too, are shown the resources which these sections offer the man who wishes to live in California. The visitor will realize after a tour of the buildings, the extraordinary resources of the Golden State, whose industries are almost as numerous as the industries of the entire United States.

At the entrance of the lower plateau begins the succession of state buildings. The first is Kansas, whose appropriation was not sufficient to give anything like the display the Kansas commissioners indicate they would like to give at this new type Exposition. With the limited funds on hand, however, was erected a small pavilion, where the visitor can at least get an idea of some of the principal features of Kansas life.

Beyond is the Utah building, surmounted by two large cupolas in red tile and four smaller pinnacles grouped about them at the corners. Next is the structure of the state of Montana, assisted by former Senator William A. Clark, whose personal gift of \$10,000 materially increased the scope of the exhibits. Directly across the way is the Washington buildings, so constructed that the rear balcony overhangs the canyada which itself leads out from the Canyon Cabrillo. Washington has laid especial stress on its forestry exhibits.

Old Mission Copies

The last of this row is the New Mexico building, a replica of the ancient mission on the Rock of Acoma. One is immediately impressed by the quaintness of the exterior, which shows the manner in which the Spanish settler utilized Indian ideas and Indian materials in building. For example, there are no rounded arches, such as came into California at a later period. The links are generally straight. The towers and walls are thicker at the bottom than at the top, this being due to difficulties in building with adobe.

The Nevada building, lying between the Standard Oil building and the Lipton tea plantation, is another imposing Spanish structure in which the rounded arch continues to play a dominant part. The original intention was to have Nevada occupy the space between the Utah and Montana buildings, but owing to the advanced state of the gardening at the time Nevada was ready to build, the state consented to place its exhibit on the Alameda.

San Diego Union, January 1, 1915, Special Section, 4:7-8. The Outdoor Organ. . . . An outdoor organ, probably the largest of its kind in existence, presented to the San Diego Exposition by John D. Spreckels, will be one of the most beautiful permanent features of the city. Situated at the lower end of the Plaza de Panama, the organ is housed in a great vaulted structure 75 feet high, from which branch curved colonnades terminating in square exedras, with a total span of something over 300 feet. The entire structure is built of steel and concrete throughout, but the effect of marble is given by the concrete pillars which form a double line along the colonnade.

The structure at the center, where the organ itself is built, is in reality nothing more than a sounding board, constructed with such close attention to acoustic properties that it is expected to throw the sound of the full tones the full length of the Plaza de Panama, which stretches a thousand feet to the north. No covered auditorium has been built. The extraordinary climate of Southern California makes it possible to have the audience seated on benches scattered about the plaza and in the cloisters and arcades of the mission buildings adjoining.

Cost of Great Organ Pavilion \$100,000

A gorgeous display of semi-tropic California flora clammers over the colonnade of the organ pavilion. Past the west end of the colonnade leads La Via de los Estados, the boulevard which winds about the plateau where the different state buildings are situated. Past the east end of the colonnade leads another path, which touches the edge of the Canyon Espanol and then winds back into the Plaza de Panama, and so continues down El Prado, the main highway of the Exposition Beautiful. From the walk along the colonnade is obtained a view across the deep canyons and across the roofs of the city to the harbor, to the strand of Coronado, to Point Loma with its bristling guns of Fort Rosecrans and the domes of the Theosophical Homestead, and far beyond the great Pacific. It is a panorama which can inspire the best in music, just as it inspires the best in painting and literature.

The organ pavilion is the last of the main structures in the Exposition grounds to be completed. Its total cost will approximate \$100,000, of which \$33,500 is the cost of the organ itself. A considerable amount of the cost is in the art stone which makes up the front of the building. The formal dedication will come on this New Year's morning, when a festival program of classical music will be given.

Throughout the year this organ will be used for regular and special events. It will come into its most important use probably in the late spring when the Mendelssohn Choir of Toronto is expected to visit the coast and spend a full week in San Diego. A few weeks later the famous Tabernacle Choir from the Mormon temple will visit the Exposition, and, while a number of Utah citizens are holding special ceremonies in the Utah building, on the lower plateau, the great choir and orchestra will be contributing their services in the Plaza.

San Diego Union, January 1, 1915, Special Section, 5:1-5. Barren hills and valleys blossom in raiment of eternal spring.

San Diego Union, January 1, 1915, Special Section, 4:7-8. Musical Features of the Fair.

Famous Choirs Coming

The tentative program for the visit of the Mendelssohn Choir includes the Chicago Symphony Orchestra to furnish the instrumental music during the tour.

Another highly important musical feature of the year will be the programs furnished by the Exposition band, which has been organized during the past summer and has been giving weekly concerts at the Exposition grounds during the period before the actual opening. This is a band of thirty pieces, under the direction of Peter J. Frank, who has had considerable experience in California music festivals. The bandmen are attired in Spanish uniform, and not only make an exceedingly gay appearance in the bright plaza, but also furnish an interesting piece of detail in the general Spanish harmony scheme which pervades the entire Exposition.

The guards and attendants are caballeros and conquistadors, the dancing girls are Spanish dancing girls, every building is a Spanish-Colonial building, and even the gardens and patios are laid out after Spanish designs.

One more musical feature is of genuine interest. This is the incidental music which accompanies the Aztec and Toltec ceremonials which will make up quite the most interesting series of events which the Exposition has planned. For several months the ethnological libraries of the country were scoured for full information about the ancient ceremonies of the red races who existed in the western continent long before the coming of the white man. The result is a series of scenarios based on the rituals of the Aztecs, Toltecs, Mayas and Incas. It is a lamentable fact that the same people who by omnivorous reading and genuine good taste have learned to love the folklore of Greece and Rome and Assyria and Scandinavia and Germany know practically nothing of the equally rich lore of the first Americas.

Deities' Terrifying Names

The names of Quetzalcoatl and Huitzilpochtli mean absolutely nothing. It might be mentioned that there are other gods and demi-gods of the ancient red races with names of a much more terrifying character. The names are no more terrifying than the rituals which their followers celebrated. One of the particularly interesting ceremonies which is scheduled for presentation next year --- with a few revisions at the requests of the actors --- is the sacrifice scene, in which the victims are fastened to the altars, past which march the priests, who, with the aid of a sharpened flint, slit open the breasts of the victims and remove their hearts. The hearts are then bounced violently on the stone pavement, and, from the elasticity which they show, the priests make auguries.

The information obtained from the scientific libraries has furnished the pageant matters of the Exposition with what they believe to be scientifically accurate data not only as regards the dramatic episodes and the costumes, but also the dance steps and the incidental music, instrumental and choral. The program includes sixty-three of these episodes, which allows for the presentation of one new one each week and a few new ones at various times in the year, in addition to various repetitions which will be necessary for the more striking episodes. This is probably the most important original work in this field which the San Diego Exposition has undertaken.

(Note: There is no record that ceremonials of the type described above were ever performed at the Panama-California Exposition.)

Hawaiian Musical Features

Even in the field of amusements, there is musical work which is entitled to consideration. More particularly important is that in the Hawaiian Village, which will be in charge, so far as music is concerned, of Ernest Kaai, who for several years has ranked as the principal musical personage in the Hawaiian Islands. Kaai is bringing with him fifty-three natives, a considerable number of whom are chosen entirely for their musical ability. Instead of presenting merely a quintet, such as has been presented at various times in this country on tour, he has chosen a large number of natives whom he has brought in, not from Honolulu nor the other coast

states, but from the back country, where the pure Hawaiian still exists. Some of the oddities which he promises are the nose flute players. He, of course, makes no claim to music of a high technical character, but wishes rather to present music which is typically Hawaiian and which he considers the best in the field of genuine folk song.

There is also a large Indian village, one of the largest concessions on the Exposition grounds, and there, too, will be a good deal in the way of folk music of the Southwest Indians. It will be remembered that numerous American composers, among them Charles Cadman, have made extensive use of Indian themes for the composition of "white man's music." Many of these themes and others of equal interest will be heard under natural conditions, remaining "red man's music."

At various times in the year, of course, there will be visiting bands and orchestras, the most important of which are the Mormon Choir and the Mendelssohn Choir.

San Diego Union, January 1, 1915, Special Section, 6:1-4. Lore of Incas and Aztecs drawn from mist of ages

California Building
Science and Education Building
Indian Arts Building]
Painted Desert

A few years after the discovery of the western continent by Columbus, there started the succession of expeditions from the old world into the new and the transplanting of European ideas and customs. The strange land whose eastern shores were washed by the Atlantic was looked on as entirely savage, and as rapidly as could be done its customs and ideas were exterminated.

In a vague way the average person knows that in Central and South America once lived the Aztecs and Incas; that the former were mighty warriors and the latter mighty builders; that among them loomed up a few dominant figures in many ways the peers of their white conquerors. But that knowledge is vague and hazy. The student knows much more. The San Diego Exposition has undertaken the task of bringing that knowledge to the layman, to enable him to learn that the ancient peoples were the peers of their contemporaries in other lands in many fields, certainly in the practical arts, and in not a few of the fine arts.

The story of that effort goes back for a long distance, almost the dawn of the Exposition planting, before construction began. Negotiations were started with the Smithsonian Institute, the School of American Archaeology, and other scientific bodies, arranging for cooperation and a distribution of expense. The first condition was that the invaluable archaeological specimens collected should remain the property of the public after the 1915 Exposition has passed on and had become a memory.

Feared Ancient Gods

And so expeditions set out, one into the deserts of the southwest, among the ancient pueblos, another to the north among the haunts of the coast Indians of centuries past, and two others into Central and South America. That which went to Guatemala brought to civilization perhaps one of the most striking groups for display.

Far back into the interior this party voyaged, away from the railroad, away from the highway, away from the footpaths, and into the depths of a tropical jungle, where the thick growth shuts out the sight of the sky and of a companion twenty feet away, where even the natives feared to go, for in the wild country still roamed, they said, the spirits of the old red warriors. Some of the more imaginative has seen the humming-bird feathers on the ankle of Huitzilpochtli, the ancient god.

More concerned with the possibilities of fever than of encountering Huitzilpochtli and the priests of Quetzalcoatl, the exploring scientists pushed their way through to the spot where once stood Quirigua. There it still stood. The palms had grown through the roofs of the temple, and the beasts and birds had made their homes in the ancient altars, but the city was there, and the great statues were there, some tilted by a collapse

of the foundation, some flat on the ground and partly buried in underbrush, some still erect. The hieroglyphs could be traced easily, but the key to the language was gone.

With the best means available, the explorers had carried with them full equipment for the making of casts from the statues which were too heavy to be moved. No ordinary plaster was used, but instead the glue mold, whose impressions are so accurate that the finest hairlines of the hieroglyphs are retained, and transferred to the final cast with ease. The result in many cases better than the original, for discoloration is absent.

Most of the statues are of red sandstone, carved from a single gigantic block. The weight of the largest is about 100,000 pounds. The materials for casting merely the surface weighed 15,000 pounds, an indication of the seriousness of the undertaking.

Transportation Difficult

Eventually the casts of the necessary matter were made, while artists in the party made rough drafts of the city itself for the making of later models. These was more difficulty in getting the fruits of the trip out of Quirigua than there had been in the exploration and the gathering of the material, and more than once were their profound wishes that the Incas still lived and would exercise their lost arts of engineering to effect the arduous labors of transportation. Some day the chronicles of that expedition will be narrated in full, and much will be added to the literature of travel.

The Peru party has uncovered much more of interest. The coast party had gathered relics of the coastal tribes and assembled them for shipment to San Diego. The desert party had struck rich veins and when the assembly was completed for the exhibits it had gathered, it was found there were 5,000 specimens of ancient pottery and weaving and examples of other arts of rare ethnological value.

All of this lot of 5,000 were distinct and they comprise what is considered as the best collection of Americana in this field, not excepting the famous exhibit of the Field Museum in Chicago. In addition, there were duplicates, numbering up to several hundred, and these were classified and sold in part --- for enough to cover the entire expense of the expedition. Other collections of duplicates were sent to Yale, to the Canadian museum, to the Swedish museum, and in exchange San Diego received archaeological material it could not otherwise have obtained.

The California Building at the Exposition, the \$250,000 structure erected by the state, to stand for all time, houses no exhibit of industrial and commercial resources as is generally the case. That so far as California is concerned is left to the buildings of the various country groups of which there are five, representing all sections. The state building is a museum, and in it are housed many of the most striking of the ancient Indian exhibits. There has been in mind the realization that just as the Panama canal, whose opening the San Diego Exposition celebrates, will open the new world to commercial development, so it must open it to scientific research. San Diego has sought in the realm of science to stimulate that development, just as in the realm of commerce it has sought to stimulate commercial development.

Serra Statue on Facade

The frontispiece of the ornate cathedral structure is of quite as much interest to the historian as the artist. At the top stands the statue of Fray Junipero Serra, to whose labors was due in great measure the real start of civilization on the coast of what is now the United States. At one side stands Cabrillo, the discoverer of 1542, beneath a bust of his patron Charles V, At the other is Philip III of Spain. Below is a bust of Portola, the first governor of Alta California, and another of Vancouver, the first English explorer of the west coast. At the extreme bottom stands de 'Ascencion, the chronicler, and across the arch is Fray Jaume, the first white martyr. It is a pictorial history of the American west coast.

Within the great carved doors, lining the corridor, is a replica of the Farnham frieze, the separate panels portraying signal events in early American history --- American in the broader sense. There are other panels of earlier days, cast from the originals which were wrought by Aztec and Inca, Maya and Toltec. The Cross of Palenque, for example, is shown and the woodcarving from Tikal, and an occasional carved tablet bearing

a portrayal of religious or royal ceremony. A succession of them leads the visitor into the main rotunda, and there, looming up beneath the vaulted ceiling, are the great monuments which were recovered from the buried cities in a stately array about the room.

About the walls and in the balconies are casts from some of the famous doorways and accurate models of the ancient cities of the old America, at Uxmal and at Chichen-Itza. Deep in the surface are carved the hieroglyphs whose key is still lost, saved that by frequent appearance, the calendar system has been partially deciphered and some of the dates are discernible. The system was not the Gregorian calendar; this is certain. The months were lunar months and the weeks were of six days, but they were apparently accurate intercalary arrangements.

Much to Be Learned

Some dates in 400 and 40-year cycles, with shorter periods of five years and one year, are found to be in the neighborhood of 4,000 years, but from what date the system of calculation started is still a total mystery. Points like this and the deciphering of the hieroglyphs will furnish subjects for interesting research for many years to come. The careful outlining of racial characteristics furnished equally engrossing material for ethnological research. The men are found to have been bearded, unlike most of the North American Indians, and the prominent noses and lips and full faces contain further suggestions as to the source of the original stock.

The advanced state of the ancient arts is clearly shown. The painstaking care in the sculpturing cannot be ignored, nor can the symbolism back of the artist's work. The average citizen will discover that the little known mythology of the ancient redmen was quite as rich as that of the nations of the other world, that the gods and goddesses have many of the same human traits, that the heroes performed deeds just as thrilling, that the tribal ceremonies were just as spectacular.

Incidentally, another division of the Exposition was set to work in the principal scientific libraries in search of date about these ceremonies, and from the months of labor devised a series of pageants duplicating the ancient rituals, some of them dating back thousands of years before the coming of the white man.

The field is still fallow for decades of study, as shown by the scanty knowledge now in the hands of scientists. One of the explorers exhibited a picture of an ancient cliff dwelling in ruins.

"That dates back several hundred years," was hazarded.

"Several thousand," corrected the archaeologist. "See how the front of the cliff has crumbled and fallen. That pile of debris was once the front part of the cliff-dwelling and the approach up the side of the cliff. I am not a specialized geologist and I do not know how long it would take that great mass of stone to disintegrate and crumble into powder. If you will tell me that, then I will tell you when that dwelling ceased to be used. And that is only a start. I would not be able to tell you for how many centuries it was occupied before the final abandonment."

Descent of Man

Adjoining the California Building is the Science and Education building, the whole east wing of which is given over to the Smithsonian Institute's display of the progress of man. From a multitude of original sources have been made busts which in regular sequence show the steady ascent of the human from the "Forerunner," the anthropoid, the primal man, from whom the present, highly-specialized human type has gradually evolved in the passage of an unknown number of centuries. The striking part of the display is that in addition to observing the tenets of true science, it heeds the limitation of the layman, and is so arranged that it is comprehensible to the intelligent though untrained visitor. The assembly represents decades of labor by the foremost ethnologists of the world, and is given at San Diego its first adequate presentation.

Across the way is the Indian Arts building, again a working out of the idea of showing highly scientific exhibits in comprehensible form. There are models showing the life of the ancient Indians from Alaska to

the Cape, in village and on plain. There are models of the villages in ruins and reconstructed. There are demonstrations of what the red men were able to do in various realms of applied arts. There are studies of Indian life. There are special exhibits showing the practicing of the many crafts, some in the form of models, some in the form of living display, with the individuals selected from the various tribes at the Painted Desert, the Santa Fe exhibit at the north end of the Isthmus.

This exhibit, by the way, has its scientific features and has taken undisputed rank as the best display of southwestern Indian life ever attempted. The effect has been to reproduce with the adobe wall that surrounds the "desert" the life not only of the pueblos with Taos, Zuni, Hopi and Rio Grande Indians, but also of the plains with Apaches, Navajos and Supais dwelling in the cactus-strewn sands below the mesa where the old cliff dwelling lie. The Indians are not idle, but are at work, shaping their pottery and perfecting their rugs and blankets and metallic ornaments just as they and their ancestors have been doing for centuries. The red man, in fact, did most of the construction work, bringing with them from the neighborhood of the real Painted Desert of Arizona, the materials with which they duplicated real conditions with unflinching accuracy.

Scenes from Desert

In the buildings devoted to work of this character, there is, of course, an extensive art display, but, save for the Fine Arts building, the work is intended more for the giving of atmosphere than for anything else. In fact, it is a modern development of ancient subjects. In the Indian Arts building, for example, the landscapes about the south wing are made of scenes from the desert country where the exhibits housed in that wing were uncovered. There are studies of the old villages in cliffs as they must have appeared in their palmy days. There are haze-veiled vistas of spots like the Enchanted Mesa, associated with some of the most interesting myths of the southwest, of the old rock at Acoma, where the ancient mission of the Spanish friars still stands --- a replica of it has been built at San Diego to house the exhibit of the state of New Mexico. There are scenes from the Painted Desert of Arizona and the Petrified Forest, of the old pueblos which _____ . Every foot of the soil is associated with the stories of the Spanish occupation from the days of Fray Marcos de Niza down through the succeeding years.

San Diego Union, January 1, 1915, Special Section, 6:5. Many Goldfish in Lakes and Ponds; Wild Ducks that Fed on High-Priced Beauties Disposed Of.

San Diego Union, January 1, 1915, Special Section, 6:6-7. Cool Rest Spots Provided at Fair; Benches Set in Shady Groves Afford Magnificent Views of City. . . . Visitors to certain world's fairs of the past recall with anguish the crowded condition of the grounds, crowded that is with buildings, as well as with people, whereby it was impossible to find a quiet resting place when one was weary of looking, where one could go and rest for a time. In San Diego there will be no repetition of that state of affairs.

The pepper grove, stretching along the Canon Espagnol by the approach to the south gate, bordered by El Paseo and its row of giant eucalyptus is a tract of nearly fifteen acres. The approach is bordered by flowers and shrubs of many varieties, and the grove is filled with spreading pepper trees between which are thick lawns unmarked by "Keep off the grass" signs.

The pepper tree is an institution in Southern California. In the back country there are drives bordered by pepper trees. In the lawns of the residences are set a few of these trees, and it remains for the Exposition to have a perfect grove. The lawns between, in which appear occasional peppers of a smaller variety, are of familiar blue grass and clover, and also of the less familiar lippea. Also there is a touch of Scottish heather. Everywhere are found mission benches set in the lawns and along the calcadas which wind along the canyon.

The vistas seen between the trees are quite incomparable, showing stretches of the main Exposition buildings on the further plateau, and the silvery seas down past the city and the Harbor of the Sun.

San Diego Union, January 1, 1915, 6:7. Tons of Material Used. . . . It is not generally known that in the construction of the Exposition upward of 20,000,000 feet of lumber were used. Of the other materials which have gone to make up the Magic City, it might be mentioned that the Puente Cabrillo alone required 10,000

barrels of cement, which went into the making of 270,000 cubic feet of reinforced concrete, together with 600 tons of steel, more than 16,000 tons of stone and sand. This brings the estimated weight of the bridge to approximately 18,000 tons. As is generally known, it is the largest bridge of this type ever constructed and is the model of railway structural work.

San Diego Union, January 1, 1915, Special Section, 6:6-7. Famous Bits of Spanish-Colonial Architecture strikingly reproduced. . . . Those who have traveled in Spanish-America will find at the Exposition interesting suggestions of famous Spanish-Colonial buildings, cathedrals, old and new missions, palaces, country residences and municipal buildings.

Thus the Home Economy building resembles the hacienda of the Conde d'Heras. In the Indian Arts building are many suggestions of the Santuario de Guadalupe at Guadalajara. In the Science and Education building there are found points resembling the cathedral at Puebla, Mexico, and in the Varied Industries Building are resemblances to the eighteenth-century monastery at Queretaro, Mexico.

The California State building, of course, bears many resemblances to the beautiful cathedral at Oaxaca, Mexico. The San Joaquin Valley building bears an extremely close resemblance to any one of half a dozen of the municipal buildings of Spanish America, although, of course, there are many original details. The building of Kern and Tulare counties combines the features of several palaces. The New Mexico building is a copy of the old mission on the rock at Acoma in New Mexico, with details introduced from the church at Cochiti.

In the "Painted Desert" these resemblances are equally marked. The larger pueblos are copies of those at Hopi and Taos, and the interior of the lower structure, where the Rio Grande tribes are quartered, is a copy of the ancient Governor's Palace, El Palacio Real de Onate, at Santa Fe. The buildings and small structures throughout the "Painted Desert" are, of course, an exact imitation of typical scenes in the great Southwest.

San Diego Union, January 1, 1915, Special Section, 6:8. North Island Regiment of Marines Stationed on Exposition Grounds; Visitors to See Real Army Life; Band Will Give Concerts. . . . A picturesque feature of the Exposition is the marine camp on the lower plateau, where are stationed the officers and men of the Fourth Regiment, under the command of Colonel J. H. Pendleton. It is the transplanting of Camp Howard, the marine camp at North Island, to which the men will be returned at the close of Exposition year.

The purpose is not alone to add materially to the attractiveness of the Exposition, but also to show to the visitor the real life of the American "soldier and sailor too."

Throughout the year there will be concerts by the regimental band, and drills on the parade grounds north of the camp itself.

With the display of state buildings along La Via de Los Estados, the camp will be certain to rivet attention to the lower plateau.

San Diego Union, January 1, 1915, Special Section, 6:8, 7:1-2. Model Farm contains every kind of fruit and vegetables.

San Diego Union, January 1, 1915, Special Section, 7:1-2. Strangest Thrills and Novel Sensations Wait Where Lights Are Gay; Isthmus presents cream of world's best amusements. . . . More than twenty years ago Chicago held the World's Columbian Exposition, which set a new mark in exposition building --- a mark which in that particular field has probably never been reached. Chicago created for the first time an amusement street of mammoth proportions. The name by which it was known, the Midway, still persists. The full name was the "Midway Pleasance," taking in almost the full sweep of what is still called the Midway between Washington and Jackson parks.

It must be admitted that the attention paid this extraordinary amusement street was probably more, so far as mere numbers are concerned, than that paid the scientific exhibits of immeasurable value, and it came to be an understanding that expositions which followed must have something similar to this amusement feature.

St. Louis, for example, has the Pike, and Seattle, the Pay Streak. San Francisco's amusement street is the Zone, and that at San Diego is the Isthmus. Keeping to the terminology of the real Isthmus, the street to the north being called the Calle Ancon, and that to the south the Calle Colon. The short stretch leading from El Prado to the lower end of the Alameda is known as Calle Cristobal.

The Isthmus proper is 2,500 feet long, with frontage on both sides, whereby San Diego has nearly a solid mile of clean amusements. The number of buildings is sixty, this being exclusive of the checking station and the police and ambulance stations at the lower end of the Isthmus. It includes the eating houses, extravaganzas, musical attractions, and the general assortment of amusements to be expected in the concession street.

"War of the Worlds" Spectacular Exhibit

At the north end is the Painted Desert, quite the most extraordinary exhibit of Indian life ever attempted. Almost at the south end is another large enterprise, known as the War of the Worlds, which shows what an imaginative genius has thought of as the possible conditions of war in the year 2000. Possibly war with have vanished at that time, but this is not the idea of the builder of the War of the Worlds. His story has to do with the dream of power of an adventurer named Rabinoff, who marooned on an island with several companions, finds a great treasure and, overcome with the desire for possession of the whole amount, kills off his companions one by one and with the loot, which now is his sole property, builds for himself a great power. To gain his ends he combines into one alliance several nations which are not existent today, including great nations of the Orient and Africa, and brings his allied forces against New York harbor.

The designer of the extravaganza also figures there will be interplanetary communication, and so, in addition to the ships of the world nations, he introduces the aerial fleets from Mars and other planets. The principal part of the extravaganza is the naval battle in New York harbor and the aerial battle overhead. The concession is probably the most complete thing of the sort ever attempted, with such remarkable features as the control of the ships by wireless apparatus and the use of eleven miles of electric wire for control of other pieces of mechanism in the production. There are large motors and there are tiny motors which can be held in the hand.

Canal Zone Reproduced

One of the other large concessions on the Isthmus is the Panama Canal Extravaganza, of particular importance is such a celebration as this because of the great crowd of visitors who will be present in 1915. Only a limited number will have the opportunity to see the real Panama Canal. Consequently, for the benefit of those who have not seen the canal zone, there has been constructed an actual model of the great waterway. The visitors will see the canal zone as it was before the Americans, and even before the French made their effort to pierce the land and unite the seas. They will see the work which America has done, and the reproduction of the passage of ships from the Atlantic to the Pacific, and back again, cutting out on the way 10,000 miles of travel which formerly was necessary. They will see a street in old Panama, with its peculiar manner of living, with its overhanging balconies, and its sidewalk shops, where the novelties of the canal zone are sold to visitors.

A little distance down the street is the Hawaiian Village, people with a large number of natives, many of whom never left the islands. They were not gathered at Honolulu, but up in the back country, where the manners of ancient Hawaii still persist. These are poi makers and singers and ukulele players and hula dancers, and all the other characters associated with native life in the Pacific islands. Even the pineapple tops have been brought to San Diego in order that there might be accurate local color. The front of the concession is a representation of Kilauea, and all about the village are palms and reproductions of scenery in the mountains and the jungles and the coast country.

Deep Sea Aquarium

There is an Ostrich Farm, where visitors may see the manner in which the plumes of the ostrich are carefully gathered for milady's hat.

There is an aquarium devoted to a display of deep sea life along the Southern California coast.

There is a motion picture concession --- not a motion picture theater, but a studio where the films are in the making and where the average visitor can get his first sight at what is becoming one of the great world industries. And, reverting to earlier days, there is adjoining this concession another building, known as the "Stories of the Missions," where in graphic form is told the romantic story of early California and the early days of Western development, which started with the founding of old Mission San Diego de Alcala in 1769.

There is a gem mine, where, in equally graphic form, is shown the manner in which the semi-precious stones of California are taken from the rock and cut and made ready for bracelets and necklaces and other pieces of ornament.

Then, of course, there are such concessions as the roller coaster, only in this case it is the longest roller coaster in the world, with a total length of 6,000 feet. Similarly, there is the "House of Joy" and "Climbing the Yelps" and a long array of such features which are of a purely amusement character. The extraordinary point is that many of these concessions, which started as amusements, have a genuine educational value. San Diego seeks to give the world the best in the way of amusements, just as it has given the best in the way of display and scientific contributions.

San Diego Union, January 1, 1915, Special Section, 7:1-4. Balboa Park Among Finest in County, Keeping Pace with City's Onward March; Aided by Matchless Climate, Superintendent Morley Backed by Board, Has Accomplished Wonders; Almost Insuperable Difficulties of Soil Overcome, by J. B. Pendleton, Secretary of the Park Commission.

Balboa Park, one of the largest and most beautiful in Southern California, is in the very heart of the city, the southern boundary line being only five blocks away from the business section. It is practically twenty-two blocks square and contains 1400 acres. In the west center of the park, 600 acres have been enclosed for the Panama-California Exposition.

In view of the fact that sections bounded by Sixteenth street on the east, Park Drive on the west, and extending from the northern to the southern boundaries are available to the greatest number of people, and, as the Exposition will attract large crowds, the larger part of the improvements have been directed to sections within this boundary.

Balboa Park, containing as it does so many beautiful canyons, hills and mesas, is adaptable to the rarest landscape effects, and it is only a question of time, money and water until San Diego will have one of the most beautiful parks in the entire country.

Recent Improvements

Park Drive, on the western boundary, has been completed from Juniper to Date streets, and opened to the public; thereby giving a splendid boulevard all the way from the bay on the south of the city to University Heights on the north. On either side of the drive are wide parkings, which, when completed, will present a double row of *cocos plumosa* palms, surrounded by green lawns, all the way from Date to Upas streets. This drive is a great boon to all who love to drive or ride, as it gives a fine driveway uninterrupted by street car and heavy business traffic.

Beginning at the intersection of Juniper and Park Drive, extending east to West Drive, and south to the canyon in the aviary section. Here the visitor is always delighted for surrounding the aviary is one of the largest flower gardens in the park, and one is always sure to find beautiful flowers here, as the beds are planted so that, as fast as one variety stops blooming, others are ready to begin, thereby providing a continuous array of blossoms.

New Aviary Built

In this flower garden, just opposite the refreshment booth, is the new aviary, built of interlocking steel and concrete. It is of mission design, and one of the finest on the Pacific coast. It is being built by the superintendent of parks, using the regular park force.

About forty-five acres of lawn have been made since January 1, 1913, all of which are provided with automatic sprinkler systems. There has been no improvement made to the park that has added more to the beauty of the surroundings than these lawns. The people show their appreciation of them by using them, as you can always see dozens of men, women and children resting on the grass and enjoying the freedom here allowed.

The northeast section, beginning at the Upas street entrance and extending to Quince street, has undergone a complete change. At the intersection of Upas street, Park drive and West drive, the low-lying shrubbery has been thinned out, walks and winding paths have been made, and a lawn, with an automatic sprinkler system, is being put in, which will make this section one of the most attractive of the entire park. A modern comfort station is to be built in this section before the close of the year.

Barren Hills Transformed.

The section between Quince and Laurel and West drive and Cabrillo canyon has also undergone a complete transformation, having been transformed from barren hillsides and mesas to luxuriant gardens. It is at the southern end of this section that the magnificent formal rose garden is located. This is one of the most perfectly laid out rose gardens in this country, and contains 6500 rose bushes, comprising a great many of the best varieties grown in California. As roses in this garden are in bloom practically every day in the year, it is one of the most popular resorts for the visitor. A pergola, 180 feet long, is being built at the south end of the garden, which will add greatly to its attractiveness.

To the north of the rose garden the visitor at this season is charmed by seeing thousands of poinsettias in full bloom. These are planted among the shrubbery in such a manner as to give a most artistic effect.

To the east of the poinsettias and skirting the slope is a splendidly arranged palm garden, consisting of many choice varieties, thereby lending a tropical effect to the entire planting scheme. North of the palms is a triangular bed of ragged Robin roses, bordered with Shasta daisies. The remainder of the slopes are planted with many varieties of low-lying evergreen trees and flowering shrubs, which presents a most pleasing effect.

Zoological Section

In this section, the bear den has been doubled in size, palm-covered shelters have been built for the deer and buffalo, and a fine wall built around the entire enclosure. The zoo has just received nine head of California elk, and a special paddock has been constructed for them just northwest of Russ High School and south of the Exposition grounds. The zoo proper has been greatly improved by a beautiful lawn on the slope between West boulevard and the deer and buffalo paddocks.

To the south of the zoo and east of the lower drive, the visitor finds much to interest him. Winding paths skirt the hillsides, which are planted to evergreen trees, flowering shrubs and flowers. Here also is a large triangular bed of ragged Robin roses. All the walks and paths in this section are bordered with a triple row of flowers, carrying out a perfect color scheme. Here are there are comfortable benches from which one obtains the best views of the bridge, the Exposition buildings, and Cabrillo canyon. This canyon has been greatly improved and planted to trees, shrubs and vines.

Plaza Section

North of Date street and looking west on Fir is an open spot known as the Plaza. From this point an unobstructed view is had of the bay, Point Loma, and the Pacific ocean, with Coronado Islands in the background. To the east are the Exposition buildings, Golden Hill and the mountains. The Plaza is visited

by more people than any other section of the park. For a long time it remained unimproved. The park board plans in the future to make this the most beautiful point in the park by improving it strictly in a formal way at a cost of between \$40,000 and \$50,000. Here is a place where some public-spirited citizen or visitor has an opportunity of erecting an everlasting monument to his memory, and, at the same time, giving great pleasure to the people and visitors of San Diego, by donating the necessary funds to carry out the scheme planned by the park board.

The Eighth street entrance has been improved by putting in two of the most perfect lawns to be found in this country. These lawns extend from Ninth street to the east to Seventh street on the west and form a semi-circle with a walk on the circular side, bordered with flower beds, which in turn are bordered by shrubbery.

Improvements Nearly Finished

The Tenth street knoll has been planted in trees and shrubs and flowers and walks and paths _____ and wind in and out and through the trees and shrubs.

The road from Eleventh street in Cabrillo canyon, connecting the main drive from Twelfth street to the Exposition grounds, has been rebuilt. A parking strip on the outer edge, planted to flowering shrubs, adds greatly to the landscape effect of this section.

The improvements from the Twelfth street entrance along Midland drive to the south entrance of the Exposition are rapidly nearing completion. These consist principally of cutting down and rounding off the hill west of the main drive, building walks and planting the parking strip on either side of the drive. The High School grounds have been graded and will be seeded to grass, presenting a beautiful lawn by the first of January, 1914. The improvements in this section will be among the most noticeable of the park, inasmuch as no planting or landscape work has heretofore been undertaken in this section.

Golden Hill Section

Situated in the southeastern corner of the park is the beautiful Golden Hill section. This portion of the park is on the crest of one of the highest hills in the city. It is about 20 acres in extent and is highly improved with driveways, walks, paths, flower gardens, trees, shrubs and cacti. The driveway follows the brow of the hill, giving one of the grandest and most extensive views to be had anywhere in the city. From this point one gets a view of the canyons and hills of the east side of the park, parts of the central and western sections, the business part of San Diego, and the bay in the foreground, and Point Loma, the Pacific Ocean and the mountains in the background. It has a small aviary, swings, sand piles, tennis courts, etc. In fact, Golden Hill is a little park in itself.

San Diego Union, January 1, 1915, Special Section, 7:4-6, 8:1. Aeroplane Flights and Auto Races Scheduled; garage service installed by San Diego company to cover territory from San Diego to Kansas City.. . . Two years ago Cal Rodgers, flying in an American machine, made the trip across the United States in forty-one days. The event was extraordinary only because it was the first aerial trip across the country. Of the hundred prominent aviators in this country, at least ninety-nine felt sure they could make the trip in less time, but not one of them undertook it after Rodgers until recently.

Late in the fall of 1914, Ralph Apperman, a young aviator whose experience had been mostly in the West, signed an agreement with the officials of the San Diego Exposition to make a flight from New York city to San Diego in seven flying days. He was told that it could not be done and was granted ten days. With this understanding he went East, taking from storage his Morane-Saulnier aeroplane, equipped with a 100 horsepower Gnome motor, and set about making plans for the trip. Incidentally, he promised to carry a passenger most of the way. It remains to be seen whether Apperman will keep his agreement, but there is every reason to believe he can because of the records made by the same aeroplane in European tests.

Good Garages Established Along Route

The arrangement with Apperman was one of the most important made by the San Diego Exposition in the realm of motordom. Second only to that is the automobile race scheduled for March from El Paso to San

Diego, the first of a series of desert classics which will probably become permanent. The route lies over the improved Southern Nations highway with allowance for three days into Phoenix and two days from Phoenix to the coast, with the night control at Yuma. In all probability, the time for the 1,100 miles, owing to the improved conditions of the roads, will be clipped to something over four days. The sands are mostly passed by corduroy and heavier grades have been almost repaved. A motorcycle trip covering the same route is also under consideration.

In addition to the regular controls, there have been established good garages all along the way, so there should be no difficulty in crossing the territory which only a half-century ago was crossed by men and women in ox carts, bound for the gold fields of California. The establishment of this garage service is in one sense of greater importance than the race itself. It is the start of arrangements for the heavy motor tours expected in 1915.

Supplementing the garage service is that which has been installed by a San Diego company known as the Transcontinental Garage Service. The work which this private company has done, cooperating with the San Diego Exposition, is of such an extensive character as to warrant particular attention. Following the receipt of information by the Exposition from various motor clubs in the East that no less than 50,000 people would make the trip by automobile in 1915, this concern set to work to carry out the elaborate plans of the Exposition.

Several cars were sent out to cover the territory from San Diego to Kansas City. They went with the idea of not along marking the highway with sign posts directing the tourist to San Diego, but also to arrange for efficient garage and hotel service all along the way. From Kansas City along the old National Trails road, the Santa Fe Trail and the trail to Sunset, this improved highway runs through the finest sections of the southwest, allowing side trips to the Grand Canyon of the Colorado, the Painted Desert and other points, and making connections with highways leading up from the Gulf of Mexico and south from the mountain country. Thus it is possible to pick up this trail from any state in the country. Each trail will be handled as a separate unit and the garages along the trail will be called "system garages."

"Motor Money" Issued

One of the purposes of the organization is to direct the business of all transcontinental motorists to the garage system in each town at the end of the day's automobile travel. For this purpose, besides advertising, there must be offered inducements to insure the motorist stopping at each system garage and to this end the company plans to issue motor money from its various stations which will be good for the purchase of oil and gasoline only at the approved garages. "Motor money" is disposed of at a five percent discount. Supplementing this service is the issuance of a complete guide, obtainable at Kansas City and other principal points, containing a clear and authentic description of the country and towns on each trail. A useful feature of the accompanying map is an altitude map of the particular trail for which it is issued. This service, of course, is permanent and the log books will be revised as needed.

Having made its general plans in the way and carefully carried out the log book idea by covering every mile of the route, the company, working with the Exposition, has arranged for one system garage in each city and town, the owner having signed a bond in each city and town to maintain normal prices throughout 1915. Thus the company has complete control all along the way and is also able to guarantee fair prices.

Accommodations on the Exposition grounds have been arranged for fully. There are three entrances, known as La Puerta del Oeste, La Puerta del Sur and La Puerta del Nord. Traffic through the first, or west side, will be entirely pedestrian. This is over the imposing quarter mile viaduct, El Puente Cabrillo. At the south gate, however, there is a large parking space, and at the north gate one very much larger, containing three hundred covered stalls and an outdoor parking space for 3,500 cars, which is looked upon as the maximum of daily motor visits.

Autos to Be Protected

In addition to carrying insurance against theft and injury, the Exposition concession has made some rather striking innovations. The checkers at the gate --- all girls in Spanish costumes --- will give to the visiting driver a card bearing his license number, retaining in post office arrangement a duplicate of that card. The visitor will be assisted by attendants in parking the car where he wishes it, and on his return will have further assistance in getting it out, fully stocked with gas and oil and given such minor repairs as may be necessary. During his absence, the parking space will be patrolled regularly.

There will be no automobiles within the grounds themselves. The only vehicle in use will be a small motor car known as an electriquette, carrying two or possibly three people at a speed limited to three and a half miles an hour for safety's sake. The speed is controlled by the driver with such ease that the vehicle is considered entirely "fool-proof." Either passenger can stop the car by stepping on a metal plate in the flooring. There is no chance for it to run away down hill because of the thorough brake system.

San Diego Union, January 1, 1915, Special Section, 7:7-8. Santa Fe Railroad's Indian Pueblo Marvel of Primitive Crafts. . . . Early in the sixteenth century there was marooned on the California coast a Barbary Negro named Estevan. Left to his own resources and knowing vaguely that the Spaniards has a considerable colony around on the other side of the Gulf of Mexico, he set out overland in search of friends and help.

The adventures of Estevan would fill a book, which would be vastly more interesting than fiction. The stories which he heard on the way from the Indians, who for some extraordinary reason let him pass through, although to be sure he was badly beaten and scarred in the course of his adventures, filled the mind of Estevan with a desire to learn more. He came eventually to the City of Mexico and there found a friar by the name of Fray Marcos of Niza, to whom he told something of the stories which the Indians had told him. The result was a trip back to the north and the white man's first sight of the ancient Indian pueblo, Zuni. Estevan, who would seem to have suffered quite enough on his trip to the gulf coast, wanted to know more and went ahead to the pueblo, and there his troubles were ended.

Fray Marcos decided he has seen enough and did not go to the village himself, but, standing far off, within sight of the pueblo and the country about it, he stooped, plucked a few blades of grass, in the Spanish custom, and claimed for the king of Spain all of the land which he saw.

Expedition Came From Spain

Since that day there has been an extraordinary curiosity concerning the Pueblo Indians of the Southwest. It was only a few years later, in 1540, when there came Coronado, bringing with him the greatest expedition in the history of America. He found a great deal to interest him in the country which was to become the Southwest of the United States, and remained long enough to send out expeditions in all directions. One of these smaller parties traveled to the east, and eventually returned with news of great plains where there roamed beasts which the Spaniards had not seen before --- beasts with great shaggy heads and heavy forequarters. These beasts were the American bison, and it is now accepted that this early Spanish party went as far as the buffalo plains of Kansas.

Another party reached the Painted Desert. A third, under command of Tovar, a captain under Coronado, caught the first glimpse of the Grand Canyon of the Colorado. The strangeness of the life of the Pueblo Indians, living under conditions which were entirely new to the Spanish, aroused their curiosity, and from then on there was marked interest in the adobe villages which had been discovered.

In the seventeenth century came the start of the Santa Fe trail, the great highway from Mexico City to Santa Fe, New Mexico. Accompanying it was the upbuilding of the missions. San Diego has the material reminder of them in the New Mexico building, which is a replica of the ancient mission on the Rock of Acoma.

Santa Fe Exhibit Wonderful

But the most impressive display of Southwestern Indian life is that of the Santa Fe Railroad, known as the Painted Desert. The name, of course, comes from the section of Arizona where the rock formation has the

lurid colors which have given the original its name. In fact, the builders at San Diego brought from New Mexico and Arizona much of the rock and the cactus and the curious wood and the ideas with which this material is fabricated, and the Indians themselves to do the work.

The Desert is cut off by the lofty mesa running in a general north and south direction. On one side of the mesa lies the pueblo exhibit, with a towering adobe structure similar to that of Zuni, and another like that at Taos. Along the east wall is a row of smaller dwellings where live the Indians of the Rio Grande tribes, with a part of the interior modeled closely after that of El Palacio Real, the governor's palace, which was built by Onate.

A little to the north is Hopi, the reservation adjoining the trading post into which the Indians bring their pottery and blankets and rugs and bracelets to be exchanged for food and baubles. A little distance away is the Kiva of the ancient pueblos, entirely underground, with a step-ladder leading down from a small opening, into the ceremonial chambers where the ancient rituals of the Indians were held. Across the open space is another kiva, modeled after those of more recent construction, in which the floor is only a few feet below the ground level, and the roof a few feet above. Here there are the open fireplaces and bakeries, and the supports where the hay and wood are cured. On the walls of the pueblos hang drying peppers and drying fruits and vegetables. Strewn about, out of the way, are broken-down carretas and a few pieces of harness or other equipment, which the carefree first American has dropped in the most convenient place.

Out through the sand crop great ledges of red sandstone, like that of the real Painted Desert. Here and there is a cedar tree, which apparently has been dead for centuries. Over the rock tops the Indians have hewn their steps.

Nomad Tribes Represented.

On the other side of the central mesa is an equally impressive exhibit of the life of the nomadic tribes. On the side of the mesa is a deep cave whose walls are blackened by apparent centuries of smoke, and on the ledge of which is still seen the crumbling ruin of a cliff dwelling.

In the sand below are built the hogans of the Navajos, the summer structures of light willows and the winter structures of large beams, whose interstices are filled with clay to keep the inhabitants warm. There are the huts of the Apaches and the curious dwellings of the Supais. There are the representatives of the wandering tribes, and their exhibit is quite as engrossing as that of the Pueblo Indians on the far side of the mesa.

A point of particular interest is that the great colony of Indians who are inhabiting their desert are not idle and not in white man's clothes, but are living just as they have lived and their ancestors have lived for centuries. They are weaving rugs and blankets in the same designs that were made a thousand years ago. They are shaping pottery and coloring it by just the same methods. They are pounding out their silver and copper ornaments. They are performing their sacred ceremonials in the kivas. They are reproducing life so that the white man can understand it. In other words, within the space of a few acres is reproduced with startling accuracy the life of the various tribes throughout the whole Southwest.

Cost Had Doubled.

The Santa Fe started this imposing exhibit with an appropriation of \$100,000. While no official figures have been given out, there is an impression that the actual cost is fully twice that amount. The desert has been built by the white men who spend their lives in the Southwest and who know the manners and the very thoughts of the Indians. These are men who alone could direct the labors of their Indian workmen toward the best results, and the results which have been obtained are amazing.

Many of the interesting features of the exhibit are genuine relics of the early centuries. Many, too, for obvious reasons, such as difficulties of transportation could not be brought to San Diego in their original form and have been duplicated. A log of wood straight from the lumber yards has been so treated in two or three days that it has taken on the aspect of a three or four-hundred-year-old exhibit. The hinges on the doors of the pueblos are not modern hinges, but are wooden bolts or leather thongs. The flooring is of adobe, the

window sills and the doors are rough-hewn, with the adz, and weathered by cunning artifice, so that they look like antiques.

As best evidence of the fidelity of the work, it may be stated that many of the men who lived for years in the Southwest are unable to tell which of the exhibits of the Painted Desert are genuine and which are imitated.

The Painted Desert is certainly too good to go out of existence at the end of the year. The crumbling adobe and the cedar-post stockade and the mesa will last in their present form for decades and should be made to last. The Santa Fe has not announced what will be done at the close of 1915, but there is an impression that the Desert will remain along with the other permanent buildings of the Exposition.

San Diego Union, January 1, 1915, Special Section, 7:7-8. Citrus Orchard Abloom in Winter; Visitor May Pluck Blossoms if He is Not Seen First. . . . San Diego has established a great citrus orchard within the Exposition grounds, where the tourist from the frozen North at any time from January to December can sniff the exquisite fragrance of orange and lemon blossoms, or pluck from the heavy trees the grapefruit or kumquat or tangerine --- if an attendant is not looking at him.

He can ramble down the Alameda and see the growing tea plantation transplanted from Ceylon, the first commercial venture of this sort, by the way, in the United States. He can wander through the exhibit buildings, along the bridge, or along La Via de Los Estados and see set before him in convincing measure the great resources of the West country.

This new type of Exposition is as valuable and educational as it is beautiful and its beauty is something which is quite unexampled in Exposition history.

San Diego Union, January 1, 1915, Special Section, 7:8. Block of Black Meerschaum . . . Many are the novelties at the Exposition, most of them to be found in the unique exhibit palaces along the Isthmus, but the states and counties have many which are unique in themselves. New Mexico, for example, has a block of black meerschaum, two feet square, recovered from the soil of the Sunshine State. There are numerous novelties and numerous gems, and, of course, the usual striking array of fruits and vegetables.

San Diego Union, January 1, 1915, 8:1. Easterners Who Know Europe to "Discover" Great West; War abroad will drive travelers to see beauties of our country.

San Diego Union, January 1, 1915, 8:4. Lights in Harmony With Entire Plan. . . . Having attained by means of buildings, gardens and attendants a rare atmosphere of Old Spain by day, the Exposition has so arranged the lighting system that the illusion would not be lost by night. Instead of outlining by lights the front of all buildings, there was devised a scheme of lighting which would give a soft glow throughout the grounds and retain the illusion of an old Spanish city. The lamps along El Prado, La Via de los Estados and the Alameda are clouded, pear-shaped globes on stately pillars, bearing a striking resemblance to solid bronze. There are upward of 1,000 of these, 100 kilowatts each. There are also 200 (?) bracket lamps and the swinging braziers in the arcades, the latter of 100 kilowatts. To get the exact illusion desired in the arcades, the ceilings were painted a faint salmon pink, in order to give the warm intensity of the color desired. At special points there are lamp posts and brackets of unique design and along the bridge a series of two-arm standards, different from the other standards, yet in the same general harmony.

San Diego Sun, January 4, 1915, 1:3. Many visitors still here for Exposition; today "Arkansas Day."

San Diego Sun, January 5, 1915, 1:5, 2:2. Isthmus shows can do spiling; barkers allowed to tell their story afternoon and night; Club Day at Exposition tomorrow; Admission prices from 9 a.m. to 6 p.m., adults 50 cents, children 25 cents; from 6 p.m. to midnight, adults 25 cents, children 10 cents; Sundays - 9 a.m. to midnight, adults 25 cents, children 10 cents; today is Fraternal Day; Should exhibit buildings be open on Sundays?.

San Diego Sun, January 5, 1915, 7:3-5. Drawing of new "Door of Hope"; Meade, Requa and Weaver, architects.

San Diego Union, January 5, 1915, 9:2. Women's Exposition Board entertains officers and their wives from U. S. S. San Diego.

San Diego Sun, January 6, 1915, 16:1. City officers to enter Exposition; going to issue their own passes; got a few from Exposition manager.

San Diego Union, January 6, 1915, 1:5. Club Women's Day; attended by clubs throughout the state; entertained by YWCA; names of committee appointed to represent clubs at Exposition.

San Diego Union, January 6, 1915, 1:4. Entries of \$10,000 Exposition auto race and the winner.

San Diego Herald, January 7, 1915, 2:2. The Exposition: A Fact Accomplished.

San Diego Sun, January 7, 1915, 2:1. Los Angeles County and Kern and Tulare Counties Day, Saturday, January 9; Kern and Tulare Counties building to be dedicated; Colonel D. C. Collier taking a rest today in hills near Ramona; today was Retailers' Day; 500 marines of San Diego marine barracks at Fair to be reviewed this afternoon in Plaza de Panama.

Park Commissioners, Minutes, January 8, 1915. Superintendent reported that parking of automobiles on Park Drive interfered with through traffic and also caused damage to the lawn on the east side; Superintendent authorized to prohibit parking of automobiles on Park Drive between the north line of Juniper Street and the south line of Nutmeg Street. . . . Auto buses and other vehicles carrying passengers for money prohibited from soliciting, taking aboard and discharging passengers on Park Drive between north line of Kalmia Street and south line of Maple Street.

Los Angeles Times, January 9, 1915, II, Editorial Section, 1:5. Are You Going To San Diego? Because This Is Los Angeles Day, If You Are.

San Diego Sun, January 9, 1915, 1:1-4. Exposition automobile race on at Point Loma.

San Diego Union, January 9, 1915, 9:4. Tulare and Kern Counties delegation dedicated their Exposition building; the building presents a pleasing appearance, the attractions including a display of grains and grasses, dairy products, fruits, nuts, vegetables and other specimens of which the Counties are duly proud. A complete oil well, one-sixth size, pumping 24 gravity oil; an aerial railroad carrying cars of walnuts; a maid milking a Jersey cow which is eating Kern County alfalfa; a cornucopia made of Tulare butter from which dollars made of butter are shown rolling in different directions, are a few of the best features of the exhibit.

San Diego Union, January 9, 1915, 9:2. 100,000 persons visited the Exposition during the first week.

Los Angeles Times, January 10, 1915, 2:3-4. Big Los Angeles crowd overwhelms San Diego.

Los Angeles Times, January 10, 1915, II, 1:3-5. New Era in American Architecture: Hand of Moor May Mark United States.

Los Angeles Times, January 10, 1915, VII, 1:1-4, 9:4-7. Carlson, a few seconds behind Cooper, sets non-stop record; Earl Cooper leads field.

Los Angeles Times, January 10, 1915, VII, 5:1-4. Motor Truck Exhibit Is Exposition Feature.

Los Angeles Times, January 11, 1915, 3:1. Secretary Lane is in favor of immediate work to stop floods in Imperial.

San Diego Sun, January 11, 1915, 9:1. Same officers will lead Exposition; directors re-elected by nearly 200 of the 4,300 stockholders of Panama-California Exposition at meeting today in California Building.

San Diego Sun, January 11, 1915, 9:4. No special events to be scheduled on Sundays; grounds will be open from 9:00 a.m. to midnight as on other days; today is Delaware Day; August Miens, an employee of the War of the Worlds, suffered burns on face and hands while firing a cannon.

San Diego Herald, January 14, 1915, 2:3. Boom the Exposition.

Park Commissioners, Minutes, January 15, 1915. Superintendent reported completion of new aviary at a saving of about \$1,250 over the lowest contractor's estimate.

San Diego Examiner, January 15, 1915, 7:1-3. Isthmus furnishes a mile of clean amusements.

San Diego Sun, January 15, 1915, 1:4-5. President Forward of Park Board says auto buses must have franchises to run on park boulevards; barred from boulevards on which Exposition grounds are located; auto bus men plan fight to the end.

San Diego Sun, January 15, 1915, 1:7-8. Exposition season tickets to be on sale at \$10 soon.

San Diego Sun, January 16, 1915, 1:4. Schumann-Heink home for entire year, she says; recovering from an attack of pneumonia which she contracted in Chicago last week.

San Diego Sun, January 16, 1915, 1:7-8. Auto bus men challenged Park Board to arrest them; test case is made ready; "jitneys" continue runs; Attorneys advise them it is okay; Elmer Fifer, auto bus driver, arrested yesterday afternoon on a charge of driving into the park in violation of the park ordinance..

San Diego Sun, January 16, 1915, 1:7-8, 7. San Francisco guests astonished at "Magic City" in great park; great crowds on grounds; record throng expected tonight; this was Stockholders' Day and San Francisco Day at the Exposition.

Los Angeles Times, January 17, 1915, III, 14:3-7. Pictures in San Diego.

San Diego Sun, January 18, 1915, 1:7. Jitney buses in park; no arrests.

San Diego Sun, January 18, 1915, 3:1-2. Sunday's crowd at Exposition largest since New Year's; more than 15,000 people visited the Fair; standing room only audience heard organ recital; Isthmus packed; Saturday, January 16 attendance: 14,793; Sunday, January 17 attendance, 14,789.

San Diego Sun, January 18, 1915, 6:1-2. Women's Rights? Sure! These Indian girls pick out their husbands, old custom, too; Indian Village at the Exposition: five tribes; tribes do not mingle because of rivalry back home.

Hopi camp in "Painted Desert"
Apaches in teepees

Navajo in mound houses
Acomas in pueblos
Huava-Supais in mud houses

San Diego Sun, January 19, 1915, 1:6-7, 2:3. Exposition great success right now, says President Davidson; special crowds will come.

San Diego Sun, January 19, 1915, 2:3-5. Panama Canal show at the Exposition is the real thing, everyone says.

San Diego Sun, January 20, 1915, 7:1-4. Exhibit on history of man one that every Exposition visitor should see.

San Diego Sun, January 20, 1915, 7:1-3. Sun man saw inner workings of Cristobal Café on tour.

San Diego Sun, January 20, 1915, 7:2. Monday, January 25, is Bobby Burns Day and Georgia State Day.

San Diego Sun, January 20, 1915, 9:7-8. Shoup says jitney bus will drive out trolley; head of Los Angeles Street System tells legislators auto will soon replace electric car lines; auto bus travels ahead of street cars and picks up waiting crowds; lawmakers at Sacramento asked to tax and regulate new competitors.

San Diego Sun, January 21, 1915, 2:1-2. Exposition even more beautiful amid rain.

San Diego Sun, January 21, 1915, 7:5-6. Weird and strange is Underground Chinatown; show depicts deterioration of "hop heads" and slave girls.

San Diego Sun, January 22, 1915, 1:1-2. Cruiser San Diego shaken by explosion; four are killed; boiler accident off west coast of Mexico; crew participated in opening exercises of Exposition.

San Diego Sun, January 22, 1915, 3:2. Today is California Commercial Association Day.

San Diego Sun, January 22, 1915, 4:6-8. Fine old relics of California now exhibited at Exposition; section devoted to aboriginal period of California; Pioneer Society also loans artifacts and documents; exhibited in California History Room next to chapel in California Quadrangle.

San Diego Sun, January 22, 1915, 6:4. Salt Lake building, built of concrete, is permanent.

San Diego Sun, January 23, 1915, 2:1-2. Odd Fellows enthuse over city and Exposition.

San Diego Sun, January 23, 1915, 3:7-8. Big Time on the Isthmus Tonight.

Los Angeles Times, January 24, 1915, VI, 1:3-7, 3:6-7. President says Best is Yet To Come at San Diego Exposition.

San Diego Sun, January 25, 1915, 1:3-6. How about Exposition dance on Plaza?

San Diego Sun, January 25, 1915, 1:7-8. Officials deny reports circulated in San Francisco and Los Angeles about Fair here closing.

San Diego Sun, January 27, 1915, 1:6-7, 6:1-2. Great auto caravan to descend on Exposition, February 12; arranged by Automobile Club of Southern California.

San Diego Union, January 28, 1915, 9:2. Two paintings by artist Robert Henri on exhibit in the Fine Arts Building at the Exposition.

San Diego Examiner, January 29, 1915, Special Exposition Issue

1:1-7, 2:1-7	Through the Isthmus

2:4	Neptune's Wonderland
3:1-4	Thompson Safety Racer
3:5-7	War of the Worlds
4:3-4	Imperial Art Gallery
5:7	Climbing the Yelps
6:1-2	Aerial Ferry
7:1-4	Underground Chinatown
7:5-7	Alhambra Cafeteria
8:1-4	Pala Gem Mine
8:5-7	Old Hawaii (Houses Old and New)

San Diego Sun, January 29, 1915, 1:1-2. Spending a rainy day on Exposition grounds.

San Diego Union, January 30, 1915, 7. Gleaned on Prado and Isthmus.

Today is "Find the Treasure Day" at the Exposition. Prizes to be distributed and hidden among the concessions on the Isthmus will aggregate \$100.

As usual children will be admitted to the grounds for 10 cents, and an unusually large crowd is expected, particularly at the Isthmus in the evening, as it is there that the lights will be brightest and the spirit of frivolity is expected to reign supreme.

Cash prizes ranging from \$1 to \$15 are to be secreted by members of the special events committee in each show house on the amusement street. They will be placed in the most unexpected places and visitors will be expected to find them. All visitors are to be given the privilege of investigating any part of each show house they like and they are at liberty to open all suspicious looking packages.

One young woman, who is bent on obtaining a prize today, made a preliminary trip of investigation yesterday. She played every show on the Isthmus and is sure of several places prizes are likely to be placed. She says, however, that she will not eat more than a dozen "hot dogs" for any prize.

Many reservations have been made for the Café Cristobal this evening, and the evening promises to bring fourth one of the largest crowds of the season. Several special events have been planned for the Isthmus and a something-doing-every-minute program is promised.

Eight Indian girls from Santa Fe, New Mexico, are due to arrive in San Diego early next week to work in the several Indian arts in the Indian Arts building, under the direction of Edgar L. Hewett. Some of them will weave baskets, others will make pottery. The object is to show visitors how each is made, carrying out the idea of the Exposition, which is an exhibition process rather than complete article.

Plans for the entertainment of the Western Fruit Jobbers' Association in San Diego, February 12 and 23, are being arranged by officers of the Exposition. The men will arrive on a special train over the Santa Fe line at 7 a.m., February 12. That day will be devoted to sightseeing in and about San Diego, and the following day will be Western Fruit Jobbers' Day at the Exposition. The day will be passed at the Exposition where the men will be entertained at a luncheon and a reception according to present plans. In the evening special events will be held on the Isthmus for the visitors. They will leave about midnight of the second day for Los Angeles, where they will hold their business sessions. February 18 they will leave Los Angeles for San Francisco where they will attend the opening of the Panama-Pacific Exposition, February 20.

A special feature of the Orange Day, which will be February 6, will be the performance at the Plaza de Panama of a troupe of Roman ladder acrobats. The troupe comes to San Diego after a long and successful vaudeville engagement on one of the principal vaudeville circuits of the country, and an entertaining performance is assured at 7 p.m.

Nearly 500 visitors are assured for Orange County Day. Under the auspices of the San Bernardino Chamber of Commerce one large delegation will come, while one special train, bringing nearly 400, will come from Fullerton, Orange and Santa Ana.

T. G. Helmerichs, who is in charge of the engraving department of the United States government display in the Commerce and Industries building, enjoys the distinction of having made \$40,000,000 per day for a period of three weeks. Helmerichs has been employed in the engraving department of the Philadelphia mint for twenty-four years and has made more money than all the millionaires in the country. "The only trouble with the money I made is that I have been allowed to spend but a small portion of it," he says.

The government exhibit was installed yesterday and is in working order. Charles S. Muir of Washington, D.C., a regular employee of Uncle Sam, is in charge.

Capable of coining money at the rate of ninety pieces per minute, the coining machine is the marvel of all who see it in operation. The government allows no coining to be done outside the regular mints, so medals are made. They bear a picture of Uncle Sam with a pick and shovel. He evidently has just finished digging the Panama canal and appears a bit chesty. The other sides bears a drawing of a pair of Panama canal locks with the first ship coming through. James T. Fitzgerald is in charge of the coining machine.

The exhibit is one of interest to everyone, for it shows the method of making greenbacks as well as coins. Instead of making the greenbacks, an American eagle is being printed on paper handkerchiefs and other souvenirs.

San Diego Union, January 30, 1915, 9:2. Carl H. Heilbron succeeded D. C. Collier as director of Exposition; Collier resigned January 29, citing need to recoup expenditures and losses of the last few years.

Los Angeles Times, January 31, 1915, III, 15:1-2. Painting at the San Diego Exposition.

Los Angeles Times, January 31, 1915, VI, 1:7, 2:4. San Diego Is Hospitable.

San Diego Union, January 31, 1915. San Joaquin Valley building cost \$26,500; total cost with exhibits \$50,000; ceiling of grain, designed and executed by Mrs. M. J. Wesseis, cost about \$7,000; more than five carloads of grain used.

San Diego Union, January 31, 1915, 4:2-3. Exposition Excursions, by Edgar L. Hewett . . . Under the above title it is proposed to furnish twice a week to the readers of **The Union** outlines and studies of various educational features of the Exposition

The people of San Diego do not yet realize, nor does any single individual know, the full value of the material that has been assembled for the use and benefit of the public. The Exposition has been built at a large outlay of money, all furnished by this community, and the community must want to know to what purpose such an expenditure has been made. Those who have been charged with the responsibility of developing the Exposition are anxious that the people shall desire such information and are ready to assist in giving it.

Never before has such an enterprise been undertaken by a community of this state. Never before has such an enterprise yielded so much for the lasting benefit of the people who originated it. The writer has spent the considerable part of a lifetime in studying the achievements of civilization throughout the world, is fairly familiar with the cities, architecture, public parks, museums, art galleries and institutions in America and Europe, and does not hesitate to say that the park development brought about by the San Diego Exposition is unsurpassed; that the architecture here assembled will stand comparison with that of any city in the world; that the exhibits in science and art will afford material for the enjoyment and education of the public to an extent that is equaled by only a few of the most advanced cities anywhere.

The present plan contemplates the systematic presentation of the various lines to be seen at the Exposition, in the belief that the people wish to see and use the material afforded. The classification will be First, the Grounds, second, the Buildings, third, the Exhibits. Articles will be prepared by the most capable writers that can be found, who will give the most serious thought to the work. Each one will be some important theme under the headings above noted. They will form a basis for actual excursions of pupils from the public schools, not only of the city, but of the county and state. Students and all visitors to the Exposition will find these outlines valuable to have in hand when visiting the Exposition. It is recommended that each article be cut out and carried to the grounds to serve as a guide.

Subjects are being chosen for the first series that bear directly upon public education, such as "The Model Farm," "A Walk to the Pepper Grove," "The Architecture of the Exposition," "In the Painted Desert," "The San Diego of Yesterday," "America Before the European Came," "The California Missions," "The Story of Man." The themes that can be selected are almost without limit. An exhaustive study of the grounds, buildings and exhibits of the Exposition would mean a liberal education, and this cannot be had this month or this year.

Most fortunately, in the three great divisions here mentioned, all that is best is permanent. The grounds will through all the future form a superb public park for the city of San Diego. The buildings establish a high plane of architecture for the development of this future great city. The California Quadrangle will be the imperishable monument of the year 1915. The greater part of the exhibits in science and art to be seen in the Science of Man, Indian Arts, California and Fine Arts building will remain the permanent possession of the people.

It is hoped that the local people will at once begin the active use of all this material and become thoroughly informed concerning it. We need not be concerned about the traveling public. Whatever splendid things are to be seen, there people will go, and not only for this year, but for all time to come. The city of San Diego will draw to itself people of culture and means, because they will find here that which makes life worth living.

The articles that are being prepared will run in the Sunday and Thursday issues of **The Union**. The one for today is on the subject "The Model Farm" and is written by Professor Spilling of the State Normal school. Do not forget to cut out all of these articles and bring them when coming to the Exposition. Each will be a valuable guide.

San Diego Union, January 31, 1915, 4:2-3. "Model Farm," by William F. Spilling. . . . Visit the model farm and you cannot help becoming a booster for the "back to the farm" movement. If more farms were like this one, there would be no need of such a movement.

When we consider that only two years ago the seventeen acres now under cultivation was wild mesa land, we can more fully appreciate the present condition. There is no "closed season" for the growth here, and the citrus orchard, now laden with golden fruit, has become what it is by growing twelve months in the year.

This orchard, three years old from the bud, is, perhaps, the first thing that attracts the attention of Eastern visitors. It bears eighteen varieties of citrus fruit. The first section of the orchard, at the south, is planted to navel oranges, now (January) well laden with ripening fruit. Across the path, to the north, is another section of similar size, made up of late Valencia oranges, which will bear after the navels are gone. The time of its bearing is what gives the Valencia its greatest commercial value. Then comes a block of lemon trees which, although so young,, are bending under a load of fruit. Crossing the west path, we come to the pomelo orchard (grapefruit).

Four Standard Fruits

The four standard fruits above mentioned are represented by about eighty trees each. Then comes a very interesting row of trees grafted with all the varieties of citrus fruit, some trees having as many as a dozen varieties growing on one stock. These varieties are more fully represented by about half a dozen trees, each of golden variegated orange, golden buckeye naval orange, ruby blood orange, paper rind St. Michael orange,

willow-leaved mandarin orange, citron of commerce, Kumquat, bouquet des fleurs orange, tangerine, lime, Mediterranean sweet orange, golden nugget navel and variegated lemon. As insurance against a possible frost, distillate heaters are distributed throughout the orchard. They can be lighted readily with a torch and will raise the temperature of the whole orchard several degrees.

The pergola fence surrounding this orchard is covered with a wonderful profusion of Cecil Bruner roses. Thirty-five varieties of roses are found on various parts of the farm. Especially beautiful is a garden of Lafrano and General MacArthur roses back of the house. The arrangement of ornamental vines and clumps of shrubbery about the house and out-buildings is worthy of study.

Wonderful Vineyard

South of the combination garage and barn is a vineyard of fifteen varieties of grapes. These according to the prevailing custom of pruning are cut back to mere stumps, but will begin to grow in the early spring and are expected to bear heavily this year. They are raised without irrigation. The fruit trees are irrigated by means of a cement pipe system, which may be seen along the upper side of the farm.

The deciduous orchard is made up of different varieties of each of the following fruits: Japanese persimmon, crabapple, apple, quince, pear, nectarine, plum, prune, peach, apricot, walnut, pecan, almond, fig and chestnut. Interesting semi-tropical fruits are olive, banana, joquat, cherimoya, or custard apple of Peru, the avocado, or alligator pear, and several varieties of guavas, including the "pineapple pear" and feijoa, or Paraguay guava.

The best varieties of blackberries, loganberries, dewberries, raspberries and strawberries contribute beauty as well as profit.

The vegetable garden shows an attractive variety, including tomatoes, potatoes, peas, beans, rhubarb, artichoke, cabbage, sugar beats, turnips, onions, radishes, spinach and lettuce.

The poultry yards furnish a model in poultry house construction. Six breeds of chickens, loaned by the Poultry Association, are each represented by a half dozen hens and a cock. Upon the gate of each yard is a framed card upon which the number of eggs laid by each breed is daily recorded. All the flocks are fed and cared for alike.

A method of allowing turkeys to range over alfalfa without injuring its growth is shown in one of the yards.

Incubators will be in operation during the hatching season.

From 10 until 4 o'clock the model bungalow is open to visitors, who are shown by the hostess the attractive features of a home, which although planned for rural surroundings, should be equally suitable to the city.

The particular feature of the ranch which entitles it to be known as a "model farm" is that no pains have been spared to make it beautiful as well as productive. There is nothing ornate or showy about house or grounds, but that the aesthetic nature of the rural man has not been forgotten is manifested by a simple beauty and good taste everywhere visible.

February, 1915, **The California Garden:** The Exposition, Horticulturally, by G. R. Gorton. . . . Our exposition having specialized on its horticultural features, it is difficult to do more than mention in a rather superficial way some of these features which, perhaps, would be most apt to attract the attention of the visitor at this time.

Possibly he would consider the groups of giant *Phoenix* as being the most conspicuous objects at the entrance --- especially if he knows that they have been in their present location less than three years.

The *acacias floribunda* and *baileyana*, the latter just coming into its mass of golden bloom, are sure to make their appeal to the lover of these typically Californian shrubs.

Approaching the Puente Cabrillo he passes successively masses of *Abelia rupestris*, just now wearing a sort of autumnal tint, various *Bottle Brushes*, *Leptospermum laevigatum*, *Escallonia alba*, *Grevillea thelemanniana*, *Cassia tomentosa*, *Tecomaria capensis*, the last four in flower. Passing across Cabrillo canyon, and under the two arches joining the California and Fine Arts Buildings, he enters the "Prado" --- the main street of exhibit buildings.

The "Prado" is lined with *Acacia melanoxylon*, the popular Blackwood acacia. The arcades which form a shady walk from building to building furnish a support for *Begonia venusta* --- just now in full flower.

The *Coprosma* forms a deep green background for the bright red *Poinsettia* blossoms. On the second plaza -- the "Plaza de Panama" --- the arcades are resplendent in the magenta of *Bougainvillea braziliensis*, and just beyond --- again on the "Prado: --- the arcades on one side are clothed with the terra cotta *Bougainvillea lateritia* and on the other with more *Bignonia venusta*. The shrubbery here is largely of "needley" planting such as *Acacia verticillata*, *Grevillea thelemanniana*, with its delicate feathery foliage and dainty red flowers, and here and there a *Hakea* or a *Casuarina*.

The corners of the buildings are given over in some instances to sub-tropical groups of many species, including *Phoenix canariensis*, *Erythea (edulis and armata)*, *Cocos plumosa*, *Chamaerops* (both *humilis* and *excelsa*), etc., combined with *Dracaenas*, *Phormium tenax*, *Eucalyptus* and *Acacias*.

In the groups in front of the Foreign Arts building are one or two *Pittosporum phillyraeoides*, a "weeping" *Pittosporum* of rather interesting habit. Some of the entrances are guarded by solitary specimens of *Dracaena indivisa*, others by tall Italian cypresses.

There are, here and there, around the grounds interesting groups of specimen plants. One such is a group east of the Food Products Building. This group contains *Gunneras Musa ensete* (the Abyssinian banana), *Sterculia acerifolia*, *Corypha australis*, *Hibiscus mutabilis*, *Derringea*, and many others.

The *Streptosolen jamesonii* in front of the Southern California Counties building has attracted much attention with its wealth of bloom. The same group contains a fine specimen of *Wigandia macrophylla*.

The patio . . . is typical of much of the sub-tropical planting and contains a number of good specimens of this class.

There is north of the California Building a planting of meadow grasses and wild flowers which promises much for the near future. There is also a similar plot at the bottom of Cabrillo Canyon, north of the bridge.

The aquatic plantings are worthy of mention. There is the naturalistic planting around and in the lagoon in Cabrillo Canyon --- the lilies and lotus, however, are hibernating just now, but promise well for the warmer months to come. The more formal pool in front of the Botanical Building contains some of Mr. Sturtevant's best in lotus and lilies, together with the usual aquatics, such as the Water Hyacinth, Water Poppy, Parrot's Feather, Thalia, Arrowhead, Water Iris, etc.

Inside the Botanical Building the *Azaleas* are now at their best, as are also the *Primulas*, *Streptocarpus*, *Saintpaulias* (the dainty little African violets), and many others, besides the curious Philodendrons, Crotons, Anthuriums, both the ornamental leaved types and the "Flamingo Flower" which are always on show.

There is very much to interest the visitor, be he "amateur" or "professional" in matters horticultural and he may profitably spend hours and days studying and enjoying.

San Diego Sun, February 1, 1915, 1:8. 180,270 people passed through Exposition gates during January; rained almost all last week; Attendance Sunday, January 31, was 5,434, January 30, Saturday, was 1,000 during a wet day..

San Diego Union, February 1, 1915, 3:2-4. Santa Fe Issues Exposition Folder; high compliment paid San Diego, its Fair and climate.

San Diego Sun, February 2, 1915, 2:5. Crowds at Exposition defy rain; Teachers' Institute being held this week at Panama-California Exposition.

San Diego Union, February 2, 1915, 2:3. This Is Straw Hat Day. . . . This is Straw Hat Day. It is San Diego's unique holiday. A year ago San Diego was placed on the map and advertised throughout the country when San Diegans turned out in summer attire and paraded when the East and Middle West were frozen up. Today San Diegans will repeat.

Several pessimistic citizens late last night said San Diego's second Straw Hat Day would be raw and cold. It remains to be seen whether their predictions will come true.

It will be up to the Gas Company to tell San Diegans whether this is a good Straw Hat Day or not. If the parade is to start at 2 p.m., the Gas Company's whistle will blow two long blasts at 11 a.m.

Major Fay, chief marshal of the parade, has completed all arrangements which will be carried out according to schedule if the weather is fair.

It will be Straw Hat Day from the time the parade arrives at the west gate until the hours begin to grow small tomorrow morning. A something-doing-every-minute program has been arranged by Leigh D. Bruckart, chairman of the special events committee and popularly known as "Brucks, King of the Isthmus."

(Events scheduled: fat man's race, ballyhoo contest, parade of bands and employees of concessions, game of "stump," special shows on the Isthmus.)

San Diego Sun, February 3, 1915, 3:6-7. Davis announces daily Exposition attendance figures

Thurs.	Dec. 31 -	31,836	
Fri.	Jan. 1 -	15,120	
Sat.	Jan. 2 -	11,315	
Sun.	Jan. 3 -	7,715	
Sat.	Jan. 9 -	6,112	
Sun.	Jan. 10 -	6,165	
Sat.	Jan. 16 -	14,793	(San Francisco Day)
Sat.	Jan. 23 -	5,082	
Sun.	Jan. 31 -	5,434	180,270 during month

San Diego Sun, February 3, 1915, 12:4-5. Description of Alhambra Cafeteria.

San Diego Sun, February 4, 1915, 7:1-2. Exposition boosters advance suggestions to Board.

San Diego Sun, February 4, 1915, 7:4. Local Chinese plan big time at Exposition, February 13, Chinese New Year; Quon Mane making arrangements; three-day celebration, February 12, 13 and 14.

San Diego Union, February 4, 1915, 1:8, 3. 100 various civic, business, social and fraternal organizations of San Diego pledge aid in movement to support Exposition. . . . In a spirit of entire loyalty to the Exposition, at the invitation of President G. A. Davidson, some 100 fraternal organizations of San Diego met last night in the auditorium of the U. S. Grant Hotel to discuss ways and means for promoting the interests of the Fair and for encouraging every method possible to increase the attendance. Many suggestions were made and occasionally a friendly criticism was offered, but harmony, which amounted almost to a love feast, prevailed throughout the meeting.

At the conclusion of the session, President Davidson said: "I am glad to see so many present, and I can assure you that every suggestion with reference to the management of the Exposition made here tonight, and I am

persuaded that the majority of them have their merits, will receive due consideration by the board of directors. I want to say that this Fair is not the directors' Fair, but it belongs to the people of San Diego, and it is our purpose to find out what they think of its management and to weigh every suggestion that is made."

Frank J. Belcher, chairman of the executive board, who presided at the meeting, expressed practically the same sentiment. "We want you to feel that it is your Exposition," said Belcher, "and anytime the people of San Diego have a suggestion to offer which we believe will further the Exposition on the road to the memorable success which it is going to be, and while I may say it already is, these suggestions, I assure you, will be welcomed by the board of directors. And I want it understood that I am not excluding criticism."

Weekly board meetings for the Exposition is the plan and the next one will be held Wednesday night, the place to be announced later.

The idea is to have all local organizations work in harmony with the board of directors with a view to a perfect understanding and an increase in the attendance. Following is the invitation issued by President Davidson which explains the purpose of the meetings:

"For the purpose of creating a more harmonious spirit throughout the city, in order that the Exposition shall be the success expected by the citizens of San Diego, and to make the year 1915 memorable as one of progress and prosperity, it has been suggested that the directors of the Panama-California Exposition call meetings of the representatives of every civic, business and social organization in the city, to discuss plans to bring about this happy result.

"The first meeting will be held in the auditorium of the U. S. Grant Hotel on Wednesday, February 3, at 7:30 p.m., and you are earnestly requested to be present in person or to appoint a representative of your organization or association, who can at that time meet the directors of the Exposition."

The first speaker called was Carl H. Heilbron, president of the Chamber of Commerce, and a member of the Exposition board of directors. "In the last analysis," said Heilbron, "the success of the Exposition depends upon the people of San Diego. We had a successful opening and we must carry our enterprise through to a successful conclusion. We are going to do it."

Among the suggestions offered by other speakers were: the sale of season tickets on the installment plan; six-month tickets for \$5; a San Diego County Day every Saturday, with admissions reduced to twenty-five cents; club tickets to admit to all the attractions on the Isthmus; that the exhibits be open on Sundays and in the evenings; an exhibit showing the growth of cotton and its manufacture into goods in the interests of the Imperial Valley cotton growers; that means be adopted to popularize to a greater extent the concessions on the Isthmus; and that the various organizations of the city set aside days to attend the Exposition in a body.

It was pointed out that while it was expected that January and February would be dull months as far as attendance was concerned, the records how that more than 180,000 persons passed through the gates last month, a showing in the history of Expositions in this country exceeded for the first thirty days only by the Chicago Exposition. Also, it was said that Eastern visitors to the Fair have not begun to arrive to an perceptible extent in view of the fact that excursion rates will not be on until March.

Practically every speaker --- and many of them had attended all the great fairs ever held in the United States -- agreed that the Panama-California Exposition for beauty, completeness, artistic finish of architecture, landscape, gardening, and general effect, ranks ahead of anything they had ever seen.

The other speakers of the evening were: R. A. Chapman, who suggested the cotton exhibit; H. W. Sumption, president of the Rotary Club; Judge E. J. Henning, president of the Federated State Societies; Judge J. M. Chatterson, who suggested a \$5 six-month's ticket; Allen Wright, city clerk; A. A. Unger, superintendent of the Holzwasser department store; J. F. Haight, president of the San Diego Ad Club; W. D. Crum, banker and real estate dealer; W. H. Hinman, secretary of the Cabrillo Club; W. O. Talbot, secretary of the Chamber of Commerce; William Tomkins, secretary of the Chamber of Commerce; W. H. Wheeler, secretary of the Manufacturers' Association; Secretary Higley of the Southern Automobile Club; Mrs. Nannette Payzant,

president of the Connecticut State Society; Duncan MacKinnon, superintendent of city schools; Attorney Eugene Ferry Smith, member of the board of directors of the Archaeological Society; Ed Crolie, president of the Retail Clerks' Association and a representative of the Eagles; A. H. Girffin, president of the Canadian Society; Jacob Breckel, president of the Central Labor Council; A. E. Blethen, representative of the Federated Improvement Clubs; B. Naylor, who suggested an "Optimistic Day," and said that the only criticism of the Exposition he had heard was from a woman who asserted that a girl rigged out in a Spanish costume looked to her like a Swede; H. S. Coffield, president of the Illinois State Society.

Before adjournment, President Davidson called attention to the fact that the steamer Great Northern is due in San Diego harbor, February 11, with five or six hundred notable aboard and that he hoped the citizens on this and the following day will turn out and attend the Exposition in full force.

On motion of Judge Henning it was decided to hold weekly meetings with the directors and the motion was made to include not only the organizations invited to participate in the one last night, but any other citizens who may wish to attend.

San Diego Union, February 4, 1915, 4:6. Exposition Excursions No. 2: Architecture of the Exposition, by William Templeton Johnson. . . . History binds California so close to Spain that it was appropriate that the officials chose Spanish architecture for the Exposition buildings.

The architecture, which was one of the glories of Spain during the period of her greatest power, had its beginnings centuries before in Constantinople.

After Rome was overthrown by barbarians in the fourth century, the capital of the Holy Roman Empire was transferred to Constantinople, and all through the dark ages, almost the only men of learning were gathered there. When Constantinople was captured by the Turks in 1453 AD, this group of brilliant scholars, architects and artists pushed westward into Italy. The seed of the revival in art and letters had been planted by such men as Dante, Cimabue and Nicholas Pisano, and artistic talent was in high demand in the great cities of Venice, Florence, Milan, Pisa, Genoa and Rome. It was a remarkable age, a reawakening of culture, everyone studying, everyone interested in architecture, sculpture and painting, and it was only natural that such enthusiasm should have produced an architectural style which has never been surpassed.

The new architectural ideas traveled slowly from Italy into Spain, and once there the style changed very materially and became a curious combination of severely plain and ornate features. The Moors had long dominated Spain, and their plain, thick-walled, small, windowed buildings with cool interior patios, designed for the scorching heat of Africa, has a decided influence on Spanish building. The ornament, however, was elaborate in the extreme, the Moorish fancy contributing to the more fanciful designs. Doorways and windows, balustrades, porticos and towers were literally covered with arabesques (the ornament of the Arab) of griffins and grotesques of all sorts, scrolls and garlands, masks, shields, cherubs, flowers --- in short, anything a vivid imagination could evolve.

The result was an architectural style differing widely from that in other countries, and one which became more and more gay and free until it degenerated into coarseness.

Spain was at the very height of her glory when America was colonized, and her galleons, laden with treasures, were crossing and recrossing the Atlantic. This period was also that of the finest architectural achievement, and it was quite natural that its influence should have crossed the water with the colonists and affected the buildings erected in the New World.

At the Exposition there is a splendid chance to study how Spanish architecture was modified by contact with the Moors, and how it gradually changed in Mexico and in California.

As one walks across the Cabrillo bridge, the Fine Arts building on the right, with its high walls and deep recessed windows, is evidently Moorish in feeling, while on the left the great dome of the California Building is similar in many respects to the tiled-covered churches of Mexico, which in turn trace their origin back to the domed churches of Italy to Hagia Sophia at Constantinople. The deep-arched gateway has quite the air of

being built for easy defense against foot soldiers, but once inside the gate all thought of a fortress vanishes, for we are in the quiet patio before the magnificent sculptured front of the California Building. It is a beautiful example of Spanish-Renaissance. There is no finer facade in Spain, and the tower holds its own with the gorgeous towers of Cordoba and Seville.

The tile-roofed arcade at the north side of the Fine Arts building is typical mission architecture, as is the eastern front of the Indian Arts building, and these should be contrasted with the rich, elaborate towers and balustrades of the Foreign Arts and Home Economy buildings --- the latter following closely in design the palace of Monterey at Salamanca. The difference between the ornament used on these buildings and that of the Varied Industries, San Joaquin Valley and Sacramento Valley is marked --- the details used being much heavier and less delicate.

The mission architecture that the Franciscan monks gave to California and the Rio Grande valley was far more simple than most of the work in Mexico and Spain; the reason being that the buildings were, a large part of them, erected by priests with Indian labor. The New Mexico building, which is taken from the mission of Acoma, is a very good example of how their construction came to have features like those to be found in Indian architecture in the same vicinity. The building is as much savage as civilized in feeling, and the use of tree trunks to support window openings and roofs shows how close to Indian methods this very interesting building is.

After all is said, the whole group of buildings may be viewed as a single artistic unit. As one stands on the Plaza de Panama, it would not take a vivid imagination to picture oneself in Mexico or Spain. The harmony of the architecture, the beauty of the planting, the many colored curtains floating from the balcony windows, the gay Spanish costumes of the attendants --- all go to make a picture that will sink deep and last long in the minds of the people.

San Diego Union, February 4, 1915. Gleaned on Prado and Isthmus. . . . Interest in special events at the Panama-California Exposition centers on the second Society Night, which will be tonight and Orange County Day which is Saturday and on which day several hundred northern boosters will visit the Fair.

Combined with Society Night is the celebration of San Diego Rotarians, who will visit the grounds in a body, take dinner at the Cristobal Café, attend the dinner dance to be given at the café and later make a tour of the Isthmus. The two big events of tonight will be merged so that the festivities may be of wider scope than at any previous celebration since the Exposition opened.

Just to be different, Rotarians have placed a ban on dress suits. In an announcement printed in **The Rotator**, the magazine of the local organization, the following words appear in black face type: **"No dress suits."**

The Thursday evening society functions have proved popular with scores who now reserve their tables a week ahead. Manager Bob Singer always arranged special entertainment on Thursday evening each week and from now on it is planned to augment the function with a gathering of some other organization. It is understood that the Rotary Club will repeat their stunt of tonight each month during 1915.

The celebration of Saturday, Orange County Day, is becoming bigger as the day draws near. One excursion is coming under the auspices of the San Bernardino Chamber of Commerce and officers of the National Orange Show, and another is coming from points in Orange county, Fullerton, Santa Ana and other live towns. The Orange county train will arrive in San Diego at 11:15 Saturday morning and the San Bernardino train will arrive fifteen minutes later.

The visitors will be met at the Santa Fe station by officers of the Exposition, probably a squad of Balboa guards and the Panama-California Exposition band. As the time of some of the visitors will be limited, they will be taken to the east entrance, where they will go directly to the Southern California Counties building, where all of them will be required to register.

At noon the visitors will eat their luncheon at the Cristobal café, after which they will make a tour of the grounds, first going through the buildings representative of Southern California and the out-of-door exhibits.

Later in the afternoon a reception will be tendered the visitors in the bungalow on the model farm. Mrs. W. W. Wilson will be the official hostess for Orange county and she will be assisted by Mrs. Charles I. Wilson and Mrs. Florence Collins Porter of Los Angeles.

In the evening an athletic entertainment will be given at the Plaza de Panama by athletes from the YMCA. Later the visitors will be taken on a tour of the Isthmus.

What is predicted will be the largest and most spectacular event of the life of the Panama-California Exposition will be the celebration of the Chinese New Year which comes on February 13.

Officers of the Los Angeles Chinese Chamber of Commerce notified Leigh D. Bruckhart, who is in charge of the arrangements, that a special train, bearing about 200 Los Angeles Chinese, will arrive in San Diego on the morning of February 13. A large number are coming from San Francisco and some of them have arranged to come on the special from Los Angeles.

The celebration, which will be under the direction of some of the most prominent Chinese residents of San Diego, among whom there are many loyal boosters of the Exposition, will really begin on Thursday evening, February 11, with a mandarin dinner dance, which will be given at the Cristobal café. Elaborate plans are being made for this event. Known for their love of good things to eat, the committee of Chinese in charge of the function say that neither time nor expense will be spared to make it the greatest banquet of Chinese foods ever spread in the city. On the evening of the banquet, the new steamship Great Northern will have arrived and the new visitors will be entertained at the dinner and dance.

Friday, February 12, the delegation of visitors from the convention of the Western Fruit Jobbers' Association at Los Angeles, will arrive. On this day the Chinese will fly their New Year's kites from the Exposition grounds. This ceremony is expected to be one of the most interesting presented.

Early morning visitors to the Isthmus on Saturday morning, February 13, will find the amusement street a mass of Chinese flags of both the old regime in China and the new, augmented by thousands of Chinese lanterns.

At 8 p.m. the feature of the whole celebration will be given, when the great parade of the 300-foot dragon will be held. With gleaming eyes, and smoke pouring from its furnace-like mouth, it will be taken on its tour, by which it is expected to chase the devil from the grounds and from the lives of the Chinese for another year. Never will the Isthmus be more brilliantly lighted than on the night of the celebration. Thousands of Chinese lanterns will be lighted and with the usual brilliance of Isthmus lighting, the effect, it is thought, will be most spectacular.

Miss Yung Hing, famous Chinese vocalist from Los Angeles, will be queen of the festival. This was decided at a meeting of the Chinese community yesterday, and she accepted the invitation by telegram. She will sing at the Cristobal café both Friday and Saturday evenings. In addition, the Toy Kee Chinese orchestra of eight pieces, has been engaged to play.

Chau Kiu Sing, secretary of the Los Angeles Chamber of Commerce and Henry U. Yip, former secretary of the same organization, are greatly interested in the San Diego celebration and predict that hundreds of Chinese from all parts of the state will attend.

Gwin Hicks, who is in charge of the Washington building at the Panama-California Exposition, is planning a celebration of "Potlatch," to be held at the Washington building, February 22, Washington's birthday.

"Potlatch" is the name given an old custom by Indians of Washington. At a certain time each year they give to the more unfortunate members of the tribe, blankets and food. It is the annual Indian charity.

Hicks intends to combine the celebration of Washington's birthday with that of "Potlatch." In the evening officers of the Exposition will pay an official visit to the Washington building and a tempting menu has been arranged by Hicks for the officials and other visitors.

Appropriate of Washington's birthday, will be served ice cream, topped with cherries. The largest cake every made in San Diego has been ordered from a local baker. It will be made of Washington flour, Washington eggs and other products of Washington, made and grown in that state. At the reception to the Washington officials, Mrs. Gwin Hicks will be official hostess and will be assisted by other women who were former residents of the Evergreen State.

The enormous cake will be served by women dressed in pioneer costumes. The ice cream will be served by Holland girls, dressed in native Holland costumes. Cider and apples will be served by Indian girls. The women who act as hostesses will be dressed in colonial costumes.

San Diego Examiner, February 5, 1915, 2:3. Progress at Mission Beach.

San Diego Sun, February 5, 1915, 1:3. Fine welcome planned for visitors; first Port-of-Call to extend royal greetings to Great Northern; arrives Wednesday; brings distinguished guests who will visit city and Exposition; first of great passenger steamships to come through Panama Canal to San Diego from the Atlantic.

San Diego Sun, February 5, 1915, 7:1. Tomorrow Orange Day; Two trains bearing San Bernardino, Riverside and Orange County delegates to arrive at 11:00 a.m.

San Diego Union, February 5, 1915, 1:4. San Diego County school teachers were entertained at all the state buildings.

San Diego Union, February 5, 1915, 3:4. Summer school to open at Exposition; made possible by Andrew Carnegie; courses in Spanish, geography of South America, and the problem of the European war are planned.

San Diego Sun, February 6, 1915, 1:3-4. Orange is King in city today; Orange County Day at Exposition.

San Diego Union, February 7, 1915, 3:2. Orange County Day is celebrated.

San Diego Union, February 7, 1915, 4:2-3. Exposition Excursions No. 3: The San Diego of Yesterday: Indian artifacts of San Diego region displayed in lower floor of Fine Arts Building, by John P. Harrington.

The romantic and interesting period of Spanish rule on this coast, about which so much is told and written, lasted only half a century. Back of that lies ten thousand years of more of Indian San Diego.

The San Diego of yesterday is to most people a dream, a picture imagined with difficulty.

In what sort of houses did our predecessors in this region live? How did they navigate the esteros and seas? What were their utensils, implements, weapons? How did they hunt and fish? What was their dress or undress? How did they smoke? What did they eat? What were their dances and dancing regalia? What musical instruments did they play? How did they dispose of the dead?

These and similar questions will be asked by anyone who begins to think about the subject.

A visit to the California room of the Fine Arts building will answer all these questions in a satisfactory way. There you can see a reconstruction of the life of the vanished or vanishing Indian, as represented by a large collection of the objects made by them.

A unique specimen is the plank canoe of the type seen on San Diego waters by Cabrillo and other early explorers. Made of rough-hewn boards of native pine or cedar, lashed together with string of red milkweed fiber, caulked with tule and coated with asphaltum, these boats would stand the roughest seas and played an important part in Indian fishing and transportation. The canoes carried from two to six Indians. In them the Indians navigated not only the esteros along the shore, but ventured far out to sea, crossed to the islands, or made long trips up and down the coast.

Another much-used kind of boat was the canoe-shaped raft or balsa of tule. These were more easily made than the wooden canoes. They would carry one or two persons and were paddled like a wooden canoe. They were used on the ocean and on the bays or esteros.

Still another type of craft is the square balsa, used only on still water.

The coast Indian house was shaped like a wigwam. A number of willow poles were leaned together, lashed and thatched with petates (mats) of tule, loose tule or grass. The fireplace was at the center of the house, and a hole was left at the apex for the exit of smoke. In fair weather the people passed most of the daytime out of doors and the cooking was done outside the house. But they slept in the house on mats, loose tule or on the earth floor, and, if the night was at all cold, kept a fire burning in the house until morning. A tule mat served to close the doorhole. A group of these houses, irregularly arranged, constituted a village, called in Spanish *rancheria* and in Indian merely "awa" --- "houses." Each village was governed by a hereditary chief who rules with autocratic authority. The Indians were monogamists and, roughly speaking, each family had a separate house. When the owner or occupant of the house died, the house was burned as were also the personal belongings.

Dress Scanty

The dress of the men was either nothing at all or a G-string of buckskin supported by a belt of string. The women wore a dress of buckskin, tule or bast. Specimens of these articles of clothing are exhibited. Beads, pendants and other ornaments for personal adornment were made of shell, bone or wood in the most varied shapes and sizes. The rarest beads were the long cylindrical ones of purple color made from the shell of the rock oyster, and the long slender beans with minute boring made of the thick white shell of the large clam.

The baby cradle was a simple affair. The fork of a willow tree was cut and twigs were tied across to form slats. On the framework these made a tule mat was fastened, and on this the child was kept tied, body, arms and legs, during the first two years of its life. This was said to make the child grow up straight in body and to make him obedient. The cradle was carried on the woman's back or head; was planted erect in the ground; or suspended by rope from the roof of the wigwam.

There are exhibited specimens of the coarse, porous, brittle, blackish pottery made by the coast Indians; also pot-rests of clay for supporting the pot over the fire, and pottery pipes. These latter were straight tubes and the head had to be held back when smoking.

Mush made of acorn meal or of various seeds was a principal food. It was taken from the pot on wooden ladles and eaten with the fingers. It was stirred with a stick, a ladle or a bunch of reeds tied together for the purpose.

The materials used by the Indians in manufacturing baskets form an interesting exhibit. Here is the bone awl, the willow splits (for white), manzanita bark (for red), fern roots (for black), and tall rice grasses for the core of the coil.

Baskets Unique

Large conical baskets were used by the women for carrying burdens on the back. With seedbeaters they knocked the seeds so that they fell from the plants into the basket. A carrying net of string was strung across the shoulders and used for carrying things.

Storage baskets of two types were used --- of mud and of coiled basketry. On these the food supplies were stored.

Rings made of twigs or fiber were used for carrying burdens on the head.

An interesting twine-twisting device is exhibited. The implements of war and the chase form an important group of objects. There are seen men's and boy's bows. For shooting small birds four little sticks were tied transversely near the tip of the arrow, and then the chance of hitting the bird was increased. There are shown spears of two types, a shield, four kinds of war clubs, an ancient stone ax, a deer-stalking outfit, boomerangs or throwing sticks and a whale's bone gourd; also crooked sticks used for extricating lizards from their chinks and crannies, and a cage for keeping wild pigeons to be used as decoys, and a snare for catching wild pigeons.

The three fishing implements are represented --- the pole and line, line and harpoon. The hooks were made of the shell of the abalone or the large seashell. The Indians had not discovered the principle of the barb.

Digging sticks, with and without stone weights, are shown; also walking-sticks and fire-sticks. In using the latter the horizontal stick is held on the ground and the foot is placed on it. The other stick is then rapidly twirled between the palms. Sometimes two or three Indians took turns, each twirling till he got out of breath, before the fire was produced.

The paraphernalia for the games of ring and pole, shinny, kicking race (the counterpart of our game of football) and peon have been installed.

Among the ceremonial objects should be mentioned the feather dancing skirts, feather headdresses, clapper sticks, rattles, feather wands held in the hands of the dancer, a bullroarer or buzzer used for calling people to the ceremony, and an old tule case for keeping regalia.

Musical instruments are represented by the primitive Jew's harp, the musical bow and the flute. These instruments were used chiefly by young people and love-makers.

The collection herein referred to occupies the lower floor of the Fine Arts building, known as the Gallery of California History. Cut this article out and take it with you when you go to the Exposition.

San Diego Sun, February 9, 1915, 1:7-8. Jitney bus on trial here today; City asks for injunction.

San Diego Sun, February 9, 1915, 7:6. Many on way to Exposition City; excursions start from East; summer rates of \$62.50, round-trip from Chicago to California.

San Diego Union, February 9, 1915, 3:3. People's Chorus to sing with outdoor organ every month.

San Diego Sun, February 10, 1915, 1:1-2. Great Northern passenger steamer comes in rain, but thousands cheer her at city pier; trip through canal is made without trouble; will sail at midnight.

San Diego Sun, February 10, 1915, 6:1-2. Mystic charm of Hawaiian Village pleases visitors; under supervision of Kenneth Croft; 56 natives employed, headed by Ernest Kaai, a musician, and Princess Niau Inakea, an actress; reproduction of Hawaiian volcano guards gateway to exhibit; Old and New Hawaii represented; natives make mats, spears and what-nots.

San Diego Herald, February 11, 1915, 3:2. Exposition Travel.

San Diego Sun, February 11, 1915, 1:7. Friday's program, February 12: Straw Hat Day, Chinese New Year, Western Fruit Jobbers' Association Day.

San Diego Sun, February 11, 1915, 5:5. Amphion Folk lunch at Exposition; music features gathering at Cristobal café; L. B. Behymen and Dr. Stewart talk.

San Diego Sun, February 12, 1915, 6:4. Chinese ready for celebration tomorrow night; a huge Chinese dragon at the head of a parade will be followed by 500 Chinese; Hour of the Rat Sunday night.

San Diego Sun, February 12, 1915, 9:3-4. Sacramento Valley Exhibit shows resources of wonderland of west; C. H. Dunton, manager.

San Diego Union, February 12, 1915, 1:7-8. Jim Corbett Appears With Other Notables in Monster Pageant. . . . Local weather forecaster E. Herbert Nimmo relented yesterday and allowed Major Herbert R. Fay to stage his straw hat parade. Major Fay didn't kick when Nimmo opened the flood gates above on February 2. Fay is the boss of the city water department. It's his business to see that J. P. soaks the back country and gives a good run-off, but occasionally Fay, who is a good military man, insists on pulling off a parade in San Diego; so he notified Nimmo shortly before midnight Thursday to put fair weather on the schedule for San Diego's postponed Straw Hat Day.

Clouds hung over Point Loma and the city at noon, but the sun was shining, and the whistle blew announcing that the straw hat parade would take place.

Straw Hat Day boosters began to gather along lower Broadway, shortly before 1 o'clock. By 1:20 they commenced to arrive in droves and when the parade started at 2:10 p.m., there were more than six thousand ready to move over the line of march.

The parade, like last year's pageant, was a democratic one. Organizations, business houses, schools, and Uncle Sam's defenders were represented. Jim Corbett, for two decades the idol of fight fame, rode near the head of the parade and pronounced it one of the best he had ever seen.

J. Keno Wilson, chief of San Diego's department of criminal investigation, in a real Panama and astride his horse, like a real Texas ranger, rode at the head of a half dozen of San Diego's finest and cleared the way for Fay's straw hat brigade. The procession moved from Lower Broadway past the U. S. Grant Hotel where the movies snapped the principal features and the committee of awards viewed the parade, up Fourth to B, east on B to Fifth, north on Fifth to Laurel, and east on Laurel to the Exposition's grounds.

Major Fay's staff was one of the most picturesque that ever had a parade in the city. All wore Exposition hat bands. The women of his staff were all expert horsewomen and Mrs. Fred Fanning won the prize for the best appearing equestrienne in the parade.

(A list of Major Fay's aides follows.)

At the Exposition, the parade was reviewed and dismissed and all wearing straw hats were admitted to the grounds at half price. The musical organizations participating in the parade were admitted free.

For a few hours after the parade was dismissed, the Isthmus did the best business it has done since the Exposition opened.

Big Brindle Bulldog Objects to Straw hat and Hides Behind Man

(See newspaper for story.)

One of the best laugh-getters in the parade was the jitney bus which a number of boys fixed up out of an old pushcart and a barrelhead. One of the men who laughed hardest as it was William Clayton, manager of the electric railway.

San Diego Sun, February 13, 1915, 1:3. Chinese to celebrate New Year on Isthmus for three nights beginning at 8:00 tonight with parade of big dragon.

San Diego Sun, February 13, 1915, 3:3. City may take over Exposition work of caring for streets, roadways, walks and grounds of Exposition for rest of year; now costs Exposition about \$5,000 a month; City will be asked to spend \$40,000 for rest of year.

San Diego Sun, February 13, 1915, 3:4. Straw Hat Day is voted success; Aviator Knox Martin flew over city and dropped six straw hats into the business district during parade.

San Diego Union, February 13, 1915, 7:2-3. Cavalry Review Stirring; Horses Thunder Down Street; Crowds Sound Applause; San Diego Given Unusual Treat When First Squadron Passes Before President Davidson at Trop and Gallop. . . . Passing in spirited review before President G. A. Davidson, yesterday afternoon, the First Cavalry Squadron and band furnished San Diego with a never-to-be-forgotten spectacle of the first magnitude. Park avenue, moreover, was an ideal setting for the brilliant action.

The afternoon was perfect, the mud of the wide boulevard had dried and conducted readily to fast mounted work. The olive drab uniforms of the troopers blended perfectly with the greenery of the park's verdant foliage, as did the color of the horses with the road. This striking harmony caused much comment. Aside from pleasing the eye, it was patent also that as fighting units these troopers would prove singularly inauspicious targets for an enemy's bullets.

Like Horse Race

The form and character of the review were unusual. San Diego people were given an especial treat. For four troops of cavalry to thunder over a city street at a speed almost that of the charge is a little out of the ordinary. The customary review does not include it. Those who saw yesterday's review are not likely to forget the well-ordered dash of the sixteen platoons from Laurel street to Upas street, nor the tingling patriotic thrills of approval awakened as line after line of running horses swept by in even rows. Liveliest of martial music rendered brilliantly by the mounted cavalry band drawn up in Quince street, opposite President Davidson, imparted just the right atmosphere of glamour and dash. The great crowd assembled on either side of Park avenue shouted its affirmation and was stirred profoundly. One's sensations were similar to those attending the finish of an exciting horse race, with something much bigger and finer added.

Returning from the parade, the four troops of cavalry proceeded in platoons along Park avenue to Quince. Wheeling left into line and backing to the south curb, the long line of mounted men presented saber to President Davidson, who acknowledged the salute by raising his hat. A series of snappy evolutions, of machine-like precision followed. After evolutions at Upas street, the sixteen platoons passed in review at a walk. The band played stirring music. Turning once more at Laurel, the trot was taken up, and at this gait, with horse prancing but perfectly controlled, the reviewers were passed a second time. Still again the reviewers were passed, this time at a gallop. Sitting erects and easily in saddle, saber at carry, still in platoon formation, the mounted men created an impression of virile force and effectiveness. The crowd gave its approval voice. Men shouted lustily, women clapped, and along the entire parkway countless handkerchiefs fluttered and waved. The movie man was busily engaged with his crank, and Snapshot Bills, stationed at various points of vantage, clicked the shutters of Kodaks with great frequency.

Mounts Dash Forward

Then came the grand finale. One by one, at Laurel street, the platoons wheeled to the about. A trumpeter sounded trot. The increased gait was taken uniformly and without excitement or confusion. Once again sounded the clarion bugle notes. As one unit the several hundred horsemen burst into a gallop, rapidly increasing the gait until the gallop became all but a charge. In short the pace was about as fast as the slowest horse could run. Eager, expectant, jumping against the bit, the horses thundered down the roadway toward the reviewing stand, shoulder to shoulder. They seemed to anticipate the full charge. A slight pressure of the legs, reins quickly released, that wild abandoned shout the trooper is taught, and they would have bounded forward, full cry, an irresistible avalanche of destruction.

Indeed, as the shouting of the spectators vibrated above the tingling music of the cavalry band, all the horses appeared to leap forward, evidently mistaking the source of the shouting and believing it the signal for the

charge. Expert horsemanship and coolness along avoided a wild melee. The horses were controlled, the swinging lines maintained their evenness and accurate alignment, and, though laboring under some difficulty and handling reins with only one hand, each trooper kept his place, maintained his ease and grace in saddle, held each his saber rigidly erect and close to the shoulder, and thus platoon after platoon of cavalymen swept by the reviewers for the last time.

San Diego Union, February 14, 1915, 1:4-5, 3:2-3. Chinese Festival Attracts Thousands to Isthmus; "Hour of Rat" observance at Exposition will close two days of incense and Cantonese music, dancing.

San Diego Union, February 14, 1915, 4:2-8. New Mexico Building; state in miniature; activities and industries of southwestern commonwealth to be shown on screens. . . . A little journey to New Mexico was the ideal the state's Panama-California commissioners set before them in planning the New Mexico building and exhibits at the Exposition.

"New Mexico is like no other state," they said. "It developed a mission architecture peculiarly its own. It possesses a greater range of minerals than any other state. Ancient ruins found within its borders are of immense interest to archaeologists, surpassing anything north of the Rio Grande. Wealth in wheat, fruits and lumber is drawn from its soil. It raises many cattle and sheep. Its landscapes are unique, vivid with colors found nowhere else."

The commissioners set themselves to portraying these things and more, in the New Mexico building. Visitors always assert that they succeeded, and, at the same time, made the portrayal in a novel manner.

They selected the old mission Acoma to serve as model for the building. They reproduced its low, strong lines; rough ends of tree trunks projecting from adobe walls; the little, severe chapel where the friars intoned mass; its crude tower.

"California's mission architecture will be followed in many buildings," they said. "Let us show how widely the style of New Mexico differs from it."

In doing this they attained the unique. The New Mexico building surmounts the mesa's edge across a canyon from the California Building, lacking graceful arches and dusky colonnades, twined about with no rambling vines, strong and crude, just as the mission of Acoma stands on its sun-baked rock and watches the centuries fall.

Chief among the exhibits they brought to San Diego specimens of the myriad ores the state produces --- fine gold, meerschaum white silver, copper bearing porphyry, seamed with ruddy native metal, glistening mica, gray iron and curious mineral forms in which many metals mingle. These specimens first meet the visitor's eye as he enters the building. And he is likely to linger long before them, for they gleam in an infinite variety of colors and shapes, a rare study in the picturesque, even to a man who cares nothing for the immensity of the wealth they represent.

Mission Model Shown

Then the commissioners had models prepared of the ancient pueblos of Quaral and Pecos --- pueblos that were old when the first Spaniards toiled across the Rio Grande and into north country. But the white man added missions, where the friars might baptize and teach, and these, too, are shown, apart from the dwellings of the Indians, but enclosed by the same walls. There are striking differences between various pueblos, some exhibiting a high order of architecture, some only crazy wasps' work.

There also is a model of the old mission of Santa Fe, and one of the Maxwell mansion, host to many a motley crew when the adventurers turned their faces down the Santa Fe trail and started to form an empire, and another of Bent's fort, which that picturesque soldier of fortune set on the Arkansas river as the outpost against the Latins and Indians.

On the models, portraits of the rulers of New Mexico --- Spaniard and American --- look down so that the room has been christened the Hall of Governors, a reminder of the Palace of the Governors in old Santa Fe.

On the opposite side of the building, under the tower peering down into Mexico, is fitted an auditorium and motion picture room. It is a faithful replica of the chapel of the Acoma mission --- severe, dedicated to service, not to aestheticism. On its walls hang many oils of New Mexico's scenery, ruins, sagebrush, vivid under the setting sun, cyclopean stairs of stone. There also are water colors and oils of the buildings of Santa Fe that remain to recall the past. Some are pierced with bullet holes that occurred at the battle of Taos and are said to be more than 100 years old.

In this auditorium are shown many striking motion pictures, films and slides. Five Indian pueblos are shown in films, nine in slides. There are films of Indian dances, bizarre and grotesque, that have been among the popular entertainments at the Exposition. The annual Navajo fair at Shiprock is depicted, a colorful event that has no parallel in America, and can be compared with the fairs in central Russia.

Pictures Show School

There is the Indian school at Shiprock, motion pictures of coal mining operations, slides on agricultural subjects, cattle in quiet meadows that the average visitor hardly believes exist in the state; movies of farming; great artesian wells; immense irrigation projects --- altogether an interesting array. As the films are changed daily, the building welcomes back day after day the same persons. The programs begin at 10:30 o'clock in the morning and at 1:30 o'clock in the afternoon, the latter hour being fixed to avoid conflict with the recitals by Dr. Humphrey J. Stewart on the Spreckels organ.

On the second floor is the forestry room, where there are additional slides, all emphasizing the idea of conservation of resources. In this hall there are innumerable photographs of the forests and forest service in New Mexico, cross-sections of great trees, model of a forest section, and another showing graphically the effects of deforestation on the soil. In assembling these exhibits the commissioners wished to aid the federal government in its propaganda work as well as to call attention to the abundant timber the state possesses.

After the visitor has gazed at all the exhibits, he usually remains to luxuriate in the colors of Navajo rugs and hangings, or to wonder at the designs of the pottery and plaques, or to sit in the cheerful reception room, or on the sunny porticoes.

Many classes of persons visit the building, and each finds something of interest. The easterner seeking to "get back to the soil" will find lists of homestead lands open to entry, with descriptions. The commissioners wished to leave every road open to the man who, having seen films, slides and photographs, and heard lectures on agricultural New Mexico, wishes to get detailed information, so that, in addition to the homestead lists, there are pamphlets devoted to different counties, as well as one great volume covering the whole state.

Pueblos Win

The tourist usually lingers longest before the pueblo and mission models and the Indian dances and fair films. The man with the commercial turn of mind likes the minerals best, since they represent the chief wealth of the state, but all usually linger longer, finding attendants to explain to them all details of the exhibits. All the attendants are residents of New Mexico and thoroughly familiar with their subjects.

Much of the credit for the showing made by New Mexico is given Colonel E. R. Twitchell, chairman of the commission, who visited the Fair and building recently, giving, when he returned home an interview in which he found it difficult to say enough for San Diego.

New Mexico placed "all its eggs in one basket." It chose to exhibit in San Diego instead of in San Francisco.

But reports being sent home to the commissioners show that New Mexico is immensely pleased. The crowds at the building have surpassed expectation many times over, as the crowds at the Exposition itself have

surprised even the most sanguine. New Mexico estimates that it gained 100,000 new settlers from the exhibits made at St. Louis ten years ago and the literature distributed there.

It is predicted that the results from the San Diego work will exceed those of St. Louis.

San Diego Sun, February 15, 1915, 1:7, 2:3. Works Division is Done; Allen leaves soon; Davis explains letters taken from Exposition files concerning contracts for exhibits and concessions; 14,500 gross admissions Saturday; South Dakota Day is February 17; Cabrillo Club Day, February 19; Kentucky Day, February 20.

San Diego Union, February 15, 1915, 1:3. 14,080 enter Exposition gates in one day; paid admittance record probably exceeded by Saturday's figures; Chinese New Year's Celebration Popular; Attendance yesterday about eight thousand; Open-air organ recital strong drawing feature; crowd surges through Isthmus; concessions busy.

San Diego Sun, February 17, 1915, 7:6. Labor Union Day is Saturday, February 20; local labor unions to hold dance on Plaza de Panama in evening.

San Diego Sun, February 17, 1915, 7:7. San Diego Society of Natural History advocates use of Exposition buildings by schools and organizations without taxation.

Park Commissioners, Minutes, February 19, 1915. A motion was duly made and carried that automobiles be prohibited from parking on the east side of both Park Boulevard and West Drive.

San Diego Sun, February 19, 1915, 1:1-2. Santa Fe admits it is using station as club over the city; Attorney for road tells Commissioner Thelen, Santa Fe wants B Street closed for good and hasn't opened new station for that reason; road is allowed ten days to file a legal brief, then Commission will render a decision.

San Diego Sun, February 19, 1915, 2:3. President Davidson to call a meeting of Exposition Board to hear all complaints and criticisms aimed at the management.

San Diego Union, February 19, 1915, 4:5. City has Water Department buildings near 11th Street entrance to Balboa Park.

San Diego Union, February 21, 1915, 4:4-5. Exposition Excursions No. 4: Child Welfare at San Francisco and San Diego, by Gertrude Longenecker.

San Diego Sun, February 22, 1915, 1:8. Expo Thronged With Visitors; Fine Weather Brings Out Crowds; special programs enjoyed today; 6,786 passed the gates yesterday (Sunday); open house at Washington building today, cider and ginger snaps also served; also Santa Barbara Day.

San Diego Union, February 23, 1915, 8:3. Outdoor dancing attracts throng; hundreds trip light fantastic on Plaza de Panama at Exposition.

San Diego Union, February 23, 1915, II, 9:3-4. Interested throng attends State's unique celebration; Famous potlatch held in Washington building at Exposition; first President's birthday observed.

San Diego Sun, February 24, 1915, 2:6. Great crowds expected at Exposition beginning March 1; Davidson encouraged.

San Diego Union, February 24, 1915, 8:1-3. A wide piazza added to Kansas State Building.

San Diego Sun, February 25, 1915, 1:8, 6:4. Let us all vote for Marston, says Wilde; says merchant is man for mayor; would put it up to O'Neill; not seeking place.

San Diego Sun, February 25, 1915, 2:6. Movies are new Exposition attraction.

San Diego Sun, February 26, 1915, 1:7-8, 2:5. Mayor O'Neill makes hot retort to Wilde.

San Diego Union, February 26, 1915, 8:4. Free vaudeville assured for Fair; headliner numbers will be furnished by concessionaires Saturday.

San Diego Union, February 26, 1915, 9:1. Mayor O'Neill praises San Francisco Exposition; friendly feeling for San Diego liberally expressed, says executive; 2,200 attend banquet; Mayor much entertained by Bay City and Oakland officials.

San Diego Union, February 26, 1915, 16:1. San Diego Day set for April 21 at San Francisco.

San Diego Union, February 26, 1915, 16:2. San Diegans inspect new Santa Fe Station; hear safety first talk.

San Diego Union, February 27, 1915, 2:1. Experts will talk at gathering of ranchers; Farm Bureau announces general plan for Exposition meeting; big event promised; agricultural exhibitors to give demonstrations for visitors.

San Diego Union, February 27, 1915, 1:3. Southland Grips Heart of Movie Beauty; Grace Darling Prefers San Diego Exposition to Northern Fair. . . . Miss Grace Darling, the movie beauty, who does all sorts of unique things for the Hearst Selig Company, has returned to San Diego. Miss Darling, who has been in San Francisco attending the opening of the northern exposition, has come back to inspect fully the wonders of the San Diego fair, which she found impossible to do when she was here as a passenger on the Great Northern because of the ship's short stay at this port.

Miss Darling frankly confesses to preferring Southern California to the northern part of the state. "Of course, the San Francisco Fair is very beautiful," declared the vivacious movie girl, "but the Panama-California Exposition appeals more strongly to me. The difference between the two expositions can be expressed aptly by say that the San Francisco Fair is a brilliant diamond, but the San Diego Exposition is a matchless pearl. Of course, it rained all the time I was in San Francisco and I was kept on the jump so much that I am worn out. I shall be very grateful to have an opportunity to inspect your Exposition leisurely and to listen to the great organ."

According to L. K. Dewein, the cinematographer who accompanies Miss Darling when she goes on her "stunts," the pretty, fair-haired slip of a girl has had a rather strenuous time since she left San Diego on the Great Northern several weeks ago. Miss Darling visited Stanford and Berkeley Universities, rode up Mount Hamilton, prowled through Oakland, and did many other things, in addition to taking in all the Exposition ceremonies and meeting all the celebrities. Miss Darling finally broke down, and, by the doctor's orders, was compelled to take a rest of several days.

Miss Darling passed a strenuous morning yesterday at Los Angeles and faces the prospect of another one today. She is to visit the Painted Desert, the Hawaiian Village, and the Pala Gem Mine on the Isthmus this noon, meeting aboriginal and Kanaka celebrities and see how San Diego County gems are mined, and will meet Judge R. S. Lovett, president of the Southern Pacific Railroad. She also will renew acquaintance with G. A. Davidson, President of the Exposition, whom she met on her former visit to San Diego, and, as the wind-up, will attend the recital by H. J. Stewart on the big Spreckels' out-of-door organ. John D. Spreckels, donor of the organ, will explain to her the intricacies of the only instrument of its kind in the world.

With all this program ahead of her, Miss Darling sought her couch early last night. She had been on duty thirteen hours yesterday, which she declared was almost as strenuous as being a newspaper woman. At the Hearst-Selig studios in Los Angeles yesterday morning she boldly walked into the cage of a leopard and posed for the camera man.

"Then they asked me to ride the wild zebra," said Miss Darling. "I had never ridden one, but I was game and said yes. When the hostlers brought him out it took four of them to hold him and then they didn't hang on

very long. After I saw him plunge and rear for several minutes, my wondrous courage suddenly shrank surprisingly and I promptly said:

“Not for me, thank you. I want to get back to New York in the regular way and not in a big, black box.”

This well-known movie star also passed half a day at San Gabriel, viewing the “Mission Play,” and inspecting the famous old mission there.

San Diego Union, February 27, 1915, 9:1. Heavy gain shown in attendance at Fair; average daily attendance in February 900 above that of January; total to date 300,107; free vaudeville show on Isthmus will be popular feature.

San Diego Union, February 27, 1915, 9:3. Fair to expedite vast expenditure; Quarter million will be disbursed to San Diego merchants during the next month in settlement of Exposition obligations for goods purchased and credit extended.

Los Angeles Times, February 28, 1915, VI, 1:4-7. Relics tell tales of ancient America; art and history enriched by exhibits at San Diego Exposition; wonderful archaeological discoveries made near the Isthmus are taken to the Fair; outdoor doings.

San Diego Union, February 28, 1915, 1:4. Grace Darling, movie girl, captures Fair; interesting scenes filmed; notables greet actress.

San Diego Union, February 28, 1915, 3:1. Count Okuma discounts war scare talk; jingoists hope to see Japan and U. S. clash over China, says Premier.

San Diego Union, February 28, 1915, 3:1. Dr. Stewart promises Welsh airs for organ recital on St. David's Day.

San Diego Union, February 28, 1915, 4:2-3. Exposition Excursions No. 5: A Visit to the Botanical Building, by H. W. Sumner. . . . Few features at the Exposition are of greater interest to the traveling public than the California wild flowers and cultivated plants. In order to meet the constant inquiries for information and assistance in identifying the California flora, a series of “excursions” has been prepared which will be run during the next few weeks in **The Union**. These will be entitled, “A Visit to the Botanical Building,” “The Exposition Wild Flower Field,” “A Walk to the Pepper Grove,” and “The Horticultural Work of the Exposition.” These have been prepared by Messrs. Sumner and Gorton of the horticultural staff of the Exposition and Professor Skilling of the San Diego Normal School. The first of this series is here presented.

The Botanical Building comprises the great domed lath house and glass house in the rear. The lath house is equipped with overhead pipes and spray nozzles, so that in dry weather a cool mist keeps the ferns and tropical plants in a proper atmosphere.

There are a few survivors of the tree ferns that were shipped from Australia. When they arrived at the nursery about two years ago an onlooker asked what was going to be done with the dead fern logs, for they were ten or twelve feet long and about four to six inches in diameter, dry apparently. Today you may see the survivors, one near the pool in the glass house, and the other in the east wing of the lath house, and all probably will agree that it was worth the time it took to wrap the trunks in a moss, so as to duplicate as nearly as possible the natural conditions of moisture.

The central palm, reaching upward into the dome, is a huge *cocos plumosa*. Nearby are several *aralia papyrifera* with their spreading branches and large lobed leaves. It is often called the rice paper tree. The pith of this tree known as rice paper is in layers which are carefully unrolled into narrow sheets. These are used by the Chinese for drawing figures of plants and animals and also for making artificial flowers.

On each side of the east doors stand two *ficus pandurata*, majestic rubber trees. It has enormous leaves and is a rapid grower. Visitors are generally interested to know that it belongs to the fig family. An easterner was recently overheard telling his friends that this was the kind that grew in the Garden of Eden. One should take a careful look at it when the chance presents itself and see what kind of dress material Eve had to contend with.

A large *strelitzia nicolae* just at the right of the archway leading to the glass house attracts one's attention. It appears not unlike a banana tree, but the leaves are not so large and are of a blue tinge. A peculiar spike of blue flowers has given it the name of "bird of paradise."

Birds Weave Homes

In passing by the bird cages one is interested in the waver birds' nest. All must wonder at this instinctive knowledge made so apparent as these busy birds skillfully weave perfect little homes.

Around the pool of the glass house are several plants which must be considered. A vine called *vitis utilis* is twining along the steel beams and its aerial roots reach nearly to the water in the pool. These roots hang so close in some instances as to form a real portier. Also, it will grow out of doors in a southern exposure and do well.

On one of the posts that support the glass roof is hung a large moose horn fern (*platycerium grande*). There are several elk horn ferns (*platycerium alcicorne*) nearby. The large perforated leaves belong to a plant named *monstera deliciosa*, or translated delicious monster. The long, rather heavy aerial roots give it decidedly a tropical look, and the fruit is said to be delicious.

Asparagus myriodadua, from Natal, is an unusual plant, with its white stems and interrupted whorls of green needles. It bends gracefully over the pool and attracts much attention.

Among the many ferns is one *lygodium japonicum*, or climbing fern. It is a splendid vine to climb about a post in a fern house, and is sure to attract the eye.

Aquatics Commended

An aquatic with finely-cut leaves floats in several of the pools. It has a formidable name, *myriophyllum proserpinacoides*, or parrot's feather for short, but grows in spite of it very rapidly from cuttings.

Aquatics is a study by itself, and should be used more in home gardens. An expensive pool is not necessary, several half-barrels will make a pretty showing with certain varieties.

Just a word of explanation as to botanical names which seem hard to remember. If one gets the meaning to hitch the name to, it is much simpler. Take "*myriophyllum*," for example: "*myrio*" means "ten thousand," literally, "thickly set," "*phyllum*" means "leaves," so the translation is plain, "thickly-set leaves," which is a noticeable thing about the plant. Take "*ficus pandurata*," "*Pandurata*" means "fiddle shaped: and the leaves really do resemble a violin in shape. Then "*streptosolen*" means "twisted tube," "*streptos*" for "twisted" and "*solen*" refers to the tube of the corolla.

It is not so hard after all.

San Diego Union, February 28, 1915. California Limited will come to California in 29 sections; enormous traffic during low-rate term assured by early rush; rate effective March 1; nearly all travelers routed by way of Los Angeles and San Diego

San Diego Union, February 28, 1915. Indians pay tribute to ocean; Brave flees before booming breakers; denizens of mountain, plain and desert see Blue Pacific.

March, 1915, The California Garden, 7: At the Exposition, by Miss K. O. Sessions: The broad border of *ageratum* and *lobelia*, around the lawn leading to the organ, is fast coming into bloom, when the effect planned for a shaded blue border can be enjoyed.

The white *ageratum* and white *Cherokee* in the bed at the south end of the main water pool on the north side of the Prado is looking well and is a pretty and effective planting.

In the front tile terrace of the Seven Southern California Counties, the four beds of *chorizema illicifolia* around the base of the Japanese fan palm is a gorgeous display. The two beds in the shade look better than the others where the sun fades the flowers. This *chorizema* will be a valuable addition to our north and east flower beds. The flowers are like rows of little butterflies sitting on fine twigs. In the front of this same building, the group of slender trees with thread-like foliage --- *casurina teni* --- is very attractive. At the north side of this building is a group of the *casurina equisetifolia* --- with similar thread-like foliage, but coarser. That group of trees is most effective against the building and the ground is so well covered with the ornamental strawberry.

The garden proper is full of thrifty *galdiola*, blue *larkspur* and *phlox*, all promising early blossoms. The bed of mixed roses has had a pruning and by April and May will make a fine showing of bloom.

The *campsidium* vines, bright green, very glossy and growing vigorously, are coming into bud and bloom this month. This vine has so many virtues and so few faults --- and it is a most useful vine for immediate results --- they have been most generously planted everywhere about the buildings and the effect is most satisfactory.

In the Garden of Montezuma, the formal garden near the California Quadrangle, is now showing the low shrub *coronella*, with its brilliant yellow blossoms in small clusters, also some charming light salmon-colored *dimorpotheca*, a sort of daisy and an annual from South Africa.

San Diego Sun, March 1, 1915, II, 7:3. Today is Saint David's Day at the Exposition, in honor of the patron saint of Welsh people; a special program has been arranged by Dr. Steward, official organist.

San Diego Union, March 1, 1915, 12:1. Grace Darling, movie princess, danced with Indians; participated in special picture exhibition at Exposition; efforts pleased redmen.

March 2, 1915. SOME RECENT ANTHROPOLOGICAL EXPLORATIONS, Division of Physical Anthropology, U. S. National Museum, Washington, Presented by Ales Hrdlicka, 235-238.

In 1912 an arrangement was entered into by the Smithsonian Institution and the Panama-California Exposition at San Diego by which it became possible to send out jointly a number of anthropological expeditions for the purpose of furnishing the Exposition with original material for its exhibits, and of serving the Smithsonian Institution and the science of anthropology in directions in which progress was especially desirable.

The objects particularly aimed at in the latter respect were the promotion of research into man's antiquity; the survey of certain parts of northern and eastern Asia in quest of possible traces of racial connection with America; and the accumulation of reliable data on child development in certain primitive races under widely different environments. Owing to illness in the personnel of the expeditions; to the European war, and other untoward circumstances only a part of these plans could be fully carried out, but the results are of sufficient importance to encourage further activity in the directions named.

The several expeditions and their results, briefly outlined, were as follows:

Ancient Man in Europe and Asia. Field work was done by J. Matiegka, head of the Anthropological Bureau of the Bohemian University at Prague, on the subject of neolithic and later prehistoric man in central Europe. Other explorations were carried on by K. Stolyhwo, head of the Anthropological Institute of Warsaw, in relation to: (a) ancient man of southwestern Russia; (b) ancient man of the Yenesei Valley,

Siberia. And a journey was made by me for the purpose of making a survey of the various well authenticated ancient skeletal remains of man in the Museums of Europe and of the sites of their discovery.

The direct results of these expeditions were the acquisition of a series of valuable specimens, including a trephined and mineralized neolithic skull in excellent state of preservation, and of valuable data which in part have already been published (1.) and in part are in preparation for publication.

The kourgans or burial mounds in northeaster Russia were found to range in age from the neolithic to the Scythic periods. They yielded some exceedingly interesting skeletal material of man as well as that of various animals, some of which are now extinct in these regions. The Yenisei caves, regrettably, gave few skeletal remains, though such could doubtless be obtained by further exploration; but they yielded objects of neolithic culture, which may be of value in future archeological comparion with the more eastern portions of Asia and possibly even with America. The examination of the ancient skeletal finds in Europe showed, besides a series of more or less doubtful specimens, a wealth of thoroughly authenticated material relating to man's descent, and substantiating his gradual evolution, during the Quarternary, from lower primitive forms.

Search in Asia for Traces of the Race that Peopled America. Besides the explorations in the Yenisei caves, above mentioned, two trips were made to northeastern Asia. The first of these, made by me, extended to the upper Yenisei and Scienga river territories and to outer Mongolia, while the second, by St. Poniatowski, head of the recently established Ethnological Institute at Warsaw, penetrated to the living tribes in the Primorskaia Oblast, Siberia. The results of these expeditions comprise anthropological data, a valuable series of photographs, and a collection of rare skeletal material. The evidence indicates that there still exist throughout extensive areas of northern and eastern Asia remnants of former prehistoric (rather than 'paleoasiatic') peoples closely resembling the American Indian in type, mentality and other important particulars. In southern Siberia, Mongolia, and the regions to the eastward, there are also extensive archeological remains in the forms of mounds and occupation sites, ranging in chronology from neolithic to historic times. The exploration of these has as yet scarcely been commenced, and may be expected, whe properly entered upon, to reveal details of the greatest consequence to American anthropology, for here somewhere must lie the remains, cultural and skeletal of the ancestors of those who peopled the American continent. (2.)

Comparative Study of Child Growth among Primitive Tribes. It was planned to conduct researches in this especially important field among the aboriginal Australians, the Negrito, the Afican Pygmies, the Zulu, the Eskimo, and the Chinese; but illness of the available explorers, the war in Europe, and other unforeseen conditions interfered with the proposed excursions to the Australians, Pygmies, and Chinese. The Negrito of the Philippines were studied by P. Newton, demonstrator in Anatomy of Georgetown University; and four hundred individuals, including many children, were measured. Particular care was taken to reach the full-bloods, which involved some perilous journeys. A series of photographs and some interesting skeletal remains were obtained, but casting became impossible, the dampness of the climate (thd journey had to be undertaken partly during the rainy season) being such that no plaster could be preserved in dry contition. The Eskimo of St. Lawrence Island, Alaska, were examined by Riley D. Moore, aid in the Division of Physical Anthropology of the National Museum; 180 individuals, including a good proportion of children and adolescents, were measured; 30 facial casts and numerous photographs were made; and an important collection of skeletal material was gathered. The data secured and the collections from this island are of particular interest as they relate to a group of people intermediary between the American and Asiatic Estkimo. Finally, an expedition, occupying fourteen months, was made by V. Shuck, an able anthropologist of Prague, to the Zulu, the Bushmen, and some British East Africa negroes, resulting in the acquirement of facial casts of 24 Zulus and 20 Bushmen, numerous photograpas and other material, and anthropometric observations on upwards of 800 children and adolescents of known age. The scientific data have already been partly utilized in charts for the Exposition, and are to be reported on as soon as conditions in Europe permit. They could form an excellent basis for eventual comparisons with observations of similar nature on the American negro, and also serve, of course, for the study of further contrasts or reemblances between the black and the white man. Duplicates of all the African measurements are preserved in the National Museum.

In addition to the above, the first four months of 1913 were spent by me on an expedition to Peru, the objects of which were to conduct a greatly needed extension of former anthropological explorations in

that country, and to obtain a collection of material for illustrating prehistoric aboriginal pathology and surgery. Considerable success was met in both directions. The anthropology of the coast was mapped out for the distance of approximately 600 miles, and some insight was obtained into that of the highlands. It was ascertained that important separate political and cultural coastal groups, such as the Chimú and the Nasca people, are no special units, anthropologically, but belonged to the same physical type as the rest of the coast population. The collections made on this trip, being selections from nearly 5000 burials, are especially valuable. Finally, the exploration made possible rich original exhibits at San Diego, covering practically the whole field of pre-Columbian Indian pathology, to which are added 60 crania showing all the forms of ancient Indian trephining. The general results of this expedition have already been published (3.), but the material collected offers a rich opportunity for further investigation.

Los Angeles Times, March 7, 1915, VI, 2:2. Historic battles - Lexington and Concord; Patriots' Day, Monday, April 19th, the 140th anniversary of the battles of Lexington and Concord.

San Diego Union, March 7, 1915, 1:4-5. Twelve platoons of mounted men from the cavalry camp in Balboa Park turned out yesterday morning at 9 o'clock and were reviewed by Admiral Thomas Benton Howard, commander of the Pacific fleet. The review took place just outside the Exposition grounds on Park Avenue, between Laurel and Upas streets. Admiral Howard and his officers watched the parading cavalymen from an automobile; details.

San Diego Union, March 7, 1915, 2:3. Nevada State Building opened.

San Diego Union, March 7, 1915, 8:1-3. Gleaned on Prado and Isthmus.

San Diego Sun, March 8, 1915, 3:2. The old Santa Fe station is being wrecked; the task was undertaken at an early hour this morning by the San Diego Wrecking Company; bits of glass from the stained glass windows in the tower are to be distributed by City Agent Hunt as souvenirs.

San Diego Sun, March 8, 1915, 7:1. Louisiana Day at Exposition.

San Diego Union, March 9, 1915, 1:3. Admiral Dewa, Japanese naval officer, and staff visited the Exposition.

San Diego Union, March 9, 1915, 4:3. D. C. Collier takes up practice in law court.

San Diego Union, March 9, 1915, 4:6-7. Exposition Excursions Number 7: A Walk to the Pepper Grove, by William S. Skilling.

San Diego Union, March 9, 1915, 4:6-7. Gleaned on Prado and Isthmus.

San Diego Union, March 10, 1915, 4:7-8. Exposition Excursions Number 8: Horticultural Work at Exposition, by C. R. Gorton.

San Diego Union, March 10, 1915, 11:1. Notables coming to San Diego Exposition; Railway and University Heads lured by charms of Southland; Governors plan trip; Senators, Congressmen and prominent professional and business men due.

San Diego Union, March 10, 1915, 11:2-3. Gleaned on Prado and Isthmus.

San Diego Union, March 10, 1915, 11:2. Curtis Company head arrives in San Diego; Exposition visited by well-known Easterners.

San Diego Union, March 10, 1915, 11:3. G. A. Davidson, Exposition president, will take vacation.

San Diego Union, March 10, 1915, 11:3. Exposition buildings to be open until six.

San Diego Sun, March 11, 1915, 1:5. Judge Puterbaugh ruled city ordinance prohibits jitney buses from stopping in the congested district for a longer time than is necessary to load and unload passengers.

San Diego Sun, March 11, 1915, 1:7. Rear Admiral Thomas Benton Howard assumed the rank of full admiral in the U.S. Navy on the afterdeck of the warship *Colorado* in San Diego harbor at 11:30 this morning.

San Diego Union, March 11, 1915, 14:1-2. Council rules B Street will be closed permanently: D. C. Collier says City should offer encouragement to corporations.

San Diego Union, March 12, 1915, II, 9:1. Arboriculturists will meet at Exposition; plans for beautification of San Diego will be discussed; mayor gives welcome; park building described by system head; Angelenos on program.

San Diego Union, March 12, 1915, II, 9:2-3. Skating carnival on Isthmus will enliven Saturday night; experts to give exhibition.

San Diego Union, March 12, 1915, II, 9:2-3. Gleaned on Prado and Isthmus.

San Diego Union, March 12, 1915, II, 9:3. Vermonters pledged to visit Fair in July; special day for natives of Green Mountain State will be held.

San Diego Union, March 12, 1915, II, 9:4. Plan to entertain visitors to Fair suggested; attorney proposes that State Societies of city act as hosts; outings contemplated; system would afford tourists good time at minimum cost.

San Diego Union, March 12, 1915, II, 9:5. Taxpayers favor city hall offer by John D. Spreckels.

San Diego Union, March 12, 1915, II, 9:5. Old Santa Fe Station nearing demolition.

San Diego Sun, March 13, 1915, 3:7-8. Publisher W. C. Bobbs suggested an annual fair to exploit products.

San Diego Sun, March 13, 1915, II, 7:1. Colonel Ed Fletcher announced that the direct highway from San Diego to Yuma by way of El Centro is in use; five or six miles of sand dunes planked; temporary road put through from El Centro and Holtville to Yuma.

San Diego Union, March 13, 1915, 1:4-5. Congressman Kettner brought delegation of congressman to visit Exposition; names given.

San Diego Union, March 13, 1915, 4:6. Taxis to be allowed in Exposition grounds after 6 in the evening if the driver has an annual parking ticket.

San Diego Union, March 13, 1915, 4:6. Governor Hammond of Minnesota asked to visit Fair.

Los Angeles Times, March 14, 1915, VI, 1:4-5. Flowers are features of an exquisite design; San Diego Exposition unique in its way to differentiate from San Francisco Fair; Scientific exhibits delight persons of learning; Story of California, past and present.

San Diego Union, March 14, 1915, II, 1:2. Princess Tsianina Redfeather, interpreter of Indian songs and descendant of Tecumseh, visited Exposition as guest of Gertrude Gilbert, who was in charge of music at Exposition.

San Diego Union, March 14, 1915, II, 1:4. Panamans ask to meet at Fair; use of New Mexico Building chapel offered Order.

San Diego Union, March 14, 1915, 8:1-3. Gleaned on Prado and Isthmus.

San Diego Union, March 14, 1915, 4:5-6. Exposition Excursions Number 9: The Maya Monuments, by Irving E. Outcalt.

San Diego Sun, March 15, 1915, 1:8. Lincoln Beachey, unfamiliar with monoplane, fell into San Francisco bay and drowned.

San Diego Sun, March 15, 1915, 6:2. Poet Edwin Markham to speak this afternoon at Exposition.

San Diego Sun, March 15, 1915, 6:3. Vice President Marshall, Secretary Lane, and Assistant Secretary of the Navy Franklin D. Roosevelt are due at Exposition about March 26.

March 16, 1915, Letter from Mack, Jenney and Tyler, Decorators, New York City, to Board of Park Commissioners: they put reredos, made of polychrome plaster, together for \$2,263.03.

San Diego Sun, March 16, 1915, 2:6. Wonderland Park and adjacent properties at Ocean Beach were sold at a trustees' sale today; C. H. Wagner purchased the park and Colonel D. C. Collier purchased the remainder of the properties for the Mission Bay Corporation, composed of creditors of the concern, for \$40,000. The Company also took over the Wonderland Park bonds.

San Diego Sun, March 16, 1915, II, 7:3. Promise speed in sheep-shearing contest at the Painted Desert tomorrow afternoon.

San Diego Sun, March 16, 1915, II, 7:4. Local organization to meet in Science of Man building tonight to consider preserving some of the Exposition buildings.

San Diego Sun, March 17, 1915, 2:6. James F. Brooks announced at meeting of the League for the Preservation of the Exposition Buildings that he had written to members of house and senate agricultural and military education committees in Washington, DC, regarding establishing a federal institution on Exposition grounds in 1916.

San Diego Sun, March 17, 1915, Saturday - Back County Day, Farm Bureau Day, Kern County and Orange County Day; April 1 set aside for dedication of Nevada building.

San Diego Sun, March 17, 1915, 2:6. Federal Use of Exposition site, plan of the League for the Preservation of the Exposition Buildings: James F. Brooks announced that through correspondence with members of the committee on agricultural and military education in both the house and senate at Washington, he had succeeded in interesting them in the matter of establishing a federal institution on the exposition grounds in 1916. . . . A committee of five was appointed to report a plan for permanent organization of the league. Among the speakers were Dr. Hewitt, M. T. Gilmore, Duncan McKinnon, W. W. Whitson, M. L. Ward, L. G. Jones, W. J. Mossholder, H. R. Ricknecker, Mrs. J. E. Jennison, Miss Lee.

San Diego Sun, March 17, 1915, II, 7:1-2. Big time at Exposition; record crowds are due.

San Diego Union, March 17, 1915, 11:1-3. Gleaned on Prado and Isthmus.

For the evening of Saturday, which is Farm Bureau Day, San Diego County Day, Orange Day, Kern County Day and the second day of the show of the San Diego Floral Association and on which day, it is predicted, all attendance records will be broken, a grand ball has been arranged in the auditorium of the Southern California Counties building.

Arrangements for the ball are not complete, but the of music will be furnished, and the ball is considered a fitting event for a celebration which undoubtedly will bring out thousands of Californians.

Between 1 and 2 p.m. oranges will be given away to callers at the Southern California Counties building, the San Joaquin building, the Kern and Tulare building. H. B. Gurley, secretary of the Southern California Counties commission, expects to give away 4,000 oranges from the Southern California Counties building alone.

A carload of wild flowers gathered by schoolchildren of Kern County will arrive the day before, and visitors at the building will be given bouquets of wild flowers. Many other features have been arranged at county and state buildings, and it is expected that a number of free attractions will be given on the Isthmus during the afternoon and evening.

Because of the many features for Saturday afternoon, the pipe organ recital by Dr. Humphrey J. Stewart will be given at 3:30 instead of 2:30, the regular time.

The San Diego Floral show, given under the auspices of the San Diego Floral Association, beginning Friday at the California Quadrangle will be the best exhibition yet given by the association, claim the members.

There are by far more entries than at other shows and growers from outside the city are sending exhibits. Some of the exhibits are being made by Los Angeles, Pasadena and Imperial Valley growers. Many entries are being made by amateurs for whom there are awards, just as for the professional growers.

To R. Reers Loos belongs the honor of having landed for San Diego and the Panama-California Exposition an excursion of 600 members of the American Insurance Union of Columbus, Ohio, which will come to California in July. According to George W. Hogias, secretary of the organization, the excursionists will come in a special train and will pass an entire day in San Diego.

When Loos heard sometime ago that the organization was to make a trip to the Pacific coast, he immediately got into communication with friends who are members of the society. Through them those who were arranging the route were influenced to include San Diego.

Julius Wangenheim, president of the Bank of Commerce & Trust Company, received a letter yesterday from J. W. Butler, manager of the Texas Bankers' annual tour in which it was announced that the

Texas bankers will be in San Diego June 8. The bankers will come in a special train and it is expected that at least 150 will make the trip on which stops will be made in twelve states and which will last twenty-three days.

Souvenir coins which bear a picture of Uncle Sam on one side and the Panama canal on the other are being manufactured in the Commerce and Industries building at the United States Treasury exhibit. The machine on which they are made is capable of turning out 90 coins per minute.

The design of Uncle Sam was designed by Charles E. Barber of the Philadelphia mint from drawings made by Clifford Berryman, cartoonist of the **Washington Star**, the man who created the Teddy Bears, James Fitzgerald, is in charge of the press, which has been in operation since 1864. Later presses show no improvement over the one made that early, claim the experts. T. G. Helmerichs, who is in charge of the engraving department, has shown the work of his department at seven expositions. Charles S. Muir is in charge of the exhibit.

In honor of St. Patrick's Day, Dr. Humphrey J. Stewart will render a special program of Irish music during this pipe organ recital this afternoon. Dean Blake, who has made himself popular with San Diego music lovers, will sing several Irish airs and Irish folk songs.

Residents of Pacific Beach are expected to turn out in large numbers for the celebration of Pacific Beach Day at the Southern California Counties building, March 18. A musical program will be given in the reception room of the Southern California Counties building and refreshments will be served. The hostesses will be Mrs. Thomas Davis, Mrs. F. L. Scripps, Mrs. E. F. Ravenscroft, and Mrs. C. B. Woodward.

John Toogood's bull is on his way to the Exposition, according to a letter received yesterday.

Toogood's bull is a freak. HE has migrated across the country with it, leading it from Florida across eight ranges of mountains and three deserts, say the letter. The animal has double shoulders, a double backbone and six legs. The two extra legs grow out of its shoulders, one on each side. One extra hoof is perfectly formed, the other being one-half hoof.

Toogood's bull is of aristocratic lineage, the parents being prize winning Holstein cattle. Toogood plans to exhibit the freak here.

San Diego Sun, March 18, 1915, II, 9:1. "Exposition charge" by barber was stopped; easterner pacified.

San Diego Union, March 18, 1915, 16:1. Orange growers to give away fruit at Fair; seven hundred souvenir boxes for one exhibit on way; large shipper active; enormous crowd expected during celebration of important day: Oranges sufficient for 700 souvenir boxes of California's best oranges are on their way to one exhibit alone at the San Diego Exposition for distribution Saturday, which is California Orange Day. This was yesterday's announcement by C. D. Boyer, manager of the Sutherland Fruit Company's display in the Varied Industries building.

Exactly how much fruit the California counties will have for distribution was not known last night, but in all probability it will be far in excess of the regular stock because there will be free distribution in small quantities at the Southern Counties, Sacramento Valley, San Joaquin Valley and Kern and Tulare Counties buildings, but although this will take place only between 1 and 2 p.m., the enormous crowd expected for the many events of the day doubtless will carry away several trainloads of fruit.

San Diego Union, March 18, 1915, 16:2-4. Indians claim sheep-shearing honors; redskins cheer as paleface draws blood; electric machine does double the work of old-fashioned clippers: While Miles A. Cooper, using a sheep-shearing machine of late model, sheared twice as many sheep as Ko-Wa-Ta, the Indian champion, who used the old-fashioned shears in the contest held at the "Painted Desert" yesterday, the Indians claim a victory for the old style for Cooper with his new-fashioned machine, drew blood, it is claimed.

So great was the interest of visitors at the Exposition in the sheep-shearing contest that it was decided to hold another Saturday afternoon between 2 and 3 o'clock.

The wool which was taken from the sheep will be carded by the Indians and made into rugs.

San Diego Union, March 18, 1915, 16:2. Hawaiian parade in streets, plan; Village is now under the management of Ernest Kaai: Saturday, March 20, will see a grand opening of the new order of affairs at the village. A grand parade during the day on the downtown streets of the city, a company of thirty people taking part: Hawaiian girls riding horseback. . . . At the conclusion of these festivities a grand prize would be given. After the downtown parade, Saturday, a similar and larger one will be given around the Fair grounds in the evening, a free concert on the Prado, songs that made Hawaii famous, both old and young taking part.

San Diego Union, March 18, 1915, II, 1:1. Exposition exhibit will be copied in Santa Fe; enthusiastic New Mexicans to reproduce handsome state building; excellent site offered; San Diego promised publicity by proposed erection of structure: Of far reaching importance to San Diego was the announcement made yesterday by Col. S. E. Koehler, who is in charge of the New Mexico building on the Exposition grounds, that the legislature of that state has made an appropriation of \$30,000 and that \$30,000 more would be raised by popular and private subscriptions, for the purpose of reproducing the present building in the city of Santa Fe as a perpetual monument to the enterprise of New Mexico and of the Panama-California Exposition.

"It would seem," said Koehler last night, "that the state of New Mexico not being content with honoring the memory of the Franciscan fathers and the conquistadors by reproducing the ancient mission on the rock at Acoma in San Diego, had decided to perpetuate the memory of that achievement and thereby bind the two states with something more enduring than sentiment by reproducing the San Diego building in Santa Fe, the capital of the state.

"This temple, when it is erected in the capital, will become a monumental lesson to future generations, a reminder of the glories of the past, and an incentive for the future as well, as part of the state museum."

In order to discuss plans for the building which will commemorate New Mexico's participation in the San Diego Exposition and to arrange means for raising the additional \$30,000, Hon. Frank Springer, New Mexico's most distinguished jurist and scientist, is now in the city. He will remain here for several days before returning to New Mexico.

Word was received yesterday that Mrs. L. Bradford Prince of Santa Fe has offered a site on Fort Marcy for the proposed building. The site is said to be an especially suitable one as it resembles the historic rock of Acoma on which stands the venerable mission church after which the Exposition building is modeled. Fort Marcy itself is historic and commands one of the finest views in the world. It is a veritable Acropolis and a wide road on an easy grade leads to the top so that it is less than ten minutes walk from the center of the city.

That the reproduction of the present building in the romantic city of Santa Fe will give this city valuable publicity for many years to come cannot be questioned. Yearly thousands of visitors register in the museum at Santa Fe, which is located at the Palace of the Governors. And when the present display of exhibits is returned to Santa Fe with the announcement that it was part of New Mexico's exhibit at the Panama-California Exposition, San Diego cannot but profit by the lasting publicity.

San Diego Union, March 18, 1915, II, 1:4. Duluth man exhibits apples at Exposition; former steel corporation official given credit for developing country: Chester A. Condgon of Duluth, Minn., formerly general counsel for the United States Steel Corporation, who is greatly responsible for the development and growth of the great Yakima valley fruit country, is in San Diego for an indefinite stay.

Some of the apples grown on the Condgon ranch are exhibited at the Northwestern apple exhibit in the food products division of the Varied Industries Building at the Panama-California Exposition. A. E. Smith is in charge of the exhibit and is proud of the showing made.

San Diego Union, March 18, 1915, II, 1:4. State Senator and Mrs. Aniceto Abeytla of Socorro county, New Mexico, arrived in San Diego yesterday for a week's visit to the Exposition. . . . It was partly due to his efforts that the state was enabled to be represented by such an imposing building.

San Diego Examiner, March 19, 1915, 2:4-5. Thought the old Santa Fe Station was lovely.

San Diego Sun, March 19, 1915, 1:3-4. Monday will be Schumann-Heink Day at Exposition.

San Diego Sun, March 19, 1915, 1:5. Fine program at Exposition Saturday, March 21: California Orange Day, Farm Bureau Day, San Diego County Day, Kern County Day, San Diego Floral Association Exhibit.

San Diego Sun, March 19, 1915, 1:6-7. Plans are being made for opening of San Diego Stadium.

San Diego Sun, March 19, 1915, 1:8. Appeal is made for city park; more funds needed and commissioners urge passage of amendment No. 8 on Tuesday, March 23; provides a minimum of eight cents and a maximum of 12 cents on a \$100 valuation for parks of city, as against a minimum of five cents and a maximum of eight cents now allowed under the charter.

The Park Commission not only has the upkeep of the park outside the exposition grounds on its hands, but now the grounds inside as well. The exposition actually started out about \$250,000 in debt, making this necessary. If the Commission had to keep up only that part of the improvements outside the exposition, the amount now allowed for upkeep would suffice.

A couple of years ago, when the amount given the parks was exactly what it is now, only 50 acres were developed.

Today there are 600 acres beautified. More than 1,500,000 shrubs, trees and plants have been planted; some 300,000 of them were planted last year alone. Forty-five acres of lawns have been created and roads throughout the park improved.

About \$180,000 has been spent in the beautification of the park grounds.

At present the further development of the 1400-acre park is not contemplated --- it is merely desired to keep the park from "going back."

The Chamber of Commerce today issued a statement endorsing Amendment No. 8. The Chamber declared the park system was one of the city's greatest assets and said the increased appropriation was absolutely necessary.

San Diego Sun, March 19, 1915, 4:3-6. EDITORIAL supporting public playgrounds in city.

San Diego Sun, March 19, 1915, II, 11:1-2. Ranchers flocking to city; Back Country Day at Exposition tomorrow.

San Diego Sun, March 20, 1915, 1:5, 3:2-4. Back Country Day attracts many to Exposition; free oranges.

San Diego Sun, March 20, 1915, 2:2. Hawaiian Village center of attention today; Ernest K. Kaii, "Hawaii's Music Master" in charge.

San Diego Sun, March 20, 1915, 9:5. Oh, you Montana girls! Welcome to our Fair city.

San Diego Sun, March 20, 1915, 9:6. Fancy dancing at Cristobal tonight when Meiklejohn returns to San Diego with the popular dances.

San Diego Union, March 21, 1915, 4:1. One day officially set aside as Madame Schumann-Heink Day at Exposition.

San Diego Sun, March 20, 1915, II, 9:6. Fancy dancing at Cristobal tonight.

San Diego Union, March 21, 1915, 4:1. EDITORIAL: The Parks Must be Maintained.

San Diego Union, March 21, 1915, Women's Section, 8:1-3. Gleaned on Prado and Isthmus.

San Diego Sun, March 22, 1915, 1:4-5. About the Candidates: It strikes The Sun that Edwin M. Capps would be the most independent mayor that could be elected from the list before the voters. He went on record today as saying that personalities and a feeling for revenge or anything resembling that would not control him at all. And that is a mighty good stand to take. Add to that Capps' rugged honesty and experience, and the voters have before them a good candidate.

San Diego Sun, March 22, 1915, 1:4-5. Schumann-Heink Day at Exposition; ceremony at Organ Pavilion in afternoon; 6,000 school children to sing "America;" dinner at Cristobal Café in evening.

San Diego Sun, March 22, 1915, 1:6. Exposition has its first real fire - "Underground Chinatown" at Isthmus damaged by mysterious blaze at 10:30 a.m. today.

San Diego Sun, March 22, 1915, 14:1. Marston urges vote for Number 8 on the ballot to keep up fine park improvements: Balboa Park is by nature a wonderful piece of ground for the landscape architect, and the climate of Southern California is another great natural gift. To these have been added the skill of artists and gardeners, supported by the boundless enterprise of a people of imagination and devotion. In a few short years a transformation that we scarcely dared to think of has been wrought before us. Verily 'the desert has rejoiced and blossomed as the rose.'

San Diego Union, March 22, 1915, 4:4-5. Exposition Excursions No. 10: The Maya Monuments (second paper), by Irving E. Outcalt.

San Diego Union, March 22, 1915, 12:1, 12:1. 17,000 enter Fair in two weekend days, estimate; Tuskegee Institute Quintet gives old plantation melodies.

San Diego Sun, March 23, 1915, 3:3. Colonel D. C. Collier honored in back country; citizens of Ramona tender him luncheon; fine 10-acre park there; Collier brought Paul Thiene, landscape gardener of San Diego Exposition, to Ramona to superintend the work which will do much to make the park attractive..

San Diego Sun, March 23, 1915, 3:4-5. "I love them all," Schumann-Heink cries as 6,000 children sing for her.

San Diego Sun, March 23, 1915, 3:7-8. Plans for Stadium dedication May 31 are started; Carl Heilbron chairman of committee.

San Diego Sun, March 23, 1915, 6:2. Women greet Exposition visitors; fine reception tomorrow for residents of El Cajon, La Mesa, Bostonia, Encanto and other localities in blue parlor of Southern California Counties Building.

San Diego Sun, March 23, 1915, II, 7:1. Exposition attendance growing, report; Grand Army of the Republic Day and Federated Societies Day, Saturday, March 27: For the first 21 days in March, they say, the total was 100,238. This is a daily average of 4,776. The best attendance in this period was Saturday when 8,542 passed through the gates.

From March 7 to 13 inclusive the total is announced as 32,552, a daily average of 4,650. From March 14 to 20 inclusive the total was 37,296, making a daily average of 5,328. This is an increase of about 700 in daily average over the March 7 to 13 week.

The combination of G.A.R. Day and the outing of the Federated States' Society Saturday is expected to turn out another big exposition crowd.

Capt. S. W. Bell, who has charge of the G.A.R. program, has informed the exposition officials that the veterans are taking keen interest in it. The program will comprise organ music, singing and patriotic addresses. Judge E. E. Headee will be one of the speakers. In the singing and music the old songs of ? will be featured.

The veterans will begin their program with a campfire at 1:45 p.m. This will be at the organ rostrum. At this time the assembly will be sounded by a bugler. Tickets have been placed on sale at the San Diego Savings Bank and Brewster Hotel. They are also being sold from 8. a.m. to noon at the G.A.R. Hall, 815 5th Street.

The Federated States' Society will celebrate with a picnic in the pepper grove. The society's program will begin at noon.

San Diego Union, March 23, 1915. D. C. Collier for John Akerman as mayor of San Diego: Louis J. Wilde for John Akerman as mayor of San Diego.

San Diego Union, March 23, 1915, 1:3-8, 2:3-4. Famous Diva lifts wondrous voice in "America," Mayor O'Neill awards her honorary citizenship; Hopi Indians give Campfire dance during dinner at Cristobal Cage; Redskin contributes gift; Angelenos present during celebration.

When Duncan MacKinnon, superintendent of San Diego schools, forming a trumpet with his hands and shouting at the top of his voice from the stage of the Spreckels out-of-door pipe organ at the grounds of the Panama-California Exposition announced, "Madame Schumann-Heink will give a free concert for the school children at the Exposition grounds in June," pandemonium broke loose from the throats of 6,000 lusty-voiced boys and girls, who had gathered to honor the great diva at the first reception of the kind ever held in the city.

With the first tumult of applause which greeted the announcement, Madame Schumann-Heink's face took on a happy smile. She had been smiling before, but the smile with which she swept the cheering multitude was one of inward happiness --- a smile and happiness which came of promising something which would make others happy.

It was Schumann-Heink Day at the Panama-California Exposition and thousands had gathered to help the children do honor to the great singer. The great plaza before the organ was a swaying mass of humanity which crowded itself nearer and nearer the American flag-draped chair upon which she sat. The crowd was estimated at 20,000, and it is believed that this estimate was conservative.

The day's events were crowded with incidents of human appeal. It seemed that in the presence of the children and the bond of love which exists between them and Madame Schumann-Heink, man understood better his fellow man. It was a happy, joyous occasion, and one never to be forgotten by the children as well as thousands who craned their necks to gain a better view of the honored guest.

Fifty years hence, perhaps, some dignified business man with a shadow of gray over his temples will tell his grandchildren of a time at San Diego, when a little freckled-face lad, Madame Schumann-Heink kissed him in return of the bouquet of California poppies he handed her. And at the same minute, perchance, some motherly woman will tell, when asked for a bed-time story, of how Madame Schumann-Heink kissed her on both cheeks and gently twitched her ear before a vast throng at San Diego, oh, so many years ago!

Probably a but few functions has "America" been sung with more intensity of feeling than at the reception of school children to Madame Schumann-Heink. Accompanied by Dr. Humphrey J. Stewart on the great organ which seemed to quiver with the emotion it seemed to feel, the children sang as though inspired. When they realized that mingling with their volume of song was the great voice of Mme. Schumann-Heink, they were further inspired to a tremendous effort. There were reserved-looking men who knew they could not sing, but they felt bound to make a noise. Guards forgot their duty and joined in the singing, and newsboys forgot their papers in time to come in on "Let freedom ring."

When, after the singing, President G. A. Davidson stepped forward, there was a silence broken only by the whispering of a gentle breeze through the leaves of the trees. "You have honored us with your presence here," he said. "We want you to know that the honor you have bestowed on us is appreciated. We thank you for the privilege of making this Schumann-Heink Day at the Panama-California Exposition.

After the few words by President Davidson, Mayor O'Neill presented Madame Schumann-Heink with a scroll which makes her an honorary citizen, the first honor of the kind ever bestowed on any one by the citizens of the city, it is said. Mayor O'Neill expressed his pleasure in representing the people for the occasion and hoped that Madame Schumann-Heink might find happiness here for many years to come.

Dressed in a spring costume of pink, which matched perfectly the basket of sweet peas which she carried, little Ella Norine O'Neill, daughter of Mayor O'Neill, presented the flowers to the singer. Madame Schumann-Heink kissed the little girl and thanked her. Then a younger tot, Edwinna Pearl Clark, representing the school children of Kern county, presented a basket of wild flowers which had been picked by Kern county school children. Little Miss Clark also was kissed for her compliment.

The marine barracks band broke into "The Star Spangled Banner: and again 6,000 school children heard the powerful voice of the diva leading them in song.

After the numbers Superintendent MacKinnon announced that all the children were at liberty to leave the plaza and the grounds if they chose. Not a child moved. They were awaiting something, although they probably did not know what. Then Madame Schumann-Heink whispered something to MacKinnon and he announced the free concert in June. Thousands immediately joined in the cheers of the children. When MacKinnon asked for three cheers for Madame Schumann-Heink, the plaza was a veritable battlefield of noise which echoes and re-echoed from the corners of the buildings on all sides. The return compliment of Madame Schumann-Heink to the children brought them closer to her and hundreds of them refuse to leave their places even after she had left the stage.

With her during the exercises were John D. Spreckels, G. A. Davidson, Mayor O'Neill, Col. J. H. Pendleton, Capt. R. F. Fifenberick, W. B. Gross and Duncan MacKinnon. As she left the stage she took with her the American flag with which her chair had been decorated. When she placed it over her shoulder and graciously posed with the two flower girls as the target for hundreds of cameras, it was the signal for another burst of applause and was but another incident of human interest with which the events of the day had been punctuated.

Perhaps never in the history of the city has there been such a sight as was presented when Cabrillo bridge was lost in the mass of school children which crowded it while on their way to greet Madame Schumann-Heink. The bridge was covered by a solid mass of humanity --- youngsters out of school for a new lesson.

As the children passed the California Building, they were reviewed by Mme. Schumann-Heink and a party of Exposition officials.

Headed by the Marine Barracks and marching twelve abreast, it took at least fifteen minutes for the parade to pass. They were of all races and of all creeds. But each one knew that Mme. Schumann-Heink was to be at the California Building, and each one of them looked toward the front of the building and waved a hand as the singer was recognize.

As soon as the parade had passed, Mme. Schumann-Heink was taken to the Plaza de Panama, where she reviewed the United States marines at their daily drill. She had great praise for the work of the officers and men and heartily congratulated Colonel Pendleton.

At the Southern California Counties building, a reception and tea was given for the party. This was preliminary to the informal dinner last night at the Cristobal Café, which was the final event of Schumann-Heink Day.

The celebration was a great success and the largest crowd, excepting the opening night, of the year took advantage of the opportunity of seeing both Mme. Schumann-Heink and the Exposition.

At the dinner last night Hopi Indians from the Painted Desert gave their campfire dance, which was enthusiastically received. Little Da Don, four years old, and whose name really means "tall tree," astonished Mme. Schumann-Heink by giving her a silver bracelet. Performers gave several exhibitions of the newest dances, and the guests danced between the exhibitions.

L. E. Behymer of Los Angeles brought a party of musicians and composers from Los Angeles to attend the reception. Among them, Miss Cora Foy, president of the Los Angeles Women's Symphony Orchestra; Mrs. W. Hamilton Cline of the music section of the Eboli Club; Mrs. Jonathan Bixy of the Long Beach Eboli Club.

Another conspicuous attendant was Carrie Jacobs Bond, the composer. Others present were: Mr. and Mrs. Hans Schumann-Heink, Miss Marie Schumann-Heink and her fiancée, Mr. Hubert Guy, Mrs. and Mrs. J. D. Spreckels, Mr. and Mrs. Frank Belcher, Jr., Mr. and Mrs. Julius Wangenheim, Mr. and Mrs. H. H. Jones, Mr. and Mrs. George Burnham, Mr. and Mrs. H. Timken, Mayor and Mrs. Charles O'Neill, Mr. and Mrs. Ivor N. Lawson, Mrs. George McKenzie, Mr. William B. Gross, Dr. Humphrey J. Stewart, Miss Gertrude Gilbert, Mr. and Mrs. A. S. Bridges, Mr. and Mrs. C. P. Douglas, Col. and Mrs. J. H. Pendleton, Dr. H. M. Kutchin, Gen. and Mrs. John McClellan, Rear Admiral and Mrs. Uriel Seabee, Mr. and Mrs. Frank Von Tesmar, Dr. and Mrs. H. P. Newman, Mr. and Mrs. Arthur Marston, Capt. and Mrs. Frank Spalding, Mr. and Mrs. L. J. Wilde, Dr. and Mrs. F. H. Mead, Mr. and Mrs. E. O. Hodge, W. F. Beardsley, D. M. Barteau, H. O. Davis, C. W. Fox, F. W. Scripps, C. W. Holzwasser, Duncan MacKinnon and others.

San Diego Sun, March 24, 1915, 1:6. New plan of city government to be tried out locally; amendment for a "manager of operation" authorized by people in yesterday's primary election.

San Diego Sun, March 24, 1915, 1:6. Amendment No. 8 carried in primary election March 23.

San Diego Sun, March 24, 1915, 1:7. Race on between Akerman and Capps for mayor; O'Neill, seeking reelection, ran third.

San Diego Sun, March 24, 1915, 2:5. Universal Manufacturing Company to make comedy film at Exposition tomorrow morning.

San Diego Union, March 24, 1915, II (Classified) 1:2-4. Citizens prevent sale of park lands. Beauty and value gradually realized; reproduction of original petition signed by San Diego citizens asking the State Legislature not to repeal the act setting aside certain municipal lands for park and burial purposes.

San Diego Union, March 24, 1915, II (Classified) 1:2-4. Provision for pleasure ground appreciated by champions who brought about conclusive action in State Legislature to preserve tract; compiled from Smythe's **History of San Diego**.

San Diego Sun, March 25, 1915, 1:4. Vice President Marshall to enter harbor on warship *Paul Jones* according to telegram from Franklin D. Roosevelt, Assistant Secretary of the Navy, received today; plan subject to change; Marshall and Roosevelt to speak at Exposition Monday.

San Diego Sun, March 25, 1915, 4:3. Miss Hornbuckle, teacher at Lincoln School, writes about Exposition: All Knockers Should Become Boosters.

San Diego Sun, March 25, 1915, 12:1-2. Exposition events keep officials busy at Magic City in park.

San Diego Sun, March 26, 1915, 8:1. Grand Army of the Republic boys to gather at Exposition; great times are planned for tomorrow at Veterans' campfire at Fair; will assemble at the Organ Pavilion rostrum at 2:30 p.m. and be introduced to Secretary of the Interior Franklin K. Lane; picnic of Federated State Societies in Pepper Grove at 12:30 p.m.

San Diego Sun, March 26, 1915, 8:4. When city tax budget is made up, it will include about \$30,000 for city maintenance of streets and grounds at Panama-California Exposition.

Los Angeles Times, March 28, 1915, VI, 1:6-7. New Mexican exhibit rich in traditions; relics of ancient past teach lessons of Indian life and customs; modern Americans permitted glimpses into distant days when Southwest teemed with other peoples; educational conditions reversed in mission which once taught red men of white brothers, by Mary S. Gulliver.

San Diego Union, March 28, 1915, 4:6. D. C. Collier made chairman of general committee to elect John Akerman mayor.

San Diego Sun, March 29, 1915, 1:2-3, 3:7-8. Vice-President Thomas R. Marshall honored as great pageant leads way to Exposition gate; stayed at U. S. Grant Hotel; reviewed troops at Plaza de Panama.

San Diego Sun, March 29, 1915, 3:8. Electriquette takes eye of vice president

San Diego Sun, March 29, 1915, 2:6. Akerman, candidate for mayor, denies he has slated H. O. Davis or Frank P. Allen, Jr. for city manager.

San Diego Union, March 29, 1915, 1:1. Vice President and Mrs. Thomas Marshall visited Exposition as representatives of President Woodrow Wilson; the President's message is "keep peace with world;" Marshall recommends firing line for those favoring war, by William Mountain.

San Diego Union, March 29, 1915, 2:2-3, 3:3. Roosevelt says full Atlantic fleet coming to San Diego; U.S. will build two dirigibles, by B. H. K. Morin: San Diego is to receive the Atlantic fleet in its entirety, following its passage through the Panama Canal in July, while the port may also see the establishment of a base for Navy dirigibles according to a statement made last night by Franklin D. Roosevelt, assistant secretary of the Navy.

Roosevelt, looking just as boyish as when he first visited San Diego a year ago, entered the harbor on the torpedo destroyer *Paul Jones* at sunset last night. Before embarking on the speed boat at San Pedro, the assistant secretary of the navy, accompanied by Livingstone Davis of Boston and Owen Winston of Bernardsville, New York, went for a frolic in the depths of the Pacific as the guests of Lt. G. E. Davis, commander of the submarine K-7.

"It was great," said Roosevelt as he enthusiastically recounted his experiences in the submersible. "We all got into dungarees and felt perfectly at home for the first time since we left Washington."

Roosevelt said he never before had the pleasure of making a dive in one of the K boats and the opportunity offered at San Pedro, even though it was Palm Sunday, was too great to resist. For thirty minutes of the hour voyage on K-7, Roosevelt was under water at a depth of more than thirty feet.

Although a choppy sea prevailed yesterday afternoon the *Paul Jones* plowed through the waves at an eighteen-knot clip. The destroyer hove in sight at 5:45 o'clock and as she swung gracefully past the bunker's wharf, Admiral T. H. Howard's steam barge went alongside to take Roosevelt and his friends to the landing near the barge office.

As Roosevelt stepped ashore, he was greeted by President G. Aubrey Davidson of the Exposition; Colonel J. H. Pendleton; Capt. G. H. Lyman, USMC, aide to vice president Thomas Marshall; Lt. D. M. Randall, marine aide to the assistant secretary of the Navy; Capt. Arthur Polilan (?) of the First Cavalry, military aide to the vice president; and Capt. R. P. Rifenerich, military aide to the president of the Panama-California Exposition.

In entering the lobby of the U. S. Grant Hotel, Roosevelt sighted Mr. and Mrs. Vincent Astor. He greeted them both warmly. Later the assistant secretary of the Navy was taken to the armored cruiser *Colorado* where he dined with the wardroom officers.

In discussing the coming of the Atlantic fleet, Roosevelt declared that unless the exigencies of the service called the vessels to other waters, the armada would come to the Pacific coast early in July. He said that the fleet would not be split, but would call at San Diego in its entirety.

The establishment of a base for dirigibles for which the Navy Department has just asked bids for two of this type of aircraft is still under consideration by the Navy authorities according to Roosevelt. The Department's attitude will be determined, Roosevelt said, on bids received from American manufacturers of dirigibles.

Mrs. Roosevelt did not make the ocean voyage with her distinguished husband. She came with the other women of the vice-presidential party on the 12:40 train.

San Diego Union, March 29, 1915, 4:4-5. EXPOSITIONS EXCURSIONS NUMBER ELEVEN; the Mohave Indians, by John P. Harrington

The Mohave collections exhibited at the Indian Arts building are peculiarly interesting as they do the life of one of the largest and most primitive tribes still left in California, and one whose habitat borders on San Diego county.

The Mohave Indians call themselves Hamakave, an ancient name of obscure etymology, of which "Mohave" is a corruption. The present population is about 1500, but a hundred years ago they numbered 3000 or more. They believe that they have lived in the region which they now occupy --- the Colorado River valley about Needles, Cal., and Parker, Ariz. --- ever since the flood.

The Mohave house is a mound-shaped structure, twenty or thirty feet across and almost six feet high. It is built of cottonwood posts and willow poles, thatched with arrow-weed and then covered with earth. The door, always oriented to the south, is closed by a curtain of willow bark. At the top of the house is a smoke-hole. Near this smoke-hole on the roof is a favorite place for Mohave dogs to lie. In this house the Indians slept, lying on the sand. From October to May a fire was kept in the house all night. In the mosquito season a smudge of arrow-weed made in the house in the evening increased the comfort of sleepers. In summer the people often slept outside the house, sometimes in brush shelters the shape and size of the top of an emigrant wagon. See the specimen.

Well Constructed

A Mohave well has been constructed at the exhibit. The soil is sandy in the Mohave valley and water is only a few feet below the surface. These wells were constructed for obtaining water for household purposes, slough water being considered too filthy and river water too muddy for drinking and cooking.

An important food of the Mohave was mesquite. The bean-like fruit of these trees was gathered in summer and fall. This work fell to the women, who used a long arrow-weed or willow hook for pulling down branches so that they could pick them, and large conical burden baskets made of sticks and string for bringing the mesquite beans home. The beans were stored in large cylindrical basket granaries woven of arrow-weed and supported on frameworks to keep them off the ground. As needed for food, the beans were pounded up in a mortar made of sections of the trunk of a cottonwood tree, which was sunk in the ground so

as to hold it steady. From the beans bread and mush were prepared. Mortars also were made of arrow-weed stalks, securely lashed together in a basket shape and sunk into the ground.

Mush was cooked in pottery ollas supported over the fire by three pot-rests and stirred with a mush-stirrer made by tying together three small sticks side by side. Food was eaten with the fingers. A mat of arrow-weed laid on the ground was sometimes used as an eating tray or table. When not in use the ollas were oftentimes inverted over a post or set inverted on top of the house.

Fish Roasted in Ashes

A long slender pole of willow was used for fishing. The fish were brought home on a string of willow bark or carried in a basket of willow withes slung over the man's back. The fish were roasted in the hot ashes or were boiled with mush.

Men wore a loin cloth woven of willow bark which came down farther behind than in front, thus resembling a tail. The dress of the women was also of willow bark and consisted of two flaps, one in front and one behind, supported by a big belt. The people usually went barefoot, but sandals of hide or fiber were frequently used. The Mohave were much given to body painting and the chin of every adult was tattooed.

The baby was kept tightly bound, body, arms and legs, to a cradle, from the time it was born until about two years old. It was believed that this was necessary in order to make the child grow up straight. The children certainly were very healthy in former times, and grew up to be finely built, erect men and women. The ingenious construction of the cradle, the coverlet of willow bark and the pad to keep the child's shoulders straight, will be understood more readily from seeing specimens than from a description here.

The little girls had their dolls of mud or wood, sometimes provided with miniature cradles.

Both men and women were accustomed to carry heavy burdens and water jars on the head. A ring of willow bark was used to protect the head and to form a flat rest for the thing carried.

Flutes were made of carrizo and were beautifully carved. They were used especially by young men when courting.

The Mohave bow was a powerful instrument of willow, four feet long, its length compensating for lack of sinew backing. The arrows were of arrow-weed or carrizo and were poisoned when used for war. The Mohaves were great hunters and expert in the use of the boomerang or throwing stick.

But it was in war that the Mohave have excelled most of all. They were the best and bravest fighters in the whole Southern California region. Tall men, powerfully built and fearless to a fault, they held their much-coveted river home for countless generations against all attacks of non-river Indians --- Desert Rats, as the Mohaves called them. By constant military expeditions the Mohave have succeeded in routing whole tribes of these desert Indians, driving them far across country.

Medicine Men Murdered

The medicine men provided the mysterious background of Mohave life, corresponding to our background of science and religion. He learned long songs and rites and much curious knowledge, prayed, had visions and in dreams had revelations from God (Matevilya) and God's son (Mastambo). Above all, he doctored the sick, who were usually brought to the medicine-man's house. For carrying a sick man a ladder-like stretcher with arrow-weed slats was employed. Medicine men were supposed to be not only able to cure, but also to cause sickness, and they were not infrequently murdered for suspected witchcraft.

When a person died the relatives and friends assembled, and there was much crying, embracing of relatives and preaching. The body was cremated on a pyre of mesquite wood amid a circle of grieving friends. The spirit was believed to go west to the Happy Hunting Grounds.

San Diego Sun, March 30, 1915, 7:1. Both Vice President Marshall and Assistant Secretary of the Navy Roosevelt were delighted with the Exposition and praised it lavishly in speeches at the Exposition late yesterday. Roosevelt said he rejoiced that San Diego is the first port of call for war craft via the canal and predicts the further development of San Diego harbor by the Navy Department. A supply depot for the Navy may be installed here, as reported months ago.

San Diego Sun, March 30, 1915, 7:8. Last call for Exposition tickets; price is \$10 and is good for as many admissions as the holder wished until the Exposition closes.

San Diego Sun, March 30, 1915, 14:1-3. Olive Day at Exposition tomorrow.

San Diego Union, March 30, 1915, 1:1-2, 3:1-4. Cheers ring as pageant passes U.S. officials; Marshall and Roosevelt extol marvels of Fair; Vice President declares the exposition is a service to the American people; he says humanity will benefit by the lessons taught; the Navy Secretary rejoices that San Diego is the first home call port for water craft via the Panama Canal.

San Diego Union, March 30, 1915, 2:2-3. Hearts of visitors won by San Diego Exposition: Vice President Marshall "The San Diego Exposition is Old Spain reproduced on the hills of one of the most beautiful cities in the world. . . . Today I stood in a dream city, and the memory will never fade from my mind."

Franklin D. Roosevelt: "This Exposition is an Exposition with a soul. It takes one away from the great fairs of maddening crowds. A year ago, on my last visit to San Diego, I walked through this park. The work for your beautiful Exposition was underway. You have transformed wild fields into a garden spot. I have seen many cities and several Expositions, but for beauty the San Diego Exposition surpasses them all."

San Diego Union, March 30, 1915, 3:4-5. Vice Presidential party guests at brilliant Cristobal dinner; dazzling uniforms and sparkling gowns grace function given by Davidson; Hawaiian songs entertain noted visitors.

San Diego Union, March 30, 1915, 4:4. Mayor astonishes candidates by resignation; both nominees declare O'Neill's action will handicap successor.

San Diego Union, March 30, 1915, II, 1:4. Navy Department plans to build supply depot; Roosevelt says San Diego will be center of battle practice; shipyard not planned; each militia organization will be lent two dirigibles for drilling.

"When the Atlantic fleets comes to San Diego," said Roosevelt, "it is in the vicinity of San Diego where the bluejackets and marines will be drilled in landing boats and field pieces through the surf, in pontoon building sub-caliber work, individual and divisional battle practice in seamanship drills, small arm target practice, and in the other duties incident to making the men who man our ships the finest and most efficient sailor men in the world. Here also will be the principal liberty port of the men of the fleet while they are engaged in drill work on the southern drill grounds."

San Diego Sun, March 31, 1915, 1:5. Boosters plan Exposition trip to San Francisco on April 21, San Diego Day at the northern exposition.

San Diego Sun, March 31, 1915, 3:3. Nevada building to be dedicated Friday, April 2.

San Diego Union, March 31, 1915, 1:5-6. Irvin S. Cobb, humorist, newspaperman and war correspondent, calls San Diego's Fair "Little Gem": "Your exposition," here Cobb threw off his coat, sat down abruptly and leaned forward, talking earnestly, "Your exposition is talked of all over the east as a little gem; as an exposition that will be a wonderful success, even if it doesn't make a cent; as a Fair that will bring the admiration of the world to you, not only for your pluck in building it, but because it is an artistic achievement that will make the east, which thinks it has a stranglehold on everything in the art line, sit up and take notice.

“The thing which it me between the eyes when I went up to the Exposition today was that the men who built your Fair have succeeded in creating an atmosphere of restfulness, an air of contentment that is exceedingly welcome to the visitor who comes from a noisy city. To clutch an elusive thing like that and to convert it into building and walks, lines and columns, wood and tower, is one of the most difficult things in architecture --- it's breathing spirit into inanimate objects. The Fair, in addition to being beautiful, is compact. You don't have to wander all over a hundred and fifty-five acres to see what is there. Maybe that doesn't mean much to you, but if you will ever get so you sit in your own lap, like I do, you'll appreciate what a saving it is.”

San Diego Union, March 31, 1915, 4:1. EDITORIAL: The Naval Program Here: Assistant Secretary of the Navy Franklin D. Roosevelt's clear statement of the Navy Department's plans with reference to San Diego harbor is very gratifying to the people of this city. It is the more satisfactory because it is the first authoritative avowal of the official program for the more extensive use of the harbor for naval purposes. In brief, it is the purpose to establish here a great depot for general storekeepers' supplies, ammunition and other essentials for the fleet. There will probably be a repair shop also. Warships of all classes, too, will rendezvous here for practice and drills. As a result San Diego during many weeks each year will be crowded with bluejackets and marines on shore leave. In a work, the Department's plan recognizes this port as the only Southern California one that is suitable for the Navy's purposes.

Of course, it could be wished that the Assistant Secretary had not negated the idea of a dry dock being established here. However, if the plan for a repair shop should be carried into effect, very possibly the dry dock will be added in time. A repair shop is a good beginning and may grow into a large plant. It any event there is every assurance now that San Diego will soon become a more important port from a naval viewpoint than ever before.

Proceedings National Academy of Science, USA, 1915, April, 1(4): 235-238.

SOME RECENT ANTHROPOLOGICAL EXPLORATIONS

by Ales Hrdlicka

DIVISION OF PHYSICAL ANTHROPOLOGY, U. S. NATIONAL
MUSEUM, WASHINGTON

Presented to the Academy, March 2, 1915

In 1912 an arrangement was entered into by the Smithsonian Institution and the Panama-California Exposition at San Diego, by which it became possible to send out jointly a number of anthropological expeditions for the purpose of furnishing the Exposition with original material for its exhibits, and of serving the Smithsonian Institution and the science of anthropology by advancing knowledge in directions in which progress was especially desirable.

The objects particularly aimed at in the latter respect were the promotion of research into man's antiquity; the survey of certain parts of

northern and eastern Asia in quest of possible traces of racial connection with America; and the accumulation of reliable data on child development in certain primitive races under widely different environments. Owing to illness in the personnel of the expeditions, to the European war, and to other untoward circumstances only a part of these plans could be fully carried out; but the results are of sufficient importance to encourage further activity in the directions named.

The several expeditions and their results, briefly outlined, were as follows:

Ancient Man in Europe and Asia. Field work was done by J. Matiegka, head of the Anthropological Bureau of the Bohemian University of Prague, on the subject of Neolithic and later prehistoric man in central Europe. Other explorations were carried on by K. Stolykwo, head of the Anthropological Institute of Warsaw in relation to (a.) ancient man of southwestern Russia; (b.) ancient man of the Yenesei Valley, Siberia. And a journey was made by me for the purpose of making a survey of the various well-authenticated ancient skeletal remains of man in the Museums of Europe and of the sites of their discovery.

The direct results of these expeditions were the acquisition of a series of valuable specimens, including a trephined and mineralized Neolithic skull in excellent state of preservation, and of valuable data which in part have already been published^[i] and in part are in preparation for publication.

The kourgans, or burial mounds in northeastern Russia, were found to range in age from Neolithic to the Scythian periods. They yielded some exceedingly interesting skeletal material of man as well as that of various animals, some of which are now extinct in these regions. The Yenisei caves, regrettably, gave few skeletal remains, though such could doubtless be obtained by further exploration; but they yielded objects of Neolithic culture, which may be of value in future archaeological comparisons with the more eastern portions of Asia and possibly even with America. The examination of the ancient skeletal finds in Europe showed, besides a series of more or less doubtful specimens, a wealth of thoroughly authenticated material relating to man's descent, and substantiating his gradual evolution, during the Quarternary, from lower primate forms.

Search in Asia for Traces of the Race that Peopled America, Besides the explorations in the Yenisei caves above mentioned, two trips were made to northeastern Asia. The first of these, made by me, extended to the upper Yenisei and Selenga river territories and to outer Mongolia, while the second, by St. Poniatowski, head of the recently established Ethnological Institute at Warsaw, penetrated to the living tribes in the Primorskaia Oblast, Siberia. The results of these expeditions comprise anthropological data, a valuable series of photographs, and a collection of rare skeletal material. The evidence indicates that there still exists throughout extensive areas of northern and eastern Asia remnants of former prehistoric (rather than 'paleoasiatic') peoples closely resembling the American Indian in type, mentality and other important particulars. In southern Siberia, Mongolia, and the regions to the eastward, there are also extensive archaeological remains in the forms of mounds and occupation sites, ranging in chronology from Neolithic to historic times. The exploration of these has as yet scarcely been commenced, and may be expected, when properly entered upon, to reveal details of the greatest consequence to American anthropology, for here somewhere must be the remains, cultural and skeletal, of the ancestors of these who peopled the American continent.^{ii[iii]}

Comparative Study of Child Growth among Primitive Tribes. It was planned to conduct researches in this especially important field among the aboriginal Australians, the Negrito, the African Pygmies, the Zulu, the Eskimo, and the Chinese; but illness of the available explorers, the war in Europe, and other unforeseen conditions interfered with the proposed excursions to the Australians, the Pygmies, and Chinese. The Negrito of the Philippines were studied by P. Newton, demonstrator in anatomy of Georgetown University; and four hundred individuals, including many children, were measured. Particular care was taken to reach the full-bloods, which involved some perilous journeys. A series of photographs and some interesting skeletal remains were obtained, but casting became impossible, the dampness of the climate (the journey had to be undertaken partly during the rainy season) being such that no plaster could be preserved in dry conditions. The Eskimos of St. Lawrence Island, Alaska, were examined by Riley D. Moore, aid in the Division of Physical Anthropology of the National Museum; 180 individuals, including a goodly portion of children and adolescents, were measured; 30 facial casts and numerous photographs were made; and an important collection of skeletal material was gathered. The data secured and the collection from this island are of particular interest, as they relate to a group of people intermediary between the American and Asiatic

Eskimo. Finally, an anthropological expedition, occupying fourteen months, was made by V. Shuck, an able anthropologist of Prague, to the Zulu, the Bushmen, and some British East Africa negroes, resulting in the acquirement of facial casts of 24 Zulus and 20 Bushmen, numerous photographs and other material, and anthropometric observations on upward of 800 children and adolescents of known age. The scientific data have already been partly utilized in charts for the Exposition, and are to be reported on as soon as conditions in Europe permit. They should form an excellent basis for eventual comparisons with observations of similar nature on the American Negro, and also serve, of course, for the study of further contrasts or resemblances between the black and white man. Duplicates of all the African measurements are preserved in the National Museum.

In addition to the above, the first four months of 1913 were spent by me on an expedition to Peru, the objects of which were to conduct a greatly needed extension of former anthropological explorations in that country, and to obtain a collection of material for illustrating prehistoric aboriginal pathology and surgery. Considerable success was met in both directions. The anthropology of the coast was mapped out for the distance of approximately 600 miles, and more insight was obtained into that of the highlands. It was ascertained that important separate political and cultural coastal groups, such as the Chimu and Nasca people, were no special units, anthropologically, but belonged to the same physical type as the rest of the coast population. The collections made on this trip, being selections from nearly 5000 burials, are especially valuable. Finally, the exploration, made possible rich original exhibits at San Diego, covering practically the whole field of pre-Columbian pathology, to which are added 60 crania showing all the forms of the ancient Indian trephining. The general results of this exposition have already been published,^{iii[iii]} but the material collected offers a rich opportunity for further investigation.

San Diego Herald, April 1, 1915, 1:1-2. Assistant Secretary of the Navy Franklin D. Roosevelt accords interview, by C. R. Miller: I had an interview with Assistant Secretary of the Navy Franklin Roosevelt on the land title situation here and he allowed me thirty minutes of his time. I asked him if there was any truth in the statement which has appeared from time to time in the Spreckels newspapers, which stated that the United States government would buy North Island for two or more millions. Roosevelt said that the government would certainly like to establish some kind of station here, but that the government would not buy North Island at any price while the title was clouded and that it would never consider paying a million or even a half million dollars for a site for a station here.

Mr. Roosevelt said that he was very much interested in the documents which I sent him on the title of North Island and he said that the government would certainly like to establish a permanent aviation station here, and a navy and marine supply base here. "Keep me in touch with your work on this land problem, and write me personally so that your letter will not be stopped by clerks in the department," said the assistant secretary of the navy.

When I explained to him, that I wanted to get back North Island and offer it to the United States government for uses as a navy and aviation base, Mr. Roosevelt said that such action would very materially aid this city by inducing the government to locate here many things which the high price of land at present prevents. After talking with Mr. Roosevelt, I am more than ever convinced that the greatest boost that could be given to this city would be to get back North Island and give the United States all or any part of it for use as a naval base.

I am convinced that even Mr. Spreckels would profit by such an arrangement as he must make money if this community gets such a government station here.

San Diego Herald, April 1, 1915, 1:2. Vice President Marshall remains on U.S. side while party visits Tijuana.

San Diego Herald, April 1, 1915, 1:3. At the Exposition: Four-hundred school teachers of Riverside County will gather at the San Diego Exposition Monday and begin a 5-day session of their annual Institute. . . . Most of the meetings will be held in the Science and Education Building.

San Diego Sun, April 1, 1915, 2:3. Madame Naui, Hawaiian Bernhardt, here at Hawaiian Village; exponent of the old music of her country.

San Diego Sun, April 1, 1915, 2:8. Booster trip plans ready; Superior Judge W. A. Sloane to give San Diego County address at Panama-Pacific Exposition on San Diego Day, April 21.

San Diego Sun, April 1, 1915, 7:1-2. Giuseppe Creatore and his band to come; outdoor festivals planned; engaged for two weeks beginning April 24, with at least two concerts daily; other hours will be occupied by the 13th Artillery Band, 4th Marine Band, Spanish Band of Exposition and other musical organizations; Shakespearean week planned; dances on May Day; rose carnival in early July; today was April Fool's Day; musical concert arranged for Easter Sunday at Organ Pavilion: People's Chorus to sing Haydn's "Creation."

San Diego Sun, April 2, 1915, 1:8. Nevada building dedicated today.

San Diego Sun, April 2, 1915, 12:3. Stadium plans are discussed; great sport program assured for dedication on May 31.

San Diego Sun, April 3, 1915, 3:4. Days of '49 to open at Exposition; concession will show some of the life of the mining camp during the California gold rush; gambling games will be operated; there will be a bar and dance hall; patrons "will be able to get something a little stronger than water"; patrons will by 100 bucks in play money for \$1 in real money; the bucks will be accepted in payment for anything sold at the attraction.

San Diego Sun, April 3, 1915, 3:4. Nevada building dedicated yesterday by Governor Doyle of Nevada; description of ceremonies.

Los Angeles Times, April 4, 1915, VI, 1:4-5. Peace and quietude of "Dream City," Vice President Marshall charmed with beauties of Panama-California Exposition; gentle entertainment please, by Mary S. Gulliver.

San Diego Union, April 4, 1915, 1:1. Kansas dedicates state building at Exposition; speech-making and sunflower social feature opening exercises; pioneer woman talks; Glee Club music entertains; agricultural exhibits viewed.
